To be clear, it is possible that were a monopolist to embark on a concerted scheme of serial refusals to deal with rivals, that scheme or "course of conduct" could amount to a separate and independent violation of the *Sherman Act*. See *Microsoft., 253 F.3d at 78* (noting course-of-conduct theory without passing on its validity). Even if such a claim were cognizable, however, simply maintaining a policy of refusing to deal with rivals would not be enough. ***HN17***[] Rather, to be actionable, an unlawful refusal-to-deal scheme would have to be made up of refusals that were themselves independent violations of the *Aspen Skiing* test. See *Simon & Simon, PC v. Align Tech., Inc., No. 19-506, 2020 U.S. Dist. LEXIS 72499, 2020 WL 1975139, at *8 (D. Del. Apr. 24, 2020)* ("Plaintiff's characterization of [the defendant's] otherwise non-actionable refusals to deal as a 'scheme' do[es] not save its claims."); *Eatoni Ergonomics, Inc. v. Rsch. In Motion Corp., 826 F. Supp. 2d 705, 709-10 (S.D.N.Y. 2011)* ("[Plaintiff] **[**61]** does not, and cannot, cite any authority for the proposition that a series of unilateral acts that do not violate the antitrust laws may be aggregated into an unlawful 'course of conduct.'"), aff'd, *486 F. App'x 186 (2d Cir. 2012)*; *Masimo Corp. v. Tyco Health Care Grp., L.P., No. 02-4770, 2004 U.S. Dist. LEXIS 26916, 2004 WL 5907538, at *5-6 (C.D. Cal. June 10, 2004)* (explaining that a course-of-conduct liability theory cannot "allow for clearly legal acts to be thrown into the mix to bolster a plaintiff's antitrust case"). Otherwise, as several scholars have persuasively explained, monopolists might face liability for refusals to deal that are categorically protected from scrutiny for the policy reasons explained above. See Crane, 76 Antitrust L.J. at 666-69; Douglas H. Ginsburg & Koren Wong-Ervin, Challenging Consummated Mergers Under Section 2 (George Mason Univ. L. & Econ. Paper No. 20-14, May 2020), https://bit.ly/3wPRpnx. The FTC, therefore, cannot get anywhere by reframing Facebook's adoption of a policy of refusing to deal with all competitors as the execution of an unlawful scheme of monopoly maintenance. ***HN18***[] Rather, to be actionable, such a scheme must involve specific instances in which that policy was enforced (i) against a rival with which the monopolist had a previous course of dealing; (ii) while the monopolist kept dealing with others in the market; (iii) at a **[**62]** short-term profit loss, with no conceivable rationale other than driving a competitor out of business in the long run.

ii. Specific Refusals

The FTC, to be sure, has alleged several specific refusals to deal that in fact may meet those requirements. All such pleaded instances, however, took place in 2013. See Redacted Compl., ¶¶ 153-56. That fact is fatal to the agency's claim for injunctive **[*26]** relief under *Section 13(b)* here, regardless of whether those specific refusals to deal ran afoul of *Aspen Skiing*, because it means that no actionable violation is either ongoing or about to occur.

HN19[] *Section 13(b)* allows the FTC to "bring suit in a district court of the United States to enjoin" allegedly unlawful conduct only where it has "reason to believe . . . that any person, partnership, or corporation is violating, or is about to violate, any provision of law enforced by the [FTC]." *15 U.S.C. § 53(b)*. All agree that *Section 2* of the *Sherman Act* is such a provision. As the Supreme Court has recently explained, given that provision's requirement that the defendant "'is violating' or 'is about to violate' (not 'has violated')" the antitrust laws, it contemplates "relief that is prospective, not retrospective." *AMG Cap. Mgmt., LLC v. FTC, 141 S. Ct. 1341, 1348, 209 L. Ed. 2d 361 (2021)*; see also *FTC v. Credit Bureau Ctr., LLC, 937 F.3d 764, 774 (7th Cir. 2019)* **[**63]** ("*Section 13(b)* serves a . . . forward-facing role: enjoining ongoing and imminent future violations."); *FTC v. Evans Prod. Co., 775 F.2d 1084, 1087 (9th Cir. 1985)* (holding that *Section 13(b)* "contemplate[s] ongoing or future violations" and thus "an injunction will issue only if the wrongs are ongoing or likely to recur"). As one court has put it, *Section 13(b)* therefore "does not permit the FTC to bring a claim based on long-past conduct without some evidence that the defendant 'is' committing or 'is about to' commit another violation." *Shire ViroPharma, 917 F.3d at 156*.

This constraint on Section 13(b)'s scope does not, it is worth noting, leave antitrust violations beyond the reach of the federal civil authorities. ***HN20***[] For one thing, the Department of Justice has broad authority to seek injunctive relief in antitrust cases. See *15 U.S.C. §§ 4*, *25*. And as to the FTC itself, "ever since [its] creation in 1914, it has been authorized to enforce the [law] through its own administrative proceedings" under Section 5(b) of the FTC Act. *AMG Cap. Mgmt., 141 S. Ct. at 1346*. *Section 5(b)* allows the agency to conduct such a proceeding against "person [who] has been or is" violating the antitrust laws. See *15 U.S.C. § 45(b)* (emphasis added). If it goes that route and prevails, the agency can then seek a court's help in enforcing its orders, including via monetary penalties, 15 U.S.C. § 57b, "mandatory injunctions[,] and such other further and equitable relief as [the court] deem[s] appropriate." Id. § 45(l). Thus, as Shire ViroPharma explained, "[i]f the FTC wants to [address] a past violation — where an entity 'has been' violating the law — it must use Section 5(b)." 917 F.3d at 159 (quoting 15 U.S.C. § 45(b)). Section 13(b), by contrast, mainly exists to "address[] a specific **[**64]** problem, namely, that of stopping seemingly unfair practices" (including antitrust violations) that are ongoing or about to occur "from taking place" until the Commission can complete an adjudication. AMG Cap. Mgmt., 141 S. Ct. at 1348.

Here, given the Court's conclusions above, the FTC cannot use 13(b) to challenge Facebook's Platform-related conduct because it has not pleaded that any actual Section 2 violation is ongoing or about to occur. The closest the agency comes is its allegation that, "[h]aving suspended its anticompetitive platform policies [in December 2018] in response to anticipated public scrutiny, Facebook is likely to reinstitute such policies if such scrutiny passes." Redacted Compl., ¶ 149 (emphasis added). Even if the mere resumption of Facebook's no-dealing-with-competitors policies were itself unlawful — which, as just explained at length, it is not — that conditional and conclusory allegation would be insufficient to establish **[*27]** the requisite imminence. See, e.g., Shire ViroPharma, 917 F.3d at 153, 160 (finding allegation that "[a]bsent an injunction, there is a cognizable danger that [defendant] will engage in similar conduct" because it had the "incentive and opportunity" to do so "woefully inadequate to state a claim under Section 13(b)"). There **[**65]** are no facts alleged, moreover, suggesting that the antitrust "scrutiny" the company is facing is "about to" pass or indeed will pass at any time in the foreseeable future. Indeed, a quick glance at any newspaper yields the contrary conclusion.

The more fundamental problem, of course, is that Facebook would not only have to imminently reinstate its policies, but it would also have to imminently take the kind of further action that might come within Aspen Skiing: target its competitors with which it had a previous, voluntary course of dealing for API revocation in a manner that suggests predatory, short-term-profit-sacrificing behavior. The FTC has certainly not alleged that that specific sort of conduct is "about to" occur. Nor could it since, according to the Complaint, Facebook has not actually taken such an action in nearly eight years. See Shire ViroPharma, 917 F.3d at 160 (finding inadequate allegation that defendant would likely resume conduct where "complaint contain[ed] no allegations that [it] had engaged in [that behavior] in the five-year gap between the 2012 cessation . . . and the 2017 lawsuit"); cf. FTC v. AdvoCare Int'l, L.P., No. 19-715, 2020 U.S. Dist. LEXIS 213865, 2020 WL 6741968, at *5-6 (E.D. Tex. Nov. 16, 2020) (finding it "implausible" that defendant's twenty-year scheme of "past misconduct," which ended one year **[**66]** earlier, would recur and thus justify Section 13(b) injunction because the "channel[s] of misconduct [were] either permanently defunct . . . or reformed, lawful, and monitored for compliance").

The agency counters with an argument that is surprising in its breadth. Because the statute says that it may "bring suit" for an injunction "[w]henever [it] has reason to believe . . . that any person . . . is violating, or is about to violate" the antitrust laws, see 15 U.S.C. § 53(b), the FTC contends that the law "confers discretion" on it to decide if such "reason to believe" exists. See FTC Opp. at 41. The upshot, per the agency, is that its "'reason to believe' determination [cannot] be reviewed" on a motion to dismiss. Id. at 39.

The Court finds this position wanting. The agency's argument focuses on the statutory trigger for when it may "bring suit . . . to enjoin" antitrust violations. The question, however, is whether Section 13(b) empowers the agency, as opposed to a court, to decide whether the conditions for an injunction are actually met such that a decree should indeed issue. ***HN21***[] Whatever the law tells the agency about what it must believe before it may file suit, for the agency to actually succeed, **[**67]** it must convince the court to agree with it that a violation is either ongoing or about to occur and that an injunction is warranted. See Evans Products, 775 F.2d at 1087 ("[A]n injunction will issue [under Section 13(b)] only if the wrongs are ongoing or likely to recur."). It follows that the Rule 8 requirement that the FTC must "state a claim to [the relief that it seeks] that is plausible on its face" requires the agency to make a plausible showing that the defendant "is violating" or "is about to violate" the antitrust laws. Nothing in the text of the statute suggests otherwise. See Advocare, 2020 U.S. Dist. LEXIS 213865, 2020 WL 6741968, at *4 (agreeing with this approach); Shire ViroPharma, 917 F.3d at 159 n.17 (declining to address argument that FTC has "unreviewable discretion to file suit" because it was not raised below, but expressing view that it is "unpersuasive").

[*28] Even accepting the FTC's argument, the two cases it cites — only one of which really embraces its "internal standard argument," *FTC v. Hornbeam Special Situations, LLC, 391 F. Supp. 3d 1218, 1223 (N.D. Ga. 2019)* — still appear to have required the agency to "set[] forth at least some facts to support a reasonable inference that the [unlawful] behavior will reoccur in the future in the absence of . . . injunctive relief." Id.; see also *FTC v. Vyera Pharms., LLC, 479 F. Supp. 3d 31, 44 (S.D.N.Y. 2020)* (noting several facts alleged that supported a "'reason to believe' that the defendants [were **[**68]** then] engaging in violations"). Here, for the reasons given above, the Court would find that Plaintiff's Complaint does not clear even that somewhat lower bar.

In sum, then, while it is possible that Facebook's alleged scheme of revoking API access from competitor apps could form the basis of a plausible refusal-to-deal claim under *Aspen Skiing*, the Court need not address that question. Even assuming the answer is yes, injunctive relief is not available now for such a claim as a matter of law.

2. *Conditional Dealing*

Plaintiff gets no further by maintaining that Facebook's policies also violated antitrust rules against what they call "conditional dealing." FTC Opp. at 31. As an initial matter, the FTC is wrong to argue that a monopolist violates that so-called doctrine whenever it "induce[s] . . . trading partners or other firms not to compete with it . . . by conditioning access to some resource of the monopolist." Id. The main case they cite for that proposition, *Lorain Journal Co. v. United States, 342 U.S. 143, 149, 72 S. Ct. 181, 96 L. Ed. 162 (1951)*, says nothing of the sort. That is unsurprising, as such a broadly formulated rule would cover refusals to deal with competitors, thus contradicting the cases discussed above — such refusals can always be reframed as offers **[**69]** to deal only on the condition that the third party refrains from competing. See, e.g., Herbert Hovenkamp, FRAND and Antitrust, *105 Cornell L. Rev. 1683, 1697 (2020)* (defining "simple refusal[s] to deal" covered by Trinko rule to include "refusal[s] . . . conditioned on a firm's status that cannot readily be changed," such as where a firm "agree[s] to sell to [non]competitors but not []competitors").

HN22[] To the extent any scholarly commentary uses the term "conditional dealing," rather, the phrase generally refers to actions such as "tying" or "exclusive dealing." *Id. at 1697, 1708*. The key fact distinguishing such conduct from a standard refusal to deal is that it is not "unilateral," but instead "involves some assay by the monopolist into the marketplace" that interferes with the relationship between rivals and third parties. *Novell, 731 F.3d at 1072*. Tying, for instance, occurs when a firm "require[s] third parties to purchase a bundle of goods rather than just the ones they really want," id., thereby leveraging the monopolist's power in the "tying" product market to harm its competitors (who lose access to customers) in the "tied" product market. See *Microsoft, 253 F.3d at 84*. "Exclusive dealing" is similar: it refers to a monopolist's conditioning the sale of a product on the buyer's **[**70]** agreement not to deal with its competitors. *Id. at 70-71*. Again, these "conditional dealing" schemes are thus categorically different from unilateral conduct that involves only the monopolist's competitors, such as its refusal to deal with them. The distinction is critical, as ***antitrust law*** is far more tolerant of unilateral behavior. See *Novell, 731 F.3d at 1072-73* (citing cases) ("Put simply if perhaps a little too simply, today a monopolist is much more likely to be held liable for failing to leave its rivals alone than for **[*29]** failing to come to their aid."); Hovenkamp, *105 Cornell L. Rev. at 1697*.

That brings us back to *Lorain Journal*, which, as it happens, involved a "a very special form of exclusive dealing, namely, a refusal to sell to end-user customers who purchase[d] from the monopolist's competitor[]." Kenneth L. Glazer & Abbott B. Lipsky, Jr., Unilateral Refusals to Deal Under Section 2 of the *Sherman Act*, 63 Antitrust L.J. 749, 800 n.75 (1995). There, the Journal, a local newspaper, had a "commanding" position in the advertising market of the city of Lorain, Ohio. See *342 U.S. at 146*. After a new radio station entered that market, the paper began to refuse to sell advertising space "in the Journal [to] any Lorain County advertiser who advertised or who [the paper] believed to be about to advertise" **[**71]** with the radio station. *Id. at 148*. The paper's bet was that many advertisers could not afford to lose out on the chance to advertise with it, and it was right; the scheme caused most firms to avoid advertising on the radio station, restoring the Journal to its local monopoly. *Id. at 148-49*. On those facts, the Court found a violation of *Section 2* of the *Sherman Act*. *Id. at 152-53*. The key point for our purposes is that the Journal did not simply refuse to deal with the competitor radio station — *e.g.*, it did not merely refuse to print advertisements for the station itself in its pages. The Journal instead refused to deal with any and all customers unless those customers agreed not to deal with the competitor station, thereby interfering with its rival's ability to compete on the merits.

For "Facebook's conditioning of access to its Platform [to be] unlawful under *Lorain Journal*" (or exclusive-dealing doctrine generally), as Plaintiff argues that it is, see FTC Opp. at 34, the agency would thus have to allege that Facebook conditioned access to its Platform APIs on app developers' agreeing not to deal with other social-networking services. And, indeed, the FTC 's Opposition suggests that Facebook did just that. See FTC Opp. at **[**72]** 32 ("Facebook . . . grant[ed] third parties full access to its Platform only on the condition that they not threaten its monopoly by [*inter alia*] connecting with or promoting other PSN providers."); id. at 31 ("Facebook conditioned access to its Platform on trading partners not competing with it or assisting competitors.") (emphasis added). If Facebook's policies had in fact interfered in that way with the ability of competing social-networking services to deal with app developers, that could plausibly have violated Section 2; such conduct might well have had a "significant effect in preserving [Facebook's] monopoly" by keeping user engagement with competing social-networking services "below the critical level necessary for any rival to pose a real threat to [its] market share." *United States v. Dentsply Int'l, Inc., 399 F.3d 181, 191 (3d Cir. 2005)* (finding *Section 2* liability based on exclusive dealing); see also *Microsoft, 253 F.3d at 69-70* (same).

Plaintiff, however, has not sufficiently pleaded the sort of conduct just described. It is true that Facebook's 2011 policy prohibited "Apps on Facebook" from "integrat[ing], link[ing] to, promot[ing], distribut[ing], or redirect[ing] to any app on any other competing social platform." Redacted Compl., ¶ 139. But, as discussed above, that policy **[**73]** applied only to apps designed for use within the Facebook website, not freestanding, separate apps like our chess app or Washington Post app. The policy, moreover, does not appear to have prevented an app developer from building a version of its app that could be accessed and used within the website of another PSN service. For instance, the developer who built a personality-test app **[*30]** for Facebook could build the same app for Google+ without running afoul of the policy, cf. id., ¶ 140; its terms simply prohibited the Facebook version of the app from linking or redirecting to the Google+ version. The 2011 policy was thus a far cry from a policy that told app developers that they could only access Facebook's platform if they promised to only build their app for Facebook. By rough analogy, it is as if the Lorain Journal, rather than refusing to carry advertisements from any business that also advertised with the competing radio station, instead merely required that advertisements appearing in its paper had to avoid mentioning the radio station. Such a focused prohibition on the use of a monopolist's own facilities obviously could not have "significantly limited" the "opportunities for [competitors] **[**74]** to enter into or remain in [the] market" for personal-social-networking services, as is required for *Section 2* liability. *Microsoft, 253 F.3d at 69*.

The 2012 and 2013 policies mentioned in the Complaint similarly did not much limit the opportunities for Facebook competitors to deal with third-party app developers. The 2012 policy allegedly prohibited freestanding apps (*i.e.*, not "Apps on Facebook") from "us[ing] Facebook Platform [APIs] to export [Facebook] user data into a competing social network." Redacted Compl., ¶ 142. The 2013 policy went further, instructing that freestanding apps could not use Facebook's APIs "to promote, or to export [Facebook] user data to, a product or service that replicates a core Facebook product or service." Id., ¶ 143. By their terms, neither of these policies imposed anything approaching a blanket prohibition on freestanding apps' linking to or creating interoperability with Facebook competitors. It is not as if, say, Facebook instructed the Washington Post that its app could only allow a user to sign in with Facebook credentials (as opposed to, say, Google credentials), or only add a Facebook "Like" button and not a "share" button from Path or Circle. Nor did Facebook require the app **[**75]** to refrain from allowing users to search for their contacts from other social-networking services, as they did for their Facebook friends using the Find Friends API. Perhaps the FTC means to hang its hat on a very capacious reading of the policy's prohibition on using Facebook Platform to "promote" competitors, but reading that term to prohibit the sort of dealings just described is implausible at best. That is especially true given that the Complaint alleges no specific instances of Facebook's enforcing its policies to prevent dealing between rivals and other freestanding apps, even as it is replete with allegations regarding Defendant's enforcement of its "no dealing with competitors" policies. See id., ¶¶ 153-58. Plaintiff's "conditional dealing" theory of a *Section 2* violation, accordingly, is not viable here given the conduct that it has alleged.

In summary, the Court concludes — and advises the parties going forward — that in its view, Facebook's "imposition and enforcement of anticompetitive conditions on access to [its] APIs," id., ¶ 71, as that conduct has been pleaded, either does not amount to exclusionary conduct violating *Section 2* of the *Sherman Act* or, to the extent that it might, cannot **[**76]** be the basis for an injunction under *Section 13(b)* of the FTC Act.

C. Challenging Acquisitions under Section 13(b)

Before closing, the Court addresses one further issue raised by Facebook in its Motion to Dismiss: whether, even assuming market power can be established, *Section 13(b)* allows the FTC to attack Facebook's acquisitions of Instagram and WhatsApp. See MTD FTC at 39. Facebook argues that because those acquisitions **[*31]** happened all the way back in 2012 and 2014, respectively, Plaintiff's challenges do not contend that the company "is violating" or "is about to violate" *Section 2*. See *15 U.S.C. § 53(b)*. In other words, Defendant maintains that the FTC's assault on its mergers is aimed at the sort of "long-past conduct" that cannot form the basis of an injunction under *Section 13(b)*. *Shire ViroPharma, 917 F.3d at 156*. (Following the lead of the parties and the cases, the Court uses the terms "acquisition" and "merger" interchangeably for purposes of this analysis.)

While Facebook's argument has some intuitive appeal, it runs into contrary precedent. ***HN23***[] The Supreme Court has clearly stated that the term "acquisition" as used in *Section 7* of the *Clayton Act* — which prohibits purchases "the effect of [which] may be substantially to lessen competition, or **[**77]** to tend to create a monopoly," *15 U.S.C. § 18* — does not refer to "a discrete transaction but [rather] a status which continues until the transaction is undone." *United States v. ITT Cont'l Baking Co., 420 U.S. 223, 241-42, 95 S. Ct. 926, 43 L. Ed. 2d 148 (1975)*. In other words, "acquisition . . . mean[s] both the purchase of rights in another company and the retention of those rights," such that *Section 7*'s "ban against [certain] acquisitions . . . include[s] a ban against holding certain assets," not just "obtaining" them in the first place. Id. (emphasis added); see also *Concord Boat Corp. v. Brunswick Corp., 207 F.3d 1039, 1050 (8th Cir. 2000)* ("*Clayton Act* claims are not limited to challenging the initial acquisition of stocks or assets . . . since holding as well as obtaining assets is potentially violative of *section 7*.") (citation omitted). As ITT Continental Baking explained, that understanding is the necessary upshot of the Court's earlier decision in *United States v. E.I. du Pont, 353 U.S. 586, 77 S. Ct. 872, 1 L. Ed. 2d 1057 (1957)*, which held that the United States could seek divestiture in 1949 of stock that du Pont had first acquired, and was still holding, in 1919. The rule under *Section 7* is thus that so long as an acquiring company continues to hold acquired assets, the Government may "at any time" argue that such company is violating *Section 7*. *Du Pont, 353 U.S. at 597*. In such a case, it would follow that the company "is violating . . . [a] provision of law enforced by the [Commission]" **[**78]** and thus comes within the ambit of *Section 13(b)*. See *15 U.S.C. § 53(b)*.

Because the FTC's challenges to Facebook's acquisitions here arise under *Section 2* of the Sherman Act, not *Section 7* of the Clayton Act, the question becomes whether that same principle applies to claims brought under *Section 2*. The Court sees no reason why not, nor does Facebook offer one. ***HN24***[] Just as "the Government may proceed at any time that an acquisition may be said with reasonable probability to contain a threat that it may . . . tend to create a monopoly," in violation of *Section 7*'s proscription against transactions having that effect, du *Pont, 353 U.S. at 597*, so too it should be able to proceed against an acquisition whenever "a threat of [*Section 2*'s] prohibited effects is evident," *id. at 598* — namely, that the acquisition is "tend[ing] to destroy competition itself" via "means other than competition on the merits." *Microsoft, 253 F.3d at 58, 62* (citation omitted). It is well established that mergers may constitute one such "means." See *Grinnell, 384 U.S. at 576* (finding *Section 2* violation based in part on a number of acquisitions of competitors); *BRFHH Shreveport, LLC v. Willis Knighton Med. Ctr., 176 F. Supp. 3d 606, 622 (W.D. La. 2016)* ("[A]cquisitions of viable competitors alone may establish the anticompetitive conduct element of a *section 2* claim."); *Behrend v. Comcast Corp.,* ***[*32]*** *No. 03-6604, 2012 U.S. Dist. LEXIS 51889, 2012 WL 1231794, at *20 (E.D. Pa. Apr. 12, 2012)* (same); see also Areeda & Hovenkamp vol. III, ¶ 701a, at 201 (noting "overlap between Sherman Act **[**79]** and *Clayton Act* treatment of mergers," including in "case of mergers as unlawful monopolistic acts by firms with significant market power").

The Court will not speculate further as to how, if at all, the *Section 2* analysis of a claim involving a long-ago merger might differ from that regarding a more recent (or even forthcoming) purchase, including on the issue of remedy. Cf. Areeda & Hovenkamp vol. II, ¶ 320g, at 375 (suggesting that "the considerations underlying the laches doctrine might well be applied against the government" in long-delayed challenges "possibly by adjustment in certain burdens of proof or the remedy"); *United States v. Pullman Co., 50 F. Supp. 123, 127 (E.D. Pa. 1943)* ("While the doctrine of laches does not apply against the United States, we should approach the question of equitable relief with great hesitancy in a case where the last operative act was nearly half a century old."). Facebook has made a number of arguments on this score that need not be addressed now. ***HN25***[] At this point, the Court simply holds that, contrary to the company's main contention, an injunction under *Section 13(b)* is a theoretically available remedy in a *Section 2* challenge to long-ago mergers so long as the defendant still holds the purchased assets or stock, as is the case **[**80]** here.

IV. Conclusion

For the foregoing reasons, the Court will grant Facebook's Motion to Dismiss, but it will dismiss without prejudice only the Complaint, not the case. The Court will also grant leave to amend and order Plaintiff to file any amended Complaint within thirty days. A contemporaneous Order so stating shall issue this day.

Date: June 28, 2021

/s/ James E. Boasberg

United States District Judge

[EDITOR'S NOTE: The following court-provided text does not appear at this cite in F. Supp. 3d.]

[*none] **ORDER**

For the reasons set forth in the accompanying Memorandum Opinion, the Court ORDERS that:

1. Facebook's Motion to Dismiss is GRANTED;
2. Plaintiff's Complaint is DISMISSED WITHOUT PREJUDICE; and
3. Plaintiff shall file any amended Complaint by July 29, 2021.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN1[] **Motions to Dismiss, Failure to State Claim**

In evaluating a motion to dismiss, the court must treat the complaint's factual allegations as true and must grant plaintiff the benefit of all inferences that can be derived from the facts alleged. Although detailed factual allegations are not necessary to withstand a Fed. R. Civ. P. 12(b)(6) motion, a complaint must contain sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face — that is, the facts alleged in the complaint must be enough to raise a right to relief above the speculative level. The court need not accept as true, then, a legal conclusion couched as a factual allegation, nor inferences unsupported by the facts set out in the complaint. And it may consider not only the facts alleged in the complaint, but also any documents either attached to or incorporated in the complaint, and matters of which courts may take judicial notice.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN2[] **Public Enforcement, State Civil Actions**

The doctrine of parens patriae standing allows a state to bring suit on behalf of its citizens. To do so, a state must assert an injury to what has been characterized as a quasi-sovereign interest, which refers to an interest the State has in the well-being of its populace that is sufficiently concrete to create an actual controversy between the State and the defendant. Although the concept of a quasi-sovereign interest is fairly vague, it includes a state's interest in the continuing prosperity of its economy, such that states have standing to challenge actions whose clear and direct effects would be the substantial disruption of their internal economies. To ensure that such injury to the state's economy is sufficiently severe and generalized, it must stand apart from the interests of particular private parties — in other words, the controversy must in substance implicate the state's interest in economic supervision, and not merely affect the fortunes of a limited class of her citizens. To ensure the requisite breadth of injury, some substantial proportion of the population of the State must be adversely affected by the challenged behavior.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > ... > US Department of Justice Actions > Criminal Actions > Intent

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

HN3[] **Actual Monopolization, Claims**

Section 2 of the Sherman Act prohibits monopoly maintenance, an offense that has two elements: (1) the possession of monopoly power in the relevant market and (2) the willful maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident. This second element of a Section 2 violation is usually referred to by the shorthand of "anticompetitive" or "exclusionary" conduct.

Antitrust & Trade Law > Sherman Act > Defenses

HN4[] **Sherman Act, Defenses**

The central principle that governs antitrust refusal-to-deal claims is that, as a general matter, a monopolist has the right to refuse to deal with other firms, which includes the right to refuse to cooperate with rivals. The general no-duty-to-deal rule holds even where a monopolist refuses to deal with its competitor merely in order to limit entry — in other words, because it wants to prevent that rival from competing with it. There is no duty to deal under the terms and conditions preferred by a competitor's rivals.

Torts > ... > Types of Premises > Recreational Facilities > Sports Facilities

HN5[] **Recreational Facilities, Sports Facilities**

Courts have coalesced around a three-part test for unlawful refusals to deal, drawn from Aspen Skiing's particular facts and aimed at sniffing out predation while avoiding over-inclusiveness. First, there must be a preexisting voluntary and presumably profitable course of dealing between the monopolist and rival with which the monopolist later refuses to deal.

Antitrust & Trade Law > Robinson-Patman Act > Claims

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > Predatory Pricing

HN6[] **Robinson-Patman Act, Claims**

Second, the refusal to deal must involve products that the defendant already sells in the existing market to other similarly situated customers. Third, and most importantly, the monopolist's discontinuation of the preexisting course of dealing must suggest a willingness to forsake short-term profits to achieve an anti-competitive end, rather than to advance a valid business purpose. To prevail on refusal-to-deal claim, a plaintiff will have to prove that the defendant's refusal to deal caused the defendant short-term economic loss. Qualcomm requires the predatory motivation to be the only conceivable rationale or purpose for the otherwise inexplicable profit sacrifice; Novell asks whether the cessation of dealing was irrational but for its tendency to harm competition; and Areeda & Hovenkamp look for an unexplained, apparently irrational change in an established course of dealing.

Antitrust & Trade Law > Sherman Act > Claims

HN7[] **Sherman Act, Claims**

A monopolist has no duty to deal with its competitors, and a refusal to do so is generally lawful even if it is motivated by a desire to limit entry by new firms or impede the growth of existing ones. It follows that a firm's merely announcing its choice not to deal with competitors, whatever the motivation for doing so, cannot violate Section 2 of the Sherman Act.

Torts > ... > Types of Premises > Recreational Facilities > Sports Facilities

HN8[] **Recreational Facilities, Sports Facilities**

Simply maintaining a policy of refusing to deal with rivals would not be enough to violate the Sherman Act. Rather, to be actionable, an unlawful refusal-to-deal scheme would have to be made up of refusals that were themselves independent violations of the Aspen Skiing test.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN9[] **Scope, Monopolization Offenses**

To violate the Sherman Act, a scheme must involve specific instances in which that policy was enforced (i) against a rival with which the monopolist had a previous course of dealing; (ii) while the monopolist kept dealing with others in the market; (iii) at a short-term profit loss, with no conceivable rationale other than driving a competitor out of business in the long run.

Antitrust & Trade Law > Clayton Act > Remedies > Injunctions

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN10[] **Remedies, Injunctions**

Section 16 authorizes injunctive relief against threatened loss or damage by a violation of the antitrust laws when and under the same conditions and principles as injunctive relief against threatened conduct that will cause loss or damage is granted by courts of equity. 15 U.S.C.S. § 26. As it has been interpreted, that provision authorizes the usual equitable practice under which courts may enter two different kinds of injunctions: (i) those that attempt to foreclose a future harmful act, known as preventive injunctions; and (ii) those aimed at preventing the future harmful effects of past acts, known as reparative injunctions.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN11[] **Standing, Requirements**

As to a preventive injunction, the key requirement is that the movant must demonstrate a significant threat of injury from an impending violation of the antitrust laws or from a contemporary violation likely to continue or recur.

Evidence > Burdens of Proof > Allocation

HN12[] **Burdens of Proof, Allocation**

It is the plaintiffs' burden to substantiate the claim for injunctive relief in an antitrust case by providing proof, or well-pleaded allegations, that the harm is likely to occur again.

Civil Procedure > Remedies > Injunctions > Permanent Injunctions

HN13[] **Injunctions, Permanent Injunctions**

The key feature of a reparative injunction is that it requires the defendant to restore the plaintiff to a preexisting condition to which the plaintiff was entitled.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN14[] **Remedies, Damages**

As a general rule, past wrongs are not enough for the grant of an injunction. An injunction would be an inappropriate remedy for unlawful conduct that substantially foreclosed competition in the relevant antitrust markets but terminated two years before the government filed its action. The usual remedy in such cases is damages.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > Exclusive Dealing

HN15[] **Exclusive & Reciprocal Dealing, Exclusive Dealing**

To the extent any scholarly commentary uses the term "conditional dealing", the phrase generally refers to actions such as tying or exclusive dealing. The key fact distinguishing such conduct from a standard refusal to deal is that it is not unilateral, but instead involves some assay by the monopolist into the marketplace that interferes with the relationship between rivals and third parties. Exclusive dealing is similar: it refers to a monopolist's conditioning the sale of a product on the buyer's agreement not to deal with its competitors.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

HN16[] **Actual Monopolization, Claims**

Whether a monopolist's conduct is condemned as exclusionary depends on the effect of that conduct, not upon the intent behind it.

Civil Procedure > ... > Defenses, Demurrers & Objections > Affirmative Defenses > Laches

Trademark Law > ... > Defenses > Defenses to Incontestability > Laches

HN17[] **Affirmative Defenses, Laches**

The equitable doctrine of laches bars a plaintiff from maintaining a suit if he unreasonably delays in filing a suit and as a result harms the defendant.

Antitrust & Trade Law > Clayton Act > Defenses

Civil Procedure > ... > Defenses, Demurrers & Objections > Affirmative Defenses > Laches

Governments > Legislation > Statute of Limitations > Time Limitations

Antitrust & Trade Law > Clayton Act > Scope

HN18[] **Clayton Act, Defenses**

Although what constitutes an unreasonable delay in filing suit is generally a fact-intensive question, in the context of injunctive actions under section 16 of the Clayton Act, many courts have held that the Clayton Act's four-year statute of limitation on damages actions should be used as a guideline for computing the laches period. The doctrine of laches is premised upon the same principles that underlie statutes of limitation: the desire to avoid unfairness that can result from the prosecution of stale claims.

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

Governments > Legislation > Statute of Limitations > Time Limitations

Antitrust & Trade Law > Clayton Act > Scope

Antitrust & Trade Law > Clayton Act > Defenses

Antitrust & Trade Law > Clayton Act > Remedies > Damages

HN19[] **Standing, Clayton Act**

Regardless of whether a Section 16 of the Clayton Act plaintiff seeks damages or an injunction, it must file its lawsuit within four years from the accrual of the claim. Generally, a Section 7 of the Clayton Act action challenging the initial acquisition of another company's stocks or assets accrues at the time of the merger or acquisition, giving the plaintiff four years from that time to sue.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Governments > Legislation > Statute of Limitations > Time Limitations

Evidence > Inferences & Presumptions > Presumptions > Creation

HN20[] **Actual Monopolization, Claims**

In an antitrust action, the bare fact of delay beyond the analogous four-year statute of limitations creates a rebuttable presumption of prejudice. When the suit is filed after the statutory period, injury i.e., prejudice is presumed.

Antitrust & Trade Law > Clayton Act > Claims

Civil Procedure > ... > Defenses, Demurrers & Objections > Affirmative Defenses > Laches

Antitrust & Trade Law > Clayton Act > Scope

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

Antitrust & Trade Law > Clayton Act > Remedies > Injunctions

HN21[] **Clayton Act, Claims**

The principle that laches does not ordinarily apply to government suits to enforce sovereign rights, allows the United States to seek an injunction for violation of its antitrust laws at any time, 15 U.S.C.S. §§ 4, 15, but does not offer the states the same leeway. Laches can bar a belated attack against a merger under Section 16 Clayton Act even if it would not be too late for the federal Government to vindicate the public interest under § 15 of the Clayton Act.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN22[] **Standing, Requirements**

The parens patriae doctrine supplies a theory of U.S. Const. art. III injury — namely, that the state itself has a cognizable interest in the continuing prosperity of its economy. But the fact that severe and generalized economic injury to a state's citizens also concretely injures the state for Article III purposes says nothing about the nature of the states' roles in the antitrust enforcement regime Congress has established. That regime, while allowing the private-injunction action to supplement government enforcement, primarily charges the United States with the duty of protecting the public interest under these laws.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

HN23[] **Remedies, Damages**

The general rule is that courts measure the reasonableness of a private antitrust plaintiff's delay in suing for divestiture relative to the announcement of the transaction and its subsequent consummation.

Antitrust & Trade Law > Clayton Act > Claims

Mergers & Acquisitions Law > Antitrust > Antitrust Statutes > Clayton Act

Trademark Law > ... > Defenses > Defenses to Incontestability > Laches

Antitrust & Trade Law > Clayton Act > Defenses

Antitrust & Trade Law > Clayton Act > Scope

HN24[] **Clayton Act, Claims**

Post-acquisition increases in prices or decreases in output are mere inertial consequences that one naturally expects to flow from an anticompetitive merger, and such consequences, the law is clear, do not restart the statute of limitations in a Section 7 of the Clayton Act, 15 U.S.C.S. § 18, action. This approach allows the statute of limitations to have effect and discourages private parties from sleeping on their rights. If it were otherwise, there would in effect be no statute of limitations and no laches defense to a claim for equitable relief, since a Section 7 challenge to the holding or use of assets could be brought at any time. Where the complained of new use of an acquired asset, moreover, was, in fact, suspected and complained about prior to and at the time of the merger, it is especially improper to measure delay from some later point in time.

Civil Procedure > Preliminary Considerations > Equity > Relief

HN25[] **Equity, Relief**

Although in an antitrust case, divestiture is a form of equitable relief, it is not generally thought of as prospective but rather retroactive in character, as it is aimed at unwinding a transaction. The fact that challenged acquisitions allegedly continue to cause ongoing harm does not affect that characterization; on the contrary, where a plaintiff's complaint is that it is experiencing continuing, present adverse effects of past action, a reparative or backward-looking decree such as a divestiture order is the appropriate remedy.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Antitrust & Trade Law > ... > US Department of Justice Actions > Criminal Actions > Intent

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN26[] **Actual Monopolization, Claims**

A maintenance offense under Section 2 of the Sherman Act has two elements: (1) the possession of monopoly power in the relevant market and (2) the willful maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident.

Antitrust & Trade Law > Clayton Act > Claims

Antitrust & Trade Law > Clayton Act > Scope

Antitrust & Trade Law > Sherman Act > Defenses

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

Antitrust & Trade Law > Sherman Act > Claims

HN27[] **Clayton Act, Claims**

In the context of a damages action, there is no reason to treat the same conduct differently in sister statutes i.e., Section 2 and Section 7 that are designed to promote the same legislative objective. There is nothing in 15 U.S.C.S. § 15b that suggests it should be applied one way for merger-acquisition claims under the Sherman Act but differently for merger-acquisition claims under the Clayton Act.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Governments > Legislation > Statute of Limitations > Time Limitations

HN28[] **Standing, Requirements**

In general, the four-year limitation for private antitrust actions is long enough to enable potential plaintiffs to observe the actual effects of a possible antitrust violation and to calculate its potential effects.

Antitrust & Trade Law > Sherman Act > Claims

HN29[] **Sherman Act, Claims**

Under one theory of Section 2 of the Sherman Act liability, often referred to as a course of conduct or monopoly broth theory, a plaintiff can allege a series of actions that when taken together make out antitrust liability even though some of the individual actions, when viewed independently, are not all actionable.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN30[] **Scope, Monopolization Offenses**

A monopolist's refusal to deal with its competitors can harm competition, especially if the monopolist has substantial control over a facility or input that is valuable to its rivals.

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN31[] **Private Actions, Sherman Act**

If a unilateral refusal, or refusals, is to be part of such larger antitrust scheme, it must in itself be unlawful.

Opinion

[*13] **MEMORANDUM OPINION**

As the pillars of our national economy have shifted **[**9]** from the concrete to the virtual, so too have the targets of government antitrust actions. Where railroads and oil companies were alleged to be early violators, over the past decades, providers of telecommunications (AT&T) and computer operating systems (Microsoft) have been the defendants. In the internet age, not surprisingly, Facebook finds itself in the spotlight, as both federal and state regulators contend, in two separate actions before this Court, that it is now the one violating the antitrust laws. The company, they allege, has long had a monopoly in the market for what they call "Personal Social Networking Services." And it has allegedly maintained that monopoly, in violation of *Section 2 of the Sherman Act*, through two different kinds of actions: first, by acquiring firms that it believed were well positioned to erode its dominance — most notably, Instagram and WhatsApp; and second, by adopting policies preventing interoperability between Facebook and certain other apps that it saw as threats, thereby impeding their growth into viable competitors. The State Plaintiffs in this action further contend that Facebook's purchases of Instagram and WhatsApp violated *Section 7 of the Clayton Act*, **[**10]** which prohibits acquisitions "the effect of [which] may be substantially to lessen competition, or to tend to create a monopoly." *15 U.S.C. § 18*. Both suits seek equitable remedies for these alleged antitrust violations, including forced "divestiture or reconstruction of illegally acquired businesses and/or divestiture of Facebook assets or business lines." ECF No. 4 (Redacted Compl.) at 75. (The Court cites a version of the States' Complaint that has minor redactions to protect confidential business information, and it mentions certain redacted facts only with the parties' permission.)

Facebook now separately moves to dismiss both actions. This Opinion resolves its Motion as to the States' Complaint, and the Court analyzes the Federal Trade Commission's largely parallel claims in its separate Opinion in No. 20-3590. Although the Court does not agree with all of Defendant's contentions here, it ultimately concurs with Facebook's bottom-line conclusion: none of the States' claims may go forward. That is so for two main reasons.

First, the States' *Section 2* and *Section 7* attacks on Facebook's acquisitions are barred by the doctrine of laches, which precludes relief for those who sleep on their rights. Although Defendant **[**11]** purchased Instagram in 2012 and WhatsApp in 2014, Plaintiffs' suit — which seeks, in the main, to have Facebook divest one or both companies — was not filed until December 2020. The Court is aware of no case, and Plaintiffs provide none, where such a long delay in seeking such a consequential **[*14]** remedy has been countenanced in a case brought by a plaintiff other than the federal government, against which laches does not apply and to which the federal antitrust laws grant unique authority as sovereign law enforcer. If laches is to mean anything, it must apply on these facts, even in a suit brought by states.

Second, the States' *Section 2* challenge to Facebook's policy of preventing interoperability with competing apps fails to state a claim under current ***antitrust law***, as there is nothing unlawful about having such a policy. While it is possible that Facebook's implementation of that policy as to certain specific competitor apps may have violated *Section 2*, the Court does not reach that question because all such revocations of access occurred over five years before the filing of the Complaint. Such long-past violations cannot furnish a basis for the injunctive relief that Plaintiffs seek here.

The Court, **[**12]** consequently, will grant Facebook's Motion and dismiss the case.

Table of Contents

I. Background

A. Social Networking

At the dawn of our century, in the much earlier days of the internet, a number of websites began to offer services that, in hindsight, were precursors to the sort that Facebook provides. Those websites provided users a platform for creating a unique webpage, personalized with photos and messages, that could then be used to interact with the pages of other "friends." See Redacted Compl., ¶ 58. Interactions were initially limited to email, using services such as America Online (AOL). Id., ¶¶ 58-59. **[**13]** Eventually, new online services emerged that allowed users to organize their profiles into a specific network and communicate with that network, such as Classmates.com and SixDegrees.com. Id., ¶ 59. Friendster and Myspace, both launched in 2002, built further on this trend, offering the first of what came to be known as "social networking" services. Id., ¶ 60. Although the precise definition of a "Personal Social Networking Service" (the main market in which Facebook allegedly operates) is disputed, it can be summarized here as one that enables users to **[*15]** virtually connect with others in their network and to digitally share their views and experiences by posting about them in a shared, virtual social space. Id., ¶¶ 1, 28, 70. For example, users might view and interact with a letter-to-the-editor-style post on politics by a neighbor, pictures from a friend's recent party, or a birth announcement for a newborn cousin. Id., ¶¶ 1, 70.

Perhaps because humans are naturally social, this new way of interacting became hugely popular. In 2006, Myspace, at one point the leading social network, "overtook Google as the most-visited website in the world." Id., ¶ 60. By 2008, however, it had been surpassed **[**14]** by a new competitor: Facebook. Id., ¶ 66. Launched in 2004 by then-undergraduate Mark Zuckerberg from his Harvard dorm room, "The Facebook," as it was initially called, was a social-networking service initially limited to Harvard students. Id., ¶ 61. Encouraged by its success on campus, Zuckerberg and some fellow students expanded the product to other universities, where it proved similarly popular. Id., ¶¶ 62-63. That growth led Facebook to expand beyond colleges, first to high schools and then to the larger adult population. Id., ¶¶ 64-66. By 2008, it had 120 million active users globally. Id., ¶ 66. Three years later, it had 156 million active users in the United States alone, with each user averaging over seven hours per month. Id. The following details of Facebook's conduct are drawn from the States' Complaint, as the Court must consider its allegations true at this stage. The allegations are quite similar, though not identical, to those made by the FTC in the parallel case and recounted in the Court's companion Opinion.

B. Facebook Blue

Facebook's "core" social-network product is known as "Facebook Blue." Id., ¶ 71. This is what its millions of users think of when they think of **[**15]** "Facebook." Generally speaking, using Facebook Blue entails interacting with "user-created content," — *i.e.*, content created or shared by one's Facebook "friends," id., ¶ 30 — or creating content oneself by posting. That is not all that users see or do, however. Users, for instance, also encounter "publisher-created content like news articles . . . and advertisements," id., "interspers[ed]" in their "news feed." Id., ¶¶ 30, 49, 54. Such content can come in text, photo, or video form. Id., ¶ 49. In addition, Facebook users can play games or use other applications built either by Facebook or by third parties. Id., ¶¶ 80, 152, 190. Facebook also offers other services beyond Facebook Blue to its users, such as Facebook Messenger, a free mobile-messaging and voice-calling service. Id., ¶¶ 71, 159, 209.

Unlike most businesses, Facebook charges users no fee; instead, it makes money by selling advertising. Id., ¶¶ 2-3. By leveraging the "vast trove of data it has collected on users, their friends, and their interests," the company is able to offer advertisers a "highly targeted" set of potential customers distilled from its "massive network of users." Id., ¶¶ 3, 51. Under this business model, **[**16]** as the States' Complaint puts it, "Users do not pay a cash price to use Facebook"; instead, "they exchange their time, attention, and personal data for access to Facebook's services." Id., ¶¶ 2, 46. That approach has been highly profitable: in 2019, for instance, advertisers paid Facebook nearly $30 billion. Id., ¶ 48. To be clear, although Facebook's data-collection and-use practices have been subject to increasing scrutiny, they are not the subject of this action.

C. Alleged Monopoly Maintenance

Instead, this suit alleges that Facebook has violated and is violating the antitrust **[*16]** laws, the focus of which, generally speaking, is to promote and ensure competition. According to Plaintiffs, Facebook Blue's meteoric rise was a positive example of what happens when firms compete to provide the best product to consumers. Because its social-networking service provided more "innovative features," "a higher-quality user experience, and better privacy protections" than anyone else, id., ¶ 73, at least as early as 2011, it had become the dominant personal social networking service" in this country, giving Facebook "monopoly power" in that market. Id., ¶¶ 4, 11, 68.

Around that time, however, Facebook **[**17]** allegedly made a fateful pivot: rather than continuing to focus on providing the best product, it became concerned with protecting its monopoly by leveraging its dominance to foreclose and forestall the rise of new competitors. Id., ¶¶ 98-99. In particular, the company's executives saw a "unique threat[] to Facebook's dominance" in the advent of mobile devices — first and foremost, smartphones — capable of accessing the internet. Id., ¶¶ 100-01. Although Facebook had mobile functionality, it had been built with websites and desktop or laptop computers in mind. Other firms' offerings, by contrast, were "built to look and function well on a mobile device in the first instance." Id., ¶ 100. Zuckerberg and other Facebook executives fretted over the possibility that other apps might create attractive mobile-native features and then leverage those features into exponential user growth, end-running Facebook's established position. Id., ¶¶ 101-02. Even if such an app was not already providing social-network-like functionality, once it had a big enough base of users, it would still pose a potential threat to Facebook Blue. Id. Facebook executives feared fast-growing mobile-messaging services **[**18]** in particular, nervous that such apps could rather easily "morph[]" into direct competitors by adding social features. Id., ¶ 103.

What Facebook did in response to these perceived threats is the basis for these antitrust suits against it. The company allegedly used its monopoly power to eliminate or destroy competitors in order to maintain its market dominance. Id., ¶ 104. Plaintiffs allege that, beginning around 2011, "Facebook used two primary tactics to achieve" that result. Id. First, it reached deep into its very deep pockets to acquire competitors and potential competitors, preventing their emergence as serious rivals. Id. Second, it adopted and then enforced policies that blocked rival apps from interconnecting their product with Facebook Blue, thereby both (i) blunting the growth of apps that had previously depended on that interoperability to attract new users, and (ii) warning all other developers not to compete with Facebook, lest they lose access as well. Id.; see also id., ¶¶ 186-87.

Acquisitions

On the acquisitions front, "Facebook acquired dozens of companies" from 2012 to 2020, and it "pursued many more acquisitions that did not come to fruition." Id., ¶ 105. Among those **[**19]** "dozens" were many minor companies; the Complaint briefly mentions Glancee and EyeGroove, firms Facebook purchased in 2012 and 2016, respectively. Id., ¶ 184. Rather than catalog each acquisition (some of which, presumably, posed no threat to competition), Plaintiffs focus almost exclusively on several key examples that purportedly illustrate Facebook's allegedly anticompetitive approach: its purchases of Instagram (2012) and WhatsApp (2014), and its ultimately unsuccessful attempts to buy Snapchat (2012-13). Id., ¶¶ 107-80.

Begin with Insta, as those in the know — *viz*., our children — refer to it. Launched in late 2010, Instagram was an **[*17]** innovative photo-editing and-sharing app designed for the era of smartphones with built-in cameras. Id., ¶¶ 107, 109. The company grew explosively, eventually attracting the attention of Facebook executives who feared that their own photo-sharing features paled in comparison. Id., ¶¶ 111, 113. That disparity gave Instagram a chance to grow to a large enough scale to be threatening, making it a "powerful competitive threat to Facebook's . . . monopoly." Id., ¶ 128. Aiming to "neutralize" that competition, and to "integrate" the "mechanics" of Instagram's **[**20]** popular photo-sharing features with Facebook Blue in order to forestall the growth of future Instagrams, id., ¶ 115, Zuckerberg offered to buy the company for $1 billion in April 2012. Id., ¶ 119. Instagram agreed.

As required by the Hart-Scott-Rodino Act, *15 U.S.C. § 18a*, the FTC reviewed the acquisition prior to closing to assess whether it posed anticompetitive concerns. Whereas most mergers are cleared quickly, in this instance the review took over four months. During that scrutiny, the agency took the rare step of "requir[ing] the submission [by the parties] of additional information or documentary material relevant to the proposed acquisition." *15 U.S.C. § 18a(e)(1)(A)*. Eventually, however, Facebook and Instagram satisfied the agency's concerns, and in August (over four months after the merger was announced), the Commission voted 5-0 to allow it to proceed without any challenge or conditions. See FTC, FTC Closes Its Investigation into Facebook's Proposed Acquisition of Instagram Photo Sharing Program (Aug. 22, 2012), https://bit.ly/3bDa2mp. Although Plaintiffs do not mention that prolonged FTC review in their Complaint, the Court may take judicial notice of that agency action. See *Pharm. Rsch. & Manufacturers of Am. v. U.S. Dep't of Health & Hum. Servs., 43 F. Supp. 3d 28, 33 (D.D.C. 2014)*; *Herron v. Fannie Mae, No. 10-943, 2016 U.S. Dist. LEXIS 3332, 2012 WL 13042852, at *1 (D.D.C. Mar. 28, 2012)*.

Zuckerberg, Plaintiffs allege, **[**21]** had similar designs in offering to buy Snapchat in October 2013. Id., ¶¶ 131, 134. That app also involved photo-sharing, with the twist that images would usually be sent one-to-one or one-to-small-group, rather than to a user's entire network, and would automatically delete after being viewed for only a few seconds. Id., ¶ 130. Impressed by the app's engagement and user growth, Facebook offered to purchase it for $4 billion — mainly, allege Plaintiffs, to "keep[] [it] out of the hands of any firm with the resources to transform [it] into a major competitive threat." Id., ¶ 134. Snapchat's founder, however, steadfastly refused the overtures. Id., ¶ 135.

Facebook had better luck the next year with WhatsApp. As noted above, the company's executives saw mobile-messaging apps like WhatsApp as their "biggest competitive threat," even though they did not directly compete with Facebook Blue in the Personal Social Networking Services market. Id., ¶ 153. The fear instead was that such apps might well "morph" into competitors in the future; given the ubiquity of text messaging in modern life, a widely adopted messaging app could leverage its network effects to transition into a highly competitive **[**22]** "mobile-first social network" by adding functions such as "gaming platforms, profiles, and news feeds." Id., ¶¶ 152-53, 160. WhatsApp was the most potent threat, according to Facebook executives, because it was the "category leader" among mobile messengers, with over 400 million active users and a superior product. Id., ¶¶ 154-55. Zuckerberg in particular "believe[d] that WhatsApp had the potential to enter Facebook's core market and erode its monopoly power," and he thus resolved to try to buy it to prevent that from happening. Id., ¶ 161. In **[*18]** February 2014, after negotiating specific terms regarding WhatsApp's continued independence, user privacy, and freedom from ads, he succeeded, as the two companies agreed on a purchase price of around $19 billion. Id., ¶¶ 165-66. That transaction was also subject to Hart-Scott-Rodino Act pre-merger review, see *15 U.S.C. § 18a*, but the FTC, once again, did not block it.

Interoperability Permissions

a. Facebook Platform

Shortly after expanding beyond colleges and high schools, Facebook developed Facebook Platform, a set of tools designed to enable developers of other mobile or web apps to interoperate with Facebook's site and data. See Redacted Compl., ¶ 80. The **[**23]** goal was to make Facebook the "platform" for all social interactions on the internet, thereby creating a better, more engaging product and driving even more users to its site. Id. The first iteration of Facebook Platform, circa 2007, allowed developers to build what Facebook called "canvas" apps displayed within the Facebook website itself. Id., ¶ 190. As an example, a user scrolling through Facebook could come upon a personality-test app, take the test, and then share her results and invite Facebook friends to take the test as well, all without ever navigating off the Facebook site. Id. Facebook made these third-party apps available to users "on a level playing field with applications built by Facebook." Id., ¶ 189. App developers took advantage, scrambling to create these canvas apps in order to gain access to its growing network of users. Id., ¶¶ 80, 189-94. Such apps would make money by allowing users to purchase virtual goods or items within the app on a "freemium" model or via ad sales.

Facebook soon expanded Platform, deploying a suite of tools that expanded its reach off the Facebook site itself. These tools — called application programming interfaces or APIs — created mechanisms **[**24]** for sharing data between Facebook and other services. Id., ¶ 80. The States provide several examples of APIs that Facebook opened to developers. One is the "Find Friends" API, id., ¶ 190, which enabled freestanding apps to allow Facebook account holders to find and connect with Facebook friends within that separate app, or to invite Facebook friends to join that app. Id., ¶¶ 207, 210, 214-15, 217. For instance, when first starting to use an independent chess app — *i.e.*, an app used separately as opposed to on the Facebook site itself — a user with a Facebook account could nonetheless search within the app for other Facebook friends already using it, or invite them to join via Facebook, all without leaving the app. Another API Facebook created was Facebook Connect, which allowed Facebook users to sign into third-party websites or apps using their Facebook log-in credentials. Id., ¶ 81.

Facebook went even further in that direction in 2010 when it launched its Open Graph API. Open Graph allowed third-party apps and websites to essentially integrate pieces of Facebook within their own service; for instance, apps could install the famous "Like" button, which, if clicked, would share a user's **[**25]** "like" on the user's Facebook profile. Id., ¶ 82. Users could do this without even navigating away from the third-party service. Id., ¶¶ 191-93. "[A] user reading an article on ESPN.com," for instance, "could now like an article on ESPN's site, and choose to post a link of the article to the user's Facebook profile directly from the ESPN.com website." Id., ¶ 193. App developers could also host Facebook comment sections, facilitating further engagement with their content. Id.,

¶ 194. This was, unsurprisingly, a massively popular tool among app developers. By May 2013, over 10 million apps and websites had used the Open Graph API to **[*19]** integrate with Facebook, and Facebook "integrations quickly became common across the internet." Id.

According to Plaintiffs, Facebook benefited significantly from its Platform program and open APIs. The company garnered goodwill and positive media coverage, continued to increase its growth and user engagement, and earned substantial sums from its requirement that partner third-party apps share revenues from in-app purchases. Id., ¶¶ 195-96. Third-party app developers likewise gained, improving the quality of users' experience by integrating social functionality **[**26]** and benefiting from Facebook's sizeable network of highly engaged users. Id., ¶ 197. Users, too, enjoyed the increased efficiency and convenience. Id., ¶ 198.

b. Conditioning Access

Nonetheless, the States allege, Facebook eventually "turned to Platform as a tool to monitor, leverage," and — most crucially here — "harm (via rescinding API access [to]) apps that Facebook viewed as actual or potential competitive threats." Id., ¶ 200. In 2011, it announced a company policy that allegedly "aimed at forbidding 'competing social platforms,' and any apps that linked or integrated with competing social platforms, from accessing its APIs." Id., ¶ 199. In 2013, Facebook announced an even broader policy of withholding API access from apps that competed by "replicat[ing] [Facebook's] core functionality," even if they were not full social networks. Id., ¶ 201.

To the extent the States allege that Facebook's 2011 policy actually prohibited — as opposed to merely "aim[ed] at" prohibiting, as is the precise wording of the allegation — freestanding third-party apps from accessing its APIs merely because those apps also "linked to or integrated with" other social-networking services, the Court does not **[**27]** accept that characterization because it is inconsistent with the text of the 2011 policy, which the FTC quotes in its simultaneously filed Complaint in the related case. See *Vanover v. Hantman, 77 F. Supp. 2d 91, 98 (D.D.C. 1999)* (court may consider material outside the pleadings where it is "referred to in the complaint and is central to plaintiff's claim"). As set out in the FTC's Complaint, the 2011 policy covered only "Apps on Facebook" — *i.e.*, the sort of "canvas apps" described above — rather than freestanding third-party apps or sites such as ESPN.com. See No. 20-3590, ECF No. 3 (Redacted FTC Compl.), ¶ 139 (quoting 2011 policy as stating that "Apps on Facebook may not integrate, link to, promote, distribute, or redirect to any app on any other competing social platform"). The 2011 policy, then, limited what apps hosted and used on Facebook's own site could do; it did not purport to restrict freestanding apps and sites from linking to or integrating with other social networks.

At any rate, armed with its policies, Facebook "began to selectively enforce" them "to cut off API access to companies Facebook worried might one day threaten its monopoly." Redacted Compl., ¶ 202. Plaintiffs allege that in cutting off access, Facebook intended **[**28]** to, and did, "devastat[e]" the targeted apps by suddenly depriving them of a "critical piece of infrastructure" on which they had relied for growth and engagement — namely, Facebook's user data and network. Id. The Complaint provides seven discrete examples of competitive or potentially competitive apps that Facebook targeted for API revocation from 2013 to 2015. Each, after promising early growth, faltered shortly after losing its access. Id., ¶¶ 207-12 (Voxer), 213-14 (Vine), 215-16 (MessageMe), 217-18 (Path), 219-21 (Circle), 222-24 (Tsū), 225-29 (Phhhoto). Around the same **[*20]** time, Facebook announced yet another new policy, requiring all developers to seek permission before being granted API access, even if they previously had it. Id., ¶ 203. Facebook then denied such requests from "apps it classified as competitors or potential competitors." Id.

According to the States, Facebook's policies and enforcement decisions helped "ensur[e] that would-be competitors could not gain or maintain a foothold in the Personal Social Networking Services market." Id., ¶ 230. What is more, Plaintiffs allege, Facebook's actions deterred other firms (and their venture-capital backers) from even thinking **[**29]** about challenging Facebook Blue. Id. The effect was to "maintain and enhance Facebook's monopoly power." Id., ¶ 231.

Although the story laid out in the Complaint ends there, the States' brief in opposition to the present Motion to Dismiss provides an important coda. According to that brief, and a Facebook press release the States append as an exhibit to their Opposition, see ECF No. 121-7, in 2018, Facebook terminated all of its policies regarding competitor API access. See ECF No. 122 (States Opp.) at 13. Facebook does not dispute that contention, see ECF No. 123 (Reply States) at 24, and the FTC's Complaint in the parallel action makes the same allegation. See Redacted FTC Compl., ¶¶ 148-49. The Court accordingly takes judicial notice of the fact that Facebook retracted its API policies in 2018. See *Bowden v. United States, 106 F.3d 433, 437, 323 U.S. App. D.C. 164 (D.C. Cir. 1997)* (considering "the pleadings and undisputed documents in the record" while considering motion to dismiss); *Webster v. Spencer, No. 17-1472, 2020 U.S. Dist. LEXIS 77047, 2020 WL 2104231, at *5 (D.D.C. May 1, 2020)* (citing similar cases). That revocation holds legal relevance, as readers with sufficient stamina will discover.

D. Procedural History

Plaintiffs — 46 States, the District of Columbia, and the Territory of Guam — filed this action on December 9, 2020. See Redacted Compl. at 5 n.1. **[**30]** Their Complaint alleges three counts. First, they claim, Facebook has violated, and is violating, *Section 2 of the Sherman Act*'s prohibition on monopoly maintenance via the two forms of exclusionary conduct described above: acquiring nascent and potential competitors, and anticompetitively conditioning access to its APIs. Id., ¶¶ 256-62. Second, Facebook violated *Section 7 of the Clayton Act* by acquiring Instagram, thereby "substantially . . . lessen[ing] competition [and] tend[ing] to create a monopoly," *15 U.S.C. § 18*, and it continues to violate that statute by holding and using Instagram assets. Id., ¶¶ 263-67. Third and finally, Facebook similarly violated and continues to violate *Section 7* by acquiring and holding WhatsApp. Id., ¶¶ 268-72. Plaintiffs seek equitable relief for these violations, including an injunction prohibiting similar conduct in the future and the divestiture of unlawfully held assets, id., ¶¶ 277(2), (8), pursuant to *Section 16 of the Clayton Act*. See *15 U.S.C. § 26* (authorizing suits by "[a]ny person . . . for injunctive relief . . . against threatened loss or damage by a violation of the antitrust laws").

As noted, the Federal Trade Commission filed a very similar suit against Facebook on the same day as the State Plaintiffs, **[**31]** pursuing similar injunctive relief. That action was assigned to Judge Christopher R. Cooper of this district. Pursuant to Local Rule 40.5(c)(2), which governs related cases, he was required to reassign the FTC action to this Court, which presides over the earlier-filed State case. See No. 20-3590, Minute Order of Jan. 12, 2021.

Facebook has now moved to dismiss both actions. See ECF No. 114 (MTD **[*21]** States); No. 20-3590, ECF No. 56-1 (MTD FTC). While the cases could be consolidated, the Court believes that clarity will be enhanced by resolving the two Motions to Dismiss in separate, contemporaneously issued Opinions. As noted above and explained hereafter, it will grant the Motion to Dismiss the States' case. By contrast, the Court will dismiss only the Complaint, not the case, in the FTC action, thus permitting the Government leave to amend. An explanation of why may be found in the companion Opinion. See Mem. Op., No. 20-3590.

II. Legal Standard

Facebook moves to dismiss this action under *Federal Rule of Civil Procedure 12(b)(6)* for failure to state a claim upon which relief can be granted. See MTD States at 1. ***HN1***[] In evaluating such Motion to Dismiss, the Court must "treat the complaint's factual allegations as true . . . and must grant plaintiff 'the **[**32]** benefit of all inferences that can be derived from the facts alleged.'" *Sparrow v. United Air Lines, Inc., 216 F.3d 1111, 1113, 342 U.S. App. D.C. 268 (D.C. Cir. 2000)* (quoting *Schuler v. United States, 617 F.2d 605, 608, 199 U.S. App. D.C. 23 (D.C. Cir. 1979)*). Although "detailed factual allegations" are not necessary to withstand a *Rule 12(b)(6)* motion, *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*, "a complaint must contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face,'" *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Twombly, 550 U.S. at 570*) — that is, the facts alleged in the complaint "must be enough to raise a right to relief above the speculative level." *Twombly, 550 U.S. at 555*. The Court need not accept as true, then, "a legal conclusion couched as a factual allegation," *Trudeau v. FTC, 456 F.3d 178, 193, 372 U.S. App. D.C. 335 (D.C. Cir. 2006)* (quoting *Papasan v. Allain, 478 U.S. 265, 286, 106 S. Ct. 2932, 92 L. Ed. 2d 209 (1986)*), nor "inferences . . . unsupported by the facts set out in the complaint." Id. (quoting *Kowal v. MCI Commc'ns Corp., 16 F.3d 1271, 1276 (D.C. Cir. 1994)*). And it may consider not only "the facts alleged in the complaint," but also "any documents either attached to or incorporated in the complaint[,] and matters of which [courts] may take judicial notice." *Equal Emp't Opportunity Comm'n v. St. Francis Xavier Parochial Sch., 117 F.3d 621, 624, 326 U.S. App. D.C. 67 (D.C. Cir. 1997)*.

III. Analysis

Facebook proffers multiple bases for dismissal here, both jurisdictional and on the merits. The Court begins by considering its argument that Plaintiffs here lack Article III standing to sue. Such position gains no purchase. But that is the only place the States prevail, for the Court concurs with Facebook that their *Section 2* challenges to its API dealings fail as a matter **[**33]** of law. It also concludes that their *Section 2* and *Section 7* claims as to Facebook's acquisitions, which took place at least six years prior to the filing of the Complaint, are barred by the doctrine of laches. Dismissal of the entire case is thus warranted.

A. Standing

Plaintiffs bring this action under *Section 16 of the Clayton Act*, which provides that "[a]ny person, firm, corporation, or association shall be entitled to sue for and have injunctive relief . . . against threatened loss or damage by a violation of the antitrust laws." *15 U.S.C. § 26*. In order to meet Article III's requirement that they articulate an injury-in-fact that they have suffered, Plaintiffs sue in their "capacity as *parens patriae*." *Alfred L. Snapp & Son, Inc. v. Puerto Rico, 458 U.S. 592, 594, **[*22]** 102 S. Ct. 3260, 73 L. Ed. 2d 995 (1982)*; see States Opp. at 5.

HN2[] "The doctrine of *parens patriae* standing allows [a] state[] to bring suit on behalf of [its] citizens." *New York v. Microsoft Corp., 209 F. Supp. 2d 132, 149 (D.D.C. 2002)*. To do so, a state must "assert an injury to what has been characterized as a 'quasi-sovereign interest,'" *Alfred L. Snapp, 458 U.S. at 601*, which refers to an "interest[] the State has in the well-being of its populace" that is "sufficiently concrete to create an actual controversy between the State and the defendant." *Id. at 602*. Although the concept of a "quasi-sovereign interest" is fairly "vague[]," id., it includes a state's "interest in the **[**34]** continuing prosperity of [its] econom[y]," such that states have "standing to challenge actions whose clear and direct effects would be the substantial disruption of the[ir] internal econom[ies]." *Pennsylvania v. Kleppe, 533 F.2d 668, 674, 174 U.S. App. D.C. 441 (D.C. Cir. 1976)* (citing cases); *Alfred L. Snapp, 458 U.S. at 607* ("[A] State has a quasi-sovereign interest in the health and well-being — both physical and economic — of its residents in general."). To ensure that such "[i]njury to the state's economy is . . . sufficiently severe and generalized," *Kleppe, 533 F.2d at 675*, it must stand "apart from the interests of particular private parties," *Alfred L. Snapp, 458 U.S. at 607* — in other words, "the controversy must in substance implicate the state's interest in economic supervision, and not merely affect the fortunes of a limited class of her citizens." *Kleppe, 533 F.2d at 674*. To ensure the requisite breadth of injury, some "substantial" "proportion of the population of the State . . . must be adversely affected by the challenged behavior." *Alfred L. Snapp, 458 U.S. at 607*; see also *New York v. Microsoft, 209 F. Supp. 2d at 152* (asking whether "the direct impact of the alleged wrong [is] felt by a substantial majority . . . of the state's citizens, so that the suit can be said to be for the benefit of the public").

Applying these principles in the antitrust context, the Supreme Court long ago held that a State had *parens patriae* standing **[**35]** to seek an injunction against a price-fixing conspiracy under *Section 16* of the Clayton Act. *Georgia v. Penn. R. Co., 324 U.S. 439, 451, 65 S. Ct. 716, 89 L. Ed. 1051 (1945)*. In that case, the State of Georgia alleged that its "economy . . . and the welfare of [its] citizens [had] seriously suffered as the result of this alleged conspiracy," *id. at 450*, and the Court agreed that antitrust violations "may affect the prosperity and welfare of a State as profoundly as [the] diversion of waters from the rivers." Id.; see also *id. at 451* (State suffered injury to "interest apart from that of particular individuals who may be affected" because the conspiracy, if proven, "limit[ed] the opportunities of her people, shackle[d] her industries, retard[ed] her development, and relegate[d] her to an inferior economic position."). Citing that decision, the lower courts have consistently held that states have *parens patriae* standing to seek injunctions under *Section 16* against antitrust violations the effects of which are widely felt within their borders. See, e.g., *New York v. Microsoft Corp., 209 F. Supp. 2d at 150-52* ("significant[] hamper[ing] [of] competition" by a monopolist is enough); *In re Ins. Antitrust Litig., 938 F.2d 919, 927 (9th Cir. 1991)* ("The state's interest in preventing harm to its citizens by antitrust violations is, indeed, a prime instance of the interest that the *parens patriae* can vindicate by obtaining **[**36]** . . . an injunction."); *Pennsylvania v. Russell Stover Candies, Inc., No. 93-1972, 1993 U.S. Dist. LEXIS 6024, 1993 WL 145264, at *8 (E.D. Pa. May 6, 1993)* ("[A] state may . . . seek injunctive relief for **[*23]** harm to its general economy that is caused by a violation of federal ***antitrust law***.").

Under these cases, Plaintiffs here have properly pleaded sufficient injury to their quasi-sovereign interests in the economic well-being of their states. Their Complaint alleges that Facebook has prevented, through anticompetitive means, the emergence of viable competitors to its monopoly in Personal Social Networking Services. As a result, millions of Plaintiffs' citizens have experienced "reductions in the quality and variety of privacy options and content available to them" in that market, see Redacted Compl., ¶¶ 8, 247-50 — which is to say that, on the States' theory, millions have experienced a rise in the effective price of using Facebook. Id., ¶ 46 (users "exchange their time, attention, and personal data for access to Facebook's services"). In addition, small and medium businesses reliant on "Social Advertising" have lacked lower-priced and higher-quality alternatives to Facebook, id., ¶¶ 52, 252, and the States' economies in general have suffered from suppressed innovation and investment in the social-networking space. **[**37]** Id., ¶¶ 8, 230, 246. Although these allegations are a shade vague, the Court finds them enough to at least satisfy the pleading requirements for *parens patriae* standing in the context of asserted antitrust violations.

Facebook attempts to distinguish Georgia v. Pennsylvania Railroad and New York v. Microsoft based on the size of the harms caused by the antitrust violations in those cases: a price-fixing conspiracy amongst twenty railroads and unlawful maintenance of Microsoft's monopoly in personal-computer operating systems, respectively. See MTD States at 5. Rather than undermining Plaintiffs' position, New York v. Microsoft supports their standing to bring this action. There, the court held that Microsoft's conduct had caused the requisite "significant adverse effect on competition within the [plaintiff] state[s]," such that "the suit c[ould] be said to be for the benefit of the public" because "millions of citizens of, and hundreds, if not thousands, of enterprises in each of the [states] utilize[d] PCs running on Microsoft software." *209 F. Supp. 2d at 151-52* (citation omitted and cleaned up). Here, the State Plaintiffs have similarly alleged that tens, if not hundreds, of millions of their citizens consistently **[**38]** use Facebook Blue, and that U.S. advertisers paid over $30 billion to access those users in 2019 alone. See Redacted Compl., ¶¶ 1, 48, 68-70. The Court thus fails to see how, at this stage especially, it could find that Facebook's alleged squelching of competition lacked "sufficiently severe and generalized" consequences for Plaintiffs' economies; the damage to their quasi-sovereign "interest[s] in economic supervision" would seem, at the very least, comparable to the harm caused by Microsoft. *Kleppe, 533 F.2d at 674*. To the extent Defendant rejoins that social-networking services are essentially whimsical enterprises, such that suppressed competition in that market cannot as a matter of law have a sizeable effect on the overall economic well-being of a state, see Reply States at 5-6, the sheer size of the related advertising market alone plausibly suggests otherwise.

Plaintiffs, accordingly, have established their standing to sue *parens patriae* at this stage.

B. Platform Policies

Moving now to the merits, the Court starts with the States' challenges to Facebook's Platform-related conduct under *Section 2 of the Sherman Act*. ***HN3***[] That Section prohibits monopoly maintenance, an offense that "has two elements: (1) the possession **[**39]** of monopoly power in the relevant market and (2) the willful . . . maintenance **[*24]** of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." *United States v. Microsoft Corp., 253 F.3d 34, 50, 346 U.S. App. D.C. 330 (D.C. Cir. 2001)* (quoting *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*). This second element of a *Section 2* violation is usually referred to by the shorthand of "anticompetitive" or "exclusionary conduct." *Id. at 58*.

By way of refresher, Plaintiffs allege that Facebook adopted and enforced a number of anticompetitive policies governing the use of its APIs. Most prominently, in 2013 it announced a policy of refusing to allow third-party, freestanding apps (like the chess app or the ESPN app discussed above) to access those APIs if they "replicate[d] [Facebook's] core functionality" — *i.e.*, if they competed with Facebook Blue. See Redacted Compl., ¶ 201. The States allege that, from 2013 to 2015, Facebook enforced that policy against a number of freestanding apps to which it had previously offered API access. See id., ¶¶ 207-12 (Voxer), 215-16 (MessageMe), 217-18 (Path), 219-21 (Circle), 222-24 (Tsū), 225-29 (Phhhoto). Facebook also allegedly enforced the policies "proactively" against newly launched apps that it feared could become a threat, id., **[**40]** ¶ 203, such as Vine. Id., ¶¶ 213-14. The

States contend that these actions represent unlawful "conditional dealing" or unlawful "refusal[s] to deal" with apps that had their API access revoked or blocked. See States Opp. at 34-35.

This Court, however, agrees with Facebook that both theories hold no water as a matter of law. That result follows from three conclusions. First, under current antitrust doctrine, Facebook's general policy of refusing to provide API access to its competitors does not itself violate *Section 2*. Second, although specific instances in which Facebook revoked a competitor's API permissions (after previously providing it access) might have violated *Section 2*, the last alleged instance occurred in 2015, and there is therefore no current or impending violation of law for the Court to enjoin here. Third, and more prosaically, Plaintiffs have failed to plead facts to support a "conditional dealing" theory. The Court looks at the first two together and then moves to the third.

For those who will consider this Opinion alongside the Court's companion Opinion in the FTC case, the following "legal framework" section is the same in both. The analysis that follows diverges somewhat given the **[**41]** different legal regimes governing suits by States and suits by the FTC, although the outcome is similar.

1. *Refusal to Deal*

a. Legal Framework

HN4[] The central principle that governs refusal-to-deal claims is that, as a general matter, a monopolist has "the right to refuse to deal with other firms," which includes the right to "refus[e] to cooperate with rivals." *Verizon Commc'ns Inc. v. L. Offs. of Curtis V. Trinko, LLP, 540 U.S. 398, 408, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)* (citing *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 601, 105 S. Ct. 2847, 86 L. Ed. 2d 467 (1985)*). That is because "[m]onopolists are both expected and permitted to compete like any other firm," and "[p]art of competing like everyone else is the ability to make decisions about with whom and on what terms one will deal." *Viamedia, Inc. v. Comcast Corp., 951 F.3d 429, 454 (7th Cir. 2020)* (citations omitted). This general no-duty-to-deal rule holds even where a monopolist refuses to deal with its competitor merely "in order to limit entry," *Trinko, 540 U.S. at 407* — in other words, because it wants to prevent that rival from competing with it. See, e.g., **[*25]** *Olympia Equip. Leasing Co. v. W. Union Tel. Co., 797 F.2d 370, 375-76 (7th Cir. 1986)* ("Today it is clear that a firm with lawful monopoly power has no general duty to help its competitors" and thus no duty "to extend a helping hand to new entrants . . . [or] help [rivals] . . . survive or expand . . . ."); *Novell, Inc. v. Microsoft Corp., 731 F.3d 1064, 1074 (10th Cir. 2013)* ("Even a monopolist generally has no duty to share . . . its intellectual or physical property with a rival."); *Fed. Trade Comm'n v. Qualcomm Inc., 969 F.3d 974, 993 (9th Cir. 2020)* ("As the Supreme Court **[**42]** has repeatedly emphasized, there is no duty to deal under the terms and conditions preferred by a competitor's rivals.") (quoting *Pac. Bell Tel. Co. v. Linkline Commc'ns, Inc., 555 U.S. 438, 457, 129 S. Ct. 1109, 172 L. Ed. 2d 836 (2009)*); *Aerotec Int'l, Inc. v. Honeywell Int'l, Inc., 836 F.3d 1171, 1184 (9th Cir. 2016)* (rejecting argument that refusal to deal is unlawful because it was motivated by "intent to foreclose competition").

These decisions, to be clear, "are not premised on the view that [monopolist refusals to deal] are incapable of harming competition"; obviously, "refusals to aid new entrants can indeed" have that effect. See Daniel A. Crane, Does Monopoly Broth Make Bad Soup?, 76 Antitrust L.J. 663, 669 (2010). Rather, the rule declaring unilateral refusals to deal essentially "per se lawful," id. at 666, or "presumptive[ly] legal[]," *Novell, 731 F.3d at 1073*, rests on three overriding considerations of antitrust policy. First, and most importantly, "[f]irms may acquire monopoly power by establishing an infrastructure that renders them uniquely suited to serve their customers. Compelling such firms to share the source of their advantage is in some tension with the underlying purpose of ***antitrust law***, since it may lessen the incentive for the monopolist, the rival, or both to invest in those economically beneficial facilities." *Trinko, 540 U.S. at 407-08*. Put another way, already large and successful firms "might be deterred from investing, innovating, **[**43]** or expanding . . . with the knowledge [that] anything [they] creat[e] [they] could be forced to share," while "smaller [competitors] might be [similarly] deterred, knowing [they] could just demand the right to piggyback on [their] larger rival." *Novell, 731 F.3d 1073*. That equilibrium would hinder, rather than advance, consumer welfare. See *Olympia Equip. Leasing, 797 F.2d at 379* ("Consumers would be worse off if a firm with monopoly power had a duty to extend positive assistance to new entrants, or having extended it voluntarily a duty to continue it indefinitely."). Second, "compelled sharing puts federal courts in the role of central planners," requiring them to pick and choose the applicable terms and conditions of the forced sharing they would order "despite their being ill-equipped to assume this role." Aerotec, 836 F.3d at 1183. Finally, "compelled sharing may actually provide opportunities for collusion" between the monopolist and its rival or rivals. Id. Collusion is "the supreme evil of antitrust," Trinko, 540 U.S. at 408, and itself quite "injuri[ous] to consumers and the competitive process alike." Novell, 731 F.3d at 1073.

Nevertheless, the general no-duty-to-deal rule does have a "narrow-eyed needle" of an exception, id. at 1074, traceable to the Supreme Court's decision in Aspen Skiing. In that case, the defendant **[**44]** owned three of the four ski resorts in the Aspen, Colorado, market (making it a monopolist), and it had long operated a joint venture with the fourth (a rival mountain) that provided a ticket good for all four. See 472 U.S. at 588-92. That joint ticket was profitable for both parties and made customers happy. Id. at 610. The defendant Aspen Skiing, **[*26]** however, eventually terminated the joint ticket. Plaintiff Highlands "tried a variety of increasingly desperate measures to re-create the joint ticket," including eventually "offering to buy the defendant's tickets at retail price." Trinko, 540 U.S. at 408-09. Aspen Skiing refused to even accept those tickets at its resorts. According to the Court, based on these facts, the jury (which had found liability) could have reasonably concluded that Aspen Skiing "was not motivated by efficiency concerns and . . . was [instead] willing to sacrifice short-run benefits and consumer goodwill in exchange for a perceived long-run impact on its smaller rival." 472 U.S. at 610-11. That, the Court held, was sufficient for Section 2 liability.

As the case has come to be understood, Aspen Skiing ran afoul of the Sherman Act — despite the general no-duty-to-deal rule — because it acted in a predatory fashion, which is to say it deliberately **[**45]** harmed itself (and consumers) in order to harm its competitor more. Consider the analogy of a predatory pricing scheme, in which a firm prices its goods below its costs and below its rivals' costs with the goal of driving those rivals out of the market and leaving it standing alone; such a scheme works where the predatory firm takes advantage of its greater ability to withstand the losses caused by its below-cost pricing. See Novell, 731 F.3d at 1075 (drawing this comparison); Brooke Grp. Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 224, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993) (explaining predatory-pricing doctrine). Aspen Skiing was doing something very similar. By terminating a profitable and customer-pleasing joint venture, and refusing to even recreate it by accepting vouchers bought at retail price, it was enduring short-term pain with the exclusive goal of driving its rival (which could not stand that pain) out of the market. The defendant thus lost the usual protection of the general no-duty-to-deal rule, since it had used its general right to choose with whom it deals "as part of a larger anticompetitive enterprise" — *i.e.*, an enterprise aimed at "harming competition," and therefore consumers, "by entrenching a dominant firm and enabling it to extract monopoly rents once the competitor is killed **[**46]** off." Viamedia, 951 F.3d at 462 (quoting Novell, 731 F.3d at 1075) (cleaned up); see also Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** vol. IIIB, ¶ 772d3, at 235 (4th ed. 2014).

The "larger anticompetitive enterprise" that characterizes an Aspen Skiing violation, crucially, cannot simply be an intent to harm — or, the flip side of the same coin, to avoid helping — a rival or rivals. "In concentrated markets the intent to maintain or improve one's own market position always entails the knowledge that rivals must suffer," and if ***antitrust law*** were to condemn every action taken by a monopolist with the "effect or purpose of limiting competition with itself," there would be little left to the rule that monopolists have no duty to aid their competitors. See Areeda & Hovenkamp, ¶ 772c2, at 220-21. That is why the Supreme Court has described Aspen Skiing as "at or near the outer boundary of § 2 liability," Trinko, 540 U.S. at 409, and "refused to extend liability to various other refusal to deal scenarios." Novell, 731 F.3d at 1074; but see Steward Health Care Sys., LLC v. Blue Cross & Blue Shield of Rhode Island, 311 F. Supp. 3d 468, 483 (D.R.I. 2018) (arguing that Trinko should not be read as "pull[ing] back the reins on refusal-to-deal claims"). And that is why the touchstone for liability is the sort of predatory design described above: "where the only conceivable rationale or purpose" **[**47]** for the refusal to deal is "to sacrifice short-term benefits in order to obtain higher **[*27]** profits in the long run from the exclusion of competition." Aerotec, 836 F.3d at 1184 (citation omitted).

HN5[] Courts have accordingly coalesced around a three-part test for unlawful refusals to deal, drawn from Aspen Skiing's particular facts and aimed at sniffing out predation while avoiding over-inclusiveness. First, "there must be a preexisting voluntary and presumably profitable course of dealing between the monopolist and rival" with which the monopolist later refuses to deal. Novell, 731 F.3d at 1074; Qualcomm, 969 F.3d at 993. It was the absence of this preexisting relationship that doomed the plaintiffs in Trinko, as the Court upheld the dismissal of their Aspen Skiing claim at the pleading stage on that basis, despite their allegations that Verizon's refusal to deal with rivals was intended to, and did, blunt their growth. See 540 U.S. at 404-05, 407, 409. ***HN6***[] Second, "the refusal to deal [must] involve[] products that the defendant already sells in the existing market to other similarly situated customers." *Qualcomm, 969 F.3d at 994*; see Areeda & Hovenkamp, ¶ 773d3, at 233 (defendant must be "selling [the] particular product or service to others but refu[sing] to sell that same product or service to" the rival) (citing *Trinko, 540 U.S. at 410*). Third, and most importantly, "[t]he **[**48]** monopolist's discontinuation of the preexisting course of dealing must suggest a willingness to forsake short-term profits to achieve an anti-competitive end," *Novell, 731 F.3d at 1075* (citation omitted); see *Qualcomm, 969 F.3d at 993*, rather than to advance a valid business purpose. See also *Covad Commc'ns Co. v. Bell Atl. Corp., 398 F.3d 666, 675 (D.C. Cir. 2005)* (to prevail on refusal-to-deal claim, plaintiff "will have to prove [that defendant's] refusal to deal caused [defendant] short-term economic loss"). The cases, and the leading treatise, offer a demanding gloss on this prong of the test: *Qualcomm* requires the predatory motivation to be "the only conceivable rationale or purpose" for the otherwise inexplicable profit sacrifice, see *969 F.3d at 993*; Novell asks whether the cessation of dealing was "irrational but for its tendency to harm competition," *731 F.3d at 1076*; and Areeda & Hovenkamp look for "an unexplained, apparently irrational change in an established course of dealing." Areeda & Hovenkamp, ¶ 772d3, at 233.

b. Application

i. Facebook Policies

Applying these principles, it is clear off the bat that Facebook's adoption of a policy of not offering API access to competitors did not, standing alone, violate *Section 2*. ***HN7***[] As set out above, a monopolist has no duty to deal with its competitors, and a refusal to do so is generally lawful even if it is motivated, as Verizon's **[**49]** was in Trinko, by a desire "to limit entry" by new firms or impede the growth of existing ones. See *540 U.S. at 408*. It follows that a firm's merely announcing its choice not to deal with competitors, whatever the motivation for doing so, cannot violate *Section 2*. Plaintiffs' core argument for why the policies themselves are unlawful — that their promulgation was intended to, and did, "deter[] apps with established user networks from . . . developing social features that would have threatened Facebook," States Opp. at 35 — misses the boat. The central teaching of the cases discussed above is that Facebook had no antitrust duty to avoid creating that deterrent. See, e.g., *Olympia Equipment Leasing, 797 F.2d at 375* ("Today it is clear that a firm with lawful monopoly power has no general duty to help its competitors . . . by . . . pulling its competitive punches.").

[*28] Facebook's general policy of withholding API access from competitors, moreover, was plainly lawful to the extent it covered rivals with which it had no previous, voluntary course of dealing. (Other rivals are addressed in Section B.1.b.ii., *infra*.) Such prior history of dealing, after all, is a necessary element of an *Aspen Skiing* claim. That is yet another reason why the mere act of announcing **[**50]** or maintaining a general no-dealing-with-competitors policy cannot, in and of itself, violate *Section 2*; rather, the analysis must focus on particular acts. See Areeda & Hovenkamp, ¶ 773e, at 273 (explaining that Aspen Skiing violations are "visible and idiosyncratic event[s]"). Consider an example from Plaintiffs' Complaint: citing its policies, in early 2013 Facebook blocked the API access of Vine, a new app it viewed as a competitor, mere hours after its launch. See Redacted Compl., ¶¶ 213-14. That decision was plainly lawful, per *Trinko*, because it was prospective: Facebook had not previously allowed Vine to access its APIs. Although the company was enforcing its "replicating core functionality" policy against Vine, that fact makes no difference to the Aspen Skiing analysis; rather, whether the specific refusal to deal with Vine contravened Section 2 depends on the details of the refusal itself.

To be clear, it is possible that were a monopolist to embark on a concerted scheme of serial refusals to deal with rivals, that scheme or "course of conduct" could amount to a separate and independent violation of the Sherman Act. See *United States v. Microsoft Corp., 253 F.3d 34, 78, 346 U.S. App. D.C. 330* (noting course-of-conduct theory without passing on its validity); **[**51]** *infra* at 62-63 (further discussing theory). Even if such a claim were cognizable, however, simply maintaining a policy of refusing to deal with rivals would not be enough. ***HN8***[] Rather, to be actionable, an unlawful refusal-to-deal scheme would have to be made up of refusals that were themselves independent violations of the Aspen Skiing test. See *Simon & Simon, PC v. Align Tech., Inc., No. 19-506, 2020 U.S. Dist. LEXIS 72499, 2020 WL 1975139, at *7-8 (D. Del. Apr. 24, 2020)* ("Plaintiff's characterization of [the defendant's] otherwise non-actionable refusals to deal as a 'scheme' do[es] not save its claims."); *Eatoni Ergonomics, Inc. v. Rsch. In Motion Corp., 826 F. Supp. 2d 705, 709-10 (S.D.N.Y. 2011)* ("[Plaintiff] does not, and cannot, cite any authority for the proposition that a series of unilateral acts that do not violate the antitrust laws may be aggregated into an unlawful 'course of conduct.'"), aff'd, *486 F. App'x 186 (2d Cir. 2012)*; *Masimo Corp. v. Tyco Health Care Grp., L.P., No. 02-4770, 2004 U.S. Dist. LEXIS 26916, 2004 WL 5907538, at *5-6 (C.D. Cal. June 10, 2004)* (explaining that a course-of-conduct liability theory cannot "allow for clearly legal acts to be thrown into the mix to bolster a plaintiff's antitrust case"). Otherwise, as several scholars have persuasively explained, monopolists might face liability for refusals to deal that are categorically protected from scrutiny for the policy reasons explained above. See Crane, 76 Antitrust L.J. at 666-69; Douglas H. Ginsburg & Koren Wong-Ervin, Challenging Consummated Mergers Under Section 2 (George Mason Univ. L. & Econ. Paper **[**52]** No. 20-14, May 2020), https://bit.ly/3wPRpnx; see also *infra* at 64. The States, therefore, cannot get anywhere by reframing Facebook's adoption of a policy of refusing to deal with all competitors as the execution of an unlawful scheme of monopoly maintenance. ***HN9***[] Rather, such a scheme must involve specific instances in which that policy was enforced (i) against a rival with which the monopolist had a previous course of dealing; (ii) while the monopolist kept dealing with others in the market; (iii) at a short-term profit loss, with no conceivable rationale **[*29]** other than driving a competitor out of business in the long run.

ii. Specific Refusals

Plaintiffs rejoin that they have alleged a number of specific refusals to deal that in fact meet those requirements. See States Opp. at 38. All such pleaded instances, however, took place from 2013 to 2015, with the latest — revocation of Ts?'s API access — happening in September 2015. See Redacted Compl., ¶¶ 222-24. Even assuming that those specific refusals to deal ran afoul of *Aspen Skiing*, the five-year delay that preceded the States' Complaint is fatal to their claim for equitable relief under *Section 16 of the Clayton Act*.

HN10[] *Section 16*, as noted above, authorizes "injunctive **[**53]** relief" "against threatened loss or damage by a violation of the antitrust laws . . . when and under the same conditions and principles as injunctive relief against threatened conduct that will cause loss or damage is granted by courts of equity." *15 U.S.C. § 26*. As it has been interpreted, that provision authorizes the usual equitable practice under which courts may enter two different kinds of injunctions: (i) those that "attempt[] to foreclose a future harmful act," known as "preventive" injunctions; and (ii) those aimed at "prevent[ing] the future harmful effects of past acts," known as "reparative" injunctions. See *Lampkin v. Dist. of Columbia, 886 F. Supp. 56, 62 (D.D.C. 1995)* (citing Dan B. Dobbs, Law of Remedies 164 (2d ed. 1993)); see also *California v. Am. Stores Co., 495 U.S. 271, 282, 110 S. Ct. 1853, 109 L. Ed. 2d 240 (1990)* (interpreting *Section 16* to authorize divestiture, a reparative remedy, so long as the "harm to . . . consumers persists" from, and therefore is still "threatened" by, the unlawful merger). The States here seek both kinds of relief as remedies for Facebook's alleged refusal-to-deal violations. On the preventive front, they request that "Facebook be enjoined and restrained from continuing to engage in any anticompetitive conduct and from adopting in the future any practice, plan, program, or device having a similar purpose **[**54]** or effect." Redacted Compl., ¶ 277(2). On the reparative front, they seek "such other and further equitable relief as this Court may deem appropriate to restore competitive conditions and lost competition" caused by Facebook's past Platform-related conduct. Id., ¶ 277(8).

Given that the only alleged conduct here that might have violated *Section 2* took place from 2013 to 2015, however, the States cannot plausibly meet the requirements for either form of relief. See *Gov't of Puerto Rico v. Carpenter Co., 442 F. Supp. 3d 464, 474 (D.P.R. 2020)* (granting motion to dismiss where government plaintiff had "failed to plausibly establish that injunctive relief should be granted" under *Section 16* because "it [was] apparent from the face of the Complaint that the last injurious act in the [alleged price-fixing] scheme befell almost ten years ago") (emphasis omitted).

HN11[] Start with the preventive injunction, the key requirement for which is familiar: the States must "demonstrate a significant threat of injury from an impending violation of the antitrust laws or from a contemporary violation likely to continue or recur." *Zenith Radio Corp. v. Hazeltine Rsch., Inc., 395 U.S. 100, 130, 89 S. Ct. 1562, 23 L. Ed. 2d 129 (1969)*; see also *In re New Motor Vehicles Canadian Exp. Antitrust Litig., 522 F.3d 6, 14 (1st Cir. 2008)* ("*Section 16* . . . dovetails with Article III's requirement that in order to obtain forward-looking relief, a plaintiff must face a threat of injury that is both real and immediate, not **[**55]** conjectural or hypothetical.") (cleaned up and citation omitted); City of Los Angeles v. Lyons, 461 U.S. 95, 103, 111, [*30] 103 S. Ct. 1660, 75 L. Ed. 2d 675 (1983) (explaining that this element of "whether the complaint states a sound basis for equitable relief" essentially overlaps with Article III standing inquiry).

Facebook's ostensible scheme of revoking rivals' API access in a manner that violated Aspen Skiing is not ongoing or "contemporary," however, since the last revocation alleged occurred in 2015 and the policies themselves were suspended in 2018. See *supra* at 15. Nor is there any reason to think, given those facts, that such a scheme is "likely to . . . recur." Zenith Radio, 395 U.S. at 130; see Duty Free Americas, Inc. v. Estee Lauder Companies, Inc., 797 F.3d 1248, 1270-72 (11th Cir. 2015) (affirming dismissal of Section 16 claim for injunctive relief based on alleged antitrust violations that occurred four years before case was filed and were unlikely to affect plaintiff again). Plaintiffs suggest that Facebook's 2018 suspension of its API policies does not "establish that [it] stopped" targeting competitors for predatory API withdrawals. See States Opp. at 13. **HN12**[] That gets it backwards: it is the States' burden to "substantiate the claim" for injunctive relief by "provid[ing] proof," or here well-pleaded allegations, "that the harm . . . is likely to occur again." Wisconsin Gas Co. v. FERC, 758 F.2d 669, 674, 244 U.S. App. D.C. 349 (D.C. Cir. 1985). Yet based on the facts they have **[**56]** pleaded, and the judicially noticeable fact that Facebook discontinued the relevant Platform policies over two years ago, the States have alleged no "more than a mere possibility . . . that the injury will occur" again. See 11A Charles Alan Wright & Arthur R. Miller, Fed. Prac. and Proc. § 2942 (3d ed.).

A reparative injunction is also clearly unavailable based on the facts alleged. To be sure, Plaintiffs have pleaded the existence of "an ongoing injury" — *i.e.*, "continuing, present adverse effects," In re Nifedipine Antitrust Litig., 335 F. Supp. 2d 6, 18 (D.D.C. 2004) (quoting O'Shea v. Littleton, 414 U.S. 488, 495-96, 94 S. Ct. 669, 38 L. Ed. 2d 674 (1974)) — from the alleged 2013-15 scheme of unlawful revocations of API access to competitor apps. To wit, that scheme allegedly blunted the growth of existing competitors to Facebook Blue, deterred other potential competitors from entering Facebook's market, and even "discouraged outside investment" in new firms, see Redacted Compl., ¶¶ 187, 211, 246, and the resulting loss in competition allegedly caused a number of harms to the States' economic well-being that are still ongoing. Id., ¶¶ 248-54.

The problem is that there is nothing the Court could order Facebook to do that would remedy that specific injury. **HN13**[] The key feature of a reparative injunction is that "it requires the defendant **[**57]** to restore the plaintiff to a preexisting condition to which [the] plaintiff was entitled." Lampkin, 886 F. Supp. at 62. A divestiture order can do that; it can "restore competitive conditions," Redacted Compl., ¶ 277(8), by unwinding a specific transaction that should never have occurred. But here, the Court cannot put the States back in their rightful position. It cannot turn back the clock to 2013, 2014, or 2015 and order Facebook to provide API access to Voxer, MessageMe, Path, or any other potential competitor (many of which are now defunct, per the Complaint), or somehow otherwise undo or ameliorate the destruction of competition that the States allege occurred. Id., ¶¶ 216, 224, 229. Accordingly, "[a]n order enjoining [Facebook] . . . would have no remedial effect whatsoever on the continuing . . . [injury] [the States] expect to experience due to the past injury they allege." In re G-Fees Antitrust Litig., 584 F. Supp. 2d 26, 35 (D.D.C. 2008) (dismissing antitrust "claim for injunctive relief . . . **[*31]** for failure to state a claim"); see also In re Nifedipine, 335 F. Supp. 2d at 19 & n.25 (noting that "the plaintiffs would also lack standing to seek an injunction" based on past conduct where the "relief they seek would not be reasonably likely to redress th[at] injury").

The foregoing analysis, it is worth emphasizing, **[**58]** simply reflects the hornbook principle that, **HN14**[] "[a]s a general rule, past wrongs are not enough for the grant of an injunction." Qualcomm, 969 F.3d at 1005 (citation omitted) (holding that injunction would be inappropriate remedy for unlawful conduct that "substantially foreclosed competition in the relevant antitrust markets" but terminated "two years before the FTC filed its action"). The usual remedy in such cases is damages, see Lyons, 461 U.S. at 109, which Plaintiffs have not sought here and would likely be time barred in any event. See 15 U.S.C. § 15c (authorizing State attorneys general to sue *parens patriae* for damages caused to their citizens by antitrust violations); id. § 15b (imposing a four-year statute of limitations on such actions). Indeed, as is discussed at length below, courts frequently apply the doctrine of laches to bar equitable relief where the comparable limitations period has run. See Carpenter, 442 F. Supp. 3d at 474-75 (finding both that Puerto Rico had "failed to plausibly establish that injunctive relief should be granted" given the delay in suit and that, by the same token, "the laches doctrine applies"). Although the Court here does not apply laches to the States' challenge to Facebook's Platform-related conduct (nor does Facebook ask it to), the doctrine's **[**59]** likely applicability confirms the correctness of the Court's conclusion that equitable relief is unavailable as to events that occurred over five years ago.

In sum, then, while it is possible that Facebook's alleged scheme of serially revoking API access from competitor apps could form the basis of a plausible refusal-to-deal claim under *Aspen Skiing*, the Court need not address that question. Even assuming the answer is yes, injunctive relief is not available now for such a claim as a matter of law.

2. *Conditional Dealing*

Plaintiffs get no further by maintaining that Facebook's policies also violated antitrust rules against what they call "conditional dealing." See States Opp. at 35. As an initial matter, the States are wrong to argue that a monopolist violates that so-called doctrine "when it requires third parties seeking to obtain its products or services to refrain from taking some action that would tend to foster competition on the merits." Id. They cite only *Lorain Journal Co. v. United States, 342 U.S. 143, 149, 72 S. Ct. 181, 96 L. Ed. 162 (1951)*, for that proposition, and yet Lorain says nothing of the sort. That is unsurprising, as such a broadly formulated rule would cover refusals to deal with competitors, thus contradicting the cases discussed above — after all, **[**60]** such refusals can always be reframed as offers to deal only on the condition that the third party refrains from competing. See, e.g., Herbert Hovenkamp, FRAND and Antitrust, *105 Cornell L. Rev. 1683, 1697 (2020)* (defining "simple refusal[s] to deal" covered by Trinko rule to include "refusal[s] conditioned on a firm's status that cannot readily be changed," such as where a firm "agree[s] to sell to [non]competitors but not []competitors").

HN15[] To the extent any scholarly commentary uses the term "conditional dealing," rather, the phrase generally refers to actions such as "tying" or "exclusive dealing." *Id. at 1697, 1708*. The key fact distinguishing such conduct from a standard refusal to deal is that it is not "unilateral," but instead "involves some assay **[*32]** by the monopolist into the marketplace" that interferes with the relationship between rivals and third parties. *Novell, 731 F.3d at 1072*. Tying, for instance, occurs when a firm "require[s] third parties to purchase a bundle of goods rather than just the ones they really want," id., thereby leveraging the monopolist's power in the "tying" product market to harm its competitors (who lose access to customers) in the "tied" product market. See *Microsoft, 253 F.3d at 84*. "Exclusive dealing" is similar: it refers to a monopolist's conditioning **[**61]** the sale of a product on the buyer's agreement not to deal with its competitors. *Id. at 69-70*. Again, these "conditional dealing" schemes are thus categorically different from unilateral conduct that involves only the monopolist's competitors, such as its refusal to deal with them. The distinction is critical, as ***antitrust law*** is far more tolerant of unilateral behavior. See *Novell, 731 F.3d at 1072-73* (citing cases) ("Put simply if perhaps a little too simply, today a monopolist is much more likely to be held liable for failing to leave its rivals alone than for failing to come to their aid."); Hovenkamp, *105 Cornell L. Rev. at 1697*.

That brings us back to *Lorain Journal*, which, as it happens, involved a "a very special form of exclusive dealing, namely, a refusal to sell to end-user customers who purchase[d] from the monopolist's competitor[]." Kenneth L. Glazer & Abbott B. Lipsky, Jr., Unilateral Refusals to Deal Under Section 2 of the Sherman Act, 63 Antitrust L.J. 749, 800 n.75 (1995). There, the Journal, a local newspaper, had a "commanding" position in the advertising market of the city of Lorain, Ohio. See *342 U.S. at 145*. After a new radio station entered that market, the paper began to refuse to sell advertising space "in the Journal [to] any Lorain County advertiser who advertised or who **[**62]** [the paper] believed to be about to advertise" with the radio station. *Id. at 148*. The paper's bet was that many advertisers could not afford to lose out on the chance to advertise with it, and it was right; the scheme caused most firms to avoid advertising on the radio station, restoring the Journal to its local monopoly. *Id. at 148-49*. On those facts, the Court found a violation of *Section 2 of the Sherman Act*. *Id. at 152-53*. The key point for our purposes is that the Journal did not simply refuse to deal with the competitor radio station — *e.g.*, it did not merely refuse to print advertisements for the station itself in its pages. The Journal instead refused to deal with any and all customers unless those customers agreed not to deal with the competitor station, thereby interfering with its rival's ability to compete on the merits.

For the *Lorain Journal* principle (or exclusive-dealing doctrine generally) to apply to this case, as Plaintiffs argue it does, they would thus have to allege that Facebook conditioned access to its Platform APIs on app developers agreeing not to deal with other social-networking services. And, indeed, the States' Opposition suggests that Facebook did just that. See States Opp. at 35 ("Facebook . . **[**63]** . adopt[ed] policies prohibiting app developers from promoting competing social networks."); id. ("These policies deterred apps from . . . working with other [social] networks . . . ."). If Facebook had in fact interfered in that way with the ability of competing social-networking services to make agreements with app developers, it could plausibly have violated *Section 2*; such conduct might well have had a "significant effect in preserving [Facebook's] monopoly" by keeping user engagement with competing social-networking services "below the critical level necessary for any rival to pose a real threat to [its] market share." *United States v. Dentsply Int'l, **[*33]** Inc., 399 F.3d 181, 191 (3d Cir. 2005)* (finding *Section 2* liability based on exclusive dealing); see also *Microsoft, 253 F.3d at 69-70* (same).

Plaintiffs, however, have not sufficiently pleaded the sort of conduct just described. As discussed above, see *supra* at 13-14, the only claim to this effect in their Complaint is their allegation that, "[i]n 2011, Facebook adopted a policy aimed at forbidding . . . any apps that linked or integrated with competing social platforms . . . from accessing its APIs." Redacted Compl., ¶ 199. The precise allegation here, however, appears to be that this 2011 policy was "aimed at" forbidding third-party apps from **[**64]** using Facebook's APIs if they "linked or integrated with" other social-networking services, not that the policy actually did condition API access on refraining from such dealings. The Complaint, moreover, pleads no facts as to how or whether that aim was achieved — in other words, there is no indication of what the policy actually said or did, or how it was implemented to have the effect of discouraging third-party apps from dealing with rivals. ***HN16***[] As the D.C. Circuit has cogently explained, whether a "monopolist's conduct . . . is . . . condemned as exclusionary" depends on "the effect of that conduct, not upon the intent behind it." *Microsoft, 253 F.3d at 59*.

The Court here is not relying on a technical pleading defect. On the contrary, even if the States had alleged that the 2011 policy in fact had this prohibition (and thus presumably caused the worrisome effect), the Court would disregard that allegation as inconsistent with the actual text of the 2011 policy. See *supra* at 13-14; *Vanover, 77 F. Supp. 2d at 98* (court may consider material outside pleadings where it is "referred to in the complaint and is central to plaintiff's claim"). As the full text reveals, the policy stated only that "Apps on Facebook may not integrate, link to, **[**65]** promote, distribute, or redirect to any app on any other competing social platform." Redacted FTC Compl., ¶ 139. By "Apps on Facebook," it is clear that the policy was referring to the "canvas apps" that Facebook allowed developers to create for use within the Facebook site itself — *e.g.*, the personality-test app — rather than freestanding apps such as the ESPN app, which a user would access and use separately. See *supra* at 11. The upshot is that while the 2011 policy prohibited apps built to be used on Facebook from providing a link to a different social-networking platform, like Circle or Path, it did not prevent freestanding apps from linking to or interoperating with competitor social-media services. It did not, for instance, provide that the ESPN app could only allow a user to sign in with Facebook credentials (as opposed to, say, Google credentials), or only add a Facebook "Like" button and not a "share" button from Path or Circle. Nor did it require the ESPN app to refrain from allowing users to search for their contacts on other apps, as they did for their Facebook friends using the Find Friends API.

Properly understood, then, the 2011 policy's conditions did not violate *Section 2 of the Sherman Act* **[**66]** . Nor do Plaintiffs so argue. The policy simply regulated the acceptable features of apps specifically built to be used on Facebook itself; it does not appear to have prevented an app developer from building a separate version of its app that could be accessed and used within the website of another PSN service. For instance, the developer who built a personality-test app for Facebook could build the same app for Google+ without running afoul of the policy; its terms merely prohibited the Facebook version of the app from linking or redirecting to the Google+ version. The 2011 policy was thus a far cry from a policy that told app developers that **[*34]** they could only access Facebook's platform if they promised to only build their app for Facebook. By rough analogy, it is as if the Lorain Journal, rather than refusing to carry advertisements from any business that also advertised with the competing radio station, instead merely required that advertisements appearing in its paper had to avoid mentioning the radio station. Such a focused prohibition on the use of a monopolist's own facilities obviously could not have "significantly limited" the "opportunities for [competitors] **[**67]** to enter into or remain in [the] market" for personal-social-networking services, as is required for *Section 2* liability. *Microsoft, 253 F.3d at 69*. As such, the States' "conditional dealing" theory of a *Section 2* violation fails to state a claim as a matter of law.

* * *

For the foregoing reasons, the Court agrees with Facebook that none of Plaintiffs' Section 2 challenges to its Platform-related policies and conduct survives the instant Motion.

C. Acquisitions

Facebook next argues that the States' challenges to its acquisitions must similarly be dismissed under the doctrine of laches. Correct again. **HN17**[] That equitable doctrine "bars a plaintiff from maintaining a suit if he unreasonably delays in filing a suit and as a result harms the defendant." *Nat'l R.R. Passenger Corp. v. Morgan, 536 U.S. 101, 121 (2002)*. The States filed this action in December 2020, seeking injunctive relief under *Section 16 of the Clayton Act* from the allegedly harmful effects of Facebook's anticompetitive acquisitions. But their main targets, the Instagram and WhatsApp mergers, both of which they challenge under *Section 7 of the Clayton Act* and *Section 2 of the Sherman Act*, took place in 2012 and 2014, respectively. See Redacted Compl., ¶¶ 119, 166. Begging the reader's indulgence for another lengthy exposition, the Court will now explain why that delay **[**68]** dooms the States' challenges here.

1. *Legal Framework*

HN18[] Although what constitutes an "unreasonable delay" in filing suit is generally a fact-intensive question, in the context of injunctive actions under *Section 16*, many courts have held that the Clayton Act's "four-year statute of limitation" on damages actions should be "used as a 'guideline'" for "computing the laches period." *Oliver v. SD-3C LLC, 751 F.3d 1081, 1085 (9th Cir. 2014)* (quoting *Int'l Tel. & Tel. Corp. v. Gen. Tel. & Elecs. Corp., 518 F.2d 913, 928 (9th Cir. 1975)*, disapproved of on other grounds by *California v. Am. Stores Co., 495 U.S. 271, 110 S. Ct. 1853, 109 L. Ed. 2d 240 (1990)*); see also *Carpenter, 442 F. Supp. 3d at 474*; *Duty Free Americas, Inc. v. Estee Lauder Companies, Inc., No. 12-60741, 2014 U.S. Dist. LEXIS 43673, 2014 WL 1329359, at *14 (S.D. Fla. Mar. 31, 2014)*; Areeda & Hovenkamp vol. II, ¶ 320g, at 373 & n.199 (citing more decisions holding "the four-year statutory limitation period for damage actions . . . determinative of the equity result as well"). As these courts explain, "The doctrine of laches is premised upon the same principles that underlie statutes of limitation: the desire to avoid unfairness that can result from the prosecution of stale claims." *Midwestern Mach. Co. v. Nw. Airlines, Inc., 392 F.3d 265, 277 (8th Cir. 2004)* (citation omitted); see also *IT&T, 518 F.2d at 928*; ("[W]e think that a basic linkage is present [between the Clayton Act's separate causes of action for damages and injunctions] because of the fact that the two categories of relief serve as tools of enforcement and remedy for the same set of substantive rights.").

[*35] **HN19**[] The starting presumption, then, is that regardless of whether a *Section 16* plaintiff **[**69]** seeks damages or an injunction, it must file its lawsuit within four years from "the accrual of the claim." *Menominee Indian Tribe of Wisconsin v. United States, 614 F.3d 519, 531, 392 U.S. App. D.C. 202 (D.C. Cir. 2010)* (cleaned up) (citing *Gull Airborne, 694 F.2d at 843*); accord *Oliver, 751 F.3d at 1086* (looking to when "cause of action in antitrust accrues" because "in applying laches, we look to the same legal rules that animate the four-year statute of limitations under *section 4B [of the Clayton Act*]."). Generally, "[a] *Section 7* action challenging the initial acquisition of another company's stocks or assets accrues at the time of the merger or acquisition," *Concord Boat Corp. v. Brunswick Corp., 207 F.3d 1039, 1050 (8th Cir. 2000)*, giving the plaintiff four years from that time to sue. See also *Z Techs. Corp. v. Lubrizol Corp., 753 F.3d 594, 604 (6th Cir. 2014)* (same); Areeda & Hovenkamp, ¶ 320c5, at 349-350 (agreeing with this rule on policy grounds). The Court largely focuses on *Section 7* in this section and then examines the distinct *Section 2* component of Plaintiffs' attacks on Facebook's acquisitions in section III.C.1.d, *infra*. Following the lead of the parties and the cases, it uses the terms "acquisition" and "merger" interchangeably for purposes of this analysis.

This presumptive four-year laches period is particularly appropriate for challenges to acquisitions. The "traditional[]" remedy in such cases, which Plaintiffs seek here, see Redacted Compl. ¶ 277(8), is divestiture of the acquired assets and/or **[**70]** stock. See *Am. Stores, 495 U.S. at 281* (quoting *United States v. E.I. du Pont de Nemours & Co., 366 U.S. 316, 329-331, 81 S. Ct. 1243, 6 L. Ed. 2d 318 (1961)*). Such a remedy, if ordered well after the merger has closed, will usually prejudice the defendant by inflicting substantial "hardship and competitive disadvantage," especially where its "business operations [have been] combined" with those of the acquired company. *Ginsburg v. InBev NV/SA, 623 F.3d 1229, 1235 (8th Cir. 2010)* (holding divestiture remedy unavailable as a matter of law because of plaintiff's "inexcusable delay[]" in bringing suit); see also *Midwestern Mach., 392 F.3d at 277* (applying laches based on "substantial[] prejudice[]" to firm's shareholders "who invested [having] no reason to believe that a merger occurring more than seven years earlier could be the basis for suit"). For that reason, "where the equity relief" sought in a merger challenge "is retroactive in character, such as divestiture of illegally acquired assets," Areeda and Hovenkamp argue that the four-year time limit "should be absolute." Areeda & Hovenkamp ¶ 320g, at 374. Indeed, as they note, courts frequently find a divestiture remedy clearly unfair and unwarranted after delays in filing much shorter than four years — sometimes only months or even days after the merger's announcement. Id. ¶ 320g, 373 & n.198; see, e.g., *Ginsburg, 623 F.3d at 1235* (suit filed only two months after merger announcement **[**71]** and before closing); *Antoine L. Garabet, M.D., Inc. v. Autonomous Techs. Corp., 116 F. Supp. 2d 1159, 1173 (C.D. Cal. 2000)* (delay of six months after merger announcement); *Taleff v. Sw. Airlines Co., 828 F. Supp. 2d 1118, 1124 (N.D. Cal. 2011)* (suit filed one day after closing).

2. *Application*

Given these precedents, the Court concludes that Plaintiffs' challenges to Facebook's 2012 and 2014 acquisitions are barred by laches. Going by the four-year "guideline" alone, *Oliver, 751 F.3d at 1085*, which is generous compared to the decisions set out above, and which prominent authorities argue "should be absolute," Areeda & Hovenkamp ¶ 320g, at 374, the **[*36]** States missed their window to sue by years. In the case of the Instagram acquisition, "the comparable statute of limitations time period ha[d] run . . . twice over" by the time they filed. *Midwestern Mach., 392 F.3d at 277* (applying laches). The Court is aware of no case, and the States provide none, in which a plaintiff other than the United States (against which laches does not apply), whether a state or a private party, was awarded equitable relief after such long post-acquisition delays in filing suit. Having thus "slumbered on [their] rights, [Plaintiffs'] equitable claims are now barred." Id.

That result is confirmed by applying the standard laches elements. Cf. *Steves & Sons, Inc. v. JELD-WEN, Inc., 988 F.3d 690, 716 (4th Cir. 2021)* (suggesting that a "singular focus on the date that a merger is consummated" is not appropriate). **[**72]** In brief, "Plaintiffs' years-long delay in bringing th[is] action was inexcusable as each challenged act was highly publicized," and "Facebook [would be] prejudiced by the unreasonable delay." *Reveal Chat Holdco, LLC v. Facebook, Inc., 471 F. Supp. 3d 981, 990 (N.D. Cal. 2020)* (discussing, *inter alia*, Instagram and WhatsApp acquisitions).

First, the States' long delays were unreasonable and unjustified as a matter of law. Both acquisitions were, per Plaintiffs' allegations, publicly announced, and the States were thus aware or certainly should have been aware of them from those points onward. See Redacted Compl., ¶¶ 124, 166, 199. The Complaint itself makes clear that concerns as to the effects of both on competition were apparent at the time. Plaintiffs allege that Facebook was "the dominant player" in Personal Social Networking Services "[a]t least as early as 2011," before either acquisition. Id., ¶ 68. Their position in this case, furthermore, is that "when the acquiring firm is a dominant firm or monopolist, competitive harm" from the acquisition of even a "potential competit[or] can be predicted with considerably more confidence[,] . . . . indicat[ing] a harsh rule against such mergers." States Opp. at 16 (quoting Areeda & Hovenkamp vol. V, ¶ 1122, at 59); see **[**73]** also Areeda & Hovenkamp vol. IV, ¶ 912a, at 91-92 (arguing that acquisition of a "nascent rival" "bears a very strong presumption of illegality" because it "eliminates an important route by which competition could have increased in the immediate future").

As to each acquisition, moreover, either judicially noticeable facts or the Complaint's allegations provide objective confirmation of contemporaneous antitrust concerns. After Facebook announced its plans to purchase Instagram in April 2012, see Redacted Compl., ¶ 124, the FTC conducted a highly publicized, four-month-long "investigation to determine whether the proposed acquisition . . . [would] violate *Section 7 of the Clayton Act*." Letter from April J. Tabor, Acting Secretary, Federal Trade Commission, to Thomas O. Barnett, Covington & Burling LLP (Aug. 22, 2012), https://bit.ly/3xaY3op. Although the agency ultimately allowed the merger to proceed with no action, the States' choice not to assert their own concerns at that time, let alone at any time in the next eight years, "bear[s] upon the issue of laches." *Am. Stores, 495 U.S. at 297* (Kennedy, J., concurring). As to WhatsApp, according to the Complaint itself, "some analysts recognized" "at the time" that "the **[**74]** only rationale for Facebook's $19 billion purchase price was the elimination of a potential competitor poised to mount a major challenge to Facebook's monopoly." Redacted Compl., ¶ 170. That perfectly summarizes Plaintiffs' exact theory of the case against the WhatsApp acquisition, see id., ¶¶ 179-80, 270, yet, again, it took them six years to come to court. **[*37]** Plaintiffs' Opposition, furthermore, does not argue or even suggest that the States were somehow not "able to pursue [their] claim[s]" at that time. Cf. *JELD-WEN, 988 F.3d at 718* (citations omitted).

Second, prejudice to Facebook, were equitable relief to be awarded now, is also apparent. ***HN20***[] As an initial matter, "[t]he bare fact of delay" beyond the analogous four-year statute of limitations "creates a rebuttable presumption of prejudice." *IT&T, 518 F.2d at 926* (citing *Gillons v. Shell Co. of Calif., 86 F.2d 600, 608 (9th Cir. 1936)* ("When the suit is filed after the statutory period, injury [*i.e.*, prejudice] is presumed.")); *Kaiser Aluminum & Chem. Sales, Inc. v. Avondale Shipyards, Inc., 677 F.2d 1045, 1057 (5th Cir. 1982)* (same; citing cases). The facts alleged in the Complaint, moreover, confirm the existence of economic prejudice here. According to the States, for the last five-plus years Facebook has made business decisions and allocated firm resources based on holding Instagram and WhatsApp, and it has also integrated their offerings **[**75]** to some extent into its core business. See Redacted Compl., ¶ 115 (quoting Zuckerberg email explaining plan to "integrate [Instagram's] products with ours"); id., ¶ 124 (Facebook "scale[d] back" or "cancel[ed]" a number of projects, including its "Mobile photos app," after buying Instagram); id., ¶ 127 (Facebook matched user accounts on Facebook Blue and Instagram to better target and serve ads); id., ¶¶ 176-78, 180 (Facebook has "take[n] active steps to utilize WhatsApp data in efforts to promote its core platform," including "combin[ing] user data across the services"). Although short of full business integration, Defendant's "expanded use of and investment in" the acquired assets "establishes economic prejudice resulting from [Plaintiffs'] [d]elay." *Pro-Football, Inc. v. Harjo, 567 F. Supp. 2d 46, 59, 62 (D.D.C. 2008)* (holding that laches barred cancellation action against trademark where "[e]conomic prejudice ar[ose] from investment in and development of the trademark") (citation omitted), aff'd in relevant part, *565 F.3d 880, 884, 385 U.S. App. D.C. 417 (D.C. Cir. 2009)* (agreeing that sufficient "evidence of prejudice . . . may arise from mere proof of continued investment in the late-attacked mark"); see also *Garabet, 116 F. Supp. 2d at 1173* (finding "serious prejudice and hardship" would be caused by divestiture given investment "spent **[**76]** on integrating the [merged] companies" and restructuring defendants' workforces).

Equitable relief would similarly prejudice Facebook's shareholders, see Redacted Compl., ¶ 99 (noting Facebook's 2012 IPO), especially those who invested within the last several years, by which point the WhatsApp and Instagram acquisitions had become old news. See *Midwestern Mach., 392 F.3d at 277*; cf. *Fed. Home Loan Bank Bd. v. Elliott, 386 F.2d 42, 54 (9th Cir. 1967)* (applying laches in non-antitrust suit seeking post-merger divestiture because of prejudice to "the rights of the shareholders . . . as of the day of the filing of the merger . . . to enjoy the benefits of the merger" and "prejudice [to] the rights of . . . shareholders who became such after the merger"). What is more, even if the existence of prejudice were debatable under the applicable precedents, "a lesser showing of prejudice is required" for laches in this case than in the above-cited cases, simply due to the sheer length of the delay. See *Harjo, 565 F.3d at 884-85* (eight-year delay) (citing *Gull Airborne Instruments, Inc. v. Weinberger, 694 F.2d 838, 843, 224 U.S. App. D.C. 272 (D.C. Cir. 1982)*); cf. *JELD-WEN, 988 F.3d at 729* (Rushing, J., concurring) ("The passage of time exacerbates th[e] complexities" that would be caused by divestiture "[a]fter a merger closes," "not only for the combined entity but also for nonparties who will be affected by a court order dividing the company."). **[**77]** Prejudice **[*38]** sufficient to trigger the rule of laches is manifest here.

3. Counterarguments

The States, unsurprisingly, object to the foregoing analysis on a number of grounds. The Court marches through each, but ultimately sticks to its guns.

a. Applicability of Laches

Plaintiffs first maintain that the usual laches framework does not properly govern in cases brought by states suing *parens patriae* and in the public interest. See States Opp. at 10-12. They cite no authority for that contention; they instead simply point out that most of the cases cited above were suits brought by private litigants — only *Carpenter* (which held that laches did apply) involved a government plaintiff, the territory of Puerto Rico. See *442 F. Supp. 3d at 464*. The dearth of cases (other than *Carpenter*) applying laches to bar merger challenges by states, however, does not somehow establish that states are immune from the doctrine. It instead seems to reflect the fact that there are very few cases like the present one, in which state plaintiffs delayed years and years in seeking equitable relief from an allegedly unlawful acquisition.

At any rate, to the extent that the question of laches' applicability to *Section 16* suits by state plaintiffs is **[**78]** open, *Carpenter* had the correct answer. The only other case that is close to being on point, *California v. American Stores Co., 495 U.S. at 271*, also supports the applicability of laches to state merger challenges. There, California sued in its capacity as *parens patriae* under *Section 16* to unwind the merger of two supermarket chains, claiming that it violated *Section 7*. *Id. at 274-75*; see *California v. American Stores Co., 872 F.2d 837, 839 (9th Cir. 1989)*. The case eventually reached the Supreme Court, which held (reversing the lower court) that divestiture was an available remedy in suits brought under *Section 16*. *Am. Stores, 495 U.S. at 278*. Throughout its opinion, the Court repeatedly referred to the suit as a "private action under *§ 16* of the Clayton Act," id. (emphasis added); see also *id. at 281, 284-85*, and emphasized that despite its holding, "equitable defenses such as laches . . . may protect consummated transactions from belated attacks by private parties" under *Section 16*. *Id. at 296*. Justice Kennedy wrote separately to emphasize his view that, given California's delay in suing while the FTC negotiated a pre-merger settlement with the defendant (the State waited to file until one day after the FTC approved the merger under the negotiated conditions), the lower courts should consider on remand whether "the bar of laches" in fact applied. *Id. at 298* (Kennedy, J., concurring). It is difficult to come away **[**79]** from these opinions with the impression that any Justice thought that *parens patriae* suits under *Section 16* are immune from a laches defense. See *New York. v. Kraft Gen. Foods, Inc., 862 F. Supp. 1030, 1033 (S.D.N.Y. 1993)* (citing American Stores for the proposition that "the State of New York[,] [though] a governmental actor, . . . is considered a private party when seeking an injunction pursuant to the Clayton Act"), aff'd sub nom. *State of N.Y. v. Kraft Gen. Foods, 14 F.3d 590 (2d Cir. 1993)*.

That approach makes sense given the history and purpose of *Section 16*. For the first two decades of its existence, the *Sherman Act* was interpreted not to provide for suits by either states or private parties. See *Paine Lumber Co. v. Neal, 244 U.S. 459, 471, 37 S. Ct. 718, 61 L. Ed. 1256 (1917)* (citing *Minnesota v. Northern Sec. Co., 194 U.S. 48, 24 S. Ct. 598, 48 L. Ed. 870 (1904)*, for proposition that "a private person cannot maintain a suit for an injunction under" **[*39]** the *Sherman Act*); *Georgia v. Evans, 316 U.S. 159, 162, 62 S. Ct. 972, 86 L. Ed. 1346 (1942)* ("[A]n amendment was necessary to permit suit for an injunction [for *Sherman Act* violations] by others than the United States."). Enacted in 1914, the *Clayton Act* "filled [that] gap . . . by authorizing equitable relief in private actions" under *Section 16*. *American Stores, 495 U.S. at 287*. Congress, however, specifically rejected an amendment that would have authorized "the attorney general of any State [to] bring suit in the name of the United States to enforce any of the antitrust laws." 51 Cong. Rec. S14519-27 (daily ed. Sept. 1, 1914); see *Evans, 316 U.S. at 162 n.1* (noting this history). **[**80]**

In expanding the universe of antitrust enforcers beyond the United States itself, Congress thus drew no distinction between states and private litigants: both simply came within the statute's authorization of "[a]ny person" to "sue for and have injunctive relief . . . against threatened loss or damage by a violation of the antitrust laws." *15 U.S.C. § 26*; see *Evans, 316 U.S. at 161* (holding that states qualify as "person[s]" under that provision); see also *Georgia v. Penn. R. Co., 324 U.S. at 447*. As such, the Congressional judgment was that states, like private parties, are entitled to relief under *Section 16* "under the same conditions and principles as injunctive relief against threatened conduct that will cause loss or damage is granted by courts of equity," *15 U.S.C. § 26* — "conditions and principles" that have always included the bar of laches against plaintiffs whose unreasonable delay prejudices the defendant.

This Court, then, agrees entirely with the position previously articulated by the United States in follow-on litigation to the *Microsoft* case:

> Although the States have traditionally played a significant role in American antitrust activity, they do not stand on equal footing with the United States as enforcers of the federal antitrust laws. The States possess important authority **[**81]** to seek both monetary and injunctive relief. In pursuing injunctive relief, however, the States appear before the Court as private parties, not as sovereign law enforcers. . . . [T]he relief they may seek is [therefore] subject to the limits Congress and the courts have imposed.

Mem. Amicus Curiae of the United States at 4, New York v. Microsoft Corp., No. 98-1233 (D.D.C. Apr. 15, 2002), https://bit.ly/3fJDlVw. ***HN21***[] Consistent with this view, the principle that laches does not ordinarily apply to "government suits to enforce sovereign rights," *United States v. Admin. Enterprises, Inc., 46 F.3d 670, 673 (7th Cir. 1995)* (citation omitted), allows the United States to seek an injunction for violation of its antitrust laws at any time, see *15 U.S.C. §§ 4*, 15; see, e.g., *du Pont, 366 U.S. at 318*, but does not offer the states the same leeway. As American Stores explained, laches can bar a "belated attack" against a merger under *Section 16* even if "it would not be too late for the [federal] Government to vindicate the public interest" "under *§ 15*" of the Clayton Act. See *495 U.S. at 295-96*.

The fact that the States "bring this *parens patriae* suit in the public interest," States Opp. at 10, does not counsel a different result. ***HN22***[] The *parens patriae* doctrine supplies a theory of Article III injury — namely, that "the state itself" has a cognizable "interest **[**82]** in the continuing prosperity of [its] econom[y]." *Kleppe, 533 F.2d at 673-74*. But the fact that "severe and generalized" economic injury to a state's citizens also concretely injures the state for Article III purposes, *id. at 675*, says nothing about the nature of the states' roles in **[*40]** the antitrust enforcement regime Congress has established. As the Supreme Court has explained, that regime, "while allowing "[t]he private-injunction action . . . [to] supplement[] [G]overnment enforcement," "primarily charge[s]" the United States "with the duty of protecting the public interest under these laws." *United States v. Borden Co., 347 U.S. 514, 518, 74 S. Ct. 703, 98 L. Ed. 903 (1954)* (emphasis added). Categorically excusing the states from laches would be inconsistent with that principle. The States' argument here also proves too much: if the fact that a suit would advance the public interest were enough to preclude a laches defense under *Section 16*, then laches would not apply even to suits by private entities. Congress, after all, authorized such suits precisely because they also "further the overriding public policy in favor of competition." *Perma Life Mufflers, Inc. v. Int'l Parts Corp., 392 U.S. 134, 139, 88 S. Ct. 1981, 20 L. Ed. 2d 982 (1968)*, overruled by *Copperweld Corp. v. Indep. Tube Corp., 467 U.S. 752, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)*; *Am. Stores, 495 U.S. at 284* ("Private enforcement of the Act was in no sense an afterthought; it was an integral part of the congressional plan for protecting competition.").

Although the doctrine **[**83]** of laches therefore applies to *parens patriae* suits such as this one, the Court does not mean to suggest that the presence of state plaintiffs has zero effect on the analysis. Laches is an equitable doctrine, and in the balancing of the equities, it is of course relevant that this suit is brought not by a competitor hoping to "seriously interfere with a rival's business operations," but rather by many of the states of the Union. *IT&T, 518 F.2d at 926*. Even giving the States' interests significantly more weight than a private actor's would receive, however, does not lead to a different result. Plaintiffs waited six and eight years, compared to the four-year guideline statute of limitations, to challenge two highly publicized acquisitions — one of an existing nascent competitor, one of a potential future competitor — by a firm that they allege was already a "dominant" monopolist. See Redacted Compl., ¶ 68. To hold that laches did not apply in those circumstances would essentially declare the States immune from the doctrine for all practical purposes. While many might welcome such a regime as a matter of policy, it is not the system we have.

b. Ongoing Violation

The States next posit that even if laches applies, **[**84]** their "Complaint is timely," despite the long delays between the mergers at issue and their filing, "because the[y] allege ongoing conduct" by Facebook. See States Opp. at 12-13. They appear to contend, albeit not with perfect clarity, both that (i) the Instagram and WhatsApp acquisitions themselves are "ongoing" because Facebook still holds the purchased assets; and that (ii) Facebook has recently taken other actions that open the acquisitions to renewed challenge.

HN23[] As noted above, the general rule is that courts "measure[] the reasonableness of a private plaintiff's delay in suing for divestiture relative to the announcement of the transaction and its subsequent consummation." *JELD-WEN, 988 F.3d at 729* (Rushing, J., concurring) (citing cases). There are a number of exceptions to that rule, but before turning to the one the States seem to raise here, it is important to note what they do not argue. Plaintiffs do not contend, in opposing Facebook's Motion to Dismiss on the ground of laches, that "they lacked notice of the threatened injury [to their citizens' economic well-being] on which [their] divestiture claim is based" at the time the acquisitions were announced or consummated. Cf. *JELD-WEN, **[*41]** 988 F.3d at 717-18* (majority) (reasoning **[**85]** that "unreasonable delay does not include any period of time before [the plaintiff] . . . . learned that the merger" threatened plaintiff injury) (cleaned up). Put differently, they do not argue that it was "uncertain or speculative whether [Facebook's] antitrust violation[s] [would] injure[] [them] at the time of the violation," such that the laches period did not "begin[] until the date that [antitrust injury] first . . . became ascertainable." Oliver, 751 F.3d at 1086 (cleaned up and citation omitted); cf. In re Evanston Nw. Healthcare, No. 07-4446, 2008 U.S. Dist. LEXIS 42437, 2008 WL 2229488, at *4 (N.D. Ill. May 29, 2008) (denying motion to dismiss where "the plaintiffs dispute[d] [the defendant's] assertion that they either knew or should have known of their potential injury at the time the merger was consummated"). Along the same lines, there is no argument that the acquisitions at issue did not violate Section 7 or Section 2 until sometime after the merger closed; on the contrary, Plaintiffs' explicit theory is that both mergers were unlawful from the outset. See States Opp. at 17 ("The States allege that Facebook was a monopolist at the time it acquired Instagram and WhatsApp and that both acquisitions substantially reduced competition and further entrenched the company's monopoly position."); id. at 23 ("The States have pleaded that **[**86]** the acquisitions were illegal both then and now."). Nor do the States maintain that they "had good reason for not" suing earlier, such that their lengthy delay, even if measured from the time of the mergers, "was [nonetheless] reasonable." Menominee Indian Tribe, 614 F.3d at 531-32; see Reply States at 12 (correctly noting "States' failure to explain, justify, or even address their multi-year delay in challeng[ing] the[] acquisitions" in their briefing).

Instead, the States cite language from the Supreme Court that, in their minds, authorizes them to bring a Section 7 claim "at any time that an acquisition may be said with reasonable probability to contain a threat that it may lead to a restraint of commerce or tend to create a monopoly of a line of commerce." United States v. E.I. du Pont de Nemours & Co., 353 U.S. 586, 597, 77 S. Ct. 872, 1 L. Ed. 2d 1057 (1957). The States contend that they may avail themselves of this rule and seek equitable relief now, no matter what has come before, because "time has made clear the [more recent] continuing anticompetitive effects of the Instagram and WhatsApp acquisitions." States Opp. at 13 (citing allegations in the Complaint of recent "proliferation of . . . objectionable content on Facebook" and "degrad[ation] of [WhatsApp's] privacy features," Redacted Compl., ¶¶ 180, 254).

The States misapprehend **[**87]** du Pont's import here. In that case, the United States — against which, recall, laches does not apply — brought a Section 7 challenge, in 1949, to the defendant's 1919 acquisition of a 23% share of General Motors stock. See 353 U.S. at 587. The Court found it proven that du Pont had long used, and was continuing to use, that "stock interest" to "entrench itself as the primary supplier of General Motors' requirements for automotive finishes and fabrics." Id. at 606. That relationship was not initially an antitrust concern, as GM was a relatively small buyer in that market at the time of du Pont's stock purchase. Id. at 599. By the time of suit, however, General Motors sold roughly half of all cars in the United States, id. at 596, giving du Pont a "commanding position" in the automobile finishes and fabrics market by virtue of its stock interest in GM, rather than competitive merit. Id. at 605; see Midwestern Mach., 392 F.3d at 273 ("In du Pont, there was no violation until **[*42]** decades later when GM became a successful and dominant firm."). In those circumstances, the Court allowed the United States to sue for divestiture, holding that "the plain language of § 7 contemplates an action at any time the [purchased] stock is used to bring about . . . the substantial lessening of competition," **[**88]** "which may be at or any time after the acquisition, depending upon the circumstances of the particular case." Du Pont, 353 U.S. at 597; see also United States v. ITT Cont'l Baking Co., 420 U.S. 223, 242, 95 S. Ct. 926, 43 L. Ed. 2d 148 (1975). ("[T]here can be a [Section 7] violation at some time later even if there was clearly no violation — no realistic threat of restraint of commerce or creation of a monopoly — at the time of the initial acts of acquisition."); Concord Boat, 207 F.3d at 1050 ("Clayton Act claims are not limited to challenging the initial acquisition of stocks or assets . . . since holding as well as obtaining assets is potentially violative of section 7.").

Du Pont and ITT, however, neither hold nor imply that the limitations or laches period for challenging a merger is forever tolled. The cases merely clarify that a violation of Section 7 — *i.e.*, "a reasonable probability that the acquisition is likely to result in the condemned restraints," du Pont, 353 U.S. at 607 — can arise (and persist) not only at the time of the merger, but also at any time afterward so long as the acquired assets are still held. That is a principle of substantive liability; it says nothing about when a plaintiff's cause of action accrues, or, by the same token, when it becomes time barred (or when delay becomes unreasonable). Areeda & Hovenkamp helpfully analogize to the doctrine of **[**89]** adverse possession: "The fact that each day of [a trespasser's] occupancy constitutes a trespass, and thus a violation, does not operate so as to toll the statute of limitations," which accrues when the injury is first actionable. See Areeda & Hovenkamp, ¶ 320c5, at 352. At some point, a trespasser's violation of the law, despite being ongoing, is immunized from suit. By the same token, even if Facebook's continued holding of Instagram and WhatsApp violates *Section 7* in some sense at this very moment, that does not make a present challenge timely. Such a result would write the statute of limitations for *Section 7* damages actions out of the Clayton Act and similarly eliminate the laches defense that Congress expected to govern *Section 16*'s cause of action for injunctive relief. See *Midwestern Mach., 392 F.3d at 273* ("[T]he statute of limitations must begin to run at some point in order for the time bar to have any effect and to give repose to merged firms."); *id. at 277* (same for laches); *Z Techs., 753 F.3d at 605* (recognizing practical need to avoid "effectively undermin[ing] merger-acquisition agreements and subject[ing] them to continual challenge"); *Complete Ent. Res. LLC v. Live Nation Ent., Inc., No. 15-9814, 2016 U.S. Dist. LEXIS 86407, 2016 WL 3457177, at *1 (C.D. Cal. May 11, 2016)* ("It cannot be the case that if a merger leads to monopoly power then anything anticompetitive that the newfound monopolist **[**90]** does . . . allow[s] the merger to be challenged indefinitely."); Areeda & Hovenkamp, ¶ 320c5, at 352-57.

Some courts suggest that du Pont's logic may "allow[] the Clayton Act statute of limitations to be restarted 'if [acquired] assets are used in a different manner from the way that they were used when the initial acquisition occurred, and that new use injures the plaintiff." *Complete Ent. Res., 2016 U.S. Dist. LEXIS 86407 2016 WL 3457177, at *2* (quoting *Midwestern Mach., 392 F.3d at 273*). Presumably the same principle would apply to laches. Plaintiffs, to be clear, do not mention or invoke this "hold and use" doctrine **[*43]** by name, but their argument as to why Facebook's recent conduct reopens the Instagram and WhatsApp acquisitions to challenge would seem to fit the bill. See States Opp. at 12-15. In any event, to the extent that the hold-and-use theory is even viable, see *Complete Ent. Res., 2016 U.S. Dist. LEXIS 86407, 2016 WL 3457177, at *2* (noting "skeptic[ism] of the legitimacy" of the doctrine), it does not help the States here.

For one thing, the conduct to which the States point — that Facebook has recently rolled back WhatsApp privacy protections, allowed "misinformation and violent or otherwise objectionable content" to proliferate on its platforms, and removed popular Instagram features, see Redacted Compl., ¶¶ 125-26, 176-180, 254 — does not qualify **[**91]** as the sort of "different uses of [the acquired] assets" that satisfy the hold-and-use doctrine as it has been articulated. *Midwestern Mach., 392 F.3d at 272*. On Plaintiffs' theory of the case, these are essentially price increases (as users pay for Facebook by allowing it to harvest their data) or reductions in product quality. ***HN24***[] Post-acquisition increases in prices or decreases in output, though, "are mere inertial consequences that one naturally expects to flow from" an anticompetitive merger, *Z Techs., 753 F.3d at 601-02* (citation omitted), and such consequences, the law is clear, "do not restart the statute of limitations" in a *Section 7* action. *Concord Boat, 207 F.3d at 1052* (quoting *DXS, Inc. v. Siemens Med. Sys., Inc., 100 F.3d 462, 467-68 (6th Cir. 1996)*). This approach "allows the statute of limitations to have effect and discourages private parties from sleeping on their rights." *Midwestern Mach., 392 F.3d at 271* (citing *Pace Indus. v. Three Phoenix Co., 813 F.2d 234, 236-37 (9th Cir. 1987)*). If it were otherwise, again, "there would in effect be no statute of limitations" and no laches defense to a claim for equitable relief, "since a *Section 7* challenge to the holding or use of assets could be brought at any time." *Concord Boat, 207 F.3d at 1052*.

"[W]here the complained of 'new use'" of an acquired asset, moreover, "was, in fact, suspected and complained about prior to [and at the time of] the merger," it is especially improper to measure delay from some later point in time. *Complete Ent. Res., 2016 U.S. Dist. LEXIS 86407, 2016 WL 3457177, at *2*. That **[**92]** is the case here — according to the States' Complaint, both the FTC and European regulators were specifically concerned that Facebook would decrease WhatsApp users' privacy after the merger in the ways that Plaintiffs allege eventually occurred. See Redacted Compl., ¶¶ 176-77. There would thus be little sense in allowing the States to sue now because those earlier concerns, which they chose not to raise in a lawsuit, ended up being prescient.

c. Prospective Relief

The States next argue that because they have alleged "ongoing harm flowing from" the damage to competition caused by the WhatsApp and Instagram acquisitions, that renders the relief they seek "prospective," and "laches generally does not apply to bar claims for prospective injunctive relief." States Opp. at 14 (quoting *Gaudreau v. Am. Promotional Events, Inc., 511 F. Supp. 2d 152, 159 (D.D.C. 2007)*). As to the remedy of divestiture, that argument makes little sense; indeed, it would mean that all of the cases applying laches in merger challenges were wrongly decided. See *Reveal Chat, 471 F. Supp. 3d at 990-91* (applying laches to plaintiffs' *Section 7* claims against Facebook's Instagram and WhatsApp acquisitions, and rejecting argument that doctrine did not apply because plaintiffs alleged "ongoing conduct and harm," including recent actions further **[**93]** integrating the acquired companies). ***HN25***[] Although divestiture is a form of equitable relief, it is not generally thought of as **[*44]** "prospective" but rather "retroactive in character," as it is aimed at "unwind[ing] a transaction." *In re: Am. Express Anti-Steering Rules Antitrust Litig., No. 08-2315, 2016 U.S. Dist. LEXIS 3332, 2016 WL 748089, at *15 (E.D.N.Y. Jan. 7, 2016)* (quoting Areeda & Hovenkamp, ¶ 320, at 374). The fact that the challenged acquisitions allegedly continue to cause "ongoing harm" does not affect that characterization; on the contrary, where a plaintiff's complaint is that it is experiencing "continuing, present adverse effects" of past action, a reparative or backward-looking decree such as a divestiture order is the appropriate remedy. See *In re New Motor Vehicles, 522 F.3d at 14* (quoting *O'Shea v. Littleton, 414 U.S. 488, 496, 94 S. Ct. 669, 38 L. Ed. 2d 674 (1974)*); see also *supra* at 31 (discussing reparative and preventive injunctions).

The States also point out that their Complaint seeks other truly prospective relief, see States Opp. at 14 — *i.e.*, that "Facebook be enjoined and restrained from continuing to engage in any anticompetitive conduct," "from making further acquisitions valued at or in excess of $10 million without advance notification to Plaintiff States," and "from making further acquisitions" without providing their Hart-Scott-Rodino Act pre-merger clearance filings to Plaintiff States in addition to the FTC. **[**94]** See Redacted Compl., ¶¶ 277(2)-(4). None of that sort of relief, however, would "restore [the] competition" allegedly lost as a result of Facebook's Instagram and WhatsApp purchases, as is required of a remedy for a *Section 7* violation. See *du Pont, 366 U.S. at 326* ("[C]ourts are . . . required . . . to decree relief effective to redress the violations . . . ."). Instead, these preventive measures would be aimed at forestalling future anticompetitive acquisitions. If such relief were to be granted here, it could only be for the States' separate claim of monopoly maintenance under *Section 2* of the Sherman Act (to which this Opinion now turns), which focuses not only on the Instagram and WhatsApp acquisitions themselves but also on additional conduct.

d. Course of Conduct

For sake of clarity, the analysis to this point has focused on Plaintiffs' *Section 7* challenges to Facebook's acquisitions, as the *Clayton Act* is the usual mechanism by which mergers are challenged. In addition to invoking that Section, though, Plaintiffs also allege one count of monopoly maintenance under *Section 2 of the Sherman Act*. ***HN26***[] Such a maintenance offense has two elements: "(1) the possession of monopoly power in the relevant market and (2) the willful . . . maintenance **[**95]** of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." *Microsoft, 253 F.3d at 50* (citation omitted). As to the second prong (which is all the Court addresses in this Opinion), the States argue that Facebook's "'buy or bury' strategy — whether viewed in the aggregate or by components — constitutes" such willful maintenance. See States Opp. at 32; see also id. at 33 (challenging "two-pronged" scheme "[w]hether viewed separately or together"). Plaintiffs' theories of why Facebook's acquisitions are also subject to a *Section 2* challenge, in addition to *Section 7* attack, can thus be separated into three basic buckets, which are described from narrowest to broadest. First, both the Instagram and WhatsApp acquisitions independently violated *Section 2*, just as they did *Section 7*. Id. at 33-34. Second, Facebook pursued a "broader acquisition strategy that served to entrench [its] monopoly" and that, in and of itself, violated *Section 2*. Id. at 42-44; see also id. at 32-33 ("Instagram and WhatsApp are the most prominent, but not the only, examples of th[is] prong of [its unlawful] course of conduct."). Third, Facebook's **[*45]** overall course of conduct, in the form of its "buy or bury" **[**96]** scheme evaluated "as a whole," separately and independently violated *Section 2*. Id. at 32-33.

Upon closer examination, each bucket has a fatal leak; that is, each theory of a *Section 2* violation runs into timeliness issues related to those that plagued Plaintiffs' *Section 7* counts. As to the first bucket — *i.e.*, the challenges to the Instagram and WhatsApp acquisitions standing alone — the straightforward answer is that the label does not change the result: the same laches analysis applies regardless of whether a particular merger is assailed on *Section 2* or *Section 7* grounds. ***HN27***[] As the Sixth Circuit has persuasively explained, in the context of a damages action:

> There is no reason to treat the same conduct differently in sister statutes [*i.e.*, *Section 2* and *Section 7*] that are designed to promote the same legislative objective. Moreover, the same statute — *15 U.S.C. § 15b* — provides the statute of limitations for each. There is nothing in *15 U.S.C. § 15b* that suggests it should be applied one way for merger-acquisition claims under the *Sherman Act* but differently for merger-acquisition claims under the *Clayton Act*.

Z Techs., 753 F.3d at 603. Equivalent logic applies to the States' claims for injunctive relief here, as *Section 16* (rather than 15b) provides the cause of action for, and imposes the same equitable limitations **[**97]** on, both *Section 2* and *Section 7* claims.

As to the second bucket, characterizing Plaintiffs' *Section 2* claim as a challenge to Facebook's larger scheme of serial anticompetitive acquisitions does not help them. The latest-in-time acquisition their Complaint mentions and characterizes as anticompetitive is the purchase of Eyegroove, "an app that allowed users to create and share music videos with augmented reality effects," which "Facebook decided to acquire . . . in 2016 upon learning that Twitter and Snapchat were interested." Redacted Compl., ¶ 184. The Complaint does not specify when in 2016 Facebook purchased that firm, but even assuming that it was in late December, four years still elapsed between the Eyegroove acquisition and the filing of this lawsuit. ***HN28***[] In general, and as set out above, "[t]he four-year limitation . . . for private antitrust actions . . . is long enough to enable potential plaintiffs to observe the actual effects of a possible antitrust violation and to calculate its potential effects." *Concord Boat, 207 F.3d at 1052* (quoting *IT&T, 518 F.2d at 929*). And courts consistently reject claims for retrospective equitable relief after far, far shorter delays. The Court can therefore see no reason in law or practice why the Eyegroove tail should **[**98]** wag the Instagram and WhatsApp dogs — why one small acquisition in 2016 (which merited one sentence in Plaintiffs' Complaint) should, four-plus years later, reopen the window to challenge a series of allegedly much more consequential acquisitions that all took place from 2012 to 2014. At the risk of repetition, there would be little left to the "especially important" principle that antitrust challenges to mergers "be timely made," for the benefit of both the public and the merged firms, see Areeda & Hovenkamp, ¶ 320, at 326, if such a maneuver were countenanced.

To the extent, moreover, that the States seek prospective injunctive relief based on Facebook's alleged scheme of anticompetitive acquisitions, they allege no present or recent unlawful conduct to enjoin, nor do they plausibly plead an impending threat of future anticompetitive acquisitions. See States Opp. at 43 (last listed "example[] that reflect[s] Facebook's evolving pattern of buying companies for anticompetitive reasons" is Eyegroove in 2016); *supra* at 32-33 **[*46]** (applying same principle in context of States' challenges to Platform policies). That is fatal to the States' requests for injunctive relief that would only prevent **[**99]** future injury — *e.g.*, an order compelling Facebook to notify Plaintiffs and provide them Hart-Scott-Rodino filings for any future acquisition over $10 million.

In the final bucket, Plaintiffs argue that their *Section 2* claim broadly asserts an overall course of monopoly-maintaining conduct that includes both Facebook's acquisitions and its API-related actions, the latter of which ceased only in 2018 with the suspension of the Platform policies. See States Opp. at 13. This "buy or bury scheme," Plaintiffs argue, is in itself timely challenged under *Section 2* here because, at worst, it terminated only two years prior to their filing this suit, within the presumptive laches period. Id.

As explained above, however, the last instance of Platform conduct that may be actionable under current refusal-to-deal doctrine occurred in late 2015; merely having the policy on the books of forbidding API access to competitors was, in itself, perfectly lawful behavior. To the extent Facebook's alleged "buy or bury" scheme is actionable, then, it can only be based on conduct that is alleged to have last occurred in 2015 (in the case of the Platform-related actions) and 2016 (in the case of Facebook's acquisitions, the last **[**100]** one of which was Eyegroove). As explained already, a challenge to either of those two prongs of conduct does not state a claim for reparative (backward-looking) relief, nor is there a plausibly pleaded risk that such scheme will imminently recur, as is necessary for preventive (forward-looking) injunctive relief. Combining the two prongs into one overall scheme changes nothing.

It is true, as the States point out, that some "[c]ourts do not require that every single action in an anticompetitive scheme be, on its own, anticompetitive" before that scheme may be separately assailed as a violation of *Section 2*. See States Opp. at 33 (quoting *In re Intuniv Antitrust Litig., 496 F. Supp. 3d 639, 680 (D. Mass. 2020)*). ***HN29***[]

Under that theory of Section 2 liability, often referred to as a "course of conduct" or "monopoly broth" theory, "a plaintiff can allege a series of actions that when taken together make out antitrust liability even though some of the individual actions, when viewed independently, are not all actionable." *Intuniv, 496 F. Supp. 3d at 680*. Facebook's "buy or bury" scheme, Plaintiffs might argue, can thus be challenged as a separate violation of Section 2 even if it is made up of some lawful conduct. If that is so, even if Facebook's merely having its API policies on the books did not violate Section 2, as the Court **[**101]** concluded above, such conduct could still be part of an unlawful scheme of monopoly maintenance that was ongoing until 2018, making the States' challenge timelier.

In *Microsoft*, the D.C. Circuit pointedly declined to address whether a defendant can violate Section 2 through a course of conduct involving lawful behavior. See *253 F.3d at 78*. Even assuming the answer is yes, however, this Court believes that the doctrine does not help Plaintiffs in these circumstances. Specifically, it does not allow unilateral refusals to deal that are lawful (such as Facebook's mere adoption of a policy of not offering API access to competitors) to be considered as part of a "monopoly broth" or "course of conduct" that violates Section 2.

Here is why: the decisions that do allow for "course of conduct" Section 2 liability, which is itself controversial, usually explain that the doctrine is necessary in **[*47]** cases involving individual acts that are lawful in themselves only because, when evaluated in a vacuum, those acts lack the requisite substantial effect on competition. In such situations, these decisions explain, it is proper to "consider the[] overall combined effect" of all the acts alleged, even if some would be lawful if assessed separately, **[**102]** because competition can die from a thousand paper cuts just as easily as from one large blow. *City of Anaheim v. S. California Edison Co., 955 F.2d 1373, 1376 (9th Cir. 1992)*; see *Microsoft, 253 F.3d at 78* (explaining theory as proposing that "a monopolist's unilateral campaign of acts intended to exclude a rival that in the aggregate has the requisite impact warrants liability even if the acts viewed individually would be lawful for want of a significant effect upon competition") (cleaned up); *Abbott Labs. v. Teva Pharm. USA, Inc., 432 F. Supp. 2d 408, 428 (D. Del. 2006)* ("Plaintiffs are entitled to claim that individual acts are antitrust violations, as well as claiming that those acts as a group have an anticompetitive effect even if the acts taken separately do not."); *LePage's Inc. v. 3M, 324 F.3d 141, 162 (3d Cir. 2003)* (explaining that "[t]he effect of [the defendant's] conduct in strengthening its monopoly position by destroying competition . . . is most apparent when [its] activities are considered as a whole."). On this view, it would be appropriate and indeed necessary to aggregate the effects of various, say, exclusive-dealing or bundling arrangements that on their own did not foreclose enough of the market to affect competition but, when evaluated together, did have that forbidden effect. See, e.g., *LePage's, 324 F.3d at 162*; *Tele Atlas N.V. v. NAVTEQ Corp., 2008 U.S. Dist. LEXIS 145998, 2008 WL 4911230, at *3-4 (N.D. Cal. Nov. 13, 2008)* (allowing jury to consider tying alongside exclusive dealing even though court had already held that **[**103]** tying conduct was not unlawful because defendant lacked market power in the tying market).

Unilateral refusals to deal (at least those that do not meet the *Aspen Skiing* elements) do not fit this paradigm. As discussed above, they are not held to be lawful because of an insignificant effect on competition. ***HN30***[] Quite the contrary: a monopolist's refusal to deal with its competitors can harm competition, especially if the monopolist has substantial control over a facility or input that is valuable to its rivals. Such refusals are instead tolerated by ***antitrust law*** despite those negative effects, on the theory that the effects of the law's intervention to compel dealing would be even worse. See *supra* at 24-25; see also Thibault Schrepel, The "Enhanced No Economic Sense" Test: Experimenting with Predatory Innovation, 7 NYU J. Intell. Prop. & Ent. L. 30, 41 (2018). They are thus not the sort of lawful conduct that the monopoly-broth theory is designed to account for and, to the extent that theory is viable, should be excluded from its reach. See Crane, 76 Antitrust L.J. at 669 (arguing for this approach); Ginsburg & Wong-Ervin, *supra*, at 8-9 (same); Schrepel, 7 NYU J. Intell. Prop. & Ent. L. at 40-41 (noting "real danger" in applying monopoly-broth theory to unilateral refusals to deal); cf. *Free FreeHand Corp. v. Adobe Sys. Inc., 852 F. Supp. 2d 1171, 1184 (N.D. Cal. 2012)* (declining **[**104]** to consider as part of monopoly-broth theory defendant's choice not to "license its technology" to competitors because it "ha[d] no duty to" do so). Any other result would recreate the negative policy consequences that the no-duty-to-deal rule is meant to avoid. It would be far too easy for plaintiffs to advance their otherwise nonviable claims against unilateral refusals to deal — which, as Trinko makes clear, are lawful even if the monopolist intends to, and does, hinder its competitors in so refusing — by **[*48]** simply repackaging such refusals as part of a larger scheme by the defendant that was intended to, and did in fact, harm competition. That result is avoided by holding that lawful unilateral refusals to deal cannot be combined with other conduct, lawful or unlawful, into an overall scheme of monopoly acquisition or maintenance that can be separately challenged. ***HN31***[] If a unilateral refusal (or refusals) is to be part of such larger scheme, it must in itself be unlawful.

The upshot is that Facebook's retention of its API policies cannot, as a matter of law, constitute part of any actionable scheme of monopoly maintenance under *Section 2 of the Sherman Act*. As a result, that the company retained **[**105]** those policies into 2018 does not furnish a basis for the States to challenge its much earlier actions.

e. Procedural Posture

Down to their last card, Plaintiffs maintain that dismissing a claim based on laches at the *Rule 12(b)(6)* stage is generally improper because laches is an affirmative defense, as to which the defendant, here Facebook, bears the burden of proof. See States Opp. at 9-10, 15. The very case they cite for the proposition that "[l]aches is a fact-intensive defense poorly suited to a motion to dismiss," however, goes on to explain that dismissal is nonetheless proper if "(1) an unreasonable delay appears on the face of the pleading; [and] (2) no sufficient excuse for delay appears or is pleaded." *Kemp v. Eiland, 139 F. Supp. 3d 329, 350 (D.D.C. 2015)* (quoting *Arclar Co. v. Gates, 17 F. Supp. 2d 818, 823 (S.D. Ill. 1998)*); see also *Zuckerman v. Metro. Museum of Art, 928 F.3d 186, 190 (2d Cir. 2019)* (affirming lower court's non-laches-based dismissal on laches grounds where "delay [was] unreasonable" "and the prejudice to the [defendant] [was] evident on the face of [the] complaint"); *Reveal Chat, 471 F. Supp. 3d at 990-91* (dismissing similar *Section 2* and *7* claims against Facebook based on laches). As explained at length above, both unreasonable delay and prejudice are manifest on the face of the States' Complaint here.

The Court is aware that the D.C. Circuit has echoed the warning that a "complaint seldom **[**106]** will disclose undisputed facts clearly establishing the [laches] defense." *Menominee Indian Tribe, 614 F.3d at 532* (quoting Wright & Miller § 1277). "Seldom," though, does not mean "never." Just as "a district court must retain the power to insist upon some specificity in pleading before allowing a potentially massive factual controversy to proceed," so too must it retain the power to avoid "sending the parties into discovery when there is no reasonable likelihood," based on "the events related in the complaint," that Plaintiffs will ultimately be entitled to the injunctive relief they seek. *Bell Atlantic Corp v. Twombly, 550 U.S. 544, 558, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)* (citations omitted). Had the States responded to the substantial timeliness arguments that Facebook put forward in its Motion to Dismiss — which rest entirely, and properly, on facts that are either pleaded or properly judicially noticed — by raising (or even hinting at) a factual dispute as to when their claims first accrued, or a reasonable justification for their long delays in filing, the outcome here might well be different. They did not do so. The only argument Plaintiffs make as to why the laches elements are not met here is their half-hearted contention that Facebook was not prejudiced but rather "benefitted from the States **[**107]** not filing sooner," since it has been and remains a very profitable company. See States Opp. at 15 (emphasis added). That is small beer indeed.

* * *

[*49] Ultimately, this antitrust action is premised on public, high-profile conduct nearly all of which occurred over six years ago — before the launch of the Apple Watch or Alexa or Periscope, when Kevin Durant still played for the Oklahoma City Thunder, and when Ebola was the virus dominating headlines. The Complaint's allegations themselves make clear that the States could easily have brought suit then, just as they make clear that any equitable relief this Court could or would order now would greatly prejudice both Facebook and third parties. The system of antitrust enforcement that Congress has established does not exempt Plaintiffs here from "the consequences of [their] choice" to do nothing over the last half decade. See *Am. Stores, 495 U.S. at 298* (Kennedy, J., concurring). The Court accordingly finds that, as a matter of law, their challenges to Facebook's acquisitions — whether they are targeted independently or as part of a larger scheme of anticompetitive behavior — are barred by the doctrine of laches or otherwise furnish no basis for the injunctive relief **[**108]** sought.

IV. Conclusion

For the foregoing reasons, the Court will grant Facebook's Motion to Dismiss this case in its entirety. A separate Order so stating will issue this day.

Date: June 28, 2021

Opinion

MEMORANDUM ORDER

J. Nicholas Ranjan, United States District Judge

Defendant Under Armour, Inc. moves to dismiss Plaintiff Multiple Energy Technologies, LLC's second amended complaint in this antitrust case. ECF 64. The Court previously dismissed MET's antitrust claim based on its failure to allege that it was a "direct competitor" of Under Armour, as well as its failure to adequately define the relevant market for antitrust purposes. ECF 54; ECF 55. MET then amended its complaint, and Under Armour responded by filing the pending motion **[*2]** to dismiss.

This time around, Under Armour renews only one of its arguments. ECF 65, pp. 9-15. That is, Under Armour says that MET has once again failed to adequately define the market in which Under Armour allegedly engaged in anticompetitive behavior. *Id.* Applying the familiar standard of *Rule 12(b)(6)*, the Court will grant the motion, and once again dismiss MET's complaint. That said, for the reasons discussed below, the Court also finds that granting leave to amend is not yet futile, and so will provide MET with one last chance to amend its complaint.

Much like its first amended complaint, MET's second amended complaint defines the relevant market as consisting of all "clothing containing recovery enhancing bioceramics," or "CCREB." ECF 58, ¶ 8. More specifically, MET adds that the CCREB market "consists of clothing such as activewear, tank tops or sleeveless shirts, t-shirts, long sleeve shirts, shorts, pants, leggings, joggers, sweatpants, sleeves, pajamas[,] and sleepwear." *Id.* at ¶ 14. According to MET, this clothing is "distinct and separate from other kinds of clothing," in that it is advertised by sellers and bought by consumers for its alleged "muscle recovery and performance" benefits. **[*3]** *Id.* at ¶ 15. As a result, CCREB "are consistently priced higher than traditional clothing that do not contain bioceramics," and "consumers who seek to purchase CCREB do not consider traditional clothing that does not contain bioceramics to be reasonably interchangeable." *Id.* at ¶¶ 17, 18.

When the Court dismissed MET's last complaint, it explained that MET's allegations had left it "unclear what clothing or type of clothing" was part of the market and, also, that MET had pled "nothing about the cross-elasticity of demand of the products in the relevant market[.]" *Multiple Energy Techs., LLC v. Under Armour, Inc., No. 20-664, 2021 U.S. Dist. LEXIS 39280, 2021 WL 807722, at *2 (W.D. Pa. Mar. 3, 2021)* (Ranjan, J.). Under Armour now argues that these same flaws remain. According to Under Armour, the products MET has identified as part of the market are not "reasonably interchangeable." ECF 72, pp. 6-11. What's more, Under Armour suggests that MET has still alleged nothing about the "elasticity" of products *within* the market—*i.e.*, that an increase in the price for one CCREB product necessarily increases demand for other like products in that market. *Id.*

The Court agrees that MET's allegations still fall short. MET's burden at this stage is to plausibly plead that *high* elasticity exists between all products *within* the alleged **[*4]** market—not just that CCREB has *low* elasticity with clothing products that *do not* incorporate bioceramics. In ***antitrust law***, "[t]he relevant product market is defined as those commodities reasonably interchangeable by consumers for the same purposes." *Tunis Bros. Co. v. Ford Motor Co., 952 F.2d 715, 722 (3d Cir. 1991)* (cleaned up). Thus, products in an antitrust product market are "characterized by a cross-elasticity of demand," meaning "the rise in the price of a good *within a relevant product market* would tend to create a greater demand for *other like goods in that market*." *Id.* (cleaned up) (emphasis added).

Put another way, the relevant question here is whether MET has plausibly pled that consumers consider all the products in the alleged market to be "reasonably interchangeable" with the other products in that market. *Id.* As a result, MET misses the mark when it alleges and argues only that consumers do not consider CCREB to be interchangeable with non-CCREB clothing, and fails to also allege that consumers *do* consider products within the CCREB market to be interchangeable with each other. MET also remains vague about what products are in the market—alleging only that the market consists of clothing "such as" the list of examples provided. ECF 58, **[*5]** ¶ 14.[1]

To survive dismissal, then, MET needed to do two things: First, it needed to say what products are in the market, with enough specificity to put Under Armour on notice of at least the rough bounds of the market.[2] Second, and more importantly, it needed to allege that consumers consider the products in the market to be "reasonably interchangeable" *with the other products in the market*. That is what the Court meant, in its first opinion, when it said that MET had pled nothing about "cross-elasticity of demand" in the CCREB market. *Multiple Energy Techs., LLC,*

---

[1] MET has alleged with some precision that Under Armour "is responsible for over 60% of sales in the market for CCREB in the United States[.]" ECF 58, ¶ 20. The Court sees no reason why MET should not be able to specify the types of clothing it considered when calculating or estimating this number. If discovery reveals that other types of clothing belong in the CCREB market, MET can always seek leave to amend its complaint to include them.

[2] This does not mean MET needs to provide excessive detail about the products in the market. It only needs to clearly identify what categories of clothing the market contains, rather than obscuring the market by providing only examples of types of clothing the market "includes."

No. 20-664, 2021 U.S. Dist. LEXIS 39280, 2021 WL 807722, at *2. Because MET did neither of these things, dismissal is once again required.

The tougher question is whether MET deserves another chance to amend. MET's previous failure to correct the same deficiencies favors dismissal. But after careful consideration, the Court finds that, for three reasons, allowing MET to amend again would not yet be futile.

First, the Court is mindful that the bar MET must clear is not a high one. In most antitrust cases, "proper market definition can be determined only after a factual inquiry into the commercial realities faced by consumers." Queen City Pizza, Inc. v. Domino's Pizza, Inc., 124 F.3d 430, 436 (3d Cir. 1997) (citation omitted); Premier Comp Sols. LLC v. UPMC, 163 F. Supp. 3d 268, 278 (W.D. Pa. 2016) (Cercone, J.) ("Definition of the relevant product market often requires **[*6]** a deeply fact-intensive inquiry, and courts are hesitant to grant motions to dismiss for failure to plead a relevant market definition." (cleaned up)). Thus, MET does not have to define the market with precision just yet—it only has to plead "enough factual matter (taken as true) to suggest that" it is "plausible" that the identified products comprise a single market. Bell Atl. Corp. v. Twombly, 550 U.S. 544, 556, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007).

Second, it is notable that MET's failure to correct its complaint seems to stem mostly from its misunderstanding of the appropriate legal standard. MET's briefing suggests that it believes the "cross-elasticity" requirement is satisfied by allegations that consumers do not consider products within the market to be interchangeable with products outside the market, rather than by allegations that all the products *within* the market are reasonably interchangeable. The Court has now clarified that standard and what it expects MET to allege.

Third, and most importantly, the Court will allow amendment because MET's arguments allude to a possible definition of the relevant market that could be enough to survive dismissal. MET's "theory of the case" seems to be that consumers who purchase products in the CCREB market are driven **[*7]** chiefly by the bioceramics contained within the clothing, rather than by the secondary consideration of what type of clothing contains those bioceramics. *See, e.g.*, ECF 58, ¶¶ 8, 15-18, 74; *see also* ECF 71, p. 12 (arguing that the "most critical component of the products in this market" is "the recovery enhancing bioceramics that are infused into these products").

If that is true, it is at least plausible that a consumer who wants to buy a bioceramic t-shirt, but finds them out-of-stock or overpriced, is more likely to purchase another type of bioceramic clothing (*e.g.*, a headband or a tank-top) than to purchase a t-shirt that lacks bioceramics. *Cf.* Am. Needle, Inc. v. New Orleans Louisiana Saints, 385 F. Supp. 2d 687, 694 (N.D. Ill. 2005) ("[A] significant segment of the market for NFL-branded headwear and apparel is purchasing the team logo. If a store sold out of hats carrying the Chicago Bears logo, these individuals would not necessarily find caps carrying logos for Spongebob, the University of Michigan, or even the Chicago Bulls to be reasonable substitutes. More likely, they would purchase a different item of apparel, such as a T-shirt or sweatshirt, or even a non-apparel item like a mug or key chain that carries the Bears logo. The product for these consumers is the **[*8]** trademarked logo.").

Put another way, the price and demand of bioceramic t-shirts could, in fact, be highly elastic with the price and demand of bioceramic wristbands, tank-tops, and all other types of CCREB clothing. "A cluster of products," such as these, "can comprise a relevant product market if the cluster is itself an object of consumer demand." Sharif Pharmacy, Inc. v. Prime Therapeutics, LLC, 950 F.3d 911, 918 (7th Cir. 2020) (cleaned up); *see also* Weiss v. York Hosp., 745 F.2d 786, 826 (3d Cir. 1984) ("Where, however, several goods or services are generally offered by the same providers, it is not unreasonable for a jury to conclude that the market for antitrust purposes includes all of those goods or services." (citations omitted)).[3]

[3] For this same reason, the Court is not convinced by Under Armour's apparent contention that, to satisfy the "reasonable interchangeability" requirement, the relevant market must be subdivided to account for every consumer trait, such as gender or age, or for all product traits, such as clothing types or sizes. *See, e.g.*, ECF 72, pp. 7-8; ECF 65, p. 2. Instead, the pertinent question is whether the products in the market share the important traits that drive consumers to shop only within the alleged market, rather than considering products outside of it to be reasonable substitutes. *See, e.g.,* Am. Needle, Inc., 385 F. Supp. 2d

Of course, that may or may not be true of the products here. MET has not yet even alleged it. But for now, it seems possible, based on its arguments to date, that MET can, if given another chance, allege a cluster of CCREB items that are "reasonably interchangeable" with one another, despite differences such as clothing type, so that grouping those products in a single market merely "reflects commercial realities." *United States v. Grinnell Corp., 384 U.S. 563, 572, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*.

While the Court will once again grant Under Armour's motion to dismiss, it will also give MET leave to amend its complaint one last time, if it has **[*9]** a factual basis to do so. As noted above, to survive dismissal, MET must identify all the clothing types that it believes to comprise the relevant market, and then allege that all those products are highly elastic with all other clothing within that market.

CONCLUSION

For all the reasons discussed above, Under Armour's motion to dismiss the second amended complaint is **GRANTED**. MET must file any amended complaint by **July 9, 2021**.

Opinion

ENTRY ON DEFENDANTS' MOTIONS TO DISMISS

This matter is before the Court on separate Motions to Dismiss filed pursuant to *Federal Rule of Civil Procedure 12(b)(6)* by Defendants Lexur Enterprises Inc. ("Lexur") (Filing No. 29), and Robert Fry ("Fry") (Filing No. 31), (collectively, "Defendants"). This case was initiated by Plaintiff Tyler Technologies, Inc. ("Tyler") against Defendants "for (1) violation of the *Sherman Antitrust Act, 15 U.S.C. § 1, et seq.*, (2) violation of the *Indiana Antitrust Act, Ind. Code § 24-1-2-1, et seq.*, (3) tortious interference with contract, (4) tortious interference with business relationships, and (5) civil conspiracy." (Filing No. 1 at 1).[1] Defendants have separately moved to dismiss, arguing that all claims **[*2]** against them, as alleged, fail (Filing No. 29; Filing No. 31).[2] For the following reasons, the Defendants Motions are **granted**.

I. BACKGROUND

The following facts are not necessarily objectively true, but, as required when reviewing a motion to dismiss, the Court accepts as true all factual allegations in the Complaint and draws all inferences in favor of Tyler as the non-moving party. *See Bielanski v. County of Kane, 550 F.3d 632, 633 (7th Cir. 2008)*. Though the Complaint goes into much greater detail, the following factual background suffices to provide adequate context for purposes of this Entry.

Pursuant to Indiana law, county assessors must physically inspect and reassess the value of all real property over the course of four years (Filing No. 1 at 8). To achieve this task, assessors regularly contract with private enterprises to provide necessary support and advice with these socalled "cyclical reassessments." *Id.* As part of this process, assessors must advertise for bids, which usually occurs in the year before the start of a new cycle. *Id.* Consistent with this practice, Tyler—"the largest software company in the nation that focuses solely on providing integrated software and technology services to the public sector"—bid in 2017 for **[*3]** contracts with Dearborn, Floyd, Jackson, Jefferson, Ripley, and Switzerland Counties (the "Counties") to provide reassessment support starting in 2018. *Id.* at 5, 6, 8. Lexur—"a regional competitor" with work "limited almost exclusively to Ohio"—was one of Tyler's rivals for the contracts. *Id.* at 6, 8-9. Ultimately, Tyler won the contracts with their terms running from May 1, 2018, through April 30, 2022. *Id.* at 8-9.

Davis and Thornsberry were both long-time Tyler employees who, in their respective roles, served as liaisons between the company and the Counties. *Id.* at 9-10. Starting in May 2020, however, Davis and Thornsberry worked in conjunction with Lexur and Fry (Lexur's President and Chief Financial Officer) to covertly create a scheme to (1) convince the Counties to reopen a bidding process "mid-cycle" (that is, before the four-year cycle concluded in 2022), (2) leave other competitors (including Tyler) in the dark about the process (rendering them unable to meaningfully submit bids), (3) guarantee that Lexur was awarded the contracts (by submitting bids that were lower than Tyler's previous successful proposals), (4) coordinate the termination of Tyler's contracts with the Counties, **[*4]** and (5) solicit other Tyler employees to work for Lexur on the newly-awarded contracts. *Id.* at 6, 12-18.[3]

Specifically, the Complaint alleges that Defendants directly solicited the assessors to pledge to rebidding the contracts, terminating Tyler, and hiring Lexur (Filing No. 1 at 12). In fact, Defendants drafted a calendar that outlined the plan, providing a day-by-day contour of the scheme. *Id.* at 13-14. As shown by this agenda, the rebidding process was to be advertised the week preceding the Fourth of July holiday weekend in 2020. *Id.* The

---

[1] Tyler also brought claims against Jimmy Davis ("Davis") and Joe Thornsberry ("Thornsberry"), who "both were active Tyler employees" until July 2020. (Filing No. 1 at 1-3, 6, 26-33.) These claims, however, have since been dismissed with prejudice by stipulation (*see* Filing No. 63 (dismissing claims against Thornsberry); Filing No. 67 (dismissing claims against Davis)).

[2] Though Lexur and Fry moved to dismiss the claims against them independently, because Fry adopted Lexur's lead and reply arguments in their entirety (*see* Filing No. 32; Filing No. 65), the Court will refer to the arguments made in Lexur's briefing as "Defendants'". For its part, Tyler responded with an "omnibus Opposition" brief (*see* Filing No. 58).

[3] The Complaint also alleges that various "other individuals or entities encouraged, assisted, or supported Defendants in their anti-competitive scheme to restrict bidding on public works contracts and to tortiously interfere with Tyler's contractual and business relationships." (Filing No. 1 at 7.) The Complaint, however, fails to outline the involvement of these John Doe Defendants in any meaningful way. Defendants suggest that these John Does "are not parties unknown to Tyler"; instead, "they are the counties themselves and certain unnamed county employees." (Filing No. 30 at 2 n.1.) Defendants opine that Tyler does not want to, however, "put itself in the awkward position of naming its own customers as Defendants." *Id.* The Court will not speculate as to these unnamed defendants' identities.

Counties were then to close the bidding windows either immediately or just before the next scheduled county commissioner meetings where Lexur (the only bidder) would be approved to replace Tyler. *Id.* Finally, the Counties would immediately halt all activities of Tyler with certain staff resigning from Tyler and transitioning to Lexur. *Id.*

Defendants themselves drafted the termination notices the Counties were to send to Tyler and organized the timing of the terminations, while, of course, knowing about the pre-existing contracts. *Id.* at 13, 20-22. Defendants also prepared the rebid notices, working with the Counties to make sure that the planned **[*5]** timeline came to fruition. *Id.* at 16-18. Despite Davis and Thornsberry working for the company at the time, Tyler, and no other competitors, were privy to this out-of-cycle rebid process with Davis even directly denying having knowledge of the Counties (for which he was responsible) planning to rebid. *Id.* at 18. None of the Counties directly told Tyler about the rebidding, and Tyler only learned about the request for bids by coincidence, leaving Tyler with neither sufficient time nor context to submit a bid. *Id.* In fact, by the time Tyler learned about the rebidding, the windows had already closed in two Counties. *Id.* In the end, with the plan followed dutifully, Lexur was the sole bidder in the rebid process. *Id.* at 19.[4] And on schedule, Davis resigned from Tyler on July 6, 2020. *Id.* Ultimately, on August 10, 2020, and under various theories, Tyler sued Defendants, who, for their part, move to dismiss pursuant to *Federal Rule of Civil Procedure 12(b)(6)*.

II. LEGAL STANDARD

Federal Rule of Civil Procedure 12(b)(6) allows a defendant to move to dismiss a complaint that has failed to "state a claim upon which relief can be granted." *Fed. R. Civ. P. 12(b)(6)*. When deciding a motion to dismiss under *Rule 12(b)(6)*, the Court accepts as true all factual allegations in the complaint and draws all inferences **[*6]** in favor of the plaintiff. *Bielanski, 550 F.3d at 633*. Courts, however, "are not obliged to accept as true legal conclusions or unsupported conclusions of fact." *Hickey v. O'Bannon, 287 F.3d 656, 658 (7th Cir. 2002)*.

The complaint must contain a "short and plain statement of the claim showing that the pleader is entitled to relief." *Fed. R. Civ. P. 8(a)(2)*. In *Bell Atlantic Corp. v. Twombly*, the Supreme Court explained that the complaint must allege facts that are "enough to raise a right to relief above the speculative level." *550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. Although "detailed factual allegations" are not required, mere "labels," "conclusions," or "formulaic recitation[s] of the elements of a cause of action" are insufficient. *Id.*; *see also Bissessur v. Ind. Univ. Bd. of Trs., 581 F.3d 599, 603 (7th Cir. 2009)* ("it is not enough to give a threadbare recitation of the elements of a claim without factual support"). The allegations must "give the defendant fair notice of what the . . . claim is and the grounds upon which it rests." *Twombly, 550 U.S. at 555*. Stated differently, the complaint must include "enough facts to state a claim to relief that is plausible on its face." *Hecker v. Deere & Co., 556 F.3d 575, 580 (7th Cir. 2009)* (citation and quotation marks omitted). To be facially plausible, the complaint must allow "the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (citing *Twombly, 550 U.S. at 556*).

III. DISCUSSION

Tyler brings five **[*7]** claims against Defendants: (1) Sherman Antitrust Act violations, (2) Indiana Antitrust Act violations, (3) tortious interference with a contract, (4) tortious interference with a business relationship, and (5) civil conspiracy. As Defendants largely attack each claim successively, the Court will discuss the Counts in turn.

---

[4] Tyler asserts in its response brief that "[e]very single one of the Counties targeted by the Defendants has ultimately reconsidered the path," either reopening the bidding process or declining or rescinding a contract with Lexur (Filing No. 58 at 5). The Court, however, will not consider these facts when ruling on this Motion to Dismiss. *See Car Carriers, Inc. v. Ford Motor Co., 745 F.2d 1101, 1107 (7th Cir. 1984)* (noting that "it is axiomatic that the complaint may not be amended by the briefs in opposition to a motion to dismiss" and that "consideration of a motion to dismiss is limited to the pleadings") (citations omitted).

A. <u>Sherman Act violations</u>

In Count I, Tyler brings a claim for violation of the *Sherman Antitrust Act (the "Sherman Act")*, alleging that "Defendants restrained competition for public works contracts by reducing the number of potential bidders and rigging the result of the bidding process." (Filing No. 1 at 26.) Defendants maintain that Tyler has failed to "allege an anti-trust injury necessary to state a claim under *Section 1 of the Sherman Act.*" (Filing No. 30 at 4.) To demonstrate an antitrust injury, a plaintiff must show "that its injury is 'of the type the antitrust laws were intended to prevent.'" *McGarry & McGarry, LLC v. Bankr. Mgmt. Sols., Inc., 937 F.3d 1056, 1065 (7th Cir. 2019)* (quoting *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*). It does not suffice "to allege that the injury is merely causally linked to the alleged anticompetitive behavior"; instead, a plaintiff "must also demonstrate that its injury 'is attributable to an anti-competitive aspect of the practice under scrutiny.'" *Id.* (quoting *Atl. Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 334, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)*).

Defendants argue **[*8]** that "[a]ccording to Tyler's own allegations, Lexur's alleged actions resulted in the six counties at issue receiving bids from Lexur that were *lower* than Tyler's bids." (Filing No. 30 at 6 (emphasis in original).) Because "no antitrust injury exists" when "an alleged conspiracy results in lower prices to consumers," the claim should be dismissed. *Id.* (citing *James Cape & Sons Co. v. PCC Constr. Co., 453 F.3d 396, 399 (7th Cir. 2006)*). Defendants additionally note that Tyler also alleges that "Lexur's activities resulted in a new entrant to the Indiana real estate assessment market," which, in fact, "suggests a pro-competitive result." *Id.* (citing *Chicago Studio Rental, Inc. v. Illinois Dept. of Commerce, 940 F.3d 971, 978 (7th Cir. 2019)*). In sum, "Tyler has only pleaded injuries to itself rather than an anticompetitive injury to the market," and "any alleged conspiracy by the Defendants resulted in the entry of a new competitor into the Indiana market and lower bids being made for cyclical reassessment contracts." *Id.* at 7.

Tyler responds that it has "sufficiently alleged an antitrust injury under the Sherman Act." (Filing No. 58 at 7.) Tyler maintains that its Complaint is "replete" with allegations of injury to competition, demonstrating that Defendants "colluded to ensure that neither Tyler nor any other competitor would have a full and fair **[*9]** opportunity to bid competitively against Lexur, that Lexur would be the only bidder for the rebid contracts, and that Lexur would be awarded the rebid contracts no matter what." *Id.* at 8. Indeed, "page after page of detailed facts" supports its allegations. *Id.* For example, Tyler argues that "Defendants' contrived timing for the Counties' issuance of the rebids . . . takes center stage in the Complaint." *Id.* Because of this timing, "Lexur was in fact the only 'bidder' in response to the Counties' rebids." *Id.* at 9. These facts, as argued by Tyler, "more than plausibly support" the Sherman Act claims when the conduct "harmed competition in a real and alarming way." *Id.* And though Lexur's solitary bids were, of course, "the lowest," this was "by design" and "chilled competition by eliminating the possibility for competitors to compete." *Id.* In sum, Defendants' conduct "all but guaranteed that the Counties and taxpayers would not receive the lowest price" when all competitors were "entirely suppressed" from submitting rival bids. *Id.* As for the contention that Lexur's conduct increased competition by introducing itself as a "new competitor" in the market, Lexur had previously "competed **[*10]** with Tyler for the Contracts in 2017." *Id.* at 9-10. In any event, Tyler contends that the claim also survives "because bid-rigging is considered a *per se* violation of the Sherman Act." *Id.* at 11. Pointing to *U.S. v. Azzarelli Construction Company*, Tyler maintains that it has alleged this type of practice, which, because of its "'pernicious effect on competition and lack of any redeeming virtue,'" is "'conclusively presumed to be unreasonable and therefore illegal.'" *Id.* at 11 (quoting *612 F.2d 292, 294 (7th Cir. 1979)*).

Defendants reply that Tyler tries to "create new ***antitrust law***" when it argues that "Lexur's alleged actions harmed the bidding process and resulted in bids that may have been higher than hypothetical bids that could have been made absent the alleged procedural malfeasance." (Filing No. 64 at 2 (emphases removed).) Defendants contend that Tyler "does not provide any factual allegations that support a finding that consumers—rather than Tyler itself—were harmed by Lexur's alleged conduct." *Id.* at 3 (emphasis removed). Though Tyler may have been harmed by Lexur's alleged conduct, "***antitrust law*** is not intended to protect Tyler's interests in maintaining its uncompetitive prices with the Counties; ***antitrust*** **[*11]** ***law*** actually discourages such claims." *Id.* (citing *United States Gypsum Co. v. Indiana Gas Co., Inc., 350 F.3d 623, 627 (7th Cir. 2003)*; *Chicago Studio, 940 F.3d at 978*). In short, Tyler "cannot escape" that it has pled that "Lexur's bids were lower than the bids received by the Counties in previous bidding cycles." *Id.* at 4. Regarding "Tyler's post-hoc effort to claim it has pled bid rigging," Defendants maintain that this practice requires "an agreement among competitors to fix prices submitted to a buyer or to divvy up work among themselves." *Id.* at 4-5 (citing *U.S. v. Heffernan, 43 F.3d 1144, 1149 (7th Cir. 1994)*; *In re Insurance Brokerage Antitrust Litigation, 618 F.3d 300, 336 (3rd Cir. 2010)*; 1 CALLMANN ON UNFAIR COMP., TR.&MONO. § 4.34 (4th ed.)) (emphasis removed). Because Tyler does not allege "that Lexur colluded with other competitors to allow Lexur to obtain the bids from the Counties," Defendants argue that "there is no *per se* wrongful conduct." *Id.* at 6. Defendant contend that Tyler's reliance on *Azzarelli* is misplaced because the alleged conduct in that case "involved an agreement among competitors to allocate bidding for projects among themselves." *612 F.2d at 297*.

The Court agrees with Defendants: Tyler has not pled sufficient facts to demonstrate that consumers were harmed by Lexur's alleged conduct, the type of injury that falls behind the Sherman Act's shield. To show antitrust injury, a plaintiff must prove that its loss **[*12]** flows from an anticompetitive *effect* of the defendant's behavior since it betrays the Sherman Act's purpose to award damages for losses stemming from acts that do not hurt competition. *Atlantic Richfield, 495 U.S. at 334*. In other words, when an injury flows from aspects of a defendant's conduct that are beneficial or neutral to competition—even if the defendant's conduct is illegal *per se*—there is no antitrust injury. *See id.* By way of example, if a defendant acquired market power through a series of illegal mergers, and then *lowered* prices to enhance its market share, a competitor who lost profits would not be able to establish antitrust injury. *See generally* *Brooke Grp. Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 223, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993)* ("Low prices benefit consumers regardless of how those prices are set, and so long as they are above predatory levels, they do not threaten competition.") (quotation omitted). Here, there is no doubt that prices went down; Tyler admits as much in its Complaint (and briefing). Because Tyler's alleged injury does not flow from conduct that was harmful to competition, it has not pled an injury as contemplated by the Sherman Act.

As for bid rigging, that practice is "a form of price fixing in which *bidders agree* to eliminate competition among them, as by taking turns **[*13]** being the low bidder." *United States v. Fenzl, 670 F.3d 778, 780 (7th Cir. 2012)* (citations omitted) (emphasis added).[5] Clearly, this type of *per se* violation of the Sherman Act requires some agreement among competitors to manipulate a market. Tyler has alleged no such thing, and instead simply proclaims in its Complaint that "*Defendants* restrained competition for public works contracts by reducing the number of potential bidders and rigging the result of the bidding process." (Filing No. 1 at 26, 27-28 (emphasis added).) Notably absent from this allegation is *any* remark of a competitor conspiring with Defendants let alone any discussion of the collusive conduct in which they purportedly engaged. *See* *Fenzl, 670 F.3d at 780*. There is no mention in the Complaint of a competitor of Lexur aside from Tyler, which, of course, claims to be the victim of—not a participant in—the supposed bid rigging. And, in fact, Tyler admits that no other competitor joined with Lexur in the supposed scheme, writing in its response brief that Defendants "colluded to ensure that neither Tyler *nor any other competitor* would have a full and fair opportunity to bid competitively against Lexur." (Filing No. 58 at 8 (emphasis added).) Because Tyler has failed to allege that Lexur "agreed" **[*14]** with any other competitor to rig bids, it has not pled this *per se* violation of the Sherman Act.

Because Tyler has not sufficiently pled an antitrust injury under the Sherman Act, the Court **grants** Defendants' Motions as they pertain to Count I.

B. Indiana Antitrust Act violations

In Count II, Tyler brings a claim for a violation of *Indiana Code § 24-1-2-3*, the *Indiana Antitrust Act* (Filing No. 1 at 27). Specifically, Tyler alleges the Defendants violated this Act by "encouraging, assisting, and supporting a

---

[5] *See also* "Bid Rigging," AN FTC GUIDE TO ANTITRUST LAWS, https://www.ftc.gov/tips-advice/competition-guidance/guide-antitrust-laws/dealings-competitors/bid-rigging (last visited May 27, 2021) ("Bid rigging can take many forms, but one frequent form is when competitors agree in advance which firm will win the bid. For instance, competitors may agree to take turns being the low bidder, or sit out of a bidding round, or provide unacceptable bids to cover up a bid-rigging scheme. Other bid-rigging agreements involve subcontracting part of the main contract to the losing bidders, or forming a joint venture to submit a single bid.").

conspiracy for the Counties to issue out-of-cycle requests for bids with an unusually short turnaround time and minimal notice designed to eliminate competition, to terminate the Counties' 2017 Tyler Contracts, and to award the cyclical reassessment contracts to Lexur as the sole bidder." *Id.* Defendants argue that because the "Indiana Antitrust Act is patterned after the Sherman Antitrust Act"—and the same "standards are applied"—this claim should be dismissed for the same reason as above: there is no "'antitrust injury or competitive harm.'" (Filing No. 30 at 7-8 (quoting *Diech-Kiebler v. Bank One*, No. 404-cv-00005, 2005 WL 2428210 at *6 (S.D. Ind. Sept. 30, 2005)).)

Tyler responds that not only does the claim survive for the reasons **[*15]** described in the prior subsection but also because "Defendants improperly conflate the Indiana Antitrust Act with the federal Sherman Act." (Filing No. 58 at 12.) Notably, the Indiana Antitrust Act, unlike the Sherman Act, specifically provides that "'[a] person who engages in any scheme, contract, or combination to restrain or restrict bidding for the letting of any contract for private or public work, or restricts free competition for the letting of any contract for private or public work, commits a Class A misdemeanor.'" *Id.* (quoting *Ind. Code § 24-1-2-3*). As the Indiana Antitrust Act provides a private right of action to enforce this provision, *see* *Ind. Code § 24-1-2-7(a)*, Tyler maintains that plaintiffs have an additional means of relief not available under the Sherman Act (Filing No. 58 at 12). As for cognizable injury under *Indiana Code § 24-1-2-3*, the Indiana Court of Appeals has "expressly held that plaintiff's own damages (time and cost wasted on a bid where the process was rigged) were sufficient to sustain [a] claim." *Id.* at 13 (quoting *City of Auburn Through Bd. Of Public Works and Safety v. Mavis, 468 N.E.2d 584, 585 (Ind. Ct. App. 1984)*). "Here," Tyler concludes, harm exceeds this metric when injuries include "significant costs to investigate Defendants' conduct and to inform the Counties of the circumstances, the initial loss of the **[*16]** Contracts for certain of the Counties, and the cost to formally protest the bid process and secure reinstatement of the Contracts, among other injuries detailed in the Complaint." *Id.*

Defendants reply that the Indiana Antitrust Act requires the same type of "antitrust injury" as federal ***antitrust law*** and that "the specific Indiana statute cited by Tyler requires a showing of collusion between multiple parties." (Filing No. 64 at 7.) First, a plaintiff must generally allege under the Indiana Antitrust Act an "'antitrust injury' that 'naturally flows from what makes the defendant's acts unlawful.'" *Id.* at 7-8 (quoting *City of Auburn, 468 N.E.2d at 585*). In any event, the damages alleged in *City of Auburn*—the case on which Tyler relies—were "incurred in preparing a bid that was never going to be successful," whereas here, "Tyler seeks to recover for damages it incurred only *after* it lost the contracts." *Id.* at 8 (emphasis in original). Because "Tyler would have incurred the same costs if it lost the contracts with the Counties regardless of the legality or illegality of the Defendants' conduct," its alleged damages "are not 'the type of injury which naturally flows from what makes the defendant's acts unlawful.'" *Id.* **[*17]** at 8-9 (quoting *City of Auburn, 468 N.E.2d at 586*). By way of comparison, Defendants point to *Thompson v. Vigo County Board of County Commissioners*, where the Indiana Court of Appeals held that there was no antitrust injury when a plaintiff, like Tyler, "'did not even expend the effort to prepare a bid.'" *Id.* at 9 (quoting *876 N.E.2d 1150, 1156 (Ind. Ct. App. 2007)*). Defendants note that the *Thompson* panel reasoned that "'it would be difficult to prove, let alone, speculate, that [plaintiff] would have been the successful bidder but for the purported collusion.'" *Id.* (quoting *876 N.E.2d at 1155*).

As for *Indiana Code § 24-1-2-3*, Defendants note that this provision of the Indiana Antitrust Act requires a plaintiff to "show that two or more parties colluded together to engage in a 'scheme, contract, or combination' to restrict bidding." *Id.* at 10 (quoting *Shook Heavy and Environmental Const. Group, a Div. of Shook, Inc. v. City of Kokomo, 632 N.E.2d 355, 359 (Ind. 1994)*). And "[m]ultiple individuals representing the same entity cannot 'collude' together for the purposes of satisfying the statutory 'collusion or fraud' requirement." *Id.* at 11 (citing *Fuller v. Town of Vevay ex rel. Vevay Town Council, 713 N.E.2d 318, 322 (Ind. Ct. App. 1999)*). Here, Tyler has not alleged "that Lexur coordinated with any other competitors or entities to enact this 'conspiracy.'" *Id.*

The Court agrees with Defendants: Tyler has not alleged sufficient injury under the Indiana Antitrust Act to state a claim. When plaintiffs proceed through the private right of action contained in the Indiana Antitrust Act, they must show an -

> injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. The injury should reflect the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation. It should, in short, be the type of loss that the claimed violations **[*18]** . . . would be likely to cause.

Alva Elec., Inc. v. Evansville-Vanderburgh Sch. Corp., 7 N.E.3d 263, 269 (Ind. 2014) (quoting *Brunswick, 429 U.S. at 489*). In fact, "Indiana precedent reflects that when an antitrust action is brought privately actual injury to the plaintiff must be demonstrated." *Id. at 270*. As held in *Thompson*, a plaintiff who "did not even expend the effort to prepare a bid" does not suffer an injury that "'naturally flow[s]' from the collusion," even assuming such collusion occurred. *876 N.E.2d at 1156*. It would, of course, as Defendants noted, "be difficult to prove, let alone, speculate, that [a plaintiff] would have been the successful bidder but for the purported collusion" in this instance. *Id. at 1155*. Here, Tyler's alleged injury—that it *potentially* would have won the bids *if* it had enjoyed the chance to prepare one—is too speculative to meet this essential element under the Indiana Antitrust Act. *See Alva Elec., 7 N.E.3d at 270* (citing *Thompson, 876 N.E.2d at 1156*) (holding that "without evidence of injury, [plaintiffs] are not entitled to relief").

Regarding *Indiana Code § 24-1-2-3*, this provision requires collusion between distinct entities. *See Gariup Constr. Co. v. Carras-Szany-Kuhn & Assocs., P.C., 945 N.E.2d 227, 240 (Ind. Ct. App. 2011)* (affirming summary judgment of *Indiana Code § 24-1-2-3* claim when "none of the facts of this case, taken alone or as a whole, raises a genuine issue of material fact from which a factfinder *could reasonably infer collusion*") (emphasis added); *Skyline Roofing & Sheet Metal Co. v. Ziolkowski Constr., Inc., 957 N.E.2d 176, 187-88 (Ind. Ct. App. 2011)* (responding to **[*19]** argument that "'[t]here must be some combination or collusive activity between two or more distinct entities before there can be a violation of antitrust laws'" by noting that plaintiff "alleged collusion between three entirely distinct entities"). Here, as described in the subsection above, Tyler has not alleged that Defendants colluded with any others and instead merely alleges that they "colluded" among themselves (*see* Filing No. 1 at 28 (noting in the Complaint that Tyler has been harmed "[a]s a direct and proximate result of Defendants' collusion"). This does not suffice to state a claim under *Indiana Code § 24-1-2-3*. *See Fuller, 713 N.E.2d at 322* ("It is clear then that the [defendant] cannot scheme, contract or combine with itself in violation of *Indiana Code Section 24-1-2-3*."); *Tilbury v. City of Fort Wayne, 471 N.E.2d 1183, 1186 (Ind. Ct. App. 1984)* (same).

Because Tyler has not sufficiently pled a violation of the Indiana Antitrust Act, the Court **grants** Defendants' Motions as they pertain to Count II.

C. Tortious interference with a contract

In Count III, Tyler brings a claim for tortious interference with a contract (Filing No. 1 at 28-29). To state a claim for tortious interference with a contract, a plaintiff must allege (1) the existence of a valid and enforceable contract, (2) the defendant's knowledge of the existence **[*20]** of the contract, (3) the defendant's intentional inducement of the breach of contract, (4) an absence of justification for the defendant's conduct, and (5) damage resulting from the defendant's wrongful inducement of the breach. *Nat'l City Bank, Indiana v. Shortridge, 689 N.E.2d 1248, 1252 (Ind. 1997)*, *supplemented on other grounds sub nom. Nat'l City Bank, Ind. v. Shortridge, 691 N.E.2d 1210 (Ind. 1998)* (citing *Winkler v. V.G. Reed & Sons, Inc., 638 N.E.2d 1228, 1235 (Ind. 1994)*; *Daly v. Nau, 167 Ind. App. 541, 549 n.6, 339 N.E.2d 71, 76 n.6 (1975)*).

The fourth prong of this test is at issue here: "absence of justification." Deceptively plain, Indiana appellate courts have struggled to delineate a canonical definition of this phrase. On one hand (and as advanced by Defendants (*see* Filing No. 30 at 8-9)), some panels of the Indiana Court of Appeals have held that this prong is established only if "the breach is malicious and exclusively directed to the injury and damage of another." *Miller v. Cent. Indiana Cmty. Found., Inc., 11 N.E.3d 944, 961 (Ind. Ct. App. 2014)* (quotation omitted), *trans. denied*; *see also Mourning v. Allison Transmission, Inc., 72 N.E.3d 482, 488 (Ind. Ct. App. 2017)*; *Duty v. Boys & Girls Club of Porter Cty., 23 N.E.3d 768, 775 (Ind. Ct. App. 2014)*. The Indiana Supreme Court, however, "summarily affirm[ed]" the language of one panel that recognized that the higher court, as noted by Tyler (*see* Filing No. 58 at 14), did not "discuss or even suggest that a malicious standard . . . was the appropriate standard with which to analyze the absence of justification." *Coca-Cola Co. v. Babyback's Int'l, Inc., 841 N.E.2d 557, 560 (Ind. 2006)*; *Coca-Cola Co. v. Babyback's Int'l, Inc., 806 N.E.2d 37, 51 (Ind. Ct. App. 2004)*, *rev'd on other grounds*; *see also Ind. App. R. 58(A)(2)* (instructing that portions of Court of Appeals' opinions that are "summarily **[*21]** affirmed . . . shall be considered as Court of

Appeals' authority"). In fact, the last time the Supreme Court directly considered how to determine whether conduct was justified in this context, it weighed

(a) the nature of the defendant's conduct;
(b) the defendant's motive;
(c) the interests of the plaintiff with which the defendant's conduct interferes;
(d) the interests sought to be advanced by the defendant;
(e) the social interests in protecting the freedom of action of the defendant and the contractual interests of the plaintiff;

(f) the proximity or remoteness of the defendant's conduct to the interference; and

(g) the relations between the parties.

Winkler, 638 N.E.2d at 1235 (citing *Restatement (Second) of Torts § 767* (1977)). Conspicuously absent from *Winkler* is any mention of malice;[6] instead, the Court noted that "the overriding question is whether the defendants' conduct has been fair and reasonable under the circumstances." *Id.* (citing *Restatement (Second) of Torts § 767 cmt. j*).

With a split in Court of Appeals precedent, this Court proceeds under the test endorsed by Indiana's court of last resort in *Winkler. See Beanstalk Grp., Inc. v. AM Gen. Corp., 283 F.3d 856, 863 (7th Cir. 2002)* (Indiana law does not require "that the interference be 'malicious'; it's enough if it's intentional and unjustified. The word 'malicious' does appear in **[*22]** a few cases, but it is apparent that the 'malice' to which it refers . . . is intentionality rather than ill will.") (citations omitted). Even under this framework, however, Defendants contend that the Complaint merely alleges that Lexur's conduct furthered its "intent to enter the Indiana real estate assessment market and compete with Tyler." (Filing No. 30 at 9.) Because "courts have held that competition is a legitimate interest that establishes justification for purposes of a tortious interference claim," *id.* (citing *Konecranes, Inc. v. Davis, No. 1:12-cv-01700-JMS-MJD, 2013 U.S. Dist. LEXIS 52815, 2013 WL 1566326, at *3 (S.D. Ind. 2013)*), Defendants argue that Tyler's allegations "cannot form the basis of a tortious interference claim," *id.* at 10.

Tyler responds that "competition is only proper justification when 'the actor does not employ wrongful means' and 'does not create or continue an unlawful restraint on trade.'" (Filing No. 58 at 14 (quoting *Restatement (Second) of Torts § 768* (1979); *see also Harvest Life Ins. Co. v. Getche, 701 N.E.2d 871, 877 (Ind. Ct. App. 1988)* (adopting *§ 768*).) Here, "Defendants employed wrongful means by orchestrating and implementing a scheme to rig the bidding process for various public works contracts, resulting in an unlawful restraint on trade." *Id.* At this motionto-dismiss stage, Tyler maintains, the Court must accept **[*23]** "that defendants acted with intent to eliminate competition so that they could induce the breach of Tyler's contracts and line their own pockets"; but the question of "[w]hether defendants acted with a legitimate business purpose . . . is a factual inquiry" suited for a different time. *Id.* at 15. In any event, "Defendants' interest in 'competing' for the Counties' contracts would not in any way explain why they participated in the process of terminating Tyler and deliberately sought to have Tyler terminated immediately," Tyler adds. *Id.* at 16. As for precedent cited by Defendants, those cases involved conduct that was "in the spirit of competition," which is "the complete opposite" here: "Defendants worked to manipulate the bidding process, eliminate competition and competitors (not just Tyler, but all competitors), and ensure that Lexur's bid and price would win no matter what, even if lower and/or better bids might have been forthcoming in a normal, competitive process." *Id.* at 17 (citing *Konecranes, 2013 U.S. Dist. LEXIS 52815, 2013 WL 1566326, at *3*).

In reply, Defendants contend that because "Lexur's conduct does not constitute 'bid rigging,' 'price fixing,' or any other *per se* anticompetitive conduct," Tyler "cannot rely upon allegations **[*24]** of that conduct to sustain its tortious interference claims." (Filing No. 64 at 12 (citing *Brazauskas v. Fort Wayne-South Bend Diocese, Inc., 796 N.E.2d 286, 291 (Ind. 2003)*).) Moreover, while Tyler seemingly implies "that the fact that the Counties terminated

---

[6] Notably, the *Winkler* court eschewed endorsing the statement from the affirmed Court of Appeals decision that "[t]o satisfy this element of the tort, the breach must be malicious and exclusively directed to the injury and damage of another." *Winkler v. V.G. Reed & Sons, Inc., 619 N.E.2d 597, 600 (Ind. Ct. App. 1993)*, *aff'd*, *638 N.E.2d 1228 (Ind. 1994)*.

their contracts with Tyler and offered out-of-cycle bids is somehow wrongful conduct attributable to Lexur," the Complaint never alleges any facts illustrating how Defendants engaged in "improper conduct." *Id.* Instead of baldly proclaiming that Lexur "acted wrongfully," Defendants argue that "Tyler must allege how that conduct is somehow 'wrongful' such as making misrepresentations, applying unfair economic pressure, or threatened litigation which induced the Counties to breach their contracts." *Id.* at 13 (citing *Winkler, 638 N.E.2d at 1235*). Again, all the Complaint alleges, Defendants continue, is that "Lexur acted with the intent to obtain contracts with the Counties," but "pursuing one's own business interest is not 'without justification.'" *Id.* (citing *Konecranes, 2013 U.S. Dist. LEXIS 52815, 2013 WL 1566326, at *3*). Unlike the cases it cites, Tyler "has not alleged any wrongful means other than the alleged 'unlawful restraint on trade' which fails as a matter of law." *Id.* at 13-14 (citing *Howmedica Osteonics Corp. v. DJO Global, Inc., 2018 U.S. Dist. LEXIS 227687, 2018 WL 3130969, at *4 (S.D. Ind. Mar. 15, 2018)* (allowing claim to proceed when complaint alleged that business interests were advanced using fraudulent **[*25]** misrepresentations, which had been specifically identified by the Restatement as an example of "wrongful means")).

Considering the parties' arguments, the *Winkler* framework, and the pertinent provisions of the Restatement, the Court concludes that Defendants' conduct was—as the Complaint itself alleges—justified because it was animated by a legitimate business purpose: to increase Lexur's business. Though Tyler alleges that Defendants tortiously interfered with the contracts by "encouraging, assisting, and supporting a conspiracy for the Counties to issue out-of-cycle requests for bids with an unusually short turnaround time and minimal notice," (Filing No. 1 at 29), it is unclear what specific wrongful conduct they performed to "manipulate" the Counties to issue the "out-of-cycle requests," (*see* Filing No. 58 at 5, 17). In other words, the Complaint does not allege through what wrongful means Defendants—who, according to the Complaint, had been mainly constrained to doing business in Ohio (*see* Filing No. 1 at 6)—triggered the Counties into opening the rebid processes. *Cf. Winkler, 638 N.E.2d at 1235-36* ("We begin our analysis with the observation that Winkler makes no contention that defendants' conduct was *malum* ***[*26]*** *in se*. . . . Winkler also does not suggest that defendants' motive was a willful or spiteful intent to injure him. . . . Winkler gives, and we perceive, no reasons why his contract interests should receive greater protection in tort law than the business interests sought to be advanced by defendants here."); *Restatement (Second) of Torts § 768 cmt. e* ("[P]hysical violence, fraud, civil suits and criminal prosecutions, are all wrongful in the situation covered by this Section. On the other hand, the actor may use persuasion and he may exert limited economic pressure.").

Instead, Tyler merely maintains that Defendants "employed wrongful means by orchestrating and implementing a scheme to rig the bidding process for various public works contracts, resulting in an unlawful restraint on trade." (Filing No. 58 at 14.) But, as discussed above, Defendants did not rig bids, and the Court "will not invent legal arguments" for *Tyler, Cty. of McHenry v. Ins. Co. of the W., 438 F.3d 813, 818 (7th Cir. 2006)* (quotation omitted), that advance alternative modes of wrongful conduct in which Defendants may have engaged, *see also, e.g., C.R. England v. Swift Transportation Co., 2019 UT 8, 437 P.3d 343, 346, 353 (Utah 2019)* (rejecting, following "a review of the caselaw from other jurisdictions," "that inducement of a breach of an existing contract constitutes improper means" in tortious interference claims). **[*27]** All told, because Tyler has failed to sufficiently allege "an absence of justification for the defendant's conduct," the Court **grants** Defendants' Motions to Dismiss as they relate to Count III.

D. Tortious interference with a business relationship

In Count IV, Tyler brings a claim for tortious interference with a business relationship (Filing No. 1 at 29-30). Similar to tortious interference with a contract, a claim for tortious interference with a business relationship requires a plaintiff to plead "(1) the existence of a valid relationship; (2) the defendant's knowledge of the existence of the relationship; (3) the defendant's intentional interference with that relationship; (4) the absence of justification; and (5) damages resulting from defendant's wrongful interference with the relationship."*McCollough v. Noblesville Sch., 63 N.E.3d 334, 344 (Ind. Ct. App. 2016)* (citations omitted). But, different from above, this claim also "requires some independent illegal action." *Brazauskas, 796 N.E.2d at 291* (citing *Watson Rural Water Co., Inc. v. Ind. Cities Water Corp., 540 N.E.2d 131 (Ind. Ct. App. 1989)*).

Defendants argue that not only does this claim fail because of the presence of justification for their conduct but also because there was no requisite independent illegal action. Yet the Court need not reach this second argument because this claim falters for the same reason **[*28]** as outlined above: Tyler's failure to allege the absence of justification. The Court, then, **grants** Defendants' Motions to Dismiss as they relate to Count IV.

E. Civil conspiracy

Finally, Tyler brings a claim against Defendants for civil conspiracy (Count VI) (Filing No. 1 at 32). "A civil conspiracy is a combination of two or more persons who engage in a concerted action to accomplish an unlawful purpose or to accomplish some lawful purpose by unlawful means." *Hall v. Shaw, 147 N.E.3d 394, 407 (Ind. Ct. App. 2020)* (quotations omitted). But civil conspiracy is not a freestanding claim; instead, it is "just another way of asserting a concerted action in the commission of a tort." *Id.* In short, "[c]ivil conspiracy must be alleged with an underlying tort." *Bd. of Trustees of Purdue Univ. v. Eisenstein, 87 N.E.3d 481, 498 (Ind. Ct. App. 2017)* (quotation omitted). Tyler alleges that Defendants "intentionally engaged in concerted action to violate federal and Indiana anti-trust laws and to tortiously interfere with Tyler's contractual and business relationships." (Filing No. 1 at 32.)

Defendants argue that because "Tyler's civil conspiracy claim relies upon Lexur's alleged violation of federal and state antitrust laws, as well as its tortious interference claims"—and those claims fail—Tyler "has no basis upon which to make its civil **[*29]** conspiracy claim." (Filing No. 30 at 12-13.) In response, Tyler maintains that "[j]ust as [its] tort claims survive these Motions, so too does its civil conspiracy claim." (Filing No. 58 at 19.) In reply, Defendants rejoin that "[b]ecause Tyler's claims for tortious interference with contract and tortious interference with business relationships both fail, so [must] Tyler's civil conspiracy claim." (Filing No. 64 at 14.) At this stage of the litigation, the life of Tyler's civil conspiracy claim rises and falls with the continued viability of its underlying tort claims. Because no underlying tort claim survives the Motions to Dismiss, the Court **grants** Defendants' Motions as they pertain to Count VI.

IV. CONCLUSION

For the reasons outlined above, the Court **GRANTS** the Defendants' Motions to Dismiss (Filing No. 29; Filing No. 31). Tyler's claims are **dismissed without prejudice**.[7] Tyler shall have **fourteen (14) days** from the date of this Entry to file an amended complaint, if such a filing is not an exercise in futility. If nothing is filed by that date, final judgment will issue.

SO ORDERED.

Date: 6/29/2021

Judges: ROBIN L. ROSENBERG, UNITED STATES DISTRICT JUDGE. MAGISTRATE JUDGE BRUCE E. REINHART.

Opinion by: ROBIN L. ROSENBERG

Opinion

[*1217] **ORDER GRANTING BRAND MANUFACTURER DEFENDANTS' MOTION TO DISMISS RICO CLAIM IN CONSOLIDATED AMENDED CONSUMER ECONOMIC LOSS CLASS ACTION COMPLAINT**

This matter is before the Court on Brand Manufacturer Defendants'[1] ("Defendants") **[*1218]** Motion to Dismiss RICO Claim in Consolidated Amended Consumer Economic Loss Class Action Complaint ("Motion to Dismiss"). DE 3115. **[**17]** The Court held a hearing on the Motion to Dismiss on June 3, 2021 (the "Hearing"). The Court has carefully considered the Motion to Dismiss, Plaintiffs' Opposition thereto [DE 3327], Defendants' Reply [DE 3425], the arguments that the parties made during the Hearing, and the record and is otherwise fully advised in the premises. For the reasons set forth below, the Defendants' Motion to Dismiss is **GRANTED** and Count I of the Amended Consumer Economic Loss Class Action Complaint ("ELC") is **DISMISSED WITH PREJUDICE**.

I. Factual Background[2]

[1] The Brand Manufacturer Defendants include Defendants Boehringer Ingelheim Pharmaceuticals, Inc. ("BI"); Chattem, Inc., Sanofi US Services Inc., and Sanofi-Aventis U.S. LLC (collectively, "Sanofi"); Pfizer Inc. ("Pfizer"); and GlaxoSmithKline LLC ("GSK").

This case concerns the pharmaceutical product Zantac and its generic forms, which are widely sold as heartburn and gastric treatments. The molecule in question—ranitidine—is the active ingredient in both Zantac and its generic forms.

Zantac has been sold since the early 1980s, first by prescription and later as an over-the-counter ("OTC") medication. In 1983, the U.S. Food and Drug Administration ("FDA") approved the sale of prescription Zantac. AMPIC ¶ 240. GSK first developed and patented Zantac. *Id.* ¶ 239. Zantac was a blockbuster—the first prescription drug in history to reach $1 billion in sales. *Id.* ¶ 240.

GSK entered into a joint venture with Warner-Lambert **[**18]** in 1993 to develop an OTC form of Zantac. *Id.* ¶ 233. Beginning in 1995, the FDA approved the sale of various forms of OTC Zantac. *Id.* ¶¶ 233, 237. The joint venture between GSK and Warner-Lambert ended in 1998, with Warner-Lambert retaining control over the sale of OTC Zantac in the United States and GSK retaining control over the sale of prescription Zantac in the United States. *Id.* ¶ 243. Pfizer acquired Warner-Lambert in 2000 and took control of the sale of OTC Zantac in the United States. *Id.* ¶ 245. The right to sell OTC Zantac in the United States later passed to BI and then to Sanofi. *Id.* ¶¶ 249-50, 253-55. When the patents on prescription and OTC Zantac expired, numerous generic drug manufacturers began to produce generic ranitidine products in prescription and OTC forms. *Id.* ¶¶ 260-62.

Scientific studies have demonstrated that ranitidine can transform into a cancer-causing molecule called N-nitrosodimethylamine ("NDMA"), which is part of a carcinogenic group of compounds called N-nitrosamines. *Id.* ¶¶ 348, 359, 365, 367. Studies have shown that these compounds increase the risk of cancer in humans and animals. *Id.* ¶¶ 398-404. The FDA, the Environmental Protection Agency, and **[**19]** the International Agency for Research on Cancer consider NDMA to be a probable human carcinogen. *Id.* ¶¶ 275, 279. The FDA has set the acceptable daily intake level for NDMA at 96 nanograms. *Id.* ¶¶ 302.

Valisure LLC and ValisureRX LLC, a pharmacy and testing laboratory, filed a Citizen Petition on September 9, 2019, calling **[*1219]** for the recall of all ranitidine products due to high levels of NDMA in the products. *Id.* ¶ 322. The FDA issued a statement on September 13 warning that some ranitidine products may contain NDMA. *Id.* ¶ 323. On November 1, the FDA announced that testing had revealed the presence of NDMA in ranitidine products. *Id.* ¶ 333. The FDA recommended that drug manufacturers recall ranitidine products with NDMA levels above the acceptable daily intake level. *Id.* Five months later, on April 1, 2020, the FDA requested the voluntary withdrawal of all ranitidine products from the market. *Id.* ¶ 338.

II. Procedural Background

After the discovery that ranitidine products may contain NDMA, plaintiffs across the country began initiating lawsuits related to their purchase and/or use of the products. On February 6, 2020, the United States Judicial Panel on Multidistrict Litigation created **[**20]** this multi-district litigation ("MDL") pursuant to *28 U.S.C. § 1407* for all pretrial purposes and ordered federal lawsuits for personal injury and economic damages from the purchase and/or use of ranitidine products to be transferred to the undersigned. DE 1. Since that time, approximately 1,400 plaintiffs have filed lawsuits in, or had their lawsuits transferred to, the United States District Court for the Southern District of Florida. In addition, this Court has created a Census Registry where tens of thousands of claimants who have not filed lawsuits have registered their claims. *See* DE 547.

---

[2] A court must accept a plaintiff's factual allegations as true at the motion-to-dismiss stage. *West v. Warden, 869 F.3d 1289, 1296 (11th Cir. 2017)* ("When considering a motion to dismiss, we accept as true the facts as set forth in the complaint and draw all reasonable inferences in the plaintiff's favor.") (quotation marks omitted). Plaintiffs have set forth their factual allegations in three "master" complaints: the Amended Master Personal Injury Complaint ("AMPIC"); the Consolidated Amended Consumer Economic Loss Class Action Complaint; and the Consolidated Medical Monitoring Class Action Complaint ("MMC") (collectively, the "Master Complaints"). DE 2759, 2835, 2832-1. Unless otherwise noted, all citations will be made to the redacted versions of the Master Complaints.

Plaintiffs filed their first Master Complaints on June 22, 2020. DE 887, 888, 889. In those Master Complaints, Plaintiffs contended that the ranitidine molecule is unstable, breaks down into NDMA, and has caused thousands of consumers of ranitidine products to develop various forms of cancer. DE 887 ¶¶ 1, 6, 19. They alleged that "a single pill of ranitidine can contain quantities of NDMA that are hundreds of times higher" than the FDA's allowable limit. *Id.* ¶ 4. The Plaintiffs pursued federal claims and state claims under the laws of all 50 U.S. states, Puerto Rico, and the District of Columbia. *See generally* ***[**21]*** DE 889.

The Court has entered numerous Pretrial Orders to assist in the management of this MDL. In Pretrial Order # 36, the Court set a schedule for the filing and briefing of the first round of motions to dismiss under *Rule 12* directed to the Master Complaints. DE 1346. The various defendants filed motions to dismiss.

Following an amendment to Pretrial Order # 36, Plaintiffs filed the AMPIC on February 8, 2021. DE 2759. After the Court granted a two-week extension of time [DE 2720], Plaintiffs filed the MMC [DE 2832-1] and the ELC [DE 2835] on February 22, 2021. In Pretrial Order # 61, the Court set a schedule for the filing and briefing of the second round of motions to dismiss under *Rule 12* directed to the Master Complaints. DE 2968. The Defendants filed the Motion to Dismiss addressed herein pursuant to that schedule.

III. The Economic Loss Class Action Complaint

One hundred and eighty named Plaintiffs bring the ELC on behalf of themselves and all others similarly situated. Each Plaintiff asserts that he or she purchased and/or used a ranitidine product during an approximate timeframe. The Plaintiffs bring the complaint in their individual capacities and on behalf of numerous classes pursuant to **[**22]** *Rule 23*. Among the various classes is one nationwide class: the "RICO Class," comprised of one hundred and six named Plaintiffs (hereafter referred to as "Plaintiffs") who purchased Defendants' OTC Zantac. ELC ¶ 708.

Plaintiffs assert Count I of the ELC against Defendants for alleged violations of the Racketeer Influenced and Corrupt Organizations Act ("RICO"), *18 U.S.C. § 1962(c)*, **[*1220]** *(d)*. *Id.* ¶¶ 485, 720. At the Hearing, Plaintiffs clarified that they are pursuing two claims within Count I. Hearing Tr. at 121. One claim is for violating *18 U.S.C. § 1962(c)*, which makes it unlawful "for any person employed by or associated with any enterprise engaged in, or the activities of which affect, interstate or foreign commerce, to conduct or participate, directly or indirectly, in the conduct of such enterprise's affairs through a pattern of racketeering activity or collection of unlawful debt." *Id.* The second claim is for violating *18 U.S.C. § 1962(d)*, which makes it unlawful to conspire to violate *§ 1962(c)*. *Id.*

Plaintiffs allege that Defendants were aware of the risks associated with ranitidine consumption. ELC ¶ 529. Rather than remove OTC Zantac from store shelves or warn the public about its safety risks, Defendants formed an enterprise to deliberately and unlawfully misrepresent and conceal the safety risks. *Id.* ¶¶ 501, **[**23]** 528-68, 569-606, 733-34. Defendants' motivation was to increase their "revenues and profits from the OTC Zantac and minimize their losses from the manufacture and the sale of all their Ranitidine-Containing Products." *Id.* ¶ 734. Defendants carried out their scheme through "thousands" of fraudulent interstate mail and wire communications during a decades-long marketing and promotional campaign to mislead the public [*id.* ¶¶ 615-17, 627, 629-48], through misleading communications with federal regulators [*id.* ¶¶ 552, 574, 582, 584, 589], and through efforts to manipulate key opinion leaders and industry groups regarding the science and safety of ranitidine products [*id.* ¶¶ 675-96]. Plaintiffs purchased OTC Zantac because of these misrepresentations and omissions regarding its safety. *Id.* ¶¶ 773, 790. Had Plaintiffs known that OTC Zantac was unreasonably dangerous, they would not have purchased the drugs, much less at the price they paid. *Id.* ¶¶ 779-80.

IV. Summary of the Parties' Arguments and the Court's Rulings

Defendants filed the instant Motion to Dismiss seeking the dismissal with prejudice of Plaintiffs' RICO claim in Count I of the ELC. DE 3115 at 6.[3] Defendants make three primary **[**24]** arguments in support of dismissal. First, Plaintiffs lack statutory standing to assert a RICO claim for three reasons: Plaintiffs did not purchase OTC Zantac directly from any Defendant and therefore cannot sue them under the indirect purchaser rule; Plaintiffs have not alleged a cognizable injury; and Plaintiffs have not plausibly alleged proximate causation. *Id.* at 12, 14-15. Second, Plaintiffs failed to allege an "association-in-fact enterprise," a basic element of a civil RICO claim, because they did not plausibly allege a common, criminal purpose or relationships amongst Defendants. *Id.* at 17-18. And third, Plaintiffs failed to allege that Defendants committed a pattern of racketeering activity. *Id.* at 25.

Plaintiffs respond that they have standing to sue Defendants under RICO because the indirect purchaser rule does not apply to RICO claims; they have alleged a cognizable injury in that they spent money on a worthless product; and, they have plausibly alleged proximate causation. DE 3327 at 11-18. Next, Plaintiffs have pled an "association-in-fact enterprise" because they allege that Defendants' common purpose was fraudulent in nature and that the dependent relationships between **[**25]** Defendants ensured a common purpose. *Id.* at 19-24. Finally, Plaintiffs have pled a pattern **[*1221]** of racketeering by means of wire and mail fraud that spanned more than two decades. *Id.* at 25.

The Court concludes that the indirect purchaser rule applies to RICO claims and the facts of this case. The indirect purchaser rule is a limitation on statutory standing that authorizes suits by direct purchasers, but bars suits by indirect purchasers. The indirect purchaser rule bars Plaintiffs' RICO claim because they did not purchase OTC Zantac directly from Defendants. Plaintiffs therefore do not have statutory standing to sue Defendants under RICO. The Court does not reach the merits of Defendants' other arguments in the Motion to Dismiss.

Therefore, the Court grants Defendants' Motion to Dismiss. Plaintiffs' RICO claim in Count I of the ELC is dismissed with prejudice.

V. Standard of Review

The inquiry when determining if a plaintiff has statutory standing is whether the plaintiff has a cause of action under the statute. *Lexmark Int'l, Inc. v. Static Control Components, Inc., 572 U.S. 118, 128, 134 S. Ct. 1377, 188 L. Ed. 2d 392 (2014)*. A court may grant a motion to dismiss a pleading if the pleading fails to state a claim upon which relief can be granted. *Fed. R. Civ. P. 12(b)(6)*. A *Rule 12(b)(6)* motion to dismiss should be granted only when the **[**26]** pleading fails to contain "enough facts to state a claim to relief that is plausible on its face." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. "A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*. The pleading must contain more than labels, conclusions, a formulaic recitation of the elements of a cause of action, and naked assertions devoid of further factual enhancement. *Id.* The "[f]actual allegations must be enough to raise a right to relief above the speculative level." *Twombly, 550 U.S. at 555*; *see also Iqbal, 556 U.S. at 678* (explaining that the plausibility standard "asks for more than a sheer possibility that a defendant has acted unlawfully").

VI. Analysis of the Defendants' Motion to Dismiss

The Motion to Dismiss raises several separate legal issues, however, the applicability of the indirect purchaser rule is dispositive in this case. The Court first explains in greater depth the parties' arguments relating to the indirect purchaser rule, and then reviews the relevant law governing the indirect purchaser rule before providing its analysis and conclusion.

---

[3] Unless noted otherwise, all page number references herein are to the page numbers generated by CM/ECF in the header of each document.

A. Arguments

Defendants argue that the indirect purchaser rule bars Plaintiffs' **[**27]** RICO claims. DE 3115 at 12. This rule of statutory standing originated in the antitrust context. *Id.* at 9. The rule prohibits a product consumer from suing a defendant such as manufacturers from whom the consumer did not directly purchase the product. *Id.* The indirect purchaser rule is a simple, bright-line rule. DE 3425 at 8 (citing *Apple Inc. v. Pepper, 139 S. Ct. 1514, 1521, 203 L. Ed. 2d 802 (2019)*). The Supreme Court and the Eleventh Circuit have explained that Congress modeled RICO's civil-action provision, *18 U.S.C. § 1964(c)*, on the civil-action provision of federal ***antitrust law***. DE 3115 at 9-10 (citing *Holmes v. Sec. Inv. Prot. Corp., 503 U.S. 258, 268, 112 S. Ct. 1311, 117 L. Ed. 2d 532 (1992)* and *Corcel Corp. v. Ferguson Enterprises, Inc., 551 F. App'x 571, 576 (11th Cir. 2014)*). It follows that limits on antitrust standing, like the indirect purchaser **[*1222]** rule, apply in the RICO context as well. *Id.* at 10. Because Plaintiffs did not purchase OTC Zantac directly from Defendants, the indirect purchaser rule bars the RICO claim. *Id.* at 12.

Plaintiffs respond that the indirect purchaser rule does not apply outside of the antitrust context. DE 3327 at 13. Plaintiffs argue that Supreme Court and Eleventh Circuit precedent do not support applying the rule in the RICO context; in fact, precedent requires the opposite. *Id.* at 13-14. The Eleventh Circuit has held that plaintiffs bringing RICO claims have standing as long as they show that their **[**28]** injuries were proximately caused by the RICO violation. *Id.* at 14 (citing *Corcel, 551 F. App'x at 576*). Because Plaintiffs have plausibly pled proximate causation, they have standing to sue Defendants under RICO. *Id.* Even if the indirect purchaser rule were to apply in the RICO context, the rule cannot apply in this case. *Id.* This is because Plaintiffs are "direct victims and targets of" Defendants' fraudulent scheme and suffered "the first—and perhaps only—injury by purchasing a drug with a material, undisclosed safety risk." *Id.* at 14-15. Any intermediaries, such as the retailers from whom Plaintiffs did directly purchase OTC Zantac, only benefitted from the demand for the drug. *Id.* at 15. These intermediaries would likely lack standing to sue under RICO because the fraudulent scheme did not target them, and the indirect purchaser rule cannot apply if no one would have standing to sue. *Id.* 15 n.4. Consequently, the indirect purchaser rule does not bar Plaintiffs' RICO claim. *Id.* at 16.

B. Law on the Indirect Purchaser Rule

In *Illinois Brick Co. v. Illinois, 431 U.S. 720, 737, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*, the Supreme Court interpreted federal ***antitrust law*** to contain a statutory standing principle called the indirect purchaser rule. In that case, the Illinois Brick Company manufactured **[**29]** and distributed concrete blocks and sold those blocks to masonry contractors, who sold masonry structures to general contractors, who sold their services for construction projects to the State of Illinois, the ultimate consumer of the blocks. *Id. at 726*. The State sued Illinois Brick, alleging that Illinois Brick had engaged in a conspiracy to fix the price of the blocks, leading to an overcharge that flowed down the distribution chain to the ultimate consumer, the State. *Id. at 727*.

The Supreme Court ruled that the State did not have standing to bring an antitrust action against Illinois Brick because the State had not purchased the blocks directly from Illinois Brick. *Id. at 737*. The Court held that plaintiffs who are two or more steps removed from the antitrust violator in a distribution chain have no statutory standing. *Id. Illinois Brick* "established a bright-line rule that authorizes suits by *direct* purchasers but bars suits by *indirect* purchasers." *Apple, 139 S. Ct. at 1520* (emphasis in original). "For example, if manufacturer A sells to retailer B, and retailer B sells to consumer C, then C may not sue A. But B may sue A if A is an antitrust violator. And C may sue B if B is an antitrust violator. That is the straightforward rule **[**30]** of *Illinois Brick*." *Id. at 1521*.

The Supreme Court created the indirect purchaser rule to prevent the transformation of "treble-damages actions into massive multiparty litigations involving many levels of distribution and including large classes of ultimate consumers remote from the defendant." *Illinois Brick, 431 U.S. at 740*; *see 15 U.S.C. § 15(a)* (providing that "any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws may sue therefore . . . and shall recover threefold the damages by **[*1223]** him sustained"). The rationales for barring indirect purchaser suits are: "(1) facilitating more effective enforcement of antitrust laws; (2) avoiding complicated damages calculations; and (3) eliminating duplicative damages against antitrust defendants." *Apple, 139 S. Ct. at 1521, 1524*.

The Supreme Court has emphasized, however, that "the bright-line rule of *Illinois Brick* means that there is no reason to ask whether the rationales of *Illinois Brick* 'apply with equal force' in every individual case." *Id.* (quoting *Kansas v. UtiliCorp United, Inc., 497 U.S. 199, 216, 110 S. Ct. 2807, 111 L. Ed. 2d 169 (1990)*). In cases where some or all of these rationales do not apply to the facts of a particular case, the Court has warned against engaging in "an unwarranted and counterproductive exercise to litigate a series of exceptions" to **[**31]** the indirect purchaser rule. *UtiliCorp, 497 U.S. at 208* (rejecting a proposal to create an exception to *Illinois Brick* where it was relatively simple to trace the pass-on of an alleged overcharge to indirect purchasers and where intermediaries passed on most or all of the overcharge to the ultimate consumer).

In *Holmes v. Securities Investor Protection Corp.*, the Supreme Court noted that it had "repeatedly observed, that Congress modeled *§ 1964(c)* on the civil-action provision of the federal antitrust laws." *503 U.S. at 267-68*; *see 18 U.S.C. § 1964(c)* (providing that "[a]ny person injured in his business or property by reason of a [RICO] violation . . . may sue therefor . . . and shall recover three fold the damages he sustains"). The Court stated that it could "fairly credit the 91st Congress, which enacted RICO, with knowing the interpretation federal courts had given the words earlier Congresses had used" in federal antitrust legislation. *Holmes, 503 U.S. at 268*. Because Congress "used the same words," in the RICO statute as it used in ***antitrust law***, the Court could "only assume that [Congress] intended them to have the same meaning that courts had already given them." *Id.* (holding that proximate causation is a requirement of RICO claims as it is of antitrust claims).

Turning **[**32]** to whether the indirect purchaser rule applies in the RICO context, the majority of federal courts to address the issue have applied the rule to RICO claims. These courts rely on the language of *Holmes* and include the Third, Sixth, and Seventh Circuits. *See Trollinger v. Tyson Foods, Inc., 370 F.3d 602, 616 (6th Cir. 2004)*; *McCarthy v. Recordex Serv., Inc., 80 F.3d 842, 855 (3d Cir. 1996)*; *see Carter v. Berger, 777 F.2d 1173, 1177 (7th Cir. 1985)*. In *McCarthy*, the Third Circuit held that "the precepts taught by *Illinois Brick* and *Utilicorp* apply to RICO claims, thereby denying RICO standing to indirect victims." *80 F.3d at 855* ("Indeed, plaintiffs have conceded that, if they lacked antitrust standing, they also lacked RICO standing."). In *Trollinger*, the Sixth Circuit held that "indirect purchasers lack standing under RICO and the antitrust laws to sue for overcharges passed on to them by middlemen." *370 F.3d at 616*. And in *Carter*, the Seventh Circuit held that, because the indirect purchaser rule promotes the enforcement of antitrust and RICO laws, it "therefore applies to RICO, too." *777 F.2d at 1177*. *See also Hu v. BMW of N. Am., LLC, No. CV184363KMJBC, 2021 U.S. Dist. LEXIS 19412, 2021 WL 346974, at *4 (D.N.J. Feb. 2, 2021)*; *Gamboa v. Ford Motor Co.*, No. 18-10106, 2020 WL 7047612, at *6 (E.D. Mich. Nov. 30, 2020); *Rickman v. BMW of N. Am., No. CV 18-4363(KM) (JBC), 2020 U.S. Dist. LEXIS 111739, 2020 WL 3468250, at *8 (D.N.J. June 25, 2020)*; *Minnesota by Ellison v. Sanofi-Aventis U.S. LLC, No. 318CV14999BRMLHG, 2020 U.S. Dist. LEXIS 82957, 2020 WL 2394155, at *8 (D.N.J. Mar. 31, 2020)*; *Albers v. Mercedes-Benz USA, LLC, No. CV 16-881(KM)(ESK), 2020 U.S. Dist. LEXIS 52321, 2020 WL 1466359, at *7* ***[*1224]*** *(D.N.J. Mar. 25, 2020)*; *MSP Recovery Claims, Series, LLC v. Sanofi Aventis U.S. LLC, No. 3:18-CV-2211-BRM-LHG, 2019 U.S. Dist. LEXIS 54086, 2019 WL 1418129, at *13 (D.N.J. Mar. 29, 2019)*; *In re Insulin Pricing Litig., No. 3:17-CV-0699-BRM-LHG, 2019 U.S. Dist. LEXIS 25185, 2019 WL 643709, at *8 (D.N.J. Feb. 15, 2019)*.

Even within Circuits that have not addressed this issue, several federal district courts have held that the indirect purchaser rule applies in the RICO context. These district courts include one within the Southern District of Florida. *See, e.g., In re Takata Airbag Prods. Liab. Litig., No. 14-24009-CV, 2019 U.S. Dist. LEXIS 25185, 2021 WL 908552, at *12 (S.D. Fla. Mar. 9, 2021)* (holding that the indirect purchaser rule **[**33]** applies in the RICO context as well"); *Harris Cnty., Tex. v. Eli Lilly & Co., No. CV H-19-4994, 2020 U.S. Dist. LEXIS 179199, 2020 WL 5803483, at *12 (S.D. Tex. Sept. 29, 2020)* (declining "to follow the minority rule" and holding "that indirect purchasers lack standing under RICO").

Other federal district courts have held that the indirect purchaser rule does not apply to federal RICO claims. These courts have reached this decision within circuits that have yet to provide guidance on the rule's application to federal RICO claims. *See, e.g., In re: EpiPen (Epinephrine Injection, USP) Mktg., Sales Pracs. & Antitrust Litig., 336*

F. Supp. 3d 1256, 1325 (D. Kan. 2018) (declining to apply the indirect purchaser rule to a RICO claim in the absence of supporting Tenth Circuit authority and instead holding that RICO standing requires only a showing of proximate causation); *GolTV, Inc. v. Fox Sports Latin Am., Ltd., No. 16-24431-CIV, 2018 U.S. Dist. LEXIS 29836, 2018 WL 1393790, at *19 (S.D. Fla. Jan. 26, 2018)* (noting the parties' failure to cite to any Eleventh Circuit authority applying the indirect purchaser rule and holding that the Eleventh Circuit's standard for RICO standing is no more than proximate causation).

C. Analysis and Conclusion

1. The Applicability of the Indirect Purchaser Rule in the RICO Context

The Court must first decide whether the indirect purchaser rule applies in the RICO context. The Court looks to the Supreme Court's decision in *Holmes* which held that, because RICO's civil-suit provision was modeled on federal ***antitrust law***, antitrust standing principles like **[**34]** proximate causation apply equally to RICO claims. *503 U.S. at 267-68*. This Court recently concluded, "[i]t logically follows that the limits the Supreme Court has placed on anti-trust standing, namely the [in]direct purchaser rule, would apply in the RICO context as well." *In re Takata, 524 F. Supp. 3d 1266, 2021 U.S. Dist. LEXIS 44464, 2021 WL 908552, at *12*.

Plaintiffs, relying on *Sedima, S.P.R.L. v. Imrex Co., 473 U.S. 479, 498-99, 105 S. Ct. 3275, 87 L. Ed. 2d 346 (1985)*, argue that, despite the Supreme Court's holding in *Holmes*, the indirect purchaser rule does not apply to RICO claims. Specifically, Plaintiffs argue that *Sedima* represents the Supreme Court's unwillingness to interpret RICO statutory standing requirements identically to those under ***antitrust law***. DE 3327 at 13-14. In *Sedima*, the Supreme Court rejected the Second Circuit's conclusion that "just as an antitrust plaintiff must allege an 'antitrust injury,' so a RICO plaintiff must allege a 'racketeering injury.'" *Id. at 485*. The Court held that it did not perceive a distinct "racketeering injury" requirement from the text of the RICO statute. *Id.* However, as the Seventh Circuit explained in *Carter*, "*Sedima* held that the 'antitrust injury' rule of antitrust does not apply to RICO, but this is so because 'RICO injury' would be an unintelligible requirement, not because there is no parallel between the two statutes." *Carter, 777 F.2d at 1176* **[*1225]** (citation **[**35]** omitted). Additionally, the plaintiff in *Sedima* was not an indirect purchaser, and the case "does not at all mention the indirect purchaser rule," nor does it provide any "analysis tending to suggest a preference that such rule not be applied in the RICO context." *In re Insulin Pricing Litig., 2019 U.S. Dist. LEXIS 25185, 2019 WL 643709, at *11*. Thus, Plaintiffs' reliance on *Sedima* is inapposite.

So too is their reliance on Eleventh Circuit authority. Plaintiffs rely primarily upon *Grogan v. Platt, 835 F.2d 844, 847-48 (11th Cir. 1988)* to demonstrate that the Eleventh Circuit would refrain from applying the indirect purchaser in the RICO context. In *Grogan*, the court did acknowledge "the perils in relying too closely on the analogy of the antitrust laws" to RICO. *Id. at 847-88*. However, the court was faced with the question of whether the plain language of the RICO statute authorizes recovery of a particular category of damages, not whether the indirect purchaser rule applies to RICO. *Id.*

Plaintiffs rely upon *Corcel, 551 F. App'x at 576*, and *Bivens Gardens Office Building, Inc. v. Barnett Banks of Florida, Inc., 140 F.3d 898, 906 (11th Cir. 1998)*, to argue that proximate causation is all that is required in the Eleventh Circuit to establish RICO standing. DE 3327 at 14. However, as in *Grogan*, these cases did not involve indirect purchaser plaintiffs and did not mention the indirect purchaser rule. And while these cases held that a RICO plaintiff must demonstrate **[**36]** that his or her injuries were proximately caused by the RICO violation, proximate causation and the indirect purchaser rule, while related, are "two analytically distinct aspects" of standing. *McCarthy, 80 F.3d at 851*. Because the Supreme Court's message in *Holmes* was clear, the Court is persuaded to join the prevailing view that the indirect purchaser rule applies to RICO claims.

2. The Applicability of the Indirect Purchaser Rule to Plaintiffs' RICO Claim

The Court next turns to the question of whether Plaintiffs are indirect purchasers, as contemplated by *Illinois Brick*. The bright-line indirect purchaser rule leaves no question that they are. Plaintiffs do not allege that they purchased OTC Zantac directly from any Defendant. Instead, Plaintiffs conceded at the Hearing that OTC Zantac was sold by Defendants to various distributors, then sold to retailers, and then sold to consumers. *See* Hearing Tr. at 125. Thus, Plaintiffs were not the first, nor even the second, purchasers in the OTC Zantac distribution chain. They were, by definition, indirect purchasers who lack standing to sue Defendants under RICO. *See* *McCarthy, 80 F.3d at 848, 855* (explaining that "only the purchaser immediately downstream" has standing to assert RICO claims **[**37]** for payment of "excessive prices").

A case from the District of New Jersey is most analogous to this case. *See* *Rickman, 2020 U.S. Dist. LEXIS 111739, 2020 WL 3468250, at *1*. In *Rickman*, class plaintiffs asserted that the automaker BMW colluded with several other defendants to market cars as "clean diesel," when they knew that the cars discharged emissions at impermissible levels and concealed the true level of emissions through deceptive technology. *Id.* The plaintiffs alleged that the defendants misled them by making affirmative misrepresentations and by failing to disclose material information and that, but for the defendants' conduct, the plaintiffs either would not have bought the cars or would have paid less for them. *Id. at *7*. The plaintiffs did not allege that they bought cars directly from BMW or the other defendants; rather, the plaintiffs bought them from dealers, from private parties, or at auctions. *Id. at *9*. The **[*1226]** court held that the plaintiffs did not have standing to sue under RICO when they did not purchase their cars directly from the defendants. *Id.* ("The Third Circuit and courts in this District have repeatedly held that such indirect purchasers lack standing to assert RICO claims."). Here, Plaintiffs similarly purchased OTC Zantac from various **[**38]** retailers, not directly from Defendants. Thus, Plaintiffs, like the *Rickman* plaintiffs, are barred from suing Defendants.

Plaintiffs argue that they "are not 'indirect purchasers' as understood by *Illinois Brick* because they are the direct victims and targets of Defendants' fraud" and "any intermediaries purely *benefitted* from the increased demand for OTC Zantac." *Id.* at 14-15 (emphasis in original). Plaintiffs further argue that they "suffered the first—and perhaps only—injury by purchasing a drug with a material, undisclosed safety risk." *Id.* at 15. Faced with identical arguments in *Warren General Hospital v. Amgen Inc., 643 F.3d 77, 92 (3d Cir. 2011)*, the Third Circuit noted that *Illinois Brick* and its progeny:

> [D]id not resolve what party was a direct purchaser by calculating exactly where the harm lay. In fact, the [Supreme] Court's discussion in those cases of the policy rationales underpinning the rule manifests the Court's intent to *avoid* linking direct purchaser status to injury calculations in determinations. In *UtiliCorp*, the consumer plaintiffs also argued that the public utility (the direct purchaser) had not been harmed by the antitrust defendant's actions, and that consumers had borne the full brunt of the injuries, thus justifying an exception **[**39]** to the *Illinois Brick* rule. The Court highlighted the need to apply the rule consistently: "[T]he process of classifying various market situations according to the amount of pass-on likely to be involved and its susceptibility of proof in a judicial forum would entail the very problems that the [indirect purchaser] rule was meant to avoid. The litigation over where the line should be drawn in a particular class of cases would inject the same massive evidence and complicated theories into treble-damages proceedings, albeit at a somewhat higher level of generality.

643 F.3d 77, 92 (3d Cir. 2011) (quoting *UtiliCorp, 497 U.S. at 216-17*).

The Court agrees with the Third Circuit's interpretation of *Illinois Brick* and *UtiliCorp*: there are no "direct-harm" or "first victim" exceptions to the indirect purchaser rule. *Id.*; *see also* *Hu, 2021 U.S. Dist. LEXIS 19412, 2021 WL 346974, at *4* (holding that there is no direct-harm exception to the indirect purchaser rule). Accordingly, the Plaintiffs' assertion that they are not true indirect purchasers is unpersuasive. The bright-line indirect purchaser rule, as articulated in *Illinois Brick* and reiterated in *UtiliCorp* and *Apple*, is an unsurmountable hurdle for Plaintiffs. As the Supreme Court explained, the rule is simple and straightforward. *See* *Apple, 139 S. Ct. at 1521* ("[I]f manufacturer **[**40]** A sells to retailer B, and retailer B sells to consumer C, then C may not sue A.").

Additionally, the Supreme Court has noted that "the bright-line rule of *Illinois Brick* means that there is no reason to ask whether the rationales of *Illinois Brick* 'apply with equal force' in every individual case" as it is unwise to "engage in 'an unwarranted and counterproductive exercise to litigate a series of exceptions.'" *Id. at 1524* (quoting *UtiliCorp, 497 U.S. at 216-17*). Because the rationales underpinning the indirect purchaser rule are not dispositive, the Court need not discuss them here in order to apply the indirect purchaser rule to Plaintiffs' RICO claim.

[*1227] In sum, the Court's examination of the Supreme Court's rulings in cases such as *Illinois Brick, UtiliCorp*, and *Apple*, and of other caselaw applying those rulings, leads it to the conclusion that the indirect purchaser rule applies in the RICO context and in this case. Because Plaintiffs did not purchase OTC Zantac directly from Defendants, Plaintiffs' RICO claim fails for lack of statutory standing.

VII. Conclusion

For the foregoing reasons, it is **ORDERED AND ADJUDGED** that Brand-Name Manufacturer Defendants' Motion to Dismiss [DE 3115] is **GRANTED**. Count I of the Consolidated **[**41]** Amended Consumer Economic Loss Class Action Complaint [DE 2835] is **DISMISSED WITH PREJUDICE**.

DONE and ORDERED in Chambers, West Palm Beach, Florida, this 30th day of June, 2021.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN1[] **Motions to Dismiss, Failure to State Claim**

A *Fed. R. Civ. P. 12(b)(6)* motion to dismiss for failure to state a claim tests the legal sufficiency of a complaint. A claim will normally survive a motion to dismiss if it offers a short and plain statement showing that the pleader is entitled to relief. *Fed. R. Civ. P. 8(a)(2)*. This statement must contain sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face. A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged. The plausibility standard is not akin to a probability requirement, but it asks for more than a mere possibility that a defendant has acted unlawfully. Where a complaint pleads facts that are merely consistent with a defendant's liability, it stops short of the line between possibility and plausibility of entitlement to relief.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Evidence > Inferences & Presumptions > Inferences

HN2[] **Motions to Dismiss, Failure to State Claim**

When considering a *Fed. R. Civ. P. 12(b)(6)* motion, the court must accept as true all factual allegations in the complaint as well as all reasonable inferences that may be drawn from such allegations. Such allegations must be construed in the light most favorable to the nonmoving party. Fraud allegations elicit a more demanding standard.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Mistake

HN3[] **Motions to Dismiss, Failure to State Claim**

Averments of fraud must be accompanied by the who, what, when, where, and how of the misconduct charged. Like the basic notice pleading demands of *Fed. R. Civ. P. 8*, a driving concern of *Fed. R. Civ. P. 9(b)* is that defendants be given fair notice of the charges against them. *Rule 9(b)* demands that allegations of fraud be specific enough to give defendants notice of the particular misconduct so that they can defend against the charge and not just deny that they have done anything wrong. *Rule 9(b)* requires particularity so that the defendant can prepare an adequate answer. This heightened-pleading standard can apply even to claims that do not innately require proof of fraud. If such a claim nonetheless avers fraudulent conduct, then at least those averments must satisfy *Rule 9(b)*; and, if a claim rests entirely on a unified course of fraudulent conduct, then the pleading of that claim as a whole must satisfy the particularity requirement of *Rule 9(b)*. Finally, a motion to dismiss a complaint or claim grounded in fraud under *Rule 9(b)* for failure to plead with particularity is the functional equivalent of a motion to dismiss under *Rule 12(b)(6)* for failure to state a claim.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN4[] **Motions to Dismiss, Failure to State Claim**

A court's review on a *Fed. R. Civ. P. 12(b)(6)* motion to dismiss is limited to the complaint, materials incorporated into the complaint by reference, and matters of which the court may take judicial notice. Moreover, in evaluating the complaint, the court must accept factual allegations in the complaint as true and construe the pleadings in the light most favorable to the nonmoving party. At the same time, a court need not accept as true allegations that contradict matters properly subject to judicial notice or allegations that are merely conclusory, unwarranted deductions of fact, or unreasonable inferences.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Evidence > Judicial Notice > Adjudicative Facts > Facts Generally Known

Evidence > Judicial Notice > Adjudicative Facts > Public Records

Evidence > Judicial Notice > Adjudicative Facts > Verifiable Facts

HN5[] **Motions to Dismiss, Failure to State Claim**

There are two doctrines that permit district courts to consider material outside the pleadings without converting a motion to dismiss into a motion for summary judgment: judicial notice under *Fed. R. Evid. 201* and incorporation by reference. The judicial notice doctrine permits a court to take judicial notice of matters that are not subject to reasonable dispute. *Fed. R. Evid. 201(b)*. A fact is not subject to reasonable dispute if it is generally known, or can be accurately and readily determined from sources whose accuracy cannot reasonably be questioned. *Fed. R. Evid. 201(b)(1)-(2)*. However, just because the document itself is susceptible to judicial notice does not mean that every assertion of fact within that document is judicially noticeable for its truth. For instance, though public records are generally subject to judicial notice, a court may not take judicial notice of disputed facts within public records.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN6[] **Motions to Dismiss, Failure to State Claim**

Incorporation-by-reference is a judicially created doctrine that treats certain documents as though they are part of the complaint itself. This doctrine permits a court to consider a document if the plaintiff refers extensively to the document or the document forms the basis of the plaintiff's claim. A court generally may assume an incorporated document's contents are true for purposes of a motion to dismiss under *Fed. R. Civ. P. 12(b)(6)*. Because all inferences must still be drawn in the nonmoving party's favor, however, it is improper to assume the truth of an incorporated document if such assumptions only serve to dispute facts stated in a well-pleaded complaint.

Evidence > Judicial Notice > Adjudicative Facts > Public Records

HN7[] **Adjudicative Facts, Judicial Records**

Courts may properly take judicial notice of other court filings and matters of public record.

Business & Corporate Compliance > ... > Computer & Internet Law > Privacy & Security > State Regulation

Torts > ... > Invasion of Privacy > Intrusions > Elements

Communications Law > Federal Acts > Wiretap Acts

HN8[] **Privacy & Security, State Regulation**

To state a claim under the Wiretap Act, *18 U.S.C.S. § 2510 et seq.*, or the California Invasion of Privacy Act, *Cal. Penal Code § 632*, or for intrusion upon seclusion or invasion of privacy, plaintiffs must allege facts showing that they had a reasonable expectation of privacy in the oral communications that they allege were recorded without their consent.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Evidence > Inferences & Presumptions > Inferences

HN9[] **Motions to Dismiss, Failure to State Claim**

At the motion to dismiss phase, the complaint is construed in a light most favorable to the plaintiff, and all reasonable inferences are to be drawn in favor of the plaintiff.

Communications Law > Federal Acts > Wiretap Acts

Computer & Internet Law > Privacy & Security > Electronic Communications Privacy Act

Evidence > ... > Illegally Obtained Evidence > Eavesdropping, Interception & Wiretapping > Elements

Evidence > ... > Illegally Obtained Evidence > Eavesdropping, Interception & Wiretapping > Wiretapping

HN10[] **Federal Acts, Wiretap Acts**

The Wiretap Act, *18 U.S.C.S. § 2510 et seq.*, is designed to prohibit all wiretapping and electronic surveillance by persons other than duly authorized law enforcement officials engaged in investigation of specified types of major crimes. *18 U.S.C.S. § 2511(1)(a)* makes it unlawful for a person to intentionally intercept, endeavor to intercept, or procure any other person to intercept or endeavor to intercept, any wire, oral, or electronic communication. *18 U.S.C.S. § 2511(1)(a)*. The Wiretap Act also imposes liability on any person who intentionally discloses to any other person the contents of any wire, oral, or electronic communication, or intentionally uses the contents of any wire, oral or electronic communication while knowing or having reason to know that the information was obtained through the unlawful interception, *§ 2511(1)(c)-(d)*.

Business & Corporate Compliance > ... > Communications Law > Federal Acts > Stored Communications Act

Civil Rights Law > Protection of Rights > Privacy Rights > Electronic Communications

Computer & Internet Law > Privacy & Security > Electronic Communications Privacy Act

HN11[] **Federal Acts, Stored Communications Act**

Just as trespass protects those who rent space from a commercial storage facility to hold sensitive documents, the *Stored Communications Act, 18 U.S.C.S. § 2702 et seq.*, protects users whose electronic communications are in electronic storage with an ISP or other electronic communications facility. An ECS provider shall not knowingly divulge to any person or entity the contents of a communication while in electronic storage by that service; if it does so, it is liable for unlawful disclosure of customer communications under *§ 2702(a)*. *18 U.S.C.S. § 2702(a)(1)*.

Business & Corporate Compliance > ... > Breach > Breach of Contract Actions > Elements of Contract Claims

HN12[] **Breach of Contract Actions, Elements of Contract Claims**

In order to plead a claim for breach of contract, plaintiffs must allege: (1) the existence of a contract with defendants, (2) their performance under that contract, (3) defendants breached that contract, and (4) they suffered damages.

Contracts Law > ... > Measurement of Damages > Foreseeable Damages > Benefit of the Bargain

Contracts Law > ... > Damages > Measurement of Damages > Reliance Damages

HN13[] **Foreseeable Damages, Benefit of the Bargain**

Also known as expectation damages, a benefit of the bargain measure of damages is intended to give the injured party the benefit of his bargain and insofar as possible to place him in the same position he would have been in had the promisor performed the contract.

Civil Procedure > Remedies > Damages > Compensatory Damages

HN14[] **Damages, Compensatory Damages**

Generally, a plaintiff may seek damages for the detriment caused by the breach.

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

Securities Law > ... > Securities Exchange Act of 1934 Actions > Insider Trading > Disgorgement of Profits

Securities Law > Civil Liability Considerations > Remedies > Equitable Relief

HN15[] **Equitable Relief, Quantum Meruit**

Under California law, a defendant's unjust enrichment can satisfy the damages' element of a breach of contract claim, such that disgorgement is a proper remedy. The Ninth Circuit has further held that California law recognizes a right to disgorgement of profits resulting from unjust enrichment, even where an individual has not suffered a corresponding loss. To plead a theory of disgorgement, plaintiffs must show that they retain a stake in the profits garnered.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

Securities Law > Postoffering & Secondary Distributions > Securities Exchange Act of 1934 Actions > Heightened Pleading Requirements

HN16[] **Heightened Pleading Requirements, Fraud Claims**

Fraud allegations must be pled with particularity. *Fed. R. Civ. P. 9(b)*. To satisfy *Rule 9(b)*, a pleading must identify the who, what, when, where, and how of the misconduct charged, as well as what is false or misleading about the purportedly fraudulent statement, and why it is false.

Torts > ... > Fraud & Misrepresentation > Actual Fraud > Elements

HN17[] **Actual Fraud, Elements**

Indispensable elements of a fraud claim include a false representation, knowledge of its falsity, intent to defraud, justifiable reliance, and damages.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Antitrust & Trade Law > Consumer Protection > False Advertising > State Regulation

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN18[] State Regulation, Claims

California's Unfair Competition Law (UCL) prohibits any unlawful, unfair or fraudulent business practice and unfair, deceptive, untrue or misleading advertising. *Cal. Bus. & Prof. Code § 17200*. The California Supreme Court has clarified that the UCL, because it is written in the disjunctive, prohibits three separate types of unfair competition: (1) unlawful acts or practices, (2) unfair acts of practices, and (3) fraudulent acts or practices. To plead a UCL claim, a plaintiff's allegations must show that a defendant's conduct violates one of these three prongs. In addition, because a UCL claim may only be brought by a person who has suffered injury in fact and has lost money or property as a result of the unfair competition, *Cal. Bus. & Prof. Code § 17204*, a plaintiff must demonstrate some form of economic injury. This requirement is sometimes referred to as UCL standing.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Antitrust & Trade Law > Consumer Protection > Deceptive Labeling & Packaging > State Regulation

Antitrust & Trade Law > Consumer Protection > False Advertising > State Regulation

HN19[] Trade Practices & Unfair Competition, State Regulation

Under California law, an Unfair Competition Law (UCL), *Cal. Bus. & Prof. Code § 17200 et seq.*, plaintiff must (1) establish a loss or deprivation of money or property sufficient to qualify as injury in fact, i.e., economic injury, and (2) show that that economic injury was the result of, i.e., caused by, the unfair business practice or false advertising that is the gravamen of the claim. There are innumerable ways in which economic injury may be shown; for instance: A plaintiff may (1) surrender in a transaction more, or acquire in a transaction less, than he or she otherwise would have; (2) have a present or future property interest diminished; (3) be deprived of money or property to which he or she has a cognizable claim; or (4) be required to enter into a transaction, costing money or property, that would otherwise have been unnecessary. Certainly, overpayment is an economic injury under the UCL.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

Contracts Law > Remedies > Restitution

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Antitrust & Trade Law > Consumer Protection > Deceptive Labeling & Packaging > State Regulation

HN20[] State Regulation, Claims

The California Supreme Court has defined an order for restitution as one compelling an Unfair Competition Law (UCL), *Cal. Bus. & Prof. Code § 17200 et seq.*, defendant to return money obtained through an unfair business practice to those persons in interest from whom the property was taken. In other words, restitution under the UCL must restore the status quo by returning to the plaintiff funds taken from him or benefits in which the plaintiff has an ownership interest.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN21[] **Trade Practices & Unfair Competition, State Regulation**

The requirement that the Unfair Competition Law injury be economic renders standing under *Cal. Bus. & Prof. Code § 17204* substantially narrower than federal standing under U.S. Const. art. III, which may be predicated on a broader range of injuries.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

Torts > Business Torts > Unfair Business Practices > Elements

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > Deceptive Labeling & Packaging > State Regulation

HN22[] **State Regulation, Claims**

The unlawful prong of the Unfair Competition Law (UCL) borrows violations of other laws and treats them as unlawful practices that the unfair competition law makes independently actionable. In other words, to be unlawful under the UCL, defendants' conduct must violate another borrowed law. Virtually any state, federal or local law can serve as the predicate for an action under *Cal. Bus. & Prof. Code § 17200*.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Torts > Business Torts > Unfair Business Practices > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > State Regulation

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Antitrust & Trade Law > Consumer Protection > False Advertising > State Regulation

HN23[] **Trade Practices & Unfair Competition, State Regulation**

The Unfair Competition Law (UCL), *Cal. Bus. & Prof. Code § 17200 et seq.*, does not define the term unfair. The California Supreme Court has appeared to confine "unfair" to conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition. It further required that 'any finding of unfairness to competitors under *§ 17200* be tethered to some legislatively declared policy or proof of some actual or threatened impact on competition. The Court explained that the prior definitions were too amorphous and provided too little guidance to courts and businesses. However, the Court expressly limited its decision, stating that nothing it said relates to actions by consumers or by competitors alleging other kinds of violations of the unfair competition law such as fraudulent or unlawful business practices or unfair, deceptive, untrue or misleading advertising.

Civil Procedure > ... > Federal Declaratory Judgments > Discretionary Jurisdiction > Factors

HN24[] **Discretionary Jurisdiction, Factors**

Declaratory relief is appropriate when (1) the judgment will serve a useful purpose in clarifying and settling the legal relations in issue, and (2) it will terminate and afford relief from the uncertainty giving rise to the proceeding. A claim for declaratory relief is unnecessary where an adequate remedy exists under some other cause of action.

Civil Procedure > Appeals > Reviewability of Lower Court Decisions > Preservation for Review

HN25[] **Reviewability of Lower Court Decisions, Preservation for Review**

Arguments raised only in footnotes, or only on reply, are generally deemed waived.

Counsel: **[**1]** For Asif Kumandan, Plaintiff: Eric Somers, LEAD ATTORNEY, Lexington Law Group, San Francisco, CA; Vincent Briganti, LEAD ATTORNEY, Andrea Farah, Henry J Kusjanovic, PRO HAC VICE, Christian Levis, Lowey Dannenberg, P.C., White Plains, NY; Erin Green Comite, Scott & Scott, LLP, Colchester, CT; John T. Jasnoch, ScottScott Attorneys at Law LLP, San Diego, CA; Joseph P. Guglielmo, ScottScott, Attorneys at Law, LLP, New York, NY; Mark N. Todzo, Lexington Law Group, LLP, San Francisco, CA.

For Melissa Spurr, Plaintiff: Eric Somers, LEAD ATTORNEY, Lexington Law Group, San Francisco, CA; Mark N. Todzo, LEAD ATTORNEY, Lexington Law Group, LLP, San Francisco, CA; Vincent Briganti, LEAD ATTORNEY, Andrea Farah, Henry J Kusjanovic, PRO HAC VICE, Christian Levis, Lowey Dannenberg, P.C., White Plains, NY; Erin Green Comite, Scott & Scott, LLP, Colchester, CT; John T. Jasnoch, ScottScott Attorneys at Law LLP, San Diego, CA; Joseph P. Guglielmo, ScottScott, Attorneys at Law, LLP, New York, NY.

For B. S., a minor, individually and on behalf of all others similarly situated, Plaintiff: Mark N. Todzo, LEAD ATTORNEY, Lexington Law Group, LLP, San Francisco, CA; Vincent Briganti, LEAD ATTORNEY, Andrea Farah, **[**2]** Peter A. Barile, III, Lowey Dannenberg, P.C., White Plains, NY; Erin Green Comite, Scott & Scott, LLP, Colchester, CT; John T. Jasnoch, ScottScott Attorneys at Law LLP, San Diego, CA.

For Lourdes Galvan, Eleeanna Galvan, Plaintiffs: Mark N. Todzo, LEAD ATTORNEY, Lexington Law Group, LLP, San Francisco, CA; Vincent Briganti, LEAD ATTORNEY, PRO HAC VICE, Andrea Farah, Christian Levis, Lowey Dannenberg, P.C., White Plains, NY; John T. Jasnoch, ScottScott Attorneys at Law LLP, San Diego, CA.

For Edward Brekhus, Plaintiff: Hayley A Reynolds, Gutride Safier LLP, San Francisco, San Francisco, CA; Mark N. Todzo, Lexington Law Group, LLP, San Francisco, CA.

For Jon Hernandez, Plaintiff: Seth Adam Safier, LEAD ATTORNEY, Gutride Safier LLP, San Francisco, CA; Hayley A Reynolds, Gutride Safier LLP, San Francisco, San Francisco, CA; Mark N. Todzo, Lexington Law Group, LLP, San Francisco, CA.

For Google LLC, Defendant: Bobbie Jean Wilson, LEAD ATTORNEY, Mara Boundy, Sunita Bali, Perkins Coie LLP, San Francisco, CA.

For Alphabet Inc., Defendant: Bobbie Jean Wilson, LEAD ATTORNEY, Sunita Bali, Perkins Coie LLP, San Francisco, CA.

Judges: BETH LABSON FREEMAN, United States District Judge.

Opinion by: BETH LABSON FREEMAN

Opinion

[*953] ORDER [3] ON DEFENDANTS' MOTION TO DISMISS THE THIRD CONSOLIDATED AMENDED COMPLAINT**

[Re: ECF 120]

The instant litigation comprises three separately-filed cases that the Court has consolidated. *See* ECF 42; ECF 109. The cases generally allege that Defendants Google LLC and Alphabet, Inc. (collectively, "Google") unlawfully intercepted, recorded, disclosed, and used the private conversations of thousands of users of the Google Assistant software. Presently before the Court is Defendants' motion to dismiss the entire consolidated suit. ECF 120. Having considered the parties' arguments and the applicable law, the Court GRANTS IN PART and DENIES IN PART the motion to dismiss.

I. BACKGROUND

This is a putative consumer class action concerning the Google Assistant, a virtual assistant software developed by Defendants Google LLC and Alphabet, Inc. for use on various Google Assistant Enabled Devices ("GAEDs") manufactured by Defendants and by third parties. Specifically, the operative Third Consolidated Amended Class Action Complaint ("3AC"), which was filed on November 9, 2020, ECF 118, contains the following allegations:

The Google Assistant is a voice-activated software, which means that users can ask questions **[**4]** of and give instructions to the Google Assistant using their voices. 3AC ¶¶ 2-4, 79. This software comes preloaded onto certain devices, such as the Google Home, the Google Pixel smartphones, and third party-manufactured smartphones that use the Google Android operating system; it can also be installed on a range of devices. *Id.* Because the Google Assistant is voice-activated, it is constantly listening for "hotwords"—i.e., "Okay Google" or "Hey Google." *Id.* ¶ 80. It does this by recording and analyzing short snippets of audio, which are stored locally in the Google Assistant Enabled Device's random-access memory ("RAM"); these snippets are continuously overwritten, however, if no hotwords are detected. *Id.* ¶ 81. When the hotwords are detected, the Google Assistant switches into "active listening" mode, meaning that it begins recording and analyzing audio in order to carry out the user's command. *Id.* ¶ 82. The Google Assistant can also be manually activated by pressing a button on the device. *Id.*

Plaintiffs allege that Defendants keep and use the audio recordings for two purposes other than carrying out the user's command: (1) to target personalized advertising to users, and (2) to **[**5]** improve the voice recognition capabilities of the Google Assistant. 3AC ¶¶ 83, 113. Sometimes, the Google Assistant may be triggered into active listening mode when the Google Assistant misperceives other words as the hotwords. This is known as a "false accept." *Id.* ¶ 244. Plaintiffs believe that in such situations, Defendants do not destroy the audio recordings, but rather continue to use them for personalized advertising and to analyze the accuracy of the Google Assistant—just as Defendants would do with authorized recordings. *Id.* ¶¶ 83, 105-113. As evidence, Plaintiffs point to the investigation carried out by VRT NWS, in which VRT NWS reviewed "more than a thousand" audio recordings and "identified 153 conversations" that were recorded due to false accepts. *Id.* ¶ 104.

This suit is based on Defendants' use of audio recordings in "false accept" situations. 3AC ¶ 1, 6-8, 244. In Plaintiffs' view, such use is an invasion of privacy, especially because many of the recorded conversations take place in individuals' homes. *Id.* ¶¶ 85-88; *see also* ¶¶ 18-75. Plaintiffs also believe that this practice contravenes the **[*954]** privacy assurances that Defendants make to users in their Privacy Policy. **[**6]** *Id.* ¶ 90. Plaintiffs are particularly troubled by the fact that some of the recordings include the conversations of children because they do not believe that these children can consent to being recorded. *Id.* ¶ 115.

Based on the foregoing, Plaintiffs have sued Google LLC and its parent company Alphabet Inc. under various state and federal laws. There are 10 claims in the 3AC: (1) violation of the federal *Wiretap Act, 18 U.S.C. §§ 2510 et* seq.; (2) violation of the federal Stored Communications Act ("SCA"), 18 U.S.C. §§ 2702 et seq.; (3) violation of the *California Invasion of Privacy Act ("CIPA"), Cal. Penal Code § 632*; (4) intrusion upon seclusion under California common law; (5) invasion of privacy, in violation of Article I, Section 1 of the California Constitution; (6) breach of contract under California common law; (7) violation of the California Unfair Competition Law ("UCL"), Cal. Bus. & Prof. Code §§ 17200 et seq.; (8) violation of the California Consumers Legal Remedies Act (the "CLRA"), Cal. Civ. Code §1750, et seq.; (9) fraud, deceit, and/or misrepresentation under California common law; and (10) request for declaratory judgment under the Declaratory Judgment Act, 28 U.S.C. §§ 2201 et seq. 3AC ¶¶ 148-288.

These claims are brought by seven Named Plaintiffs:

• Melissa Spurr is a resident of Union County, New York. 3AC ¶ 18. She alleges that she owned at least three Google Home devices during the Class Period. *Id.* ¶ 20.

• B.S. is a minor member of Plaintiff Spurr's household; as such, she **[**7]** has allegedly interacted with Plaintiff Spurr's Google Home device during the Class Period. 3AC ¶¶ 19-20. She brings suit by and through her legal guardian, Plaintiff Spurr. *Id.*

• Lourdes Galvan is a resident of Los Angeles County, California. 3AC ¶ 27. She alleges that she interacted with a Google Assistant-enabled Samsung Galaxy Tab and a Google Assistant-enabled Samsung smartphone during the Class Period. *Id.* ¶ 29.

• E.G., is a member of Plaintiff Galvan's household; she was a minor during a portion of the Class Period but now brings suit on her own. 3AC ¶¶ 28-29. Like Plaintiff Galvan, E.G. alleges that she owned and interacted with a Google Assistant-enabled Samsung Galaxy Tab and a Google Assistant-enabled Samsung smartphone during the Class Period. *Id.* ¶ 29.

• Asif Kumandan is a resident of Kings County, New York. 3AC ¶ 38. He alleges that he owned a Google Assistant-enabled Google Pixel smartphone during the Class Period. *Id.* ¶ 39.

• Edward Brekhus is a resident of Marin County, California. 3AC ¶ 45. He alleges that he owned a Google Assistant-enabled Google Home Mini device during the Class Period. *Id.* ¶ 46. Brekhus obtained the device pursuant to a Spotify promotion. *Id.*

• Jon **[**8]** Hernandez is a resident of Los Angeles County, California. 3AC ¶ 61. Hernandez alleges that he purchased a Google Home Mini device during the Class Period. *Id.* ¶ 62. He further alleges that he owned two other GAEDs during the Class Period. *Id.* ¶ 67.

Defendants now move to dismiss the 3AC pursuant to Fed. R. Civ. P. 12(b)(6). Mot. at 1, ECF 120. The motion has been fully briefed and was heard on May 6, 2021. See Opp., ECF 124; Reply, ECF 129; ECF 134 (minute entry for hearing).

[*955] II. LEGAL STANDARD

HN1[] A Rule 12(b)(6) motion to dismiss for failure to state a claim tests the legal sufficiency of a complaint. Navarro v. Block, 250 F.3d 729, 732 (9th Cir. 2001). A claim will normally survive a motion to dismiss if it offers a "short and plain statement ... showing that the pleader is entitled to relief." *See* Fed. R. Civ. P. 8(a)(2). This statement "must contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009) (quoting Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)). "A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." Iqbal, 556 U.S. at 678. "The plausibility standard is not akin to a 'probability requirement,' but it asks for more than a mere possibility that a defendant has acted **[**9]** unlawfully." *Id.* (quoting Twombly, 550 U.S. at 556). "Where a complaint pleads facts that are 'merely consistent with' a defendant's liability, it 'stops short of the line between possibility and plausibility of 'entitlement to relief.''" *Iqbal, 556 U.S. at 678* (quoting *Twombly, 550 U.S. at 557*).

HN2[] When considering a *Rule 12(b)(6)* motion, the court must accept as true all factual allegations in the complaint as well as all reasonable inferences that may be drawn from such allegations. *LSO, Ltd. v. Stroh, 205 F.3d 1146, 1150 n. 2 (9th Cir. 2000)*. Such allegations must be construed in the light most favorable to the nonmoving party. *Shwarz, 234 F.3d at 435*.

Fraud allegations elicit a more demanding standard. *Rule 9(b)* provides: "In alleging fraud ..., a party must state with particularity the circumstances constituting fraud.... ***HN3***[] Malice, intent, knowledge, and other conditions of a person's mind may be alleged generally." *Fed. R. Civ. P. 9(b)*. This means that "[a]verments of fraud must be accompanied by the 'who, what, when, where, and how' of the misconduct charged." *Vess v. Ciba—Geigy Corp. USA, 317 F.3d 1097, 1106 (9th Cir. 2003)*. Like the basic "notice pleading" demands of *Rule 8*, a driving concern of *Rule 9(b)* is that defendants be given fair notice of the charges against them. *See, e.g., In re Lui, 646 Fed. Appx. 571, 573 (9th Cir. 2016)* ("*Rule 9(b)* demands that allegations of fraud be specific enough to give defendants notice of the particular misconduct ... so that they can defend against the charge and not **[**10]** just deny that they have done anything wrong.") (quotation omitted*); Odom v. Microsoft Corp., 486 F.3d 541, 553 (9th Cir. 2007)* (*Rule 9(b)* requires particularity "so that the defendant can prepare an adequate answer"). This heightened-pleading standard can apply even to claims that do not innately require proof of fraud. *E.g., Vess, 317 F.3d at 1103-05*.

If such a claim nonetheless avers fraudulent conduct, then at least those averments must satisfy *Rule 9(b)*; and, if a claim rests "entirely" on a "unified course of fraudulent conduct," then "the pleading of that claim as a whole must satisfy the particularity requirement of *Rule 9(b)*." *Id. at 1103-04*. Finally, "[a] motion to dismiss a complaint or claim 'grounded in fraud' under *Rule 9(b)* for failure to plead with particularity is the functional equivalent of a motion to dismiss under *Rule 12(b)(6)* for failure to state a claim." *Id. at 1107*.

HN4[] A court's review on a *12(b)(6)* motion to dismiss "is limited to the complaint, materials incorporated into the complaint by reference, and matters of which the court may take judicial notice." **[*956]** *Cedar Point Nursery v. Shiroma, 923 F.3d 524, 530 (9th Cir. 2019)* (citing *Tellabs, Inc. v. Makor Issues & Rights, Ltd., 551 U.S. 308, 322, 127 S. Ct. 2499, 168 L. Ed. 2d 179 (2007)*). Moreover, in evaluating the complaint, the court must "accept factual allegations in the complaint as true and construe the pleadings in the light most favorable to the nonmoving party." *Manzarek v. St. Paul Fire & Marine Ins. Co., 519 F.3d 1025, 1031 (9th Cir. 2008)*. At the same time, a court need not accept as true "allegations that **[**11]** contradict matters properly subject to judicial notice" or "allegations that are merely conclusory, unwarranted deductions of fact, or unreasonable inferences." *In re Gilead Scis. Sec. Litig., 536 F.3d 1049, 1055 (9th Cir. 2008)* (internal quotation marks and citations omitted).

III. REQUEST FOR JUDICIAL NOTICE AND INCORPORATION BY REFERENCE

Defendants have submitted five exhibits that they ask the Court to review in ruling on their motion to dismiss. *See* Mot. 2-3; Bali Decl., ECF 121 ¶¶ 2-7, Exhs. A-F. Defendants believe these exhibits are either incorporated by reference in the 3AC or subject to judicial notice. Plaintiffs do not oppose this request.

HN5[] There are two doctrines that permit district courts to consider material outside the pleadings without converting a motion to dismiss into a motion for summary judgment: judicial notice under *Federal Rule of Evidence 201* and incorporation by reference. *Khoja v. Orexigen Therapeutics, Inc., 899 F.3d 988, 998 (9th Cir. 2018)*, *cert. denied sub nom. Hagan v. Khoja, 139 S. Ct. 2615, 204 L. Ed. 2d 264 (2019)*. The judicial notice doctrine permits a court to take judicial notice of matters that are "not subject to reasonable dispute." *Fed. R. Evid. 201(b)*. A fact is "not subject to reasonable dispute" if it is "generally known," or "can be accurately and readily determined from sources whose accuracy cannot reasonably be questioned." *Fed. R. Evid. 201(b)(1)-(2)*. However, "[j]ust because the document itself is **[**12]** susceptible to judicial notice does not mean that every assertion of fact within that document is judicially noticeable for its truth." *Khoja, 899 F.3d at 999*. For instance, though public records are generally subject to judicial notice, a court may not take judicial notice of disputed facts within public records. *Id.*

HN6[] "[I]ncorporation-by-reference is a judicially created doctrine that treats certain documents as though they are part of the complaint itself." *Khoja, 899 F.3d at 1002*. This doctrine permits a court to consider a document "if the plaintiff refers extensively to the document or the document forms the basis of the plaintiff's claim." *United States v. Ritchie, 342 F.3d 903, 908 (9th Cir. 2003)*. A court generally "may assume an incorporated document's contents are true for purposes of a motion to dismiss under *Rule 12(b)(6)*." *Khoja, 899 F.3d at 1003* (internal quotations omitted). Because all inferences must still be drawn in the nonmoving party's favor, however, "it is improper to assume the truth of an incorporated document if such assumptions only serve to dispute facts stated in a well-pleaded complaint." *Id.*

Exhibit A is a copy of the current version of the Google Terms of Service, effective as of March 31, 2020. Bali Decl. ¶ 2. Exhibit B is a copy of the Google Privacy Policy, effective as of December 19, 2019. **[**13]** *Id.* ¶ 3. Exhibit C is a copy of the Google Terms of Service, effective as of October 25, 2017. *Id.* ¶ 4. Exhibit D is a copy of the Google Terms of Service, effective as of April 14, 2014. *Id.* ¶ 5. These documents "form the basis" for Plaintiffs' claims for breach of contract as they contain the contract terms that were allegedly **[*957]** breached. *See* 3AC ¶¶ 237, 242. Defendants' request to incorporate by reference Exhibits A-D is GRANTED. *See* *Ritchie, 342 F.3d at 908*; *accord* *Bass v. Facebook, Inc., 394 F. Supp. 3d 1024, 1037 n.1 (N.D. Cal. 2019)* (granting Facebook's request to incorporate by reference the Terms of Service because the consolidated complaint relied upon them to allege the breach of contract claims and statutory claims).

Defendants also ask the Court to consider Exhibit E—a true and correct copy of the "Transcript of Proceedings Before the Honorable Beth Freeman United States District Judge" from the April, 9 2020 hearing on Google's Motion to Dismiss Plaintiffs' Consolidated Amended Class Action Complaint. Mot. at 2-3; Bali Decl. ¶ 6. ***HN7***[] Courts may properly take judicial notice of other court filings and matters of public record. *Reyn's Pasta Bella, LLC v. Visa USA, Inc., 442 F.3d 741, 746 n.6 (9th Cir. 2006)*. Defendants' request for judicial notice of Exhibit E is GRANTED.

Lastly, Exhibit F purports to be a copy of the "Manage audio recordings in your **[**14]** Web & App Activity" webpage from Google's Help Center. Bali Decl. ¶ 7. This document is not incorporated by reference by the 3AC; rather, Defendants ask the Court take judicial notice of it because it appears on a publicly accessible website. Mot. at 3 (citing *Fed. R. Evid. 201(b)*). The existence of this document is a judicially noticeable fact, and therefore the Court GRANTS Defendants' unopposed request. *See, e.g.,* *Opperman v. Path, Inc., 84 F. Supp. 3d 962, 976 (N.D. Cal. 2015)* (collecting cases in which courts have taken judicial notice of publicly available policies and agreements). The Court notes, however, that this notice does not establish that the document is valid or otherwise binding on the Plaintiffs. *See* *Datel Holdings Ltd. v. Microsoft Corp., 712 F. Supp. 2d 974, 984 (N.D. Cal. 2010)*.

IV. DISCUSSION

The Court made extensive findings regarding the legal viability of Plaintiffs' previous complaint when considering Defendants' previous motion to dismiss. *See* Order on Motion to Dismiss, ECF 80. The Court addressed each element of each claim in detail. *See generally id*; *see also* Defendants' Motion to Dismiss Consolidated Amended Class Action Complaint, ECF 56 at iii (attacking Plaintiffs' claims in turn). Defendants adopt a more particularized approach in the instant motion. *See* Mot. at i-ii. The Court addresses each argument raised by **[**15]** Defendants in turn.

A. Counts 1, 3, 4, and 5 and the Reasonable Expectation of Privacy

Plaintiffs bring claims 1, 3, 4, and 5 for violation of the Wiretap Act, violation of *CIPA § 632*, intrusion upon seclusion under California common law, and invasion of privacy in violation of the California Constitution. According to Defendants, Plaintiffs Galvan, E.G., and Kumandan's privacy claims fail because they have not alleged that Google intercepted their private communications. Mot. at 6-10.

HN8[] To state a claim under the Wiretap Act or *CIPA § 632* or for intrusion upon seclusion or invasion of privacy, Plaintiffs must allege facts showing that they had a reasonable expectation of privacy in the oral communications that they allege were recorded without their consent. *See* Order on Motion to Dismiss at 11 (must allege "reasonable expectation of privacy" in oral communications to state a claim under the Wiretap Act) (quoting *United States v. McIntyre, 582 F.2d 1221, 1223 (9th Cir. 1978)*); *id.* at 28 (to state a *CIPA Section 632* claim, plaintiffs must allege "confidential communications," which requires a "reasonable expectation of privacy") (citing *Kearney v. Salomon Smith Barney, Inc., 39 Cal.4th 95, 117, n.7,* **[*958]** *45 Cal. Rptr. 3d 730, 137 P.3d 914 (2006)*); *id.* at 31 (the intrusion must have occurred "under circumstances that would give rise to a reasonable expectation of privacy" to state a claim for **[**16]** intrusion upon seclusion or invasion of privacy); *see also Hernandez v. Hillsides, Inc., 47 Cal. 4th 272, 285, 288, 97 Cal. Rptr. 3d 274, 211 P.3d 1063 (2009)*.

Defendants argue that the 3AC does not allege facts showing that Plaintiffs frequently had oral communications near their devices under circumstances giving rise to a reasonable expectation of privacy. Mot. at 7-10. The Court addressed this argument in part in its order on Defendants' previous motion to dismiss. This Court concluded that the Named Plaintiffs' allegations were "too vague" to infer that Plaintiffs' respective GAEDs intercepted their private conversations. Order on Motion to Dismiss at 11. Although this Court rejected Defendants' suggestion that Plaintiffs were required to identify specific communications that Plaintiffs reasonably believed to be private and that were wrongly recorded, it nonetheless found that Plaintiffs failed to allege that they had a reasonable expectation of privacy in the intercepted communications. *Id.* In support of this conclusion, the Court pointed to the lack of "facts regarding the participants in the conversations, the locations of the conversations, or examples of content from the conversations." *Id.* at 12. The Court highlighted that lack of detail was "especially glaring" for Plaintiffs **[**17]** who interacted with smartphones because "smartphones are by their nature mobile and are frequently used in public places." *Id.* The 3AC includes extensive amendments about the Named Plaintiffs' usage of their GAEDs. 3AC ¶¶ 18-75

In light of these amendments, the Court is satisfied that Plaintiffs allege sufficient facts to show that they frequently had oral communications near their devices under circumstances giving rise to a reasonable expectation of privacy. Plaintiffs Galvan and E.G., who are members of the same household, allege that they own a Samsung smartphone and a Galaxy Tab device. 3AC ¶ 29. Plaintiffs Galvan and E.G. allegedly charge these devices in their living or dining room during the day and in the bedroom at night. *Id.* ¶ 31. They further allege that they have private conversations with family members "in their home, bedroom, and car" in the presences of the GAEDs. *Id.* ¶¶ 30-31. For example, on September 17, 2018, the Galvan family had a "private disciplinary conversation" "concerning personal responsibility. This confidential conversation was recorded without a hot word." *Id.* ¶ 32; *see also id.* ¶ 33 (conversation about Galvan parents' childhood in the inner city). Similarly, **[**18]** Plaintiff Kumandan alleges that he "frequently carried his Google Pixel smartphone on his person, including to areas within his home where he has a reasonable expectation of privacy." *Id.* ¶ 39. Kumandan alleges that his GAED recorded a conversation between him and his wife about BBQ sauce at their joint residence "where they have expectation of privacy." *Id.* ¶ 40; *see also id.* ¶ 42 (On July 6, 2019, "Google recorded Plaintiff Kumandan's interaction with his family member and/or a friend which took place in privacy and to the exclusion of all other persons where Plaintiff Kumandan had a reasonable expectation of privacy"). Contrary to Defendants' assertion to the contrary, Mot. at 8, these allegations properly detail the circumstances under which Plaintiffs' private conversations occurred. Plaintiffs Galvan, E.G., and Kumandan all allege that the GAEDs intercepted conversations between family members that occurred inside their respective homes. Such interceptions occurred "surreptitiously" without Plaintiffs uttering a hot word or manually activating the devices. *Id.* ¶¶ 32, 43. While Defendants seem to take issue with the fact that Plaintiffs' decline to go **[*959]** into more granular detail **[**19]** about the content of their conversations, this demand has already been rejected by the Court, Order on Motion to Dismiss at 11, and undermines the alleged private nature of the conversations. In sum, the Court finds that Plaintiffs had a subjective expectation that these conversations were not being overheard or recorded and that this expectation was objectively reasonable. *McIntyre, 582 F.2d at 1223*.

Defendants further argue that Plaintiffs fail to allege facts showing that false accepts routinely occur. Mot. at 10. As an initial matter, Plaintiffs need not plead this allegation in light of amendments to the 3AC. In the Court's previous Order, it held Plaintiffs must allege that "they frequently have oral communications near their respective Google Assistant Enabled Devices under circumstances giving rise to a reasonable expectation of privacy" coupled with an allegation that "false accepts routinely occur" to support an inference that their private conversations were intercepted. Order on Motion to Dismiss at 12; *see also id.* ("At the motion hearing, Defendants represented that through their accounts, users can view all their past conversations with the Google Assistant, including false accepts. If that is **[**20]** the case, Plaintiffs are advised to avail themselves of that information."). This holding was made in context of the previous complaint, in which the Plaintiffs failed to identify *any* conversations that Defendants surreptitiously recorded. Plaintiffs have now rectified this problem and have identified multiple conversations that Defendants recorded even where Plaintiffs did not utter a hot word or manually activate the devices. *See generally* 3AC ¶¶ 18-75.

The Court declines to heed Defendants' objection for a second reason. Defendants object that the allegations in the complaint do not establish that false accepts occur frequently and that "[t]he relevant inquiry is how frequently the Assistant records communications which are not intended for it, and Plaintiffs' own allegations show that this figure is low." Mot. at 10. But this inquiry is more properly considered at the summary judgment phase. ***HN9***[] At the motion to dismiss phase, the complaint is construed in a light most favorable to the plaintiff, *Everest & Jennings, Inc. v. American Motorists Ins. Co., 23 F.3d 226, 228 (9th Cir.1994)*, and all reasonable inferences are to be drawn in favor of the plaintiff, *Jacobson v. Hughes Aircraft, 105 F.3d 1288, 1296 (9th Cir.1997)*. In the 3AC, Plaintiffs Galvan, E.G., and Kumandan allege that they often engaged in private conversations near their **[**21]** GAEDs and identified specific occurrences of private conversations that were allegedly intercepted. 3AC ¶¶ 27-44. Plaintiffs further allege that "[o]f the 11 recorded conversations reflected in the Google account connected to Plaintiff Galvan's smart phone, all 11 were non-consensually recorded by Google and the Google Assistant Enabled Device" and "[o]f the seven recorded conversations that Plaintiff Kumandan's Google account currently reflects, five, or 71%, were non-consensually recorded by Google and Google Assistant Enabled Device." *Id.* ¶¶ 36, 44. Drawing all reasonable inferences in favor of the Plaintiffs, the 3AC adequately alleges that false accepts routinely occur.

The Court DENIES Defendants' Motion to Dismiss based on a failure to allege that Google intercepted Plaintiffs' private communications

B. Count 1 and Unlawful Disclosure or Use

HN10[] The Wiretap Act "is designed to prohibit 'all wiretapping and electronic surveillance by persons other than duly authorized law enforcement officials engaged in investigation of specified types of **[*960]** major crimes.'" *Greenfield v. Kootenai County, 752 F.2d 1387, 1388 (9th Cir. 1985)* (quoting S. Rep. No. 1097, 90th Cong., 2d Sess.). In Count 1 of the 3AC, Plaintiffs allege that the Defendants violated *18 U.S.C. § 2511(1)(a)* of the **[**22]** Wiretap Act, which makes it unlawful for a person to "intentionally intercept[], endeavor[] to intercept, or procure[] any other person to intercept or endeavor to intercept, any wire, oral, or electronic communication." *Id. § 2511(1)(a)*; *see* 3AC ¶¶ 160-162. The Wiretap Act also imposes liability on any person who "intentionally discloses" to "any other person the contents of any wire, oral, or electronic communication," or "intentionally uses" the "contents of any wire, oral or electronic communication" while "knowing or having reason to know that the information was obtained through the [unlawful] interception," *id. § 2511(1)(c)-(d)*; Plaintiffs allege that Defendants also violate these provisions. *See* 3AC ¶¶ 163-168.

Defendants now argue that Plaintiffs' theory that Google is liable under *§ 2511(1)(c)-(d)* for disclosing and using unlawfully intercepted oral communications to target personalized advertising to them fails as a matter of law. Mot. at 11-13. Defendants contend that (1) "the only Plaintiffs who allege that they were targeted with personalized advertisements are Kumandan, Galvan, and E.G.", (2) "'liability for disclosure or use is contingent on the original interception being unlawful'"; and (3) "there are no allegations **[**23]** that Google *disclosed* Plaintiffs' communications to a third party for the purpose of targeting advertisements." Mot. at 11 (quoting Order on Motion to Dismiss at 15) (emphasis in original).

First, the Court agrees with Defendants that the Plaintiffs' allegations of targeted advertising are limited to Plaintiffs Galvan, E.G., and Kumandan. In the 3AC, Galvan and E.G. allege the following facts regarding Google's use of private conversations for targeted advertising:

> Several times, topics of Plaintiff Galvan's and Plaintiff E.G.'s private conversations were used to target advertisements to them. In one such instance, Plaintiff E.G. was doing research on Los Angeles gangs and was having a conversation regarding these gangs during her parents' childhood (who both grew up in the inner city). Following this conversation, Plaintiff E.G. receive targeted advertising in the form of suggested videos by YouTube, a Google-owned company.

3AC ¶ 33. Kumandan alleges:

> On at least one occasion, the subject matter of a conversation between Plaintiff Kumandan and his wife were used to target advertisements to Plaintiff Kumandan. In one such instance, Plaintiff Kumandan was speaking to his wife about BBQ **[**24]** sauces. Plaintiff Kumandan did not search for or otherwise interact with Google regarding the same subject matter. Following this conversation, Plaintiff Kumandan received targeted advertisement where an ad for a BBQ sauce was displayed on Plaintiff Kumandan's Instagram page. This conversation took place in Plaintiff and his spouse's joint residence where they have expectation of privacy

Id. ¶ 40. Plaintiffs do not argue otherwise. *See* Opp. at 10. Accordingly, the Court DISMISSES WITHOUT LEAVE TO AMEND any Wiretap Act claim based on targeted advertising by Plaintiffs Spurr, B.S., Brekhus, and Hernandez.

Defendants next argue that Plaintiffs' Wiretap Act claim must be dismissed because Plaintiffs Galvan, E.G., and Kumandan fail to plead facts showing that the alleged interception was unlawful. Mot. at 11-12; *see* *Noel v. Hall, 568 F.3d 743, 751 (9th Cir. 2009)*; *18 U.S.C. § 2511(1)(c)*, *(d)* (prohibiting the use or disclosure of the **[*961]** contents of any wire communications "obtained through the interception of a wire . . . communication in violation of this subsection"). But, as explained in Section III.A, Plaintiffs Galvan, E.G., and Kumandan successfully alleged that Defendants intercepted a "wire, oral, or electronic communication." *18 U.S.C. § 2511(1)(a)*. And the Court has previously **[**25]** held that Plaintiffs successfully alleged that such interception was intentional. Order on Motion to Dismiss at 9-10.

Defendants' final argument is that there are no allegations that Google disclosed any recordings to any third party. This argument speaks solely to the viability of Plaintiffs' claims under *18 U.S.C. § 2511(c)*. *See* Mot. at 11 ("there are no allegations that Google *disclosed* Plaintiffs' communications to a third party for the purpose of targeting advertisements" (emphasis in original)). Plaintiffs Galvan and E.G. allege that, for the purposes of targeted advertising, Defendants disclosed the contents of E.G.'s conversations to YouTube:

> Several times, topics of Plaintiff Galvan's and Plaintiff E.G.'s private conversations were used to target advertisements to them. In one such instance, Plaintiff E.G. was doing research on Los Angeles gangs and was having a conversation regarding these gangs during her parents' childhood (who both grew up in the inner city). Following this conversation, Plaintiff E.G. received targeted advertising in the form of suggested videos by YouTube, a Google-owned company. The video concerned an individual whose name was specifically mentioned in the conversation. **[**26]** Plaintiffs Galvan and E.G. have recognized that other ads have been targeted to them following their private conversations in their home.

3AC ¶ 33. According to Defendants, these allegations fail as a matter of law because "E.G. does not allege that Google disclosed the conversation to any third party, as YouTube is not a third party, but rather 'a Google-owned company.'" Mot. at 12 (quoting 3AC ¶ 33, citing Bali Decl., Exh. B at 19, 35). In response, Plaintiffs argue that whether YouTube is a third party entity is a factual question that requires interrogation into the nature of the relationship between Defendants and YouTube. While the relationship between a defendant and a third party entity often may require a factual interrogation in some circumstances, there are no allegations in the current pleading to suggest that YouTube is a third party. This is true even when construing Plaintiffs' allegations in a light most favorable to their claims. Indeed, the pleading itself states that YouTube is a Google-owned company. 3AC ¶ 33. Accordingly, the Court DISMISSES WITHOUT LEAVE TO AMEND Galvan and E.G.'s Wiretap Act claim to the extent it is predicated on unlawful disclosure for the purpose **[**27]** of targeted advertising.

Meanwhile, Kumandan alleges that, for the purposes of targeted advertising, Defendants disclosed the contents of his conversation to Instagram:

> On at least one occasion, the subject matter of a conversation between Plaintiff Kumandan and his wife were used to target advertisements to Plaintiff Kumandan. In one such instance, Plaintiff Kumandan was speaking to his wife about BBQ sauces. Plaintiff Kumandan did not search for or otherwise interact with Google regarding the same subject matter. Following this conversation, Plaintiff Kumandan received targeted advertisement where an ad for a BBQ sauce was displayed on Plaintiff Kumandan's Instagram page.

3AC ¶ 40. Defendants take an everything-but-the-kitchen-sink approach to Kumandan's pleading, arguing that there is no allegation that this conversation occurred near Kumandan's GAED, no allegation **[*962]** as to the temporal gap between the conversation recording and the targeted advertising, and no allegation that Google disclosed Kumandan's conversation to Instagram. Mot. at 11.

None of these arguments carry the day. First, the Court has already found that Kumandan properly alleged that the conversation occurred near his **[**28]** Google Pixel. Second, the Court is unaware of any authority suggesting that Kumandan needs to specify the exact time period between his alleged conversation and the targeted Instagram advertisement. Viewing the pleadings in the light most favorable to Plaintiffs, the Court finds it sufficient that Kumandan pled that the targeted advertisement occurred after the identified intercepted conversation. Finally, the Court rejects Defendants' argument that Plaintiffs must allege the specific mechanics behind Google's alleged disclosure to Instagram. *See* Mot. at 11 ("there are no facts at all connecting the advertisement that was displayed on Instagram to Google or the Assistant, and [Plaintiffs'] attempt to draw such a connection is pure speculation"). While Google suggests that Kumandan's pleadings are wholly speculative, the Court finds it eminently plausible that Google disclosed Kumandan's intercepted conversations to Instagram, thus enabling Instagram to provide Kumandan with targeted advertisements.

Finally, Defendants argues that "to the extent Plaintiffs contend that Google *used* Kumandan's and/or E.G.'s conversations to target advertisements, such use is expressly permitted under the **[**29]** Privacy Policy and thus not actionable." Mot. at 12 (emphasis in original). The Privacy Policy, of which the Court has taken judicial notice, contains a section entitled "Information we collect as you use our services." Bali Decl., Exh. B at 29. That section states, "We collect information about your activity in our services, which we us to do things like recommend a YouTube video you might like." *Id.*; *see also id.* at 23 (Google "collect[s] information about your activity in our services, which we use to do things like recommend a YouTube video you might like.").

In the Court's previous order, it found that Google's Privacy Policy was too vague to conclusively establish consent to *disclosure* of the recordings. *See* Order on Motion to Dismiss at 21-22. The Court now finds that Google's Privacy Policy is too vague to conclusively establish consent to *use* of the recordings. The question before the Court is whether the Privacy Policy adequately indicated to users that Defendants would use recordings made absent manual activation or the utterance of a hot word, such that users could fairly be said to have "agreed" to these disclosures. *In re Facebook, Inc., Consumer Privacy User Profile Litig., 402 F. Supp. 3d 767, 789 (N.D. Cal. 2019)*. The Court considers this question "objectively, from **[**30]** the perspective of a reasonable . . . user." *Id.* The Court find that while Google's Privacy Policy does disclose that it will collect and use information for targeted advertising, it does not sufficiently apprise users that it will use recordings made in the absence of manual activation or a hot word utterance. *See* *In re Facebook, Inc., Consumer Privacy User Profile Litigation, 402 F. Supp. 3d at 792* ("Although Facebook points to a section in its Data Use Policy entitled 'Service Providers' which says 'we give your information to the people and companies that help us provide, understand, and improve the services we offer,' that statement does not come close to disclosing the massive information-sharing program with business partners that the plaintiffs allege in the complaint."). As such, it cannot serve as a valid consent.

C. Count 2: Stored Communications Act

Count 2 alleges violations of the *Stored Communications Act ("SCA")*. **[*963]** As the Ninth Circuit has explained, the SCA is modeled off the common law of trespass. *Theofel v. Farey-Jones, 359 F.3d 1066, 1072-73 (9th Cir. 2004)*. ***HN11***[] "Just as trespass protects those who rent space from a commercial storage facility to hold sensitive documents, the Act protects users whose electronic communications are in electronic storage with an ISP or other electronic communications facility." *Id.* (internal **[**31]** quotations and citations omitted). An ECS provider "shall not knowingly divulge to any person or entity the contents of a communication while in electronic storage by that service"; if it does so, it is liable for unlawful disclosure of customer communications under *§ 2702(a)*. *18 U.S.C. § 2702(a)(1)*. Defendants now argue that, as with Plaintiffs' Wiretap Act claims, "there are no factual allegations supporting any contention that Google disclosed information to third parties for the purpose of targeted advertising." Mot. at 12. Accordingly, Defendants request that the Court dismiss Plaintiffs' unlawful disclosure claim under *18 U.S.C. § 2702(a)(1)* based on targeted advertising.

The Court has dismissed Plaintiffs Spurr, B.S., Galvan, E.G., Brekhus, and Hernandez's Wiretap Act claims under *18 U.S.C. § 2511(1)(c)* based on a theory of targeted advertising. *See* Section III.B. Accordingly, the Court DISMISSES WITHOUT LEAVE TO AMEND any SCA claim based on targeting advertising by Plaintiffs Spurr, B.S., Galvan, E.G., Brekhus, and Hernandez.

D. Count 6: Common Law Breach of Contract

Count 6 is a claim for breach of contract based on Defendants' Terms of Service ("TOS") and the Privacy Policy contained therein. 3AC ¶¶ 181-196. ***HN12***[] In order to plead a claim for breach of **[**32]** contract, Plaintiffs must allege: (1) the existence of a contract with Defendants, (2) their performance under that contract, (3) Defendants breached that contract, and (4) they suffered damages. *In re Facebook, Inc. Internet Tracking Litig., 956 F.3d 589, 2020 WL 1807978, at *14* (citing *Oasis West Realty, LLC v. Goldman, 51 Cal. 4th 811, 821, 124 Cal. Rptr. 3d 256, 250 P.3d 1115 (2011)*). Defendants move to dismiss on the grounds that Plaintiffs fail to (1) plead how any website is incorporated into the Terms of Service ("TOS"), (2) identify any conduct by Google that is in breach of any contractual term, or (3) identify any damages suffered by Plaintiffs. *See* Mot. at 13-18.

i. Specific Contractual Provisions: FAQ in the Nest Help Center

In the Court's order considering Defendants' previous motion to dismiss, it found that Plaintiffs adequately identified certain provisions of Google's Privacy Policy. Order on Motion to Dismiss at 33-34. This Court found, however, that certain identified provisions of the Privacy Policy could not form the basis for a breach of contract claim because the operative complaint made no reference to such provisions. *Id.* at 34 ("The Consolidated FAC makes no reference to this provision, which means the Court cannot consider it to be alleged for purposes of the instant motion."). Finally, the Court concluded that Plaintiffs were unable to **[**33]** base their contract claim on provisions from "different websites, including the 'Google Nest Help Center' and the 'Google Safety Center'" because the websites were not binding on the parties. *Id.* at 34-35 ("But this vague statement is hardly sufficient to establish that the particular websites cited by Plaintiffs are part of the TOS or otherwise are binding upon the parties.").

Defendants now argue that the FAQ in the Nest Help Center is not incorporated into Google's Terms of Service, and therefore cannot be the basis for a breach of contract claim. Mot. at 13-14. Plaintiffs **[*964]** respond that "[c]ontrary to Google's argument, the allegations regarding Google's breach are not premised on the FAQs referenced in the [3]AC. Rather, the citation to the FAQs is simply included to aid the interpretation of the potentially ambiguous term 'use audio features' in the context of GAEDs." Opp. at 12. Accordingly, the Court DISMISSES Plaintiffs' breach of contract claim to the extent that it is premised on the FAQ in the Nest Help Center.

ii. Breach

The Court now turns to whether Plaintiffs have alleged that Defendants breached the terms of the Privacy Policy. Plaintiffs allege that they entered into a **[**34]** valid contract with Google, "which Google breached in three separate and distinct ways: (1) by recording Plaintiffs' private conversations when they are not using their Google Assistant Enabled Devices; (2) by disclosing to third parties Plaintiffs' private conversations without their consent; and (3) by changing the way Defendants collected and used information without Plaintiffs' knowledge or consent."

3AC ¶ 236. According to Defendants, Plaintiffs have failed to plausibly plead facts to support their claims. Mot. at 14-16.

Plaintiffs adequately allege the first two identified theories of breach, but miss the mark on the third. Plaintiffs' first theory—that Google breached the Privacy Policy by recording Plaintiffs' private conversations when they are not using their GAEDs—is predicated on the following Privacy Policy provision:

> **Your activity**
> We collect information about your activity in our services, which we use to do things like recommend a YouTube video you might like. The activity information we collect may include:
> ...
> • Voice and audio information when you use audio features.

Bali Decl., Exh. B at 21; TAC ¶ 242. Defendants claim that Plaintiffs have failed to allege a breach of **[**35]** this provision because it "does not say that Google will collect audio information only when the user utters a hotword or manually activates the device. . . . audio features are being used when the Assistant is activated; there is nothing in this provision limiting the meaning of 'use' to only *intentional* uses.'" Mot. at 14-15 (emphasis added). In other words, Defendants ask the Court to find as a matter of law that this provision is broad enough to permit Google to record conversations even where a hotword on manual activation does not occur.

The Court declines to do so. At the motion to dismiss stage, the Court must draw all reasonable inferences in favor of Plaintiffs. *See* *Retail Prop. Trust v. United Bhd. of Carpenters & Joiners of Am., 768 F.3d 938, 945 (9th Cir. 2014)*. Under this standard, the Court cannot conclude that the Privacy Policy provision's reference to the "*use* [of GAED] audio features" applies to scenarios in which the Plaintiffs do not affirmatively use GAED audio features, but the GAED nonetheless records audio. TAC ¶ 242 (emphasis added); *see also* Transcript ("Tr.") at 7:3-10 ("[THE COURT:] In my view the Plaintiffs have [it] right that audio features are used when the consumer chooses to use them, not when the device mistakenly or otherwise picks up unintended **[**36]** conversations. And so I think it is at least a reasonable inference that the phrase 'when audio features are used' really is limited to when there is a decision to manually engage or to state a hotword."). And while Defendants stress that "the Nest FAQ make clear that Google Home records conversations when a hotword is 'detected' not when it is spoken," Mot. at 15, they simultaneously argue that the Nest FAQ is not incorporated into the Privacy Policy and is **[*965]** thus not a proper basis of Plaintiffs' breach of contract claim, Mot. at 13-14.

Plaintiffs' second theory—that Google breached the Privacy Policy by disclosing to third parties Plaintiffs' private conversations without their consent—is predicated on the following Privacy Policy provision:

> **When Google shares your information**
> We do not share personal information with companies, organizations, or individuals outside of Google except in the following cases:
>
> **With your consent**
>
> We'll share personal information outside of Google when we have your consent. For example, if you use Google Home to make a reservation through a booking service, we'll get your permission before sharing your name or phone number with the restaurant. We'll ask for your **[**37]** explicit consent to share any sensitive personal information.
>
> **With domain administrators**
> . . .
>
> **For external processing**
> We provide personal information to our affiliates and other trusted businesses or person to process it for us, based on our instructions and in compliance with our Privacy Policy and any other appropriate confidentiality and security measures.

> **For legal reasons**
>
> . . .

Bali Decl., Exh. B at 29; TAC ¶¶ 245, 251. Defendants contend that they have not breached this provision solely because "this Court already found that the Privacy Policy permits disclosure 'for external processing' without consent." Mot. at 16 (citing Order on Motion to Dismiss at 35). But the Court's determination was driven by its finding that the operative complaint did "not adequately plead that Plaintiffs' 'personal information' has been shared. The vague and conclusory allegation that Plaintiffs 'private conversations' were recorded and disclosed does not suffice." Order on Motion to Dismiss at 35. As the Court explained at length above, this deficiency has now been rectified. And the parties do not dispute that Plaintiffs have not consented to the disclosure of their personal information. Mot. at 16; Opp. **[**38]** at 15. This theory of breach may thus proceed.

Plaintiffs' third theory—that Google breached the Privacy Policy by changing the way Defendants collected and used information without Plaintiffs' knowledge or consent—is predicated on the following Privacy Policy provision:

> The information Google collects, and how that information is used, depends on how you use our services and how you manage your privacy controls.

Bali Decl., Exh. B at 29; TAC ¶¶ 252. According to Plaintiffs Brekhus and Hernandez, Defendants breached this provision because

> [Google] changed the method that [it] collected information and changed the way the information was used without regard to how Plaintiffs and the Purchaser Subclass used the services or managed their privacy controls, without notice to or consent by Plaintiffs. As alleged herein, Google changed the method of collecting information from being based on actions by the user, such as manual activation or using "hot words," to being based on sounds not made by the user necessarily, but by other items in the home such as smoke alarms, glass breaking, or other noises.

TAC ¶¶ 253. But nothing in the identified contract provision suggests that Google is contractually **[**39]** prohibited from making changes to how it collects or uses consumer information. Tr. at 7:14-16 ("[THE COURT:] I haven't actually seen anything in the pleading that would tell me that Google promised not to do that."), 38:22-25 ("[THE COURT:] You have pointed to **[*966]** nothing in the documents -- in the contracts that tells me that Google promised to never update and -- or to say: We promise we will never do a software update you don't like."), 40:12-13 ("[THE COURT:] You are basically suing on a bug that was unintentional, claiming it to be a breach of contract."). And Plaintiffs do not point this Court to a *single* instance where another court has allowed a similar theory of breach to proceed. *See* Opp. at 16-17. Accordingly, the Court DISMISSES the third theory of Plaintiffs' contract claim WITHOUT LEAVE TO AMEND.

iii. Damages

Plaintiffs proffer three damages theories: (1) benefit of the bargain, (2) "harm to [Plaintiffs'] "privacy interests," and (3) "disgorgement of profits made by Google as a result of its breach of contract." 3AC ¶¶ 254-256; *see* Opp. at 17-18. Defendants believe all of these theories to be flawed. *See* Mot. at 17-18.

The first theory is benefit of the bargain damages: "the **[**40]** services Plaintiffs . . . received in exchange for the purchase price of Google Assistant Enabled Devices were worth less than the services they paid for because Plaintiffs' information was recorded without their consent and divulged to third parties." 3AC ¶ 254. ***HN13***[] Also known as expectation damages, a benefit of the bargain measure of damages is intended "to give the injured party the benefit of his bargain and insofar as possible to place him in the same position he would have been in had the promisor performed the contract." *Coughlin v. Blair, 41 Cal. 2d 587, 262 P.2d 305, 314 (Cal. 1953)*; *see also Twin City Fire Ins. Co. v. Philadelphia Life Ins. Co., 795 F.2d 1417, 1425 (9th Cir. 1986)*.

Courts have approved damages based on benefit of the bargain in several technology cases involving privacy. For instance, in *In re Yahoo! Inc. Customer Data Sec. Breach Litig.*, Plaintiff Mortensen alleged that he paid "$19.95 each year since December 2007 for Yahoo's premium email service" but did not acquire the full value of Yahoo's service because it was not secure. *313 F. Supp. 3d 1113, 1130 (N.D. Cal. 2018)*. There, Plaintiff Mortensen plausibly lost the benefit of the bargain in that he received a less valuable email service than the one he paid for. *See id.* Similarly, in *In re Anthem, Inc. Data Breach Litig.*, plaintiffs paid premiums to defendants for health insurance plans. *No. 15-MD-02617-LHK, 2016 U.S. Dist. LEXIS 70594, 2016 WL 3029783, at *7-*8 (N.D. Cal. May 27, 2016)*. When the **[**41]** defendants experienced various breaches of its database containing individuals' health record information, the plaintiffs alleged, *inter alia*, that the defendants had breached their privacy policies. *2016 U.S. Dist. LEXIS 70594, [WL] at *9*. The Court allowed the plaintiff to pursue a theory of benefit of the bargain losses on the theory that some portion of their premiums went toward paying for robust security measures, which they allegedly did not receive. *2016 U.S. Dist. LEXIS 70594, [WL] at *13*.

The Court previously found that Plaintiffs failed to allege that they have paid anything to Defendants for the GAEDs:

> Not only does the Consolidated FAC say nothing about any fee or premium paid, it appears that the Google Assistant is available free of charge for use on Google Assistant Enabled Devices. *See* Consol. FAC ¶ 21. As a result, it cannot be said that Plaintiffs received less than what they paid for—they appeared to have paid nothing. *See* *In re LinkedIn User Privacy Litig., 932 F. Supp. 2d 1089, 1093 (N.D. Cal. 2013)* (rejecting plaintiffs' benefit of the bargain theory because "the FAC fails to allege that Plaintiffs actually provided consideration for the security services which they claim were not provided"). The Court **[*967]** therefore does not believe that benefit of the bargain is a viable damages theory.

Order on Motion to Dismiss at 37. **[**42]**

Defendants argue that Plaintiffs B.S., Galvan, E.G., and Brekhus "fail to allege that they paid Google anything for the Assistant, much less any privacy protective features." Mot. at 17. And the allegations in the 3AC of Plaintiffs Kumandan, Spurr, and Hernandez, Defendants contend, do not rectify the problem the Court previously identified because while they "allege that they 'purchased Google Manufactured Devices,'" they "fail to allege that they paid a premium for a certain level of privacy protection they did not receive." Mot. at 17 (quoting 3AC ¶ 238).

The Court easily concludes that Plaintiffs Kumandan, Spurr, and Hernandez have adequately pled expectation damages. The 3AC explicitly alleges that "Plaintiffs Kumandan, Spurr, Hernandez and Google Manufactured Device Subclass Members would not have purchased, or would not have paid as high a price, for the Google Assistant Enabled Devices if they had known that Google would breach the TOS and Privacy Policy by recording and revealing Plaintiffs private conversations." 3AC ¶ 254.

The same cannot be said for the remaining Plaintiffs. There is no allegation even supporting an inference that B.S. even owned a GAED. *See* 3AC ¶ 20 ("Plaintiff **[**43]** Spurr owned at least three Google Home devices during the Class Period."). And Brekhus explicitly alleges that he obtained his GAED for free via a promotion with third-party company Spotify. 3AC ¶ 46. That Brekhus "*would not have paid for Spotify* or ordered the Google Home device . . . had he known that any of Google's representations were false," has no bearing on the benefit of Brekhus' bargain *with Defendants*. 3AC ¶ 55 (emphasis added). Finally, while Plaintiffs Galvan and E.G. allege that they owned a Samsung smart phone and a Galaxy Tab during the Class Period, 3AC ¶ 29, the Court cannot infer from this information that they purchased the devices from Google (as opposed to some other entity). Accordingly, the Court GRANTS Defendants' motion on this ground as to Galvan, E.G., B.S. and Brekhus and DENIES Defendants' motion on this ground as to Kumandan, Spurr, and Hernandez.

Plaintiffs' second theory of damages—harm to their privacy interests—is adequately pled. ***HN14***[] Generally, a plaintiff may seek damages for "the detriment caused by the breach." *Stephens v. City of Vista, 994 F.2d 650, 657 (9th Cir. 1993)* (citing *Cal. Civ. Code § 3300*). In this case, the detriment Plaintiffs say they suffered was an invasion of their privacy. Plaintiffs are entitled to seek compensatory **[**44]** damages or perhaps nominal damages for such harm. *See* *In re Facebook, Inc., Consumer Privacy User Profile Litig., 402 F. Supp. 3d at 802*; *Cal. Civ. Code § 3360*. As discussed a length above, Plaintiffs have amended their complaint to sufficiently allege an invasion of their privacy, and the 3AC plausibly alleges that Plaintiffs' own private conversations were intercepted. Accordingly, the Court DENIES Defendants' motion on this ground.

Plaintiffs' third theory of damages is that Plaintiffs are entitled to "disgorgement of the profits Google has obtained as a result of the improved functionality of Google Assistant resulting from its sharing of private conversations in breach of its contract with Plaintiff[s] and Class Members." 3AC ¶ 256. ***HN15***[] The Ninth Circuit has said that "under California law, a defendant's unjust enrichment can satisfy the 'damages' element of a breach of contract claim, such that disgorgement is a proper remedy." *Foster Poultry Farms, Inc. v. SunTrust Bank, 377 Fed. App'x 665, 669 (9th Cir. 2010)* (citing *Ajaxo Inc. v.* ***[*968]*** *E*Trade Group, Inc., 135 Cal. App 4th 21, 56-57, 37 Cal. Rptr. 3d 221 (2005)*). The Ninth Circuit has further held that "California law recognizes a right to disgorgement of profits resulting from unjust enrichment, even where an individual has not suffered a corresponding loss." *In re Facebook, Inc. Internet Tracking Litig., 956 F.3d 589, 2020 WL 1807978, at *5-*6*.

To plead a theory of disgorgement, Plaintiffs must show "that they retain a stake in the profits garnered." *956 F.3d 589, Id. at *6*. The Court previously concluded that

> **[**45]** Plaintiffs attempt to plead that they are entitled to the "substantial profits" that Defendants' have earned using their "personal information" because Defendants' use was unauthorized. Consol. FAC ¶¶ 199-200. But Plaintiffs have not adequately alleged that their unspecified "personal information" has financial value or that Defendants have profited from the information. Although courts have found that individuals' browsing history may plausibly carry financial value, *In re Facebook, Inc. Internet Tracking Litig., 956 F.3d 589, 2020 WL 1807978, at *6*., Plaintiffs have not pleaded any description of the "personal information" that Defendants' allegedly used. Without such facts, Plaintiffs' assertion that Defendants garnered "substantial profits" from the information is purely conclusory. *See, e.g., Varga v. Wells Fargo Bank, N.A., 796 Fed. App'x 430, 431 (9th Cir. 2020)* ("Varga's conclusory assertion that she was 'deprived of the contractual and consumer protections and benefits' of the notice provision is insufficient to plausibly allege" damages.). The Court finds that Plaintiffs have plausibly demonstrated that any profits were unjustly earned by virtue of Defendants' use being allegedly unauthorized. *In re Facebook, Inc. Internet Tracking Litig., 956 F.3d 589, 2020 WL 1807978, at *6*.

Order on Motion to Dismiss at 38.

To rectify these defects, the 3AC alleges that "[t]he unlawfully-obtained private conversations have financial value, in that they enabled Google to improve the functionality of the Google Assistant and to better target advertisements to Google users, thereby increasing Google's revenue." 3AC ¶ 256. While Defendants argue that this allegation is pure speculation, Mot. at 18, Plaintiffs have offered at least one example of the financial value of their intercepted personal information. Plaintiff Kumandan pled that he had a conversation inside his home with his wife about BBQ sauce, and that, later, he received a targeted Instagram advertisement for BBQ sauce. 3AC ¶ 40. Plaintiff **[**46]** also allege that "[i]mproving the functionality of Google Assistant is necessary to allow Google to continue to compete with the increasingly crowded virtual assistant market and to buttress the price of the Google Manufactured Devices."). *Id.* ¶ 10. Drawing all inferences in favor of Plaintiffs, the Court finds it plausible that Google was able to monetize Plaintiffs' unauthorized recordings via targeted advertising and by improving the Google Assistant functionality. The Court DENIES Defendants' motion on this ground.

E. Counts 8 and 9 and *Fed. R. Civ. P. 9(b)*

In Count 8, Plaintiffs Brekhus and Hernandez allege that Defendants have violated the CLRA by making "improper representations" about Google Home devices and by advertising Google Home devices "with intent not to sell them as advertised." 3AC ¶¶ 263-270. In Count 9, Plaintiffs Brekhus and Hernandez allege that Defendants have engaged in common law fraud, deceit, and/or misrepresentation **[*969]** by "fraudulently and deceptively inform[ing] Plaintiffs that the Google Home Product had adequate security measures in place and that Defendants would not misuse their personal information." 3AC ¶¶ 271-278. Defendants move to dismiss both claims, arguing that neither **[**47]** claim meets the requisite *Fed. R. Civ. P. 9(b)* standard. Mot. at 18-20, 22-23.

HN16[] Fraud allegations must be pled "with particularity." *Fed. R. Civ. P. 9(b)*. To satisfy *Rule 9(b)*, "a pleading must identify the who, what, when, where, and how of the misconduct charged, as well as what is false or misleading about the purportedly fraudulent statement, and why it is false." *Cafasso, U.S. ex rel. v. Gen. Dynamics*

C4 Sys., Inc., 637 F.3d 1047, 1055 (9th Cir. 2011) (internal marks omitted). Rule 9(b)'s heightened pleading standard extends to Plaintiffs' CLRA claim as it sounds in fraud. Kearns v. Ford Motor Co., 567 F.3d 1120, 1125 (9th Cir. 2009). Plaintiffs do not dispute that the fraud and CLRA claims fall under this standard. *See* Opp. at 21-25. They do dispute whether their pleadings meet this standard. *Id.*

The Court finds the pleadings as to these claims exceedingly thin. Indeed, the Court struggled to identify a specific, cogent theory of fraudulent conduct alleged in the 3AC pursuant to which Brekhus and Hernandez intend to sue. *See* Tr. at 43:19-44:18 (clarifying theory of fraud). The allegation in the 3AC that Defendants promised "adequate security measures" is vague to the point of meaninglessness. 3AC ¶ 272 ("Defendants have fraudulently and deceptively informed Plaintiffs that the Google Home Product had adequate security measures in place and that Defendants would not misuse their personal **[**48]** information."). It is Plaintiffs' responsibility to detail what these security measures would be, and how Google failed to provide them. *See* Cafasso, 637 F.3d at 1055.

In the opposition brief and at the motion hearing, Plaintiffs clarified that their theory of fraud is predicated on Google's ability to *expand* the circumstances upon which the GAEDs would initiate recordings. Opp. at 22 ("the claims are that Google promised that the Google Home devices would active in only three limited circumstances, when in fact, Google retained the ability to unilaterally add additional circumstances, and it did so in the form of 'alarm events.'"); *see also* Tr. at 43:19-44:12 ("THE COURT: So you are saying that Google had a present intention to change the terms that it didn't disclose? That's what you are saying? [PLAINTIFFS]: Yes, Your Honor . . . We allege that at the time they made those representations, they knew that they could and would change the circumstances under which . . . the devices could record and transmit."). To this end, the pleading includes allegations that GAEDs belonging to third parties began recording audio after the detection of smoke alarms or breaking glass. 3AC ¶¶ 108-109. In response, Google explained **[**49]** that these recordings were accidental and were triggered by a software update that was consequently rolled back. *Id.* ¶ 110.

Acknowledging that this theory is less amorphous than Plaintiffs' "adequate security measures" theory, the Court nonetheless finds that it still falls far short of Rule 9's requirements. First, the Court is unable to find where this *unified theory* of fraud is alleged in the complaint. Instead, Plaintiffs have peppered relevant allegations throughout without providing the Court any guiding common thread. *Cf.* Tinian Women Ass'n v. United States Dep't of the Navy, 976 F.3d 832, 841 (9th Cir. 2020) ("Potentially relevant facts and regulations are scattered in different parts of the complaint, and a district court's job is not to piece together a jigsaw puzzle of claims."). And, even ignoring this flaw, the **[*970]** 3AC is void of facts that so much as suggest that (1) Brekhus and Hernandez justifiably and detrimentally relied on Defendants' alleged misrepresentations or (2) Google, *at the time of the alleged misrepresentations*, had the intent to mislead or omit material information about the future circumstances under which the GAEDs would record audio. ***HN17***[] Plaintiffs must plead additional facts that establish these "indispensable elements of fraud." Vess v. Ciba-Geigy Corp. USA, 317 F.3d 1097, 1105 (9th Cir. 2003) ("indispensable elements **[**50]** of a fraud claim include a false representation, knowledge of its falsity, intent to defraud, justifiable reliance, and damages" (internal marks and citation omitted).

The Court GRANTS Defendants' motion to dismiss Counts 8 and 9. While the Court remains skeptical that Plaintiffs can fix the identified defects, because this is the first instance the Court has had to consider these claims, Plaintiffs are allowed LEAVE TO AMEND. *See* Eminence Capital, LLC v. Aspeon, Inc., 316 F.3d 1048, 1052 (9th Cir. 2003) (citing Foman v. Davis, 371 U.S. 178, 182, 83 S. Ct. 227, 9 L. Ed. 2d 222 (1962).

F. Count 7: California UCL

HN18[] Count 7 is brought under California's Unfair Competition Law ("UCL"), which prohibits any "unlawful, unfair or fraudulent business practice and unfair, deceptive, untrue or misleading advertising." Cal. Bus. & Prof. Code § 17200. The California Supreme Court has clarified that the UCL, because it is "written in the disjunctive," prohibits three separate types of unfair competition: (1) unlawful acts or practices, (2) unfair acts of practices, and (3) fraudulent acts or practices. Cel-Tech Commc'ns, Inc. v. Los Angeles Cellular Tel. Co., 20 Cal. 4th 163, 180, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999); *accord* Davis v. HSBC Bank Nevada, N.A., 691 F.3d 1152, 1168 (9th Cir.

2012). To plead a UCL claim, a plaintiff's allegations must show that a defendant's conduct violates one of these three "prongs." *Id.* In addition, because a UCL claim may only be brought by "a person who has suffered injury in fact and has lost money or property as a result **[**51]** of the unfair competition," *Cal. Bus. & Prof. Code § 17204*, a plaintiff must "demonstrate some form of economic injury." *Kwikset Corp. v. Superior Court, 51 Cal. 4th 310, 323, 120 Cal. Rptr. 3d 741, 246 P.3d 877 (2011)*. This requirement is sometimes referred to as "UCL standing." *Id. at 320-21*.

In their motion to dismiss, Defendants contend that Plaintiffs have failed to allege economic injury, which would preclude any UCL claim. Mot. at 20-21. Defendants also challenge the sufficiency of Plaintiffs' allegations as to both of the UCL prongs alleged ("unlawful" and "unfair"). Mot. at 23-24.

i. Economic injury

The Court begins by addressing Defendants' contention that Plaintiffs have not alleged economic injury, as necessary to bring a UCL claim. Mot. at 20. ***HN19***[] Under California law, a UCL plaintiff must "(1) establish a loss or deprivation of money or property sufficient to qualify as injury in fact, i.e., economic injury, and (2) show that that economic injury was the result of, i.e., caused by, the unfair business practice or false advertising that is the gravamen of the claim." *Kwikset Corp. v. Superior Court, 51 Cal. 4th 310, 322, 120 Cal. Rptr. 3d 741, 246 P.3d 877 (2011)*. "There are innumerable ways in which economic injury" may be shown; for instance:

> A plaintiff may (1) surrender in a transaction more, or acquire in a transaction less, than he or she otherwise would have; (2) have a present or future property interest **[**52]** diminished; (3) be deprived of money or property to which he or she has a cognizable claim; or (4) be required **[*971]** to enter into a transaction, costing money or property, that would otherwise have been unnecessary.

Id. at 323.

In the instant case, Plaintiffs advance two theories of economic injury. First, Plaintiffs allege overpayment for their Google Assistant Enabled Devices, i.e. "that had they known their private communications would be intercepted, recorded, disclosed, and misused, they would not have made their purchase, or would have paid less for them. Opp. at 18 (citing 3AC ¶¶ 11, 126, 254, 261). Certainly, overpayment is an economic injury under the UCL. *See, e.g., Davidson v. Kimberly-Clark Corp., 889 F.3d 956, 966 (9th Cir. 2018)*, *cert. denied*, *139 S. Ct. 640, 202 L. Ed. 2d 492 (2018)*. The question becomes whether Plaintiffs have pleaded sufficient facts to establish overpayment here.

This Court previously held that the complaint sufficiently alleged that "Plaintiffs Kumandan and Spurr 'purchased their Google Manufactured Device either directly from Google or from actual or apparent agents of Google.'" Order on Motion to Dismiss at 45 (quoting Consol. FAC ¶ 215). Neither the 3AC, nor Defendants' motion, changes that conclusion. *See* *U.S. v. Alexander, 106 F.3d 874, 876 (9th Cir. 1997)*; *see also* Reply at 14 ("Plaintiffs B.S., Galvan, E.G., Brekhus, **[**53]** and Hernandez have not alleged economic loss"). The Court thus turns to consider the allegations of Galvan, E.G., B.S., Brekhus, and Hernandez.

Defendants maintain that the 3AC contains insufficient details regarding Plaintiffs' purchase of their GAEDs. Mot. at 20. According to Defendants, the 3AC does not allege that Plaintiffs purchased and overpaid for their devices. *Id.* They continue: "Plaintiffs contend generally that they 'would not have purchased a [GAED], or would have paid less' had they known about Google's alleged conduct ([3]AC ¶ 261), but absent any further detail explaining how Plaintiffs suffered an economic loss from a service they paid nothing for, this is nothing more than a legal conclusion." *Id.*

That is true of Named Plaintiff B.S., who allegedly interacted with a GAED that she did not own. 3AC ¶ 20 ("Plaintiff Spurr owned at least three Google Home devices"). It is also true of Named Plaintiffs Galvan and E.G., who allegedly interacted with devices not manufactured by Defendants, a Samsung smartphone and the Samsung Galaxy Tab, *id.* ¶ 29, and Named Plainitff Brekhus, who interacted from a device he received for free pursuant to his paid Spotify subscription, *id.* ¶ **[**54]** 46. Because these Named Plaintiffs have failed to allege that they paid any money for a Google Assistant Enabled Device, they cannot have been injured by overpayment. *See* Order on Motion to Dismiss at 45. Named Plaintiff Hernandez, however, alleges that he purchased a Google Home Mini device from Best Buy in December 2018. 3AC ¶ 62. He also alleges that he "would not have purchased the Google Home device, nor would he have set it up or used it, had he known that any of Google's representations [about activation phrases and manual activation] were false." *Id.* ¶ 66. The Court therefore finds that Plaintiff Hernandez has plausibly alleged that he would not have purchased his GAED, or would have paid less for it, if he had been aware of Defendants' practices with regard to false accepts.

Plaintiffs' second theory of economic injury is that they have a "property interest" in the recordings that were unlawfully obtained by Google and that they are therefore entitled to restitution. 3AC ¶¶ 261-62; *see* Opp. at 19 (citing *Korea Supply Co. v. Lockheed Martin Corp., 29 Cal. 4th 1134, 1144, 131 Cal. Rptr. 2d 29,* ***[*972]*** *63 P.3d 937 (2003)*). According to Plaintiffs, "Google profited from the use of Plaintiffs' unauthorized recordings by using them to improve the functionality of Google Assistant and for targeted **[**55]** advertising." Opp. at 23. ***HN20***[] The California Supreme Court has "defined an order for 'restitution' as one 'compelling a UCL defendant to return money obtained through an unfair business practice to those persons in interest from whom the property was taken.'" *Korea Supply Co., 29 Cal. 4th at 1144*. In other words, restitution under the UCL must "restore the status quo" by "returning to the plaintiff" funds taken from him or "benefits in which the plaintiff has an ownership interest." *Id. at 1148-49*; *see also* *Hadley v. Kellogg Sales Co., 324 F. Supp. 3d 1084, 1113 (N.D. Cal. 2018)* ("[I]t is well-established that nonrestitutionary disgorgement, which focuses on the defendant's unjust enrichment, is unavailable in a ... class action under the FAL, CLRA, and UCL." (internal quotation marks omitted)). Defendants object, and contend that Plaintiffs fail to allege that their voice recordings have any value or, in the alternative, that Plaintiffs fail to connect such value to "'a realistic economic harm or loss that is attributable to [Google's] alleged conduct.'" Mot. at 20-21 (quoting *In re Facebook Internet Tracking Litig., 140 F.Supp.3d 922, 931 (N.D. Cal. 2015)*.

The Court finds that Plaintiffs' theory of economic loss here is "purely hypothetical." *In re Facebook, Inc., Consumer Priv. User Profile Litig., 402 F. Supp. 3d 767, 804 (N.D. Cal. 2019)*; *see also* *id. at 784* ("The plaintiffs do not plausibly allege that they intended to sell their non-disclosed personal information to someone else."). While **[**56]** Plaintiffs contend that the value of their "voice recordings can be inferred by the fact that Google uses them to improve the functionality of Google Assistant and to target advertising," Opp. at 19, there are no facts to suggest that Plaintiffs intended to monetize their individual voice recordings, nor is there any facts that suggest there is a market in which Plaintiffs could sell such recordings. That Defendants were able to monetize and profit from the unauthorized recordings does not give rise to an inference that Plaintiffs "lost money or property," *Cal. Bus. & Prof. Code § 17204*. As another court in this district has explained, claiming that a defendant "may have gained money through its sharing or use of the plaintiffs' information" is "different from saying the plaintiffs lost money." *In re Facebook, Inc., Consumer Privacy User Profile Litig., 402 F. Supp. 3d at 804*. And while Plaintiffs cite to *In re Facebook, Inc. Internet Tracking Litigation* in a Hail Mary attempt to save this theory, there, the Ninth Circuit discussed the value of Facebook user's browsing histories in the context of the *Computer Data and Access Fraud Act ("CDAFA")*, disgorgement, and Article III standing. *956 F.3d 589, 600-601 (9th Cir. 2020)*, *cert. denied sub nom. Facebook, Inc. v. Davis, 141 S. Ct. 1684, 209 L. Ed. 2d 464 (2021)* ("California law requires disgorgement of unjustly earned profits[1] regardless of whether a **[*973]** defendant's actions caused **[**57]** a plaintiff to directly

---

[1] This Court has already stressed the difference between disgorgement—which the Ninth Circuit considered in *In re Facebook, Inc. Internet Tracking Litigation*—and restitution—which Plaintiffs seek here:

> "'Disgorgement' is a broader remedy than restitution" in that disgorgement "has been used to refer to surrender of all profits earned as a result of an unfair business practice regardless of whether those profits represent money taken directly from persons who were victims of the unfair practice." *[Korea Supply Co., 29 Cal. 4th] at 1145* (emphasis in original). By contrast, restitution under the UCL must "restore the status quo" by "returning to the plaintiff" funds taken from him or "benefits in which the plaintiff has an ownership interest." *Id. at 1148-49*. Put another way, restitutionary **[**58]** disgorgement "focuses on the plaintiff's loss, and nonrestitutionary disgorgement "focuses on the defendant's unjust enrichment." *Meister v. Mensinger, 230 Cal. App. 4th 381, 398, 178 Cal. Rptr. 3d 604 (2014)*. Although the defendant's benefit and the plaintiff's loss are often the same, nonrestitutionary disgorgement may also be had "where a benefit has

expend his or her own financial resources . . . This unauthorized use of their information for profit would entitle Plaintiffs to profits unjustly earned. Thus, Plaintiffs sufficiently alleged a state law interest whose violation constitutes an injury sufficient to establish standing to bring their claims for CDAFA violations and California common law trespass to chattels, fraud, and statutory larceny."). ***HN21***[] Indeed, the "requirement that injury be economic renders standing under *section 17204* substantially narrower than federal standing under [*Article III*], which may be predicated on a broader range of injuries. *Kwikset Corp., 51 Cal. 4th at 324*.

In sum, the Court GRANTS Defendants' motion to dismiss Galvan, E.G., B.S., and Brekhus's UCL claims for failure to adequately plead economic injury. Plaintiffs Kumandan, Spurr, and Hernandez have adequately pled economic injury. Because their UCL claims shall go forward, the Court proceeds to consider of the adequacy of Plaintiffs Kumandan, Spurr, and Hernandez's pleadings under the unlawful and unfair prongs of the UCL.

i. Unlawful Prong

HN22[] The "unlawful" prong of the UCL "borrows violations of other laws and treats them as unlawful practices that the unfair competition law makes independently actionable." *Cel-Tech, 20 Cal. 4th at 180*. In other words, to be "unlawful" under the UCL, Defendants' conduct must violate another "borrowed" law. *HSBC Bank Nevada, 691 F.3d at 1168*. "Virtually any state, federal or local law can serve as the predicate **[**59]** for an action under *section 17200*." *Id.* (quoting *People ex rel. Bill Lockyer v. Fremont Life Ins. Co., 104 Cal. App. 4th 508, 515, 128 Cal. Rptr. 2d 463 (2002)*) (alterations omitted). Here, Plaintiffs predicate their "unlawful" claim on Defendants' alleged violations of (1) the Wiretap Act, (2) the SCA, (3), *CIPA §632*, (4) the common law prohibition of intrusion upon seclusion, (5) the California Constitution's right of privacy, (6) the CLRA, and (7) *Cal. Bus. & Prof. Code § 22576*,[2] for having breached the Privacy Policy. Opp. at 20; 3AC ¶ 258.

Because Plaintiffs assert each of these alleged violations as independent counts, the Court has already considered the adequacy of Plaintiffs' allegations as to those counts. The Court's findings in that regard are equally determinative of the validity of Plaintiffs' UCL claim. See Mot. at 24 ("To the extent this **[**60]** claim is premised on other claims that are subject to dismissal, Plaintiffs' 'unlawful' UCL claim fails as well."). **[*974]** The Court has not dismissed any of these claims in full but has narrowed them where appropriate; accordingly, the Court DISMISSES WITHOUT LEAVE TO AMEND Plaintiffs' UCL unlawful claim to the extent it is predicated on aspects of predicate claims the Court has dismissed.

ii. Unfair Prong

> been received by the defendant but the plaintiff has not suffered a corresponding loss." *Id.* (internal quotations and alterations omitted).

Order on Motion to Dismiss at 46.

[2] This provision states:

> An operator of a commercial Web site or online service that collects personally identifiable information through the Web site or online service from individual consumers who use or visit the commercial Web site or online service and who reside in California shall be in violation of this section if the operator fails to comply with the provisions of *Section 22575* or with the provisions of its posted privacy policy in either of the following ways:
>
> (a) Knowingly and willfully.
>
> (b) Negligently and materially.

Cal. Bus. & Prof. Code § 22576. Plaintiffs allege that Defendants violate this provision by virtue of its breach of contract, as alleged in Count 6. *See* 3AC ¶¶ 241, 258.

Plaintiffs allege that Defendants have "engaged in business acts or practices deemed 'unfair' under the UCL." 3AC ¶ 259. ***HN23***[] "The UCL does not define the term 'unfair.' In fact, the proper definition of 'unfair' conduct against consumers is currently in flux among California courts." *Hodsdon v. Mars, Inc., 891 F.3d 857, 866 (9th Cir. 2018)* (internal quotations omitted). For some years, the California Courts of Appeal formulated different tests, such as whether the practice "offends an established public policy or when the practice is immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers," *Cel-Tech, 20 Cal. 4th at 184* (quoting *S. Bay Chevrolet v. Gen. Motors Acceptance Corp., 72 Cal. App. 4th 861, 887, 85 Cal. Rptr. 2d 301 (1999)*) ("*South Bay* test"), or whether "the gravity of the harm to the alleged victim" outweighs "the utility of the defendant's conduct," *id.* (quoting *State Farm Fire & Casualty Co. v. Superior Court, 45 Cal. App. 4th 1093, 1104, 53 Cal. Rptr. 2d 229 (1996)*) ("*State Farm Fire* test"). Then, in *Cel-Tech*, the California Supreme Court **[**61]** appeared to confine "unfair" to "conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition." *20 Cal. 4th at 187*. "It further required that 'any finding of unfairness to competitors under *section 17200* be tethered to some legislatively declared policy or proof of some actual or threatened impact on competition.'" *HSBC Bank Nevada, 691 F.3d at 1170* (quoting *Cel—Tech, 20 Cal. 4th at 185*). The *Cel-Tech* Court explained that the prior definitions were "too amorphous" and "provide[d] too little guidance to courts and businesses." *HSBC Bank Nevada, 691 F.3d at 1169* (quoting *Cel—Tech, 20 Cal. 4th at 185*).

However, the *Cel-Tech* court expressly limited its decision, stating, "Nothing we say relates to actions by consumers or by competitors alleging other kinds of violations of the unfair competition law such as 'fraudulent' or 'unlawful' business practices or 'unfair, deceptive, untrue or misleading advertising.'" *Cel—Tech, 20 Cal. 4th at 187 n.12*. Consequently, California courts remain divided on whether the *Cel-Tech* definition applies to "consumer actions" or whether the *State Farm Fire* and *South Bay* tests remain valid. *See* *HSBC Bank Nevada, 691 F.3d at 1170*. The Ninth Circuit has noted this continued controversy but **[**62]** awaits the California Supreme Court's resolution of it. *See id.*; *Hodsdon, 891 F.3d at 866*. In this case, the parties follow the Ninth Circuit's lead and argue under *Cel-Tech* and the prior balancing tests from *State Farm Fire* and *South Bay*. *See* 3AC ¶ 259; Mot. at 23-24; Opp. at 20-21.

First, as to Plaintiffs' claim that Defendants' conduct is unfair under the *Cel-Tech* test, the Court finds that Plaintiffs have alleged harm to competition or violation of the "letter, policy, or spirit of the antitrust laws." *HSBC Bank Nevada, 691 F.3d at 1170*. *See* Mot. at 24. In particular, Plaintiffs argue that "Google's actions . . . have violated California's strong public policy of protecting privacy. Google's conduct of intercepting, recording, disclosing, and otherwise misusing Plaintiffs' and Class members' private conversations violated the Wiretap Act, SCA, *CIPA §632*, **[*975]** California common law, the California constitution, and breached its contract with Plaintiffs." Opp. at 21 (citing 3AC ¶ 260). Plaintiffs also cite to the United States House of Representatives Subcommittee on Antitrust, Commercial and Administrative Law report entitled "Investigation of Competition in Digital Markets." 3AC ¶ 123. According to Plaintiffs, this report finds that "as competition **[**63]** has been reduced online, consumers have been subject to privacy abuses by Google, including through the use of the voice assistant, Google Assistant" and that "there is a significant potential for misuse of data collected by voice assistants to harm competition or consumers." *Id.* At this current juncture, the Court finds these allegations sufficient under *Cel-Tech*.

Second, as to the pre-*Cel-Tech* definitions of "unfair," some courts have treated the *State Farm Fire* and *South Bay* tests as distinct tests; others, including the Ninth Circuit, have referred to them together as the "balancing test," *see* *HSBC Bank Nevada, 691 F.3d at 1169*; *accord* *Herskowitz v. Apple Inc., 940 F. Supp. 2d 1131, 1146 (N.D. Cal. 2013)*. In any event, the parties agree that both tests require the Court to "weigh the utility of the defendant's conduct against the gravity of the harm to the alleged victim." *HSBC Bank Nevada, 691 F.3d at 1169*; *see* Mot. at 23; Opp. at 20. Plaintiffs contend that "Google's conduct of secretly intercepting, recording, disclosing, and misusing their communications harmed them by invading their privacy and there is no corresponding benefit to consumers. Opp. at 21 (citing 3AC ¶ 260). According to Defendants, Plaintiffs have failed to pass the balancing test because they "admit that the Assistant provides a substantial benefit **[**64]** to consumers" and "concede that they took advantage of these benefits and wish to continue doing so." Mot. at 24 (citing 3AC ¶¶ 4, 20, 29, 39, 51, 65, 67, 79, 80, 82, 127).

At the motion to dismiss stage, the Court cannot say that the benefits from Google Assistant's unauthorized recordings necessarily outweighs the harms from such recordings. *See* *McCoy v. Alphabet, Inc., No. 20-CV-05427-SVK, 2021 U.S. Dist. LEXIS 24180, 2021 WL 405816, at *10 (N.D. Cal. Feb. 2, 2021)* ("At the motion to dismiss stage, the Court cannot say that the benefits from collecting that information to develop new products, features, and technologies for the benefit of the users and the public necessarily outweighs the harm."); *In re iPhone Application Litig., 844 F. Supp. 2d 1040, 1073 (N.D. Cal. 2012)* ("While the benefits of Apple's conduct may ultimately outweigh the harm to consumers, this is a factual determination that cannot be made at this stage of the proceedings."); *see also* Order on Motion to Dismiss at 51 ("Just how 'occasional' the error is, however, is a question of fact that remains unanswered at this stage. Moreover, the harm that is asserted here is the invasion of privacy, which is difficult to quantify. The Court cannot say, as a matter of law, that the utility of the Google Assistant necessarily outweighs the harm from false accepts.").

Defendants' **[**65]** motion to dismiss on the unfair prong of the UCL is DENIED.

G. Count 10: Declaratory Judgment

HN24[] Finally, Defendants move to dismiss Count 10, Plaintiffs' request for declaratory judgment under the *Declaratory Judgment Act, 28 U.S.C. §§ 2201 et seq.*[3] Declaratory relief is appropriate **[*976]** when (1) "the judgment will serve a useful purpose in clarifying and settling the legal relations in issue," and (2) "it will terminate and afford relief from the uncertainty... giving rise to the proceeding." *Bilbrey by Bilbrey v. Brown, 738 F.2d 1462, 1470 (9th Cir. 1984)* (citations omitted). "A claim for declaratory relief is unnecessary where an adequate remedy exists under some other cause of action." *Mangindin v. Washington Mut. Bank, 637 F. Supp. 2d 700, 707 (N.D. Cal. 2009)*; *see also* *Tyson v. Nationstar Mortg. LLC, No. 15-cv-01548, 2016 U.S. Dist. LEXIS 777, 2016 WL 39903, at *5 (N.D. Cal. Jan. 4, 2016)* (dismissing declaratory relief where "Plaintiffs' declaratory relief claim is duplicative of their TILA rescission claim").

The Court finds that Plaintiffs have not met the requirements for declaratory relief. Pursuant to their declaratory judgment claim, Plaintiffs seek a declaration that "Defendants continue to owe a legal duty to not intercept, record, disclose, and otherwise misuse Plaintiffs' and Class Members' confidential communications under, *inter alia*, the common law, the Wiretap Act, the SCA, CIPA, *Cal. Penal Code §632*, and *Cal. Bus. & Prof. Code §22576*." 3AC ¶ 283. They also seek an injunction "enjoining Google from engaging **[**66]** in the unlawful conduct alleged in this claim and requiring Google to delete all recordings of Class Members, to cease further recording, and to implement functionality sufficient to prevent unauthorized recordings in the future." *Id.* ¶ 284. The injunctive relief Plaintiffs seek is duplicative of the relief Plaintiffs seek under the UCL. *Compare* 3AC ¶ 262 with *id.* ¶ 284. In other words, if Plaintiffs are successful in their alternate claims for relief, Plaintiffs' claim for declaratory relief would be unnecessary. *See* *Tyson, 2016 U.S. Dist. LEXIS 777, 2016 WL 39903, at *5*. Accordingly, the Court GRANTS WITHOUT LEAVE TO AMEND Defendants' motion to dismiss Plaintiffs' cause of action for declaratory relief.

V. ORDER

---

[3] In the instant motion, Defendants insist that they previously moved to dismiss this claim. Mot. at 24. A review of Google's prior briefing reveals that Google did, indeed, move to dismiss Plaintiffs' declaratory judgment claim—in a single footnote buried at the end of twenty-five page brief. This Court's Standing Orders are clear that "[f]ootnotes shall not be used to cite to legal authorities or evidence." Standing Order for Civil Cases IV.F. The Court assumed that it did not need to caution parties not to raise dispositive arguments in footnotes. *See Estate of Saunders v. Comm'r*, 745 F.3d 953, 962 fn. 8 (9th Cir. 2014) ("***HN25***[] Arguments raised only in footnotes, or only on reply, are generally deemed waived"); *Khoja v. Orexigen Therapeutics, Inc.*, 498 F. Supp. 3d 1296, 1309 fn. 4 (S.D. Cal. 2020); *Cheever v. Huawei Device USA, Inc.*, No. 18-CV-06715-JST, 2019 U.S. Dist. LEXIS 231125, 2019 WL 8883942, at *3 (N.D. Cal. Dec. 4, 2019); *Sanders v. Sodexo, Inc.*, No. 2:15-cv-00371-JAD-GWF, 2015 U.S. Dist. LEXIS 96073, 2015 WL 4477697, at *5 (D. Nev. July 20, 2015) ("'Many courts will disregard arguments raised exclusively in footnotes.'" (quoting Bryan Garner, The Redbook: A Manual on Legal Style 168 (3d ed. 2013))).

For the foregoing reasons, the Court rules on Defendants' motion to dismiss the 3AC as follows:

- Count 1: GRANTED IN PART and DENIED IN PART WITHOUT LEAVE TO AMEND
- Count 2: GRANTED IN PART and DENIED IN PART WITHOUT LEAVE TO AMEND
- Count 3: DENIED
- Count 4: DENIED
- Count 5: DENIED
- Count 6: GRANTED IN PART and DENIED IN PART WITHOUT LEAVE TO AMEND
- Count 7: GRANTED IN PART and DENIED IN PART WITHOUT LEAVE TO AMEND
- Count 8: GRANTED WITH LEAVE TO AMEND
- Count 9: GRANTED WITH LEAVE TO AMEND

- Count 10: GRANTED WITHOUT LEAVE TO AMEND **[**67]**

Any amended complaint is **due by August 2, 2021**. Plaintiffs are directed to file a redlined complaint as an attachment to any amended complaint. Leave to amend is **[*977]** restricted to Counts 8 and 9; Plaintiff may not add new parties or claims without obtaining prior express leave of the Court. Any future motion to dismiss SHALL be limited to Counts 8 and 9. Briefing on the motion shall be limited to 5 pages for the opening and opposition briefs and 3 pages for the reply brief.

IT IS SO ORDERED.

LexisNexis® Headnotes

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Appropriateness

Civil Procedure > Judgments > Summary Judgment > Entitlement as Matter of Law

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Legal Entitlement

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Materiality of Facts

HN1[] **Entitlement as Matter of Law, Appropriateness**

Fed. R. Civ. P. 56(a) provides that summary judgment is appropriate where there is no genuine issue as to any material fact and the moving party is entitled to judgment as a matter of law. The existence of some factual disputes between litigants will not defeat an otherwise properly ground motion for summary judgment; the requirement is that there be no genuine issue of material fact. Mere metaphysical doubt as to the material facts will not suffice.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Appropriateness

Civil Procedure > Judgments > Summary Judgment > Burdens of Proof

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Movant Persuasion & Proof

Civil Procedure > Judgments > Summary Judgment > Entitlement as Matter of Law

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

HN2[] **Entitlement as Matter of Law, Appropriateness**

The basic issue before a court on a motion for summary judgment is whether the evidence presents a sufficient disagreement to require submission to a jury or whether it is so one-sided that one party must prevail as a matter of law. The moving party has the burden of showing the absence of a genuine issue as to any material fact, and in deciding whether the movant has met that burden, the court must view the movant's evidence and all factual inferences arising from it in the light most favorable to the nonmoving party. If reasonable minds could differ on the inferences arising from undisputed facts, then a court should deny summary judgment.

Antitrust & Trade Law > Consumer Protection > False Advertising

HN3[] **Consumer Protection, False Advertising**

Puffery can be generally understood as generalized, vague, nonquantifiable statements of corporate optimism. The "touchstone" of a puffery analysis is the likelihood that reasonable consumers would rely on that representation. Whether a representation is mere puffery depends, in part, on the context in which it is made.

Antitrust & Trade Law > Consumer Protection > False Advertising

HN4[] **Consumer Protection, False Advertising**

Both state and federal courts hold that whether a statement is puffery is a question of fact, save for the unusual case where the answer is so clear it may be decided as a question of law.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN5[] **Deceptive & Unfair Trade Practices, State Regulation**

Florida's Deceptive and Unfair Trade Practices Act requires: (1) a deceptive act or unfair practice; (2) causation; and (3) actual damages. To satisfy the first element, a plaintiff must show that the alleged practice was likely to deceive a consumer acting reasonably in the same circumstances. In determining whether a representation is likely to mislead consumers acting reasonably, courts consider the net impression created. If the statements are likely to mislead reasonable consumers, then it makes no difference if the statements are technically or literally true. And how a reasonable consumer would interpret a term is an issue of fact.

Torts > Products Liability

HN6[ ] Torts, Products Liability

Consumer complaints suffice to establish knowledge on the part of a manufacturer, but only if there are an unusual number of complaints such that the manufacturer would be on notice of the problem.

Torts > Products Liability > Types of Defects > Design Defects

HN7[ ] Types of Defects, Design Defects

Courts that do not find design defects to be covered by express warranties are generally presented with warranty language that only covers materials and workmanship.

Torts > Products Liability > Types of Defects > Design Defects

HN8[ ] Types of Defects, Design Defects

Courts commonly use at least one of the following three tests to determine whether a product is defectively designed: (1) the consumer expectation test; (2) the risk utility test; and (3) the reasonable alternative design test. A product is defectively designed under the consumer expectation test if the product fails to perform as safely as an ordinary consumer would expect when used as intended or in a manner reasonably foreseeable by the manufacturer.

Commercial Law (UCC) > ... > Contract Provisions > Warranties > Implied Warranty of Merchantability

Torts > Products Liability > Theories of Liability > Breach of Warranty

Commercial Law (UCC) > ... > Breach, Excuse & Repudiation > Notice Requirements > Notice of Breach

HN9[ ] Warranties, Implied Warranty of Merchantability

Illinois law provides two exceptions to the notice requirement: when (1) the seller has actual knowledge of the defect of the particular product or (2) the seller is deemed to have been reasonably notified by the filing of the buyer's complaint alleging breach of UCC warranty. A seller's generalized knowledge about the safety concerns of third parties is insufficient to fulfill the UCC notice requirement.

Torts > ... > Compensatory Damages > Types of Losses > Economic Losses

Torts > ... > Fraud & Misrepresentation > Negligent Misrepresentation > Remedies

Torts > ... > Fraud & Misrepresentation > Actual Fraud > Remedies

HN10[] **Types of Losses, Economic Losses**

The economic loss rule precludes tort recovery for economic harms based on a duty arising from a contractual relationship. However, the rule slightly varies from state to state and there are certain exceptions. The chief exception is that tort claims may survive the economic loss rule when the claim is for fraud, i.e., the plaintiff was harmed even before the contract was signed.

Torts > ... > Compensatory Damages > Types of Losses > Economic Losses

Torts > ... > Fraud & Misrepresentation > Negligent Misrepresentation > Remedies

Torts > ... > Fraud & Misrepresentation > Actual Fraud > Remedies

HN11[] **Types of Losses, Economic Losses**

Under Missouri law, a fraud claim independent of a contract is actionable, but it must be based upon a misrepresentation that was outside of or collateral to the contract, such as many claims of fraudulent inducement. To decide whether a fraud claim is independent of a contract claim under the economic loss doctrine, a court should look at (1) whether the subject matter of the alleged misrepresentations was incorporated into the parties' contract and (2) whether the plaintiff suffered additional damages outside the contract as a result of the alleged fraud. Additionally, the fraudulent inducement exception is subject to a widely recognized limitation that where the fraudulent misrepresentation concerns the quality, character, or safety of the goods sold, the economic loss doctrine bars the fraud claim because it is substantially redundant with warranty claims.

Bankruptcy Law > ... > Examiners, Officers & Trustees > Duties & Functions > Capacities & Roles

Bankruptcy Law > Individuals With Regular Income > Estate Property

HN12[] **Duties & Functions, Capacities & Roles**

A pre-petition cause of action is the property of a Chapter 7 bankruptcy estate, and only the trustee in bankruptcy has standing to pursue it. Failure to list an interest on a bankruptcy schedule leaves that interest in the bankruptcy estate.

Governments > Legislation > Statute of Limitations > Time Limitations

HN13[] **Statute of Limitations, Time Limitations**

A cause of action can accrue for ownership purposes before the statute of limitations for that cause of action has begun to run.

Torts > Procedural Matters > Conflict of Law > Place of Injury

HN14[] **Conflict of Law, Place of Injury**

In Florida, absent special circumstances, the state where an injury occurred is the decisive consideration in determining the applicable choice of law.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN15[] **Class Actions, Certification of Classes**

A plaintiff seeking to represent a proposed class must establish that the proposed class is adequately defined and clearly ascertainable.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Adequacy of Representation

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Numerosity

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Typicality

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

HN16[] **Prerequisites for Class Action, Adequacy of Representation**

Parties seeking class action certification must satisfy the four requirements of *Fed. R. Civ. P. 23(a)*, commonly referred to as numerosity, commonality, typicality, and adequacy of representation. Parties moving for class certification bear the burden of establishing each element of *Rule 23(a)*. If the party seeking class certification fails to demonstrate any requirement, the case may not continue as a class action. Specifically, the four requirements of *Rule 23(a)* are: (1) the class is so numerous that joinder of all members is impracticable; (2) there are questions of law or fact common to the class; (3) the claims or defenses of the representative parties are typical of the claims or defenses of the class; and (4) the representative parties will fairly and adequately protect the interests of the class. *Fed. R. Civ. P. 23(a)*.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

HN17[] **Class Actions, Certification of Classes**

For purposes of commonality for class certification, even a single common question will do. A question is common if answering it resolves an issue that is central to the validity of each one of the claims in one stroke.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Adequacy of Representation

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Typicality

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

HN18[] **Prerequisites for Class Action, Adequacy of Representation**

The typicality test for class certification is not demanding. Typicality requires that the claims or defenses of the representative parties are typical of the claims or defenses of the class. *Fed. R. Civ. P. 23(a)(3)*. The typicality test centers on whether other members have the same or similar injury, whether the action is based on conduct which is not unique to the named class plaintiffs, and whether other class members have been injured by the same course of conduct. Although similar to commonality in that it concentrates on the nexus between class members and their designated representative, typicality differs from commonality in that it focuses on the class representative's individual characteristics in comparison to those of the proposed class. Typicality is satisfied where the named plaintiffs' claims arise from the same event or pattern or practice and are based on the same legal theory as the claims of the class.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Adequacy of Representation

HN19[] **Prerequisites for Class Action, Adequacy of Representation**

The purpose of the adequacy requirement is to protect the legal rights of absent class members. Adequacy of representation is primarily based on the forthrightness and vigor with which the representative party can be expected to assert and defend the interests of the class and whether plaintiffs have interests antagonistic to those of the rest of the class. The inquiry requires a court to consider both whether there are any inter-class conflicts and whether class counsel and named plaintiffs will prosecute the case with zeal.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Superiority

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Maintainability

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

HN20[] **Class Actions, Certification of Classes**

In addition to meeting the four requirements of *Fed. R. Civ. P. 23(a)*, parties seeking class certification must prove that the action is maintainable under one of the three subsections of *Rule 23(b)*. Certification under *Rule 23(b)(3)* is appropriate when (1) questions of law or fact common to the members of the class predominate over any questions affecting only individuals members, and when (2) a class action is superior to other available methods for fairly and efficiently adjudicating the controversy. *Fed. R. Civ. P. 23(b)(3)*.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Maintainability

HN21[] **Prerequisites for Class Action, Maintainability**

Fed. R. Civ. P. 23(b)(3)'s predominance requirement is more demanding than the commonality requirement of *Rule 23(a)*. It tests whether proposed classes are sufficiently cohesive to warrant adjudication by representation, by asking whether the common, aggregation-enabling, issues in the case are more prevalent or important than the non-common, aggregation-defeating, individual issues. Thus, the predominance inquiry calls upon courts to give careful scrutiny to the relation between common and individual questions in a case. An individual question is one where members of a proposed class will need to present evidence that varies from member to member, while a common question is one where the same evidence will suffice for each member to make a prima facie showing or the issue is susceptible to generalized, class-wide proof. When one or more of the central issues in the action are common to the class and can be said to predominate, the action may be considered proper under *Rule 23(b)(3)* even though other important matters will have to be tried separately, such as damages or some affirmative defenses peculiar to individual class members.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Maintainability

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Superiority

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN22[] **Class Actions, Certification of Classes**

Individual issues are a threat to predominance in a class action even when they come up in affirmative defenses. The general rule is that courts are reluctant to deny class action status under *Fed. R. Civ. P. 23(b)(3)* simply because affirmative defenses may be available against individual members.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN23[] **Class Actions, Certification of Classes**

Fed. R. Civ. P. 23(b)(3) requires that any model supporting a plaintiff's damages be consistent with its theory of liability. In short, the requirement ensures that the damages are capable of determination via class-wide proof, just like the theory of liability.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Maintainability

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN24[] **Prerequisites for Class Action, Maintainability**

It is universally true in *Fed. R. Civ. P. 23(b)(3)* class actions that damages must be susceptible to class-wide measurement such that individual issues do not predominate over common questions.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Maintainability

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Superiority

HN25[] **Prerequisites for Class Action, Maintainability**

There are four non-exhaustive factors a court should consider in assessing whether a class action is superior to individual litigation: (A) the interest of members of the class in individually controlling the prosecution or defense of separate actions; (B) the extent and nature of any litigation concerning the controversy already commenced by or against members of the class; (C) the desirability or undesirability of concentrating the litigation of the claims in the particular forum; and (D) the difficulties likely to be encountered in the management of a class action. *Fed. R. Civ. P. 23(b)(3)*.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN26[] Class Actions, Certification of Classes

The class action device exists to overcome the problem that small recoveries do not provide the incentive for any individual to bring a solo action prosecuting his or her rights.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

HN27[] Class Actions, Certification of Classes

Unjust enrichment is a fact-intensive inquiry that focuses on the totality of the circumstances, not just the defendant's conduct. Before it can grant relief on that equitable claim, a court must examine the particular circumstances of an individual case and assure itself that, without a remedy, inequity would result or persist. Due to the necessity of an inquiry into the individualized equities attendant to each class member, courts find unjust enrichment claims inappropriate for class action treatment.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN28[] Class Actions, Certification of Classes

The predominance inquiry for class certification is not determined by simply counting the number of individual questions versus common ones, a court must consider their relative importance.

Opinion

[*1357] **ORDER ON SUMMARY JUDGMENT AND CLASS CERTIFICATION**

THIS CAUSE came before the Court upon Ford's Motion for Summary Judgment and Plaintiffs' Motion for Class Certification.

THE COURT has considered the motions, the responses, the replies, the supplemental briefing, oral argument, the pertinent **[**3]** portions of the record, and being otherwise fully advised in the premises, it is

ADJUDGED that the motions are disposed of as follows:

This Order **grants** Ford summary judgment on Plaintiffs' claims concerning the occurrence of Limp Mode on public roads, all of Plaintiff Cruz's claims, the express and implied warranty claims of Plaintiffs Roberts, Hochsprung, Kowalchik, and **[*1358]** Porter, as well as the express warranty claims of any class members who did not fulfill their presentment and notice obligations. It **denies** summary judgment on all other claims.

The Order also **certifies** nine state law classes and Magnuson-Moss classes in Texas and California under *Rule 23(b)(3)*. The class is defined as "All persons who purchased a Class Vehicle from a Ford-authorized dealer or distributor located in [insert state here] before April 1, 2016."

I. Introduction

Plaintiffs are purchasers of Defendant Ford's Shelby GT350 Mustang car. The Shelby Mustang is a performance version of the standard Mustang. It is several cuts above both the base version of the Mustang and the Mustang GT (which has a V8 engine). Only true car enthusiasts opt for the Shelby GT350, and they do so mainly for its racing and track capabilities. In fact, **[**4]** the name "Shelby" comes from Carroll Shelby, a race car driver and designer for Ford in the mid-20th century. Indeed, Ford touted the Shelby as "an all-day track car that is also street legal."

Like any car, consumers had the option to customize it to their liking. This included choosing between five packages—the base package, technology package, track package, R package, and R technology package. **The two lowest packages, base and technology, did not come with transmission and differential coolers**. The coolers prevent the engine from overheating at consistently high rotations per minute, allowing the driver to drive faster for longer. In order to prevent overheating in the Shelbys without the coolers, Ford programmed the Base and Technology packages to rapidly decelerate when engine temperature got too high. Both parties refer to this as "Limp Mode." This was an intentional design choice. Originally, all Shelbys had the coolers, but Ford removed the coolers from the Base and Tech packages a few years before launch—allegedly to increase profit margins in their volume-leading Tech package.

Obviously, track driving is done at very fast speeds for a prolonged period. Plaintiffs allege that **[**5]** many of their vehicles unexpectedly entered Limp Mode, both on the track and the open road. The Shelbys are essentially unusable for sustained track driving—the main reason many Plaintiffs bought the car. Plaintiffs now bring a variety of claims under the statutory and common laws of several different states. To be brief, the Plaintiffs make two broad categories of complaint: 1) Ford advertised all Shelbys as track-capable, the advertising induced Plaintiffs to purchase the car, and then the car did not perform as advertised. 2) The consistent occurrence of limp mode is a breach of Ford's express and implied warranties. Finally, the named Plaintiffs ask this Court to certify a class.

II. Legal Standard

HN1[] *Fed. R. Civ. P. 56* provides, "summary judgment is appropriate where there 'is no genuine issue as to any material fact' and the moving party is 'entitled to judgment as a matter of law.'" *See* *Alabama v. N. Carolina, 560 U.S. 330, 130 S. Ct. 2295, 2308, 176 L. Ed. 2d 1070 (2010)* (quoting *Fed. R. Civ. P. 56(a)*). The existence of some factual disputes between litigants will not defeat an otherwise properly ground motion for summary judgment; "the requirement is that there be no *genuine* issue of *material* fact." *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 248, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)* (emphasis added). Mere "metaphysical doubt as to the material facts" will not suffice. *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 587, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*.

[*1359] ***HN2***[] The basic issue **[**6]** before the court on a motion for summary judgment is "whether the evidence presents a sufficient disagreement to require submission to a jury or whether it is so one-sided that one party must prevail as a matter of law." *Anderson, 477 U.S. at 251 (1986)*. The moving party has the burden of showing the absence of a genuine issue as to any material fact, and in deciding whether the movant has met this burden the court must view the movant's evidence and all factual inferences arising from it in the light most favorable to the nonmoving party. *Allen v. Tyson Foods, Inc., 121 F.3d 642, 646 (11th Cir. 1997)*. "If reasonable minds could differ on the inferences arising from undisputed facts, then a court should deny summary judgment." *Miranda v. B & B Cash Grocery Store, Inc., 975 F.2d 1518, 1534 (11th Cir. 1992)*.

III. False Advertising

Many of Plaintiffs' claims focus on Ford's marketing. There are claims under various state statutes prohibiting deceptive business practices, common law fraudulent concealment claims, and one claim for violation of California's false advertising law. In their summary judgment briefing, the parties do not discuss the differences between the various states' laws. Instead, Ford makes the general objection that its advertisements are not actionable because they are mere puffery.

Most of the facts are not disputed. Ford advertised the **[**7]** entire Shelby lineup "track-ready" and "track-capable." While not directly relevant to the puffery analysis, Ford knew race-track enthusiasts were the Shelbys target audience. In a track day invitation sent to all Shelby owners post-purchase, Ford's marketing manager wrote that the GT350 had "exceptional race track capabilities, we're sure that's one of the reasons you purchased your GT350—perhaps the main reason." There should be no doubt that Ford touted the Shelby lineup as designed for the track. Other advertising materials include phrases like "an all-day track car that's also street legal," "tested endlessly on the most challenging roads and tracks in the world," "we wanted to build the best possible Mustang for the places we most love to drive - challenging back roads with a variety of corners and elevation changes - and the track on weekends," and finally described the Mustang as "track-focused."

Rather than deny the obvious, Ford's two categories of responses argue that 1) their advertising is mere puffery, as evidenced by the fact that no one really agrees on what "track-capable" means and 2) Ford's advertising actually differentiated the Base and Tech models from the others **[**8]** because Ford lavished much more "track" praise on the higher end models and specifically warned consumers that Base and Tech models would need aftermarket coolers. *See* D.E. 140 at 3; D.E. 141-54.

A. Mere Puffery

While true that each circuit and the various states will have their own slightly nuanced definition of puffery, ***HN3***[] puffery can be generally understood as "generalized, vague, nonquantifiable statements of corporate optimism."

Omnicare, Inc. v. Laborers Dist. Council Const. Indus. Pension Fund, 575 U.S. 175, 135 S. Ct. 1318, 191 L. Ed. 2d 253 (2015); *Carvelli v. Ocwen Fin. Corp., 934 F.3d 1307, 1318 (11th Cir. 2019)*. Or, as Judge Learned Hand wrote, "[t]here are some kinds of talk which no sensible man takes seriously, and if he does he suffers from his credulity." *Vulcan Metals Co. v. Simmons Mfg. Co., 248 F. 853, 856 (2d Cir. 1918)*. One Multi-District Litigation judge considering puffery across several jurisdictions held that the "touchstone" of the puffery analysis is "the likelihood that reasonable consumers would rely on that representation." *In re Chrysler-Dodge-Jeep **[*1360]** Ecodiesel Mktg., Sales Practices, & Prod. Liab. Litig., 295 F. Supp. 3d 927, 1007 (N.D. Cal. 2018)*. Finally, "[w]hether a representation is mere puffery depends, in part, on the context in which it is made." *In re Petrobras Sec. Litig., 116 F. Supp. 3d 368, 381 (S.D.N.Y. 2015)* (internal citation and omitted) (Rakoff, J.).

Ford argues their "track-capable" claim and related advertising is puffery, and therefore non-actionable, because there are many definitions of "track" driving. Ford claims calling a Base Shelby "track-ready" is vague, subjective, and unable **[**9]** to be objectively verified. At the summary judgment stage, this argument, much like the Mustangs' engines, blows smoke.

Ford further argues "track" could mean everything ranging from a drag race at a stoplight on Red Road to a 20-minute session doing laps on a racetrack. Some of the other "events" Ford cites include autocross, gymkhana, drag strip, roll racing, drift, and closed road. "Track Days," Ford says, are a *specific* event where the Base and Tech models of the Shelby GT350 struggle the most and often enter Limp Mode. According to Ford, "Track Day" has a specific meaning within the racing community; it does not simply refer to a day at the track. Ford further argues that there is not even one type of Track Day, some have sessions of 25-30 minutes, some have no defined sessions at all, some are on oval tracks, while some are on a road course. To prove its point, Ford cites to many different depositions of named Plaintiffs and its own employees which demonstrate that each person has their own idea of what qualifies as a car as being "track-capable" and that the term has no standard definition. For example, Plaintiff Cruz gave the amorphous definition that "track ready" vehicles **[**10]** have limits that exceed those of a "normal" vehicle. Plaintiff Gondan testified "I don't know what you mean by 'track.' There are drag strips, drag tracks. There are road courses. Autocross." Plaintiff Kelly agreed that "track capable can mean different things to different people." Plaintiff Evans said he needed the MagneRide suspension in order to take his car to the track, whereas Plaintiff Hochsprung said the MagneRide suspension was irrelevant.

But for Ford to prevail on the puffery argument at the summary judgment stage, it must convince this Court that no reasonable juror could find that Ford's advertisements claiming its Shelby Mustangs were "track-capable" or "track-ready" led a reasonable consumer to believe that he could do intense track driving without the car entering Limp Mode. That is a tall task. ***HN4***[] Further, both state and federal courts hold that whether a statement is puffery is a question of fact, save for the unusual case where the answer is so clear it may be decided as a question of law. *Commonwealth by Shapiro v. Golden Gate Nat'l Senior Care LLC, 648 Pa. 604, 626-27, 194 A.3d 1010 (2018)* (collecting cases).

Here, the facts are such that a reasonable consumer could rely on Ford's representations as conveyances of fact, rather than "general claims of superiority made **[**11]** by a salesman." *See* *Mfg. Research Corp. v. Greenlee Tool Co., 693 F.2d 1037, 1040 (11th Cir. 1982)*. A general claim of superiority, for example, may be something like "Built Ford Tough." Or perhaps a representation that is "not the sort of empirically verifiable statement that [could] be affirmatively disproven" would read "[i]t's inevitable... Mustangers have more fun."[1] *Next Century Communs. Corp. v. **[*1361]** Ellis, 318 F.3d 1023, 1028 (11th Cir. 2003)*. Those are, however, plainly not the sort of advertisements the Court is faced with today. In one press release, Ford touts the Shelby GT350s' transmission as "developed with all-day track capability and high-RPM capability at the forefront." This statement is specific—it focuses on the car's transmission—and it is empirically verifiable. Indeed, "all-day" is measured in time and "high-RPM" is literally measured in rotations per minute. Ford's argument that "it cannot be objectively verified whether any given GT350—or any other vehicle—is 'track ready' or 'track capable' or is a 'thoroughbred capable of tackling the world's most challenging roads and racetracks'" is ironic. Racing is an activity obsessed with metrics and objective verification—victory is often decided by tenths of a second and Ford relentlessly tests its performance vehicles so

---

[1] https://www.designnews.com/automotive/classic-mustang-ads-take-us-back-dawn-pony-car-era/gallery?slide=5

that they meet the expectations of their target **[**12]** customer, considered "gearheads." Internal Ford documents show the company believed, for the GT350 "performance is defined as track performance." Plaintiffs cite evidence showing that the Base/Tech Shelbys caught fire after being put through their paces by Ford Engineering, and afterwards, the engineering team informed the marketing team that it was concerned that the Base Shelby was not "track durable" nor "appropriate for track use." (D.E. 141 at 5). The bottom line is that if Ford itself believes "track capable" and similar claims are objective standards, it is certainly possible a reasonable juror may feel the same way.

B. Deceptive Advertising

Ford attempts to elide the distinction between its puffery defense and its separate argument that its advertising, viewed as a whole, was not deceptive. While it is true that the Court must consider the allegedly misleading statements in context rather than in a vacuum, Ford's other statements about the higher-end Shelbys do not make its "track-capable" claims any more vague or subjective even though they may make Ford's advertising, as a whole, less deceptive. *See* *Marty v. Anheuser-Busch Companies, LLC, 43 F. Supp. 3d 1333 (S.D. Fla. 2014)* (finding single statement was not puffery after considering it in light of **[**13]** Defendant's entire advertising campaign).

The Court now turns to Ford's argument that its Shelby advertising was not deceptive, first, because it warned consumers that aftermarket coolers would be necessary for track days and, second, because it specified elsewhere in its advertising materials that certain non-Base and non-Technology models were the "track day specialists." Plaintiffs bring deceptive advertising claims under a variety of state laws, but the Defendants do not make state specific objections regarding what qualifies as deceptive. ***HN5***[] Florida's Deceptive and Unfair Trade Practices Act, for example, requires: "(1) a deceptive act or unfair practice; (2) causation; and (3) actual damages." *Carriuolo v. Gen. Motors Co., 823 F.3d 977, 983 (11th Cir. 2016)*. "To satisfy the first element, the plaintiff must show that 'the alleged practice was likely to deceive a consumer acting reasonably in the same circumstances.'" *Id. at 983-84*. "In determining whether a representation is likely to mislead consumers acting reasonably, courts consider the net impression created." *F.T.C. v. RCA Credit Servs., LLC, 727 F.Supp.2d 1320, 1329 (M.D. Fla. 2010)*. If the statements are "likely to mislead reasonable consumers," then it makes no difference if the statements are "technically or literally true." *F.T.C. v. Peoples Credit First, LLC, 244 F. App'x 942, 944 (11th Cir. 2007)*. And how a reasonable consumer would interpret **[**14]** a term is an issue of fact. *Jankus v. Edge Inv'rs, L.P., 650 F. Supp. 2d 1248, 1258 (S.D. Fla. 2009)*. Here, it is plausible that a reasonable **[*1362]** juror could find that a reasonable consumer would be misled by the "net impression" created by Ford's advertising.

Granted, Ford recommended that consumers add transmission and differential coolers to the Base and Technology models if they planned on "sustained high speeds or track day use." Complaint ¶ 359. However, Plaintiffs allege that this recommendation came on page 25 of the Supplemental Owner's Guide—a pamphlet only available in the glove box of the car one has already purchased. Ford disputes this and claims the Guide was available online, pre-purchase. Ford points to Plaintiff Kamperman's testimony that he viewed the language "over and over" as proof that Plaintiffs' knew about the need for coolers *before* purchase. But nowhere in the selected section does he say he viewed the Guide *pre-purchase*. Thus, a genuine dispute of material fact precludes summary judgment on this basis. Further, a Ford marketing employee told one customer that if he planned to use his Technology package Shelby on the racetrack for "sustained lap sessions, we would still recommend that you purchase coolers." Complaint ¶ 328. Notably, **[**15]** however, this statement was made to *one* consumer rather than the general consuming public.

Ford also points to the way in which it described the higher end "R" and "Track" packages as evidence its advertising was not deceptive. In various brochures made available to dealers and consumers before purchase, the R model was marketed as "the most track-ready" and recommended for "hardcore track use" while the Track model was touted as the "track-day specialist." In contrast, those same materials were silent on the Base and Technology models' track capabilities. But merely highlighting that the most expensive, souped-up Shelby models would be *more* track capable than the Base and Technology models does not cure the deception. With all due respect to American engineering, Plaintiffs surely knew a Ferrari would be better suited for intense track driving than the Base Shelby, but they were nonetheless entitled to rely on Ford's representation that its car was an "all-day track car."

Ford succinctly summarizes the false/deceptive advertising issue in its reply brief. It writes, "the statements at issue were made in a wide variety of contexts, some of which included pictures of vehicles on road **[**16]** courses and some that did not, some of which differentiated between models and some that did not, and some that specifically identified which models had coolers and noted that coolers were needed for 'trade day use,' and some that did not." (D.E. 167 at 6). Exactly. With such variable evidence, it cannot be said that there is no genuine dispute of material fact such that judgment for Ford would be appropriate.

IV. Subjective Knowledge

Ford then makes state-specific and plaintiff-specific arguments that certain Plaintiffs' subjective knowledge that their Base or Technology package Shelbys would go into Limp Mode after intense driving precludes their common-law and statutory fraud claims. Ford argues Oregon, Texas, Washington, Florida, and New York common law all require proof of reliance for a successful fraud claim. Additionally, Oregon, Texas, and Washington statutory fraud laws require proof of reliance or proof that but-for the fraud, the injury would not have occurred. Further, Florida and New York statutory fraud laws do not require proof of reliance, Defendant says, but a Plaintiff cannot claim they were deceived if they subjectively knew the truth. Plaintiffs do not dispute most **[**17]** of Ford's characterizations of the relevant law. Now, the plaintiff-specific evidence.

[*1363] A. Plaintiff Long (Oregon)

Obviously, one cannot "rely" on fraudulent representations if one subjectively knows those representations to be false. Long saw a YouTube video of a car going into Limp Mode and some online comments to the same effect. He also called Ford customer service and they told him there was "no certain fix." However, when Long spoke to his contact at the local Ford dealer, he felt that he was being reassured that he would not have a problem with Limp Mode. Whether Long's subjective knowledge was such that he could not have relied on Ford's representations about the cars is a question of credibility best answered by a jury.

B. Plaintiff Kamperman (Texas)

Kamperman plainly knew the difference between the Tech package and the other Shelbys. He said the "the track [package] would be able to withstand much longer periods at high speeds." But elsewhere in his testimony, Kamperman said he believed that the car he purchased was *also* track capable, albeit not to the same degree, "because it was listed on the same page with the other track ready cars. . . . it said 'this car can definitely **[**18]** be tracked.'" Kamperman certainly gives testimony that would have a finder of fact doubt whether he was truly deceived by Ford's advertising. But again, whether Kamperman's subjective knowledge was such that he could not have relied on Ford's representations about the cars is a question of credibility best answered by a jury.

C. Plaintiff Evans (Washington)

Evans saw Internet forums were Tech package Shelbys were not performing well at the track. He also knew that the car did not have coolers. However, he also testified that he had an expectation that Ford would fix the Limp Mode problem before he took delivery. Based on this evidence, the Court cannot definitively say that there is no genuine dispute as to whether Evans could have relied on Ford's alleged misrepresentations. Thus, the Court **denies** summary judgment on the common law and statutory fraud claims under Oregon, Texas, and Washington law.

D. Plaintiff Kowalchik (Florida)

Kowalchik knew that the Tech package did not have coolers, and he plainly testified that he would add them afterwards because a car is not "complete" without them. Although Kowalchik is a self-described "gearhead," he did not purchase the more track-ready car **[**19]** because he could not afford it. However, somewhat confusingly, Kowalchik also testified that "Nobody said you couldn't drive the car on a track. Nobody said, 'Oh, by the way, we put a dog of a transmission in it that's going to overheat if you get aggressive with it.'" And also, "Something was not as I had assumed it would be based upon all of Ford's advertisements." Once again, Kowalchik's testimony about how he is a car-expert and always planned to modify his lower-tier Mustang is not helpful to the Plaintiffs' case, but the testimony, on the whole, does not categorially rule out Kowalchik's reliance on Ford's advertisements. Thus, the Court denies summary judgment.

E. Plaintiff Kelly (New York)

Kelly understood that his Tech package Shelby would only be suitable for short track days. But, importantly, Kelly testified that he thought "short track day" meant 20-30 minute sessions. In other words, Kelly thought his car would be suited for what Ford considers a regular "track day." Thus, summary judgment is denied for any state law claims on the basis that Plaintiffs had subjective knowledge that Base and Tech package Shelbys **[*1364]** would enter Limp Mode in certain driving conditions.

V. Objective [**20] Knowledge

Ford then argues that summary judgment on statutory fraud claims is required because no reasonable consumer under the circumstances could have been deceived. Ford cites case law holding that it must be *probable*, not merely possible, that a significant portion of the general public could be misled. Then it argues Plaintiffs who took delivery after February 2016 could not reasonably claim to be misled because of information and rumors available on Internet forums that the cars at issue could not do track days. Plainly, this argument is not a summary judgment winner. It certainly is genuinely disputed as to whether a Plaintiff was likely to be misled, and posts on Internet forums are not sufficient evidence to put the question beyond the debate of a jury.

VI. Omission Claims

Next, Ford argues that summary judgment on the Plaintiffs' statutory and common-law *omission* claims is required. The omission claims allege that Ford concealed that Limp Mode would occur on **public roadways under normal driving conditions**.[2] Ford moves for summary judgment and argues that first, Ford's actual knowledge of the defect must be proven and second, it had no such knowledge of any occurrence of Limp **[**21]** Mode on public roads at the time Plaintiffs purchased their vehicles.

The evidence Plaintiffs offer as proof that Ford had knowledge that Limp Mode would occur on public roads under normal driving conditions is easily summarized. It includes testimony by a Ford Performance parts manager that he was aware of a consumer report that Limp Mode occurred on a public road, a 2014 internal email from Ford's Chief Functional Engineer warning not to send cars without coolers to Germany (likely due to the manner of driving on the autobahn), and the subsequent remedial measure of Ford adding standard coolers in later model years.

Statutory and common-law fraud by omission standards vary slightly from state to state—some require actual knowledge, and in some states, "should have known" is sufficient. Of all the evidence in this case, it is telling that there is only one internal email that mentions Limp Mode on public roads; and even then, the email merely relays a *single*, unverified consumer report with no other diagnostic information. The Court is unconvinced that this is sufficient evidence such that any reasonable juror could find that Ford had knowledge that the Base and Tech Shelbys would go **[**22]** into Limp Mode under normal driving conditions. Plaintiffs only cite three cases where

---

[2] Notably, this claim is NOT about Limp Mode occurring while Plaintiffs drove their cars on the track or in more aggressive ways.

consumer complaints supported a finding of corporate knowledge, and all three of those cases were at the motion to dismiss stage. Several courts in the Ninth Circuit have held that ***HN6***[] consumer complaints suffice to establish knowledge, but only if there are an unusual number of complaints such that the manufacturer would be on notice of the problem. *Williams v. Yamaha Motor Co., 851 F.3d 1015, 1026 (9th Cir. 2017)*. In this district, Judge Ruiz recently considered a claim on similar facts and concluded

> There is certainly no hard-and-fast rule on how many consumer complaints a plaintiff must show to sufficiently plead a defendant's knowledge; perhaps 12 examples could provide a sufficient factual assertion in the proper case. But here, **[*1365]** not only is it a very small number relative to the "hundreds of thousands" of vehicles that supposedly have this defect, but, like the plaintiffs in *Espineli*, Plaintiffs have offered no context as to how many complaints are normal such that someone could infer they were more than a "blip on [Defendants'] radar."

Timothy Lewis, Teresa Massa, Linda Gazie, Steven Wallach, Ana Schwartz, Joseph Monopoli$, James Fitzpatrick, & Synthia Praglin, ***[**23]*** *on behalf of themselves & all others similarly situated$, Plaintiffs, v. Mercedes-Benz USA, LLC, Daimler AG & Grammer AG, Defendants., No. 19-CIV-81220-RAR, 2021 U.S. Dist. LEXIS 60557, 2021 WL 1216897 (S.D. Fla. Mar. 30, 2021)* (internal citations omitted). Judge Ruiz ultimately dismissed the claim. This Court grants summary judgment on these claims. Just as unverified internet reports could not give consumers objective knowledge of Limp Mode, they are not sufficient to impute to Ford Management actual knowledge of Limp Mode occurring on public roads.

VII. Breach of Express Warranty

Ford next asks for summary judgment on Plaintiffs' various state law claims that Ford breached the express warranty. Ford's broadest argument is that Ford never breached the warranty because Limp Mode is a *safety feature*, not a malfunction, failure, or defect. The New Vehicle Limited Warranty promises that if your

> "Ford was properly operated and maintained, and was taken to a Ford dealership for a warranted repair during the warranty period, then authorized Ford Motor Company dealers will, without charge, repair, replace, or adjust all parts on your vehicle that **malfunction or fail during normal use** during the applicable coverage period **due to a manufacturing defect** in factory-supplied **[**24]** materials or factory workmanship. This warranty does not mean that each Ford vehicle is defect free. **Defects may be unintentionally introduced into vehicles during the design** and manufacturing processes and such defects could result in the need for repairs." (emphasis added).

Plaintiffs argue that the "malfunction" here is the premature overheating of the engine caused by the lack of coolers (i.e., the "defect"). Defendant responds that first, premature overheating is not a malfunction—it is a designed safety feature; second, Ford argues, even if premature overheating could be considered a malfunction, it never occurred in Plaintiffs' vehicles precisely because of Limp Mode.

The Court is not convinced by the second argument. Plaintiffs describe the malfunction as premature overheating, but this is essentially synonymous with Limp Mode. Plaintiffs' breach of warranty argument is best rephrased as "my car was defective because it did not have the necessary coolers to go really fast for a long time." And because the evidence shows this was a deliberate design choice by Ford, it can be described as an alleged *design* defect, as opposed to a *manufacturing* defect. So, the two questions become: **[**25]** 1) Does the New Vehicle Limited Warranty cover design defects? And 2) Can a "safety feature" that **performed as intended** qualify as a design defect?

A. Warranty Interpretation

The first question first. Judge Dimitrouleas concluded that the same warranty language here covered design defects in a 2014 suit against Ford. *Sanchez-Knutson v. Ford Motor Co., 52 F. Supp. 3d 1223, 1232 (S.D. Fla. 2014)* ("[T]to the extent that the language is ambiguous regarding whether design defects are covered, that ambiguity is construed against Ford, the drafter."). The Ninth Circuit **[*1366]** found design defects were covered, as well, noting "Ford's express warranty is not simply a 'materials and workmanship' warranty, as it references defects that are introduced during the 'design' process. *Daniel v. Ford Motor Co., 806 F.3d 1217, 1224-25 (9th Cir. 2015)*. ***HN7***[] Courts that do *not* find design defects to be covered by express warranties are generally presented with warranty language that only covers "materials and workmanship." *See$, e.g., Bruce Martin Const., Inc. v. CTB, Inc., 735 F.3d 750 (8th Cir. 2013)*. The warranty *here* covers design defects that may be "unintentionally" introduced. In the other cases cited, the *design* was (of course) intentional, but the *consequences* were unintentional. Here, both the design and its consequences were intentional—Limp Mode worked just the way Ford wanted it to. So to decide whether this **[**26]** Warranty covers design defects, perhaps it is best to consider the second question: Whether it is even *possible* on facts like these.

Can Limp Mode even be considered a design defect if it worked as expected? The answer here varies by state and is fact intensive. For example, in Florida, "the definition of design defect is in a state of flux." *In re Standard Jury Instructions in Civil Cases—Report No. 09-10 (Prods. Liab.), 91 So. 3d 785, 789 (Fla. 2012)* (Pariente, J., concurring). ***HN8***[] Courts commonly use at least one of the following three "tests" to determine whether a product is defectively designed: (1) the consumer expectation test; (2) the risk utility test; and (3) the reasonable alternative design test. *Pierre v. Intuitive Surgical, Inc., 476 F. Supp. 3d 1260, 1270 (S.D. Fla. 2020)* (Ruiz, J.). A product is defectively designed under the consumer expectation test if "the product fails to perform as safely as an ordinary consumer would expect when used as intended or in a manner reasonably foreseeable by the manufacturer." *Tillman v. C.R. Bard, Inc., 96 F. Supp. 3d 1307, 1338-39 (M.D. Fla. 2015)*; *Restatement (Second) of Torts § 402A*. Should a jury find that the Base or Tech GT350's did not perform as safely as an ordinary consumer would expect, then it is possible that Plaintiffs may recover for breach of warranty. At that point, it would be unnecessary to address Florida's other tests. On the other hand, a jury could find that a design defect does not exist under applicable **[**27]** state law and Ford does not breach its warranty merely because a consumer was misled by allegedly false advertising. Plaintiffs do not seek to certify express warranty classes, and the state law variations can be dealt with at trial through the appropriate jury instructions and verdict forms.

B. Presentment and Notice

Ford has two other arguments as to why summary judgment must be granted on the breach of warranty claims, even if the warranty covers design defects and Limp Mode is indeed found to be a design defect. First, Ford argues that some Plaintiffs never experienced Limp Mode and so the alleged defect never manifested. Second, some Plaintiffs failed to present their vehicles to Ford for repair and thus did not comply with the terms of the warranty.

Plaintiffs argue that even if some Plaintiffs did not experience Limp Mode, its occurrence is a virtual certainty. This Court previously denied Ford's motion to dismiss on the manifestation/virtual certainty issue after thoroughly reviewing the relevant state law. *Tershakovec v. Ford Motor Co., No. 17-21087-CIV, 2018 U.S. Dist. LEXIS 116130, 2018 WL 3405245 at *6-9 (S.D. Fla. July 12, 2018)*. Although Ford argues this time is different because "the evidence now conclusively rebuts" the contention that Limp Mode is a virtual certainty, it is fundamentally inconsistent **[**28]** for Ford to argue on one page of its briefing that Limp Mode was a conscious and well-executed design choice and **[*1367]** then argue on another page that Limp Mode may never occur. Even if Ford's argument were logically consistent, the evidence is inconclusive as to whether Limp Mode is a virtual certainty. Summary judgment in favor of Ford is inappropriate on that basis.

Next, Ford correctly notes there are two "notice" issues that Plaintiffs conflate. Presentment and notice of breach are separate. Presentment is a contractual obligation under the warranty, while the obligation of pre-suit notice of breach stems from *UCC § 2-607* as adopted in Illinois, Missouri, and Florida. With respect to presentment under the warranty, Plaintiffs argue that Ford Headquarters waived the requirement that Plaintiffs present their cars to the dealership for service by instructing all Ford dealers to let customers know Limp Mode is normal and to refer them to the Supplemental Owner's Guide for instructions on aftermarket coolers. The implication is that Ford Headquarters' message to all dealers was a form of anticipatory repudiation, which occurs when the obligor commits a voluntary and affirmative act that makes it "actually **[**29]** or apparently impossible for him to perform."

Restatement (Second) of Contracts § 250, cmt. c. However, this argument fails—Ford did not repudiate its obligations under the warranty.

It is clear that a service bulletin from Ford to its network of dealers that advises the dealers that Limp Mode is normal and refers customers to the owner's guide does not make it impossible for Ford to perform its obligation—in fact, it instructs dealers on *exactly how* to perform their obligation. Unfortunately for Plaintiffs, the dealers' performance of their obligation means turning customers away without a solution, but the Court will not excuse Plaintiffs' presentment under the warranty merely because that presentment would be futile. Thus, summary judgment is granted in favor of Ford on the breach of express warranty claims by Plaintiffs who did not present their vehicles to Ford for repair.

C. Plaintiffs Roberts, Hochsprung, Kowalchik, and Porter

Finally, Ford seeks summary judgment for the express and implied breach of warranty for three plaintiffs—Roberts (Missouri), Hochsprung (Illinois), and Kowalchik (Florida)—who failed to give pre-suit notice, and one plaintiff—Porter (Illinois)—who allegedly contacted a Ford *dealer* but not Ford Motor Company **[**30]** as is required by law. Under *Section 2-607 of the Uniform Commercial Code*, "the buyer must within a reasonable time after he discovers or should have discovered any breach notify the seller of breach or be barred from any remedy." Plaintiffs concede that Roberts, Hochsprung, and Kowalchik did not notify Ford that they considered Ford to have breached its warranty but argue that Ford waived the notice requirement. As noted above, Ford has not waived the notice requirement. Thus, Ford is granted summary judgment on Roberts, Hochsprung, and Kowalchik's express and implied warranty claims.

Summary judgment is also granted on Porter's express and implied breach of warranty claims even though ***HN9***[] Illinois law provides two exceptions to the notice requirement: "when (1) the seller has actual knowledge of the defect of the particular product or (2) the seller is deemed to have been reasonably notified by the filing of the buyer's complaint alleging breach of UCC warranty." *Connick v. Suzuki Motor Co., 174 Ill. 2d 482, 492, 675 N.E.2d 584, 221 Ill. Dec. 389 (1996)* (internal citation omitted). There is no doubt Ford had actual knowledge that Limp Mode occurred in the Base and Tech GT350's—Ford designed them that way. But the seller's "generalized knowledge about the safety concerns of third parties **[*1368]** is insufficient to fulfill plaintiffs' **[**31]** UCC notice requirement." *Id.* In other words, under Illinois law, the seller must be on notice that *this particular product* is troublesome rather than merely knowing that the Shelby GT350 Base and Tech models *in general* have had some Limp Mode issues. The Illinois Supreme Court cited Judge Learned Hand's interpretation of *§ 2-607*: "The notice of the breach required is **not** of the facts, which the seller presumably knows quite as well as, if not better than, the buyer, but of *buyer's claim* that they constitute a breach." *American Mf'g Co. v. United States Shipping Bd. Emergency Fleet Corp., 7 F.2d 565, 566 (2d Cir. 1925)* (emphasis in *Connick*). Even though Ford knew that Limp Mode existed in every car, Ford did not know that Porter wanted his car remedied. *See Anthony v. Country Life Mf'g, LLC., 70 Fed. Appx. 379, 383-84 (7th Cir. 2003)* (nutrition bar manufacturer did not have actual notice of plaintiff's claim that its bars contained substances not approved by the Food and Drug Administration, even though manufacturer was aware of ingredients in bars, because plaintiff failed to notify defendant of the claimed breach of implied warranty of merchantability prior to filing suit (citing *Connick*)).

Of course, any Plaintiff on whose state law warranty claims summary judgment was granted to Ford should also have their Magnuson-Moss Warranty Act claims dismissed because a valid **[**32]** state law claim is a prerequisite to the federal claim.

VIII. Unjust Enrichment

Ford argues Plaintiffs' unjust enrichment claims should be dismissed because 1) the parties' relationship is governed by an express contract and 2) because the Plaintiffs' have an adequate remedy at law. The Court denies summary judgment on these equitable claims and will deal with them at trial.

IX. Economic Loss Rule

Ford seeks summary judgment on the common law fraud claims under Missouri, Texas, and New Jersey law because Plaintiffs' claims are barred by the economic loss rule. ***HN10***[] Put simply, the economic loss rule precludes tort recovery for economic harms based on a duty arising from a contractual relationship. However, the rule slightly varies from state to state and there are certain exceptions.

The chief exception is that tort claims may survive the economic loss rule when the claim is for fraud, i.e., Plaintiff was harmed even before the contract was signed. Both parties agree on the law in Texas and New Jersey—when Defendant had no intention of performing its obligation under the contract, Plaintiffs' fraud claim survives the economic loss rule. *Formosa Plastics Corp. USA v. Presidio Engineers & Contractors, Inc., 960 S.W.2d 41 (Tex. 1998)*; *Bracco Diagnostics, Inc. v. Bergen Brunswig Drug Co., 226 F. Supp. 2d 557 (D.N.J. 2002)*. The parties dispute, however, whether Ford had any **[**33]** intention of performing the contract at the time it was made. There is clearly a factual dispute as to whether Ford knew that the Base and Tech package Shelby GT350's were Track Day capable. If Ford indeed knew that the lack of a cooler would be fatal to the track performance Plaintiffs expected, a fraud claim would be well-founded and it would survive the economic loss rule because Ford never intended to deliver the quality of car for which Plaintiffs signed up. Thus, summary judgment is denied on the Texas and New Jersey tort claims.

HN11[] Missouri law is more complicated. "A fraud claim *independent of the contract* is actionable, but it must be based upon a misrepresentation that was *outside of or collateral to the contract*, such as many claims of fraudulent inducement." **[*1369]** *AKA Distrib. Co. v. Whirlpool Corp., 137 F.3d 1083, 1086 (8th Cir. 1998)*. To decide whether a fraud claim is independent of a contract claim under the economic loss doctrine, a court should look at (1) whether the subject matter of the alleged misrepresentations was incorporated into the parties' contract and (2) whether the plaintiff suffered additional damages outside the contract as a result of the alleged fraud. *Compass Bank v. Eager Rd. Assocs., LLC, 922 F. Supp. 2d 818, 827 (E.D. Mo. 2013)*. Additionally, "the fraudulent inducement exception is subject to a widely **[**34]** recognized limitation that where the fraudulent misrepresentation concerns the quality, character, or safety of the goods sold, the economic loss doctrine bars the fraud claim because it is substantially redundant with warranty claims." *Flynn v. CTB, Inc., No. 1:12CV68 SNLJ, 2015 U.S. Dist. LEXIS 129976, 2015 WL 5692299 (E.D. Mo. Sept. 28, 2015)*.

Of course, the fraud here clearly concerns the quality of the goods sold. However, other Missouri courts have disagreed with the *Flynn* court. A Western District of Missouri judge held that something can be *both* concerning the quality of goods sold and necessarily separate from the contract because the conduct was *prior* to formation of the contract. *Patterson Oil Co. v. Verifone, Inc., No. 2:15-CV-4089, 2015 U.S. Dist. LEXIS 141635, 2015 WL 6149594, at *8 (W.D. Mo. Oct. 19, 2015)* ("Claims about the quality of goods sold may therefore fall within the fraudulent inducement exception if they are nevertheless independent of the contract formed."). A court in this district considered the Missouri economic loss rule in *Wilson v. Volkswagen Grp. of Am., Inc., No. 17-23033-CIV, 2018 U.S. Dist. LEXIS 164774, 2018 WL 4623539 (S.D. Fla. Sept. 26, 2018)* and agreed with the *Patterson Oil* court. There, he held that Plaintiffs' fraud claims could survive despite the *Flynn* case. However, the *Flynn* court better applies the principles articulated by the Eighth Circuit. In *Dannix Painting, LLC v. Sherwin-Williams Co., 732 F.3d 902 (8th Cir. 2013)*, the Eighth Circuit stated:

> Where there are well-developed contractual remedies, such as the remedies that the [U.C.C.] (in force in all U.S. states) provides **[**35]** for breach of warranty of the quality, fitness, or specifications of goods, there is no need to provide tort remedies for misrepresentation. The tort remedies would duplicate the contract remedies, adding unnecessary complexity to the law. Worse, the provision of these duplicative tort remedies would undermine contact law.

Dannix, 732 F.3d at 908. Here, the warranty claim would provide the exact same damages as the tort remedy, running afoul of the logic behind the "quality of goods" exception described above. An example of fraudulent inducement that would survive Missouri's economic loss rule may be if Ford told potential customers that Dale

Earnhardt Jr.'s favorite car was a Ford Mustang when that simply was not true. That claim does not concern the quality or safety of the car, but nonetheless may have enticed a buyer. However, because the fraud at issue here was about an alleged design defect covered by the warranty, the Court grants summary judgment to Ford on the Missouri fraud claims because they are barred by the state's economic loss rule.

X. Plaintiff Cruz's Standing

Plaintiff Cruz, who asserts Pennsylvania state law claims, filed for Chapter 7 bankruptcy in March 2017. On May 16, 2017 he joined this **[**36]** lawsuit. And on June 12, 2017 his debts were discharged. ***HN12***[] "A pre-petition cause of action is the property of the Chapter 7 bankruptcy estate, and only the trustee in bankruptcy has standing to pursue it." *Parker v. Wendy's Int'l, Inc., 365 F.3d 1268, 1272 (11th Cir. 2004)*. Failure to list an interest on a bankruptcy schedule leaves that interest in **[*1370]** the bankruptcy estate. *Id.* Ford argues that because Plaintiff Cruz did not list his claims against Ford, only the bankruptcy estate has standing to pursue those claims—not Mr. Cruz. Cruz argues that he only discovered that he had a claim *after* filing his bankruptcy petition.[3] Under Pennsylvania law, Cruz says, accrual of the statute of limitations may be tolled "when a plaintiff is unable, despite the exercise of due diligence, to know of the injury or its cause." *Mest v. Cabot Corp., 449 F.3d 502, 510 (3d Cir. 2006)* (cleaned up).

However, the Eleventh Circuit has explicitly separated the statute of limitations issue from accrual of the claim. ***HN13***[] "A cause of action can accrue for ownership purposes before the statute of limitations for that cause of action has begun to run." *In re Alvarez, 224 F.3d 1273, 1277 n.7 (11th Cir. 2000)* (quoting *State Farm Life Ins. Co. v. Swift (In re Swift), 129 F.3d 792, 798 (5th Cir. 1997)*).[4] Thus, even if the *statute of limitations* was tolled due to Cruz's debatable lack of knowledge, the claims still belonged to him at the time his bankruptcy petition were discharged. **[**37]** Summary judgment is granted to Ford on Plaintiff Cruz's claims. Because the Court grants summary judgment on all of Cruz's claims due to lack of standing, it does not address Ford's argument that Cruz cannot pursue his implied warranty claim under New York law because he was not in privity with Ford. Although, it appears Ford has the better argument there, too.

XI. Plaintiff Long—Time Bar

Ford argues Plaintiff Long's Oregon Unfair Trade Practices Act claim is time barred because it has a one-year statute of limitations, Long knew that his car was defective *before* he even took delivery in 2016 and did not file his claim until February 2018. Plaintiffs counter that 1) whether Long knew of the defect is a question for the jury and 2) even if he knew about it, his claim is timely under the relation back doctrine. As discussed above in the "subjective knowledge" section, there is not sufficient evidence to say there is no genuine dispute as to whether Long knew about Limp Mode before taking delivery/filing his suit. Thus, whether Long's claim is time-barred is a question best left for trial.

XII. Class Certification

Plaintiffs' seek to certify a *Rule 23(b)(3)* class that spans eleven states, has approximately **[**38]** 1,700 members, and values each of their damages at approximately $9,000. The certification dispute centers around predominance.

---

[3] Ford heavily disputes this and points to Cruz's testimony that he experienced Limp Mode in 2016.

[4] The Ninth Circuit has also distinguished claim accrual from the statute of limitations. *Goldstein v. Stahl (In re Goldstein), 526 B.R. 13, 21-22 (B.A.P. 9th Cir. 2015)* ("It is important, however, to distinguish principles of accrual from principles of discovery and tolling, which may cause the statute of limitations to begin to run after accrual has occurred for purposes of ownership in a bankruptcy proceeding.") (internal citation omitted).

It is clear (and Ford even concedes) that the *Rule 23(a)* factors are met here. But Ford argues that common questions do not predominate over individual ones, and thus, certification under *23(b)(3)* must be denied.

First, an overview of how the Plaintiffs propose the class should be structured. The Plaintiffs propose three alternatives class structures.

1) **Individual State Classes**: 11 classes comprised of California, Florida, Illinois, Missouri, New Jersey, New York, Oregon, Pennsylvania, Tennessee, Texas, and Washington residents.

[*1371] 2) **Bellwether State Classes**: California, Florida, and Missouri Classes would go to trial as a bellwether.

3) **State Law Groupings**: The Plaintiffs would break the classes into types of law—Consumer Protection, Fraudulent Concealment (common law), Implied Warranty, Unjust Enrichment Classes. Then, there would be three or four subclasses under each class to account for the variations in state law.

a. For example, the Plaintiffs propose splitting the "Consumer Protection Acts" class into (i) the Unfair and Deceptive Conduct Consumer Protection class to pursue **[**39]** claims under statutes that prohibit unfair/deceptive conduct—nine states (ii) Omissions Consumer Protection class to pursue claims under statutes that prohibit omissions of material fact—two states (iii) and Unconscionable Acts or Practices Consumer Protection class that prohibits unconscionable conduct—two states.

Even though having eleven proposed state law classes within a single class action is unusual, it is the superior method among those Plaintiff proposes. Eleven different classes within one case looks more like a Multi-District Litigation than a standard class action—indeed, most class actions certify at most, three or four different state law classes. Of course, the Plaintiffs structured their class this way to avoid the choice of law issues concomitant with a proposed *nationwide* class (an issue that would almost certainly defeat predominance). Typically, manageability is a concern when there are variations in state law *within* a class, but here, the Plaintiffs have made the classes small enough that the law that applies to each class is uniform. But there still may be manageability problems at a hypothetical trial.

As explained more fully below, only *some* state classes are **[**40]** right for certification. Further, only *some* categories of claims can be certified—namely the common law and statutory fraud claims, whereas the warranty and unjust enrichment claims will be swamped by individual questions. Thus, the Court believes a potential trial with multiple verdict forms that tick through the elements of the nine certified state class' statutory and common law fraud claims is manageable.

A. Choice of Law

Before discussing the specifics of *Rule 23*, the Court must clarify the choice of law issues presented in the parties' class certification briefing. The Plaintiffs define their state law classes as "All persons in the State of XYZ who purchased a Class Vehicle from a Ford-authorized dealer or distributor." That is both a little too vague and incorrect as a matter of law. As Defendant points out, Florida's choice of law rules require that Plaintiffs' claims are governed by the laws of the states where the vehicles were purchased, not where the owners ride. *In re: Takata Airbag Prod. Liab. Litig., No. 14-24009-CV, 2016 U.S. Dist. LEXIS 142864, 2016 WL 6072406 (S.D. Fla. Oct. 14, 2016)*. Plaintiffs argue that this case is factually distinct and the law of the state where the Plaintiff resides governs. The Court disagrees. As it noted in *In re: Takata*, ***HN14***[] in Florida, absent special circumstances, the state **[**41]** where the injury occurred would . . . be the decisive consideration in determining the applicable choice of law. *Pysca Panama, S.A. v. Tensar Earth Techs., Inc., 625 F. Supp. 2d 1198, 1220 (S.D. Fla. 2008)* (cleaned up). And again, as the Court has previously ruled, the injury occurs where the car is sold.

Plaintiffs understand this choice of law decision leaves them without named class **[*1372]** representatives in New Jersey and Pennsylvania—they ask the Court to substitute other class members as representatives. Although the Court has the power to do so, it declines to exercise that power at this stage in a case originally filed in 2017.

B. *Rule 23(a)*

HN15[] A plaintiff seeking to represent a proposed class must establish that the proposed class is adequately defined and clearly ascertainable. *Little v. T—Mobile USA, Inc., 691 F.3d 1302, 1304 (11th Cir. 2012)*. The Court finds the classes are clearly defined and it is administratively simple to identify class members thanks to Ford's recordkeeping. *HN16*[] Parties seeking class action certification must also satisfy the four requirements of *Federal Rule of Civil Procedure 23(a)*, commonly referred to as numerosity, commonality, typicality, and adequacy of representation. *Amchem Prods., Inc. v. Windsor, 521 U.S. 591, 117 S. Ct. 2231, 138 L. Ed. 2d 689 (1997)*. Parties moving for class certification bear the burden of establishing each element of *Rule 23(a)*. *London v. Wal—Mart Stores, 340 F.3d 1246, 1253 (11th Cir. 2003)*. If the party seeking class certification fails to demonstrate any requirement, the case may not continue **[**42]** as a class action. *Jones v. Roy, 202 F.R.D. 658, 662 (M.D. Ala. 2001)*. Specifically, the four requirements of *Rule 23(a)* are: (1) the class is so numerous that joinder of all members is impracticable; (2) there are questions of law or fact common to the class; (3) the claims or defenses of the representative parties are typical of the claims or defenses of the class; and (4) the representative parties will fairly and adequately protect the interests of the class. *Fed. R. Civ. P. 23(a)*.

As mentioned in this Order's introduction, the Court tweaks the class definition Plaintiffs propose. *Fed. R. Civ. P. 23(c)(1)(B)* ("An order that certifies a class action must define the class and the class claims, issues, or defenses, and must appoint class counsel under *Rule 23(g)*."). To restate, the class shall be defined as "All persons who purchased a Class Vehicle from a Ford-authorized dealer or distributor located in [insert state here] before April 1, 2016." The Court understands that, after its choice of law and class certification holdings in this Order, class counsel may need an opportunity to amend its named plaintiffs in order to substitute in the proper parties. To the extent Plaintiffs make such a request (*not* a request to add *new* named plaintiffs), it will be granted.

1. Numerosity

Plaintiffs claim that **[**43]** there are 1,668 class vehicles. Granted, the Court does not ultimately certify all states, but surely over 1,000 putative plaintiffs satisfies the Eleventh Circuit's rule that "generally less than twenty-one [class members] is inadequate, more than forty adequate, with numbers between varying according to other factors." *Cox v. Am. Cast Iron Pipe Co., 784 F.2d 1546, 1553 (11th Cir. 1986)* (alteration added) (citing 3B Moore's Federal Practice ¶ 23.05[1] at n.7 (1978)).

2. Commonality

HN17[] For purposes of [commonality], "even a single common question will do." *Carriuolo v. Gen. Motors Co., 823 F.3d 977 (11th Cir. 2016)* (citing *Wal—Mart Stores, Inc. v. Dukes, 564 U.S. 338, 131 S. Ct. 2541, 180 L. Ed. 2d 374 (2011)*). A question is common if answering it resolves "an issue that is central to the validity of each one of the claims in one stroke." *Wal-Mart Stores, Inc., 564 U.S. at 350*. Surely commonality is satisfied. For example, if the answer to the common question "was Ford's advertising mere puffery?" is "yes", all of Plaintiffs' fraud claims will fail.

[*1373] 3. Typicality

HN18[] The typicality test is not demanding. *In re Checking Acct. Overdraft Litig., 307 F.R.D. 630, 642 (S.D. Fla. 2015)*. Typicality requires that "the claims or defenses of the representative parties are typical of the claims or defenses of the class." *Fed. R. Civ. P. 23(a)(3)*. The typicality test centers on "whether other members have the same or similar injury, whether the action is based on conduct which is not unique to the named class plaintiffs, and whether other class members have been injured by the same **[**44]** course of conduct." *Hanon v. Dataprods. Corp., 976 F.2d 497, 508 (9th Cir. 1992)*. Although similar to commonality in that it concentrates on the "nexus" between class members and their designated representative, typicality differs from commonality in that it focuses on the class representative's individual characteristics in comparison to those of the proposed class. *Piazza v. EBSCO Indus. Co., 273 F.3d 1341, 1346 (11th Cir. 2001)*; *Prado—Steiman v. Bush, 221 F.3d 1266, 1269 (11th Cir. 2000)*. Typicality is satisfied where the named plaintiffs' claims "arise from the same event or pattern or practice and are based on the same legal theory" as the claims of the class. *Kornberg v. Carnival Cruise Lines, Inc., 741 F.2d 1332, 1337 (11th Cir. 1984)*, *cert. denied*, *470 U.S. 1004, 105 S. Ct. 1357, 84 L. Ed. 2d 379 (1985)*.

Here, class representatives and absent class members complain of the same injury allegedly caused by the same course of conduct by Ford. Ford's only specific typicality objection is to Plaintiff Cruz, on whose claims the Court has already granted summary judgment to Ford. Ford's general objection that its unique defenses against some named plaintiffs is insufficient to defeat typicality, particularly when all named plaintiffs' "claims share the same essential characteristics as the claims of the class at large." *Bruhl v. Price Waterhousecoopers Int'l, 257 F.R.D. 684, 690 (S.D. Fla. 2008)* (Marra, J.). Ford's arguments are better directed at the adequacy and predominance tests.

4. Adequate Representation

HN19[] The purpose of the adequacy requirement is to "protect the **[**45]** legal rights of absent class members." *Lyons v. Georgia—Pacific Corp. Salaried Employees Ret. Plan, 221 F.3d 1235, 1253 (11th Cir. 2000)*. Adequacy of representation is primarily based on "the forthrightness and vigor with which the representative party can be expected to assert and defend the interests of the . . . class" and "whether plaintiffs have interests antagonistic to those of the rest of the class." *Kirkpatrick v. J.C. Bradford & Co., 827 F.2d 718, 726 (11th Cir. 1987)*. This inquiry requires the Court to consider both whether there are any inter-class conflicts and whether class counsel and named plaintiffs will prosecute the case with zeal. *Valley Drug Co. v. Geneva Pharm., Inc., 350 F.3d 1181 (11th Cir. 2003)*.

First, this case does not present classic concerns about inter-class conflicts that threaten the absent class members' right to adequate representation. Unlike in *Amchem Products, Inc. v. Windsor, 521 U.S. 591, 117 S. Ct. 2231, 138 L. Ed. 2d 689 (1997)* or *Ortiz v. Fibreboard Corp., 527 U.S. 815, 119 S. Ct. 2295, 144 L. Ed. 2d 715 (1999)*, all class members would be entitled to the same recovery if they prevail on their substantive claims. No one class member is harmed by the success of another. *In re Nat'l Football League Players Concussion Inj. Litig., 821 F.3d 410 (3d Cir. 2016)*, *as amended* (May 2, 2016) (finding no fundamental conflicts of interest in *Rule 23(b)(3)* class where structural protections helped to align interests of present and future claimants). No such structural provisions are necessary here, where **[*1374]** all class members share the interest of maximizing present monetary recovery. *See* *Tefel v. Reno, 972 F. Supp. 608, 617 (S.D. Fla. 1997)* ("If the Plaintiffs succeed, the benefits will inure to all class members. **[**46]** Where the named plaintiffs in a class action are seeking the same type of relief for themselves as they seek for class members, the adequacy of representation requirement of *Rule 23(a)(4) of the Federal Rules of civil Procedure* is satisfied."). Nor is this a case where some particularly high-dollar claims are being diluted by virtue of being lumped in with less valuable ones. Indeed, if not for class certification, it is likely that no plaintiff would find it economically viable to pursue a claim. Second, Ford raises no issue nor does the Court believe there to be any issue with class counsel's ability to represent the class.

Finally, Ford also rests a portion of its adequacy argument on the possibility their unique defenses against class representatives forcing those representatives to devote significant energy and resources on their own cases at the expense of the class as a whole. *Ross v. Bank S., N.A., 837 F.2d 980 (11th Cir.)*, *reh'g granted and opinion vacated sub nom.* *Ross v. Bank S., N.A. (Three Cases), 848 F.2d 1132 (11th Cir. 1988)*, and *on reh'g*, *885 F.2d 723 (11th Cir. 1989)* ("The existence of even an arguable defense can vitiate the adequacy of representation if it will distract the named plaintiff's attention from the issues common to the class."). Although Ford's point is well-taken, it does not defeat adequacy of representation for a few reasons. First, *Ross* and **[**47]** its progeny are securities fraud cases. These cases are unique in the sense that often (particularly after the passage of the Private Securities Litigation Reform Act of 1995) the named plaintiff is a large institutional investor that could have some of its other business interests threatened by a large recovery against the defendant against whom it is litigating. Second, the "unique defense," here, reliance and knowledge, is so central to all class members' claims that the time and resources named plaintiffs spend on the issue would actually help prove all class members' case.[5] As shown in the

[5] In some cases where the Court found unique defenses defeated adequate representation, the defenses were unrelated to the merits of the case. *See, e.g.*, *Kline v. Wolf, 88 F.R.D. 696, 699-700 (S.D.N.Y.1981)* (finding that named plaintiff's claim was atypical because of a credibility problem).

parties' briefing papers, Plaintiffs argue that, based on Ford's advertisements and disclosures (or lack thereof), it was actually impossible for any class member to have known the truth. That argument—if true—benefits all class members. Lastly, the Court is reluctant to decline to certify a class on the basis of "unique defenses" when the Court, earlier in this opinion, thoroughly considered and decided not to grant the Defendant summary judgment on the basis of those same defenses. It would be a perverse result to dash all class members' chances of recovery in the name of protecting them from **[**48]** a highly uncertain threat.

C. *Rule 23(b)(3)*

HN20[] In addition to meeting the four requirements of *Rule 23(a)*, parties seeking class certification must prove that the action is maintainable under one of the three subsections of *Rule 23(b)*. *Amchem Prods., 521 U.S. at 614*. Plaintiffs seek class certification under *Rule 23(b)(3)*, which is appropriate when (1) "questions of law or fact common to the members of the class predominate over any questions affecting only individuals members," and when (2) "a class action is superior to other available methods for fairly and efficiently adjudicating the controversy." *Fed. R. Civ. P. 23(b)(3)*.

[*1375] 1. Predominance

HN21[] *Rule 23(b)(3)*'s predominance requirement is "more demanding" than the commonality requirement of *Rule 23(a)*. *See* *Comcast Corp. v. Behrend, 569 U.S. 27, 34, 133 S. Ct. 1426, 185 L. Ed. 2d 515 (2013)*. It "tests whether proposed classes are sufficiently cohesive to warrant adjudication by representation," *Amchem, 521 U.S. at 623*, by "ask[ing] whether the common, aggregation-enabling, issues in the case are more prevalent or important than the non-common, aggregation-defeating, individual issues." *Tyson Foods, Inc. v. Bouaphakeo, 577 U.S. 442, 453, 136 S. Ct. 1036, 194 L. Ed. 2d 124 (2016)*. Thus, the predominance inquiry

> calls upon courts to give careful scrutiny to the relation between common and individual questions in a case. An individual question is one where "members of a proposed class will need to present evidence that varies from member to member," while **[**49]** a common question is one where "the same evidence will suffice for each member to make a prima facie showing [or] the issue is susceptible to generalized, class-wide proof."

Id. (quoting 2 Newberg on Class Actions § 4:50 at 196-97 (5th ed. 2012)). "When one or more of the central issues in the action are common to the class and can be said to predominate, the action may be considered proper under *Rule 23(b)(3)* even though other important matters will have to be tried separately, such as damages or some affirmative defenses peculiar to individual class members. . . ." *Id.* (quoting 7AA C. Wright, A. Miller, & M. Kane, Federal Practice and Procedure § 1778, pp. 123-124 (3d ed. 2005) (footnotes omitted)).

Here, the individual issue of each class member's knowledge of the truth about his car threatens to swamp the common questions about Ford's conduct. Ford argues that at least 6 of the 19 named plaintiffs subjectively knew the truth about the GT 350's—namely, that they could not perform on the track like Ford advertised that they could. As a result, Ford says, Plaintiffs cannot maintain a successful statutory or common law fraud claim. How could a buyer have "relied" on the misrepresentation or how could **[**50]** the misrepresentation have "caused" damages when the Plaintiff bought the car *despite* knowing the truth? Thus, the question is: What is the implication of an "actual, subjective knowledge" defense on the predominance of common issues?

Plaintiffs have two responses: First, that knowledge is irrelevant. They say that materiality, reliance, and causation, three elements of some of the statutory consumer protection and fraudulent concealment claims, can be proven on a class wide basis with reference to an objective consumer standard. Plaintiffs cite case law that shows, in some states, that a Plaintiff can prove those elements in their case-in-chief with reference to an "objective consumer." In this sense, common issues predominate because "the addition or subtraction of any of the plaintiffs to or from the class [does not] have a substantial effect on the substance or quantity of evidence offered." *Klay v. Humana, Inc., 382 F.3d 1241, 1255 (11th Cir. 2004)*. Plaintiffs do not have to affirmatively prove the *absence* of their knowledge of the truth about the cars as an element of their causes of action. In fact, the Eleventh Circuit held in *Klay* that, in certain cases, circumstantial evidence common to the entire class could be used to prove reliance. **[**51]** *Id. at 1259*; *see* *Rowe v. Bankers Life & Cas. Co., No. 09-CV-491, 2012 U.S. Dist. LEXIS 43198, 2012 WL 1068754 at *10-12 (N.D. Ill. Mar. 29, 2012)* (collecting cases courts were willing to infer reliance and causation on a class-wide basis). In other words, if the reasonable consumer would have relied on Ford's representations and omissions, Plaintiffs can still succeed even if *this particular class member* did not.

[*1376] And second, Plaintiffs also argue that the classes should be certified because it was factually impossible for a plaintiff to have known the truth about the Base and Tech package cars, rendering reliance and causation a non-issue. The deposition excerpts Ford highlights in its summary judgment briefing show that some named Plaintiffs knew there were differences between the various GT350 trim levels. Plaintiff Kowalchik testified that he always planned to add after-market coolers and that he was a "gearhead." Some others noted they had seen YouTube videos or read Internet forums about a Limp Mode rumor. But those excerpts do *not* show two things: First, that the Plaintiffs knew that the lack of coolers specifically meant the Base and Tech GT350's were incapable of Track Days, and second, that any of the additional information Plaintiffs knew came from Ford itself. This is a crucial point—although Ford shows that **[**52]** the disclaimers about the Base and Tech GT350's Track Day performance were available in the Supplemental Owner's Guide and that the Guide was available in the glovebox upon delivery, Ford is unable to point to any record evidence that convinces the Court it was available *prior to purchase*. Ford claims the Guide was available online, but as Plaintiffs note, Ford gives no specifics about *when* the document was posted and not one of the 25 named Plaintiffs referenced the Guide in their deposition testimony. This means class members could not have learned the truth—from Ford—until sometime in April 2016. Whether their knowledge was sufficient to conclude they knew their cars could not complete a Track Day without entering Limp Mode is a jury question, but surely a reasonable consumer cannot have been expected to search the Internet for unverified reports of problems she did not know existed. *Falk v. Gen. Motors Corp., 496 F. Supp. 2d 1088, 1097 (N.D. Cal. 2007)* ("But GM is alleged to have *known* a lot more about the defective speedometers, including information unavailable to the public. Many customers would not have performed an Internet search before beginning a car search. Nor were they required to do so.").

Case law from federal courts from across the country **[**53]** demonstrate that a presumption of causation and reliance is only appropriate in some states and in some fact patterns. One such case is when a Defendant's representations to the entire class were uniform. However, after Judge Dow in *Row v. Bankers Life & Cas. Co.*, cited above, noted that class-wide proof could be used for causation and reliance in such a scenario, he explained the limitations of that approach when "there is more than one logical explanation for the plaintiff's participation in the transaction or conduct at issue." *2012 U.S. Dist. LEXIS 43198, [WL] at *11* (internal quotations and citation omitted). Another Northern District of Illinois Court aptly illustrated the different scenarios. In Scenario A, a court allowed class-wide proof of reliance when it certified a class of plaintiffs who claimed they were misled by a volleyball club when they purchased lessons from the club because the club did not disclose its owner had been accused of rape and sexual abuse. *Mullen v. GLV, Inc., 330 F.R.D. 155 (N.D. Ill. 2019)*. In Scenario B, a court held plaintiffs could *not* use class-wide proof of reliance when de-certifying a class that claimed they were misled by Coca-Cola because the corporation did not disclose that its fountain diet coke had more artificial ingredients **[**54]** than its bottled diet coke. *Oshana v. Coca-Cola Co., 472 F.3d 506 (7th Cir. 2006)*. Common-sense makes all the difference, the *Mullen* court held. Reasonable parents would not knowingly send their child to camp with an adult who had a history of rape and abuse. On the other hand, a reasonable consumer may well purchase one product over another despite a misleading **[*1377]** advertisement, whether because of a difference in taste, price, or other considerations. *Mullen, 330 F.R.D. at 166*.

Even though common sense dictates this case is more akin to Scenario B because Plaintiffs could have purchased their GT350 for myriad reasons including, for example, in Plaintiff Kamperman's case, "because I was not going to need a car that required the capability to run for extended periods of time at high speeds,"[6] it is also true that Ford's representations to Plaintiffs were uniform and the evidence appears to show that no class member could possibly have known from Ford that the car was ill-equipped to complete a Track Day. In this particular predominance

[6] Plaintiffs cite Ford's expert Dr. Nauhaus for the statistic that 70% of "performance enthusiasts" at the time of purchase intended to use their vehicle for road course track days

inquiry, the Court finds that the more relevant considerations are Ford's uniform course of conduct and the dearth of evidence pointing to individual reliance issues that stem from Ford's communications. To the extent such individual **[**55]** issues appear later in the litigation, the Court can resolve them then. *In re Linerboard Antitrust Litig., 305 F.3d 145 (3d Cir. 2002)* ("Many courts faced with similar circumstances have certified class status with the expectation that individual questions concerning fraudulent concealment can be resolved at a later damages phase.").

The Court is also cognizant that, beyond the Plaintiffs' challenge in proving their case-in-chief, Ford will also present affirmative defenses that may be unique to each class member. Ford will seek to introduce deposition testimony of the Plaintiff who said, for example, "I was starting to learn about the car not performing as I expected." *See Sacred Heart Health Sys., Inc. v. Humana Mil. Healthcare Servs., Inc., 601 F.3d 1159, 1170 (11th Cir. 2010)* ("If the defendant has non-frivolous defenses to liability that are unique to individual class members, any common questions may well be submerged by individual ones. This principle emerges clearly from our case law and that of other circuits."). ***HN22***[] Individual issues are a threat to predominance even when they come up in affirmative defenses. *Id. at 1177*. ("The risk of voluminous and individualized extrinsic proof runs particularly high where a defendant raises substantial affirmative defenses to breach."). But of course, in close cases like this one, there is Eleventh Circuit precedent **[**56]** that points in the opposite direction. "The general rule, regularly repeated by courts in many circuits, is that courts traditionally have been reluctant to deny class action status under *Rule 23(b)(3)* simply because affirmative defenses may be available against individual members." *Brown v. Electrolux Home Prod., Inc., 817 F.3d 1225, 1240 (11th Cir. 2016)* (cleaned up). These competing authorities highlight that class certification in the face of affirmative defenses is a matter of degree—and here, the individual affirmative defense of a lack of reliance is not significant or complex enough to defeat predominance in the face of the Defendant's common course of conduct. This case is more like *Brown* than *Sacred Heart Health Sys.* —in the latter case, the contracts between Plaintiffs and Defendant were materially different. *Sacred Heart Health Sys., Inc., 601 F.3d at 1171*. The Court estimated there were approximately 33 unique variations. In other words, neither the Plaintiffs' nor Defendants' conduct was common. *Brown*, on the other hand, involved a consumer product—a washing machine—that was uniformly marketed and sold to Plaintiffs. In holding that the affirmative defense of misuse did not necessarily defeat predominance in the class' warranty claims, Chief Judge Pryor wrote that affirmative defenses on narrow **[*1378]** issues **[**57]** such as misuse (or, in this case, a plaintiff's knowledge) are often easy to resolve and district courts have several tools to manage them. *Brown, 817 F.3d at 1241*.

2. Predominance and Damages

HN23[] Finally, *Rule 23(b)(3)* also requires that any model supporting a plaintiff's damages be consistent with its theory of liability. *Comcast Corp. v. Behrend, 569 U.S. 27, 35, 133 S. Ct. 1426, 185 L. Ed. 2d 515 (2013)*. In short, this requirement ensures that the damages are capable of determination via classwide proof—just like the theory of liability. *Id.* Here, Plaintiffs rely on their expert, Ted Stockton, to propose that class members should recover $8,982.99—a "market-based measure of what would be required to restore the consumer to the originally negotiated state of utility." Pl. Mot. for Class Certification at 43. Stockton arrives at this number, roughly, by estimating the cost of adding the necessary coolers to the Base and Tech GT350's. Defendant seizes on Plaintiffs' description of these damages as a "benefit of the bargain" theory and argues not all of the statutory and common law fraud laws in the various states in which the Plaintiffs seek certification provide for recovery under such a theory. Florida's statutory fraud law permits recovery under either benefit of the bargain theory of for "out-of-pocket" **[**58]** damages, for instance, but the other states, such as California, permit only out-of-pocket damages. *Pulaski & Middleman, LLC v. Google, Inc., 802 F.3d 979, 983 (9th Cir. 2015)*. Out-of-pocket damages measure the difference between what a plaintiff paid and what the plaintiff would have paid but for the misconduct. And as noted above, benefit of the bargain damages measure the difference between what a plaintiff received and the market value of the product if it performed as promised.

Translated from legalese to the facts of this case, recovery on a benefit of the bargain theory means the class members recover the difference between the value of the car as-is and the market value of a Base or Tech GT350 that could complete a Track Day without Limp Mode; recovery on an out of pocket theory means the class members recover the difference between what they paid for their cars and what they would have paid had they known they would enter Limp Mode when attempting to complete a Track Day. According to Ford, the mismatch between the various bases for liability and what they describe as the Plaintiffs' 'benefit of the bargain' damages theory is fatal to class certification under *Comcast Corp.*

But it is unclear whether the *Comcast* Court's specific concerns apply outside **[**59]** of the antitrust context. ***HN24***[] Surely it is universally true in *23(b)(3)* class actions that damages must be susceptible to classwide measurement such that individual issues do not predominate over common questions. *Comcast, 569 U.S. at 35*. But some courts have limited *Comcast* to "where multiple theories of liability exist, those theories create separable anticompetitive effects, and the combined effects can result in aggregated damages." *In re VHS of Michigan, Inc., 601 F. App'x 342, 344 (6th Cir. 2015)*. "Where there is no chance of aggregated damages attributable to rejected liability theories, the Supreme Court's concerns do not apply." *Id.*; *see also* *Comcast Corp. v. Behrend, 569 U.S. 27, 42-43, 133 S. Ct. 1426, 185 L. Ed. 2d 515 (2013)* ("The Court's ruling is good for this day and case only. In the mine run of cases, it remains the "black letter rule" that a class may obtain certification under *Rule 23(b)(3)* when liability questions common to the class predominate over damages questions unique to class members.") (Ginsburg and Breyer, JJ., dissenting).

Defendants rightly point out multiple legal theories of liability exist here, but **[*1379]** those multiple theories of liability do not create "separable effects" that, when combined, result in aggregated damages. In *Comcast*, the Plaintiffs' damages were not consistent with their theory of liability because substantive ***antitrust law*** requires **[**60]** that a "private plaintiff identify the economic rationale for a business practice's illegality under the antitrust laws and show that its harm flows from whatever it is that makes the practice unlawful." 2A P. Areeda, H. Hovenkamp, R. Blair, & C. Durrance, ***Antitrust Law*** ¶ 391a, p. 320 (3d ed. 2007). In other words, ***antitrust law*** requires a plaintiff to specifically explain which effect of a defendant's conduct makes the conduct unlawful and calculate the damages attributable only to that isolated impact. The fraud laws at issue in this class action impose no such requirement. Although different *types* of damages are available for violations of Florida's fraud laws versus California's fraud laws, the harm that the plaintiffs suffer due to violations of those different laws is the same—Ford's alleged fraud caused them to overpay for their vehicles. On the other hand, again, the harm suffered by antitrust plaintiffs by each different antitrust impact is *legally separable and distinct* and requires a damages calculation tied to its theory of liability. Thus, because the Plaintiffs suffer the same harm because of the violation of any state's fraud law, Mr. Stockton's damages model is sufficiently **[**61]** connected to the Plaintiffs' theories of liability. The model calculates how much a class member "overpaid" for his vehicle due to Ford's misrepresentations and omissions, it "is the translation of the *legal theory of the harmful event* into an analysis of the economic impact *of that event*," and thus satisfies *Rule 23(b)*. *Comcast, 569 U.S. at 38*.

Even if *Comcast*'s concerns apply here, Plaintiffs meet its test because Stockton's calculation matches *both* theories of liability. If one had to devise a damages model for either of those theories of liability independently, Stockton's model would be applicable to the class a whole and would accurately measure either benefit of the bargain or out of pocket damages.

Thus, if the Court is going to deny Ford summary judgment on whether their advertising was misleading and agrees with Plaintiffs that the advertising was uniformly targeted to all putative class members, then it would be logically inconsistent to deny certification on the grounds that Plaintiffs may not use class-wide proof to win a presumption of reliance and causation. The Court will certify the state classes where state law does not prohibit such a presumption, discussed in more detail below.

3. Superiority

The predominance **[**62]** inquiry narrowly tilts in favor of certification and the superiority analysis helps push it over the edge. ***HN25***[] There are four non-exhaustive factors a court should consider in assessing whether a class action is superior to individual litigation: (A) the interest of members of the class in individually controlling the prosecution or defense of separate actions; (B) the extent and nature of any litigation concerning the controversy already commenced by or against members of the class; (C) the desirability or undesirability of concentrating the litigation of the claims in the particular forum; [and] (D) the difficulties likely to be encountered in the management of a class action. *Klay, 382 F.3d at 1269* (citing *Fed. R. Civ. P. 23(b)(3)*).

Even if some class members have slightly stronger claims than others (perhaps because it is crystal clear that they relied on no source other than Ford's representations), their interest in going it alone is outweighed by the fact that their recovery of at most $9,000 will be dwarfed **[*1380]** by their litigation costs. Relatedly, no class members are currently going it alone so the second factor is satisfied as well. And further, Plaintiffs correctly point out that it is desirable to concentrate the litigation **[**63]** in this Court due to the Court's familiarity with the factual and legal issues—this would conserve judicial as well as litigant resources such that the claims can be resolved on the merits rather than devolving into a war of attrition. *See* *Carriuolo v. Gen. Motors Co., 823 F.3d 977, 989 (11th Cir. 2016)*. Finally, as noted above, manageability is a concern due to numerous state law classes and the possibility of individual affirmative defenses. However, "[t]his concern will rarely, if ever, be in itself sufficient to prevent certification of a class." *Klay, 382 F.3d at 1272*. If these potential manageability issues worsen and eventually threaten to derail the case, the Court always has the option to exercise its powers under *Fed. R. Civ. P. Rule 23(d)(1)*. ***HN26***[] The class action device exists "to overcome the problem that small recoveries do not provide the incentive for any individual to bring a solo action prosecuting his or her rights." *Amchem Prods., Inc. v. Windsor, 521 U.S. 591, 117 S. Ct. 2231, 138 L. Ed. 2d 689 (1997)* (cleaned up). And because those solo actions may also seem de minimis to a regulator, the class action also serves to deter or discipline bad actors where there would otherwise be no government intervention. *See generally* Brian T. Fitzpatrick, The Conservative Case for Class Actions (2019).

D. State-by-State Decisions on Certification

Now the Court turns to a state-by-state **[**64]** analysis (both statutory and common law) to determine which state classes can be certified.

1. California

A California class can be certified for both statutory and common law fraud claims because state law does not require an individualized showing of reliance in either case. *Daniel v. Ford Motor Co., 806 F.3d 1217, 1225 (9th Cir. 2015)*; *Anderson v. Apple Inc., 500 F. Supp. 3d 993 (N.D. Cal. 2020)* (holding that a Court may assume reliance when the alleged omission is "plausibly material"); *Tietsworth v. Sears, 720 F. Supp. 2d 1123, 1147 (N.D. Cal. 2010)* ("Courts have recognized that this element, which is often phrased in terms of reliance or causation, may be presumed in the case of a material fraudulent omission.") (internal citation and quotations omitted).

2. Florida

A Florida class can be certified on the Florida Deceptive and Unfair Trade Practices claim, but not on the Florida common law claims. *Carriuolo v. Gen. Motors Co., 823 F.3d 977, 983 (11th Cir. 2016)* (holding a similar class can be certified under Florida Deceptive and Unfair Trade Practices Act). However, Plaintiffs' Florida common claims should be dismissed under the economic loss rule. Even though Defendant did not make this argument in its summary judgment motion, it is clearly governed by this Court's previous decisions. *Cardenas v. Toyota Motor Corp., 418 F. Supp. 3d 1090 (S.D. Fla. 2019)* (dismissing fraudulent concealment claims under Florida economic loss rule); *In re Takata Airbag Prod, Liab. Litig., 193 F. Supp. 3d 1324 (S.D. Fla. 2016)* (same).

3. Illinois

An Illinois class can be certified for both **[**65]** statutory and common law fraud claims. *Cannon v. Nationwide Acceptance Corp., No. 96 C 1136, 1997 U.S. Dist. LEXIS 20019, 1997 WL 779086, at *3 (N.D. Ill. Dec. 12, 1997)* ("Individual reliance need not be shown for claims brought under Racketeer Influenced and Corrupt Organizations Act **[*1381]** and the Illinois Consumer Fraud Act."). *See supra*.

4. Missouri

Defendants are entitled to summary judgment on Plaintiff's Missouri common law claims due to the Economic Loss rule. However, a Missouri Merchandising Practices Act class can be certified. *Glen v. Fairway Indep. Mortg. Corp., 265 F.R.D. 474, 481 (E.D. Mo. 2010)*, *order clarified*, *No. 4:08CV730 RWS, 2010 U.S. Dist. LEXIS 20660, 2010 WL*

891621 (E.D. Mo. Mar. 8, 2010) ("Because the class claim is based upon a promise given to all putative class members in a form contract and can be proven with common evidence, individualized inquires are not necessary and do not defeat class certification.").

5. New Jersey

Pursuant to the Court's choice of law analysis, the New Jersey class has no named plaintiff and therefore cannot be certified.

6. New York

A New York class can be certified for both statutory and common law fraud claims. Defendants concede that New York's consumer fraud statute does not require proof of individual reliance. *See* *Pelman v. McDonald's Corp., 396 F.3d 508, 511 (2d Cir. 2005)* ("A private action brought under § 349 does not require proof of actual reliance"). And although reliance is an element of fraudulent concealment under New York law, it does not defeat predominance. *In re NASDAQ Mkt.-Makers Antitrust Litig., 169 F.R.D. 493, 520 (S.D.N.Y. 1996)* ("Courts have overwhelmingly held that, even when the issue **[**66]** of fraudulent concealment involves both common and individual questions, the common question of whether Defendants successfully concealed the existence of the alleged conspiracy predominates over any individual questions regarding the knowledge or diligence of individual plaintiffs.").

7. Oregon

Plaintiffs do not seek a statutory class, but a common law fraud class can be certified. *Wieber v. FedEx Ground Package Sys., Inc., 231 Ore. App. 469, 220 P.3d 68, 78 (Ore. 2009)* ("Direct evidence of reliance in support of a fraud claim is not required; a plaintiff may prevail on a showing that a reasonable inference of reliance can be drawn from the facts in evidence.").

8. Pennsylvania

No class can be certified under Pennsylvania law because there is no named Plaintiff. All of Plaintiff Cruz's were dismissed for lack of standing.

9. Tennessee

The named Plaintiff can bring his statutory claim, but not on behalf of the class. *Cardenas v. Toyota Motor Corp., 418 F. Supp. 3d 1090 (S.D. Fla. 2019)*. However, a fraudulent concealment class can be certified. *Bearden v. Honeywell Int'l Inc., 720 F. Supp. 2d 932 (M.D. Tenn. 2010)* (holding that the mere possibility, without further evidence, of individual reliance issues will not defeat predominance).

10. Texas

Plaintiffs do not seek a common law class, and although reliance is an element of the statutory claim, "[t]his does not mean, of course, that reliance or other elements of **[**67]** their causes of action cannot be proved class-wide with evidence generally applicable to all class members; class-wide proof is possible when class-wide evidence exists. *Henry Schein, Inc. v. Stromboe, 102 S.W.3d 675, 693 (Tex. 2002)*. Thus, a Texas statutory class can be certified.

[*1382] 11. Washington

Both statutory and common law classes can be certified. *Vernon v. Qwest Commc'ns Int'l, Inc., 643 F. Supp. 2d 1256, 1268 (W.D. Wash. 2009)* ("Washington courts do not require a plaintiff to allege individual reliance on Defendants' conduct, particularly where the non-disclosure of a material fact is alleged."). While the Court has not found Washington case law directly addressing a presumption of reliance in common law fraudulent concealment cases, the Supreme Court of Washington has expressly approved a rebuttable presumption of reliance in omission cases because "it is virtually impossible to prove reliance in cases alleging nondisclosure of material facts." *Morris v. Int'l Yogurt Co., 107 Wash. 2d 314, 328, 729 P.2d 33 (1986)*.

E. Remaining Certification Decisions on Unjust Enrichment and Warranty Claims

But not all claims can be certified—individual questions are a larger barrier to some claims than they are to others. For example, the predominance requirement posts a unique barrier to Plaintiffs' request to certify their unjust enrichment claims. ***HN27***[] Unjust enrichment "is a fact-intensive inquiry that focuses **[**68]** on the totality of the circumstances, not just defendant's conduct." *In re McCormick & Co., Inc., Pepper Prod. Mktg. & Sales Practices Litig., 422 F. Supp. 3d 194, 232 (D.D.C. 2019)*. Further, while the nominal elements of an unjust enrichment claim are materially similar in each state, the specific contours of what is "unjust" varies. *See Id. at 232-33* (collecting cases); *see also Lilly v. Ford Motor Co., No. 00 C 7372, 2002 U.S. Dist. LEXIS 5698, 2002 WL 507126 (N.D. Ill. Apr. 3, 2002)* ("Unjust enrichment is an equitable doctrine. There would be individual questions as to whether a particular class member is subject to equitable defenses."). The Eleventh Circuit has spoken clearly on this issue. "Before it can grant relief on this equitable claim, a court must examine the particular circumstances of an individual case and assure itself that, without a remedy, inequity would result or persist. Due to the necessity of this inquiry into the individualized equities attendant to each class member, courts, including ours, have found unjust enrichment claims inappropriate for class action treatment." *Vega v. T-Mobile USA, Inc., 564 F.3d 1256, 1274 (11th Cir. 2009)*.

Next, the Court addresses the Plaintiffs' request for class certification of their implied warranty claims in California, New Jersey, Missouri, Pennsylvania, and Texas.[7] As noted above, New Jersey and Pennsylvania classes cannot be certified because there are no class representatives. A Missouri class also cannot be certified **[**69]** because the Court granted summary judgment on both class representatives' implied warranty claims.[8] That leaves California and Texas. Ford argues that the question of whether an individual plaintiff gave sufficient notice is an individual one that defeats predominance. Plaintiffs note that only four named class members failed to give notice—none of those Plaintiffs were in the Texas or California classes. It is true that notice is an individual issue. But it is a simple one. ***HN28***[] The predominance inquiry is not determined by simply counting **[*1383]** the number of individual questions versus common ones—a Court must consider their relative importance. *Butler v. Sears, Roebuck & Co., 727 F.3d 796, 800 (7th Cir. 2013)*. Here, the simply question of notice can be determined, if necessary, by a claims administrator while the big question of whether the product was defective at the time it was sold is a common one. Thus, the Court finds the California and Texas implied warranty classes can be certified, along with the Magnuson-Moss classes.

XIII. Conclusion

The iconic Ford Mustang made an indelible pony-shaped mark on American car culture. Through product placement in James Bond movies and racing partnerships with figures like Carroll Shelby, Ford has spent half a century **[**70]** cultivating an aura of performance and adventure. But these Plaintiffs allege, to Lee Iacocca's chagrin, that their cars are more like Pintos than Mustangs. The thrust of Plaintiffs' claims is that Ford billed *all* of their GT350 Mustangs as race cars capable of all-day track performance with the knowledge and expectation that performance enthusiasts would buy them on that basis. In reality, Plaintiffs say, the Base and Technology package versions of the cars were intentionally designed without coolers in order to inflate Ford's profits margins. As a result, the Base and Tech cars could not complete a full "Track Day" without going into "Limp Mode." There are so many fact-intensive questions, including: Did Ford's advertising really communicate what Plaintiffs allege? And did Plaintiffs know, or should they have known, the cars they were purchasing did not have coolers? Therefore, the

[7] Plaintiffs do not seek an express warranty class.

[8] In its class certification briefing, Defendant appears to concede that Missouri does not require a plaintiff to prove notice of breach. But in the preceding sentence, Defendant cites the Missouri statute that reads "the buyer must within a reasonable time after he discovers or should have discovered any breach notify the seller of breach or be barred from any remedy." *Mo. Rev. Stat. § 400.2-607(3)(a)*. Yet, the Defendant sought summary judgment against a Missouri Plaintiff's warranty claims for failure to give notice of breach. The Court will follow Missouri law.

Court declines to settle the majority of these claims at the summary judgment stage. However, Ford is granted summary judgment on Plaintiffs' claims concerning the occurrence of Limp Mode on public roads, all of Plaintiff Cruz's claims, the express and implied warranty claims of Plaintiffs Roberts, Hochsprung, **[**71]** Kowalchik, and Porter, as well as the express warranty claims of any class members who did not fulfill their presentment and notice obligations.

The class certification decision was closer than the summary judgment decision. Ford raises the valid concern that Plaintiffs cannot prove elements of their claims, such as reliance, on a classwide basis and the valid concern that it will seek to raise unique affirmative defenses for each class member. But Plaintiffs have done enough to show that these facts permit presumptions of reliance and that Ford's evidence of potential affirmative defenses is not strong enough to defeat the predominance of common issues. Requiring *every* issue to be common would defeat the utility of the class action device. Thus, with the class definition set out by the Court above, the Court certifies statutory and common law fraud classes in California, Florida, Illinois, New York, and Washington; statutory fraud classes in Missouri and Texas; common law fraud classes in Oregon and Tennessee; and implied warranty and Magnuson-Moss classes in California and Texas. Grossman, Roth, Yaffa, and Cohen and Hagens Berman are appointed as class counsel and are directed to **[**72]** give absent class members appropriate notice under *Rule 23*.

DONE AND ORDERED in Chambers at Miami, Florida, this 1st of July 2021.

FEDERICO A. MORENO

UNITED STATES DISTRICT JUDGE

Ticas v. Youssef

Superior Court of California, County of Los Angeles

July 16, 2021, Decided

20STCP03768

Reporter

2021 Cal. Super. LEXIS 97005 *

MIGUEL TICAS, et al. vs JOESEF R. YOUSSEF, DDS

Core Terms

cause of action, demurrer, alleges, pled, surgery, battery, patient, billing, unfair, emotional distress, contends, billing practices, insurance company, Plaintiffs', reasons, removal, wisdom tooth, fraudulent, consented, consumer, dental, outrageous conduct, misrepresentations, fails

Counsel: **[*1]** For Plaintiff(s): No Appearances.

For Defendant(s): No Appearances.

Judges: Judge: Honorable Richard J. Burdge Jr.

Opinion by: Richard J. Burdge Jr

Opinion

NATURE OF PROCEEDINGS: Hearing on Demurrer - with Motion to Strike (CCP 430.10)

The court's tentative ruling is posted online for parties to review.

The parties submit to the Court's tentative ruling via telephone.

The Court's tentative ruling is adopted as the final order of the court as follows:

Dr. Youssef's demurrer is sustained as to the second, fifth and sixth causes of action. Plaintiffs are granted 30 days leave to amend. Having overruled Dr. Youssef's demurer to the third and fourth causes of action, the motion to strike is moot. Dr. Youssef is to give notice.

Background

This action arises out of Defendant, Joesef R. Youssef, DDS' ("Dr. Youssef") care and treatment of Plaintiffs, Miguel Ticas ("Mr. Ticas") and Christina Ticas. ("Mrs. Ticas") Plaintiffs allege that on October 29, 2019, Dr. Youssef performed oral surgery on Mr. Ticas to remove his right lower wisdom tooth. However, Dr. Youssef allegedly abandoned the surgery without removing this tooth despite billing Mr. Ticas and his insurance for the removal. Plaintiffs allege that other oral surgeons have **[*2]** since confirmed that Dr. Youssef lacked the necessary training and experience to handle the surgery, and that Mr. Ticas suffered pain and ongoing complications as a result. Mrs. Ticas also alleges that she has lost income and suffered loss of consortium.

Plaintiffs' operative First Amended Complaint ("FAC"), filed February 8, 2021, alleges the following causes of action: (1) medical negligence, (2) violation of Consumer Legal Remedies Act, (3) fraud, (4) injunctive relief pursuant to Business and Professions Code §17200, (5) medical battery, (6) intentional infliction of emotional distress.

Dr. Youssef now demurs to the FAC's second through sixth causes of action. Dr. Youssef also moves to strike portions of the FAC. Plaintiffs oppose both motions.

Discussion[1]

Legal Authority

A demurrer is an objection to a pleading, the grounds for which are apparent from either the face of the complaint or a matter of which the court may take judicial notice. (*Code Civ. Proc., § 430.30, subd. (a)*; see also *Blank v. Kirwan (1985) 39 Cal.3d 311, 318*.) The purpose of a demurrer is to challenge the sufficiency of a pleading "by raising questions of law." (*Postley v. Harvey (1984) 153 Cal.App.3d 280, 286*.) The court "treat[s] the demurrer as admitting all material facts properly pleaded, but not contentions, deductions or conclusions of fact or law. . . ." (*Berkley v. Dowds (2007) 152 Cal.App.4th 518, 525* (Berkley).) **[*3]** "In the construction of a pleading, for the purpose of determining its effect, its allegations must be liberally construed, with a view to substantial justice between the parties." (*Code Civ. Proc., § 452*; see also *Stevens v. Sup. Ct. (1999) 75 Cal.App.4th 594, 601*.) "When a court evaluates a complaint, the plaintiff is entitled to reasonable inferences from the facts pled." (*Duval v. Board of Trustees (2001) 93 Cal.App.4th 902, 906*.)

The general rule is that the plaintiff need only allege ultimate facts, not evidentiary facts. (*Doe v. City of Los Angeles (2007) 42 Cal.4th 531, 550*.) "All that is required of a plaintiff, as a matter of pleading, even as against a special demurrer, is that his complaint set forth the essential facts of the case with reasonable precision and with sufficient particularity to acquaint the defendant with the nature, source and extent of his cause of action." (*Rannard v. Lockheed Aircraft Corp. (1945) 26 Cal.2d 149, 156-157*.) "[D]emurrers for uncertainty are disfavored and are granted only if the pleading is so incomprehensible that a defendant cannot reasonably respond." (*Mahan v. Charles W. Chan Ins. Agency, Inc. (2017) 14 Cal.App.5th 841, 848, fn. 3*, citing *Lickiss v. Fin. Indus. Regulatory Auth. (2012) 208 Cal.App.4th 1125, 1135*.) In addition, even where a complaint is in some respects uncertain, courts strictly construe a demurrer for uncertainty "because ambiguities can be clarified under modern discovery procedures." (*Khoury v. Maly's of California, Inc. (1993) 14 Cal.App.4th 612, 616*.)

Demurrers do not lie as to only parts of causes of action where some valid claim is alleged but "must dispose of an entire **[*4]** cause of action to be sustained." (*Poizner v. Fremont General Corp. (2007) 148 Cal.App.4th 97, 119*.) "Generally it is an abuse of discretion to sustain a demurrer without leave to amend if there is any reasonable possibility that the defect can be cured by amendment." (*Goodman v. Kennedy (1976) 18 Cal.3d 335, 349*.)

Analysis

Second Cause of Action: Violation of Consumer Legal Remedies Act

"The CLRA declares unlawful a variety of "unfair methods of competition and unfair or deceptive acts or practices" used in the sale or lease of goods of services to a consumer." (*Cal. Civ. Code § 1770, subd. (a)*; *Bower v. AT&T Mobility, LLC (2011) 196 Cal.App.4th 1545, 1556*(Bower).) However, a Plaintiff in a CLRA action must also show that she suffered "some kind of tangible increased cost or burden . . ." (*Bower, supra, 196 Cal.App.4th at 1556*, quoting *Meyer v. Sprint Spectrum L.P. (2009) 45 Cal.4th 634, 641*.)

---

[1] Dr. Youssef submits the declaration of his counsel, Yee Lam ("Lam") to demonstrate compliance with statutory meet and confer requirements. Lam attests that on March 4, 2021, her office sent Plaintiffs' counsel a meet and confer letter regarding the arguments raised in the instant demurrer and motion to strike. (Lam Decl. ¶ 2, Exh. A.) On March 9, 2021, Plaintiffs' counsel responded by agreeing to withdraw the FAC's prayer for punitive damages but otherwise stated that the FAC was sufficiently pled. (Lam Decl. ¶ 3, Exh. B.) The Lam Declaration is sufficient for purposes of ***Code of Civil Procedure sections 430.41*** and ***435.5***.

Dr. Youssef contends that the FAC's second cause of action is insufficiently pled because the FAC does not allege that Plaintiffs relied upon Dr. Youssef's alleged statement that the wisdom tooth had been removed. (Demurrer, 9-11.) Additionally, Plaintiffs argue that the FAC fails to allege how Dr. Youssef engaged in false advertising as defined in *Civil Code sections 1770(a)(5)*, *(14)* or *(16)*. (Id.) Finally, Dr. Youssef argues that the second cause of action is insufficiently pled because billing practices to an insurance company cannot form the basis of a CLRA claim, as an insurance company is not a consumer within the **[*5]** meaning of the CLRA (Id.) Finally, Dr. Youssef contends that the second cause of action is insufficiently pled because the FAC fails to allege how Plaintiffs were harmed by Dr. Youssef's alleged statements about removal of the wisdom tooth. (Id.)

Pursuant to *Civil Code section 1761, subdivision (d)*, a "consumer" is "an individual who seeks or acquires, by purchase or lease, any goods or services for personal, family, or household purposes."

In opposition, Plaintiffs contend that the second cause of action is sufficiently pled because it is based only on Dr. Youssef's billing practices, not the dental surgery. (Opposition, 3-5.) Plaintiffs argue that billing practices of a healthcare facility can form the basis of a CLRA claim. (Id.) Plaintiffs cite to *Hale v. Sharp Healthcare (2010) 183 Cal.App.4th 1373* (Hale) in support of this argument.

In Hale, an uninsured patient brought an action on behalf of herself and other uninsured patients, alleging that defendant healthcare providers violated the CLRA and Unfair Competition Law by deceptively charging uninsured patients fees that substantially exceeded fees it accepted from insured patients. (Id. at 1377.) The trial court sustained defendants' demurrer without leave to amend and the patient appealed. (Id.) The Court of Appeal concluded **[*6]** that the trial court erred by sustained the demurrer to the patient's UCL and CLRA causes of action. (Id.) The Court of Appeal held that the patient had standing to bring her UCL claim because the patient alleges that she paid $500 of her $14,447.65 medical bill and as such, was a bona fide consumer of medical services. (Id. at 1383-1384.) Additionally, the Court of Appeal noted that the patient sufficiently alleged reliance because the Complaint alleges that the patient signed the Admission Agreement and was expected to be charged regular rates. (Id. at 1385.) According to the Hale court, this is sufficient to state a claim to the extent the patient's CLRA claim is fraud based. (Id. at 1387.)

In reply, Dr. Youssef contends that Plaintiffs' reliance on Hale is misplaced because he made no representations regarding his billing practices and Plaintiffs failed to allege any reliance upon his billing practices. (Reply, 2-3.)

Here, the FAC alleges that Dr. Youssef "falsified billing records to plaintiff's insurance company" by billing for a procedure which has not been completed and billing for "office visits which never occurred." (FAC ¶ 13.) According to Plaintiffs, this conduct violates **[*7]** at least *Civil Code section 1770(a)(5)*, *(14)* and *(16)*. (FAC ¶ 14.) Plaintiff Mr. Ticas was allegedly harmed because he could not "obtain corrected dental surgery" through his insurance company. (FAC ¶ 16.) However, the FAC also alleged that Mr. Ticas has since visited other oral surgeons for a second opinion. (FAC ¶ 9.)

The court finds the second cause of action insufficiently pled. Plaintiffs' reliance on Hale is misplaced, as Hale does not stand for the general proposition that billing practices of a healthcare facility can form the basis of a CLRA claim. The Hale court found plaintiff's CLRA claim sufficiently pled in part because Plaintiff had sufficiently alleged reliance. Unlike Hale, the FAC alleges that Mr. Ticas underwent dental surgery with Dr. Youssef and later discovered that the surgery had not been completed. Thus, the FAC does not allege that Plaintiffs relied on Dr. Youssef's statements or conduct or that he paid fraudulent bills.

For these reasons, Dr. Youssef's demurrer to the second cause of action is sustained.

Third Cause of Action: Fraud

"The elements of fraud that will give rise to a tort action for deceit are: '(a) misrepresentation (false representation, concealment, or nondisclosure); (b) knowledge **[*8]** of falsity (or 'scienter'); (c) intent to defraud, i.e., to induce reliance; (d) justifiable reliance; and (e) resulting damage.'" *Engalla v. Permanente Medical Group, Inc. (1997) 15 Cal.4th 951, 974*.) Fraud must be pled in the complaint specifically. General and conclusory allegations are not sufficient. (Nagy v. Nagy (1989) 210 Cal.App.3d 1262, 1268.) Unlike most causes of action where the "the policy of liberal construction of the pleadings," fraud requires particularity, that is, "pleading facts which show how, when, where, to whom, and by what means the representations were tendered." (Lazar v. Superior Court (1996) 12 Cal.4th 631, 645.) Every element of a fraud cause of action must be alleged both factually and specifically. (Hall v. Department of Adoptions (1975) 47 Cal.App.3d 898, 904; Cooper v. Equity General Insurance (1990) 219 Cal.App.3d 1252, 1262.)

Dr. Youssef contends that the FAC's third cause of action is insufficiently pled because the FAC fails to allege fraud with the required specificity. (Demurrer, 12-15.) Specifically, Dr. Youssef argues that the FAC fails to allege any specific facts regarding misrepresentations by Dr. Youssef, that Dr. Youssef had knowledge of the falsity of any misrepresentations, or that Plaintiffs relied on any of Dr. Youssef's alleged misrepresentations. (Id.)

In opposition, Plaintiffs contend that the third cause of action is sufficiently pled because the FAC alleges that Dr. Youssef told Plaintiff and his insurance company **[*9]** that he had removed the wisdom tooth when he had not, which is sufficient to state a claim for fraud. (Opposition, 5-8.)

Here, the FAC alleges that Dr. Youssef committed fraud through "falsely representing that a dental procedure" had been completed and also by "charging plaintiffs' insurance company for office visits which never occurred." (FAC ¶ 20.) Dr. Youssef allegedly "did these fraudulent acts knowingly and intentionally." (Id.)

The court finds the third cause of action is sufficiently pled. The Complaint alleges that Dr. Youssef submitted false bills and was paid for them because the insurer relied on their accuracy. As a result, Plaintiff could not receive insurance payments for certain necessary services..

For these reasons, Dr. Youssef's demurrer is overruled as to the third cause of action.

Fourth Cause of Action: Injunctive Relief pursuant to Business & Professions Code §17200

Business and Professions Code section 17200 ("UCL") prohibits "unfair competition," which is defined to include "any unlawful, unfair or fraudulent business act or practice" and "unfair, deceptive, untrue or misleading advertising" and any act prohibited by business and professions code section 17500. A cause of action under the UCL must be stated with "reasonable particularity." (Gutierrez v. Carmax Auto Superstores California (2018) 19 Cal.App.5th 1234, 1261.)

"While **[*10]** the scope of conduct covered by the UCL is broad, its remedies are limited. [Citation.] A UCL action is equitable in nature; damages cannot be recovered. [Citation.] [The Supreme Court has] stated that under the UCL, '[p]revailing plaintiffs are generally limited to injunctive relief and restitution.'" (Korea Supply Co. Lockheed Martin Corp. (2003) 29 Cal.4th 1134, 1144.) UCL actions based on "unlawful" conduct may be based on violations of other statutes. (See Klein v. Chevron U.S.A., Inc. (2012) 202 Cal.App.4th 1342, 1383.)

Dr. Youssef contends that the FAC's fourth cause of action is insufficiently pled because the FAC does not plead this cause of action with reasonable particularity. (Demurrer, 15-16.) Specifically, Dr. Youssef argues that the FAC's fourth cause of action is uncertain because it does not allege, for example, the amounts incorrectly billed, any statutes Dr. Youssef allegedly violated, or the people who allegedly communicated such incorrect billing. (Id.)

In opposition, Plaintiffs contend that the fourth cause of action is sufficiently led because the FAC sufficiently alleges a claim under the "unfairness" prong of the UCL, which is broadly defined. (Opposition, 8-9.) Plaintiffs cite to cases, including Podolsky v. First Healthcare Corp. (1996) 50 Cal.App.4th 632, 647 (Podolsky) for this argument. **[*11]**

In Podolsky, the Court of Appeal stated that the "unfairness" prong of the UCL is intentionally broad. (Id. at 647.) Specifically, "[t]he test of whether a business practice is unfair 'involves an examination of [that practice's] impact on its alleged victim, balanced against the reasons, justifications and motives of the alleged wrongdoer." (Id.) Additionally, the California Supreme Court has held that "unfair" in the UCL is defined as follows: "conduct that threatens an incipient violation of an ***antitrust law*** or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition." (*Cel-Tech Communications, Inc. v. Los Angeles Cellular Telephone Co. (1999) 20 Cal.4th 163, 187* (Cel-Tech).)

Here, the FAC alleges that Dr. Youssef "overbilled Mr. Ticas for the botched surgery" he did not perform and also billed for "office visits which never occurred." (FAC ¶¶ 7-8.) Additionally, the FAC alleges that "Defendants" engaged in "unlawful, unfair and fraudulent business practices through their fraudulent billing practices." (FAC ¶ 25.)

The court finds the FAC's fourth cause of action is sufficiently pled for the same reasons that the third cause of action was sufficiently pled.

[*12] For these reasons, Dr. Youssef's demurrer to the fourth cause of action is overruled.

Fifth Cause of Action: Medical Battery

Dr. Youssef contends that the FAC's fifth cause of action is sufficiently pled because the sixth cause of action is based on an "undesirable outcome" of Mr. Ticas' dental surgery and thus, is not actionable as battery. (Demurrer, 16-17.) Dr. Youssef cites to cases, including *Conte v. Girard Orthopaedic Surgeons Medical Group, Inc., (2003) 107 Cal.App.4th 1260, 1268* (Conte) for the argument that there is no cause of action for battery where the doctor's touching was within the scope of consent.

In Conte, plaintiff sought treatment following an injury during a motorcross accident. (Id. at 1263-1264.) Plaintiff sought other consultations and then signed a consent form for surgery, which he believed was for a repair of his shoulder and not for a diagnostic procedure. (Id. at 1265.) Thereafter, Plaintiff discovered that his shoulder was not repaired but instead a diagnostic procedure was completed. (Id.) Plaintiff brought a claim for battery, arguing that defendant was liable for battery because he performed a substantially different procedure than the one to which he consented. (Id. at 1268.) The Court of Appeal held that battery was not appropriate, as the **[*13]** doctor in this case did less than he was authorized to do by completing a diagnostic procedure which was not substantially different than the one to which plaintiff had consented. (Id.)

In opposition, Plaintiffs contend that the fifth cause of action is sufficiently pled because the FAC alleges that Dr. Youssef intentionally mislead Plaintiffs about his lack of training and qualifications, which is sufficient to state a claim for battery. (9-11.) Plaintiffs cite cases, including *Rains v. Superior Court (1984) 150 Cal.App.3d 933, 939-942* (Rains) in support of their arguments.

In Rains, plaintiffs participated in in-patient psychiatric treatment and consented to physical violence as a therapeutic measure. (*Rains, supra, 150 Cal.App.3d at 935*.) Plaintiffs brought an action for battery, alleging that defendants engaged in touching outside of the scope of their consent. (*Id. at 936*.) The Court of Appeal held that Plaintiffs properly stated a claim for battery because the complaint properly alleges that the defendants intentionally misrepresented the necessity of physical violence and thus, plaintiffs' consent was "legally ineffective." (*Id. at 940-941*.)

Here, the FAC alleges that Mr. Ticas consented to removal of his right lower wisdom tooth rather than partial removal followed by "ham-handed, substandard **[*14]** effort to cover up the botched surgery." (FAC ¶ 30.) As such, Defendants allegedly "exceeded the scope of consent" when Dr. Youssef performed the surgery "rather than inform the client" and then "performed procedures wholly outside of the scope of consent." (FAC ¶ 31.)

The court finds Plaintiffs' fifth cause of action insufficiently pled. The court finds Conte similar to the instant action. As with the plaintiff in Conte who consented to a shoulder repair surgery but received a shoulder diagnostic procedure, here Mr. Ticas consented to a total removal of his wisdom tooth but allegedly received a partial removal. Thus, Dr. Youssef's conduct was within the scope of consent according to the guidance from Conte and is not actionable as medical battery. Plaintiffs' citation to Rains is misplaced, as Rains involved misrepresentations about defendants' proposed medical procedures prior to those procedures taking place. Here, the FAC does not allege that Dr. Youssef engaged in any such representations prior to engaging in dental surgery.

For these reasons, Dr. Youssef's demurrer to the fifth cause of action is sustained.

Sixth Cause of Action: Intentional Infliction of Emotional Distress

The elements **[*15]** of a claim for intentional infliction of emotional distress ("IIED") are: "(1) extreme and outrageous conduct by the defendant with the intention of causing, or reckless disregard of the probability of causing, emotional distress; (2) the plaintiff's suffering severe or extreme emotional distress; and (3) actual and proximate causation of the emotional distress by the defendant's outrageous conduct." (*Christensen v. Superior Court (1991) 54 Cal.3d 868, 903* (Christensen).) Under California law, for conduct to be "outrageous" it must be "so extreme as to exceed all bounds of that usually tolerated in a civilized community." (See *Ess v. Eskaton Props., Inc. (2002) 97 Cal.App.4th 120, 130*.) Liability does not extend to mere insults, indignities, threats, annoyances, petty oppressions, or other trivialities. (*Hughes v. Pair (2009) 46 Cal.4th 1035, 1051*.)

Dr. Youssef contends that the sixth cause of action is insufficiently pled because the FAC fails to allege that Dr. Youssef engaged in extreme or outrageous conduct. (Demurrer, 17-18.) Specifically, Dr. Youssef contends that the FAC's sixth cause of action is based on the same facts as the first cause of action for negligence, which are insufficient to support a claim for IIED. (Id.)

In opposition, Plaintiffs contend that the sixth cause of action is sufficiently pled because the allegations **[*16]** about Dr. Youssef's representations regarding the surgery and fraudulent billing can "reasonably be considered outrageous conduct" beyond the bounds to be tolerated in a civilized society. (Opposition, 11.)

In reply, Dr. Youssef contends that the FAC insufficiently pleads a claim for IIED because an allegation that a healthcare provider lacks the required skill to perform a procedure constitutes a negligence claim. (Reply, 7-8.)

Here, the FAC alleges that Dr. Youssef's conduct, "namely, botching a surgery, then covering it up and lying to plaintiff's insurance company that the surgery had been successfully completed" constitutes "extreme and outrageous conduct." (FAC ¶ 36.) As a result of Dr. Youssef's conduct, "plaintiff" suffered extreme emotional distress. (FAC ¶ 37.)

The court finds the sixth cause of action insufficiently pled. Specifically, the court agrees with Dr. Youssef that the sixth cause of action relies on substantially the same allegations as the first cause of action, which are insufficient to state a claim for IIED. Additionally, the FAC does not allege that Dr. Youssef "covered up" the allegedly failed surgery with the intention of causing Plaintiffs emotional distress **[*17]** or with reckless disregard of the probability of causing Plaintiffs emotional distress, other than conclusory statements to this effect.

For these reasons, Dr. Youssef's demurrer to the sixth cause of action is sustained.

Conclusion

Dr. Youssef's demurrer is sustained as to the second, fifth and sixth causes of action. Plaintiffs are granted 30 days leave to amend. Dr. Youssef is to give notice.

MOTION TO STRIKE

Having overruled Dr. Youssef's demurrer to the third and fourth causes of action, the motion to strike is moot.

Marcum v. Columbia Gas Transmission, LLC

United States District Court for the Eastern District of Pennsylvania

July 19, 2021, Decided; July 19, 2021, Filed

CIVIL ACTION NO. 19-3873

Opinion by: WENDY BEETLESTONE

Opinion

[*414] **MEMORANDUM OPINION**

This suit arises from the installation of a gas pipeline through the residential property of Plaintiffs Scott and Kerstin Marcum. Plaintiffs allege that the flow of stormwater runoff onto their property increased following the installation, resulting in property damage. They blame the pipeline's owner, Defendant Columbia Gas Transmission, **[**2]** LLC ("Columbia"), which, they say, failed to restore the property with sufficient stormwater management controls. They bring claims for: (1) negligent construction and failure to maintain; (2) violation of the *Pennsylvania Storm Water Management Act ("SWMA")*, *32 Pa. Stat. Ann. § 680.13*; (3) nuisance; (4) trespass to land by alteration of surface and subsurface drainage; and, (5) breach of fiduciary duty to maintain.[1] Columbia moves to exclude the testimony of Plaintiffs' liability expert, Chad Ingram, and for summary judgment.

I. BACKGROUND

The property in question has been subject to a pipeline easement since 1957, when the original owner entered into a Right of Way Agreement with Columbia's predecessor granting the latter the right to install and operate a 10-inch underground gas pipeline through the premises.

Plaintiffs bought the property in 1998. Shortly thereafter, they were approached by Columbia, which sought to amend the 1957 Agreement. Specifically, it proposed replacing the existing 10-inch pipeline with a 24-inch pipeline (the "1896 line"). Plaintiffs wouldn't agree to the amendment, so Columbia initiated a condemnation action as authorized by the *Natural Gas Act, 15 U.S.C. § 717f(h)*. That litigation was resolved in 2002, when Plaintiffs entered into an amended **[**3]** Right of Way Agreement with Columbia for the installation, operation, and maintenance of the 1896 line (the "2002 Amendment").

A few years later, an agent for Columbia approached Plaintiffs seeking to amend the 2002 Amendment. Columbia wanted to install another pipeline—this one 26-inches in diameter (the "1278 line"). In 2014, after consulting with an attorney, Plaintiffs entered into a second amended Right of Way Agreement with Columbia for the installation, operation, and maintenance of the 1278 line (the "2014 Amendment"). In conjunction with the 2014 Amendment, Plaintiffs executed a release of claims. In return Plaintiffs received $35,000 from Columbia.

Columbia sought permission for construction of the 1278 line from the Federal Energy Regulatory Commission ("FERC") and applied for various state permits. In support of its applications, Columbia submitted to FERC, the Pennsylvania Department of Environmental Protection ("PADEP"), and the Chester County Conservation District ("CCCD") an updated Erosion and Sediment Control Plan as well as Post Construction Storm Water Management and Site Restoration Plans for review and approval. FERC approved the 1278 pipeline on December 18, 2014. **[**4]** In February 2015, the CCCD in conjunction with the PADEP issued to Columbia an Erosion and Sediment Control General Permit ("ESCGP-2"). The following month, FERC issued a notice to proceed with construction of the 1278 line through Plaintiffs' property.

Columbia installed the 1278 line in the summer of 2015. The construction process was not entirely smooth. Plaintiffs' property **[*415]** is located downslope from two other properties. To prevent excess stormwater from running down this slope and entering Plaintiffs' property during construction, Columbia installed temporary erosion and sediment ("E&S") controls. These controls were overburdened in July by a significant overnight rain. Stormwater runoff flowed toward Plaintiffs' home, leaving sediment deposits on their rear patio and yard. Columbia installed additional E&S controls in response, but these too were overwhelmed during an August storm, resulting in washout of the restored easement area.

There were, from Plaintiffs' perspective, issues with Columbia's post-construction site restoration efforts as well. According to Plaintiffs, prior to the 2015 construction, there were several water diversion features on the properties of Plaintiffs **[**5]** and their uphill neighbor which served to lessen the flow of stormwater onto Plaintiffs' property. They contend, primarily, that upon finishing construction of the 1896 line in 2002, Columbia built a water diversion berm—a retentive grading technique used to manage stormwater runoff—in the easement area across Plaintiffs'

---

[1] Plaintiffs alleged a claim of fraudulent concealment against Columbia but withdrew this claim in response to Columbia's summary judgment motion.

backyard. The purpose of this berm, according to Plaintiffs, was to divert enhanced stormwater runoff resulting from the 2002 construction away from Plaintiffs' home, allowing it to instead drain to the side of Plaintiffs' house and into culverts in the street below. Plaintiffs contend that Columbia removed this berm when installing the 1278 line and failed to replace it when restoring the site.

Columbia disputes these facts. It agrees, however, that there were certain permanent berms located on the property immediately uphill from Plaintiffs' own which were removed and replaced during the 2015 construction. The parties now dispute whether these replacement berms serve to concentrate, rather than disperse, stormwater runoff toward Plaintiffs' home. Columbia also acknowledges that, as part of the construction process, a number of trees were cleared from Plaintiffs' **[**6]** property as well as from the property of Plaintiffs' uphill neighbor. These trees were not replaced. The parties dispute whether Columbia undertook any stormwater remediation measures in the formerly wooded area, such as cultivating brushy vegetation to help slow the velocity of stormwater and surface runoff coming down the hillside.

According to Plaintiffs, since the 2015 installation of the 1278 line, increased stormwater runoff has caused significant damage to their home and property including, in February 2018, the formation of a large and growing sinkhole within the easement area. Plaintiffs filed this action shortly thereafter.

II. COLUMBIA'S *DAUBERT* MOTION

Plaintiffs proffer Chad Ingram, an engineer, to testify regarding the effect of the pipeline construction on stormwater flow. Plaintiffs contend that Ingram's reports and testimony in this matter support their allegation that Columbia's failure to install adequate stormwater controls increased the flow of runoff onto their property. Columbia moves to exclude Ingram's testimony and opinions pursuant to *Federal Rule of Evidence 702*.[2]

[*416] A. Legal Standard

The Federal Rules of Evidence govern the admission of expert opinions in a federal case. *Daubert v. Merrell Dow Pharms., Inc., 509 U.S. 579, 587-89, 113 S. Ct. 2786, 125 L. Ed. 2d 469 (1993)*. *Rule 702* provides: **[**7]**

> A witness who is qualified as an expert by knowledge, skill, experience, training, or education may testify in the form of an opinion or otherwise if:
> (a) the expert's scientific, technical, or other specialized knowledge will help the trier of fact to understand the evidence or to determine a fact in issue;
> (b) the testimony is based on sufficient facts or data;
> (c) the testimony is the product of reliable principles and methods; and
> (d) the expert has reliably applied the principles and methods to the facts of the case.

Fed. R. Evid. 702.

This rule "embodies a trilogy of restrictions on expert testimony: qualification, reliability, and fit." *Schneider ex rel. Estate of Schneider v. Fried, 320 F.3d 396, 404 (3d Cir. 2003)*. Qualification requires "that the witness possess

---

[2] Columbia separately moves to exclude the testimony and opinions of James Tupitza, a real estate attorney proffered by Plaintiffs to testify regarding customs and practices in pipeline condemnation and construction litigation. Tupitza has authored an eight-page report responding to four hypothetical questions posed by Plaintiffs' counsel. Most of his opinions involve matters—specifically, the release executed by Plaintiffs in conjunction with the 2014 Amendment and Plaintiffs' breach of fiduciary duty claim—which, even if they were appropriate matters for expert opinion, will not be relevant at trial given the Court's disposition of these issues in the present opinion. It is thus unclear whether and to what extent Plaintiffs will continue to proffer Tupitza as an expert witness moving forward. Given that the substance of Tupitza's opinions is not relevant to the Court's disposition of its summary judgment motion, Columbia's *Daubert* challenge will be denied without prejudice to raise again should Plaintiffs seek to put Tupitza on the stand at trial.

specialized expertise." *Id.* To be reliable, the expert's opinion must be premised on more than mere "'subjective belief or unsupported speculation'; the expert must have 'good grounds' for his or her belief." *In re Paoli R.R. Yard PCB Litig., 35 F.3d 717, 742 (3d Cir. 1994)* (quoting *Daubert, 509 U.S. at 590*). Finally, the expert's testimony must "fit" the case at hand, that is, "must be relevant for the purposes of the case and must assist the trier of fact." *Calhoun v. Yamaha Motor Corp., U.S.A., 350 F.3d 316, 321 (3d Cir. 2003)* (quoting *Schneider, 320 F.3d at 405*). When a party challenges an expert's opinions pursuant to *Rule 702*, the proffering party bears the burden of demonstrating by a preponderance **[**8]** of the evidence that the opinions of its proposed expert are admissible. *Padillas v. Stork-Gamco, Inc., 186 F.3d 412, 417-18 (3d Cir. 1999)*.

The proffering party is not, however, required to "carry the burden of proving to the judge that the expert's assessment of the situation is correct." *United States v. Mitchell, 365 F.3d 215, 244 (3d Cir. 2004)* (quoting *Ruiz-Troche v. Pepsi Cola Bottling Co., 161 F.3d 77, 85 (1st Cir. 1998)*); *see also* *Paoli, 35 F.3d at 744* ("The grounds for the expert's opinion merely have to be good, they do not have to be perfect."). Trial courts must act as gatekeepers to ensure the relevance and reliability of all expert testimony, *Kumho Tire Co. v. Carmichael, 526 U.S. 137, 147, 119 S. Ct. 1167, 143 L. Ed. 2d 238 (1999)*, but this gatekeeping obligation "is not intended to serve as a replacement for the adversary system," *Fed. R. Evid. 702*, advisory committee's note. "Vigorous cross-examination, presentation of contrary evidence, and careful instruction on the burden of proof are the traditional and appropriate means of attacking shaky but admissible evidence." *Daubert, 509 U.S. at 596*.

B. Discussion

Plaintiffs retained Ingram through his firm, Ingram Engineering Services, Inc. ("IES"), to investigate the increased stormwater runoff they observed on their **[*417]** property during and following construction of the 1278 line. Ingram drafted his first report in April of 2016. After visiting the property, he opined, *inter alia*, that "[t]he grading of the easement [was] restored in such a manner that conveys additional **[**9]** storm water toward the rear and east side of the property." He concludes:

> that post-construction failures are caused from the inadequate re-grading performed during the restoration process. IES suspects that a diversion berm existed before the construction which conveyed stormwater properly into the street and away from the rear and sides of [Plaintiffs'] property. During construction activities for the pipe installation, the berm was removed during final grading operations. Once the pipe installation was completed, the area was re-graded which resulted in a significant increase in stormwater being conveyed toward the rear and side yards rather than towards the street. In addition to the improper conveyance, the grading has allowed excessive flow rates which have caused erosion and sediment run-off[.]

Ingram returned to Plaintiffs' property in early 2018 after the sinkhole began to form and authored a second report, which reiterated his findings concerning the inadequacy of Columbia's post-construction site restoration measures and the removal of the water diversion berm. In the report, he notes that "IES estimates the volume of stormwater doubled based upon the location of" the removed **[**10]** berm. He also provides an opinion on the cause of the sinkhole, explaining that it:

> is likely due to the presence of carbonite geology (soluble limestone) or improper backfill operation at this localized area. A small swale immediately upslope of said subsidence/sinkhole has formed and conveys concentrated stormwater into the opening. This is accelerating subsurface erosion and has created a safety hazard.

Ingram visited the property twice in September 2020, and thereafter authored his third and final report. The purpose of this report was "to determine if continued deterioration resulting from stormwater runoff is observed [on Plaintiffs' property] as well as to evaluate the grading on the subject property and upslope tributary drainage area within the pipeline easement." Ingram observed, among other things, continued erosion and deterioration at the property; stormwater runoff continuing to culminate in the rear of Plaintiffs' property; water damage to Plaintiffs' home; and additional surface depressions located in the area of the sinkhole. The report notes that Columbia did some work on the sinkhole in December 2018 but opines that poor soil compaction around the pipeline and continued **[**11]** concentrated runoff in the area will continue to produce subsidence on Plaintiffs' property.

Columbia does not question Ingram's qualifications, and the Court finds that Ingram—a licensed Pennsylvania engineer who operates his own firm and worked on pipeline projects in his former role as in-house township engineer—possesses the specialized expertise necessary to opine on pipeline construction and stormwater flow. Columbia does, however, dispute whether Ingram's opinions on these issues are reliable and whether they fit the facts of this case. Its motion refers to only one of Ingram's opinion (elicited by defense counsel during Ingram's expert deposition) namely that prior to Columbia's construction of the 1278 line, there was 88% less stormwater entering Plaintiffs' property. Nevertheless, Columbia seeks to exclude Ingram's opinions and testimony in their entirety.

[*418] With respect to reliability, Columbia contends that Ingram's opinions are not based on sufficient facts and data and are, instead, based on nothing more than *ipse dixit*. It points out that Ingram did not review, *inter alia*, Plaintiffs' depositions, stormwater flow rate data prior to Plaintiffs' purchase of the property, the **[**12]** plans associated with the 2002 construction of the 1896 line, or scientific data related to local precipitation between 2010 and 2020. But an expert's opinion need not rest on perfect grounds: "As long as an expert's scientific testimony rests upon 'good grounds, based on what is known,'" it should be subjected to the adversary process. *Mitchell, 365 F.3d at 244* (quoting *Ruiz-Troche, 161 F.3d at 85*). Ingram's opinions and testimony are based on his years of experience as an engineer, as well as his prior work on pipeline-related projects. He conducted several post-construction site inspections and reviewed time-stamped pre-construction photographs and videos, construction-related documents and existing grading plans, and site-specific topographic and aerial data and images. Whether Ingram should have done more research and performed more calculations is an appropriate issue for cross-examination at trial, *Stecyk v. Bell Helicopter Textron, Inc., 295 F.3d 408, 414 (3d Cir. 2002)*; *Kannankeril v. Terminix Int'l, Inc., 128 F.3d 802, 806 (3d Cir. 1997)* (credibility and weight of expert testimony decided by factfinder); however, the Court finds that his opinions are based on a sufficient factual foundation and supporting methodology to survive the present motion.

With respect to the "fit" requirement, expert testimony is admissible under this prong if it "is sufficiently tied to **[**13]** the facts of the case that it will aid the jury in resolving a factual dispute." *United States v. Schiff, 602 F.3d 152, 173 (3d Cir. 2010)* (quoting *Daubert, 509 U.S. at 591*). "This condition goes primarily to relevance. Expert testimony which does not relate to any issue in the case is not relevant and, ergo, non-helpful." *Daubert, 509 U.S. at 591*. The standard for meeting the "fit" requirement "'is not that high,' but 'is higher than bare relevance.'" *Schiff, 602 F.3d at 173* (quoting *Paoli, 35 F.3d at 745*). Ingram's opinions meet this standard: They squarely address the parties' fundamental factual disputes regarding the property's pre-and post-construction topography and how the alleged topographical changes have increased stormwater runoff. They also address Plaintiffs' sinkhole and subsidence allegations, another issue central to this litigation. Columbia's motion to preclude Ingram from testifying in this matter will therefore be denied.[3]

III. COLUMBIA'S SUMMARY JUDGMENT MOTION

Columbia next moves, pursuant to *Federal Rule of Civil Procedure 56*, for summary judgment on all of Plaintiffs' claims. The substantive law of Pennsylvania governs this diversity action. *Chamberlain v. Giampapa, 210 F.3d 154, 158 (3d Cir. 2000)*.

A. Legal Standard

---

[3] Columbia requests a *Daubert* hearing. Courts have discretion to grant or deny such requests. *Padillas, 186 F.3d at 418* (the decision to hold a *Daubert* hearing "rests in the sound discretion of the district court"). In this case, because the full record on this issue is presently before the Court, including Ingram's several reports and deposition testimony, a *Daubert* hearing is unnecessary. *See* *Oddi v. Ford Motor Co., 234 F.3d 136, 154 (3d Cir. 2000)* (*Daubert* hearing properly denied where district court "already had before it the depositions and affidavits of the plaintiff's experts").

"[S]ummary judgment is appropriate where there is no genuine issue as to any **[*419]** material fact and the moving party is entitled to a judgment as a matter of **[**14]** law." *Alabama v. North Carolina, 560 U.S. 330, 344, 130 S. Ct. 2295, 176 L. Ed. 2d 1070 (2010)* (citations and internal quotations omitted). In ruling on a summary judgment motion, a court must "view the facts and draw reasonable inferences in the light most favorable to the party opposing the summary judgment motion." *Scott v. Harris, 550 U.S. 372, 378, 127 S. Ct. 1769, 167 L. Ed. 2d 686 (2007)* (internal quotations and alterations omitted). "A genuine issue is present when a reasonable trier of fact, viewing all of the record evidence, could rationally find in favor of the non-moving party in light of his burden of proof." *Doe v. Abington Friends Sch., 480 F.3d 252, 256 (3d Cir. 2007)*.

B. Discussion

As should be apparent from the case background, this matter is riddled with factual disputes concerning what Columbia did and did not do prior to constructing the 1278 line and during the post-construction site restoration process. Typically, such disputes would make summary judgment inappropriate. Columbia argues, however, that Plaintiffs' allegations and evidence fail to support their various claims. It further contends that Plaintiffs' claims are precluded by the release they executed prior to Columbia's work on the 1278 line, and raises certain timeliness concerns.

1. The Release

Up first is whether the release executed by Plaintiffs in connection with the 2014 Amendment acts as a bar to their claims. The release **[**15]** is titled "Release of Specific Claims" and reads, in relevant part:

> [T]he undersigned hereby release and discharge Columbia Gas Transmission, LLC, its successors, assigns, affiliates, agents, contractors and subcontractors, from the below listed claims and damages to the date hereof caused by the laying, construction, maintenance, replacement, alteration or removal of its facilities or any other exercise of its rights[.]

It is unclear what specific claims and damages the parties intended to be released: Although the language of the release suggests that it applies only to "the below listed claims and damages," no such list appears within the document. Regardless, by its clear terms, the provision applies only to claims and damages "to the date hereof caused," that is, claims and damages incurred prior to the document's execution. Plaintiffs executed the release on May 21, 2014. Their claims all arise out of the construction and maintenance of the 1278 line, which did not begin until the summer of 2015. Because the release does not absolve Columbia from liability for its post-execution conduct, it does not bar the claims asserted in this suit.

2. The Statute of Limitations

Another threshold **[**16]** issue is the extent to which the relevant limitations period bars recovery for Plaintiffs' alleged damages. The parties agree that a two-year statute of limitations applies to each of Plaintiffs' claims. *See* *42 Pa. Con. Stat. § 5524* (two-year limitations period applies to actions for "injuring personal property," actions based on "tortious conduct," and actions based "upon a statute for a civil penalty or forfeiture"). Plaintiffs filed this action on April 5, 2018. Given the two-year limitations period, Columbia contends that Plaintiffs are precluded from recovering for damages sustained prior to April 5, 2016. This would include, *inter alia*, damages stemming from Columbia's alleged failure to implement adequate E&S controls when constructing the 1278 line in the summer of 2015.

[*420] Plaintiffs agree with Columbia that damages incurred after April 5, 2016 are timely sought. But they urge application of the discovery rule to permit them to recover for damages sustained prior to this date.[4] Their request will be denied.

For statute of limitations purposes, a claim accrues in a property damage action "when the injury occurred or was discovered." *CTS Corp. v. Waldburger, 573 U.S. 1, 8, 134 S. Ct. 2175, 189 L. Ed. 2d 62 (2014)*. Pursuant to Pennsylvania's discovery rule, "the statute of **[**17]** limitations begins to run when the complaining party 'knows, or reasonably should know (1) that he has been injured, and (2) that his injury has been caused by another party's conduct.'" *Miller v. Phila. Geriatric Ctr., 463 F.3d 266, 276 (3d Cir. 2006)* (quoting *Bohus v. Beloff, 950 F.2d 919, 924 (3d Cir. 1991)*). Here, the record establishes that Plaintiffs were aware of the damages they sustained during the 2015 construction of the 1278 line—namely, the July 2015 incident where heavy rain caused sediment-laden runoff to deposit on Plaintiffs' patio and yard and the August 2015 incident where heavy rain caused washout of the restored easement area—when they occurred. Plaintiffs documented both events that summer, taking photographs and videos of the damage, the failed E&S controls, and Columbia's cleanup efforts.

In November 2015, Plaintiff Scott Marcum contacted Columbia's agents to inform them of enhanced stormwater runoff. At that time, Plaintiff expressly complained that this increase was due to Columbia's removal of the water diversion berm on Plaintiffs' property. Columbia's construction manager visited the property the following month, investigated the easement, and told Plaintiff that he saw "an issue with the grade." In mid-December, Plaintiff informed Columbia that he was contemplating **[**18]** bringing suit.

The question of when an injury is discovered for statute of limitations purposes is ordinarily one for the jury. *Gleason v. Borough of Moosic, 609 Pa. 353, 15 A.3d 479, 485 (Pa. 2011)*. But where the salient facts are not in dispute, the court is permitted to determine whether the discovery rule applies. *Fine v. Checcio, 582 Pa. 253, 870 A.2d 850, 858 (Pa. 2005)* ("Where, however, reasonable minds would not differ in finding **[*421]** that a party knew or should have known on the exercise of reasonable diligence of his injury and its cause, . . . the discovery rule does not apply as a matter of law."). Here, Plaintiffs documented their injuries as they occurred and, in 2015, expressly informed Columbia of the very same water diversion concerns at issue in this litigation. With respect to damages incurred prior to April 5, 2016, no fact finder could reasonably conclude that Plaintiffs were unaware of these damages or their cause.

Plaintiffs' only response to the contrary concerns their statutory SWMA claim. They argue that they could not have reasonably discovered the extent of Columbia's alleged SWMA violation until discovery in this action. But Plaintiffs' ignorance of a legal cause of action does not, in itself, require application of the discovery rule. Once a plaintiff "possesses the salient facts concerning **[**19]** the occurrence of his injury and who or what caused it, he has the ability to investigate and pursue his claim. Postponing the commencement of the limitations period until he has actually done so would nullify the justifiable rationale of the statute of limitations[.]" *O'Brien v. Eli Lilly & Co., 668*

---

[4] Plaintiffs also spend much time pressing use of the continuing trespass doctrine. When a party alleges a continuing trespass, it is permitted to recover for damages incurred in the two-year statutory period preceding the suit, even if the original trespass upon which the action is based occurred outside the limitations period. *Kowalski v. TOA PA V, L.P., 2019 PA Super 93, 206 A.3d 1148, 1167-68 (Pa. Super. 2019)*. This Court previously held in Plaintiffs' favor on this issue, finding that Plaintiffs alleged a continuing trespass. *See* *Marcum v. Columbia Gas Transmission, LLC, 423 F. Supp.3d 115, 127 (E.D. Pa. 2019)*. It is unclear why Plaintiffs raise the doctrine again here, given that Columbia's moving brief does not raise the issue and, indeed, only questions Plaintiffs' ability to recover damages sustained prior to April 5, 2016—the same date from which Plaintiffs could recover damages pursuant to the continuing trespass doctrine. *See* *Kowalski, 206 A.3d at 1167*; *Marcum, 423 F. Supp.3d at 127* ("Plaintiffs thus can potentially recover for damages in the two-year statutory period preceding the suit."). In its reply brief, Columbia asserts that the continuing trespass doctrine does not apply and further argues that "all of Plaintiffs' claims for damages in this matter should be dismissed as time-barred." Courts need not address arguments raised for the first time in a reply brief. *See* *Gucciardi v. Bonide Prods., Inc., 28 F. Supp.3d 383, 393 (E.D. Pa. 2014)* ("Where a reply brief raises new arguments in support of a motion for summary judgment, the district court is justified in disregarding them."). Columbia's moving brief only questions Plaintiffs' ability to "recover[] for damages sustained prior to April 5, 2016," and this is the only timeliness argument that will be considered.

F.2d 704, 710 (3d Cir. 1981). Thus, Plaintiffs may not recover for damages incurred prior to April 5, 2016, but remain entitled to seek recovery for damages sustained after this date. *See* Robinson v. Pa. Hosp., 1999 PA Super 217, 737 A.2d 291, 294 (Pa. Super. 1999) ("Should new injuries appear from the original harm, no statute of limitations would bar a subsequent suit for recovery.").

3. The SWMA Claim

Section 13 of Pennsylvania's SWMA requires "[a]ny landowner and any person engaged in the alteration or development of land which may affect storm water runoff characteristics" to:

> implement such measures consistent with the provisions of the applicable watershed storm water plan as are reasonably necessary to prevent injury to health, safety or other property. Such measures shall include such actions as are required:
>
> (1) to assure that the maximum rate of storm water runoff is no greater after development than prior to development activities; or
>
> (2) to manage the quantity, velocity and direction of resulting storm water runoff **[**20]** in a manner which otherwise adequately protects health and property from possible injury.

32 Pa. Stat. Ann. § 680.13. Plaintiffs allege that Columbia violated—and continues to violate—this statute by failing to comply with two municipal ordinances: (1) Caln Township Ordinance Section 88-3, which requires "any person engaging in activities which disturb the topography and vegetation of land" within the township to first secure a grading permit; and, (2) Caln Township Ordinance Section 135-105(B), which, like the SWMA, requires persons "engaged in the alteration or development of land" to "manage the rate, volume, direction, and quality of resulting stormwater runoff in a manner which otherwise adequately protects health, property, and water quality of waters of the commonwealth."

Columbia argues that this claim must be dismissed, for two reasons. First, it contends that the municipal ordinances upon which Plaintiffs premise their SWMA claim are preempted by the FERC order approving the 1278 line. Second, it argues that Plaintiffs fail to provide evidence that Columbia violated the terms of a "county-adopted watershed storm plan" as required to state their SWMA claim. *See* Lincoln Investors, L.P. v. King, 152 A.3d 382, 390 (Pa. Commw. 2016).

[*422] The preemption argument is dealt with **[**21]** first. Although Columbia suggests that the municipal ordinances cited by Plaintiffs are "preempted by FERC," it appears what Columbia means is that these ordinances are preempted by the Natural Gas Act, which "confers upon FERC exclusive jurisdiction over the transportation and sale of natural gas in interstate commerce for resale." Schneidewind v. ANR Pipeline Co., 485 U.S. 293, 300-01, 108 S. Ct. 1145, 99 L. Ed. 2d 316 (1988). Columbia transports and sells natural gas in interstate commerce and is a "natural gas company" subject to FERC regulation under the Act. *See* 15 U.S.C. § 717a(6). The Act requires natural gas companies to obtain from FERC a "certificate of public convenience and necessity" prior to constructing or operating facilities used for the interstate transportation of natural gas. *See id.* § 717f(c).

Columbia obtained such a certificate before beginning work on the 1278 line. It maintains that it was not required to obtain an additional township grading permit or comply with the township's stormwater management ordinances, as neither requirement was mandated in the FERC order approving construction of the 1278 line. Plaintiffs offer no specific response to Columbia's argument that it was not required to obtain a township grading permit prior to installing the pipeline, effectively conceding **[**22]** this point. *See* Skirpan v. Pinnacle Health Hosps., 2010 U.S. Dist. LEXIS 94499, 2010 WL 3632536, at *6 (M.D. Pa. Apr. 21, 2010) (party waives issues unaddressed in its response to summary judgment motion). They do, however, contend that Columbia cannot hide behind the Natural Gas Act to escape post-construction liability for violations of state and local stormwater management provisions.

Federal law is, under the Supremacy Clause, "the supreme Law of the Land." U.S. Const., art. VI, cl. 2. Thus, Congress may preempt state laws through federal legislation. Oneok, Inc. v. Learjet, Inc., 575 U.S. 373, 376, 135 S.

Ct. 1591, 191 L. Ed. 2d 511 (2015). It may do so expressly or implicitly. Id. at 376-77. Where, as here, a statute contains no explicit preemption language, Congress may implicitly preempt state action through "field" or "conflict" preemption. Id. at 377.

Field preemption exists where Congress "intended 'to foreclose any state regulation in the *area*,' irrespective of whether state law is consistent or inconsistent with 'federal standards.'" *Id.* (quoting Arizona v. United States, 567 U.S. 387, 401, 132 S. Ct. 2492, 183 L. Ed. 2d 351 (2012)). "In such situations, Congress has forbidden the State to take action in the *field* that the federal statute pre-empts." *Id.* Conflict preemption, on the other hand, "exists where 'compliance with both state and federal law is impossible,'" *id.* (quoting California v. ARC Am. Corp., 490 U.S. 93, 100, 109 S. Ct. 1661, 104 L. Ed. 2d 86 (1989)), or where the state law "stands as an obstacle to the accomplishment and execution" of the federal law, Williamson v. Mazda Motor of Am., Inc., 562 U.S. 323, 330, 131 S. Ct. 1131, 179 L. Ed. 2d 75 (2011) (quoting Hines v. Davidowitz, 312 U.S. 52, 67, 61 S. Ct. 399, 85 L. Ed. 581 (1941)).

Columbia does not specify **[**23]** which form of implied preemption it believes to be at issue here. The United States Supreme Court has found FERC's regulatory authority under the Natural Gas Act to be field preemptive where a state law "amounts to a regulation in the field of gas transportation and sales for resale that Congress intended FERC to occupy." Schneidewind, 485 U.S. at 304. Thus, in *Schneidewind*, a state law requiring natural gas companies to obtain state approval before issuing long-term securities was preempted by the Natural Gas **[*423]** Act, because the law was "directed at . . . the control of rates and facilities of natural gas companies," "precisely the things over which FERC has comprehensive authority." Id. at 308.

In a later case, the Court clarified that the Natural Gas Act was not intended to limit the regulatory power of the states, but rather "was drawn with meticulous regard for the continued exercise of state power." Oneok, 575 U.S. at 385-86 (quoting Panhandle E. Pipe Line Co. v. Pub. Serv. Comm'n of Ind., 332 U.S. 507, 517-18, 68 S. Ct. 190, 92 L. Ed. 128 (1947)); *see* id. at 387 (Natural Gas Act was not intended to preempt "traditional" state regulation). Considering whether the Natural Gas Act field preempts state ***antitrust law*** as applied to natural gas companies, the Court emphasized "the importance of considering the *target* at which the state law *aims* in determining whether that **[**24]** law is pre-empted." Id. at 385. Where a law is not "aimed at natural-gas companies in particular, but rather all businesses in the marketplace," it will not be field preempted, id. at 387, although conflict preemption principles may still apply, id. at 389. Because the state laws at issue were aimed primarily at the field of antitrust enforcement, rather than at natural gas regulation, the Court found that these laws were not field preempted.

Here, the state and local stormwater management laws cited by Plaintiffs do not target the natural gas industry, but rather apply broadly to "[a]ny landowner and any person engaged in the alteration or development of land which may affect storm water runoff characteristics." *See* 32 Pa. Stat. Ann. § 680.13. They are, moreover, directed at protecting "health and property from possible injury," *see id.*, a subject traditionally left to the States to regulate, *see* Home Bldg. & Loan Ass'n v. Blaisdell, 290 U.S. 398, 434, 54 S. Ct. 231, 78 L. Ed. 413 (1934) (states have inherent "authority to safeguard the vital interests of [their] people"). The Natural Gas Act does not field preempt these laws.

So, the only remaining question is whether these stormwater management provisions are conflict preempted. Courts regularly apply conflict preemption to state and local actions which serve to prohibit or unreasonably **[**25]** delay the construction of pipeline facilities approved by FERC. *See, e.g.*, PennEast Pipeline Co., LLC v. Permanent Easement of 0.06 Acres in Moore Twp., Northampton Cty., Pa., 2019 U.S. Dist. LEXIS 158149, 2019 WL 4447981, at *8 (E.D. Pa. Sept. 17, 2019) ("[S]tate and local regulation is preempted by the NGA to the extent they conflict with federal regulation or would delay the construction and operation of facilities approved by [FERC]."); Algonquin Gas Transmission, LLC v. Weymouth, Ma., 919 F.3d 54, 63-65 (1st Cir. 2019) (town's denial of a permit for a natural gas compressor station pursuant to a local wetlands ordinance conflicted with FERC project approval); Islander E. Pipeline Co., LLC v. Blumenthal, 478 F. Supp.2d 289, 294-95 (D. Conn. 2007) (requirement that natural gas company obtain a state permit prior to constructing pipeline conflicted with FERC project approval). But this case is distinguishable. The 1278 line has already been installed and is operational; thus, the core concern of these conflict preemption cases—namely, that application of state law will obstruct Congress's purposes in enacting the

Natural Gas Act and empowering FERC with the authority to facilitate the interstate transmission of natural gas—is not in play.

At heart, Plaintiffs' Complaint seeks damages for injuries caused by Columbia's alleged failure to comply with the provisions **[*424]** of the SWMA. Columbia fails to identify how this action for damages implicates FERC's authority under the Natural Gas Act to regulate the transportation of natural **[**26]** gas, *see, e.g.*, *Abramson v. Fla. Gas Transmission Co., 909 F. Supp. 410, 416-17 (Nov. 20, 1995)* (state tort law does not conflict with federal regulation of transportation and sale of natural gas), and fails to identify any authority finding preemption under similar circumstances. Accordingly, the Court declines to find the stormwater management laws relied on by Plaintiffs preempted by the Natural Gas Act.

Columbia next argues that Plaintiffs' allegations and evidence fail to support their SWMA claim. The contention is two-pronged: First, Columbia notes that to state a claim under *section 13 of the SWMA*, Plaintiffs must make "a showing that the landowner's conduct violated the terms of a county-adopted watershed storm water plan." *See Marcum, 423 F. Supp.3d at 125* (quoting *Lincoln, 152 A.3d at 390*). The parties agree that the relevant "county-adopted watershed storm water plan" is Chester County's Act 167 Stormwater Management Plan. Columbia argues that Plaintiffs fail to establish which terms of the Plan it is alleged to have violated.

This first argument is quickly put to bed. Plaintiffs argue that Columbia violated section 135-105 of the Caln Township Stormwater Management Ordinance, which adopts in its entirety Section 105(B) of Act 167's Stormwater Management Model Ordinance:

> [A]ny landowner or any person engaged in a regulated activity, including **[**27]** but not limited to the alteration or development of land, which may affect stormwater runoff characteristics, shall implement such measures as are reasonably necessary to prevent injury to health, safety, or other property. Such measures also shall include actions as are required to manage the rate, volume, direction, and quality of resulting stormwater runoff in a manner which otherwise adequately protects health, property, and water quality of waters of the commonwealth.

The township was required, pursuant to the SWMA, to adopt this provision. *See* *32 Pa. Stat. Ann. § 680.11* ("Within six months following adoption and approval of the watershed storm water plan, each municipality shall adopt or amend, and shall implement such ordinances and regulations . . . as are necessary to regulate development within the municipality in a manner consistent with the applicable watershed storm water plan and the provisions of this act."). Plaintiffs adequately identify which terms of Act 167 it believes Columbia to have violated.

Second, Columbia argues that it cannot be liable under the SWMA, because it complied with all of the Act 167 requirements necessary to obtain the state permits required by FERC. It is undisputed that Columbia's **[**28]** plans and submissions for the issuance of the required permits were reviewed by both the Chester County Conservation District and the Pennsylvania Department of Environmental Protection ("PADEP") and were found to be in conformance with Act 167. It is also undisputed that the PADEP issued Columbia an ESCGP-2 permit, allowing it to proceed with the 1278 pipeline project. But Columbia fails to clarify how these facts bear on its alleged liability under *section 13 of the SWMA*. Pursuant to that section, a landowner must, when altering or developing land, "manage the quantity, velocity and direction of resulting storm water runoff in a manner which otherwise adequately protects health and property from possible injury." *Id.* *§ 680.13*. The Act provides a civil remedy in damages for persons "injured by conduct which violates the provisions of *section 13*." *Id.* **[*425]** *§ 680.15(c)*. Columbia points to no statutory safe harbor provision insulating a landowner from liability for injuries caused by increased stormwater runoff if it obtains the requisite permits prior to engaging in land alteration.

Plaintiffs offer enough evidence from which a factfinder could conclude that Columbia's land alteration activities resulted in enhanced stormwater runoff, which **[**29]** has in turn damaged Plaintiffs' property. Whether Columbia's stormwater management efforts were sufficient to avoid SWMA liability is now a question for a jury if this matter proceeds to trial.

4. The Nuisance and Trespass Claims

Columbia also challenges Plaintiffs' nuisance and trespass claims. Because Columbia fails to identify a basis for granting summary judgment as to either claim, both will survive.

As to the nuisance claim, Columbia suggests that Plaintiffs premise this claim on Columbia's "fail[ure] to comply with *§ 680.13 of the Pennsylvania Storm Water Management Act*" and should therefore be dismissed for the same reasons as the SWMA claim. Columbia misreads Plaintiffs' Complaint. Although Plaintiffs' nuisance allegations do, like their SWMA allegations, fault Columbia for failing to "(1) assure that the maximum rate of storm water runoff is no greater after development than prior to development activities, and (2) manage the quantity, velocity and direction of resulting storm water runoff in a manner which otherwise adequately protects plaintiffs' property," these allegations do not suggest that Plaintiffs' nuisance claim is premised on their SWMA claim. Columbia fails, moreover, to **[**30]** provide any legal analysis or citation specific as to why summary judgment should be granted on Plaintiffs' nuisance claim. *See Laborers' Int'l Union of N. Am., AFL-CIO v. Foster Wheeler Energy Corp., 26 F.3d 375, 398 (3d Cir. 1994)* ("An issue is waived unless a party raises it in its opening brief, and for those purposes 'a passing reference to an issue . . . will not suffice to bring that issue before this court.'" (alteration in original) (quoting *Simmons v. City of Philadelphia, 947 F.2d 1042, 1066 (3d Cir. 1991)*)).

Columbia's briefing on Plaintiffs' trespass claim is similarly sparse. Indeed, Columbia fails to make any argument at all as to the adequacy of Plaintiffs' trespass allegations and evidence. Although Plaintiffs will bear the burden of proving these claims at trial, Columbia—as the moving party—bears the initial burden of showing the basis for its summary judgment motion. *Celotex Corp. v. Catrett, 477 U.S. 317, 323, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986)*. This requires Columbia to do more than merely state that Plaintiffs' nuisance and trespass claims should be dismissed; it must provide some ground for dismissal. It fails to do so. Ergo, these two claims will proceed.

5. The Breach of Fiduciary Duty Claim

The same cannot be said for Plaintiffs' breach of fiduciary duty claim.

To establish a breach of fiduciary duty, Plaintiffs must show: (1) the existence of a fiduciary relationship; (2) the defendant's failure to act **[**31]** in good faith and solely for the benefit of the plaintiff with respect to matters within the scope of that relationship; (3) that the plaintiff suffered an injury; and, (4) that defendant's failure to act was a "real factor" in producing the plaintiff's injury. *Conquest v. WMC Mortg. Corp., 247 F. Supp.3d 618, 633-34 (E.D. Pa. 2017)* (quoting *Dinger v. Allfirst Fin., Inc., 82 F. App'x 261, 265 (3d Cir. 2003)*). Columbia questions only the first requirement, arguing that Plaintiffs fail to allege or produce evidence of a fiduciary relationship between the parties.

[*426] "A fiduciary duty is the highest duty implied by law." *Yenchi v. Ameriprise Fin., Inc., 639 Pa. 618, 161 A.3d 811, 819 (Pa. 2017)*. It "requires a party to act with the utmost good faith in furthering and advancing the other person's interests." *Id. at 820*. Given the significance of this obligation, a fiduciary duty must be imposed only "where the attendant conditions make it certain that a fiduciary relationship exists." *Id.*

Fiduciary relationships rarely arise in the context of arms-length transactions. *See id. at 822-23*. This is how Columbia characterizes its relationship with Plaintiffs: It argues that the parties' negotiation and execution of the 2014 Amendment was a "routine, arms-length business transaction" which took place over a period of 18 months, during which time Plaintiffs had ample opportunity to and did in fact consult with counsel. It notes **[**32]** that Plaintiffs voluntarily entered into the 2014 Amendment and received a negotiated sum of $35,000 in exchange.

To Plaintiffs, the parties' transaction was anything but "routine." They note that a fiduciary relationship may arise "when the circumstances make it certain the parties do not deal on equal terms, but, on the one side there is an overmastering influence, or, on the other, weakness, dependence or trust, justifiably reposed." *Id. at 820*. Such was the case here, they say: Although Plaintiffs negotiated for compensation of $35,000, they never had the option to refuse to grant an easement in light of Columbia's condemnation powers and were forced to contract on Columbia's terms.

Given the disparity in bargaining power between the parties, their execution of the 2014 Amendment cannot fairly be characterized as a "routine" business transaction. But neither can Columbia's substantial bargaining power be a basis for imposing a fiduciary duty. This power was bestowed by Congress pursuant to the Natural Gas Act, which authorizes gas companies like Columbia to acquire property by eminent domain if: (1) the company holds a certificate of public convenience and necessity from FERC; (2) it is unable **[**33]** to acquire the easement via negotiation with the landowner; and, (3) the landowner seeks an amount greater than $3,000. *See* *Transcon. Gas Pipe Line Co. v. Permanent Easements for 2.14 Acres & Temp. Easements for 3.59 Acres in Conestoga Twp., Lancaster Cty., Pa., Tax Parcel No. 1201606900000, 907 F.3d 725, 729 (3d Cir. 2018)* (citing *15 U.S.C. § 717f(h)*). Plaintiffs point to no language in the Act imposing on gas companies a corresponding duty to act solely for the benefit of the landowners whose property they condemn or otherwise obtain. Nor does the language of the 2014 Amendment create such a duty: It merely defines the parties' rights with respect to the easement area.

Plaintiffs fail, moreover, to provide any authority imposing a fiduciary relationship under similar circumstances. Their reliance on *Adair v. EQT Production Co., 2011 U.S. Dist. LEXIS 52932, 2011 WL 4527433 (W.D. Va. Jan. 21, 2011)*, is misplaced. That case did not involve the installation of natural gas pipelines, but rather the drilling and production of coal bed methane ("CBM"), a natural gas residing in coal seams. CBM was long considered a waste product until innovations in extraction technologies allowed for its commercial capture and sale. *2011 U.S. Dist. LEXIS 52932, [WL] at *1*. Given its newfound value, a question arose as to whether CBM was owned by landowners who retained rights to the gas estate/interest in the land, or by the entities or individuals who owned the coal estate/interest. *Id.* To avoid having ownership disputes slow the development of CBM, Virginia **[**34]** enacted a compulsory pooling statute, whereby all interests or estates would be **[*427]** pooled into CBM drilling units. *Id.* Pursuant to the statute, gas well operators would be appointed to drill for and produce CBM from the drilling units. *Id.* In drilling units where there were conflicting claims of CBM ownership or where the owners could not be found, the statute required unit operators to "deposit any funds due to these interests into escrow, to be held pending identification and location of the owner or a final agreement or determination as to ownership of the CBM estate/interest." *Id.*

The question presented to the *Adair* court was whether unit operators owe a fiduciary duty to properly account for and pay into escrow the funds due to potential CBM owners. That court said yes, recognizing that absent such a duty, the mineral interest owner would have "no assurance of ever receiving any benefit of their bargain." *2011 U.S. Dist. LEXIS 52932, [WL] at *25*. This situation is factually distinct from the present matter: Under Virginia's compulsory pooling statute, unit operators are placed in charge of funds due to potential CBM owners, putting the operators in a position similar to that of a trustee. *See* *Hale v. CNX Gas Co., LLC, 2011 U.S. Dist. LEXIS 52935, 2011 WL 4527447, at *26 (W.D. Va. Jan. 21, 2011)*. No similar statutory requirement **[**35]** exists here.

Plaintiffs also rely on Pennsylvania's Environmental Rights Amendment, *Pa. Const. art. I, § 27*, as a basis for finding a fiduciary relationship. This constitutional provision expressly names the Commonwealth as "trustee" of Pennsylvania's public natural resources and imposes on it a fiduciary duty "to 'conserve and maintain' the corpus of the trust." *Pa. Envt'l Def. Found. v. Commonwealth, 640 Pa. 55, 161 A.3d 911, 932 (Pa. 2017)* (quoting *Robinson Twp. v. Commonwealth, 623 Pa. 564, 83 A.3d 901, 957 (Pa. 2013)*). Plaintiffs fail to clarify how this provision's imposition of a fiduciary duty upon the Commonwealth to act in the best interest of its citizens with respect to public natural resources bears on Plaintiffs' request for imposition of a fiduciary duty on Columbia to act in the best interest of Plaintiffs with respect to their personal property. Plaintiffs cite to no authority—constitutional, statutory, or otherwise—supporting the imposition of a fiduciary duty between a natural gas company and a landowner when the former obtains an easement from the latter for the installation of a gas pipeline. Thus, their breach of fiduciary duty claim will be dismissed.

6. The Negligent Construction and Failure to Maintain Claim

Finally, Columbia seeks dismissal of Plaintiffs' negligence claim. To succeed on this claim, Plaintiffs must establish that: **[**36]** (1) Columbia owed Plaintiffs a duty of care; (2) Columbia breached this duty; and, (3) the breach resulted in injury. *McCandless v. Edwards, 2006 PA Super 247, 908 A.2d 900, 904 (Pa. Super. 2006)*. Columbia contends that Plaintiffs fail to produce evidence suggesting that it breached its duty of care. Specifically, it argues that the applicable duty of care was set forth by the requirements of FERC relative to the construction of the pipeline. Because, says Columbia, there is no evidence that any FERC regulations were violated, its conduct with respect to the easement area could not have been negligent.

Again, Columbia fails to cite relevant authority in support of its position. But it does note that:

> the determination of whether an act or failure to act constitutes negligence, of any degree, in view of all the evidence has always been particularly committed to determination by a jury. It is an issue that may be removed from consideration by a jury and decided as a matter of law only where the case is entirely free from **[*428]** doubt and there is no possibility that a reasonable jury could find negligence.

Snead v. Soc'y for Prevention of Cruelty to Animals of Pa., 2007 PA Super 204, 929 A.2d 1169, 1183 (2007) (citations omitted). Here, Plaintiffs present evidence from which a jury could conclude that various water diversion features were removed from Plaintiffs' property **[**37]** during construction of the 1278 line. There is evidence indicating that Columbia's construction manager saw an issue with the property grading following installation. There is no indication that Columbia ever attempted to address this issue. Plaintiffs have documented water-related damage to their property including land-subsidence problems, which their expert attributes to accelerating surface and subsurface erosion.[5] From this evidence, a reasonable jury could find that the amount of water runoff on Plaintiffs' property has increased since the installation of the 1278 line, and that Columbia was negligent in failing to implement adequate stormwater management measures.

So, the negligence claim will proceed, along with the nuisance, trespass, and SWMA claims, limited by the timeliness concerns addressed above. An appropriate order follows.

July 19, 2021

BY THE COURT:

/s/ Wendy Beetlestone, J.

WENDY BEETLESTONE, J.

ORDER

AND NOW, this 19th day of July, 2021, upon consideration of Defendant Columbia Gas Transmission, LLC's ("Columbia") Motion for Summary Judgment (ECF Nos. 61 & 85) and Plaintiffs' response thereto (ECF Nos. 84 & 86-1); Columbia's Motion to Preclude the Testimony and Opinions **[**38]** of Chad Ingram (ECF No. 60) and Plaintiffs' response thereto (ECF No. 81); and Columbia's Motion to Preclude the Testimony and Opinions of James Tupitza (ECF No. 59) and Plaintiffs' response thereto (ECF No. 80), **IT IS ORDERED** that:

1. Columbia's Motion for Summary Judgment (ECF No. 61) is **GRANTED IN PART** and **DENIED IN PART**:

---

[5] Columbia takes issue with the inability of Plaintiffs' expert to state with certainty whether the sinkhole which began to develop on Plaintiffs' property in February 2018 was due to the presence of soluble limestone in the sinkhole area or Columbia's reliance on poor backfilling methods when constructing the 1278 line. Columbia may seek to explore this issue during cross-examination, *see Kannankeril, 128 F.3d at 806*, but it is not dispositive to the present motion. Plaintiffs' primary contention is that this and their other water-related injuries were caused by enhanced stormwater runoff, which in turn was caused by Columbia's ongoing failure to install adequate stormwater controls.

a. With respect to Count Two (negligent construction and failure to maintain), Count Four (violation of the Pennsylvania Storm Water Management Act), Count Five (nuisance), and Count Six (trespass), the Motion is **DENIED**.

b. With respect to Count Seven (breach of fiduciary duty), the Motion is **GRANTED**, and this claim is **DISMISSED WITH PREJUDICE**.

2. Columbia's Motion to Preclude the Testimony and Opinions of Chad Ingram (ECF No. 60) is **DENIED.**

3. Columbia's Motion to Preclude the Testimony and Opinions of James Tupitza (ECF No. 59) is **DENIED WITHOUT PREJUDICE**.

BY THE COURT:

/s/ Wendy Beetlestone, J.

LexisNexis® Headnotes

Civil Procedure > Judgments > Preclusion of Judgments > Law of the Case

HN1[] **Preclusion of Judgments, Law of the Case**

Under the law of the case doctrine, when a court decides on a rule of law, that decision should continue to govern the same issues in subsequent stages in the same case. This rule of practice promotes the finality and efficiency of the judicial process by protecting against the agitation of settled issues. While courts should be loath to revisit prior decisions of its own or of a coordinate court absent extraordinary circumstances, they have the power to do so in any circumstance.

Civil Procedure > Dismissal > Involuntary Dismissals > Failure to Prosecute

HN2[] **Involuntary Dismissals, Failure to Prosecute**

9th Cir. R. 42-1 contains no indication that a dismissal for failure to prosecute an appeal to hearing necessarily constitutes an adjudication on the merits.

Bankruptcy Law > Procedural Matters > Judicial Review > Jurisdiction

HN3[] **Judicial Review, Jurisdiction**

Circuit courts may establish a bankruptcy appellate panel composed of bankruptcy judges to hear and determine certain appeals from bankruptcy courts. *28 U.S.C.S. § 158(a)*, *(b)(1)*, *(c)(1)*. The decisions of the bankruptcy appellate panel may be appealed to the circuit courts. *28 U.S.C.S. § 158(c)(2)*, *(d)(1)*.

Civil Procedure > ... > Preclusion of Judgments > Estoppel > Collateral Estoppel

HN4[] **Estoppel, Collateral Estoppel**

Under collateral estoppel, once a court has decided an issue of fact or law necessary to its judgment, that decision may preclude relitigation of the issue in a suit on a different cause of action involving a party to the first case. For the doctrine to apply, the party asserting preclusion must establish, inter alia, that the first proceeding ended with a final judgment on the merits.

Patent Law > Jurisdiction & Review > Standards of Review

HN5[] **Jurisdiction & Review, Standards of Review**

An appellate court reviews issues not unique to patent law under the law of the regional circuit in which the appeal would otherwise lie.

Civil Procedure > Appeals > Standards of Review > De Novo Review

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN6[] **Standards of Review, De Novo Review**

The Ninth Circuit reviews the grant of a motion to dismiss de novo. To survive a motion to dismiss under *Fed. R. Civ. P. 12(b)(6)*, the complaint must contain sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face. Accordingly, an appellate court will affirm a dismissal for failure to state a claim where there is no cognizable legal theory or an absence of sufficient facts alleged to support a cognizable legal theory.

Civil Procedure > Parties > Pro Se Litigants > Pleading Standards

HN7[] **Pro Se Litigants, Pleading Standards**

Pro se litigants remain bound by the rules of procedure, even though courts are to construe their pleadings liberally.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN8[] **Complaints, Requirements for Complaint**

The failure to state a plausible claim is not a mere technical deficiency but a substantive shortcoming in a plaintiff's claim. Under the Federal Rules of Civil Procedure, plaintiffs must state a cognizable basis for relief—based on their factual allegations and without regard to their ability to prove those allegations—before they can proceed to proving the allegations and obtaining relief. A plaintiff's inability to simply state a cognizable basis for relief and the facts to support it is a basic deficiency that should be exposed at the point of minimum expenditure of time and money by the parties and the court.

Constitutional Law > Bill of Rights > Fundamental Rights > Eminent Domain & Takings

Real Property Law > ... > Elements > Involuntary Acquisition & Diminution of Value > Takings

HN9[] **Fundamental Rights, Eminent Domain & Takings**

The Constitution generally protects individual rights only from government action, not from private action. Included in these individual rights is the *Fifth Amendment's* guarantee against government seizure of private property for public use without just compensation. The *Takings Clause of the Fifth Amendment* does not apply to a private party unless the private action may fairly be treated as that of the state.

Copyright Law > ... > Subject Matter > Statutory Copyright & Fixation > Expression & Idea Distinguished

Copyright Law > ... > Subject Matter > Statutory Copyright & Fixation > Scope of Protection

HN10[] **Statutory Copyright & Fixation, Expression & Idea Distinguished**

The copyright laws do not protect concepts or ideas in copyrighted works.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN11[] **Motions to Dismiss, Failure to State Claim**

Threadbare recitals of the elements of a cause of action, supported by mere conclusory statements, do not suffice to state a cognizable claim.

Copyright Law > Scope of Copyright Protection > Publication

HN12[] **Scope of Copyright Protection, Publication**

17 U.S.C.S. § 705 plainly permits public inspection of certain records and indexes, as well as the articles deposited in connection with completed copyright registrations and retained under the control of the Copyright Office. *17 U.S.C.S. § 705(b)*; *37 C.F.R. § 201.2*.

Civil Procedure > Parties > Capacity of Parties

HN13[] **Parties, Capacity of Parties**

Under the Federal Rules of Civil Procedure, for parties other than an individual or corporation, their capacity to be sued is determined by the law of the state where the court is located. *Fed. R. Civ. P. 17(b)*.

Business & Corporate Law > ... > Corporate Existence, Powers & Purpose > Powers > Ability to Engage in Litigation

HN14[] **Powers, Ability to Engage in Litigation**

California's Corporation Code only identifies a corporation or association as entities that may be sued. *Cal. Corp. Code § 105*. Under California law, a plaintiff may not sue a corporation's board of directors as an entity separate from the corporation.

Antitrust & Trade Law > Clayton Act > Claims

Antitrust & Trade Law > Clayton Act > Scope

HN15[] **Clayton Act, Claims**

Section 14 of the Clayton Act extends a corporation's violation of a penal provision of the antitrust laws to individual directors who authorized or ordered the acts constituting the violation. *15 U.S.C.S. § 24*.

Business & Corporate Compliance > ... > Sole Proprietorships > Business & Corporate Law > Sole Proprietorships

HN16[] **Businesses & Corporations, Sole Proprietorships**

Under Ohio law, a sole proprietorship has no legal identity separate from that of the individual who owns it.

Constitutional Law > Congressional Duties & Powers > Bills of Attainder & Ex Post Facto Clause > Bills of Attainder

HN17[] Bills of Attainder & Ex Post Facto Clause, Bills of Attainder

Bills of attainder are legislative acts, no matter what their form, that apply either to named individuals or to easily ascertainable members of a group in such a way as to inflict punishment on them without a judicial trial. *U.S. Const. art. I, §§ 9-10*.

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Civil Procedure > ... > Pretrial Judgments > Default & Default Judgments > Default Judgments

Civil Procedure > ... > Pretrial Judgments > Default & Default Judgments > Relief From Default

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

Civil Procedure > Judgments > Relief From Judgments

HN18[] Standards of Review, Abuse of Discretion

The Ninth Circuit reviews denials of motions for default judgment, leave to amend, and reconsideration for abuse of discretion. A district court abuses its discretion when it makes an error of law, when it rests its decision on clearly erroneous findings of fact, or when the appellate court is left with a definite and firm conviction that the district court committed a clear error of judgment.

Civil Procedure > ... > Pretrial Judgments > Default & Default Judgments > Default Judgments

Civil Procedure > ... > Default & Default Judgments > Default Judgments > Entry of Default Judgments

Civil Procedure > ... > Default & Default Judgments > Entry of Default > Failure to Pursue Cause

HN19[] Default & Default Judgments, Default Judgments

Fed. R. Civ. P. 55 provides a two-step process for obtaining an entry of default judgment. First, a party must secure an entry of default by the court clerk. *Fed. R. Civ. P. 55(a)*. The entry of default is an official recognition of the fact that one party is in default. A defendant who fails to answer within the time specified by the rules is in default even if that fact is not officially noted, i.e., even if there is no entry of default. Second, only after an entry of default may a party seek a default judgment.

Civil Procedure > ... > Pretrial Judgments > Default & Default Judgments > Relief From Default

Civil Procedure > Judgments > Relief From Judgments

HN20[] Default & Default Judgments, Relief From Default

A district court may set aside an entry of default for good cause under *Fed. R. Civ. P. 55(c)* or a final default judgment under *Fed. R. Civ. P. 60(b)*. *Fed. R. Civ. P. 55(c)*.

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

HN21[] Amendment of Pleadings, Leave of Court

Fed. R. Civ. P. 15(a) provides that a party may amend its complaint once as a matter of course before a responsive pleading is served. Fed. R. Civ. P. 15(a)(1). In all other cases, a party may only amend its pleading with the opposing party's written consent or the court's leave. Fed. R. Civ. P. 15(a)(2). A court should freely give leave when justice so requires. But the liberality in granting leave to amend is subject to the qualification that amendment of the complaint does not cause the opposing party undue prejudice, is not sought in bad faith, and does not constitute an exercise in futility.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN22[] Motions to Dismiss, Failure to State Claim

A court deciding a Fed. R. Civ. P. 12(b)(6) motion must accept all factual allegations in the complaint as true. No evidentiary proof of factual allegations is required.

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

HN23[] Standards of Review, Abuse of Discretion

An abuse of discretion occurs where a district court abuses its discretion when it makes an error of law, when it rests its decision on clearly erroneous findings of fact, or when the appellate court is left with a definite and firm conviction that the district court committed a clear error of judgment.

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Governments > Courts > Rule Application & Interpretation

Evidence > Judicial Notice

HN24[] Standards of Review, Abuse of Discretion

The Ninth Circuit reviews the decision to take judicial notice for abuse of discretion. It reviews a district court's compliance with local rules under the same standard.

Evidence > Judicial Notice > Adjudicative Facts > Facts Generally Known

Evidence > Judicial Notice > Adjudicative Facts > Verifiable Facts

HN25[] Adjudicative Facts, Facts Generally Known

A court may only take judicial notice of adjudicative facts—facts of a particular case—that are not subject to reasonable dispute. Fed. R. Evid. 201.

Constitutional Law > ... > Fundamental Rights > Procedural Due Process > Scope of Protection

HN26[] **Procedural Due Process, Scope of Protection**

An opportunity to be heard does not require an oral or evidentiary hearing on the issue. The opportunity to brief the issue fully satisfies due process requirements.

Civil Procedure > Pleading & Practice > Motion Practice > Content & Form

HN27[] **Motion Practice, Content & Form**

Fed. R. Civ. P. 78 permit courts by rule or order to provide for submitting and determining motions on briefs, without oral hearings. *Fed. R. Civ. P. 78(b)*.

Opinion by: O'MALLEY

Opinion

O'MALLEY, *Circuit Judge*.

Sara Elizabeth Siegler—and, purportedly, Sara Elizabeth Siegler ("SES"), a sole proprietorship that she owns and operates—appeals several decisions of the United States District Court for the Southern District of California. These include the denial of her motion for default judgment, the dismissals of her First and Second Amended Complaints, and the denials of her motions for reconsideration **[*2]** and motion for leave to amend. *See Siegler v. Sorrento Therapeutics, Inc. (Siegler I), No. 3:18-cv-01681-GPC-NLS, 2018 U.S. Dist. LEXIS 186709, 2018 WL 9516052 (S.D. Cal. Oct. 31, 2018)*; *Siegler v. Sorrento Therapeutics, Inc. (Siegler II), No. 3:18-cv-01681-GPC-NLS, 2019 U.S. Dist. LEXIS 23779, 2019 WL 581719 (S.D. Cal. Feb. 13, 2019)*; *Siegler v. Sorrento Therapeutics, Inc. (Siegler III), No. 3:18-cv-01681-GPC-MSB, 2019 U.S. Dist. LEXIS 62813, 2019 WL 1574321 (S.D. Cal. Apr. 11, 2019)*; *Siegler v. Sorrento Therapeutics, Inc. (Siegler IV), No. 3:18-cv-01681-GPC-NLS, 2019 U.S. Dist. LEXIS 103674, 2019 WL 2549248 (S.D. Cal. June 20, 2019)*; *Siegler v. Sorrento Therapeutics, Inc. (Siegler V), No. 3:18-cv-01681-GPC-NLS, 2019 U.S. Dist. LEXIS 129755, 2019 WL 3532294 (S.D. Cal. Aug. 2, 2019)*; *Siegler v. Sorrento Therapeutics, Inc. (Siegler VI), No. 3:18-cv-01681-GPC-MSB, 2019 U.S. Dist. LEXIS 216776, 2019 WL 6877594 (S.D. Cal. Dec. 17, 2019)*. Because we are unpersuaded by Siegler's arguments, we *affirm*.

I. BACKGROUND

A. Factual Background

Given the procedural posture of this matter, we assume the facts Siegler alleges are true. Siegler, a resident of Ohio, owns and operates an Ohio-based sole proprietorship in her own name, SES. According to Siegler, SES is "an early stage micro-entity without any marketed pharmaceutical products to date" and a "potential participant in the CAR T cell pharmaceutical market both domestically and abroad."[1] *Siegler II, 2019 U.S. Dist. LEXIS 23779, 2019 WL 581719, at *2*. In 2013, Siegler began collaborating with Dr. Richard Paul Junghans on developing new CAR T cell-based therapeutics for virology and oncology indications. See *id.* As part of the collaboration, Siegler authored two scientific articles, "In Vivo Testing of 3rd Generation Anti-CEA Designer CAR T Cells with Bcl-XL in Pancreatic Cancer" and "Phase 1b/2 Study of [2nd Generation] Anti-CEA Designer CAR T Cells in Breast Cancer."[2] *Id.* In 2015, Siegler registered these articles with the United States Copyright Office. *Id.* Around this time, Siegler made plans to use a facility at Prospect CharterCARE Roger Williams Medical Center LLC ("RWMC") to develop **[*3]** her research. *Id.*

Meanwhile, Dr. Junghans became employed on a part-time basis at Tufts Medical Center, a non-profit medical institution that is incorporated and has its principal place of business in Massachusetts. *See 2019 U.S. Dist. LEXIS 23779, [WL] at *2, *17*. Dr. Junghans also founded a company, BDL Products, Inc. *2019 U.S. Dist. LEXIS 23779, [WL] at *2*. TNK Therapeutics, Inc., a wholly owned subsidiary of Sorrento Therapeutics, Inc., later acquired BDL Products. *See 2019 U.S. Dist. LEXIS 23779, [WL] at *3*. They executed a Stock Purchase Agreement that was allegedly contingent on an exclusive license to several CARs between TNK Therapeutics and CARgenix Holdings LLC. *Id.* According to Siegler, these agreements contained a restrictive covenant that prohibited Dr. Junghans and Tufts Medical Center from working with her on their original collaboration. *Id.* Siegler ultimately terminated her relationship with Dr. Junghans. *Id.*

In 2016, Sorrento Therapeutics and TNK Therapeutics entered into an Immunotherapy Research Collaboration Agreement with RWMC. *Id.* According to Siegler, the agreement effectively precluded her from using the RWMC facility at which she planned to develop her research. *Id.* A 2018 extension of the agreement expressly placed the operation of the RWMC facility **[*4]** under Sorrento Therapeutics's management. *See id.*

Sorrento Therapeutics also executed a Sponsored Research Agreement with Tufts Medical Center. *2019 U.S. Dist. LEXIS 23779, [WL] at *4*. Under that contract, Sorrento Therapeutics awarded Tufts Medical Center funding for "discrete research to be conducted by Dr. Junghans at Tufts Medical Center in Boston, Massachusetts." *Id.* The two entities executed a second Sponsored Research Agreement the next year. *See id.*

Around this time in 2016, Sorrento Therapeutics and TNK Therapeutics entered into several more contracts with other companies. These included joint-venture agreements to commercialize anti-CEA CAR T constructs abroad and licenses to CAR T constructs. *See id.*

Additionally, in 2016, RWMC initiated a clinical trial to study the use of anti-CEA CAR T cells as a potential treatment for liver and pancreatic cancers. *2019 U.S. Dist. LEXIS 23779, [WL] at *3*.

Finally, RWMC filed two U.S. patent applications, No. 15/210,818 ("the '818 application") and No. 15/099,370 ("the '370 application"). *2019 U.S. Dist. LEXIS 23779, [WL] at *4*. Tufts Medical Center also filed a provisional application, Application No. 62/362,825 ("the '825 application"). *See id.* These applications related to anti-CEA CAR T cell constructs. The U.S. Patent and Trademark **[*5]** Office has only granted the '818 application, which issued on September 11, 2018, as U.S. Patent No. 10,071,118 ("the '118 patent"). *See id.*

B. Procedural History

1. Dismissal of the First Amended Complaint

On July 24, 2018, Siegler and SES sued Sorrento Therapeutics, TNK Therapeutics, CARgenix Holdings, BDL Products, and Sorrento Therapeutics's CEO Dr. Henry Ji (collectively, the "Sorrento Defendants"), as well as the Board of Directors of Sorrento Therapeutics, RWMC, an equity owner of CARgenix Holdings named Dr. Steven C. Katz, and Dr. Junghans. On August 20, 2018, Siegler and SES filed a First Amended Complaint as a matter of right, naming Tufts Medical Center as an additional defendant.

---

[1] CAR T cells, or CARs, are chimeric antigen receptor T cells. CAR T cells are a potential cancer treatment.

[2] Anti-CEA CAR T cells target the carcinoembryonic antigen ("CEA") on tumor cells.

According to the First Amended Complaint, the defendants unlawfully researched anti-CEA CAR T cell constructs, mentioned them in corporate presentations, and filed related patent applications. Based on these allegations, Siegler asserted claims of copyright infringement and trade secret misappropriation, as well as a *Fifth Amendment* takings claim. Based on her allegations of the defendants' various business and contractual dealings, Siegler also asserted violations of the *Sherman Act*, the *Clayton Act*, the Foreign Trade Anti-Trust Improvement Act, and California's Unfair **[*6]** Competition Law. Finally, Siegler sought a declaratory judgment that RWMC's '818 application was invalid.

The Sorrento Defendants moved to dismiss the First Amended Complaint. *2019 U.S. Dist. LEXIS 23779, [WL] at *1*. Each of the other named defendants, except for the Board of Directors of Sorrento Therapeutics, timely joined the motion to dismiss. *See id.* Tufts Medical Center also moved to dismiss for lack of personal jurisdiction. *2019 U.S. Dist. LEXIS 23779, [WL] at *1, *17*.

The Board of Directors of Sorrento Therapeutics maintained that it is not a legal entity capable of being sued, as set forth in the Sorrento Defendants' motion to dismiss, but belatedly joined the motion over 21 days after service of process. *See* Notice of Joinder & Joinder by Putative Defendant the Board of Directors of Sorrento Therapeutics, Inc. in the Sorrento Defendants' Motion to Dismiss Plaintiff's Amended Complaint at 1, *Siegler II, 2019 U.S. Dist. LEXIS 23779, 2019 WL 581719* (No. 3:18-cv-01681-GPC-NLS); Memorandum of Points & Authorities in Support of the Omnibus Motion at 16-17, *Siegler I, 2018 U.S. Dist. LEXIS 186709, 2018 WL 9516052* (No. 3:18-cv-01681-GPC-NLS).

On October 30, 2018, Siegler moved for an entry of default and an order granting default judgment against the Board of Directors. Memorandum of Points & Authorities **[*7]** in Support of the Omnibus Motion at 16-17, *Siegler I, 2018 U.S. Dist. LEXIS 186709, 2018 WL 9516052* (No. 3:18-cv-01681-GPC-NLS). The district court denied Siegler's request for failure to secure an entry of default from the Clerk, pursuant to *Rule 55 of the Federal Rules of Civil Procedure*. *Siegler I, 2018 U.S. Dist. LEXIS 186709, 2018 WL 9516052, at *2*. The court denied Siegler's subsequent motion for reconsideration but welcomed Siegler to request an entry of default anew. *Siegler v. Sorrento Therapeutics, Inc., No. 3:18-cv-01681-GPC-NLS, 2018 U.S. Dist. LEXIS 204324, 2018 WL 6303728, at *1-2 (S.D. Cal. Dec. 3, 2018)*.

Siegler also moved for leave to amend the First Amended Complaint. *Siegler II, 2019 U.S. Dist. LEXIS 23779, 2019 WL 581719, at *6*. She sought to update her pleadings in two ways: (1) to incorporate the Patent Office's issuance of the '818 application as the '118 patent and (2) to identify a database of SES's, the defendants' copying of which potentially infringed Siegler's copyrights. *Id.*

On February 13, 2019, the district court granted both the Sorrento Defendants' and Tufts Medical Center's motions to dismiss and granted in part Siegler's motion to file a Second Amended Complaint. *2019 U.S. Dist. LEXIS 23779, [WL] at *20-21*. The court decided these motions without oral argument, pursuant to Civil *Local Rule 7.1(d)(1)* of the Local Rules of Practice for the United States District Court for the Southern District of California ("Local Rules"), and vacated the scheduled hearing. *2019 U.S. Dist. LEXIS 23779, [WL] at *1, *21*.

The district court dismissed all claims against the Board of Directors of Sorrento **[*8]** Therapeutics, as well as the takings claim against all defendants, with prejudice. The court explained that a corporate board of directors is not a separate entity from the corporation it manages and that it lacks the capacity to be sued. *2019 U.S. Dist. LEXIS 23779, [WL] at *14*. The court found no evidence that the Board of Directors existed independent of Sorrento Therapeutics and rejected Siegler's argument that she could sue it pursuant to *Section 14* of the Clayton Act—which provides for personal liability of a corporation's individual directors, officers, or agents where the corporation violates the penal provisions of ***antitrust law***. *2019 U.S. Dist. LEXIS 23779, [WL] at *13-14*. The court also explained that the *Fifth Amendment* applies only to government action. *2019 U.S. Dist. LEXIS 23779, [WL] at *16*. Because the court found no basis here for extending the *Fifth Amendment* to private entities, the court determined that further amendment would be futile. *2019 U.S. Dist. LEXIS 23779, [WL] at *16-17*.

The district court dismissed Siegler's copyright infringement, trade secret misappropriation, and antitrust claims without prejudice. *See* *2019 U.S. Dist. LEXIS 23779, [WL] at *7-16*. The court explained how the First Amended Complaint failed to state specific elements of each of these claims but granted Siegler leave to amend them. *See* *2019 U.S. Dist. LEXIS 23779, [WL] at *7-16*. The court advised Siegler to: (a) specifically identify the protectable elements of her copyrighted **[*9]** works that the defendants allegedly unlawfully copied, (b) clarify what trade secrets, if any, were misappropriated, (c) provide details about whether she redacted any of her submissions to the Copyright Office that allegedly contained trade secrets, and (d) allege the existence of a relevant market and an antitrust injury, both of which were required for her antitrust claims. *See* *2019 U.S. Dist. LEXIS 23779, [WL] at *9, *11-13, *13 n.11*. The district court also dismissed without prejudice Siegler's patent invalidity claim. *2019 U.S. Dist. LEXIS 23779, [WL at *14, *16*.

The district court further determined that it had no personal jurisdiction—general or specific—over Tufts Medical Center. *2019 U.S. Dist. LEXIS 23779, [WL] at *18, *20*. The court found that the defendant was not at home in California and that its two contracts with Sorrento Therapeutics were insufficient minimum contacts with the State of California. *See* *2019 U.S. Dist. LEXIS 23779, [WL] at *18-20*. The court rejected Siegler's argument that personal jurisdiction could be grounded in *Section 12* of the Clayton Act—which provides nationwide personal jurisdiction for antitrust suits—because it had dismissed Siegler's antitrust claims. *2019 U.S. Dist. LEXIS 23779, [WL] at *20*. But the court granted Siegler leave to amend because a second amended complaint (a) might be able to allege general jurisdiction and (b) may adequately plead antitrust claims supporting **[*10]** personal jurisdiction under *Section 12* of the Clayton Act. *Id.*

Finally, two other determinations by the district court are relevant to this appeal. First, the district court concluded that only Siegler herself, not SES, was a plaintiff. *2019 U.S. Dist. LEXIS 23779, [WL] at *1 n.1*. The court explained that, under Ohio law, a sole proprietorship has no legal identity separate from that of the individual who owns it. *Id.* Second, the district court declined to take judicial notice of several links to Securities and Exchange Commission ("SEC") filings in the First Amended Complaint. *2019 U.S. Dist. LEXIS 23779, [WL] at *1 n.2*. The court explained that, even though it could take notice of the content of the filings and the fact that they were filed, it could not take notice of the truth of the content or any inferences drawn therefrom. *Id.*

Siegler subsequently moved for reconsideration of the district court's dismissal of the First Amended Complaint. *Siegler III, 2019 U.S. Dist. LEXIS 62813, 2019 WL 1574321, at *1*. The court denied the motion, reasoning that Siegler had not identified any new evidence or new law and that the court had not committed clear error in dismissing the First Amended Complaint. *2019 U.S. Dist. LEXIS 62813, [WL] at *2*. The court also faulted Siegler for failing to provide an affidavit accompanying her motion, as required by the Local Rules. *Id.*

2. Dismissal of the **[*11]** Second Amended Complaint

On May 3, 2019, Siegler and SES filed a Second Amended Complaint against all previously named defendants. *Siegler V, 2019 U.S. Dist. LEXIS 129755, 2019 WL 3532294, at *5*. The Second Amended Complaint retained her claims of copyright infringement, trade secret misappropriation, a *Fifth Amendment* taking, antitrust violations, and invalidity of the '118 patent. *Id.* Siegler added new claims of unjust, uncompensated takings in violation of the *Fourteenth Amendment* and unjust enrichment. *Id.* Siegler also added challenges to the validity of RWMC's '370 application and Tufts Medical Center's '825 application. *2019 U.S. Dist. LEXIS 129755, [WL] at *6*.

Siegler's factual allegations remained largely unchanged. *Id.* She added that she sent Dr. Junghans drafts of the articles that she later registered with the Copyright Office. *2019 U.S. Dist. LEXIS 129755, [WL] at *2, *6*. She also alleged that Dr. Junghans executed a nondisclosure agreement with Sorrento Therapeutics that was intended to scuttle Siegler out of their planned collaboration and to deprive her of her right of first refusal on Dr. Junghans's inventions. *Id.* Finally, Siegler replaced the Board of Directors of Sorrento Therapeutics with its individual members.*2019 U.S. Dist. LEXIS 129755, [WL] at *6*.

The Sorrento Defendants moved to dismiss the Second Amended Complaint, and the other defendants joined the motion. *2019 U.S. Dist. LEXIS 129755, [WL] at *1 & n.1*. **[*12]** Tufts Medical Center also moved to dismiss for lack of personal jurisdiction. *2019 U.S. Dist. LEXIS 129755, [WL] at *1*.

Around this time, Siegler moved for leave to file a third amended complaint to supplement the Second Amended Complaint with "[n]ewly discovered information and additional updates" and a chart of various web documents. *Siegler IV, 2019 U.S. Dist. LEXIS 103674, 2019 WL 2549248, at *4*. The court denied her leave because Siegler neither detailed how she would integrate the web documents into a third amended complaint nor attached a proposed amended pleading. *Id.* The court added that it was not apparent how the web documents related to or cured any of the deficiencies in Siegler's pleadings. *Id.* For similar reasons, the court denied Siegler's motion for reconsideration of her motion for leave to amend. *Siegler V, 2019 U.S. Dist. LEXIS 129755, 2019 WL 3532294, at *26*. The court added that, after reviewing the purportedly newly discovered information that Siegler sought to include in a third amended complaint, "the Court is confident that none of the information contained therein would have cured the deficiencies" in her pleadings. *Id.*

On August 2, 2019, the court granted the Sorrento Defendants' motion to dismiss and denied Tufts Medical Center's motion to dismiss for lack of personal jurisdiction as moot. *2019 U.S. Dist. LEXIS 129755, [WL] at *1, *24*. As before, **[*13]** the court decided these motions without oral argument. *2019 U.S. Dist. LEXIS 129755, [WL] at *1*.

The district court dismissed all of Siegler's claims with prejudice because Siegler failed to cure the previously identified deficiencies. *See* *2019 U.S. Dist. LEXIS 129755, [WL at *7, *26*. It found that further amendment would be futile. *See* *2019 U.S. Dist. LEXIS 129755, [WL] at *12-13, *18, *20-22*.

The court explained that Siegler failed to state a copyright infringement claim because the Second Amended Complaint did not plead protectable expression. *2019 U.S. Dist. LEXIS 129755, [WL] at *8*. The court rejected Siegler's theory of copyright—"if I obtain copyright registration for an article *describing* a scientific discovery, course of treatment, or cell construct, then I also get to prevent others from performing, commercializing, or utilizing the same." *2019 U.S. Dist. LEXIS 129755, [WL] at *10*. The court added that Siegler inadequately alleged copying, as well. For the same reasons, the court dismissed Siegler's unjust enrichment claim, which was predicated on the same allegations as her copyright infringement claim.[3] *2019 U.S. Dist. LEXIS 129755, [WL] at *12*.

The court also explained that Siegler failed to state a trade secret misappropriation claim because the Second Amended Complaint did not specify any particular trade secrets. *2019 U.S. Dist. LEXIS 129755, [WL] at *13*. According to the court, Siegler's failure to allege that she redacted her copyright registrations when she **[*14]** filed with the Copyright Office precluded a favorable determination of trade secrets as a matter of law. *2019 U.S. Dist. LEXIS 129755, [WL] at *12*. Indeed, the court had previously explained that registration necessarily required some degree of public exposure and that submissions to the Copyright Office were publicly accessible. *See* *Siegler II, 2019 U.S. Dist. LEXIS 23779, 2019 WL 581719, at *10* (citing, *inter alia*, *17 U.S.C. § 705(b)*). Moreover, the court found that the Second Amended Complaint's new allegation that Siegler sent drafts of the copyrighted articles to Dr. Junghans contradicted the existence of a trade secret. *Siegler V, 2019 U.S. Dist. LEXIS 129755, 2019 WL 3532294, at *13*.

The court next explained that Siegler failed to state an antitrust violation because she inadequately alleged (1) the existence of a relevant market and (2) an injury to competition. *See* *2019 U.S. Dist. LEXIS 129755, [WL] at *14-18*. Indeed, even assuming that Siegler had adequately alleged a market of CAR T cell goods, the court found that Siegler's newly pled allegations of other entities' viable CAR T projects contradicted her claim that the defendants had reduced competition in the market. *2019 U.S. Dist. LEXIS 129755, [WL] at *17*. The court dismissed Siegler's claims under *Section 14* of the Clayton Act and California law because they depended on the same inadequate allegations as her antitrust claims. *2019 U.S. Dist. LEXIS 129755, [WL] at *18*.

The court also reiterated that it previously dismissed Siegler's *Fifth Amendment* **[*15]** takings claim with prejudice because the *Fifth Amendment* generally only applies to government action. *2019 U.S. Dist. LEXIS 129755, [WL] at *21-22*. For the same reason, the court dismissed Siegler's new *Fourteenth Amendment* claim with prejudice. *Id.*

[3] The court additionally held that the Copyright Act preempted Siegler's state-law cause of action. *Siegler V, 2019 U.S. Dist. LEXIS 129755, 2019 WL 3532294, at *12*.

The court finally dismissed Siegler's challenges to RWMC's '118 patent, its '370 application, and Tufts Medical Center's '825 application. *2019 U.S. Dist. LEXIS 129755, [WL] at *19-21*.

Because the court dismissed the entirety of the Second Amended Complaint with prejudice, as noted previously, the court determined that Tufts Medical Center's motion to dismiss for lack of personal jurisdiction was moot. *2019 U.S. Dist. LEXIS 129755, [WL] at *24*.

On December 17, 2019, the district court denied Siegler's motion to reconsider its dismissal of all claims in the Second Amended Complaint with prejudice. *Siegler VI, 2019 U.S. Dist. LEXIS 216776, 2019 WL 68877594, at *6*. The court reaffirmed its substantive rulings, further explaining that (1) it applied the correct standard in resolving the defendants' *Rule 12(b)(6)* motion to dismiss and (2) its dismissal with prejudice due to the futility of further amendment was proper. *2019 U.S. Dist. LEXIS 216776, [WL] at *6-7*.

3. Siegler's Appeals

On January 16, 2020, Siegler filed two notices of appeal. Her notice to the Ninth Circuit purported to appeal the district court's dismissal of her non-patent claims and its denials of her motions for reconsideration. Appellee's Appx. 149-50. Her notice to this court purported to appeal only the district court's dismissal of her patent invalidity claims. *Id.* at 153. In her briefing before **[*16]** this court, however, Siegler instead addressed other issues.

On January 27, 2020, the Ninth Circuit ordered Siegler to pay the filing and docketing fees for her appeal or to file a motion to proceed in forma pauperis within 21 days. *Siegler v. Sorrento Therapeutics, Inc. (Siegler VII), No. 20-55087, 2020 U.S. App. LEXIS 15419, 2020 WL 4218311, at *1 (9th Cir. 2020)*. On May 13, 2020, the Ninth Circuit dismissed Siegler's appeal for failure to comply with the court's orders, pursuant to *Rule 42-1* of the Ninth Circuit Rules. *Id.* The next day, the district court set an appeal mandate hearing. On June 8, 2020, the district court ordered the spreading of the mandate.[4]

We have jurisdiction pursuant to *28 U.S.C. § 1295(a)(1)*.

II. Discussion

Siegler presents ten issues for review on appeal. These issues cover numerous substantive and procedural determinations by the district court from the denial of her motion for default judgment against the Board of Directors of Sorrento Therapeutics through the denial of her motion for reconsideration of the dismissal of the Second Amended Complaint. Siegler also objects to the district court's setting of an appeal mandate hearing date after she filed her notices of appeal. But before we reach Siegler's arguments, we first address the appellees' assertion that the Ninth Circuit's mandate **[*17]** and the district court's spreading of the mandate constituted an adjudication on the merits of Siegler's non-patent claims.

A. The Ninth Circuit's Dismissal

Based on the Ninth Circuit's dismissal of Siegler's appeal for failure to comply with its orders, the appellees argue that the law of the case and collateral estoppel preclude our consideration of the arguments Siegler makes as to her non-patent claims. We disagree; the appellees read too much into the Ninth Circuit's dismissal.

At the outset, we have exclusive jurisdiction over Siegler's entire case, including her non-patent claims, because this court's jurisdiction is case-specific, not issue-specific, and because this case in part arises under patent law. *28 U.S.C. § 1295(a)(1)*. Here, Siegler sought a declaratory judgment of patent invalidity, which the district court dismissed with prejudice. *See* *Zenith Elecs. Corp. v. Exzec, Inc., 182 F.3d 1340, 1346 (Fed. Cir. 1999)* ("Our exclusive jurisdiction over matters arising in whole or in part under the patent laws is not defeated by the fact that the patent claims have been dismissed with prejudice."). That we have exclusive jurisdiction over Siegler's appeal

---

[4] Some district courts schedule a date on which the mandate is "spread" and the federal appellate judgment becomes final. *See* *Calderon v. U.S. Dist. Ct., 128 F.3d 1283, 1286 n.2 (9th Cir. 1997)*, *overruled on other grounds by* *163 F.3d 530 (9th Cir. 1998)* (en banc).

counsels against treating the Ninth Circuit's dismissal for failure to pay fees or to move to proceed in forma pauperis **[*18]** as an adjudication on the merits.

The doctrine of the law of the case provides the appellees no help. ***HN1***[] Under that doctrine, when a court decides on a rule of law, that decision should continue to govern the same issues in subsequent stages in the same case. *Christianson v. Colt Indus. Operating Corp., 486 U.S. 800, 815-16, 108 S. Ct. 2166, 100 L. Ed. 2d 811 (1988)*. This rule of practice promotes the finality and efficiency of the judicial process by "protecting against the agitation of settled issues." *Id. at 816* (internal quotation marks and citation omitted). While courts should be loath to revisit prior decisions of its own or of a coordinate court absent extraordinary circumstances, they have the power to do so in any circumstance. *See id. at 817*.

Here, the Ninth Circuit's dismissal of Siegler's appeal does not operate as a decision on the merits of Siegler's non-patent claims, particularly where our sister circuit lacked jurisdiction over any of Siegler's claims. ***HN2***[] Moreover, *Ninth Circuit Rule 42-1* (as well as the dismissal order) contains no indication that a dismissal for failure to prosecute an appeal to hearing necessarily constitutes an adjudication on the merits.

The appellees' reliance on *In re Wiersma, 483 F.3d 933 (9th Cir. 2007)*, is misplaced. There, the Ninth Circuit considered whether the Bankruptcy Appellate Panel of the Ninth Circuit ("BAP") had mistakenly dismissed **[*19]** an appeal from the bankruptcy court for failure to prosecute when it intended to dismiss the appeal as interlocutory.[5] *See id. at 939-40*. The Ninth Circuit rejected this interpretation of the record, finding "no evidence that the BAP's intent was to dismiss the appeal as interlocutory." *Id. at 940*. Separately, it found that the bankruptcy court's decision—*i.e.*, the subject of the appeal before the BAP—was "a complete adjudication of the issues at bar." *Id. at 938-39*. The appellees conflate these determinations. The Ninth Circuit did not hold that the BAP's dismissal for failure to prosecute operated as a complete adjudication on the merits. We therefore conclude that the doctrine of the law of the case does not preclude our review of Siegler's non-patent claims.

The doctrine of collateral estoppel is even more inapplicable here. ***HN4***[] Under collateral estoppel, once a court has decided an issue of fact or law necessary to its judgment, that decision may preclude relitigation of the issue in a suit on a different cause of action involving a party to the first case. *Hydranautics v. FilmTec Corp., 204 F.3d 880, 885 (9th Cir. 2000)*. For the doctrine to apply, the party asserting preclusion must establish, *inter alia*, that the first proceeding ended with a final judgment on the merits. **[*20]** *See id.* Because Siegler's appeals to the Ninth Circuit and this court are not separate cases for purposes of collateral estoppel, and because the Ninth Circuit's dismissal was not a final judgment on the merits, collateral estoppel does not foreclose our review of Siegler's non-patent claims.

B. Siegler's Arguments on Appeal

HN5[] Turning to Siegler's arguments on appeal, we review issues not unique to patent law under the law of the regional circuit in which the appeal would otherwise lie. *Centocor Ortho Biotech, Inc. v. Abbott Labs., 636 F.3d 1341, 1347 (Fed. Cir. 2011)*. We group Siegler's arguments into three main categories. First, Siegler challenges the dismissal of several of her claims with prejudice. Second, Siegler protests the denials of many of her motions, including for default judgment, leave to amend, and reconsideration. Third, Siegler objects to other decisions by the district court, including its decision not to take judicial notice, its decision to decide motions without oral argument, and its decision to set an appeal mandate hearing.

1. Dismissal of Siegler's Claims

Siegler argues that the district court erroneously dismissed (a) her *Fifth Amendment* takings claim, (b) her trade secret misappropriation claim, and (c) her claims against the Board of Directors of Sorrento **[*21]** Therapeutics. *See* Appellant's Br. 1, 6-8, 16. Siegler also disagrees with the district court's determinations that (d) Siegler is the

---

[5] ***HN3***[] Circuit courts may establish a bankruptcy appellate panel composed of bankruptcy judges to hear and determine certain appeals from bankruptcy courts. *See 28 U.S.C. § 158(a)*, *(b)(1)*, *(c)(1)*. The decisions of the bankruptcy appellate panel may be appealed to the circuit courts. *See id.* at *§ 158(c)(2)*, *(d)(1)*.

only plaintiff in the action and (e) the court lacked personal jurisdiction over Tufts Medical Center. *See id.* at 8, 23. We see no error.

HN6[] The Ninth Circuit reviews the grant of a motion to dismiss *de novo.* *Depot, Inc. v. Caring for Montanans, Inc., 915 F.3d 643, 652 (9th Cir. 2019)*. To survive a motion to dismiss under *Rule 12(b)(6) of the Federal Rules of Civil Procedure*, the complaint must contain sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face. *Id.* (quoting *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*). Accordingly, we will affirm a dismissal for failure to state a claim where "there is no cognizable legal theory or an absence of sufficient facts alleged to support a cognizable legal theory." *Id.*

Siegler asserts that "[t]he sufficiency of the [Second Amended Complaint] should not have been tested via *[Federal Rule of Civil Procedure] 12(b)(6)* . . . in light of the lessened standard that should have been applied to pleadings prepared by a *pro se* litigant." Appellant's Br. 9. Moreover, according to Siegler, any failure to state a claim for relief would be "a mere technical deficiency." *Id.; see also id.* at 7 ("Within this context, technical deficiencies in the pleadings of Appellants were the basis for the prejudicial **[*22]** dismissals of CASD Document 75.").

We find no legal support for these arguments. ***HN7***[] The Ninth Circuit makes clear that pro se litigants remain bound by the rules of procedure, even though courts are to construe their pleadings liberally.[6] *See* *Ghazali v. Moran, 46 F.3d 52, 54 (9th Cir. 1995)*; *see also* *Arunachalam v. Apple, Inc., 806 F. App'x 977, 980 (Fed. Cir. 2020)* ("Dr. Arunachalam, though pro se, is required to follow the Federal Rules of Civil Procedure the same as every other party that litigates in the federal courts.").

HN8[] Moreover, the failure to state a plausible claim is not a mere technical deficiency but a substantive shortcoming in a plaintiff's claim. Under the Federal Rules of Civil Procedure, plaintiffs must state a cognizable basis for relief—based on their factual allegations and without regard to their ability to prove those allegations—before they can proceed to proving the allegations and obtaining relief. A plaintiff's inability to simply state a cognizable basis for relief and the facts to support it is a "basic deficiency" that "should . . . be exposed at the point of minimum expenditure of time and money by the parties and the court." *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 558-60, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)* (internal quotation marks omitted).

Finding no error with the *Rule 12(b)(6)* standard that the district court applied, we turn now to each of the claims **[*23]** about which Siegler makes arguments.

a. Takings Under the *Fifth Amendment*

We agree with the district court that Siegler fails to state a cognizable takings claim under the *Fifth Amendment*. Siegler's principal shortcoming is that she has not alleged a government action or a private action fairly attributable to the government.

HN9[] The Constitution generally protects individual rights "only from *government* action, not from *private* action." *Single Moms, Inc. v. Mont. Power Co., 331 F.3d 743, 746 (9th Cir. 2003)*; *Lugar v. Edmondson Oil Co., 457 U.S. 922, 935, 102 S. Ct. 2744, 73 L. Ed. 2d 482 (1982)* ("[M]ost rights secured by the Constitution are protected only against infringement by governments."). Included in these individual rights is the *Fifth Amendment's* guarantee against government seizure of private property for public use without just compensation. The *Takings Clause of the Fifth Amendment* does not apply to a private party unless the private action may fairly be treated as that of the state. *See* *Single Moms, 331 F.3d at 747*.

Here, Siegler acknowledges that "[n]one of the Defendants-Appellees are the US government." Appellant's Br. 15; *see id.* at 1 ("One fact that was failed to be taken into account is the fact that the uncompensated, unjust takings of

---

[6] To the extent Siegler argues that the district court did not construe her pleadings liberally, we disagree. *See, e.g.,* *Siegler II, 2019 U.S. Dist. LEXIS 23779, 2019 WL 581719, at *8, *13*; *Siegler V, 2019 U.S. Dist. LEXIS 129755, 2019 WL 3532294, at *18 n.13*.

the intellectual property . . . of Appellants was and is being carried out by *non-governmental* entities." (emphasis added)). Moreover, even construing Siegler's pleadings liberally, neither the First nor **[*24]** the Second Amended Complaints contain any allegations that *a governmental actor* took Siegler's intellectual property without just compensation. They instead relate to the alleged actions of private parties that are not fairly attributable to the government. For this reason, the district court correctly determined that Siegler's takings claim under the *Fifth Amendment* was not cognizable. At bottom, Siegler was not entitled to relief under the *Fifth Amendment* because she had not alleged a critical element to her claim—government action.

Siegler appears to suggest that she has a cognizable IP takings claim because the district court recognized that "a cognizable claim existed with regard to the IP of Appellants." Appellant's Br. 7; *see* *Siegler II, 2019 U.S. Dist. LEXIS 23779, 2019 WL 581719, at *8 n.5* ("Plaintiff might have articulated a claim of unlawful appropriation by contending that Defendants copied the copyrightable *expression* of her ideas."). We decline to read into the district court's encouragement an approval of Siegler's takings claim. The district court immediately clarified that, notwithstanding the potential to state a claim of copyright infringement, Siegler had not supplied the "critical element" of "alleging what if any part of her copyrighted works were protected **[*25]** subject matter." *Siegler II, 2019 U.S. Dist. LEXIS 23779, 2019 WL 581719, at *8 n.5*. The court added that it could not supply this element for Siegler, advising her "to specifically to identify [sic] what *protectable* elements of her copyrighted works were copied unlawfully by defendants."[7] *2019 U.S. Dist. LEXIS 23779, [WL] at *8 n.5, *9*.

Siegler also argues that the district court inappropriately applied *28 U.S.C. § 1498*, which governs patent and copyright infringement by the government. Appellant's Br. 15. But the district court did not apply, or even mention, this statute. Further, the district court dismissed Siegler's takings claim because the *Fifth Amendment* requires government action (and not because it conflated the *Fifth Amendment* with the statutory provision on copyright infringement by the government).

Siegler's reliance on *Kelo v. City of New London, 545 U.S. 469, 125 S. Ct. 2655, 162 L. Ed. 2d 439 (2005)*, cannot rescue her takings claim. According to Siegler, *Kelo* stands for the proposition that "private property—such as the IP of a sole proprietorship—cannot be taken for public use without just compensation." Appellant's Br. 15; *see id.* at 3. Siegler is correct insofar as the government cannot take the private property of an individual for public use without just compensation. But, consistent with the Supreme Court's takings jurisprudence, the Court in *Kelo* considered whether the City of New London, **[*26]** Connecticut—*i.e.*, a municipal government—violated the *Takings Clause*. *545 U.S. at 472*. *Kelo* does not recognize a right to just compensation from private entities. For at least this reason, the district court correctly dismissed Siegler's takings claim for failure to state a claim.[8]

b. Trade Secret Misappropriation

We also agree with the district court that Siegler fails to state a cognizable trade secret misappropriation claim. Siegler's principal shortcoming is that she has not alleged the existence of a trade secret. The pleadings at most assert that the contents of Siegler's copyrights are protected by trade secret law. *See* *Siegler V, 2019 U.S. Dist. LEXIS 129755, 2019 WL 3532294, at *10*. ***HN11***[] But "[t]hreadbare recitals of the elements of a cause of action, supported by mere conclusory statements, do not suffice." *Iqbal, 556 U.S. at 678*.

---

[7] Siegler's arguments about her takings claim include two tables purporting to show the substantial similarity between Siegler's copyrights and the defendants' patent applications. Appellant's Br. 12-15. ***HN10***[] But, as the district court explained, the copyright laws do not protect concepts or ideas in copyrighted works. *See* *Siegler V, 2019 U.S. Dist. LEXIS 129755, 2019 3532294, at *10*. Siegler makes no arguments on appeal that the defendants' patent applications are substantially similar to her *expression*.

[8] Siegler appears to argue that her procedural due process rights were violated by the appellees and the district court, both of whom, she alleges, deprived her of her interest in her two copyrights. *See* Appellant's Br. 15-16. Her assertion against the appellees fails because they are not government actors. *See* *Siegler V, 2019 U.S. Dist. LEXIS 129755, 2019 WL 3532294, at *22 & n.18* (citing *Geneva Towers Tenants Org. v. Federated Mortg. Investors, 504 F.2d 483, 487 (9th Cir. 1974)*). We see no basis to her assertion against the district court, which patiently explained its rulings and painstakingly afforded Siegler an opportunity to present her arguments in writing.

Moreover, we reject Siegler's argument that "documents filed with the [C]opyright [O]ffice are not discoverable under any circumstance by an outsider." *See* Appellant's Br. 16. ***HN12***[] Title 17 of the U.S. Code, *Section 705*, plainly permits public inspection of certain records and indexes, "as well as the articles deposited in connection with completed copyright registrations and retained under the control of the Copyright Office." *17 U.S.C. § 705(b)*; *see 37 C.F.R. § 201.2* ("[I]nspection of copies or identifying material **[*27]** deposited in connection with a completed copyright registration may be undertaken in the Records Research and Certification Section."). The district court did not confuse the Copyright Office with the Patent Office, as Siegler argues. *See* Appellant's Br. 16. That the Patent Office publishes patent applications is not relevant to the Copyright Office's mandate to make deposited materials open to public inspection. Therefore, the district court's dismissal of Siegler's trade misappropriation claim was proper.

c. The Board of Directors of Sorrento Therapeutics

We next agree that Siegler fails to state a cognizable claim against the Board of Directors of Sorrento Therapeutics because it is not a separate legal entity from Sorrento Therapeutics. ***HN13***[] Under the Federal Rules of Civil Procedure, for parties other than an individual or corporation, their capacity to be sued is determined "by the law of the state where the court is located," here, California.[9] *Fed. R. Civ. P. 17(b)*. The Supreme Court of California has not addressed whether a corporation's board of directors may be sued as a legal entity separate from the corporation itself. ***HN14***[] But California's Corporation Code only identifies a corporation or association **[*28]** as entities that may be sued. *Cal. Corp. Code § 105*; *see Theta Chi Fraternity, Inc. v. Leland Stanford Junior Univ., 212 F. Supp. 3d 816, 821 (N.D. Cal. 2016)*. We are persuaded that, under California law, a plaintiff may not sue a corporation's board of directors as an entity separate from the corporation.

Siegler argues that *Section 14* of the Clayton Act provides "the authority under which the [Sorrento Therapeutics] Board of Directors could be property [sic] sued." Appellant's Br. 7. We disagree. ***HN15***[] *Section 14* of the Clayton Act extends a corporation's violation of a penal provision of the antitrust laws to *individual* directors who authorized or ordered the acts constituting the violation. *See 15 U.S.C. § 24*. Moreover, the statutory provision is *penal*; it cannot apply to Siegler's civil case. *See id.* ("[S]uch violation shall be deemed a misdemeanor . . . ."); *United States v. Wise, 370 U.S. 405, 414-15, 82 S. Ct. 1354, 8 L. Ed. 2d 590 (1962)*. It does not authorize Siegler to bring *civil* claims against the *collective* Board of Directors of Sorrento Therapeutics. The district court therefore correctly dismissed the Board of Directors of Sorrento Therapeutics from the First Amended Complaint.

d. SES

We also agree with the district court that the only plaintiff in this action is Siegler. ***HN16***[] Under Ohio law, "[a] sole proprietorship has no legal identity separate from that of the individual who owns it." *Patterson v. V & M Auto Body, 63 Ohio St. 3d 573, 589 N.E.2d 1306, 1308 (Ohio 1992)*. Here, there is no dispute **[*29]** that SES is a sole proprietorship. Necessarily, SES "has no legal identity separate from that of the individual who owns it," *i.e.*, Siegler. *See id.*

Siegler argues that such a determination would deny either her or SES's due process rights. *See* Appellant's Br. 23. According to Siegler, she could not organize SES as a corporation because corporations must be represented by counsel in court. *Id.* Siegler explains that, if SES were a corporation, it "would have been denied total access to the legal system by its current inability to afford legal representation." *Id.* We are unpersuaded by Siegler's argument because it assumes its conclusion. For the district court's decision to deny either her or SES's due process rights, Siegler and SES must be distinct legal identities, each possessing its own distinct right to due process. But *Patterson* requires treating Siegler and SES as having the same legal identity with one and the same right to due process. Because the district court's decision did not violate Siegler's due process rights, it necessarily did not violate SES's.[10]

---

[9] *Rule 17(b) of the Federal Rules of Civil Procedure* provides two exceptions. Siegler does not argue that these exceptions apply, nor do we see their relevance here.

[10] We are bound by the facts before us and decline to consider the implications of the hypothetical where SES is a corporation.

Siegler also argues that her and SES's inability to fully exercise their rights to legal redress based on the corporate structure **[*30]** of SES "may unfairly single out sole proprietors in a manner that itself may be deemed unconstitutional within the framework of the Bill of Attainder." *Id.* ***HN17***[] Bills of attainder are "[l]egislative acts, no matter what their form, that apply either to named individuals or to easily ascertainable members of a group in such a way as to inflict punishment on them without a judicial trial." *United States v. Brown, 381 U.S. 437, 448-49, 85 S. Ct. 1707, 14 L. Ed. 2d 484 (1965)*; *see* *U.S. Const. art. I, §§ 9-10*. Siegler's argument lacks merit, at minimum, because there is no legislative act here, much less one that punishes named individuals or easily ascertainable members of a group without a judicial trial. For these reasons, the district court properly dismissed SES.

e. Personal Jurisdiction over Tufts Medical Center

Finally, we decline to reach the issue of whether the district court had personal jurisdiction over Tufts Medical Center. We are unpersuaded by Siegler's arguments that the district court erred in dismissing the First and Second Amended Complaints against all defendants (including Tufts Medical Center). It is therefore unnecessary to further review whether Siegler's claims against Tufts Medical Center would have been properly dismissed for a lack of personal jurisdiction.

2. Denials of Siegler's **[*31]** Motions

Siegler argues that the district court erroneously denied (a) her motion for default judgment against the Board of Directors of Sorrento Therapeutics, (b) her motion for leave to file a third amended complaint, and (c) several of her motions for reconsideration. We disagree.

HN18[] The Ninth Circuit reviews denials of motions for default judgment, leave to amend, and reconsideration for abuse of discretion. *See* *Eitel v. McCool, 782 F.2d 1470, 1471 (9th Cir. 1986)* (motions for default judgment); *Curry v. Yelp Inc., 875 F.3d 1219, 1224 (9th Cir. 2017)* (motions for leave to amend); *SEC v. Platforms Wireless Int'l Corp., 617 F.3d 1072, 1100 (9th Cir. 2010)* (motions for reconsideration). A district court abuses its discretion when it makes an error of law, when it rests its decision on clearly erroneous findings of fact, or when the appellate court is left with "a definite and firm conviction that the district court committed a clear error of judgment." *United States v. 4.85 Acres of Land, 546 F.3d 613, 617 (9th Cir. 2008)* (citation omitted).

a. Motion for Default Judgment

The district court did not abuse its discretion in denying Siegler's motion for default judgment against the Board of Directors of Sorrento Therapeutics. ***HN19***[] *Rule 55 of the Federal Rules of Civil Procedure* provides a two-step process for obtaining an entry of default judgment. *See* *Eitel, 782 F.2d at 1471*. First, a party must secure an entry of default by the court clerk. *See* *Fed. R. Civ. P. 55(a)*. The entry of default is "an official recognition of the fact that **[*32]** one party is in default." 10A C. Wright & A. Miller, *Federal Practice and Procedure* § 2692 (4th ed.). A defendant who fails to answer within the time specified by the rules is in default even if that fact is not officially noted, *i.e.*, even if there is no entry of default. *See id.;* *Hughes v. Port of Seattle, Nos. 87-3627, -3650, 1988 U.S. App. LEXIS 22121, 1988 WL 60164, at *2 (9th Cir. 1988)* (unpublished table decision) ("The party must seek leave even if there has not been a formal entry of default once the party is technically in default."). Second, only after an entry of default may a party seek a default judgment. *See* 10A C. Wright & A. Miller, *Federal Practice and Procedure* § 2682.

HN20[] A district court may set aside an entry of default for good cause under *Rule 55(c)* or a final default judgment under *Rule 60(b)*. *Fed. R. Civ. P. 55(c)*. Courts have been extremely lenient in treating other pleadings as requests for leave to set aside a default. *See* *Hughes, 1988 U.S. App. LEXIS 22121, 1988 WL 60164, at *3*; *Davies v. Guinn Res. Co., No. 91-15065, 1992 U.S. App. LEXIS 28782, 1992 WL 317249, at *1 (9th Cir. 1992)* (unpublished table decision) ("The district court was free to construe Guinn's [belated] answer as a motion to set aside the default, and its order denying the motion to strike must be viewed as setting aside Guinn's default.").

Here, the district court denied Siegler default judgment because Siegler had not secured an entry of default prior to moving for default judgment. *Siegler I, 2018 U.S. Dist. LEXIS 186709, 2018 WL 9516052, at *2*. While we are **[*33]** inclined to agree with that conclusion, we also affirm the denial of Siegler's motion for a different reason. *See* *Eitel,* 782 F.2d at 1471 ("[W]e need not agree with the district court's reasoning to affirm. We may affirm on any ground finding support in the record."). As already discussed, the Board of Directors of Sorrento Therapeutics is not a separate legal entity from the corporation it serves. It is beyond dispute that Sorrento Therapeutics timely responded to the First Amended Complaint by filing a motion to dismiss in part on that ground. Therefore, the Board timely responded to the First Amended Complaint because it and the corporation are the same entity.[11]

Siegler argues that the district court denied her motion for default judgment "on a mere technicality (*i.e.*, that Appellants had not first asked the Clerk for the entry of default)." *See* Appellant's Br. 22. We do not need to reach that argument because we affirm the denial of her motion for a different reason. Moreover, denying default judgment here furthers the goal of resolving cases on their merits. *See* 10A C. Wright & A. Miller, *Federal Practice and Procedure* § 2681 ("Under modern procedure, defaults are not favored by the law and any **[*34]** doubts usually will be resolved in favor of the defaulting party. The reason for this attitude is that contemporary procedural philosophy encourages trial on the merits."). For these reasons, the district court did not abuse its discretion in denying Siegler's motion for default judgment.

b. Motion for Leave to Amend

The district court also did not abuse its discretion in denying Siegler leave to file a third amended complaint. ***HN21***[] Federal Rule of Civil Procedure 15(a) provides that a party may amend its complaint once "as a matter of course" before a responsive pleading is served. *DCD Programs, Ltd. v. Leighton, 833 F.2d 183, 185 (9th Cir. 1987)*; Fed. R. Civ. P. 15(a)(1). In all other cases, a party may only amend its pleading with the opposing party's written consent or the court's leave. Fed. R. Civ. P. 15(a)(2). A court should freely give leave when justice so requires. *Id.* But the liberality in granting leave to amend is "subject to the qualification that amendment of the complaint does not cause the opposing party undue prejudice, is not sought in bad faith, and *does not constitute an exercise in futility*." *DCD Programs, 833 F.2d at 186* (emphasis added) (citations omitted).

Here, the district court denied Siegler leave because Siegler had not explained how the newly discovered information in a chart of links to web documents "relate to or cure any of the deficiencies **[*35]** identified" in the First Amended Complaint. *Siegler IV, 2019 U.S. Dist. LEXIS 103674, 2019 WL 2549248, at *4*. In denying Siegler's corresponding motion for reconsideration, the district court added that, after reviewing the newly discovered information, it was confident that none of that information "would have cured the deficiencies identified in the [First Amended Complaint], or in the present order dismissing the [Second Amended Complaint]." *Siegler V, 2019 U.S. Dist. LEXIS 129755, 2019 WL 3532294, at *26*. We see no error of law or clearly erroneous findings of fact in the district court's analysis. This is particularly so where (1) the district court advised Siegler on how to amend her claims when it granted her leave to file a Second Amended Complaint, (2) Siegler did not cure those deficiencies in the Second Amended Complaint, and (3) Siegler's newly discovered information did not cure her pleadings. *See Siegler II, 2019 U.S. Dist. LEXIS 23779, 2019 WL 581719, at *9, *11-13, *13 n.11*; *Siegler V, 2019 U.S. Dist. LEXIS 129755, 2019 WL 3532294, at *7, *12-13, *17, *23-26*. Further, we are unpersuaded by Siegler's bare, unsupported contention in her brief that the deficiencies in the Second Amended Complaint "could have been cured by additional amendment(s) had leave been granted to file a third amended complaint." *See* Appellant's Br. 9.

Siegler presents three further reasons for reversing the district court's denial of her motion for leave to amend. We reject each of **[*36]** them.

First, Siegler argues that the district court should have permitted her more than a single opportunity to amend her complaint. *See id.* at 10. But this argument is duplicative of her complaints about the district court's denial of leave to file a third amended complaint. And it does not address the court's conclusions that filing additional amendments

---

[11] Even if the Board were a separate entity from the corporation it serves, we would view the district court's denial of Siegler's motion as setting aside the Board's default. *See Hughes, 1988 U.S. App. LEXIS 22121, 1988 WL 60164, at *2* ("[T]he district court denied Hughes' motion for a default judgment. We find that in so doing, the court implicitly set aside the default."). There is good cause to set aside the default here because the Board disputed whether it had the capacity to be sued. *See* Fed. R. Civ. P. 55(c).

would be futile. None of the cases Siegler cites mandates a minimum number of times a plaintiff may amend her pleadings. *See id.*

Second, Siegler argues that she was effectively denied a meaningful opportunity to be heard because the court dismissed her case before discovery and, therefore, she was "limited in the proof that could be provided." *Id.* at 10-11. This argument stems from a misunderstanding of the standards applied to a *Rule 12(b)(6)* motion. ***HN22***[] A court deciding such a motion must "accept all factual allegations in the complaint as true." *Tellabs, Inc. v. Makor Issues & Rights, Ltd., 551 U.S. 308, 322, 127 S. Ct. 2499, 168 L. Ed. 2d 179 (2007)*. No evidentiary proof of factual allegations is required.[12] Therefore, the district court did not deny Siegler a meaningful opportunity to be heard when it dismissed her claims prior to discovery.

Third, Siegler argues that the district court gave leeway to the defendants by denying Siegler's motion for default **[*37]** judgment on a "very minor technicality" but inconsistently denied her motion for leave to file a third amended complaint. Appellant's Br. 11. Because the Board of Directors of Sorrento Therapeutics is the same defendant as the corporation it serves, we disagree that denying Siegler's motion for default judgment is based on a very minor technicality. *See supra* Section II.B.2.a. Nor is that denial inconsistent with the district court's denial of Siegler's motion to amend. Reviewing both of the district court's decisions does not leave us with a definite and firm conviction that the district court committed a clear error of judgment. For these reasons, the district court did not err in denying Siegler's motion for leave to amend.

c. Motions for Reconsideration

Finally, the district court did not abuse its discretion in denying Siegler's motions for reconsideration of (1) the dismissal of the First Amended Complaint, (2) the dismissal of the Second Amended Complaint, and (3) the denial of leave to file a third amended complaint. Siegler does not explain how the district court abused its discretion, and we see no error of law or clearly erroneous findings of fact in its analyses. Instead, **[*38]** Siegler protests the district court's discretion to grant reconsideration, which "essentially sets up *pro se* litigants for potentially erroneous and manifestly unjust dismissals." *See* Appellant's Br. 17. ***HN23***[] This is an incorrect understanding of our standard of review, where a district court abuses its discretion when it makes an error of law, when it rests its decision on clearly erroneous findings of fact, or when we are left with a definite and firm conviction that the district court committed a clear error of judgment. *4.85 Acres of Land, 546 F.3d at 617*. We therefore uphold the district court's denials of Siegler's motions for reconsideration.

3. Other Discretionary Decisions

Siegler challenges (1) the district court's refusal to take judicial notice of SEC filings and other documents linked in her pleadings, (2) the district court's vacatur of three hearings in this case, and (3) the district court's setting of an appeal mandate hearing date after she filed her notices of appeal. Appellant's Br. 8, 17-19, 22. Siegler also lists several "instances of perceived disparate treatment and/or prejudice." *See id.* at 21. We are not persuaded by these arguments.

HN24[] The Ninth Circuit reviews the decision to take judicial notice **[*39]** for abuse of discretion. *Khoja v. Orexigen Therapeutics, Inc., 899 F.3d 988, 998 (9th Cir. 2018)*. It reviews a district court's compliance with local rules under the same standard. *Hinton v. Pac. Enters., 5 F.3d 391, 395 (9th Cir. 1993)*.

First, the district court did not abuse its discretion by declining to take judicial notice of SEC filings and other documents linked in Siegler's pleadings. Siegler argues that the documents in her pleadings "were representative of transactions or the commercial elements by which defendants unjustly enriched themselves," as well as of commercial use. Appellant's Br. 8. ***HN25***[] But a court may only take judicial notice of adjudicative facts—facts of

[12] Siegler contends that *Haines v. Kerner, 404 U.S. 519, 92 S. Ct. 594, 30 L. Ed. 2d 652 (1972)*, confers on litigants a right to offer proof to support a complaint. Appellant's Br. 11. Not so. The Court instead determined that the plaintiff's complaint survived a *Rule 12(b)(6)* motion and that the case could proceed to discovery: the plaintiff's allegations were "sufficient to call for the opportunity to offer supporting evidence." *Haines, 404 U.S. at 519-20*.

a particular case—that are not subject to reasonable dispute. *See Fed. R. Evid. 201* & Notes. The district court may not take judicial notice of Siegler's desired *inference*, drawn from her linked documents, that the defendants unjustly enriched themselves. Moreover, taking judicial notice of the existence of certain commercial transactions, like the acquisition of BDL Products, does not aide Siegler. The district court dismissed her copyright infringement and unjust enrichment claims for a separate reason: Siegler failed to articulate the protectable elements of her copyrights. *See Siegler V, 2019 U.S. Dist. LEXIS 129755, 2019 WL 3532294, at *12*.

Second, the district court did not abuse its discretion by vacating three **[*40]** scheduled motions hearings. It was within the court's discretion to resolve motions without oral argument. *See, e.g., Carpinteria Valley Farms, Ltd. v. Cnty. of Santa Barbara, 344 F.3d 822, 832 n.6 (9th Cir. 2003)*. Indeed, *Civil Local Rule 7.1(d)* expressly permits as much: "A judge may, in the judge's discretion, decide a motion without oral argument."[13] To the extent Siegler argues that the district court's vacaturs of hearings denied her an opportunity to be heard, the Ninth Circuit has resoundingly rejected that argument. ***HN26***[] "[A]n opportunity to be heard does not require an oral or evidentiary hearing on the issue. The opportunity to brief the issue fully satisfies due process requirements." *Pac. Harbor Cap., Inc. v. Carnival Air Lines, Inc., 210 F.3d 1112, 1118 (9th Cir. 2000)* (citations omitted).

Third, even assuming (without deciding) that the district court abused its discretion in setting a date to spread the Ninth Circuit's mandate, we fail to see how that error would affect Siegler's rights. Indeed, we have exclusive jurisdiction over Siegler's entire case, *see supra* Section II.A, Siegler had an opportunity to present arguments to this court, and we have considered each of the arguments she raised. For this reason, even if the district court erred in this regard, the error would be harmless.

Finally, we consider the many instances of purported unfair treatment by the district court. **[*41]** *See* Appellant's Br. 20-21. While we can understand that Siegler feels unfairly treated as a result of the events she outlines, she was treated more than fairly by the district court.

III. CONCLUSION

We have considered Siegler's remaining arguments and find them to be without merit. We therefore *affirm*.

AFFIRMED

COSTS

No costs.

End of Document

---

[13] ***HN27***[] *Rule 78 of the Federal Rules of Civil Procedure* permit courts "by rule or order" to "provide for submitting and determining motions on briefs, without oral hearings." *Fed. R. Civ. P. 78(b)*. Siegler may disagree with the Southern District of California's decision to permit rulings on motions without oral argument, but we see no basis for overturning that decision.

SmileDirectClub, LLC v. Battle

United States Court of Appeals for the Eleventh Circuit

July 20, 2021, Decided

No. 19-12227

Reporter

4 F.4th 1274 *; 2021 U.S. App. LEXIS 21393 **; 29 Fla. L. Weekly Fed. C 102

SMILEDIRECTCLUB, LLC, Plaintiff—Appellee, versus TANJA D. BATTLE, in her official capacity as Executive Director of the Georgia Board of Dentistry, et al., Defendants—Appellants.

Prior History: [1]** Appeal from the United States District Court for the Northern District of Georgia. D.C. Docket No. 1:18-cv-02328.

Smiledirectclub, LLC v. Ga. Bd. of Dentistry, 2019 U.S. Dist. LEXIS 140217 (N.D. Ga., May 8, 2019)

Disposition: APPEAL DISMISSED.

Core Terms

immunity, district court, collateral order doctrine, quotation, marks, overrule, interlocutory appeal, Sherman Act, final judgment, discovery, immunity from suit, motion to dismiss, immediate appeal, collateral-order, state action, unreviewability, tentative, qualified immunity, contractor, antitrust, non-final, cases, immediately appealable, stand trial, collateral, decisions, orders, political question, lack jurisdiction, summary judgment

LexisNexis® Headnotes

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

Civil Procedure > Appeals > Appellate Jurisdiction > Collateral Order Doctrine

Civil Procedure > Appeals > Appellate Jurisdiction > Interlocutory Orders

HN1[ ] **Exemptions & Immunities, Parker State Action Doctrine**

Interlocutory appeals may not be taken under the collateral order doctrine from the denials of so-called state-action immunity under the Parker decision and its progeny.

Civil Procedure > Appeals > Appellate Jurisdiction > Collateral Order Doctrine

Governments > State & Territorial Governments > Claims By & Against

Civil Procedure > Appeals > Standards of Review > De Novo Review

Civil Procedure > Appeals > Appellate Jurisdiction > Interlocutory Orders

Civil Procedure > Appeals > Standards of Review > Questions of Fact & Law

HN2[] **Appellate Jurisdiction, Collateral Order Doctrine**

Whether an interlocutory appeal can be taken from the denial of Parker state action immunity presents a question of law subject to plenary review. The answer to that question involves consideration of two matters--the scope of the collateral order doctrine and the nature of Parker state action immunity.

Civil Procedure > Appeals > Appellate Jurisdiction > Collateral Order Doctrine

Civil Procedure > Appeals > Appellate Jurisdiction > Final Judgment Rule

HN3[] **Appellate Jurisdiction, Collateral Order Doctrine**

A circuit court generally only has jurisdiction over appeals from final decisions of the district courts. *28 U.S.C.S. § 1291*. There are a handful of exceptions to this final-judgment rule, among them the collateral order doctrine. First recognized in the doctrine allows for immediate appeals of a small class of non-final orders.

Civil Procedure > Appeals > Appellate Jurisdiction > Collateral Order Doctrine

HN4[] **Appellate Jurisdiction, Collateral Order Doctrine**

The collateral order doctrine is sometimes called an exception to the final-judgment rule, but the doctrine is best understood not as an exception to the final decision rule laid down by Congress in *28 U.S.C.S. § 1291*, but as a practical construction of it. In other words, *§ 1291* entitles a party to appeal not only from a district court decision that ends the litigation on the merits and leaves nothing more for the court to do but execute the judgment, but also from a narrow class of decisions that do not terminate the litigation, but must, in the interest of achieving a healthy legal system, nonetheless be treated as final.

Civil Procedure > Appeals > Appellate Jurisdiction > Collateral Order Doctrine

HN5[] **Appellate Jurisdiction, Collateral Order Doctrine**

The United States Supreme Court has described the collateral order doctrine as narrow.

Civil Procedure > Appeals > Appellate Jurisdiction > Collateral Order Doctrine

Civil Procedure > Appeals > Appellate Jurisdiction > Final Judgment Rule

HN6[] **Appellate Jurisdiction, Collateral Order Doctrine**

In order to fall within the collateral order doctrine and be immediately appealable, a non-final order must satisfy three conditions. The order must: (1) conclusively determine the disputed question, (2) resolve an important issue completely separate from the merits of the action, and (3) be effectively unreviewable on appeal from a final judgment. That formulaic approach serves as a reminder that collateral order theory does not justify an ad hoc balancing of the arguments for and against immediate appeal on a case-by-case basis.

Antitrust & Trade Law > Sherman Act > Scope > Exemptions

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

HN7[] **Scope, Exemptions**

In the Parker Act, the United States Supreme Court held as a statutory matter that the Sherman Act does not reach state action. In a dual system of government in which, under the Constitution, the States are sovereign, an unexpressed purpose to nullify a state's control over its officers and agents is not lightly to be attributed to Congress.

Evidence > Burdens of Proof > Allocation

HN8[] **Burdens of Proof, Allocation**

Private parties must satisfy the clear articulation and active supervision standards set out in and its progeny in order to receive the benefit of the Parker decision.

Civil Procedure > ... > Summary Judgment > Appellate Review > Appealability

Civil Procedure > Appeals > Appellate Jurisdiction > Collateral Order Doctrine

Civil Procedure > ... > Defenses, Demurrers & Objections > Affirmative Defenses > Immunity

HN9[] **Appellate Review, Appealability**

A non-final order denying a Parker-based summary judgment motion is immediately appealable under the collateral order doctrine. With respect to the unreviewability condition, the United States Court of Appeals for the Eleventh Circuit we characterized the Parker decision as providing immunity from suit, and not just a defense from liability. And because the denial of a claim of immunity from suit falls within the collateral order doctrine, the denial of a Parker-based motion is effectively unreviewable after final judgment.

Civil Procedure > Appeals > Appellate Jurisdiction > Collateral Order Doctrine

HN10[] **Appellate Jurisdiction, Collateral Order Doctrine**

Orders denying certain immunities are strong candidates for prompt appeal under *28 U.S.C.S. § 1291* by way of the collateral order doctrine. Yet there is a crucial distinction between a right not to be tried and a right whose remedy requires the dismissal of charges or claims. That is because the former necessarily falls into the category of rights that can be enjoyed only if vindicated prior to trial, whereas the latter does not.

Antitrust & Trade Law > Sherman Act > Scope > Exemptions

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > State Regulation

HN11[] **Scope, Exemptions**

The Supreme Court has told us that Parker and its progeny are premised on an understanding that respect for the States' coordinate role in government counsels against reading the federal antitrust laws to restrict the States' sovereign capacity to regulate their economies and provide services to their citizens. In the view of the United States Court of Appeals for the Eleventh Circuit, the Parker decision and its progeny address the scope of the Sherman Act, and stand only for the proposition that the Act does not reach state action, not that it cannot do so.

Civil Procedure > Appeals > Appellate Jurisdiction > Interlocutory Orders

HN12[] **Appellate Jurisdiction, Interlocutory Orders**

The United States Supreme Court has cautioned federal courts to view claims of a right not to be tried with skepticism, if not a jaundiced eye, because virtually every right that could be enforced appropriately by pretrial dismissal might loosely be described as conferring a right not to stand trial. The Parker decision did not arise from any special concerns that would result from having to go to trial, and Parker protection is not lost if an immediate appeal is denied.

Antitrust & Trade Law > Sherman Act > Defenses

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Right to Petition Immunity

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Scope

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

Antitrust & Trade Law > Sherman Act > Scope > Exemptions

HN13[] **Sherman Act, Defenses**

The Noerr-Pennington doctrine provides, in the United States Supreme Court's words, that defendants are immune from antitrust liability for engaging in conduct (including litigation) aimed at influencing decisionmaking by the government. Despite the immunity label placed on the Noerr-Pennington doctrine, courts have recognized that it can be said to spring directly from a construction of the Sherman Act and from consideration of *First Amendment* concerns.

Civil Procedure > Appeals > Appellate Jurisdiction > Collateral Order Doctrine

Civil Procedure > Appeals > Appellate Jurisdiction > Final Judgment Rule

HN14[] **Appellate Jurisdiction, Collateral Order Doctrine**

The third condition of the collateral order doctrine, which asks whether a right or claim can be vindicated adequately on appeal following final judgment, simply cannot be answered without a judgment about the value of the interests that would be lost through rigorous application of a final judgment requirement. The decisive consideration is whether delaying review until the entry of final judgment would imperil a substantial public interest or some particular value of a high order. In determining the answer to this question, the focus is not on the specific case under consideration, but rather on the entire category to which a claim belongs. The crucial question is not whether an interest is important in the abstract; it is whether deferring review until final judgment so imperils the interest as to justify the cost of allowing immediate appeal of the entire class of relevant orders.

Civil Procedure > Appeals > Appellate Jurisdiction > Final Judgment Rule

HN15[] **Appellate Jurisdiction, Final Judgment Rule**

Effective review remains available after final judgment because appellate courts can remedy the erroneous denial of Parker protection by vacating an adverse judgment. A denial of a Parker defense, therefore, does not satisfy the unreviewability condition of the Cohen decision.

Civil Procedure > Judicial Officers > Judges > Discretionary Powers

Civil Procedure > Appeals > Appellate Jurisdiction > Interlocutory Orders

HN16[] **Judges, Discretionary Powers**

28 U.S.C.S. § 1292(b) gives a circuit court the discretion to hear an interlocutory appeal if the district court concludes that the matter involves a controlling question of law as to which there is substantial ground for difference of opinion and that an immediate appeal from the order may materially advance the ultimate termination of the litigation.

Civil Procedure > Appeals > Appellate Jurisdiction > Collateral Order Doctrine

HN17[] **Appellate Jurisdiction, Collateral Order Doctrine**

Non-final denials of Parker protection do not fall within the collateral order doctrine.

Counsel: For SMILEDIRECTCLUB, LLC, Plaintiff - Appellee: Jeffrey S. Cashdan, Stephen B. Devereaux, Madison Kitchens, Adam Reinke, King & Spalding, LLP, ATLANTA, GA.

For TANJA D. BATTLE, in her official capacity as Executive Director of the Georgia Board of Dentistry, THOMAS P. GODFREY, GREGORY G. GOGGANS, RICHARD BENNETT, REBECCA B. BYNUM, TRACY GAY, STEVE HOLCOMB, LOGAN NALLEY, JR., ANTWAN L. TREADWAY, H. BERT YEARGAN, WENDY JOHNSON, individually and in their official capacities as Members of the Georgia Board of Dentistry, Defendants - Appellants: Andrew Alan Pinson, Christopher Michael Carr, Roger A. Chalmers, Bryan A. Thernes, Drew Waldbeser, Attorney General's Office, ATLANTA, GA; Michael A. Caplan, James William Cobb, Caplan Cobb, LLP, ATLANTA, GA.

Judges: Before WILLIAM PRYOR, Chief Judge, and WILSON, MARTIN, JORDAN, ROSENBAUM, JILL PRYOR, NEWSOM, BRANCH, GRANT, LUCK, LAGOA, BRASHER, and TJOFLAT, Circuit Judges.* JORDAN, Circuit Judge, delivered the opinion of the Court, in which WILLIAM PRYOR, Chief Judge, and WILSON, MARTIN, ROSENBAUM, JILL PRYOR, NEWSOM, BRANCH, GRANT, LUCK, LAGOA, BRASHER, and TJOFLAT, Circuit Judges, joined.

Opinion by: JORDAN

Opinion

[*1276] JORDAN, Circuit Judge:

HN1[] Sitting as a full court, we hold that interlocutory appeals may not be taken under the collateral order doctrine from the denials of so-called "state-action immunity" under *Parker v. Brown, 317 U.S. 341, 350-52, 63 S. Ct. 307, 87 L. Ed. 315 (1943)*, and its progeny. We therefore dismiss this appeal by the members of the Georgia Board of Dentistry for lack of appellate jurisdiction.

I

SmileDirectClub, LLC, offers orthodontic treatments, including teeth alignment, at steep discounts. Its **[**3]** business model is described in detail in the panel opinion, *see* *SmileDirectClub, LLC v. Battle, 969 F.3d 1134, 1136-37 (11th Cir. 2020)*, and we briefly summarize it here.

Patients visit a SmileDirect location, where a technician takes a digital scan of their teeth. The scans are sent to SmileDirect's lab to create a model. They are also sent to a Georgia-licensed dentist or orthodontist, who determines whether any oral conditions warrant further investigation or prevent the patient from being a candidate for SmileDirect's alignment treatment. If there are no issues or problems, the dentist or orthodontist creates a patient-specific plan that results in a prescription for SmileDirect's clear aligners. The patient then receives the aligners by mail from SmileDirect.

In 2018, the Georgia Board of Dentistry—a state-organized entity mostly comprised of practicing dentists—voted to amend its *Rule 150-9-.02*, which relates to the expanded duties of dental assistants. As explained in the panel opinion, the "practical effect of the proposed amendment w[as] . . . to require that digital **[*1277]** scans, like the ones [performed] by SmileDirect at [its locations,] only take place when a licensed dentist is physically in the building where the scans are taking place, and to prohibit them otherwise." **[**4]** *Id. at 1137*. Georgia Governor Nathan Deal approved the amendment of *Rule 150-9-.02* through a "Certification of Active Supervision." *See id.* (internal quotation marks omitted).

SmileDirect then sued a number of defendants, including the Board members in their individual capacities. As relevant here, SmileDirect alleged that the Board's amendment of *Rule 150-9-.02* violated the Sherman Act, *15 U.S.C. § 1*, which prohibits "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or [interstate] commerce." The Board members moved to dismiss the antitrust claims against them in their individual capacities. They argued that they were entitled to dismissal based on so-called "state action immunity"

* Judge Gerald Bard Tjoflat took senior status on November 19, 2019 and elected to participate in this decision pursuant to *28 U.S.C. § 46(c)(2)*.

under *Parker* because they acted on behalf of Georgia in amending *Rule 150-9-.02*. The district court denied the motion, and the Board members filed an interlocutory appeal as permitted by our precedent. *See, e.g.,* Commuter Transp. Sys., Inc. v. Hillsborough Cnty. Aviation Auth., 801 F.2d 1286, 1289-90 (11th Cir. 1986); Praxair, Inc. v. Fla. Power & Light Co., 64 F.3d 609, 611 (11th Cir. 1995). The panel affirmed the district court's denial of the Board members' motion to dismiss, *see* SmileDirectClub, 969 F.3d at 1143-46, and we took the case en banc to consider whether denials of *Parker* "state action immunity" can be appealed prior to final judgment.[1]

II

HN2[] Whether an interlocutory appeal can be taken from the **[**5]** denial of *Parker* "state action immunity" presents a question of law subject to plenary review. *See* Pinson v. JPMorgan Chase Bank, N.A., 942 F.3d 1200, 1206 (11th Cir. 2019). The answer to that question involves consideration of two matters—the scope of the collateral order doctrine and the nature of *Parker* "state action immunity"—so we begin with some background.

A

HN3[] As a circuit court, we generally only have jurisdiction over appeals from "final decisions of the district courts." Mohawk Indus., Inc. v. Carpenter, 558 U.S. 100, 103, 130 S. Ct. 599, 175 L. Ed. 2d 458 (2009) (quoting 28 U.S.C. § 1291). There are a handful of exceptions to this final-judgment rule, among them the collateral order doctrine. First recognized in Cohen v. Beneficial Industrial Loan Corporation, 337 U.S. 541, 546, 69 S. Ct. 1221, 93 L. Ed. 1528 (1949), the doctrine allows for immediate appeals of a "small class" of non-final orders.

HN4[] The collateral order doctrine is sometimes called an "exception" to the final-judgment rule, but the doctrine "is **[*1278]** best understood not as an exception to the 'final decision' rule laid down by Congress in § 1291, but as a 'practical construction' of it." Digit. Equip. Corp. v. Desktop Direct, Inc., 511 U.S. 863, 867, 114 S. Ct. 1992, 128 L. Ed. 2d 842 (1994) (citing Cohen, 337 U.S. at 546). In other words, "[§ 1291] entitles a party to appeal not only from a district court decision that ends the litigation on the merits and leaves nothing more for the court to do but execute the judgment, but also from a narrow class of decisions that do not terminate the litigation, but must, in the interest of achieving **[**6]** a healthy legal system, nonetheless be treated as final." *Id.* (internal quotation marks and citations omitted). *Accord* 19 Moore's Federal Practice § 202.07[1] (3d ed. 2021).

HN5[] The Supreme Court has described the collateral order doctrine as "narrow." Firestone Tire & Rubber Co. v. Risjord, 449 U.S. 368, 374, 101 S. Ct. 669, 66 L. Ed. 2d 571 (1981). And it has remarked that the doctrine is only available in a "limited category of cases." Flanagan v. United States, 465 U.S. 259, 265, 104 S. Ct. 1051, 79 L. Ed. 2d 288 (1984) (internal quotation marks and citations omitted). In its more recent decisions regarding the doctrine, the Court has repeatedly "emphasiz[ed] its modest scope." Will v. Hallock, 546 U.S. 345, 350, 126 S. Ct. 952, 163 L. Ed. 2d 836 (2006). "[A]lthough the Court has been asked many times to expand the 'small class' of collaterally appealable orders, [it] ha[s] instead kept it narrow and selective in its membership." *Id. See also* Digit. Equip. Corp., 511 U.S. at 868 ("[W]e have also repeatedly stressed that the 'narrow' exception should stay that way and never be allowed to swallow the general rule that a party is entitled to a single appeal, to be deferred until final judgment has been entered[.]") (citation omitted); 15A Charles Alan Wright et al., Federal Practice and Procedure, § 3911 (2d ed.

---

[1] The district court ruled that SmileDirect's Sherman Act claim, as pled, was "sufficient to survive a Rule 12(b)(6) motion to dismiss on *Parker* immunity grounds." D.E. 51 at 13. Like the panel, we conclude that the district court's denial of the *Parker* defense was conclusive at this stage of the litigation. *See* SmileDirectClub, 969 F.3d at 1138 n.4. The district court did not definitively reject the *Parker* defense because the facts as pled might not be the facts at summary judgment or trial. But this does not mean that the district court's Rule 12(b)(6) ruling was tentative. *Cf.* Behrens v. Pelletier, 516 U.S. 299, 309, 116 S. Ct. 834, 133 L. Ed. 2d 773 (1996) (explaining that a motion to dismiss on qualified immunity grounds takes the defendant's conduct as alleged in the complaint, while a motion for summary judgment on qualified immunity grounds considers the evidence in the light most favorable to the plaintiff).

1992 & April 2021 update) ("The common admonition that this doctrine is a narrow 'exception' to the final-judgment doctrine may be revised to warn that it is a very narrow exception.").

HN6[] In order to fall **[**7]** within the collateral order doctrine and be immediately appealable, a non-final order must satisfy three conditions. The "order must [1] conclusively determine the disputed question, [2] resolve an important issue completely separate from the merits of the action, and [3] be effectively unreviewable on appeal from a final judgment." *Coopers & Lybrand v. Livesay, 437 U.S. 463, 468, 98 S. Ct. 2454, 57 L. Ed. 2d 351 (1978)* (citing *Cohen, 337 U.S. at 546*). This formulaic approach "serves as a reminder that collateral order theory does not justify an ad hoc balancing of the arguments for and against immediate appeal on a case-by-case basis." Wright et al., 15A Federal Practice and Procedure, at § 3911.[2]

B

HN7[] In *Parker, 317 U.S. at 350-52*, the Supreme Court held as a statutory matter that the Sherman Act does not reach state action. "[N]othing in the language of the Sherman Act or in its history," the Court wrote, "suggests that its purpose was to restrain a state or its officers or agents from activities directed by its legislature." *Id. at 350-51*. The Court explained that "[i]n a dual system of government in which, under the Constitution, the States are sovereign, . . . an unexpressed purpose to nullify a state's control over its officers and agents is not lightly to be attributed to Congress." *Id. at* ***[*1279]*** *351*. That intuition shaped the Court's interpretation **[**8]** of the Sherman Act. Although California had imposed a "restraint" on trade, that restraint resulted from "an act of government which the Sherman Act did not undertake to prohibit." *Id. at 352*.

The Court later extended *Parker* to private parties and municipalities in certain circumstances. *See Cal. Retail Liquor Dealers Ass'n v. Midcal Aluminum, Inc., 445 U.S. 97, 104-06, 100 S. Ct. 937, 63 L. Ed. 2d 233 (1980)* (private parties); *Town of Hallie v. City of Eau Claire, 471 U.S. 34, 38, 105 S. Ct. 1713, 85 L. Ed. 2d 24 (1985)* (municipalities and other political subdivisions). *HN8*[] Private parties, like the Board members in this case, must satisfy the "clear articulation" and "active supervision" standards set out in *Midcal, 445 U.S. at 105*, and its progeny in order to receive the benefit of *Parker*.

III

HN9[] We held in *Commuter Transportation Systems, 801 F.2d at 1289-90*—a case involving antitrust claims against a state airport authority—that a non-final order denying a *Parker*-based summary judgment motion is immediately appealable under the collateral order doctrine. With respect to the unreviewability condition, we characterized *Parker* as providing immunity from suit, and not just a defense from liability. *See id. at 1289*. And because the denial of a claim of immunity from suit falls within the collateral order doctrine, *see, e.g., Mitchell v. Forsyth, 472 U.S. 511, 525, 529-30, 105 S. Ct. 2806, 86 L. Ed. 2d 411 & n.10 (1985)* (holding that denials of absolute and qualified immunity are immediately appealable under the doctrine), we reasoned that the denial of a *Parker*-based motion is effectively **[**9]** unreviewable after final judgment. *See Commuter Transp. Sys., 801 F.2d at 1289*.[3]

---

[2] As explained later, we conclude that the Board members cannot meet the third condition of effective unreviewability, and therefore do not discuss the first and second conditions.

[3] We later extended the jurisdictional ruling in *Commuter Transportation Systems* to private parties, but without explaining why they too are entitled to an immediate appeal when their *Parker* arguments are rejected before trial. *See Praxair, 64 F.3d at 611*. As things stand, we are the only circuit to allow private parties like the Board members to take an interlocutory appeal from the denial of a *Parker*-based motion to dismiss or motion for summary judgment. The other circuits to address the issue have held that private parties cannot use the collateral order doctrine to appeal a non-final order rejecting the application of *Parker. See Auraria Student Hous. v. Campus Village Apartments, LLC, 703 F.3d 1147, 1151 (10th Cir. 2013)*; *Acoustic Sys., Inc. v. Wenger*

There is some support for this aspect of *Commuter Transportation Systems. See Martin v. Mem'l Hosp. at Gulfport, 86 F.3d 1391, 1395-97 (5th Cir. 1996)*; 1A Phillip Areeda & Herbert Hovenkamp, ***Antitrust Law*** § 222b (4th ed. 2013). For example, in *Martin* the Fifth Circuit also treated *Parker* as providing "an entitlement not to stand trial under certain circumstances." *86 F.3d at 1395* (internal quotation marks and citation omitted). Yet just four years later, the full Fifth Circuit—in a unanimous opinion—retreated from this facet of *Martin in Surgical Care Center of Hammond, L.C. v. Hospital Service District No. 1 of Tangipahoa Parish, 171 F.3d 231, 234 (5th Cir. 1999)* (en banc): "While thus a convenient shorthand, '*Parker* immunity' is more accurately a strict standard for locating the reach of the Sherman Act than the judicial creation of a defense to liability for its violation."

A

HN10[] "[O]rders denying certain immunities are strong candidates for prompt appeal under *§ 1291*" by way of the collateral order doctrine. *See Digit. Equip. Corp.,* ***[*1280]*** *511 U.S. at 871*. Yet there is a "crucial distinction between a right not to be tried and a right whose remedy requires the dismissal of charges [or claims]." *United States v. Hollywood Motor Car Co., 458 U.S. 263, 269, 102 S. Ct. 3081, 73 L. Ed. 2d 754 (1982)*. This is because "[t]he former necessarily falls into the category of rights that can be enjoyed only if vindicated prior to trial," whereas "[t]he latter does not." **[**10]** *Id.* "Those seeking immediate appeal . . . naturally argue that any order denying a claim of right to prevail without trial satisfies the third condition [of effective unreviewability]. But this generalization is too easy to be sound and, if accepted, would leave the final order requirement of *§ 1291* in tatters." *Hallock, 546 U.S. at 351*.

We conclude that *Commuter Transportation Systems* incorrectly characterized *Parker* as creating an immunity from trial. Though the Supreme Court has used the shorthand term "*Parker* immunity," *see, e.g., City of Columbia v. Omni Outdoor Advert., Inc., 499 U.S. 365, 370, 111 S. Ct. 1344, 113 L. Ed. 2d 382 (1991)*, it has also referred to *Parker* as a "defense" to an antitrust claim, *see, e.g., Town of Hallie, 471 U.S. at 39*, so the "immunity" phrasing is not conclusive. We must figure out what *Parker* really represents in order to avoid what Justice Cardozo referred to as the "tyranny of labels." *Snyder v. Massachusetts, 291 U.S. 97, 114, 54 S. Ct. 330, 78 L. Ed. 674 (1934)*. *See also Surgical Care Ctr., 171 F.3d at 234* (addressing the "*Parker* immunity" shorthand: "The price of the shorthand of using similar labels for distinct concepts is the risk of erroneous migrations of principles.").

HN11[] The Supreme Court has told us that "*Parker* and its progeny are premised on an understanding that respect for the States' coordinate role in government counsels against reading the federal antitrust laws to restrict the States' sovereign capacity to **[**11]** regulate their economies and provide services to their citizens." *FTC v. Phoebe Putney Health Sys., Inc., 568 U.S. 216, 236, 133 S. Ct. 1003, 185 L. Ed. 2d 43 (2013)*. In our view, *Parker* and its progeny address the scope of the Sherman Act, and stand only for the proposition that the Act "does not reach state action, not that it cannot do so." *SmileDirectClub, 969 F.3d at 1147* (Jordan, J., concurring).

In reading *Parker* this way, we join the Fourth, Sixth, and Ninth Circuits. *See SolarCity Corp. v. Salt River Project Agric. Improvement & Power Dist., 859 F.3d 720, 726 (9th Cir. 2017)* ("[T]he state[ ]action doctrine is a defense to liability, not immunity from suit."); *S.C. State Bd. of Dentistry v. FTC, 455 F.3d 436, 444 (4th Cir. 2006)* ("The Supreme Court did not say in *Parker* that states and their agencies are immune from federal restrictions placed upon a state's regulation of commerce within its borders or that Congress *could not* otherwise make states liable for antitrust violations."); *Huron Valley Hosp., Inc. v. City of Pontiac, 792 F.2d 563, 567 (6th Cir. 1986)* ("[T]he [*Parker*] exemption is not an 'entitlement' of the same magnitude as qualified immunity or absolute immunity, but rather is more akin to a defense to the original claim."). We also align ourselves with the Third, Fifth, and Tenth Circuits, which have similarly read *Parker* in opinions not addressing the collateral order doctrine. *See Kay Elec. Coop v. City of Newkirk, 647 F.3d 1039, 1042 (10th Cir. 2011)* (Gorsuch, J.) (noting that "the term 'immunity' may be a bit strong since the Court [in *Parker*] held only that Congress *hadn't* covered state action, not that **[**12]** it *couldn't*"); *Surgical Care Ctr., 171 F.3d at 234* ("'*Parker* immunity' is more accurately a strict standard for locating the reach of

---

Corp., 207 F.3d 287, 292-94 (5th Cir. 2000); *We, Inc. v. City of Philadelphia, 174 F.3d 322, 329 (3d Cir. 1999)*; *Segni v. Com. Off. of Spain, 816 F.2d 344, 346 (7th Cir. 1987)*.

the Sherman Act than the judicial creation of a defense to liability for its violation."); Duke & Co. v. Foerster, 521 F.2d 1277, 1279 n.5 (3d Cir. 1975) ("[T]he thrust **[*1281]** of *Parker* is that the Sherman Act is simply inapplicable to activity mandated by state authority."), *overruled in part on other grounds by* Omni Outdoor Advert., 499 U.S. at 382-83.

HN12[] The Supreme Court has cautioned federal courts to "view claims of a right not to be tried with skepticism, if not a jaundiced eye," because "virtually every right that could be enforced appropriately by pretrial dismissal might loosely be described as conferring a right not to stand trial." Digit. Equip. Corp., 511 U.S. at 873 (internal quotation marks and citations omitted). Applying that skepticism here, we agree with the Fourth, Sixth, and Ninth Circuits that *Parker* did not arise from any special concerns that would result from having to go to trial, and that *Parker* protection is not lost if an immediate appeal is denied. *See* SolarCity Corp., 859 F.3d at 726; S.C. State Bd. of Dentistry, 455 F.3d at 444; Huron Valley Hosp., 792 F.2d at 567. *Cf.* Morrison v. Nat'l Austl. Bank Ltd., 561 U.S. 247, 254, 130 S. Ct. 2869, 177 L. Ed. 2d 535 (2010) ("[T]o ask what conduct [a statute] reaches is to ask what conduct [it] prohibits, which is a merits question.").

The treatment of the *Noerr-Pennington* doctrine provides an apt analogy. **HN13**[] That doctrine provides, in the Supreme Court's words, that **[**13]** "defendants are immune from antitrust liability for engaging in conduct (including litigation) aimed at influencing decisionmaking by the government." Octane Fitness, LLC v. Icon Health & Fitness, Inc., 572 U.S. 545, 556, 134 S. Ct. 1749, 188 L. Ed. 2d 816 (2014). Despite the "immunity" label placed on the *Noerr-Pennington* doctrine, we have recognized that it "can be said to spring directly from a construction of the Sherman Act" and from consideration of First Amendment concerns. *See* McGuire Oil Co. v. Mapco, Inc., 958 F.2d 1552, 1559 (11th Cir. 1992). And several circuits have concluded that a "denial of immunity under the *Noerr-Pennington* doctrine is not an appealable collateral order . . . because it is effectively reviewable after final judgment." 19 Moore's Federal Practice, at § 202.07[1] & n. 53.8 (citing Nunag-Tanedo v. E. Baton Rouge Par. Sch. Bd., 711 F.3d 1136, 1138-41 (9th Cir. 2013); Hinshaw v. Smith, 436 F.3d 997, 1003 (8th Cir. 2006); Acoustic Sys., Inc., 207 F.3d at 295-96; We, Inc., 174 F.3d at 328-30).

What the Ninth Circuit said about *Noerr-Pennington* is just as true of *Parker*: "As a principle of statutory interpretation, [*Parker*] is no more a protection from litigation itself than is any other ordinary defense, affirmative or otherwise[,] and constitutionally grounded or not." Nunag-Tanedo, 711 F.3d at 1140. So, insofar as the unreviewability condition of the collateral order doctrine is concerned, *Commuter Transportation Systems* wrongly equated a *Parker* defense with an immunity from suit. *See generally* McMahon v. Presidential Airways, Inc., 502 F.3d 1331, 1339 (11th Cir. 2007) ("A party is entitled to a collateral order appeal when it has a substantial claim to a true immunity from suit: i.e., **[**14]** an immunity that not only insulates the party from liability, but also prevents the party from being exposed to discovery and/or trial.").[4]

[*1282] B

HN14[] We close with a final observation. The third condition of the collateral order doctrine, which asks whether a right or claim can be vindicated adequately on appeal following final judgment, "simply cannot be answered without a judgment about the value of the interests that would be lost through rigorous application of a final judgment requirement." Mohawk Indus., 558 U.S. at 107 (quoting Digit. Equip. Corp., 511 U.S. at 878-79). The "decisive consideration is whether delaying review until the entry of final judgment 'would imperil a substantial public

---

[4] We acknowledge that some of the earlier Supreme Court cases applying the collateral order doctrine permitted appeals in scenarios not involving a claimed immunity from suit. *See, e.g.,* Eisen v. Carlisle & Jacquelin, 417 U.S. 156, 170-72, 94 S. Ct. 2140, 40 L. Ed. 2d 732 (1974) (imposition of notice costs in a class action); Swift & Co. Packers v. Compania Colombiana del Caribe, 339 U.S. 684, 688-89, 70 S. Ct. 861, 94 L. Ed. 1206 (1950) (attachment of a vessel in an admiralty proceeding). Those cases, however, are too far removed from the *Parker* defense asserted here to be of much help. We are also wary of applying those cases beyond their particular facts given the Supreme Court's comment that "the collateral[ ]order doctrine may have expanded beyond the limits dictated by its internal logic and the strict application of the criteria set out in *Cohen*." Ashcroft v. Iqbal, 556 U.S. 662, 672, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009).

interest' or 'some particular value of a high order.'" *Id.* (quoting *Hallock, 546 U.S. at 352-53*). In determining the answer to this question, the focus is not on the specific case under consideration, but rather "on 'the entire category to which a claim belongs.'" *Id.* (quoting *Digit. Equip. Corp., 511 U.S. at 868*). "The crucial question . . . is not whether an interest is important in the abstract; it is whether deferring review until final judgment so imperils the interest as to justify the cost of allowing immediate appeal of the entire class of relevant orders." *Id. at 108*.

Though its reading of the Sherman Act was **[**15]** partly rooted in federalism, *Parker* does not reflect a value of sufficiently high order to satisfy the third condition of the collateral order doctrine. This is admittedly a normative judgment, but the Supreme Court's 2006 decision in *Hallock* leads us to our conclusion.

In *Hallock*, the plaintiff and her company filed suit against the United States under the *Federal Tort Claims Act, 28 U.S.C. § 2674*. They alleged that federal agents had damaged property seized pursuant to a search warrant, leading to the loss of the business. *See* *Hallock, 546 U.S. at 347-48*. The district court dismissed the suit without reaching the merits, ruling that the agents' conduct fell within *28 U.S.C. § 2680(e)*, an exception to the FTCA's waiver of sovereign immunity. *See* *id. at 348*. When the plaintiff filed a suit against the agents for constitutional deprivations under *Bivens v. Six Unknown Named Agents of Federal Bureau of Narcotics, 403 U.S. 388, 91 S. Ct. 1999, 29 L. Ed. 2d 619 (1971)*, the agents sought dismissal under *28 U.S.C. § 2676*, the so-called "judgment bar" of the FTCA. They argued that the judgment in the FTCA action barred the *Bivens* suit. The district court denied the motion to dismiss, and the agents sought to appeal under the collateral order doctrine. *See* *id. at 348-49*. The Second Circuit ruled that the agents could take an immediate appeal, but the Supreme Court, in a unanimous opinion, vacated for lack of jurisdiction. *See* *id. at 355*.

The **[**16]** Court pointed to non-final denials of immunity—e.g., qualified immunity, absolute immunity, and *Eleventh Amendment* immunity—and to the denial of a double jeopardy claim as the sort of cases that warrant interlocutory appeal under the collateral order doctrine. *See* *id. at 350*. Then, explaining that not every right to dismissal can be considered a right not to stand trial, the Court confirmed that it is "some particular value of a high order," i.e., "avoidance of trial that would imperil a substantial public interest, that counts when asking whether an order is 'effectively' unreviewable if review is to be left until later." *Id. at 352-53*. Turning to *§ 2676*'s judgment bar, the Court concluded that no such public interest **[*1283]** was at stake notwithstanding the sovereign immunity overtones:

> It is not the preservation of initiative but the avoidance of litigation for its own sake that supports the judgment bar, and if simply abbreviating litigation troublesome to Government employees were important enough for *Cohen* treatment, collateral order appeal would be a matter of right whenever the Government lost a motion to dismiss under the [FTCA], or a federal officer lost one on a *Bivens* action, or a state official was in that position in a case **[**17]** under *42 U.S.C. § 1983*, or *Ex Parte Young, 209 U.S. 123, 28 S. Ct. 441, 52 L. Ed. 714 [ ] (1908)*.

Id. at 353-54. The Court finished its opinion by analogizing to a res judicata/claim preclusion defense, a denial of which would not merit an immediate appeal under the collateral order doctrine. *See* *id. at 355* ("The judgment bar at issue in this case has no claim to greater importance than the typical defense of claim preclusion[.]").

Given what *Hallock* held, and what it said, we are unpersuaded by the Board members' arguments that *Parker* reflects a value of sufficiently high order because its reading of the Sherman Act is based in part on federalism concerns. If the Board members were correct, then the collateral order doctrine would potentially permit an immediate appeal of any pretrial order rejecting a claim by a state or its officials (or private parties acting in concert with a state) that a statute does not cover their conduct. The Supreme Court has never hinted at such an expansive view of the collateral order doctrine, and we decline to sanction it here. ***HN15***[] Effective review remains available after final judgment because "[a]ppellate courts can remedy the [erroneous denial of *Parker* protection] . . . by vacating an adverse judgment." *Mohawk Indus., 558 U.S. at 109*. A denial of a *Parker* defense, therefore, does not satisfy **[**18]** the unreviewability condition of *Cohen. Cf.* *Digit. Equip. Corp., 511 U.S. at 878* (a right to be free from trial "by [private] agreement does not rise to the level of importance needed for recognition under *§ 1291*").

HN16[] This does not mean that the denial of a dispositive motion grounded in *Parker* can never be reviewed prior to final judgment. For example, 28 U.S.C. § 1292(b) gives a circuit court the discretion to hear an interlocutory appeal if the district court concludes that the matter involves "a controlling question of law as to which there is substantial ground for difference of opinion" and that "an immediate appeal from the order may materially advance the ultimate termination of the litigation." This avenue, we think, gives those who seek dismissal of antitrust claims based on *Parker* an avenue to obtain interlocutory review. *See* Mohawk Indus., 558 U.S. at 110-11. There is also the rulemaking process. If states, municipalities, and private parties believe that there should be immediate review of a rejected *Parker* defense, they can propose a rule of appellate procedure that so provides. *See* id. at 114.[5]

IV

HN17[] Non-final denials of *Parker* protection do not fall within the collateral order doctrine. The appeal by the members of the Georgia Board of Dentistry **[**19]** is therefore dismissed for lack of jurisdiction.

APPEAL DISMISSED.

Concur by: WILLIAM PRYOR; TJOFLAT

Concur

[*1284] WILLIAM PRYOR, Chief Judge, joined by BRASHER, Circuit Judge, concurring:

I join Judge Jordan's opinion for the Court in full. I write separately to explain why the Court is right to overrule the line of precedent beginning with Commuter Transportation Systems, Inc. v. Hillsborough County Aviation Authority, 801 F.2d 1286 (11th Cir. 1986). This appeal presents the rare case in which overruling a circuit precedent is appropriate.

Overruling circuit precedent is and should be a "rare step." McCarthan v. Dir. of Goodwill Indus.-Suncoast, Inc., 851 F.3d 1076, 1096 (11th Cir. 2017) (en banc). "Stability and predictability are essential factors in the proper operation of the rule of law[.]" *Id.* (alteration rejected) (internal quotation marks omitted). So we "should not lightly overrule past decisions." *Id.* (quoting Moragne v. States Marine Lines, Inc., 398 U.S. 375, 403, 90 S. Ct. 1772, 26 L. Ed. 2d 339 (1970)). Our caution is especially important when we revisit decisions based on statutes "because Congress remains free to alter what we have done." *Id.* (internal quotation marks omitted).

But stare decisis is not an "inexorable command." Payne v. Tennessee, 501 U.S. 808, 828, 111 S. Ct. 2597, 115 L. Ed. 2d 720 (1991). We may overrule a precedent if a "special justification" exists to do so. Allen v. Cooper, 140 S. Ct. 994, 1003, 206 L. Ed. 2d 291 (2020) (internal quotation marks omitted). For example, we may overrule a precedent when it is "plainly and palpably wrong" and overruling would not "result in more harm than continuing to follow **[**20]** the erroneous decision." McCarthan, 851 F.3d at 1096 (quoting Bryan A. Garner et al., *The Law of Judicial Precedent* § 46, at 388 (2016)). And we may overrule a precedent if its "statutory and doctrinal underpinnings have eroded and there has not been significant reliance on the precedent." *Id.* (citing Kimble v. Marvel Entm't, LLC, 576 U.S. 446, 458, 135 S. Ct. 2401, 192 L. Ed. 2d 463 (2015)).

Before we overrule a precedent, we weigh three considerations: the wrongness of the precedent, its negative consequences, and the extent to which it has generated reliance interests. Ramos v. Louisiana, 140 S. Ct. 1390,

---

[5] We decided *Commuter Transportation Systems* in 1986, four years before Congress amended 28 U.S.C. § 2072(c), a provision of the Rules Enabling Act, to authorize the Supreme Court to adopt more nuanced finality requirements through rulemaking. *See* Mohawk Indus., 558 U.S. at 113-14.

1414-15, 206 L. Ed. 2d 583 (2020) (Kavanaugh, J., concurring in part). In this appeal, each consideration counsels in favor of overruling *Commuter Transportation Systems*.

First, as we unanimously recognize, Commuter Transportation Systems is wrong. The wrongness of a decision is "[t]he primary and most important factor to weigh in considering whether to overrule an earlier decision." Garner et al., *The Law of Judicial Precedent* § 47, at 397. We should ask "how wrong the precedent is as a matter of law." Ramos, 140 S. Ct. at 1415 (Kavanaugh, J., concurring in part). If the error is "clear and unambiguous," then the wrongness factor weighs heavily in favor of correction. McCarthan, 851 F.3d at 1096 (internal quotation marks omitted).

As the opinion for the Court ably explains, *Commuter Transportation Systems* is clearly **[**21]** and unambiguously wrong. It misunderstands a defense to liability as an immunity from suit. *See* Commuter Transp. Sys., 801 F.2d at 1289. So-called "state-action immunity" flows from the fact that state action falls outside the ambit of the Sherman Act as written. Parker v. Brown, 317 U.S. 341, 350-52, 63 S. Ct. 307, 87 L. Ed. 315 (1943). A statute can confer a right not to be tried—that is, an immunity from suit—only through an "explicit statutory . . . guarantee that trial will not occur." Digit. Equip. Corp. v. Desktop Direct, Inc., 511 U.S. 863, 874, 114 S. Ct. 1992, 128 L. Ed. 2d 842 (1994) (internal quotation marks omitted). By contrast, a statutory omission establishes a mere defense to liability. **[*1285]** *Id.* Our confusion about this distinction led us to conclude mistakenly that a non-final order based on *Parker* is immediately appealable under the collateral-order doctrine. Court Op. at 8, 10. Properly understood as a defense to liability, state-action immunity does not satisfy the requirements for immediate appealability. *Cf.* Swint v. Chambers Cnty. Comm'n, 514 U.S. 35, 42, 115 S. Ct. 1203, 131 L. Ed. 2d 60 (1995) (explaining that the denial of qualified immunity is immediately appealable because qualified immunity is "an *immunity from suit* rather than a mere defense to liability" (internal quotation marks omitted)).

Second, *Commuter Transportation Systems* has significant negative consequences. To evaluate whether a precedent causes "more harm than good," we must evaluate a range of **[**22]** consequences. McCarthan, 851 F.3d at 1096. As a legal matter, *Commuter Transportation Systems* is inconsistent with the applicable legal doctrines. We must consider "consistency and coherence with other decisions" when we consider the jurisprudential consequences of a precedent. Ramos, 140 S. Ct. at 1415 (Kavanaugh, J., concurring in part). After all, one of the purposes of stare decisis is to "promote[] the evenhanded, predictable, and consistent development of legal principles." Payne, 501 U.S. at 827. An outlier decision undermines this function by muddling the law, so it deserves "less precedential weight." Garner et al., *The Law of Judicial Precedent* § 47, at 397-98. *Commuter Transportation Systems* takes a liberal approach toward immunities from trial that is at odds with the narrowness of the doctrine. *See* Commuter Transp. Sys., 801 F.2d at 1289. The Supreme Court has made clear that we should "view claims of a 'right not to be tried' with skepticism, if not a jaundiced eye." Digit. Equip. Corp., 511 U.S. at 873. As mentioned, "[a] right not to be tried" in the relevant sense "rests upon an explicit statutory or constitutional guarantee that trial will not occur." Midland Asphalt Corp. v. United States, 489 U.S. 794, 801, 109 S. Ct. 1494, 103 L. Ed. 2d 879 (1989). Otherwise, "virtually every right that could be enforced appropriately by pretrial dismissal might loosely be described as conferring a 'right not to stand trial.'" **[**23]** Digit. Equip. Corp., 511 U.S. at 873.

Because *Parker* creates only a defense to liability instead of a right not to be tried, it is also in tension with the collateral-order doctrine. The Supreme Court has explained that the collateral-order doctrine is "narrow": the criteria for immediate appealability are "stringent," few kinds of nonfinal orders qualify, and it "should stay that way." Id. at 868 (internal quotation marks omitted); *see* Court Op. at 6 (collecting cases). Allowing interlocutory appeal as of right for a defense to liability contravenes our mandate to keep the "'small class' of collaterally appealable orders . . . narrow and selective in its membership." Will v. Hallock, 546 U.S. 345, 350, 126 S. Ct. 952, 163 L. Ed. 2d 836 (2006).

As a practical matter, allowing unnecessary interlocutory appeals taxes the legal system. Although *Parker*-based interlocutory appeals are relatively infrequent, they are burdensome whenever they occur. Myriad problems "inherently accompan[y]" interlocutory appeals. Richardson-Merrell Inc. v. Koller, 472 U.S. 424, 434, 105 S. Ct. 2757, 86 L. Ed. 2d 340 (1985). Interlocutory appeals "cause disruption, delay, and expense for the litigants." Stringfellow v. Concerned Neighbors in Action, 480 U.S. 370, 380, 107 S. Ct. 1177, 94 L. Ed. 2d 389 (1987). They burden appellate courts by requiring consideration of unnecessary and duplicative issues. 15A Charles Alan Wright et al., *Federal Practice and Procedure* § 3907, at 269 n.2 (2d ed. 1992). And **[*1286]** they "encroach[] upon the **[**24]** prerogatives of district court judges, who play a special role in managing ongoing litigation." *Mohawk Indus., Inc. v. Carpenter, 558 U.S. 100, 106, 130 S. Ct. 599, 175 L. Ed. 2d 458 (2009)* (internal quotation marks omitted). We tolerate these costs in the handful of cases in which interlocutory appeal is necessary to "achiev[e] a healthy legal system," but we must guard against them otherwise. *Digit. Equip. Corp., 511 U.S. at 867* (internal quotation marks omitted). Here, as in most cases, the health of our legal system does not turn on the availability of interlocutory appeal. *Cf.* Court Op. at 14-17 (explaining that a *Parker*-based appeal is not effectively unreviewable after final judgment).

Finally, *Commuter Transportation Systems* has created no serious reliance interests. The only litigants with reliance interests in that decision are the government and quasi-government litigants that prefer the right to appeal an adverse ruling before it is final. To be sure, to the extent that there are erroneous denials of state-action immunity, our decision might create additional litigation costs. But "the convenience of government officials" does not "count in the balance of *stare decisis*." *Kisor v. Wilkie, 139 S. Ct. 2400, 2447, 204 L. Ed. 2d 841 (2019)* (Gorsuch, J., concurring in the judgment); *see also* *Hallock, 546 U.S. at 353* (refusing to consider "simply abbreviating litigation troublesome to [g]overnment **[**25]** employees" as an important interest for purposes of the collateral-order doctrine).

Nor is there a real risk that our decision will hamper the ability of states to regulate their economies. The *amici* states contend that our decision and its attendant litigation costs will have a "chilling effect" on state regulation, but I doubt it. *Parker*-based interlocutory appeals have never been common, and *Parker* remains an important defense to liability.

In any event, the ease of regulation is not a meaningful reliance consideration. *See* *Kisor, 139 S. Ct. at 2447* (Gorsuch, J., concurring in the judgment). General concerns about the "efficiency of [g]overment" and the effects of the "burden[s] and distract[ions]" of litigation can be asserted in any case involving the government. *Hallock, 546 U.S. at 353*. As we do not treat these concerns as "substantial public interest[s]" for purposes of the collateral-order doctrine, *id.*, we need not treat them as significant concerns when we evaluate reliance. These concerns are not "the sort of reliance interest[s] that could outweigh the countervailing interest[s]" that support overruling *Commuter Transportation Systems.* *Kisor, 139 S. Ct. at 2447* (Gorsuch, J., concurring in the judgment) (internal quotation marks omitted). "Continuing **[**26]** to follow [*Commuter Transportation Systems*] would do more harm than good," so "[t]his appeal presents the rare circumstance where we should overturn our precedents." *McCarthan, 851 F.3d at 1096, 1099*.

TJOFLAT, Circuit Judge, concurring:

There's a significant facial difference between this case and *Commuter Transportation Systems v. Hillsborough County Aviation Authority, 801 F.2d 1286 (11th Cir. 1986)*, that could lead some to the reasonable belief that we needn't overrule *Commuter* to conclude we lack jurisdiction. Namely, the District Court here expressly refrained from deciding whether the Board members established their *Parker*[1] defense, choosing instead to postpone the determination until further discovery had been conducted. Because jurisdiction under the collateral-order doctrine depends on a "fully consummated decision" in the **[*1287]** district court, it seems obvious at first blush that we lack jurisdiction. *Abney v. United States, 431 U.S. 651, 659, 97 S. Ct. 2034, 2040, 52 L. Ed. 2d 651 (1977)*.

By holding that *Parker* provides an immunity from suit, however, *Commuter* conferred a special status on the state-action doctrine. Immunities, unlike mere defenses from liability, are deemed denied even if not expressly ruled upon because a defendant who is forced to proceed to the next stage of litigation is conclusively and necessarily denied the immunity he claims. *Mitchell v. Forsyth, 472 U.S. 511, 527, 105 S. Ct. 2806, 2816, 86 L. Ed. 2d 411 (1985)*. That's why it's necessary for us to overrule *Commuter* ***[**27]*** even though the District Court below didn't literally decide the *Parker* issue.

---

[1] *Parker v. Brown, 317 U.S. 341, 63 S. Ct. 307, 87 L. Ed. 315* (1943)

I.

The District Court did not decide whether the Board members had established their *Parker* defense at the motion-to-dismiss stage. Rather, it denied the Board members' *Rule 12(b)(6)* motion to dismiss only because it found that SmileDirect's complaint stated a claim under the Sherman Act. It expressly reserved the *Parker* question for after discovery:

> [T]he Complaint reveals a well-pleaded factual dispute that is not resolved by the Certification of Active Supervision. Only discovery will determine whether the Board provided all relevant information to the Governor, whether the proposed amendment was subjected to any meaningful review by the Governor, or whether the Certification of Active Supervision was merely "rubberstamped" as a matter of course.
>
> ...
>
> *Accordingly, the Court finds that a definitive ruling on Parker immunity would be premature at this stage*, that SmileDirect's Sherman Act anititrust claim, as pleaded, is sufficient to survive a *Rule 12(b)(6)* motion to dismiss on Parker immunity grounds, and that *further factual development is required to determine whether the Board members are entitled to Parker immunity. The Board members* ***[**28]*** *may therefore raise the Parker immunity defense at a later stage in this litigation, such as in a motion for summary judgment, if appropriate*.

On its face, this ruling seems to flunk *Cohen*'s first prong, which requires that the ruling appealed from "conclusively determine the disputed question."[2] *Coopers & Lybrand v. Livesay, 437 U.S. 463, 468, 98 S. Ct. 2454, 2458, 57 L. Ed. 2d 351 (1978)*. This requirement ordinarily bars immediate review of an issue the district court did not rule on, or which it ruled on but left open to reconsideration. 15A Charles A. Wright & Arthur Miller, Federal Practice and Procedure § 3911.1 (2d ed. 2021).

One might reasonably wonder, then, whether it is necessary for us to overrule *Commuter*. After all, the District Court in *Commuter* never indicated that the extensive discovery record before it was insufficiently developed or that its summary judgment denial was in any way tentative or subject to revision. *Commuter, 801 F.2d at 1288-89*. Might not this be a basis on which to distinguish *Commuter*?

Possibly. But there's good reason to believe that claims of immunity from suit are different from mere defenses to liability when it comes to *Cohen*'s first prong. An immunity from suit—like qualified immunity **[*1288]** or absolute immunity—is "an entitlement not to stand trial or face the other **[**29]** burdens of litigation." *Mitchell, 472 U.S. at 526, 105 S. Ct. at 2815*. As such, it is "effectively lost if a case is erroneously permitted to go to trial." *Id.* In *Mitchell*, the Supreme Court explained why a pre-trial denial of qualified immunity would satisfy *Cohen*'s first prong even if the evidence at trial showed that the defendant was entitled to immunity after all:

> [T]he trial judge may rule only that if the facts are as asserted by the plaintiff, the defendant is not immune. At trial, the plaintiff may not succeed in proving his version of the facts, and the defendant may thus escape liability. Even so, the court's denial of summary judgment finally and conclusively determines the defendant's claim of right not to *stand trial* on the plaintiff's allegations, and because "[t]here are simply no further steps that can be taken in the District Court to avoid the trial the defendant maintains is barred," it is apparent that "*Cohen*'s threshold requirement of a fully consummated decision is satisfied" in such a case.

Id. at 527, 105 S. Ct. at 2816 (quoting *Abney, 431 U.S. at 659, 97 S. Ct. at 2040*) (emphasis in original).

---

[2] *Cohen*'s three prongs are: "[1] the order must conclusively determine the disputed question, [2] resolve an important issue completely separate from the merits of the action, and [3] be effectively unreviewable on appeal from a final judgment." *Coopers, 437 U.S. at 468, 98 S. Ct. at 2458* (citation omitted).

It seems to follow that a defendant's claim to immunity is conclusively denied whenever the defendant is made to proceed to the next stage of the litigation.[3] It matters not whether the **[**30]** district court intends to reconsider the ruling or even whether it makes an express ruling at all. By holding that *Parker* provides an immunity from suit rather than a mere defense to liability, *Commuter* therefore implicitly held that a defendant who raises *Parker* need not obtain an express and non-tentative ruling to immediately appeal. It is enough that the defendant is forced to proceed to discovery or trial. It is this implicit holding that stands in our way today notwithstanding the lack of an express ruling on *Parker*.

II.

Once we clear away *Commuter*, the conclusion that we lack jurisdiction follows per force. The Supreme Court and the lower federal courts have held that immediate review of tentative rulings—at least where a mere defense from liability is at issue—is unavailable under *Cohen*.

Consider *Swint v. Chambers County Commission, 514 U.S. 35, 115 S. Ct. 1203, 131 L. Ed. 2d 60 (1995)*. In that case, a county moved for summary judgment on plaintiffs' *42 U.S.C. § 1983* claims, arguing the Supreme Court's decision in *Monell v. Department of Social Services of City of New York, 436 U.S. 658, 98 S. Ct. 2018, 56 L. Ed. 2d 611 (1978)*, precluded liability. *Swint, 514 U.S. at 38-39, 115 S. Ct. at 1206*. The District Court denied the motion, citing a genuine issue of fact as to whether the sheriff who committed the raid that gave rise to plaintiffs' civil rights claims was a policymaker for the county, which if true would subject the county to liability **[**31]** under *Monell. Id. at 39-40, 115 S. Ct. at 1206-07*. In denying defendants' motions for reconsideration, however, the District Court indicated its intent to revisit the question:

> What th[is] Court decided in its [prior order] was that the Plaintiffs had come forward with sufficient evidence to persuade this Court that Sheriff Morgan **[*1289]** may be the final policy maker for the County. The parties will have an opportunity to convince this Court that Sheriff Morgan was or was not the final policy maker for the County, and the Court will make a ruling as a matter of law on that issue before the case goes to the jury.

Id. (alterations in original).

We thought we had jurisdiction to review the order not under the collateral-order doctrine (which we recognized didn't apply), but under our pendent appellate jurisdiction.[4] *Id. at 40-41, 115 S. Ct. at 1207*. And we reversed the order denying the county's motion for summary judgment. *Id. at 41, 115 S. Ct. at 1207*. The Supreme Court then vacated our opinion and held that we lacked jurisdiction over the county's appeal whether under the collateral-order doctrine or our pendent jurisdiction. *Id.* The collateral-order doctrine did not supply jurisdiction because

> [t]he District Court planned to reconsider its ruling on the county commission's summary judgment **[**32]** motion before the case went to the jury. That court had initially determined only that "Sheriff Morgan ... may have been the final policy maker for the County." The ruling thus fails the *Cohen* test, which "disallow[s] appeal from any decision which is tentative, informal or incomplete."

Id. at 42, 115 S. Ct. at 1208 (quoting *Cohen, 337 U.S. at 546, 69 S. Ct. at 1225*) (alterations in original).[5]

---

[3] If qualified immunity is raised at the motion-to-dismiss stage, the defendant's claim is conclusively denied once the court subjects him to discovery. *Behrens v. Pelletier, 516 U.S. 299, 308, 116 S. Ct. 834, 839-40, 133 L. Ed. 2d 773 (1996)*. If it's raised at summary judgment, it's denied when the case proceeds to trial. *Mitchell, 472 U.S. at 527, 105 S. Ct. at 2816*.

[4] "Pendent jurisdiction is properly exercised over nonappealable decisions of the district court when the reviewing court already has jurisdiction over one issue in the case." *Stewart v. Baldwin Cty. Bd. of Educ., 908 F.2d 1499, 1509 (11th Cir. 1990)* (citation omitted). The individual defendants in *Swint* were denied qualified immunity, which we recognized supplied a basis for our appellate jurisdiction under *Mitchell, 472 U.S. at 530, 105 S. Ct. at 2817-18*. *Swint v. City of Wadley, Ala., 5 F.3d 1435, 1448-49 (11th Cir. 1993)*. We thus exercised our pendent jurisdiction over the county's appeal in the interest of "judicial economy." *Id. at 1449-50*.

The lower federal courts have found *Cohen*'s first factor lacking under similar circumstances. A Third Circuit case, *Harris v. Kellogg Brown & Root Services, Inc., 618 F.3d 398, 399 (3rd Cir. 2010)*, involved tort claims against a government contractor that performed allegedly negligent electrical maintenance for the United States military. The contractor, arguing that the case presented non-justiciable political questions and that it was immune from suit under the "combatant activities" exception to the Federal Tort Claims Act's waiver of sovereign immunity,[6] moved to dismiss the case. *Id. at 399*.

The District Court, in denying the motion without prejudice, concluded that the case did not present political questions and that the contractor, at least "at this time," was not entitled to immunity. *Id. at 400*. But the Court noted that "[i]f further factual development illuminates the presence **[*1290]** of political questions in this action, [the **[**33]** contractor] may renew its motion at that time," and also underscored that its decision respecting immunity "was informed by the fact that only 'limited discovery' had been conducted to date." *Id.* In declining to certify the question for interlocutory appeal under *28 U.S.C. § 1292(b)*,[7] the Court again emphasized that "the case was in the early stages of discovery" and that it "would entertain a renewed motion, if one was warranted in light of the facts obtained through further discovery." *Id.*

The contractor appealed under *§ 1291* and the Third Circuit tossed the case. *Id. at 400-01*. "[T]he order appealed did not 'conclusively determine' whether [the contractor] could successfully invoke the political question doctrine or the combatant activities exception," said the Court, because the District Court twice made clear that its order was not necessarily a "final disposition" of the issues. *Id. at 401-02*. That being so, exercising jurisdiction over the appeal would undermine *§ 1291*'s goal of "avoiding piecemeal litigation":

> It takes little imagination to foresee how reviewing the District Court's ruling now could undermine that goal. Suppose we undertook review here and concluded that, on the record before us, no political question existed. We would then remand the case, and presumably, discovery would continue. But because the presence or absence of a political question is such a fact-intensive inquiry, . . . a better-developed record could give rise to another colorable motion to dismiss. Suppose that this time, the District Court granted [the contractor]'s motion, and Plaintiffs appealed. We would again be **[**35]** required to decide the applicability of the political question doctrine to this case. There could be no clearer example of the very redundancy, delay, and waste of judicial resources that the final decision rule is intended to prevent.

Id. at 403-04 (citing *Firestone Tire & Rubber Co. v. Risjord, 449 U.S. 368, 374, 101 S. Ct. 669, 66 L. Ed. 2d 571 (1981)*).[8]

---

[5] Even in cases where *Cohen*'s first prong is satisfied—for instance where the court determinatively rejects a defense in a bench trial under *Federal Rule of Civil Procedure 52(c)*—*Cohen*'s other two prongs may still prevent immediate review. Findings of fact underlying the court's ruling, for example, are likely to flunk the requirement that the issue reviewed be separate from the merits. *See Johnson v Jones, 515 U.S. 304, 314-15, 115 S. Ct. 2151, 2157, 132 L. Ed. 2d 238 (1995)*. And mere defenses from liability are unlikely to be considered "effectively unreviewable" as part of a final judgment. In *Swint*, for instance, the Court went on to hold that *Monell* was a mere defense to liability and that "[a]n erroneous ruling on liability may be reviewed effectively on appeal from final judgment." *514 U.S. at 43, 115 S. Ct. at 1208*.

[6] *See 28 U.S.C. § 2680(j)* (preserving immunity from "[a]ny claim arising out of the combatant activities of the military or naval forces, or the Coast Guard, during time of war").

[7] *Section 1292(b)* provides:

> When a district judge, in making in a civil action an order not otherwise appealable under this section, shall be of the opinion that such order involves a controlling question of law as to which there is substantial ground for difference of opinion and that an immediate appeal from the order may materially advance the ultimate termination of the litigation, he shall so state in writing in such order. The Court of Appeals which would have jurisdiction of an appeal of such action may thereupon, in its discretion, permit an appeal to be taken from such order, if application is made to it within ten days after the entry of the order: Provided, however, That application for an appeal hereunder shall not stay proceedings **[**34]** in the district court unless the district judge or the Court of Appeals or a judge thereof shall so order.

The Second Circuit has also interpreted *Cohen*'s first factor as precluding review of orders "expressly subject to future reconsideration by the issuing court." *Metro Servs. Inc. v. Wiggins, 158 F.3d 162, 165 (2d Cir. 1998)* (quoting *In re "Agent Orange" Prod. Liab. Litig., 745 F.2d 161, 163-64 (2d Cir. 1984)*). Applying this rule, the Second Circuit has refused to review the denial of *Feres*[9] immunity on a motion to dismiss where the District Court emphasized that its ruling was "tentative to **[*1291]** assist the parties in preparing for trial" and that the government could "renew its motion to dismiss at any time before or during trial as further evidence and legal developments suggest."[10] *In re Agent Orange, 745 F.2d at 164* (citation and quotation marks omitted). The Second Circuit has likewise refused to review a District Court's designation of lead plaintiffs in a class action where it "explicitly indicated that its designation of [the plaintiffs] will be subject to continuing reassessment throughout the course of the litigation." *Metro, 158 F.3d at 165*.

The Fourth Circuit, too, has joined these other **[**36]** circuits in this principle. *Jamison v. Wiley, 14 F.3d 222, 227-28 (4th Cir. 1994)*, involved a provision of the Westfall Act requiring district courts to substitute federal employee defendants in tort suits for the United States when the Attorney General certifies that the employee was acting within the scope of his employment at the time of the tort. The District Court initially swapped Wiley for the United States after the government filed a Westfall certification, but under authority of a Fourth Circuit decision interpreting the Act, decided to conduct an independent determination of the scope issue. *Jamison, 14 F.3d at 228-29*. In the meantime, the District Court vacated its initial substitution order and reinstated Wiley as the named defendant. *Id. at 229*. The Court noted, though, that "it was not making a final ruling on the substitution question at that time . . . [since] it could not determine [the issue] . . . without further 'factual inquiry.'" *Id.* After eight months and an evidentiary hearing, the District Court issued an order finding that "the acts at issue were not within the scope of Wiley's employment" and that substitution was therefore inappropriate. *Id.* (quotation marks omitted).

Wiley appealed this ruling, and Jamison argued that the Fourth Circuit lacked **[**37]** jurisdiction because the District Court's pre-hearing ruling was immediately appealable under *Cohen*, and Wiley's failure to appeal *that* order therefore made this appeal untimely. *Id. at 229-30*. The Fourth Circuit disagreed:

> The [pre-hearing] order does not meet the first—and most fundamental—requirement for appealability under *Cohen*, because it did not "conclusively determine" the issue in dispute: whether Wiley was entitled to have the United States substituted for him as defendant. ... Though the district court [] directed that Wiley be resubstituted as the named defendant, it made clear that its decision to do so was a tentative one, made only to return things to the status quo at the time of removal, and that it might well change its mind and resubstitute the United States after the evidentiary hearing. Such a tentative and preliminary ruling on a disputed issue, which plainly holds open the prospect of reconsideration and alteration by the district court itself, is not sufficiently "final" to be appealable under the collateral order doctrine.[11]

---

[8] See *Metex Corp. v. ACS Industries, Inc., 748 F.2d 150, 153-54 (3d Cir. 1984)*, for another instance where the Third Circuit found *Cohen*'s "determinative ruling" requirement unsatisfied due to the provisional nature of a summary judgment denial.

[9] The Supreme Court held in *Feres v. United States, 340 U.S. 135, 146, 71 S. Ct. 153, 159, 95 L. Ed. 152 (1950)*, that "the Government is not liable under the Federal Tort Claims Act for injuries to servicemen where the injuries arise out of or are in the course of activity incident to service."

[10] Although the government pressed the argument, the Supreme Court did not reach the question whether the *Feres* doctrine provided an immunity from suit or whether it instead provided a mere defense to liability. *In re Agent Orange, 745 F.2d at 164*. The Court thought it didn't need to reach the question because it interpreted the District Court's order as leaving "open the distinct possibility of dismissal before the case is heard" so that "the occurrence of a trial is no certainty." *Id.; but see Behrens, 516 U.S. at 308, 116 S. Ct. at 839* ("*Harlow* and *Mitchell* make clear that [qualified immunity] is meant to give government officials a right, not merely to avoid standing trial, but also to avoid the burdens of such *pretrial* matters as discovery." (citation and quotation marks omitted) (emphasis in original).

[11] The Fourth Circuit did find that the District Court's post-hearing ruling was immediately appealable under *Cohen* because "it finally and conclusively denied a claim of absolute immunity." *Jamison, 14 F.3d at 234*.

Id. at 230 (citation omitted).

[*1292] These cases represent the rule that, at least where a defense from liability is at issue, a district court's ruling will not satisfy **[**38]** *Cohen*'s first prong when the court states that the ruling is tentative and will be reconsidered later. Applying this principle here, this appeal is due to be dismissed because the District Court's ruling, like those in each of the foregoing cases, was manifestly "tentative, informal or incomplete." *Swint, 514 U.S. at 42, 115 S. Ct. at 1208* (quotation marks and citation omitted).

For this reason as well as the reasons set forth in the majority opinion, I concur in the decision to overrule *Commuter* and to dismiss this case for lack of jurisdiction.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN1[ ] **Motions to Dismiss, Failure to State Claim**

Under Fed. R. Civ. P. 12(b)(6), a claim may be dismissed because of the plaintiff's failure to state a claim upon which relief can be granted. Fed. R. Civ. P. 12(b)(6). Counterclaims are subject to Rule 12(b)(6) challenges. A dismissal under Rule 12(b)(6) may be based on the lack of a cognizable legal theory or on the absence of sufficient facts alleged under a cognizable legal theory. In reviewing a complaint under Rule 12(b)(6), all well-pleaded allegations of material fact are taken as true and construed in the light most favorable to the non-moving party. However, complaints that offer no more than labels and conclusions or a formulaic recitation of the elements of a cause of action will not do. The Court is not required to accept as true allegations that contradict exhibits attached to the Complaint or matters properly subject to judicial notice, or allegations that are merely conclusory, unwarranted deductions of fact, or unreasonable inferences.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN2[] Motions to Dismiss, Failure to State Claim

To avoid a Fed. R. Civ. P. 12(b)(6) dismissal, a complaint must contain sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face. A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged. Plausibility means more than a sheer possibility, but less than a probability, and facts that are merely consistent with liability fall short of plausibility. The following are principles for Rule 12(b)(6) motions: (1) to be entitled to the presumption of truth, allegations in a complaint or counterclaim may not simply recite the elements of a cause of action, but must contain sufficient allegations of underlying facts to give fair notice and to enable the opposing party to defend itself effectively; (2) the factual allegations that are taken as true must plausibly suggest entitlement to relief, such that it is not unfair to require the opposing party to be subjected to the expense of discovery and continued litigation. If a motion to dismiss is granted, the district court should grant leave to amend even if no request to amend the pleading was made. However, leave to amend need not be granted if amendment would be futile or the plaintiff has failed to cure deficiencies despite repeated opportunities.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Oral Agreements

Copyright Law > ... > Assignments & Transfers > Formalities > Writing Requirement

HN3[] Types of Contracts, Oral Agreements

Ownership of copyrights cannot be transferred by oral agreement.

Business & Corporate Compliance > ... > Ownership Rights > Distribution > Infringement

Business & Corporate Compliance > ... > Ownership Rights > Displays > Infringement

Copyright Law > Scope of Copyright Protection > Collective & Derivative Works > Infringement

Copyright Law > Copyright Infringement Actions > Civil Infringement Actions > Registration Requirement

HN4[] Copyright, Infringement of Distribution Rights

The Copyright Act affords copyright owners the exclusive rights to display, perform, reproduce, or distribute copies of a copyrighted work, to authorize others to do those things, and to prepare derivative works based upon the copyrighted work. 17 U.S.C.S. § 106. Only the legal or beneficial owner of an exclusive right under a copyright has standing to sue for infringement of that right. Further, while one can own a copyright and have property rights in a work without a registration, the owner needs to register the copyright before he can sue for infringement. 17 U.S.C.S. §§ 408(a), 411(a). A claim for copyright infringement has two basic elements: (1) ownership of a valid copyright, and (2) copying of constituent elements of the work that are original. To plead ownership, a plaintiff must plausibly allege it owns a valid copyright registration for its works.

Copyright Law > Scope of Copyright Protection > Publication > Copyright Act of 1976

Copyright Law > ... > Assignments & Transfers > Formalities > Writing Requirement

Copyright Law > Scope of Copyright Protection > Assignments & Transfers > Scope of Conveyances

Copyright Law > Scope of Copyright Protection > Ownership Interests > Joint Authors & Works

HN5[] **Publication, Copyright Act of 1976**

Copyright owners may transfer any exclusive rights comprised in a copyright, including any subdivision of any of the rights specified in 17 U.S.C.S. § 106, so long as the transfer is evidenced by a signed writing. Specifically, the Copyright Act provides that a transfer of copyright ownership, other than by operation of law, is not valid unless an instrument of conveyance, or a note or memorandum of transfer, is in writing and signed by the owner of the rights conveyed or such owner's duly authorized agent. 17 U.S.C.S. § 204(a). Section 204 of the Copyright Act invalidates a purported transfer of ownership unless it is in writing.

Copyright Law > Copyright Infringement Actions > Civil Infringement Actions > Burdens of Proof

Evidence > Burdens of Proof > Allocation

Copyright Law > ... > Assignments & Transfers > Formalities > Writing Requirement

Copyright Law > Scope of Copyright Protection > Assignments & Transfers > Scope of Conveyances

Copyright Law > ... > Civil Infringement Actions > Elements > Ownership

HN6[] **Civil Infringement Actions, Burdens of Proof**

The general rule in the Ninth Circuit is that a third party may not raise noncompliance with 17 U.S.C.S. § 204(a)'s writing requirement as a defense to a copyright transfer. Section 204(a) is designed to resolve disputes between owners and transferees and to protect copyright holders from persons mistakenly or fraudulently claiming oral licenses or copyright ownership. In the absence of a dispute between the copyright owner and transferee, it would be unusual and unwarranted to permit a third-party infringer to invoke § 204(a) to avoid suit for copyright infringement. Although a third party may not raise noncompliance with § 204(a)'s writing requirement as a defense to a copyright transfer where the parties to the transfer do not dispute it existence, a third party is not foreclosed from challenging a plaintiff's ownership for purposes of standing. The copyright plaintiff bears the burden of establishing a qualifying ownership interest in the copyright both as a substantive element of the infringement claim and also as a necessary predicate for standing to bring the claim. The absence of standing to bring a copyright infringement claim is a jurisdictional failure.

Copyright Law > ... > Defenses > Estoppel > Equitable Estoppel

Copyright Law > ... > Assignments & Transfers > Licenses > Nonexclusive Licenses

Copyright Law > Scope of Copyright Protection > Assignments & Transfers > Scope of Conveyances

Copyright Law > ... > Assignments & Transfers > Formalities > Writing Requirement

HN7[] **Estoppel, Equitable Estoppel**

A non-exclusive license may be granted orally or implied from conduct. The granting of a non-exclusive license waives the right of the copyright owner to sue the licensee for copyright infringement. Critically, a mere non-exclusive license does not constitute a transfer of copyright ownership and therefore cannot confer standing to assert a copyright infringement claim.

Copyright Law > ... > Subject Matter > Statutory Copyright & Fixation > Expression & Idea Distinguished

Copyright Law > Scope of Copyright Protection > Ownership Interests > Joint Authors & Works

Copyright Law > Scope of Copyright Protection > Ownership Interests > Initial Ownership

Copyright Law > ... > Protected Subject Matter > Limited Protection for Factual Works > Literal Forms of Expression

Copyright Law > ... > Subject Matter > Statutory Copyright & Fixation > Scope of Protection

HN8[] **Statutory Copyright & Fixation, Expression & Idea Distinguished**

A joint work is a work prepared by two or more authors with the intention that their contributions be merged into inseparable or interdependent parts of a unitary whole. 17 U.S.C.S. § 101. The authors of a joint work are co-owners of the copyright in that work. 17 U.S.C.S. § 201(a). Each author must make an independently copyrightable contribution, which is a contribution that represents original expression that could stand on its own as the subject matter of copyright. That is, to be an author, one must supply more than mere direction or ideas; one must translate an idea into a fixed tangible expression entitled to copyright protection.

Copyright Law > ... > Damages > Types of Damages > Infringement Profits

Copyright Law > Scope of Copyright Protection > Ownership Interests > Joint Authors & Works

HN9[] **Types of Damages, Infringement Profits**

In the Ninth Circuit, a joint work has four elements: (1) a copyrightable work, (2) two or more authors, (3) the authors intend for their contributions to be merged into inseparable or interdependent parts of a unitary whole, and (4) each author made an independently copyrightable contribution to the work. In determining whether individuals are co-authors of a joint work, a contract that defines relationship as one of co-authors is dispositive. In the absence of a contract, courts consider whether: (1) a purported author superintends the work by exercising control; (2) the putative co-authors make objective manifestations of a shared intent to be co-authors; and (3) the audience appeal of the work turns on both contributions and the share of each in its success cannot be appraised. The first factor, control, will often be the most important consideration. Additionally, because each co-author of a joint work has an independent right to use or license the copyright, a co-author cannot be liable to another co-author for infringement of copyright, but co-authors must account to other co-authors for any profits earned from licensing or using the copyright.

Copyright Law > ... > Assignments & Transfers > Licenses > Exclusive Licenses

Copyright Law > ... > Assignments & Transfers > Licenses > Nonexclusive Licenses

Copyright Law > Scope of Copyright Protection > Ownership Interests > Joint Authors & Works

Copyright Law > Scope of Copyright Protection > Assignments & Transfers > Scope of Conveyances

Copyright Law > ... > Assignments & Transfers > Formalities > Writing Requirement

HN10[] **Licenses, Exclusive Licenses**

Unless all co-authors of a joint work join in granting an exclusive license, a single co-author (acting on its own behalf) can grant only a non-exclusive license in the copyright work because one co-author cannot limit the other co-authors' independent right to exploit the copyright. However, a co-owner of a copyright is free to transfer his ownership interest to another, as long as the transfer is only of the exclusive copyright interests that the transferring co-owner himself possesses.

Copyright Law > Scope of Copyright Protection > Ownership Interests > Joint Authors & Works

Copyright Law > ... > Civil Infringement Actions > Elements > Ownership

HN11[] **Ownership Interests, Joint Authors & Works**

One joint owner of a copyright cannot sue another joint owner of a copyright for copyright infringement.

Business & Corporate Law > ... > Establishment > Elements > Application of Agency Law Principles

Copyright Law > Scope of Copyright Protection > Collective & Derivative Works > Collective Works

Copyright Law > Scope of Copyright Protection > Ownership Interests > Works Made for Hire

HN12[] **Elements, Application of Agency Law Principles**

A work made for hire is defined as either:(1) a work prepared by an employee within the scope of his or her employment; or(2) a work specially ordered or commissioned for use as a contribution to a collective work, as part of a motion picture or other audio visual work, as a translation, as a supplementary work, as a compilation, as an instructional text, as a test, as answer material for a test, or as an atlas, if the parties expressly agree in a written instrument signed by them that the works shall be considered a work made for hire. 17 U.S.C.S. 101. With respect to the first definition, the terms employee and scope of employment are construed according to common law agency principles.

Labor & Employment Law > Employment Relationships > At Will Employment > Definition of Employees

HN13[] **At Will Employment, Definition of Employees**

The central question for determining whether a person is an employee is the hiring party's right to control the manner and means by which the product is accomplished. Factors that a court should consider for determining employee status include: the skill required for that occupation, the source of the instrumentalities and tools, the location of the work, the duration of the relationship between the parties, whether the hiring party has the right to assign additional projects to the hired party, the extent of the hired party's discretion over when and how long to work, the method of payment, the hired party's role in hiring and paying assistants, whether the work is part of the regular business of the hiring party, whether the hiring party is in business, the provision of employee benefits, and the tax treatment of the hired party.

Copyright Law > Scope of Copyright Protection > Publication > Copyright Act of 1976

Copyright Law > Scope of Copyright Protection > Ownership Interests > Works Made for Hire

Copyright Law > Scope of Copyright Protection > Assignments & Transfers > Scope of Conveyances

HN14[] Publication, Copyright Act of 1976

An employee's scope of employment is determined by examining three factors: (1) the work is of the kind the employee is employed to perform; (2) the work occurs substantially within the authorized time and space limits; and (3) it is actuated, at least in part, by a purpose to serve the employer. With respect to the second definition, works specially ordered or commissioned can only be made after the execution of an express agreement between the parties. No specific wording need be used in order for a writing to constitute a work for hire agreement. However, if there is no written instrument at all, then the work cannot be a commissioned or specially ordered work for hire. If a work is made for hire, the employer or other person for whom the work was prepared is considered the author and owns the copyright unless the parties have expressly agreed otherwise in a written instrument signed by them. 17 U.S.C.S. § 201(b).

Copyright Law > ... > Civil Infringement Actions > Remedies > Injunctions

HN15[] Remedies, Injunctions

The Copyright Act provides that a court may grant temporary and final injunctions on such terms as it may deem reasonable to prevent or restrain infringement of a copyright. 17 U.S.C.S. § 501(a). The plain language of § 501(a) presupposes either a plausibly pled or an adequately proven copyright infringement claim. This is consistent with the nature of an injunctive relief, which is not a standalone cause of action but a remedy that must be supported by a viable substantive cause of action.

Copyright Law > ... > Statutory Copyright & Fixation > Protected Subject Matter > Sound Recordings After 1972

HN16[] Protected Subject Matter, Sound Recordings After 1972

Copyright law protects intangible sound recordings but does not protect the material object in which the work is embodied.

Contracts Law > Statute of Frauds > Exceptions > Partial Performance

Contracts Law > Statute of Frauds > Requirements > Writings

HN17[] Exceptions, Partial Performance

With respect to the statute of frauds, full performance of a contract is an exception to the writing requirement.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Executed Contracts

Contracts Law > Statute of Frauds > Exceptions > Partial Performance

Contracts Law > Statute of Frauds > Requirements > Performance

HN18[] Types of Contracts, Executed Contracts

Cal. Civ. Code § 1624(a)(1) applies to agreements that by their terms are not to be performed within one year of making the agreement. Cal. Civ. Code § 1624(a)(1). However, even if a contract cannot be completely performed within one year of execution, if the contract has been fully performed by one party, the remaining promise is taken out of the statute of frauds and may be enforced by the performing party.

Copyright Law > Scope of Copyright Protection > Publication > Copyright Act of 1976

Copyright Law > Constitutional Copyright Protections > Federal & State Law Interrelationships > Federal Preemption

Copyright Law > ... > Subject Matter > Statutory Copyright & Fixation > Original Works of Authorship

Copyright Law > ... > Subject Matter > Statutory Copyright & Fixation > Scope of Protection

HN19[] **Publication, Copyright Act of 1976**

All state laws that are equivalent to any of the exclusive rights within the general scope of copyright as specified by 17 U.S.C.S. § 106 in works of authorship that are fixed in a tangible medium of expression and come within the subject matter of copyright as specified in 17 U.S.C.S. § 102 and 17 U.S.C.S. § 103 are governed exclusively by the Copyright Act. 17 U.S.C.S. § 301(a). A two part test is used to determine whether a state law claim is preempted by § 301(a). First, whether the subject matter of the state law claim falls within the subject matter of copyright as described in 17 U.S.C.S. §§ 102 and 103. Under the second prong, courts determine whether the state law claim contains an element not shared by a copyright claim; an element which changes the nature of the action so that it is qualitatively different from the copyright claim. In essence, courts should engage in a fact-specific inquiry into the actual allegations underlying the claims at issue in the case, so as to determine whether the gravamen of the state law claim asserted is the same as the rights protected by the Copyright Act.

Torts > ... > Contracts > Intentional Interference > Elements

Torts > ... > Prospective Advantage > Intentional Interference > Elements

HN20[] **Intentional Interference, Elements**

The elements of an Intentional Interference with Prospective Economic Advantage (IIPEA) claim are: (1) the existence, between the plaintiff and some third party, of an economic relationship that contains the probability of future economic benefit to the plaintiff; (2) the defendant's knowledge of the relationship; (3) intentionally wrongful acts designed to disrupt the relationship; (4) actual disruption of the relationship; and (5) economic harm proximately caused by the defendant's action. The third element, a wrongful act, refers to an unlawful act that is proscribed by a constitutional, statutory, regulatory, common law, or other determinable standard such that it is independently wrongful of its interfering character. IIPEA claims are more inclusive than intentional interference with contractual relations claims and do not require the existence of a valid contract.

Copyright Law > ... > Statutory Copyright & Fixation > Protected Subject Matter > Sound Recordings After 1972

HN21[] **Protected Subject Matter, Sound Recordings After 1972**

The Copyright Office permits registration of cover art as an associated image of sound recordings.

Torts > ... > Contracts > Intentional Interference > Elements

HN22[] **Intentional Interference, Elements**

The elements of a cause of action for Intentional Interference with Contractual Relations are: (1) a valid contract between the plaintiff and a third party; (2) the defendant's knowledge of that contract; (3) the defendant's intentional acts designed to induce a breach or disruption of the contractual relationship; (4) actual breach or disruption of the contractual relationship; and (5) resulting damage. To state a claim for disruption of a contractual relation, the plaintiff need not show the defendant induced an actual or inevitable breach of the contract. It is sufficient to show the defendant's conduct made the plaintiff's performance, and inferentially enjoyment, under the contract more burdensome or costly.

Business & Corporate Compliance > ... > Ownership Rights > Displays > Infringement

Copyright Law > Scope of Copyright Protection > Collective & Derivative Works > Scope of Protection

Copyright Law > Scope of Copyright Protection > Collective & Derivative Works > Derivative Works

Copyright Law > Scope of Copyright Protection > Collective & Derivative Works > Infringement

HN23[] **Copyright, Infringement of Display Rights**

Section 106 of the Copyright Act grants exclusive rights to a copyright holder to reproduce, prepare derivative works, distribute, perform, and display the copyrighted work. 17 U.S.C.S. § 106.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Oral Agreements

Copyright Law > ... > Assignments & Transfers > Formalities > Writing Requirement

HN24[] **Types of Contracts, Oral Agreements**

17 U.S.C.S. § 204(a) not only bars copyright infringement actions but also breach of contract claims based on oral agreements.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Torts > Business Torts > Unfair Business Practices > Elements

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN25[] **Trade Practices & Unfair Competition, State Regulation**

California's Unfair Competition Law (UCL) broadly proscribes the use of any unlawful, unfair or fraudulent business act or practice. Cal. Bus. & Prof. Code. § 17200. The UCL operates as a three-pronged statute: Each of these three adjectives unlawful, unfair, or fraudulent captures a separate and distinct theory of liability. The UCL's unlawful prong borrows violations of other laws and makes those unlawful practices actionable under the UCL, and virtually any law or regulation — federal or state, statutory or common law — can serve as a predicate. When the underlying legal claim that supports a UCL cause fails, however, so too will the the derivative UCL claim. A business practice is fraudulent under the UCL if members of the public are likely to be deceived. Unless a particular disadvantaged or vulnerable group is targeted, whether conduct is fraudulent is judged by the effect the conduct would have on a reasonable consumer. Conduct is unfair either when it threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition, or when it offends an established public policy or when the practice is immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers.

Copyright Law > Scope of Copyright Protection > Publication > Copyright Act of 1976

Copyright Law > Scope of Copyright Protection > Ownership Rights > Reproductions

Copyright Law > Scope of Copyright Protection > Ownership Rights > Performances

HN26[] **Publication, Copyright Act of 1976**

Reproducing and performing are actions that are expressly listed as exclusive rights in 17 U.S.C.S. § 106. 17 U.S.C.S. § 106.

Trade Secrets Law > Misappropriation Actions > Elements of Misappropriation > Confidentiality

HN27[] **Elements of Misappropriation, Confidentiality**

Common law misappropriation is covered under the umbrella of unfair competition and is normally invoked in an effort to protect something of value not otherwise covered by patent or copyright law, trade secret law, breach of confidential relationship, or some other form of unfair competition. The elements of a California common law misappropriation claim are: (1) the plaintiff made a substantial investment of time, effort and money into creating the thing misappropriated such that the court can characterize that thing as a kind of property right; (2) the defendant appropriated the thing at little or no cost, such that the court can characterize defendant's actions as reaping where it has not sown; and (3) the defendant injured plaintiff by the misappropriation.

Copyright Law > Scope of Copyright Protection > Publication > Copyright Act of 1976

Copyright Law > Scope of Copyright Protection > Ownership Rights

HN28[] **Publication, Copyright Act of 1976**

Inducing a breach of contract by facilitating a transfer of copyrighted works does not encompass any exclusive right under 17 U.S.C.S. § 106.

Torts > ... > Contracts > Intentional Interference > Elements

HN29[] **Intentional Interference, Elements**

Inducing a breach of contract is part of an Intenional Interference with Contractual Relations claim, specifically it is one of two ways to satisfy the third element of that cause of action. Without a valid contract, no breach can be induced.

Torts > Intentional Torts > Conversion > Elements

HN30[] Conversion, Elements

Conversion is an act of willful interference with a chattel, done without lawful justification, by which any person thereto is deprived of use and possession. Stated differently, conversion is the wrongful exercise of dominion over the property of another. The elements of conversion are: (1) the plaintiff's ownership or right to possession of the property; (2) the defendant's conversion by a wrongful act or disposition of property rights; and (3) damages. To establish conversion, a plaintiff must show an actual and substantial interference with his ownership or right to posses the property. The measure of damages for a conversion claim is the full value of the property converted.

Copyright Law > Constitutional Copyright Protections > Federal & State Law Interrelationships > Federal Preemption

HN31[] Federal & State Law Interrelationships, Federal Preemption

Claims for the conversion of tangible property involve actions different from those proscribed in the copyright laws and thus, are not preempted. While conversion is generally immune from preemption because it involves tangible property, conversion actions seeking only damages for reproduction of the property — not return of tangible property — are preempted by the Copyright Act.

Business & Corporate Compliance > ... > Ownership Rights > Distribution > Infringement

Copyright Law > Scope of Copyright Protection > Collective & Derivative Works > Derivative Works

Business & Corporate Compliance > ... > Ownership Rights > Displays > Infringement

Copyright Law > Scope of Copyright Protection > Collective & Derivative Works > Infringement

Copyright Law > Scope of Copyright Protection > Collective & Derivative Works > Scope of Protection

HN32[] Copyright, Infringement of Distribution Rights

17 U.S.C.S. § 106 grants copyright owners the exclusive rights' to display, perform, reproduce, or distribute copies of a copyrighted work, to authorize others to do those things, and to prepare derivative works based upon the copyrighted work.

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN33[] Injunctions, Preliminary & Temporary Injunctions

A preliminary injunction is not a cause of action, it is a remedy.

Copyright Law > Scope of Copyright Protection > Publication > Copyright Act of 1976

Copyright Law > Copyright Infringement Actions > Civil Infringement Actions > Registration Requirement

Copyright Law > ... > Civil Infringement Actions > Online Infringement > Defenses

Copyright Law > ... > Deposit & Registration Requirements > Registration > Registration Certificates

Copyright Law > ... > Subject Matter > Statutory Copyright & Fixation > Scope of Protection

HN34[] **Publication, Copyright Act of 1976**

The Copyright Act in part provides that no civil action for infringement of the copyright in any United States work shall be instituted until preregistration or registration of the copyright claim has been made in accordance with the Copyright Act. 17 U.S.C.S. § 411(a). While this section does not impose a precondition to copyright protection, it does expressly prohibit copyright owners from bringing infringement actions without first properly registering their work.

Copyright Law > ... > Deposit & Registration Requirements > Registration > Application Requirements

Copyright Law > ... > Civil Infringement Actions > Defenses > Copyright Misuse

Copyright Law > Copyright Infringement Actions > Civil Infringement Actions > Registration Requirement

Copyright Law > ... > Deposit & Registration Requirements > Registration > Registration Certificates

HN35[] **Registration, Application Requirements**

Once a defendant alleges that (1) a plaintiff's certificate of registration contains inaccurate information; (2) the inaccurate information was included on the application for copyright registration; and (3) the inaccurate information was included on the application with knowledge that it was inaccurate, a district court is then required to submit a request to the Register of Copyrights to advise the court whether the inaccurate information, if known, would have caused it to refuse registration. Courts may not consider in the first instance whether the Register of Copyrights would have refused registration due to the inclusion of known inaccuracies in a registration application. Additionally, inadvertent mistakes on registration certificates do not invalidate a copyright and thus do not bar infringement actions, unless the alleged infringer has relied to its detriment on the mistake, or the claimant intended to defraud the Copyright Office by making the misstatement. If it is determined that a registration contains inaccurate information, and that the inaccurate information was included in the registration application with knowledge that the information was incorrect, and that the inaccurate information would have caused the Copyright Office to refuse registration, then a district court may declare the registration invalid.

Copyright Law > ... > Civil Infringement Actions > Defenses > Copyright Misuse

Copyright Law > Copyright Infringement Actions > Civil Infringement Actions > Registration Requirement

HN36[] **Defenses, Copyright Misuse**

A court cannot invalidate a copyright until it receives word from the Copyright Office regarding what effect the known inaccuracy would have had on the registration decision.

Opinion

ORDER ON COUNTER-DEFENDANTS' MOTION TO DISMISS

(Doc. No. 23)

This is a copyright dispute involving seven musical albums by the artist Los Originales De San Juan. Counter-Plaintiff Hyphy Music, Inc. ("Hyphy") brings claims against Counter-Defendants Yellowcake, Inc. ("Yellowcake"), Colonize Media, Inc. ("Colonize"), Jose Hernandez ("Hernandez") (collectively "YCH") and Jesus Chavez, Sr. ("Chavez") for two copyright violations under the *Copyright Act (17 U.S.C. § 101 et seq.)* involving four of the albums and associated cover art of three of the albums, and state law claims for intentional interference with prospective economic advantage, intentional interference with contractual relations, unfair competition, conversion, and breach of contract. Currently before the Court is YCH's *Rule 12(b)(6)* motion to dismiss six of the seven counterclaims alleged against them. For the reasons that follow, Defendants' motion will generally be granted.

RULE 12(b)(6) FRAMEWORK

HN1[] Under *Federal Rule of Civil Procedure 12(b)(6)*, a claim may be dismissed because of the plaintiff's "failure to state a claim upon which relief can be granted." *Fed. R. Civ. P. 12(b)(6)*. Counterclaims are subject to *Rule 12(b)(6)* challenges. See *Seismic Reservoir 2020, Inc. v. Paulsson, 785 F.3d 330, 335 (9th Cir. 2015)*. A dismissal under *Rule 12(b)(6)* may be based on the lack of a cognizable legal theory or on the absence of sufficient facts **[*3]** alleged under a cognizable legal theory. *Mollett v. Netflix, Inc., 795 F.3d 1062, 1065 (9th Cir. 2015)*. In reviewing a complaint under *Rule 12(b)(6)*, all well-pleaded allegations of material fact are taken as true and construed in the light most favorable to the non-moving party. *Kwan v. SanMedica, Int'l, 854 F.3d 1088, 1096 (9th Cir. 2017)*. However, complaints that offer no more than "labels and conclusions" or "a formulaic recitation of the elements of a cause of action will not do." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*; *Johnson v. Federal Home Loan Mortg. Corp., 793 F.3d 1005, 1008 (9th Cir. 2015)*. The Court is "not required to accept as true allegations that contradict exhibits attached to the Complaint or matters properly subject to judicial notice, or allegations that are merely conclusory, unwarranted deductions of fact, or unreasonable inferences." *Seven Arts Filmed Entm't, Ltd. v. Content Media Corp. PLC, 733 F.3d 1251, 1254 (9th Cir. 2013)*. ***HN2***[] To avoid a *Rule 12(b)(6)* dismissal, "a complaint must contain sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face." *Iqbal, 556 U.S. at 678*; *Mollett, 795 F.3d at 1065*. "A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Iqbal, 556 U.S. at 678*; *Somers v. Apple, Inc., 729 F.3d 953, 959 (9th Cir. 2013)*. "Plausibility" means "more than a sheer possibility," but less than a probability, and facts that are "merely consistent" with liability fall short of "plausibility." *Iqbal, 556 U.S. at 678*; *Somers, 729 F.3d at 960*. The Ninth Circuit has distilled the following principles for **[*4]** *Rule 12(b)(6)* motions: (1) to be entitled to the presumption of truth, allegations in a complaint or counterclaim may not simply recite the elements of a cause of action, but must contain sufficient allegations of underlying facts to give fair notice and to enable the opposing party to defend itself effectively; (2) the factual allegations that are taken as true must plausibly suggest entitlement to relief, such that it is not unfair to require the opposing party to be subjected to the expense of discovery and continued litigation. *Levitt v. Yelp! Inc., 765 F.3d 1123, 1135 (9th Cir. 2014)*. If a motion to dismiss is granted, "[the] district court should grant leave to amend even if no request to amend the pleading was made . . . ." *Ebner v. Fresh, Inc., 838 F.3d 958, 962 (9th Cir. 2016)*. However, leave to amend need not be granted if amendment would be futile or the plaintiff has failed to cure deficiencies despite repeated opportunities. *Garmon v. County of L.A., 828 F.3d 837, 842 (9th Cir. 2016)*.

BACKGROUND

Hyphy is a record label that is in the business of producing, manufacturing, distributing, exploiting, selling, and licensing sound and audiovisual recordings and associated artwork. Chavez is the founder and principal of the musical group Los Originales De San Juan, a popular Mexican musical group.

In February 2013, Hyphy entered into an oral exclusive recording **[*5]** agreement with Chavez whereby Hyphy commissioned Chavez, for a period of five (5) years, to exclusively provide services as a recording artist in the making of sound and audio-visual recordings embodied in albums. Pursuant to the agreement, Hyphy agreed to: (1) select the musical compositions to be recorded on the albums; (2) produce the musical performances on the albums; (3) direct the recording and filming of musical and audiovisual performances to be embodied on the albums; and (4) pay Chavez a fixed amount per album. Chavez agreed to follow Hyphy's artistic direction, perform the recordings, and grant Hyphy the non-exclusive right to utilize Chavez's likeness and his group's name. Chavez also agreed that Hyphy would be the owner of all title, right, and interest in and to the tangible masters of the albums and all property rights in the musical performances embodied in the tangible masters (including the copyrights and any extensions and renewals of the copyrights) from the inception of the creation of each album. Hyphy performed the above services and contributed sufficient originality to the albums such that Hyphy at a minimum is a co-author, co-owner, or joint owner of the **[*6]** copyrights in the albums for purposes of the Copyright Act. Hyphy also produced, created, and designed the album cover art for the albums. Apparently, Hyphy and Chavez created four albums (Corridos de Poca M, Desde La Cantina de Mi Barrio, El Campesino, and Nuestra Historia). See FAC Ex. B. Hyphy also registered copyrights in the content of the four albums and in the cover art of three albums (Corridos de Poca M, Desde la Cantina de Mi Barrio, and El Campesino). Hyphy alleges that it is the exclusive copyright owner of the four albums and the albums' cover art. See id.

In April 2019, Hernandez had a meeting with Chavez wherein Hernandez expressed his interest in exploiting the four Los Originales' albums. Chavez advised Hernandez that he had entered into a contract with Hyphy and that Hyphy was the owner of the four albums. Hernandez intentionally misled Chavez and wrongfully told Chavez that Hyphy had no rights in the four albums and that Chavez was free to sell to Hernandez's companies, Colonize and Yellowcake. Hernandez offered Chavez a significant sum of money purportedly to purchase the rights to the four albums and also promised to indemnify Chavez if Hyphy sought legal redress **[*7]** from Chavez. Hernandez engaged in this conduct individually and on behalf of Colonize and Yellowcake to disrupt the contractual relations between Hyphy and Chavez. Chavez purportedly entered into an agreement with Yellowcake. In exchange for money, Chavez wrongfully transferred his ownership rights in the four albums and cover art to Yellowcake, even though Chavez had no such rights to grant.

In May or June 2019, Hyphy discovered that Yellowcake and Colonize created or caused the creation of copies of the four Los Originales albums and cover art and was distributing, selling and exploiting these works through online platforms such as ITunes, Amazon Music, and YouTube. The only difference between the cover art created by Hyphy and the cover art being utilized by Yellowcake and Colonize was that Yellowcake and Colonize removed the Hyphy logos and replaced them with Yellowcake and Colonize's respective logos. This was done without Hyphy's authorization. Yellowcake sent correspondences to Hyphy in which Yellowcake was claiming ownership of the masters and sound recordings of the seven albums. However, Yellowcake and Colonize have no direct license from Hyphy to use or exploit the seven **[*8]** albums and cover art.

Yellowcake and Colonize sent fraudulent takedown notices to YouTube that falsely claimed that Hyphy had no right to post or upload the three albums and cover art. Prior to the takedown notices, Hyphy had received significant revenue from YouTube, and the YouTube uploads provided an important and lucrative marketing channel for the four albums and cover art. Now, YCH's uploads of the albums and cover art have generated substantial views and revenue on their YouTube channels. YCH's exploitation of the four albums is unlawful and a blatant violation of California law and federal copyright law.

On June 4, 2020, Yellowcake filed a copyright infringement claim against Hyphy. Hyphy procured registered copyrights for the four albums on the following dates: March 17, 2017 (El Campesino), May 9, 2018 (Desde La Cantina de Mi Barrio), April 13, 2020 (Corridos De Poca M), and August 2, 2020 (Nuestra Historia). See Defendants' Request for Judicial Notice ("RJN") (Doc. No. 29) Exs. 1, 2, 3, 4.[1] On August 19, 2020, Hyphy filed its counterclaim, and on August 28, 2020, filed the active First Amended Counterclaim ("FAC").

COUNTER-DEFENDANTS' MOTION TO DISMISS

I. First Cause of [*9] Action — Copyright Infringement of Sound Recordings

Counter-Defendants' Arguments

Yellowcake explains that in March 2019, it entered into an asset purchase agreement with Chavez whereby Yellowcake purchased the entirety of Chavez's ownership in the rights, title, and interest in the sound recordings that comprise the albums of Los Originales De San Juan. Yellowcake then complied in all respects with the provisions of the Copyright Act by registering copyrights for each of the sound recordings. Yellowcake was issued a Certificate of Registration for each copyrighted sound recording.

Yellowcake argues that Hyphy's first copyright claim fails because Hyphy cannot establish that it has valid ownership of a copyright in the albums. Hyphy purports to make its ownership claim by alleging an oral agreement with Chavez. ***HN3***[] However, ownership of copyrights cannot be transferred by oral agreement. At best, all that could arise from the oral agreement was a non-exclusive license to use the albums/sound recordings. In the absence of a writing between Hyphy and Chavez, Chavez had the ability to transfer his ownership of the sound recordings to Yellowcake. Because Hyphy cannot rely on the oral agreement **[*10]** to establish exclusive rights in the four albums, the first cause of action for infringement and the third cause of action for associated injunctive relief should be dismissed.

Counter-Plaintiff's Opposition

Hyphy argues that, pursuant to Paragraph 17, the FAC alleges that Hyphy is a co-author of the four albums with Chavez. As a co-author, Hyphy has an equal undivided interest in the whole of the works with Chavez. This is the case regardless of whether the FAC in the alternative pleads that Hyphy was granted an oral license from Chavez. Therefore, YCH's arguments that Hyphy does not possess a valid copyright in the sound recordings and masters, or that any claim thereto is made only by way of an oral argument with Chavez, is misplaced. As a co-author, Hyphy

[1] The RJN requests that the Court to take judicial notice of copies of registration information from the U.S. Copyright Office's Online Catalog regarding the seven albums. See Doc. No. 29. The Court takes judicial notice of these governmental records. See *Fed. R. Evid. 201*; *Basile v. Twneitieth Century Fox Film Corp., 678 F. App'x 576, 577 (9th Cir. 2017)*; *Sybersound Records, Inc. v. UAV Corp., 517 F.3d 1137, 1146 (9th Cir. 2008)*; *Yellowcake, Inc. v. Morena Music, Inc., 522 F. Supp. 3d 747, 2021 U.S. Dist. LEXIS 39127, *8 n.1 (E.D. Cal. Mar. 1, 2021)*; *Kaseberg v. Conaco, LLC, 360 F.Supp.3d 1026, 1029 n.2 (S.D. Cal. 2018)*; *Obodai v. YouTube LLC, 840 F.Supp.2d 714, 715 n.1 (S.D. N.Y. 2011)*.

may sue YCH for copyright infringement because Chavez never had the ability to grant the exclusive rights that YCH believed it had obtained.

Legal Standard

HN4[] "The Copyright Act affords copyright owners the 'exclusive rights' to display, perform, reproduce, or distribute copies of a copyrighted work, to authorize others to do those things, and to prepare derivative works based upon the copyrighted work." *Maloney v. T3Media, Inc., 853 F.3d 1004, 1010 (9th Cir. 2017)*; see *17 U.S.C. § 106*. Only the "legal or beneficial **[*11]** owner of an exclusive right under a copyright" has standing to sue for infringement of that right. *Righthaven LLC v. Hoehn, 716 F.3d 1166, 1169 (9th Cir. 2013)*. Further, while one can own a copyright and have property rights in a work without a registration, the owner needs to register the copyright before he can sue for infringement. See *17 U.S.C. §§ 408(a)*, *411(a)*; *Gold Value Int'l Textile, Inc. v. Sanctuary Clothing, Ltd. Liab. Co., 925 F.3d 1140, 1144 (9th Cir. 2019)*; *Alaska Stock, LLC v. Houghton Mifflin Harcourt Publ'g Co., 747 F.3d 673, 678 (9th Cir. 2014)*. A claim for copyright infringement has two basic elements: (1) ownership of a valid copyright, and (2) copying of constituent elements of the work that are original. *Feist Publ'ns, Inc. v. Rural Tel. Serv. Co., 499 U.S. 340, 351, 111 S. Ct. 1282, 113 L. Ed. 2d 358 (1991)*; *Great Minds v. Office Depot, Inc., 945 F.3d 1106, 1110 (9th Cir. 2019)*; *Seven Arts, 733 F.3d at 1254*. "To plead ownership, [a plaintiff] must plausibly allege it owns a valid copyright registration for its works." *Malibu Textiles, Inc. v. Label Lane Int'l, Inc., 922 F.3d 946, 951 (9th Cir. 2019)*.

Discussion

Hyphy's opposition focuses on allegations in Paragraph 17 to contend that it is a co-author and therefore a joint owner of the three albums. This is a reasonable reading of Paragraph 17. However, the FAC also alleges an agreement between Hyphy and Chavez for the intellectual property rights in the four albums. Further, documents from the Copyright Office indicate that Hyphy named itself as the author of the albums as an "employer" in a work for hire arrangement. Finally, although not mentioned in the opposition, Copyright Office documents for the El Campesino album identify Hyphy as the copyright claimant through **[*12]** a written transfer agreement. See RJN Ex. 4. Therefore, the opposition, the Counterclaim, and the judicially noticed documents indicate four potential theories of ownership by Hyphy. The Court will examine each theory separately.

1. Oral Transfer from Chavez to Hyphy

HN5[] "Copyright owners may transfer '[a]ny exclusive rights comprised in a copyright, including any subdivision of any of the rights specified in *[17 U.S.C. § 106]*,' . . . so long as the transfer is evidenced by a signed writing." *Corbello v. Devito, 777 F.3d 1058, 1062 (9th Cir. 2015)* (citing *17 U.S.C. §§ 201(d)(2)* and *204(a)*); see also *Jules Jordan Video, Inv. v. 144942 Canada, Inc., 617 F.3d 1146, 1156 (9th Cir. 2010)*. Specifically, the Copyright Act provides that a "transfer of copyright ownership, other than by operation of law, is not valid unless an instrument of conveyance, or a note or memorandum of transfer, is in writing and signed by the owner of the rights conveyed or such owner's duly authorized agent." *17 U.S.C. § 204(a)*. "*[S]ection 204* of the Copyright Act invalidates a purported transfer of ownership unless it is in writing." *Effects Assocs. v. Cohen, 908 F.2d 555, 556 (9th Cir. 1990)*; see *Radio TV Espanola S.A. v. New World Entm't Ltd., 183 F.3d 922, 926-27 (9th Cir. 1999)*; *Konigsberg Int'l, Inc. v. Rice, 16 F.3d 355, 356-57 (9th Cir. 1994)*.

a. Ability to Raise Compliance with *§ 204(a)*

HN6[] The general rule in the Ninth Circuit is that a third party may not raise noncompliance with *17 U.S.C. § 204(a)*'s writing requirement as a defense to a copyright transfer. *DRK Photo, 870 F.3d at 986*. *Section 204(a)* is "designed to resolve disputes between owners and transferees and to protect copyright holders **[*13]** from persons mistakenly or fraudulently claiming oral licenses or copyright ownership." *Jules Jordan Video, 617 F.3d at 1157*; see

Billy-Bob Teeth, Inc. v. Novelty, Inc., 329 F.3d 586, 592 (7th Cir. 2003). In the absence of a dispute between the copyright owner and transferee, "it would be unusual and unwarranted to permit a third-party infringer to invoke § 204(a) to avoid suit for copyright infringement." Jules Jordan Video, 617 F.3d at 1157 (quoting Billy-Bob Teeth, 329 F.3d at 592). "Although a third party may not raise noncompliance with [§ 204(a)]'s writing requirement as a defense to a copyright transfer where the parties to the transfer do not dispute it existence, a third party is not foreclosed from challenging a plaintiff's ownership for purposes of standing." DRK Photo v. McGraw-Hill Global Educ. Holdings, LLC, 870 F.3d 978, 986 (9th Cir. 2017) (citing Jules Jordan Video, 617 F.3d at 1157 and Righthaven, 716 F.3d at 1169). The copyright plaintiff bears the burden of establishing a qualifying ownership interest in the copyright both as a substantive element of the infringement claim and also as a necessary predicate for standing to bring the claim. DRK Photo, 870 F.3d at 986. The absence of standing to bring a copyright infringement claim is a jurisdictional failure. Righthaven, 716 F.3d at 1172-73.

Here, no party has raised YCH's ability to raise § 204(a) with respect to the oral agreement between Chavez and Hyphy. Despite this failure, the Court finds that YCH's invocation of § 204(a) is appropriate. First, as *DRK Photo* expressly makes clear, YCH may invoke § 204(a) as a challenge to standing. **[*14]** Second, the express allegations in the FAC identify the only agreement between Hyphy and Chavez as an oral one. Thus, the express allegations by Hyphy plainly and clearly demonstrate a failure to meet § 204(a)'s requirements. Third, the Court does not find that the general rule against third parties raising § 204(a) applies in this situation. This is not a case in which there is no dispute between the copyright holder and the transferee. Chavez is a named counter-defendant. The single claim alleged against Chavez by Hyphy is for breach of oral agreement based on Chavez's transfer of his rights in the four albums to Yellowcake. Further, the fact that Chavez entered into a written agreement with YCH for the interest in the four albums indicates that Chavez believed that he had not transferred his ownership interests to Hyphy. This is contrary to Hyphy's alleged position that it held all exclusive rights by virtue of its oral agreement with Chavez. Thus, the counterclaim against Chavez and the nature of Chavez's actions towards the four albums clearly demonstrate a dispute between Chavez and Hyphy. Ultimately, the Court is faced with competing claims from two entities who claim ownership in copyrights **[*15]** through a common transferee and counter-defendant who transferred the copyrights twice. Under these circumstances, the Court finds that it is appropriate for YCH to raise the issue of compliance with § 204(a).

b. Effect of § 204(a)

The Counterclaim affirmatively states that Hyphy and Chavez entered into oral recording agreements that included the transfer to Hyphy of all intellectual property rights that Chavez had in the four albums. See FAC ¶ 16. There are no allegations in the FAC that Hyphy and Chavez entered into any kind of written agreement whatsoever.

The absence of a written agreement is a key argument made in YCH's motion, yet Hyphy's opposition does not address the argument in terms of answering the writing requirement. That is, Hyphy does not argue that it has a written agreement with Chavez or that a written agreement is somehow unnecessary to effect a transfer of Chavez's copyright interests. Instead, the opposition regarding the first cause of action mentions the oral agreement with Chavez one time, and only then in an attempt to recharacterize the agreement or the agreement's effect. Specifically, after stating the legal proposition that a co-author shares an equal undivided interest **[*16]** in a copyrighted work, Hyphy states: "This is the case regardless of whether Hyphy also pleads in the alternative that it was granted an oral license to such rights." Doc. No. 27 at 4:20-21.

It is noteworthy that the FAC never uses the term "license" or expressly alleges any claim or theory "in the alternative." Nevertheless, accepting that the FAC is alleging that a license exists, that does not aid Hyphy. ***HN7***[] A non-exclusive license may be granted orally or implied from conduct. Effects Assocs., 908 F.2d at 558. The granting of a non-exclusive license waives the right of the copyright owner to sue the licensee for copyright infringement. Graham v. James, 144 F.3d 229, 236 (2d Cir. 1998). Critically, a "mere 'non-exclusive license' does not constitute a 'transfer of copyright ownership' and therefore cannot confer standing to assert [a copyright] infringement claim." DRK Photo, 870 F.3d at 983; see Sybersound Records, Inc. v. UAV Corp., 517 F.3d 1137, 1146 (9th Cir. 2008). Therefore, even if the Court accepts Hyphy's characterization of its agreement with Chavez, the license that would be created is non-exclusive only, the license could only serve as a defense to a claim by Chavez, and it would not form an ownership interest sufficient to confer standing under the first cause of action. The first cause of action is in no way furthered by the contention that the oral **[*17]** agreement created a license in the albums as between Chavez and Hyphy. *Yellowcake, Inc. v. Morena Music, Inc., 522 F. Supp. 3d 747, 2021 U.S. Dist. LEXIS 39127, *16 (E.D. Cal. Mar. 1, 2021)*.

The absence of a written transfer agreement defeats both Hyphy's standing to pursue, and substantive claim of, copyright infringement based on an oral transfer of ownership between Chavez and Hyphy. See *17 U.S.C. § 204(a)*; *DRK Photo, 870 F.3d at 986*; *Righthaven, 716 F.3d at 1172*; *Radio TV Espanola, 183 F.3d at 926-27*; *Konigsberg, 16 F.3d at 356-57*; *Effects Assocs., 908 F.2d at 556-57*. To the extent a non-exclusive license may be involved or pled in the FAC, that non-exclusive license does not give Hyphy standing to pursue a copyright infringement claim. *DRK Photo, 870 F.3d at 983*; *Morena Music, 2021 U.S. Dist. LEXIS 39127 at *17*. Therefore, the first cause of action does not allege a valid or plausible ownership interest in the copyrights of the three albums based on an oral contractual transfer between Hyphy and Chavez. *Morena Music, 2021 U.S. Dist. LEXIS 39127 at *17*.

2. Joint Owner/Co-Author

HN8[] A "joint work" is "a work prepared by two or more authors with the intention that their contributions be merged into inseparable or interdependent parts of a unitary whole." *17 U.S.C. § 101*; *Aalmuhammed v. Lee, 202 F.3d 1227, 1231 (9th Cir. 2000)*; *Ashton-Tate Corp. v. Ross, 916 F.2d 516, 520 (9th Cir. 1990)*. "The authors of a joint work are co-owners of the copyright in that work." *17 U.S.C. § 201(a)*; *Richlin v. MGM Pictures, Inc., 531 F.3d 962, 968 (9th Cir. 2008)*; *Ashton-Tate, 916 F.2d at 521*. Each author must make an "independently copyrightable contribution," which is a contribution that "represents original expression that could stand on its own as the subject matter of copyright." *Ashton-Tate, 916 F.2d at 521* (quoting P. Goldstein, *Copyright: Principles, Law and Practice* ***[*18]*** , § 4.2.1 p.379 (1989)); see also *Richlin, 531 F.3d at 968*. That is, "to be an author, one must supply more than mere direction or ideas; one must 'translate an idea into a fixed tangible expression entitled to copyright protection." *S.O.S., Inc. v. Payday, Inc., 886 F.2d 1081, 1087 (9th Cir. 1989)*; *Ashton-Tate, 916 F.2d at 521*. Therefore, ***HN9***[] in the Ninth Circuit, a "joint work" has four elements: (1) a copyrightable work, (2) two or more authors, (3) the authors intend for their contributions to be merged into inseparable or interdependent parts of a unitary whole, and (4) each author made an independently copyrightable contribution to the work. *Aalmuhammed, 202 F.3d at 1231*. In determining whether individuals are co-authors of a joint work, a contract that defines relationship as one of co-authors is dispositive. See *Richlin, 531 F.3d at 968*; *Aalmuhammed, 202 F.3d at 1234*. In the absence of a contract, courts consider whether: (1) a purported author "superintends" the work by exercising control; (2) the putative co-authors make objective manifestations of a shared intent to be co-authors; and (3) the audience appeal of the work turns on both contributions and the share of each in its success cannot be appraised. *Aalmuhammed, 202 F.3d at 1234*; see also *Richlin, 531 F.3d at 968*. The first factor, control, will often be the most important consideration. *Richlin, 531 F.3d at 968*; *Aalmuhammed, 202 F.3d at 1234*. Additionally, because each co-author of a "joint work" has an independent right **[*19]** to use or license the copyright, a co-author cannot be liable to another co-author for infringement of copyright, but co-authors must account to other co-authors for any profits earned from licensing or using the copyright. See *Ashton-Tate, 916 F.2d at 522*; *Oddo v. Ries, 743 F.2d 630, 632-33 (9th Cir. 1984)*. Further, ***HN10***[] unless all co-authors of a "joint work" join in granting an exclusive license, a single co-author (acting on its own behalf) can grant only a non-exclusive license in the copyright work because one co-author cannot limit the other co-authors' independent right to exploit the copyright. *Sybersound, 517 F.3d at 1146*. However, a co-owner of a copyright is free to transfer his ownership interest to another, as long as the transfer is only of the exclusive copyright interests that the transferring co-owner himself possesses. Tresona Multimedia, LLC v. Burbank High Sch. Vocal Music Ass'n, 953 F.3d 638, 645 n.2 (9th Cir. 2020).

Here, YCH does not argue that the relevant allegations in the FAC (Paragraphs 16 and 17) do not plausibly allege that the albums are joint works and that Chavez and Hyphy are co-authors. Additionally, recent Ninth Circuit authority indicates some of the requirements for a joint ownership as co-authors can at least be plausibly inferred from the Counterclaim. In *Abs Entertainment*, the Ninth Circuit addressed the copyright claims of remastering engineers in **[*20]** remastered sound recordings. See *Abs Entm't v. CBS Corp., 908 F.3d 405, 410-11 (9th Cir.*

2018). As relevant here, the Ninth Circuit made a distinction between remastering engineers and recording engineers/record producers:

> Nothing in this opinion should be construed to question or limit the creative contributions of the recording engineers and/or record producers responsible for the recording session that led to the initial fixation of the sound recording. The initial producer/engineer's role is often to work in collaboration with the performing artists to make many of the creative decisions that define the overall sound of the recording as fixed, including such things as microphone choice, microphone placement, setting sound levels, equipment used, processing filters employed, tapes selected, session structure, and other similar decisions analogous to the creative choices of photographers that courts have consistently held to be original. See *United States Copyright Office and Sound Recordings as Works Made for Hire: Hearing Before the Subcomm. on Courts and Intellectual Property of the H. Comm. on the Judiciary*, 106th Cong. 2nd Sess. (2000) (statement of Marybeth Peters, Register of Copyrights) ("The copyrightable elements in a sound recording **[*21]** will usually, though not always, involve 'authorship' both on the part of the performers whose performance is captured and on the part of the record producer responsible for setting up the recording session, capturing and electronically processing the sounds, and compiling and editing them to make the final sound recording."); cf. *Burrow-Giles, 111 U.S. at 60* (holding that photographs are copyrightable to the extent of the photographer's decisions with respect to costume, accessories, pose of subjects, light and shade and evoking the desired expression).

Id. at 423. Given *Abs Entm't*'s observations regarding the contributions of record producers, and the absence of any substantive arguments against the relevant allegations of the FAC, for purposes of this motion, dismissal based on the absence of an ownership interest is inappropriate.

However, accepting the allegation of co-authorship, and thus joint ownership, of the four albums would appear to defeat Hyphy's claim of copyright infringement. *Morena Music, 2021 U.S. Dist. LEXIS 39127 at *21*. Hyphy's theory means that it was a co-owner of the copyrights in the albums with Chavez. See id. There is no dispute that Chavez entered into a written transfer agreement with YCH. See Complaint at Ex. A; FAC ¶¶ 22, 23. Because it **[*22]** is clear that Hyphy was not a party to that transfer, Chavez could not transfer exclusive rights to YCH. See *Sybersound, 517 F.3d at 1146*. However, Chavez could transfer his ownership interest in the albums to YCH. See Tresona Multimedia, 953 F.3d at 645 n.2. Therefore, the agreement between Chavez and YCH could have transferred Chavez's interests in the album to YCH. The ultimate result would be that Hyphy is now a joint owner of the copyrights in the albums with YCH. ***HN11***[] One joint owner of a copyright cannot sue another joint owner of a copyright for copyright infringement. See *Ashton-Tate, 916 F.2d at 522*; *Oddo, 743 F.3d at 632-33*. Given the current state of the briefing before the Court, Hyphy's theory of co-authorship/joint ownership defeats its claim of copyright infringement because the other joint owner is Yellowcake. See id.; *Morena Music, 2021 U.S. Dist. LEXIS 39127 at *22*.

3. Work for Hire

HN12[] A work made for hire is defined as either:

> (1) a work prepared by an employee within the scope of his or her employment; or
>
> (2) a work specially ordered or commissioned for use as a contribution to a collective work, as part of a motion picture or other audio visual work, as a translation, as a supplementary work, as a compilation, as an instructional text, as a test, as answer material for a test, or as an atlas, if the parties expressly agree in a written **[*23]** instrument signed by them that the works shall be considered a work made for hire.

17 U.S.C. 101; *Hendricks & Lewis PLLC v. Clinton, 766 F.3d 991, 998 n.5 (9th Cir. 2014)*; *Jules Jordan Video, 617 F.3d at 1156*. With respect to the first definition, the terms "employee" and "scope of employment" are construed according to common law agency principles. *Community for Creative Non-Violence v. Reid, 490 U.S. 730, 740-41, 109 S. Ct. 2166, 104 L. Ed. 2d 811 (1989)*; *U.S. Auto Parts Network, Inc. v. Parts Geek, Ltd. Liab. Co., 692 F.3d 1009, 1015 (9th Cir. 2012)*; *JustMed, Inc. v. Byce, 600 F.3d 1118, 1125 (9th Cir. 2010)*. ***HN13***[] The central question for determining whether a person is an "employee" is "the hiring party's right to control the manner and means by which the product is accomplished." *Reid, 490 U.S. at 751*; *JustMed, 600 F.3d at 1125*. Factors that a court should consider for determining "employee" status include: the skill required for that occupation, the source of the instrumentalities and tools, the location of the work, the duration of the relationship between the parties, whether the hiring party has the right to assign additional projects to the hired party, the extent of the hired party's discretion over when and how long to work, the method of payment, the hired party's role in hiring and paying assistants, whether the work is part of the regular business of the hiring party, whether the hiring party is in business, the provision of employee benefits, and the tax treatment of the hired party. *Reid, 490 U.S. at 751-52*; *JustMed, 600 F.3d at 1125*. ***HN14***[] An employee's "scope of employment" is determined by examining three factors: (1) the work is of the kind **[*24]** the employee is employed to perform; (2) the work occurs substantially within the authorized time and space limits; and (3) it is actuated, at least in part, by a purpose to serve the employer. *U.S. Auto Parts, 692 F.3d at 1015*. With respect to the second definition, "[w]orks 'specially ordered or commissioned' can only be made after the execution of an express agreement between the parties." *Gladwell Gov't Servs., Inc. v. County of Marin, 265 F. App'x 624, 626 (9th Cir. 2008)*; *Schiller & Schmidt, Inc. v. Nordisco Corp., 969 F.2d 410, 413 (7th Cir. 1992)*; *Sisyphus Touring, Inc. v. TMZ Prods., 208 F.Supp.3d 1105, 1111-12 (C.D. Cal. 2016)*. No specific wording need be used in order for a writing to constitute a "work for hire" agreement." *Warren v. Fox Family Worldwide, Inc., 328 F.3d 1136, 1141 (9th Cir. 2003)*. However, if there is no written instrument at all, then the work cannot be a commissioned or specially ordered "work for hire." *Jules Jordan Video, 617 F.3d at 1155*. If a work is made for hire, "the employer or other person for whom the work was prepared is considered the author" and owns the copyright "unless the parties have expressly agreed otherwise in a written instrument signed by them." *17 U.S.C. § 201(b)*; see *U.S. Auto Parts, 692 F.3d at 1015*.

As indicated above, there are only two ways that a work can be deemed a "work for hire." *17 U.S.C. § 101*. The FAC's allegations are insufficient to demonstrate either method.

First, there are no allegations that a written agreement exists between Chavez and Hyphy that states that the albums are commissioned works that are to be considered works for hire. In fact, the FAC alleges **[*25]** that the agreement with Chavez was oral. See Counterclaim ¶ 16. As a result of this allegation, the albums categorically cannot be specially ordered or commissioned works for hire under *§ 101(2)*. *Jules Jordan Video, 617 F.3d at 1155*; *Morena Music, 2021 U.S. Dist. LEXIS 39127 at *24*.

Second, with respect to "employee" status, Paragraph 16 of the Counterclaim describes the relationship with Chavez. Some aspects of Paragraph 16 may be supportive of "employee" status under *Reid*, e.g. providing sound engineers and audio/visual directors, while others do not, e.g. Chavez was paid a fixed rate per album for the albums. Cf. FAC ¶ 16 with *Reid, 490 U.S. at 751-53*. However, neither Paragraph 16 nor the remainder of the FAC address all of the *Reid* factors. Further, unlike the express allegation that Hyphy did enough to be considered a co-author, or the express allegation that Chavez granted Hyphy all rights in the three albums, there are no express allegations that Chavez was an employee of Hyphy. Given who Chavez is (the founder and musical principal of Los Originales De San Juan), and the limited allegations made in the FAC, the Court finds it more plausible that Chavez is an independent contractor, particularly in the absence of an express allegation that Chavez was an employee of Hyphy. In the absence of **[*26]** an actual allegation that Chavez was an employee of Hyphy, supported by sufficient factual allegations that indicate employee status, there is not a sufficiently plausible indication that Chavez was an employee of Hyphy who was acting int the scope of his employment for Hyphy. See *Morena Music, 2021 U.S. Dist. LEXIS 39127 at *26*.

4. Written Agreement

As indicated above, the copyright registration for the album/sound recording El Campesino identifies the "Copyright Claimant" as "Hyphy Music, Inc., Transfer: By written agreement." RJN Ex. 4. Thus, a judicially noticed document suggests that a written agreement for a transfer of the interest in El Campesino exists. Such an agreement would fatally undercut the basis for YCH's argument that no valid transfer or ownership interest exists. However, the Court finds it troubling that the written agreement was not alleged to exist in the original Counterclaim, the now operative FAC, or even the opposition to this motion to dismiss. Instead, each of these documents identify the existence of an oral agreement only. Considering the importance a written agreement would have to Hyphy's claims and its defense of those claims, the failure of Hyphy to allege or describe in any fashion a written agreement, **[*27]** and the FAC's clear factual allegation of only an oral agreement, the Court cannot conclude that a written transfer agreement exists.

5. Conclusion

The Counterclaim does not plausibly allege a valid transfer between Chavez and Hyphy, nor does the Counterclaim plausibly allege that the four albums were works for hire. Accepting that there are sufficient plausible allegations that indicate co-authorship between Hyphy and Chavez, the allegations in the FAC and the Complaint indicate that Chavez transferred at least his ownership interests in the albums to YCH. As a co-owner, Hyphy cannot sue YCH for copyright infringement. Since no plausible infringement claim is stated, dismissal is appropriate. See *Morena Music, 2021 U.S. Dist. LEXIS 39127 at *26*.

II. Third Cause of Action — Injunctive Relief under the Copyright Act

HN15[] The Copyright Act provides that a court "may . . . grant temporary and final injunctions on such terms as it may deem reasonable to prevent or restrain infringement of a copyright." *17 U.S.C. § 501(a)*; *Flexible Lifeline sys. v. Precision Lift, Inc., 654 F.3d 989, 994 (9th Cir. 2011)*. The plain language of *§ 501(a)* presupposes either a plausibly pled or an adequately proven copyright infringement claim. This is consistent with the nature of an injunctive relief, which is not a standalone cause of action but a remedy that must be **[*28]** supported by a viable substantive cause of action. *Morena Music, 2021 U.S. Dist. LEXIS 39127 at *26-*27*; *TYR Sport Inc. v. Warnaco Swimwear, Inc., 679 F.Supp.2d 1120, 1141 n.13 (C.D. Cal. 2009)*. Dismissal of the claim for injunctive relief as a distinct cause of action is appropriate, but Hyphy is free to request injunctive relief under *§ 501(a)* in the prayer or as part of the allegations under an infringement cause of action. *Morena Music, 2021 U.S. Dist. LEXIS 39127 at *26-*27*.

III. Fourth, Fifth & Sixth Causes of Action — Intentional Interference with Prospective Business Advantage, Intentional Interference with Contractual Relations, UCL, & Conversion

Counter-Defendants' Arguments

YCH argues that the state law claims fail because they are preempted by the Copyright Act and fail to satisfy the California statute of frauds requirement. With respect to preemption, the state law claims are preempted by the Copyright Act because they are equivalent to the rights protected by the Copyright Act and the albums fall within the subject matter of the Copyright Act. Each cause of action depends on a valid transfer of a copyright interest from Chavez to Hyphy.

Counter-Plaintiff's Opposition

With respect to preemption, Hyphy argues that the Copyright Act does not preempt any of the state law claims. Each claim is at least partly based on YCH's wrongdoing affecting Hyphy's right to own and possess **[*29]** the tangible masters. ***HN16***[] Copyright law protects intangible sound recordings but does not protect the material object in which the work is embodied. The tangible embodiment of intangible rights, like the tangible masters here, are qualitatively different than what is protected by the Copyright Act. YCH cites no case in which the Copyright Act preempts a claim based on property rights in tangible embodiments like the masters. Therefore, there is no preemption.

HN17[] With respect to the statute of frauds, full performance of the contract is an exception to the writing requirement. Hyphy argues that it has fully performed under the terms of the oral agreement. Therefore, the California statute of frauds requirement has been met. Additionally, YCH's reliance on *17 U.S.C. § 204(a)*'s requirement for a writing is misplaced because that section only involves transfers of a copyright. That section can have no application to the masters, which are tangible property and not copyrights. Finally, Hyphy argues that each state law claim incorporates by reference allegations regarding its co-authorship of the albums. Thus, contrary to YCH's arguments, not one counterclaim relies solely on Hyphy being able to establish ownership **[*30]** of the copyrights at issue through a written contract.

Discussion

YCH's arguments against the state law counterclaims are primarily based on either Copyright Act preemption or state law statute of frauds.

1. California Statute of Frauds

HN18[] YCH invokes *Cal. Civ. Code § 1624(a)(1)*, which applies to agreements that by their terms are not to be performed within one year of making the agreement. See *Cal. Civ. Code § 1624(a)(1)*; *Zakk v. Diesel, 33 Cal.App.5th 431, 449, 245 Cal. Rptr. 3d 215 (2019)*. However, even if a contract cannot be completely performed within one year of execution, if the contract has been fully performed by one party, the remaining promise is taken out of the statute of frauds and may be enforced by the performing party. See *Dutton v. Interstate Investment Corp., 19 Cal.2d 65, 119 P.2d 138, (1941)*; *Dougherty v. California Kettleman Oil Royalties, 9 Cal.2d 58, 81, 69 P.2d 155 (1937)*; *Zakk, 33 Cal.App.5th 449-54*; *Secrest v. Security Nat'l Morg. Loan Trust 2002-2, 167 Cal.App.4th 544, 556, 84 Cal. Rptr. 3d 275 (2008)*.

Here, the allegations in the Counterclaim generally describe the 2013 oral agreement with Chavez as being one for the completion of musical albums over a period of five years in exchange for a fixed monetary amount per album. See Counterclaim ¶¶ 16, 17. There are no allegations that indicate that Chavez has additional contractual promises to perform. While there are no allegations that address the statute of frauds expressly, that is hardly surprising as the statute of frauds is an affirmative defense. See *Fed. R. Civ. P. 8(c)(1)*; *Corbin v. Time Warner Entm't-Advance/Newhouse P'ship, 821 F.3d 1069, 1079-80 (9th Cir. 2016)*; *Walton v. City of Red Bluff, 2 Cal.App.4th 117, 131, 3 Cal. Rptr. 2d 275 (1991)*. Further, YCH does not address in its reply Hyphy's "full **[*31]** performance" argument. In the absence of any response from YCH, and because the applicability of the statute of frauds is not apparent from the face of the counterclaims, dismissal of any state law claim based on the potential application of the statue of frauds is inappropriate. See *McCalden v. California Library Ass'n, 955 F.2d 1214, 1219 (9th Cir. 1990)* (holding that a complaint may be dismissed on the basis of an affirmative defense if the defense clearly appears by the face of the complaint); *Morena Music, 2021 U.S. Dist. LEXIS 39127 at *30*; *Williams v. Alhambra Sch. Dist. No. 68, 234 F.Supp.3d 971, 985 (D. Ariz. 2017)* (declining to dismiss a claim where the allegations did not clearly demonstrate the applicability of the statute of frauds).

2. Copyright Act Preemption

HN19[] All state laws that are "equivalent to any of the exclusive rights within the general scope of copyright as specified by [*§ 106*] in works of authorship that are fixed in a tangible medium of expression and come within the subject matter of copyright as specified in [*§ 102* and *§ 103*] . . . are governed exclusively by [the Copyright Act]." *17 U.S.C. § 301(a)*; see also *Maloney v. T3 Media, Inc., 853 F.3d 1004, 1010 (9th Cir. 2017)*; *Sybersound, 517 F.3d at 1150*. A two part test is used to determine whether a state law claim is preempted by *§ 301(a)*. *Maloney, 853 F.3d at 1010*; *Sybersound, 517 F.3d at 1150*. First, whether the subject matter of the state law claim falls within the subject matter of copyright as described in *17 U.S.C. §§ 102* and *103*. *Maloney, 853 F.3d at 1010*; *Sybersound, 517 F.3d at 1150*. Second, assuming that it does, whether the rights asserted under **[*32]** the state law are equivalent to the rights contained in *17 U.S.C. § 106*, which identifies the exclusive rights of copyright holders. *Maloney, 853 F.3d at 1010*; *Sybersound, 517 F.3d at 1150*. Under the second prong, courts determine whether the state law claim contains an element not shared by a copyright claim; "an element which changes the nature of the action so that it is qualitatively different from the [copyright claim]." *Summit Mach. Tool Manufacturing. Corp. v. Victor CNC Sys., 7 F.3d 1434, 1439-40 (9th Cir. 1993)* (quotation omitted); see *Laws v. Sony Music Entm't, Inc., 448 F.3d 1134, 1143 (9th Cir. 2006)*; *Altera Corp. v. Clear Logic, Inc., 424 F.3d 1079, 1089 (9th 2005)*. In essence, courts should "engage in a fact-specific inquiry into the actual allegations underlying the claims at issue in the case, so as to determine whether the 'gravamen' of the state law claim asserted is the same as the rights protected by the Copyright Act." *Crafty Prods. v. Michaels Cos., 424 F.Supp.3d 983, 995 (S.D. Cal. 2019)*; *Idema v. Dreamworks, Inc., 162 F.Supp.2d 1129, 1190 (C.D. Cal. 2001)*.

a. Intentional Interference with Prospective Economic Advantage ("IIPEA")

HN20[] The elements of an IIPEA claim are: (1) the existence, between the plaintiff and some third party, of an economic relationship that contains the probability of future economic benefit to the plaintiff; (2) the defendant's knowledge of the relationship; (3) intentionally wrongful acts designed to disrupt the relationship; (4) actual disruption of the relationship; and (5) economic harm proximately caused by the defendant's action. *Roy Allan Slurry Seal, Inc. v. Am. Asphalt S., Inc., 2 Cal. 5th 505, 512, 213 Cal. Rptr. 3d 568, 388 P.3d 800 (2017)*. The third element, a wrongful **[*33]** act, refers to an unlawful act that is proscribed by a constitutional, statutory, regulatory, common law, or other determinable standard such that it is independently wrongful of its interfering character. *Edwards v. Arthur Andersen LLP, 44 Cal. 4th 937, 944, 81 Cal. Rptr. 3d 282, 189 P.3d 285 (2008)*. IIPEA claims are more inclusive than intentional interference with contractual relations claims and do not require the existence of a valid contract. *Korea Supply Co. v. Lockheed Martin Corp., 29 Cal.4th 1134, 1159, 131 Cal. Rptr. 2d 29, 63 P.3d 937 (2003)*.

The Counterclaim alleges that Hyphy was in an economic relationship with YouTube that would have resulted in economic benefit through uploading and commercially exploiting the albums and cover art (advertisements would be placed in the videos which would generate revenue). See Counterclaim ¶ 56. Yellowcake and Colonize knew about Hyphy's economic relationship with YouTube and intended to disrupt it. Yellowcake and Colonize sent fraudulent DMCA takedown notices[2] to YouTube, knowing that the notices would likely interfere with the economic relationship between Hyphy and YouTube. See id. at ¶ 57. The relationship was disrupted as YouTube agreed to clock Hyphy's video postings and to cease paying advertising revenues to Hyphy for the videos embodying the albums and cover art. See id. at ¶ 58. This disruption caused economic loss and harm **[*34]** to Hyphy. See id.

First, the albums are sound recordings and thus, are entitled to copyright protection. See *17 U.S.C. § 102(a)(7)*; *Morena Music, 2021 U.S. Dist. LEXIS 39127 at *33*. Further, the albums' respective cover art appears to be the subject of registered copyrights as visual material. See FAC Ex. B (listing Copyright registrations numbers); cf. *Morena Music, 2021 U.S. Dist. LEXIS 39127 at *33* (finding cover art for sound recording was the subject of a registered copyright).[3] The registration indicates that the cover art is "artwork and photograph for digital sound recordings." ***HN21***[] The Copyright Office permits registration of cover art as an associated image of sound recordings. *EMI Christian Music Grp., Inc. v. MP3tunes, LLC, 844 F.3d 79, 96-97 (2d Cir. 2016)*; *Morena Music,*

---

[2] "DMCA" refers to the Digital Millennium Copyright Act, and the takedown procedures of the are found at *17 U.S.C. § 512(c)*. See *Vernor v. Autodesk, Inc., 621 F.3d 1102, 1105 & n.3 (9th Cir. 2010)*.

[3] The FAC lists the copyrights in the cover art for three albums that are at issue. See FAC Ex. B. However, the Court was unable to locate these registrations on the Copyright Office website. In the absence of any challenges by YCH, the Court will assume that Hyphy has simply made typographical errors while attempting to convey the cover art registration numbers. Nevertheless, Hyphy is expected to review the registration information provided and make appropriate corrections in any amended counterclaims. If Hyphy has no registrations in the cover art, then Hyphy must correct the FAC by dropping all allegations of registered cover art. Pursuing infringement claims based on non-existent registrations (as opposed to incorrectly entered existing registration numbers) is sanctionable.

2021 U.S. Dist. LEXIS 39127 at *33 (citing *EMI Christian*). Therefore, the cover art is also subject to copyright protection.

Second, the IIPEA claim is based on Yellowcake and Colonize utilizing § 512 of the DMCA/Copyright Act to enforce what they believe to be their exclusive rights in the albums and cover art. This led to YouTube prohibiting Hyphy from using YouTube's platform in connection with videos involving the albums and cover art. In other words, Yellowcake and Colonize interfered with Hyphy's ability to exploit the albums by reproducing, distributing, displaying, and/or performing the albums through YouTube. Hyphy's allegations call into question who has **[*35]** the ability to decide whether and how to display, copy, or make available the albums. This is conduct within the ambit of § 106. See 17 U.S.C. § 106; Morena Music, 2021 U.S. Dist. LEXIS 39127 at *34; McGowan, 505 F. Supp. 3d 1000, 2020 U.S. Dist. LEXIS 229408 at *39-*40; Hoff, 2019 U.S. Dist. LEXIS 140343 at *17-*18; Worth, 5 F.Supp.2d at 822-23.

Hyphy argues that its IIPEA claim is qualitatively different because it includes allegations that Yellowcake and Colonize interfered with Hyphy's right to possess and exploit the tangible masters of the albums. The Court agrees with Hyphy that claims based on the tangible masters of the sound recordings, as opposed to the copyrighted albums, would be qualitatively different from a copyright infringement claim. However, the allegations under the IIPEA claim do not reasonably indicate that the tangible masters have any relevance.

It is unknown how the tangible masters could have been affected by the § 512 takedown notices and YouTube's corresponding decision to not permit Hyphy to post *videos* on YouTube. To the Court's understanding, the tangible masters are not videos, they are sound/audio recordings. If anything, the videos being posted on YouTube would appear to be some form of copy of the masters, not the tangible masters themselves. Without additional allegations, it is unreasonable to infer that the tangible masters form the basis of any IIPEA claim **[*36]** as alleged in the Counterclaim. See Seven Arts, 733 F.3d at 1254; Morena Music, 2021 U.S. Dist. LEXIS 39127 at *35.

In sum, because Hyphy's IIPEA claim as pled is preempted by the Copyright Act, dismissal is appropriate. See Morena Music, 2021 U.S. Dist. LEXIS 39127 at *35; Crafty Prods., 424 F.Supp.3d at 995-96; Idema, 162 F.Supp.2d at 1193.

b. Intentional Interference with Contractual Relations ("IICR")

HN22[] The elements of a cause of action for IICR are: (1) a valid contract between the plaintiff and a third party; (2) the defendant's knowledge of that contract; (3) the defendant's intentional acts designed to induce a breach or disruption of the contractual relationship; (4) actual breach or disruption of the contractual relationship; and (5) resulting damage. Quelimane Co. v. Stewart Title Guaranty Co., 19 Cal.4th 26, 55, 77 Cal. Rptr. 2d 709, 960 P.2d 513 (1998); Ghazarian v. Magellan Health, Inc., 53 Cal.App.5th 171, 191, 266 Cal. Rptr. 3d 841 (2020). "To state a claim for disruption of a contractual relation, the plaintiff need not show the defendant induced an actual or inevitable breach of the contract. It is sufficient to show the defendant's conduct made the plaintiff's performance, and inferentially enjoyment, under the contract more burdensome or costly." Ghazarian, 53 Cal.App.5th at 191 (quoting Golden West Baseball Co. v. City of Anaheim, 25 Cal.App.4th 11, 51, 31 Cal. Rptr. 2d 378 (1994)).

The Counterclaim alleges that Hernandez met with Chavez and expressed interest in exploiting the albums. See Counterclaim ¶ 62. Although Chavez advised Hernandez that Hyphy owned the albums, Hernandez intentionally misled Chavez by telling Chavez that Hyphy had no rights in the albums. See **[*37]** id. at ¶ 63. Hernandez offered to Chavez significant money for Chavez's rights in the albums and further induced Chavez to ignore his contractual obligations through an offer to indemnify Chavez in the event Hyphy brought suit. See id. As a result, Chavez entered into an agreement with Yellowcake for the transfer of his ownership and rights in the albums and cover art even though Chavez had no such rights to grant. See id. at ¶ 64. This interference with Hyphy's agreement with Chavez caused Hyphy harm. See id. at ¶ 65.

(1) Preemption

First, the albums and cover art are protected by the copyrights. See *17 U.S.C. § 102(a)*; *EMI Christian Music, 844 F.3d at 96-97*; *Morena Music, 2021 U.S. Dist. LEXIS 39127 at *37*; FAC Ex. B.

Second, the allegations in essence complain that YCH induced Chavez to sell rights in the albums that he did not have, presumably because Chavez had already transferred all of his rights to Hyphy. See Counterclaim ¶¶ 16, 17, 62, 63, 64. In other words, the contract that was allegedly breached involved the ownership of the albums and cover art. These allegations do not identify or involve any of the rights listed in *§ 106*. ***HN23***[] *Section 106* of the Copyright Act grants exclusive rights to a copyright holder to reproduce, prepare derivative works, distribute, perform, and display the copyrighted **[*38]** work. See *17 U.S.C. § 106*; *Maloney, 853 F.3d at 1010*; *Morena Music, 2021 U.S. Dist. LEXIS 39127 at *37*. Because Hyphy's IICR claim is qualitatively different from a copyright infringement claim because none of the rights listed in *§ 106* are the subject of the IICR claim. Dismissal of this claim on the basis of preemption is inappropriate. See *Morena Music, 2021 U.S. Dist. LEXIS 39127 at *37*.

(2) Pleading Deficiency [4]

"*Section 204(a)* ***HN24***[] not only bars copyright infringement actions but also breach of contract claims based on oral agreements." *Valente-Kritzer Video v. Pinckney, 881 F.2d 772, 774 (9th Cir. 1989)*; *Morena Music, 2021 U.S. Dist. LEXIS 39127 at *39*; *Johnson v. Altamirano, 418 F.Supp.3d 530, 556 (S.D. Cal. 2019)*. Here, Hyphy's IICR claim is based on YCH inducing Chavez to transfer his copyright interests to YCH, even though those transfers were the subject of an oral agreement between Chavez and Hyphy. Therefore, in order for YCH's conduct in inducing the transfer of copyrights from Chavez to YCH to be wrongful, a valid contract between Hyphy and Chavez for the transfer of those copyrights is an essential element of Hyphy's IICR claim. See *Morena Music, 2021 U.S. Dist. LEXIS 39127 at *39*; *Johnson, 418 F.Supp.3d at 555-56*; *Quelimane, 19 Cal.4th at 55*. However, as explained above, *§ 204(a)* operates to invalidate the oral contract between Hyphy and Chavez to the extent that the oral contract included the transfer of copyright ownership in the albums.[5] See *Valente-Kritzer Video, 881 F.2d at 774*; *Morena Music, 2021 U.S. Dist. LEXIS 39127 at *39*; *Johnson, 418 F.Supp.3d at 556*. That is, through operation of *§ 204(a)*, there is no valid contract between Chavez and Hyphy for the transfer of Chavez's copyright interests in the albums. **[*39]** See *Morena Music, 2021 U.S. Dist. LEXIS 39127 at *39*; *Johnson, 418 F.Supp.3d at 555-56*. Therefore, any IICR claim based on the purported transfer of Chavez's ownership of the copyrights in the four albums fails because Hyphy cannot establish the first essential element of an IICR claim. See id.; *Bed, Bath & Beyond of La Jolla, Inc. v. La Jolla Village Square Venture Partners, 52 Cal.App.4th 867, 879, 60 Cal. Rptr. 2d 830 (1997)*; *A-Mark Coin Co. v. General Mills, Inc., 148 Cal.App.3d 312, 322, 195 Cal. Rptr. 859 (1983)*. Dismissal of the IICR claim is appropriate to the extent that the claim is based on ownership interests or the transfer thereof in the four albums. See *Valente-Kritzer Video, 881 F.2d at 774*; *Morena Music, 2021 U.S. Dist. LEXIS 39127 at *40*; *Johnson, 418 F.Supp.3d at 556*; *Bed, Bath & Beyond, 52 Cal.App.4th at 879*; *A-Mark Coin Co., 148 Cal.App.3d at 322*.

c. UCL

---

[4] YCH's motion did not argue that the IICR cause of action was not plausibly pled. However, the pleading deficiency identified in this section necessarily follows from the Court's analysis of the first cause of action. Because a failure to state a claim can be raised even at trial, see *Fed. R. Civ. P. 12(h)(2)*, and because the deficiency is fatal to part of the IICR cause of action, the Court addresses the matter *sua sponte* at this time. See ***Omar v. Sea Land Service, Inc., 813 F.2d 986, 991 (9th Cir. 1987)***.

[5] YCH did not move to dismiss the second cause of action for copyright infringement based on the three albums' cover art. Therefore, the analysis in this section and ultimate dismissal does not apply to issues surrounding the cover art.

HN25[] The UCL broadly proscribes the use of any "unlawful, unfair or fraudulent business act or practice." *Cal. Bus. & Prof. Code. § 17200*; *Beaver v. Tarsadia Hotels, 816 F.3d 1170, 1177 (9th Cir. 2016)*. "The UCL operates as a three-pronged statute: 'Each of these three adjectives [unlawful, unfair, or fraudulent] captures a 'separate and distinct theory of liability.'" *Beaver, 816 F.3d at 1177* (citation omitted). The UCL's "unlawful" prong "borrows violations of other laws . . . and makes those unlawful practices actionable under the UCL," and "virtually any law or regulation — federal or state, statutory or common law — can serve as a predicate . . . ." *Candelore v. Tinder, Inc., 19 Cal.App.5th 1138, 1155, 228 Cal. Rptr. 3d 336 (2018)*. When the underlying legal claim that supports a UCL cause fails, however, "so too will the [the] derivative UCL claim." *AMN Healthcare, Inc. v. Aya Healthcare Services, Inc., 28 Cal.App.5th 923, 950, 239 Cal. Rptr. 3d 577 (2018)*. "A business practice is 'fraudulent'' under the UCL if members of the public are likely to be deceived." *Davis v. HSBC Bank, 691 F.3d 1152, 1169 (9th Cir. 2012)*; *Puentes v. Wells Fargo Home Morg., Inc., 160 Cal.App.4th 638, 645, 72 Cal. Rptr. 3d 903 (2008)*. Unless a particular disadvantaged or vulnerable **[*40]** group is targeted, whether conduct is "fraudulent" is judged by the effect the conduct would have on a reasonable consumer. *Puentes, 160 Cal.App.4th at 645*. Finally, California law with respect to "unfair" conduct is currently "in flux." *Hodsdon v. Mars, Inc., 891 F.3d 857, 866 (9th Cir. 2018)*. Conduct is "unfair" either when it "threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition," or when it 'offends an established public policy or when the practice is immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers." Id.

The Counterclaim alleges that Yellowcake and Colonize are reproducing and performing, or benefitting financially from, aiding, encouraging, enabling, inducing causing, materially contributing to, or otherwise facilitating the reproduction and performance of Hyphy's statutory and common law rights in the albums and cover art and have engaged in common law misappropriation. See Counterclaim ¶ 68. Hernandez also induced Chavez to breach his agreement with Hyphy in order to obtain rights which Chavez had no right to give. See id. The Counterclaim **[*41]** alleges that this conduct is unfair and constitutes unfair, unlawful, or deceptive practices under *Cal. Bus. & Prof. Code § 17200*. See id. at ¶ 68.

(1) Yellowcake and Colonize

First, as discussed above, the albums and cover art are protected by the copyright act. See *17 U.S.C. § 102*; *Morena Music, 2021 U.S. Dist. LEXIS 39127 at *41*; *EMI Christian Music, 844 F.3d at 96-97*.

Second, the conduct alleged in Paragraph 68 involves reproducing and performing the albums and cover art and engaging in common law misappropriation. *HN26*[] Reproducing and performing are actions that are expressly listed as exclusive rights in *§ 106*. See *17 U.S.C. § 106*; *Maloney, 853 F.3d at 1010*.

HN27[] Common law misappropriation is covered under the umbrella of unfair competition and is "normally invoked in an effort to protect something of value not otherwise covered by patent or copyright law, trade secret law, breach of confidential relationship, or some other form of unfair competition." *City Solutions, Inc. v. Clear Channel Communications, 365 F.3d 835, 842 (9th Cir. 2004)*. The elements of a California common law misappropriation claim are: (1) the plaintiff made a substantial investment of time, effort and money into creating the thing misappropriated such that the court can characterize that "thing" as a kind of property right; (2) the defendant appropriated the "thing" at little or no cost, such that the court can characterize defendant's actions as "reaping where it has not sown;" **[*42]** and (3) the defendant injured plaintiff by the misappropriation. *Hollywood Screentest of Am., Inc. v. NBC Universal, Inc., 151 Cal. App. 4th 631, 650, 60 Cal. Rptr. 3d 279 (2007)*. The only "things" that are identified as "misappropriated" are the albums and cover art, see Counterclaim ¶ 68, both of which are protected by the Copyright Act. Further, the only alleged conduct that could readily be considered appropriation are the acts of reproducing, displaying, and performing, all of which are exclusive rights that belong to a copyright owner under *§ 106*.

Hyphy's opposition generally argues that the involvement of the tangible masters makes all of its claims qualitatively different from an infringement claim. The term "tangible masters" is not used under this cause of action, but the term does appear in Paragraph 16. Paragraph 67 of the UCL claim incorporates by reference all of the prior 66 paragraphs, including paragraphs that make up five other causes of action. See Counterclaim ¶ 67. This is an improper shotgun pleading technique that does not give proper notice to either YCH or the Court that the tangible masters are intended to play a role in the UCL claim.[6] See *Weiland v. Palm Beach Cnty. Sheriff's Office, 792 F.3d 1313, 1321-23 (11th Cir. 2015)*; *Deerpoint Grp., Inc. v. Agrigenix, LLC, 345 F.Supp.3d 1207, 1234 n.14 (E.D. Cal. 2018)*. Further, apart from the notice concerns, it is unclear how the tangible masters truly fit within the conduct alleged under the UCL **[*43]** and particularly Paragraph 68 given the other allegation involving the involvement of digital mediums such as YouTube. That is, it is unclear how tangible masters can play by utilized through YouTube. Therefore, Hyphy's reliance on the tangible masters does not reasonably fit within the allegations actually made within the FAC and the claim as pled is implausible.

Because the Court finds that the acts of reproducing, performing, and "misappropriating" are actions covered by *§ 106*, the UCL claims against Yellowcake and Colonize are preempted by the Copyright Act. See *Kodadek v. MTV Networks, Inc., 152 F.3d 1209, 1213 (9th Cir. 1998)*; *Media.net Adver. FZ-LLC v. NetSeer, Inc., 156 F.Supp.3d 1052, 1074-75 (N.D. Cal. 2016)*.

(2) Hernandez

The Counterclaim alleges that Hernandez induced Chavez to breach his agreement with Hyphy. No other conduct by Hernandez is expressly identified under the UCL claim. See Counterclaim ¶¶ 68-71.

(A) Preemption

HN28[] Inducing a breach of contract by facilitating a transfer of copyrighted works does not encompass any exclusive right under *§ 106*. See *Morena Music, 2021 U.S. Dist. LEXIS 39127 at *44*. Therefore, the UCL claim against Hernandez is qualitatively different from a copyright infringement claim and not preempted by *§ 301*. See id.

(B) Pleading Defect [7]

HN29[] Inducing a breach of contract is part of an IICR claim, specifically it is one of two ways to satisfy the third **[*44]** element of that cause of action. As discussed above, through operation of *§ 204(a)*, there is no valid oral contract between Hyphy and Chavez for the transfer of a copyright in the albums. See *Valente-Kritzer Video, 881 F.2d at 774*; *Johnson, 418 F.Supp.3d at 556*. Without a valid contract, no breach can be induced. See *Morena Music, 2021 U.S. Dist. LEXIS 39127 at *44*; *Johnson, 418 F.Supp.3d at 556*; *Bed, Bath & Beyond, 52 Cal.App.4th at 879*; *A-Mark Coin Co., 148 Cal.App.3d at 322*. In other words, Hernandez did not and could not induce Chavez to breach a valid oral agreement for the transfer of copyrights in the four albums. Without inducement, there is no wrongful conduct that could be considered "unfair," "fraudulent," or "unlawful." Thus, because there is no plausible

---

[6] For any cause of action, not just the IIPEA claim, if prior paragraphs are intended to support that cause of action, then Hyphy should incorporate by reference only those specific paragraphs, e.g. "paragraphs 14 through 17, 27, 38 and 42 are hereby incorporates by reference." The wholesale incorporation by reference of all prior paragraphs, when not all prior paragraphs are relevant and intended to support a cause of action, is improper. *Weiland, 792 F.3d at 1321-23*; *Deerpoint Grp., 345 F.Supp.3d at 1234 n.14*.

[7] Like the IICR claim, YCH's motion did not argue that the UCL cause of action was not plausibly pled. However, the pleading deficiency identified in this section necessarily follows from the Court's analysis of the first cause of action and the IICR claim. Because the deficiency is fatal to part of the UCL claim, the Court addresses the matter *sua sponte* at this time. See ***Omar, 813 F.2d at 991***.

or viable claim, dismissal of any UCL claim that relates to the seven albums or transfer thereof is proper.[8] See Morena Music, 2021 U.S. Dist. LEXIS 39127 at *44-*45; AMN Healthcare, 28 Cal.App.5th at 950.

d. Conversion

HN30[] Conversion is "an act of willful interference with a chattel, done without lawful justification, by which any person thereto is deprived of use and possession." De Vries v. Brumback, 53 Cal.2d 643, 647, 2 Cal. Rptr. 764, 349 P.2d 532 (1960). Stated differently, conversion is "the wrongful exercise of dominion over the property of another." Lee v. Hanley, 61 Cal.4th 1225, 1240, 191 Cal. Rptr. 3d 536, 354 P.3d 334 (2015); Hester v. Public Storage, 49 Cal.App.5th 668, 680, 263 Cal. Rptr. 3d 299 (2020). The elements of conversion are: (1) the plaintiff's ownership or right to possession of the property; (2) the defendant's conversion by a wrongful act or disposition of property rights; and (3) damages. Lee, 61 Cal.4th at 1240; Hester, 49 Cal.App.5th at 680. To establish conversion, a plaintiff must show an actual **[*45]** and substantial interference with his ownership or right to posses the property. Zaslow v. Kroenert, 29 Cal.2d 541, 550-51, 176 P.2d 1 (1946). The measure of damages for a conversion claim is the full value of the property converted. General Security Servs. Corp. v. County of Fresno, 815 F.Supp.2d 1123, 1143 (E.D. Cal. 2011); Intel Corp. v. Hamidi, 30 Cal.4th 1342, 1350, 1 Cal. Rptr. 3d 32, 71 P.3d 296 (2003); Irwin v. McDowell, 91 Cal. 119, 122, 27 P. 601 (1891).

The Counterclaim in relevant part alleges that Hyphy owns the tangible master recordings for the three albums and that Yellowcake intentionally interfered with Hyphy's ownership in that property by exercising dominion over the masters, exploiting the masters, claiming ownership in the masters, and interfering with Hyphy's ability to commercially exploit the masters. See Counterclaim ¶¶ 73, 74.

HN31[] The Ninth Circuit has recognized that claims for the conversion of tangible property involve actions different from those proscribed in the copyright laws and thus, are not preempted. Oddo, 743 F.2d at 635. "While conversion is generally immune from preemption because it involves tangible property, conversion actions seeking only damages for reproduction of the property — not return of tangible property — are preempted by the Copyright Act." Doody v. Penguin Group (USA), Inc., 673 F.Supp.2d 1144, 1164-65 (D. Haw. 2009); Marketing Info. Masters, Inc. v. Board of Trs. of Cal. St. Univ. Sys., 552 F.Supp.2d 1088, 1098 (S.D. Cal. 2008); Firoozye v. Earthlink Network, 153 F.Supp.2d 1115, 1130 (N.D. Cal. 2001).

Hyphy's invocation of the tangible masters, as opposed to the albums/sound recordings embodied within the masters which are subject to copyright protection, see 17 U.S.C. § 102(a)(7), is clearly an attempt to fit this **[*46]** claim within *Oddo*. However, the Court is not satisfied that Hyphy has alleged a viable claim, either in terms of Oddo or pleading the elements of conversion.

First, the FAC nowhere requests the return of the tangible masters. Instead, Hyphy alleged that it was harmed according to proof. This is indicative of a preempted copyright claim. Morena Music, 2021 U.S. Dist. LEXIS 39127 at *46; Doody, 673 F.Supp.2d at 1164-65.

Second, the Court understands that Hyphy is alleging that Yellowcake "exploited" the masters by reproducing them and making them available on platforms such as YouTube. The Court takes this to mean copying and distributing or displaying them through YouTube. Otherwise, it is unclear how tangible masters can be utilized through YouTube or other digital and on-line mediums since, to the Court's knowledge, the tangible masters are not videos. Similarly, the Court understands that Hyphy was attempting to exploit the masters in the same way as Yellowcake, but Yellowcake interfered through takedown notices and threats of litigation.

Hyphy's allegations regarding exploiting the tangible masters on digital platforms like YouTube seem like a copyright infringement claim. HN32[] Section 106 grants "copyright owners the 'exclusive rights' to display,

---

[8] Because YCH does not address any issues surrounding the cover art, the analysis of this subsection is limited to actions involving the three albums.

perform, reproduce, or distribute **[*47]** copies of a copyrighted work, to authorize others to do those things, and to prepare derivative works based upon the copyrighted work." *Maloney, 853 F.3d at 1010*. The only difference between the conversion cause of action and copyright infringement appears to be that the tangible masters are the "works" at issue. Hyphy appears to be treating the tangible masters the same as or interchangeably with the copyrighted albums. Without additional allegations that adequately distinguish between the tangible masters and the copyrighted albums, as well as clarification of how the tangible masters, as opposed to the copyrighted albums, were being "exploited" on digital platforms like YouTube, the Court cannot find that Hyphy has affectively pled around *§ 301* preemption with respect to "exploitation" of the masters. See *Morena Music, 2021 U.S. Dist. LEXIS 39127 at *46*.

Third, and relatedly, it is unclear what exactly Hyphy means by the allegation of "exercising dominion." While it is possible to read this as an allegation that Yellowcake physically possessed Hyphy's masters, that is not what is expressly alleged, nor do the circumstances surrounding this case reasonably indicate that Yellowcake took physical possession of, or took any actions directly against, Hyphy's tangible **[*48]** masters. Additional allegations are necessary to explain how exactly Yellowcake "exercised dominion" over the tangible masters.

Fourth, it is unclear how Yellowcake claimed ownership of the tangible masters (or how merely claiming ownership in general) constitutes such a substantial interference with the tangible masters that Yellowcake would be required to pay Hyphy the full value of the tangible masters. Additional allegations are necessary because the allegations in the Counterclaim do not reasonably suggest that Yellowcake somehow took the tangible masters or actually interfered with the tangible masters. Instead, it appears that Hyphy is attempting to rebrand an infringement claim into a conversion claim by relying on the tangible masters instead of the copyrighted albums.

Finally, interfering with Hyphy's ability to commercially exploit the tangible masters does not appear to be an act of conversion. Such interference does not affect either actual ownership of the tangible masters or Hyphy's right to possess the tangible masters. The ability to commercially exploit the masters is perhaps a benefit of ownership, but it is not the same as ownership and also would not appear to justify **[*49]** the full value of the tangible masters as damages.

In sum, because the factual allegations do not plausibly indicate that Yellowcake converted the physical/tangible masters, and because the allegations do not sufficiently remove the conversion claim from *§ 301* preemption, dismissal of the conversion claim is appropriate.

IV. Conclusion

YCH has moved to dismiss all claims, except for the second cause of action for copyright infringement involving the cover art and the eighth cause of action against Chavez.

With respect to the first cause of action, a valid ownership interest has not been pled. First, the agreement to transfer between Chavez and Hyphy that is pled in the FAC is an oral agreement and thus, invalid under *§ 204(a)*. This defect cannot be remedied, so the dismissal of any infringement claim based on a transfer of copyrights through the oral agreement will be without leave to amend. Second, the co-author/joint owner theory does not yield a plausible claim because the pleadings indicate that the joint owners of the copyright in the four albums would be Hyphy and Yellowcake, and joint owners may not sue each other for copyright infringement. Dismissal of this infringement claim will be with **[*50]** leave to amend. However, Hyphy must be able to explain why Yellowcake is not a joint owner of the copyrights in the albums. Third, the allegations categorically show that the albums were not works for hire as specially commissioned works. The allegations are also insufficient to show that the albums were a work for hire based on Chavez being an employee who was acting within the scope of his employment for Hyphy when the albums were created. Because it is not clear that amendment of this employee work for hire theory would be futile, dismissal will be with leave to amend. Finally, while no pleading or opposition identifies a written agreement, judicially noticed documents identify a written agreement for the transfer of Chavez's interest in the El Campesino album to Hyphy. Because it is unclear that granting leave to add such a theory would be futile, Hyphy will be permitted to amend their first counterclaim to include a written agreement for the transfer of the El Campesino album.

HN33[] With respect to the third cause of action, a preliminary injunction is not a cause of action, it is a remedy. Therefore, dismissal of the request as a standalone cause of action is appropriate.

With respect **[*51]** to the IIPEA cause of action, that claim as pled is preempted by the Copyright Act. However, because it is not entirely clear that amendment would be futile with respect to a claim based on the tangible masters, dismissal will be with leave to amend to add such a claim.

With respect to the IICR claim, YCH has not adequately shown that this cause of action is preempted by the Copyright Act. However, application of *§ 204(a)* invalidates any oral contract for the transfer of Chavez's copyrights in the albums to Hyphy. Without a valid contract, there is no plausible IIRC claim. Therefore, dismissal of the IIRC claim to the extent that it is based on an oral contract for the transfer of copyrights in the albums between Chavez and Hyphy will be without leave to amend. However, because it is unclear whether a written contract exists for the transfer of El Campesino from Chavez to Hyphy, dismissal of the IIRC claim will be with leave to amend with respect to the El Campesino album and only to the extent that a written transfer agreement actually exists and is alleged in an amended counterclaim.

With respect to the UCL cause of action, the claims against Yellowcake and Colonize are preempted by the Copyright **[*52]** Act. With respect to Hernandez, while the Copyright Act does not preempt the UCL claim, no plausible UCL claim based on Hernandez inducing Chavez to transfer his interests in the copyrights of the albums can be stated because of application of *§ 204(a)*. Therefore, dismissal of the UCL claim against Hernandez to the extent that it is based on inducing a breach of the oral contract for the transfer of copyrights in the three albums between Chavez and Hyphy will be without leave to amend. However, because it is unclear whether a written contract exists for the transfer of El Campesino from Chavez to Hyphy, dismissal of the UCL claim will be with leave to amend with respect to the El Campesino album and only to the extent that a written transfer agreement actually exists and is alleged in an amended counterclaim.

With respect to the conversion cause of action, no plausible claim is alleged. Additional allegations are necessary to clarify what actions Yellowcake took with respect to the tangible masters that would rise to the level of conversion and justify the full value of the tangible masters as damages. Further, the allegations in the Complaint suggest that Hyphy is attempting to artfully plead **[*53]** a copyright infringement claim as a conversion claim, and thus avoiding preemption, by focusing on the tangible masters instead of the copyrighted albums. Thus, the claim appears to be preempted. However, because it is not clear that amendment would be futile, dismissal will be with leave to amend.

V. Validity of Hyhphy's Copyright Registrations in the Four Albums

HN34[] The Copyright Act in relevant part provides that "no civil action for infringement of the copyright in any United States work shall be instituted until preregistration or registration of the copyright claim has been made in accordance with [the Copyright Act]." *17 U.S.C. § 411(a)*. While this section does not impose a precondition to copyright protection, it does expressly prohibit "copyright owners from bringing infringement actions without first properly registering their work." *Unicolors, Inc. v. H&M Hennes & Mauritz, L.P., 959 F.3d 1194, 1197 (9th Cir. 2020)*; see also *Alaska Stock, 747 F.3d at 678*.

HN35[] The Ninth Circuit has explained that, "once a defendant alleges that (1) a plaintiff's certificate of registration contains inaccurate information; (2) 'the inaccurate information was included on the application for copyright registration'; and (3) the inaccurate information was included on the application 'with knowledge that it was inaccurate,' a district **[*54]** court is then required to submit a request to the Register of Copyrights 'to advise the court whether the inaccurate information, if known, would have caused [it] to refuse registration.'" *Unicolors, 959 F.3d at 1197* (quoting *17 U.S.C. § 411(b)(1)-(2)*). Courts may "not consider in the first instance whether the Register of Copyrights would have refused registration due to the inclusion of known inaccuracies in a registration application." Id. Additionally, "inadvertent mistakes on registration certificates do not invalidate a copyright and thus do not bar infringement actions, unless . . . the alleged infringer has relied to its detriment on the mistake, or the claimant intended to defraud the Copyright Office by making the misstatement." *Jules Jordan Video, 617 F.3d at 1156* (quoting *Lamps Plus, Inc. v. Seattle Lighting Fixture Co., 345 F.3d 1140, 1145 (9th Cir. 2003)*); see also *Gold Value, 925 F.3d at 1146*. If it is determined that a registration contains inaccurate information, and that the inaccurate information was included in the registration application with knowledge that the information was incorrect, and that the inaccurate information would have caused the Copyright Office to refuse registration, then a district court may declare the registration invalid. See *Gold Value, 925 F.3d at 1148*; see also *Unicolors, 959 F.3d at 1200*.

Here, the work for hire theory and written agreement theory for Hyphy's ownership interest in the albums **[*55]** was brought to the Court's attention by YCH through judicially noticed documents from the U.S. Copyright Office's Public Catalog website, i.e. the registration information for the four albums. The registration information indicates that Hyphy is the author of three of the albums as an "employer for hire," see RJN Exs. 1, 2, 3, and for one album through a written transfer. See RJN Ex. 4. Neither Chavez nor Yellowcake are mentioned on the registration for the three work for hire albums, but Chavez is mentioned as an "author" on the "transfer agreement" album. See RJN Exs. 1, 2, 3, 4. YCH argues that absence of an allegation of a written agreement or reliance on a written agreement in the opposition makes the work for hire/"employer for hire" and "written transfer" status of Hyphy false. YCH argues that Hyphy had knowledge that these two copyright theories of ownership were false, and also knew of Yellowcake's registration in the Nuestra Historia album at the time that Hyphy filed for its registration in that album. YCH contends that because Hyphy knew of the falsity of its representations to the Copyright Office, and because the Copyright Office would not have granted registration with **[*56]** knowledge of the true information, Hyphy's registrations are invalid.

After review, the Court agrees that the judicially noticed registration information is inconsistent with the FAC. The FAC does not claim an ownership interest in any of the albums through either a work for hire or written transfer theory. Instead, the FAC attempts to claim ownership through either an oral transfer agreement with Chavez or as a co-author/joint owner. The FAC therefore indicates that the registrations contain incorrect information in terms of authorship and basis for copyright interest. Further, YCH is clearly alleging that Hyphy knew that it was submitting false information to the Copyright Office as part of the registration application. Under *Unicolors*, these allegations and the judicially noticed documents are sufficient to put the validity of Hyphy's copyright registrations at issue.

At this point, however, noting that the validity of the registrations is as far as the Court will go. First, no inquiry has been sent to the Copyright Office regarding inaccurate information. ***HN36***[] As *Unicolors* expressly states, this Court cannot invalidate a copyright until it receives word from the Copyright Office regarding **[*57]** what effect the known inaccuracy would have had on the registration decision. See *id. at 1197*. Therefore, invalidating the registrations at this point is clearly improper. See id. Second, and more fundamentally, YCH's arguments have been made for the first time as part of a reply. Hyphy has not had an opportunity to explain what was actually submitted in its application to the Copyright Office, explain the inconsistency between the FAC and the registration information, address the issue of knowledge or inadvertence, or otherwise respond to YCH's allegations.[9]

Under these circumstances, the Court will order the parties to submit additional briefing. Hyphy will be permitted to respond to the challenges to the validity of its registrations. Of particular import, Hyphy should attempt to explain the apparent inaccuracies in the registration information and explain what information was presented as part of its registration application. The Court will then permit YCH to reply to Hyphy's supplemental response. If, after reviewing the supplemental information, the Court is satisfied that there is inaccurate information that is part of the registrations and that was included in the applications to the Copyright **[*58]** Office, the Court will send an inquiry as required by *§ 411*/*Unicolors* to determine how the Copyright Office would have reacted. However, once the Court receives the response of the Copyright Office, and depending on the response, the Court will not invalidate the registration until the issue of Hyphy's knowledge/inadvertence has been decided.

---

[9] Relatedly, while the submissions at this time suggest knowledge by Hyphy, the issue of knowledge has not been litigated or decided.

The issue of the registrations' validity is not one that should delay proceedings further. Assuming that the Court sends an inquiry to the Copyright Office, that inquiry will not affect the second or eighth causes of action. Further, even if Hyphy files an amended counterclaim and continues to pursue an infringement claim with respect to any of the albums, it seems unlikely that the issue of knowledge or inadvertence will be able to be decided before either a summary judgment motion or a trial. Therefore, the pre-trial and scheduling process will not be stayed pending either receipt of the supplemental briefing or a possible response from the Copyright Office.

ORDER

Accordingly, IT IS HEREBY ORDERED that:

1. Counter-Defendants' *Rule 12(b)(6)* motion to dismiss is GRANTED in part as follows:

a. The first cause of action for copyright infringement based on an oral transfer **[*59]** agreement between Chavez and Hyphy is DISMISSED without leave to amend;
b. The first cause of action for copyright infringement based on a work for hire through a special order or commission is DISMISSED without leave to amend;
c. The first cause of action for copyright infringement based on a co-author/joint owner, work for hire through an employer-employee relationship, or written transfer agreement is DISMISSED with leave to amend;
d. The third cause of action for preliminary injunction is DISMISSED without prejudice as this is a remedy and not a cause of action;[10]
e. The fourth cause of action for intentional interference with prospective economic advantage is DISMISSED and leave to amend is granted only with respect to a claim based on the tangible masters;
f. The fifth cause of action for intentional interference with contractual relations to the extent that it is based on an oral contract involving the transfer of copyrights in the three albums is DISMISSED without leave to amend, but leave to amend is GRANTED with respect to alleging a claim based on a written transfer from Chavez to Hyphy in the album El Campesino;

g. The sixth cause of action for *Cal. Bus. & Prof. Code § 17200* UCL against Yellowcake and Colonize **[*60]** is DISMISSED without leave to amend as preempted;

h. The sixth cause of action for *Cal. Bus. & Prof. Code § 17200* UCL against Hernandez based on inducement to breach an oral agreement relating to copyright ownership in the albums is DISMISSED without leave to amend, but leave to amend is GRANTED with respect to alleging a claim based on a written transfer from Chavez to Hyphy in the album El Campesino; and
i. The seventh cause of action for conversion based on actions directed against the tangible masters is DISMISSED with leave to amend;

2. Within twenty-one (21) days of service of this order, Hyphy may file an amended counterclaim that is consistent with the analysis of this order;

3. If Hyphy fails to timely file an amended Counterclaim, leave to amend shall be automatically withdrawn without further notice, and Defendants shall file an answer to the Counterclaim within twenty-eight (28) days of service of this order;

4. Within fourteen (14) days of service of this order, Hyphy shall file supplemental briefing, as discussed above, that addresses and responds to the arguments made in the Counter-defendants' reply brief concerning the validity of Hyphy's copyright registrations in the four albums; and

---

[10] To be clear, Hyphy is free to request a preliminary injunction under the Copyright Act either in its Prayer for Relief or as part of the allegations under a copyright infringement cause of action.

5. Within seven **[*61]** (7) days of service of Hyphy's supplemental briefing, Counter-defendants shall file a response.

IT IS SO ORDERED.

MOUNT WILSON FM BROADCASTERS, INC., A CALIFORNIA CORPORATION v. A-1 ELECTRIC SERVICE COMPANY, INC., A CALIFORNIA CORPORATION

Core Terms

demurrer, unfair, consumer, cause of action, business practice, tentative ruling, unfair business practice, fraudulent, alleges

Counsel: **[*1]** For Plaintiff(s): Andrew J. Kazmer for Neal Zaslavsky via LA CourtConnect.

For Defendant(s): Todd Andrew Daley via LA CourtConnect.

Judges: H. Jay Ford III.

Opinion by: H. Jay Ford III

Opinion

Minute Order

NATURE OF PROCEEDINGS: Hearing on Demurrer - without Motion to Strike

****************************TENTATIVE RULING******************************

Defendant A-1 Electric Service Company's Demurrer to Complaint is MOOT as to the 5th cause of action for breach of implied warranty of fitness and OVERRULED as to the 6th cause of action for unfair business practice. Defendant A-1 to answer in 20 days.

5th cause of action for breach of implied warranty—Plaintiff filed a dismissal without prejudice of the 5th cause of action for breach of implied warranty on 7-12-21. The Court declines Defendants request for the Court to set aside the dismissal, rule on the demurrer and sustain the demurrer without leave to amend. A plaintiff has the absolute right to voluntarily dismiss pursuant to *CCP §581* "at any time before the actual commencement of trial, upon payment of costs, if any." One court has held that the plaintiff can dismiss without prejudice as long as no actual ruling or order has been made, even after the parties learn of an adverse **[*2]** tentative ruling. *Datner v. Mann Theatres Corp. (1983) 145 Cal.App.3d 768, 771*.). But see, Groth Bros.

Oldsmobile, Inc. v. Gallagher (2002) 97 Cal.App.4th 60, 72 (voluntary dismissal filed after court issued tentative ruling sustaining demurrer without leave to amend was ineffective and should have been vacated); See generally, Edmon & Kernow, Cal. Practice Guide: Civil Procedure Before Trial (The Rutter Group 2020), ¶11:25. In *Wells v. Marina City Properties, Inc. (1981) 29 Cal.3d 781, 785*, the Supreme Court stated in dictum: "[W]e note that such right of voluntary dismissal ... would also not be impaired prior to a decision sustaining the demurrer." *Wells, supra, 29 Cal.3d at pp. 789-790*; see also *Christensen v. Dewor Developments (1983) 33 Cal.3d 778, 785* (dismissal without prejudice while demurrer pending.)

Here. no tentative ruling had been issued when the dismissal was filed. The demurrer is not a motion dispositive of the entire action, like a motion for summary judgment or a motion for terminating sanctions. Under these circumstances, the Court declines to set the dismissal aside and deems the demurrer moot as to the 5th cause of action.

6th cause of action for violation of B&PC §17200—Defendant demurs to the 6th cause of action for violation of B&PC 17200 on grounds that it is uncertain, because Plaintiff fails to identify the specific prong of 17200 allegedly violated by Defendant. "Demurrers for uncertainty are disfavored and are granted only if **[*3]** the pleading is so incomprehensible that a defendant cannot reasonably respond. A demurrer for uncertainty is strictly construed, even where a complaint is in some respects uncertain, because ambiguities can be clarified under modern discovery procedures." *A.J. Fistes Corp. v. GDL Best Contractors, Inc. (2019) 38 Cal.App.5th 677, 695*.However, the 17200 claim is not so poorly pled that Defendant cannot respond, which is the standard for a demurrer based on uncertainty.

Defendant also argues the 6th cause of action fails to state sufficient facts to allege a violation of 17200. Defendant relies on *Khoury v. Maly's of California, Inc. (1993) 14 Cal.App.4th 612* as authority to sustain the demurrer based on Plaintiff's failure to identify the particular prong of 17200 violated by Defendant's conduct. "A plaintiff alleging unfair business practices under these statutes must state with reasonable particularity the facts supporting the statutory elements of the violation. Demurrer was properly sustained as to this cause of action because the second amended complaint identifies no particular section of the statutory scheme which was violated and fails to describe with any reasonable particularity the facts supporting violation." *Khoury, supra, 14 Cal.App.4th 612, 619*.

Plaintiff expressly alleges violation of the "unfair" and "fraudulent" prongs of B&PC §17200. See Complaint, **[*4]** ¶54 ("these acts constitute unfair business practices") and 55 ("the acts and conduct of the Defendants...constitute unfair and fraudulent business acts and practices and thereby violate [17200].") Plaintiff identifies a particular section of the B&PC violated by Defendant's conduct.

Plaintiff alleges that Defendant demanded payment for services that it knew were negligently rendered. Plaintiff alleges Defendant failed to bolt down and secure the generator they installed. See Complaint, ¶21. Plaintiff also alleges Defendant failed to specify the appropriate generator for Plaintiff s use. See Complaint, *'24. Plaintiff alleges these acts qualify as unfair and fraudulent. Plaintiff is seeking redress under B&PC §17200 as a consumer of Defendant's services, not as Defendant's competitor.

In cases involving a direct competitor, an unfair business practice is narrowly defined. "When a plaintiff who claims to have suffered injury from a direct competitor's 'unfair' act or practice invokes section 17200, the word 'unfair' in that section means conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or **[*5]** the same as a violation of the law, or otherwise significantly threatens or harms competition." *Cel-Tech Communications, Inc. v. Los Angeles Cellular Telephone Co. (1999) 20 Cal.4th 163, 187*.

In consumer cases, it is unclear if the Cel-Tech definition also exclusively applies or if the broad pre-Cel-Tech definition applies: "*[S]ection 17200 of the Business and Professions Code* defines 'unfair competition' to include, as relevant, 'unlawful, unfair or fraudulent business practice(s)'...It would be impossible to draft in advance detailed plans and specifications of all acts and conduct to be prohibited, since unfair or fraudulent business practices may run the gamut of human ingenuity and chicanery." See *Motors, Inc. v. Times Mirror Co. (1980) 102 Cal.App.3d 735, 740*. Thus, whether a business is unfair is a fact intense inquiry that requires the Court to act as a court in equity. "It is really quite impossible" to make such a determination on demurrer. Id.

"Subsequent to the decision in Cel-Tech, a split of authority developed among the Courts of Appeal, which have applied three different tests for unfairness in consumer cases." *Drum v. San Fernando Valley Bar Assn. (2010) 182*

Cal.App.4th 247, 256. There are three possible tests to determine whether a business practice is "unfair" under §17200 in a consumer. The first test requires that the public policy that is a predicate to a consumer unfair competition action be tethered to specific constitutional, statutory or **[*6]** regulatory provisions. Id. Under the second test, the question is "whether the alleged business practice is immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers and requires the court to weigh the utility of the defendants' conduct against the gravity of the harm to the alleged victim." Id. Under the third test, a business practice is unfair if (1) the consumer injury was substantial; (2) the injury must not be outweighed by any countervailing benefits to consumers or competition; and (3) it must be an injury to consumers themselves that could not reasonably be avoided." Id.

Plaintiff does not allege Defendant's conduct violates any specific constitutional, statutory or regulatory provision. However, whether Defendant's alleged business practice is "immoral, unethical, oppressive, unscrupulous or substantially injurious to customers" requires a factual analysis outside the scope of a demurrer. The third potential test for "unfairness" in the consumer context likewise requires a factual analysis outside the scope of demurrer. Plaintiff has alleged a substantial consumer injury due to Defendant's business practice.

"The determination whether a business practice **[*7]** is unfair involves an examination of that practice's impact on its alleged victim, balanced against the reasons, justifications and motives of the alleged wrongdoer. In brief, the court must weigh the utility of the defendant's conduct against the gravity of the harm to the alleged victim. Whether a practice is unfair is a determination of fact which requires a review of the evidence from both parties. It thus cannot usually be made on demurrer." *Nolte v. Cedars-Sinai Medical Center (2015) 236 Cal.App.4th 1401, 1407-1408*. Plaintiff sufficiently alleges an unfair business practice for purposes of demurrer. Defendant's Demurrer is OVERRULED.

************************END OF TENTATIVE RULING*************************

The matter is called for hearing.

Both sides submit on the tentative ruling.

The Court adopts the tentative ruling as indicated above.

The Demurrer - without Motion to Strike filed by A-1 ELECTRIC SERVICE COMPANY, INC., a California Corporation on 04/29/2021 is Overruled.

Counsel are ordered to comply with *CRC 3.724* and *3.727*.

Notice is waived.

Opinion by: NANCY J. ROSENSTENGEL

Opinion

MEMORANDUM AND ORDER

ROSENSTENGEL, Chief Judge:

This is an antitrust case brought by Plaintiff Donald Conrad against Defendants Jimmy John's Franchise, LLC; Jimmy John's Enterprises, LLC; and Jimmy John's LLC (*collectively* "Jimmy John's"). According to the Amended Complaint (Doc. 75), a "No-Poach Provision" in Jimmy John's Franchise Agreement effectively prohibited employees from switching between rival locations, stifling competition for labor in violation of *Section 1 of the Sherman Act*, *15 U.S.C. § 1*.

Based on an expert report from economist Dr. Hal Singer, Conrad alleges that the Provision suppressed wages for every Jimmy John's employee by 8.4 percent, causing [TEXT REDACTED BY THE COURT] in class-wide damages. (Doc. 115-13). But in an Order entered on February 24, 2021 (Doc. 223), the Court excluded the report under *Daubert*. Without expert testimony, Conrad cannot satisfy the predominance requirement under *Rule 23*. Yet other issues also preclude class certification: Conrad's claims are atypical of the unnamed class members because the No-Poach Provision was admittedly irrelevant to him; there is a potential conflict between managers **[*3]** and hourly employees; and several individual questions exist that cannot be answered using common proof. So for the reasons below, the Court denies Conrad's Motion for Class Certification, as well as his Motion to Strike.

BACKGROUND

Jimmy John's is a franchised sandwich fast-food chain with nearly 3,000 stores across 40 states. (Am. Compl. at 2). About 98 percent of those stores are independently owned and operated by around 800 franchisees. (*Id.*). The individual franchisees—not Jimmy John's — determine how much their employees get compensated. (North Dep. at 56:19-21, Doc. 115-14). Simply put, Jimmy John's "is not responsible for the employment matters of franchisees" (*id.* at 60:3-6), [TEXT REDACTED BY THE COURT]." (JJE Bonus Program at 2, Doc. 133-12; Franchise Operations at 6, Doc. 115-24).

Despite their relative independence, franchisees must maintain minimum brand standards to ensure a consistent customer experience across the country. (North Dep. at 70:19-22; McCrary Report ¶¶ 50, 85, Doc. 133-57). These brand standards include "a set of specific training requirements on each franchisee" (McCrary Report ¶ 68), and on "new and existing employees being promoted to the Certified Manager **[*4]** role." (*id.* ¶ 72). But Jimmy John's will only pay to train "up to two employees": "Franchisees must cover both fees and expenses for each additional employee sent for training." (*Id.* ¶ 80). The estimated total cost to train a certified manager is between [TEXT REDACTED BY THE COURT] and [TEXT REDACTED BY THE COURT] (*Id.*).

From at least 2014 to 2018, Jimmy John's included a so-called No-Poach Provision in its Franchise Agreement. (Conrad's Mem. in Supp. of Mot. for Class Cert. [*hereinafter* "Conrad's Mem."] at 1, 8, Doc. 115). Its terms changed over time. In 2014, for example, the Provision prohibited franchisees from recruiting or hiring anyone "who was employed within the preceding twenty-four (24) months, as a General Manager or Assistant Manager at a JIMMY JOHN'S® Restaurant . . . without obtaining the employer's prior written permission." (2014 Franchise Agreement § 7(d), Doc. 115-17). The Provision was enforced by the franchisees themselves, who could be forced to pay up to $50,000 for violating it. (*Id.*). In 2015, the Provision was amended to only prohibit recruiting (not hiring) but applied to all employees (not only managers). (2015 Franchise Agreement § 7(d), Doc. 133-15). And **[*5]** in 2016, it was limited even more so that the $50,000 penalty applied only when a *manager* was solicited in violation of the Provision. (2016 Franchise Agreement § 7(d), Doc. 133-26).

With that in mind, about 88 percent of employee release requests "were approved without conditions;" and "[o]nly [TEXT REDACTED BY THE COURT] approved employee releases were associated with conditions on reimbursement for training expenses." (McCrary Report ¶ 96) (emphasis omitted). In the rare case that "a release was refused for reasons other than poor performance or was approved conditional on compensation, 74 percent . . . involved managers - and training investments were explicitly mentioned in the negotiations for approximately half of those managers." (*Id.* ¶ 97) (emphasis omitted). On the other hand, non-managers were released 94 percent of the time. (*Id.*). "In other words, . . . the requests were almost always granted, and almost always without cost." (*Id.*).

In February 2018, Conrad started working at a Jimmy John's in Winter Park, Florida, "as an in-shop employee at $8.25 per hour." (Conrad's Resp. to Jimmy John's Second Set of Interrogs. at 7, Doc. 133-43). A month later, "he was promoted to Person **[*6]** In Charge and given a raise to $9.00 per hour." (*Id.*). And a month after that, he was "promoted to a salaried manager earning $91.00 per day." (*Id.*). Then, the area manager asked Conrad to switch to the Orlando location, where he would become a co-manager. (*Id.*). He did, receiving "a raise to $95.00 per day . . . ." (*Id.*). But the new position was short-lived: Conrad did not get along with the franchise co-owner's niece, who worked in the same store and supposedly "specifically targeted [Conrad's] work performance . . . ." (*Id.* at 5). In November, Conrad was fired after he told the niece "that he no longer cared for her opinions." (*Id.*). More accurately, he called her "a fucking bitch." (Conrad Dep. at 308:4-9, Doc. 133-48).

Now, Conrad alleges that the No-Poach Provision "reflects a naked restraint of competition" in violation of *Section 1 of the Sherman Act, 15 U.S.C. § 1*. (Am. Compl. at 1). In brief, he alleges that the No-Poach Provision had the effect of suppressing wages and stifling worker mobility, leading to class-wide injury and damages. (Conrad's Mem. at 1). The crux of his claim is that without the Provision, franchisees would be pressured to increase their wages to match competing locations **[*7]** or else risk losing their employees. (*Id.* at 15). Even so, Conrad admits that he "made no efforts to obtain employment at [another] Jimmy John's restaurant," (Conrad's Resp. to Second Set of Interrogs. at 6; Conrad Dep. at 61:10-12), and that the No-Poach Provision was "irrelevant" and "just didn't really have anything to" do with him. (Conrad Dep. at 189:9-14, 205:11-19). Still, he claims that he "suffered reduced wages and inhibited employment opportunities due to the" No-Poach Provision. (Am. Comp. at 7).

Conrad seeks to certify the following class under *Federal Rules of Civil Procedure 23(a)* and *23(b)(3)*:

> All persons in the United States who were employed at a Jimmy John's-branded restaurant at any time between January 24, 2014 to July 12, 2018, whether owned and operated as a corporate store or a franchise store.

(Conrad's Mem. at 1).

To support his claim, Conrad points to an expert report prepared by Dr. Hal Singer. (Singer Report at 1, Doc. 115-13). But the Court excluded Dr. Singer's opinions because his wage regressions suffered from a methodological flaw: Dr. Singer failed to adjust for those two percent of the wage data that do not consistently record employee wages as per-shift or per-hour, leading to inflated estimates **[*8]** of impact. (*See* Mem. & Order at 40-46, Doc. 223). On the other hand, the Court admitted both of Jimmy John's expert reports prepared by Dr. Janus Ordover (Ordover Report at 1, Doc. 133-56) and Dr. Justin McCrary (McCrary Report at 1, Doc. 133-57). (*See* Mem & Order at 46-65).

Finally, in responding to Conrad's Motion for Class Certification, Jimmy John's attached declarations from 19 franchise owners. (*See* Scolnick Decl. at 14, Doc. 133-1). But three purportedly never responded to Conrad's "repeated attempts to obtain discovery from them." (Conrad's Mot. to Strike at 1, Doc. 186). He therefore asks the Court to strike those franchisee-declarations under *Federal Rule of Civil Procedure 37*. (*Id.* at 5).

Law And Analysis

A. Motion to Strike

In general, "a party must, without awaiting a discovery request, provide to the other parties . . . the name and, if known, the address and telephone number of each individual likely to have discoverable information . . . that the disclosing party may use to support its claims or defenses . . . ." *Fed. R. Civ. P. 26(a)(1)(A)*. There is also a continuing duty to supplement these disclosures "in a timely manner if the party learns that in some material respect the disclosure or response is incomplete or incorrect, and **[*9]** if the additional or corrective information has not otherwise been made known to the other parties during the discovery process or in writing . . . ." *Fed. R. Civ. P. 26(e)(1)(A)*.

"If a party fails to" meet its disclosure obligations, then the Court may prohibit it from using "that information or witness to supply evidence on a motion . . . unless the failure was substantially justified or is harmless." *Fed. R. Civ P. 37(c)(1)*. "The determination of whether a *Rule 26(a)* violation is justified or harmless is entrusted to the broad discretion of the district court." *Mid-America Tablewares v. Mogi Trading Co., 100 F.3d 1353, 1363 (7th Cir. 1996)*. "[T]he following factors should guide the district court's discretion: (1) the prejudice or surprise to the party against whom the evidence is offered; (2) the ability of the party to cure the prejudice; (3) the likelihood of disruption to the trial; and (4) the bad faith or willfulness involved in not disclosing the evidence at an earlier date." *David v. Caterpillar, Inc., 324 F.3d 851, 857 (7th Cir. 2003)*.

Conrad claims that he "made numerous attempts to contact the remaining three franchisee declarants-Butler, Firmer, and Severson-regarding their document and deposition subpoenas," but they never responded. (Conrad's Mot. to Strike at 3). He also claims that Jimmy John's counsel refused to accept service of subpoenas on the declarants' behalf. **[*10]** (*Id.* at 3). He thus argues that sanctions are warranted. (*Id.* at 6-9). The Court disagrees.

First, the Court rejects Conrad's contention that Jimmy John's had to serve subpoenas on third parties outside its control. At the center of this case is Conrad's claim that the franchisees "are independently owned and operated as separate and distinct entities from Jimmy John's." (Am. Compl. at 2). *Cf. Copperweld Corp. v. Indep. Tube Corp., 467 U.S. 752, 769, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)* ("[O]fficers or employees of the same firm do not provide the plurality of actors imperative for a *§ 1* conspiracy."). In fact, Jimmy John's itself had to serve subpoenas on franchisees when they wanted to depose them or request document production. (*See* Rose Decl., Exs. 1-3, Docs. 195-1, 195-2, 195-3). Conrad also acknowledges that his efforts to serve the other 16 franchisees were made through their respective counsel. (Chan Decl. ¶ 7, Conrad's Reply Ex. 1). In short, Jimmy John's did not have to serve any of the franchisees on Conrad's behalf.

The Court also has reviewed the communications between the litigants and finds that Conrad's inability to depose the remaining three franchisees did not arise from any willfulness, bad faith, or fault of Jimmy John's counsel. Jimmy John's supplemented its **[*11]** initial disclosures in July 2020 with an address for each of the three franchisees. (Jimmy John's Supp. *Rule 26(a)(1)* Initial Disclosures at 5-7, Doc. 197-2). For Butler and Scott, Jimmy John's also included a store phone number. (*Id.* at 5, 7). True, these franchisees owned several Jimmy John's-branded stores; and Conrad first contacted Jimmy John's counsel on August 26 complaining of difficulties reaching them. (Email String at 1, Doc. 197-2, Ex. 2). But after a meet-and-confer on September 11, Jimmy John's counsel provided Butler and Finner's personal email addresses and the email address for Severson's attorney. (*Id.* Ex. 5). When they supposedly failed to respond (which Firmer disputes (Finney Decl. at 1, Doc. 197-1)), Conrad never sought court intervention, nor did he seek an extension of the deadline. Instead, he waited for the deadline to pass and now asks the Court to exclude the testimony in whole cloth. Such a harsh remedy is inappropriate given that Jimmy John's provided additional points of contact for the three franchisees. And while Conrad's contentions are not without force, any prejudice is harmless: Jimmy John's did not explicitly rely on those franchisee-declarations in opposing **[*12]** class certification, and the Court does not reference them below. In other words, those declarations are in no way dispositive. The Court thus denies Conrad's Motion to Strike.

B. Motion for Class Certification

Federal Rule of Civil Procedure 23 provides a mechanism by which "[o]ne or more members of a class may sue or be sued as representative parties on behalf of all members . . . ." *Fed. R. Civ. P. 23(a)*. But "[a]ggregation is not an end unto itself." Principles of the Law of Aggregation Litigation § 1.03 (2010). Rather, the objectives of *fidelity, finality*, and *feasibility* guide district courts in determining whether class certification is the fairest and most efficient mode of adjudication. *Id.* Ultimately, the Court is vested with "broad discretion to determine whether certification of a class-action lawsuit is appropriate." *Keele v. Wexler, 149 F.3d 589, 592 (7th Cir. 1998)* (cleaned up); *Amchem Prods., Inc. v. Windsor, 521 U.S. 591, 630, 117 S. Ct. 2231, 138 L. Ed. 2d 689 (1997)* (Breyer, J., concurring in part and dissenting in part) ("The law gives broad leeway to district courts in making class certification decisions, and their judgments are to be reviewed by the court of appeals only for abuse of discretion.").

Conrad seeks to certify a class under *Rule 23(b)*. "To achieve certification, a proposed class under *Rule 23(b)* must meet the requirements of *Rule 23(a)*—numerosity, typicality, commonality, **[*13]** and adequacy of representation—and one of the alternatives listed in *Rule 23(b)*." *Howard v. Cook Cty. Sheriff's Off., 989 F.3d 587, 597 (7th Cir.*

2021). Relevant here, Rule 23(b)(3) permits a class action if "the court finds that questions of law or fact common to the members of the class *predominate* over any other questions affecting only individual members, and that a class is *superior* to other available methods for the fair and efficient adjudication of the controversy." Fed. R. Civ. P. 23(b)(3) (emphasis added). "If the party certification fails to meet any of these . . . requirements, class certification is precluded." Kress v. CCA of Tenn., LLC, 694 F.3d 890, 893 (7th Cir. 2012).

"Rule 23 does not set forth a mere pleading standard. A party seeking class certification must affirmatively demonstrate his compliance with the Rule—that is, he must be prepared to prove that there are *in fact* sufficiently numerous parties, common question of law or fact, etc." Wal-Mart Stores, Inc. v. Dukes, 564 U.S. 338, 350, 131 S. Ct. 2541, 180 L. Ed. 2d 374 (2011) (emphasis in original). That said, "Rule 23 must be liberally interpreted": "Its policy is to favor maintenance of class actions." King v. Kan. City S. Indus., Inc., 519 F.2d 20, 25-26 (7th Cir. 1975); Messner v. Northshore Univ. Health Sys., 669 F.3d 802, 815 (7th Cir. 2012) ("[I]n antitrust cases, Rule 23, when applied rigorously, will frequently lead to certification.") (cleaned up). Even so, Conrad bears "the burden of proving by a preponderance of the evidence that . . . the requirements of Rule 23" are met. Howard, 989 F.3d at 597.

i. Numerosity

"Determining whether the proposed class **[*14]** is sufficiently numerous for certification is usually straightforward. Affidavits, declarations, or even reasonable estimates in briefs are often sufficient to establish the appropriate size of the class and whether joinder might be a practical and manageable alternative to class action litigation." Manual for Complex Litigation § 21.141. "Numerosity is generally presumed when the proposed class would have at least 40 members." Lapin v Goldman Sachs & Co., 254 F.R.D. 168, 175 (S.D.N.Y. 2008) (citing 1 Newberg on Class Actions § 3.05 (2d ed. 1985)); *e.g.,* In re Gen. Motors Corp. Dex-Cool Prods. Liability Litig., 241 F.R.D. 305 (S.D. Ill. 2007); Exhaust Unlimited, Inc. v. Cintas Corp., 223 F.R.D. 506 (S.D. Ill. 2004).

The numerosity requirement is uncontested here. Conrad seeks to represent a putative class of over 615,000 current and former Jimmy John's employees. (Conrad's Mem. at 21). The Court agrees that the putative class is "so numerous that joinder of all members is impracticable," thus satisfying the numerosity requirement. *See* Fed. R. Civ. P. 23(a)(1).

ii. Commonality

"Commonality requires the plaintiff to demonstrate that the class members have suffered the same injury. This does not mean merely that they have all suffered a violation of the same provision of the law." Dukes, 564 U.S. at 350 (cleaned up). Rather, "[t]heir claims must depend upon a common contention of such a nature that it is capable of classwide resolution—which means that determination of its truth or falsity **[*15]** will resolve an issue that is central to the validity of each one of the claims in one stroke." *Id.* "Identifying common questions typically requires examining the parties' claims and defenses, identifying the type of proof the parties expect to present, and deciding the extent to which there is a need for individual, as opposed to common, proof." Manual for Complex Litigation § 21.141. "'[E]ven a single [common] question' will do." Dukes, 564 U.S. at 359 (quoting Richard Nagareda, *The Preexistence and the Structure of the Class Action*, 103 Colum. L. Rev. 149, 176 n.119 (2003)).

Courts often give "superficial treatment of" the commonality requirement given that it "may be a superfluous provision, or at least partially redundant, since the existence of common questions can be viewed as an essential ingredient of a finding that the case falls within one of the three categories of class actions described in" Rule 23(b). Wright & Miller, Federal Practice and Procedure § 1763. Relevant here, because predominance (discussed below) is governed by "a more stringent standard than" commonality, some "courts in actions brought under subdivision (b)(3) have not drawn a distinction between the two requirements." *Id.* Instead, they "either have dealt with the common-issue question simultaneously with their inquiry into whether **[*16]** common questions predominate or have assumed that Rule 23(a)(2) was satisfied and thought it necessary only to rule on the question whether the suit fit within subdivision (b)(3)." *Id.*; *accord* Comcast Corp. v. Behrend, 569 U.S. 27, 34, 133 S. Ct. 1426, 185 L. Ed.

2d 515 (2013) (noting that "[t]he same analytical principles govern Rule 23(b)" and Rule 23(a), but "Rule 23(b)(3)'s predominance criterion is even more demanding than Rule 23(a)"); Amchem, 521 U.S. at 609 ("The Third Circuit recognized that Rule 23(a)(2)'s 'commonality' requirement is subsumed under, or superseded by, the more stringent Rule 23(b)(3) requirement that questions common to the class 'predominate over' other questions.").

Conrad contends that there are at least three common issues of law and fact: (1) "[w]hether Jimmy John's restaurants entered into an unlawful agreement not to poach one another's employees;" (2) "whether the No-Poach [Provision] should be judged unlawful;" and (3) "whether the agreement suppressed Class members' compensation; and if it did, the magnitude of that effect." (Conrad's Mem. at 22).

In response, Jimmy John's blurs its commonality and predominance arguments; but it devotes most of its attention to arguing that common issues do not predominate. (*See* Jimmy John's Resp. at 13-30) ("Plaintiff also fails to meet his burden of establishing Rule 23(a) commonality and Rule 23(b)(3) predominance."). Given the low threshold **[*17]** for commonality, the Court will not belabor this discussion and will instead focus on the more stringent standard for predominance below.

iii. Typicality

The typicality requirement "primarily directs the district court to focus on whether the named representatives' claims have the same essential characteristics as the claims of the class at large." De La Fuente v. Stokely-Van Camp, Inc., 713 F.2d 225, 232 (7th Cir. 1983). "'A plaintiff's claim is typical if it arises from the same event or practice or course of conduct that gives rise to the claims of other class members and his or her claims are based on the same legal theory.'" *Id.* (quoting H. Newberg, *Class Actions* § 1115(b) at 185 (1977)). "The typicality requirement may be satisfied even if there are factual distinctions between the claims and the named plaintiffs and those of other class members. Thus, similarity of legal theory may control even in the face of differences of fact." *Id.* But "[e]ven though some factual variations may not defeat typicality," Oshana v. Coca-Cola Co., 472 F.3d 506, 514 (7th Cir. 2006), there must still "be enough congruence between the named representative's claim and that of the unnamed members of the class to justify allowing the named party to litigate on behalf of the group," Spano v. Boeing Co., 633 F.3d 574, 586 (7th Cir. 2011).

Conrad simply alleges that the typicality requirement **[*18]** is satisfied because "he worked in a Jimmy-John's-branded restaurant . . . ." (Conrad's Mem. at 22-23). But his core allegation is that the No-Poach Provision prevented workers from changing locations for better wages. Yet Conrad was not among those employees: He did not leave his job at Jimmy John's in search of higher wages, and he was never denied the opportunity to change locations because of the Provision. Indeed, he admits that he "made no efforts to obtain employment at [another] Jimmy John's restaurant" (Conrad's Resp. to Second Set of Interrogs. at 6; *see also* Conrad's Dep. at 61:10-12), and that the No-Poach Provision was "irrelevant" and "just didn't really have anything to" do with him (Conrad's Dep. at 189:9-14, 205:11-19). Rather, he was fired after he called a coworker—his boss's niece—"a fucking bitch." (*Id.* at 308:4-9). So while some factual distinctions will not preclude class certification, Conrad's claim is atypical of those putative class members who were actually denied the opportunity to change locations for better wages because of the No-Poach Provision. The typicality requirement is therefore not met.

iv. Adequacy

"[A]dequacy of representation is composed of **[*19]** two parts: 'the adequacy of the named plaintiff's counsel, and the adequacy of representation provided in protecting the different, separate, and distinct interest' of the class members." Retired Chi. Police Ass'n v. City of Chi., 7 F.3d 584, 598 (7th Cir. 1993) (quoting Sec'y of Labor v. Fitzsimmons, 805 F.2d 682, 697 (7th Cir. 1986) (en banc)). Only the second part is at issue here.

"Rule 23 contemplates, and the district court should insist on, a conscientious representative plaintiff. All class suits create some conflict between the representative and the class; the representative and counsel may be tempted to sell out the class for benefits to themselves. Judges are on the lookout for persons who may pay inadequate attention to the interests of the others they purport to represent." Rand v. Monsanto Co., 926 F.2d 596, 599 (7th Cir. 1991), *overruled on other grounds*, Chapman v. First Index, Inc., 796 F.3d 783, 787 (7th Cir. 2015). "[T]he presence of even an arguable defense peculiar to the named plaintiff or a small subset of the plaintiff class may destroy the required typicality of the class as well as bring into question the adequacy of the named plaintiff's representation. The fear is that the named plaintiff will become distracted by the presence of a possible defense applicable only to him so that the representation of the rest of the class will suffer." J.H. Cohn & Co. v. Am. Appraisal Assocs., Inc., 628 F.2d 994, 999 (7th Cir. 1980) (citations omitted).

To that end, "[a] class is not fairly and adequately represented **[*20]** if class members have antagonistic or conflicting claims." Rosario v. Livaditis, 963 F.2d 1013, 1018 (7th Cir. 1992). "The adequacy inquiry" thus "serves to uncover conflicts of interest between named parties and the class they seek to represent." Amchem, 521 U.S. at 625. In other words, "a class representative must be part of the class and 'possess the same interest and suffer the same injury' as the class members." *E.* Tex. Motor Freight Sys., Inc. v. Rodriguez, 431 U.S. 395, 403, 97 S. Ct. 1891, 52 L. Ed. 2d 453 (1977) (quoting Schlesinger v. Reservists Comm. to Stop the War, 418 U.S. 208, 216, 94 S. Ct. 2925, 41 L. Ed. 2d 706 (1974)).

Jimmy John's argues that Conrad failed to establish the adequacy requirement because "there are significant economic conflicts between the interests of managers and the employees they supervised." (Jimmy John's Resp. at 11). It points to two conflicts in particular. First, Jimmy John's contends that because managers were charged with enforcing the allegedly anticompetitive No-Poach Provision, they cannot be in the same class as nonsupervisory employees like in-shoppers and drivers. Put differently, "[a]t any trial of this case, certain managers would be called as defense witnesses, testifying about the very decisions at issue here, and explaining that [the No-Poach Provision] was honored largely in the breach." (*Id.* at 12). Jimmy John's therefore argues that "[t]his is a paradigmatic and preclusive intra-class conflict because many **[*21]** putative class members participated in the challenged employment decisions." (*Id.*) (cleaned up). The Court agrees.

As a general matter, the litigants disagree about whether supervisory and nonsupervisory employees can ever be part of the same class. For its part, Jimmy John's points to Randall v. Rolls-Royce Corp., 637 F.3d 818 (7th Cir. 2011). There, the plaintiff sought to represent a putative class of "female employees of a Rolls-Royce plant" who charged the company "with sex discrimination . . . in paying the members of the class less than comparable male employees by setting the base pay of women employees . . . below that of male employees" and "denying them promotions they would have received had they been men." Id. at 820. In affirming the district court's denial of class certification, the Seventh Circuit acknowledged two conflicts between female supervisors and female nonsupervisory employees. Id. at 824. For one, the court was concerned that some female supervisors might "deliberately depress the salary of female employees whom they supervise, or increase the salary of male employees whom they supervise, in order increase evidence of discrimination." Id. at 824. Additionally, there was "even evidence that the [female supervisors] participated in decisions concerning **[*22]** female employees' compensation that, on their theory of the case, were" in fact "discriminatory." *Id.* (citing Wagner v. Taylor, 836 F.2d 578, 595, 266 U.S. App. D.C. 414 (D.C. Cir. 1987) ("Supervisory employees are often inappropriate representatives of nonsupervisory employees because the structure of the workplace tends to cultivate distinctly different interests between the two groups.")).

Conrad tries to differentiate *Randall* by noting that *this* case turns on actions by franchise **owners**, not managers. (Conrad's Reply at 3). In other words, the owners were the ones who entered into the supposedly anticompetitive Franchise Agreement, while the managers were just neutrally applying it. (*Id.*). But that position contradicts testimony suggesting that at least some managers were given broad discretion whether to enforce the No-Poach Provision. For example, one delivery driver and member of the putative class said that "[t]o apply for the job . . . , [he] simply walked into the store, told the **manager** that [he] was currently working at" another Jimmy John's location "and asked if they needed any help. The manager's response was, 'when can you start?'" Indeed, the manager did not "even notify" the franchise owner. (Hanzlik Decl. ¶ 7, Doc. No. 133-82) (emphasis added). **[*23]** Another manager similarly stated that he "never received instructions" from the franchise owner "to seek permission or releases when hiring applicants with prior Jimmy John's experience," and he "recall[ed] hiring about a dozen former Jimmy John's employees." (Arredondo Decl. ¶ 12, Doc. No. 133-78). While Conrad points to *Staton v.*

Boeing Co. 327 F.3d 938 (9th Cir. 2003), for the proposition that "supervisors and nonsupervisors may be included in the same certified class when both are subject to the policy or practice challenged by the lawsuit" (Conrad's Reply at 2), the Ninth Circuit there recognized that "whether employees at different levels of the internal hierarchy have potentially conflicting interests is context-specific and depends upon the particular claims alleged in a case." *Staton, 327 F.3d at 958*. The court then said that to satisfy the adequacy requirement, plaintiffs "'must offer evidence of coextensive interests or at least allege the existence of a general discriminatory policy.'" *Id. at 959* (quoting 5 Herbert B. Newberg & Alba Conte, *Newberg on Class Actions*, § 24.42 at 24-170-71 (3d ed. 1992)). "Given that the named plaintiffs include[d] representatives of each major employee sub-group," the court found no conflicts. *Id. at 959*.

This Court too rejects the **[*24]** invitation to adopt a bright-line rule barring classes representing both supervisory and nonsupervisory employees. Yet even under the Ninth Circuit's level-handed approach, Jimmy John's has identified another significant conflict between managers and nonsupervisory employees that precludes certification. Jimmy John's franchisees take part in a profit-sharing program [TEXT REDACTED BY THE COURT]." (JJE Bonus Program at 2). Given that Conrad accuses the company of using the No-Poach Provision as a tool to "keep labor costs low" (Am. Compl. ¶ 119, Doc. 75), Jimmy John's argues that managers would be encouraged to enforce the provision to increase store profits. (Jimmy John's Resp. at 12). Simply put, not unlike the complicit female employees in *Randall*, "the fact that managers with profit-based bonuses allegedly made more money during the class period by taking steps to lower employee wages would put those class members against one another." (*Id.*).

Conrad, on the other hand, says that the profit-sharing program does not present a conflict because he "does not seek compensation for suppressed bonuses," only suppressed base pay. (Conrad's Reply at 3-4). But even assuming Conrad's theory—that **[*25]** the No-Poach Provision suppressed base pay across the board—is correct, it may equally be true that managers' bonuses exceeded their suppressed base pay. By extension, managers may be willing to suppress their own base pay if enforcing the No-Poach Provision would lead to a greater bonus. And unlike in *Staton*, Conrad is the only named plaintiff: He does not adequately represent the interest of managers who were motivated to reduce labor mobility so they can reap the benefits of the profit-sharing program. This conflict presents another reason why class certification is inappropriate.

v. Predominance

"The *Rule 23(b)(3)* predominance inquiry tests whether proposed classes are sufficiently cohesive to warrant adjudication by representation." *Amchem, 521 U.S. at 623*. "While similar to *Rule 23(a)*'s requirements for typicality and commonality, 'the predominance criterion is far more demanding.'" *Messner, 669 F.3d at 814* (quoting *Amchem, 521 U.S. at 623*). "In order to meet the predominance requirement of *Rule 23(b)(3)*, a plaintiff must establish that 'the issues in the class action that are subject to generalized proof, and thus applicable to the class as a whole, . . . predominate over those issues that are subject only to individualized proof.'" *In re Visa Check/MasterMoney Antitrust Litig., 280 F.3d at 136* (quoting *Rutstein v. Avis Rent-A-Car Sys., Inc., 211 F.3d 1228, 1233 (11th Cir. 2000)*). "Common issues may predominate when **[*26]** liability can be determined on a class-wide basis, even when there are some individualized damage issues." *Id.* at 139 (collecting cases). But "[t]here is no mathematical or mechanical test for evaluating predominance." *Messner, 669 F.3d at 814*. "[A] court weighing class certification must" therefore "walk a balance between evaluating evidence to determine whether a common question exists and predominates, without weighing that evidence to determine whether the plaintiff class will ultimately prevail on the merits." *Bell v. PNC Bank, Nat'l Ass'n, 800 F.3d 360, 376 (7th Cir. 2015)* (emphasis in original).

The "predominance requirement is satisfied when 'common questions represent a significant aspect of [a] case and . . . can be resolved for all members of [a] class in a single adjudication.'" *Id. at 815* (quoting 7AA Wright & Miller, Federal Practice & Procedure § 1778 (3d ed. 2011)). "Or, to put it another way, common questions can predominate if a 'common nucleus of operative facts and issues' underlies the claims brought by the proposed class." *Id.* (quoting *In re Nassau Cnty. Strip Search Cases, 461 F.3d 219, 228 (2d Cir. 2006)*) "'If, to make a prima facie showing on a given question, the members of a proposed class will need to present evidence that varies from member to member, then it is an individual question. If the same evidence will suffice **[*27]** for each member to make a prima facie showing, then it becomes a common question.'" *Id.* (quoting *Blades v. Monsanto Co., 400 F.3d 562, 566 (8th Cir. 2005)*). That said, "[i]ndividual questions need not be absent. The text of *Rule 23(b)(3)* itself contemplates that such individual questions will be present. The rule requires only that those questions not predominate over the common questions affecting the class as a whole." *Id.*

"Analysis of predominance under *Rule 23(b)(3)* 'begins, of course, with the elements of the underlying cause of action.'" *Messner, 669 F.3d at 815* (quoting *Erica P. John Fund, Inc. v. Halliburton Co., 563 U.S. 804, 809, 131 S. Ct. 2179, 180 L. Ed. 2d 24 (2011)*). Here, the Court must examine whether Conrad can "establish each of the three required elements of an antitrust claim— (1) a violation of ***antitrust law***; (2) injury and causation; and (3) damages—using common evidence." *Id.*

As for the first requirement, "*Section 1* of the Sherman Act is designed to prevent businesses from entering into collusive agreements . . . ." *Omnicare, Inc. v. UnitedHealth Grp., Inc., 629 F.3d 697, 705 (7th Cir. 2011)*. "By its terms, *§ 1* prohibits '[e]very contract, combination . . . or conspiracy, in restraint of trade or commerce,' though courts have long restricted its reach to agreements that unreasonably restrain trade." *Id.* (quoting *15 U.S.C. § 15*). "To prevail under *§ 1* under any theory, plaintiffs generally must prove three things: (1) that defendants had a contract, combination, or conspiracy **[*28]** ('an agreement'); (2) that as a result, trade in the relevant market was unreasonably restrained; and (3) that they were injured." *Id.*

In the first place, Conrad must present common evidence that Jimmy John's and its franchisees "had a conscious commitment to a common scheme designed to achieve an unlawful objective." *See* *Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 768, 104 S. Ct. 1464, 79 L. Ed. 2d 775 (1984)*. And because Conrad alleges a "hub-and-spokes conspiracy" (*see* Conrad's Mem. at 1-2), he must ultimately establish "both that there was a central coordinating party (the 'hub'), and that each participant (along the 'rim') recognized that it was part of the greater arrangement, and it coordinated or otherwise carried out its duties as part of the broader group," *Marion Healthcare, LLC v. Becton Dickinson & Co., 952 F.3d 832, 842 (7th Cir. 2020)*. "In other words, a 'hub-and-spokes conspiracy' requires a 'rim' connecting the various horizontal agreements." *Id.* "[F]or such a conspiracy to exist, 'those people who form the wheel's spokes must have been aware of each other and must do something in furtherance of some single, illegal enterprise.'" *United States v. Bustamante, 493 F.3d 879, 886-87 (7th Cir. 2007)* (quoting *United States v. Levine, 546 F.2d 658, 663 (5th Cir. 1977)*); *see also* *MM Steel, L.P. v. JSW Steel (USA) Inc., 806 F.3d 835, 844 (5th Cir. 2015)* (noting that the antitrust plaintiff must show that the spokes "knew the essential nature and general scope of the joint plan") (cleaned up). "[A] rimless wheel conspiracy," on the other **[*29]** hand, "is not a single, general conspiracy but instead amounts to multiple conspiracies between the common defendant and each of the other defendants." *Dickson v. Microsoft Corp., 309 F.3d 193, 203 (4th Cir. 2002)* (citing *Kotteakos v. United States, 328 U.S. 750, 768-69, 66 S. Ct. 1239, 90 L. Ed. 1557 (1946)*). So in the end, "to secure class certification," Conrad must "demonstrate (not merely allege) that there is proof common to all class members, and that this proof would show that they suffered 'injuries that reflected the anticompetitive effect of either the violation or the anticompetitive acts made possible by the violation.'" *Kleen Prods. LLC v. Int'l Paper Co., 831 F.3d 919, 926 (7th Cir. 2016)* (quoting *James Cape & Sons Co. v. PCC Constr. Co., 453 F.3d 396, 399 (7th Cir. 2006)*).

The predominance requirement is not satisfied here because, among other reasons, Conrad failed to establish that common evidence will show that the Jimmy John's franchisees had a conscious commitment to suppress labor mobility. Given that the No-Poach Provision was independently enforced (Jimmy John's itself having no hand), some franchisees took no part in doing so. For example, one franchisee suggested that he does not enforce the Provision because "employees are allowed to work wherever they want." (Jimmy John's Franchisee Forum Post from December 2017, Jimmy John's Resp. at Ex.133-19). Another posited, "Who really enforced that in their units? I'm not going to track where each employee **[*30]** goes to work at next." (Jimmy John's Franchisee Forum Post from July 2018, Jimmy John's Resp. at Ex. 45). (*See also* McNulty Decl. ¶ 33, Jimmy John's Resp. at Ex. 133-69) (franchisee hired manager after receiving verbal consent from previous franchisee-employer). Some also thought that the Provision only applied to managers—possibly because some versions of the Provision *did* only apply to managers. (*E.g.*, Email from Franchisee to Jimmy John's from August 2014, Jimmy John's Resp. at Ex. 133-14). These franchisees surely are not alone in their practice of not enforcing the Provision, permitting employees to change locations without exercising their right of enforcement. Indeed, Jimmy John's expert, Dr. McCrary, determined that 88 percent of releases—when requested at all—were granted. (McCrary Report ¶ 87, Jimmy John's Resp. at Ex. 133-57). While the evidence so far suggests that other franchisees did, in fact, enforce the Provision (*e.g.*, Jimmy John's Franchisee Forum Post from December 2017) ("[W]e were already sued last year for this."), that only highlights the individualized nature of Conrad's claims. *See* *United States v. Townsend, 924 F.2d 1385, 1391 (7th Cir. 1991)* ("[M]ere knowledge of the hub's activities, or those of the other spokes, **[*31]** is not enough to tie the conspiracy together.").

Although "[t]here have been many antitrust class actions in which the relief sought was damages, and the fact that the damages would generally be different for each member of the class was not deemed an insuperable obstacle," *Hardy v. City Optical Inc., 39 F.3d 765, 771 (7th Cir. 1994)*, separate proof would be needed to establish which franchisees, if any, consciously acted to further the unlawful objective of suppressing labor mobility. Along those lines, though "[t]he justification for cooperation is not relevant to whether that cooperation is concerted or independent action," *id. at 199*, the circumstances must still reveal "a unity of purpose or a common design and understanding, or a meeting of minds in an unlawful arrangement," *Am. Tobacco Co. v. United States, 328 U.S. 781, 810, 66 S. Ct. 1125, 90 L. Ed. 1575 (1946)*. No such evidence exists here. In sum, Conrad has not shown that common evidence will establish that each (or even most) of the franchisees conspired with Jimmy John's in the common pursuit of suppressing labor mobility.

Individual inquiries also arise from the changing face of the No-Poach Provision. True, each of the nearly 800 franchisees signed a franchise agreement containing some form of the Provision. But Conrad claims that there was a "standard franchise agreement." **[*32]** (Am. Compl. at 9). Not so. In 2014, for example, the No-Poach Provision prohibited franchisees from **hiring** *managers* who had worked for another franchisee within the past two years. In 2015, that prohibition was removed; from then on, franchisees were simply not allowed to **solicit** other franchisee's *workers*. While Conrad contends that most franchisees were governed by a similar version of the Provision found in the 2014 Franchise Agreement (Conrad's Mem. at 8-9), the agreements expired every 10 years (*see, e.g.*, 2007 Franchise Agreement § 1(D), Doc. 133-3; 2015 Franchise Agreement § 1(D); 2016 Franchise Agreement § 1(D)). In other words, the class members "'held a multitude of jobs, at different levels of [Jimmy John's] hierarchy, for variable lengths of time, in [3,000] stores, sprinkled across [40] states,'" with each franchisee having its own philosophy on enforcing the No-Poach Provision, "subject to a variety of [agreements] that all differed . . . .'" *See* *Dukes, 564 U.S. at 360* (quoting *Dukes v. Wal-Mart Stores, Inc., 603 F.3d 571, 652 (9th Cir. 2010)* (Kozinski, C.J., dissenting)). Proof of impact would thus vary among class members depending on their position and which version of the Franchise Agreement they were governed by. Similarly, given that Conrad seeks **[*33]** to certify a class of all Jimmy John's employees from 2014 to 2018 whose franchisees signed different agreements, overwhelming individualized inquiries would be required to establish that each franchisee participated in the same "conspiracy."

The Court also excluded Dr. Singer's testimony because he used a flawed methodology to predict antitrust impact. More specifically, the Court determined that Dr. Singer's regression models suffered from a systemic failure to adjust for those two percent of the wage data that did not consistently record employee wages as per-shift or per-hour, leading to inflated estimates of impact. Fatally, Conrad relies only on Dr. Singer's report to support his claim that the wages of every Jimmy John's employee nationwide were suppressed by the No-Poach Provision. On the other hand, the Court admitted the testimony of Dr. Ordover, Jimmy John's expert, who ably demonstrated that—after adjusting for Dr. Singer's error—"managers paid on an hourly basis had an average wage suppression of approximately two percent, while salaried managers suffered no suppression at all." (Ordover Report at 21, Jimmy John's Resp. at Ex. 133-67). "Without presenting another methodology, **[*34]** [Conrad] cannot show *Rule 23(b)(3)* predominance: Questions of individual damages calculations will inevitably overwhelm questions common to the class." *See* *Comcast Corp., 569 U.S. at 34*.

Additionally, the United States Supreme Court recently concluded in *NCAA v. Alston* that the plaintiff's monopsony claims were appropriately analyzed under the rule of reason, not the per se rule. *141 S. Ct. 2141, 2157, 210 L. Ed. 2d 314 (2021)*. In brief, a class of current and former student-athletes sued the NCAA and 11 Division I conferences for using their "monopsony power to cap artificially the compensation offered to recruits." *Id. at 2152* (cleaned up). Even though the defendants *admitted* that their conduct constituted "horizontal price fixing in a market where [they] exercise monopoly control" *id. at 2154*, the Court took "special care not to deploy" the per se rule given the "often hard-to-see efficiencies attendant to complex business arrangements," *id. at 2156*. *Cf.* *Nat'l Collegiate Athletic Ass'n v. Bd. of Regents of Univ. of Okla., 468 U.S. 85, 100, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (1984)* ("[A] per-se rule is applied when 'the practice facially appears to be one that would always or almost always tend to restrict competition and decrease output.'") (quoting *Broad. Music, Inc. v. Columbia Broad. Sys., Inc., 441 U.S. 1, 19-20, 99 S. Ct. 1551, 60 L. Ed. 2d 1 (1979)*). Rather, the Supreme Court agreed with the district court's finding that the "fuller review" offered by the rule of reason was more appropriate in a monopsony case involving "an **[*35]** industry in which some horizontal restraints on competition are essential if the product is to be available at all." *Alston, 141 S. Ct. at 2157* (cleaned up); *see also* *id. at 2158* ("Whether an antitrust violation exists necessarily depends on a careful analysis of market realities.").

Alston thus answers a question this Court punted at the motion-to-dismiss stage: The rule of reason applies in this monopsony case challenging a nationwide franchise's use of intrabrand restraints that were arguably "designed to help [the company] more effectively compete with other brands by ensuring cooperation and collegiality among franchisees, and by encouraging investment in training." (Jimmy John's Resp. at 5). *See also* United States' Statement of Interest, *Stigar v. Dough, Inc.*, No. 2:18-CV-00244-SAB, Doc. 30, at 11-16 (E.D. Wash. Mar. 7, 2019) (arguing that no-poach provisions in franchise agreements are subject to the rule of reason).

With that in mind, the rule of reason raises more individualized issues precluding class certification. "Especially in view of the increasing complexity of corporate operations, a business enterprise should be free to structure itself in ways that serve efficiency of control, economy of operations, and **[*36]** other factors dictated by business judgment without increasing its exposure to antitrust liability." *Copperweld Corp., 467 U.S. at 773*. To that end, "even under the best of circumstances, applying the antitrust laws can be difficult—and mistaken condemnations of legitimate business arrangements are especially costly, because they chill the very procompetitive conduct the antitrust laws are designed to protect." *Alston, 141 S. Ct. at 2161*. Indeed, "[t]he whole point of the rule of reason is to furnish 'an enquiry meet for the case, looking into the circumstances, details, and logic of a restraint' to ensure that it unduly harms competition before a court declares it unlawful." *Id. at 2160* (quoting *Cal. Dental Ass'n v. FTC, 526 U.S. 756, 781, 119 S. Ct. 1604, 143 L. Ed. 2d 935 (1999)*); *see also* *id. at 2164* ("[A]ntitrust courts must give wide berth to business judgments before finding liability."); Frank H. Easterbrook, *The Limits of Antitrust*, *63 Tex. L. Rev. 1, 15 (1984)* ("For a number of reasons, errors on the side of excusing questionable practices are preferable.").

Here, Jimmy John's expert Dr. McCrary persuasively described how most putative class members likely *benefited* from the No-Poach Provision because it gave franchisees an added incentive to provide more training, thus promoting employee advancement. (McCrary Report ¶¶ 96-98). For example, the Senior Director of **[*37]** Marketing Execution and Operations refused to release one certified manager because the franchisee "invested a lot of time and money in training him and getting him certified": The No-Poach Provision protected the investment franchisees made in training their employees. (Email from Buergler to Hooper at 1, Doc. 133-20) (emphasis added). Similarly, the Director of Franchise Development understood the Provision as a means "to keep the peace among franchisees," thereby "reduc[ing] friction within the system." (Morena Dep. at 12:16-18, Doc. 133-53). In other words, the No-Poach Provision not only had the potential to encourage investment in training, but it may also have promoted cooperation between franchisees, increasing coordination and thus "increasing the overall demand for the brand." (McCrary Report ¶ 153; *see id.* § 6.2). (*See also* Hooper Dep. at 87:12-15) ("I think that the brand is stronger when [franchisees support each other] instead of bickering and squabbling over stuff that is external to serving customers freaky fast."). Perhaps more importantly, Dr. McCrary suggests that increasing the use of certified managers "improves the speed at which orders are executed and the frequency **[*38]** of complaints with the store." (McCrary Report ¶ 147; *see id.* § 6.1). These procompetitive justifications, coupled with the fact that most release requests were *approved* without conditions, present overwhelming individualized questions precluding certification. *See* *Kohen v. Pac. Inv. Mgmt. Co. LLC., 571 F.3d 672, 677 (7th Cir. 2009)* ("[A] class should not be certified if it is apparent that it contains a great many persons who have suffered no injury at the hands of the defendant . . . .").

Along those lines, the Court noted in excluding Dr. Singer's testimony that Conrad's baseline premise—that every Jimmy John's employee nationwide was injured by the No-Poach Provision, no matter their position or location—

was mere *ipse dixit*. Indeed, "[c]ommon proof of actual injury to each class member requires that all class members operate in the same relevant market, otherwise, they could not be affected in a common manner by the challenged conduct." *Exhaust Unlimited, Inc., 223 F.R.D. at 513*. And "[i]t is by now well established that any rule of reason analysis requires a showing of anticompetitive market effect. To hold otherwise would ignore the very purpose of the antitrust laws which were enacted for the protection of competition, not competitors." *Lektro-Vend Corp. v. Vendo Corp., 660 F.2d 255, 268 (7th Cir. 1981)* (applying the rule of reason to noncompetition **[*39]** covenant).

With that in mind, the Court remains of the same mind as Dr. Ordover and Dr. McCrary, whose prudent analyses revealed that the relevant labor market includes not merely Jimmy John's franchisees but also other quick-service restaurants ("QSRs"). Dr. Ordover recognized, for example, that "it is likely that the putative class members seek employment in a labor market (or multiple labor market) that is (or are) much broader than Jimmy John's branded stores." (Ordover Report ¶ 91). He then aptly demonstrated that "99 percent of Jimmy John's branded stores have at least ten other QSR brands within ten miles, with an average number of nearby brands of 53" (*id.* ¶ 103), and "an average number of QSR locations of nearly 257" (*id.* ¶ 104).

Similarly, given that "[s]ome franchisees indicate that they compete with all other employers in the local area hiring minimum wage employees," Dr. McCrary explained how "the only way an individual worker's wage could be suppressed by the [No-Poach Provision] is if the worker had developed specific skills at Jimmy John's that raised their productivity at Jimmy John's more than at other competing brands. If not, then competition from other brands would **[*40]** push the worker's wage at Jimmy John's up to the competitive level associated with that worker's skills." (McCrary Report ¶ 93). Without reaching the merits on that question here, individualized inquiries would still be needed to determine whether a given Jimmy John's employee could have been injured given the varied and dynamic labor markets across the country. In sum, the Court agrees with Jimmy John's that Conrad's "failure to offer classwide evidence of a relevant labor market is case-ending." (Jimmy John's Resp. at 22).

i. Superiority

"*Rule 23(b)(3)* also conditions class certification on whether the class action device is superior to other available methods for fairly and efficiently resolving the dispute in question." *Messner, 669 F.3d at 814 n.5*. Relevant considerations include:

> (A) The class members' interests in individually controlling the prosecution or defense of separate actions;
> (B) The extent and nature of any litigation concerning the controversy already begun by or against class members;
> (C) The desirability or undesirability of concentrating the litigation of the claims in the particular forum; and
> (D) The likely difficulties in managing a class action.

Fed. R. Civ. P. 23(b)(3).

The superiority requirement is satisfied when "a class action **[*41]** would achieve economies of time, effort, and expense and promote . . . uniformity of decisions as to persons similarly situated, without sacrificing procedural unfairness or bringing about other undesirable results." *Amchem, 521 U.S. at 615*. Indeed, "[t]he policy at the very core of the class action mechanism is to overcome the problem that small recoveries do not provide the incentive for any individual to bring a solo action prosecuting his or her rights." *Id. at 617* (quoting *Mace v. Van Ru Credit Corp., 109 F.3d 338, 344 (7th Cir. 1997)*). "But when a separate evidentiary hearing is required for each class member's claim, the aggregate expense may, if each claim is very small, swamp the benefits of class-action treatment." *Pastor v. State Farm Mut. Auto. Ins. Co., 487 F.3d 1042, 1047 (7th Cir. 2007)*.

Jimmy John's argues that the superiority argument is not satisfied because the individualized questions discussed above—and more like them—would make a trial unmanageable:

> For instance, for any given class member, it would first be necessary to identify her employer and determine if they were aware of Section 7(d), and, if so, whether they enforced or ignored it. What were that franchisee's practices with respect to hiring, pay, and retention of employees—e.g., did the franchisee pay more than other

> QSRs in the area, or pay more at one of its Jimmy John's **[*42]** stores than others? Did the class member work for only a few weeks before quitting—and if so, could a reasonable factfinder still conclude that she would have received a promotion or raise but-for 7(d)? For a longer-tenured class member, did he receive a promotion, bonus, or raise? Did he move between stores—if so, did he do it for increased pay, or did he accept lower pay for other perceived advantages, such as proximity to his home? Were there any other separately-owned Jimmy John's stores within a reasonable commute of the class member's store? Was she an in-shopper or a manager—if the latter, what was her role in setting pay for other class members? Did she keep wages low in order to increase her own bonus?

(Jimmy John's Resp. at 30).

The Court agrees. Conrad characterizes these assertions as a "fiction that [he] is unable to quantify the wage suppression of each Class Member attributable to the restraint." (Conrad's Reply at 14). But Jimmy John's contentions go beyond mere difficulties in assessing individual damages. *See* *Mullins v. Direct Digit., LLC, 795 F.3d 654, 663 (7th Cir. 2015)* ("It has long been recognized that the need for individual damages determinations at this later stage of the litigation does not itself justify the denial of **[*43]** certification.").

True enough, individual actions for suppressed wages may ultimately prove impractical, prohibitively expensive, or inefficient. Even so, a class action is hardly desirable when predominance is so lacking. *See* *Messner, 669 F.3d at 814 n.5* (citing *Klay v. Humana, Inc., 382 F.3d 1241, 1269 (11th Cir. 2004)* ("Superiority analysis is intertwined with predominance analysis; when there are no predominant common issues of law or fact, class treatment would be either singularly inefficient or unjust.") (cleaned up)).

The issue is not simply one of assessing individual damages—rather, it is one where "it is apparent that [the class] contains a great many persons who have suffered no injury" and "thus require more than a thousand separate hearings" to assess the validity of each claim. *See* *Kohen, 571 F.3d at 677*. For example, the Court described above how the No-Poach Provision changed over time; how enforcement practices differed among franchisees; and how most class members—including Conrad—were never actually denied the chance to change shops, either because the franchisees acquiesced or because they did not seek a move in the first place. In the end, a class action is not superior to individual suits when the class is "defined so broadly as to include many members who could not **[*44]** bring a valid claim even under the best of circumstances." *See* *Messner, 669 F.3d at 824*. Thus the superiority requirement, too, is unsatisfied.

CONCLUSION

For the reasons set forth above, the Court **DENIES** Conrad's Motion to Strike (Doc. 186) and Motion for Class Certification (Doc. 113).

IT IS SO ORDERED.

HN1[] **Summary Judgment, Burdens of Proof**

A party is entitled to summary judgment if the movant shows that there is no genuine dispute as to any material fact and the movant is entitled to judgment as a matter of law. Fed. R. Civ. P. 56(a). The moving party has the burden of establishing the absence of a genuine dispute of material fact. The court must view the evidence in the light most favorable to the non-movant and draw all reasonable inferences in the non-movant's favor. Although credibility determinations, the weighing of the evidence, and the drawing of legitimate inferences from the facts are jury functions, not those of a judge ruling on a motion for summary judgment, the mere existence of a scintilla of evidence in support of the plaintiff's position is insufficient. Where the record taken as a whole could not lead a rational trier of fact to find for the non-moving party, there is no genuine issue for trial.

Civil Procedure > Pleading & Practice > Pleadings > Supplemental Pleadings

HN2[] Pleadings, Supplemental Pleadings

Fed. R. Civ. P. 15(d) provides that a court may permit a party to serve a supplemental pleading setting out any transaction, occurrence, or event that happened after the date of the pleading to be supplemented. This rule also permits a supplemental pleading to correct a defective complaint and circumvents the needless formality and expense of instituting a new action when events occurring after the original filing indicated a right to relief. The purpose of Rule 15(d) is to promote as complete an adjudication of the dispute between the parties as is possible.

Civil Procedure > Pleading & Practice > Pleadings > Supplemental Pleadings

HN3[] Pleadings, Supplemental Pleadings

Amended pleadings under Fed. R. Civ. P. 15(a) differ from supplemental pleadings under Fed. R. Civ. P. 15(d). The former relate to matters that occurred prior to the filing of the original pleading and entirely replace the earlier pleading; the latter deal with events subsequent to the pleading to be altered and represent additions to or continuations of the earlier pleadings.

Civil Procedure > Pleading & Practice > Pleadings > Supplemental Pleadings

HN4[] Pleadings, Supplemental Pleadings

A supplemental pleading is the mechanism used for events, transactions, and occurrences that happened after the date of the pleading to be supplemented. Fed. R. Civ. P. 15(d) allows the addition of post-complaint allegations. Indeed, Rule 15(d) is somewhat narrower in scope than the rule it replaced, because it does not expressly apply to pre-action matters of which a party was ignorant at the time the original pleading was filed but embraces only events that have happened after the date of the pleading to be supplemented.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Fraudulent Procurement of Patent

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > ... > Intellectual Property > Bad Faith, Fraud & Nonuse > Fraud

HN5[] Attempts to Monopolize, Elements

In order to prevail on a Walker Process claim, the antitrust-plaintiff must show two things: first, that the antitrust-defendant obtained the patent by knowing and willful fraud on the patent office and maintained and enforced the patent with knowledge of the fraudulent procurement; and second, all the other elements necessary to establish a Sherman Act monopolization claim. To state an antitrust claim of monopolization under § 2 of the Sherman Act, a plaintiff must show: (a) the possession of monopoly power in the relevant market; (b) the willful acquisition or maintenance of that power; and (c) causal antitrust injury.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN6[] Relevant Market, Product Market Definition

A relevant antitrust market consists of all products that are reasonably interchangeable by consumers for the same purposes. The principle most fundamental to product market definition is cross-elasticity of demand for certain products or services. Commodities which are reasonably interchangeable for the same or similar uses normally should be included in the same product market for antitrust purposes. "Reasonable interchangeability" may be determined by looking at price, use, and qualities of the products. Ultimately what constitutes a relevant market is a factual determination for the jury. The definition of an antitrust "relevant market" is typically a factual rather than a legal inquiry, but certain legal principals govern the definition.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Appropriateness

Evidence > Inferences & Presumptions > Inferences

Civil Procedure > Judgments > Summary Judgment > Entitlement as Matter of Law

HN7[] Entitlement as Matter of Law, Appropriateness

At summary judgment, the court must view the facts in the light most favorable to the nonmoving party and resolve all reasonable inferences in favor of the nonmoving party.

Antitrust & Trade Law > Regulated Practices > Market Definition

HN8[] Regulated Practices, Market Definition

In Brown Shoe, the U.S. Supreme Court explained that within a broad market, well-defined submarkets may exist that themselves constitute markets for antitrust purposes. The boundaries of such a submarket may be determined by examining such practical indicia as industry or public recognition of the submarket as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors. The Ninth Circuit, however, has repeatedly noted that the Brown Shoe indicia are practical aids for identifying the areas of actual or potential competition and that their presence or absence does not decide automatically the submarket issue. Instead, whether isolating a submarket is justified turns ultimately upon whether the factors used to define the submarket are economically significant.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN9[] Relevant Market, Product Market Definition

In an antitrust case, the scope of the relevant market is not governed by the presence of a price differential between competing products.

Antitrust & Trade Law > Regulated Practices > Market Definition

HN10[] Regulated Practices, Market Definition

In an antitrust case, for the sixth factor, sensitivity to price changes, courts typically consider whether a sufficient number of customers would switch to other technologies in response to a price increase.

Opinion

OPINION AND ORDER

Michael H. Simon, District Judge.

In this action brought by Plaintiff Ni-Q, LLC (Ni-Q) against Defendant Prolacta Bioscience, Inc. (Prolacta), Ni-Q sought a declaratory judgment of non-infringement and invalidity of U.S. Patent No. 8,628,921 (the '921 Patent). Prolacta asserted a counterclaim for infringement of that patent. The Court granted Ni-Q's first motion for partial summary judgment, finding that certain claims of the '921 Patent were invalid under *35 U.S.C. § 101* and that even if they were valid, Ni-Q did not infringe the '921 Patent as a matter of law. The Court also granted Ni-Q's second motion for partial summary judgment, finding that certain claims of the '921 Patent were invalid as anticipated under *35 U.S.C. § 102(b)* (pre-America Invents Act).

Upon the stipulated request of the parties, the Court dismissed Ni-Q's claims requesting a declaratory judgment of non-infringement and invalidity **[*2]** as moot, after Prolacta surrendered the '921 Patent during reissue, when the U.S. Patent and Trademark Officer (USPTO) issued the RE48,240 patent. The Court also dismissed Prolacta's counterclaim for infringement of the '921 Patent.

In its Third Amended Complaint, Ni-Q added claims asserting that Prolacta violated *Oregon's Unlawful Trade Practices Act (UTPA)* and *Section 2* of the Sherman Act, *15 U.S.C. § 2*, alleging a *Walker Process* claim of enforcement of a fraudulently obtained patent.[1] Ni-Q, however, has stated that it will voluntarily dismiss its UTPA claim, leaving only its antitrust claim. In response to Prolacta's counterclaim, Ni-Q also asserted an affirmative defense of inequitable conduct, alleging that Prolacta engaged in fraud on the USPTO in obtaining the '921 Patent, among other patents.

Now before the Court is Ni-Q's third motion for summary judgment, arguing that the '921 Patent is unenforceable because of Prolacta's inequitable conduct, Ni-Q's fourth motion for summary judgment, on its antitrust claim, and Ni-Q's motion for leave to file a supplemental complaint adding a claim for a declaratory judgment that the '921 Patent is unenforceable because of inequitable conduct and that Prolacta engaged in fraud on the PTO during the reissue of the '921 Patent. For the following reasons, Ni-Q's motion for leave to file **[*3]** a supplemental complaint is denied, Ni-Q's third motion for summary judgment is denied as moot, and Ni-Q's fourth motion for summary judgment is denied.

---

[1] In *Walker Process Equipment v. Food Machine & Chemical Corp., 382 U.S. 172, 86 S. Ct. 347, 15 L. Ed. 2d 247 (1965)*, the Supreme Court held that a plaintiff could sue under *§ 2* of the Sherman Act based on the alleged maintenance and enforcement of a fraudulently obtained patent.

STANDARDS

A. Summary Judgment

HN1[] A party is entitled to summary judgment if the "movant shows that there is no genuine dispute as to any material fact and the movant is entitled to judgment as a matter of law." *Fed. R. Civ. P. 56(a)*. The moving party has the burden of establishing the absence of a genuine dispute of material fact. *Celotex Corp. v. Catrett, 477 U.S. 317, 323, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986)*. The court must view the evidence in the light most favorable to the non-movant and draw all reasonable inferences in the non-movant's favor. *Clicks Billiards Inc. v. Sixshooters Inc., 251 F.3d 1252, 1257 (9th Cir. 2001)*. Although "[c]redibility determinations, the weighing of the evidence, and the drawing of legitimate inferences from the facts are jury functions, not those of a judge . . . ruling on a motion for summary judgment," the "mere existence of a scintilla of evidence in support of the plaintiff's position [is] insufficient . . . ." *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 252, 255, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*. "Where the record taken as a whole could not lead a rational trier of fact to find for the non-moving party, there is no genuine issue for trial." *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 587, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)* (citation and quotation marks omitted).

B. Supplemental Pleading

HN2[] *Rule 15(d) of the Federal Rules of Civil Procedure* provides that a court may "permit a party to serve a supplemental **[*4]** pleading setting out any transaction, occurrence, or event that happened after the date of the pleading to be supplemented." This rule also "permits a supplemental pleading to correct a defective complaint and circumvents 'the needless formality and expense of instituting a new action when events occurring after the original filing indicated a right to relief.'" *Northstar Fin. Advisors Inc. v. Schwab Invs., 779 F.3d 1036, 1044 (9th Cir. 2015)* (quoting 6A Charles Alan Wright, Arthur R. Miller, & Mary Kay Kane, *Fed. Prac. & Proc*. § 1505 (3d ed. 2015) (Wright & Miller)). "The purpose of *Rule 15(d)* is to promote as complete an adjudication of the dispute between the parties as is possible." *LaSalvia v. United Dairymen of Arizona, 804 F.2d 1113, 1119 (9th Cir. 1986)* (simplified).

HN3[] Amended pleadings under *Rule 15(a)* differ from supplemental pleadings under *Rule 15(d)*. "The former relate to matters that occurred prior to the filing of the original pleading and entirely replace the earlier pleading; the latter deal with events subsequent to the pleading to be altered and represent additions to or continuations of the earlier pleadings." Wright & Miller, § 1504.

DISCUSSION

A. Motion to File Supplemental Complaint

Ni-Q moves for leave to file a supplemental complaint alleging a claim for inequitable conduct. Much of the conduct alleged in the proposed supplemental claim, however, **[*5]** is conduct that occurred before the date that the Third Amended Complaint was filed.[2] *HN4*[] A supplemental pleading is the mechanism used for events, transactions, and occurrences that happened *after* the date of the pleading to be supplemented. *Id.*; *see also LaSalvia, 804 F.2d*

[2] Ni-Q alleges a few facts relating to the reissue of the '921 Patent that may have occurred after the filing of the Third Amended Complaint (those facts do not have specific dates, but given the timing of the reissue patent prosecution, the alleged conduct is likely to have occurred after October 2019). The core of Ni-Q's proposed inequitable conduct claim, however, is that Prolacta engaged in inequitable conduct in originally prosecuting the '921 Patent, which occurred well before the filing of the Third Amended Complaint. Indeed, Ni-Q included most of the same allegations in its inequitable conduct affirmative defense to Prolacta's counterclaim.

at 1119 ("*Federal Rule of Civil Procedure 15(d)* allows the addition of *post-complaint allegations*." (emphasis added)). Indeed, *Rule 15(d)* is "somewhat narrower in scope" than the rule it replaced, "because it does not expressly apply to pre-action matters of which a party was ignorant at the time the original pleading was filed (these matters may be raised under *Rule 15(a)*) but embraces only events that have happened 'after the date of the pleading to be supplemented.'" *Wright & Miller* § 1504. That the alleged conduct is not post-complaint conduct is apparent by the fact that Ni-Q asserts nearly identical allegations in its affirmative defense of inequitable conduct to Prolacta's counterclaim. Thus, the proper mechanism was for Ni-Q to move for leave to file a Fourth Amended Complaint.

Additionally, even considering Ni-Q's request on the merits, or construing Ni-Q's request as one under *Rule 15(a) of the Federal Rules of Civil Procedure* instead of under *Rule 15(d)*, the Court would deny the request as moot, untimely, and unduly prejudicial. The sole basis on **[*6]** which Ni-Q asserts that it should be able to add a new claim four years into this litigation is an anticipated motion for attorney's fees under *35 U.S.C. § 285*. The Court, however, will consider Ni-Q's arguments and evidence relating to inequitable conduct when such a motion is filed. *See* *Liebel-Flarsheim Co. v. Medrad, Inc., 481 F.3d 1371, 1383 (Fed. Cir. 2007)* ("We agree with the district court that the inequitable conduct counterclaim is moot. . . . The only other additional relief that may be available to Medrad by an inequitable conduct determination is attorney fees under *35 U.S.C. § 285*. Medrad admitted during oral arguments that, although it plans to predicate an attorney fee application on inequitable conduct, it has not filed that application yet. We therefore affirm the decision that the inequitable conduct counterclaim is presently moot.").

B. Motions for Summary Judgment

1. Inequitable Conduct

Ni-Q filed its motion for summary judgment on its affirmative defense of inequitable conduct before the parties stipulated that the Court should dismiss Ni-Q's declaratory judgment claims on infringement and invalidity and Prolacta's counterclaim. Ni-Q argued in its motion that the '921 Patent was unenforceable because of Prolacta's inequitable conduct. The Court requested supplemental briefing **[*7]** on the legal effect, if any, of the Court ruling on Ni-Q's summary judgment motion after the Court dismissed Ni-Q's claims relating to infringement and invalidity and Prolacta's counterclaim. Ni-Q cites *Monsanto Co. v. Bayer Bioscience N.V., 514 F.3d 1229 (Fed. Cir. 2008)*, in support of the proposition that the Court should resolve this motion and find the '921 Patent unenforceable.

Monsanto does not support Ni-Q's assertion that a court can, independent of a motion for attorney's fees under *§ 285*, find a patent that is not in suit unenforceable for inequitable conduct. As the Federal Circuit explained in *Monsanto*:

> The question facing this court is, thus, whether a district court's jurisdiction under *§ 285* to determine whether there was inequitable conduct in the prosecution of patents that are otherwise no longer in suit confers on that court the jurisdiction to hold such patents unenforceable for inequitable conduct. We hold that it does.

Id. at 1243. The prerequisite in *Monsanto* for the court having jurisdiction to hold the patent that was no longer in suit unenforceable was the existence of a pending motion under *§ 285*. Here, Ni-Q has not yet filed a motion under *§ 285*.[3]

---

[3] Ni-Q also cites *Advanced Magnetic Closures, Inc. v. Rome Fastener Corp., 607 F.3d 817 (Fed. Cir. 2010)*. Like in *Monsanto*, the jurisdiction for the court in *Advanced Magnetic* to make findings on inequitable conduct and unenforceability on a patent not in suit stemmed from the presence of a filed motion under *§ 285*. *Id. at 827* ("This court has held that a district court retains jurisdiction to consider a motion for attorney's fees under *35 U.S.C. § 285* and to make findings of inequitable conduct—even after a party has dismissed its counterclaims as to that patent.").

Ni-Q's affirmative defense of inequitable conduct to claimed infringement by Prolacta is moot because **[*8]** the '921 Patent is no longer in suit, Ni-Q's declaratory judgment claims have been dismissed, and Prolacta's infringement counterclaim has been dismissed. Thus, Ni-Q's motion for summary judgment is denied as moot. As discussed above, the Court will consider Ni-Q's arguments relating to inequitable conduct, including whether such conduct rendered the '921 Patent unenforceable, in any future motion under *§ 285*.

2. Antitrust

Ni-Q's Third Amended Complaint alleges that Prolacta engaged in fraud on the USPTO and attempted monopolization under *15 U.S.C. § 2* based on the fraudulently obtained patent. Ni-Q alleges that the relevant market is "the market for breast milk having standardized macronutrient content within the US." Third Am. Compl. ¶ 72. In Ni-Q's motion for summary judgment, however, Ni-Q argues that Prolacta has engaged in monopolization (instead of attempted monopolization) and that the relevant market is "DNA-matched, nutrient standardized human breast milk." It troubles the Court that Ni-Q's changed its antitrust theory and asserted relevant market definition after the close of fact discovery.[4] Prolacta, however, responded to Ni-Q's motion on the merits, although Prolacta reserved its rights under *Rule 37(c) of the Federal Rules of Civil Procedure* to exclude Ni-Q's **[*9]** "late" assertion of a revised antitrust theory and new market definition. Because Prolacta did not challenge Ni-Q's late changes of its relevant market definition and antitrust theory, the Court will address these issues on the merits of Ni-Q's motion for summary judgment.

HN5[] "In order to prevail on a *Walker Process* claim, the antitrust-plaintiff must show two things: first, that the antitrust-defendant obtained the patent by knowing and willful fraud on the patent office and maintained and enforced the patent with knowledge of the fraudulent procurement; and second, all the other elements necessary to establish a Sherman Act monopolization claim." *TransWeb, LLC v. 3M Innovative Props. Co., 812 F.3d 1295, 1306 (Fed. Cir. 2016)*. "To state an antitrust claim of monopolization under *§ 2* of the Sherman Act, a plaintiff must show: '(a) the possession of monopoly power in the relevant market; (b) the willful acquisition or maintenance of that power; and (c) causal antitrust injury.'" *Unigestion Holdings, S.A. v. UPM Tech., Inc., 412 F. Supp. 3d 1273, 1284 (D. Or. 2019)* (quoting *Somers v. Apple, Inc., 729 F.3d 953, 963 (9th Cir. 2013)*).

Prolacta argues that there are disputed issues of material fact on all the elements of Ni-Q's *Walker Process* antitrust claim—whether Prolacta engaged in the requisite fraud, whether Prolacta has monopoly power in an appropriately defined relevant market, and whether there is antitrust **[*10]** injury. Because the Court finds that there is a disputed issue of material fact on the definition of the relevant market, the Court need not reach Prolacta's remaining arguments.

HN6[] A relevant antitrust market consists of all products that are "reasonably interchangeable by consumers for the same purposes." *United States v. E. I. du Pont de Nemours & Co., 351 U.S. 377, 395, 76 S. Ct. 994, 100 L. Ed. 1264 (1956)*; *see also* *Kaplan v. Burroughs Corp., 611 F.2d 286, 291 (9th Cir. 1979)* ("The principle most fundamental to product market definition is 'cross-elasticity of demand' for certain products or services. Commodities which are 'reasonably interchangeable' for the same or similar uses normally should be included in the same product market for antitrust purposes."). "Reasonable interchangeability" may be determined by looking at price, use, and qualities of the products. *E. I. du Pont, 351 U.S. at 404*. "Ultimately what constitutes a relevant market is a factual determination for the jury." *Image Tech. Servs., Inc. v. Eastman Kodak Co., 125 F.3d 1195, 1203 (9th Cir. 1997)*; *see also* *Apple Inc. v. Psystar Corp., 586 F. Supp. 2d 1190, 1196 (N.D. Cal. 2008)* ("The definition of an antitrust 'relevant market' is typically a factual rather than a legal inquiry, but certain legal principals govern the definition." (citing *Newcal Indus., Inc. v. Ikon Office Sol., 513 F.3d 1038, 1045 (9th Cir. 2008)*).

---

[4] Fact discovery closed on July 31, 2020. Ni-Q disclosed its new asserted relevant market to Prolacta on August 27, 2020, through Supplemental Interrogatory responses. Ni-Q filed its motion for summary judgment on its antitrust claim on September 18, 2020.

Ni-Q argues that the relevant market is a submarket of milk products, or even human breast milk, that is bought to feed to neonates and must contain all three attributes that Prolacta has included in the '921 Patent—standardized **[*11]** nutrients, DNA matching, and human breast milk. Focusing on "technological, rather than economic, substitution is," however, "a fatal flaw in establishing [the] proposed market definition." *Unitherm Food Sys., Inc. v. Swift-Eckrich, Inc., 375 F.3d 1341, 1364 (Fed. Cir. 2004)*, *rev'd on other grounds*, *546 U.S. 394, 126 S. Ct. 980, 163 L. Ed. 2d 974 (2006)*. Additionally, the evidence shows that there are material disputes about whether Ni-Q's proposal is a proper submarket definition.

At its essence, Ni-Q's argument and evidence relating to relevant market definition is that Prolacta "DNA-matches" when no other supplier of human breast milk does so and that some customers are willing, at least on occasion, to pay a premium for Prolacta's DNA-matched products. From this, Ni-Q asserts that it has provided a proper definition of a relevant submarket. If the issue before the Court was whether such a proposed definition is sufficient to withstand a motion to dismiss, Ni-Q would likely prevail. That is not, however, the current procedural posture. Ni-Q, as the plaintiff in an antitrust claim, is seeking summary judgment in its favor. Thus, the relevant question is whether, as a matter of law, Ni-Q's proposed market definition is the only reasonable definition supported by the facts or whether a jury must decide the most appropriate **[*12]** market definition supported by the facts. ***HN7***[] Moreover, at summary judgment, the Court must view the facts in the light most favorable to the nonmoving party and resolve all reasonable inferences in favor of the nonmoving party. This presents a very steep burden for Ni-Q at this stage of the proceedings.

Ni-Q appears to argue (or assume) that any patented product that is mildly commercially successful must be in a unique (and single-seller) market for purposes of the antitrust laws. That is not, however, how markets are defined under the antitrust laws. *Accord* *In re Live Concert Antitrust Litig., 863 F. Supp. 2d 966, 993 (C.D. Cal. 2012)* (finding that the expert's analysis of the relevant product market "failed to provide any meaningful discussion as to whether and how any such indicia are 'economically significant' in this particular case" and instead "essentially boils down to: plenty of people (including consumers and industry participants) recognize 'rock' as a type of music; therefore, the relevant market in this case is comprised of 'live rock music concerts'"). Ni-Q's proposed market definition (even for a submarket) ignores record evidence that *consumers* consider donated human breast milk products, whether pasteurized, sterilized, "DNA-matched," or with standardized **[*13]** nutrition or fortified after purchase, all to be reasonably interchangeable. For example, Dr. William Rhine, of Lucile Salter Packard Children's Hospital at Stanford University, an expert who has submitted declarations on behalf of Prolacta on the benefits of human breast milk, standardized nutrients, and DNA tested breast milk, testified at deposition that his hospital uses donated breast milk from the Human Milk Banking Association of North America (HMBANA), and fortifies it. ECF 219-9 at 6-8. Additionally, Ni-Q's designated corporate representative at Ni-Q's deposition under *Rule 30(b)(6)* testified that HMBANA milk that is fortified meets the standard of care in the industry. ECF 220-1 at 28-29. He also testified that customers view all donated breast milk, including through HMBANA, as "equal," "substitutes," the "same across the board," and that customers "believe that if they are getting milk from a HMBANA bank that it's the same as milk as Prolacta, that it's the same milk from Ni-Q." *Id.* at 44-46; *see also* ECF 206 at 2 (Ni-Q's Chief Executive Officer explaining in his Declaration that hospitals that want to "feed babies a human milk diet" can choose milk from HMBANA, Prolacta, Ni-Q, or Medolac). **[*14]** Indeed, the evidence shows that by far HMBANA has the largest market share of sales of donated human breast milk. HMBANA milk is pasteurized but not sterilized or DNA tested, and it does not have standardized nutrition. That some customers, on some occasions, might prefer and buy human breast milk that is sterilized or DNA-matched and has standardized nutrition does not mean that it is undisputed that all three attributes constitute a relevant submarket for antitrust purposes. The key question is whether consumers consider these breast milk products to be reasonably interchangeable, at least depending upon respective prices. The whole point of defining a relevant market (or submarket) for antitrust purposes is to determine which products have the ability or potential to assert a competitive influence on the pricing decisions of the products of an antitrust defendant. "A firm with market power can profitably increase its price above the competitive level for a sustained period of time." ABA ***ANTITRUST LAW*** SECTION, Monopolization and Dominance Handbook 7 (2d ed. 2021).

Ni-Q also ignores evidence in the record that the sterilization of breast milk performed by Ni-Q and Medolac replaces **[*15]** the DNA matching performed by Prolacta and renders that attribute unnecessary and broadening the correct market definition. Thus, there is an issue of fact whether human breast milk that is sterilized is reasonably interchangeable with human breast milk that is DNA-matched, even if standardized nutrition were an appropriate attribute for a submarket.

Moreover, Ni-Q relies on Prolacta's pricing to argue monopolization, but the evidence on pricing is disputed and ambiguous. The evidence shows that some of Prolacta's pricing is high but sometimes it is discounted and sometimes Ni-Q has higher pricing than Prolacta on some products. HMBANA, however, has much lower prices, and the evidence does not show that Prolacta can unilaterally price its products however it likes based on monopoly power. Indeed, Prolacta lowered its prices because of pricing pressure from HMBANA's products.

Viewed in the light most favorable to the nonmoving party, the evidence shows that consumers of Prolacta's products have alternatives in human breast milk products from Ni-Q, Medolac, and HMBANA.[5] This is sufficient to show a genuine dispute on the question of market definition. Although Prolacta's products may have **[*16]** some different attributes, "where there are market alternatives that buyers may readily use for their purposes, illegal monopoly does not exist merely because the product said to be monopolized differs from others." *E.I. du Pont, 351 U.S. at 394*.

Ni-Q also argues that its proposed submarket definition is proper under *Brown Shoe Co. v. United States, 370 U.S. 294, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)*. ***HN8***[] In *Brown Shoe*, the Supreme Court explained that within a broad market, well-defined submarkets may exist that themselves constitute markets for antitrust purposes. *Id. at 325*. "The boundaries of such a submarket may be determined by examining such practical indicia as industry or public recognition of the submarket as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors." *Id.* The Ninth Circuit, however, has "repeatedly noted that the *Brown Shoe* indicia are practical aids for identifying the areas of actual or potential competition and that their presence or absence does not decide automatically the submarket issue." *Thurman Indus., Inc. v. Pay 'N Pak Stores, Inc., 875 F.2d 1369, 1375 (9th Cir. 1989)*. Instead, "[w]hether isolating a submarket is justified turns ultimately upon whether the factors used to define the submarket are 'economically significant.'" **[*17]** *Id.* There are questions of fact for the jury to decide.

A review of the *Brown Shoe* factors shows that they do not support finding Ni-Q's proposed submarket is the only properly defined market (or even submarket), which is required for Ni-Q to prevail at summary judgment. The first factor, public recognition of a separate submarket, is not undisputed. Indeed, there is no evidence in the record, let alone undisputed evidence, that customers or suppliers consider DNA-matched, nutrient standardized human breast milk to be its own relevant submarket. Instead, as previously discussed, the evidence shows that customers view human breast milk products interchangeably. There also is evidence that suppliers, including both Ni-Q and Prolacta, consider HMBANA to be a primary competitor. *See, e.g.*, ECF 220-1 at 31-32 (Ni-Q's corporate designee discussing HMBANA, Prolacta, and Medolac as Ni-Q's competitors); ECF 204 at 5 (Ni-Q stating that Prolacta "regards HMBANA as its primary competitor"); ECF 205-1 at 4 (Prolacta's corporate designee testifying that Prolacta competes with HMBANA).

The second factor, the product's peculiar characteristics and uses, also involves disputed issues of material fact. **[*18]** As noted, there is evidence that sterilization replaces DNA matching. This supports the conclusion that any potential submarket would include at least products that are *either* DNA-matched or sterilized candidates. There also is some evidence that consumers do not find the attributes of sterilization or DNA matching, or nutrient standardization, economically significant. That suggests there should be no submarket for a premium donated breast milk containing any of these attributes. *See, e.g., In re Super Premium Ice Cream Distrib. Antitrust Litig., 691 F. Supp. 1262, 1268 (N.D. Cal. 1988)*, *aff'd sub nom Haagen-Dazs Co. v. Double Rainbow Gourmet Ice Creams, Inc., 895 F.2d 1417 (9th Cir. 1990)* (Table). Thus, there are disputed issues of fact regarding this factor and it does not support Ni-Q's proposed submarket definition.

---

[5] Consumers also may have reasonable alternatives to Prolacta's products from formula based on cow's milk, although there is a stronger argument that those alternatives could be considered part of a separate product market.

For the third factor, unique production facilities, Ni-Q does not provide argument or evidence that Prolacta's facilities are unique. For the fourth factor, distinct customers, Ni-Q does not argue, let alone provide undisputed evidence, that Prolacta's customers are distinct from other breast milk customers. The customers are the same—neonatal intensive care units and similar facilities and their patients. At most, Ni-Q shows that at least some of these customers are willing some of the time to pay more for Prolacta's products. But these are the same **[*19]** customers who also purchase Ni-Q's, Medolac's, and HMBANA's products. Ni-Q does not argue, or provide evidence, that it is undisputed that there is a subset of customers for whom Prolacta's products are the *only reasonable* alternative. *See, e.g.*, ECF 218 at 20-25 (Declaration of Margaret E. Guerin-Calvert, President and Senior Managing Director of FTI Consulting, Inc.'s Center for Healthcare Economics and Policy, Prolacta's economics expert, explaining how Prolacta's customers are not captive).

For the fifth factor, distinct prices, Ni-Q relies on the fact that Prolacta's list prices are higher than Ni-Q's and Medolac's. Ni-Q argues that the fact that Prolacta charges higher prices means that it monopolizes the market. As noted, the price information is not as clear as presented by Ni-Q; both Ni-Q and Prolacta have a range of prices. ***HN9***[] Further, "the scope of the relevant market is not governed by the presence of a price differential between competing products." *Twin City Sportserv., Inc. v. Charles O. Finley & Co., 512 F.2d 1264, 1274 (9th Cir. 1975)*.

For the sixth factor, sensitivity to price changes, Ni-Q does not provide any economic evidence that Prolacta's prices are not sensitive to price changes. Ni-Q argues that it does not need economic evidence because Prolacta charges **[*20]** higher prices. That, however, is not the question. ***HN10***[] For this factor, courts "typically consider whether a sufficient number of customers would switch to other technologies in response to a price increase. If enough customers switch, then [the product does] not constitute an independent market." *DSM Desotech Inc. v. 3D Sys. Corp., 749 F.3d 1332, 1343-44 (Fed. Cir. 2014)*. Here, the evidence shows that changes in the prices charged by Prolacta for its products can, and do, cause customers to switch to those other products. Ni-Q admits that Prolacta lowered its prices to better compete with HMBANA, and Prolacta's corporate designee testified to that fact. *See, e.g.*, ECF 205-1 at 12 (Prolacta's corporate designee testifying that market for Prolacta's products is a "price-sensitive market" and that Prolacta lowered its prices in 2016 after conducting a market survey and "consider[ing] HMBANA's pricing"); *accord* ECF 218 at 23 (Prolacta's economics expert discussing how a large percentage of Prolacta's customers switched to purchasing competitors' products between 2016 and June 2020). Thus, it is a disputed issue of fact whether a price increase of Prolacta's products would cause customers to switch to competitor's products.

For the seventh factor, distinct vendors, **[*21]** Ni-Q argues that the vendors are distinct because HMBANA does not standardize nutrition or match DNA and Ni-Q and Medolac do not match DNA. That argument relates to the *product's* peculiar characteristics. Ni-Q does not argue or present evidence that the *vendors* are distinct.

As noted, at summary judgment the facts must be viewed in the light most favorable to the nonmoving party, which is Prolacta. Ni-Q has not met its burden of proving a relevant market (or even submarket) as a matter of law. *See, e.g.*, ECF 218 at 1-25 (Prolacta's economics expert explaining why Ni-Q's proposed market definition is an improper antitrust market definition). A jury will need to decide that question.

CONCLUSION

The Court DENIES Plaintiff's Motion for Leave to File a Supplemental Complaint (ECF 236). The Court DENIES AS MOOT Plaintiff's Motion for Summary Judgment that U.S. Patent No. 8,628,921 is Unenforceable Due to Inequitable Conduct (ECF 201). The Court DENIES Plaintiff's Motion for Summary Judgment as to Its Sherman Antitrust Act Claim (ECF 204).

IT IS SO ORDERED.

DATED this 26th day of July, 2021.

/s/ Michael H. Simon

Michael H. Simon

United States District Judge

Ruiz v. Celsius Holdings

United States District Court for the Southern District of California

July 27, 2021, Decided; July 28, 2021, Filed

Case No.: 3:21-cv-00128-GPC-KSC

Reporter

2021 U.S. Dist. LEXIS 235986 *; 2021 WL 5811264

JIMY RUIZ and MICHAEL CAVALLERO on behalf of themselves and all others similarly situated, Plaintiffs, v. CELSIUS HOLDINGS, INC., Defendant.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN1[] Motions to Dismiss, Failure to State Claim

Fed. R. Civ. P. 12(b)(6) permits dismissal for failure to state a claim upon which relief can be granted. Fed. R. Civ. P. 12(b)(6). Dismissal under Rule 12(b)(6) is appropriate where the complaint lacks a cognizable legal theory or sufficient facts to support a cognizable legal theory. Under Fed. R. Civ. P. 8(a)(2), the plaintiff is required only to set forth a short and plain statement of the claim showing that the pleader is entitled to relief, and give the defendant fair notice of what the claim is and the grounds upon which it rests.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN2[] Motions to Dismiss, Failure to State Claim

A complaint may survive a motion to dismiss only if, taking all well-pleaded factual allegations as true, it contains enough facts to state a claim to relief that is plausible on its face. A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged. Threadbare recitals of the elements of a cause of action, supported by mere conclusory statements, do not suffice. In sum, for a complaint to survive a motion to dismiss, the non-conclusory factual content, and reasonable inferences from that content, must be plausibly suggestive of a claim entitling the plaintiff to relief.

Civil Procedure > ... > Justiciability > Standing > Injury in Fact

Constitutional Law > ... > Case or Controversy > Standing > Elements

HN3[] Standing, Injury in Fact

U.S. Const. art. III, § 2 the United States Constitution requires that a plaintiff have standing to bring a claim. The irreducible constitutional minimum of Article III standing requires that the plaintiff must have (1) suffered an injury in fact, (2) that is fairly traceable to the challenged conduct of the defendant, and (3) that is likely to be redressed by a favorable judicial decision. To establish injury in fact, a plaintiff must show that he or she suffered an invasion of a legally protected interest that is concrete and particularized and actual or imminent, not conjectural or hypothetical. The Supreme Court noted that concreteness is quite distinct from particularization. An injury is particularized if it affects the plaintiff in a personal and individual way. In addition, for an injury to be concrete, it must be de facto, meaning that it is real and not abstract. However, an injury need not be tangible in order to be concrete, and intangible injuries may constitute injury in fact. Economic injury is clearly a sufficient basis for standing. Certainly, an economic injury qualifies as a concrete injury.

Civil Procedure > ... > Justiciability > Standing > Burdens of Proof

Constitutional Law > ... > Case or Controversy > Standing > Elements

Evidence > Burdens of Proof > Allocation

HN4[] Standing, Burdens of Proof

The plaintiff bears the burden of demonstrating the elements of U.S. Const. art. III standing. At the pleading stage, the plaintiff must clearly allege facts demonstrating each element. In a class action, U.S. Const. art. III standing is met at the motion to dismiss stage if at least one named plaintiff satisfies the requirements.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN5[] Class Actions, Certification of Classes

At the pleading stage in a putative class action, a plaintiff's claims related to products that are substantially similar to the product purchased by the plaintiff should not be dismissed for lack of standing.

Governments > Courts > Authority to Adjudicate

HN6[] Courts, Authority to Adjudicate

As statutory standing is not jurisdictional, the Court need not reach the issue sua sponte.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Mistake

HN7[] **Heightened Pleading Requirements, Fraud Claims**

Where a claim alleges fraud or is grounded in fraud, *Fed. R. Civ. P. 9(b)* requires a plaintiff to state with particularity the circumstances constituting fraud or mistake. *Fed. R. Civ. P. 9(b)*. However, malice, intent, knowledge, and other conditions of a person's mind may be alleged generally. A party must set forth the time, place, and specific content of the false representations as well as the identities of the parties to the misrepresentation.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN8[] **Heightened Pleading Requirements, Fraud Claims**

Allegations of fraud must be specific enough to give defendants notice of the particular misconduct which is alleged to constitute the fraud charged so that they can defend against the charge and not just deny that they have done anything wrong. Particularity requires plaintiff to allege the who, what, when, where, and how of the alleged fraudulent conduct. In addition, the complaint must state what is false or misleading about a statement, and why it is false.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

HN9[] **Heightened Pleading Requirements, Fraud Claims**

Fed. R. Civ. P. 9(b)'s requirements apply to state law claims grounded in fraud.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Mistake

HN10[] **Heightened Pleading Requirements, Fraud Claims**

Under *Fed. R. Civ. P. 9(b)*, knowledge may be alleged generally. *Fed. R. Civ. P. 9(b)*.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN11[] **Deceptive & Unfair Trade Practices, State Regulation**

A plaintiff must adequately allege the defendant was aware of a product defect in order to state a Consumer Legal Remedies Act claim arising from the defendant's failure to disclose that defect, because a seller generally has no duty to disclose defects of which it is not aware.

Antitrust & Trade Law > Consumer Protection > False Advertising > State Regulation

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN12[] False Advertising, State Regulation

The reasonable consumer standard applies to a plaintiffs' claims under the California Unfair Competition Law, False Advertising Law, Consumer Legal Remedies Act, and General Business Law (GBL). Under the reasonable consumer standard, a plaintiff must show that members of the public are likely to be deceived. The materially misleading prong of GBL claims requires that the act is likely to mislead a reasonable consumer acting reasonably under the circumstances. This requires more than a mere possibility that the label might conceivably be misunderstood by some few consumers viewing it in an unreasonable manner. Whether a business practice is deceptive will usually be a question of fact not appropriate for decision at the motion to dismiss stage.

Business & Corporate Compliance > ... > Contracts Law > Breach > Breach of Warranty

Commercial Law (UCC) > ... > Contract Provisions > Warranties > Express Warranties

Torts > Products Liability > Theories of Liability > Breach of Warranty

Business & Corporate Compliance > ... > Contracts Law > Contract Conditions & Provisions > Express Warranties

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Express Warranties

HN13[] Breach, Breach of Warranty

Cal. Com. Code § 2313 defines an express warranty. In short, an express warranty is a contractual promise from the seller that the goods conform to the promise. To prevail on a breach of express warranty claim under California law, a plaintiff must prove that (1) the seller's statements constitute an affirmation of fact or promise or a description of the goods, (2) the statement was part of the basis of the bargain, and (3) the warranty was breached. Product packaging may serve as part of an express warranty. Typically, whether the label actually provided a warranty and is likely to deceive a consumer are not appropriate questions to decide on a dismissal motion.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

Torts > Business Torts > Unfair Business Practices > Elements

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN14[] State Regulation, Claims

A business act or practice may violate the California Unfair Competition Law (UCL) if it is either unlawful, unfair, or fraudulent. Each of these three adjectives captures a separate and distinct theory of liability. The unlawful prong incorporates other laws and treats violations of those laws as unlawful business practices independently actionable under the UCL. As to the unfair prong, an unfair business practice is one that either offends an established public policy or is immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers. To state a claim under the fraudulent prong of the UCL, a plaintiff must allege that members of the public are likely to be deceived by the defendant's acts.

Antitrust & Trade Law > Consumer Protection > Deceptive Labeling & Packaging > Federal Food, Drug & Cosmetic Act

HN15[] **Deceptive Labeling & Packaging, Federal Food, Drug & Cosmetic Act**

The FDCA explicitly provides that a dietary supplement shall be deemed to be a food within the meaning of the FDCA subject to certain exceptions. *21 U.S.C.S. § 321(ff)*.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices

HN16[] **Consumer Protection, Deceptive & Unfair Trade Practices**

While an antitrust violation describes one variety of unfair business practice, case law relating to antitrust injury is limited to actions based on unfairness to competitors. For actions between competitors, an unfair practice must be tied to a legislatively declared policy.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices

HN17[] **Consumer Protection, Deceptive & Unfair Trade Practices**

To determine whether a practice is unfair, the court must weigh the utility of the defendant's conduct against the gravity of the harm to the alleged victim.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > False Advertising > State Regulation

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Antitrust & Trade Law > Consumer Protection > Deceptive Labeling & Packaging > State Regulation

HN18[] **Trade Practices & Unfair Competition, State Regulation**

California's False Advertising Law prohibits any unfair, deceptive, untrue, or misleading advertising. *Cal. Bus. & Prof. Code § 17500*. California laws prohibit not only advertising which is false, but also advertising which, although true, is either actually misleading or which has a capacity, likelihood or tendency to deceive or confuse the public.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Antitrust & Trade Law > Consumer Protection > Deceptive Labeling & Packaging > State Regulation

HN19[] **Trade Practices & Unfair Competition, State Regulation**

The Consumer Legal Remedies Act (CLRA) prohibits particular unfair and deceptive acts and practices in a transaction intended to result or which results in the sale or lease of goods or services to any consumer. *Cal. Civ. Code § 1770(a)*. Conduct that is likely to mislead a reasonable consumer violates the CLRA.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN20[] **Deceptive & Unfair Trade Practices, State Regulation**

A plaintiff must demonstrate actual reliance on the unfair or deceptive act to succeed in a claim under the Consumer Legal Remedies Act.

Antitrust & Trade Law > Consumer Protection > False Advertising > State Regulation

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN21[] **False Advertising, State Regulation**

Under the New York General Business Law, deceptive acts or practices and false advertising in the conduct of any business, trade or commerce or in the furnishing of any service in New York state are unlawful. *N.Y. Gen. Bus. Law § 349(a)*, *§ 350*. To successfully assert a claim under *N.Y. Gen. Bus. Law § 349(h)* or *§ 350*, a plaintiff must allege that a defendant has engaged in (1) consumer-oriented conduct that is (2) materially misleading and that (3) plaintiff suffered injury as a result of the allegedly deceptive act or practice.

Business & Corporate Law > Distributorships & Franchises > Disclosure & Registration > Requirements

Governments > Legislation > Statutory Remedies & Rights

HN22[] **Disclosure & Registration, Requirements**

N.Y. Gen. Bus. Law § 349(h) provides a private right of action. *N.Y. Gen. Bus. Law § 349(h)*. The private right of action for *§ 350* claims is provided in *§ 350-e*. *N.Y. Gen. Bus. Law § 350-e(1)*.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN23[] **Deceptive & Unfair Trade Practices, State Regulation**

A *N.Y. Gen. Bus. Law § 349* or *§ 350* claim will not lie where the deceptive act itself was the only injury, such as when a plaintiff alleges she was deceived into making a purchase and merely seeks a refund of the purchase price. Aside from reliance requirement, *§ 350* standard is identical to *§ 349*. However, the New York Court of Appeals has left open the possibility that a plaintiff might have a claim for the higher price the consumer paid for the product as a result of the misrepresentation. A plaintiff therefore may satisfy the injury requirement by articulating a price premium theory, or alleging that the deceptive practice caused her to pay more than the product was actually worth.

Opinion

ORDER: (1) DENYING DEFENDANT'S MOTION TO DISMISS; AND (2) DENYING AS MOOT PLAINTIFFS' APPLICATION TO FILE SUR-REPLY [ECF No. 20.]

Before the Court is Defendant **[*2]** Celsius Holdings, Inc.'s Motion to Dismiss the First Amended Complaint of Plaintiff Jimy Ruiz and Michael Cavallero. ECF No. 20. The motion has been fully briefed. ECF Nos. 25, 26. The Court finds the motion suitable for disposition without a hearing pursuant to Civil Local Rule 7.1(d)(1). For the reasons set forth below, the Court **DENIES** Defendant's motion to dismiss and also **DENIES AS MOOT** Plaintiffs' application to file a sur-reply.

I. BACKGROUND[1]

Plaintiffs Jimy Ruiz and Michael Cavallero ("Plaintiffs") are individuals residing in Chula Vista, California and White Plains, New York, respectively, who were frequent purchasers of the "healthy energy" drink products sold by Defendant Celsius Holdings, Inc. ("Defendant"). ECF No. 13 ("FAC") ¶¶ 2, 5, 11, 19. Defendant manufactures, markets, advertises, and sells beverages that tout healthful ingredients as compared to competing energy drinks. *Id.* ¶¶ 2 -3. The front labels on the beverages feature a name, such as "Sparkling Orange," and an image (or vignette) of the fruit identified by the name. *Id.* ¶¶ 5, 36. However, the beverages do not contain the ingredient reflected in the name and vignette, but rather "natural flavor." *Id.* ¶ 6. Plaintiffs purchased Defendant's **[*3]** beverages that featured names such as Sparkling Orange, Peach Mango Green Tea, Sparkling Grape Rush, and Sparkling Strawberry Guava, believing that the beverages contained the fruits depicted by the name and vignette. *Id.* ¶¶ 12-13, 20-21. Plaintiffs would not have purchased Defendant's beverages or would not have paid as much for them had they known that the beverages did not include the depicted fruits, and thus lost money as a result of the alleged misrepresentation. *Id.* ¶¶ 16, 24, 80.

On January 22, 2021, Plaintiffs filed their initial putative class action complaint. ECF No. 1. On March 26, 2021, Defendant filed a motion to dismiss. ECF No. 10. On April 16, 2021, Plaintiffs filed their First Amended Complaint ("FAC"), asserting putative class claims on behalf of themselves and other consumers for (1) breach of express warranty, *Cal. Comm. Code § 2313*; (2) unlawful business practices in violation of the California Unfair Competition Law ("UCL"), *Cal. Bus. & Prof. Code § 17200 et seq.*; (3) unfair business practices in violation of the UCL; (4) fraudulent business practices in violation of the UCL; (5) false advertising in violation of the False Advertising Law ("FAL"), *Cal. Bus. & Prof. Code § 17500 et seq.*; (6) violation of the Consumer Legal Remedies Act ("CLRA"), *Cal.*

---

[1] The factual background in this section is drawn from Plaintiffs' First Amended Complaint.

Civ. Code § 1750 et seq.; (7) violation **[*4]** of New York's Consumer Protection from Deceptive Acts and Practices Law, N.Y. Gen. Bus. Law ("GBL") § 349 et. seq.; (8) violation of New York's Consumer Protection from Deceptive Acts and Practices Law, N.Y. Gen. Bus. Law § 350 et. seq.; and (9) restitution based on quasi-contract/unjust enrichment. FAC ¶¶ 96-156. On May 14, 2021, Defendant filed the instant motion to dismiss the FAC. ECF No. 20.

II. LEGAL STANDARD

HN1[] Federal Rule of Civil Procedure ("Rule") 12(b)(6) permits dismissal for "failure to state a claim upon which relief can be granted." Fed. R. Civ. P. 12(b)(6). Dismissal under Rule 12(b)(6) is appropriate where the complaint lacks a cognizable legal theory or sufficient facts to support a cognizable legal theory. *See* Balistreri v. Pacifica Police Dep't., 901 F.2d 696, 699 (9th Cir. 1990). Under Rule 8(a)(2), the plaintiff is required only to set forth a "short and plain statement of the claim showing that the pleader is entitled to relief," and "give the defendant fair notice of what the . . . claim is and the grounds upon which it rests." Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007).

HN2[] A complaint may survive a motion to dismiss only if, taking all well-pleaded factual allegations as true, it contains enough facts to "state a claim to relief that is plausible on its face." Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009) (quoting Twombly, 550 U.S. at 570). "A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant **[*5]** is liable for the misconduct alleged." *Id.* "Threadbare recitals of the elements of a cause of action, supported by mere conclusory statements, do not suffice." *Id.* "In sum, for a complaint to survive a motion to dismiss, the non-conclusory factual content, and reasonable inferences from that content, must be plausibly suggestive of a claim entitling the plaintiff to relief." Moss v. U.S. Secret Serv., 572 F.3d 962, 969 (9th Cir. 2009) (citations omitted).

III. DISCUSSION

Defendant moves to dismiss the FAC in its entirety on the basis of lack of standing, failure to comply with Rule 9(b), and failure to state a claim. Plaintiffs oppose.

A. Standing

HN3[] Article III, Section 2 the United States Constitution requires that a plaintiff have standing to bring a claim. *See* Lujan v. Defenders of Wildlife, 504 U.S. 555, 560, 112 S. Ct. 2130, 119 L. Ed. 2d 351 (1992). "[T]he 'irreducible constitutional minimum of [Article III] standing'" requires that "[t]he plaintiff must have (1) suffered an injury in fact, (2) that is fairly traceable to the challenged conduct of the defendant, and (3) that is likely to be redressed by a favorable judicial decision." Spokeo, Inc. v. Robins, 578 U.S. 330, 136 S. Ct. 1540, 1547, 194 L. Ed. 2d 635 (2016) (citing Lujan, 504 U.S. at 560). "To establish injury in fact, a plaintiff must show that he or she suffered 'an invasion of a legally protected interest' that is 'concrete and particularized' and 'actual or imminent, not conjectural or hypothetical.'" Id. at 1548 (quoting Lujan, 504 U.S. at 560). The Supreme Court noted that **[*6]** concreteness is quite distinct from particularization. *Id.* An injury is "particularized" if it affects "the plaintiff in a personal and individual way." *Id.* In addition, for an injury to be "concrete", it must be "de facto," meaning that it is "real" and not "abstract." *Id.* However, an injury need not be "tangible" in order to be "concrete," and intangible injuries may constitute injury in fact. Id. at 1549. "Economic injury is clearly a sufficient basis for standing." San Diego Cnty. Gun Rights Committee v. Reno, 98 F.3d 1121, 1130 (9th Cir. 1996); Debernardis v. IQ Formulations, LLC, 942 F.3d 1076, 1084 (11th Cir. 2019) ("Certainly, an economic injury qualifies as a concrete injury.").

HN4[] The plaintiff bears the burden of demonstrating the elements of Article III standing. Spokeo, Inc., 136 S. Ct. at 1547. At the pleading stage, the plaintiff "must 'clearly . . . allege facts demonstrating' each element." *Id.* (quoting Warth v. Seldin, 422 U.S. 490, 518, 95 S. Ct. 2197, 45 L. Ed. 2d 343 (1975)). In a class action, Article III standing is met at the motion to dismiss stage if at least one named plaintiff satisfies the requirements. *Bates v. United Parcel Serv., Inc., 511 F.3d 974, 985 (9th Cir. 2007)*.

Defendant disputes that Plaintiffs have met any of the three Article III standing requirements. ECF No. 20-1 at 13-15. As to the injury in fact requirement, Plaintiffs allege that they suffered economic injury because they paid more for the beverages than they otherwise would have, believing that the beverages contained real fruit as a result of **[*7]** Defendant's labeling. FAC ¶¶ 75, 77, 80. Defendant argues that a conclusory allegation that a consumer paid more than she believes she should have does not suffice to demonstrate injury. ECF No. 20-1 at 15 (citing *McGee v. S-L Snacks National, 982 F.3d 700, 710 (9th Cir. 2020)*). But *McGee* stands for the opposite of what Defendant suggests, as it notes that the Ninth Circuit "has consistently recognized that a plaintiff can satisfy the injury in fact requirement by showing that she paid more for a product than she otherwise would have due to a defendant's false representations about the product." *McGee, 982 F.3d at 706*. The Ninth Circuit distinguished the allegations in *McGee* from this line of cases because the plaintiff did not allege the defendant misrepresented the product, causing her to overpay. *Id. at 707*. Plaintiffs here have alleged that they would not have purchased, or would have paid less for, Defendant's beverages if Defendant had not represented that the beverages contained fruit. This is sufficient to establish injury in fact. *See* *Mazza v. Am. Honda Motor Co., 666 F.3d 581, 595 (9th Cir. 2012)* ("To the extent that class members were relieved of their money by Honda's deceptive conduct—as Plaintiffs allege—they have suffered an 'injury in fact.'"); *Pirozzi v. Apple, Inc., 966 F. Supp. 2d 909, 917 (N.D. Cal. 2013)* ("palpable economic injuries have long been recognized as sufficient to lay the basis **[*8]** for standing") (quoting *Sierra Club v. Morton, 405 U.S. 727, 733-34, 92 S. Ct. 1361, 31 L. Ed. 2d 636 (1972)*).

Defendant's arguments regarding traceability and redressability also fail. Although Defendant contends that Plaintiffs only have themselves to blame for paying the alleged price premium, the FAC alleges that the product labeling led Plaintiffs to believe that the beverages contained fruit, and that they relied on this representation when deciding to purchase the product. FAC ¶¶ 74-78. Since the Court must accept as true the allegation that Plaintiffs paid what they did for the beverages because the front labels caused them to believe the beverages contained fruit, whether Plaintiffs have adequately alleged that reliance on the beverage name and vignette was *reasonable* is not a question of causation, but rather of whether Plaintiffs have stated a claim arising from fraud. Further, Plaintiffs' alleged economic injury of overpaying could be redressed by damages or restitution.[2] *See* *Coe v. Philips Oral Healthcare Inc., No. C13-518-MJP, 2014 U.S. Dist. LEXIS 22983, 2014 WL 722501, at *4 (W.D. Wash. Feb. 24, 2014)* (citing *Association of Public Agency Customers v. Bonneville Power Admin., 733 F.3d 939, 954 (9th Cir. 2013)*) ("Without question, the relief sought—compensation for the overpayment—remedies the alleged injury."). Additionally, although not addressed by Defendant, because Plaintiffs are previously deceived consumers who would purchase Defendant's product in the future if the beverages **[*9]** were not misleadingly marketed, they have alleged standing to seek an injunction. *See Davidson v. Kimberly-Clark Corp., 889 F.3d 956, 969-71 (9th Cir. 2018)*; FAC ¶¶ 18, 26, 84.

The Supreme Court's recent decision in *TransUnion* is inapposite.[3] That case held that a plaintiff who "has not suffered any physical, monetary, or cognizable intangible harm traditionally recognized as providing a basis for a lawsuit in American courts" lacks Article III standing even if Congress provides a cause of action to sue for a defendant's violation of law. *TransUnion LLC v. Ramirez, 141 S. Ct. 2190, 2206, 210 L. Ed. 2d 568 (2021)*. Plaintiffs here allege monetary harm in the form of overpayment, a form of injury that the *TransUnion* court noted would confer standing. The fact that Plaintiffs' complaint makes reference to FDCA labeling requirements does not transform them from purchasers that allege monetary loss as a result of alleged deceptive labeling into "unharmed

---

[2] Defendant contends, for the first time on reply, that Plaintiffs have failed to allege an inadequate remedy at law under ***Sonner v. Premier Nutrition Corp., 971 F.3d 834, 944 (9th Cir. 2020)***. ECF No. 26 n.3. Because Defendant raised this issue for the first time on reply, the Court need not consider it. *Zamani v. Carnes, 491 F.3d 990, 997 (9th Cir. 2007)*.

[3] Plaintiffs filed an ex parte application to file a sur-reply on this issue, noting that Plaintiffs agreed that they would not oppose any request by Defendant to file a sur-sur reply. *See* ECF No. 28. Because the Court easily concludes that *TransUnion* does not affect the standing analysis in this case, the Court sees no need to have the parties engage in further briefing. Accordingly, the Court **DENIES AS MOOT** Plaintiffs' ex parte application.

plaintiffs seeking to enforce general compliance with regulatory law."[4] ECF No. 26 at 8; *cf.* *In re Chrysler-Dodge-Jeep Ecodiesel Mktg., Sales Pracs., & Prod. Liab. Litig., 295 F. Supp. 3d 927, 947 (N.D. Cal. 2018)* ("Even if Plaintiffs' claims were tied to EPA and CARB emission standards . . . Plaintiffs allege that they paid money for the Class Vehicles that they would not have otherwise spent but for Defendants' misrepresentations and concealment of material facts.").

While not directly raised by Defendant, **[*10]** because it concerns subject matter jurisdiction, the Court also briefly addresses whether Plaintiffs have standing to pursue claims related to the other "fruit" beverages that they did not personally purchase. "Courts in this circuit have diverged on the question." *Donohue v. Apple, Inc., 871 F. Supp. 2d 913, 921 (N.D. Cal. 2012)* (collecting cases); *see also* *Coe, 2014 U.S. Dist. LEXIS 22983, 2014 WL 722501, at *4*. ***HN5***[] The Court concurs with the majority of district courts to consider this issue and finds that at the pleading stage in a putative class action, a plaintiff's claims related to products that are substantially similar to the product purchased by the plaintiff should not be dismissed for lack of standing. Rather, such issues should be deferred until the class certification stage when the court addresses commonality, typicality, and adequacy. *See* *Donahue, 871 F. Supp. 2d at 922*; *Anderson v. Jamba Juice, 888 F. Supp. 2d 1000, 1005-06 (N.D. Cal. 2012)*. Here, as discussed further below, Plaintiffs allege substantially the same "labeling infirmity" on all of Defendant's "fruit" beverages. FAC ¶ 28. Further, Plaintiffs assert claims for injunctive relief, and they state generally that they would purchase Defendant's beverages in the future should they be able to rely on the labeling, which plausibly includes "fruit" beverages in Defendant's product lines other than the ones they purchased previously. **[*11]** *Id.* ¶¶ 18, 26.

Accordingly, the Court finds that Plaintiffs have adequately alleged standing.[5]

B. *Rule 9(b)*

HN7[] Where a claim alleges fraud or is grounded in fraud, *Rule 9(b)* requires a plaintiff to "state with particularity the circumstances constituting fraud or mistake." *Fed. R. Civ. P. 9(b)*. However, "[m]alice, intent, knowledge, and other conditions of a person's mind may be alleged generally." *Id.* A party must set forth "the time, place, and specific content of the false representations as well as the identities of the parties to the misrepresentation." *Odom v. Microsoft Corp., 486 F.3d 541, 553 (9th Cir. 2007)* (internal quotation marks omitted).

HN8[] Allegations of fraud must be "specific enough to give defendants notice of the particular misconduct which is alleged to constitute the fraud charged so that they can defend against the charge and not just deny that they have done anything wrong." *Semegen v. Weidner, 780 F.2d 727, 731 (9th Cir. 1985)*; *see also* *Cooper v. Pickett, 137 F.3d 616, 627 (9th Cir. 1997)* (noting that particularity requires plaintiff to allege the "who, what, when, where, and how" of the alleged fraudulent conduct). In addition, the complaint must state "what is false or misleading about a statement, and why it is false." *In re GlenFed, Inc. Sec. Litig., 42 F.3d 1541, 1548 (9th Cir. 1994)* (en banc) *superseded by statute on other grounds*, Private Sec. Litig. Reform Act of 1995, *15 U.S.C. § 78u-4(b)(1)*, *as recognized in* *Ronconi v. Larkin, 253 F.3d 423, 429 n.6 (9th Cir. 2001)*.

HN9[] *Rule 9(b)*'s requirements apply to state law claims grounded in fraud. *See* *Vess v. Ciba-Geigy Corp., U.S.A., 317 F.3d 1097, 1103-05 (9th Cir. 2003)* (applying **[*12]** *Rule 9(b)* to UCL and FAL claims to the extent they alleged fraud); *Kearns v. Ford Motor Co., 567 F.3d 1120, 1125 (9th Cir. 2009)* (applying *Rule 9(b)* particularity requirement to UCL and CLRA claims grounded in fraud). Accordingly, Plaintiffs must meet the particularity

[4] Defendant also argues at length that Plaintiffs do not have standing to enforce the FDCA. *E.g.*, ECF No. 26 at 9-12. However, Plaintiffs do not bring a cause of action under the FDCA. Instead, the FDCA is relevant only insofar as Plaintiffs allege it serves as a predicate law for their UCL claim, which the Court discusses *infra*.

[5] Although Plaintiffs address statutory standing for the UCL, FAL, and CLRA claims in their opposition, *see* ECF No. 25 at 12-13, Defendant only raised Article III standing in its motion to dismiss. ***HN6***[] As statutory standing is not jurisdictional, the Court need not reach the issue sua sponte. *Jewel v. Nat'l Sec. Agency, 673 F.3d 902, 907 n.4 (9th Cir. 2011)*.

requirement for their UCL claims (counts two, three, and four), their FAL claim (count five), their CLRA claim (count six), and their New York GBL claims (counts seven and eight)[6] for allegations of fraud.

With respect to the Sparkling Orange beverage, Plaintiffs have successfully identified the "the time, place, and specific content of the false representations as well as the identities of the parties to the misrepresentation." *Odom, 486 F.3d at 553*. Plaintiffs state that they purchased the Sparkling Orange beverage at specified retailers throughout the class period. FAC ¶¶ 12, 20. Plaintiffs allege that Defendant was responsible for marketing and advertising the beverage and creating the label, and that named Plaintiffs viewed the label. *Id.* ¶¶ 2, 6, 12, 13, 20, 21. Moreover, there appears to be no dispute that the label depicted and described by Plaintiffs is substantially similar to the label Defendant currently uses to market the Sparkling Orange beverage, giving Defendant adequate notice of the particular **[*13]** misconduct alleged. *Compare* FAC ¶ 5 *with* ECF No. 20-1 at 8. Plaintiffs have also explained why the front label of the Sparkling Orange beverage is false and misleading. Specifically, Plaintiffs allege that the name and vignette of an orange slice mislead prospective purchasers into thinking that the beverage contains orange when it does not contain orange. FAC ¶¶ 5, 6. Plaintiffs further allege that consumers rely on front-of-package marketing to make their purchasing decisions, citing to studies, and notes that competitor products explicitly indicate that the beverage is "flavored" on the front label if they do not include orange, or actually include the fruit identified. *Id.* ¶¶ 66, 70. While Defendant may disagree that its packaging is misleading to a reasonable consumer, these allegations suffice to put Defendant on notice of how Plaintiffs claim the labeling is false or misleading. *Rule 9(b)* is therefore satisfied with respect to Plaintiffs' allegations regarding the Sparkling Orange beverage. *Cf. In re 5-hour ENERGY Mktg. & Sales Pracs. Litig., No. MDL 13-2438 PSG PLAX, 2014 U.S. Dist. LEXIS 149732, 2014 WL 5311272, at *17 (C.D. Cal. Sept. 4, 2014)* (noting that many courts in California have found similar allegations sufficient to satisfy *Rule 9(b)* in cases alleging label-based fraud).

The parties also dispute whether Plaintiffs have complied with **[*14]** *Rule 9(b)* with respect to the varieties of beverage sold by Defendant, as the FAC primarily discusses the labeling of the Sparkling Orange beverage. ECF No. 20-1 at 19; ECF No. 25 at 14 n.3. Plaintiffs list several other examples of Defendant's beverages that they purchased and allege to have misleading labels, including Peach Mango Green Tea, Sparkling Grape Rush, and Sparkling Strawberry Guava. FAC ¶¶ 12, 20. The FAC also lists the flavors in Defendant's product lines that offer "fruit" beverages "affected by the same labeling infirmity described herein."[7] *Id.* ¶ 28, n.3. By any reasonable reading of the FAC, this alleges that the "fruit" beverages listed feature a front label with the name and vignette of the fruit or fruits identified, leading consumers to believe that the beverage contains the fruit or fruits depicted by the front label when it does not. Plaintiffs therefore allege a consistent misrepresentation across all of the "fruit" beverages named in the FAC, giving Defendant adequate notice of the particular misrepresentations alleged. However, should Plaintiffs wish to assert claims relating to products not identified in the FAC, Plaintiffs must amend their complaint to give Defendant **[*15]** notice of the alleged misrepresentations at issue.

Defendant also argues that Plaintiffs fail to adequately plead Defendant's knowledge of the alleged misrepresentations. ECF No. 20-1 at 19-20. ***HN10***[] Under *Rule 9(b)*, knowledge may be alleged generally. *Fed. R. Civ. P. 9(b)*. Further, Plaintiffs allege that Defendant both manufactured and marketed the product, FAC ¶¶ 2, 6, so it is plausible to conclude that Defendant was aware the beverage did not contain fruit but was marketed with a

---

[6] While the Second Circuit has determined that GBL claims need not meet the *Rule 9(b)* particularity requirement, *see Pelman ex rel. Pelman v. McDonald's Corp., 396 F.3d 508, 511 (2d Cir. 2005)*, its reasoning appears at odds with the Ninth Circuit's decision in *Kearns*, which held that even claims that do not reflect the elements of common law fraud must meet *Rule 9(b)*'s requirements if they are grounded in fraud. *See Keegan v. Am. Honda Motor Co., 838 F. Supp. 2d 929, 958 (C.D. Cal. 2012)*. The Court therefore presumes that *Rule 9(b)* applies to allegations of fraudulent conduct underlying Plaintiffs' GBL claims.

[7] The products identified in the FAC are: Sparkling Peach Vibe, Sparkling Orange, Sparkling Wild Berry, Sparkling Grape Rush, Raspberry Acai Green Tea, Grapefruit Melon Green Tea, Sparkling Fuji Apple Pear, Sparkling Kiwi Guava, Sparkling Watermelon, Peach Mango Green Tea, Jackfruit, Cherry Lime, Strawberry Dragon Fruit, Blueberry Pomegranate, Sparkling Blood Orange Lemonade, Watermelon Berry, Sparkling Grapefruit, Sparkling Orange Pomegranate, and Sparkling Cucumber Lime. FAC ¶ 28 n.3.

label featuring a fruit name and vignette. Plaintiffs need not allege facts regarding Defendant's state of mind with greater specificity than this at the pleading stage.[8]

C. Reasonable Consumer Standard

Defendant's primary argument is that Plaintiffs have failed to adequately plead that a reasonable consumer would be misled by the fruit name and vignette on the front label of Defendant's beverages, given that the beverages advertise "0 Sugar," minimal calories, and do not list the fruit in the ingredients on the back panel. ECF No. 20-1 at 16-18. Plaintiffs argue that what a reasonable consumer would believe is a factual issue inappropriate for adjudication at the motion to dismiss stage, and that the inclusion of an accurate ingredients label **[*16]** does not render consumers' reliance on the front label unreasonable. ECF No. 25 at 18-21.

HN12[] The "reasonable consumer standard" applies to Plaintiffs' claims under the UCL,[9] FAL, CLRA, and GBL. *See* *Freeman v. Time, Inc., 68 F.3d 285, 289-90 (9th Cir. 1995)*; *Williams v. Gerber Prod. Co., 552 F.3d 934, 938 (9th Cir. 2008)*; *Orlander v. Staples, Inc., 802 F.3d 289, 300 (2d Cir. 2015)*. "Under the reasonable consumer standard, [a plaintiff] must 'show that members of the public are likely to be deceived.'" *Williams, 552 F.3d at 938* (quoting *Freeman, 68 F.3d at 289*); *see also* *Orlander, 802 F.3d at 300* (noting that the "materially misleading" prong of GBL claims requires that the act is "likely to mislead a reasonable consumer acting reasonably under the circumstances.") (internal citation omitted). "This requires more than a mere possibility that [the] label 'might conceivably be misunderstood by some few consumers viewing it in an unreasonable manner.'" *Ebner v. Fresh, Inc., 838 F.3d 958, 965 (9th Cir. 2016)* (citation omitted). "[W]hether a business practice is deceptive will usually be a question of fact not appropriate for decision" at the motion to dismiss stage. *Williams, 552 F.3d at 938* (citing *Linear Technology Corp. v. Applied Materials, Inc., 152 Cal. App. 4th 115, 134-35, 61 Cal. Rptr. 3d 221 (2007)*); *Barton v. Pret A Manger (USA) Ltd., 535 F. Supp. 3d 225, 2021 WL 1664319, at *5 (S.D.N.Y. 2021)*.

Plaintiffs' allegations that a reasonable consumer would be deceived by the packaging in this case are similar to those found sufficient in *Williams*. There, the court noted that the product at issue "is called 'fruit juice snacks' and the packaging **[*17]** pictures a number of different fruits, potentially suggesting (falsely) that those fruits or their juices are contained in the product." *Williams, 552 F.3d at 939*. The Ninth Circuit disagreed with the district court's conclusion that no reasonable consumer would be deceived by the representations on the front of the box merely because the ingredients were specifically identified on the side of the box. *Id. at 939-40*. Similarly, Plaintiffs maintain here that the front of the packaging includes a name and picture of fruit, which plausibly suggests that a reasonable consumer may be deceived into thinking the beverage contains fruit. Like the Ninth Circuit found in *Williams*, a reasonable consumer might not "look beyond misleading representations on the front of the [can] to discover the truth from the ingredient list in small print" on the back of the can. *Id. at 939*. Defendant argues that a reasonable consumer would not conclude that a sugar-free, low-calorie beverage contains any fruit, *see* ECF No. 26 at 6, but this is a factual assertion that depends on whether it is commonly known that it is not possible to make a sugar-free, low-calorie drink that includes any amount of fruit. Here, Plaintiffs have alleged facts suggesting that consumers **[*18]** rely on front-of-package representations to make their purchasing decisions, that some seek out products that contain "real" ingredients, and that competing products specifically identify if they are fruit "flavored,"

---

[8] Defendant's argument that Plaintiffs must allege Defendant was aware of a defect at the time of sale for their CLRA claim is unconvincing. *Wilson v. Hewlett-Packard* ***HN11***[] dealt with an alleged fraudulent omission, and stands for the principle that a plaintiff must adequately allege the defendant was aware of a product defect in order to state a CLRA claim arising from the defendant's failure to disclose that defect, because a seller generally has no duty to disclose defects of which it is not aware. *Wilson v. Hewlett-Packard Co., 668 F.3d 1136, 1145 (9th Cir. 2012)*. Plaintiffs adequately allege that Defendant knowingly made an affirmative misrepresentation by marketing the product with the fruit name and vignette despite being aware the product contained no fruit at the time of sale.

[9] Plaintiffs argue that this standard applies to their "unlawful" UCL claims only insofar as the predicate act contains the reasonable consumer test. ECF No. 25 at 18. Because the Court concludes the FAC adequately alleges deception under the reasonable consumer standard, the Court does not resolve this issue.

FAC ¶¶ 49, 66, 70, bolstering their allegation that a reasonable consumer would be deceived. Regardless of whether Plaintiffs will succeed in convincing a factfinder, "[t]he facts of this case . . . do not amount to the rare situation in which granting a motion to dismiss is appropriate" on the issue of whether a business practice is deceptive to a reasonable consumer. *Williams, 552 F.3d at 938-39*.

Accordingly, the Court finds that Plaintiffs have plausibly alleged that a reasonable consumer would be deceived by Defendant's labeling practices.

D. Failure to State a Claim

Defendant also argues that Plaintiffs fail to state a claim for relief for any of the causes of action asserted in the FAC.

1. Count One: Express Warranty

HN13[] *Section 2313* of the California Commercial code defines an express warranty.[10] In short, an express warranty "is a contractual promise from the seller that the goods conform to the promise." *Daugherty v. American Honda Motor Co., Inc., 144 Cal. App. 4th 824, 830, 51 Cal. Rptr. 3d 118 (2006)*. "To prevail on a breach of express warranty claim under California law, a plaintiff must prove that: (1) **[*19]** the seller's statements constitute an affirmation of fact or promise or a description of the goods; (2) the statement was part of the basis of the bargain; and (3) the warranty was breached." *In re ConAgra Foods, Inc., 90 F. Supp. 3d 919, 984 (C.D. Cal. 2015)*, *aff'd sub nom.* *Briseno v. ConAgra Foods, Inc., 674 F. App'x 654 (9th Cir. 2017)*, *and aff'd sub nom.* *Briseno v. ConAgra Foods, Inc., 844 F.3d 1121 (9th Cir. 2017)* (citation omitted). Product packaging may serve as part of an express warranty. *Rosales v. FitFlop USA, LLC, 882 F. Supp. 2d 1168, 1178 (S.D. Cal. 2012)* (citing *Cal. Comm. Code § 2313(b)*); *Baird v. Samsung Elecs. Am., Inc., 522 F. Supp. 3d 679, 2021 WL 1799432, at *3 (N.D. Cal. 2021)*. Typically, "[w]hether the label actually provided a warranty and is likely to deceive a consumer are not appropriate questions to decide on a dismissal motion." *Augustine v. Talking Rain Beverage Co., Inc., 386 F. Supp. 3d 1317, 1332 (S.D. Cal. 2019)* (citation omitted).

The Court finds that Plaintiffs have plausibly alleged that the labeling constituted a "description of the goods" warranting that the beverages **[*20]** contained the fruit identified in the name and depicted by the vignette. *Cal. Comm. Code § 2313(b)*. While Defendant avers that the picture of fruit merely signifies that the beverage is fruit-flavored, it would be premature to decide at this juncture whether a reasonable consumer would view the label as a promise that the beverage contains fruit, or, as Defendant argues, as a promise that the beverage tastes like the fruit. The *McKinnis v. Kellogg* case cited by Defendant is distinguishable. There, the court found that "[a]bsent a representation that Froot Loops contains actual fruit," the plaintiffs failed to state a claim for breach of express warranty where the front of the box included the text "natural fruit flavors" surrounded by small illustrations of fruit. *McKinnis v. Kellogg USA, No. CV07-2611ABC(RCX), 2007 U.S. Dist. LEXIS 96106, 2007 WL 4766060, at *4-5 (C.D. Cal. Sept. 19, 2007)*. The court noted that the term "Froot" was fanciful, not descriptive of the ingredients, and

---

[10] The section provides:

"(1) Express warranties by the seller are created as follows:

(a) Any affirmation of fact or promise made by the seller to the buyer which relates to the goods and becomes part of the basis of the bargain creates an express warranty that the goods shall conform to the affirmation or promise.

(b) Any description of the goods which is made part of the basis of the bargain creates an express warranty that the goods shall conform to the description.

(c) Any sample or model which is made part of the basis of the bargain creates an express warranty that the whole of the goods shall conform to the sample or model.

(2) It is not necessary to the creation of an express warranty that the seller use formal words such as 'warrant' or 'guarantee' or that he have a specific intention to make a warranty, but an affirmation merely of the value of the goods or a statement purporting to be merely the seller's opinion or commendation of the goods does not create a warranty."

that the illustrations of fruit were only included next to the "natural fruit flavors" text, which was permissible under FDA regulations to convey that the product was flavored. *Id.* Here, in contrast, Plaintiffs plausibly allege that the beverage labels include a representation that the beverages contain actual fruit; while Froot Loops promised only "natural fruit flavors," **[*21]** the front label of Defendant's beverages include only the fruit name and vignette and no such clarification that the flavoring is derived from natural flavors. To the extent *McKinnis* suggests that an accurate ingredients panel insulates a defendant from liability, *2007 U.S. Dist. LEXIS 96106, [WL] at *5*, this position is undermined by the Ninth Circuit's decision in *Williams. Williams, 552 F.3d at 939*; *cf. Brady v. Bayer Corp., 26 Cal. App. 5th 1156, 1178, 237 Cal. Rptr. 3d 683 (2018)* (finding plaintiff plausibly alleged that front label for "One A Day" vitamins created express warranty that one gummie would be sufficient for one day's vitamins, even though serving size of two gummies was listed on the back label).

Plaintiffs have also adequately alleged that the warranty that the beverages contained fruit contributed to their purchase of the product, and that the beverages do not in fact contain fruit. Accordingly, the Court DENIES Defendant's motion to dismiss Plaintiffs' claim for breach of express warranty.

2. Counts Two, Three, and Four: UCL

HN14[] A business act or practice may violate the UCL if it is either "unlawful," "unfair," or "fraudulent." *Rubio v. Capital One Bank, 613 F.3d 1195, 1203 (9th Cir. 2010)*. Each of these three adjectives captures "a separate and distinct theory of liability." *Kearns, 567 F.3d at 1127* (citing *S. Bay Chevrolet v. Gen. Motors Acceptance Corp., 72 Cal. App. 4th 861, 85 Cal. Rptr. 2d 301 (1999)*). The unlawful prong incorporates other laws and treats violations of those laws as unlawful **[*22]** business practices independently actionable under the UCL. *Chabner v. United of Omaha Life Ins. Co., 225 F.3d 1042, 1048 (9th Cir. 2000)*. As to the unfair prong, "[a]n unfair business practice is one that either 'offends an established public policy' or is 'immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers.'" *McDonald v. Coldwell Banker, 543 F.3d 498, 506 (9th Cir. 2008)* (quoting *People v. Casa Blanca Convalescent Homes, Inc., 159 Cal.App.3d 509, 530, 206 Cal. Rptr. 164 (1984)*). To state a claim under the fraudulent prong of the UCL, a plaintiff must allege that "members of the public are likely to be deceived" by the defendant's acts. *Sybersound Records, Inc. v. UAV Corp., 517 F.3d 1137, 1152 (9th Cir. 2008)*; *Kearns, 567 F.3d at 1125*.

a. Unlawful (Count Two)

Plaintiffs allege that Defendant's labeling constitutes an unlawful business practice because the labels violate the FDCA, *21 U.S.C. § 301 et seq.* and implementing regulations, as well as California's Sherman Food, Drug, and Cosmetic Law ("Sherman Law"), *Cal. Health & Safety Code § 109875 et seq.*, which incorporates FDCA regulations. FAC ¶¶ 103-112. Plaintiffs point to one regulation, *21 C.F.R. § 101.22*, which regulates how labels are permitted to advertise the characterizing flavor of the product depending on whether the flavor is derived from the characterizing ingredient or from other flavors. *21 C.F.R. § 101.22(i)*. In short, the regulation provides that "[i]f the food is one that is commonly expected to contain a characterizing food ingredient, and . . . the food contains no such ingredient, the name of the characterizing **[*23]** flavor . . . shall be immediately followed by the word 'flavored,'" for instance, "strawberry flavored shortcake." *21 C.F.R. § 101.22(i)(1)(i)*. The regulation also requires that "[i]f none of the natural flavor used in the food is derived from the product whose flavor is simulated, the food . . . shall be labeled either with the flavor of the product from which the flavor is derived or as 'artificially flavored.'" *21 C.F.R. § 101.22(i)(1)(ii)*.

Plaintiffs allege that Defendant's labels characterize the beverages as containing particular fruits, yet do not contain those fruits and do not indicate that the beverage is "flavored" or "artificially flavored." FAC ¶¶ 57-59. This would constitute a violation of the FDCA regulation and thus the Sherman Law, which may serve as a predicate violation constituting an unlawful business practice under the UCL. *See Hilsley v. Gen. Mills, Inc., 376 F. Supp. 3d 1043, 1050 (S.D. Cal. 2019)*. Defendant argues that its product is "a liquid dietary supplement, not a food," and that Plaintiffs fail to allege why it would be commonly expected for the product to contain any particular characterizing food ingredient. ECF No. 20-1 at 23. ***HN15***[] However, the FDCA explicitly provides that "a dietary supplement shall be deemed to be a food within the meaning of" the FDCA subject to certain exceptions. **[*24]** *21 U.S.C. §*

321(ff). Defendant has also not establish that, as a matter of law, beverages labeled with particular fruits would not be commonly expected to contain the fruit.

The Court therefore DENIES Defendant's motion to dismiss the claim under the unlawful prong of the UCL.

b. Unfair (Count Three)

Plaintiffs also allege that the same labeling practice is unfair because it causes significant harm to the consumer that outweighs Defendant's conceivable justifications for the practice. FAC ¶ 116. Defendant argues that its business practice is not unfair because it does not violate the policy or spirit of ***antitrust law***. *See* ECF No. 20-1 at 23.

HN16[] While an antitrust violation describes one variety of unfair business practice, the Ninth Circuit has recognized that case law relating to antitrust injury "was limited to actions based on unfairness to competitors." *Lozano v. AT & T Wireless Servs., Inc., 504 F.3d 718, 735 (9th Cir. 2007)* (noting that for actions between competitors, an unfair practice must be tied to a "legislatively declared" policy). For actions based on unfairness to consumers, "[i]n the absence of further clarification by the California Supreme Court," the Ninth Circuit concluded that such claims may still be analyzed using the more general "balancing test" articulated **[*25]** in *South Bay Chevrolet v. General Motors. Id. at 736* (citing *S. Bay Chevrolet v. Gen. Motors Acceptance Corp., 72 Cal. App. 4th 861, 85 Cal. Rptr. 2d 301 (1999)*); *Hodsdon v. Mars, Inc., 891 F.3d 857, 866 (9th Cir. 2018)* (noting that "the proper definition of 'unfair' conduct against consumers is currently in flux among California courts.") (citation omitted). ***HN17***[] In *South Bay*, the California Court of Appeal explained that to determine whether a practice is unfair, "the court must weigh the utility of the defendant's conduct against the gravity of the harm to the alleged victim." *South Bay, 72 Cal. App. 4th 861, 886, 85 Cal. Rptr. 2d 301 (1999)* (citation omitted); *Davis v. HSBC Bank Nevada, N.A., 691 F.3d 1152, 1169 (9th Cir. 2012)*.

While the Court recognizes the unsettled state of the law regarding the UCL's definition of "unfairness," Defendant has not provided any argument for why the Court should decline to apply the balancing test urged by Plaintiffs. Accordingly, the Court heeds *Lozano*'s suggestion that a district court does "not apply the wrong legal standard by relying on the balancing test from *South Bay*." *Lozano, 504 F.3d at 736*. Plaintiffs have identified the harm to consumers as leading them to pay more money for the product than they otherwise would have absent the misleading labels. Defendant's justification is that it wishes to advertise the flavor of the product. Plaintiffs plausibly allege that Defendant's interest in having a front label that advertises fruit without clarifying that the beverages are merely **[*26]** fruit "flavored" is outweighed by the harm to consumers. *Cf. Beckman v. Arizona Canning Co., LLC, No. 3:16-CV-02792-JAH-BLM, 2019 U.S. Dist. LEXIS 154441, 2019 WL 4277393, at *11 (S.D. Cal. Sept. 9, 2019)* ("Countless food manufactures have successfully displayed and marketed their product without consumer confusion or a likelihood of deception."). Indeed, as Defendant vociferously argues that its "advertising states that the product is orange flavored," ECF No. 20-1 at 26, it does not explain what interest it has in omitting the word "flavored" from the front of the can other than a general disagreement with the FDCA labeling requirements.

Accordingly, the Court DENIES Defendant's motion to dismiss Plaintiffs' claim under the unfair prong of the UCL.

c. Fraudulent (Count Four)

As explained above with respect to the "reasonable consumer" issue, the Court finds that Plaintiffs have adequately alleged that "members of the public are likely to be deceived" by the labels into thinking that the beverages contain fruit.[11] *Sybersound Recs., 517 F.3d at 1152*. Accordingly, the Court DENIES Defendant's motion to dismiss Plaintiffs' claim under the fraudulent prong of the UCL.

---

[11] The case cited by Defendant, *Clark v. Westbrae Natural, Inc.*, is distinguishable because the court found it implausible, based on the facts alleged, that a reasonable consumer would expect the inclusion of the word "vanilla" indicates that the flavor is derived *exclusively* from the vanilla bean. *Clark v. Westbrae Nat., Inc., No. 20-CV-03221-JSC, 2020 U.S. Dist. LEXIS 224966, 2020 WL 7043879, at *3 (N.D. Cal. Dec. 1, 2020)*. Plaintiffs more plausibly allege that a reasonable consumer would believe a drink advertising a particular fruit contains at least some amount of that fruit.

3. Count Five: FAL

HN18[] California's FAL prohibits any "unfair, deceptive, untrue, or misleading advertising." **[*27]** Cal. Bus. & Prof. Code § 17500. "California laws prohibit not only advertising which is false, but also advertising which[,] although true, is either actually misleading or which has a capacity, likelihood or tendency to deceive or confuse the public." Moore v. Mars Petcare US, Inc., 966 F.3d 1007, 1017 (9th Cir. 2020) (citations omitted).

Defendant argues that Plaintiffs have failed to show that Defendant knew or failed to use reasonable care to know their advertising was untrue or misleading. ECF No. 20-1 at 26. But as explained above, Plaintiffs have plausibly alleged that Defendant included the fruit vignette and name on the beverage labels despite knowing that the beverages did not contain the fruit. FAC ¶¶ 6, 28, 35, 37. Plaintiffs have also alleged that Defendant aimed to target more health-conscious consumers with its advertising. *Id.* ¶¶ 31. While Defendant argues that its "advertising states that the product is [fruit] flavored," ECF No. 20-1 at 26, this is not what the packaging says, according to the FAC. It is therefore plausible that Defendant was aware of the misleading nature of the product labeling.

The Court therefore DENIES Defendant's motion to dismiss the FAL claim.

4. Count Six: CLRA

HN19[] The CLRA prohibits particular unfair and deceptive acts and practices in a "transaction **[*28]** intended to result or which results in the sale or lease of goods or services to any consumer." *Cal. Civ. Code § 1770(a)*. "Conduct that is 'likely to mislead a reasonable consumer' violates the CLRA." Wilson v. Hewlett-Packard Co., 668 F.3d 1136, 1140 (9th Cir. 2012) (quoting Colgan v. Leatherman Tool Grp., Inc., 135 Cal. App. 4th 663, 680, 38 Cal. Rptr. 3d 36 (2006)). Plaintiffs allege that Defendant's labeling constitutes a prohibited practice under the CLRA by representing that the goods have ingredients they do not have, *Cal. Civ. Code § 1770(a)(5)*, representing that the goods are of a particular standard, quality, or grade when they are not, *Cal. Civ. Code § 1770(a)(7)*, and advertising goods with the intent not to sell them as advertised, *Cal Civ. Code § 1770(a)(9)*. HN20[] A plaintiff must demonstrate actual reliance on the unfair or deceptive act to succeed in a claim under the CLRA. Cohen v. DIRECTV, Inc., 178 Cal. App. 4th 966, 980, 101 Cal. Rptr. 3d 37 (2009).

Aside from arguments related to the reasonable consumer standard for deception that the Court has already rejected,[12] Defendant contends that Plaintiffs have not stated a CLRA claim because Plaintiffs did not establish actual reliance on the alleged misrepresentations. ECF No. 20-1 at 26. But the FAC alleges that Plaintiff Ruiz believed that the beverages contained fruit as a result of the labeling, and would not have purchased them on the same terms had he known they did not contain fruit. FAC ¶¶ 13, 15, 16. Plaintiffs also allege that the inclusion of "real" **[*29]** ingredients as opposed to natural flavors in food products is a material consideration to many consumers when deciding what products to purchase. *Id.* ¶¶ 48, 49. The FAC therefore sufficiently pleads reliance on the prohibited acts.

Thus, the Court DENIES Defendant's motion to dismiss Plaintiffs' CLRA claim.

5. Counts Seven and Eight: GBL

HN21[] Under the New York GBL, "[d]eceptive acts or practices" and "[f]alse advertising in the conduct of any business, trade or commerce or in the furnishing of any service in" New York state are unlawful. N.Y. Gen. Bus. Law §§ 349(a), 350. "To successfully assert a claim under General Business Law § 349(h)[13]] or § 350, a plaintiff must allege that a defendant has engaged in (1) consumer-oriented conduct that is (2) materially misleading and that (3) plaintiff suffered injury as a result of the allegedly deceptive act or practice." Koch v. Acker, Merrall & Condit

[12] Because Plaintiffs plausibly allege Defendant engaged in a prohibited act under ***Section 1770(a)(5)***, representing the goods have an ingredient they do not have, the Court does not reach Plaintiffs' alternative theories under the CLRA.

[13] HN22[] Section 349(h) provides a private right of action. N.Y. Gen. Bus. Law § 349(h). The private right of action for Section 350 claims is provided in Section 350-e. N.Y. Gen. Bus. Law § 350-e(1).

Co., 18 N.Y.3d 940, 941, 967 N.E.2d 675, 944 N.Y.S.2d 452 (2012) (citation omitted); Spagnola v. Chubb Corp., 574 F.3d 64, 74 (2d Cir. 2009).

HN23[] "[A] section 349 [or 350] claim will not lie where the deceptive act itself was the only injury," such as when a plaintiff alleges she was deceived into making a purchase and merely seeks a refund of the purchase price. Servedio v. State Farm Ins. Co., 889 F. Supp. 2d 450, 452 (E.D.N.Y. 2012), *aff'd*, 531 F. App'x 110 (2d Cir. 2013); Greene v. Gerber Prod. Co., 262 F. Supp. 3d 38, 67-68, n.12 (E.D.N.Y. 2017) (quoting Goshen v. Mut. Life Ins. Co. of N.Y., 98 N.Y.2d 314, 324 n.1, 774 N.E.2d 1190, 746 N.Y.S.2d 858 (2002)) (noting that aside from reliance requirement, Section 350 standard is identical to Section 349). However, the New York Court of Appeals has "left open the possibility **[*30]** that 'a plaintiff might have a claim for the *higher* price the consumer paid for the product as a result of the misrepresentation.'" Servedio, 889 F. Supp. 2d at 452 (quoting Small v. Lorillard Tobacco Co., 94 N.Y.2d 43, 56, 720 N.E.2d 892, 698 N.Y.S.2d 615 (1999)) (emphasis in original). A plaintiff therefore may satisfy the injury requirement by articulating a "price premium" theory, or alleging that the deceptive practice caused her to pay more than the product was actually worth. Id. at 453; *see also* Orlander, 802 F.3d at 302 (finding that a plaintiff need only "allege that, on account of a materially misleading practice, she purchased a product and did not receive the full value of her purchase," and finding requirement satisfied where the plaintiff "did not receive the services that Defendant misleadingly told Plaintiff he was purchasing"); Wright v. Publishers Clearing House, Inc., 439 F. Supp. 3d 102, 114 (E.D.N.Y. 2020); Koenig v. Boulder Brands, Inc., 995 F. Supp. 2d 274, 288 (S.D.N.Y. 2014).

Defendant argues that Plaintiff Cavallero has not sufficiently alleged a separate injury under the GBL, since he bought a can of Defendant's beverage and received a can of Defendant's beverage. ECF No. 20-1 at 29. Plaintiffs contend that they have plausibly alleged that they paid a price premium for Defendant's beverages because the beverages lacked the promised ingredients and they would not have paid as much for them had they known the truth. ECF No. 25 at 31.

Courts have differed somewhat **[*31]** in determining what is needed to allege a "price premium" theory of injury under the GBL. In an unpublished Ninth Circuit case, for instance, the court found that the plaintiffs had failed to allege they paid a price premium for a Starbucks DoubleShot Espresso beverage that did not actually contain two shots of espresso, reasoning that the plaintiffs had alleged no details regarding the price premium and concluding that "[t]he bare recitation of the word 'premium' does not adequately allege a cognizable injury" under the GBL. Naimi v. Starbucks Corp., 798 F. App'x 67, 70 (9th Cir. 2019) (granting leave to amend "to allege the necessary factual details concerning the alleged price premium they paid"). The district court in Greene v. Gerber also considered whether specific alleged facts supported the plaintiff's claim that she paid a price premium for infant formula marketed as allergy-reducing, including that parents value a formula's ability to prevent allergies and that formulas without allergy claims were priced lower. Greene, 262 F. Supp. 3d at 68. However, that court clarified that a plaintiff need not identify precisely comparable products to support her price premium theory at the motion to dismiss stage. Id. at 69. Several other district courts in New York have found price premium injuries **[*32]** sufficiently pleaded despite minimal factual enhancement where the products the plaintiffs ultimately received did not contain the attributes the defendants had advertised. Daniel v. Mondelez Int'l, Inc., 287 F. Supp. 3d 177, 198 n.19 (E.D.N.Y. 2018) (noting that weight of authority in Second Circuit "allow[s] complaints that lack allegations of both cheaper and exactly comparable products to survive motions to dismiss"); Koenig, 995 F. Supp. 2d at 288 (finding price premium injury adequately pleaded for milk misleadingly advertised as fat-free); Stoltz v. Fage Dairy Processing Indus., S.A., No. 14-CV-3826 MKB, 2015 U.S. Dist. LEXIS 126880, 2015 WL 5579872, at *23 (E.D.N.Y. Sept. 22, 2015) (finding price premium allegations sufficient where plaintiffs alleged defendants commanded a premium for yogurt by deceiving customers about the attributes of the yogurt). *But see* Colella v. Atkins Nutritionals, Inc., 348 F. Supp. 3d 120, 143 (E.D.N.Y. 2018) ("[P]laintiff only conclusorily asserts that [defendant] charges a premium for its products and provides no facts regarding what the premium was, what price he paid for the products, or the price of non-premium products.").

Here, the Court concludes that Plaintiffs have pleaded sufficient facts to support their price premium theory at the motion to dismiss stage. Plaintiffs have alleged that consumers seek out products that feature "real" ingredients and that at least one competitor changed its formulation to include fruit as customer demand transparency and "clean **[*33]** labeling." FAC ¶¶ 49, 50. Because these allegations suggest that the inclusion of real fruit is valued by consumers, Plaintiffs plausibly allege that they paid a price premium for a beverage they believed contained fruit. *Cf.* *Daniel, 287 F. Supp. 3d at 196* ("In most cases, 'price premium' should . . . be observable through an increased price in comparison to products without the desirable quality."). Following the district court in *Greene, 262 F. Supp. 3d at 69*, the Court declines to dismiss the GBL claims on the ground that Plaintiffs have not alleged a precisely comparable product to demonstrate the amount of the price premium, as whether Plaintiffs can indeed show that they paid a price premium is a question of fact not properly determined at the pleading stage.

Further, as found above, Plaintiffs adequately allege Defendant's labeling is deceptive. New York case law does not compel a different finding for the GBL claims. Notably, the Second Circuit has applied the same "reasonable consumer" standard to claims under both New York's GBL and California's UCL and FAL, including the holding in *Williams* that reasonable consumers should not be expected to review information on the product's back label to correct misrepresentations on the front label. **[*34]** *Mantikas v. Kellogg Co., 910 F.3d 633, 636-38 (2d Cir. 2018)* (citing *Williams, 552 F.3d at 939*).

Accordingly, the Court DENIES Defendant's motion to dismiss the GBL claims.

6. Count Nine: Quasi-Contract or Unjust Enrichment

Defendant only challenges Plaintiffs' equitable claims on the grounds that Plaintiffs have failed to allege that Defendant's product labels are false, misleading, or untrue. ECF No. 20-1 at 30. Because the Court finds Plaintiffs adequately allege that the labels would be deceptive to a reasonable consumer, the Court DENIES Defendant's motion to dismiss the quasi-contract or unjust enrichment claims.

IV. CONCLUSION

For the reasons set forth above, the Court:

1. DENIES AS MOOT Plaintiffs' Application to File Sur-Reply; and
2. DENIES Defendant's Motion to Dismiss.

IT IS SO ORDERED.

Deslandes v. McDonald's USA, LLC

United States District Court for the Northern District of Illinois, Eastern Division

July 28, 2021, Decided; July 28, 2021, Filed

No. 17 C 4857

Reporter
2021 U.S. Dist. LEXIS 140735 *; 2021 WL 3187668

LEINANI DESLANDES, Plaintiff, v. McDONALD'S USA, LLC, McDONALD'S CORPORATION, and DOES 1 through 10, Defendants.

Core Terms

franchisees, restaurants, employees, rule of reason, relevant market, horizontal, hiring, training, brand, anticompetitive, effects, markets, output, franchise agreement, competitors, class member, outlets, procompetitive, geographic, parties, predominate, franchisor, market power, antitrust, franchise, vertical, class certification, common question, quick-look, ancillary

Counsel: **[*1]** For Leinani Deslandes, on behalf of herself and all others similarly situated, Plaintiff: Michele Vercoski, Richard McCune, Jr., McCune Wright Arevalo, Ontario, CA; Derek Yeats Brandt, McCune Wright Arevalo, LLP, Edwardsville, IL.

For McDonald's USA, LLC, a Delaware limited liability company, McDonald's Coporation, a Delaware corporation, Defendants: David Jarrett Arp, LEAD ATTORNEY, PRO HAC VICE, Gibson Dunn & Crutcher LLP, Washington, DC; Matthew Cameron Parrott, LEAD ATTORNEY, PRO HAC VICE, Gibson, Dunn & Crutcher LLP, Irvine, CA; Rachel Susan Brass, LEAD ATTORNEY, PRO HAC VICE, Gibson, Dunn & Crutcher Llp, San Francisco, CA; Rachael Cecelia Brennan Blackburn, Robert M. Andalman, A & G Law LLC, Chicago, IL.

Judges: HON. JORGE ALONSO, United States District Judge.

Opinion by: JORGE ALONSO

Opinion

MEMORANDUM OPINION AND ORDER

After a hiring restriction prevented plaintiff Leinani Deslandes ("Deslandes") from taking a better-paying position with a rival McDonald's outlet, she filed this suit seeking relief under *Section 1 of the Sherman Antitrust Act, 15 U.S.C. § 1*. Deslandes and Stephanie Turner ("Turner"), who filed a related suit (19-cv-5524), move for certification of a nationwide class of persons who were employed by a McDonald's restaurant during a five-year period. **[*2]** For the reasons set forth below, plaintiffs' motion is denied.

I. BACKGROUND

Deslandes filed suit against two defendants. The first is McDonald's USA, LLC, which is a wholly-owned subsidiary of the second defendant, McDonald's Corporation. Together ("McDonald's"), these entities are the franchisors of the popular restaurants ("McDonald's restaurants"), with McDonald's Corporation serving as franchisor for franchise agreements signed until 2005 and McDonald's USA, LLC serving as the franchisor for franchise agreements signed after that time. Although most (90-95%) of McDonald's restaurants are owned and operated by franchisees, the rest are operated by McDonald's USA, LLC (Def. Brief at 3/Docket 299 at 10) and are commonly referred to as McOpCos.

For many years, including at least 1973 to 2017, the franchise agreement contained a provision that stated:

> Franchisee shall not employ or seek to employ any person who is at the time employed by McDonald's, any of its subsidiaries, or by any person who is at the time operating a McDonald's restaurant or otherwise induce, directly or indirectly, such person to leave such employment. This paragraph 14 shall not be violated if such person has left **[*3]** the employ of any of the foregoing parties for a period in excess of six months.

Plaintiffs allege that this provision violated the Sherman Antitrust Act and suppressed their wages.

In or about March 2017, McDonald's Corp. announced to the McOpCos and the franchisees that it would discontinue enforcement of the no-hire provision. (Singer Report at ¶ 3). In July 2018, McDonald's Corp. entered an agreement with the Washington State Attorney General that it would neither include the hiring provision in future franchise agreements nor enforce it with respect to the franchise agreements that already include the provision. (Singer Report at ¶ 3).

II. DISCUSSION

"The class action is 'an exception to the usual rule that litigation is conducted by and on behalf of the individual named parties only.'" *Wal-Mart Stores, Inc. v. Dukes, 564 U.S. 338, 348, 131 S. Ct. 2541, 180 L. Ed. 2d 374 (2011)* (quoting *Califano v. Yamasaki, 442 U.S. 682, 700-701, 99 S. Ct. 2545, 61 L. Ed. 2d 176 (1979)*). "A class action may be maintained if *Rule 23(a)* is satisfied and" if the case falls within at least one of the categories outlined in *Rule 23(b)*. *Fed.R.Civ.P. 23(b)*; *see also* *Wal-Mart Stores, 564 U.S. at 345*. *Rule 23(a)* allows "[o]ne or more members of a class" to "sue or be sued as representative parties on behalf of all class members only if:

> (1) the class is so numerous that joinder of all members is impracticable;
>
> (2) there are questions of law or fact common to **[*4]** the class;
> (3) the claims or defenses of the representative parties are typical of the claims or defenses of the class; and
> (4) the representative parties will fairly and adequately protect the interests of the class.

Fed.R.Civ.P. 23(a). *Rule 23(b)(3)* allows class certification where "the court finds that the questions of law or fact common to class members predominate over any questions affecting only individual members, and that a class action is superior to other available methods for fairly and efficiently adjudicating the controversy." *Fed.R.Civ.P. 23(b)(3)*. *Rule 23(c)(1)(A)* requires that "[a]t an early practicable time after a person sues or is sued as a class representative, the court must determine by order whether to certify the action as a class action." *Fed.R.Civ.P. 23(c)(1)(A)*.

To support a motion for class certification, a "party seeking class certification must affirmatively demonstrate his compliance with the Rule—that is, he must be prepared to prove that there are *in fact* sufficiently numerous parties, common questions of law or fact, etc." *Wal-Mart, 564 U.S. at 350*. Thus, the "party seeking certification bears the burden of demonstrating that certification is proper by a preponderance of the evidence." *Chicago Teachers Union, Local No. 1 v. Board of Ed. of City of Chi., 797 F.3d 426, 433 (7th Cir 2015)*. A court considering a motion for class certification must engage in "a rigorous **[*5]** analysis" that "will frequently" overlap with the merits, because the considerations "are enmeshed in the factual and legal issues comprising the plaintiff's cause of action." *Comcast Corp. v. Behrend, 569 U.S. 27, 33-34, 133 S. Ct. 1426, 185 L. Ed. 2d 515 (2013)* (citations omitted).

Plaintiffs seek to certify a class of:

> All persons who were employed at a McDonald's-branded restaurant in the United States from June 28, 2013 to July 12, 2018. Excluded from the Class are Defendants' directors and officers, the Judge, and the Judge's staff and immediate family members.

(Plfs. Brief at 1/Docket 268 at 7).

1. **Numerosity**

First, the Court agrees that the number of class members makes joinder impracticable. Plaintiffs assert that there are "hundreds of thousands" of class members. (Docket 268 at 8). Defendants say there are "millions" of class members. (Docket 299 at 8). Either way, the class contains far more members than would be practicable to join. *See* *Mulvania v. Sheriff of Rock Island Cty., 850 F.3d 849, 859 (7th Cir. 2017)* ("While there is no magic number that applies to every case, a forty-member class is often regarded as sufficient to meet the numerosity requirement.").

2. Common issues and whether they will predominate

Next, the Court considers whether plaintiffs have shown the existence of one or more common issues and whether such common questions **[*6]** will predominate over individual questions. The Supreme Court has described what makes an issue common. It has said:

> Commonality requires the plaintiff to demonstrate that the class members 'have suffered the same injury. This does not mean merely that they have all suffered a violation of the same provision of law. . . . Their claims must depend upon a common contention[.] . . . That common contention, moreover, must be of such a nature that it is capable of classwide resolution—which means that determination of its truth or falsity will resolve an issue that is central to the validity of each one of the claims in one stroke.

Wal-Mart, 564 U.S. at 349-50 (citations omitted). In describing the difference between common and individual questions, the Supreme Court has explained:

> An individual question is one where 'members of a proposed class will need to present evidence that varies from member to member,' while a common question is one where 'the same evidence will suffice for each member to make a prima facie showing [or] the issue is susceptible to generalized, class-wide proof.'

Tyson Foods, Inc. v. Bouaphakeo, 577 U.S. 442, 453, 136 S. Ct. 1036, 194 L. Ed. 2d 124 (2016) (citation omitted); *see also* *Messner v. Northshore Univ. HealthSystem, 669 F.3d 802, 815 (7th Cir. 2012)* ("If, to make a prima facie showing on a given question, the members of a proposed class will need to **[*7]** present evidence that varies from member to member, then it is an individual question.") (quoting *Blades v. Monsanto Co., 400 F.3d 562, 566 (8th Cir. 2005)*).

To be suitable for class action treatment, a case must not only involve common questions (*Fed.R.Civ.P. 23(a)(2)*), but those common questions must predominate (*Fed.R.Civ.P. 23(b)*). "The *Rule 23(b)(3)* predominance inquiry tests whether proposed classes are sufficiently cohesive to warrant adjudication by representation." *Amchem Products, Inc. v. Windsor, 521 U.S. 591, 623, 117 S. Ct. 2231, 138 L. Ed. 2d 689 (1997)*. *Rule 23(b)(3)*'s "predominance criterion is far more demanding" than "*Rule 23(a)*'s commonality requirement[.]" *Amchem, 521 U.S. at 623-34*. "Analysis of predominance under *Rule 23(b)(3)* 'begins, of course, with the elements of the underlying cause of action.'" *Messner, 669 F.3d at 815* (quoting *Erica P. John Fund, Inc. v. Halliburton Co., 563 U.S. 804, 131 S.Ct. 2179, 2184, 180 L. Ed. 2d 24 (2011)*).

The parties agree[1] that the elements of plaintiffs' cause of action are: (1) a violation of the antitrust laws; (2) injury resulting from the violation, which is to say that plaintiffs suffered antitrust "impact;" and (3) damages. *Messner, 669 F.3d at 815*. The parties do not agree, however, on the proper analysis of plaintiff's antitrust claim, so the Court must first resolve that issue.

---

[1] *See* Plfs. Brief at 20/Docket 268 at 26; Def. Brief at 11, 16, 18/Docket 299 at 18, 23, 25.

Quick look versus Rule of Reason

The parties disagree about whether plaintiffs' antitrust claim may be considered under a quick look analysis or whether it will require rule of reason analysis.[2]

This Court has previously explained:

> Section 1 of the Sherman Antitrust **[*8]** Act prohibits "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce . . . " 15 U.S.C. § 1. This language has long been interpreted to "outlaw only *unreasonable* restraints" of trade. State Oil Co. v. Khan, 522 U.S. 3, 10, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997). Some restraints are deemed so anti-competitive (and, thus, unreasonable) that they are illegal *per se*, while other restraints, which may have procompetitive effects, are judged under the rule of reason (or its subset: the quick look).
>
> As the Supreme Court has explained, restraints that are "unlawful *per se*" are those that "have such predictable and pernicious anticompetitive effect, and such limited potential for procompetitive benefit" that it is obvious they are unreasonable restraints of trade. Khan, 522 U.S. at 10. The *per se* rule applies to restraints "'that would always or almost always tend to restrict competition and decrease output.'" Leegin, 551 U.S. at 886. Accordingly, the *per se* rule is reserved for restraints with respect to which "courts have had considerable experience" such that they "can predict with confidence that [the restraint] would be invalidated in all or almost all instances under the rule of reason[.]" Leegin, 551 U.S. at 886-87.
>
> Most restraints are not *per se* unlawful but are instead analyzed under **[*9]** the rule of reason. Khan, 522 U.S. at 10. Under the rule of reason, "the finder of fact must decide whether the questioned practice imposes an unreasonable restraint on competition, taking into account a variety of factors, including specific information about the relevant business, its condition before and after the restraint was imposed, and the restraint's history, nature, and effect." Khan, 522 U.S. at 10. Generally, this requires a plaintiff to show the defendant has "market power—that is the ability to raise prices significantly without going out of business—without which the defendant could not cause anticompetitive effects on market pricing." Agnew v. National Collegiate Athletic Ass'n, 683 F.3d 328, 335 (7th Cir. 2012). In this case, market power would be the power to suppress wages.
>
> Courts sometimes apply a third test of reasonableness, the quick look, which is a short form of rule of reason analysis. Illinois Corp. Travel, Inc. v. American Airlines, Inc., 806 F.2d 722, 727 (7th Cir. 1986) ("This is the sort of short form or quick look Rule of Reason analysis endorsed in NCAA v. Board of Regents, 468 U.S. 85, 109-10, 104 S. Ct. 2948, 82 L. Ed. 2d 70 & n. 42 (1984)). As the Seventh Circuit has explained:
>
> > the quick-look approach can be used when 'an observer with even a rudimentary understanding of economics could conclude that the arrangements in question would have an anticompetitive effect on customers and markets,' but there are nonetheless reasons to examine the potential **[*10]** procompetitive justifications.
>
> Agnew, 683 F.3d at 336 (internal citation omitted) (quoting Cal. Dental Ass'n v. FTC, 526 U.S. 756, 770, 119 S. Ct. 1604, 143 L. Ed. 2d 935 (1999)). Under quick-look analysis, if the defendant lacks legitimate justifications for facially anticompetitive behavior then the court "condemns the practice without ado" without resort to analysis of market power. Agnew, 683 F.3d at 336; Chicago Prof. Sports Ltd. Partnership v. NBA, 961 F.2d 667, 674 (7th Cir. 1992); *see also* National Collegiate Athletic Ass'n v. Board of Regents, 468 U.S. 85, 109-10 n. 42, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (1984) ("While the 'reasonableness' of a particular alleged restraint often depends on the market power of the parties involved, because a judgment about market power is the

---

[2] The Court notes the Supreme Court issued its decision in NCAA v. Alston, __ U.S. __, 141 S.Ct. 2141, 210 L. Ed. 2d 314 (2021), after the parties had briefed their motion for class certification. The Court allowed each party to file a brief discussing the impact of that case on this motion.

> means by which the effects of the conduct on the market place can be assessed, market power is only one test of 'reasonableness.' And where the anticompetitive effects of conduct can be ascertained through means short of extensive market analysis, and where no countervailing competitive virtues are evident, a lengthy analysis of market power is not necessary.").

*Deslandes v. McDonald's USA, LLC, Case No. 17 C 4857, 2018 U.S. Dist. LEXIS 105260, 2018 WL 3105955 at *4-5 (N.D. Ill. June 25, 2018)*.

Plaintiff now argues, "[t]his Court has already held that an abbreviated from of the rule of reason—the quick-look test—is appropriate given the predictable effects that ensue" from the alleged conduct. (Docket 371 at 4). That is imprecise. The Court said plaintiff had *stated a claim* for a restraint that *might* be unlawful under a quick look. Specifically, the Court stated: **[*11]**

> Here, plaintiff argues that she has alleged the existence of a horizontal agreement in restraint of trade. Plaintiff alleges that McDonald's franchisees signed written franchise agreements pursuant to which each agreed not to hire employees (including former employees who left within the prior six months) from other McDonald's restaurants. Specifically, the franchisees were not allowed to hire anyone who was employed (or had been employed in the prior six months) by "McDonald's, any of its subsidiaries, or by any person who is at the time operating a McDonald's restaurant[.]" (Am. Complt. ¶ 87). Plaintiff alleges that the McOpCos were similarly restricted.
>
> Defendants argue that this is merely a vertical restraint, because it was spearheaded by the entity at the top of the chain. The Court agrees that the restraint has vertical elements, but the agreement is also a horizontal restraint. It restrains competition for employees among horizontal competitors: the franchisees and the McOpCos. Plaintiff has alleged that McOpCos run McDonald's-brand restaurants and, thus, compete directly with franchisees for employees. Plaintiff has also alleged that the McOpCos are subsidiaries of defendant **[*12]** McDonald's and that the restraint explicitly restricts franchisees from hiring employees of McDonald's subsidiaries, i.e., the franchisees' competitors. Thus, McDonald's, by including the no-hire provision in its agreement with franchisees, was protecting its own restaurants (i.e., *itself*) from horizontal competition for employees. *Cf. Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 771, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)* ("the coordinated activity of a parent and its wholly owned subsidiary must be viewed as that of a single enterprise for purposes of *§ 1* of the Sherman Act"). The Court finds that plaintiff has alleged a horizontal restraint of trade.
>
> Naked horizontal agreements (i.e., those among competitors) to fix prices or to divide markets are *per se* unlawful. *Leegin, 551 U.S. at 886*; *Federal Trade Comm'n v. Superior Court Trial Lawyers Assoc., 493 U.S. 411, 110 S. Ct. 768, 107 L. Ed. 2d 851 (1990)* (horizontal agreement among lawyers not to accept appointments to represent indigent criminal defendants until fees increased was a naked price restraint and *per se* unlawful); *Blackburn v. Sweeney, 53 F.3d 825, 827 & 828 (7th Cir. 1995)* ("reciprocal agreement [among attorneys] to limit advertising to different geographical regions was . . . an agreement to allocate markets so that the *per se* rule of illegality applies"). This includes naked agreements to set wages. *Arizona Hosp., 2009 U.S. Dist. LEXIS 42871, 2009 WL 1423378 at * 3* (plaintiff's allegations that hospital association set prices for temporary nurses stated claim for **[*13]** *per se* violation of the Sherman Act).
>
> A horizontal agreement not to hire competitors' employees is, in essence, a market division. *See United States v. eBay, Inc., 968 F.Supp. 2d 1030, 1039 (N.D. Cal. 2013)* ("The court thus finds that the United States' allegations concerning agreement between eBay and Intuit [not to hire each other's employees] suffice to state a horizontal market allocation agreement."). The Department of Justice, which enforces rather than interprets the law, has warned employers that it considers naked no-hire agreements to be *per se* unlawful. (Press Release, U.S. Dep't of Justice, *Justice Department and Federal Trade Commission Release Guidance for Human Resource Professionals on How **Antitrust Law** Applies to Employee Hiring and Compensation* (Oct. 20, 2016), *available at* https://www.justice.gov/opa/pr/justice-department-and-federal-trade-commission-release-guidance-human-resource-professionals.). Thus, because a no-hire agreement is, in essence, an agreement to divide a market, the Court has no trouble concluding that a naked horizontal no-hire agreement

> would be a *per se* violation of the antitrust laws. Even a person with a rudimentary understanding of economics would understand that if, say, large law firms in Chicago got together **[*14]** and decided not to hire each other's associates, the market price for mid-level associates would stagnate. With no competition for their talent (aside from lower-paying in-house or government jobs), associates would have no choice but to accept the salary set by their firms or to move to another city. Thus, such a claim would be suitable for *per se* treatment.
>
> Not all horizontal restraints are *per se* unlawful, however. Some horizontal restraints are *ancillary* to agreements that are procompetitive, usually in the sense of enhancing output (i.e., producing either a greater quantity of goods or a new good that would not otherwise exist). *Polk Bros., Inc. v. Forest City Enterprises, Inc., 776 F.2d 185, 188-89 (7th Cir. 1985)* ("A court must distinguish between 'naked' restraints, those in which the restriction on competition is unaccompanied by new production or products, and 'ancillary' restraints, those that are part of a larger endeavor whose success they promote."). A restraint is ancillary if it "promoted enterprise and productivity when it was adopted." *Polk Bros., 776 F.2d at 189*. When a restraint is ancillary, it is judged either under the rule of reason or given a "quick look." For example, no-hire agreements that are ancillary to the sale of a business can have procompetitive effects, so they **[*15]** are judged under the rule of reason. *Eichorn v. AT&T Corp., 248 F.3d 131, 144 (3d Cir. 2001)*.
>
> Similarly, where the horizontal restraint is necessary in order for the product to exist at all, a restraint will not be judged *per se* unlawful but rather will be judged under the rule of reason, including by "quick look." *Law v. National Collegiate Athletic Assoc., 134 F.3d 1010 (10th Cir. 1998)*; *see also* *Broadcast Music, Inc. v. Columbia Broadcasting Sys., Inc., 441 U.S. 1, 99 S. Ct. 1551, 60 L. Ed. 2d 1 (1979)*; *National Collegiate Athletic Ass'n. v. Board of Regents of the Univ. of Okla., 468 U.S. 85, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (1984)*. In *Law*, a group of college basketball coaches brought suit challenging the NCAA's rule limiting annual salaries for certain assistant basketball coaches to $16,000 per year. Because some restraints were necessary in order to make college sports available, the court concluded that the horizontal price restraint should be analyzed under the rule of reason, and, in particular, the "quick look." *Law, 134 F.3d at 1018 & 1020* ("We find it appropriate to adopt such a quick look rule of reason in this case.")
>
> In this case, plaintiff has alleged a horizontal restraint that is ancillary to franchise agreements for McDonald's restaurants. Each time McDonald's entered a franchise agreement, it increased output of burgers and fries, which is to say the agreement was output enhancing and thus procompetitive. (That is not to say that the provision itself was output enhancing. The very fact that McDonald's has managed to continue signing franchise agreements **[*16]** even after it stopped including the provision in 2017 suggests that the no-hire provision was not necessary to encourage franchisees to sign.) Because the restraint alleged in plaintiff's complaint is ancillary to an agreement with a procompetitive effect, the restraint alleged in plaintiff's complaint cannot be deemed unlawful *per se*. Plaintiff's claim does not rise and fall on *per se* treatment, though. She claims in the alternative that the restraint is unlawful under quick-look analysis.
>
> The next question, then, is whether plaintiff has plausibly alleged a restraint that might be found unlawful under quick-look analysis. The Court thinks she has. Even a person with a rudimentary understanding of economics would understand that if competitors agree not to hire each other's employees, wages for employees will stagnate. Plaintiff herself experienced the stagnation of her wages. A supervisor for a competing McDonald's restaurant told plaintiff she would like to hire plaintiff for a position that would be similar to plaintiff's position but that would pay $1.75-2.75 more per hour than she was earning. Unfortunately for plaintiff, the no-hire agreement prevented the McOpCo from offering **[*17]** plaintiff the job. When plaintiff asked her current employer to release her, plaintiff was told she was too valuable. The Court agrees that an employee working for a below-market wage would be extremely valuable to her employer.

*Deslandes, 2018 U.S. Dist. LEXIS 105260, 2018 WL 3105955 at *6-7*.

The Court specifically stated, "Though the Court has concluded that plaintiff has stated a claim for a restraint that might be unlawful under quick-look analysis, the evidence at a later stage may not support it." *Deslandes, 2018*

U.S. Dist. LEXIS 105260, 2018 WL 3105955 at *8. Accordingly, the Court gave plaintiff leave to amend to add a claim under the rule of reason. *Id.* Plaintiff declined.[3]

Alston

Since that time, the parties have engaged in discovery, and the Supreme Court has clarified when quick-look analysis applies, which is rarely. In *NCAA v. Alston, __ U.S. __, 141 S.Ct. 2141, 210 L. Ed. 2d 314 (2021)*, college athletes brought suit against the NCAA, claiming its agreement with member schools to limit compensation to student athletes amounted to an unlawful restraint of trade in violation of the Sherman Antitrust Act. The NCAAargued that the court should apply a quick look, but the Supreme Court disagreed.

The Supreme Court, in a unanimous decision, first noted that claims regarding restraints of trade "presumptively" call for rule of reason analysis. *Alston, 141 S.Ct. at 2151*. It went on to explain that **[*18]** a quick look suffices:

> *only* for restraints at opposite ends of the competitive spectrum. For those sorts of restraints—rather than restraints in *the great in-between*—a quick look is sufficient for approval or condemnation.

Alston, 141 S.Ct. at 2155 (emphasis added). On one end of that spectrum, the Supreme Court explained, are restraints that are "so obviously incapable of harming competition that they require little scrutiny," such as joint ventures commanding such a small share of the market (say, 5-6%) that any reduction in output would be made up by the rest of the market. *Alston, 141 S.Ct. at 2155-56*. On the opposite end of the spectrum are those "agreements among competitors" that "so obviously threaten to reduce output and raise prices that they might be condemned" after a quick look. *Alston, 141 S.Ct. at 2156*. The Supreme Court said such quick-look condemnations should be rare, explaining, "we take special care not to deploy these condemnatory tools until we have amassed 'considerable experience with the type of restraint at issue' and 'can predict with confidence that it would be invalidated in all or almost all instances.'" *Alston, 141 S.Ct. at 2156* (citing *Leegin Creative Leather Products, Inc. v. PSKS, Inc., 551 U.S. 877, 886-887, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007)*).

This case falls in "the great in-between" of restraints that require rule-of-reason analysis. This Court cannot say that **[*19]** it has enough experience with no-hire provisions of franchise agreements to predict with confidence that they must always be condemned, which means, under *Alston*, that the Court must apply rule of reason analysis to this case. The Supreme Court's recent unanimous decision in *Alston* is not, however, the only reason the Court must apply the rule of reason. Two additional reasons support applying the rule of reason.

Pro-competitive effects

First, defendants have put forth sufficient evidence of pro-competitive effects of the hiring restriction to warrant full rule of reason analysis. Specifically, defendants put forth the expert report of Dr. Justin McCrary ("Dr. McCrary"), who holds a Ph.D. in Economics and is a Professor at Columbia University.[4] (Plaintiffs do not challenge the admissibility of either Dr. McCrary's report or the report by Dr. Kevin M. Murphy ("Dr. Murphy"), defendants' other expert witness.)

Dr. McCrary first describes the benefits of a franchise business model and the free-rider problem that can be expected with such a model. Without franchising, an owner of a chain of restaurants will face several problems in trying to expand quickly. In addition to needing a significant **[*20]** amount of capital, the owner might have difficulty

---

[3] Likewise, plaintiff Turner failed to state a claim under the rule of reason. Her complaint is limited to a quick look claim. [Case No. 19-cv-5524, Docket 1].

[4] The Court is not suggesting that this evidence is undisputed or that a fact-finder would find it persuasive. The point is merely that in the face of defendants' significant evidence of pro-competitive effects, a full analysis under the rule of reason, rather than a quick look, is necessary.

ensuring the non-owner manager of each outlet has an incentive to maximize sales and profits. This is where the franchise model can help. When each outlet is owned and operated by a franchisee, the franchisee's compensation is "directly tied to *the profits*" of running the outlet. (McCrary Rep. at ¶ 32).

The franchise model allows for quicker growth of the brand but comes with a free-rider problem. As with any brand or trademark, the benefit of the brand to the consumer is the consistency the consumer can expect each time he makes a purchase from that brand and the reduced search costs inherent in sticking with what is known. For such branding to be effective in a franchise model, each franchisee must be delivering a product and experience that is nearly identical. Any given franchisee, however, (and particularly one with an outlet along, say, an interstate highway that receives few repeat customers) has an incentive to cut corners (either in food quality or customer service) in order to boost its own profits. That hurts the brand, because when a customer has a bad experience at one outlet, he might refrain from visiting other outlets **[*21]** in the future. Dr. McCrary describes how franchisors, in order to control the free-rider problem and promote a consistent brand, include in their franchise agreements provisions and restraints to control quality. The franchisor, thus, requires, among other things, a particular level of quality, cleanliness and service. Dr. McCrary argues that these sorts of restrictions are procompetitive, because they strengthen the quality of the brand, thereby encouraging additional franchisees to open outlets and increasing the output of the end product.

Dr. McCrary goes on to describe the exponential growth in the number of McDonald's restaurants after 1955, when Ray Kroc ("Kroc") began including brand restrictions in franchise agreements. Among the restrictions Kroc included were:

> specific requirements related to: the look of the store, the neon sign, and the parking lot; employee appearance, product appearance (containers, bags, napkins, spoons, etc. had to meet . . . specifications); advertising and marketing (all 'signs, cards, notices, displays or decorations' were required to be supplied or approved by McDonald's), product and service quality, operations, and inspections of financial books **[*22]** and operation methods.

(McCrary Rep. at ¶ 67). Kroc also added a royalty payment of 1.9 percent of gross sales and included an employment restriction similar to the one at issue in this case. Specifically, those early franchisees agreed "'not [to] employ or seek to employ any person who is at the time employed' by McDonald's or a 'similar establishment' licensed by McDonald's, i.e., one of McDonald's other franchisees.'" (McCrary Rep. at ¶ 69). After Kroc's changes, McDonald's grew from nine outlets in 1955, to 229 in 1960, to more than 2000 by the early 1970's, to about 6,000 by 1980, and to more than 14,000 today.

Today, McDonald's restaurants are still required to maintain consistency. Franchisees are required to comply with standardized employee uniforms and appearance, hours of operation and restaurant appearance. McDonald's has specific rules for menu and food preparation (including the strict procedure for cooking fries), inventory control and bookkeeping. McDonald's restaurants are audited regularly to ensure compliance with the brand standards.

To that end, Dr. McCrary reports, McDonald's also imposes strict training guidelines. Although franchisees make their own hiring and **[*23]** compensation decisions, they are required to follow certain training guidelines. Each restaurant must be managed by a person who has taken a week-long training class at McDonald's Hamburger University. Defendant does not charge for that course, but the franchisee must pay the trainee's travel expenses and must also pay the trainee for the time spent there. In fact, all employees must be paid for all the time they spend training. Department managers complete about 45 weeks of training, and shift managers take about fourteen weeks of training. In 2015, McDonald's estimated the cost of training a new manager to be $4,392 and the cost to train a shift manager to be $2,744. Crew members, too, must learn restaurant maintenance, customer service and how to operate each food preparation station.

Dr. McCrary opines that the hiring restriction encourages franchisees to train their employees without fear that other outlets will free-ride on this training by hiring away employees trained in the McDonald's way. It also encourages cooperation among franchisees. For example, franchisees are required to manage their restaurants personally and are required to complete significant training (which can **[*24]** take years if the potential franchisee has no McDonald's experience) before signing a franchise agreement. That training sometimes involves on-the-job training in an existing franchise restaurant. Absent the hiring restriction, current franchisees would be reluctant to allow potential franchisees to train in their restaurants for fear they would use the opportunity to recruit employees.

Dr. McCrary opines that the hiring restraint increases output in the hamburger market, because it encourages the very training that enhances the brand (by ensuring uniform food quality, customer service and building cleanliness). Dr. McCrary says his opinion is consistent with labor theory developed by Gary Becker, who noticed that "firms are more willing to invest in training that is specific to their firm because there is a smaller chance they will lose that investment to competing firms." (McCrary Rep. at ¶ 331; *see also* ¶¶ 120-130). The hiring provision makes the training related to the brand specific to the franchisee (rather than just to the brand), because it prevents other outlets from free riding on that training. All that training leads to greater brand consistency, better food quality and **[*25]** customer satisfaction, which is to say a strong brand. (McCrary Rep. at ¶ 145). A strong brand with satisfied customers leads to additional franchise outlets, thereby increasing output of hamburgers and fries. Dr. McCrary cites evidence that many franchisees chose a McDonald's franchise (over other potential branded restaurants) to open, because of the hiring provision. (McCrary Rep. at ¶ 131). That suggests the provision itself was output enhancing in the market for hamburgers and fries. When new outlets open, the outlets must be staffed. Thus, new restaurants also increase output in the labor market (i.e., demand for labor).

Dr. McCrary also opined that it does not make economic sense for McDonald's, as franchisor, to enable its franchisees to act as monopsony purchasers of labor. In simple terms:

> [T]he alleged monopsony conspiracy does not make economic sense for McDonald's because it would lead to a reduction in labor at each franchisee, which would lead [to] a reduction in sales at McDonald's restaurants. Indeed, a basic tenet of franchising economics is that franchisors do not benefit when their franchisees gain market power because franchisees will then sell less of their products, **[*26]** which undermines the brand's growth.

(McCrary Rep. at ¶ 201(a)). To the extent a franchisee is a labor monopsonist, the franchisee would hire less labor (reduce labor output) at a lower price. In the process, the franchisee would increase his profit but would be limited in his output of hamburgers, which, in turn reduces revenue. That is because the monopsonist franchisee is still selling into a competitive market for lunch and cannot increase price. His revenue per unit is the same, but he is selling fewer burgers, so his revenue goes down even as his profit goes up. This is good for the franchisee, but it is terrible for the franchisor, who is paid based on franchisees' revenue, not profit. So, while it might be good for the franchisee to be a labor monopsonist, it is terrible for the franchisor, who wants to increase output of hamburgers and fries. The case of McDonald's is slightly different, because it also operates restaurants, the McOpCos. As Dr. McCrary points out, however, defendant's revenue from franchise royalties is far greater than its revenue from operating restaurants.

Defendants have offered enough evidence of procompetitive effects to warrant rule of reason analysis. **[*27]**

Vertical restraint in many locations

Second, the evidence plaintiffs put forth in connection with their motion for class certification does not show that all of the plaintiffs faced horizontal restraints ancillary to output-enhancing agreements. The reason the Court concluded that the plaintiff had adequately *alleged* a restraint that might be subject to quick look analysis is that plaintiff had alleged a horizontal restraint (albeit one that is ancillary to an output-enhancing agreement) by alleging that McOpCos compete directly with franchisees for labor. "[I]n the market for employees, the McDonald's franchisees and McOpCos *within a locale* are direct, horizontal competitors." *Deslandes, 2018 U.S. Dist. LEXIS 105260, 2018 WL 3105955 at 8* (emphasis added). In her complaint, plaintiff had alleged a provision of the franchise agreement that prohibited franchisees from hiring McDonald's Corp. employees within six months. That provision is part of a vertical franchise agreement (between franchisor and franchisee), but it is also a horizontal agreement because entities (McOpCos) owned by the franchisor (McDonald's Corp.) compete with the franchisees, both in selling hamburgers and in hiring employees.

At the class certification stage, plaintiffs want **[*28]** to certify a nationwide class. They have not, however, put forth evidence that McOpCos compete with franchisees in every part of the United States. Plaintiffs agree that only "5-10%" of the McDonald's restaurants were owned by McOpCos, but they do not say where those McOpCos operated. (Plfs. Brief at 3/Docket 268 at 9). The total number of McDonald's restaurant locations exceeds 14,000. (Docket 299 at 10). Record evidence shows that, as of 2015, only 900 out of 3000 franchisees (many of whom owned multiple locations) operated a McDonald's restaurant near a McOpCo-owned McDonald's restaurant. (King Dep. at 99/Docket 270-14 at 20). Defendants put forth evidence that in many parts (some twenty states) of the United States, no McDonald's restaurants are owned by McOpCos. (Murphy Rep. at p. 10). In locations where no McOpCos compete with franchisees, the hiring provision cannot be said to be horizontal.[5] In locations where only franchisees compete, the hiring provision is merely vertical. Vertical restraints are judged under the rule of reason. *Leegin Creative Leather Products, Inc. v. PSKS, Inc., 551 U.S. 877, 907, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007)*.

For all of these reasons, the Court must apply rule of reason analysis to this case. The upshot of applying rule of reason analysis to this case **[*29]** is that the question of whether defendants engaged in an unreasonable restraint of trade is not a common question. It cannot be answered for all of the members of the proposed class with the same evidence, because not all of the plaintiffs sold their services in the same relevant market.

Relevant market

Section 1 of the Sherman Antitrust Act, 15 U.S.C. § 1, "outlaw[s] only *unreasonable* restraints" of trade. *State Oil Co. v. Khan, 522 U.S. 3, 10, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997)* (emphasis added). The rule of reason, thus,:

> requires courts to conduct a fact-specific assessment of 'market power and market structure . . . to assess the [restraint]'s actual effect' on competition. The goal is to 'distinguis[h] between restraints with anticompetitive effect that are harmful to the consumer and restraints stimulating competition that are in the consumer's best interest.'

Ohio v. American Express Co., ___ U.S. ___, 138 S.Ct. 2274, 2284, 201 L. Ed. 2d 678 (2018) (citations omitted). To establish a claim under the rule of reason, a plaintiff must first "prove that the challenged restraint has a substantial anticompetitive effect that harms consumers *in the relevant market*" by either using "[d]irect evidence" of "actual detrimental effects . . . such as reduced output, increased prices, or decreased quality in the *relevant market*" or "[i]ndirect evidence" of "proof of market power plus some evidence that the **[*30]** challenged restraint harms competition." *AmEx, 138 S.Ct. at 2284* (emphasis added). The burden then shifts to the defendant "to show a procompetitive rationale for the restraint." *AmEx, 138 S.Ct. at 2284*. Finally, the "burden shifts back to the plaintiff to demonstrate that the procompetitive efficiencies could be reasonably achieved through less anticompetitive means." *AmEx, 138 S.Ct. at 2284*.

Thus, the definition of a relevant market is essential on a rule of reason claim. *AmEx, 138 S.Ct. at 2285* ("courts usually cannot properly apply the rule of reason without an accurate definition of the relevant market"); *Alston, 141 S.Ct. at 2158* ("Whether an antitrust violation exists necessarily depends on a careful analysis of market realities."). How precisely that relevant market must be defined depends on whether the alleged restraint is vertical or horizontal. In the case of vertical restraints, a relevant market must always be defined. *AmEx, 138 S.Ct. at 2285 n. 7*. That is because "[v]ertical restraints often pose no risk to competition unless the entity imposing them has market power, which cannot be evaluated unless the Court first defines the relevant market." *AmEx, 138 S.Ct. at 2285 n. 7*; *see also* *Republic Tobacco Co. v. North Atlantic Trading Co., Inc., 381 F.3d 717, 737 (7th Cir. 2004)* ("As horizontal agreements are generally more suspect than vertical agreements, we must be cautious about importing relaxed standards of proof from horizontal **[*31]** agreement cases into vertical agreement cases."). In some cases of

---

[5] Plaintiffs also put forth evidence that, in 2015, the McOpCos, after raising their starting wages by $1 per hour, decided not to hire employees from franchisees for a period of one year. Whether that constituted a unilateral act or a horizontal agreement in connection with a vertical relationship is not clear from the evidence. Even if it is the latter, it still would be horizontal only where McOpCos compete with franchisees, not nationwide.

horizontal restraint, the definition of the market can be somewhat less precise, although the general contours of the market must be apparent. AmEx, 138 S.Ct. at 2285 n. 7 ("Given that horizontal restraints involve agreements between competitors not to compete in some way, this Court concluded that it did not need to precisely define the relevant market to conclude that these agreements were anticompetitive.") (citing FTC v. Indiana Federation of Dentists, 476 U.S. 447, 460-61, 106 S. Ct. 2009, 90 L. Ed. 2d 445 (1986)). In *Indiana Federation of Dentists*, the Supreme Court did not require a precise definition of the relevant market, where it was clear the competitors had 100% of the market in one town and 67% in the other, "in light of the reality that markets for dental services tend to be relatively localized[.]" 476 U.S. at 460-61. In other words, "if a plaintiff *can show the rough contours of a relevant market*, and show that the defendant commands a substantial share of the market, then direct evidence of anticompetitive effects can establish the defendant's market power—in lieu of the usual showing of a precisely defined relevant market." Republic Tobacco, 381 F.3d at 737 (emphasis added) ("Economic analysis is virtually meaningless if it is entirely unmoored from at least a rough definition **[*32]** of a product and geographic market.").

Plaintiffs have made no attempt to identify a relevant market, beyond arguing that "the 'rough contours' are the service market for McDonald's restaurant workers," (Plfs. Reply at 3/Docket 346 at 10) as though a relevant market could be limited to one brand or as though all the plaintiffs live in one "company town." The evidence plaintiffs have put forth in an attempt to establish anticompetitive effects *assumes* that plaintiffs sell their labor in one national market, as does their proposed class definition.

Plaintiffs have not, however, put forth evidence that they sell their labor in a national market, and it defies logic to suppose that they do. *See* Ioana Marinescu & Herbert Hovencamp, "Anticompetitive Mergers in Labor Markets" 94 *Indiana Law Journal* 1031, 1048 ("The boundaries of labor markets are driven mainly by employee skills or training. Geographic markets are driven mainly by the location and mobility of current or prospective employees. . . . [A]pplications for a job decline rapidly with distance[.] . . . Traditional geographic markets for products are frequently defined in terms of shipping costs . . . Measuring geographic markets for **[*33]** labor is more complex. Commuting 'costs' include not merely the price of a subway ticket or gasoline, but also time and convenience, and these things frequently vary from one commuter to another."); *see also* Herbert J. Hovencamp, "Competition Policy for Labour Markets" (2019) *Faculty Scholarship at Penn Law*. 2090 at ¶ 12 ("most labour markets are geographically quite small, many of them no larger than the commuting range of employees.").

The Court has no doubt that national labor markets exist for certain jobs. The market for Chief Executive Officers is an obvious example. In the market for Chief Executive Officers, companies recruit nationally (or internationally), pay for the new hire to relocate and sometimes allow (or require) her to commute home via the company's private jet until she relocates. Likely, there are many other high-skill, high-earning jobs (such as dermatologist or computer engineer) for which the relevant market is essentially national or regional. That could be true in any labor market where positions are so highly-skilled or highly-paid that employers can recruit from across the nation, because the labor is worth enough to the employer to pay for relocation and/or **[*34]** the salary is sufficiently high to incentivize an employee to move. That is not, however, the market in which these plaintiffs offer their services. As this Court has previously said about the markets in which plaintiffs sell their labor:

> The relevant market for employees to do the type of work alleged in this case is likely to cover a relatively-small geographic area. Most employees who hold low-skill retail or restaurant jobs are looking for a position in the geographic area in which they already live and work, not a position requiring a long commute or a move. That is not to say that people do not move for other reasons and then attempt to find a low-skill job; the point is merely that most people do not search long distances for a low-skill job with the idea of then moving closer to the job.

Deslandes, 2018 U.S. Dist. LEXIS 105260, 2018 WL 3105955 at *8. Even looking at the rough contours of the relevant markets in which plaintiffs sell their labor suggests there are hundreds or thousands of local relevant markets in this case.

The evidence put forth at the class certification stage bears out the intuition that the proposed class members sell their labor in local geographic markets, generally within easy commuting distance. Defendants, for example, **[*35]** put forth evidence of McOpCos in Kearney, Nebraska that, in 2015, sought approval to increase starting wages from $9.00 per hour due to competition from local employers (which they listed as Arby's, KFC, Taco Bell, HyVee, Walmart, Hotels, Qdoba, Jimmy Johns, Applebees, Buffalo Wild Wings, Perkins, Burger King, Culvers and The Buckle), many of whom paid $10 per hour. (Docket 310-4 at 10-12). Defendants put forth evidence of franchisees' declaring that they compete for employees with local employers. [Docket 310-12 at 5 ("We sometimes offer raises to retain employees sought by other local employers, including quick-service restaurants like Wendy's and retail stores like Wal-Mart, among many others."); Docket 310-12 at 14 ("The McDonald's stores I oversee [in Orlando] compete for employees with the theme parks nearby, such as Disney and Universal, as well as Culver's, Wendy's, Chipotle, and other retail establishments."); Docket 310-12 at 21-22 ("The main competitors for labor in the Jacksonville market are the other quick service restaurants in the vicinity of our restaurants. Comparatively, the main competitors for labor in the Orlando market are the other quick service restaurants, **[*36]** as well as theme parks, Wal-Mart, Sam's Club, and Costco. . . . [W]e have offered raises to retain employees sought by other local employers. These employers include other quick-service restaurants, such as Krystals, LongHorn Steakhouses, KFCs, Papa John's, Panera Breads, Starbucks, Chick-fil-A's, Burger Kings, Little Caesars, Panda Expresses, Wendy's, and Fire House Subs—all of which (among others) are located throughout Jacksonville near the restaurants operated by [us]."; Docket 310-12 at 29 & 31 ("The main competitors for both workforce and customers to my McDonald's-brand restaurants in the Northern Kentucky region are other quick service restaurants such as Wendy's and Burger King." . . . "The turnover rate for my restaurants at the hourly crew person level is 139%. Most of the employees who leave fall into three categories: 1) Looking for a more specific shift (9:00 a.m. to 5:00 p.m. and/or no weekend shifts); 2) the company can provide more hours then we can; or 3) increased pay. For example, the local Amazon distribution center offers higher pay and more consistent weekly hours.")].

The expert opinions are consistent with that evidence. Even Dr. Peter Capelli ("Dr. Capelli"), **[*37]** one of plaintiffs' experts, recognized that crew members likely sell their labor in local markets. (Capelli Dep. at 235-36/Docket 302-1 at 608-09) ("My testimony is that for the restaurant employees in particular, the crew employees, there may be labor markets of different geographic size and that the key issue there might not even be size, it might be commuting distance."). Dr. McCrary said something similar. (McCrary Rep. at ¶ 288) ("McDonald's franchisees also report surveying competitors *in their geographic location* in order to set market-driven wages.") (emphasis added). Dr. Murphy, defendants' other expert (the admissibility of whose report plaintiffs did not challenge), similarly opined:

> For low-skilled and relatively low-wage workers, such as the majority of those in the putative class, evidence suggests that labor markets generally are local. Commuting time and costs likely are too high for distant employers to be reasonable alternatives for most employees. There are certain fixed time and monetary costs of relocating (finding a new place to live, moving children into new schools) and those costs likely are relatively high the lower the expected increased earnings from relocating. **[*38]** Given average wages at [quick service restaurants], and other employers that individual McDonald's restaurants consider to be their competitors, it is unlikely that employees will seek opportunities more than a few miles from where they reside.

(Dr. Murphy Rep. at ¶ 109). Dr. Hal J. Singer ("Dr. Singer"), plaintiffs' expert, calculated that only 8% of McDonald's employees commute ten or more miles to work. (Singer Rep. at ¶ 64/Docket 270-5 at 54). Thus, about 92% of McDonald's employees work within ten miles of home. The relevant market for each plaintiff's labor is a small, geographic area. There are likely hundreds or thousands of relevant markets among the class members.

Any given plaintiff can establish that the restraint is anticompetitive only by showing anticompetitive effects in the relevant market where she sells her labor. Those markets vary by plaintiff, which means this is not a question that can be answered with common evidence. It is simply not a question that is common to a nationwide class. To be sure, this might be a common question as to the subset of plaintiffs who work in each of the respective relevant markets across the country. For example, this is likely a common **[*39]** question as to every plaintiff in the relevant market of, say, the Chicago Loop (which relevant market perhaps includes areas within a mile or two radius thereof). It is not, however, a common question as to the nationwide class these plaintiffs ask to certify. Plaintiffs do not seek to certify smaller subclasses.

The issue of anticompetitive effects in relevant markets will predominate. It will undoubtedly be true that in some relevant markets, McDonald's restaurants will have so many competitors for labor that the restraint will have no anticompetitive effect. In other markets, McOpCos and franchisees may have so little outside competition for employees that the restraint will impact the market. The anticompetitive effects of the restraint will have to be judged separately for each of the hundreds (or thousands) of relevant markets, and that will be the predominant issue, especially if, as plaintiffs assert, antitrust impact is a common question (an issue this Court need not address).[6]

The proposed class does not meet the predominance requirement of *Rule 23(b)*.

3. Adequacy

Rule 23(a)'s requirement that "the representative parties will fairly and adequately protect the interests of the class," **[*40]** has two components: the adequacy of the named plaintiffs and the adequacy of proposed class counsel. *See* *Gomez v. St. Vincent Health, Inc., 649 F.3d 583, 592 (7th Cir. 2011)* (citations omitted).

One of the reasons why courts insist that class counsel be adequate is:

> the incentive of class counsel, in complicity with the defendant's counsel, to sell out the class by agreeing with the defendant to recommend that the judge approve a settlement involving a meager recovery for the class but generous compensation for the lawyers[.]

Creative Montessori Learning Centers v. Ashford Gear LLC, 662 F.3d 913, 918 (7th Cir. 2011). The Seventh Circuit recognizes:

> There is . . . a much greater conflict of interest between the members of the class and the class lawyers than there is between an individual client and his lawyer. The class members are interested in relief for the class but the lawyers are interested in their fees, and the class members' stakes in the litigation are too small to motivate them to supervise the lawyers in an effort to make sure that the lawyers will act in their best interests.

Thorogood v. Sears, Roebuck and Co., 547 F.3d 742, 744 (7th Cir. 2008) (citations omitted). That is of "particular significance" where class members "lack both the monetary stake and the sophistication in legal and commercial matters that would motivate and enable them to monitor the efforts of class counsel on their behalf." **[*41]** *Creative Montessori, 662 F.3d at 917*.

Accordingly, "[a]nything 'pertinent to counsel's ability to fairly and adequately represent the class,'" bears "on the class certification decision." *Reliable Money Order, Inc. v. McKnight Sales Co., Inc., 704 F.3d 489, 498 (7th Cir. 2013)* (citations omitted). Among other things, a court "must . . . consider counsel's work on the case to date." *Reliable Money Order, 704 F.3d at 498 n. 7*; *see also* *Nagel v. ADM Investor Services, Inc., 65 F. Supp.2d 740, 746 (N.D. Ill. 1999)* (Easterbrook, J.) ("One important part of a judge's job under *Rule 23* is to protect putative class members from self-appointed champions whose work is not up to snuff.").

---

[6] Because the Court has determined that the question of whether the restraint caused anticompetitive effects in the hundreds (or thousands) of relevant markets will predominate, the Court need not consider whether the question of antitrust impact is a common question. (It is difficult, though, to imagine that it could be a common question, as opposed to a question that would need to be answered separately for each relevant market. Each person's injury is the amount his or her wages were suppressed multiplied by the hours worked. The amount each person's wages are suppressed will almost certainly vary depending on the amount of labor market power McDonald's possessed in each relevant market. *See, e.g.* *State of Ala. v. Blue Bird Body Co., Inc., 573 F.2d 309, 327-28 (5th Cir. 1978)* ("This proof of injury in a price-fixing case will generally consist of some showing by the plaintiff that, as a result of this conspiracy, he had to pay supracompetitive prices for school buses. . . . [W]e do not understand how the plaintiffs can make this proof without examining the relevant school bus market where each individual plaintiff is located.").) Because the Court need not consider whether impact is a common question, the Court need not decide whether to exclude the report and testimony of plaintiff's expert, Dr. Singer. *See* *Messner, 669 F.3d at 812* ("When an expert's report or testimony is 'critical to class certification,' we have held that a district court must make a conclusive ruling on any challenge to that expert's qualifications or submissions before it may rule on a motion for class certification."). Here, the outcome of this motion is the same with or without Dr. Singer's report and testimony. The same is true as to the report and testimony of Dr. Capelli.

Even were it not the case that individual issues will predominate, the Court would be hesitant to certify the proposed class. One unusual aspect of this case is that, while plaintiffs cannot prevail as class, they could lose as one. That owes to the fact that counsel for the named plaintiff made a strategic decision early in this case not to amend the complaint to add a claim under the rule of reason. If the Court certified a nationwide class (which, again, would not be appropriate for the reasons outlined above), it would be to the great detriment of the class. The class members would lose on a rule-of-reason claim, because their attorneys waived it.[7] Dr. Singer, plaintiffs' expert, calculated aggregate class damages at $2.74 billion. (Singer Rep. at ¶ 5/Docket **[*42]** 270-5 at 9). It is no surprise, then, that attorneys might take a shot at a nationwide-class jackpot (of which they might hope to collect a third, which is about $913,000,000.00) rather than propose a small, local class under the rule of reason. The reward to any given plaintiff would likely be quite similar whether he proceeded as part of a small, local class or a massive nationwide class. Only the lawyers had something to gain by foregoing a claim under the rule of reason, which makes one wonder whether the attorneys were looking out mostly for themselves when they chose not to amend to add a claim under the rule of reason. Perhaps these attorneys took a gamble, choosing not to pursue a rule-of-reason claim in the hopes of the huge reward of certifying a nationwide class under quick-look analysis. Such a self-interested decision would not instill confidence that the attorneys would adequately represent the class.

This case will not proceed as a class action.[8] When plaintiff filed her complaint, it "toll[ed] the applicable statute of limitations for all persons encompassed by the class complaint." *China Agritech, Inc. v. Resh, __ U.S. __, 138 S.Ct. 1800, 1804, 201 L. Ed. 2d 123 (2018)* (citing *American Pipe & Constr. Co. v. Utah, 414 U.S. 538, 94 S. Ct. 756, 38 L. Ed. 2d 713 (1974)*); *see also* *Collins v. Village of Palatine, Ill., 875 F.3d 839, 843 (7th Cir. 2017)* ("the filing of a proposed class action immediately **[*43]** pauses the running of the statute of limitations for all class members."). Each class member remains free to pursue his or her own claim. *China Agritech, 138 S.Ct. at 1810*.

III. CONCLUSION

For all of these reasons, plaintiffs' motions [268, 269] for class certification are denied. Defendants' *Daubert* motions [301, 307] to exclude the expert testimony of Dr. Singer are denied (without prejudice) as moot, and defendants' *Daubert* motions [300, 304] to exclude the expert testimony of Dr. Capelli are denied (without prejudice) as moot. Plaintiff's unopposed motion [288] to file supplemental **[*44]** expert report is granted. Defendants' motion to [348] file surreply is granted.

This case is set for status hearing on October 5, 2021 at 9:30 a.m.

SO ORDERED.

---

[7] One might think this would have prompted defendants to consent to certification of a class, such that they could win with one fell swoop. *Thomas v. UBS AG, 706 F.3d 846, 850 (7th Cir. 2013)* ("[Defendant] opposed [class] certification even though a defendant with a winning case has much to gain from it—the judgment for a defendant will be *res judicata* in any suit by a class member who had not opted out of the class, provided 'that the named plaintiff at all times adequately represent the interests of absent class members.'") (citation omitted). Perhaps defendants assume most plaintiffs will opt out of a doomed-to-fail class. In any case, defendants do not want a nationwide class certified, and they will get their wish.

[8] The problems discussed above are not the only problems with the proposed class definition. As defendants point out, the proposed class is overly broad in that it contains individuals who could not have been injured by the alleged wrongful conduct. "[I]f the [class] definition is so broad that it sweeps within it persons who could not have been injured by the defendant's conduct, it is too broad." *Kohen v. Pacific Inv. Mgt. Co., LLC, 571 F.3d 672, 677 (7th Cir. 2009)*; *Messner, 669 F.3d at 824* ("If, however, a class is defined so broadly as to include a great number of members who for some reason could not have been harmed by the defendant's allegedly unlawful conduct, the class is defined too broadly to permit certification."). Here, plaintiffs challenge a hiring restriction that applies only to current employees or employees who have left in the past six months. It can have no effect on new hires or on employees within the first few weeks of work. More than 2% of new hires leave within two weeks. More than 11% leave within a month. More than 20% leave within two months. (Figure 12 of Dr. Murphy Rep. at p. 67). It is clear the proposed class definition was too broad, but the Court need not decide by what degree.

ENTERED: July 28, 2021

/s/ Jorge Alonso

HON. JORGE ALONSO

United States District Judge

Yanagi v. Bank of Am., N.A. (In re Herrero)

United States Bankruptcy Court for the District of Hawaii

July 28, 2021, Decided

Case No. 10-02991, Chapter 7, Adv. Pro. No. 21-90005

Reporter
2021 Bankr. LEXIS 1995 *; 2021 WL 3195802

LexisNexis® Headnotes

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN1[] **Motions to Dismiss, Failure to State Claim**

To survive a motion to dismiss, a complaint must contain sufficient factual matter to state a claim to relief that is plausible on its face. A *Fed. R. Civ. P. 12(b)(6)* dismissal may be based on either a lack of a cognizable legal theory or the absence of sufficient facts alleged under a cognizable legal theory. When ruling on a *rule 12(b)(6)* motion, a court must construe the complaint in the light most favorable to the plaintiff and accept all well-pleaded factual allegations as true.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN2[] Motions to Dismiss, Failure to State Claim

The key is whether the allegations are well-plead; a court is not bound by conclusory statements, statements of law, or unwarranted inferences cast as factual allegations. While a complaint attacked by a *Fed. R. Civ. P. 12(b)(6)* motion to dismiss does not need detailed factual allegations, a plaintiff's obligation to provide the grounds' of his entitlement to relief requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do.

Civil Procedure > ... > Affirmative Defenses > Statute of Limitations > Federal Preemption

Governments > Legislation > Statute of Limitations > Time Limitations

Governments > Legislation > Statute of Limitations > Tolling

HN3[] Statute of Limitations, Federal Preemption

A federal court hearing claims under state law applies the substantive law of the state, including the state's statute of limitations. Federal courts must abide by a state's tolling rules, which are integrally related to statutes of limitations.

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > Erie Doctrine

Governments > Courts > Judicial Precedent

HN4[] Federal & State Interrelationships, Erie Doctrine

When interpreting state law, federal courts are bound by decisions of the state's highest court. In the absence of such a decision, a federal court must predict how the highest state court would decide the issue using intermediate appellate court decisions, decisions from other jurisdictions, statutes, treatises, and restatements as guidance.

Civil Procedure > ... > Statute of Limitations > Tolling of Statute of Limitations > Class Actions

Governments > Legislation > Statute of Limitations > Tolling

HN5[] Tolling of Statute of Limitations, Class Actions

Under the class action tolling rule, the commencement of a class action suspends the applicable statute of limitations as to all asserted members of the class who would have been parties had the suit been permitted to continue as a class action. The Hawaii Supreme Court has adopted the class action tolling rule and has also approved so-called cross-jurisdictional tolling, under which the pendency of a class action in federal court tolls the statute of limitations for purposes of a subsequent state court action.

Civil Procedure > ... > Statute of Limitations > Tolling of Statute of Limitations > Class Actions

Governments > Legislation > Statute of Limitations > Tolling

Civil Procedure > ... > Class Actions > Class Members > Named Members

HN6[] Tolling of Statute of Limitations, Class Actions

Courts have developed three different approaches to whether class action tolling applies where the named plaintiffs in the putative class action lack standing. Courts following the first approach maintain that the filing of a class action does not satisfy American Pipe's requirements when the putative class representative lacks standing. Courts following the second approach reason that a suit on a claim that the claimant had no power to bring still functions to give a defendant notice of whatever causes of action are asserted therein, so the named plaintiff's lack of standing has no effect. Courts following the third, middle-ground, approach will not apply class action tolling to later claims brought by putative class members if the class representative's lack of standing was clear from the pleadings. Courts employ the middle-ground approach for two reasons: one, if it is clear from the face of the complaint that the plaintiff lacks standing, the defendant may not be notified of the substantive claims against it, and two, any putative class members who argue reliance upon that filing would be allowed, effectively, to sleep on their rights.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Statute of Limitations > Tolling of Statute of Limitations > Class Actions

Civil Procedure > ... > Voluntary Dismissals > Court Order > Dismissal With Prejudice

HN7[] Class Actions, Certification of Classes

Tolling continues on appeal from a dismissal with prejudice only when a class has been certified. The limitations clock resumes when a noncertified class claim is dismissed with or without prejudice.

Civil Procedure > ... > Statute of Limitations > Tolling of Statute of Limitations > Class Actions

Governments > Legislation > Statute of Limitations > Tolling

HN8[] Tolling of Statute of Limitations, Class Actions

Federal courts have stressed that the class action tolling rule does not leave a plaintiff free to raise different or peripheral claims. When a plaintiff invokes American Pipe in support of a separate lawsuit, the district court should take care to ensure that the suit raises claims that concern the same evidence, memories, and witnesses as the subject matter of the original class suit, so that the defendant will not be prejudiced.

Civil Procedure > Judgments > Entry of Judgments > Compelling Specific Acts

HN9[] Entry of Judgments, Compelling Specific Acts

Haw. R. Civ. P. 15 seeks to balance the plaintiff's interest in having all of its claims against the defendant decided in a single action with the defendant's interest in receiving timely notice of the claims against it.

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Relation Back

HN10[] Amendment of Pleadings, Relation Back

Haw. R. Civ. P. 15 allows an amended pleading to relate back to the date of the original pleading when the claim or defense asserted in the amended pleading arose out of the conduct, transaction, or occurrence set forth or attempted to be set forth in the original pleading.

Civil Procedure > ... > Statute of Limitations > Tolling of Statute of Limitations > Class Actions

Governments > Legislation > Statute of Limitations > Tolling

HN11[] **Tolling of Statute of Limitations, Class Actions**

At most, the class action tolling rule requires the claims asserted in the original and subsequent actions to be the same; the relief requested need not be identical.

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Relation Back

HN12[] **Amendment of Pleadings, Relation Back**

Under *Haw. R. Civ. P. 15(c)*, any amendment requiring additional evidentiary proof which was not reasonably foreseeable from the earlier pleadings should be deemed to contain a new occurrence. If the rule were otherwise, parties may have to gather the evidence after it has dissipated and this would directly contravene the purpose of the statute.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Torts > Business Torts > Unfair Business Practices > Defenses

Governments > Legislation > Statute of Limitations > Time Limitations

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN13[] **Trade Practices & Unfair Competition, State Regulation**

Under *Haw. Rev. Stat. § 480-24*, unfair and deceptive trade practices and unfair methods of competition claims are subject to a four-year statute of limitations.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Civil Rights Law > Protection of Rights > Procedural Matters > Continuing Violations

Torts > ... > Settlements > Releases From Liability > Validity

Governments > Legislation > Statute of Limitations > Time Limitations

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > State Regulation

HN14[] **Remedies, Damages**

Under Haw. Rev. Stat. § 480-24(a), a cause of action for a continuing violation is deemed to accrue at any time during the period of the violation. A continuing violation is a continuing pattern of related improper conduct. To allege a continuing violation under federal ***antitrust law*** in the Ninth Circuit, a plaintiff must allege that a defendant completed an overt act during the limitations period that is (1) a new and independent act that is not merely a reaffirmation of a previous act and (2) inflicts new and accumulating injury on the plaintiff.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

Governments > Legislation > Interpretation

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > State Regulation

HN15[] **Public Enforcement, State Civil Actions**

Haw. Rev. Stat. § 480-3 directs that this chapter shall be construed in accordance with judicial interpretations of similar federal antitrust statutes.

Governments > Legislation > Statute of Limitations > Time Limitations

HN16[] **Statute of Limitations, Time Limitations**

Under Hawaii law, a claim that a deed is void is not subject to a statute of limitations.

Governments > Legislation > Statute of Limitations > Time Limitations

HN17[] **Statute of Limitations, Time Limitations**

Under Hawaii law, the proper standard to determine the relevant limitations period is the nature of the claim or right, not the form of the pleading. Different limitations periods may apply to different claims, even when they are stated in the same count and arise from the same transaction.

Governments > Legislation > Interpretation

HN18[] **Legislation, Interpretation**

The Hawaii Supreme Court has often stated that the fundamental starting point for statutory interpretation is the language of the statute itself. Where the statutory language is plain and unambiguous, a court's sole duty is to give effect to its plain and obvious meaning.

Governments > Legislation > Statute of Limitations > Time Limitations

HN19[] **Statute of Limitations, Time Limitations**

Under Hawaii law, a twenty-year limitations period applies to actions to recover possession of any lands, or make any entry thereon, while a six-year limitations period applies to actions for the recovery of any debt founded upon any contract, obligation, or liability and personal actions of any nature whatsoever not specifically covered by the laws of the State. A personal action, or action in personam, is one where the judgment will impose a personal liability or obligation and does not affect the nature of the parties' interest in property.

Governments > Legislation > Statute of Limitations > Time Limitations

Real Property Law > Financing > Foreclosures > Deficiency Judgments

HN20[] **Statute of Limitations, Time Limitations**

As the Hawaii Supreme Court has held, a mortgagee can foreclose on a mortgage if within the statute of limitations for real actions, but cannot recover a money judgment on the underlying note. The mortgagee may not collect a deficiency judgment in those circumstances, either, illustrating that the only timely claim is against the land.

Real Property Law > Title Quality > Adverse Claim Actions > Quiet Title Actions

HN21[] **Adverse Claim Actions, Quiet Title Actions**

In an action to quiet title under Hawaii law, a plaintiff must at least prove that he has a substantial interest in the property and that his title is superior to that of the defendants. The tender rule requires a borrower, in bringing a quiet title action, to allege that he has paid, or is able to tender, the amounts owed.

Bankruptcy Law > Procedural Matters > Adversary Proceedings > Causes of Action

Civil Procedure > Judicial Officers > Judges > Discretionary Powers

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

Bankruptcy Law > Procedural Matters > Adversary Proceedings > Commencement of Adversary Proceedings

HN22[] **Adversary Proceedings, Causes of Action**

Fed. R. Civ. P. 15 applies in adversary proceedings through *Fed. R. Bankr. P. 7015*. Under *Rule 15*, after a brief period in which a party may amend as of right, leave to amend lies within the sound discretion of the trial court.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

HN23[] **Motions to Dismiss, Failure to State Claim**

The U.S. Court of Appeals for the Ninth Circuit has stated that, in dismissing for failure to state a claim under *Fed. R. Civ. P. 12(b)(6)*, a district court should grant leave to amend even if no request to amend the pleading was made, unless it determines that the pleading could not possibly be cured by the allegation of other facts. While leave to amend shall be freely given when justice so requires, futile amendments should not be permitted.

ORDER GRANTING IN PART AND DENYING IN PART DEFENDANTS' MOTION TO DISMISS

In this adversary proceeding, Plaintiffs Richard A. Yanagi, as trustee of the chapter 7 bankruptcy estate of Myrna M. Herrero, and Fredrick A. Mendoza assert claims against two groups of defendants: Counts I and II state claims against Bank of America, N.A. ("BANA") and Mortgage Electronic Registration Systems, Inc. ("MERS"), and Count III states claims against Joel Brandon Villamor, Julia Kelly, and Prospect Mortgage, LLC ("the QTE Defendants"). The Plaintiffs' claims arise out of the allegedly wrongful nonjudicial foreclosure of real property belonging to Ms. Herrero and Mr. Mendoza (the "Property").

BANA and MERS move to dismiss the complaint, arguing that the Plaintiffs' claims are untimely under the applicable statutes of limitations, that the mortgage held by MERS has been released, and that the Plaintiffs have not proven their ability to tender the amount of the indebtedness on the real property, which is required to state a claim for wrongful foreclosure.

For the reasons described below, I will GRANT the motion in part and DENY it in part.

I. **BACKGROUND**[1]

A. **Foreclosure**

Ms. Herrero and Mr. Mendoza owned **[*3]** real property in Eleele, Hawaii. In August 2009, the mortgage on their property was assigned to BAC Home Loans Servicing, L.P ("BAC"). On June 24, 2010, BAC purportedly conducted a public auction of the Property.[2] BAC submitted the highest bid at the June 24 auction as a credit bid on behalf of

[1] The facts recited below are mostly taken from the complaint, the allegations of which I must accept as true for purposes of this motion. *See* *Broam v. Bogan, 320 F.3d 1023, 1028 (9th Cir. 2003)*.

[2] Compl. ¶ 36, ECF No. 1.

the Federal National Mortgage Association ("Fannie Mae"), which held a beneficial interest in the note and mortgage.[3]

On July 9, 2010, BAC's attorney executed a Mortgagee's Affidavit of Foreclosure Under Power of Sale pertaining to the foreclosure of the mortgage and sale of the Property.[4] The foreclosure affidavit was recorded in the Bureau of Conveyances on July 19, 2010.[5] On July 27, 2010, BAC executed a "Mortgagee's Quitclaim Deed Pursuant to Power of Sale" conveying the Property to Fannie Mae.[6] On August 6, 2010, the quitclaim deed was recorded.[7]

In July 2011, BAC merged into BANA and BANA assumed all of BAC's obligations and liabilities existing at the time of the merger.[8]

The Property changed hands several times until it was finally conveyed to Defendants Villamor and Kelly by warranty deed on February 19, 2016.[9] On February 20, 2016, Mr. Villamor and Ms. Kelly executed a mortgage **[*4]** on the Property in favor of MERS.[10] On March 15, 2021, a Release of Mortgage was recorded whereby MERS acknowledged full payment and satisfaction of the mortgage.

B. **Bankruptcy Case and** ***Degamo*** **Class Action**

On September 29, 2010, Ms. Herrero filed her chapter 7 bankruptcy petition. She did not list claims against BANA in her bankruptcy schedules.[11] On December 28, 2010, she obtained a chapter 7 discharge and her case was closed.[12]

Ms. Herrero was allegedly a class member in a putative class action entitled *Degamo v. Bank of America, N.A.*, filed in state court on September 7, 2012[13] and removed to federal district court on March 25, 2013.[14] The plaintiffs in *Degamo* asserted claims against BANA for wrongful nonjudicial foreclosure in violation of *Haw. Rev. Stat. § 667-5* and unfair or deceptive acts or practices or unfair methods of competition under *Haw. Rev. Stat. chapter 480*.[15] MERS was not a defendant in the class action.

On September 22, 2017, one of the named plaintiffs, Milagros Juan Degamo, was dismissed from the class action.[16] The court dismissed the *Degamo* class action with prejudice on March 14, 2019, because the remaining named plaintiffs lacked prudential standing as a result of prior bankruptcy filings. **[*5]** [17]

On December 31, 2020, Ms. Herrero moved to reopen her chapter 7 case to add her claim against BANA and others arising from the nonjudicial foreclosure sale to her bankruptcy schedules.[18] I entered an order granting the motion on January 4, 2021,[19] and Richard A. Yanagi was appointed as the chapter 7 trustee on January 7, 2021.[20]

C. **The Adversary Complaint and Motion to Dismiss**

Mr. Mendoza and Trustee Yanagi filed their adversary complaint, commencing this proceeding, on February 9, 2010.[21] Count I of the complaint alleges that BANA's foreclosure of the Property did not comply with *section 667-5* and the power of sale in the mortgage.[22] Count II alleges that BANA engaged in unfair and deceptive trade practices ("UDAP") and unfair methods of competition ("UMOC") in violation of *Haw. Rev. Stat. chapter 480*.[23] Count III is a claim for quiet title and ejectment against the QTE Defendants.

On March 22, 2021, BANA and MERS filed this motion, arguing that the complaint should be dismissed under *Fed. R. Civ. P. 12(b)(6)*, made applicable by *Fed. R. Bankr. P. 7012(b)*.[24] The remaining QTE Defendants joined in the motion on March 24, 2021.[25] The motion came for hearing on May 14, 2021. Van-Alan H. Shima appeared for the Plaintiffs and Patricia J. McHenry appeared for BANA and MERS.

II. **STANDARD [*6]**

28 *Broam v. Bogan, 320 F.3d 1023, 1028 (9th Cir. 2003)*.

HN2[] The key is whether the allegations are well-plead; a court is not bound by conclusory statements, statements of law, or unwarranted inferences cast as factual allegations.[29] "While a complaint attacked by a Rule 12(b)(6) motion to dismiss does not need detailed factual allegations, a plaintiff's obligation to provide the 'grounds' of his 'entitlement to relief' requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do."[30]

B. **Statutes of Limitations and Tolling Based on State Law**

HN3[] A federal court hearing claims under state law applies the substantive law of the state, including the state's statute of limitations.[31] "Federal courts must abide by a state's tolling rules, which **[*7]** are integrally related to statutes of limitations."[32]

HN4[] "When interpreting state law, federal courts are bound by decisions of the state's highest court. 'In the absence of such a decision, a federal court must predict how the highest state court would decide the issue using intermediate appellate court decisions, decisions from other jurisdictions, statutes, treatises, and restatements as guidance.'"[33]

III. DISCUSSION

A. **Class Action Tolling**

HN5[] Under the class action tolling rule, "the commencement of a class action suspends the applicable statute of limitations as to all asserted members of the class who would have been parties had the suit been permitted to continue as a class action."[34] The Hawaii Supreme Court has adopted the class action tolling rule[35] and has also approved so-called "cross-jurisdictional tolling," under which the pendency of a class action in federal court tolls the statute of limitations for purposes of a subsequent state court action.[36]

1. End of Class Action Tolling

BANA claims that class action tolling ended on September 22, 2017, when the last plaintiff with prudential standing was dismissed from *Degamo*. The Plaintiffs argue that the statute of limitations still has **[*8]** not begun to run because the judgment in *Degamo* was vacated in part and no class certification motion has yet been denied.[37]

[37] Compl. ¶ 12 n.1, ECF No. 1. After the Plaintiffs commenced this adversary proceeding, the Ninth Circuit Court of Appeals affirmed the district court's denial of the plaintiffs' bankruptcy trustees' ratification of the action, substitution of the bankruptcy

To decide when tolling ended, I must predict (1) whether the Hawaii Supreme Court would apply class action tolling where the named plaintiffs lacked standing to bring their claims, and (2) whether the court would continue to apply class action tolling after a putative class action is dismissed where the dismissal is appealed. There is no controlling Hawaii Supreme Court precedent on these questions.

Answering the first issue, I predict that the Hawaii Supreme Court would apply class action tolling where the named plaintiffs' lack of standing is not clear from the face of the complaint.

HN6[] Courts have developed three different approaches to whether class action tolling applies where the named plaintiffs in the putative class action lack standing.[38] Courts following the first approach maintain that the filing of a class action does not satisfy *American Pipe*'s requirements when the putative class representative lacks standing.[39] Courts following the second approach reason that a suit on a claim that the claimant had no power to bring still functions "to give a defendant notice **[*9]** of whatever causes of action are asserted therein," so the named plaintiff's lack of standing has no effect.[40] Courts following the third, "middle-ground," approach will not apply class action tolling to later claims brought by putative class members if the class representative's lack of standing was clear from the pleadings. Courts employ the middle-ground approach for two reasons: one, if it is clear from the face of the complaint that the plaintiff lacks standing, the defendant may not be notified of the substantive claims against it, and two, "any putative class members who argue reliance upon that filing would be allowed, effectively, to sleep on their rights."[41]

Of the three approaches, I believe the middle-ground approach is most consistent with the Hawaii Supreme Court's holdings in *Patrickson* and *Levi*.[42] This approach strikes a balance between "[t]he primary purpose of a statute of limitations," which "is to compel the exercise of a right of action within a reasonable time so that the opposing party has a fair opportunity to defend" and a major purpose of a class action suit, which is "to prevent multiplicity of actions, thereby preserving the economies **[*10]** of time, effort and expense."[43]

A member of the proposed class in *Degamo* would not have known that the named plaintiffs lacked standing from the face of the complaint. Conversely, BANA received notice of the claims pending against it when plaintiffs with Article III standing and without any facially clear defects in prudential standing filed a complaint.[44] It is therefore fair to make BANA defend against these claims now. Thus, class action tolling did not end on September 7, 2012, when the last plaintiff with prudential standing was dismissed from *Degamo*.

In response to the second question, I predict that the Hawaii Supreme Court would end class action tolling after the trial court dismisses all claims in a non-certified putative class action, even if the dismissal is appealed.

---

trustees for the plaintiffs, and leave to file a second amended complaint. The court vacated the district court's denial of the motions to intervene by five members of the putative class and remanded the matter. *Degamo v. Bank of Am., 849 F. App'x 620 (9th Cir. 2021)*.

[39] *Id.*

[40] *Id.* (quoting *Rose v. Ark. Valley Env't & Util. Auth., 562 F. Supp. 1180, 1193 (W.D. Mo. 1983)*).

[41] *Id.*

[42] *Patrickson v. Dole Food Co., 137 Haw. 217, 368 P.3d 959, 970 (Haw. 2015)*; *Levi v. Univ. of Hawaii, 67 Haw. 90, 679 P.2d 129, 132 (Haw. 1984)*.

[43] *Levi, 679 P.2d at 131-32*.

[44] *See id. at 132* ("The filing of a class action within the statute of limitations places a defendant on notice of the subject matter and size of the prospective litigation.").

HN7[] In *Taylor v. United Parcel Service, Inc.*, the Fifth Circuit Court of Appeals held that tolling continues on appeal from a dismissal with prejudice only when a class has been certified.[45] The *Taylor* court emphasized "the distinction between putative members of an uncertified class and members of a certified class in determining the application of tolling principles."[46] Following *Taylor*, the Seventh Circuit Court of **[*11]** Appeals held in *Collins v. Village of Palatine* that "the limitations clock resumes when a *noncertified* class claim is dismissed with or without prejudice."[47] In *Bermudez Chavez v. Occidental Chemical Corporation*, the New York Court of Appeals also held that tolling ends upon clear dismissal of a putative class action.[48] It reasoned that, "[u]nder those circumstances, future plaintiffs are on notice that they must take steps to protect their rights because the litigation no longer compels the court to address class certification or the named plaintiffs to advance absent class members' interests. . . ."[49]

Because the Hawaii Supreme Court based its adoption of the class action tolling rule on federal law, I believe it likely that the Hawaii Supreme Court would adopt the majority rule among federal courts when determining when to end class action tolling. The rule has also found traction with state courts. Therefore, I predict that, in these circumstances, the Hawaii Supreme Court would hold the appeal of *Degamo* did not extend tolling because the district court never certified it as a class action. Based on both of my predictions of state law, I hold that tolling ended on March 14, 2019.

Assuming **[*12]** that the Plaintiffs' claims accrued on the date of the foreclosure sale, June 24, 2010, the statute of limitations ran for two years, two months, and thirteen days until it was tolled by the filing of *Degamo* on September 7, 2012. Applying class action tolling until *Degamo* was dismissed on March 14, 2019, the statute ran for another one year, ten months, and twenty-five days before the adversary complaint was filed on February 9, 2021. By this calculation, the statute of limitations ran for about four years and one month, well within the six-year limitations period applicable to the Plaintiffs' wrongful foreclosure claims.

2. Scope of Tolling

BANA argues that the Plaintiffs' requests for restitution-and rescission-based damages, additional allegations of BANA's wrongful conduct in subparagraphs 61(a), (g), and (h) of Count I, and additional allegations of wrongful conduct in paragraph 81 of Count II are outside the scope of class action tolling. I agree in part and disagree in part for reasons I will describe below.

a. **Measures of Damages**

HN8[] Federal courts have stressed that the class action tolling rule "does not leave a plaintiff free to raise different or peripheral claims."[50] "[W]hen a plaintiff **[*13]** invokes *American Pipe* in support of a separate lawsuit, the district court should take care to ensure that the suit raises claims that 'concern the same evidence, memories, and witnesses as the subject matter of the original class suit,' so that 'the defendant will not be prejudiced.'"[51]

[45] *554 F.3d 510, 520-21 (5th Cir. 2008)*.

[46] *Id. at 517*.

[47] *875 F.3d 839, 845 (7th Cir. 2017)* (emphasis added).

[48] *35 N.Y.3d 492, 132 N.Y.S.3d 224, 158 N.E. 3d 93, 104 (N.Y. 2020)*.

[49] *Id.*

[50] *Williams v. Boeing Co., 517 F.3d 1120, 1136 (9th Cir. 2008)* (quoting *Crown, Cork & Seal Co. v. Parker, 462 U.S. 345, 352-53, 103 S. Ct. 2392, 76 L. Ed. 2d 628 (1983)*) (cleaned up).

[51] *Crown, Cork & Seal, 462 U.S. at 355* (Powell, J., concurring) (quoting *Am. Pipe, 414 U.S. at 561* (Blackmun, J., concurring)).

"There is no consensus on whether class action tolling is available only as to claims that are identical to those asserted in the initial putative class action."[52] For some courts, a common legal and factual nexus is sufficient to allow tolling.[53] In contrast, the Ninth Circuit Court of Appeals requires that the causes of action be "identical."[54] But there is no precedent from the Hawaii Supreme Court directly on point, and it is Hawaii state law that controls this inquiry.

I predict that the Hawaii Supreme Court would not require exact identity of claims and would instead consider whether "new claims" would relate back to the class action complaint if they were alleged in an amended pleading in the same action under *Haw. R. Civ. P 15(c)*.[55] ***HN9***[] That rule seeks to balance the plaintiff's interest in having all of its claims against the defendant decided in a single action with the defendant's **[*14]** interest in receiving timely notice of the claims against it. These are the same factors that the Hawaii Supreme Court analyzed when it adopted the class action tolling rule.[56]

I disagree with BANA's assertion that the additional measures of damages requested by the Plaintiffs "would not relate back if alleged in a new pleading in the same action, let alone be tolled under *American Pipe*."[57] ***HN11***[] At most, the class action tolling rule requires the *claims* asserted in the original and subsequent actions to be the same; the *relief* requested need not be identical.[58]

The Hawaii Supreme Court's holding in *Mauian Hotel* is instructive. There, an insurer, on behalf of third-party plaintiff Napili-Kai, amended its answer to add a claim against another third-party plaintiff, Austin, Smith & Associates, Inc.[59] The amendment referred to some factual allegations in the earlier pleadings, but it "also contained additional allegations of fact to support its claim for [property damages]."[60] Austin, Smith & Associates asserted the statute of limitations as an affirmative defense and moved for summary judgment.[61] The lower court granted the motion and Napili-Kai appealed.[62]

When this is so[,] later-filed claims may relate back, even if they rest on a different legal theory . . . .").

[59] ***481 P.2d at 312***.

[60] ***Id. at 314***.

[61] ***Id. at 312***.

[62] *Id.*

To decide whether the new allegations **[*15]** "alter[ed] the fact situation to such an extent that the subsequent claim [arose] not out of the original occurrence but instead out of another,"[63] the *Mauian Hotel* court looked to the policy behind Hawaii's *rule 15(c)*:

> *Rule 15(c)* assumes that pleading the occurrence will properly notify the other party of what evidence to gather. . . . ***HN12***[] [U]nder *15(c)* ***any amendment requiring additional evidentiary proof which was not reasonably foreseeable from the earlier pleadings*** should be deemed to contain a new occurrence. If the rule were otherwise, parties may have to gather the evidence after it has dissipated and . . . this would directly contravene the purpose of the statute.[64]

The court found that "the subsequent claim [arose] out of a new occurrence and not the one originally described."[65] "[N]othing in the original pleadings even hinted at the subsequently alleged damage to Napili-Kai's property" and "the allegation of injury to the Napili-Kai Hotel raise[d] numerous possible evidentiary questions."[66] Therefore, the court held that the subsequent claim did not relate back under *rule 15(c)*.

Here, unlike in *Mauian Hotel*, the Plaintiffs' requests for damages measured on principles of restitution and rescission do not require **[*16]** additional evidence that was not reasonably foreseeable from the earlier pleadings. These "new" measures of damages may require the court to determine the market value of the Property when it was sold and the losses that Ms. Herrero and Mr. Mendoza suffered as a consequence of the foreclosure sale, including loss of use and loss of the Property's rental value. BANA received notice that these issues would arise in the *Degamo* trial from the First Amended Complaint, which sought various forms and calculations of damages, including increased residual debt, loss of net equity, loss of use, and loss of the properties' rental value.[67]

BANA compares this case to *Williams v. Boeing Co.*, where the Ninth Circuit Court of Appeals held that compensation discrimination claims in class action plaintiffs' second amended complaint would not relate back to their earlier claims of retaliation, hostile work environment, and denial of opportunities for promotion under *Haw. R. Civ. P. 15(c)*'s federal analogue. BANA argues that here, as in *Williams*, the Plaintiffs' claim "is a new legal theory depending on different facts, not a new legal theory depending on the same facts."[68] I also find the comparison **[*17]** useful, but I draw the opposite conclusion. Here, the new measures of damages sought by the Plaintiffs are based on the same facts and events alleged in *Degamo*.

In *Williams*, the plaintiffs would have had to amend their complaint "to include additional facts to support the compensation discrimination claim" and "different statistical evidence and witnesses would be used to prove the . . . claims because of the different processes [the defendant used] to make salary and promotion decisions."[69] As a contrast, *Williams* cited *Martell v. Trilogy Ltd.*, where the court held that the amended complaint related back under *rule 15* where it added a new theory of recovery based on facts alleged in the original complaint.[70]

70 *See id.* (citing *Martell, 872 F.2d at 325-26*).

The present scenario is more like *Martell* than *Williams*. Here, BANA received notice of the evidence it needed to gather when *Degamo* was filed.[71] It cannot assert that it was caught off-guard by the Plaintiffs' request for different measures of damages based on the same evidence.[72] Therefore, I determine that the statute of limitations on the Plaintiffs' requests for restitution and rescission was tolled during the *Degamo* class action to the same extent as their requests for other measures **[*18]** of damages.

b. **Additional Wrongful Conduct Alleged in Count I**

Count I of the adversary complaint alleges numerous defects in the foreclosure sale conducted by BANA,[73] including defects that BANA contends were absent from the *Degamo* complaint. Specifically, BANA argues that the plaintiffs' allegations in subparagraph 61(a) that Ms. Herrero and Mr. Mendoza were not served with a notice of acceleration that complied with the mortgage, and their allegation in subparagraph 61(h) that the auction was postponed but there was no new posting on the property advertising a new auction date, are outside the scope of class action tolling and therefore time-barred.[74] I agree in part but disagree in part for reasons I will explain below.

I agree that the Plaintiffs' allegations of wrongful conduct regarding the notice of acceleration are not subject to class action tolling. The allegedly wrongful conduct asserted in *Degamo* began with the notice of sale. The notice of acceleration would have been issued before the notice of sale, i.e., before the events that *Degamo* was concerned with. The allegations relating to the notice of acceleration "alter[] the fact situation to such an **[*19]** extent that the subsequent claim arises not out of the original occurrence but instead out of another."[75] Thus, the Plaintiffs' allegations of wrongful conduct regarding the notice of acceleration in subparagraph 61(a) of the complaint are not subject to class action tolling.

However, the same is not true of subparagraphs (g) and (h). These "new" allegations of wrongful conduct, specifically that there was no posting on the property advertising a new auction date, arise out of the same occurrence described in *Degamo*: the noticing of the foreclosure sale.[76] Accordingly, the Plaintiffs' allegations in subparagraph 61(h) were subject to class action tolling.

c. **Additional Wrongful Conduct Alleged in Count II**

As I will describe in the next section, the Plaintiffs' UDAP and UMOC claims are time-barred even with the application of class action tolling, so I need not consider whether their additional allegations of wrongful conduct in paragraph 81 of the complaint are subject to tolling.

B. **Accrual and Timeliness of UDAP and UMOC Claims**

---

[71] *See* ***Mauian Hotel, 481 P.2d at 313*** ("***Rule 15(c)*** contemplates that once a party has been properly put on notice regarding what evidence to gather[,] the statute [of limitations] is satisfied, regardless of when the claim itself is asserted.").

[73] Compl. ¶ 61, ECF No. 1.

[74] First Am. Mot. Dismiss Compl. 14, ECF No. 10.

[75] ***Mauian Hotel, 481 P.2d at 314***.

[76] *See* First Am. Compl. ¶ 14(c), *Degamo v. Bank of Am., N.A.*, No. 1:13-cv-00141-JAO-KJM (D. Haw. Apr. 23, 2013), ECF No. 14 (alleging that BANA's policies and practices, adopted to deter public participation and "chill" bid prices at nonjudicial foreclosure auctions, "included, but were not limited to . . . postponing auctions without publishing notices of the rescheduled auctions' new dates and times.").

HN13[] Under *Haw. Rev. Stat. section 480-24*, UDAP and UMOC claims are subject to a four-year statute of limitations. Here, the Plaintiffs' claims are timely only if I determine **[*20]** that they accrued on August 6, 2010, the date that the quitclaim deed to Fannie Mae was recorded.[77] Otherwise—whether they accrued on June 24, 2010, the date of the foreclosure sale; July 9, 2010, the date that the foreclosure affidavit was recorded; or July 27, 2010, the date that BANA executed the quitclaim deed to Fannie Mae—the claims are time-barred. In the absence of direct guidance, I predict that the Hawaii Supreme Court would hold that UDAP and UMOC claims based on a wrongful foreclosure accrue, at the latest, on the date that the affidavit of foreclosure is recorded.[78] I therefore conclude that the Plaintiffs' claims are time-barred.

The Plaintiffs urge me to determine that their UDAP and UMOC claims accrued on the date that the quitclaim deed to Fannie Mae was recorded, as the last event in a "continuing violation" of *Haw. Rev. Stat. chapter 480*. But the quitclaim conveyance cannot constitute a "continuing violation" of *Haw. Rev. Stat. chapter 480* because it did not cause any additional harm.

HN14[] Under *Haw. Rev. Stat. section 480-24(a)*, "a cause of action for a continuing violation is deemed to accrue at any time during the period of the violation." A "continuing violation" is a "continuing pattern of related improper conduct . . . ."[79] To allege a continuing **[*21]** violation under federal ***antitrust law*** in the Ninth Circuit,[80] a plaintiff must allege that a defendant completed an overt act during the limitations period that is (1) "a new and independent act that is not merely a reaffirmation of a previous act" and (2) "inflict[s] new and accumulating injury on the plaintiff."[81]

The damages asserted by the Plaintiffs are loss of monies invested in the Property, loss of market value, loss of use and rental value from the date that Ms. Herrero and Mr. Mendoza lost possession, and moving and rental expenses.[82] The Property was conveyed when the affidavit was recorded, and any loss of use and value stems from that conveyance.[83] Ergo, the Plaintiffs' UDAP and UMOC claims accrued on that date. The later execution and recordation of the deed did not result in any further loss and therefore did not inflict a "new and accumulating injury" upon Ms. Herrero and Mr. Mendoza.

Therefore, I hold that the Plaintiffs' UDAP and UMOC claims are completely barred by the applicable statute of limitations.

---

[77] If the Plaintiffs' claims accrued on August 6, 2010, the statute of limitations would have run for two years and one month until *Degamo* was filed on September 7, 2012. After the district court dismissed *Degamo* on March 14, 2019, the statute ran for another one year, ten months, and twenty-five days before the Plaintiffs filed their adversary complaint on February 9, 2021. In total, the statute of limitations would have run for 1,459 days, or three years, eleven months, and twenty-five days, making the plaintiffs' claims timely by just a few days.

[78] BANA argues that UDAP and UMOC claims stemming from a wrongful foreclosure accrue on the date of the foreclosure sale, not the date that the foreclosure affidavit is recorded. However, I need not reach this issue because the Plaintiffs' claims would be time-barred if they accrued on either date.

[82] Compl. ¶ 87, ECF No. 1. The complaint alleges that BANA engaged in various practices designed to "chill" bidding prices and achieve a high self-sale rate, including publication of false, deceptive, or misleading notices of sale. *See id.* ¶¶ 76-80, 83, 85. Any injury caused thereby accrued when the notice of sale was published or, at the latest, when the property was conveyed.

[83] *See In re Hoopai*, No. 04-02511, 2005 Bankr. LEXIS 884, 2005 WL 1156091, at *4 (Bankr. D. Haw. Jan. 12, 2005) ("[T]itle passes in a non-judicial foreclosure sale when the affidavit is recorded, not when the auction is held.").

C. **Limitations Period for Quiet Title and Ejectment Claims**

The timeliness of the Plaintiffs' claims against the QTE Defendants depends on which limitations period **[*22]** they are subject to under Hawaii law.[84] MERS argues that quiet title and ejectment claims are subject to a six year limitations period under *Haw. Rev. Stat. § 657-1*. The Plaintiffs argue that their quiet title and ejectment claims are subject to either no statute of limitations at all or a twenty-year limitations period under *Haw. Rev. Stat. section 657-31*. If the Plaintiffs are correct, their claims are timely. If BANA is correct, the claims are time-barred.

For the reasons that follow, I conclude that any portion of the Plaintiffs' quiet title and ejectment claim seeking recovery of the land is subject to a twenty-year limitations period under *Haw. Rev. Stat. section 657-31*, while any claims for money damages, including lost rental value, are subject to a six-year limitations period under *section 657-1(4)*. Thus, the Plaintiffs' request for return of the property is timely, but their request to recover its lost rental value is not.

First, I disagree with the Plaintiffs' argument that their quiet title and ejectment claims are not subject to a statute of limitations because the foreclosure sale was void and not voidable. ***HN16***[] Under Hawaii law, "a claim that a deed is void is not subject to a statute of limitations."[85] But the most recent precedent from the Hawaii Supreme Court has referred **[*23]** to wrongful foreclosures as "voidable," not "void."[86] Therefore, I predict that the supreme court would hold that the sale of the Property, if in violation of the power of sale or *Haw. Rev. Stat. section 667-5*, was voidable.[87]

Second, different limitations periods should apply to the Plaintiffs' quiet title and ejectment claims based on the relief sought. Here, the Plaintiffs' claims have two basic elements: a request for title and possession of the Property, and a request for compensation for the loss of the Property and its use. I predict that the Hawaii Supreme Court would apply a twenty-year statute of limitations to the Plaintiffs' requests for return of the Property and a six-year statute of limitations to their requests for monetary compensation.

HN17[] Under Hawaii law, "[t]he proper standard to determine the relevant limitations period is the nature of the claim or right, not the form of the pleading."[88] Different limitations periods may apply to different claims, even when they are stated in the same count and arise from the same transaction.[89]

---

[84] The federal district court for this district has observed that "[i]t is not clear what statute of limitations period applies to a quiet title claim arising from an alleged wrongful foreclosure [under Hawaii law]." *Lynch v. Bank of N.Y. Mellon, Civ. No. 17-00195 LEK-RLP, 2018 U.S. Dist. LEXIS 127224, 2019 WL 3624969, at *6 (D. Haw. July 30, 2018)*. The district court has predicted that the Hawaii Supreme Court would apply a six-year statute of limitations to quiet title claims. *Moore v. Kailua Kona Properties, LLC, Civ. No. 18-00159 LEK-KSC, 2018 U.S. Dist. LEXIS 79365, 2018 WL 2172489, at *2 (D. Haw. May 10, 2018)*.

[85] *Hancock v. Kulana Partners, LLC, 145 Haw. 374, 452 P.3d 371, 378 (2019)*.

[86] *Santiago v. Tanaka, 137 Haw. 137, 366 P.3d 612, 633 (Haw. 2016)* ("Where it is determined that the nonjudicial foreclosure of a property is wrongful, the sale of the property is invalid and ***voidable*** at the election of the mortgagor, who shall then regain title to and possession of the property.") (emphasis added).

[87] I recognize that the court recently took the question up on certiorari in *Delapinia v. Nationstar Mortgage, LLC, 146 Haw. 218, 458 P.3d 929, 941 (Haw. App. 2020)*, *cert. granted*, *SCWC-17-0000387, 2020 Haw. LEXIS 133, 2020 WL 2992104 (Haw. June 4, 2020)*.

[88] ***Au v. Au, 63 Haw. 210, 626 P.2d 173, 177 (Haw. 1981)***.

[89] *See id.* ("Different causes of action arising from a single transaction may be plead together. However, where two or more causes of action arise from a single transaction, different statute[s] of limitations are applicable to the separate claims.") (internal citation omitted).

HN18[] The Hawaii Supreme Court "has often stated that 'the fundamental starting point for statutory interpretation is the language of the statute itself. **[*24]** . . . Where the statutory language is plain and unambiguous, [a court's] sole duty is to give effect to its plain and obvious meaning.'"[90]

HN19[] Under Hawaii law, a twenty-year limitations period applies to "action[s] to recover possession of any lands, or make any entry thereon,"[91] while a six-year limitations period applies to "[a]ctions for the recovery of any debt founded upon any contract, obligation, or liability" and "[p]ersonal actions of any nature whatsoever not specifically covered by the laws of the State."[92] A personal action, or "action in personam," is one "where the judgment will impose a personal liability or obligation and does not affect the nature of the parties' interest in property."[93] Here, the Plaintiffs' requests for return of the Property do not seek recovery of a debt founded on a contract, obligation, or liability, as contemplated by *section 657-1(1)*. And I will not apply *section 657-1(4)*, which functions as a "catchall" for personal actions that do not fit into one of the other provisions of *section 657*, when another statute of limitations is both more specific and more relevant. Based on the plain language of the statutes, these requests for relief would fit most closely within *section 657-31*.

The ICA reached a similar conclusion **[*25]** regarding claims for foreclosure in *Bowler v. Christiana Trust*. There, the court rejected the argument that a foreclosure action was "'of like character' to '[a]ctions for the recovery of any debt founded upon any contract, obligation, or liability,'"[94] stating that "[t]he supreme court has long distinguished an action to recover a debt or enforce a promissory note from an action to foreclose a mortgage."[95] Observing that distinction, the court held that a foreclosure action was more similar to an "action to recover possession of any lands, or make any entry thereon" and therefore subject to a twenty-year limitations period under *section 657-31*.[96]

Bowler is not a state supreme court case and does not concern wrongful foreclosure claims, but it is persuasive as a decision of the state's intermediate appellate court. The *Bowler* court also supported its decision with a detailed analysis of Hawaii Supreme Court precedent.[97] It stated that "the determinative issue is not the method of the foreclosure or the purpose of the security interest, but rather the fact that a mortgage is a conveyance of a real property interest, which allows the mortgagee to sell and take possession of the property."[98] The *Bowler* **[*26]** court's reasoning also applies to the Plaintiffs' quiet title and ejectment claims, which challenge a conveyance of a real property interest and seek to take possession of the property in question. And, if claims for foreclosure are subject to a twenty-year limitations period as determined in *Bowler*, the same must be true of claims seeking to undo a foreclosure.

94 No. CAAP-16-0000728, 143 Haw. 235, 426 P.3d 459, 2018 WL 4659562, at *5 (Haw. App. Sep. 28, 2018).

95 *Id.*

96 *Id.*

97 *See Bowler*, 143 Haw. 235, 426 P.3d 459, 2018 WL 4659562, at *5-8 (Haw. App. 2018) (discussing *Hilo v. Liliuokalani, 15 Haw. 507 (Haw. Terr. 1904)*; *Kipahulu Sugar Co. v. Nakila, 20 Haw. 620, 621 (Haw. Terr. 1911)*).

98 426 P.3d 459, [WL] at *8.

But, because of the distinction between an action to recover a debt and an action to recover land, I will apply the six-year statute of limitations to the Plaintiffs' requests for money damages.

HN20[] As the Hawaii Supreme Court has held, a mortgagee can foreclose on a mortgage if within the statute of limitations for real actions, but cannot recover a money judgment on the underlying note.[99] The mortgagee may not collect a deficiency judgment in those circumstances, either, illustrating that the only timely claim is against the land.[100] Here, similarly, the Plaintiffs seek lost rent as damages for their quiet title claims. The Plaintiffs' request for money damages is therefore a personal action that does not fit within the provisions of *subsections 657-1(1) through (3)*. Thus, I will apply *Haw. Rev. Stat. section 657-1(4)* to these requests for relief.

In summary, I conclude that the Plaintiffs' **[*27]** requests for money damages on their quiet title and ejectment claims are time-barred. As described above, their requests for recovery of title and possession are subject to a twenty-year statute of limitations and are therefore timely.

D. **The "Tender Rule"**

BANA argues that the Plaintiffs have not sufficiently alleged that they can tender the amount of indebtedness on the mortgage. The Plaintiffs dispute that Hawaii law requires any allegation of proof of ability to tender, but allege that, given the sums they are owed in damages, they will be able to make tender if required to do so by law.[101] Based on this allegation, I decline to dismiss the Plaintiffs' quiet title and ejectment claims for failure to satisfy the tender rule.

HN21[] In an action to quiet title under Hawaii law, a plaintiff "must at least prove that he has a substantial interest in the property and that his title is superior to that of the defendants. The tender rule requires a[] borrower, in bringing a quiet title action, to allege that he has paid, or is able to tender, the amounts owed."[102] In *Delapinia*, the ICA affirmed the circuit court's dismissal of the Plaintiffs' quiet title claim because they "did not 'allege that they have **[*28]** paid or are able to tender the amount of indebtedness that would be due under the mortgage[.]'"[103]

The Plaintiffs argue that *Delapinia*'s precedential value is uncertain because the Hawaii Supreme Court has taken certiorari. But *Delapinia*, as a decision of Hawaii's intermediate appellate court, is currently controlling state law. However, even if the tender rule applies, I determine that the allegations of the adversary complaint are sufficient to defeat a motion for summary judgment. For purposes of this motion, I must accept as true the Plaintiffs' statement that they will be able to make tender by offsetting their claims for damages against the amount of their indebtedness on the mortgage. The Plaintiffs do not need to allege that they can pay the full amount owing in cash.

E. **Defendant MERS Should Be Dismissed**

MERS points out that, on March 15, 2021, a Release of Mortgage was recorded, acknowledging "full payment and satisfaction" and discharging the mortgage held by MERS.[104] Therefore, MERS argues, the Plaintiffs cannot state a quiet title and ejectment claim against it. The Plaintiffs did not contest this allegation in their opposition. I hold that

[99] *Kipahulu Sugar Co., 20 Haw. at 622* ("In the case at bar the statute has run against the note, but the period prescribed for the recovery of land has not expired. The plaintiff was, therefore, entitled to a decree of foreclosure."); *Hilo v. Liliuokalani, 15 Haw. at 508* ("Actions on the notes were of course barred long ago by the statute . . . . But that did not bar the remedy against the land."); *see also* *Maile v. Carter, 17 Haw. 49, 52 (Haw. Terr. 1905)* (citing *Campbell v. Kamaiopili, 3 Haw. 477 (Haw. Kingdom 1872)*); *Castle v. Smith, 17 Haw. 32 (Haw. Terr. 1905)*; *Kaikainahaole v. Allen, 14 Haw. 527 (Haw. Terr. 1902)*;.

[100] *Kipahulu Sugar Co., 20 Haw. at 622* ("To allow a deficiency judgment would virtually be to enforce payment of the defendant's note, action upon which is, concededly, barred.").

[101] Compl. ¶ 69, ECF No. 1.

[102] *Delapinia, 458 P.3d at 939* (internal citations omitted).

[103] *Id.*

[104] First Am. Mot. Dismiss Compl. 17, ECF No. 10.

because MERS no longer claims an interest **[*29]** in the property, the Plaintiffs cannot state a claim against MERS on which relief can be granted.

The Release of Mortgage, recorded in the State of Hawaii Bureau of Conveyances as Doc. No. A-77440970, is a matter of public record of which I may properly take judicial notice.[105] The release demonstrates that MERS no longer has an interest in the property. Therefore, the Plaintiffs' claims against MERS should be dismissed.

F. **Leave to Amend**

HN22[] *Fed. R. Civ. P. 15* applies in adversary proceedings through *Fed. R. Bankr. P. 7015*. Under *rule 15*, "'after a brief period in which a party may amend as of right,' leave to amend lies 'within the sound discretion of the trial court.'"[106] The Plaintiffs have not requested leave to amend.

HN23[] The Ninth Circuit has stated that "in dismissing for failure to state a claim under *Rule 12(b)(6)*, 'a district court should grant leave to amend even if no request to amend the pleading was made, unless it determines that the pleading could not possibly be cured by the allegation of other facts.'"[107] While "leave to amend 'shall be freely given when justice so requires,' . . . futile amendments should not be permitted."[108] Here, amendment of the complaint would be futile because the pleading could not be cured by the allegation of other **[*30]** facts. Therefore, I will deny leave to amend the complaint as to claims, measures of damages, and allegations of wrongful conduct dismissed by this order.

Absent tolling, all of the Plaintiffs' monetary claims are undoubtedly time-barred. The only type of tolling that the Plaintiffs have mentioned is class action tolling, and it seems highly unlikely that any other tolling doctrine could apply. Thus, granting leave to amend to add facts that render the Plaintiffs' claims in subparagraph 61(a) timely would be futile.

The same is true of the Plaintiffs' UDAP and UMOC claims and portions of the Plaintiffs' quiet title and ejectment claims. A four-year limitations period clearly applies to the Plaintiffs' UDAP and UMOC claims under *Haw. Rev. Stat. section 480-24*. No other facts or arguments could possibly justify the application of a longer period. Thus, the Plaintiffs' claims in paragraph 81, which are not subject to class action tolling, are indisputably time-barred. Likewise, because they were not subject to class action tolling, the Plaintiffs' quiet title and ejectment claims against the remaining defendants are also time-barred to the extent that they seek money damages. Lastly, MERS is no longer a proper defendant **[*31]** to the Plaintiffs' quiet title and ejectment claims because the mortgage has been released; no amendment can cure that.

Leave to amend is therefore denied.

III. CONCLUSION

In conclusion, I will GRANT the Defendants' motion in part. I hereby DISMISS the Plaintiffs' additional allegations of wrongful conduct in Count I, subparagraph 61(a); all of the Plaintiffs' UDAP claims in Count II; the Plaintiffs' requests for money damages on their quiet title and ejectment claims in Count III; and all of the Plaintiffs' claims against MERS, without leave to amend.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN1[] **Motions to Dismiss, Failure to State Claim**

Under Fed. R. Civ. P. 12(b)(6), a claim may be dismissed because of the plaintiff's failure to state a claim upon which relief can be granted. Counterclaims are subject to Rule 12(b)(6) challenges. A dismissal under Rule 12(b)(6) may be based on the lack of a cognizable legal theory or on the absence of sufficient facts alleged under a cognizable legal theory. In reviewing a complaint under Rule 12(b)(6), all well-pleaded allegations of material fact are taken as true and construed in the light most favorable to the non-moving party. However, complaints that offer no more than labels and conclusions or a formulaic recitation of the elements of a cause of action will not do. The Court is not required to accept as true allegations that contradict exhibits attached to the Complaint or matters properly subject to judicial notice, or allegations that are merely conclusory, unwarranted deductions of fact, or unreasonable inferences.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN2[] Motions to Dismiss, Failure to State Claim

To avoid a Fed. R. Civ. P. 12(b)(6) dismissal, a complaint must contain sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face. A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged. Plausibility means more than a sheer possibility, but less than a probability, and facts that are merely consistent with liability fall short of plausibility.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN3[] Motions to Dismiss, Failure to State Claim

The United States Court of Appeals for the Ninth Circuit has distilled the following principles for Fed. R. Civ. P. 12(b)(6) motions: (1) to be entitled to the presumption of truth, allegations in a complaint or counterclaim may not simply recite the elements of a cause of action, but must contain sufficient allegations of underlying facts to give fair notice and to enable the opposing party to defend itself effectively; (2) the factual allegations that are taken as true must plausibly suggest entitlement to relief, such that it is not unfair to require the opposing party to be subjected to the expense of discovery and continued litigation. If a motion to dismiss is granted, the district court should grant leave to amend even if no request to amend the pleading was made. However, leave to amend need not be granted if amendment would be futile or the plaintiff has failed to cure deficiencies despite repeated opportunities.

Copyright Law > Scope of Copyright Protection > Ownership Interests > Joint Authors & Works

Copyright Law > ... > Civil Infringement Actions > Elements > Ownership

HN4[] Ownership Interests, Joint Authors & Works

It is concrete law that co-owners of a copyright cannot sue another co-owner for copyright infringement.

Copyright Law > Scope of Copyright Protection > Ownership Interests > Joint Authors & Works

HN5[] Ownership Interests, Joint Authors & Works

A co-owner cannot unilaterally grant exclusive rights in a copyright without the agreement of all other co-owners.

Business & Corporate Compliance > ... > Ownership Rights > Distribution > Infringement

Copyright Law > Scope of Copyright Protection > Collective & Derivative Works > Derivative Works

Business & Corporate Compliance > ... > Ownership Rights > Displays > Infringement

Copyright Law > Scope of Copyright Protection > Collective & Derivative Works > Infringement

Copyright Law > Scope of Copyright Protection > Collective & Derivative Works > Scope of Protection

HN6[] Copyright, Infringement of Distribution Rights

The Copyright Act affords copyright owners the exclusive rights to display, perform, reproduce, or distribute copies of a copyrighted work, to authorize others to do those things, and to prepare derivative works based upon the copyrighted work. 17 U.S.C.S. § 106. Only the legal or beneficial owner of an exclusive right under a copyright has standing to sue for infringement of that right. A claim for copyright infringement has two basic elements: (1) ownership of a valid copyright, and (2) copying of constituent elements of the work that are original. To plead ownership, a plaintiff must plausibly allege it owns a valid copyright registration for its works.

Copyright Law > ... > Subject Matter > Statutory Copyright & Fixation > Expression & Idea Distinguished

Copyright Law > Scope of Copyright Protection > Ownership Interests > Joint Authors & Works

Copyright Law > ... > Subject Matter > Statutory Copyright & Fixation > Scope of Protection

HN7[] Statutory Copyright & Fixation, Expression & Idea Distinguished

One method of copyright ownership involves co-ownership. A joint work is a work prepared by two or more authors with the intention that their contributions be merged into inseparable or interdependent parts of a unitary whole. 17 U.S.C.S. § 101. The authors of a joint work are co-owners of the copyright in that work. 17 U.S.C.S. § 201(a). Each author must make an independently copyrightable contribution, which is a contribution that represents original expression that could stand on its own as the subject matter of copyright. That is, to be an author, one must supply more than mere direction or ideas; one must translate an idea into a fixed tangible expression entitled to copyright protection.

Copyright Law > Scope of Copyright Protection > Ownership Interests > Joint Authors & Works

Copyright Law > ... > Assignments & Transfers > Licenses > Nonexclusive Licenses

Copyright Law > Scope of Copyright Protection > Assignments & Transfers > Scope of Conveyances

HN8[] Ownership Interests, Joint Authors & Works

One co-owner of a copyright may bring suit to enforce a copyright without joining the other co-authors/co-owners to the suit. Because each co-owner of a joint work has an independent right to use or license the copyright, a co-owner cannot be liable to another co-owner for infringement of copyright, but co-owners must account to other co-authors for any profits earned from licensing or using the copyright. Further, unless all co-owners/co-authors of a joint work join in granting an exclusive license, a single co-author (acting on its own behalf) can grant only a non-exclusive license in the copyright work because one co-author cannot limit the other co-authors' independent right to exploit the copyright. However, a co-owner of a copyright is free to transfer his ownership interest to another, as long as the transfer is only of the exclusive copyright interests that the transferring co-owner himself possesses. A co-owner of a copyright can transfer its interests in the copyright without the permission of the other co-owners.

Business & Corporate Compliance > ... > Contract Formation > Contracts Law > Contract Formation

HN9[] Contracts, Contract Formation

A contract that is void ab initio is null from the beginning, and treated as if it had never existed.

Copyright Law > ... > Assignments & Transfers > Licenses > Nonexclusive Licenses

HN10[] **Licenses, Nonexclusive Licenses**

A non-exclusive licensee cannot sue for copyright infringement.

Copyright Law > ... > Assignments & Transfers > Licenses > Exclusive Licenses

Copyright Law > Scope of Copyright Protection > Assignments & Transfers > Scope of Conveyances

Copyright Law > Scope of Copyright Protection > Ownership Interests > Joint Authors & Works

Copyright Law > ... > Assignments & Transfers > Licenses > Nonexclusive Licenses

HN11[] **Licenses, Exclusive Licenses**

The United States Court of Appeals for the Ninth Circuit, in finding that its decision in Sybersound did not prohibit copyright co-owners from transferring their rights without permission from other co-owners, described and explained part of Sybersound as follows: We held in Sybersound that when one co-owner independently attempts to grant an exclusive license of a particular copyright interest, that licensee does not have standing to sue alleged third-party infringers. After all, one co-owner, acting independently, may not limit the other co-owners' independent rights to exploit the copyright. Such a conclusion stems from the self-evident principle that a joint-owner cannot transfer more than he himself holds; thus, an assignment or exclusive license from one joint-owner to a third party cannot bind the other joint-owners or limit their rights in the copyright without their consent. In other words, the third party's right is exclusive as to the assigning or licensing co-owner, but not as to the other co-owners and their assignees or licensees. As such, a third-party assignee or licensee lacks standing to challenge the attempted assignments or licenses of other copyright owners.

Business & Corporate Compliance > ... > Copyright Law > Copyright Infringement Actions > Civil Infringement Actions

Copyright Law > Scope of Copyright Protection > Ownership Interests > Joint Authors & Works

Civil Procedure > Preliminary Considerations > Justiciability > Standing

HN12[] **Copyright, Civil Infringement Actions**

The copyright statute permits infringement suits only if brought by owners of an exclusive right against alleged violators of such exclusive right. 17 U.S.C.S. § 501. If an "exclusive right" could only be possessed by a sole owner of a copyright, a co-owner would be unable to bring an infringement action to protect his interest. Moreover, such a limitation would contradict the principle of the free transferability of copyright ownership interests—a principle reflected in both the express language of 17 U.S.C.S. § 201(d) and Ninth Circuit precedent, neither of which treat transferability differently based on whether the original copyright owner is a sole owner or a co-owner. Thus, the Ninth Circuit's Sybersound decision merely imposes a standing limitation on copyright assignees and licensees that reflects the basic principle that one cannot give away more than one's share in a copyright—it need not, and should not, be extended to limit a co-owner's ability to transfer unilaterally any exclusive copyright interests that he himself possesses.

Copyright Law > Scope of Copyright Protection > Assignments & Transfers > Scope of Conveyances

HN13[] **Assignments & Transfers, Scope of Conveyances**

A co-owner of a copyright is free to transfer that ownership interest to another, as long as the transfer was only of exclusive copyright interests that the co-owner itself possess.

Copyright Law > Scope of Copyright Protection > Assignments & Transfers > Scope of Conveyances

HN14[] **Assignments & Transfers, Scope of Conveyances**

A transfer is limited by the rights possessed by the transferor and the rights that are attempted to be transferred. One cannot convey what one does not possess.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN15[] **State Regulation, Claims**

The California Unfair Competition Law (UCL), Cal. Bus. & Prof. Code § 17200 et seq., broadly proscribes the use of any unlawful, unfair or fraudulent business act or practice. Cal. Bus. & Prof. Code. § 17200. The UCL operates as a three-pronged statute: Each of these three adjectives unlawful, unfair, or fraudulent captures a separate and distinct theory of liability. The UCL's unlawful prong borrows violations of other laws and makes those unlawful practices actionable under the UCL, and virtually any law or regulation — federal or state, statutory or common law — can serve as a predicate. When the underlying legal claim that supports a UCL cause fails, however, so too will the the derivative UCL claim.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN16[] **Trade Practices & Unfair Competition, State Regulation**

For purposes of the California Unfair Competition Law (UCL), Cal. Bus. & Prof. Code § 17200 et seq., conduct is unfair either when it threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition, or when it offends an established public policy or when the practice is immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers.

Civil Procedure > Sanctions > Baseless Filings > Certification Requirements

HN17[] **Baseless Filings, Certification Requirements**

Fed. R. Civ. P. 11(c)(2) provides strict procedural requirements for parties to follow when they move for sanctions under Rule 11. Among other things, a motion for sanctions must be made separately from any other motion and must describe the specific conduct that allegedly violates Rule 11(b). Fed. R. Civ. P. 11(c)(2).

Opinion

ORDER ON COUNTER-DEFENDANTS' MOTION TO DISMISS

(Doc. No. 41)

This is a copyright dispute involving three musical albums by the artist Los Originales De San Juan. Through a First Amended Counterclaim ("FAC"), Counter-Plaintiff Morena Music, Inc. ("Morena") brings claims against Counter-Defendants Yellowcake, Inc. ("Yellowcake"), Colonize Media, Inc. ("Colonize"), and Jose Hernandez ("Hernandez") (collectively "YCH") for two copyright violations under the Copyright Act (*17 U.S.C. § 100 et seq.*) involving the albums and associated cover art, and a state law claim for unfair competition (*Cal. Bus. & Prof. Code § 17200 et seq.*) ("UCL"). Currently before the Court is YCH's second *Rule 12(b)(6)* motion to dismiss two of the three claims alleged against them. For the reasons that follow, YCH's motion will be granted.

***RULE 12(b)(6)* FRAMEWORK**

HN1[] Under *Federal Rule of Civil Procedure 12(b)(6)*, a claim may be dismissed because of the plaintiff's "failure to state a claim upon which relief can be granted." *Fed. R. Civ. P. 12(b)(6)*. Counterclaims are subject to *Rule 12(b)(6)* challenges. See *Seismic Reservoir 2020, Inc. v. Paulsson, 785 F.3d 330, 335 (9th Cir. 2015)*. A dismissal under *Rule 12(b)(6)* may be based on the lack of a cognizable legal theory or on the absence of sufficient **[*3]** facts alleged under a cognizable legal theory. *Mollett v. Netflix, Inc., 795 F.3d 1062, 1065 (9th Cir. 2015)*. In reviewing a complaint under *Rule 12(b)(6)*, all well-pleaded allegations of material fact are taken as true and construed in the light most favorable to the non-moving party. *Kwan v. SanMedica, Int'l, 854 F.3d 1088, 1096 (9th Cir. 2017)*. However, complaints that offer no more than "labels and conclusions" or "a formulaic recitation of the elements of a cause of action will not do." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*; *Johnson v. Federal Home Loan Mortg. Corp., 793 F.3d 1005, 1008 (9th Cir. 2015)*. The Court is "not required to accept as true allegations that contradict exhibits attached to the Complaint or matters properly subject to judicial notice, or allegations that are merely conclusory, unwarranted deductions of fact, or unreasonable inferences." *Seven Arts Filmed Entm't, Ltd. v. Content Media Corp. PLC, 733 F.3d 1251, 1254 (9th Cir. 2013)*. ***HN2***[] To avoid a *Rule 12(b)(6)* dismissal, "a complaint must contain sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face." *Iqbal, 556 U.S. at 678*; *Mollett, 795 F.3d at 1065*. "A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Iqbal, 556 U.S. at 678*; *Somers v. Apple, Inc., 729 F.3d 953, 959 (9th Cir. 2013)*. "Plausibility" means "more than a sheer possibility," but less than a probability, and facts that are "merely consistent" with liability fall short of "plausibility." *Iqbal, 556 U.S. at 678*; *Somers, 729 F.3d at 960*. ***HN3***[] The Ninth Circuit has distilled the following principles **[*4]** for *Rule 12(b)(6)* motions: (1) to be entitled to the presumption of truth, allegations in a complaint or counterclaim may not simply recite the elements of a cause of action, but must contain sufficient allegations of underlying facts to give fair notice and to enable the opposing party to defend itself effectively; (2) the factual allegations that are taken as true must plausibly suggest entitlement to relief, such that it is not unfair to require the opposing party to be subjected to the expense of discovery and continued litigation. *Levitt v. Yelp! Inc., 765 F.3d 1123, 1135 (9th Cir. 2014)*. If a motion to dismiss is granted, "[the] district court should grant leave to amend even if no request to amend the pleading was made . . . ." *Ebner v. Fresh, Inc., 838 F.3d 958, 962 (9th Cir. 2016)*. However, leave to amend need not be granted if amendment would be futile or the plaintiff has failed to cure deficiencies despite repeated opportunities. *Garmon v. County of L.A., 828 F.3d 837, 842 (9th Cir. 2016)*.

BACKGROUND

From the FAC, Morena is a record label that is in the business of producing, manufacturing, distributing, exploiting, selling, and licensing sound and audio-visual recordings and artwork. Jesus Chavez Sr. ("Chavez") is the founder and principal of the musical group Los Originales De San Juan, a popular Mexican musical group.

On September 16, 2013, Morena entered **[*5]** into an oral recording agreement with Chavez whereby Morena commissioned Chavez to provide services as a recording artist in the making of sound and audio-visual recordings for three albums (50 Mentadas, 15 Corridos Inmortales, and Celebrando 39). Pursuant to the agreement, Morena agreed to: (1) select the musical compositions to be recorded on the albums; (2) commission and/or provide the sound engineers and audio-visual directors; (3) produce the musical performances on the albums; (4) direct the recording and filming of musical and audiovisual performances to be embodied on the albums; and (5) pay Chavez a fixed amount per album. Chavez agreed to follow Morena's artistic direction, perform the recordings, and grant Morena the non-exclusive right to utilize Chavez's likeness and his group's name. Morena performed the above services and thereby contributed sufficient originality to the albums such that Morena at a minimum is a co-author, co-owner, or joint owner of the copyrights in the albums for purposes of the Copyright Act. Morena also produced, created, and designed the album cover art for each of the three albums. Morena also registered copyrights in the content of the three **[*6]** albums and in the cover art of the three albums. Morena alleges that it is the exclusive copyright owner of the cover art and at least a co-owner of the albums with Chavez.

In April 2019, Hernandez had a meeting with Chavez. At the meeting, Hernandez intentionally and willfully misled Chavez into mistakenly believing that Morena had no rights in the Los Originales' albums and cover art and that Chavez was free to sell all rights in the works exclusively to Yellowcake and Colonize. Hernandez offered Chavez a significant amount sum of money and promise to indemnify to purchase the exclusive rights in the albums and cover art. Hernandez engaged in fraudulent or wrongful conduct. As a result, Chavez purportedly entered into an agreement ostensibly to sell the entirety of all right, title, and interest in and to the albums and cover art exclusively to Yellowcake. However, Chavez did not possess such exclusive rights to grant in their entirety, which allegedly rendered such agreement void ab initio.

On December 21, 2019, Morena discovered that Yellowcake and Colonize created or caused the creation of copies of the three Los Originales albums and cover art and was distributing, selling and **[*7]** exploiting these works through online platforms such as ITunes, Amazon Music, and YouTube. This was done without Morena's authorization. Yellowcake sent correspondences to Morena in which Yellowcake was claiming ownership of the masters and sound recordings of the three albums.

Yellowcake and Colonize sent fraudulent takedown notices to YouTube that falsely claimed that Morena had no right to post or upload the three albums and cover art. Prior to the takedown notices, Morena had received significant revenue from YouTube, and the YouTube uploads provided an important and lucrative marketing channel for the three albums and cover art. Now, YCH's uploads of the albums and cover art have generated substantial revenue on YouTube. However, Yellowcake and Colonize do not possess exclusive right or license from Chavez and Morena as co-owners to use and exploit the albums and cover art and thus, have no authority to engage in the on-going reproduction, use, and or display of the albums and cover art.

COUNTER-DEFENDANTS' MOTION TO DISMISS

I. First Cause of Action — Copyright Infringement of Sound Recordings

Counter-Defendants' Arguments

Yellowcake argues that in the prior motion to dismiss, the **[*8]** Court held that Morena could maintain a copyright infringement claim as a joint owner of the albums if it could show that Yellowcake was not a joint owner. However, the FAC expressly alleges that Morena is a co-owner of the albums and fails to show that Yellowcake is not a co-owner. ***HN4***[] It is concrete law that co-owners of a copyright cannot sue another co-owner for copyright infringement.

In reply, Yellowcake argues that Morena's reliance on the rule that a co-owner cannot grant an exclusive license without the permission of the other co-owners of the copyright is misplaced. In the Court's prior dismissal order, the Court recognized that there was no dispute that Chavez entered into a written transfer agreement with Yellowcake and that, while Chavez as a co-owner could not transfer exclusive interests, he could transfer his own ownership interest. The Court recognized that if Morena is a joint owner, the effect of the transfer agreement between Morena and Chavez was to make Morena and Yellowcake joint owners of the copyrights. Therefore, the fact that Chavez could not transfer an exclusive license if he was merely a co-owner does not mean that Yellowcake is not at least a co-owner of the **[*9]** copyright with Morena.

Counter-Plaintiff's Opposition

Morena argues that it has alleged that it is at least a co-owner of the copyright in the albums with Chavez. ***HN5***[] A co-owner cannot unilaterally grant exclusive rights in a copyright without the agreement of all other co-owners. The FAC establishes that any document purporting to grant Yellowcake exclusive rights in the copyrights is void ab initio because Morena never agreed to allow Chavez to assign exclusive rights and Chavez alone did not possess such exclusive rights to sell. Therefore, Morena is not a co-owner with Yellowcake even if there is no dispute that Yellowcake and Chavez entered into a written transfer agreement. Accepting the allegations as true, the Court must deny dismissal.

Legal Standard

HN6[] "The Copyright Act affords copyright owners the 'exclusive rights' to display, perform, reproduce, or distribute copies of a copyrighted work, to authorize others to do those things, and to prepare derivative works based upon the copyrighted work." *Maloney v. T3Media, Inc., 853 F.3d 1004, 1010 (9th Cir. 2017)*; see *17 U.S.C. § 106*. Only the "legal or beneficial owner of an exclusive right under a copyright" has standing to sue for infringement of that right. *Righthaven LLC v. Hoehn, 716 F.3d 1166, 1169 (9th Cir. 2013)*. A claim for copyright infringement has two basic elements: **[*10]** (1) ownership of a valid copyright, and (2) copying of constituent elements of the work that are original. *Feist Publ'ns, Inc. v. Rural Tel. Serv. Co., 499 U.S. 340, 351, 111 S. Ct. 1282, 113 L. Ed. 2d 358 (1991)*; *Great Minds v. Office Depot, Inc., 945 F.3d 1106, 1110 (9th Cir. 2019)*; *Seven Arts, 733 F.3d at 1254*. "To plead ownership, [a plaintiff] must plausibly allege it owns a valid copyright registration for its works." *Malibu Textiles, Inc. v. Label Lane Int'l, Inc., 922 F.3d 946, 951 (9th Cir. 2019)*.

HN7[] One method of copyright ownership involves co-ownership. *Richlin v. MGM Pictures, Inc., 531 F.3d 962, 968 (9th Cir. 2008)*. A "joint work" is "a work prepared by two or more authors with the intention that their contributions be merged into inseparable or interdependent parts of a unitary whole." *17 U.S.C. § 101*; *Aalmuhammed v. Lee, 202 F.3d 1227, 1231 (9th Cir. 2000)*; *Ashton-Tate Corp. v. Ross, 916 F.2d 516, 520 (9th Cir. 1990)*. "The authors of a joint work are co-owners of the copyright in that work." *17 U.S.C. § 201(a)*; *Richlin, 531 F.3d at 968*; *Ashton-Tate, 916 F.2d at 521*. Each author must make an "independently copyrightable contribution," which is a contribution that "represents original expression that could stand on its own as the subject matter of copyright." *Ashton-Tate, 916 F.2d at 521* (quoting P. Goldstein, *Copyright: Principles, Law and Practice*, § 4.2.1 p.379 (1989)); see also *Richlin, 531 F.3d at 968*. That is, "to be an author, one must supply more than mere direction or ideas; one must 'translate an idea into a fixed tangible expression entitled to copyright protection." *S.O.S., Inc. v. Payday, Inc., 886 F.2d 1081, 1087 (9th Cir. 1989)*; *Ashton-Tate, 916 F.2d at 521*. ***HN8***[] One co-owner may bring suit to enforce a copyright without joining the other co-authors/co-owners to the suit. *Corbello v. Devito, 777 F.3d 1058, 1065 (9th Cir. 2015)*. Because each co-owner of a "joint work" has an independent right to use **[*11]** or license the copyright, a co-owner cannot be liable to another co-owner for infringement of copyright, but co-owners must account to other co-authors for any profits earned from licensing or using the copyright. See *id. at 1062, 1066*; *Ashton-Tate, 916 F.2d at 522*; *Oddo v. Ries, 743 F.2d 630, 632-33 (9th Cir. 1984)*. Further, unless all co-owners/co-authors of a "joint work" join in granting an exclusive license, a single co-author (acting on its own behalf) can grant only a non-exclusive license in the copyright work because one co-author cannot limit the other co-authors' independent right to exploit the copyright. *Sybersound, 517 F.3d at 1146*. However, a co-owner of a copyright is free to transfer his ownership interest to another, as long as the transfer is only of the exclusive copyright interests that the transferring co-owner himself possesses. Tresona Multimedia, LLC v. Burbank High Sch. Vocal Music Ass'n, 953 F.3d 638, 645 n.2 (9th Cir. 2020); see *Corbello, 777 F.3d at 1065*. A co-owner of a copyright can transfer its interests in the copyright without the permission of the other co-owners. *Corbello, 777 F.3d at 1064-66* & n.5.

Discussion

Both parties acknowledge that the Court previously dismissed any copyright infringement claim by Morena that was based on Morena being a co-author/co-owner of the albums. See *Yellowcake, Inc. v. Morena Music, Inc., 522 F. Supp. 3d 747, 2021 U.S. Dist. LEXIS 39127, *21-*22 (E.D. Cal. Mar. 1, 2021)*. The Court dismissed this theory because the allegations of the Counterclaim and Yellowcake's Complaint indicated that, by virtue of the transfer **[*12]** agreement between Yellowcake and Chavez, Morena was a co-owner with Yellowcake. See id. The Court dismissed Morena's infringement claim with leave to amend and instructed Morena that any amendment was required to explain why Yellowcake was not a co-owner with Morena. See id. at *50. In response to the Court's order, Morena contends that it is relying on the theory that it is a co-owner with Chavez and that Yellowcake is not a co-owner because the agreement between Chavez and Yellowcake is void ab initio. Specifically, after alleging that Morena "is at least a co-owner along with Chavez in the copyrights for the Los Originales Albums," FAC ¶ 18, the FAC in alleges: ". . . Chavez purportedly entered into an agreement to ostensibly sell the entirety of all right, title, and interest in and to the Los Originales Albums and Cover Art exclusively to . . . Yellowcake. At the time he entered into this agreement with . . . Yellowcake, however, Chavez did not possess such exclusive rights to grant in their entirety, rendering such agreement void ab intio." FAC ¶ 21.

HN9[] A contract that is "void ab initio" is "[n]ull from the beginning," Black's Law Dictionary (11th Ed. 2019), and treated as if it **[*13]** had never existed. *LA Sound USA, Inc. v. St. Paul Fire & Marine Ins. Co., 156 Cal.App.4th 1259, 1266, 67 Cal. Rptr. 3d 917 (2007)*; see also *Chen v. Bell-Smith, 768 F.Supp.2d 121, 134 (D. D.C. 2011)*. If the transfer agreement between Chavez and Yellowcake is void ab initio, then the transfer agreement transferred nothing between Chavez and Yellowcake. See Chen, 768 F.Supp.2d at 134; A-Mark Coin Co. v. General Mills, Inc., 148 Cal.App.3d 312, 322, 195 Cal. Rptr. 859 (1983) ("No rights are enforceable under a void contract.").

Morena relies heavily on *Sybersound* to argue that it is a co-owner with Chavez and not Yellowcake. In *Sybersound*, plaintiff Sybersound attempted to enforce karaoke-use interests in certain copyrights. See Sybersound, 517 F.3 at 1141-42. Sybersound claimed "to have acquired an ownership interest in [several songs] by entering into a written agreement with TVT, an original [co-owner] to the copyright of these songs." Id. at 1142. Sybersound argued that "it stepped into TVT's shoes and became a co-owner in the karaoke-use interest of the copyright when it became the 'exclusive assignee and licensee of [TVT's] copyrighted interests for purposes of karaoke use, and also exclusive assignee of the right to sue to enforce the assigned copyright interests . . . pursuant to the assignment agreement with TVT." Id. at 1145. The Ninth Circuit found that Sybersound's position was flawed because TVT could not grant an exclusive right in the karaoke interests of the copyrights. See id. The Ninth Circuit assumed **[*14]** that the karaoke-use interest was an interest protected by copyright but observed that TVT was not the exclusive owner of that interest. See id. "[U]nless all the other co-owners of the copyright joined in granting an exclusive right to Sybersound, TVT, acting solely as a co-owner of the copyright, could grant only a non-exclusive license to Sybersound because TVT may not limit the other co-owners' independent right to exploit the copyright." Id. Additionally, the Ninth Circuit rejected the argument that Sybersound became an exclusive assignee of TVT's copyright interests because the assignment agreement transferred all its karaoke interests to Sybersound. See id. at 1146. The Ninth Circuit held that, in order to be effective, an assignment or any other alienation permitted by the Copyright Act must be exclusive, and because TVT's assignment was admittedly non-exclusive, TVT succeeded only in transferring what it could — a non-exclusive license. See id. ***HN10***[] A non-exclusive licensee cannot sue for copyright infringement. See id.

In *Corbello*, the Ninth Circuit addressed the argument that *Sybersound* prohibited co-owners from transferring their rights without the permission of other co-owners. See Corbello, 777 F.3d at 1064. ***HN11***[] In **[*15]** finding that *Sybersound* did not prohibit co-owners from transferring their rights without permission from other co-owners, the *Corbello* court described and explained part of *Sybersound* as follows:

> We held [in *Sybersound*] that when one co-owner independently attempts to grant an exclusive license of a particular copyright interest, that licensee—in this case, Sybersound—does not have standing to sue alleged third-party infringers. [Sybersound, 517 F.3d] at 1146. After all, one co-owner, acting independently, "may not limit the other co-owners' independent rights to exploit the copyright." Id. Such a conclusion stems from the self-evident principle that a joint-owner cannot transfer more than he himself holds; thus, an assignment or exclusive license from one joint-owner to a third party cannot bind the other joint-owners or limit their rights in the copyright without their consent. In other words, the third party's right is "exclusive" as to the assigning or licensing co-owner, but not as to the other co-owners and their assignees or licensees. As such, a third-party assignee or licensee lacks standing to challenge the attempted assignments or licenses of other copyright owners.
>
> . . . But [*Sybersound*'s] emphasis **[*16]** on the word "exclusive" in these provisions cannot mean that only sole owners possess "exclusive" rights, as such a rule would run directly contrary to another well-settled principle of copyright law: the right of one joint-owner to sue third-party infringers without joining any of his fellow co-owners, a right Sybersound itself expressly recognizes. See id. at 1145 . . . . ***HN12***[] After all, the copyright statute permits infringement suits only if brought by owners of an "exclusive right" against alleged violators of such "exclusive right." 17 U.S.C. § 501 (emphasis added). If an "exclusive right" could only be possessed by a sole owner of a copyright, a co-owner would be unable to bring an infringement action to protect his interest.
>
> Moreover, such a limitation would contradict the principle of the free transferability of copyright ownership interests—a principle reflected in both the express language of § 201(d) and our Circuit precedent, neither of which treat transferability differently based on whether the original copyright owner is a sole owner or a co-owner. See, e.g., Silvers, 402 F.3d at 887; Gardner, 279 F.3d at 779; Bagdadi, 84 F.3d at 1197. Thus, *Sybersound* merely imposes a standing limitation on copyright assignees and licensees that reflects the basic principle that one cannot give **[*17]** away more than one's share in a copyright—it need not, and should not,

> be extended to limit a co-owner's ability to transfer unilaterally any exclusive copyright interests that he himself possesses.

Id. at 1065-66. The *Corbello* transfer was not affected by *Sybersound* and "constituted a transfer of DeVito's derivative-work interest in the copyright, rather than a license." *Id. at 1066*. Thus, the plaintiff could bring an infringement claim as an owner of a copyright interest. *Id. at 1064-66*.

Part of the analysis from *Corbello* was quoted with approval in *Tresona*. See Tresona, 953 F.3d at 645. *Tresona* further emphasized that the transfer in *Corbello* was a transfer of an interest and not a mere non-exclusive license. See id. at 645 n.2. ***HN13***[] "[A] co-owner of a copyright is free to transfer that ownership interest to another, as long as the transfer was only of 'exclusive copyright interests that [the co-owner itself] possess.'" Id. (quoting *Corbello, 777 F.3d at 1066*.

In this case, Yellowcake's Complaint alleges that it is the exclusive owner of the copyrights to the albums; documents from the Copyright Office indicate that Yellowcake is the sole claimant by virtue of a written transfer contract to the albums/copyrights; and the FAC alleges that Chavez and Yellowcake entered into an agreement for **[*18]** the sale of all rights, titles, and interests in the albums. See Doc. No. 1 & Ex. A; FAC ¶ 21. The allegation of the FAC combined with the actual copyright documents submitted by Yellowcake indicate that Chavez was not attempting to assign an exclusive license or carve out an exclusive interest as in *Sybersound*. Instead, the FAC when read in light of the copyright documents indicate that Chavez was selling everything, including all of his own rights in the albums, to Yellowcake. There is no indication or allegation that Chavez reserved any kind of ownership interest in the copyrights or divided any of the interests. Chavez could sell all interests that he possessed as a co-owner in the albums, and the consent of Morena was not required. See *Corbello, 777 F.3d at 1064-66* & n.5.

Of course, *Sybersound, Corbello*, and *Tresona* indicate that Chavez could not have sold the totality of all the exclusive rights in the albums/copyrights because Morena as a co-owner did not consent. However, the Court cannot conclude that simply because all existing exclusive rights in the jointly-owned copyrights/albums could not have been transferred is enough to render the agreement between Chavez and Yellowcake void ab initio.

First, Morena **[*19]** cites no authority that the agreement between Chavez and Yellowcake is void ab initio. Second, even in *Sybersound*, the Ninth Circuit read the transfer agreement as effecting the creation of a non-exclusive license because TVT could not grant the exclusive rights or license at issue. See *Sybersound, 517 F.3d at 1146*. *Sybersound* did not hold that the assignment was void ab initio. Third, *Corbello* and *Tresona* examined *Sybersound* and concluded that agreements which unsuccessfully attempt to transfer exclusive rights that a transferor does not have are still effective as between the transferor and the transferee. See Tresona, 953 F.3d at 645; *Corbello, 777 F.3d at 1065*. ***HN14***[] The key is that a transfer is limited by the rights possessed by the transferor and the rights that are attempted to be transferred. See Tresona, 953 F.3d at 645 n.2; *Corbello, 777 F.3d at 1064-66*. One cannot convey what one does not possess. In this case, Chavez (per the FAC's allegations) had a full co-ownership interest in the albums that he could transfer without the consent of Morena. See *Corbello, 777 F.3d at 1064-66* & n.5; see also Tresona, 953 F.3d at 645 & n.2.

In sum, because the allegations and judicially noticed documents indicate that Chavez attempted to convey all rights he possessed in the copyrights, even if he misunderstood the extent of the rights he possessed, the circumstances at this time **[*20]** appear to be more in-line with *Corbello* than *Sybersound*, meaning that a transfer of all of Chavez's rights in the copyrights was accomplished. Thus, the allegations and judicially noticed documents do not plausibly indicate that Morena is a co-owner with Chavez and not Yellowcake. The end result is that Chavez has no more exclusive rights in the copyrights, is no longer an owner of the copyrights, and that (crediting Morena's allegations in this *Rule 12(b)(6)* motion) Morena and Yellowcake are co-owners of the copyrights. Since co-owners cannot be liable to each other for copyright infringement, see *id. at 1066*; *Ashton-Tate, 916 F.2d at 522*; *Oddo, 743 F.2d at 632-33*, dismissal of the first cause of action is appropriate.

This is the second time that the Court has dismissed the co-owner theory of copyright infringement because the allegations and judicially noticeable documents indicated that Morena and Yellowcake were co-owners. Therefore, dismissal will be without leave to amend at this time. However, the Court recognizes that no scheduling order has been entered and no discovery or amendment deadlines set. It is possible that further discovery could alter the Court's analysis. If Morena diligently obtains evidence that indicates that Yellowcake is not a co-owner **[*21]** of the copyrights, Morena may file a motion for reconsideration or file a timely amended counterclaim in accordance with any deadlines set by a scheduling order. Finally, because co-owners are required to account to each other for their use of a co-owned copyrights, the Court will permit Morena to file an amended counterclaim that includes a claim for an accounting against Yellowcake. See *Corbello, 777 F.3d at 1062*; *Ashton-Tate, 916 F.2d at 522*; *Oddo, 743 F.2d at 632-33*.

II. Third Cause of Action — UCL

Counter-Defendant's Argument

YCH argues that the FAC's UCL claim is conclusory, lacks factual support, and improperly lumps all Counter-Defendants together without describing what each defendant did. As best can be gleaned from the allegations, it appears that Morena is alleging a UCL claim due to alleged infringing conduct. However, the Court already determined that such a claim is preempted by the Copyright Act. Therefore, no claim is plausibly alleged.

Counter-Plaintiff's Opposition

Morena argues that its UCL claim is not preempted by the Copyright Act because its claim is premised on all of YCH's wrongful conduct, including Hernandez intentionally and willfully misleading Chavez into granting Yellowcake rights in the albums that he did not possess. The conduct **[*22]** that is incorporated by reference is "unfair" because YCH's conduct of misleading Chavez into mistakenly believing that Morena had no rights to the albums/copyrights was an act that threatened or harmed competition and that was immoral and unethical.

Legal Standard

HN15[] The UCL broadly proscribes the use of any "unlawful, unfair or fraudulent business act or practice." *Cal. Bus. & Prof. Code. § 17200*; *Beaver v. Tarsadia Hotels, 816 F.3d 1170, 1177 (9th Cir. 2016)*. "The UCL operates as a three-pronged statute: 'Each of these three adjectives [unlawful, unfair, or fraudulent] captures a 'separate and distinct theory of liability.'" *Beaver, 816 F.3d at 1177* (citation omitted). The UCL's "unlawful" prong "borrows violations of other laws . . . and makes those unlawful practices actionable under the UCL," and "virtually any law or regulation — federal or state, statutory or common law — can serve as a predicate . . . ." *Candelore v. Tinder, Inc., 19 Cal.App.5th 1138, 1155, 228 Cal. Rptr. 3d 336 (2018)*. When the underlying legal claim that supports a UCL cause fails, however, "so too will the [the] derivative UCL claim." *AMN Healthcare, Inc. v. Aya Healthcare Services, Inc., 28 Cal.App.5th 923, 950, 239 Cal. Rptr. 3d 577 (2018)*. California law with respect to "unfair" conduct is currently "in flux." *Hodsdon v. Mars, Inc., 891 F.3d 857, 866 (9th Cir. 2018)*. ***HN16***[] Conduct is "unfair" either when it "threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as **[*23]** a violation of the law, or otherwise significantly threatens or harms competition," or when it 'offends an established public policy or when the practice is immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers." Id.

Discussion

The third counterclaim incorporates by reference all prior paragraphs, states that YCH's conduct including acts of infringement harmed Morena and the public, and notes that a UCL claim can be based on the violation of any state or federal law. See FAC ¶¶ 54-56.

The most natural reading of the third cause of action is that Morena's UCL claim is based on infringement of Morena's copyrights in the albums and cover art by YCH; no other basis is clearly apparent. However, the Court already held that such a UCL claim based on infringement is preempted by the Copyright Act. See *Yellowcake, at *43-*44*. Morena does not address the Court's prior analysis, nor does it vigorously defend any UCL claim based on infringing conduct by YCH. The Court detects no reason to deviate from its prior conclusion. Therefore, any UCL claim based on infringing conduct is preempted. See id.

Morena's opposition argues that it has incorporated by reference other paragraphs and thus, **[*24]** the entirety of YCH's conduct is at issue. In particular, however, Morena's opposition focuses on Hernandez intentionally and willfully misleading Chavez into the mistaken belief that Morena had no rights in the albums and thus, that he could freely sell all rights in the albums to YCH. There are problems with this theory.[1]

First, Paragraph 53 of the FAC, which is the first paragraph of the third cause of action, incorporates by reference all prior paragraphs. As part of the incorporation by reference, irrelevant paragraphs are included. This pleading practice — incorporating all prior paragraphs by reference irrespective of relevance to the claim being pled — is an improper shotgun pleading technique that generally does not give sufficient notice of the actual basis for a claim. See *Weiland v. Palm Beach Cnty. Sheriff's Office, 792 F.3d 1313, 1321-23 (11th Cir. 2015)*; *Deerpoint Grp., Inc. v. Agrigenix, LLC, 345 F.Supp.3d 1207, 1234 n.14 (E.D. Cal. 2018)*. The Court held that Morena's prior Counterclaim used improper shotgun pleading and explained that the practice should be avoided. See *Yellowcake, 2021 U.S. Dist. LEXIS 39127 at *34-*35* & n.4. Morena did not heed the Court's prior analysis. The basis identified from the opposition for Morena's UCL claim is not clear or obvious from the other prior paragraphs. Morena's second use of the shotgun pleading technique once again fails to apprise the Court **[*25]** and opposing counsel of the basis for its UCL claim. See id. On this basis alone, dismissal of the third counterclaim is appropriate.

Second, even if the Court held that the FAC gives fair notice of a UCL claim based on Hernandez's conduct in obtaining Chavez's ownership interests in the albums, Morena has not adequately alleged that any "unfair" conduct caused it harm. Chavez was at least a co-owner of the albums. As a co-owner, Chavez had the ability to transfer the entirety of his own interests in the albums without the permission of co-owner Morena. See *Corbello, 777 F.3d at 1064-66* & n.5. Morena has no recognizable interest in or claim to Chavez's ownership rights that would allow it to veto or limit a full transfer by Chavez. Thus, Hernandez could attempt to obtain or actually obtain the totality of Chavez's ownership interest in the copyrights, irrespective of Morena's interests or consent. While Morena alleges that Hernandez made misrepresentations in obtaining Chavez's ownership interests, the misrepresentations do not appear to be germane. Even if Chavez believed the misrepresentations that Morena had no ownership interest in the copyrights, Chavez still would have correctly believed that he was transferring **[*26]** all ownership interests that he possessed through the transfer agreement. Even considering the alleged true extent of Chavez's ownership interests in the copyrights, Chavez could still sell his actual interest without regard to Morena. Further, the misrepresentations were directed solely to Chavez in order to convince him to sell. It would therefore seem that the person who would be injured from Hernandez's misrepresentations is Chavez, not Morena.[2] There is no indication that Hernandez made misrepresentations to Morena or that Morena detrimentally relied on the misrepresentations in any way. While the Court would agree that Yellowcake's conduct after acquiring Chavez's interests and registering the copyrights was detrimental to Morena, that conduct is separate from and post-dates any

---

[1] There are three bases for a UCL claim, "unlawful," "fraudulent," and "unfair" conduct. *Beaver, 816 F.3d at 1177*. Morena presumably knows exactly what conduct of YCH violates which aspects of the UCL. It is up to Morena to clearly explain its theories of liability. It is not enough for Morena to say that the entirety of YCH's conduct is at issue and then identify only one act by Hernandez. Since Morena has only identified one act by Hernandez, the Court will only focus on Hernandez's misleading acts/misrepresentations in obtaining Chavez's copyright interests.

[2] The Court notes that any injury to Chavez would appear to be theoretical at best. By believing Hernandez, Chavez may have actually obtained a windful because Yellowcake allegedly was attempting to pay for all rights that existed in the copyrights, not just Chavez's. Presumably one would pay more to be a sole-owner of a copyright, as opposed to a joint-owner. Thus, it seems unlikely that Chavez has suffered any injury from the conduct of YCH.

misrepresentations from Hernandez to Chavez. Therefore, it is unclear how misrepresentations to Chavez about the extent of his or Morena's ownership interests in the albums are either "unfair" or injurious to Morena.

In sum, there is no plausible claim alleged for a violation of the UCL.[3] The UCL theory that is clearly alleged in the FAC is preempted and the theory that is identified in the opposition is **[*27]** neither fairly noticed nor plausibly pled in the FAC. This is the second time that the Court has dismissed Morena's UCL claim. The only theories of UCL liability that have been adequately identified are not plausible. Thus, the Court will dismiss the UCL claim without leave to amend.[4]

III. *Rule 11* Sanctions

HN17[] *Rule 11(c)(2)* "provides strict procedural requirements for parties to follow when they move for sanctions under *Rule 11*." *Radcliffe v. Rainbow Const. Co., 254 F.3d 772, 788 (9th Cir. 2001)*; see *Hadsell v. Baskin, 790 Fed. App'x 97, 98 (9th Cir. 2020)*. Among other things, a "motion for sanctions must be made separately from any other motion and must describe the specific conduct that allegedly violates *Rule 11(b)*." *Fed. R. Civ. P. 11(c)(2)*.

In this case, YCH requests *Rule 11* sanctions as part of its *Rule 12(b)(6)* motion. YCH's request therefore violates the "separate motion" requirement. Because YCH has failed to meet the "strict procedural requirements" of *Rule 11(c)(2)*, YCH's motion for *Rule 11* sanctions will be denied. See id.; *Cohen v. American Sec. Ins. Co., 735 F.3d 601, 607 n.3 (7th Cir. 2013)*; *Williamson v. Recovery L.P., 542 F.3d 43, 51-52 (2d Cir. 2008)*; *Beltran v. Procare Pharm., LLC, 2020 U.S. Dist. LEXIS 194043, *9 (C.D. Cal. Oct. 19, 2020)*; *South Shore Ranches, LLC v. Lakelands Co., LLC, 2009 U.S. Dist. LEXIS 42941, *21 (E.D. Cal. May 13, 2009)*.

ORDER

Accordingly, IT IS HEREBY ORDERED that:

1. Counter-Defendants' *Rule 12(b)(6)* motion to dismiss (Doc. No. 41) is GRANTED;

2. The first and third counterclaims are DISMISSED without leave to amend;

3. Within fourteen (14) days of service of this order, Counter-Plaintiff may file a Second Amended Counterclaim that adds a claim for an accounting;

4. If Counter-Plaintiff fails to **[*28]** timely file a Second Amended Complaint, then Defendants shall file an answer to the First Amended Counterclaim within twenty-one (21) days of service of this order; and

5. Counter-Defendants' motion for *Rule 11* sanctions is DENIED.

IT IS SO ORDERED.

Dated: August 2, 2021

---

[3] The Court also agrees with YCH that the complaint improperly lumps all Defendants together under the third cause of action without adequately differentiating which defendant committed which wrongful acts, or how each Defendant may be liable for the acts of another Defendants. See FAC ¶¶ 53-57. The third cause of action therefore violates the general rule that broad allegations that lump multiple defendants together without distinguishing the alleged wrongs or actions between the defendants fail to provide individual defendants with adequate notice. See *Warnshuis v. Bausch Health U.S., LLC, 2020 U.S. Dist. LEXIS 107136, *23 (E.D. Cal. June 18, 2020)* (and cases cited therein).

[4] Again, Morena indicated that the entirety of YCH's conduct is at issue for purposes of its UCL claim. If Morena can identify specific conduct by Yellowcake, Colonize, or Hernandez that is actionable under the UCL, then Morena can file a motion for reconsideration of the decision to dismiss the third cause of action without leave to amend.

Civil Procedure > Appeals > Standards of Review > De Novo Review

Civil Procedure > Preliminary Considerations > Jurisdiction

HN1[] **Standards of Review, De Novo Review**

An appellate court must first examine the basis of its jurisdiction, a question it reviews de novo.

Civil Procedure > Appeals > Appellate Jurisdiction > Collateral Order Doctrine

Civil Procedure > Appeals > Appellate Jurisdiction > Interlocutory Orders

Civil Procedure > Appeals > Appellate Jurisdiction > Final Judgment Rule

HN2[] **Appellate Jurisdiction, Collateral Order Doctrine**

The U.S. Court of Appeals for the Fifth Circuit's precedent holds that the collateral order doctrine confers jurisdiction to review an interlocutory appeal of a district court's denial of state-action immunity in certain circumstances. The collateral order doctrine provides a practical construction of *28 U.S.C.S. § 1291*'s final decision requirement, rendering a district court's interlocutory decision immediately appealable if it (1) conclusively determine[s] the disputed question, (2) resolves an important issue completely separate from the merits of the action, and (3) would be effectively unreviewable on appeal from a final judgment.

Antitrust & Trade Law > Sherman Act > Scope > Exemptions

Civil Procedure > Appeals > Appellate Jurisdiction > Collateral Order Doctrine

Civil Rights Law > ... > Section 1983 Actions > Scope > Private Facilities

Governments > State & Territorial Governments > Claims By & Against

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

HN3[] **Scope, Exemptions**

Denials of state-action immunity to state, state-entity, and municipal defendants are immediately appealable collateral orders because (1) denials of states' and state entities' claims to state action immunity clearly purport to be conclusive determinations that they have no right not to be sued under federal antitrust laws; (2) an appellate court reviewing the denial of the state or state entity's claim of immunity need not consider the correctness of the plaintiff's version of the facts, nor even determine whether the plaintiff's allegations actually state a claim; and (3) state action immunity shares the essential element of absolute, qualified and *Eleventh Amendment* immunities—an entitlement not to stand trial under certain circumstances, which is effectively lost if a case is erroneously permitted to go to trial. However, the U.S. Court of Appeals for the Fifth Circuit does not allow such immediate appeals for private defendants because it must view claims of a right not to be tried with skepticism and the state action doctrine does not immunize private defendants from suit. Accordingly, the denial of state-action immunity to a private party would not be effectively unreviewable on appeal from a final judgment.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

HN4[] **Exemptions & Immunities, Parker State Action Doctrine**

The U.S. Supreme Court has rejected a purely formalistic inquiry into whether a defendant invokes state-action immunity as a prototypical state agency or a private party.

Governments > Local Governments > Property

HN5[] **Local Governments, Property**

As a public entity, the San Jacinto River Authority is entitled to a presumption that it acts in the public interest absent a showing to the contrary.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN6[] **Motions to Dismiss, Failure to State Claim**

In reviewing the denial of a motion to dismiss under *Fed. R. Civ. P. 12(b)(6)*, the court takes all well-pleaded facts as true.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

***HN7*[]** **Complaints, Requirements for Complaint**

When the complaint attaches written exhibits, the exhibits are considered a part of the pleading for all purposes. *Fed. R. Civ. P. 10(c)*. If an attached exhibit contradicts a factual allegation in the complaint, then indeed the exhibit and not the allegation controls.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

***HN8*[]** **Motions to Dismiss, Failure to State Claim**

A motion to dismiss is properly denied if, accepting the well-pled factual allegations in the plaintiff's complaint as true, the plaintiff states a claim to relief that is plausible on its face.

Civil Procedure > Appeals > Standards of Review > De Novo Review

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

***HN9*[]** **Standards of Review, De Novo Review**

State authorization is generally interpreted by an objective test that looks at the language of the statute; if other evidence is needed, it can be gleaned from legislative histories or state judicial decisions. This analysis ordinarily produces a legal conclusion reviewed de novo. Thus, in reviewing the denial of a motion to dismiss based upon state-action immunity, an appellate court will affirm the denial if, taking the well-pleaded factual allegations in the complaint as true and looking to the language of the relevant authorizing statute (and, to the extent necessary, legislative history or judicial decisions), the defendant is not entitled to state-action immunity.

Antitrust & Trade Law > Sherman Act > Defenses

Governments > Local Governments > Claims By & Against

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Local Governments & Private Parties

Antitrust & Trade Law > Sherman Act > Scope > Exemptions

***HN10*[]** **Sherman Act, Defenses**

U.S. Supreme Court precedent recognizes three tiers of protection from federal antitrust lawsuits under the state-action immunity doctrine: (1) clear exercises of a state's sovereign power are immune from federal antitrust scrutiny ipso facto (Parker immunity); (2) acts of a prototypical state agency or municipality are entitled to immunity if pursuant to a clearly articulated and affirmatively expressed state policy to replace competition with regulation (Hallie scrutiny); and (3) actions by private parties or state agencies controlled by participants in the market they regulate are protected if they meet the aforementioned clear articulation requirement and are also subject to active supervision by the state (Midcal scrutiny). Because states regulate their economies in many ways not inconsistent with the antitrust laws, state-action immunity is disfavored. Ipso facto Parker immunity applies only for state legislation and decisions of a state supreme court, acting legislatively rather than judicially.

Antitrust & Trade Law > Sherman Act > Scope > Exemptions

Energy & Utilities Law > Antitrust Issues > Monopolization

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Local Governments & Private Parties

HN11[] **Scope, Exemptions**

Anticompetitive conduct by a nonsovereign actor must be clearly articulated and affirmatively expressed as state policy to merit state-action immunity. This inquiry involves two distinct questions: (1) Does state law authorize the defendant to engage in the challenged conduct?; and (2) Did the state authorize the challenged conduct with an intent to displace competition with regulation or monopoly service? State lawmakers need not expressly state in a statute or its legislative history that the legislature intends for the delegated action to have anticompetitive effects. Rather, state-action immunity applies if the anticompetitive effect was the foreseeable result of the state's authorization. When anticompetitive consequences are simply one foreseeable possibility among many, then authorization should not be inferred.

Governments > Local Governments > Property

Governments > Public Improvements > Sanitation & Water

HN12[] **Local Governments, Property**

The Enabling Statute allows the San Jacinto River Authority (SJRA) to contract with municipalities or other corporate bodies or persons for the purpose of establishing and collecting rates and other charges for the sale or use of water, water transmission, treatment or connection facilities and any other services sold, furnished or supplied by SJRA. Enabling Statute § 3(xviii).

Governments > Local Governments > Administrative Boards

Governments > Public Improvements > Sanitation & Water

HN13[] **Local Governments, Administrative Boards**

The Enabling Statute permits the San Jacinto River Authority to enter into any and all necessary and proper contracts necessary or useful in the furtherance of any power granted by law. Enabling Statute § 3(xv).

Governments > Public Improvements > Sanitation & Water

HN14[] **Public Improvements, Sanitation & Water**

Section 3(xviii) of the San Jacinto River Authority's (SJRA's) Enabling Statute authorizes SJRA to participate in the markets for water, water transmission and treatment, and other services through contracts establishing rates and other charges. Precedent establishes that mere authorization to participate in a market does not constitute authority to monopolize that market.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN15[] **Scope, Monopolization Offenses**

Even a lawful monopolist may be subject to antitrust restraints when it seeks to extend or exploit its monopoly in a manner not contemplated by its authorization.

Judges: Before WIENER, ELROD, and HIGGINSON, Circuit Judges.

Opinion by: STEPHEN A. HIGGINSON

Opinion

[*339] STEPHEN A. HIGGINSON, *Circuit Judge*:

Plaintiffs-Appellees Quadvest and Woodland Oaks Utility, investor-owned water utilities, sued Defendant-Appellant San Jacinto River Authority ("SJRA"), a state entity, alleging that SJRA violated *Section 1 of the Sherman Act* when it entered into **[*340]** and enforced contracts relating to the purchase of wholesale water in Montgomery County, Texas. SJRA asserted its entitlement to state-action antitrust immunity in a motion to dismiss, which the district court denied. We AFFIRM.

I.

Quadvest and Woodland Oaks Utility ("Plaintiffs") entered into contracts with SJRA governing Plaintiffs' purchase and use of water. **[**2]** Plaintiffs now challenge those contracts as anticompetitive in violation of *Sherman Act Section 1*. The instant interlocutory appeal asserts that SJRA is entitled to state-action immunity from Plaintiffs' lawsuit because the contracts were entered into and are enforced pursuant to a clearly articulated and affirmatively expressed state policy to replace competition with regulation. *See* *Cal. Retail Liquor Dealers Ass'n v. Midcal Aluminum, Inc., 445 U.S. 97, 105, 100 S. Ct. 937, 63 L. Ed. 2d 233 (1980)*. We first discuss SJRA's creation and its enabling statute.

A. Creation of SJRA and Enabling Statute

SJRA is a political subdivision of the State of Texas, created in 1937 by the Texas Legislature to conserve, control, and utilize the storm and flood waters of the San Jacinto River and its tributary streams. According to Plaintiffs' First Amended Complaint ("FAC"), SJRA owns one-third of the water rights to the surface water in Lake Conroe in addition to groundwater-producing wells. Plaintiffs assert that SJRA is both a water wholesaler and retailer, (1) wholesaling raw and treated surface water to utilities that re-sell the water to their end-user customers, (2) wholesaling raw groundwater to municipal utility districts **[**3]** that serve The Woodlands, and (3) retailing raw surface water to its own end-user customers.[1]

SJRA's Enabling Statute, as amended,[2] vests SJRA with the authority to:

- "store, control and conserve the storm and flood waters of the watershed of the San Jacinto River and its tributaries," (§ 3(i));
- "provide water for domestic, municipal, commercial, industrial and mining purposes . . . including water supplies for cities, towns and industries, and in connection therewith to construct or otherwise acquire water transportation, treatment and distribution facilities and supplemental sources of supply," (§ 3(v));
- "enter into any and all necessary and proper contracts . . . necessary or useful in the furtherance of any power granted by law to [SJRA]," (§ 3(xv)); and

- "enter into such contracts . . . with municipalities or other corporate **[*341]** bodies or persons, public or private, for the purpose of establishing and collecting . . . rates and other charges for the sale or use of water, water transmission, treatment or connection facilities . . . and any other services sold, furnished or supplied by [SJRA]," (§ 3(xviii)).

B. The Lone Star District Regulatory Plan

In June 2006, the Texas Water Development **[**4]** Board, in association with SJRA and Lone Star Groundwater Conservation District (a state entity charged with regulating groundwater use in Montgomery County), commissioned a study to assess the County's long-term groundwater supply needs. According to the FAC, groundwater has historically been less expensive, and thus more widely used, than surface water in Montgomery County. The study determined that, based on projections of future water needs, potable water demand would eventually exceed the estimated sustainable recharge rate of the Gulf Coast Aquifer (Montgomery County's source of groundwater), necessitating the use of surface water. The report further concluded that new surface water treatment facilities would need to be constructed to meet the projected need for potable surface water.

Citing the recommendations of the report, SJRA and Lone Star executed a Memorandum of Understanding ("MOU") by which the parties agreed to "pursue a cooperative implementation strategy . . . to finance and provide wholesale surface water to converting [groundwater] users," "to spread financing costs . . . in an equitable manner to all permitted users of water throughout [Montgomery] County, regardless **[**5]** of which particular users actually convert from groundwater to surface water," and to assess water use fees to "equalize the cost of groundwater and surface water."

Lone Star subsequently adopted a District Regulatory Plan (the "Lone Star Plan") to regulate groundwater production in Montgomery County, consistent with the MOU. Among other requirements, the Lone Star Plan mandated that all "large volume groundwater users" ("LVGUs")[3] reduce their groundwater consumption to either (a)

---

[1] Although the FAC describes SJRA as wholesaling only "raw surface water" to utilities, the GRP Contracts provide for SJRA to also wholesale treated surface water to utilities.

[2] *See* 1937 Tex. Gen. & Spec. Laws, ch. 426; 1939 Tex. Gen. & Spec. Laws, ch. 10; 1941 Tex. Gen. Laws, chs. 480 & 613; 1943 Tex. Gen. Laws, ch. 371; 1951 Tex. Gen. Laws, chs. 366 & 367; 1967 Tex. Gen. Laws, ch. 547; *1991 Tex. Gen. Laws, ch. 698*; *2003 Tex. Gen. Laws, ch. 847*; *2015 Tex. Gen. Laws, ch. 1148*.

According to the FAC, SJRA's Enabling Statute was deleted from Vernon's Texas Statutes and Codes Annotated when they were recodified but was not relocated to a new code. All citations in this opinion are to the version of SJRA's Enabling Statute that is currently in force, which Plaintiffs compiled into a single document as an exhibit to the FAC. We append the full Enabling Statute to our decision for reference.

70% of the volume they were permitted to produce in 2009 or (b) 10 million gallons (the "Groundwater Reduction Rule"). Alternatively, LVGUs could satisfy the Lone Star Plan by participating in a "joint groundwater reduction plan" ("Joint GRP") with one or more additional LVGUs, pursuant to which the LVGUs could achieve 30% groundwater use reduction on aggregate, rather than individually.

C. SJRA's Groundwater Reduction Plan Contracts with Plaintiffs

In March 2011, SJRA (itself an LVGU subject to the Lone Star Plan) finalized a Joint GRP to allow participating LVGUs to collectively achieve compliance with Lone Star's Groundwater Reduction Rule. Under SJRA's Joint GRP, some LVGUs would "over convert" to surface **[**6]** water (i.e., reduce their groundwater consumption by greater than 30%), thereby allowing other LVGUs to continue to use more groundwater **[*342]** than would otherwise be permitted. According to an exhibit to the FAC, 140 of the 202 LVGUs in Montgomery County had joined the Joint GRP by executing contracts with SJRA as of February 8, 2011. Plaintiffs are each party to such a contract with SJRA (together, the "GRP Contracts").

The GRP Contracts require Plaintiffs to pay SJRA a volume-based fee for pumping groundwater, regardless of the source (the "Groundwater Pumpage Fee"). SJRA would use the Groundwater Pumpage Fee proceeds to develop a surface water treatment facility and transmission system. Plaintiffs allege that the Groundwater Pumpage Fee is calculated to equalize the costs of groundwater and surface water. Upon completion of the surface water treatment facility, the GRP Contracts allow SJRA to (1) require Plaintiffs to connect to SJRA's transmission system and (2) dictate how much surface water each Plaintiff must buy from SJRA (the "Surface Water Put Option"). The GRP Contracts also allow SJRA to charge a volume-based fee on any water imported from a non-Joint GRP participant (the "Water **[**7]** Importation Fee").

D. Montgomery County Water Utilities' Lawsuit Against Lone Star

In 2015, Plaintiffs and other Montgomery County LVGUs sued Lone Star, alleging that it lacked statutory authority for the Groundwater Reduction Rule. After an initial state trial court ruling declaring the Rule void *ab initio* and an interlocutory appeal, the parties filed motions for partial non-suit following Lone Star's withdrawal of its appeal. The trial court thus entered a final judgment in May 2019 declaring that the Groundwater Reduction Rule had been adopted without legal authority and was thereby void.

E. Procedural History

Plaintiffs in the instant lawsuit are investor-owned water utilities that sell drinking water to retail consumers in Montgomery County and were subject to Lone Star's Groundwater Reduction Rule before it was invalidated. They aver that they rely exclusively on groundwater and do not buy surface water from SJRA.

Plaintiffs filed this lawsuit against SJRA on November 15, 2019, and amended their complaint on February 3, 2020. The FAC alleges that the GRP Contracts constitute continuing violations of *Sherman Act Section 1*, which declares that "[e]very contract . . . in restraint of **[**8]** trade or commerce among the several States . . . is . . . illegal." *15 U.S.C. § 1*. Specifically, Plaintiffs assert that the Groundwater Pumpage Fee provision "constitute[s] [a] horizontal agreement[] between SJRA and each Plaintiff to fix the price of wholesale raw water in Montgomery County by assessing pumpage fees to LVGU participants so as to equalize the wholesale price of raw groundwater with the

---

[3] The Lone Star Plan defined "Large Volume Groundwater User" or "LVGU" as "any person or entity that, through a single well or a combination of wells, actually produced or was authorized by a permit or permits issued by [Lone Star] to produce 10 million gallons or more of groundwater annually from the Gulf Coast Aquifer within the [Lone Star] District during calendar year 2009. A Large Volume Groundwater User does not include any person or entity that produces groundwater solely for its own domestic use associated with a single family residence, agricultural use, as that term is defined by Chapter 36, Water Code, or both domestic and agricultural use."

wholesale price of raw surface water." They further allege that the Surface Water Put Option and Water Importation Fee provisions are unreasonable restraints of trade. Plaintiffs request a declaratory judgment that the GRP Contracts are illegal and unenforceable and an injunction prohibiting SJRA from enforcing the GRP Contracts or taking any other acts to enforce the Joint GRP.

SJRA moved to dismiss the FAC pursuant to *Federal Rule of Civil Procedure 12(b)(6)*, asserting that the action was barred by the statute of limitations and laches, that SJRA was entitled to state-action immunity, and that the FAC failed to state a Sherman Act claim.

On August 14, 2020, the district court entered an order denying SJRA's motion to dismiss. Relevant to the instant interlocutory appeal, the district **[**9]** court concluded **[*343]** that SJRA had failed to demonstrate its entitlement to state-action immunity.

SJRA filed a notice of interlocutory appeal on August 21, 2020, appealing the district court's order denying its state-action immunity defense.

II.

HN1[] We must first examine the basis of our jurisdiction, a question we review de novo. *Mosley v. Cozby, 813 F.2d 659, 660 (5th Cir. 1987)*; *United States v. Slovacek, 699 F.3d 423, 425 (5th Cir. 2012)*.

HN2[] Our precedent holds that the collateral order doctrine confers jurisdiction to review an interlocutory appeal of a district court's denial of state-action immunity in certain circumstances.[4] *See* *Martin v. Mem'l Hosp. at Gulfport,*

---

[4] This issue is the subject of an active circuit split. Every other circuit to have considered this issue disagrees with our precedent, instead holding that interlocutory appeals from denials of state-action immunity may not be taken under the collateral order doctrine. *See* *Huron Valley Hosp., Inc. v. City of Pontiac, 792 F.2d 563, 567-68 (6th Cir. 1986)*; *S.C. State Bd. of Dentistry v. FTC, 455 F.3d 436, 441-47 (4th Cir. 2006)*; *SolarCity Corp. v. Salt River Project Agric. Improvement & Power Dist., 859 F.3d 720, 727 (9th Cir.)*, *cert. granted*, ***138 S. Ct. 499, 199 L. Ed. 2d 381 (2017)***, *and cert. dismissed by agreement of the parties*, ***138 S. Ct. 1323, 200 L. Ed. 2d 510 (Mar. 22, 2018)***; *SmileDirectClub, LLC v. Battle, No. 19-12227, 4 F.4th 1274, 2021 U.S. App. LEXIS 21393, *18-19 (11th Cir. July 20, 2021)* (en banc) (overruling the Eleventh Circuit's prior precedent which agreed with our *Martin* precedent, *Commuter Transp. Sys., Inc. v. Hillsborough Cnty. Aviation Auth., 801 F.2d 1286, 1290 (11th Cir. 1986))*.

In 2017, the Supreme Court granted a writ of certiorari in *SolarCity* to decide "[w]hether orders denying state-action immunity to public entities are immediately appealable under the collateral-order doctrine." ***SolarCity Corp. v. Salt River Project Agric. Improvement & Power Dist., No. 17-368, 138 S. Ct. 499, 199 L. Ed. 2d 381 (Dec. 1, 2017)***. The parties reached a settlement agreement before oral argument was heard, however, and the Court dismissed the petition pursuant to the parties' agreement. ***138 S. Ct. 1323, 200 L. Ed. 2d 510 (2018)***. Last month, the en banc Eleventh Circuit held that "interlocutory appeals may not be taken under the collateral order doctrine from the denials of so-called 'state-action immunity,'" overruling its prior precedent. *SmileDirectClub, 4 F.4th 1274, 2021 U.S. App. LEXIS 21393, at *2, *18-19*.

Other courts, in critiquing our precedent, have noted that (1) the Supreme Court has repeatedly emphasized the narrowness of the collateral order doctrine in recent decisions, *see* *SmileDirectClub, 4 F.4th 1274, 2021 U.S. App. LEXIS 21393, at *6*; *SolarCity, 859 F.3d at 730*; (2) the Court in *Will v. Hallock* held that government defendants are not entitled to immediate appealability merely to avoid the burdens of trial absent "some particular value of a high order," *see* *SolarCity, 859 F.3d at 724* (discussing *546 U.S. 345, 352-55, 126 S. Ct. 952, 163 L. Ed. 2d 836 (2006))*; *see also* *SmileDirectClub, 4 F.4th 1274, 2021 U.S. App. LEXIS 21393, at *16-17*; and (3) as our en banc court has observed, "*Parker* immunity is an inapt description, for its parentage differs from the qualified and absolute immunities of public officials. . . . '*Parker* immunity' is more accurately a strict standard for locating the reach of the Sherman Act than the judicial creation of a defense to liability for its violation." *Surgical Care Ctr. of Hammond, L.C. v. Hosp. Serv. Dist. No. 1 of Tangipahoa Par., 171 F.3d 231, 234 (5th Cir. 1999)* (en banc); *see* *S.C. State Bd. of Dentistry, 455 F.3d at 444-45*; *SmileDirectClub, 4 F.4th 1274, 2021 U.S. App. LEXIS 21393, at *9* ("There is some support for this aspect of *Commuter Transportation Systems*. For example, in *Martin* the Fifth Circuit also treated *Parker* as providing 'an entitlement not to stand trial under certain circumstances.' . . . Yet just four years later, the full Fifth Circuit—in a unanimous opinion—retreated from this facet of *Martin* in *Surgical Care Center of Hammond*." (citations omitted) (quoting *Martin v. Mem'l Hosp. at Gulfport, 86 F.3d 1391, 1395 (5th Cir. 1996)))*. We remain bound, however, by our precedent absent

86 F.3d 1391, 1396-97 [*344] (5th Cir. 1996). The collateral order doctrine provides a "practical construction" of 28 U.S.C. § 1291's "final decision" requirement, Digit. Equip. Corp. v. Desktop Direct, Inc., 511 U.S. 863, 867, 114 S. Ct. 1992, 128 L. Ed. 2d 842 (1994) (citing Cohen v. Beneficial Indus. Loan Corp., 337 U.S. 541, 546, 69 S. Ct. 1221, 93 L. Ed. 1528 (1949)), rendering a district court's interlocutory decision immediately appealable if it "[1] conclusively determine[s] the disputed question, [2] resolve[s] an important issue completely separate from the merits of the action, and [3] [would] **[**10]** be effectively unreviewable on appeal from a final judgment," Will v. Hallock, 546 U.S. 345, 349, 126 S. Ct. 952, 163 L. Ed. 2d 836 (2006) (internal quotation marks omitted).

HN3[] In *Martin*, we held that denials of state-action immunity to state, state-entity, and municipal defendants are immediately appealable collateral orders because (1) "denials of states' and state entities' claims to state action immunity clearly purport to be conclusive determinations that they have no right not to be sued under **[**11]** federal antitrust laws"; (2) "[a]n appellate court reviewing the denial of the state or state entity's claim of immunity need not consider the correctness of the plaintiff's version of the facts, nor even determine whether the plaintiff's allegations actually state a claim"; and (3) "state action immunity shares the essential element of absolute, qualified and Eleventh Amendment immunities—an entitlement not to stand trial under certain circumstances," which is "effectively lost if a case is erroneously permitted to go to trial." 86 F.3d at 1395-97 (internal quotation marks omitted).

However, this court does not allow such immediate appeals for private defendants because we must "view claims of a right not to be tried with skepticism" and "the state action doctrine does not immunize private defendants from suit." Acoustic Sys., Inc. v. Wenger Corp., 207 F.3d 287, 292 (5th Cir. 2000) (internal quotation marks omitted). Accordingly, the denial of state-action immunity to a private party would not be effectively unreviewable on appeal from a final judgment. *Id.*

Plaintiffs argue that because SJRA is a participant in the market relevant to their antitrust claim—the market for wholesale raw **[**12]** water in Montgomery County—SJRA invokes state-action immunity as a private party rather than a state entity and is thereby subject to the doctrine's "active supervision" requirement. They rely on the Supreme Court's opinion in *North Carolina State Board of Dental Examiners v. FTC*, where in deciding that the active supervision requirement applied to a state regulatory board controlled by active market participants, the Court distinguished such boards, which are more akin to "private trade associations," from "prototypical state agencies." 574 U.S. 494, 511, 135 S. Ct. 1101, 191 L. Ed. 2d 35 (2015). Following *Dental Examiners*, we held that a state regulatory board composed of private market participants invoked state-action immunity "as a private party" and was thus unentitled to immediate appeal of a Federal Trade Commission order denying its state-action immunity defense. *See* La. Real Est. Appraisers Bd. v. FTC, 976 F.3d 597, 604 (5th Cir. 2020), *cert. denied*, *141 S. Ct. 2506, 209 L. Ed. 2d 540, 2021 U.S. LEXIS 1819, 2021 WL 1241021 (2021)*.

SJRA, like the defendant in *Martin*, is a state-created entity that, unlike the defendant in *Louisiana Real Estate Appraisers*, **[*345]** is not alleged to be controlled by private market participants. *See* Martin, 86 F.3d at 1395-97; **[**13]** La. Real Est. Appraisers Bd., 976 F.3d at 604. **HN4**[] However, the Supreme Court has rejected a "purely formalistic inquiry" into whether a defendant invokes state-action immunity as a prototypical state agency or a private party. *See* Town of Hallie v. City of Eau Claire, 471 U.S. 34, 39, 105 S. Ct. 1713, 85 L. Ed. 2d 24 (1985); *see also* La. Real Est. Appraisers Bd., 976 F.3d at 604. Relevant here, Plaintiffs allege that SJRA is an active participant in the market over which it purportedly exerts anticompetitive control.

In *Hallie* and again in *Dental Examiners*, the Court focused on the risk of private interests influencing a state entity's decisions. *See* Hallie, 471 U.S. at 45; Dental Examiners, 574 U.S. at 507-08; *see also* La. Real Est. Appraisers Bd., 976 F.3d at 604. **HN5**[] As a public entity, SJRA is entitled to a presumption that it acts in the public interest "absent a showing to the contrary." Hallie, 471 U.S. at 45. Although SJRA allegedly participates in the Montgomery County wholesale raw water market, Plaintiffs have not shown at this early stage that SJRA is influenced by or pursues outside private interests. We thus conclude that, for the purposes of our jurisdictional analysis, SJRA

---

reconsideration by our full court. We further note that neither party raised this issue in its appellate briefing nor during oral argument.

invokes state-action **[**14]** immunity as a state entity. The instant interlocutory appeal is thereby proper under this court's precedent.

III.

We now turn to the merits of SJRA's appeal. The district court denied SJRA's motion to dismiss, concluding that state-action immunity did not apply. On appeal, SJRA asserts that the district court erred because SJRA's entry into and enforcement of the GRP Contracts was authorized by its Enabling Statute, and the displacement of competition in the wholesale raw water market was the foreseeable result of this authorization. Plaintiffs maintain that SJRA's Enabling Statute does not authorize its anticompetitive conduct.

HN6[] In reviewing the denial of a motion to dismiss under *FRCP 12(b)(6)*, this court "tak[es] all well-pleaded facts as true." *Zantiz v. Seal, 602 F. App'x 154, 159 (5th Cir. 2015)* (per curiam) (unpublished) (citing *Brown v. Miller, 519 F.3d 231, 236 (5th Cir. 2008))*. ***HN7***[] When, as here, the complaint attaches written exhibits, the exhibits are considered "a part of the pleading for all purposes." *Fed. R. Civ. P. 10(c)*. If an attached exhibit contradicts a factual allegation in the complaint, "then indeed the exhibit and not the allegation controls." *United States ex rel. Riley v. St. Luke's Episcopal Hosp., 355 F.3d 370, 377 (5th Cir. 2004)*; **[**15]** *see also* *Smit v. SXSW Holdings, Inc., 903 F.3d 522, 528 (5th Cir. 2018)*.

HN8[] A motion to dismiss is properly denied if, accepting the well-pled factual allegations in the plaintiff's complaint as true, the plaintiff states a claim to relief that is plausible on its face. *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*; *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. ***HN9***[] "State authorization is generally interpreted by an objective test that looks at the language of the statute; if other evidence is needed, it can be gleaned from legislative histories or state judicial decisions." *Surgical Care Ctr. of Hammond, L.C. v. Hosp. Serv. Dist. No. 1 of Tangipahoa Par., 171 F.3d 231, 234 (5th Cir. 1999)* (en banc) (quoting 1 PHILLIP E. AREEDA & HERBERT HOVENKAMP, ***ANTITRUST LAW***, ¶ 222b (1997)). This analysis "ordinarily produces a legal conclusion reviewed de novo." *Id.*

[*346] Thus, in reviewing the denial of a motion to dismiss based upon state-action immunity, we will affirm the denial if, taking the well-pleaded factual allegations in the complaint as true and looking to the language of the relevant authorizing statute (and, to the extent **[**16]** necessary, legislative history or judicial decisions), the defendant is not entitled to state-action immunity. *See, e.g, Earles v. State Bd. of Certified Pub. Accts., 139 F.3d 1033, 1040-44 (5th Cir. 1998)*.

A.

HN10[] Supreme Court precedent recognizes three tiers of protection from federal antitrust lawsuits under the state-action immunity doctrine: (1) clear exercises of a state's sovereign power are immune from federal antitrust scrutiny *ipso facto* ("*Parker* immunity"), *Dental Examiners, 574 U.S. at 504* (discussing *Parker v. Brown, 317 U.S. 341, 63 S. Ct. 307, 87 L. Ed. 315 (1943))*; (2) acts of a "prototypical state agenc[y]" or municipality are entitled to immunity if pursuant to a "clearly articulated and affirmatively expressed" state policy to replace competition with regulation ("*Hallie* scrutiny"), *id. at 504, 506-07, 511* (quoting *FTC v. Phoebe Putney Health Sys., Inc., 568 U.S. 216, 225, 133 S. Ct. 1003, 185 L. Ed. 2d 43 (2013))* (discussing *Hallie, 471 U.S. 34, 105 S. Ct. 1713, 85 L. Ed. 2d 24*); and (3) actions by private parties or state agencies controlled by participants in the market they regulate are protected if they meet the aforementioned "clear articulation" requirement and are also subject to "active supervision" by the state ("*Midcal* scrutiny"), *id. at 507* (discussing **[**17]** *Midcal, 445 U.S. 97, 100 S. Ct. 937, 63 L. Ed. 2d 233*). Because "[s]tates regulate their economies in many ways not inconsistent with the antitrust laws," "state-action immunity is disfavored." *FTC v. Ticor Title Ins. Co., 504 U.S. 621, 635-36, 112 S. Ct. 2169, 119 L. Ed. 2d 410 (1992)* (citing *Lafayette v. La. Power & Light Co., 435 U.S. 389, 398-99, 98 S. Ct. 1123, 55 L. Ed. 2d 364 (1978))*.

Ipso facto Parker immunity applies only for "[s]tate legislation and decisions of a state supreme court, acting legislatively rather than judicially." *Dental Examiners, 574 U.S. at 504* (internal quotation marks omitted). This case does not fit those circumstances, and SJRA thus invokes state-action immunity as a nonsovereign actor.

HN11[] Anticompetitive conduct by a nonsovereign actor must be "clearly articulated and affirmatively expressed as state policy" to merit state-action immunity. *Midcal, 445 U.S. at 105* (quoting *La. Power & Light Co., 435 U.S. at 410*). This inquiry involves two distinct questions: (1) Does state law authorize the defendant to engage in the challenged conduct?; and (2) Did the state authorize the challenged conduct with an intent to *displace competition* with regulation or monopoly service? 1A Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law***, ¶ 225, p. 140 (4th ed. 2013) ("Areeda **[**18]** & Hovenkamp"); *see also* *Phoebe Putney, 568 U.S. at 228*.

State lawmakers need not "expressly state in a statute or its legislative history that the legislature intends for the delegated action to have anticompetitive effects." *Hallie, 471 U.S. at 43*. Rather, state-action immunity applies if the anticompetitive effect was the "foreseeable result" of the state's authorization. *Id. at 42*. "[W]hen anticompetitive consequences are simply one 'foreseeable' possibility among many, then authorization should not be inferred." Areeda & Hovenkamp at ¶ 225, p. 170 (discussing *Phoebe Putney, 568 U.S. 216, 133 S. Ct. 1003, 185 L. Ed. 2d 43*).

[*347] B.

Plaintiffs challenge three provisions of the GRP Contracts as anticompetitive in violation of Sherman Act *Section 1*: (1) the Groundwater Pumpage Fee, which requires Plaintiffs to pay SJRA a volume-based fee for pumping groundwater, regardless of the source; (2) the Surface Water Put Option, which allows SJRA to dictate the amount of surface water Plaintiffs must buy from SJRA; and (3) the Water Importation Fee, which charges Plaintiffs if they purchase water from a non-Joint GRP participant. The FAC alleges that the Groundwater Pumpage Fee fixes the price of wholesale raw water in Montgomery County **[**19]** by equalizing the wholesale price of raw groundwater with that of raw surface water, and also that the Surface Water Put Option and Water Importation Fee are unreasonable restraints of trade.

We first ask whether SJRA's Enabling Statute authorizes its entry into and enforcement of the challenged provisions. *See* *Phoebe Putney, 568 U.S. at 228*. SJRA may be correct that its Enabling Statute authorizes the challenged provisions. *HN12*[] *HN13*[] The Enabling Statute allows SJRA to contract with "municipalities or other corporate bodies or persons . . . for the purpose of establishing and collecting . . . rates and other charges for the sale or use of water, water transmission, treatment or connection facilities . . . and any other services sold, furnished or supplied by [SJRA]." Enabling Statute § 3(xviii). The Groundwater Pumpage Fee could be considered a rate or charge for a service provided by SJRA—coordinated compliance with Lone Star's Groundwater Reduction Rule—as well as a charge for the use of SJRA's water transmission, treatment, and connection facilities. Similarly, the Surface Water Put Option could be viewed as a charge for the use of SJRA's facilities. The Enabling Statute also permits SJRA **[**20]** to "enter into any and all necessary and proper contracts . . . necessary or useful in the furtherance of any power granted by law." Enabling Statute § 3(xv). Though this statutory language is quite nonspecific, SJRA may have an argument that the Water Importation Fee is "necessary or useful" to provide the service of regulatory compliance to the Joint GRP participants.

But our inquiry does not end there. To warrant state-action immunity, the alleged anticompetitive effect—the displacement of competition in the Montgomery County wholesale raw water market—must be the "inherent, logical, or ordinary result" of the state's authorization. *Phoebe Putney, 568 U.S. at 229*. *HN14*[] Section 3(xviii) of SJRA's Enabling Statute authorizes SJRA to participate in the markets for water, water transmission and treatment, and other services through contracts establishing rates and other charges. Precedent establishes that mere authorization to participate in a market does not constitute authority to monopolize that market. *See* *id. at 228* ("Grants of general corporate power that allow substate governmental entities to participate in a competitive marketplace should be, can be, and typically are used in ways **[**21]** that raise no federal antitrust concerns."); *Hammond, 171 F.3d at 235* (distinguishing "a statute that in empowering a municipality necessarily contemplates the anticompetitive activity from one that merely allows a municipality to do what other businesses can do").

SJRA's state authorization is more akin to the enabling laws at issue in *Phoebe Putney* and *Hammond*, where the defendants were statutorily authorized to acquire hospitals and enter into contracts and joint ventures to sell hospital services, respectively, than it is similar to the legislative **[*348]** grants in cases finding clear articulation. *See* *Phoebe Putney, 568 U.S. at 219-20*; *Hammond, 171 F.3d at 233*. The statutory powers SJRA invokes as authorizing its challenged conduct "should be, can be, and typically are used in ways that raise no federal antitrust concerns." *Phoebe Putney, 568 U.S. at 228*. This statutory authorization lacks the indicators of monopolistic intent present in cases finding clear articulation, where the defendants were explicitly granted authority to regulate a market, such as through zoning ordinances, *City of Columbia v. Omni Outdoor Advert. Inc., 499 U.S. 365, 373, 111 S. Ct. 1344, 113 L. Ed. 2d 382 (1991)*, professional conduct rules, *Earles* ***[**22]*** , *139 F.3d at 1042*, and the maintenance of "fair competition," *Spec's Fam. Partners, Ltd. v. Nettles, 972 F.3d 671, 683 (5th Cir. 2020)*.

SJRA argues that monopoly is the foreseeable result of its statutory authorization because "[w]henever SJRA contracts with an entity to supply surface water (at cost, as SJRA must), other raw water competitors (like groundwater wholesale suppliers) are necessarily displaced." This argument contravenes precedent holding that bare authority to participate in a market does not inherently result in monopoly. *See* *Phoebe Putney, 568 U.S. at 228*; *Hammond, 171 F.3d at 235*. This assertion is further undermined by the FAC, which alleges that groundwater in Montgomery County is plentiful and was historically less expensive than surface water. Accepting this factual allegation as true, *Iqbal, 556 U.S. at 678*, statutory authority to sell surface water would not inherently, logically, or ordinarily result in the displacement of competition in the market for allegedly cheaper, plentiful groundwater.

Even if SJRA's Enabling Statute could be read as vesting SJRA with monopoly power over the market for surface water in Montgomery County, precedent cautions against interpreting **[**23]** such statutory authority as extending to the entire wholesale raw water market. ***HN15***[] "[E]ven a lawful monopolist may be subject to antitrust restraints when it seeks to extend or exploit its monopoly in a manner not contemplated by its authorization." *La. Power & Light Co., 435 U.S. at 417*; *see also* Areeda & Hovenkamp at ¶ 222, p. 79 (citing *Cmty. Commc'ns Co. v. City of Boulder, 455 U.S. 40, 102 S. Ct. 835, 70 L. Ed. 2d 810 (1982))* ("[A]uthorization from the state must be 'market-specific' in the sense that it authorizes the subdivision to displace competition in a specific area of commerce."). Here, SJRA's hypothetical monopoly authority over the surface water market in Montgomery County would not foreseeably extend to the entire wholesale raw water market.

We therefore conclude, with attention to the record before us, that the Texas Legislature did not authorize SJRA's entry into and enforcement of the challenged GRP Contract provisions with the intent to displace competition in the market for wholesale raw water in Montgomery County. SJRA is thus not entitled to state-action immunity at this stage.

IV.

For the foregoing reasons, we AFFIRM the district court's denial of SJRA's motion to dismiss based upon state-action immunity. **[**24]**

SECTION 1. It being declared by the Constitutional provision the policy of the State of Texas, *Section 59, Article 16*, to provide for the conservation and development of all the natural resources of the State, including the control, storing, preservation, and **[*349]** distribution of its storm and flood waters, the waters of its rivers and streams, for irrigation, power, and all other useful purposes, the reclamation and irrigation of its arid, semi-arid, and other lands needing irrigation, the reclamation and drainage of its overflowed lands, and other lands needing drainage, the conservation and development of its forests, water and hydro-electric power, the navigation of its inland and coastal waters, and the preservation and conservation of all such natural resources of the State, are each and all hereby declared public rights and duties, which may be effected through the creation within the State, or the **[**25]** divisions of the State, into such number of conservation and reclamation districts as many be determined to be essential to the accomplishment of the purposes of the policy expressed in the Constitution of the State; such Districts to be governmental agencies and bodies politic and corporate, with all rights, privileges, and functions as may be conferred by law, there is hereby created the San Jacinto River Conservation District [now the San Jacinto River Authority][1] .

SEC. 1A. (a) The District is subject to review under Chapter 325, Government Code (Texas Sunset Act), but may not be abolished under that chapter. The review shall be conducted under *Section 325.025, Government Code*, as if the District were a state agency scheduled to be abolished September 1, 2021, and every 12th year after that year.

(b) The District shall pay the cost incurred by the Sunset Advisory Commission in performing the review. The Sunset Advisory Commission shall determine the cost, and the District shall pay the amount promptly on receipt of a statement from the Sunset Advisory Commission detailing the cost.

SEC. 2. The San Jacinto River Conservation and Reclamation District is created as a governmental agency, **[**26]** a body politic and corporate, vested with all the authority as such under the Constitution and laws of the State; and shall have and be recognized to exercise all of the powers of such governmental agency and body politic and corporate as expressly authorized in the provisions of the Constitution, *Section 59 of Article 16*, for Districts created to conserve, control, and utilize to beneficial service the storm and flood waters of rivers and streams of the State, or such powers as may be contemplated and implied by the purposes of this provision of the Constitution, and as may be conferred by General Law, and in the provisions of this Act; and shall have and be recognized to exercise all the rights and powers of an independent governmental agency, body politic and corporate, to formulate any and all plans deemed essential to the operation of the District[2] and for its administration in the control, storing, preservation, and distribution to all useful purposes of the storm and flood waters of the San Jacinto River and its tributary streams; and as such District, shall have and be recognized to exercise such authority and power of control and regulation over such storm and flood waters **[**27]** of the San Jacinto River and its tributaries as may be exercised by the State of Texas, subject to the provisions of the Constitution and the Acts of the Legislature.

[*350] SEC. 3. The San Jacinto River Authority, in addition to all powers expressly or impliedly granted by other Sections of this Act, by complying where applicable with the provisions of Chapter 1, Title 128, Vernon's Texas Civil Statutes, as amended, is hereby empowered as follows:

(i) to store, control and conserve the storm and flood waters of the watershed of the San Jacinto River and its tributaries, and to prevent the escape of any such waters through every practical means; so as to prevent the devastation of lands from recurrent overflows, and to protect life and property;

---

[1] See Acts of 1951, 52nd Leg., ch. 366, § 1; any usage hereinafter of the term "San Jacinto River Conservation and Reclamation District" shall mean the "San Jacinto River Authority" and vice versa.

[2] See Acts of 1951, 52nd Leg., ch. 366, § 2; any usage hereinafter of the term "District" shall mean the "Authority" and vice versa.

(ii) to provide through every practical means for the control, utilization and coordination of regulation of the waters of the san Jacinto River and its tributaries;

(iii) to appropriate the waters of the San Jacinto River and its tributaries, to construct dams and other facilities for the impoundment, conservation, diversion and utilization of such waters, and to devote such waters to municipal, domestic, agricultural, commercial, industrial, mining, **[**28]** and other beneficial uses, within and without the watershed of said River;

(iv) to provide waters for the irrigation of lands where irrigation is required for agricultural purposes or may be deemed helpful to more profitable agricultural production;

(v) to provide water for domestic, municipal, commercial, industrial and mining purposes within and without the watershed of said River, including water supplies for cities, towns and industries, and in connection therewith to construct or otherwise acquire water transportation, treatment and distribution facilities and supplemental sources of supply;

(vi) to encourage and develop drainage systems and provisions for drainage of lands in the valleys of the San Jacinto River and its tributary streams needing drainage for profitable agricultural production; and drainage for other lands in the watershed area of the Authority requiring drainage for the most advantageous use;

(vii) to encourage through practical and legal means the conservation of soils against destructive erosion and thereby preventing the increased flood menace incident thereto;

(viii) to forest and reforest and to aid in the foresting and reforesting of the watershed area of the **[**29]** San Jacinto River and its tributaries and to prevent and aid in the prevention of soil erosion and floods in, on, and upon all lands situated within the boundaries of said Authority;

(ix) to control, store, and employ the waters of the San Jacinto River and its tributaries in the development and distribution of hydroelectric powers, where such use may be economically coordinated with other and superior uses, and subordinated to the uses declared by law to be superior;

(x) to encourage, aid, and protect navigation and harbor improvements;

(xi) to acquire land adjacent to or in the vicinity of any waters impounded by the Authority or adjacent to or in the vicinity of San Jacinto River or any of its tributaries for park and recreation purposes and to acquire or construct park and recreation facilities thereon. Except as may otherwise be provided by the general law, the acquisition or construction any recreation and park facilities by the Authority shall be subject to the approval of the Texas State Parks and Wildlife Commission and to such conditions as the Commission may prescribe;

(xii) to acquire or construct facilities for the gathering, transporting, treating and disposing of sewage **[**30]** and industrial waste and effluent;

[*351] (xiii) to control, store and employ all or any of such waters for each and every purpose for which the same when controlled and conserved may be utilized in the performance of a useful service and contemplated and authorized by the provisions of the Constitution and the public policy therein declared;

(xiv) to construct and otherwise acquire and to repair, improve, extend, operate and maintain all works, plants and other facilities necessary or useful in the furtherance of any power granted by law to the Authority, including, but not limited to, water storage reservoirs, dams, canals, waterways, and water transportation facilities of all kinds, water treatment facilities, hydroelectric facilities, municipal water supply facilities, facilities for the treatment of sewage and industrial waste and effluent, parks and recreation facilities, and all other necessary and useful structures, facilities and equipment;

(xv) to enter into any and all necessary and proper contracts with other Federal or State agencies, districts and bodies politic and corporate, and others, to make and enter into such cooperative and coordinative contracts with such agencies, districts **[**31]** and bodies politic and corporate, and others, necessary or useful in the furtherance of any power granted by law to the Authority, including the power to pledge its funds and its other assets or any part thereof;

(xvi) to acquire any properties necessary for any of its corporate purposes by purchase, by condemnation as elsewhere provided in this Act, or by gift, and to acquire property by lease or other contract, upon such terms as may be accepted by the Authority's Board of Directors;

(xvii) to operate the water and sewage properties and facilities of other public bodies or political subdivisions upon such terms as the Authority may agree in connection with the supplying by the Authority of any water or sewage or waste disposal or other services to public bodies;

(xviii) to enter into such contracts, upon such terms and for such periods of time as the Board of the Authority might approve, with municipalities or other corporate bodies or persons, public or private, for the purpose of establishing and collecting, and by resolution or order of otherwise establish and collect, rates and other charges for the sale or use of water, water transmission, treatment or connection facilities, sewage **[**32]** or industrial or other waste disposal services and facilities of all types, park or recreation facilities, power, electric energy, and any other services sold, furnished, or supplied by the Authority, which fees and charges shall be sufficient to produce revenue adequate—

(1) to pay expenses necessary to the operation and maintenance of the properties and facilities of the Authority;

(2) to pay the interest on or the principal of any bonds or other obligations issued by the Authority when and as same become due and payable and to fulfill any reserve or other fund obligations of the Authority in connection with such bonds; and

(3) to pay such other expenses as the Board of Directors shall deem necessary and proper for any purposes in the corporate operations, and functions of the Authority; and

(xix) to authorize by its contracts any other districts, agencies, and bodies politic and corporate and individuals to participate in the joint construction, operation, and maintenance of all of said water storage reservoirs, dams, canals, waterways, and water lines and all other structure, facilities, and equipment in connection therewith, or in connection with sewage or **[*352]** waste facilities of all **[**33]** types, and all necessary facilities for the manufacture, sale, and transportation of such hydroelectric power, along with said Authority, and said Authority may by such contracts allow such other agencies, districts, and bodies politic and corporate, and others to receive such portion of the revenues derived from the sale of water and hydroelectric power or furnishing sewage and waste facilities and services, as the Board of Directors shall deem just, equitable, and proper.

SEC. 4. The powers and duties herein developed upon the San Jacinto River Authority are recognized to be taken subject to all legislative declarations of public policy in the maximum utilization of the storm, flood and unappropriated flow waters of the State for the purpose for which the Authority is created, as expressed and indicated in this Act, as amended, and subject to the continuing rights of supervision by the State which shall be exercised through the Texas Water Rights Commission, which agency shall be charged with the authority and duty to approve, or to refuse to approve, the adequacy of any plan or plans (devised in the exercise of any power granted under this Act) which contemplate improvements or facilities, **[**34]** the plans pertaining to which are required to be supervised or approved by said agency under the provisions of the General Law. If any such plans contemplate the installation, construction or other acquisition of parks and recreation facilities or of facilities for the gathering, transporting or disposal of sewage, or industrial wastes and effluent, said Commission shall not approve such plans until it finds that the Texas Parks and Wildlife Commission or the Texas Water Pollution Control Board, as the case may be, has issued such approvals or permits relating to such matters as may be required by this Act or the General Law.

SEC. 5. The area of said District is hereby established to comprise all the territory embraced within the watershed of the San Jacinto River and its tributary streams, save and except that portion of said watershed lying and being situated within the boundaries of Harris County, which is hereby expressly excepted from the boundaries of said District. Provided, that prior to September 1, 1941, the actual boundaries of said District shall be established by the

Reclamation Department of the General Land Office, so that the same may be expressed in written calls of **[**35]** the metes and bounds of said District. The written description of said boundaries shall be certified by the Commissioner of the General Land Office, approved by the State Board of Water Engineers, and recorded in the minutes of said District. The Board of Directors shall cause a certified copy of said certified boundaries to be filed and recorded in the office of the County Clerk of each county lying in whole or in part within the boundaries of said District, and it shall also file a copy thereof, together with a map showing said boundaries with the Tax Assessor and Collector of each of the counties lying in whole or in part within said District.

SEC. 6. The management and control of all the affairs of said District shall be vested in, and the powers, rights, privileges, and functions of the District shall be exercised by, a Board of Directors consisting of six (6) members,[3] all of whom shall be freehold property taxpayers and legal voters of the State of Texas and four (4) of whom shall be residents of a county wholly **[*353]** encompassed by the District. Members of such Board of Directors shall be appointed by the Governor for terms of six (6) years. Provided, the present Board of six (6) directors **[**36]** of said District, appointed by the State Board of Water Engineers under authority of House Bill No. 1094, Chapter 613, Acts of the Regular Session of the Forty-seventh Legislature, amending Section 6 of Chapter 426, Acts of the Regular Session of the Forty-fifth Legislature, as amended by House Bill No. 828, Chapter 480, Acts of the Regular Session of the Forty-seventh Legislature, for terms of two (2), four (4), and six (6) years, shall continue to serve as such until the expiration of the respective terms for which they were appointed. Upon the expiration of the respective terms for which the present members of the Board of Directors were appointed, the successors of each and all of them shall be appointed by the Governor for a term of six (6) years.

The directors shall hold office after their appointment and qualification until their successors shall be appointed and qualified. Should any vacancy occur in the Board of Directors, the same shall be filled in like manner by the Governor for the unexpired term. The Directors appointed shall, within the (30) days after their appointment, qualify by taking the official oath required of County Commissions, and shall execute bond in the **[**37]** sum of Five Thousand Dollars ($5,000) payable to the District, the sufficiency of which bond shall be determined by the State Board of Water Engineers, which bonds after being recorded in the official bond records of the county in which the District maintains its office shall be deposited with the depository selected and approved for the deposit of the funds of the District.

The Board of Directors shall organize by electing one of its members President, one Vice-President, one Secretary, and one Treasurer. Four (4) members, including the presiding officer, shall constitute a quorum to transact business. The President shall preside at all meetings of the Board and shall be the chief executive officer of the District. The Vice-President shall act as President in case of the absence or disability of the President. The Secretary shall act as Secretary of the Board and shall be charged with the duty of keeping a record of all proceedings and all orders of the Board. The Treasurer shall receive and receipt for all moneys received by the District and shall keep books and records of all moneys received and expended. In case of the absence of inability of the Secretary to act, a Secretary pro **[**38]** term shall be selected by the directors.

The domicile of the District shall be in the City of Conroe, in the County of Montgomery, Texas, where the District shall maintain its principal office. The Board of Directors shall have authority to fix the time, place and number of meetings of such Board by proper resolutions, regulations and bylaws passed by said Board. Said Board shall cause to be kept complete and accurate accounts conforming to approved methods of bookkeeping. Said accounts and all contracts, documents, and records of the District shall be kept at said principal office, and same shall be open to public inspection at all reasonable times.

SEC. 7. (a) The Board of Directors shall have all powers, both express and implied, to do and perform any and all acts for any on behalf of the Authority which are authorized by the Constitution and laws of the United States of America and the State of Texas for the purpose of the achievement of the plans and purposes intended in the creation of the Authority and in the exercise of all powers elsewhere herein granted to the Authority; and said **[*354]** Board of Directors shall have full and complete authority to do any and all acts necessary or

---

[3] See *Sec. 651.0085, Tex. Gov't Code*, as amended (requiring governor to appoint additional member).

convenient **[**39]** to the exercise of the powers, privileges, and functions conferred upon said Authority and its Board of Directors by this Act or any other Act or law.

(b) The Board of Directors is hereby authorized and directed to make or cause to be made surveys and engineering investigations for the information of the Authority and to determine the plans necessary to the accomplishment of the purposes for which the Authority is created, and may employ engineers, attorneys, and all other technical and non-technical assistants or employees and fix and provide the amount and manner of their compensation for the making of such surveys, the preparation of plans, and the collection of data essential to the determination of the character, extent, and cost of all improvements essential in the exercise of any power granted herein or in any other law applicable to the Authority, and for expenditures found essential in the maintenance and administration of the Authority. The members of the Board of Directors shall receive a per diem of not more than Twenty-five ($25.00) Dollars per day for the period served, together with traveling and other necessary expenses. Any director may perform any service required **[**40]** by the Board, but in such case may not receive the per diem and other compensation at the same time.

(c) All bonds issued by the Authority shall be and are hereby declared to be legal and authorized investments for banks, savings banks, trust companies, building and loan associations, insurance companies, fiduciaries and trustees, and for any sinking funds of cities, towns, villages, counties, school districts and other political corporations and subdivisions of the State of Texas. Such bonds shall be eligible to secure the deposit of any and all public funds of the State of Texas and any and all public funds of cities, towns, villages, counties, school districts and other political corporations or sub-divisions of the State of Texas, and such bonds shall be lawful and sufficient security for said deposits at their market value when accompanied by all unmatured coupons appurtenant thereto.

(d) Money in any fund of the Authority or any fund established by the Board of Directors in connection with the authorization of its bonds, including but not limited to proceeds from the sale of bonds, and which funds are not needed to satisfy their particular purpose for any period of time may be **[**41]** invested or reinvested from time to time in direct obligations of or obligations the principal and interest of which are guaranteed by the United States of America or invested in direct obligations of or participation certificates guaranteed by the Federal Intermediate Credit Banks, Federal Land Banks, Federal National Mortgage Association, Federal Home Loan Banks, Banks for Cooperatives, and in certificates of deposit of any bank or trust company the deposits of which are fully secured by a pledge of securities of any of the kind hereinabove specified. The type and maturity of investments made hereunder shall be determined by the Board which, in the case of funds established in connection with the authorization of bonds, shall provide appropriate recitals with regard thereto in the resolutions relating to the issuance of such bonds. Income and profits on such investments shall be applied as provided in any such resolution, and, absent such provision, shall be applied to the uses hereinabove specified for bond proceeds.

SEC. 8. For the purpose of providing funds requisite to procure necessary engineering **[*355]** surveys, the collection and compilation of data respecting regional and general **[**42]** conditions entering into and influencing the character and extent of the improvements necessary to the storage, control, conservation, and equitable distribution, to the greatest public advantage of such flood waters when stored and controlled, it is hereby provided that any county lying in whole or in part within the area of the temporary District, as herein defined, may contribute to the funds from year to year for such engineering surveys and the compilation of data essential to the progress of flood control improvement in such amount as may be deemed an equitable part of the cost of such surveys and the compilation of necessary information in the estimated relations of such expenditures to the contemplated and probable benefit to be secured to the respective counties from the accomplishment of the plans and purposes of the creation of the District, and for the provision of such fund may make the necessary collections through their respective general funds, or may appropriate the amount of the estimated equitable contribution of such costs, of developing essential engineering data from their general fund.

SEC. 8c. (a) The Board of Directors of the Authority may adopt and enforce **[**43]** rules to:

(1) preserve and protect the sanitary condition and prevent waste or unauthorized use of water owned or controlled by the Authority;

(2) preserve, protect, secure, and regulate privileges on any Authority property; and

(3) ensure the public safety on, in, under, across, or within any Authority property.

(b) A rule adopted under this section must clearly define any conduct that constitutes an offense and plainly state the punishment for the offense. In adopting a rule under this section, the Board must prescribe a punishment that is proportionate to the seriousness of the offense. The Board may designate an offense only as a Class C misdemeanor.

(c) A rule adopted under this section does not take effect until the Authority has published once a week for two consecutive weeks a substantive statement of the rule and the penalty for violation of the rule in a newspaper with general circulation in each county in which the rule is to be effective. The statement must intelligently explain the purpose to be accomplished by or the acts prohibited by the rule. The statement must advise the public that violation of the rule will subject the violator to a penalty. The statement must advise **[**44]** the public that the full text of the rule is on file in the principal office of the Authority and that any interested person is entitled to read the full text. The Board may use one statement to satisfy the notice requirements of this section for any number of rules the Board adopts. The Board may amend a rule after the rule is adopted, but must meet the notice requirements under this subsection.

(d) The violation of a rule is not punishable as an offense unless the violation occurs after the 30th day on which the notice requirements under this section are met. A rule adopted under this section is effective until repealed, revoked, rescinded, or amended by official action of the Board.

(e) A rule adopted under this section shall be recognized by the courts of the state and is enforceable by complaint filed in the appropriate court by the proper prosecuting authority in a jurisdiction in which Authority property is located in the same manner as a penal statute under **[*356]** state law. A penalty provided by a rule under this section is in addition to any other penalty provided by lay. Rules promulgated under the authority of this chapter shall not conflict with any provision of the Parks and Wildlife **[**45]** Code or a rule adopted under the authority of the Parks and Wildlife Code.

(f) The Board, the commissioners court, and the law enforcement officials in a county in which Authority property is located may enter into a contract to provide for the employment, assignment, duties, equipping, or compensation of local law enforcement personnel to enforce the Board's rules. A contract under this subsection may require the Authority to pay the commissioners court a specified portion of the cost of providing the law enforcement personnel.

(g) In this section, "Authority property" means any land, easement, water, property, equipment, work, or facility owned or controlled, in whole or in part, by the Authority, including a reservoir, impoundment, lake, canal, channel, conduit, pipe, siphon, dam, dike, levee, embankment, or berm, but excluding Lake Houston and the San Jacinto River below Lake Houston, except for equipment, works or facilities owned by the Authority at or near a dam site.
SEC. 9. The San Jacinto River Conservation and Reclamation District is hereby declared to be a Conservation and Reclamation District, having all and singular, the powers, duties, functions, and to observe procedures **[**46]** in so far as the same may be applicable and practicable, to accomplish the purposes of this Act, as is provided by Chapter 25 of the General Laws of the Thirty-ninth Legislature, Regular Session, and the several amendments thereof; provided however, that the provisions of said Chapter 25, and the subsequent Amendments thereto, shall not apply to any matter specifically provided for herein, or expressly or impliedly excluded, relating to the creation of a district and to the issuance of preliminary bonds to finance the making of investigations upon which to base a plan for improvements and the levy of a tax therefore. It is however, provided that the District may upon a vote of the qualified electors issue such preliminary bonds and levy a tax to retire the same, which tax may be in addition to all other taxes hereby authorized; Section 15 of Chapter 280, General and Special Laws of the Forty-first Legislature of Texas, Regular Session, amending said Chapter 25, General Laws of the Thirty-ninth Legislature, Regular Session, and Section 6 of Chapter 107 of the General and Special Laws of the Fortieth Legislature, First Called Session, amending said Chapter 25, shall not control this **[**47]** District, but in lieu thereof it is specifically provided as follows:

(a) After the completion and approval of a plan for the coordination of improvements deemed adequate to serve said watershed as a whole, as hereinbefore provided for, the State Board of Water Engineers and the Reclamation Department of the General Land Office of Texas in authorizing improvements to control the waters of, and, or in allocating the right to use waters from said San Jacinto River and its tributaries shall substantially conform to, and shall effectually preserve the benefits of, the plan formulated by this District, and said District shall have the right to enforce the observance of the same by judicial decree.

(b) This District shall have the power to provide and maintain improvements for the common benefit of said District as a whole, subject only in appropriate case to the constitutional and statutory provisions concerning a vote by the qualified electors of the District.

[*357] (c) Especially shall said District have all and singular the powers contained in Section 15 of said Chapter 280, General and Special Laws of the Forty-first Legislature, relating to improvements peculiar to defined areas within a district. **[**48]**

(d) It is however, further provided that if the electors of any defined area within this District desire they may become a water control and improvement district for the purpose of independently providing, operating, and maintaining improvements designed peculiarly to serve such defined area. Such contained defined area may be so constituted under the applicable provisions of said Chapter 25 of the General Laws of the Regular Session of the Thirty-ninth Legislature. In like manner any other political subdivision of the State of Texas being in whole or in part in this District may independently provide, maintain, and operate works peculiarly designed to benefit such body politic. In either case, however, such works and the operation thereof shall be constructed and operated in such manner as will conform to this District plan to the greatest practicable degree.

(e) To the extent necessary to enable this District to construct, maintain, and operate works beneficial to the District as a whole, or to give the supervision, or to perform any service inuring to the benefit of the District as a whole and provide funds adequate to defray the cost of the administration to this District, it shall **[**49]** have power to levy and collect taxes, equitably distributed, which taxes shall be in addition to other taxes that may lawfully be levied by the State and other political subdivisions thereof.

(f) This Legislature finds and declares that the recurrent, devastating floods in the valley of the San Jacinto River, which have, over a long period of years, caused a deplorable loss of life and property, and the erosion of soil, and a depletion of the fertility of the lands in said valley and watershed served by the San Jacinto River in Texas, and the public highways and structures on land belonging to the State of Texas situated within said watershed, to be a public calamity, and the San Jacinto River Conservation and Reclamation District is hereby authorized to do any and all things necessary or suitable for the prevention of such public calamity.

SEC. 10. The San Jacinto River Conservation and Reclamation District shall not be authorized to issue bonds nor to incur any form of continuing obligations or indebtedness for purposes of effecting improvements comprehended in the plan of organization and administration of the District, nor incur any indebtedness in the form of a continuing charge **[**50]** upon land or properties within the District, unless such proposition shall have been submitted to the qualified property taxpaying voters of the District, or, in appropriate case, such voters of a defined area or political subdivision within the District, and approved by a majority of such electors voting thereon.

SEC. 10a. The Board of Directors of the San Jacinto River Conservation and Reclamation District, a State Agency, shall have full authority to negotiate and deal and/or contract with the United States of America or with any of its governmental agencies now in existence or that may hereafter come into existence and/or others for grants, and/or loans and/or allotments and is hereby granted the right and power to receive and accept grants and/or loans and/or allotments from the United States of America and/or others for the purpose of making investigations and assembling data and/or for any one or more purposes set forth in this Act and/or the Act creating the San Jacinto Conservation and Reclamation District and to receive and use **[*358]** said moneys for the purpose mentioned in said Acts.

SEC. 10b. The Authority shall have the authority and is hereby authorized to issue from time to **[**51]** time its negotiable revenue bonds for the purpose of making investigations and assembling data; for the purpose or purposes of purchasing, acquiring, and/or condemning lands, leases, easements, rights-of-way and other properties; and for the purpose of constructing, repairing, improving and extending any structures, dams, reservoirs, transmission facilities, water treatment, water supply, sewage and other waste gathering, transmission, treatment and disposal facilities, for developing park and recreation facilities; and for the purposes of acquiring, constructing, improving, repairing and extending any other properties and facilities deemed appropriate by the Board of Directors of the Authority in the exercise of powers granted the Authority in Section 3 or elsewhere in this Act. Any one or more or a combination of the foregoing purposes may be combined into a single issue of bonds. Such bonds shall be issued in accordance with, and may be secured by and payable from any or all the revenues of the Authority permitted by, Section 10c hereof, including, but not limited to, the proceeds of any one or more contracts between the Authority and any persons, firms, corporations, cities and **[**52]** political subdivisions.

If and when the Legislature remits the ad valorem tax in the counties for a certain period of years, the Directors may in their discretion if necessary with the approval of the Commissioners Court of the county in the watershed use part or all of the taxes remitted to said counties for the purpose of paying back to the United States of America or any of its agencies or others the money borrowed by the Authority for the purpose herein mentioned.

SEC. 10c. The bonds issued by the authority of this Act may either be (1) sold for cash, at public or private sale, at such price or prices as the Board of Directors shall determine, not to be for less than par and accrued interest, provided that the interest cost of the money received therefore, computed to maturity in accordance with the standard bonds tables in general use by banks and insurance companies, shall not exceed five (5) per cent per annum, or (2) may be issued on such terms as the Board of Directors shall deem necessary or convenient for any corporate purpose, or (3) may be issued to refund any bonds issued at any time under authority of this Act. All such bonds shall be authorized by resolution or resolutions **[**53]** of the Board of Directors concurred in by a majority of the members of the Board, and shall bear such date or dates, made at such time or times, bear interest at such rate or rates (not exceeding five (5) per cent per annum) payable annually or semiannually, that such denominations be in such form, either coupon or registered, carrying such registered privileges as to principal only or as to both principal and interest, and as to exchange of coupon bonds for registered bonds or vice versa, in exchange of bonds of one denomination for bonds of other denominations, be executed in such manner and be payable at such place or places within or without the State of Texas, as such resolution or resolutions may provide. Any resolution or resolutions authorizing any bonds may contain provisions, which shall be part of the contract between the directors and the bondholders thereof from time to time.

(a) Reserving the right to redeem such bonds at such time or times, in such amounts and at such prices not exceeding one hundred and two (102) per cent of the **[*359]** principal amount thereof, plus accrued interest, as may be provided;

(b) Providing for the setting aside of sinking funds or reserve funds and **[**54]** the regulation and disposition thereof;

(c) Pledging to secure the payment of the principal and interest on such bonds and the sinking fund or reserve fund payments agreed to be made in respect to such bonds all or any parts of the moneys that may be donated and/or granted herein by the State of Texas and all or any part of the gross or net revenues hereafter received by the district in respect of the property, real, personal, or mixed, to be acquired and/or constructed with such bonds or with proceeds thereof, or all or any part of the gross or net revenues thereafter received by the District from whatsoever source derived;

(d) Prescribing the purposes to which such bonds or any bonds thereafter to be issued or the proceeds thereof, may be applied;

(e) Agreeing to fix and collect rates and charges sufficient to produce revenues together with the moneys that may be granted and/or donated by the State of Texas adequate to pay the items specified herein, and prescribing the use and disposition of all revenues;

(f) Prescribing limitations upon the issuance of additional bonds and upon all agreements which may be made with the purchaser and successive bondholders;

(g) With regard to the construction, **[**55]** extension, improvement, operation, maintenance, depreciation, replacement, and betterments of the properties of the District and carrying of insurance upon all or any part of said property covering loss or damage or loss of use and occupance resulting from specified risks;

(h) Fixing the procedure, if any, by which, if the District shall so desire, the terms of any contract with bondholders of such bonds may be amended or abrogated, the amount of bonds the holders of such must consent thereto, and the manner in which such consent shall be evidenced, for the execution and delivery by the district to the bank or trust company authorized by law to accept such trust, or to the United States of America or any office or agency thereof, of indentures or agreements therein authorized to be made with all for the benefit of the holders of such bonds and such other provisions as may be contained in such indentures or agreements; and

(i) Such other provisions not inconsistent with provisions of this Act as the Board may approve.

Any such resolution and any indenture or agreement entered into pursuant thereto may provide that in the event that,

(1a) Defaults may be made in the payment of the interest **[**56]** on any or all bonds when and as the same shall become due and payable, or

(1b) Defaults shall be made in payment of the principal of any or all bonds when and as the same shall become due and payable whether at maturity thereof, by call for redemption or otherwise, or

(1c) Defaults shall be made in the performance in agreement made with purchasers or successive holders of any bonds, and such defaults shall have continued for such period, if any, as may be prescribed by said resolution in respect thereof, the trustee under the indenture or indentures entered into in respect of the bonds authorized, and by, or, if there shall be in such indenture, a trustee appointed in the manner provided in such resolution or resolutions by the bondholders of twenty-five (25) per cent aggregate principal amount **[*360]** of the bonds authorized hereby and at the time outstanding may, and upon the written request of the holders of twenty-five (25) percent in aggregate principal amount of the bonds authorized by such resolution or resolutions at the time outstanding, shall, in his or its own name, be for the equal and proportionate benefit of the holders of all such bonds; and with or without having possession thereof **[**57]** for the holders of all such bonds:

(1) By mandamus or suit, action or proceeding at law or in equity, enforce all rights of the holders of such bonds,

(2) Bring suit upon such bonds and/or appurtenant coupons,

(3) By action or suit in equity requiring the Directors to act as if they were the trustees of an express trust for the bondholders,

(4) By action or suit in equity enjoin any act or things which may be unlawful or in violation of the rights of the holders of such bonds, and/or

(5) After such notice of the Directors as such resolution may provide, declare the principal of all such bonds due and payable and if all defaults shall be made good, then with the written consent of the holders of twenty-five (25) per cent aggregate principal amount of such bonds at the time outstanding, annul such declaration and its consequent; provided, however, that the bondholders of more than the majority and principal amounts of bonds authorized thereby and at the time outstanding shall by instrument or instruments in writing delivered to such trustee, have the right to direct and control any and all actions taken or to be taken by such trustee under this paragraph. Such resolution, indenture or agreement **[**58]** may provide that in any such suit, action or proceeding, any such trustee, whether or not all of such bonds shall have been declared due and payable, and with or without possession of any thereof, shall be entitled as of right to the appointment of a receiver who may enter and take possession of all or any part of the properties of the District, and operate and maintain the same, and fix, collect and

receive rates and charges that together with the moneys that may be granted and/or donated by the State of Texas will be sufficient to provide revenues adequate to pay the items set forth herein, and cost and disbursements of such suit, action or proceeding, and to apply such revenue in conformity with the provisions of this Act and the resolution or resolutions authorizing such bonds. In any suit, action or proceeding by any such trustee or receivers, if any, counsel fees and expenses of such trustee and of receiver or receivers, if any, shall constitute taxable disbursements and all costs and disbursements allowed by the Court shall be a fixed charge upon any revenue pledged to secure the payment of such bonds. In addition to the powers hereinabove specifically provided for, each trustee **[**59]** shall have possess all powers necessary or appropriate for the exercise of any thereof, or incident to the general representation of the bondholders in enforcement of their rights.

Before any bonds shall be sold by the District, a certified copy of the proceedings for the issuance thereof, including the term of such bonds, together with any other information which the Attorney General of the State of Texas may require, shall be submitted to the Attorney General, and if he shall find that such bonds have been issued in accordance with law, and he shall approve such bonds, he shall execute a certificate to that effect which shall be filed in the office of the Comptroller of the State of Texas and be recorded in a record kept for that purpose. No bonds shall be issued until the same shall **[*361]** have been registered by the Comptroller who shall so register the same if the Attorney General shall have filed with the Comptroller his certificate approving the bonds and the proceedings for the issuance thereof as hereinabove provided.

All bonds approved by the Attorney General as aforesaid, and registered by the Comptroller as aforesaid, and issued in accordance with proceedings so approved shall be **[**60]** valid and binding obligations of the District and shall be incontestable for any cause from and after the time of such registration.

SEC. 10d. The Authority shall be authorized to enter into oil and gas leases with respect to its properties upon such terms as the Board of Directors may consider appropriate in the production of revenues to the Authority. The Authority shall be additionally authorized to sell or otherwise dispose of its properties if its Board of Directors shall have first determined that the property or interest to be disposed of is not necessary to the business of the Authority and shall have approved the terms of any such sale. All property of the Authority, however, shall be at all times exempted from forced sale under any judgment, suite or proceeding of any nature or kind.

SEC. 10e. The District shall have the power and is hereby authorized to acquire by purchase, lease, gift, or in any other manner (otherwise than by condemnation) and to maintain, use and operate any and all property of any kind, real, personal, or mixed, or any interest therein, within or without the boundaries of the District necessary or convenient to the exercise of the powers, rights, privileges, **[**61]** and functions conferred upon it by this Act.

The District shall have the power and right of eminent domain for the purpose of acquiring by condemnation any and all property of any kind, real, personal, or mixed, or any interest therein, within or without the boundaries of the District (other than such property of or any interest therein without the boundaries of the District as may at the time be owned by any body politic) necessary or convenient to the exercise of the powers, rights, privileges, and functions conferred upon it by this Act in the manner provided by General Law with respect to condemnation, or at the option of the District, in the manner provided by Statutes relative to condemnation by Districts organized under General Law pursuant to *Section 59 of Article 16 of the Constitution* of the State of Texas.

In condemnation proceedings, being prosecuted by said Districts, the District shall not be required to give bond for appeal or bond for costs.

That if in the exercise of the power of eminent domain, the relocation or change of grade of any railroad facilities are required, the same shall be accomplished under the provisions of Article 7880-123a, Revised Civil Statutes of **[**62]** Texas, 1925.

The District shall have the power and authority to overflow, and inundate any public lands and public property and to require the relocation of roads and highways in the manner and to the extend permitted to Districts organized under General Law pursuant to *Section 59 of Article 16 of Constitution* of the State of Texas

SEC. 10f. The Board of Directors shall have authority to make all necessary rules and regulations for the government and control of the District not inconsistent with the Constitution and Laws of the State of Texas.

SEC. 12. In the prosecution of the plans for which the District has been created for the storing, controlling, conserving, and **[*362]** distributing to useful purposes the storm and flood waters of the San Jacinto River watershed, the District shall be recognized to have the right to make use of the bed and banks of the San Jacinto River and of its tributary streams for any and all purposes necessary to the accomplishments of the plans of the District.

SEC. 13. Nothing in this Act, as amended, shall be construed to violate an provision of the Federal or State Constitution, and all acts done under this Act shall be in such manner as will confirm thereto, whether **[**63]** expressly provided or not. Where any procedure hereunder may be held by any court to be violative of either of such Constitutions, the Authority shall have the power by resolution to provide an alternative procedure conformable with such Constitutions. If any provision of this Act should be invalid, such fact shall not affect the validity of any other provisions of this Act, and the Legislature hereby declares that it would have enacted the valid provisions of the Act notwithstanding the invalidity of any other provision or provisions hereof.

SEC. 14. [OMITTED].

Agency v. Dfo Global Performance Commerce Ltd.

United States District Court for the Central District of California

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN1[] **Motions to Dismiss, Failure to State Claim**

Under Fed. R. Civ. P. 12(b)(6), a defendant may move to dismiss for failure to state a claim upon which relief can be granted. A plaintiff must state enough facts to state a claim to relief that is plausible on its face. A claim has facial plausibility if the plaintiff pleads facts that allow the court to draw the reasonable inference that the defendant is liable for the misconduct alleged.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN2[] **Motions to Dismiss, Failure to State Claim**

In resolving a Fed. R. Civ. P. 12(b)(6) motion under Twombly, the Court must follow a two-pronged approach. First, the Court must accept all well-pleaded factual allegations as true, but threadbare recitals of the elements of a cause of action, supported by mere conclusory statements, do not suffice. Nor must the Court accept as true a legal conclusion couched as a factual allegation. Second, assuming the veracity of well-pleaded factual allegations, the Court must determine whether they plausibly give rise to an entitlement to relief. This determination is context-specific, requiring the Court to draw on its experience and common sense, but there is no plausibility where the well-pleaded facts do not permit the court to infer more than the mere possibility of misconduct.

Evidence > Judicial Notice > Adjudicative Facts > Facts Generally Known

Evidence > Judicial Notice > Adjudicative Facts > Public Records

Evidence > Judicial Notice > Adjudicative Facts > Verifiable Facts

HN3[] **Adjudicative Facts, Facts Generally Known**

Under Fed. R. Evid. 201, the Court may take judicial notice of matters of public record if the facts are not subject to reasonable dispute. See Fed. R. Evid. 201(b).

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN4[] **Motions to Dismiss, Failure to State Claim**

Even if a document is not attached to a complaint, it may be incorporated by reference into a complaint if the plaintiff refers extensively to the document or the document forms the basis of the plaintiff's claim. The defendant may offer such a document, and the district court may treat such a document as part of the complaint, and thus may assume that its contents are true for purposes of a motion to dismiss under Fed. R. Civ. P. 12(b)(6).

Business & Corporate Compliance > ... > Causes of Action Involving Trademarks > Infringement Actions > Determinations

Trademark Law > Causes of Action Involving Trademarks > Infringement Actions > Burdens of Proof

HN5[] **Infringement Actions, Determinations**

To state a claim for trademark infringement, a plaintiff must allege two elements: first, that the plaintiff owns a valid and protectible trademark; and second, that a defendant used, in commerce, a similar mark without authorization in a manner that is likely to cause consumer mistake, confusion, or deception.

Business & Corporate Compliance > ... > Federal Unfair Competition Law > False Advertising > Elements of False Advertising

HN6[] **False Advertising, Elements of False Advertising**

A false advertising claim requires a showing that: (1) the defendant made a false statement either about the plaintiff's or its own product; (2) the statement was made in commercial advertisement or promotion; (3) the statement actually deceived or had the tendency to deceive a substantial segment of its audience; (4) the deception is material; (5) the defendant caused its false statement to enter interstate commerce; and (6) the plaintiff has been or is likely to be injured as a result of the false statement, either by direct diversion of sales from itself to the defendant, or by a lessening of goodwill associated with the plaintiff's product.

Torts > ... > Fraud & Misrepresentation > Actual Fraud > Elements

Torts > ... > Fraud & Misrepresentation > Nondisclosure > Elements

HN7[] **Actual Fraud, Elements**

Promissory fraud is a subspecies of fraud and deceit. A promise to do something necessarily implies the intention to perform; hence, where a promise is made without such intention, there is an implied misrepresentation of fact that may be actionable fraud. Cal. Civ. Code § 1710, subd. (4). The elements of fraud, which give rise to the tort action for deceit, are (a) misrepresentation (false representation, concealment, or nondisclosure); (b) knowledge of falsity (or scienter); (c) intent to defraud, i.e., to induce reliance; (d) justifiable reliance; and (e) resulting damage.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

HN8[] **Heightened Pleading Requirements, Fraud Claims**

Under Fed. R. Civ. P. 9(b), a plaintiff must plead each element of a fraud claim with particularity, i.e., the plaintiff must set forth more than the neutral facts necessary to identify the transaction. A fraud claim must be accompanied by the who, what, when, where, and how of the fraudulent conduct charged. A pleading is sufficient under Rule 9(b) if it identifies the circumstances constituting fraud so that a defendant can prepare an adequate answer from the allegations. Statements of the time, place, and nature of the alleged fraudulent activities are sufficient, but mere conclusory allegations of fraud are not. Furthermore, though allegations based on information and belief are usually insufficient, in circumstances of corporate fraud, this rule may be relaxed as to matters within the opposing party's knowledge.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN9[] **State Regulation, Claims**

California's Unfair Competition Law (UCL) prohibits any unlawful, unfair, or fraudulent business act or practices. Cal. Bus. & Prof. Code § 17200 et. seq. To prevail on a UCL claim, a plaintiff must make a twofold showing: he or she must demonstrate injury in fact and a loss of money or property caused by unfair competition.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN10[] **Trade Practices & Unfair Competition, State Regulation**

In the context of Cal. Bus. & Prof. Code § 17200, unfair means conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition.

Antitrust & Trade Law > Consumer Protection > Likelihood of Confusion > False Designation of Origin

Business & Corporate Compliance > ... > Unfair Competition > Federal Unfair Competition Law > False Designation of Origin

Antitrust & Trade Law > Consumer Protection > False Advertising > Lanham Act

HN11[] **Likelihood of Confusion, False Designation of Origin**

False advertising claims are properly stated where one alleges that a person is misrepresenting the nature, characteristics, qualities, or geographic origin of his or her or another person's goods, services, or commercial activities in commercial advertising or promotion. 15 U.S.C.S. § 1125(a)(1)(B). A false designation of origin claim requires that a plaintiff show that the defendant used in commerce any word, term, name, symbol, or device that is likely to cause confusion, or to cause mistake, or to deceive as to the affiliation, connection, or association of defendant with plaintiff, or as to the origin, sponsorship, or approval of his goods by plaintiff.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN12[] **Motions to Dismiss, Failure to State Claim**

A court is not required to accept as true allegations contradicting documents that are referenced in the complaint.

Opinion

CIVIL MINUTES - GENERAL

Proceedings: [IN CHAMBERS] Order Regarding Motion to Dismiss

Defendant DFO Global Performance Commerce Ltd. (formerly DBA Direct Focus Online Ltd.) ("DFO Global") filed a motion to dismiss the Third Amended Complaint ("TAC") of Plaintiff Agency Y LLC ("Agency Y") and Plaintiff Global Media Holdings Incorporated ("Global Media") (together, "Plaintiffs"). Mot., Dkt. No. 58. Agency Y opposed the motion. Opp'n., Dkt. No. 59. DFO Global Replied. Reply, Dkt. No. 60.

For the following reasons, the Court **GRANTS in large part** and **DENIES in part** the motion, with leave to amend.

I. BACKGROUND

The following facts are alleged in Agency Y's TAC. See TAC Dkt. No. 48.

Tim Burd ("Burd") is a high-profile internet marketing professional. Id. ¶ 14. Burd's name is recognized as a source of origin for his internet marketing services, some of which he provides through his corporation, Global Media. Id. Global Media is the owner of the service mark TIM BURD, and it has applied for registration of the service mark. Id. On September 3, 2016, **[*2]** Burd created a Facebook Business Manager Account at the highest setting (5,000 ad accounts). Id. ¶ 15.Later in 2016, Burd and Sean Brown ("Brown") founded Agency Y and created a successful brand under the service mark "AGENCY Y" to promote internet marketing services via its website at "www.agencyy.com." Id. ¶ 16.The AGENCY Y brand consists of the AGENCY Y mark and "www.agencyy.com". Id. ¶ 17.

In December 2016, Agency Y registered www.agencyy.com through the registrar GoDaddy (the "Domain"), which has been an important mechanism through which Agency Y has interacted with its clients. Id. ¶ 18. Agency Y invested substantial time, effort, and resources in promoting and marketing its services through Agency Y. As a result, the mark in connection with these services was valuable with considerable goodwill. Id. ¶ 19. In 2017 alone, Agency Y expended approximately $ 700,000 on the marketing, advertising, and promotion of services offered under the AGENCY Y mark. Id. ¶ 20. From 2016 to 2020, Agency Y participated in numerous regional and global conferences to market and promote its services under the AGENCY Y mark. Id. Agency Y's mark is distinctive to both the public and Agency Y's trade. **[*3]** Id. In 2017, Agency Y generated over $ 750,000 in Year-1 revenue under its Agency Y mark. Id. Clients understood that the Agency Y services originated from Agency Y and Burd, and based on the strength of the Agency Y brand, Year 1 revenue, and Burd's reputation, the business could easily have sold for a substantial sum. Id. ¶ 22.

From December 2016 to February 2019, the Agency Y mark and services received significant media coverage and received substantial promotion from Facebook groups, name brand recognition with Burd, word of mouth marketing, and personal referrals. Id. ¶ 21.

In October 2017, Defendant Bruce Cran ("Cran") approached Burd and Brown about creating a joint venture between Cran's company and Agency Y to promote the AGENCY Y brand and grow Agency Y's business. Id. ¶ 25. In reliance on Cran's representations, in November 2017, Agency Y entered into an agreement (the "Agreement") with DFO NJ for a 23-month term (renewable for additional12-month terms). Id. ¶ 26. The Agreement promises Agency Y commissions for referring its clients to DFO Global in the event that Agency Y's clients engage DFO Global to perform internet marketing services for Agency Y's clients. Id. ¶ 27. **[*4]** As a practical matter, however, not only did Agency Y refer and introduce its existing and potential clients to DFO Global, but they would also manage leads, clients, and push for growth and "upsells". Id.

For approximately two years thereafter, Agency Y believed that the parties co-existed within the parameters of the Agreement, but DFO Global "kept Agency Y in the dark, thus obscuring its fraudulent behavior and devious intentions." Id. ¶ 28. During the initial and first renewal term of the Agreement, Agency Y remained the owner of the AGENCY Y service mark and all goodwill associated with it per Section 8(d) of the Agreement. Id. ¶ 29. In less than a year after DFO Global's assumption of the Agency Y brand, however, Agency Y noticed that the brand was suffering damage to its reputation due to subpar service resulting in decreased goodwill. Id. ¶ 30. In or around February 2019, Cran told Burd and Brown that some changes to the Agreement would be made to "bring it in line with the business relationship." Id. ¶ 31. Based on Cran's representations, on or about February 27, 2019, Agency Y entered into its first amendment to the Agreement ("First Addendum"), which states that DFO NJ was **[*5]** replaced by DFO BC or DFO NV—which have identical names (although the First Addendum does not specify which is DFO NJ's successor). Id. ¶ 32. The First Addendum also changed the provision in the Agreement that each party remains the owner of its respective marks and associated goodwill, replacing it with an assignment from Agency Y to DFO NJ's successor (either DFO BC or DFO NV). Id. DFO Global "intended to deceive and manipulate Agency Y to assign its intellectual property rights in the First Addendum." Id. ¶ 33.

Around September 2019, Cran told Burd and Brown that further modifications were required to the business terms of the Agreement, and that if the deal went awry, Agency Y could simply take back its IP. Id. ¶ 34. Based on Cran's representations, around September 10, 2019, Agency Y entered into its second amendment to the Agreement ("Second Addendum"), which also did not specify whether DFO BC or DFO NV is DFO NJ's successor. Id. ¶ 35. The Second Addendum reduced commissions payable to Agency Y from 10% of gross revenue to 10% of net profit, changed the mechanism for extension of the term, and put Agency Y on a "probationary period" with certain performance benchmarks it needed **[*6]** to meet to prevent termination of the Agreement. Id. ¶ 36. The Second Addendum also provided that in the event of termination, DFO Global would return to Agency Y its intellectual property. Id. When Cran made the representations to Burd and Brown to induce Agency Y to enter into the

Agreement and two addenda, DFO Global "had no intention of performing oral or written promises it made". Id. ¶ 37. Instead, DFO Global "intended to have Agency Y refer its clients to them, take over those clients, use the AGENCY Y brand to attract Agency Y's customers, and re-brand the services to make the AGENCY Y brand worthless and irrelevant." Id.

On June 4, 2020, Agency Y invoked Section 3(c) of the Second Addendum that authorizes the return of the Agency Y intellectual property rights. Id. ¶ 39. In the meantime, DFO Global had dismantled the Agency Y website, and since the filing of the original complaint in this action, DFO Global changed the www.agencyy.com website to display Agency Y on the "Home Page," but to link to DFO Global's new company, Amasa, at the "About" section. Id. ¶ 40. The Agency Y web address led only to the new website, www.agencyamasa.com, and remnants of Agency Y remained on the **[*7]** DFO Global website, but clicking on the link for more information about Agency Y directed to www.agencyamasa.com. Id. Moreover, on June 22, 2020, DFO Global announced a rebranding before the parties had an opportunity to discuss the proper distribution of the intellectual property assets upon termination of the Agreement. Id. ¶ 41.

The announcement describes the Agreement as "with Agency Y co-founder Tim Burd" when in fact it was with Agency Y itself, not Burd. Id. ¶ 42. Putting aside the announcement's false identification of the parties to the Agreement, it is true that Agency Y and Defendants' company dissolved their relationship. Id. However, the announcement was false in another sense: Agency Y did not decide to re-brand itself; DFO Global instead falsely stated that Agency Y had renamed itself Amasa. Id. DFO Global nevertheless controlled the domain names for both Agency Y and the new domain name, and diverted traffic that would have gone to www.agencyy.com (which DFO Global controlled) to www.agencyamasa.com (which DFO Global also controlled). Id. Agency Y's clientele and potential new clients could not reach Agency Y. Id.

II. Legal Standard

A. Motion to Dismiss

HN1[] Under *Rule 12(b)(6)*, a defendant **[*8]** may move to dismiss for failure to state a claim upon which relief can be granted. A plaintiff must state "enough facts to state a claim to relief that is plausible on its face." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. A claim has "facial plausibility" if the plaintiff pleads facts that "allow[] the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*.

HN2[] In resolving a 12(b)(6) motion under Twombly, the Court must follow a two-pronged approach. First, the Court must accept all well-pleaded factual allegations as true, but "[t]hreadbare recitals of the elements of a cause of action, supported by mere conclusory statements, do not suffice." *Iqbal, 556 U.S. at 678*. Nor must the Court "'accept as true a legal conclusion couched as a factual allegation.'" *Id. at 678-80* (quoting *Twombly, 550 U.S. at 555*). Second, assuming the veracity of well-pleaded factual allegations, the Court must "determine whether they plausibly give rise to an entitlement to relief." *Id. at 679*. This determination is context-specific, requiring the Court to draw on its experience and common sense, but there is no plausibility "where the well-pleaded facts do not permit the court to infer more than the mere possibility of misconduct." Id.

B. Request for Judicial Notice

HN3[] Under *Federal Rule of Evidence 201*, the **[*9]** Court may take judicial notice of matters of public record if the facts are not "subject to reasonable dispute." *Lee v. City of Los Angeles, 250 F.3d 668, 688-89 (9th Cir. 2001)*; see *Fed. R. Evid. 201(b)*.

III. Discussion

A. Incorporation By Reference

DFO Global first asks the Court to incorporate by reference the parties' Agreement and the two Addenda to the Agreement, because Agency Y refers extensively to these documents in its TAC. See Mot., Dkt. No. 58, at 4. Agency Y does not appear to oppose this request.

HN4[] "Even if a document is not attached to a complaint, it may be incorporated by reference into a complaint if the plaintiff refers extensively to the document or the document forms the basis of the plaintiff's claim. The defendant may offer such a document, and the district court may treat such a document as part of the complaint, and thus may assume that its contents are true for purposes of a motion to dismiss under *Rule 12(b)(6)*." *United States v. Ritchie, 342 F.3d 903, 908 (9th Cir. 2003)* (citations omitted).

The Court agrees with DFO Global that Agency Y relies extensively on the Agreement and its two Addenda in its TAC. See, e.g., TAC ¶¶ 25, 29, 32, 35-39. Accordingly, the Court GRANTS the request with respect to the Agreement between the parties and the First and Second Addenda to the Agreement.

B. Group Pleading

Next, DFO Global **[*10]** argues that the TAC is defective in that it fails to clarify which claim applies to which Defendant, and instead it alleges that "Defendants" committed each violation in each cause of action. Mot., Dkt. No. 58, at 4. Specifically, DFO Global argues that improperly grouping together the Defendants does not change the legal defenses between Agency Y and DFO Global at this stage, but that the decision to improperly group Cran with DFO Global is problematic because "[t]he TAC is devoid of any facts supporting a theory of personal liability as to Cran." Id., at 5.

Agency Y responds that they are uncertain of the precise relationship among the DFO Global entities, which is why it named all of them, and that without discovery "it is impossible to know the precise contours of the interrelationship among the various defendants." Opp'n., Dkt. No. 59, at 10. The Court agrees that group pleading is not inappropriate in this case, and that with respect to Cran the Court will dismiss claims that it finds are improperly stated with respect to him. Accordingly, the Court DENIES the motion to dismiss Cran due to a group pleading defect.

C. Motion to Dismiss

I. Agency Y's Claims

1. Trademark Infringement **[*11]**

DFO Global first asks the Court to dismiss Agency Y's trademark infringement claim as it relates to the Agency Y Mark on the ground that it is inconsistent with and barred by the parties' contracts. Mot., Dkt. No. 58, at 10. ***HN5***[] To state a claim for trademark infringement, a plaintiff must allege two elements: first, that the plaintiff owns a valid and protectible trademark; and second, that a defendant used, in commerce, a similar mark without authorization in a manner that is likely to cause consumer mistake, confusion, or deception. *So. Cal. Darts Ass'n v. Zaffina, 762 F.3d 921, 929 (9th Cir. 2014)*.

Specifically, DFO Global argues that Agency Y's trademark infringement claim, based on the allegedly unauthorized use of the Agency Y mark, is subject to dismissal because the allegation is inconsistent with the contracts. Mot., Dkt. No. 58, at 6. DFO Global states that "[a]ny use of the mark before June 2020 is barred by the agreements, and any use post-June 2020 is a contractual dispute, not a trademark claim." Id. As such, DFO Global concludes, Agency Y has not cured the defect that the Court identified in the FAC and SAC as reason to dismiss the trademark infringement claim with respect to the Agency Y mark. Id.

Agency Y responds that the defect has, **[*12]** in fact, been cured. Agency Y argues that unlike the SAC, the TAC "distinguishes between Agency Y's claim for infringement of its mark and [Global Media]'s claim for infringement of the Burd mark, by adding Burd as a plaintiff and pleading their respective claims in separate counts." Opp'n., Dkt. No. 59, at 16. The Court does not believe that this distinction makes a difference with respect to the sufficiency of the pleadings for the trademark infringement claims.

As was the case with previous iterations of this Complaint, the TAC has not sufficiently alleged facts that would lead to the existence of a valid trademark infringement claim with respect to the Agency Y mark given the express language in the contracts and addenda, which render this a contract dispute rather than a trademark infringement claim. As such, the Court again dismisses the trademark infringement claim with respect to the Agency Y mark as inconsistent with the contract. Accordingly, the Court **GRANTS** the motion to dismiss the trademark infringement claim as it relates to the Agency Y mark.

2. False Designation of Origin/ False Advertising/ Unfair Competition Claims

DFO Global next asks the Court to dismiss Agency Y's **[*13]** false designation of original, false advertising, and common law unfair competition claims. Mot., Dkt. No. 58, at 6.

HN6[] A false advertising claim requires a showing that: (1) the defendant made a false statement either about the plaintiff's or its own product; (2) the statement was made in commercial advertisement or promotion; (3) the statement actually deceived or had the tendency to deceive a substantial segment of its audience; (4) the deception is material; (5) the defendant caused its false statement to enter interstate commerce; and (6) the plaintiff has been or is likely to be injured as a result of the false statement, either by direct diversion of sales from itself to the defendant, or by a lessening of goodwill associated with the plaintiff's product. *Jarrow Formulas, Inc. v. Nutrition Now, Inc., 304 F.3d 829, 835 n.4 (9th Cir. 2002)*.

The TAC alleges false advertising premised on allegations that (1) DFO Global "sought to register the AGENCY Y mark in the United States Patent and Trademark Office." (TAC, Dkt. No. 48 ¶ 51); and (2) DFO Global re-routed Agency Y's URL to link to the Amasa website, which "misled the public, leading them to believe that Amasa was affiliated with Agency Y or was one and the same as Agency Y (Id. ¶ 40).

Regarding the United States **[*14]** Patent and Trademark Office ("USPTO") filing, DFO Global argues that Agency Y does not allege how exactly filing a trademark application with the USPTO is a "commercial advertisement or promotion" or explain how the application "actually deceived or had a tendency to deceive a substantial segment of its audience." Mot., Dkt. No. 58, at 7. Furthermore, DFO Global argues that the claim is barred under the economic loss doctrine. Id. The Court agrees that Agency Y's TAC suffers from the same defects as did its prior complaints. Just as before, any unlawfulness regarding DFO Global's filing with the USPTO is based on Section 8(d) of the Agreement, which provides that DFO Global is not the owner Agency Y mark (TAC ¶ 29), and Agency Y also again pleads that DFO Global's filing of the service mark was a violation of the Agreement (id. ¶ 108). As such, the Court once again finds that any damages resulting from the USPTO filing would be breach of contract damages, so the economic loss doctrine bars this tort claim.

Turning now to the false advertising claim based on the rerouting of the Agency Y URL to Amasa, Agency Y alleges that "[t]his misrepresented the nature, characteristics, and qualities **[*15]** of the mark," and that "Agency Y was injured as a result of this false advertising both by direct diversion of its sales to Defendants and the lessening of the goodwill associated with Plaintiff's services." Opp'n., Dkt. No. 59, at 17. However, the Court does not find that Agency Y has adequately alleged that this rerouting was false or a misrepresentation. As DFO Global notes, "after the emergence of a dispute between DFO [Global] and Agency Y, any public statement or representation that the

Agency Y business (i.e. the internet advertising services offered by DFO [global]) would continue instead as Amasa, is *accurate*, rather than false." Reply, Dkt. No. 60, at 6 (emphasis in original). Furthermore, the Court agrees that this kind of rerouting from one website to another does not constitute the kind of behavior that the Lanham Act prohibits. See *15 U.S.C. § 1125(a)(1)(B)* (the Lanham Act "prohibits a person from misrepresenting the nature, characteristics, qualities, or geographic origin of his or her or another person's goods, services, or commercial activities in commercial advertising or promotion."

With respect to the false designation of origin claim, DFO Global argues that because Agency Y contends that **[*16]** a contractual dispute arose in June 2020 regarding the ownership of the AGENCY Y Mark (after DFO Global had been authorized to provide services related to the AGENCY Y Mark for years), Agency Y cannot also allege that ceasing to offer services under one mark and continuing the business under a new mark falsely designates source or is likely to cause confusion. Mot., Dkt. No. 58, at 8-9. The Court once again agrees that the rerouting to Amasa is accurate in showing that the services in question were coming from DFO Global. What is more, the Court finds that allegations that Agency Y's June 4, 2020 demand regarding the return of the IP Assets eliminated DFO Global's right to make changes to the website or inform the public of its rebranding is a breach of contract claim, not a false designation claim.

Accordingly, the Court **GRANTS** the motion to dismiss with respect to the false advertising, false designation of origin, and common law unfair competition claims.

3. Promissory Fraud Claim

DFO Global next argues that Agency Y's promissory fraud claim should be dismissed because it "merely upcycles its repeatedly dismissed fraudulent concealment claim under a different heading." Mot., Dkt. No. **[*17]** 58, at 10.

"'***HN7***[] Promissory fraud' is a subspecies of fraud and deceit. A promise to do something necessarily implies the intention to perform; hence, where a promise is made without such intention, there is an implied misrepresentation of fact that may be actionable fraud." *Engalla v. Permanente Medical Group, Inc., 15 Cal. 4th 951, 973-974, 64 Cal. Rptr. 2d 843, 938 P.2d 903 (1997)* (citations omitted). *Cal. Civ. Code § 1710, subd. (4)*. "The elements of fraud, which give rise to the tort action for deceit, are (a) misrepresentation (false representation, concealment, or nondisclosure); (b) knowledge of falsity (or 'scienter'); (c) intent to defraud, i.e., to induce reliance; (d) justifiable reliance; and (e) resulting damage." *Beckwith v. Dahl, 205 Cal. App. 4th 1039, 1059-1060, 141 Cal. Rptr. 3d 142 (2012)* (citation omitted).

First, DFO Global argues that the promissory fraud claim lacks specificity as is required by *Rule 9(b)*. Mot., Dkt. No. 58, at 11. ***HN8***[] Under *Fed. R. Civ. P. 9(b)*, a plaintiff must plead each element of a fraud claim with particularity, i.e., the plaintiff "must set Title Agency Y LLC et al. v. DFO Global Performance Commerce Ltd. et al. forth more than the neutral facts necessary to identify the transaction." *Cooper v. Pickett, 137 F.3d 616, 625 (9th Cir. 1997)* (emphasis in original) (quoting *Decker v. GlenFed, Inc. (In re GlenFed, Inc. Sec. Litig.), 42 F.3d 1541, 1548 (9th Cir. 1994)*). A fraud claim must be accompanied by "the who, what, when, where, and how" of the fraudulent conduct charged. *Vess v. Ciba-Geigy Corp. USA, 317 F.3d 1097, 1106 (9th Cir. 2003)* (quoting *Cooper, 137 F.3d at 627*). "A pleading is sufficient under *rule 9(b)* if it identifies the **[*18]** circumstances constituting fraud so that a defendant can prepare an adequate answer from the allegations." *Moore v. Kayport Package Express, Inc., 885 F.2d 531, 540 (9th Cir. 1989)*. Statements of the time, place, and nature of the alleged fraudulent activities are sufficient, but mere conclusory allegations of fraud are not. Id. Furthermore, though allegations based on information and belief are usually insufficient, in circumstances of corporate fraud, this rule may be relaxed as to matters within the opposing party's knowledge. Id.

DFO Global contends that the TAC does not state what promises were made, by whom, when and where they were made, or how, and that the mere contention that DFO Global "made false promises" in the contracts is insufficient under *Rule 9(b)*. Mot., Dkt. No. 58, at 11. Agency Y's opposition does not assist the Court in locating where any such specificity can be located. See Opp'n., Dkt. No. 59, at 18. Although Agency Y contends that its TAC is "remarkably fact-specific," it does not explain how exactly fraud was committed based on the rerouting of the website or the rebranding. See id., at 18-19. The Court agrees with DFO Global that Agency Y's allegations regarding promissory fraud are inadequate under *Rule 9(b)*'s standard. The general contention **[*19]** that DFO Global promised to "promote the AGENCY Y brand and grow Agency Y's services" (TAC ¶ 25) merely restates its claim for breach of contract, and the allegation regarding certain oral promises that were not memorialized in the parties' contracts (TAC ¶ 88) are too vague for the standard set by *Rule 9(b)*. Because the Court has found that this claim is inadequately plead under *Rule 9(b)*, it does not reach DFO Global's argument regarding economic loss on this claim. Accordingly, the Court GRANTS the motion to dismiss the promissory fraud claim with respect to the Agency Y mark for failure to comply with the heightened pleading standard required by *Fed. R. Civ. P. 9(b)* for fraud pleadings.

4. Unfair Competition Law Claims

DFO Global next argues that Agency Y's claims under the unlawful, unfair, and fraudulent prongs of California's Unfair Competition Law ("UCL") must be dismissed. Mot., Dkt. No. 58, at 13.

HN9[] California's UCL prohibits "any unlawful, unfair, or fraudulent business act or practices." *Cal. Bus. & Prof. Code §17200, et. seq.* To prevail on a UCL claim, a plaintiff must "make a twofold showing: he or she must demonstrate injury in fact and a loss of money or property caused by unfair competition." *Peterson v. Cellco P'ship, 164 Cal. App. 4th 1583, 1590, 80 Cal. Rptr. 3d 316 (4th Dist. 2008)*.

As to the unlawful prong, DFO Global states simply: **[*20]** "Agency Y claims DFO [Global] has acted unlawfully due to the above allegations. Because these claims must be dismissed, as analyzed *supra*, the UCL claim predicated on the claims must be dismissed as well." Mot., Dkt. No. 58, at 13-14 (citing TAC, Dkt. No. 48 ¶ 94)). For the third time on this point, the Court agrees. Agency Y's contention of unlawful behavior under the UCL is based on the fact that DFO Global adopted and registered the Agency Y mark with the USPTO and engaged in conduct that violated the Lanham Act as asserted in the second and third causes of action. See TAC, Dkt. No. 48 ¶ 94. Thus, the UCL claim is premised on Agency Y's Lanham Act and promissory fraud causes of action, which as discussed above, cannot survive. Accordingly, the Court **GRANTS** the motion to dismiss the UCL claim based on the unlawful prong.

With respect to the unfair prong, DFO Global argues that Agency Y has not cured the defect that the Court noted with regard to the SAC, which was that it "fail[ed] to specifically explicate what public policy DFO Global violated through its allegedly unfair actions." Order, Dkt. No. 45, at 16. DFO Global contends that Agency Y's new allegation on this point is merely **[*21]** that DFO Global's actions "offend" and "violate" public policy. Mot., Dkt. No. 58, at 14 (citing TAC, Dkt. No. 48 ¶ 95, 96). Agency Y responds that the TAC does, in fact, directly tie the UCL claims to multiple federal statutes, including the Lanham Act *§1125(a)(1)* (established to protect consumers and businesses from unfair competition), and the *Sherman Act § 2*, *15 U.S.C. § 2*. Opp'n., Dkt. No. 59, at 18.

Once again, the Court finds that these allegations do not sufficiently allege violation of public policy. dismissal of Agency Y's UCL claim under the "unfair" prong. Mot., Dkt. No. 39, at 21. ***HN10***[] In the context of *section 17200*, "unfair...means conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition." *Cel-Tech Commc'ns, Inc. v. Los Angeles Cellular Tel. Co., 20 Cal. 4th 163, 187, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999)*. The TAC does not add new allegations of any kind that do more than state that public policy has been violated in a conclusory manner. Accordingly, the Court **GRANTS** the motion to dismiss the UCL claim based on the unfair prong.

Finally, with regard to the fraudulent prong, DFO Global argues that Agency Y's allegations fail because they do not **[*22]** meet the *Rule 9(b)* pleading standard and because the "promissory fraud" claim on which it is based is improperly plead. Mot., Dkt. No. 58, at 14. For the same reasons discussed above regarding promissory fraud, the Court agrees, and **GRANTS** the motion to dismiss the UCL claim based on the fraudulent prong.

ii. Global Media's Claims: Causes of Action with Respect to the Burd Mark

1. Trademark Infringement

First, DFO Global argues that the Court should dismiss Global Media's claim for trademark infringement on the ground that the allegation is contradicted by the June 22 announcement. Mot., Dkt. No 58, at 15. Specifically, DFO Global contends that the TAC states that the announcement "implied that Burd . . . would continue his role in Amasa" which therefore constituted false, unauthorized use of the mark. (TAC ¶ 57), but that the announcement itself— which is quoted in the TAC— states the following:

> Media buying firm Agency Y has unveiled a new name, logo, and website as part of an extensive rebranding initiative. The company is now known as Amasa (uh-mah-suh). The initiative coincides with the dissolution of Direct Focus Online's agreement with Agency Y co-founder Tim Burd. Amasa will continue to **[*23]** put growth, data, and transparency at the core of its service offerings, which include media buying, conversion rate optimization, and strategic growth hacking.

Mot., Dkt. No. 58, at 15 (citing TAC ¶ 41). DFO Global argues that it is inconsistent to claim that this announcement implies that Burd will be continuing on with DFO/Amasa when the text itself referred to the dissolution of DFO Global's agreement with Burd. Id. Agency Y does not appear to respond directly to this point, and the Court is inclined to agree that it is inconsistent to state that DFO Global infringed the Burd mark through the June 22 announcement where the announcement itself directly states that there has been a dissolution between DFO Global and Burd.

With respect to the Pitchbook Profile, DFO Global notes that Agency Y's allegation is that the Profile leads to trademark infringement liability because it "states that Amasa's Executive Team includes Sean Brown and Tim Burd." Mot., Dkt. No. 58 (quoting TAC ¶ 59.) The Court finds that Agency Y does not sufficiently plead that this statement was untruthful or misleading under the circumstances when made, as the TAC does not plead the date that the Pitchbook profile **[*24]** was first made, or that at the time it was first made, that it was inaccurate. The TAC also does not plead that DFO Global was subsequently "re-stating" the Pitchbook profile causing it to be inaccurate. Thus, the Court finds that the TAC does not allege sufficient facts to plead a violation of the Lanham act with regard to the Pitchbook profile.

Accordingly, the Court GRANTS the motion to dismiss the trademark infringement claim with respect to the Burd mark.

2. False Advertising/ False Designation of Origin Claim

Next, DFO Global contends that Global Media's false advertising/ false designation of origin claim should be dismissed based largely on a now-familiar argument that the facts on which these claims are based (generally stemming from the June 22 announcement) are inconsistent with the claims. Mot., Dkt. No. 58, at 18 (citing TAC ¶ 64, 65). Specifically, DFO Global states that "as addressed above, this announcement specifically noted that the DFO entities were ending their relationship with Mr. Burd. It is therefore implausible that such an announcement could support a claim for false advertising or false designation of origin." Id.

HN11[] False advertising claims are properly stated **[*25]** where one alleges that a person is "misrepresenting the nature, characteristics, qualities, or geographic origin of his or her or another person's goods, services, or commercial activities in commercial advertising or promotion." Alfasigma USA, Inc., 398 F. Supp. 3d at 590 (citing *15 U.S.C. § 1125(a)(1)(B)*). A false designation of origin claim requires that a plaintiff show that the defendant "used in commerce any word, term, name, symbol, or device ...' that is 'likely to cause confusion, or to cause mistake, or to deceive as to the affiliation, connection, or association of [d]efendant with [p]laintiff, or as to the origin, sponsorship, or approval of his goods by [p]laintiff.'" *Blizzard Entm't, Inc., 2018 U.S. Dist. LEXIS 224178, 2018 WL 7448915, at *5*.

The Court agrees that neither a false advertising claim nor a false designation of origin claim is properly stated here. As noted above, Global Media's allegations regarding falsity here appear to be directly contradicted by the announcement itself. ***HN12***[] The Court is not required to "accept as true allegations contradicting documents that are referenced in the complaint." *Lazy Y Ranch Ltd. v. Behrens, 546 F.3d 580, 588 (9th Cir. 2008)*. Accordingly, the Court GRANTS the motion to dismiss the false advertising and false designation of origin claims with respect to the Burd mark.

3. Unfair Competition Law

Next, DFO Global argues that Global Media's **[*26]** claims under California's Unfair Competition Law must be dismissed because they are predicated on the above allegations of infringement, false advertising, and false designation of origin, all of which must be dismissed. Mot., Dkt. No. 58, at 19 (citing TAC ¶ 94-98). The Court agrees. Having dismissed Global Media's claims regarding trademark infringement, false advertising, and false designation of origin, the Court likewise GRANTS the dependent Unfair Competition Law claims with respect to the Burd mark.

iii. Allegations Against Cran

Finally, DFO Global seeks dismissal of all claims against Cran on the grounds that "Agency Y and [Global Media] fail to articulate how Cran *personally* committed trademark infringement, unfair competition, false advertising, false designation of origin, or cybersquatting relating to the AGENCY Y Mark, the Burd Mark, or the AGENCY Y URL." Mot., Dkt. No. 58, at 20. Essentially, DFO Global argues that the TAC does not allege any facts that tend to show that Cran, rather than DFO Global, did anything with respect to the alleged intellectual property at issue. Id. DFO Global also notes that Cran has not been served, and that the Court lacks personal jurisdiction **[*27]** over him. Id., at 19-21.

In response, Agency Y argues that Cran has not been served because he "has been intentionally evading service" and that Agency Y has "attempted to serve Cran multiple times at all known addresses, all of which have turned out to have no ties to Cran." Opp'n., Dkt. No. 59, at 19. Moreover, Agency Y states that since Cran has not been served, this is not the time to litigate the personal jurisdiction issue, and that since Cran has not appeared and is not a moving party, DFO Global does not have standing to address the TAC's allegations against him. Id. The Court agrees that DFO Global does not have standing to litigate the allegations against the heretofore unserved Cran. Accordingly, the Court DENIES the motion to dismiss the allegations against Cran.

IV. Conclusion

For the foregoing reasons, the Court **GRANTS in large part** and **DENIES in part** the motion with leave to amend.

IT IS SO ORDERED.

Opinion by: JOHN MICHAEL VAZQUEZ

Opinion

OPINION WITH FINDINGS OF FACT & CONCLUSIONS OF LAW

John Michael Vazquez, U.S.D.J.

In this hotly contested matter, Plaintiff Federal Trade Commission ("FTC") seeks to stop Defendant Hackensack Meridian Health, Inc. ("HMH"), the largest health system in New Jersey, from acquiring Defendant Englewood Healthcare Foundation ("Englewood"), an alleged close and local competitor to two of HMH's medical centers. Presently pending before the Court is the FTC's motion for a preliminary injunction to prevent HMH and Englewood from consummating their proposed merger until completion of the pending administrative proceedings. D.E. 133. The parties agree to the relevant product market but little else. The relevant product market is a cluster of inpatient general acute care ("GAC") services sold and provided to **[*5]** commercial insurers and their members.

Defendants filed a brief in opposition to the FTC's motion, D.E. 157, to which the FTC filed a reply, D.E. 228. The parties also filed several motions *in limine* in advance of the evidentiary hearing, D.E. 246, 248, 260, 264, in addition to proposed findings of fact and conclusions of law, D.E. 320-21, 323-29. The Court reviewed the submissions in support of and opposition to the motions and held a seven-day evidentiary hearing via videoconference. The parties also provided post-hearing submissions, D.E. 320, 324, and the Court heard closing arguments, also via videoconference, on June 2, 2021. For the reasons stated below, the motion for a preliminary injunction is **GRANTED**.[1]

I. WITNESSES

During the evidentiary hearing, the Court heard testimony from the following individuals, in order of appearance:

- Michael Maron; President & Chief Executive Officer, Holy Name Medical Center;
- Michele Nielsen; Vice President of Network Contracting & New Jersey Market Lead, UnitedHealthcare;
- Lynda A. Grajeda; Director of Contracting for Medicaid & Medicare, Amerigroup of New Jersey[2];
- Walter C. Wengel, III; Senior Director for the New Jersey Network, Aetna;
- Sue Anderson; **[*6]** Principal, The Chartis Group;
- Kevin Lenahan; Senior Vice President, Chief Administrative Officer, Chief Financial Officer, Atlantic Health System;
- Dr. Leemore Dafny; Plaintiff's expert in healthcare and antitrust economics[3];
- Ken Kobylowski; Senior Vice President for Provider Contracting & Network Operations, AmeriHealth New Jersey & AmeriHealth Administrators;
- Ryan Tola; President, New Jersey Division, Doyle Alliance Group;
- Robert C. Garrett; President & Chief Executive Officer, HMH;
- Warren Geller; President & Chief Executive Officer, Englewood;
- Dr. Lawrence Wu; Defendants' expert in healthcare and antitrust economics;
- Kristen Strobel; Senior Director of Global Benefits, Becton, Dickinson & Co.;
- Patrick Young; President of Population Health, HMH;
- Allen Karp; Executive Vice President of Healthcare Management & Transformation, Horizon Blue Cross & Blue Shield of New Jersey;
- Mark Sparta; President & Chief Hospital Executive, Hackensack University Medical Center;
- Kevin C. "Casey" Nolan; Defendants' expert in hospital operations, capacity and strategic planning;

---

[1] The Court has considered all submissions, testimony, and exhibits in this matter. To the extent the Court does not expressly address an argument raised by the parties, the Court has considered it and found that it does not change the Court's analysis.

[2] Ms. Grajeda testified that Amerigroup only offers Medicaid and Medicare plans in New Jersey. Tr. at 282:1-4. The FTC, however, expressly excludes Medicare Advantage and managed Medicaid insurers from its relevant product market. FTC Br. at 17 n.42. As a result, the Court finds little probative value to Ms. Grajeda's testimony.

[3] Dr. Dafny also testified as a rebuttal expert.

- Dr. Gautam Gowrisankaran; Defendants' expert in the areas of industrial organization, economics and econometrics in **[*7]** the healthcare industry;
- Dr. Stephen Brunnquell; President, Englewood Health Physician Network;
- Dr. Gregg Meyer; Defendants' expert in the area of healthcare quality, population health and value-based care;
- Lisa Ahern; Defendants' expert on cost savings and efficiencies for healthcare provider transactions; and
- Dr. Patrick Romano; Plaintiff's rebuttal expert on healthcare quality.[4]

II. BACKGROUND, EVIDENCE, and FINDINGS OF FACT

Defendants Englewood and HMH both have hospitals in Bergen County, a densely populated county in northern New Jersey. Englewood operates a single hospital, while HMH has two in the county, including one that it owns with a non-party partner.

Hospitals provide inpatient and outpatient care. Outpatient care generally refers to a same-day medical service, whereas inpatient care requires an overnight stay. Tr. at 48:11.[5] The focus of this case is inpatient care, specifically inpatient GAC services. As to inpatient GAC services, the type of care is divided into four categories: primary, secondary, tertiary, and quaternary care. The categories reflect the level of complexity of care; primary care is the least complex and quaternary care is the most complex. On average, **[*8]** patients need primary and secondary care more frequently than the higher levels of tertiary and quaternary care. Tr. at 49:7-19. For example, delivery of a baby without complications is considered primary care. A C-section, by comparison, reflects secondary care. A baby born with medical complications requiring neonatal treatment receives tertiary care. Tr. at 49:23-9. Quaternary care includes complex procedures such organ transplants and high-end cancer care. Tr. at 73:23-25; 736:15-19. Hospitals that provide only primary and secondary care are often referred to as community hospitals (although some witnesses used community hospital to refer to an entity that also provided limited tertiary services). *See, e.g.*, Tr. at 46:24-47:6.

A. Healthcare Providers

The following hospitals and healthcare systems are relevant to the Court's analysis: (1) Englewood; (2) Hackensack University Medical Center; (3) Pascack Valley Medical Center; (4) Holy Name Medical Center; (5) Valley Hospital Medical Center; (6) Bergen New Bridge Medical Center; (7) Palisades Medical Center; (8) Mountainside Medical Center; (9) St. Joseph's Hospital (2 locations); (10) St. Mary's General Hospital; (11) RWJBarnabas Health; **[*9]** (12) Atlantic Health System; and (13) New York city hospitals, including New York Presbyterian, Hospital for Special Surgery, Mt. Sinai, and Memorial Sloan Kettering.

1. Bergen County Hospitals

Defendant Englewood is a high-quality, community teaching hospital in Bergen County. Englewood provides primary, secondary, and some tertiary care, including cardiac and cancer surgery programs. Tr. at 845:13-19, 24-25; 845:25-846:3; 865:12-13. Englewood is licensed for 531 beds and is currently able to operate 350. Englewood, however, frequently operates under its 350-bed capacity. For example, the day before Englewood's President &

---

[4] Plaintiff also sought to qualify Dr. Romano as an expert on capacity issues from the hospital operations perspective, including calculations of capacity or steps that a hospital could take to relieve capacity issues. Defendants challenged Dr. Romano's qualification regarding capacity issues, outside of the limited scope of how capacity challenges impact the quality of care. D.E. 264. Dr. Romano is a clinical practitioner. He does not have experience with healthcare system capacity constraints from the operational viewpoint. As a result, the Court grants Defendants' request to preclude Dr. Romano as an expert on operational capacity issues.

[5] Citations to "Tr." refer to the transcript from the seven-day evidentiary hearing in this matter.

Chief Executive Officer Warren Geller testified in this matter, Englewood's census was just 222 patients. Tr. at 847:20-848:16. As to payor mix, about half of Englewood's patients use government programs, such Medicare and Medicaid, while the other half have commercial insurance. Tr. at 849:14-18. Of the commercially insured patients, approximately 55% are Bergen County residents. The remaining 45% come from Hudson, Essex, Passaic, and Rockland counties, which all border Bergen County. Tr. at 850:2-6. About half of Englewood's revenue is generated from patients outside **[*10]** of Bergen County. Tr. at 851:3-5. Englewood's growth over the last several years has come from counties other than Bergen County. Tr. at 850:11-18.

Defendant HMH's flagship hospital, Hackensack University Medical Center ("HUMC"), is also located in Bergen County, approximately five miles from Englewood. HUMC is licensed for 781 beds and has 711 operational beds. Tr. at 1148:9-13. HUMC is the busiest hospital in New Jersey and more than 50% of HUMC's commercially insured patients come from outside of Bergen County. Tr. at 735:3-17; 783:10-14. HUMC is HMH's only hospital that performs complex tertiary and quaternary care, in addition to primary and secondary care. Tr. at 735:3-17. HUMC is considered an academic medical center. According to Robert C. Garrett, HMH's President & Chief Executive Officer, this means that in addition to providing complex tertiary and quaternary care, HUMC is focused on academics, research, and innovation. Tr. at 735:6-20. Nevertheless, there is a high overlap in the inpatient GAC services provided by HUMC and Englewood. [TEXT REDACTED BY THE COURT].

HUMC is currently adding a new tower to its hospital complex, which was described as a "modernization project" **[*11]** and was referred to during the hearing as the "Second Street" project. Tr. at 1150:23-1151:6. The Second Street project will (1) replace the currently 40-year-old operating room platform with larger operating rooms that can house equipment and technology used for complex tertiary and quaternary care; (2) convert existing medical-surgical ("med-surg") beds into private rooms; and (3) add twenty-two new intensive care unit ("ICU") beds. Tr. at 1151:6-18. HUMC started planning the Second Street project in 2012 and, at the time of the hearing, anticipated that it would be ready for partial occupancy in approximately 18 months. Tr. at 1151:21-25.

HMH also co-owns, with Ardent Health Services ("Ardent"), Pascack Valley Medical Center ("Pascack Valley"). Tr. at 769:6-9. Pascack Valley is the smallest acute care community hospital in Bergen County, providing primary and secondary care, Tr. at 57:12-19; 768:16-18, but not tertiary care. Tr. at 768:17-18.

Holy Name Medical Center ("Holy Name") is also in Bergen County. Tr. at 44:19-20. Holy Name is a Catholic sponsored community hospital that provides primary and secondary care services. Tr. at 47:2-6. At least 80% of Holy Name's inpatient admissions **[*12]** come from within Bergen County. Tr. at 52:18-21. Michael Maron, Holy Name's President & Chief Executive Officer, believes that this is because people want convenient, consistent care that is readily available. Tr. at 52:25-6. Englewood is approximately five miles northeast of Holy Name, and there is a significant overlap in the geographic range of patients that the two hospitals service. Tr. at 56:5-15. With the exception of Englewood's tertiary care offerings, the two hospitals offer virtually identical services and are roughly the same size. Tr. at 55:25-56:4; 57:17-18. HUMC is five miles west of Holy Name. Tr. at 57:4-5. Because of the overlap in services and location, Holy Name views Englewood and HUMC as its primary competitors. Tr. at 86:10-23; 87:19-25.

Valley Hospital Medical Center ("Valley") is another hospital in Bergen County. Valley is the second largest hospital in the county, and offers primary, secondary, and limited tertiary care. Tr. at 59:1-3. Valley Hospital is currently located in Ridgewood, New Jersey but is relocating to a new facility about two miles east, in Paramus, New Jersey. Tr. at 88:5-17. Valley's new location is a modernization project; [TEXT REDACTED **[*13]** BY THE COURT] Tr. at 88:13-14; 89:5-13. The project is nearing completion. The new construction will ultimately take Valley over five years to complete and is estimated to cost more than $750 million. Tr. at 449:13-23. Because of the location, Garrett believes that Valley's new hospital will make it a stronger competitor in the region. Tr. at 776:20-25.

Bergen New Bridge Medical Center ("New Bridge") is a government-run, county-owned hospital in Bergen County. New Bridge is predominately a long-term care facility for behavioral health but has a small acute care component that largely services its long-term care residents. Tr. at 59:20-60:3. New Bridge has a new management team that is investing in the facility and recently started to accept commercially insured patients. Tr. at 864:2-9.

2. Health Systems

As noted, HMH is the largest healthcare system in New Jersey. HMH was formed after Hackensack University Health Network and Meridian Health merged in 2016. Two additional large health systems play a significant role in the northern New Jersey marketplace, although neither has a hospital in Bergen County: RWJBarnabas Health ("RWJBH") and Atlantic Health System ("Atlantic"). RWJBH has numerous **[*14]** facilities throughout New Jersey, including Saint Barnabas Medical Center, an academic medical center in Essex County. Tr. at 1108:1-8. In 2017 and 2018, RWJBH was the market share leader within Bergen, Essex, Hudson, and Passaic Counties. DX3213-019.[6] According to Garrett, RWJBH is HMH's strongest competitor even though RWJBH does not have an inpatient hospital in Bergen County. Tr. at 774:23-12; 777:16-19. Atlantic has five hospitals: Morristown Medical Center and Chilton Medical Center, which are both in Morris County; Overlook Hospital in Union County; Newton Medical Center in Sussex County; and Hackettstown Medical Center in Warren County. Tr. at 434:1-10. Morristown Medical Center is also an academic medical center. Tr. at 1108:9-13. Although Atlantic does not have a hospital in Bergen County, it is affiliated with an urgent care facility in the county through a joint partnership. Tr. at 434:11-13; 436:17-437:7. [TEXT REDACTED BY THE COURT]

3. Non-Bergen County Hospitals

Turning to facilities outside of Bergen County, Palisades Medical Center ("Palisades") is in Hudson County, just south of the Bergen County line. Palisades is owned by HMH and provides primary and secondary care. **[*15]** Tr. at 768:16-18; 769:1-3. HMH also co-owns Mountainside Medical Center with Ardent. Tr. at 769:6-9. Mountainside is a community hospital in Essex County that provides primary and secondary care. Tr. at 768:16-18; 769:1-3. St. Joseph's Hospital and Medical Center is in Paterson, New Jersey and St. Joseph's Wayne Hospital is in Wayne, New Jersey. Wayne and Paterson are both in Passaic County, and both hospitals are within 10 miles of HUMC. Tr. at 775:17-25. St. Mary's General Hospital is an additional for-profit hospital in Passaic County. Tr. at 80:24-6.

Certain New York City hospitals are also relevant. New York Presbyterian, Hospital for Special Surgery ("HSS"), Mt. Sinai, and Memorial Sloan Kettering ("MSK") were mentioned most frequently during the hearing. Although no party denies that some New Jersey residents receive primary and secondary care at New York hospitals, the witnesses largely view these hospitals as providing high-end, specialty care (more complex tertiary and quaternary care) to New Jersey residents. Tr. at 73:20-74:5; [TEXT REDACTED BY THE COURT]; 397:1-10. As to outmigration - that is, New Jersey residents seeking medical care at a New York hospital, *see, e.g.* **[*16]** , Tr. at 767:10-11 - less than 30,000 New Jersey residents were discharged from a New York hospital in 2018. DX3601-16.

New York City hospitals are also establishing a physical presence in New Jersey, which the parties refer to as "front doors." MSK and HSS, for example, have outpatient facilities in Bergen County, and Mount Sinai has affiliations with Holy Name and Valley. Tr. at 779:20-780:13. Other New Jersey health systems, such as Atlantic, do the same. These outpatient facilities - the front doors - are intended to steer patients requiring inpatient care to an affiliated hospital. Tr. at 780:14-16; 780:21-25. The parties, however, failed to provide any evidence demonstrating that the outpatient facilities actually materially impact inpatient admissions.[7] In fact, [TEXT REDACTED BY THE COURT], stated that the number of patients that ultimately came to [TEXT REDACTED BY THE COURT] hospital for

---

[6] On June 1, 2021, Defendants provided the Court with their list of exhibits that they seek to move into evidence. D.E. 332. The FTC provided its list on June 7, 2021, D.E. 340, and Defendants provided a supplemental list on June 9, 2021. D.E. 344. The parties also set forth a limited list of objections to documents on the exhibit lists. D.E. 331, 332, 344. The Court addresses the objections to PX1061, the Optimization Plans, and the Waiver Letters below. Otherwise, the Court did not rely on any of the documents for which there remain objections so the objections are moot. Those exhibits without objections in D.E. 332, 340 and 344 are admitted into evidence.

[7] Of course, there could be at least one other rational business reason for establishing outpatient facilities without regard to inpatient admissions: they are independently profitable. The parties, however, did not address this point, so the Court does not speculate.

inpatient care after visiting one of its [TEXT REDACTED BY THE COURT] facilities accounted for [TEXT REDACTED BY THE COURT] of [TEXT REDACTED BY THE COURT] total inpatient admissions over a 1.5-year period. [TEXT REDACTED BY THE COURT]. With respect to the number of patients who were initially **[*17]** treated at the Bergen County [TEXT REDACTED BY THE COURT] facility and received subsequent inpatient or outpatient care at [TEXT REDACTED BY THE COURT] hospital, [TEXT REDACTED BY THE COURT] indicated that the number was [TEXT REDACTED BY THE COURT] to [TEXT REDACTED BY THE COURT] utilization strategy. [TEXT REDACTED BY THE COURT].

The parties also consider physician practice groups to be a driver of inpatient admissions. For example, Geller appeared to attribute Englewood's overall growth to its expanding physician network, the Englewood Health Physician Network. Englewood's physician network is "robust," encompassing over 500 physicians in five different counties. In fact, [TEXT REDACTED BY THE COURT] of Englewood's revenue comes from its outpatient services. Tr. at 872:4. Moreover, these 500 physicians, who are fully integrated into the Englewood network, funnel care to Englewood's hospital. Tr. at 852:11-14; 853:6-12; 1311:1-10. Dr. Stephen Brunnquell, President of the Englewood Health Physician Network, explained that the physician network is also a "front door" to the hospital. Tr. at 1309:18-1; 1313:4-5.

B. Insurance Companies & Plans

Private (or commercial) insurance companies **[*18]** play a major role in the United States' healthcare system and are the payors at issue here. Within New Jersey, the four major commercial insurance companies, from largest to smallest, are Horizon Blue Cross & Blue Shield of New Jersey ("Horizon"), UnitedHealthcare ("United"), Aetna, and Cigna. Tr. at 1024:6-10. Within the commercial insurance sphere, each insurance company offers fully insured and employer-sponsored (or self-insured) plans. For a self-insured product, the employer bears the financial responsibility for the medical expenses that are incurred on behalf of its covered employees, and the employer typically pays the insurance company a fee to administer the plan. Tr. at 151:13-22; 1104:16-22. For a fully insured plan, the insurance company bears the risk if the medical expenses exceed the premium paid by the employer. Tr. at 151:23-152:5.[8]

Medical providers and facilities contract with insurance companies to be in the plan's "network." If a provider goes "out of network," the provider is no longer a participating provider in that insurance company's product or plan. Tr. at 1038:14-21. Each insurance company witness spoke to the importance of a network, which includes physicians, **[*19]** other providers, facilities (including hospitals), and other services that are offered to plan users. Each insurance company witness also testified that a network is "an integral component of the products" offered by the company. *See, e.g.*, Tr. at 152:13-25. Of critical importance is a network with a full scope of services and providers that are well-dispersed geographically. *See, e.g.*, Tr. at 153:19-23; 156:19-25; 335:24-336:4 (explaining that Aetna wants a "big network presence" that does not have any "holes"). Individual members, and therefore plan purchasers, also want access to care that is geographically convenient.[9] *See, e.g.*, Tr. at 155:9-15. If an insurance company does not provide an attractive network, the insurance company will not be able to sell the plan. *See, e.g.*, Tr. at 154:16-19.

At the same time, healthcare providers and facilities want to be in-network because, among other things, it increases their volume of patients. *See, e.g.*, [TEXT REDACTED BY THE COURT]. Patrick Young, HMH's President of Population Health, explained that from HMH's perspective, it is not a benefit for a provider to go out of network (or become non-participating). Young testified that if HMH went **[*20]** out of network with an insurance

---

[8] When referring to commercial insurers herein, the Court does not distinguish between fully insured and self-insured plans, as the difference is immaterial to the Court's analysis.

[9] The Court notes that New Jersey has GeoAccess standards that apply to certain commercial and government plans. These standards generally require that an insurance company's network offers the requisite number of providers and facilities within a certain distance, time, and mileage of the insured population. Tr. at 330:2-10.

company, it would cause a significant financial hit for the organization due to lost revenue, and it would be disruptive to patients and physicians. Tr. at 1039:1-1040:4.

In New Jersey, insurance companies negotiate with health systems and hospitals on a statewide basis. This means that all of an insurer's plan members in New Jersey have access to in-network health systems' facilities and hospitals. At the same time, counties are important considerations for insurers in developing and selling a health plan. Bergen County is an important county because of its population size and affluence. FTC FOF ¶ 19. The relevant insurers have the following number of customers in Bergen County: United has approximately [TEXT REDACTED BY THE COURT] commercial members, Tr. at 161:13-15; Aetna has [TEXT REDACTED BY THE COURT] commercial members, Tr. at 341:9-11; and AmeriHealth has about 15,000 members, Tr. at 678:6-8. All insurers who testified indicated that they could not market a plan to Bergen County residents if the plan did not include a Bergen County hospital.

The Court heard a great deal of testimony about HMH's experience with commercial insurance companies, **[*21]** both from HMH's view and from the perspective of the insurance companies. HMH negotiates with commercial insurers "as a fully integrated network," that is, on a system-wide basis. Tr. at 1024:19-25. This means that HMH negotiates for a consistent (or the same) rate increase across all its facilities. The base rate of each facility, however, differs. Tr. at 1026:15-22. Accordingly, the actual rate charged by each specific HMH facility is not uniform across HMH's system although each facility's percentage rate increases are the same. In addition, the rates HUMC charges insurers for GAC services are substantially higher than the rates that Englewood charges. On an adjusted case-mix basis, [TEXT REDACTED BY THE COURT].[10] DX5001, ¶ 162.

The commercial insurance witnesses who testified in this matter largely described their negotiations with HMH as difficult. [TEXT REDACTED BY THE COURT], from [TEXT REDACTED BY THE COURT] believed that HMH's position during [TEXT REDACTED BY THE COURT] last negotiations with HMH in [TEXT REDACTED BY THE COURT] were "as close to take it or leave it as I've seen in the marketplace without much justification." [TEXT REDACTED BY THE COURT] further believed that **[*22]** HMH's most recent rate increases were [TEXT REDACTED BY THE COURT] than those of other health systems in New Jersey. [TEXT REDACTED BY THE COURT], explained that after [TEXT REDACTED BY THE COURT]'[TEXT REDACTED BY THE COURT] discussions for the [TEXT REDACTED BY THE COURT] contract with HMH hit a "stalemate," the final rates were only agreed to [TEXT REDACTED BY THE COURT]. In [TEXT REDACTED BY THE COURT] years with [TEXT REDACTED BY THE COURT] had never seen negotiations escalate in such a manner. [TEXT REDACTED BY THE COURT] stated that the ultimate rate was [TEXT REDACTED BY THE COURT] of what [TEXT REDACTED BY THE COURT] typically agrees to for similarly situated hospitals. [TEXT REDACTED BY THE COURT]

From HMH's perspective, Young stated that HMH never gets everything that it wants when negotiating with insurance companies and believes that the commercial insurance companies have significant leverage. Tr. at 1043:22-23; 1048:2-1050:2. Young also indicated that HMH never negotiates on a take-it-or-leave-it basis, Tr. at 1043:19-21, but an email provided by the FTC seems to suggest otherwise. PX1241. In the first paragraph of this email, which was sent by a HMH employee to [TEXT **[*23]** REDACTED BY THE COURT] on [TEXT REDACTED BY THE COURT], the HMH representative wrote: "[TEXT REDACTED BY THE COURT]." *Id.* [TEXT REDACTED BY THE COURT]" *Id.*

In addition to rates, the other sticking point in HMH's recent negotiations with private insurers involves language in certain contracts about rates after an HMH acquisition (the "Acquisition Clause"). The Acquisition Clauses predates HMH and appeared in legacy Meridian's contracts with certain commercial insurers. Through the Acquisition Clause, when HMH acquires an entity, the new facility moves to the same rates as HMH's similar facilities within a certain time frame. Tr. at [TEXT REDACTED BY THE COURT]; 1036:5-14. In other words, once HMH acquires a facility, that facility can charge insurers more than it used to, pursuant to the Acquisition Clause.

---

[10] The case-mix index is used to compare the level of care provided at different hospitals and facilities. The higher the case-mix index, the higher the overall acuity, or complexity of care, provided at the facility. *See* Tr. at 191:8-15; 397:6-10.

After the FTC filed its opening brief in this matter pointing to the Acquisition Clause, HMH informed insurers that it was waiving the Acquisition Clause for the Englewood merger. Young was not aware of [TEXT REDACTED BY THE COURT], [TEXT REDACTED BY THE COURT], [TEXT REDACTED BY THE COURT]. [TEXT REDACTED BY THE COURT]. The Acquisition Clause has had a substantial financial impact **[*24]** on [TEXT REDACTED BY THE COURT] After HMH acquired JFK University Medical Center, it cost [TEXT REDACTED BY THE COURT] more per year; after HMH acquired Raritan Bay Medical Center, it cost [TEXT REDACTED BY THE COURT] more per year. [TEXT REDACTED BY THE COURT] As a result, during the [TEXT REDACTED BY THE COURT] negotiations, [TEXT REDACTED BY THE COURT] asked [TEXT REDACTED BY THE COURT]. [TEXT REDACTED BY THE COURT] testified that HMH [TEXT REDACTED BY THE COURT] The Acquisition Clause was also a major sticking point with [TEXT REDACTED BY THE COURT] negotiations. [TEXT REDACTED BY THE COURT], however, had [TEXT REDACTED BY THE COURT]. [TEXT REDACTED BY THE COURT]. When HMH previously acquired the Carrier Clinic, HMH and [TEXT REDACTED BY THE COURT] could not agree as to whether [TEXT REDACTED BY THE COURT]. The classification impacted [TEXT REDACTED BY THE COURT]. As a result, HMH [TEXT REDACTED BY THE COURT]. Ultimately, HMH's acquisition cost [TEXT REDACTED BY THE COURT] and additional [TEXT REDACTED BY THE COURT]. [TEXT REDACTED BY THE COURT].

Horizon is the largest insurer in New Jersey and provides both commercial and government-sponsored plans. Horizon's commercial plans account **[*25]** for approximately 60 % of its business in New Jersey. Tr. at 1092:8-1093:5. Although numerous insurance companies have had challenges with HMH, Horizon did not voice the same concerns and supports the proposed merger. DX1101. In fact, after the HMH and Englewood merger was announced, Allen Karp, Horizon's Executive Vice President of Healthcare Management and Transformation, sent Young a letter indicating that Horizon supported the merger.[11] DX1101. Karp did so at the request of HMH. Tr. at 1133:12-15.

In the letter, Karp explained that the merger allows Englewood to "focus on tertiary care for residents of Bergen County" and provide Englewood's patients with access to coordinated quaternary care within the HMH system. DX1101. Karp also stated that HMH's ability to expand quaternary care would "have the added benefit of keeping care in New Jersey." *Id.* Karp does not believe that the merger would increase HMH's bargaining leverage with Horizon. Tr. at 1103:16-24. At the same time, [TEXT REDACTED BY THE COURT]. Tr. at 1116:19-22. In addition, Karp is not aware what tertiary care will be provided at Englewood post-merger, or how HMH intends to keep quaternary care patients in New Jersey after **[*26]** the merger. Tr. at 1128:12-1129:5.

The Court does not give Karp's letter much weight. It was written at the request of HMH and while long on superlatives, it is short on supporting information or analysis.

C. The Proposed Merger

In April 2018, Englewood's Executive Committee and Board's outside counsel retained a consultant, The Chartis Group ("Chartis"), to assist with Englewood's strategic planning. Geller explained that he [TEXT REDACTED BY THE COURT] Tr. at 871:15-18; 384:6-9. Geller continued that Englewood had and has [TEXT REDACTED BY THE COURT] but it would be [TEXT REDACTED BY THE COURT]. Tr. at 871:21-25. Englewood also had [TEXT REDACTED BY THE COURT], and wanted an [TEXT REDACTED BY THE COURT]. Tr. at 872:3-19.

---

[11] During the hearing, the FTC emphasized the fact that Horizon, HMH and RWJBH are co-owners of Braven Health, a new Medicare Advantage program. Tr. at 1131:12-1132:1; 1069:9-25. These entities share [TEXT REDACTED BY THE COURT] generated by Braven Health, with [TEXT REDACTED BY THE COURT]. Tr. at 1075:20-1076:1; 1131:21-23. This relationship creates an additional financial incentive for Horizon to keep patients at HMH's hospitals. The FTC also emphasized the fact that except for HSS, Horizon does not have any direct contracts with New York hospitals. Tr. at 1131:3-11. Again, this also creates a motive to support the merger that is unique to Horizon. Similarly, Defendants emphasized that Atlantic and United formed a competing physicians' practice group, which gives both United and Atlantic a motive to oppose the proposed merger. The Court ultimately gives the various relationships little weight as the evidence did not adequately establish how the insurers' motives resulted in slanted or biased testimony.

The Court also heard about Englewood's strategic planning process, which led to the proposed merger, from Sue Anderson, a Principal at Chartis. Tr. at 383:4-5. Chartis's work was divided into two phases; Anderson was highly involved in both. Tr. at 386:17-22.

In Phase I, Chartis looked at whether Englewood could achieve its strategic goals by itself or whether it needed a "stronger affiliation with another health system." Tr. at 386:23-387:3. Chartis presented its Phase **[*27]** I work to the Executive Committee in June 2018. PX2079. Chartis identified Englewood's key local competitors within Englewood's primary service area ("PSA")[12] : HMH accounted for 34% of inpatient discharges; Englewood for 15%; [TEXT REDACTED BY THE COURT]. No other New Jersey hospital in the region had a percentage of discharges larger than 7%. Tr. at 391:9-392-18; 06:14-16; PX2079-16. In addition, about 8% of patients in Englewood's PSA sought care at a New York facility but the outmigration was for relatively complex care. Tr. at 396:12-397:10.

At the time, Englewood and HMH had a limited relationship related to a Horizon narrow network insurance product.[13] PX2079-70. During its Phase I presentation, Chartis determined that the most likely future market scenario was that [TEXT REDACTED BY THE COURT]. Tr. at 389:9-399:10; PX2079-71-PX2079-72. Chartis identified other threats to Englewood's patient share, which included competition from New York health systems moving into the New Jersey arena (through "front doors") and the new capital projects at Valley and [TEXT REDACTED BY THE COURT] (*i.e.* Valley's new hospital and [TEXT REDACTED BY THE COURT]). PX2079-006. Ultimately, Chartis recommended **[*28]** that it would "be an opportune time for [Englewood] to explore [a] partnership opportunity, a strong affiliation." Tr. at 399:13-20. After Chartis presented its Phase I work, the Englewood Board [TEXT REDACTED BY THE COURT]. Tr. at 873:23-25.

In Phase II, Chartis helped Englewood find a partner. Chartis initially identified five potential partners: HMH; [TEXT REDACTED BY THE COURT]; [TEXT REDACTED BY THE COURT]; [TEXT REDACTED BY THE COURT]; and [TEXT REDACTED BY THE COURT]. Tr. at 399:22-400:12. Chartis met with all five, and Englewood representatives attended some of the meetings. Tr. at 400:13-15; 486:6-9.

Chartis also established a data room to enable Englewood and its potential partners to share information. Tr. at 401:10-16. When Englewood was first informed about the data room, Anderson suggested [TEXT REDACTED BY THE COURT] PX2311-002. Within the same email chain, an Englewood executive expressed concern over [TEXT REDACTED BY THE COURT] PX2311-001. Geller responded to this email with [TEXT REDACTED BY THE COURT] and then directed that the recipient have [TEXT REDACTED BY THE COURT]. *Id.*

During the hearing, however, HMH and Englewood downplayed the fact that they are competitors. **[*29]** *See, e.g.*, Tr. at 781:12-782:1 (Garrett explaining that HUMC only competes with academic medical centers in New Jersey and New York City); Tr. at 859:22-25 (Geller stating that Englewood does not compete with HUMC). HMH and Englewood's mantra during the proceeding was that they are complements rather than competitors. The email chain and other ordinary course documents discussed below, however, demonstrate otherwise. *See, e.g.*, PX2291-004 (in a Q&A document that Englewood drafted after the merger was announced, one of the questions was "For a long time, Hackensack has been a fierce but respected competitor. So how do we now become partners and colleagues?"). Accordingly, the Court finds that Englewood and HUMC do in fact compete for patients who receive the primary, secondary, and tertiary services provided at both hospitals and that they view themselves as competitors.

Chartis and certain Englewood Executive Committee members met with HMH representatives on November 26, 2018. After the meeting, Chartis compiled feedback that it had received from Englewood's representatives. Tr. at 487:11-16; PX2325. Comments included the following: "[TEXT REDACTED BY THE COURT]." PX2325 at 3.

---

[12] By way of reference, HUMC defines a primary service area as the geographic area where 75% of inpatient discharges originate. Tr. at 1158:18-21. Englewood provided Chartis with information about its PSA but Defendants did not provide any evidence explaining how Englewood determined its PSA.

[13] Generally, a narrow network insurance product offers members access to fewer providers than the insurance company's standard offering. Tr. at 241:9-24.

Anderson **[*30]** explained that there was concern that [TEXT REDACTED BY THE COURT]. Tr. at 489:16-21. Another Englewood attendee commented that "[[TEXT REDACTED BY THE COURT]." PX2325 at 3.

As Phase II continued, [TEXT REDACTED BY THE COURT] withdrew from consideration. Tr. at 512:23-25; 874:15-22. [TEXT REDACTED BY THE COURT] provided a formal bid to Englewood, but the Englewood Board voted in January 2019 not move forward with [TEXT REDACTED BY THE COURT]. Tr. at 512:7-18; 874:23-875:7. Geller stated that Englewood rejected [TEXT REDACTED BY THE COURT] offer because [TEXT REDACTED BY THE COURT]. Tr. at 875:9-24. [TEXT REDACTED BY THE COURT] testified that Englewood was concerned that [TEXT REDACTED BY THE COURT] was not [TEXT REDACTED BY THE COURT]. [TEXT REDACTED BY THE COURT]. Next, in February 2019, and Englewood mutually decided not to move forward, Tr. at 490:10-19; 513:1-5, leaving HMH and [TEXT REDACTED BY THE COURT] as the two remaining potential partners.

Turning to HMH, as it was developing its proposal to Englewood in February of 2019, James Blazer wrote an internal email addressing Chartis's follow-up questions to HMH. PX1061-001. Blazer is the Chief Strategy Officer at HMH and "one of **[*31]** the key [HMH] executives that was involved with the transaction." Tr. at 823:9-12. In the email, Blazer wrote that HMH wanted to [TEXT REDACTED BY THE COURT]. The email continued that Englewood "[TEXT REDACTED BY THE COURT]." *Id.* Five days later, Garrett sent by email, a letter to Chartis responding to Englewood's follow-up questions. PX1042.[14] Blazer was copied on the email, and the letter used a similar structure and language as that in Blazer's email. *Id.* Garrett began the letter by explaining that a partnership will allow HMH to build on its successes and offer more advanced care. Garrett wrote that "HMH is confident that we can sustain or more likely grow EH's current high volume and increase its case mix index." *Id.* But he then stated that "a formal partnership would allow [Englewood] *to continue* to reap the benefits of the Horizon Omnia contract, as well as the Medicare Shared Savings Plan." *Id.* (emphasis added). In other words, HMH approached the Englewood negotiation not only with a kind word (potential benefits to Englewood) but also a gun (a threat to ending the affiliation with HMH).

On March 28, 2019, Chartis presented the offers from HMH and [TEXT REDACTED BY THE COURT] **[*32]** to the Executive Committee. In comparing the two entities as potential partners, Chartis noted that a "pro" of choosing HMH is that it would "[TEXT REDACTED BY THE COURT]" PX6004-009. Relatedly, a "con" for [TEXT REDACTED BY THE COURT] was that a partnership with [TEXT REDACTED BY THE COURT] " *Id.* As a "con" for HMH, Chartis indicated that "[TEXT REDACTED BY THE COURT]." *Id.*

Next, in reviewing the differences for clinical services in the two bids, the HMH offer contained several specific numerical commitments regarding the number of transfers and patients that HMH would send to Englewood and outlined certain intended capital improvement projects. The [TEXT REDACTED BY THE COURT] offer did not provide the same level of detail. *Id.* at 004. Anderson, however, explained that Englewood wanted [TEXT REDACTED BY THE COURT] from HMH [TEXT REDACTED BY THE COURT]. Accordingly, Englewood explicitly asked Chartis to raise this issue with HMH. Anderson did not recall asking [TEXT REDACTED BY THE COURT] for a similar level of detail and did not believe that Englewood asked for such information from [TEXT REDACTED BY THE COURT]. Tr. at 516:22-517:15; 529:1-16. Anderson explained that if Englewood **[*33]** had wanted similar detailed plans from [TEXT REDACTED BY THE COURT],." Tr. at 516:6-15. Geller, however, testified that Englewood had Chartis [TEXT REDACTED BY THE COURT]. Tr. at 876:17-877:15; *but see* DX0103 (Englewood's "deal asks" which does not include any questions about [TEXT REDACTED BY THE COURT] at Englewood). The Court credits Anderson's recollection. She was the point person on the deal asks, and the [TEXT REDACTED BY

---

[14] The FTC introduced Blazer's email during its cross-examination of Garrett. Defendants objected to the email because Garrett was not copied on it. Tr. at 824:8-11. The FTC established that while Blazer was the point person for the merger transaction, Garrett had final sign-off. Tr. at 823:6-15; 824:14-21. Moreover, as noted, Garrett sent the letter to Chartis soon after the email. Given the timing of the two documents, the similarity in content, and Blazer and Garrett's roles, it is reasonable to infer that Garrett was aware of the contents of Blazer's email, PX1061, when Garrett wrote the letter. *See* *Egan v. Live Nation Worldwide, Inc., 764 F. App'x 204, 208-09 (3d Cir. 2019)* (explaining that the burden to authenticate a document under *Fed. R. Evid. 901* is "slight" and that a "party can meet its burden by making 'a prima facie showing of some competent evidence to support authentication'" (quoting *United States v. Turner, 718 F.3d 226, 232 (3d Cir. 2013)*)).

THE COURT] requested from HMH is consistent with [TEXT REDACTED BY THE COURT]. No such similar concerns were raised as to [TEXT REDACTED BY THE COURT].

Finally, [TEXT REDACTED BY THE COURT] intended to provide [TEXT REDACTED BY THE COURT] million in "fresh" capital within the [TEXT REDACTED BY THE COURT], with a total capital contribution of [TEXT REDACTED BY THE COURT] million over [TEXT REDACTED BY THE COURT]. HMH intended to provide [TEXT REDACTED BY THE COURT] in "fresh" capital, with a total capital contribution of [TEXT REDACTED BY THE COURT] over an [TEXT REDACTED BY THE COURT]. PX6004-006. Geller stated that on paper, the [TEXT REDACTED BY THE COURT] offer looked significant but that after the Board studied the offers, it determined that the HMH offer **[*34]** was better. With the [TEXT REDACTED BY THE COURT] offer, money that the Englewood Foundation[15] raised would decrease [TEXT REDACTED BY THE COURT]s contribution and [TEXT REDACTED BY THE COURT] that would boost Englewood's bottom line and balance sheet. Tr. at 882:11-883:10. But again, it appears that [TEXT REDACTED BY THE COURT] did not give [TEXT REDACTED BY THE COURT] because Englewood did not ask. As for the HMH offer, Geller explained that Garrett gave his commitment that [TEXT REDACTED BY THE COURT] and that this was ultimately put into the final agreement. Tr. at 883:11-884:-2.

Once Englewood chose HMH as its partner, the parties negotiated the precise terms of the merger. On September 23, 2019, HMH and Englewood entered into the Definitive Agreement (the "Agreement"), under which HMH will become the sole member and ultimate parent of Englewood. DX3800. The Agreement sets forth numerous specific commitments and provides a level of detail that is not typically seen in a merger agreement. Tr. at 744:15-18.

The Agreement states that Englewood "will play a critical role as a tertiary hub in the HMH Northern Region." DX3800, § 3.1. HMH agreed that Englewood would continue as a separate **[*35]** legal entity for at least 10 years with its own board of trustees. *Id.* HMH also agreed to provide Englewood with a $404,500,000 capital investment for specified projects (with 60% coming in the first 4 years) and $5,000,000 in operating funds per year for seven years, beginning three years after the closing date. *Id.*, § 3.5.2.

During the hearing, Defendants pointed to Exhibit C to the Agreement, entitled "Clinical Initiatives," as evidence of firm commitments that HMH was making to Englewood. *Id.*, Ex. C. There are 27 total commitments, but numbers 20-27 are "operational commitments" which require HMH to use its "best efforts" and to which the Englewood Trust[16] has no "right to enforce[.]" *Id.* Moreover, closer inspection of the first 19 "firm commitments" reveals that they, for the most part, do not promise much except to explore, assess, or collaborate on different issues, or make "regional" improvements. *Id.* There are, however, a few firm commitments: Englewood will become part of HMH's regional transfer center; Englewood will get a new robot; HMH [TEXT REDACTED BY THE COURT] at Englewood; and HMH's capital commitment will be earmarked for certain projects. *Id.* The non-enforceable operational **[*36]** commitments (20-27) address, among other things, actual increases in patient volume ([TEXT REDACTED BY THE COURT]). *Id.*

While Defendants touted increased inpatient admissions at Englewood as a result of the merger, the Agreement also contemplates the opposite effect. If Englewood's volume in certain service lines [TEXT REDACTED BY THE COURT], then Englewood's "Trust Board" has some limited remedies. *Id.*, §§ 3.2.1, 3.2.3. After a number of cumbersome steps and arbitration, the Trust Board can only require HMH to engage a healthcare consultant to develop a "further revised Action Plan" that has to be approved by the post-closing boards. *Id.* And if that revised plan is not properly implemented, then the Trust Board can return to arbitration after a meet-and-confer period. *Id.*

Garrett explained that with the merger, HMH plans to "optimize services between the two organizations" and convert Englewood to its tertiary hub in the northern New Jersey region. Tr. at 743:2-8. This conversion will alleviate "significant capacity issues at HUMC," and allow HMH to expand HUMC as a quaternary academic medical center

---

[15] The Foundation is the philanthropic arm for Englewood Health. *See* About Us, Englewood Health Foundation, https://www.englewoodhealthfoundation.org/about-us/.

[16] The Englewood Trust is an entity that will be formed when the merger is consummated to enforce certain terms of the Agreement on Englewood's behalf. DX3800, at 1.

that provides the highest level of care in New Jersey. Tr. at 743:15-20; *see also* **[*37]** 763:3-9. Garrett further explained that there are specific commitments in the Agreement because "they're the basis of how we're going to transform care" and are the basis of the "optimization of services." Tr. at 743:25-744:5. According to Garrett, these commitments are "the centerpiece" of the merger so it was "important to put it right in the definitive agreement." Tr. at 745:12-14.[17]

After the Agreement was signed, Englewood and HMH formed multiple committees, which were overseen by the Steering Committee, to create a plan to implement the Exhibit C commitments upon consummation of the merger. Tr. at 1315:17-22. Garrett stated that the Steering Committee "met regularly" after the Agreement was signed but acknowledged that there was a "significant pause" due to the COVID-19 pandemic because "people's attentions were 100 percent dedicated to taking care of COVID patients." Tr. at 795:14-21. Mark D. Sparta, the President and Chief Hospital Executive at HUMC, believed that between March 2020 and March 2021, the surgical, physician and cardiac integration teams "[TEXT REDACTED BY THE COURT]" [TEXT REDACTED BY THE COURT]. Tr. at 1172:24-25. Dr. Brunnquell, President of the Englewood Health **[*38]** Physician Network, testified that as of October 2020, the clinical teams had stopped meeting, but the Steering Committee continued to do so. Tr. at 1329:8-19. Dr. Brunnquell also indicated that much of the planning work was suspended because the committees had done as much as they could do prior to the actual closing of the deal. Tr. at 1328:18-1329:4.

The initial work product from the Steering Committee was the first draft of the "HMH-Englewood Health Service Optimization Framework" (the "Optimization Plan"), dated February 26, 2021. Tr. at 794:9-10. A second draft was produced shortly thereafter. The most recent Optimization Plan is dated March 31, 2021. DX3601. By the time this document was produced, not only had discovery been underway in this matter, but several key witnesses had already been deposed. The Optimization Plan discusses "persistent capacity constraints" at HUMC that HMH cannot address without a merger with Englewood. DX3601-006, 007. Of course, the parties had already agreed to the merger in September 2019 so this after-the-fact justification is, at best, odd. For the reasons stated in the Analysis section below, the Court gives the Optimization Plan little weight. **[*39]** Nevertheless, the Court reviews below some of the statements in the Optimization Report in light of other evidence.

Sparta discussed the capacity challenges at HUMC. Sparta explained that the long-standing capacity problems stem from a shortage of med-surg beds in the facility, which are general adult hospital beds. This causes backups in the emergency department, operating rooms, and the intensive care unit, as patients in these department are typically moved to med-surg beds for continued care. Tr. at 1143:2-15; 1143:24-16; 1145:9-10; 1145:6-10. The average occupancy of med-surg beds at HUMC ranges between 90 to 94% of HUMC's actual capacity over the last four years. Tr. at 1144:19-22. The industry standard for hospital occupancy is 85%. Tr. at 1186:16-18.

Critically, HMH does not point to any ordinary course documents discussing HUMC's capacity challenges before Englewood sought a merger. Englewood, not HMH, initiated the process to achieve its strategic goals. Moreover, others in the industry were not aware of any severe capacity issues — HUMC never declined transfers and has not gone on divert in several years. *See, e.g.*, Tr. at 90:10-22 (Maron stating that he was not aware of capacity **[*40]** issues at HUMC, that HUMC had never turned away a transfer from Holy Name, and that he did not believe that HUMC's emergency department has gone on divert in the last eight or ten years); [TEXT REDACTED BY THE COURT] ([TEXT REDACTED BY THE COURT] explaining that [TEXT REDACTED BY THE COURT] was not aware of any severe capacity issues at HUMC and would have expected to hear about it if that were the case); Tr. at 1127:10-22 (Karp stating that he was not aware of any severe capacity issues at HUMC and that because of his position he would have expected that he would have known of such a problem).

The Optimization Plan states that in order to alleviate the capacity problems at HUMC, HMH plans to shift and redirect certain tertiary care from HUMC to Englewood. HMH plans to redirect non-complex tertiary cases to Englewood as soon as the merger is finalized and has identified a number of cases that can annually be redirected from HMH's other hospitals in the region, including HUMC. DX3601-011. While HUMC plans to transfer cases to

[17] [TEXT REDACTED BY THE COURT], the testimony of Anderson from Chartis suggested that [TEXT REDACTED BY THE COURT] was due to [TEXT REDACTED BY THE COURT]. PX6004-006.

Englewood on the first day that the merger becomes effective, HUMC does not currently do so because Englewood is a competitor and Englewood would lose the revenues **[*41]** of the transferred case. PX7004-189—PX7004-190. Although there is no legal impediment to such transfers,[18] HUMC has a legitimate business reason for not doing so. At the same time, the fact that such legitimate financial considerations are dispositive undercuts other claims by Defendants, such as Garrett's indication that HMH's strategy is "New Jersey First," that is, to improve healthcare for New Jersey residents, as Defendants indicated that capacity constraints can have a deleterious impact on care. Tr. at 768:4-9. If HMH's primary concern was New Jersey first, it seems that it would currently transfer patients away from HUMC to alleviate its capacity constraints.

In addition, several witnesses called into question the number of patients that HMH could transfer on its own accord. For example, Sparta explained that about 70% of HUMC's medical staff are not HUMC employees, so HUMC cannot control where the non-staff physicians admit their patients. Tr. at 1147:22-1148:6; *see also* Tr. at 123:22-124:7 (Maron explaining that hospitals do not refer patients to hospitals, physicians do). In addition, when HMH first started looking into the specific number of patients that it could commit to **[*42]** transferring to Englewood, Sparta stated in a March 24, 2019 email that "[[TEXT REDACTED BY THE COURT]." [TEXT REDACTED BY THE COURT]. At the hearing, Sparta explained that after he sent the email, HMH [TEXT REDACTED BY THE COURT]. Tr. at 1178:8-18. But notably, Sparta did not [TEXT REDACTED BY THE COURT] in his email. Finally, Defendants' expert witness in hospital operations, capacity, and strategic planning, Kevin C. "Casey" Nolan, also stated that because 80% of the physicians on staff at HUMC are independent, "it's very difficult for HUMC to dictate to them where they want to admit their patients." Tr. at 1215:10-17. Nolan acknowledged that "transfers, frankly, are a last resort." Tr. at 1215:16-17.

In addition, the Optimization Plan notes that annually, 50 NICU patients will be redirected from HUMC to Englewood. DX3601-011. But again, other testimony undercuts this representation. Geller conceded that Englewood needs a new, updated NICU to alleviate space and noise issues. Tr. at 915:10-20. And Brunnquell stated that Englewood's NICU is "an older unit" that "would not meet the current code." Tr. at 1321:7-9. Finally, Nolan explained that "[m]oms can and do shop for their physician **[*43]** and the hospital they want to deliver at and they've chosen HUMC, so the ability to transfer those patients is probably not very high." Tr. at 1215:1-4.

The Optimization Plan also states that the Second Street project (referred to as the "Helena Theurer Pavilion") "will not alleviate HUMC's capacity challenges." DX3601-008. Nevertheless, the construction project expands HUMC's existing footprint. The project will result in [TEXT REDACTED BY THE COURT] new operating rooms, and HUMC plans to [TEXT REDACTED BY THE COURT] operating rooms. Tr. at 1173:25-1174:9. The new tower will also have [TEXT REDACTED BY THE COURT] new ICU beds, and HUMC plans to [TEXT REDACTED BY THE COURT] of its existing ICU beds. Tr. at 1175:9-14. In addition, the tower will have space for [TEXT REDACTED BY THE COURT] additional ICU beds that can be added if the need arises. Tr. at 1175:15-18. Finally, the new tower will have [TEXT REDACTED BY THE COURT] new private med-surg beds, and HMH plans to [TEXT REDACTED BY THE COURT]. HUMC's plan to [TEXT REDACTED BY THE COURT] cuts against its capacity claims, as does the fact that it is not currently [TEXT REDACTED BY THE COURT].

Finally, Defendants tout the cost savings **[*44]** that will result from this merger. Neither the Steering Committee, nor HMH or Englewood independently did any work, outside of this litigation, to assess the cost savings that may be incurred by transferring patients to Englewood after the merger. Tr. at 796:19-25. Defendants also state that their plan to optimize care between the two hospitals will reduce the need for patients to seek services at the more expensive New York hospitals. Tr. at 766:4-21; DX3601-016.

As to cost savings from the merger, Defendants largely rely the testimony of Lisa Ahern, Defendants' expert witness on cost savings and efficiencies for healthcare provider transactions. Ahern identified eleven categories of cost saving categories that she anticipates will result from the merger. The first eight categories address cost savings caused by corporate restructuring, such as reducing staffing redundancies and streamlining the supply chain

[18] There was no evidence that HUMC or HMH would face perilous economic consequences if it transferred those case to Englewood.

between the two entities. Ahern referred to the remaining three categories as "ancillary services," and these are more patient "facing." Tr. at 1385:22-1386:10. Ahern opined that by four years after the merger closes, there will be $38 million in annual recurring efficiencies. **[*45]** Tr. at 1386:23-1387:2. Critically, however, Ahern failed to conduct any analysis as to what percentage of the identified cost savings would be passed on to commercial insurers. Tr. at 1402:16-18. Similarly, HMH has a history of mergers and acquisitions. The corporate restructuring cost savings should, to some degree, result from any merger or acquisition. But HMH failed to present any evidence of its historical performance as to the relevant cost savings being passed on to commercial insurers.

One final note, no party disputed that HMH, as a large health system, and HUMC, as a large academic center, are more desirable to insurers than Englewood. This fact is reflected in the large price differential for services between HUMC and Englewood; in other words, Englewood is not nearly as important to an insurer as HUMC. [TEXT REDACTED BY THE COURT].

The extensive expert testimony from economists is discussed below.

III. PROCEDURAL HISTORY

After HMH and Englewood entered into the Agreement, the FTC filed an administrative complaint against HMH and Englewood. Through the administrative complaint, the FTC alleges that if consummated, the proposed merger violates *Section 7 of the Clayton Act, 15 U.S.C. § 18*, and *Section 5 of the Federal Trade Commission Act ("FTC") Act, 15 U.S.C. § 45* **[*46]** . On December 3, 2020, five FTC Commissioners voted unanimously to authorize FTC staff "to obtain preliminary injunctive relief under *Section 13(b) of the FTC Act*." Plf. FOF ¶ 4. The FTC filed its Complaint in this matter the following day, December 4, 2020, seeking a temporary restraining order and preliminary injunction that enjoins the merger. D.E. 1. The same day, the parties entered into a stipulated temporary restraining order, through which HMH and Englewood agreed that they would not consummate the proposed merger until after the Court rules on the FTC's motion for a preliminary injunction. D.E. 4. Then, on March 22, 2021, pursuant to the parties' case management order, the FTC filed its motion for a preliminary injunction, which sought to preserve the status quo pending a full administrative proceeding on the merits. D.E. 133. From May 10 through May 19, 2021, the Court conducted an evidentiary hearing on the FTC's motion for a preliminary injunction and heard closing arguments on June 2, 2021.

IV. LEGAL STANDARD

Pursuant to *Section 13 of the FTC Act*, the FTC can file suit in district court seeking a preliminary injunction "to prevent a merger pending a FTC **[*47]** administrative adjudication '[w]henever the Commission has reason to believe that a corporation is violating, or is about to violate, *Section 7* of the Clayton Act.'" *FTC v. Penn State Hershey Med. Ctr., 838 F.3d 327, 337 (3d Cir. 2016)* (quoting *FTC v. H.J. Heinz Co., 246 F.3d 708, 714, 345 U.S. App. D.C. 364 (D.C. Cir. 2001)*). The standard for granting a preliminary injunction under the FTC Act is not the same as the standard used to grant injunctive relief under *Federal Rule of Civil Procedure 65*. Rather, a court should issue a preliminary injunction pursuant to *Section 13* "[u]pon a proper showing that, weighing the equities and considering the Commission's likelihood of ultimate success, such action would be in the public interest." *15 U.S.C. § 53(b)*.

Under *Section 13(b)*, a court first considers the FTC's likelihood of success on the merits. *Penn State Hershey Med. Ctr., 838 F.3d at 337*. Next, the court weighs the equities to determine whether a preliminary injunction is in the public interest. "The question is whether the harm that the [Defendants] will suffer if the merger is delayed will, in turn, harm the public more than if the injunction is not issued." *Id. at 352*. Ultimately, in deciding whether to preliminarily enjoin a merger "doubts are to be resolved against the transaction." *Id. at 337*.

The FTC must show that it has a likelihood of success of demonstrating, during the administrative proceeding, that the proposed merger violates *Section 7* of the Clayton Act. **[*48]** *Id. at 337*. *Section 7* prohibits mergers where the effect "*may* be substantially to lessen competition, or tend to create a monopoly." 15 U.S.C. § 18 (emphasis added). The definition of antitrust liability under Section 7 is "relatively expansive" as the language deals in "probabilities, not certainties." Penn State Hershey Med. Ctr., 838 F.3d at 337 (quoting Brown Shoe Co. v. United States, 370 U.S. 294, 323, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)). "To stop a merger, a Section 7 plaintiff ultimately must show that a 'substantial lessening of competition' is 'sufficiently probable and imminent.'" FTC v. Thomas Jefferson Univ., 505 F. Supp. 3d 522, 537 (E.D. Pa. 2020) (quoting United States v. Marine Bancorporation, Inc., 418 U.S. 602, 622, 623 n.22, 94 S. Ct. 2856, 41 L. Ed. 2d 978 (1974)). Thus, at the preliminary injunction stage, the FTC does not need to establish that the proposed merger violates Section 7. Rather, the FTC "need only show that there is a reasonable probability that the challenged transaction will substantially impair competition." FTC v. Sysco Corp., 113 F. Supp. 3d 1, 22 (D.D.C. 2015) (quoting FTC v. Staples, Inc., 970 F. Supp. 1066, 1072 (D.D.C. 1997)).

Courts use a burden-shifting framework to determine whether a merger is likely to harm competition pursuant to Section 7. The FTC must first establish a *prima facie* case by demonstrating that the merger is anticompetitive. Penn State Hershey Med. Ctr., 838 F.3d at 337. If the FTC establishes its *prima facie* case, "it creates a presumption in favor of preliminary relief." Thomas Jefferson Univ., 505 F. Supp. 3d at 538. Next, to rebut the presumption, a defendant must show "either that the combination would not have anticompetitive effects or that the extraordinary effects of the merger will be offset **[*49]** by extraordinary efficiencies resulting from the merger." Penn State Hershey Med. Ctr., 838 F.3d at 337. If the defendant successfully rebuts the *prima facie* case, "the burden of production shifts back to the Government and merges with the ultimate burden of persuasion, which is incumbent upon the Government at all times." Id. at 337 (internal quotation omitted).

V. ANALYSIS & CONCLUSIONS OF LAW

A. Likelihood of Success

1. *Prima Facie* Case

To establish a *prima facie* case, the FTC must "(1) propose the proper relevant market and (2) show that the effect of the merger in that market is likely to be anticompetitive." Id. at 337-38.

a. Relevant Market

The relevant market includes two components: the product market and the geographic market. Id. at 338. Appropriate market definitions are "'critical' because a proposed merger's legality 'almost always depends upon the market power of the parties involved.'" Thomas Jefferson, 505 F. Supp. 3d at 539 (quoting FTC v. Cardinal Health, Inc., 12 F. Supp. 2d 34, 45 (D.D.C. 1998)). Thus, defining the proper relevant market is a fact-specific analysis. Here, the FTC defines the relevant product market as the cluster of inpatient GAC services offered by Englewood and HMH's Bergen County hospitals and sold to commercial insurers.[19] FTC FOF ¶¶ 13-16. Dr. Dafny, the FTC 's expert in healthcare and antitrust economics, explained that (1) 97% **[*50]** of patient admissions at both HUMC and Englewood are for overlapping services, and that (2) 85% of the service lines offered at HUMC or Pascack Valley are offered at Englewood, while 99% of Englewood's service lines are offered at HUMC or Pascack Valley. Tr. at 556:15-21. Defendants do not meaningfully challenge the relevant product market as defined by the FTC. Accordingly, the Court adopts the FTC. 's proposed relevant market, and focuses on the geographic market.

---

[19] Although specific inpatient GAC services are not interchangeable, courts and parties look at these services together as a "cluster" when the competitive conditions are reasonably similar across services. *See* ProMedica Health Sys., Inc. v. FTC, 749 F.3d 559, 565-66 (6th Cir. 2014); *see also* Penn State Hershey Med. Ctr., 838 F.3d at 338 (defining relevant product market at general acute care services sold to commercial payors).

"The relevant geographic market 'is that area in which a potential buyer may rationally look for the goods or services he seeks.'" Penn State Hershey Med. Ctr., 838 F.3d at 338 (Gordon v. Lewistown Hosp., 423 F.3d 184, 212 (3d Cir. 2005)). Moreover, the identified relevant market "is dependent on the special characteristics of the industry involved[.]" Thomas Jefferson, 505 F. Supp. 3d at 539 (internal quotations omitted). Courts and the FTC frequently use the hypothetical monopolist test ("HMT") to determine the relevant geographic market. Defendants do not challenge the FTC 's use of the HMT, instead they challenge the FTC 's application of the test. Specifically, Defendants contend that the FTC 's geographic market does not comport with commercial realities or the *Horizontal Merger Guidelines* (the "*Merger Guidelines*").[20]

An HMT **[*51]** analysis starts by selecting a narrow candidate market. Then,

> if a hypothetical monopolist could impose a small but significant non-transitory increase in price ("SSNIP") in the proposed market, the market is properly defined. If, however, consumers would respond to a SSNIP by purchasing the product from outside the proposed market, thereby making the SSNIP unprofitable, the proposed market definition is too narrow.

Penn State Hershey Med. Ctr., 838 F.3d at 338 (internal quotations omitted). A "SSNIP is typically about 5%." Penn State Hershey Med. Ctr., 838 F.3d at 338 n.1 (quoting *Merger Guidelines*, § 4.1.2). A relevant geographic market should not be broadly defined, and the HMT "is designed to ensure that candidate markets are not overly narrow." *Merger Guidelines*, § 4.

The healthcare industry is unique in antitrust cases because patients, the direct users of inpatient GAC services, do not pay hospitals for the services (with the exception of co-pays or other similar charges). Rather, "the healthcare market is represented by a two-stage model of competition." Penn State Hershey Med. Ctr., 838 F.3d at 342. At the first stage, medical providers, including hospitals, compete to be included in an insurance plan's hospital network. At the second stage, medical providers compete to attract individual members of an insurer's **[*52]** plan. Id. at 342; *see also* FTC FOF ¶ 5; Tr. at 935:13-25. Competition at the second stage involves non-monetary factors like quality and reputation. Tr. at 550:16-551:1. Moreover, "[p]atients are largely insensitive to healthcare prices because they utilize insurance, which covers the majority of their healthcare costs." Penn State Hershey Med. Ctr., 838 F.3d at 342. Accordingly, the Third Circuit has instructed that courts must focus their analysis on insurers, who are the actual payors. Id. The Circuit has recognized, however, that "[p]atients are relevant to the analysis, especially to the extent that their behavior affects the relative bargaining positions of insurers and hospitals as they negotiate rates." *Id.*; *see also* Tr. at 555:2-6 (Dafny explaining that patient preferences influence insurers' decisions when forming their networks). In other words, the first stage is not independent from the second stage as patients (insureds) influence decisions at the first stage. With this in mind, the Court focuses its attention on the first stage, with the understanding that the two stages cannot be completely divorced from each other. And, as noted, the Court is only focused on private (or commercial insurance) companies rather than government **[*53]** payors.

Here, Dr. Dafny explained that her candidate market is commercially insured patients in Bergen County. Tr. at 557:15-17. This means that any hospital that serves a resident of Bergen County is included as a market participant even if that hospital is not located in Bergen County. Tr. at 558:17-22. Dr. Dafny chose Bergen County as her candidate market for three principal reasons: (1) Englewood and HUMC are both located in Bergen County; (2) the vast majority of Bergen County residents receive care in Bergen County; and (3) Bergen County is an economically significant area for insurers. Tr. at 557:19-558:13.

The commercial insurers, including Horizon, testified that they cannot offer a marketable plan in Bergen County that does not include a Bergen County hospital. *See, e.g.*, Tr. at 165:19-22 (Nielsen testifying that United could not sell a marketable plan to Bergen County residents that did not include any Bergen County hospitals); Tr. at 339:14-23 (as to whether Aetna could sell a network without a Bergen County hospital, Wengel explained that "if you live and reside in a county and you don't have a hospital but maybe the competitor does, I think you'll lose those cases

[20] The *Merger Guidelines* are issued by the U.S. Department of Justice's Antitrust Division and the FTC. Although the *Guidelines* are not binding on this Court, "they are often used as persuasive authority." Penn State Hershey Med. Ctr., 838 F.3d at 338 n.2 (quoting Saint Alphonsus Med. Ctr.-Nampa Inc. v. Saint Lukes Health Sys., Ltd., 778 F.3d 775, 784 n.9 (9th Cir. 2015)).

nine **[*54]** times out of ten"); Tr. at 1119:22-1120:5 (Karp stating that he did not think Horizon could market a plan to residents and employers of Bergen County that did not have a Bergen County hospital). Consequently, these insurers would be forced to accept a SSNIP from a hypothetical monopolist of all Bergen County hospitals to continue competing in the county. This is even reflected in the insurers' testimony. *See* [TEXT REDACTED BY THE COURT] (explaining that [TEXT REDACTED BY THE COURT] would likely be forced to accept a reasonable price increase imposed by all hospitals serving Bergen County); Tr. at 1119:22-1120:10 (explaining that if all Bergen County hospitals increased rates a reasonable amount, Horizon would continue to sell plans in Bergen County provided that the increase was reasonable and fit within Horizon's budget). Accordingly, the Court finds that the FTC has sufficiently established that its proposed geographic market of Bergen County satisfies the HMT. FTC FOF ¶ 66.

Dr. Dafny performed a willingness to pay ("WTP") analysis to empirically test her conclusion that Bergen County satisfies the HMT. As Dafny explained, a WTP analysis provides numbers that serve to confirm that **[*55]** the candidate market, here Bergen County, satisfies the HMT. Tr. at 563:11-564:11. The WTP analysis examines the negotiating leverage that a hypothetical monopolist of Bergen County hospitals would have as to insurers. In performing the analysis, Dafny used a subset of hospitals that serve Bergen County residents, and her analysis showed a substantial increase in willingness to pay. Tr. at 563:11-564:15. Specifically, Dafny assumed that the hypothetical monopolist owned all hospitals in Bergen County, a subset of her candidate market (all hospitals that serve Bergen County residents). And her analysis indicated that an insurer's willingness to pay for a hypothetic monopolist of this subset increased by 65% when compared with the hospitals independently. As a result, Dafny believed that her geographic market satisfies the HMT. Tr. at 564:4:15. Dr. Dafny also performed a second WTP analysis that considered Bergen County hospitals vis-à-vis patients from Bergen County and its three surrounding counties. The WTP for this market is 49%, which is also more than a SSNIP. Tr. at 1511:17-1512:7.

Defendants challenge the FTC's proposed geographic market on several grounds. Defendants first maintain **[*56]** that the FTC fails to establish a relevant geographic market because it used customers, rather than suppliers, to define the area but failed to establish price discrimination. Defs. COL ¶ 8-13. Defendants rely on the *Merger Guidelines*, which provide as follows:

> In the absence of price discrimination based on customer location, the [FTC] normally define[s] geographic markets based on the locations of suppliers . . . . In other cases, notably if price discrimination based on customer location is feasible . . . the [FTC] *may* define geographic markets based on the location of customers.

Merger Guidelines, § 4.2 (emphasis added). Defendants contend that as a result, the FTC must establish price discrimination as a matter of law to support its proposed geographic market here.

Although often used as persuasive authority, the *Merger Guidelines* are not binding. *Penn State Hershey Med. Ctr., 838 F.3d at 338 n.2*. Moreover, Section 4.2 of the *Guidelines* does not use mandatory language. Consequently, price discrimination is not required as a matter of law. Importantly, the FTC has successfully used a patient-based market without evidence of price discrimination. *See, e.g.*, *St. Alphonsus Med. Ctr. - Nampa, Inc. v. St. Luke's Health Sys., Ltd., No. 12-560, 2014 U.S. Dist. LEXIS 182869, 2014 WL 4074466, at *7-8 (D. Idaho Jan. 24, 2014)*, *aff'd* *778 F.3d 775, 784-85 (9th Cir. 2015)*. The Court concludes that the lack of price discrimination here **[*57]** does not doom Bergen County as the relevant geographic market.

Defendants next contend that the FTC's geographic market does not reflect commercial realities. Defendants maintain that Bergen County is an arbitrary "political" boundary that plays no meaningful role in the first stage of hospital competition. Defs. COL ¶ 8. The Court would agree if a political boundary (such as a municipality, county, or state) were not otherwise supported by evidence. But here, the FTChas provided sufficient evidence to support a geographic market of Bergen County. Indeed, numerous courts have defined a relevant geographic market by county or other "political" boundary. *See, e.g.*, *Penn State Hershey Med. Ctr., 838 F.3d at 342* (concluding that the FTC "met its burden to properly define the relevant geographic market" as "the four-county Harrisburg area"); *Saint Alphonsus Med. Ctr.-Nampa Inc., 778 F.3d at 781, 84* (stating that district court did not err in finding that *one city* in Idaho was the relevant geographic market); *ProMedica Health Sys., Inc. v. FTC, 749 F.3d 559, 565 (6th Cir. 2014)* (stating that there was no dispute that a *single county* was the relevant geographic market).

As noted, the critical inquiry is whether adequate evidence supports the FTC's proposed market. Here, the evidence reflects that commercial insurers treat Bergen County as a significant target **[*58]** within the larger New Jersey market. This was illustrated by testimony from representatives of United, Aetna, AmeriHealth, and Horizon. For example, Nielsen testified that when United looks at whether its plans are attractive to its members, it reviews coverage at a state-wide level but also "drills that down to the county level" to ensure that the plan is attractive to the specific county's members. Tr. at 161:20-23; *see also* Tr. at 180:2-6 (referring to Bergen County as a "[TEXT REDACTED BY THE COURT]"). In addition, AmeriHealth tracks its membership and sales in Bergen County and has specifically tried to grow its membership within the county. Tr. at 682:15-22; Tr. at 683:11-13. Ken Kobylowski, Senior Vice President for Provider Contracting & Network Operations for AmeriHealth testified that as AmeriHealth is trying to expand its business, Bergen County is an attractive market because it is such a densely populated county. Tr. at 683:11-18. Even Horizon, who supports the merger, conceded that Bergen County is an important county "because of the number of members that we have there and the population." Tr. at 1118:1-5. Moreover, as noted, the insurers testified that they could not **[*59]** offer a marketable plan to Bergen County residents that did not include a Bergen County hospital. *See, e.g.*, Tr. at 165:19-22 (Nielsen from United); 339:14-23 (Wengel as to Aetna); 1119:22-1120:5 (Karp as to Horizon).

Defendants argue that commercial insurers do not just look at Bergen County because all offer statewide plans. Defendants continue that no insurer offers only Bergen County plans and the providers do not ask for county only plans. *See* Defs. FOF ¶¶ 42-47. Thus, Defendants argue that because the actual commercial insurance plans do not align with the FTC's defined geographic market, the FTCfails to establish a relevant market. Tr. at 1664:4-1665:2. But Dr. Dafny explained that a relevant geographic market for antitrust purposes does not necessarily align with a consumer's understanding of a relevant market. Tr. at 592:1-17. In fact, in *Hershey*, the Third Circuit emphasized that "[t]he hypothetical monopolist test is exactly what its name suggests: hypothetical." *Penn State Hershey Med. Ctr., 838 F.3d at 344*. Moreover, economic significance does not need to be unique. Dr. Dafny recognized, and other insurers testified, that other counties and areas of New Jersey are also important markets, Tr. at 1508:10-19, but this **[*60]** does not mean that Bergen County is *not* important to insurers. Dr. Dafny explained that "there is nothing in [her] opinion that relies on Bergen County being the only county that an insurer is interested in targeting." Tr. at 632:10-12.

Next, Defendants argue that using Bergen County customers artificially excludes patients just outside of Bergen County and "distinguishes between Bergen County residents and nonresidents in a way that neither payors nor providers do." Defs. FOF ¶ 14. "Whatever market urged by the FTC, the other party can usually contend plausibly that something relevant was left out, that too much was included, or that dividing lines between inclusion and exclusion were arbitrary." *FTC v. Tronox Ltd., 332 F. Supp. 3d 187, 202 (D.D.C. 2018)* (quoting 2B Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** ¶ 530d (4th ed. 2014)). Defendants point to Englewood and HUMC's PSAs, which demonstrate that both hospitals serve individuals who reside outside of Bergen County, and the fact that HUMC and Englewood consider their reach to extend beyond Bergen County.[21] *See* DX5001, Exs. 8, 9. But looking at a hospital's PSA to determine a geographic market is viewing the market from the lens of the supplier, not the buyer. As discussed, the **[*61]** Third Circuit has instructed that courts must apply the HMT through the lens of the insurer. *Penn State Hershey Med. Ctr., 838 F.3d at 342*. In addition, although the Court recognizes that patients certainly can and do cross county lines for inpatient GAC care, the evidence demonstrates that, at least for Bergen County, most residents stay within the county for such care. Dr. Dafny calculated that more than 75% of Bergen County residents receive their inpatient GAC services at a hospital in Bergen County. PX8000, Fig. 25. As a result, focusing on Bergen County is likely to capture a "significant amount of potential harm."[22] Tr. at 622:2-24. Notably,

---

[21] It is not clear if Garrett or Geller were even aware of HUMC or Englewood's PSAs before this litigation began. *See* Tr. at 806:11-18; Tr. at 908:1-25. If the top executives of the entities at issue here were not aware of this information in ordinary course, it is difficult to infer that payors were aware of the PSA for either entity or that it was relevant to payors' decisions when forming their networks.

[22] Defendants harp on Dr. Dafny's use of the word "significant" as a subjective and the fact that Dr. Dafny did not quantify the actual harm. Tr. at 622:10-15; 624:3-8. But Dr. Dafny's conclusion about "significant" harm is supported by data — that 75% of

Defendants' expert economist, Dr. Wu, did not disagree with Dr. Dafny's calculation about the number of Bergen County residents who received care within the County. Tr. at 980:3-14.

The concept that individuals prefer to receive care close to home was also recognized by the payors. For example, Karp explained that for emergency services and most elective in-patient services, patients will choose to go to the closest provider. Tr. at 1121:21-1122:1; *see also* [TEXT REDACTED BY THE COURT] testifying that a large proportion of [TEXT REDACTED BY THE COURT] Bergen County **[*62]** participants seek care within the county and that [TEXT REDACTED BY THE COURT] data demonstrates that [TEXT REDACTED BY THE COURT] Bergen County commercial participants accessed care at hospitals within the county). So, while the proposed market does exclude non-Bergen County residents, the case law recognizes that a geographic market is often imprecise. *See* *United States v. Conn. Nat'l Bank, 418 U.S. 656, 669, 94 S. Ct. 2788, 41 L. Ed. 2d 1016 (1974)* ("An element of 'fuzziness would seem inherent in any attempt to delineate the relevant geographic market.'" (*quoting* *United States v. Phila. Nat'l Bank, 374 U.S. 321, 360 n.37, 83 S. Ct. 1715, 10 L. Ed. 2d 915 (1963)*)). Moreover, the exclusion is justified by the evidence.

Finally, Defendants critique Dr. Dafny's decision to start with Bergen County because Englewood and its "closest and largest" HMH rival, HUMC, are both in Bergen County. Defendants point out that Dafny did not form an opinion as to whom Englewood's closest rival is overall or who HUMC's closest rival might be. Thus, Defendants explain that Dafny's "first principal reason . . . boils down to the proposition that these two hospitals happen to be in the same county." Tr. at 1663:2-5. Defendants also contend that Englewood and HUMC are complements, not competitors. *See* Defs. FOF ¶ 85.

As noted, prior to the merger, HUMC and Englewood were competitors and viewed **[*63]** each other as such. More importantly, commercial payors viewed the two as competitors. For example, [TEXT REDACTED BY THE COURT] testified that [TEXT REDACTED BY THE COURT] considers HUMC to be the best possible alternative for Englewood because of the "tremendous amount of overlap" of services provided by the two facilities and geographic proximity. [TEXT REDACTED BY THE COURT]. Other insurers also consider the two hospitals to be competitors. *See, e.g.*, Tr. at 1116:23-25 (Karp agreeing that Englewood and HUMC are currently competitors). Even Garrett acknowledged that there were overlapping services between the two hospitals. Tr. at 782:2-13. Finally, according to Dr. Wu, across all inpatient GAC services, Englewood provides 73% of the same services that are offered at HUMC. DX5001, Ex. 4. The non-overlapping services account for only [TEXT REDACTED BY THE COURT] of HUMC's revenue. *Id.* This evidence undercuts Defendants' critique of Dr. Dafny's decision to use Bergen County as a candidate market.[23]

Defendants also challenge Dr. Dafny's application of the HMT. Defendants argue that although Dafny states that she considered hospitals that served individuals outside of Bergen County, **[*64]** in actuality, she only looked at hospitals within Bergen County when considering whether insurers would accept a SSNIP. Defs. COL ¶ 13. To determine whether a hypothetical monopolist would be able to impose a SSNIP, Dafny considered the insurer's testimony that Bergen County is significant and that they could not market a plan to Bergen County residents that did not include a Bergen County hospital. *See* PX8000-074. In addition, Dafny only used all Bergen County hospitals for her WTP analysis instead of all hospitals that serve Bergen County residents. *Id.* at 075. But Dr. Dafny explained that if this subset (Bergen County hospitals only) could "impose a SSNIP, then surely all the hospitals that are serving Bergen County could do so." Tr. at 564:4-7. As a result, and in light of the insurer testimony about accepting a SSNIP, Dafny believed that it was appropriate to extrapolate the results of her WTP with the subset to

---

Bergen County residents receive care within the County. Further, Dr. Dafny characterized the harm as significant to indicate that it was enough *to continue with* (not end) her analysis as to whether Bergen County satisfied the HMT. Tr. at 622:19-24.

[23] In any event, the Third Circuit has found that true complements can nevertheless potentially run afoul of the antitrust laws. *See* *Penn State Hershey Med. Ctr., 838 F.3d at 334, 353-54* (granting preliminary injunction of proposed merger of academic medical center that specialized in complex services and a health system that focused on primary and secondary care).

the geographic market as a whole. Tr. at 563:21-564:15; 642:4-7. Defendants do not meaningfully challenge this decision,[24] and the Court finds that it is a reasonable inference.

If a hypothetical monopolist owned all the hospitals in Bergen County, then insurers **[*65]** could attempt to redirect their customers to nearby hospitals outside of the county (and even this scenario ignores the insurer's testimony that they cannot market a viable plan to Bergen County residents that does not include a Bergen County hospital). But if the hypothetical monopolist owned not only the hospitals in Bergen County but also the other nearby hospitals, then the monopolist would have greater leverage over the insurers because the insurers could not redirect their Bergen County customers to nearby, non-county hospitals. In other words, if a hypothetical monopolist also owned hospitals outside of Bergen County, then insurers would have even less choice in declining a SSNIP if they wanted a marketable plan for Bergen County residents.

Next, Defendants take issue with Dr. Dafny's confirmatory WTP analysis because it focused on stage two of hospital competition. The WTP model looks at the value that a hospital or health system adds to an insurer's network. PX8000-057, ¶ 117. As discussed, factors that are important in stage 2 inform stage 1 competition, which Dr. Wu acknowledges. Tr. at 990:15-21 (testifying that while the focus is on stage 1, stage 2 competition is "important" **[*66]** so that stage 2 must be analyzed as to how it affects stage 1). For example, if an insurer knows that individuals frequently choose Hospital A over Hospital B, that insurer would want Hospital A in its network because that hospital makes the network more desirable. Accordingly, stage 1 and stage 2 competition cannot be viewed in separate, isolated spheres. Even the Third Circuit recognizes that "[p]atients, of course, are relevant." *Penn State Hershey Med. Ctr., 838 F.3d at 343*. Therefore, the fact that elements of patient choice play a part of the WTP analysis is not fatal.

Thus, in sum, the FTC demonstrates that commercially insured patients in Bergen County is a relevant geographic market.

b. Anticompetitive Effects

After the relevant markets are determined, "a prima facie case is established if the plaintiff proves that the merger will probably lead to anticompetitive effects in that market." *Penn State Hershey Med. Ctr., 838 F.3d at 346* (quoting *Saint Alphonsus Med. Ctr.-Nampa, Inc., 778 F.3d at 785*). An anticompetitive effect means that the transaction would create an incentive for the merged parties to raise prices, lower quality, and innovate less. *See, e.g.*, *Saint Alphonsus Med. Ctr.-Nampa Inc., 778 F.3d at 786* (finding that high HHI and evidence demonstrating that merger would likely lead to increased reimbursement rates with high entry barriers for other entities sufficient **[*67]** to establish prima facie case). The *Merger Guidelines* state that market concentration, which is measured by the Herfendahl-Hirschman Index ("HHI"), is a useful indicator of the competitive effects of a merger. *Merger Guidelines*, § 5.3. "In determining whether the HHI demonstrates a high market concentration, we consider both the post-merger HHI number and the increase in the HHI resulting from the merger." *Penn State Hershey Med. Ctr., 838 F.3d at 346-47* (quoting *Horizontal Merger Guidelines*, § 5.3, at 18-19). An HHI above 2,500 in the post-merger market is considered "highly concentrated" and if the merger increases the HHI by more than 200 points it is "presumed to be likely to enhance market power." *Id.* (quoting *Merger Guidelines*, § 5.3, at 19). The FTC "can establish a prima facie case simply by showing a high market concentration based on HHI numbers." *Id.*

[24] Dr. Wu indicated that there is no actual evidence of price discrimination in Bergen County and that if more hospitals were considered, it does not seem possible that a hypothetical monopolist could raise prices for Bergen County residents. Tr. at 944:4-16. Putting aside the Third Circuit's remonstration that the HMT is *hypothetical*, Wu's analysis appears to ignore the commercial reality that the large majority of Bergen County residents do seek inpatient GAC services in Bergen County. Dr. Wu also challenged Dr. Dafny's HMT for focusing on hospitals rather than patients. Tr. at 943. The Court disagrees with this reasoning. The patients would be the appropriate focus in the opposite scenario — if an insurance company merger was being challenged and the resulting hypothetical monopolist had all of the commercially insured customers in Bergen County. Then the inquiry would be whether such an insurer monopolist could impose a SSNIP (meaning a larger discount for the monopolist) on the hospitals.

The FTC put forth evidence demonstrating that under a patient-based model, which is based on inpatient GAC discharges of Bergen County residents, the post-merger HHI is 2,835 and the change in HHI is 841.[25] PX8000-080, Fig. 15. The post-merger HHI is considered highly concentrated, and the increase is above 200, meaning that the merger is likely to enhance the merged entities' **[*68]** market power. In addition, HMH would control almost half of the market share in Bergen County post-merger. PX8000, Fig. 15. Consequently, the FTC satisfies is *prima facie* case based on this information alone.

Defendants respond that small adjustments to the geographic market eliminate the presumption of enhanced market power. Defs. COL ¶ 19. The *Merger Guidelines* state that "[w]here analysis suggests alternative and reasonably plausible candidate markets, and where the resulting market shares lead to very different inferences regarding competitive effects, it is particularly valuable to examine more direct forms of evidence concerning those effects." *Merger Guidelines*, § 4. Defendants rely on a number of calculations performed by Dr. Wu to demonstrate that different candidate markets lead to very different competitive effect results. Wu compared the post-merger HHIs for three other "markets." DX5001, Ex. 16, 20. Wu, however, never proposed that any of the "markets" he looked to were a potential candidate market. Tr. at 952:25-953:26. And Wu conceded that before calculating market concentration, there "needs to be [] an appropriately defined market." Tr. at 49:13-15. Moreover, Wu's markets **[*69]** use patient flow data, which adopts the perspective of the hospitals; this approach has been rejected by the Third Circuit. *Penn State Hershey Med. Ctr., 838 F.3d at 340* ("But subsequent empirical research demonstrated that utilizing patient flow data to determine the relevant geographic market resulted in overbroad markets with respect to hospitals.").

But even if the Court were to accept any of Dr. Wu's markets as alternative candidate markets, direct evidence supports the conclusion that the merger will substantially lessen competition in Bergen County. *See Saint Alphonsus Med. Ctr.-Nampa, Inc., 778 F.3d at 788* (considering HHI and direct evidence of anticompetitive effect to determine that plaintiffs established their *prima facie* case); *H.J. Heinz Co., 246 F.3d at 717* (concluding that ordinary course documents and direct evidence regarding the market "bolstered" the FTC's market concentration statistics); *Sysco Corp., 113 F. Supp. 3d at 71-72* ("In summary, the FTC has bolstered its *prima facie* case with additional proof that the merger would harm competition[.]"). Using Englewood's information, Chartis calculated that HMH accounted for 34% of hospital discharges in Englewood's PSA and Englewood accounted for approximately 15% of discharges in its own PSA. PX2079-016. Englewood's PSA covers a large portion of Bergen County and small areas of Passaic, **[*70]** Hudson, and Rockland Counties. PX2079-015. Accordingly, after the merger, Englewood's data suggests that HMH will account for almost 50% of the market share in Englewood's PSA. HMH's ordinary course documents before this litigation identify Bergen County as HUMC's PSA. *See* PX1129-007, -051. The fact that HUMC and Englewood historically defined their PSA to include similar areas demonstrates that combining the two entities will eliminate a competitor in the county.

Many insurance companies also believe that the proposed merger will lead to anticompetitive effects, as illustrated by insurers' testimony and their ordinary course documents. For example, [TEXT REDACTED BY THE COURT] internal analysis, using [TEXT REDACTED BY THE COURT] claim data, indicated that together, HMH's Bergen County hospitals and Englewood would account for [TEXT REDACTED BY THE COURT] of [TEXT REDACTED BY THE COURT] commercial inpatient spend. [TEXT REDACTED BY THE COURT]. In addition, [TEXT REDACTED BY THE COURT] believed that post-merger, [TEXT REDACTED BY THE COURT] market share in Bergen County will go to HMH. [TEXT REDACTED BY THE COURT] testifying that under [TEXT REDACTED BY THE COURT] modeling and projections, **[*71]** if HUMC were to leave [TEXT REDACTED BY THE COURT] broad coverage network, [TEXT REDACTED BY THE COURT] of the patients who would have gone to HUMC would chose Englewood under a conservative assumption).

Defendants' ordinary course documents and testimony also demonstrate that HMH and Englewood are competitors. By way of example, as previously discussed, during Phase 2 of Chartis's work with Englewood, Chartis

---

[25] Dr. Dafny also calculated HHI using a hospital-based approach, as a "sensitivity check," which also resulted in an HHI over 2,500 and a change in HHI greater than 200. Tr. at 647:7-648:22. The patient-based calculation is the more conservative of the two approaches. Tr. at 648:10-13.

set up a data room so Englewood could share documents with potential merger partners. When Englewood was first informed about the data room, an Englewood executive expressed concern with [TEXT REDACTED BY THE COURT]." PX2311-001. Geller responded to this email with [TEXT REDACTED BY THE COURT] and then directed the recipient [TEXT REDACTED BY THE COURT]. *Id.* Moreover, after meeting with HMH during phase 2 of Chartis's work, an Englewood Board member commented that "[TEXT REDACTED BY THE COURT]." PX2325 at 3. Finally, even after the merger was announced, Englewood acknowledged that "[f]or a long time, Hackensack has been a fierce but respected competitor." PX2291-004. And HMH indicates that once the merger is consummated, it can immediately transfer many cases to Englewood. Garrett, **[*72]** however, explained that presently, HMH has no incentive to transfer patients from HUMC because Englewood is a competitor. PX7004-189-90.

The FTC also relies on Dr. Dafny's diversion ratio calculations to further demonstrate that the merger will have an anticompetitive effect. This quantitative analysis assesses what other hospitals patients would choose if one hospital were not available. Tr. at 571:22-72:23. A "higher diversion ratio is indicative of closer competition between the parties." Tr. at 572:6-7. Dafny used a patient-choice model for a four-county area. Using this model, if Englewood were not available, more than 40% of its patients would use an HMH hospital, and almost 30% would choose HUMC. The next closest hospital was Valley, at 12%. Tr. at 573:9-18. If HUMC was not available, about 17% would go to Valley and approximately 10% would go to Englewood. Tr. at 574:1-7. Dafny explained that this quantitative analysis shows that HMH, and specifically HUMC, places a strong competitive constraint on Englewood, which affects Englewood's pricing and quality. Tr. at 574:20-23. Defendants maintain that the diversion ratio analysis focuses on stage 2 competition because Dafny's analysis **[*73]** did not capture price differences between HUMC and Englewood. Defs. FOF ¶¶ 98-99. As discussed, there is a large price difference between the two hospitals. *See* [TEXT REDACTED BY THE COURT]. But as also discussed, patients' preferences inform insurers' decisions when creating networks and negotiating rates, thus are relevant to stage 1. In fact, Dafny also relied on [TEXT REDACTED BY THE COURT] redirection analysis and [TEXT REDACTED BY THE COURT] termination analysis. Tr. at 575:11-21. Accordingly, while Dafny's diversion ratio analysis alone would not establish an anticompetitive effect, when viewed in combination with the HHI and direct evidence, the quantitative analysis further supports the FTC.

Dr. Dafny also calculated a "rough estimate" of the price impact of the merger at $31 million per year. To do so, Dafny used her patient-based WTP model, which quantified the impact of the acquisition on Defendants' bargaining leverage with insurers.[26] Plf. FOF ¶ 114. She based her calculation on information from a peer-reviewed paper, referred to during the hearing as the Garmon study. Tr. at 576:16-24. Defendants argue that Dafny's "rough estimate" is unreliable because it too is based **[*74]** on stage 2 considerations. Defendants also challenge her estimate because it was based on a single study and assert that Dafny did not use an appropriate coefficient. Defs. FOF ¶¶ 102-110.

Again, patient preferences impact and inform stage 1 negotiations. Turning to Defendants' critiques of the Garmon study, Dafny first noted that while she adopted the coefficient from the Garmon study, substantial literature supported the general proposition that "hospitals and hospital systems with higher willingness to pay command higher negotiated prices in the marketplace." Tr. at 577:12-14; *see also* 654:13-15. Dafny then explained that she selected the coefficient that only included mergers without variable cost savings. Dafny further indicated that she purposefully selected this coefficient to look at the price impact of the merger because she was "assessing the competitive effect absent mitigating factors, absent entry or efficiencies." Tr. at 1520:9-15. In other words, Dafny selected the category without variable cost savings because she accounted for such savings in her efficiencies analysis: "If I were to use an estimate that included all mergers, including those with cost savings, then I **[*75]** [would] be double counting because I would be having cost savings in my price effect and then cost savings potentially in the efficiencies analysis." Tr. at 1520:16-20. Defendants do not meaningfully challenge Dafny's explanation, and the Court finds it persuasive.

---

[26] In addition to the patient-choice model, Dafny also calculated willingness to pay using a hospital-choice model. Tr. at 575-76. When considering all discharges in a four-county area, Dafny concluded that "the parties combined yields an increase in this willingness to pay of 10.1% per discharge." Tr. at 576:2-9. Dafny then estimated that the 10% increase caused a 5.7% price increase for transaction absent any cost efficiencies, and it would increase Englewood's price around 35%. Tr. at 576-78.

Defendants point out that the full sample of mergers in the Garmon study showed that there was no statistically significant relationship between changes in WPT and price, and that the Garmon study did not include any hospitals in New Jersey. Defs. FOF ¶¶ 108-09. Accordingly, Defendants point to Dr. Wu's analysis of New Jersey claims data, which allegedly demonstrates that the merger will not lead to higher prices. *Id.* ¶¶ 111-12. According to Wu, Garmon indicated that commercial claims information is "the ideal data" to evaluate potential price increases. Tr. at 964:15-22. Using this claims data, Wu concluded that there is no statistically significant relationship between price and hospitals' willingness to pay in Northern New Jersey. Tr. at 965:4-11. But even accepting Wu's conclusion, the direct evidence indicates otherwise.

Namely, the FTC points to the Acquisition Clauses as proof of a likely price impact. *See* Plf. FOF ¶¶ 116-17. When HMH **[*76]** acquires or merges with an entity, the Acquisition Clause permits HMH to raise rates at the new facility to match HMH's similar facilities. [TEXT REDACTED BY THE COURT]; 1036:5-14; 1083:14-21. In response, Defendants point to unsolicited letters that HMH sent to insurers stating that HMH would not enforce the Acquisition Clauses with respect to this merger (the "Waiver Letters"). *See* [TEXT REDACTED BY THE COURT]. HMH sent these letters after the FTC filed its opening briefing in this matter. As a result, the FTC contends that the letters "may lack the reliability necessary to be admitted under *Rule 803(6)*," the business records exception. D.E. 246 at 4.

The FTC does not identify any cases demonstrating that post-litigation created business records are inadmissible. Moreover, the Court is not aware of any evidentiary rule that bars a business record simply because it was created after litigation began. *See* *United States v. Casoni, 950 F.2d 893, 911 n.10 (3d Cir. 1991)* ("Thus, we are satisfied *Rule 803(6)* contains no general rule limiting admissible business records to those prepared *ante litem motam*."). Accordingly, the Court will not exclude the Waiver Letters. Rather, the critical issue is how much weight the Court should give this evidence. The Supreme Court has **[*77]** explained that post-acquisition evidence "tending to diminish the probability or impact of anticompetitive effects" can be considered but "the probative value of such evidence" is "extremely limited." *United States v. Gen. Dynamics Corp., 415 U.S. 486, 504, 94 S. Ct. 1186, 39 L. Ed. 2d 530 (1974)* (internal citations omitted). Lower courts have determined that such evidence is "deemed of limited value whenever such evidence *could arguably* be subject to manipulation." *Chi. Bridge & Iron Co. N.V. v. FTC, 534 F.3d 410, 435 (5th Cir. 2008)* (emphasis in original); *see also* *United States v. Aetna Inc., 240 F. Supp. 3d 1, 80-90 (D.D.C. 2017)* (giving less weight to business decision made after the merger was agreed to because the court determined that it was made to improve the defendant's litigation position).

As discussed, Young was not aware [TEXT REDACTED BY THE COURT], and after each acquisition [TEXT REDACTED BY THE COURT]. Tr. at 1083:14-21. [TEXT REDACTED BY THE COURT] and [TEXT REDACTED BY THE COURT] both sought to [TEXT REDACTED BY THE COURT] with HMH[TEXT REDACTED BY THE COURT]. The Acquisition Clause still appears in [TEXT REDACTED BY THE COURT] and [TEXT REDACTED BY THE COURT] contracts with HMH, although [TEXT REDACTED BY THE COURT] was able to [TEXT REDACTED BY THE COURT].[27] [TEXT REDACTED BY THE COURT]. Finally, Garrett explained that the clauses were intended to ensure that HMH hospitals were "paid fairly **[*78]** for the services that they delivered," Tr. at 787:4-9, and at his deposition in this matter, Young testified that with respect to the Acquisition Clauses, [TEXT REDACTED BY THE COURT] PX7026-148. Thus, until the FTC argued in its opening brief that the Acquisition Clauses are evidence of a likely price increase, HMH seemingly had no intention of waiving the Acquisition Clauses after it acquired Englewood. Yet, shortly after HMH learned of the FTC 's argument, it sent the Waiver Letters.

The Waiver Letters are a prime example of alleged business records that were created to bolster Defendants' litigation position. HMH [TEXT REDACTED BY THE COURT] and, just prior to the FTC's opening brief, Young effectively testified [TEXT REDACTED BY THE COURT]. And the Waiver Letters run contrary to HMH's own financial interest. As a result, the Court gives little weight to the Waiver Letters.[28] Even if the Court were to consider

---

[27] The Court notes that [TEXT REDACTED BY THE COURT] and [TEXT REDACTED BY THE COURT] contracts were executed after the proposed transaction was announced, and [TEXT REDACTED BY THE COURT] negotiations for its current contract with HMH occurred after the announcement. [TEXT REDACTED BY THE COURT].

the Waiver Letters, they do not constitute binding contracts; Defendants point to no consideration given by the insurance companies in exchange for the waivers.[29]

More importantly, even if the Acquisition Clause was enforced, it would not change the Court's analysis. The critical inquiry, in the **[*79]** Court's view, is the impact that the merger will have on future negotiations with commercial insurers. To this end, HMH makes no representations about rate increases or nonprice terms for any future system-wide negotiations.[30] Because HMH has historically been able to negotiate higher rate increases than Englewood, the reasonable inference is that HMH will be able to do so after the merger (with the benefit of having added Englewood to its portfolio).[31] Accordingly, although the Waiver Letters may delay a price increase in the short term, as [TEXT REDACTED BY THE COURT] explained, HMH is "really just putting off the inevitable." [TEXT REDACTED BY THE COURT]

The Merger would also likely eliminate competition on a non-price level. As discussed, although Defendants downplayed the fact that they are competitors during the hearing, ordinary course evidence demonstrates that HMH and Englewood currently monitor each other's service offerings. For example, after Englewood advertised its use of a new technology as "first in the State," HMH expedited its approval process for the same technology due to concerns from an HMH physician about his ability to keep up with competitors. PX1205. Similarly, **[*80]** an Englewood employee noted that Englewood should market a new technology that HMH did not have "as this will give [Englewood] the edge." PX2358. Moreover, Garrett explained that HMH monitors competitors' quality ratings, which helps improve HMH's services. Tr. at 800:2-17. As part of this tracking, HMH looks at Englewood's ratings. PX1055. If Englewood and HUMC were no longer competitors, it would remove an incentive for both entities to continue to improve quality metrics and offer innovative medical technology. *See Merger Guidelines*, § 6.4 (explaining that "[c]ompetition often spurs firms to innovate" and that the FTC "may consider whether a merger is likely to diminish innovation competition by encouraging the merged firm to curtain its innovative efforts below the level that would prevail in the absence of the merger").

In fact, one of the concerns that Englewood raised as to potentially partnering with [TEXT REDACTED BY THE COURT] was that it would lead to *further* competition with HMH. As noted, on March 28, 2019, Chartis presented the offers from HMH and [TEXT REDACTED BY THE COURT] to the Executive Committee. In comparing the two entities as potential partners, Chartis noted **[*81]** that a "pro" of choosing HMH, "[TEXT REDACTED BY THE COURT] " PX6004-009. Relatedly, a "con" for was that a partnership with [TEXT REDACTED BY THE COURT] "[TEXT REDACTED BY THE COURT]" *Id.* The "[TEXT REDACTED BY THE COURT]" refers to future competition between HUMC and Englewood; likewise, the potential for [TEXT REDACTED BY THE COURT] indicates [TEXT REDACTED BY THE COURT], *i.e.*, direct competition resulting in more and/or improved services for patients.

Finally, Defendants contend that market responses from competitors will also constrain Defendants post-merger. Defs. COC ¶ 24. "[I]n certain cases, repositioning by other competitors may be sufficient to deter or counteract the

---

[28] Defendants also argue that, based on Third Circuit precedent, the Court cannot consider private agreements or contractual language in conducting an antitrust analysis. The Court disagrees. The Third Circuit has clearly stated that private contracts cannot be considered in determining the relevant product market or the relevant geographic market. *Penn State Hershey Med. Ctr., 838 F.3d at 344* (citing *Queen City Pizza, Inc. v. Domino's Pizza, Inc., 124 F.3d 430, 438-39 (3d Cir. 1997)*). But the Acquisition Clause is being considered as to anticompetitive effects, not in defining the relevant market.

[29] Defendants contend that the Waiver Letters are enforceable on equitable grounds. D.E. 313.

[30] [TEXT REDACTED BY THE COURT].

[31] Defendants also contend that adding Englewood will not increase HMH's leverage with commercial insurers. Defs. FOF ¶¶ 113-21. Dr. Dafny acknowledged that Englewood does not have much bargaining leverage when compared to HMH, Tr. at 1522:9-10, and unlike HUMC, no commercial insurer testified that it needed Englewood in its network to create a desirable network. However, Defendants conflate two separate issues. The first is whether HMH and HUMC are more important to insurers than Englewood. The answer to that inquiry is clearly yes. The second is whether adding Englewood to HMH will further increase HMH's leverage with insurers. The answer to that query is, based on the evidence, yes-subject to a final determination in the administrative action.

anticompetitive effects of a merger" *Penn State Hershey Med Ctr., 838 F.3d at 351*, but the repositioning must be "timely, likely, and sufficient in its magnitude, character, and scope to deter or counteract the competitive effects of concern," *Merger Guidelines*, § 9. Defendants' argument regarding competitors is not supported by the evidence.

Defendants argue that hospitals and health systems' use of front doors will mitigate against any price increase post-merger. Defs. FOF ¶¶ 127. But there is little to no evidence demonstrating that front doors actually **[*82]** have any impact on the inpatient market in Bergen County. The only evidence about the effectiveness of front door came from [TEXT REDACTED BY THE COURT]. Specifically, the number of patients that utilized [TEXT REDACTED BY THE COURT] Bergen County front door who were then subsequently treated at an [TEXT REDACTED BY THE COURT] was "[TEXT REDACTED BY THE COURT]" to [TEXT REDACTED BY THE COURT] utilization strategy. [TEXT REDACTED BY THE COURT]. Defendants also contend that after the merger, insurers will be able to steer patients away from HMH. But again, there is no evidence that insurers are likely to take this approach. The Court also has serious doubts that this would occur given the repeated testimony that Bergen County residents prefer to receive care close to home and that insurers need to include HUMC in their networks to remain marketable to Bergen County residents. Finally, potential competitors seeking to enter the Bergen County market face high entry barriers and costs. This is evidenced by HUMC's tower project and the new Valley hospital, both of which are multi-year and multimillion-dollar (actually hundreds of millions) projects. And while Garrett and Geller both opined **[*83]** that Valley's new location will increase competition, Defendants did not provide persuasive evidence to support these opinions. Finally, any new entry into the market would need to proceed through New Jersey's certificate of need process, which is time-consuming and expensive. FTC FOF ¶ 152.

As a result, the FTC demonstrates that the merger will likely create an anticompetitive effect. The FTC , therefore, establishes its *prima facie* case.

2. Rebuttal Evidence

To rebut the presumption that the merger is anticompetitive, Defendants must present evidence "that the market-share statistics [give] an inaccurate account of the [merger's] probable effects on competition." *H.J. Heinz Co., 246 F.3d at 715*. The stronger the Government's *prima facie* case, the more evidence that Defendants must present to successfully rebut the presumption. *FTC v. Sanford Health, 926 F.3d 959, 963 (8th Cir. 2019)* (quoting *United States v. Baker Hughes, Inc., 908 F.2d 981, 991, 285 U.S. App. D.C. 222 (D.C. Cir. 1990)*). Defendants focus on three overarching procompetitive effects that they argue rebut the FTC's presumption: (1) upgrades to Englewood's physical plant and increased capacity; (2) expansion of the complex tertiary and quaternary care at HUMC; and (3) service optimization between the entities. Defendants maintain that these effects will lower costs and increase the quality of healthcare **[*84]** for the community.

Apart from the service optimizations that will be realized through the merger, Defendants frame their rebuttal arguments in terms of the procompetitive benefits of the merger. Defs. FOF ¶ 130, COL ¶¶ 25, 27. Defendants do not characterize these arguments as asserting an efficiencies defense. The FTC contends that there is "no distinction between a procompetitive benefit and an efficiency; rather efficiencies are cognizable only if they are procompetitive in nature." Plf. COL ¶ 43. Thus, the FTC treats Defendants' rebuttal case as invoking an efficiencies defense.

The Clayton Act itself does not expressly provide for an efficiencies defense nor has the Supreme Court formally addressed whether one exists. Although the Third Circuit has also not concluded that an efficiencies defense exists, other circuits have determined that the defense is cognizable. *Penn State Hershey Med. Ctr., 838 F.3d at 348*. Moreover, the *Merger Guidelines* recognize the defense. *Merger Guidelines*, § 10. Assuming that the defense is legally cognizable, it must meet several requirements. Among other things, the efficiencies must be "merger specific," which means "they must be efficiencies that cannot be achieved by either company alone." *Penn State Hershey Med. Ctr., 838 F.3d at 348* **[*85]** . The efficiencies must also be verifiable and not speculative. *Id.* This is a high bar, as "[t]he presumption of illegality may be overcome only where the defendants 'demonstrate that the intended acquisition would result in significant economies and that these economies ultimately would benefit competition and, hence, consumers.'" *Id.* (quoting *FTC v. Univ. Health, Inc., 938 F.2d 1206, 1223 (11th Cir. 1991)*).

However, "where the evidence of efficiencies in the relevant market will not support an outright defense to an anticompetitive merger, such evidence is relevant to the competitive effects analysis of the market required to determine whether the proposed transaction will substantially lessen competition." *FTC v. Arch Coal, Inc., 329 F. Supp. 2d 109, 151 (D.D.C. 2004)*; *see also* *FTC v. Tenet Health Care Corp., 186 F.3d 1045, 1054 (8th Cir. 1999)* ("We further find that although Tenet's efficiencies defense may have been properly rejected by the district court, the district court should nonetheless have considered evidence of enhanced efficiency in the context of the competitive effects of the merger.").

Whether the Court construes Defendants as invoking a formal efficiencies defense or as addressing the competitive effects analysis, Defendants fail to establish extraordinary procompetitive effects to offset Plaintiff's *prima facie* case.

a. Upgrades and Increased Capacity at Englewood

Englewood's goals in finding a strategic partner, and in choosing HMH specifically, were to increase its inpatient utilization and obtain capital for needed improvements to the hospital. HMH is providing significant capital that is specifically earmarked for Englewood through the merger, and Garrett explained that HMH intends to turn Englewood into "a leading provider of tertiary care in Northern New Jersey." Tr. at 743:5-8.

As noted, Defendants repeatedly pointed to the Agreement, specifically to HMH's "hard commitments" in Section 3 and Exhibit C, as evidence of HMH's **[*86]** plans to grow Englewood's utilization and improve its clinical offerings. *See* Tr. at 886:19-25; DX3800, Ex. C. But as noted, for many of the "hard commitments" (1 through 19), the commitments are to explore, assess, and collaborate on different issues or to make "regional" (not Englewood specific) improvements. DX3800, Ex. C. Moreover, as to the first 19 commitments in Exhibit C, Englewood is only permitted to arbitrate disputes, with a remedy of specific performance or the reimbursement of costs. *Id.*, §§ 3.2.5, 7.1.3.3. In addition, the commitments to increase Englewood's inpatient volume (certain of commitments 20-27) are not enforceable by Englewood.

Nevertheless, HMH is providing significant capital to Englewood for necessary improvements to its physical plant, including upgrades to the OR and the Heart Center of Excellence, and providing Englewood with a robot for Englewood's robotic urology services and [TEXT REDACTED BY THE COURT]. *Id.*, Ex. C, ¶¶ 3, 11, 15, 19. While not as comprehensive or firm as represented by Defendants during the hearing, the Court recognizes that these improvements to Englewood could likely amount to a procompetitive benefit to Bergen County, in that Englewood **[*87]** should be able to upgrade its facilities and equipment thereby offering a broader array of services for its patients. Dr. Gowrisankaran, Defendants' expert on industrial organization, economics, and econometrics in the healthcare industry, testified that his analysis of such capital investments indicated that they were likely to attract more patients. Tr. at 1246-45.[32]

b. Expansion of Complex Services at HUMC

Next, Defendants tout that the merger will allow HMH to expand the complex tertiary and quaternary care provided at HUMC. Defendants continue that this will reduce the outmigration of patients to New York, Defs. FOF ¶¶ 134, 140, which, in turn, helps the community in terms of cost of care and quality. To expand HUMC's services, HMH maintains that it needs to relieve capacity constraints and "[t]he merger will ease HUMC's capacity constraints by redirecting non-complex tertiary patients to Englewood." *Id.* ¶ 136. Defendants continue that HUMC does not have feasible alternatives to alleviate capacity constraints outside of the merger. *Id.* ¶ 137.

The Court has doubts as to several representations regarding HMH's need for the merger to realize its vision for HUMC. First, HMH indicates that **[*88]** it can transfer many cases to Englewood on day one, that is, before any

[32] For the reasons stated in note 37, the Court declines the FTC's invitation to analyze and compare the capital investment offered by [TEXT REDACTED BY THE COURT] to Englewood during their merger discussions.

capital contributions and resulting improvements to Englewood have been made. HUMC also claims that it has had capacity issues for a number of years. As a result, the FTC posed the question as to why HUMC has not previously transferred cases to Englewood to address its capacity issues. As discussed, in his deposition, Garrett stated that it did not presently make sense for HUMC to transfer patients to Englewood because Englewood is a competitor. PX7004-189—PX7004-90. And there was no indication that transferring such patients would place either HMH or HUMC in financial jeopardy. Garrett's response is illuminating because it reflects HMH's position that financial results are more important than its claimed concern for the community and patients, *i.e.*, "New Jersey First." The Court is not critical of this motive - HMH's financial interests are legitimate business considerations. However, this statement nevertheless undercuts Defendants' claims that New Jersey and its residents are the primary consideration.

Defendants also rely on the Optimization Plan to support the strategy to transfer patients to Englewood and **[*89]** to establish that HUMC faces capacity constraints. Among other things, the Optimization Plan identifies an initial estimate on the number and type of patients that can be transferred to Englewood. DX3601. Like the Waiver Letters, the FTC argues that the Optimization Plan was created after the FTC filed its complaint in this matter and contends that it "may lack the reliability necessary to be admitted under *Rule 803(6)*," the business records exception. D.E. 246 at 4.

The FTC argues that the Optimization Plan is not a business record and was created for this litigation. The FTC points to the fact that the document was not circulated until March 26, 2021, yet Defendants' capacity expert, among other of Defendants' experts, relied on the document extensively in his April 9, 2021, report. D.E. 246 at 4-5. Moreover, the first draft of the Optimization Report was only created on February 27, 2021. *Id.* at 8; *see also* DX3602.

Garrett explained that the Optimization Plan was the result of the efforts of nineteen planning teams that in combination met over 300 times. Tr. at 759:11-15. Defendants further explain that the information about transfers in the Optimization Plan was largely created through the **[*90]** work of the Transfer Team, which it appears, first began meeting in April 2020. *See* Defs. June 8, 2021, Ltr. at 1-2; DX3792-001. Defendants also identify several documents that allegedly illustrate the various committee work that started in April 2020 and led to the Optimization Plan. *See* Defs. June 8, 2021 Ltr.[33]

The Optimization Plan reads like an advocacy piece created for the current litigation.[34] As noted, Defendants represented that the purpose of the Steering Committee was to create a plan *to implement* the Exhibit C commitments upon consummation of the merger, but the Optimization Plan noticeably fails to do so. For example, despite the months of planning, the document contains no details as to how the merged entity intends to redirect cases to Englewood. Instead, the Optimization Plan largely repeats information in the Agreement. In fact, although the Optimization Plan identifies the number of cases HMH believes it can redirect from its other regional hospitals, the numbers for Palisades and Pascack Valley are actually less than the numbers contemplated in the Agreement. The number of patients for Englewood's cardiac surgery and robotics urology programs are the same as in the

---

[33] Defendants submitted their June 8 letter with leave of Court, in response to questions that arose during closing arguments. While Defendants reference exhibits that were included in its exhibit list in the June 8 letter, they also rely on documents that were not on their exhibit list. Defendants sought leave to admit these additional exhibits into evidence. These new documents are not critical to Defendants' argument on this issue, nor are they pertinent to the Court's conclusion. As a result, the Court does not reach the request for leave to admit.

[34] In fact, the FTC also points out that statements from the Optimization Plan are word-for-word copies of statements made in a July 21, 2021 white paper that Defendants submitted to the FTC to support this merger. D.E. 246 at 6-7. Defendants counter that in actuality, the statements from the white paper were "derived from and consistent with their internal analysis and integration planning activities." D.E. 256 at 7. But the first draft of the Optimization Plan was not created until February 2021. Moreover, despite Defendants' position that the white paper was influenced by Defendants' integration planning activities, Defendants fail to point to any documents that support this statement. Even Defendants' additional documents identified in their June 8 Letter do not reflect that such work product existed. Tellingly, not a single document cited in the letter makes even passing reference HUMC's capacity constraints.

Agreement. **[*91]** Thus, rather than providing Defendants with a comprehensive plan to implement, the document reads as a sales pitch to justify the merger after the fact. The Court, therefore, admits the Optimization Plan but gives it little weight. To give the Optimization Plan any significant weight would merely invite future antitrust litigants to create similar documents.

Next, although Defendants maintain that HMH has no alternatives to relieve the capacity constraints at HUMC except to transfer patients to Englewood, Defendants gloss over the fact that HUMC is currently expanding capacity through the Second Street Tower project. In the Optimization Plan and throughout the hearing, Defendants repeatedly explained that the Second Street project "will not alleviate HUMC's capacity challenges." DX3601-008. But the construction project expands HUMC's existing footprint. Through the project, HUMC is building [TEXT REDACTED BY THE COURT] new operating rooms and plans to [TEXT REDACTED BY THE COURT] operating rooms. Tr. at 1173:25-1174:9. The new tower will also have [TEXT REDACTED BY THE COURT] new ICU beds and HUMC plans to [TEXT REDACTED BY THE COURT] of its existing ICU beds. Tr. at 1175:9-14. In addition, **[*92]** there is space for [TEXT REDACTED BY THE COURT] additional ICU beds that can be added if the need arises. Tr. at 1175:15-18. Finally, the new tower will have [TEXT REDACTED BY THE COURT] new private med-surg beds and HMH [TEXT REDACTED BY THE COURT]. Tr. at 1175:19-1176:2. If HUMC's capacity constraints were so severe, or the need to expand HUMC's tertiary and quaternary services were as acute as Defendants make them out to be, the Court questions why HMH is [TEXT REDACTED BY THE COURT]. At a minimum, HMH did not provide any adequate explanation as to this fact. Moreover, HMH planned *pre-merger* to expand certain quaternary service lines with the Tower project. PX1051. In addition, HUMC never gave a signal to insurers or competitors that it had severe capacity constraints; HUMC never declined a transfer and never went on redirect in the time leading up to the Agreement. Finally, HMH has three hospitals near HUMC: Pascack Valley (owned with Ardent), Palisades, and Mountainside (owned with Ardent). These three hospitals provide primary and secondary care. Pascack Valley is not at capacity, and there was no indication that either Palisades or Mountainside was at capacity. Nevertheless, **[*93]** HMH provided no reason as to why HUMC could not alleviate its capacity constraints to some degree through using one or more of the three.[35]

Dr. Gowrisankaran evaluated the procompetitive benefits of the proposed merger, finding nine benefits. Tr. at 1226:12-13. The first benefit was increased patient volume at Englewood. *Id.* at 1242:14-23. Gowrisankaran explained that payors would save money through transfers to Englewood and tertiary redirections from HUMC to Englewood. Gowrisankaran continued that payors would save because Englewood is cheaper than HUMC. Tr. at 1244:11-12. The Court agrees with Dr. Dafny that transfers or redirections from HUMC to Englewood are not an efficiency; instead the transfers/redirections are a voluntary decision by HUMC to give away profits. Tr. at 586:7-24. Not only is it a voluntary decision, but it is a decision that runs counter to HUMC and HMH's financial interest. Besides the transfers not being in HMH and HUMC's financial interest, there are also serious questions as to whether the number of projected transfers can be implemented. As noted, a large number of hospital referrals come from physicians not employed by the hospital; those physicians do not **[*94]** have to send their patients to Englewood. And HUMC is not reducing it tertiary service lines. Moreover, Gowrisankaran drew his transfer/redirection figures from the Optimization Plan, Tr. at 1283-84:13-20, of which the Court gives little weight for the reasons stated above.

Defendants also primarily rely on Dr. Gowrisankaran to quantify the benefits that would result from HUMC's increased quaternary services. HMH, however, glosses over the fact that it needs state approval to expand HUMC's quaternary service lines. Plf. FOF ¶ 162. At least with respect to hospitals obtaining tertiary capacity, this is an expensive and time-consuming process, and approval is not guaranteed. Tr. at 768:13-25; *see also* 93:4-19. And Gowrisankaran opined that there would be direct payor cost savings from quaternary care received in New Jersey versus New York. *See* Defs. FOF ¶ 146. But quaternary services are highly complex and infrequently performed, and Gowrisankaran's patient choice model, which he based[36] on HMH's [TEXT REDACTED BY THE COURT]

[35] In fact, when HMH acquired Pascack Valley, one of its stated reasons to reopen the facility was to serve as a pressure relief valve for overflow patients at HUMC. Tr. at 1437:25-4. But at the present time, Pascack Valley only operates at about 50% to 60% of its occupancy rate. Tr. at 1212:12-15.

recapture rate, amounts to [TEXT REDACTED BY THE COURT] patients. DX5002, Table 11A. Moreover, Gowrisankaran acknowledged that the actual reduced payor expenditures **[*95]** would be much less once he accounted for transfers from lower-priced New Jersey hospitals to HUMC. Tr. at 1287:11-18. In fact, Gowrisankaran found that [TEXT REDACTED BY THE COURT] would have reduced expenditures post-merger for quaternary services; [TEXT REDACTED BY THE COURT] would all have increased expenditures. Tr. at 1288-89:12-13.

c. Service Optimization

The final procompetitive benefit asserted by Defendants is cost-savings that will result from service optimization between the two entities.[37] For this benefit, Defendants rely on their expert Ms. Ahern, who calculated that the merger would result in $38 million in cost-savings efficiencies annually. Defs. FOF ¶ 150. Ahern, however, failed to account for the $439 million capital contribution by HMH, which would result in not reaching a net positive gain until thirteen years after the merger.[38] Tr. at 1529-30:24-15. Ms. Ahern recognized that HMH had a demonstrated track record of cost savings through past mergers and acquisitions. Dr. Gowrisankaran estimates that 50% of Ms. Ahern's amount would be passed through to payors. Tr. at 1529:24-15. While Gowrisankaran estimates that payers would see cost savings, there is no evidence that **[*96]** these cost savings will be realized. *Id.* ¶ 150. Critically, HMH has acquired other hospitals in New Jersey, including Palisades in 2016 and JFK in 2018, and Defendants provide no evidence that the cost-savings from service optimization between the prior merger entities was passed through to payors. Therefore, with history as a guide, the Court doubts that any costs savings HMH realizes will be passed through to payors.

d. Quality Improvements

Finally, the Court briefly addresses the alleged quality improvements that Defendants submit will be achieved at Englewood and HUMC after the merger. Dr. Meyer, Defendants' healthcare quality expert, testified that HMH has a history of being a leader in healthcare quality and a track record of improving the quality of care with its merger partners.[39] *Id.* ¶ 154. The Court also agrees that HMH's capital commitment will certainly permit Englewood to

---

[36] The Court notes that Dr. Gowrisankaran utilized a patient-choice model for his analysis of the cost-savings that HMH will realize by capturing outmigration. The Court also notes that one of Dr. Wu's critiques of Dr. Dafny's analysis is that she improperly used a patient-choice model.

[37] Defendants frame this as an efficiency. Defs. FOF ¶¶ 27-29. The FTC argues that these service optimization efficiencies are not merger specific because they could also be achieved if Englewood chose a different merger partner, such as [TEXT REDACTED BY THE COURT]. *See* Plf. COL ¶ 46. An efficiency is merger specific if it "cannot be achieved by either company alone because, if they can, the merger's asserted benefits can be achieved without the concomitant loss of a competitor." *H.J. Heinz Co., 246 F.3d at 722*. Thus, there is no legal requirement that Defendants must compare the efficiencies alleged here with those of a different hypothetical merger partner. And the FTC has cited no authority indicating that a court can consider other potential merger partners in conducting an efficiencies analysis. The merger specific inquiry focuses on the efficiencies that could theoretically be achieved by either merging entity alone, absent the merger.

[38] The Court is also concerned that neither Ms. Ahern nor anyone from her team, produced any notes, despite the fact that she interviewed more than 100 Englewood and HMH employees, because, according to Ahern, her team is well versed in the field of healthcare organizations and operations. Tr. at 140:6-1402:11. Yet, neither Ms. Ahern nor any of her team members claimed to have an eidetic memory. Further, no explanation was provided as to how Ms. Ahern was able to effectively incorporate her team's verbal work product into her final report. Absent an extraordinary and credible explanation, the Court cannot fathom how Ms. Ahern and her team were able to accurately synthesize over 100 interviews from memory alone.

[39] The FTC seeks to preclude Defendants from relying on certain portions of Dr. Meyer's report because Dr. Meyer destroyed notes from interviews that were incorporated into his report, in contravention of the Case Management Order. D.E. 248. The FTC seeks to exclude those portions of the report that relied on the destroyed notes under *Federal Rules of Civil Procedure 37(b)(2)(A)*. A court has broad discretion when imposing sanctions pursuant to *Rule 37(b)*. *Wachtel v. Health Net, Inc., 239*

upgrade and expand its facilities and equipment. This is a quality improvement. At the same time, Englewood is also a high-quality hospital. Tr. at 846:4-16. In fact, Dr. Romano, the FTC's expert on healthcare quality opined that "Englewood performs better than HUMC on some important measures." Tr. at **[*97]** 1435:22-23. In other words, even without HMH's capital infusion, Englewood still outperforms HUMC in certain areas. Consequently, although both hospitals (particularly Englewood) will likely see certain improvements in quality due to the merger, this merger is fundamentally different than, for example, a merger where a large successful health system acquires a small, failing hospital. Because Englewood and HUMC consistently perform well in multiple quality assessments, Defendants also fail to establish that any improvements in quality at either entity will be a sufficient procompetitive benefit.

In sum, Defendants do establish that improvements at Englewood will result in an adequate procompetitive benefit. In addition to a limited benefit of HUMC recapturing a small number of outmigration patients, Englewood should be able to expand and upgrade its physical plant, equipment, and services. But these benefits do not amount to extraordinary efficiencies that offsets the likely anticompetitive effect of the merger. Consequently, Defendants fail to rebut the FTC's *prima facie* case and the Court concludes that the FTC establishes a likelihood of success in demonstrating that the merger violates **[*98]** *Section 7* of the Clayton Act, or in other words, that "there is a reasonable probability that the challenged transaction will substantially impair competition." *Sysco Corp., 113 F. Supp. 3d at 22* (quoting *Staples, 970 F. Supp. at 1072*)).[40]

B. Weighing the Equities

"Although the Government's showing of likelihood of success creates a presumption in favor of preliminary injunctive relief, we must still weigh the equities in order to decide whether the merger would be in the public interest." *Penn State Hersey Med. Ctr., 838 F.3d at 352* (quoting *H.J. Heinz Co., 246 F.3d at 726*). The Court must determine whether the harm Defendants "will suffer if the merger is delayed will, in turn, harm the public more than if the injunction is not issued." *Id.* In addition, the Third Circuit has explained that although a court may consider the private equities, "they are not to be afforded great weight." *Id. at 352*.

The FTC contends that "[t]he principal equity in favor of issuance of the injunction is the public's interest in effective enforcement of the antitrust laws." Plf. FOF ¶ 50. If Defendants are allowed to proceed with the transaction, and then the administrative proceeding finds that the merger is unlawful, it will be difficult to unscramble the proverbial egg. *See id.* ¶ 50. Defendants argue that if the merger is enjoined it will "derail **[*99]** the Merger" and "deny[] the community of [the] significant healthcare benefits" of the expanded complex care at HUMC and tertiary care at Englewood. Defs. FOF ¶ 31. In arguing that the community will be denied the benefits of the changes to care, Defendants incorrectly focus on whether the merger is in the public interest. At this stage, the Court must determine whether the *injunction* is in the public interest. *Penn State Hershey Med. Ctr., 838 F.3d at 353*. As for Defendants' argument that the injunction will derail the merger, it is not a consideration endorsed by the Third Circuit. "We see no reason why, if the merger makes economic sense now, it would not be equally sensible to consummate the merger following a FTC adjudication on the merits that finds the merger lawful." *Id.* Accordingly, on balance the equities favor granting the injunction.

VI. CONCLUSION

F.R.D. 81, 84 (D.N.J. 2006). In this instance, although Dr. Meyer intentionally destroyed his notes, there is no evidence of bad faith. Accordingly, the Court denies the FTC's request.

[40] Even if the Court were to conclude that Defendants rebutted the FTC's *prima facie* case that the merger will be anticompetitive, the Court would conclude that the FTC appropriately meets its burden of persuasion to demonstrate a likelihood of success in establishing that the merger violates *Section 7*.

In sum, the FTC demonstrates a likelihood of success on the merits and the equities favor granting the injunction. Therefore, the Court preliminarily enjoins the proposed acquisition pending the outcome of the administrative proceeding. An appropriate Order accompanies this Opinion.

LexisNexis® Headnotes

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN1[] **Standards of Review, Abuse of Discretion**

The court reviews a district court's decision to certify a class for abuse of discretion. But a district court per se abuses its discretion when it makes an error of law.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Adequacy of Representation

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Numerosity

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Typicality

HN2[] **Prerequisites for Class Action, Adequacy of Representation**

Before any class may be certified, *Fed. R. Civ. P. 23(a)* requires a district court to make the following determinations: (1) the class is so numerous that joinder of all members is impracticable; (2) there are questions of law or fact common to the class; (3) the claims or defenses of the representative parties are typical of the claims or defenses of the class; and (4) the representative parties will fairly and adequately protect the interests of the class. *Fed. R. Civ. P. 23(a)*. A party seeking class certification must affirmatively demonstrate his compliance with the Rule, and must do so with evidentiary proof, And classes certified under *Rule 23(b)(3)* are only appropriate when (1) all of the prerequisites of *Rule 23(a)* are satisfied, (2) common questions of law or fact predominate over any questions affecting only individual class members, and (3) proceeding as a class is superior to other available methods of litigation.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Numerosity

HN3[] **Prerequisites for Class Action, Numerosity**

Fed. R. Civ. P. 23(a)(1) requires that a class be so numerous that joinder of all members is impracticable. *Fed. R. Civ. P. 23(a)(1)*. Though no specified number is needed to maintain a class action, as a general guideline, a class that encompasses fewer than 20 members will likely not be certified while a class of 40 or more members raises a presumption of impracticability of joinder based on numbers alone. For the "gray area" cases between twenty and forty members, all the circumstances of the case should be taken into consideration in evaluating the impracticability of joinder.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Numerosity

HN4[] **Prerequisites for Class Action, Numerosity**

The text of *Fed. R. Civ. P. 23(a)(1)* refers to whether the class is so numerous that joinder of all members is impracticable, not whether the class is so numerous that failing to certify presents the risk of many separate lawsuits.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN5[] **Class Actions, Certification of Classes**

The judicial-economy factor involves weighing the actual, practical difficulties of joining all of the potential class members by inquiring whether joinder would be expensive, time-consuming, and logistically unfeasible'. Otherwise, the judicial-economy factor would always favor class certification, which is simpler to manage than individual lawsuits. In fact, even compared to joinder, class certification will often be preferable from a judicial economy perspective. And in analyzing this factor, district courts should bear in mind *Fed. R. Civ. P. 23(a)*'s high standard, which asks whether a variety of factors make joinder not only uneconomical but also economically impracticable. *Fed. R. Civ. P. 23(a)(1)*.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > Burdens of Proof > Allocation

HN6[] Class Actions, Certification of Classes

Fed. R. Civ. P. 23 places on plaintiffs the burden of presenting evidence that the putative class complies with Rule 23. And in presenting this evidence, plaintiffs must do more than simply show that litigating as a class—rather than joinder—would offer marginal economic benefits. True, impracticable does not mean impossible. But the impracticability standard recognizes that the class action is an exception to the usual rule that litigation is conducted by and on behalf of the individual named parties only.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN7[] Class Actions, Certification of Classes

True, impracticable does not mean impossible. But the impracticability standard recognizes that the class action is an exception to the usual rule that litigation is conducted by and on behalf of the individual named parties only.

Civil Procedure > Parties > Joinder of Parties > Permissive Joinder

HN8[] Joinder of Parties, Permissive Joinder

As the Third Circuit stated in Modafinil—some parties being economically unmotivated to litigate via joinder is only one of many factors to consider in making an impracticability of joinder consideration.

Civil Procedure > Judicial Officers > Judges > Discretionary Powers

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Numerosity

HN9[] Judges, Discretionary Powers

To be sure, the court gives district courts considerable discretion in making numerosity determinations. But district courts must provide a rigorous analysis to allow for meaningful appellate review on the numerosity factor. And that rigorous analysis must be premised on a correct understanding of Fed. R. Civ. P. 23(a)(1).

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Numerosity

HN10[] Standards of Review, Abuse of Discretion

A district court abuses its discretion when it considers issues that have no place in the numerosity requirement.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Adequacy of Representation

Constitutional Law > ... > Case or Controversy > Standing > Elements

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Typicality

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN11[] **Prerequisites for Class Action, Adequacy of Representation**

To establish U.S. Const. art. III standing of named plaintiffs during class certification under *Fed. R. Civ. P. 23* it is sufficient for standing purposes that the plaintiffs seek recovery for an economic harm that they allege they have suffered. Moreover, contesting a class representative's injury does not defeat typicality. To defeat class certification, a defendant must show some degree of likelihood a unique defense will play a significant role at trial.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Maintainability

HN12[] **Prerequisites for Class Action, Commonality**

Fed. R. Civ. P. 23(b)(3) requires a showing that questions common to the class predominate. Predominance also applies to damages because the efficiencies of the class action mechanism would be negated if questions of individual damage calculations overwhelm questions common to the class. This does not mean, however, that damages must be susceptible of measurement across the entire class for purposes of *Rule 23(b)(3)*.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Maintainability

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN13[] **Standing, Requirements**

In addition to establishing U.S. Const. art. III standing, private antitrust plaintiffs must also demonstrate antitrust standing. Antitrust standing often is critically important for the purpose of evaluating *Fed. R. Civ. P. 23(b)(3)*'s predominance requirement because it is an element of the claim that may call for individual, as opposed to common, proof.

Civil Procedure > Appeals > Appellate Jurisdiction > State Court Review

HN14[] **Appellate Jurisdiction, State Court Review**

Failure to file a petition for permission to cross-appeal is a jurisdictional defect, barring consideration of any issue that may have been raised.

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

Antitrust & Trade Law > ... > Private Actions > Purchasers > Direct Purchasers

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Antitrust & Trade Law > Clayton Act > Scope

Antitrust & Trade Law > Clayton Act > Remedies > Damages

HN15[] **Standing, Clayton Act**

Generally, only direct purchasers from an antitrust violator can sue for damages. Immediate buyers from the alleged antitrust violators can be construed as direct purchasers under the Clayton Act.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN16[] **Class Actions, Certification of Classes**

The court affords district courts substantial deference in certifying classes.

Judges: Before NIEMEYER, FLOYD, and RUSHING, Circuit Judges. NIEMEYER, Circuit Judge, concurring.

Opinion by: FLOYD

Opinion

[*232] FLOYD, Circuit Judge:

A group of pharmaceutical buyers brought this class action against two manufacturers who allegedly reached an anticompetitive settlement in a patent dispute. Defendants-Appellants Merck[1] and Glenmark[2] challenge the district court's class certification order. Plaintiffs-Appellees are a class of direct purchasers of Merck's brand-name drug and Glenmark's generic version of that drug. The district court determined that the putative class of thirty-five purchasers satisfied the class certification requirements set forth in *Federal Rule of Civil Procedure 23*. We hold that the district court's numerosity analysis fell short in several respects, so we vacate the district court's order and remand for further proceedings.

I.

In the 1980s, Merck began **[**4]** developing a cholesterol-lowering drug. Eventually, Merck invented ezetimibe, patented and marketed under the name Zetia. Merck's patent was exclusive through April 2017, meaning that Merck had the exclusive right to develop ezetimibe through that date. In 2006, Glenmark sought FDA approval to market a generic version of Zetia, claiming that Merck's Zetia patent was "invalid or w[ould] not be infringed by the manufacture, use, or sale of" Glenmark's generic. *See* *21 U.S.C. § 355(j)(2)(A)(vii)(IV)*.[3] As required by law, Glenmark notified Merck of its generic drug application. Merck promptly sued Glenmark for patent infringement. Glenmark did not contest that its proposed generic infringed on Merck's patent. Instead, Glenmark argued that Merck's patent was invalid. In 2010, Merck and Glenmark settled the patent dispute. The settlement agreement allowed Glenmark to launch its generic in December 2016—over four months before the expiration of Merck's exclusivity period.

Plaintiffs, on behalf of a small group of drug wholesalers that purchased Zetia directly from Merck, sued Merck and Glenmark under federal ***antitrust law***, alleging that the two companies conspired to inflate the drug's price. Plaintiffs' case drew parallels **[**5]** to the Supreme Court's decision in *FTC v. Actavis, Inc., 570 U.S. 136, 133 S. Ct. 2223, 186 L. Ed. 2d 343 (2013)*, which concerned the anticompetitive settlement of a patent case. In *Actavis*, a brand-name manufacturer sued generic manufacturers for patent infringement. Under the parties' **[*233]** settlement agreement, the brand-name manufacturer agreed to a reverse payment in which it agreed to pay the generic manufacturers between $240 and $342 million to delay the launch of their generic products. *Id. at 144-45*. The FTC then sued both parties, alleging that the reverse payment was anticompetitive and therefore in violation of federal ***antitrust law***. *Id. at 145*. The Supreme Court agreed, holding that a "large and unjustified" reverse payment made "in return for staying out of the market" may give rise to antitrust liability. *Id. at 154, 158*.

In this case, Plaintiffs allege that Merck made a "reverse payment" by giving up its right to sell a generic version of ezetimibe for the six-month period after Glenmark introduced its own generic. Because Glenmark was the first to seek FDA approval for a generic ezetimibe, it had the near-exclusive right to sell a generic for 180 days after launching it. *21 U.S.C. § 355(j)(5)(B)(iv)*. The right is near-exclusive because the brand-name manufacturer can market a competing generic, called an "authorized **[**6]** generic," by essentially rebranding its brand-name drug and selling it at a lower price point. *In re Lamictal Direct Purchaser Antitrust Litig., 957 F.3d 184, 189 (3d Cir. 2020)*.

---

[1] "Merck" refers to Defendants-Appellants Merck & Co., Inc.; Merck Sharp & Dohme Corp.; Schering-Plough Corp.; Schering Corp.; and MSP Singapore Co. LLC.

[2] "Glenmark" refers to Defendants-Appellants Glenmark Pharmaceuticals Ltd. and Glenmark Pharmaceuticals Inc., USA.

[3] Federal law gives competing drug manufacturers the opportunity to introduce generic versions of branded drugs. Generic manufacturers may obtain FDA approval through an abbreviated review process so long as the generic is a bioequivalent of the approved, brand-name drug.

Here, Merck chose to discount its branded drug rather than launch an authorized generic. Based on that decision, Plaintiffs allege that Merck must have agreed not to launch any authorized generic in exchange for ending the patent litigation between Merck and Glenmark. According to Plaintiffs, this agreement constitutes an anticompetitive "reverse payment." Without such an agreement, Merck and Glenmark would have settled the case by allowing Glenmark to launch its generic at least two years earlier than it actually did in December 2016. Had Glenmark's less expensive generic been available for those two years, the class would have spent billions less acquiring the generic ezetimibe instead of Merck's brand-name version.

Three entities sought to represent a class of all direct Zetia purchasers: FWK Holdings, LLC (FWK), Rochester Drug Co-Operative, Inc. (Rochester), and César Castillo, Inc. (Castillo). The thirty-two absent class members are all sophisticated companies with purportedly large claims, including the "Big Three" wholesalers—McKesson, AmerisourceBergen, and Cardinal Health—"who account **[**7]** for 97 percent of all class purchases." J.A. 1088.

Plaintiffs moved for class certification in November 2019. Merck and Glenmark opposed the motion, contending that the proposed class did not satisfy the requirements of *Federal Rule of Civil Procedure 23*. A magistrate judge issued a report and recommendation to certify the class in June 2020, to which Merck and Glenmark objected. In August 2020, the district court adopted the report, overruled all objections, and certified the class. Merck and Glenmark timely appealed.

II.

HN1[] "We review a district court's decision to certify a class for abuse of discretion." *EQT Prod. Co. v. Adair, 764 F.3d 347, 357 (4th Cir. 2014)*. But "[a] district court per se abuses its discretion when it makes an error of law." *Thorn v. Jefferson-Pilot Life Ins. Co., 445 F.3d 311, 317 (4th Cir. 2006)*.

III.

HN2[] Before any class may be certified, *Rule 23(a)* requires a district court to make the following determinations:

(1) the class is so numerous that joinder of all members is impracticable;

[*234] (2) there are questions of law or fact common to the class;

(3) the claims or defenses of the representative parties are typical of the claims or defenses of the class; and

(4) the representative parties will fairly and adequately protect the interests of the class.

Fed. R. Civ. P. 23(a). "A party seeking class certification must affirmatively demonstrate his compliance with the Rule," **[**8]** *Wal-Mart Stores, Inc. v. Dukes, 564 U.S. 338, 350, 131 S. Ct. 2541, 180 L. Ed. 2d 374 (2011)*, and must do so with "evidentiary proof," *Comcast Corp. v. Behrend, 569 U.S. 27, 33, 133 S. Ct. 1426, 185 L. Ed. 2d 515 (2013)*. And classes certified under *Rule 23(b)(3)*—as is the case here—are only appropriate when (1) "all of the prerequisites of *Rule 23(a)* are satisfied," (2) "common questions of law or fact . . . predominate over any questions affecting only individual class members," and (3) "proceeding as a class [is] superior to other available methods of litigation." *EQT Prod., 764 F.3d at 357*. Merck and Glenmark argue that the district court's decision to certify the class ran afoul of several of these requirements. We consider each in turn.

A.

HN3[] *Rule 23(a)(1)* requires that a class be "so numerous that joinder of all members is impracticable." *Fed. R. Civ. P. 23(a)(1)*. Though "[n]o specified number is needed to maintain a class action," *Cypress v. Newport News Gen. & Nonsectarian Hosp. Ass'n, 375 F.2d 648, 653 (4th Cir. 1967)*, "[a]s a general guideline, . . . a class that encompasses fewer than 20 members will likely not be certified . . . while a class of 40 or more members raises a presumption of impracticability of joinder based on numbers alone," 1 *Newberg on Class Actions* § 3:12 (5th ed. 2021). For the "gray area" cases between twenty and forty members, J.A. 1916 (quoting J.A. 1081), "all the circumstances of the case should be taken into consideration" in evaluating the impracticability of joinder, *Ballard v. Shield of S.W. Va., Inc., 543 F.2d 1075, 1080 (4th Cir. 1976)*.

The district court conducted **[**9]** its numerosity analysis using the Third Circuit's "non-exhaustive list" of factors, which includes "judicial economy, the claimants' ability and motivation to litigate as joined plaintiffs, the financial resources of class members, [and] the geographic dispersion of class members." *In re Modafinil Antitrust Litig., 837 F.3d 238, 253 (3d Cir. 2016)* (vacating class certification in a reverse-payment case under *Rule 23(a)*'s numerosity requirement). The district court determined that the judicial-economy and geographic-dispersion factors favored class certification, though the latter "should be given relatively lower weight than the other factors." J.A. 1921. The court also explained that the "financial factor does not significantly inform the practicability assessment." J.A. 1922 (quoting J.A. 1090 (cleaned up)). Finally, the court concluded that the "ability and motivations of the class members to proceed via joinder weigh 'slightly' in favor of a finding that joinder is impracticable." J.A. 1920 (quoting J.A. 1086).

We commend the magistrate judge and district court for their careful and thorough adjudication of the class certification motion. But for the reasons explained below, we are compelled to conclude that the court rested its numerosity analysis on faulty **[**10]** logic.

For starters, the district court appears to have based its numerosity determination on its reasoning that "multiple *individual* trials" would result if the case proceeded without class status. *See* J.A. **[*235]** 1085 (emphasis added). ***HN4***[] But "the text of *Rule 23(a)(1)* refers to whether 'the class is so numerous that *joinder* of all members is impracticable,' not whether the class is so numerous that failing to certify presents the risk of many separate lawsuits." *Modafinil, 837 F.3d at 253*. The district court's numerosity analysis ran afoul of this important principle in two critical ways.

First, in the course of analyzing the judicial-economy factor, the district court adopted the magistrate judge's reasoning that "multiple individual trials . . . will essentially involve the same theories of liability and largely the same evidence," and that "[i]n such circumstances, proceeding in a class action is preferred as it greatly conserves judicial resources." J.A. 1085; *see* J.A. 1919 ("agree[ing] with the analysis in the [report and recommendation] on the judicial economy factor"). True, the district court minimized this aspect of the magistrate judge's analysis, noting that the magistrate judge "spen[t] just a single paragraph on the **[**11]** possibility that there could be some separate trials." J.A. 1918-19. But given the district court's conclusion that "judicial economy is the most persuasive of the numerosity factors," J.A. 1922, we are left in the dark as to whether this faulty logic played into the district court's numerosity analysis.[4]

When analyzing the judicial-economy factor on remand, the district court should consider whether judicial economy favors *either* a class action *or* joinder. *See* *Modafinil, 837 F.3d at 254* (noting that ***HN5***[] the judicial-economy factor involves weighing "'the actual, practical difficulties of joining all of the potential class members' by inquiring whether *joinder* 'would be expensive, time-consuming, and logistically unfeasible'" (emphasis added) (quoting 5 *Moore's Federal Practice* § 23.22)). Otherwise, the judicial-economy factor would always favor class certification, which is simpler to manage than individual lawsuits. In fact, even compared to *joinder*, class certification will often be preferable from a judicial economy perspective.[5]

Second, in analyzing the class members' ability and motivation to litigate, the district court again focused its analysis on the economics of individual suits. *See* J.A. 1920 (agreeing **[**12]** with the magistrate judge that the motivation factor favored certification, in part, given "*evidence from other cases regarding class members' motivation to pursue claims on their own*" (emphasis added)).[6] In considering the feasibility **[*236]** of pursing

[4] In a footnote, the district court suggested our precedent permits it to compare the practicability of a class to that of individual trials, noting that "the Third Circuit's statements in *Modafinil* are contrary to those of other courts, including the Fourth Circuit." J.A. 1919 n.9. We disagree. The district court's conclusion relied on *Ballard*, which observed in passing that individual suits could increase the volume of discovery. *See* *543 F.2d at 1080*. This comment, which is dicta, directly conflicts with the language of *Rule 23(a)(1)*. We therefore afford it no weight and do not consider it binding precedent.

[5] And in analyzing this factor, district courts should bear in mind *Rule 23(a)*'s high standard, which asks whether a variety of factors make joinder not only uneconomical but also economically *impracticable*. *Fed. R. Civ. P. 23(a)(1)*.

individual claims, the magistrate judge and district court seem to acknowledge yet adopt Plaintiffs' "assum[ption], without any evidence, that absent a class action, the[ ] smaller claimants would sue individually and thus bear the entire cost of litigation." J.A. 1089. This misconstrues the standard. Indeed, "there has been no showing that it would be uneconomical for [smaller claimants] to be individually joined as parties in a traditional lawsuit." *Modafinil, 837 F.3d at 259*. Plaintiffs must bring to bear some evidence to this effect—and the district court may not consider the economics of individual suits in analyzing this factor.[7]

HN9[] To be sure, we give "district courts considerable discretion in making numerosity determinations." *Id. at 249*. But district courts must provide a "rigorous analysis" to allow for meaningful appellate review on the numerosity factor. *Gen. Tel. Co. of Sw. v. Falcon, 457 U.S. 147, 161, 102 S. Ct. 2364, 72 L. Ed. 2d 740 (1982)*. And that "rigorous analysis" must be premised on a correct understanding **[**13]** of *Rule 23(a)(1)*. Because the district court's numerosity analysis improperly looked to the impracticability of individual suits rather than joinder, we are compelled to conclude that legal error infected the court's class-certification decision. *See* *Modafinil, 837 F.3d at 249* ***HN10***[] ("A district court abuses [its] discretion . . . when it considers issues that have no place in the numerosity requirement."). We therefore vacate the district court's class-certification order.

B.

Merck and Glenmark raise two additional arguments related to class certification, which we can quickly resolve.

1.

First, Merck and Glenmark challenge the district court's adequacy determination, arguing that none of the named plaintiffs can adequately represent the class. We see no abuse of discretion here. We recognize that class counsel "is largely responsible for [named plaintiff] FWK's formation." J.A. 1103. But the district court found "no evidence in this case that either FWK or [its owner] have any current or prospective financial dealings with any of class counsel." J.A. 1106, 1925. The court did not abuse its discretion in finding that "the record in this case satisfactorily demonstrates FWK's adequacy to serve as class representative." J.A. 1105, **[**14]** 1925.

We also find no abuse of discretion in the decision that named plaintiff Rochester, despite its current Chapter 11 bankruptcy proceedings, still "share[s] common objectives and the same factual **[*237]** and legal positions" as other class members. *Ward v. Dixie Nat'l Life Ins. Co., 595 F.3d 164, 180 (4th Cir. 2010)* (quoting *Gunnells v. Healthplan Servs., Inc., 348 F.3d 417, 430-31 (4th Cir. 2003)*). Indeed, Rochester's bankruptcy status gives it a "strong interest" in recovering its "fairly substantial" $40.5 million in treble damages. J.A. 1122. The fact that Merck and Glenmark are two of Rochester's creditors does not change that interest.

Merck and Glenmark further argue that named plaintiff Castillo "lacks standing under Article III and the antitrust laws—which renders it an atypical class representative" because Castillo "could not have been injured by the

---

[6] The district court made this finding despite noting that Plaintiffs "offered little case-specific and member-specific evidence that class members would not join the suit on their own." J.A. 1920. ***HN6***[] But *Rule 23* places on Plaintiffs the burden of "present[ing] evidence that the putative class complies with *Rule 23*." *See* *EQT Prod., 764 F.3d at 357*. And in presenting this evidence, Plaintiffs must do more than simply show that litigating as a class—rather than joinder—would offer marginal economic benefits. ***HN7***[] True, "[i]mpracticable does not mean impossible." *Robidoux v. Celani, 987 F.2d 931, 935 (2d Cir. 1993)*. But the impracticability standard recognizes that "[t]he class action is 'an exception to the usual rule that litigation is conducted by and on behalf of the individual named parties only.'" *Wal-Mart Stores, 564 U.S. at 348* (quoting *Califano v. Yamasaki, 442 U.S. 682, 700-01, 99 S. Ct. 2545, 61 L. Ed. 2d 176 (1979)*). We see little evidence in the record to support this point, and we expect that the district court will require Plaintiffs to adduce such evidence on remand to establish impracticability.

[7] Notably underscoring the district court's analysis of this factor is the assumption that if even one party may be *unmotivated* to litigate their small-value claims, *Rule 23(a)(1)* is satisfied because joinder of "*all members*" would then be impracticable. *See* *Fed. R. Civ. P. 23(a)(1)* (emphasis added). But—***HN8***[] as the Third Circuit stated in *Modafinil*—some parties being economically *unmotivated* to litigate via joinder is only one of many factors to consider in making an impracticability of joinder consideration. *837 F.3d at 259* ("Even if it were uneconomical for some . . . of the[ ] individual plaintiffs to join the suit, the District Court must still determine whether, considering all the other relevant factors, class status . . . is appropriate here.").

claimed delay in the availability of a product it would not have bought anyway." Opening Br. at 47. But Merck's and Glenmark's argument as to Castillo is an injury question for the jury—not a question of standing. *See In re Deepwater Horizon, 739 F.3d 790, 803 (5th Cir. 2014)* (noting that ***HN11***[] to establish "Article III standing of named plaintiffs during class certification under *Rule 23*, . . . it [is] 'sufficient for standing purposes that the plaintiffs seek recovery for an economic harm that they allege they have suffered'" (quoting *Cole v. Gen. Motors Corp., 484 F.3d 717, 723 (5th Cir. 2007)*)). Moreover, contesting **[**15]** a class representative's injury does not defeat typicality—another argument made by Merck and Glenmark. *Beck v. Maximus, Inc., 457 F.3d 291, 300 (3d Cir. 2006)* ("To defeat class certification, a defendant must show some degree of likelihood a unique defense will play a significant role at trial."). Because Castillo will rely on the same common evidence as the class to prove its injury at trial, we see no abuse of discretion in the district court's adequacy finding as to Castillo.

Accordingly, we reject Merck's and Glenmark's contention that the district court abused its discretion in finding the named plaintiffs adequate class representatives.

2.

Second, Merck and Glenmark challenge the district court's predominance determination. ***HN12***[] "*Rule 23(b)(3)* requires a showing that *questions* common to the class predominate . . . ." *Amgen Inc. v. Conn. Ret. Plans & Tr. Funds, 568 U.S. 455, 459, 133 S. Ct. 1184, 185 L. Ed. 2d 308 (2013)*. Predominance also applies to damages "because the efficiencies of the class action mechanism would be negated if '[q]uestions of individual damage calculations . . . overwhelm questions common to the class.'" *Modafinil, 837 F.3d at 260* (alterations in original) (quoting *Comcast, 569 U.S. at 34*). "This does not mean, however, that damages must be 'susceptible of measurement across the entire class for purposes of *Rule 23(b)(3)*.'" *Id.* (quoting *Neale v. Volvo Cars of N. Am., LLC, 794 F.3d 353, 374 (3d Cir. 2015)*).

Merck and Glenmark argue that the district court erred **[**16]** in permitting Plaintiffs to use industry- and class-wide averages to prove injury for the purposes of Article III and antitrust standing. They contend that this method of proof swallows the predominance requirement. According to Merck and Glenmark, Plaintiffs predict their "averages-based approach will show that *most* class members suffered injury, but leave open the possibility that fact-specific inquiries may be necessary to prove that others are injured." Reply Br. at 21. The district court rejected these arguments, concluding that different forms of common proof could show antitrust injury to the class. The court explained that a reasonable jury could find that all class members would have purchased some generic form of the drug—rather than the **[*238]** more expensive brand—had a generic been available earlier. We agree.

HN13[] In addition to establishing Article III standing, private antitrust plaintiffs "must also demonstrate 'antitrust standing.'" *Novell, Inc. v. Microsoft Corp., 505 F.3d 302, 310 (4th Cir. 2007)*. Antitrust standing "often is critically important for the purpose of evaluating *Rule 23(b)(3)*'s predominance requirement because it is an element of the claim that may call for individual, as opposed to common, proof." *In re Hydrogen Peroxide Antitrust Litig., 552 F.3d 305, 311-12 (3d Cir. 2008)*. But we find no issue with the practice of proving injury by class-wide **[**17]** averages, which the district court correctly characterized as "common." J.A. 1927. Moreover, even if some individualized-injury inquiry is ultimately required at trial for some defendants, common issues will still predominate. We therefore affirm the district court's predominance finding.

C.

Plaintiffs invite us to review the district court's dismissal of twenty-three companies.[8] But Plaintiffs never filed a cross-petition raising the issue. ***HN14***[] And "[t]he failure to file [a] petition for permission to cross-appeal . . . is a

---

[8] ***HN15***[] Generally, "only direct purchasers from an antitrust violator can sue for damages." *Dickson v. Microsoft Corp., 309 F.3d 193 (4th Cir. 2002)*. When Glenmark began making the generic drug in December 2016, it sold the generic to its exclusive dealer Par at cost-plus-shipping. Plaintiffs allege that Par is therefore a co-conspirator, so the district court erred in dismissing the claims of the twenty-three companies who purchased generic ezetimibe from Par rather than from Glenmark. *See Apple Inc. v. Pepper, 139 S. Ct. 1514, 1521, 203 L. Ed. 2d 802 (2019)* (noting that "immediate buyers from the alleged antitrust violators" can be construed as direct purchasers under the Clayton Act (cleaned up)). *But see Ill. Brick Co. v. Illinois, 431 U.S. 720, 730-*

jurisdictional defect, barring" consideration of any issue that may have been raised. *Tranello v. Frey, 962 F.2d 244, 248 (2d Cir. 1992)* (citing *Myles v. Laffitte, 881 F.2d 125, 126 (4th Cir. 1989)*).

Accordingly, Plaintiffs waived any objection to the district court's dismissal of these companies. In the magistrate judge's recommendation that the district court certify the thirty-five-member class, the magistrate judge advised the parties "that failure to file timely objections" would "result in waiver of appeal from a judgment of this Court based on such findings and recommendations." J.A. 1142-43. Plaintiffs did not appeal the thirty-five-member class or argue the class should be a fifty-eight-person class that included the twenty-three dismissed companies. **[**18]** Failure to do so constitutes waiver.

Resisting this conclusion, Plaintiffs ask us to consider their waived challenge under our "pendant appellate jurisdiction." Resp. Br. at 46 (citing *Scott v. Fam. Dollar Stores, Inc., 733 F.3d 105, 110-11 (4th Cir. 2013)*). In *Scott*, we exercised pendant appellate jurisdiction in a *Rule 23(f)* appeal where the district court had previously denied leave to amend a complaint, but petitioners had failed to seek interlocutory review of the order denying the motion for leave to amend the complaint. *733 F.3d at 110-11*. We concluded that reviewing the leave-to-amend decision was "necessary to ensure meaningful review" and "inextricably intertwined" with an issue on appeal. *Id. at 111* (quoting *Rux v. Republic of Sudan, 461 F.3d 461, 475 (4th Cir. 2006)*). But in *Scott*, the district court declined to certify the class and denied as futile any amendment to the **[*239]** complaint in the same order. And the two questions were intertwined because they turned on the same legal issue.

By contrast, the *Rule 12(b)(6)* and class certification orders in this case stemmed from separate motions. Moreover, the questions of class certification did not turn on the question presented in the *Rule 12(b)(6)* order—namely, whether the twenty-three dismissed companies have antitrust standing. Accordingly, we decline Plaintiffs' invitation to exercise pendant appellate jurisdiction. **[**19]** *See* *EQT Prod., 764 F.3d at 364* (declining to exercise pendant jurisdiction in similar circumstances).

IV.

HN16[] We afford district courts substantial deference in certifying classes. This opinion does not change that deference. Rather, we simply require that the district court consider only those factors permitted by *Rule 23(a)*'s numerosity requirement and that the court conduct the requisite full-throated analysis. The judgment of the district court is

VACATED AND REMANDED WITH INSTRUCTIONS.

JUDGMENT

In accordance with the decision of this court, the judgment of the district court is vacated. This case is remanded to the district court for further proceedings consistent with the court's decision.

This judgment shall take effect upon issuance of this court's mandate in accordance with *Fed. R. App. P. 41*.

Concur by: NIEMEYER

Concur

NIEMEYER, Circuit Judge, concurring:

I am pleased to join the court's opinion. I write separately only to identify some factors that might be considered in determining "numerosity" under *Federal Rule of Civil Procedure 23(a)(1)*. *See* *Anderson v. Weinert Enters., Inc.,*

33, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977) (prohibiting an indirect purchaser from suing for overcharges passed on to it from an upstream dealer).

986 F.3d 773, 775 (7th Cir. 2021) ("Ample ink has been spilled discussing class action litigation and Federal Rule of Civil Procedure 23. Rare are the cases analyzing the Rule's numerosity requirement").

While a district court's nuanced discretion is especially important in determining whether a proposed class is "so **[**20]** numerous that joinder of all members is *impracticable*," Fed. R. Civ. P. 23(a)(1) (emphasis added), we have recognized that a definitive test has not been articulated to assist in the exercise of that discretion, *see* Kelley v. Norfolk & W. Ry. Co., 584 F.2d 34, 35 (4th Cir. 1978) (per curiam) (noting that "[t]here is no mechanical test for determining whether in a particular case the requirement of numerosity has been satisfied"). Nonetheless, I believe we can point to a few nonexclusive factors that a district court might consider.

First and perhaps most important is simply the number of members defined to be in the class. Generally, courts have presumed that a class with more than 40 members is sufficiently numerous while a class that numbers 20 or fewer is presumably too small to certify. *See* 5 James Wm. Moore et al., *Moore's Federal Practice* § 23.22[1][b] (3d ed. 2020); 1 William B. Rubenstein, *Newberg on Class Actions* § 3.12 (5th ed. 2021); *see also* Kennedy v. Va. Polytechnic Inst. & State Univ., No. 7-08-CV-00579, 2010 U.S. Dist. LEXIS 101491, 2010 WL 3743642, at *3 (W.D. Va. Sept. 23, 2010) ("A nationwide survey of federal court decisions signals that it is exceedingly rare to certify classes with less than 25 members. . . . [C]ourts seem much more willing to certify a class if it has more than 40 members" (citations omitted)). For me, a class fewer than even 30 members should be exceptional.

But other factors must be considered to give flesh **[**21]** to the numbers inquiry. Leading treatises have typically summarized the relevant factors as (1) judicial economy resulting from avoidance of joined or independent actions, (2) geographic dispersion of putative class members, and (3) the ability and motivation of class members to bring suit absent class certification. *See* Moore's, *supra*, § 23.22[1][a]; Rubenstein, *supra*, §§ 3.11, 3.12; *cf.* In re Modafinil Antitrust Litig., 837 F.3d 238, 253 (3d Cir. 2016). The weight to be given any relevant **[*240]** factor, however, will be influenced by the particular facts of the case. For example, geographic dispersion, or the lack thereof, may have extra importance when a putative class's members are either especially scattered or notably concentrated. *See, e.g.,* Anderson, 986 F.3d at 777 (noting that geographic dispersion cut against certification where "[a]ll but two of the class members lived within a 50-mile radius of the courthouse"). And class members' motivation gains importance where there is reason to believe that those members would otherwise refrain from a joint suit out of "fear of possible reprisals" by the defendant or for other reasons cutting both for and against certification. Cypress v. Newport News Gen. & Nonsectarian Hosp. Ass'n, 375 F.2d 648, 653 (4th Cir. 1967) (en banc) (certifying a small class of Black physicians in an employment discrimination suit).

Judicial economy as a broad category **[**22]** appears to be the factor on which courts have relied most heavily. *See* Modafinil, 837 F.3d at 253-54 (stating that "both judicial economy and the ability to litigate as joined parties are of primary importance"); *see also* McKenna v. First Horizon Home Loan Corp., 475 F.3d 418, 427 (1st Cir. 2007) ("Among the primary rationales behind the class action mechanism are judicial economy and efficiency"). One aspect of judicial economy is docket management. *See* Modafinil, 837 F.3d at 257 ("[Judicial economy] primarily involves considerations of docket control, taking into account practicalities as simple as that of every attorney making an appearance on the record"). All members of a putative class suing on their own — even if joined under Rule 20 — will naturally place a greater strain on a district court than having just two or three class members represent the whole. *See* Robidoux v. Celani, 987 F.2d 931, 936 (2d Cir. 1993); *see also* Rubenstein, *supra*, § 3.11 ("Where many individuals have similar claims, there may be a flood of litigation. With so many litigants proceeding individually, the courts would be overrun with claims. Yet the vast quantity of individual litigants makes joinder impracticable").

Another facet of judicial economy is courtroom space and correlated staffing. For example, more parties joined to an action means, in most cases, more attorneys, each of which **[**23]** must be present in court for hearings and conferences. In this case, there may be a substantial gap between the number of attorneys currently needed to represent the 3 named class representatives and the number that would be needed to represent 35 joined parties, if that many were to consent, even if one assumes that each joined party has only 2 or 3 attorneys present. A court could reasonably recognize the demands on physical space and staffing necessary to accommodate so many individuals. *See* Town of New Castle v. Yonkers Contracting Co., 131 F.R.D. 38, 41 (S.D.N.Y. 1990) ("[T]he impracticability of joinder is best seen by noting the difficulties involved in having thirty-five intervenors, all with their respective attorneys, attempt to go through the formal motions required for entrance into and participation in the suit" (cleaned up)).

As a further aspect of judicial economy, a district court may consider the differential in costs of discovery between a class action and an action with many joined parties. The court could consider whether, in the action of joined parties, "discovery would be repetitive and unduly expensive." *Ballard v. Blue Shield of S.W. Va., Inc., 543 F.2d 1075, 1080 (4th Cir. 1976)*. But while a district court may give weight to this consideration as to *future discovery*, it should not succumb to the sunk-cost fallacy **[**24]** and certify a class merely because a great deal of effort has *already been expended* ***[*241]*** in discovery. Noteworthy about discovery is the fact that it represents civil litigation's largest cost. *See generally* John S. Beckerman, *Confronting Civil Discovery's Fatal Flaws*, *84 Minn. L. Rev. 505 (2000)*; Nicholas M. Pace & Laura Zakaras, RAND Inst. for Civ. Just., *Where the Money Goes: Understanding Litigant Expenditures for Producing Electronic Discovery* (2012).

And an aspect of broader practicality, and also, perhaps, judicial economy, might relate to the ability to identify class members. *See Baltimore v. Laborers' Int'l Union of N. Am., 67 F.3d 293* [published in full-text format at *1995 U.S. App. LEXIS 27703*], at *1 (4th Cir. 1995) (unpublished table decision); *Ballard, 543 F.2d at 1080* (noting that "the number of [class members] and knowledge of their identity . . . should be considered"). It has been observed that if a "majority of the members of the proposed class were identified" by the court, and especially if those members "reside within an established jurisdictional boundary," joinder may be more practicable. *Baltimore, 67 F.3d at *1* [published in full-text format at *1995 U.S. App. LEXIS 27703*]. On the other hand, when absent class members "are not specifically identifiable," joinder might become more impracticable. *Doe v. Charleston Area Med. Ctr., Inc., 529 F.2d 638, 645 (4th Cir. 1975)*.

These factors are, to be sure, not exhaustive. But they exemplify the nature of what should be considered in determining the numerosity requirement **[**25]** of *Rule 23(a)(1)*. At bottom, "*all the circumstances* of the case should be taken into consideration" in a district court's numerosity analysis. *Ballard, 543 F.2d at 1080* (emphasis added). Moreover, an appellate court's review of a certification order should remain mindful that certification is ultimately determined by the district court — not the appellate court — and that it is the district court which will be saddled with the burdens that flow from a decision. *Cf. Brown v. Nucor, 785 F.3d 895, 922 (4th Cir. 2015)* (Agee, J., dissenting) (noting that this court "typically tread[s] lightly when reviewing a class certification decision").

Opinion

ORDER ON MOTION TO DISMISS

THIS CAUSE comes before the Court upon Defendants'[1] Motion to Dismiss Amended Complaint, filed on March 11, 2021. (DE 23). The Motion is fully briefed. (DE 29; DE 31). For the following reasons, the Motion is denied.

I. BACKGROUND

On October 12, 2020, Plaintiff, a mobile homeowners association, filed this action in state court (DE 1-1); it was removed to this Court on January 11, 2021 (DE 1). Plaintiff brings this action "in its representative capacity on behalf of itself, and more than 1,000 current and former mobile homeowners in the Maralago Cay Mobile Home Park." (DE 15 at 3). Defendants include three business entities that own and operate the mobile home park, seven current and former agents of those entities, and one attorney and one law firm ("Law Firm Defendants"). (*Id.* at ¶¶ 8-17, 20-21). The Amended Complaint contains one claim for violations of the Florida Antitrust Act. (*Id.* at ¶¶ 61-74). It alleges that Defendants "conspired to eliminate discounting of lot rental amount[s] by ensuring that all park owners charged the same minimum price and used the same terms" **[*3]** by, among other actions, including a long-term agreement ("LTA") in park lot rental agreements. (*Id.* at ¶¶ 64-65). The Amended Complaint further maintains that "[t]his conspiracy, combination, or concert of action resulted in higher mobile home lot rental prices . . . than would have existed in a competitive market." (*Id.* at ¶ 2). Defendants raise several grounds for dismissal. (*See* DE 23).

II. LEGAL STANDARD

A motion to dismiss under *Rule 12(b)(6)* challenges the legal sufficiency of the allegations in a complaint. *See Fed. R. Civ. P. 12(b)(6)*. In assessing legal sufficiency, courts are bound to apply the pleading standard articulated in *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)* and *Ashcroft v. Iqbal, 556 U.S. 662, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*. That is, "a complaint must . . . contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" *Am. Dental Ass'n v. Cigna Corp., 605 F.3d 1283, 1289 (11th Cir. 2010)* (quoting *Twombly, 550 U.S. at 570*).

When reviewing a motion to dismiss, a court must construe the complaint in the light most favorable to the plaintiff and accept as true all of the plaintiff's factual allegations. *See Christopher v. Harbury, 536 U.S. 403, 406, 122 S. Ct. 2179, 153 L. Ed. 2d 413 (2002)*; *Erickson v. Pardus, 551 U.S. 89, 93-94, 127 S. Ct. 2197, 167 L. Ed. 2d 1081 (2007)*. However, pleadings that "are no more than conclusions, are not entitled to the assumption of truth. While legal conclusions can provide the framework of a complaint, they must be supported by factual allegations." *Iqbal, 556 U.S. at 679*. "[A] formulaic recitation **[*4]** of the elements of a cause of action will not do[.]" *Twombly, 550 U.S. at 555* (citation omitted). "Factual allegations must be enough to raise [the plaintiff's] right to relief above the speculative level[.]" *Id.* (citation omitted).

III. DISCUSSION

I will address in turn each ground for dismissal asserted by Defendants. Before doing so, I note that I strongly considered granting the Motion based upon the deficiencies in Plaintiff's Response, which in effect operate to waive several arguments. However, "parties cannot waive the application of the correct law," *Jefferson v. Sewon Am., Inc., 891 F.3d 911, 923 (11th Cir. 2018)*, and the arguments raised by Defendants do not warrant dismissal of the Amended Complaint under the facts as alleged by Plaintiff and the applicable law. As such, I will deny Defendants'

---

[1] Plaintiff filed this action against an additional Defendant which had filed a separate Motion to Dismiss (DE 24). That Defendant has since been voluntarily dismissed from this action. (DE 41).

Motion to Dismiss notwithstanding Plaintiff's failure to provide meaningful substantive briefing on many of the legal issues raised in the Motion.

1. Res Judicata/Claim-Splitting Doctrine

Defendants first argue that the sole claim in this action is barred by res judicata and/or the claim-splitting doctrine because "[t]his is the second of two putative class actions filed by . . . [Plaintiff] within 11 months involving the same parties and same issues." (DE 23 at 1, 10-12). **[*5]**

Res judicata "is an affirmative defense that should be raised under *Rule 8(c)*[,] . . . [but] a party may raise a res judicata defense by motion rather than by answer where the defense's existence can be judged on the face of the complaint." *Concordia v. Bendekovic, 693 F.2d 1073, 1075 (11th Cir. 1982)* (citations omitted). There is no mention of any prior lawsuit in the Amended Complaint. And while Defendants attach the complaint from the prior lawsuit to their Motion, that exhibit alone fails to invoke the res judicata doctrine since it "does not indicate that the issue was actually litigated or that there has been a final judgment in the [prior] proceeding." *See id. at 1076*.

"Additional evidence, preferably a copy of the . . . court's records [from the prior lawsuit], is required in order to apply the doctrine of res judicata in the context of either a *Rule 12(b)(6)* motion to dismiss or a *Rule 56* motion for summary judgment." *Id.* Defendants did not attach such records. "As a general rule, a court in one case will not take judicial notice of its own records in another and distinct case even between the same parties, unless the prior proceedings are introduced into evidence." *Id.* (citations omitted). Thus, I reject Defendants' res judicata argument. However, should Defendants deem it **[*6]** appropriate to renew that argument on summary judgment, there appears to be a strong argument for applying the doctrine as to the Law Firm Defendants.

Nor does the record support application of the claim-splitting doctrine. "The claim-splitting doctrine: (1) 'requires a plaintiff to assert all of its causes of action arising from a common set of facts in one lawsuit,' and (2) applies where a second suit has been filed before the first suit has reached a final judgment." *Kennedy v. Floridian Hotel, Inc., 998 F.3d 1221, 1236 (11th Cir. 2021)* (citation omitted). Here, Defendants do not establish that the present lawsuit was filed before the prior lawsuit reached a final judgment. Therefore, Defendants' claim-splitting argument fails.

2. Antitrust Exemptions

Under the Florida Antitrust Act, "[a]ny activity or conduct exempt under Florida statutory or common law or exempt from the provisions of the antitrust laws of the United States is exempt from the provisions of this chapter." *Fla. Stat. § 542.20*. On that basis, Defendants assert that the alleged misconduct is exempt from the Florida Antitrust Act. (DE 23 at 12-16). They first argue that "[t]he alleged anticompetitive conduct here (sharing pricing information) is exempt under the Florida Mobile Home Act . . . because it is **[*7]** regulated by and pursuant to the Act." (*Id.* at 12-13). "[A]ll regulation and control of mobile home lot rents in mobile home parks and all those other matters and things relating to the landlord-tenant relationship treated by or falling within the [Florida Mobile Home Act's] purview" are "preempted to the state." *See Fla. Stat. § 723.004(2)*.

For Defendants to succeed on this issue, I must accept their assertions that (1) the Florida Mobile Home Act's "mandate[ ] that rents . . . be 'reasonable' . . . operates as a cap" and "a price-fixing mechanism" that is "designed to reign in free-market forces, which is antithetical to the purpose of ***antitrust law***," and (2) it is "antithetical to ***antitrust law***" that the Florida Mobile Home "Act establishes a comprehensive and mandatory negotiation process that specifically *requires*[2] park owners to accumulate, compare and provide to an HOA's 'homeowners' committee' data on the rents charged at other, comparable parks." (*See* DE 23 at 3-5 (emphasis in original)).

[2] I note that this appears to be required only "[i]f an increase [in lot rental amount] is based upon the lot rental amount charged by comparable mobile home parks." *Fla. Stat. § 723.037(4)(b)1*.

However, I am not persuaded that what the Act does—namely, require reasonable rental amounts and require some level of disclosure and consideration of rental amounts of comparable mobile home parks—equates to price **[*8]** fixing. Although those aspects of the Florida Mobile Home Act are intended to ensure that the rental amounts charged are reasonable, it is untenable to argue that they necessarily result in or encourage price fixing. For example, Defendants point to no provision in the Florida Mobile Home Act that prohibits the lowering or discounting of rental amounts. Simply ensuring that the rental amounts are not unreasonably high cannot be construed as either regulation or authorization of price fixing. Nor am I convinced that applying the Florida Antitrust Act to Defendants' alleged price fixing would frustrate any provision of the Florida Mobile Home Act or conflict with any action taken under the Florida Mobile Home Act. Therefore, I reject Defendants' argument in this regard.

Turning to federal law, Defendants contend that the alleged misconduct is exempt under (1) the state-action immunity doctrine and (2) the implied preclusion doctrine. (*Id.* at 13-16). With respect to the latter, "[i]mplied antitrust immunity is not favored, and can be justified only by a convincing showing of clear repugnancy between the antitrust laws and the regulatory system." *Nat'l Gerimedical Hosp. & Gerontology Ctr. v. Blue Cross of Kansas City, 452 U.S. 378, 388, 101 S. Ct. 2415, 69 L. Ed. 2d 89 (1981)* (citations omitted). Likewise, "given the **[*9]** fundamental national values of free enterprise and economic competition that are embodied in the federal antitrust laws, 'state-action immunity is disfavored, much as are repeals by implication.'" *F.T.C. v. Phoebe Putney Health Sys., Inc., 568 U.S. 216, 225, 133 S. Ct. 1003, 185 L. Ed. 2d 43 (2013)* (citation omitted). "When determining whether the anticompetitive acts of private parties are entitled to immunity, we employ a two-part test, requiring first that 'the challenged restraint . . . be one clearly articulated and affirmatively expressed as state policy,' and second that 'the policy . . . be actively supervised by the State.'" *Id.* (citation omitted). "[W]here possible, 'the proper approach . . . is an analysis which reconciles the operation of both statutory schemes with one another, rather than holding one completely ousted.'" *Nat'l Gerimedical Hosp. & Gerontology Ctr., 452 U.S. at 392* (citation omitted).

Defendants' arguments with regard to these doctrines likewise hinge on their assertion that the Florida Mobile Home Act effectively operates as a price-fixing mechanism because it requires reasonable rental amounts and requires some level of disclosure and consideration of rental amounts of comparable mobile home parks. Because I have rejected that assertion, I am not persuaded that Defendants have overcome the presumption against **[*10]** these antitrust exemptions. As a result, Defendants' Motion to Dismiss on grounds of antitrust exemptions is denied.

3. Unilateral Conduct

Defendants next claim that the alleged misconduct is unilateral and thus not actionable under the Florida Antitrust Act and, further, that the involvement of the Law Firm Defendants "cannot create the necessary combination to implicate ***antitrust law***." (DE 23 at 16-17). Under the Florida Antitrust Act, "[e]very contract, combination, or conspiracy in restraint of trade or commerce in this state is unlawful." *Fla. Stat. § 542.18*. Similarly, *section 1* of the *Sherman Act* provides that "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal." *15 U.S.C. § 1*. "A *section 1* plaintiff must prove an agreement between two or more persons to restrain trade, because unilateral conduct is not illegal under *section 1*." *Levine v. Cent. Fla. Med. Affiliates, Inc., 72 F.3d 1538, 1545 (11th Cir. 1996)* (citations omitted).[3]

"Ordinarily, a corporation cannot conspire with its own directors, officers or employees." *Hackett v. Metro. Gen. Hosp., 422 So. 2d 986, 988 n.2 (Fla. 2d DCA 1982)*. Here, however, there are three business entity Defendants, and the Amended Complaint does not describe the precise relationship between all of them. Without such information, **[*11]** I decline to find that the entities "have a complete unity of interest" and therefore that their

---

[3] The Florida Antitrust Act's construction provision provides: "It is the intent of the Legislature that, in construing this chapter, due consideration and great weight be given to the interpretations of the federal courts relating to comparable federal antitrust statutes." *Fla. Stat. § 542.32*.

"coordinated activity . . . must be viewed as that of a single enterprise." *See* *Copperweld Corp. v. Indep. Tube Corp., 467 U.S. 752, 771, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)*.

Further, with respect to the Law Firm Defendants, Defendants cite to *Am. Credit Card Tel. Co. v. Nat'l Pay Tel. Corp., 504 So. 2d 486, 488 (Fla. 1st DCA 1987)*, for the proposition that outside counsel falls within the general rule that a corporation cannot conspire with its agents. (DE 23 at 17). "However, an exception to this rule exists where, as here, the coconspiring corporate agents are alleged to have an independent personal stake in achieving the object of the conspiracy." *Hackett, 422 So. 2d at 988 n.2* (citations omitted). Here, Plaintiff alleges that one of the Law Firm Defendants, Defendant J. Allen Bobo, had "described existing statewide mobile home lot rental amounts as 'not high enough,' explaining that if lot rent increases were appropriately higher, . . . retiree mobile homeowners would be filing lawsuits all over the state." (DE 15 at ¶ 51). While it is presumably in the interest of the other Defendants to avoid lawsuits, Defendant J. Allen Bobo's statement indicates that he would benefit from an increase in the filing of lawsuits by mobile homeowners. I find this allegation sufficient at the motion-to-dismiss **[*12]** stage to plausibly allege that the Law Firm Defendants had an independent personal stake in increasing rental amounts through LTAs. Therefore, I reject Defendants' argument that Plaintiff only alleged unilateral conduct.

4. Statute of Limitations

Defendants also contend that Plaintiff's claim is time-barred because "[t]he LTA has been in use at Maralago since 2008." (DE 23 at 17-18). Claims brought under the Florida Antitrust Act are subject to a four-year statute of limitations. *See* *Fla. Stat. § 542.26(1)*. Defendants fail to recognize that "[s]uit may be brought more than four years after the events that initially created the cause of action . . . if the action is commenced within four years after the defendant commits (1) an overt act in furtherance of the antitrust conspiracy or (2) an act that by its very nature constitutes a 'continuing antitrust violation.'" *Morton's Mkt., Inc. v. Gustafson's Dairy, Inc., 198 F.3d 823, 827-28 (11th Cir. 1999)* (citation omitted). "An act constitutes a 'continuing violation,' if it injures the plaintiff over a period of time. Even though the illegal act occurs at a specific point in time, if it inflicts 'continuing and accumulating harm' on a plaintiff, an antitrust violation occurs each time the plaintiff is injured by the act." *Id. at 828* (citation omitted). **[*13]** As such, "[w]hen an alleged antitrust conspiracy results in ongoing sales or the collection of payments over time, . . . each sale or payment constitutes a new 'act' that starts the running of the statute of limitations." *Bray v. Bank of Am. Corp., 784 F. App'x 738, 741 (11th Cir. 2019)* (citations omitted).

Here, Plaintiff alleges that the LTAs "harm competition by increasing prices for the mobile home lot rental amounts made subject to them" and that the individuals represented by Plaintiff "will continue to be harmed by paying supra-competitive lot rental amounts charged in Florida mobile home parks that they would not have paid in the absence of the conspiracy." (DE 15 at ¶¶ 71, 73). Therefore, each time that such a rental amount is collected pursuant to the LTAs, another antitrust violation occurs, thereby starting the running of the four-year limitations period again. Although some of the alleged misconduct that Plaintiff asserts supports its Florida Antitrust Act claim may fall outside of the limitations period, it is not apparent from the face of the Amended Complaint that no such rental amounts were collected within the four-year period preceding the filing of this action. Therefore, the Motion is also denied on the statute of limitations **[*14]** argument.

5. Anticompetitive Conduct

Finally, Defendants maintain that "[m]uch of the alleged conduct is not anticompetitive activity within the ambit of the Florida Antitrust Act." (DE 23 at 18). Even so, that does not require dismissal of the Amended Complaint, which clearly alleges that Defendants have engaged in anticompetitive behavior, such as imposing LTAs to "reduc[e] or eliminat[e] price competition" (*see, e.g.*, DE 15 at ¶ 64). I find such allegations sufficient to plausibly allege anticompetitive activity, and thus I do not view this argument as a basis for dismissing the Amended Complaint.[4]

---

[4] I have also considered Defendants' arguments that Plaintiff's "conspiracy to monopolize" theory "has no foundation or place in this case" and that the Amended Complaint is "an improper shotgun pleading." (DE 23 at 2). However, I decline to analyze those

6. Other Grounds

I decline to consider the arguments raised in the recently dismissed Defendant's separate Motion to Dismiss, as Defendants request (*see* DE 23 at 1 n.1). Specifically, Defendants state that "[i]n the interests of brevity and marshalling the Court's resources, the grounds for dismissal raised by the [recently dismissed Defendant in its Motion to Dismiss] are hereby adopted by reference and incorporated herein." (*Id.*). That Motion is roughly twenty pages, while Defendants' own Motion is eighteen pages. "Absent prior permission of the Court, . . . a motion and its incorporated **[*15]** memorandum of law . . . shall [not] exceed twenty (20) pages[.]" *S.D. Fla. L.R. 7.1(c)(2)*. Defendants' request to adopt the arguments set forth in a twenty-page Motion on top of its eighteen-page Motion is contrary to the spirit of this Local Rule, and as such granting that request would serve neither the interest of brevity nor the interest of conserving judicial resources.

Moreover, several arguments in the recently dismissed Defendant's Motion are tailored specifically to that Defendant and thus do not squarely apply to the remaining Defendants. Nevertheless, Defendants fail to parse out which arguments apply to them and why, and I decline to do so on their behalf. Finally, I note that Defendants attempted to adopt that Motion before it was even filed, which further supports the inference that Defendants failed to determine whether the arguments raised therein were applicable to them. Therefore, I will deny Defendants' request to incorporate these additional arguments regarding dismissal of the Amended Complaint.

IV. CONCLUSION

Accordingly, it is **ORDERED AND ADJUDGED** that Defendants' Motion to Dismiss Amended Complaint (DE 23) is **DENIED**.

SIGNED in Chambers at West Palm Beach, Florida, this 4th day of August, **[*16]** 2021.

/s/ Donald M. Middlebrooks

Donald M. Middlebrooks

United States District Judge

---

here, as Defendants failed to set forth a cogent argument for either ground and, instead, only mentioned the grounds in passing. And although the Amended Complaint appears to suffer from several deficiencies, Defendants failed to sufficiently challenge the deficiencies by asserting arguments supported by the applicable law.

Opinion

MINUTE ORDER

Tentative Ruling posted on the Internet.

Demurrer to Second Amended Cross-Complaint (SAXC)

The Court hears oral argument and confirms the tentative ruling as follows:

The Demurrer filed by Cross-Defendants William Young and Jennifer Young (the "Youngs") as to the First Cause Action for Fraudulent Concealment-Conspiracy and Third Cause of Action for Violation of *Business and Professions Code section 17200* of Cross-Complainant, Sean Parry's Second Amended Cross-Complaint ("SAXC") is SUSTAINED, without leave to amend as follows.

First COA (Fraudulent Concealment-Conspiracy): The Youngs correctly raise the point that the SAXC asserts a new theory of liability for fraudulent concealment-conspiracy. Per the Court's 1-19-2021 Minute Order, the Court "sustained with 20 days, *final* leave to amend" a prior demurrer to the First Amended Cross-Complaint of Sean Parry. (See ROA 165.) The prior demurrer to the First Amended Cross-Complaint involved two causes of action for Declaratory **[*2]** Relief and Violation of *Business and Professions Code section 17200*, and sustained the demurrer to that pleading, with leave to amend, as to *those* causes of action. The Court sustained the demurrer as to the claim for declaratory relief as it did not seek to declare future rights, and Parry did not plead an actual controversy involving justiciable questions concerning the legal rights or duties between the parties. (See ROA 165.)

An order sustaining a demurrer to a prior complaint with leave to amend grants a plaintiff leave to amend only the causes of action asserted in the prior complaint, not leave to add entirely new causes of action, unless the new cause of action directly responds to the court's reason for sustaining the earlier demurrer. (*Patrick v. Alacer Corp.* (2008) 167 Cal.App.4th 995, 1015.)

Here, the First Cause of Action for Fraudulent Concealment-Conspiracy does not directly relate to the

Court's reason for sustaining the earlier demurrer on the first cause of action for Declaratory Relief, and Parry is attempting to allege an entirely new cause of action which is beyond the scope of the Court's 1-19-2021 Minute Order. Thus, the demurrer as to the first cause of action is SUSTAINED, without leave to amend, without **[*3]** prejudice to a motion for leave to amend to assert new causes of action.

Third COA (Violation of *Business and Professions Code § 17200*): "*Business and Professions Code section 17204* restricts private standing to bring a UCL action to 'a person who has *suffered injury in fact* and has *lost money or property* as a *result* of the unfair competition.' [Citation.]" (*Jenkins v. JP Morgan Chase Bank, N.A. (2013) 216 Cal.App.4th 497, 521*, disapproved on other grounds by *Yvanova v. New Century Mortg. Corp. (2016) 62 Cal.4th 919, 929*.) To have standing, a party must "(1) establish a loss or deprivation of money or property sufficient to qualify as injury in fact, i.e., *economic injury*, and (2) show that the economic injury was the result of, i.e., *caused by*, the unfair business practice or false advertising that is the gravamen of the claim." (*Kwikset Corp. v. Superior Court (2011) 51 Cal.4th 310, 322*.) To prove the second element, the plaintiff must show that he actually relied on the allegedly deceptive or misleading statement. (*Shaeffer v. Califia Farms, LLC (2020) 44 Cal.App.5th 1125, 1137*, internal quotations and citations omitted.)

"The *UCL [Business and Professions Code section 17200 et seq.*] defines unfair competition as 'any unlawful, unfair or fraudulent business act or practice '' [Citation.]" (*In re Tobacco Cases* (2009) 46

Cal.4th 298, 311.) "A plaintiff alleging unfair business practices under [*Business and Professions Code Sections 17000, et seq.*] must state with reasonable particularity the facts supporting the statutory elements of the violation. (*Khoury v. Maly's of California, Inc. (1993) 14 Cal.App.4th 612, 619*.) The UCL borrows violations of other laws in proscribing unlawful **[*4]** business practices. (*Solus Industrial Innovations, LLC v. Superior Court (2018) 4 Cal.5th 316, 341*.)

The Fourth District Court of Appeal has consistently held "a plaintiff alleging an unfair business practice must show the defendant's conduct is tethered to an underlying constitutional, statutory or regulatory provision, or that it threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of an ***antitrust law***. [Citations.]" (*Graham v. Bank of America, N.A. (2014) 226 Cal.App.4th 594, 613*, internal quotations omitted ("*Graham*").) The fraud prong of the UCL may be shown if members of the public are likely to be deceived, and absent a duty to disclose, the failure to do so does not support a claim under the fraudulent prong of the UCL. (*Graham, supra, 226 Cal.App.4th at pp. 613-614*, internal citations and quotations omitted.)

Here, the gravamen of this claim appears to be that Cerritos deprived Parry of hundreds of thousands of dollars by misrepresenting and/or concealing the true purpose for which Cerritos was using the loaned money, i.e., in furtherance of the allegedly illegal car export scheme orchestrated by the Youngs and Cerritos. However, the allegations still do not indicate Cerritos duped Parry into loaning him money, but instead, that there existed some arrangement between Cerritos and Parry that Parry would loan Cerritos money for the **[*5]** car rental business. (SACC, ¶ 54.) Consequently, it does not appear Parry has standing as Parry does not allege facts showing that his harm was caused by the unfair business practice, i.e., an allegedly illegal car export scheme, let alone what the allegedly deceptive or misleading statement was as to Parry that constituted the unfair business practice. (*Shaeffer v. Califia Farms, LLC (2020) 44 Cal.App.5th 1125, 1137*.)

In addition, as noted by the Youngs, and not addressed by Parry, the SAXC does not allege Parry is a consumer or a competitor in this case. The UCL's purpose is to protect both consumers and competitors by promoting fair competition in commercial markets for goods and services. (*Kasky v. Nike, Inc.* (2002) 27 Cal.4th 939, 949.) "A UCL action is not an all-purpose substitute for a tort or contract action. Instead, the act provides an equitable means through which both public prosecutors and private individuals can bring suit to prevent unfair business practices and restore money or property victims of these practices ... ." (*Graham v. Bank of America, N.A. (2014) 226 Cal.App.4th 594, 609-610*, internal citations and quotations omitted ("*Graham*").)

Moreover, as to the unlawful prong, while the SAXC cites to specific federal and statute statutes allegedly violated, Parry does not allege how said violations **[*6]** caused Parry's economic injuries. As to the unfair prong, the SAXC does not show how the allegedly illegal car export scheme was unfair to Parry, nor does it allege that the Youngs' made any alleged misrepresentation and/or omission to Parry, or that Cerritos' alleged misrepresentation and/or omission to Parry about how the loaned money was being used is tethered to an underlying constitutional, statutory or regulatory provision, or that it threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of an ***antitrust law***. (*Graham, supra, 226 Cal.App.4th at p. 613*, internal quotations omitted.) As to the fraudulent prong, the SAXC does not allege facts showing members of the public are likely to be deceived by Cerritos' alleged misrepresentation and/or omission to Parry, or that the Youngs owed Parry a duty to disclose. (*Id. at pp. 613-614*.)

As previously noted, the Court sustained the prior demurrer to Parry's cross-complaint with final leave to amend. **The demurrer as to the third cause of action is GRANTED, with final leave to amend within 20 days**.

Finally, the Court notes that for the first time in reply, the Youngs attempt to bring the demurrer as to the second cause of action. (Reply, 6:17-18; 8:15-9:6.) The Court **[*7]** disregards any demurrer to **the Second COA (Fraudulent Concealment**) as this ground for demurrer was not raised in the moving papers, and was raised for the first time in reply. (*Code Civ. Proc. § 430.60*; *Balboa Ins. Co. v. Aguirre (1983) 149 Cal.App.3d 1002, 1010*; *Jay v. Mahaffey (2013) 218 Cal.App.4th 1522, 1537-1538*.) Further, the Court notes that the second cause of action is not alleged against the Youngs.

The Court deems the demurrer on the grounds of uncertainty waived as this ground for demurrer was not argued or discussed in the moving papers. (*California Rules of Court, Rule 3.1113(a)*.)

Defendant to give notice.

Hendershot v. Southern Glazer's Wine & Spirits of Okla., LLLP

United States District Court for the Northern District of Oklahoma

August 9, 2021, Decided; August 9, 2021, Filed

Case No. 20-CV-0652-CVE-CDL

Reporter

2021 U.S. Dist. LEXIS 148676 *; 2021 WL 3501523

BRYAN HENDERSHOT, an individual f/d/b/a BOARDWALK DISTRIBUTION COMPANY, Plaintiff, v. SOUTHERN GLAZER'S WINE AND SPIRITS OF OKLAHOMA, LLLP d/b/a JARBOE SALES COMPANY; CENTRAL LIQUOR COMPANY, L.P. d/b/a RNDC OKLAHOMA; BEST BRANDS OF DELAWARE, L.L.C. d/b/a REPUBLIC NATIONAL DISTRIBUTING COMPANY; and BRIAN LIDJI, an individual d/b/a SOUTHERN GLAZER'S WINE & SPIRITS OF OKLAHOMA, Defendants.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN1[] **Motions to Dismiss, Failure to State Claim**

The court's function on a Fed. R. Civ. P. 12(b)(6) motion is not to weigh the evidence that the parties might present at trial, but to assess whether the plaintiff's complaint is legally sufficient to state a claim for which relief may be granted. To survive a motion to dismiss, a complaint must contain enough facts to state a claim to relief that is plausible on its face and the factual allegations must be enough to raise a right to relief above the speculative level. A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged. Once a claim has been stated adequately, it may be supported by showing any set of facts consistent with the allegations in the complaint. For the purpose of making the dismissal determination, a court must accept all the well-pleaded allegations of the complaint as true and must construe the allegations in the light most favorable to a claimant.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN2[] Motions to Dismiss, Failure to State Claim

On a Fed. R. Civ. P. 12(b)(6) motion, a court need not accept as true those allegations that are conclusory in nature. Conclusory allegations without supporting factual averments are insufficient to state a claim upon which relief can be based. A motion to dismiss is properly granted when a complaint provides no more than labels and conclusions, and a formulaic recitation of the elements of a cause of action.

Antitrust & Trade Law > International Aspects > Commerce With Foreign Nations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN3[] International Aspects, Commerce With Foreign Nations

15 U.S.C.S. § 1 makes every contract, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations illegal. 15 U.S.C.S. § 1. The essence of a claim of violation of § 1 of the Sherman Act is the agreement itself. Only after an agreement is established will a court consider whether the agreement constituted an unreasonable restraint of trade.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN4[] Cartels & Horizontal Restraints, Price Fixing

In order to state a claim under 15 U.S.C.S. § 1, a complaint must present enough factual matter, taken as true, to suggest that an agreement was made. Allegations of parallel business conduct, taken alone, do not state a claim under § 1; plaintiffs must allege additional facts that tend to exclude independent self-interested conduct as an explanation for defendants' parallel behavior. Asking for plausible grounds to infer an agreement does not impose a probability requirement at the pleading stage; it simply calls for enough fact to raise a reasonable expectation that discovery will reveal evidence of illegal agreement. An allegation of parallel conduct and a bare assertion of conspiracy will not suffice. Such an allegation, without some further factual enhancement, stops short of the line between possibility and plausibility of entitlement to relief.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

Civil Rights Law > Protection of Rights > Conspiracy Against Rights > Elements

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

HN5[] Conspiracy to Monopolize, Elements

In order to state a claim under 15 U.S.C.S. § 1, terms like "conspiracy," or even "agreement," are border-line: they might well be sufficient in conjunction with a more specific allegation. When the antitrust claim relies solely on circumstantial facts of parallel behavior, the conspiracy is not plausible if, in light of common economic experience, the alleged conduct is equally likely to result from independent action. Therefore, to overcome a motion to dismiss, plaintiff must show the existence of additional circumstances, often referred to as "plus" factors, which, when viewed in conjunction with the parallel acts, can serve to allow a fact-finder to infer a conspiracy.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN6[] **Per Se Rule Tests, Manifestly Anticompetitive Effects**

In a viable complaint under 15 U.S.C.S. § 1, the plaintiff must allege, not only an injury to himself, but an injury to the market as well. Actual anticompetitive effects include, but are not limited to, reduction of output, increase in price, or deterioration in quality. However, there are some methods of restraint that are so inherently and facially anti-competitive that an elaborate and burdensome inquiry into a demonstrable economic impact on competition in a relevant market is not required.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > Boycotts

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN7[] **Horizontal Refusals to Deal, Boycotts**

Allegations supporting an inference of group boycott establish a per se violation of 15 U.S.C.S. § 1 and do not require the complaint to allege injury to the market. A group boycott exists where a group of competitors threaten to withhold business from third parties unless those third parties would help them injure their directly competing rivals. Group boycott can be based on a threat made by a single competitor if the complaint also alleges a horizontal agreement among those threatened to hurt a competitor of the retailer who made the threat. The court must then necessarily determine whether a horizontal agreement has been adequately alleged.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Right to Petition Immunity

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Scope

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN8[] **Sherman Act, Claims**

Alleged violations of the federal antitrust laws cannot be based on defendants' efforts to amend the Oklahoma Constitution. No violation of the Sherman Act, 15 U.S.C.S. § 1, can be predicated upon mere attempts to influence the passage or enforcement of laws. The federal antitrust laws do not regulate the conduct of private individuals in seeking anticompetitive action from the government. Private actors are immune from antitrust liability for petitioning the government, even when the private actors' motives are anticompetitive. This is the case because it is inappropriate to base liability on whether a petitioner has an anticompetitive motive, because that would unduly chill speech. This is referred to as Noerr—Pennington doctrine. Under this doctrine, defendants also cannot be held liable for injuries caused by the effects of such legislative amendment. First Amendment petitioning privileges would indeed be hollow if upon achieving a petitioned-for end the petitioner were then subjected to antitrust liability for his success.

Constitutional Law > State Constitutional Operation

HN9[] **Constitutional Law, State Constitutional Operation**

According to the Oklahoma Supreme Court the plain language of Okla. Const. Art. 28A, § 2(A)(2) is not in conflict with the anticompetitive provisions of the Oklahoma Constitution. Accordingly, business transactions conducted pursuant to and in compliance with Okla. Const. Art. 28A do not, in and of themselves, constitute violations of ***antitrust law***.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN10[] **Sherman Act, Claims**

Because competitors' conduct of securing exclusive contracts with brands can be legitimate and unilaterally prompted by common perceptions of the market, a plaintiff must allege something more than merely parallel behavior to allege a violation of the Sherman Act, 15 U.S.C.S. § 1. Plaintiff must allege plus factors.

Antitrust & Trade Law > Sherman Act > Claims

Evidence > Types of Evidence > Circumstantial Evidence

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN11[] **Sherman Act, Claims**

To overcome a motion to dismiss a complaint alleging a violation of the Sherman Act, 15 U.S.C.S. § 1, plaintiff must show the existence of additional circumstances, often referred to as "plus" factors, which, when viewed in conjunction with the parallel acts, can serve to allow a fact-finder to infer a conspiracy. Plus factors can include a common motive to conspire, evidence that shows that the parallel acts were against the apparent individual economic self-interest of the alleged conspirators, evidence of a high level of interfirm communications, e.g., whether the defendants have exchanged or have had the opportunity to exchange information relative to the alleged conspiracy, as well as product uniformity; and whether the defendants have been uniform in their actions. Circumstantial evidence alone cannot support a finding of conspiracy when the evidence is equally consistent with independent conduct.

Antitrust & Trade Law > Sherman Act > Claims

Evidence > Inferences & Presumptions > Inferences

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

HN12[] **Sherman Act, Claims**

Allegations of communications and meetings among conspirators can support an inference of agreement to allege a violation of the Sherman Act, 15 U.S.C.S. § 1, because they provide the means and opportunity to conspire. Courts have held that a high level of communications among competitors can constitute a plus factor which, when combined with parallel behavior, supports an inference of conspiracy. Facilitating practices may evidence the plus factors necessary to establish the inference of an agreement.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN13[] **Sherman Act, Claims**

A market in which sales power is concentrated in the hands of the few can also facilitate coercion to allege a violation of the Sherman Act, 15 U.S.C.S. § 1. Fewer minds' must meet in a concentrated market.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Antitrust & Trade Law > ... > US Department of Justice Actions > Criminal Actions > Intent

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN14[] **Actual Monopolization, Claims**

The offense of monopoly under § 2 of the Sherman Antitrust Act, 15 U.S.C.S. § 2, has two elements: (1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Sherman Act

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN15[] **Sherman Act, Claims**

Section 2 of the Sherman Antitrust Act, 15 U.S.C.S. § 2, prohibits attempts to monopolize any part of the trade or commerce among the several States.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

Antitrust & Trade Law > ... > US Department of Justice Actions > Criminal Actions > Intent

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN16[] **Sherman Act, Claims**

To state a claim under section 2 of the Sherman Antitrust Act, 15 U.S.C.S. § 2, plaintiff must allege: (1) a relevant market, comprised of geographic market and product market components; (2) a dangerous probability of successful monopolization in the relevant market; (3) the specific intent to monopolize the relevant market; and (4) some conduct in furtherance of the monopolization attempt. If the claim does not adequately allege these elements, it cannot survive dismissal.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN17[] **Sherman Act, Claims**

An important part of the analysis for a claim under § 2 of the Sherman Antitrust Act, 15 U.S.C.S. § 2, relates to the definition of the relevant market, which traditionally has two components: the product market and the geographic market. The relevant geographic market must be sufficiently defined so that the court understands in which part of the country competition is threatened. To assert an adequate geographic market, the area of effective competition must be charted by careful selection of the market area in which the seller operates, and to which the purchaser can practicably turn for supplies.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN18[] **Sherman Act, Claims**

A relevant product market for a claim under § 2 of the Sherman Antitrust Act, 15 U.S.C.S. § 2, consists of products that have reasonable interchangeability for the purposes for which they are produced—price, use and qualities considered. Products have reasonable interchangeability if consumers treat them as acceptable substitutes. In order to evaluate whether one product would be an acceptable substitute for another, courts consider whether there exists cross-elasticity of demand and supply of the two products. Cross-elasticity of demand exists if consumers would respond to a slight increase in the price of one product by switching to another product.

Antitrust & Trade Law > Sherman Act > Claims

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN19[] **Sherman Act, Claims**

The essential elements of a private antitrust claim under § 2 of the Sherman Antitrust Act, 15 U.S.C.S. § 2, must be alleged in more than vague and conclusory terms to prevent dismissal of the complaint on a defendant's Fed. R. Civ. P. 12(b)(6) motion.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

HN20[] **Sherman Act, Claims**

Monopolization under § 2 of the Sherman Antitrust Act, 15 U.S.C.S. § 2, is rarely found when the defendant's share of the relevant market is below 70%.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Sherman Act

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

HN21[] **Sherman Act, Claims**

The market shares of the defendants cannot not be aggregated to establish an attempt to monopolize under § 2 of the Sherman Antitrust Act, 15 U.S.C.S. § 2.

Judges: CLAIRE V. EAGAN, UNITED STATES DISTRICT JUDGE.

Opinion by: CLAIRE V. EAGAN

Opinion

OPINION AND ORDER

Before the Court is defendants' joint motion to dismiss (Dkt. # 47) plaintiff Bryan Hendershot's amended complaint (Dkt. # 41) pursuant to *Federal Rule of Civil Procedure 12(b)(6)*. Plaintiff has filed a response (Dkt. # 53), and defendants filed a reply (Dkt. # 54).

I. BACKGROUND

Plaintiff is the former owner and operator of Boardwalk Distribution Company ("Boardwalk"), a sole proprietorship located in Tulsa, Oklahoma, that distributed wine, spirits, and beer to retailers in Oklahoma. Dkt. # 41, at 1. Plaintiff sold the assets of Boardwalk in mid-2020, but remained obligated to pay Boardwalk's debts. Id. Boardwalk has since ceased operations. Id. In his amended complaint (Dkt. # 41), plaintiff alleges that defendants, horizontal direct competitors of Boardwalk, conspired successfully to effectuate a group boycott of Boardwalk. Id. As a result, plaintiff states he suffered at least a $ 22 million loss. Id. at 2. Plaintiff asserts the following in support of that claim:

This case arises from a 2018 amendment to the Oklahoma Constitution: amendment 28A ("28A"). Prior to the passage of 28A, **[*3]** the sale of wine and liquor in Oklahoma operated on a three-tier system involving brands (which produced the wine or liquor), distributors (which purchased a brand's product at wholesale), and retailers (which sold the product to the public). Both in-state and out-of-state brands were permitted to sell their products in the state of Oklahoma to licensed distributors. Licensed distributors were required to be residents of Oklahoma. Oklahoma law required brands to sell their products to all Oklahoma distributors at the same price. Id. at 5. Distributors then sold and distributed those products to retailers. Id. With limited exceptions, retailers were the only entities allowed to sell alcohol to the public. Id.

Distributors that did not qualify as residents of Oklahoma, but that were seeking to sell alcohol in the state (e.g., national distributors), required a nonresident seller (NRS) license. *Okla. Stat. tit. 37A, § 2-135* (2020); *Okla. Stat. tit. 37, § 524* (2015) (repealed). Such a license, "authorize[d] the holder thereof to solicit and take orders for wine and spirits from the holders of licenses authorized to import the same into this state, and to ship or deliver, or cause to be shipped or delivered, wine and spirits into Oklahoma pursuant **[*4]** to such sales." *Okla. Stat. tit. 37A, § 2-135* (2020). Essentially, a nonresident seller acted as a broker for manufacturers by shipping wine or spirits into Oklahoma to be sold by a licensed Oklahoma distributor.

As of January 1, 2014, there were two dominant distributors of wine and spirits in Oklahoma: Central Liquor Company LP ("Central") and Jarboe Sales Company ("Jarboe"). Central and Jarboe both had relationships with national distributors in order to facilitate the sale of out-of-state brands to retailers within Oklahoma. Southern Glazer's Wine and Spirits, Inc. ("Southern Glazer's") worked primarily with Jarboe, and Republic National Distributing Company, LLC ("Republic") worked primarily with Central. Brian Lidjl d/b/a Southern Glazer's Wine & Spirits of Oklahoma was the non-resident seller (NRS) to Jarboe prior to October 1, 2018. Best Brands of Delaware, LLC, d/b/a Republic National Distributing Company was the NRS to Central.

In 2014, a third distributor emerged: Boardwalk. Dkt. # 41, at 5. Plaintiff attributes Boardwalk's ability to compete against the two major distributors to its increased services to retailers. Those services included making daily deliveries to any retailer in the state, and allowing **[*5]** retailers to place orders late in the day. Id. at 5-6. From 2014 to 2017, Boardwalk's sales revenues increased from $ 22.5 million to $ 97.6 million. Id. at 6. As Boardwalk realized an increase in sales, the market shares of both Central and Jarboe decreased.

Plaintiff alleges that an owner of Central, Brad Naifeh, acknowledged the increased competition Boardwalk created while having lunch with plaintiff prior to Naifeh's death in June 2018. At that lunch, plaintiff alleges that Naifeh handed him a note stating that if Boardwalk did not scale back delivery times to retailers, Central would lower its prices. Id. Plaintiff alleges that Boardwalk did not adjust its delivery practices after receiving that note, and that Central subsequently lowered its prices. Id. Plaintiff also alleges that, at a lunch in Oklahoma City in 2015, Naifeh told plaintiff that, after changes in the law, Boardwalk "would be reduced to selling beer in Northeast Oklahoma." Id. at 16.

In 2015, Jarboe and Central formed a lobbying and public relations entity referred to as The Institute for Responsible Alcohol Policy ("IRAP") to pursue legislative changes that would benefit Central, Jarboe, and their respective NRSs. **[*6]** Id. at 8-9. That same year, Oklahoma state senator Clark Jolly began to conduct meetings regarding revisions to Article 28 of the Oklahoma Constitution.[1] Id. at 8. Boardwalk was not invited to participate in

---

[1] Plaintiff alleges that Senator Jolly was allied with Central and Jarboe and acted for their benefit. However, plaintiff makes no allegations supporting these contentions.

those meetings. Id. at 8. Naifeh, the primary spokesperson for Central, attended those meetings. Id. In one meeting, on May 27, 2015, plaintiff alleges Naifeh stated he wanted Republic to be able to buy into Central, which, at the time, was prohibited by law. Id.

The result of those legislative discussions was a proposed amendment that eliminated the requirement that brands sell to all distributors who wished to buy product. Id. at 9-10. Plaintiff alleges that prior to passage of 28A this change was not discussed openly in the legislative halls or outside them. Id. at 9.[2] Plaintiff explains that this amendment allowed brands represented by Republic and Southern Glazer's, through their NRSs, to sell exclusively to their respective Oklahoma distributors. Id. at 11.

The proposed amendment also sought to change the ownership requirements for Oklahoma distributors. The proposed amendment would allow a corporation, limited liability company, or similar business entity, otherwise prohibited from obtaining a distributor license **[*7]** in Oklahoma, to purchase up to a 50% ownership interest of an Oklahoma distributor.

The amendment was placed on the November 8, 2016 ballot, and it was subsequently passed. As a result, the amendment became effective on October 1, 2018 ("effective date").

Plaintiff alleges that, prior to the effective date, some person or entity (presumably defendants or their predecessors) obtained "letter[s] of designation" from brands, "whereby a [b]rand had to designate the entity it would sell to after the [effective date]." Id. at 13. Plaintiff alleges that "[c]onspirators," worked together to develop these letters "to avoid conflict among them over the nature of the [b]rand commitment, and to assist in the commitment." Id. Plaintiff alleges that, during these maneuvers, defendants discouraged brands from selling to Boardwalk. Id. at 12-13.

Plaintiff further alleges that this pre-amendment activity allowed defendants to obtain commitments from brands to sell wine and spirits only to Central and Jarboe, respectively. Id. at 12. Plaintiff argues that "[t]he alignment of [b]rands with either Republic-Central or Southern-Jarboe occurred not through competition, but from pre-existing relationships, and **[*8]** from leverage, or tacit leverage, derived from the [n]ational [d]istributors." Id. at 13. Plaintiff states that "[l]everage also arose because, if the [b]rand did not sell in Oklahoma to Republic-Central or Southern-Jarboe, the [b]rand knew it was exposed to its sales to or through [the corresponding national distributor] in other states being cut back or eliminated." Id. at 14.

On or about the effective date, Southern Glazer's Wines & Spirits, Inc. finalized a purchase of 49% interest in Jarboe. The purchase resulted in a new entity: Southern Glazer's Wine & Spirits of Oklahoma, LLLP d/b/a Jarboe Sales Company ("Southern-Jarboe"). Also on that day, Republic National Distributing Company LLC finalized a purchase of a 49% interest in Central. The purchase resulted in a new entity: Central Liquor Company L.P. d/b/a RNDC Oklahoma ("Republic-Central"). Id. at 11. At that time, Brian Lidjl d/b/a Southern Glazer's Wine & Spirits of Oklahoma became the non-resident seller to Southern-Jarboe and Best Brands of Delaware, LLC, d/b/a Republic National Distributing Company became the nonresident seller to Republic-Central.

Plaintiff states that the focus of the amended complaint is the conspiracy **[*9]** formed "after the passage of 28A" among the defendants. Id. at 12. Plaintiff specifically states the conspiracy was "to maintain and to secure [b]rands for their companies to sell to the exclusion of Boardwalk and to thereby force Boardwalk from competition with them through a group boycott in the distributor markets for wine and spirits in Oklahoma in violation of the *Sherman Act*, *15 U.S.C. § 1*, and to attempt to monopolize, and to monopolize the markets for wine and spirits in Oklahoma in violation of the Sherman Act, *15 U.S.C. § 2*." Id. at 12. According to plaintiff, "leverage power existed after passage of 28A, was known by the [c]onspirators to exist, and assured the development of the group boycott." Id. Plaintiff alleges that "the [c]onspirators met together after passage of 28A, and on belief discussed their efforts and sought to achieve an acceptable balance between them on wine and spirits to be represented by each. On belief, these meetings also included assessments of Boardwalk's status with any [b]rands representation." Id. at 13.

[2] The Court notes that the proposed amendment does contain the operative language.

Plaintiff further alleges that "[t]o enforce the group boycott, Southern-Jarboe, and on belief, Republic-Central, committed other anticompetitive actions, e.g., a retailer **[*10]** was told that, if he bought from Boardwalk, his delivery days by Southern-Jarboe would be cut back. Further, the [c]onspirators conspired and offered special deals and concessions to grocers to prelude Boardwalk from securing shelf space in their grocery stores." Id. at 16.

Plaintiff states "[t]he group boycott . . .enabled Republic-Central and Southern-Jarboe to control the distribution markets in Oklahoma for wine and for spirits (liquor), or at least 90 percent, or more, of them," and that "Southern-Jarboe and Republic-Central achieved and had a monopoly over distribution of all the top 100 Brands by volume sold in Oklahoma." Id. Plaintiff describes that "Southern-Jarboe is believed to have a monopoly over 14 of the top 25 [b]rands of wine and spirits, and Republic-Central is believed to have a monopoly over the other 11 of the top 25 [b]rands." Plaintiff contends that after the effective date, defendants have attempted to monopolize the product markets in Oklahoma, and have the power to do so. Id.

In support of the allegation, plaintiff submits anecdotal evidence of anticompetitive acts. According to plaintiff:

> A. One high-volume liquor store owner in south Oklahoma City swore under **[*11]** oath that "the two largest wholesalers significantly increased wholesale [prices] for wine and spirits — up by around 18% from before the new law was implemented, according to our numbers." This owner further swore under oath that his deliveries dropped from five days a week to two.
> B: After implementation of 28A an Edmond retailer swore under oath that Central failed to supply two of his best-selling items — McCormick Vodka 80-Proof and Jim Beam — for a period of two weeks. Southern-Jarboe he further swore increased his minimum order charge from $ 10 dollars for an order under $ 100 to $ 30 dollars for an order under $ 200, for no apparent reason.
> C. An El Reno retailer swore that, because of the monopolistic situation, [Republic-Central and Southern-Jarboe] controlled Route 66 Liquors' livelihood and "could easily put [it] out of business if they so desired."
>
> D. The situation post 28A's implementation was especially dire for rural retailers, who need consistent and frequent shipments to stay competitive. Shangri-La and Beverage Service operates a resort on Monkey Island near Afton, Oklahoma. It experienced fewer deliveries and lower product availability since 28A was implemented. Southern-Jarboe **[*12]** and Republic-Central are metropolitan-focused and only deliver to Shangri-La once a week, whereas prior to implementation of 28A, Boardwalk was willing to deliver multiple times a week.
> E. In the opposite corner of the state, an Altus liquor store owner swore by affidavit that his customers suffered because of "infrequent deliveries and poor customer service" from the two dominant wholesalers. For top brands, however, neither he nor Shangri-La [has] a choice.

Id. at 17-18. Plaintiff does not include the sworn statements with his amended complaint.

Plaintiff alleges that the amended complaint demonstrates that defendants have violated *15 U.S.C. §§ 1* and *2*.[3] Plaintiff specifically alleges that defendants have committed a per se violation of *§ 1*, and argues that Southern-Jarboe, or, in the alternative, Republic-Central, is attempting to monopolize the wine or spirits markets in Oklahoma. Id. at 19-20.

II. LEGAL STANDARD

HN1[] "The Court's function on a *Rule 12(b)(6)* motion is not to weigh the evidence that the parties might present at trial, but to assess whether the plaintiff's complaint is legally sufficient to state a claim for which relief may be granted." *Ramer v. Crain, No. 16-CV-754-JED-FHM, 2019 U.S. Dist. LEXIS 161949, 2019 WL 4602816, at *2 (N.D.*

---

[3] Plaintiff also alleges that defendants' actions "constitute a violation of . . . the *Oklahoma Anti Trust Reform Act*," under *Okla. Stat. tit. 79, § 201 et seq.* That may be a true statement, if proven, but that does not state a claim for relief. Plaintiff does not state a separate count or claim based on Oklahoma statutory law. The Court will not infer one.

Okla. Sept. 23, 2019)[4] (citing Brokers' Choice of Am., Inc. v. NBC Universal, Inc., 757 F.3d 1125, 1135 (10th Cir. 2014)). To survive a motion to dismiss, a complaint must contain **[*13]** enough "facts to state a claim to relief that is plausible on its face" and the factual allegations "must be enough to raise a right to relief above the speculative level." Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007) (citations omitted). "A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009). "Once a claim has been stated adequately, it may be supported by showing any set of facts consistent with the allegations in the complaint." Id. at 562. For the purpose of making the dismissal determination, a court must accept all the well-pleaded allegations of the complaint as true and must construe the allegations in the light most favorable to a claimant. Twombly, 550 U.S. at 555; Alvarado v. KOBTV, L.L.C., 493 F.3d 1210, 1215 (10th Cir. 2007); Moffett v. Halliburton Energy Servs., Inc., 291 F.3d 1227, 1231 (10th Cir. 2002).

HN2[] A court need not accept as true those allegations that are conclusory in nature. Erikson v. Pawnee Cnty. Bd. of Cnty. Comm'rs, 263 F.3d 1151, 1154-55 (10th Cir. 2001). "[C]onclusory allegations without supporting factual averments are insufficient to state a claim upon which relief can be based." Hall v. Bellmon, 935 F.2d 1106, 1109-10 (10th Cir. 1991). A motion to dismiss is properly granted when a complaint provides no "more than labels and conclusions, and a formulaic recitation of the elements of a cause of action." Id.

III. RESTRAINT OF TRADE

Plaintiff alleges that defendants have violated **[*14]** § 1 of the Sherman Antitrust Act. **HN3**[] Section 1 of title 15 of the United States Code makes "[e]very contract, . . . or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations" illegal. 15 U.S.C. § 1. "The essence of a claim of violation of [s]ection 1 of the Sherman Act is the agreement itself." Champagne Metals v. Ken-Mac Metals, Inc., 458 F.3d 1073, 1082 (10th Cir. 2006). "Only after an agreement is established will a court consider whether the agreement constituted an unreasonable restraint of trade." Id. (quoting AD/SAT, Div. of Skylight, Inc. v. Associated Press, 181 F.3d 216, 232 (2d Cir.1999)).

HN4[] In order to state a claim under § 1, a complaint must present "enough factual matter (taken as true) to suggest that an agreement was made." Twombly, 550 U.S. at 556. "[A]llegations of parallel business conduct, taken alone, do not state a claim under § 1; plaintiffs must allege additional facts that 'ten[d] to exclude independent self-interested conduct as an explanation for defendants' parallel behavior.'" Id. at 552 (citations omitted). "Asking for plausible grounds to infer an agreement does not impose a probability requirement at the pleading stage; it simply calls for enough fact to raise a reasonable expectation that discovery will reveal evidence of illegal agreement." Id. "[A]n allegation of parallel conduct and a bare assertion of conspiracy will not suffice." Id. Such an allegation, "without some further factual **[*15]** enhancement, . . . stops short of the line between possibility and plausibility of 'entitle[ment] to relief.'" Id. at 557. **HN5**[] "[T]erms like 'conspiracy,' or even 'agreement,' are border-line: they might well be sufficient in conjunction with a more specific allegation . . ." Id. (quoting DM Rsch., Inc. v. Coll. of Am. Pathologists, 170 F.3d 53, 56 (1st Cir. 1999)). "[W]hen the antitrust claim relies solely on circumstantial facts of parallel behavior, the conspiracy is not plausible if in light of common economic experience the alleged conduct is equally likely to result from independent action." Llacua v. W. Range Ass'n, 930 F.3d 1161, 1175 (10th Cir. 2019). Therefore, to overcome a motion to dismiss, "plaintiff must show the existence of additional circumstances, often referred to as 'plus' factors, which, when viewed in conjunction with the parallel acts, can serve to allow a fact-finder to infer a conspiracy." Apex Oil Co. v. DiMauro, 822 F.2d 246, 253-54 (2d Cir. 1987).

HN6[] In a viable complaint, "the plaintiff must allege, not only an injury to himself, but an injury to the market as well." Agnew v. Nat'l Collegiate Ath. Ass'n, 683 F.3d 328, 335 (7th Cir. 2012). "Actual anticompetitive effects

---

[4] Unpublished decisions are not precedential, but they may be cited for their persuasive value. See ***Fed. R. App. 32.1***; ***10th Cir. R. 32.1***.

include, but are not limited to, reduction of output, increase in price, or deterioration in quality." *Jacobs v. Tempur-Pedic Int'l, Inc., 626 F.3d 1327, 1339 (11th Cir. 2010)*. However, "[t]here are some methods of restraint that are so inherently and facially anti-competitive that an elaborate and burdensome inquiry into a demonstrable economic **[*16]** impact on competition in a relevant market is not required." *Total Benefits Plan. Agency, Inc. v. Anthem Blue Cross & Blue Shield, 552 F.3d 430, 434 (6th Cir. 2008)* (citing *Nat'l Soc'y of Prof'l Eng'rs v. United States, 435 U.S. 679, 692, 98 S. Ct. 1355, 55 L. Ed. 2d 637 (1978)*). These are known as per se violations. ***HN7***[] Allegations supporting an inference of group boycott establish a per se violation of *§ 1* and do not require the complaint to allege injury to the market.

A group boycott exists where "[a] group of competitors threaten[] to withhold business from third parties unless those third parties would help them injure their directly competing rivals." *NYNEX Corp. v. Discon, Inc., 525 U.S. 128, 135, 119 S. Ct. 493, 142 L. Ed. 2d 510 (1998)*. Group boycott can be based on a threat made by a single competitor if the complaint also alleges "a horizontal agreement among those threatened . . . to hurt a competitor of the retailer who made the threat." Id. The Court must then necessarily determine whether a horizontal agreement has been adequately alleged.

In their joint motion to dismiss (Dkt. # 47), defendants argue that plaintiff failed to state a claim under *§ 1*. Defendants state that plaintiff did not "plausibly allege an agreement in restraint of trade" and that plaintiff "fails to allege sufficient facts showing an agreement to boycott Boardwalk." Dkt. # 47, at 8. Specifically, defendants note that plaintiff's claim cannot rest on defendants' efforts to amend the Oklahoma constitution, **[*17]** as such claims are barred by federal law. Id. at 5.

Plaintiff responds, arguing that paragraphs 5-33 of the amended complaint show "openly concerted acts," Dkt. # 53, at 14, and that the group boycott is adequately alleged in paragraphs 35-50. Id. Plaintiff argues he satisfies the plus factor description of defendants' actions as "largely inconsistent with unilateral conduct but largely consistent with explicitly co-ordinated action." Id. at 13. Plaintiff further states that he stands on his allegations on group boycott, as made in paragraph 56 of the amended complaint. Id. Plaintiff finally argues that any application of the rule of reason analysis is not applicable in this case. Id.

A. Legislative Action

The Court agrees with the defendants that, insofar as paragraphs 5-33 detail the legislative lobbying efforts of defendants and their predecessors, they cannot form the basis of an antitrust violation. ***HN8***[] As an initial matter, violations of the antitrust laws cannot be based on defendants' efforts to amend the Oklahoma Constitution. *E.R.R. Presidents Conference v. Noerr Motor Freight, Inc., 365 U.S. 127, 135, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961)* ("[N]o violation of the [Sherman] Act can be predicated upon mere attempts to influence the passage or enforcement of laws."); *United Mine Workers of Am. v. Pennington, 381 U.S. 657, 669, 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965)*; see also *City of Columbia v. Omni Outdoor Advert., Inc., 499 U.S. 365, 379-80, 111 S. Ct. 1344, 113 L. Ed. 2d 382 (1991)* ("The federal antitrust **[*18]** laws also do not regulate the conduct of private individuals in seeking anticompetitive action from the government."). "Private actors are immune from antitrust liability for petitioning the government, even when the private actors' motives are anticompetitive." *Sanders v. Brown, 504 F.3d 903, 912 (9th Cir. 2007)*. This is the case because "it is inappropriate to base liability on whether a petitioner has an anticompetitive motive, because that would unduly chill speech." Id. This is referred to as Noerr—Pennington doctrine. *Noerr, 365 U.S. at 135*; *Pennington, 381 U.S. at 669*. Under this doctrine, defendants also cannot be held liable for injuries caused by the effects of such legislative amendment. "*First Amendment* petitioning privileges would indeed be hollow if upon achieving a petitioned-for end the petitioner were then subjected to antitrust liability for his success." *Greenwood Utils. Comm'n v. Miss. Power Co., 751 F.2d 1484, 1505 (5th Cir. 1985)*; see also *Sanders, 504 F.3d at 914*.

HN9[] According to the Oklahoma Supreme Court "the plain language of Article 28A, § 2(A)(2) is not in conflict with the anticompetitive provisions of the [Oklahoma] Constitution." *Inst. for Responsible Alcohol Pol'y v. State ex rel. Alcoholic Beverage L. Enf't Comm'n, 2020 OK 5, 457 P.3d 1050, 1057 (Okla. 2020)* (citing *Okla. Const. art. V, §*

44 & *§ 51*). Accordingly, business transactions conducted pursuant to and in compliance with 28A do not, in and of themselves, constitute violations of ***antitrust law***. Plaintiff is advised that exclusive contracts with brands are permitted in the post-amendment wine **[*19]** and spirits distribution schemes, and therefore allegations that exclusive contracts are in violation of *§§ 1* or *2* of the Sherman Act are without merit.

However, as noted by plaintiff in his response, such immunity extends only as far as the defendant's legislative efforts, i.e., defendants are protected only for their efforts to change the Oklahoma beverage laws to allow exclusive contracts. To the extent plaintiff alleges that, in addition to legislative discussions, there were also anti-competitive discussions or agreements among defendants not to pursue one another's brands, such allegations are not protected by the *Noerr-Pennington* doctrine. See, e.g., *Webb v. Utah Tour Brokers Association, 568 F.2d 670 (10th Cir. 1977)*.

B. Parallel Conduct

Although the Court will not consider any allegations that petitioning for 28A is violative of the Sherman Act, plaintiff alleges that other unlawful conduct occurred. The Court now assesses whether such conduct is evidence of an agreement.

Plaintiff asserts that the activities alleged in paragraph 36 require an agreement. Paragraph 36 alleges that "[l]eading up to 28A's implementation on the [effective date], each of Central and Jarboe and their respective NRSs solicited as necessary, and obtained commitments from [b]rands **[*20]** to sell wine and spirits only to Republic-Central, or to Southern-Jarboe, respectively after the [effective date]," and alleges in those efforts that both Central and Jarboe "discourage[d] the opportunity available to the [b]rands under 28A to sell to Boardwalk," when Cental and Jarboe "knew that a commitment from a [b]rand to Central or Jarboe, or to their successor entities, was a foregone conclusion, because of pre-existing sales relations." Dkt. # 41, at 12-13. Contrary to plaintiff's assertion, those allegations, although more specific than the others to which plaintiff points, do not suggest behavior that would require an agreement. Those actions do not demonstrate anything other than the natural business practice for each Oklahoma distributor to secure distribution contracts with brands with which a co-owner of each respective Oklahoma distribution company had already established exclusive national deals. "[N]othing . . . intimates that [this action] was anything more than the natural, unilateral reaction of each [defendant] intent on preserving its regional dominance. The complaint's general collusion premise fails to answer the point that there was no need for joint encouragement," **[*21]** as "each [defendant] had reason" to secure their own exclusive deals, "regardless of the other [defendant's] actions." *Twombly, 550 U.S. at 546-47*.

HN10[] Because competitors' conduct of securing exclusive contracts with brands can be legitimate and "unilaterally prompted by common perceptions of the market," a plaintiff must allege "something more than merely parallel behavior." *Id. at 554*. Plaintiff must allege plus factors.

C. Plus Factors

HN11[] As stated above, to overcome a motion to dismiss, "plaintiff must show the existence of additional circumstances, often referred to as 'plus' factors, which, when viewed in conjunction with the parallel acts, can serve to allow a fact-finder to infer a conspiracy." *Apex Oil Co. v. DiMauro, 822 F.2d 246, 253-54 (2d Cir. 1987)*. Plus factors can include "a common motive to conspire, evidence that shows that the parallel acts were against the apparent individual economic self-interest of the alleged conspirators, [] evidence of a high level of interfirm communications," *Mayor & City Council of Baltimore, Md. v. Citigroup, Inc., 709 F.3d 129, 136 (2d Cir. 2013)*, (e.g., "whether the defendants have exchanged or have had the opportunity to exchange information relative to the alleged conspiracy,") as well as "product uniformity; [and] whether the defendants have been uniform in their actions." *Hyland v. HomeServices of Am., Inc., 771 F.3d 310, 320 (6th Cir. 2014)*. "[C]ircumstantial evidence alone cannot support a **[*22]** finding of conspiracy when the evidence is equally consistent with independent conduct." Id.

Defendants allege that plaintiff asserts no plus factors. Dkt. # 47, at 10. In response (Dkt. # 53), plaintiff refutes this contention. Dkt. # 53, at 12-13. Plaintiff alleges that certain actions taken by defendants to secure exclusive contracts occurred prior to the effective date, specifically, the concerted acts of drafting letters of designation, along with defendants' meetings to achieve an artificial distribution of competing brands between the distributor defendants, constitute plus factors. Plaintiff also asserts that the allegations of price increases in combination with service cutbacks, and threats to retailers targeting Boardwalk's ability to compete, constitute sufficient allegations of plus factors. Id. at 13-14.

Plaintiff alleges in the amended complaint that defendants met to discuss dividing up brands per distributor; that defendants met frequently while lobbying for 28A and after its passage; and that defendants communicated frequently via an industry group they created (which excluded Boardwalk) during that process. Dkt. # 41, at 8-9. Plaintiff asserts that these allegations **[*23]** are sufficient to indicate a high level of interfirm communications. ***HN12***[] "Allegations of communications and meetings among conspirators can support an inference of agreement because they provide the means and opportunity to conspire." *SD3, LLC v. Black & Decker (U.S.) Inc., 801 F.3d 412, 432 (4th Cir. 2015)*, as amended on reh'g in part (Oct. 29, 2015). "Courts have held that a high level of communications among competitors can constitute a plus factor which, when combined with parallel behavior, supports an inference of conspiracy." *Blomkest Fertilizer, Inc. v. Potash Corp. of Saskatchewan, 203 F.3d 1028, 1033 (8th Cir. 2000)*. In SD3, LLC, plaintiff identified a meeting at which the alleged conspiracy was formed, as well as "phone calls, meetings, and discussions among the various conspirators." *801 F.3d at 432*. Those allegations, the court found, identified "a practice, not illegal in itself, that facilitates [an antitrust conspiracy] that would be difficult for the authorities to detect." Id. "Facilitating practices . . . may evidence the plus factors necessary to establish the inference of an agreement." Id. (quoting Sharon E. Foster, LIBOR Manipulation and Antitrust Allegations, *11 DePaul Bus. & Comm. L.J. 291, 304 (2013)*).

Here, although plaintiff does not allege the exact meeting at which the alleged conspiracy was formed, plaintiff does allege that there were multiple meetings between defendants from **[*24]** 2015 through 2018 and that during those meetings agreements not to compete with one another, in an effort create advantageous brand contracts and to exclude Boardwalk, were made. Such allegations are not based on lobbying for the passage of 28A, but rather are based on the simultaenous or subsequent anti-competitive agreement not to compete for brands associated with defendants' respective national distributors. See, e.g., *In re High-Tech Emp. Antitrust Litig., 856 F. Supp. 2d 1103, 1123 (N.D. Cal. 2012)* (finding plaintiff successfully alleged that agreements among competitors not to compete for each others' employees were anticompetitive). As such, they are not barred by *Noerr*-*Pennington* and tend to show interfirm communications that establish the inference of an agreement.

Plaintiff also alleges that defendants' conduct of not pursuing contracts with each other's brands constitutes evidence of an agreement in restraint of trade. Dkt. # 53, at 22. This sort of conduct, without an express agreement, could be factually neutral, as it is the type of conduct that was alleged in *Twombly* (holding that a competitor's reticence to encroach on a competitor's territory was not evidence of collusion; instead it was the natural tendency of that formerly-monopolistic industry **[*25]** to "sit[] tight, expecting their neighbors to do the same thing." *550 U.S. at 568*.) However, here, plaintiff alleges that the conduct was accompanied by concerted acts to determine which brands would be exclusively sold by which distributor. Dkt. # 41, at 13. Further, the industry here is different from that in Twombly in that it was not a formerly government-sanctioned monopoly.

Plaintiff also alleges that price increases and simultaneous service cutbacks are indicative of a common motive to conspire. Dkt. # 53, at 21-22. Defendants do not offer a common economic rationale that would tend to refute plaintiff's allegation that price increases accompanied by service reductions by one firm should be rationally followed by price increases and service reduction by another firm. In a competitive market, one would assume that a competitor that was not able to adequately supply a retailer would become disfavored in short order and lose business to the other competitors, especially where other competitors were equipped to fill the demand created by the other distributor.

In reply (Dkt. # 54) to plaintiff's assertion these acts are evidence of a common motive to conspire, defendants assert that price increases **[*26]** (and, presumably, service cutbacks) or attempts to limit Boardwalk's access to shelf space "have nothing to do with the alleged parallel conduct—and thus do not suggest an agreement to boycott Boardwalk." Dkt. # 54, at 8. However, these maneuvers evince a common motive for boycotting Boardwalk. Defendants' alleged agreement not to compete for one another's brands would leave brands with the choice to either work solely with a distributor with national ties, or to jeopardize that relationship by rejecting the terms offered by that distributor and contract with Boardwalk and/or other smaller distributors. By artificially eliminating the only other major national distributor from the pool of competing distributors, brands had less leverage to make favorable contracts. Therefore, defendants arguably agreed to give each other artificially superior positions with brands, and by using those superior positions to push Boardwalk from retail stores, defendants' alleged actions in fact created the power to act in concert to raise prices and decrease service availability, while still maintaining each defendants' respective pre-Boardwalk distribution market share for wine and spirits.

Further, while **[*27]** plaintiff does not expressly point to the structure of the market for wine and spirits as a plus factor, plaintiff does state that defendants overwhelmingly dominate the market he alleged (top 100 brands by volume of both wine and spirits). ***HN13***[] "A market in which sales power is concentrated in the hands of the few can also facilitate coercion. Fewer 'minds' must 'meet' in a concentrated market." *SD3, LLC, 801 F.3d at 432* (finding the defendants' control of 85% of the market as a relevant plus factor). Here, plaintiff alleges that defendants have control over at least 90% or more of the market for distribution of wine and spirits. Dkt. # 41, at 16. Accordingly, the Court finds that the allegations of the concentrated structure of the market constitutes a plus factor.

Some of plaintiff's allegations suffer from a lack of precision regarding exactly who was part of one or more conspiracies at a given time and precisely when agreements were made to pursue the objectives of those conspiracies. However, the allegations of defendants' parallel conduct of securing exclusive brand contracts, while allegedly agreeing not to compete for each others' brands (Dkt. # 41, at 13), in conjunction with: i) allegations of high inter-firm **[*28]** communications (specifically the legislative meetings, and the creation of an industry group that excluded Boardwalk, a major competitor) (id. at 8-9); ii) allegations that both firms increased prices and decreased service availability after securing exclusive contracts with brands (id. at 17); iii) allegations that special deals were offered to preclude Boardwalk, and not others, from shelf-space[5] (id. at 16); and iv) the concentrated market structure apparent from the face of the amended complaint, push the conspiracy among defendants alleged in the complaint from possible to plausible.

IV. MONOPOLIZATION

Plaintiff also alleges that defendants have violated *§ 2* of the Sherman Antitrust Act, which prohibits attempted monopolization. *15 U.S.C. § 2*.[6] ***HN14***[] "The offense of monopoly under [*section 2*] has two elements: (1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*.

HN16[] To state a claim, plaintiff must allege: (1) a relevant market, comprised of geographic market and product market components; (2) a dangerous probability of successful **[*29]** monopolization in the relevant market; (3) the specific intent to monopolize the relevant market; and (4) some conduct in furtherance of the monopolization attempt. *United States v. AMR Corp., 335 F.3d 1109, 1113 (10th Cir. 2003)*; *Full Draw Prods. v. Easton Sports, Inc., 182 F.3d 745, 756 (10th Cir. 1999)*; *TV Commc'ns Network, Inc. v. Turner Network Television, Inc., 964 F.2d 1022, 1025 (10th Cir. 1992)*; *Bacchus Indus., Inc. v. Arvin Indus., Inc., 939 F.2d 887, 893 (10th Cir. 1991)*. If the claim does not adequately allege these elements, it cannot survive dismissal.

---

[5] Because the Court finds there is more than one plus factor alleged, the Court finds a conspiracy has been alleged. As a result, although only one competitor is having been charged expressly with this conduct in the amended complaint, this action was likely taken in furtherance of the attempts to eliminate Boardwalk as a competitor, as part of the conspiracy.

[6] ***HN15***[] *Section 2* of the Sherman Antitrust Act prohibits "attempt[s] to monopolize ... any part of the trade or commerce among the several States . . . ."

In their joint motion to dismiss, defendants argue that plaintiff fails to allege a claim under *§ 2* for several reasons. Defendants assert plaintiff fails to plead a relevant market or that either Republic-Central or Southern-Jarboe has a monopoly within that market (or is likely to succeed becoming a monopoly). Dkt. # 47, at 7-8. Defendants state that plaintiff also fails to allege facts suggesting that either Southern-Jarboe or Republic-Central engaged in any "exclusionary conduct." Id. Defendants also argue that plaintiff cannot maintain a claim under *section 2* against both distributors "because only one firm can be a monopolist." Id. (citing *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 454, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993)*).

In response, plaintiff asserts that he has pled all elements of monopoly. Plaintiff asserts he has pled that defendants attempted to monopolize the "distributor product market for wine or the distributor product market for spirits (liquor), or both markets, in the state of Oklahoma and in any sub markets **[*30]** as may be discovered." Dkt. # 53, at 24-25. Plaintiff further notes that "[w]ine has a completely different manufacturing process from spirits, and the products in each separate market are largely interchangeable." Id. at 25. Plaintiff alleges defendants engaged in exclusionary conduct by alleging group boycott. Id. at 26. Finally, plaintiff alleges that his *§ 2* claim can proceed against bother Republic-Central and Southern-Jarboe in the alternative.

A. Relevant Market

HN17[] "An important part of the analysis relates to the definition of the 'relevant market,' which traditionally has two components: the product market and the geographic market." *Sky Angel U.S., LLC v. Nat'l Cable Satellite Corp., 947 F. Supp. 2d 88, 102 (D.D.C. 2013)*. "[T]he relevant geographic market must be sufficiently defined so that the Court understands in which part of the country competition is threatened." *Id. at 104*. To assert an adequate geographic market, "[t]he area of effective competition . . . must be charted by careful selection of the market area in which the seller operates, and to which the purchaser can practicably turn for supplies." *Tampa Elec. Co. v. Nashville Coal Co., 365 U.S. 320, 327, 81 S. Ct. 623, 5 L. Ed. 2d 580 (1961)*.

HN18[] "A relevant product market consists of 'products that have reasonable interchangeability for the purposes for which they are produced—price, use and qualities considered.'" **[*31]** *PepsiCo, Inc. v. Coca-Cola Co., 114 F. Supp. 2d 243, 248 (S.D.N.Y. 2000)*, aff'd, *315 F.3d 101 (2d Cir. 2002)* (quoting *United States v. E.I. duPont de Nemours & Co., 351 U.S. 377, 404, 76 S. Ct. 994, 100 L. Ed. 1264 (1956)*). "Products have reasonable interchangeability if consumers treat them as 'acceptable substitutes.'" Id. (citing *Federal Trade Comm'n v. Cardinal Health, Inc., 12 F. Supp. 2d 34, 45 (D.D.C. 1998)*). "In order to evaluate whether one product would be an acceptable substitute for another, courts consider whether there exists cross-elasticity of demand and supply of the two products." Id. "Cross-elasticity of demand exists if consumers would respond to a slight increase in the price of one product by switching to another product." *AD/SAT, Div. of Skylight, Inc. v. Associated Press, 181 F.3d 216, 227 (2d Cir. 1999)*.

Plaintiff has alleged a plausible geographic market, Oklahoma, where the markets for both wine and spirits are regulated by state licensing requirements, thus restricting market access to outside competitors.

With respect to the relevant product market, plaintiff asserts that both wine and spirits are interchangeable within their respective markets. Plaintiff also asserts that "[a]s of the time when statistics were last available, Southern-Jarboe and Republic-Central achieved and had a monopoly over distribution of all the top 100 [b]rands by volume sold in Oklahoma. More specifically, Southern-Jarboe is believed to have a monopoly over 14 of the top 25 [b]rands of wine and spirits, and Republic-Central is believed to have **[*32]** a monopoly over the other 11 of the top 25 [b]rands." Dkt. # 41, at 16.

In light of the allegations above, the Court finds that plaintiff has not alleged a relevant product market. To the extent plaintiff seeks to allege a new market in his *§ 2* claim (i.e., "the top 25 brands"), plaintiff fails to adequately do so. ***HN19***[] "The essential elements of a private antitrust claim must be alleged in more than vague and conclusory terms to prevent dismissal of the complaint on a defendant's 12(b)(6) motion." *Crane & Shovel Sales Corp. v. Bucyrus-Erie Co., 854 F.2d 802, 805 (6th Cir. 1988)*. Plaintiff's allegations do not meet that threshold for three main reasons. First, plaintiff does not specify how "the top 25 brands" were selected (By volume sold or by revenue? Is this nationally or within Oklahoma?). Next, plaintiff does not differentiate between the markets for wine and spirits when outlining the above "top 25" breakdown. Finally, plaintiff's allegations do not explain why he chose the top 25 as a cut off. As a result, the Court finds the allegations of the "top 25 brands" market are too vague and conclusory to adequately state a relevant market in which either defendant holds a monopoly.

B. Attempt to Monopolize

Even ignoring the deficiencies of plaintiff's "top 25" market definition, **[*33]** plaintiff's allegations still fail. Plaintiff alleges that, at most, Southern-Jarboe controls 56% of "top 25" alleged market. ***HN20***[] "[M]onopolization is rarely found when the defendant's share of the relevant market is below 70%." *Exxon Corp. v. Berwick Bay Real Est. Partners, 748 F.2d 937, 940 (5th Cir. 1984)*; see *Colo. Interstate Gas Co. v. Natural Gas Pipeline Co. of Am., 885 F.2d 683, 694 n.18 (10th Cir. 1989)*. The Court does not find that this is one of the rare instances in which claims of monopoly survive below that threshold. Plaintiff does not allege that either distributor defendant has a growing market share that presents a danger of overtaking competitors. In fact, the allegations in plaintiff's complaint tend to demonstrate that defendants' respective market shares are not likely to change due to the *§ 1* agreement alleged.

If the Court instead relies on plaintiff's allegation that defendant distributors control 90% of the markets for wine and spirits (sold by volume in Oklahoma), plaintiff's claim still fails. ***HN21***[] "[T]he market shares of [the defendants] [cannot] not be aggregated to establish an attempt to monopolize." *H.L. Hayden Co. of New York, Inc. v. Siemens Med. Sys., Inc., 879 F.2d 1005, 1018 (2d Cir. 1989)*. Therefore, the alleged 90% market share cannot be attributed to either defendant. Further, plaintiff has not alleged that either defendant holds a monopoly over the other (let alone in what proportion), and there is nothing to suggest that one **[*34]** or the other does. In support of this element, plaintiff provides nothing more than blanket allegations that either defendant has exclusive deals with some portion of the top 100 brands by volume in Oklahoma. Dkt. # 53, at 27-28. Such "bare assertions [are] too conclusory to plausibly establish market power in any context." *FTC v. Facebook, Inc., No. CV 20-3590 (JEB), 2021 U.S. Dist. LEXIS 119540, 2021 WL 2643627, at *12 (D.D.C. June 28, 2021)* (collecting cases). Without any evidence or allegations that either defendant has a dominant position in the market, plaintiff's claim cannot survive.

IT IS THEREFORE ORDERED that defendants' joint motion to dismiss (Dkt. # 47) is **denied** as to count 1, and **granted** as to count 2. Count 2 is hereby **dismissed**.

DATED this 9th day of August, 2021.

Judges: COLIN S. BRUCE, UNITED STATES DISTRICT JUDGE.

Opinion by: COLIN S. BRUCE

Opinion

ORDER

Plaintiff, Midwest Renewable Energy, LLC, on behalf of all others similarly situated, filed a Class Action Complaint (#1) against Defendant Archer Daniels Midland Company ("ADM"), alleging that Defendant violated *Section 2* of the Sherman Antitrust Act, *15 U.S.C. § 2*. ADM filed a Motion to Dismiss (#14) on October 2, 2020. Plaintiff filed an Opposition to Defendant's Motion to Dismiss (#25) on October 23, 2020, and ADM filed a Reply in Support of its Motion to Dismiss (#43) on January 22, 2021.

For the following reasons, ADM's Motion to Dismiss (#14) is GRANTED.

I. BACKGROUND

The following background **[*2]** facts are taken from the allegations in Plaintiff's Complaint (#1). At this stage of the proceedings, the court must accept as true all material allegations in the Complaint, drawing all reasonable inferences therefrom in Plaintiff's favor. See *Lewert v. P.F. Chang's China Bistro, Inc., 819 F.3d 963, 966 (7th Cir. 2016)*.

This is a putative class action involving alleged unlawful conduct by ADM to obtain monopoly power to depress ethanol prices. The alleged conduct occurred at the Kinder Morgan terminal in Argo, Illinois ("Argo Terminal"). Trading for ethanol at the Argo Terminal during the "Market-on-Close" ("MOC") period from 1:00 P.M. to 1:30 P.M. each trading day determines the Chicago Benchmark Price created by S&P Global Platts ("Platts"). Platts' Chicago Benchmark Price sets the value of Chicago Ethanol Derivatives (i.e., ethanol futures contracts and options contracts traded on the Chicago Mercantile Exchange). Trades at the Argo Terminal are also used by the Oil Price Information Service ("OPIS") in its reports of daily Chicago OPIS Prices.

Plaintiff, the other proposed class members, and ADM all produce ethanol. They are competitors in the production and "First Level Sale"[1] of ethanol. Plaintiff and other ethanol producers make First Level Sales Contracts **[*3]** that specify prices in a formula based, in whole or in part, on Platts' Chicago Benchmark Prices, Chicago Ethanol Derivatives Prices, or Chicago OPIS Prices determined by sales at the Argo Terminal.

Prior to November 2017, ADM had been a predominant buyer of ethanol at the Argo Terminal. Plaintiff alleges that, from November 1, 2017, until an unknown date believed to be after September 4, 2019, ADM became a predominant seller at the Argo Terminal, flooding Argo with ethanol that it intentionally sold at uneconomically low prices in order to benefit its outsized short positions in ethanol derivatives.[2] The alleged conduct by ADM included uneconomically shipping ethanol to Argo when the prices at the Argo Terminal were already lower than those at other terminals; selling ethanol at the Argo Terminal for less than ADM's variable cost to produce or obtain the ethanol; selling during the MOC even when ADM did not have physical ethanol to deliver to satisfy the sales contracts; and aggressively reducing its prices during the MOC window to capture 90 to 100 percent of sales during that window.

Plaintiff alleges that ADM's conduct resulted in a decrease of ethanol prices at the Argo Terminal **[*4]** and an accompanying decrease in the Chicago Ethanol Derivative Prices determined by the daily MOC prices at the Argo Terminal. Plaintiff alleges that these price decreases produced substantial gains for ADM on its short positions in Chicago Ethanol Derivatives, sufficient to compensate ADM for its losses incurred at Argo.

Plaintiff alleges that it and other class members incurred losses when they sold ethanol pursuant to First Level Sales Contracts in which prices were based upon a formula incorporating the depressed MOC prices at the Argo Terminal.

II. DIMISSAL UNDER *RULE 12(B)(6)*

Under *Rule 8(a)(2) of the Federal Rules of Civil Procedure*, a complaint must include "a short and plain statement of the claim showing that the pleader is entitled to relief." *Fed. R. Civ. P. 8(a)(2)*. In order to survive a motion to dismiss under *Rule 12(b)(6)*, "a complaint must contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*, quoting *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*.

In assessing a motion to dismiss, the court must draw all reasonable inferences in favor of the plaintiff but need not accept as true any legal assertions, threadbare recitals of the elements of a cause of action, or conclusory statements. See *Vesely v. Armslist LLC, 762 F.3d 661, 664-65 (7th Cir. 2014)*.

III. ANALYSIS

Plaintiff's Complaint contains two counts: Monopoly **[*5]** and Attempted Monopoly, both in violation of *Section 2* of the Sherman Antitrust Act.

---

[1] "First Level Sale" is the first sale of ethanol by a producer, as compared to the resale of ethanol by someone other than the producer.

[2] A short position is a trading position where a derivative investment earns money for a trader if the price of the underlying commodity decreases.

Private civil actions to enforce the Sherman Antitrust Act are allowed under the Clayton Act, *15 U.S.C. § 15*. *Sanner v. Board of Trade of City of Chicago, 62 F.3d 918, 926 (7th Cir. 1995)*. To recover under the Clayton Act, a plaintiff must first prove "antitrust injury," which is an "injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*.

The offense of monopoly under *Section 2* of the Sherman Act has two elements: "(1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*.

To demonstrate attempted monopoly, a plaintiff must prove "a dangerous probability of achieving monopoly power" as the first element, while still demonstrating anticompetitive conduct intended to achieve monopoly power as the second element. *Spectrum Sports v. McQuillan, 506 U.S. 447, 456, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993)*.

In its Motion to Dismiss (#14), ADM argues that Plaintiff did not allege that it suffered an antitrust injury; Plaintiff did not adequately plead that ADM has achieved monopoly power or a dangerous probability of achieving monopoly power; and Plaintiff **[*6]** did not adequately plead that ADM engaged in anticompetitive conduct.

A. Antitrust Injury

In paragraph 14 of the Complaint, entitled "Antitrust Injury And Damages," Plaintiff alleges the following:

> Through the conduct alleged in this Complaint, ADM did artificially depress each of the following: prices, bids and offers in the Argo market; the OPIS Chicago Prices; the Chicago Benchmark Prices; and Chicago Ethanol Derivatives Prices. Plaintiff and Class Members made their First Level Sales at one or more of the depressed prices and, therefore, received less for their ethanol than they would have received in the absence of ADM's unlawful conduct.

ADM argues that these allegations do not constitute antitrust injury because antitrust injury is a loss that results "from acts that reduce output or *raise* prices." *Chicago Professional Sports v. NBA, 961 F.2d 667, 670 (7th Cir. 1992)* (emphasis added). ADM maintains that an antitrust injury cannot be premised on lower prices, as alleged in Plaintiff's Complaint.

The Seventh Circuit has held that a "plaintiff who wants something, such as less competition or higher prices, that would injure consumers, does not suffer antitrust injury." *U.S. Gypsum Co. v. Indiana Gas, Inc., 350 F.3d 623, 627 (7th Cir. 2003)*. Likewise, the Supreme Court has held:

> Antitrust injury does not arise for purposes **[*7]** of *§ 4* of the Clayton Act ... until a private party is adversely affected by an *anticompetitive* aspect of the defendant's conduct, see *Brunswick, 429 U.S., at 487, 97 S.Ct., at 696*; in the context of pricing practices, only predatory pricing has the requisite anticompetitive effect.... Low prices benefit consumers regardless of how those prices are set, and so long as they are above predatory levels, they do not threaten competition. Hence, they cannot give rise to antitrust injury.

Atlantic Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 339-40, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990) (emphasis in original).

Therefore, the injury alleged in Plaintiff's Complaint does not constitute an antitrust injury sufficient to support its claim under the Clayton and Sherman Antitrust Acts, unless Plaintiff alleges that ADM depressed prices below a predatory level. "Predatory pricing is a three-stage process: Low prices, followed by the exit of producers who can no longer make a profit, followed by monopoly prices." *Wallace v. International Business Machines Corp., 467 F.3d 1104, 1106 (7th Cir. 2006)*.

"To make out a predatory-pricing claim, the plaintiff must establish not only that the defendant has sold products below cost but also that exit from the market has occurred or is imminent, enabling the aggressor to recoup by setting monopoly prices that injure consumers." *R.J. Reynolds Tobacco Co. v. Cigarettes Cheaper, 462 F.3d 690, 695 (7th Cir. 2006)*; see also *Schor v. Abbott Laboratories, 457 F.3d 608, 613 (7th Cir. 2006)* ("[T]he Supreme Court [has] held that low prices **[*8]** are lawful, even if the seller has considerable market power, unless rivals have been driven out of the market and recoupment is either ongoing or imminent.").

In response to ADM's Motion to Dismiss, Plaintiff admits that it "does not seek to allege a traditional predatory pricing claim."

Plaintiff argues that ADM has been able to recoup its losses from below-cost sales of physical ethanol at the Argo Terminal not by raising prices after excluding other competitors, but rather through its gains on short positions in the ethanol futures market. The Seventh Circuit has held that, in the case of certain commodities, "[t]he futures market and the cash market ... are ... so closely related that the distinction between them is of no consequence to antitrust standing analysis." *Sanner, 62 F.3d at 929* (internal quotations omitted). Therefore, the court finds Plaintiff's theory of recoupment is sufficient at this stage, even if it does not follow the traditional predatory pricing scheme.

However, even accounting for Plaintiff's alternative theory of recoupment, the Complaint still does not contend that Plaintiff "has been knocked out of the market or is in imminent danger of leaving," or that other ADM competitors **[*9]** "tried and failed to enter the marketplace" or already "exit[ed] the market." *R.J. Reynolds Tobacco, 462 F.3d at 696*; *VBR Tours, LLC v. National Railroad Passenger Corp., 2015 U.S. Dist. LEXIS 4742, 2015 WL 225328, at *5 (N.D. Ill. Jan. 15, 2015)*. Rather, as indicated above, in paragraph 14 of the Complaint Plaintiff alleges that it and other proposed class members continued to make their sales, just at depressed prices.

The Complaint does contain boilerplate language alleging that ADM's manipulation of prices caused other market participants to face a "barrier to entry." But boilerplate language is not a sufficient allegation of antitrust injury. See, e.g., *VBR Tours, 2015 U.S. Dist. LEXIS 4742, 2015 WL 225328, at *5* ("[T]he complaint states that [defendant]'s ability to underprice its competitors has created an 'insurmountable' barrier to entry, chilling competition, yet [plaintiff] provides no example of a potential competitor who tried and failed to enter the marketplace, nor does it cite to on[e] example of an existing competitor exiting the market. In the absence of any such information, the Court is left with general statements that [defendant] will cause antitrust injury by reducing prices. General allegations of low prices are insufficient to state a claim.").

Plaintiff apparently suggests that a barrier to entry arose because ADM was violating the Commodity Exchange Act ("CEA"), *7 U.S.C. § 1 et seq.*, whereas competitors **[*10]** could not lawfully engage in similar conduct. In fact, Plaintiff's Complaint admittedly relies upon the complaint and other filings in *AOT Holding AG v. Archer Daniels Midland Co.*, case no. 19-CV-2240 (C.D. Ill.), which is a case brought pursuant to the CEA. Again, however, Plaintiff must allege *antitrust* injury, which is an "injury of the type the *antitrust* laws were intended to prevent." *Brunswick Corp., 429 U.S. at 489* (emphasis added); see also *Associated General Contractors of California, Inc. v. California State Council of Carpenters, 459 U.S. 519, 534, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)* ("Congress did not intend the antitrust laws to provide a remedy in damages for all injuries that might conceivably be traced to an anti-trust violation."). ***Antitrust law*** is "designed to protect consumers from producers, not to protect producers from each other." *Ehredt Underground, Inc. v. Commonwealth Edison Co., 90 F.3d 238, 240 (7th Cir. 1996)*. Here, Plaintiff may not rely on alleged violations of the CEA in order to allege antitrust injury sufficient to support its claims under the Clayton and Sherman Antitrust Acts.

Because the Complaint does not adequately allege antitrust injury, it is DISMISSED without prejudice.

B. Monopoly Power

As indicated above, to establish the first element of monopoly or attempted monopoly under *Section 2* of the Sherman Act, a plaintiff must show that a defendant either possesses monopoly power in the relevant market or that there **[*11]** is a dangerous probability of defendant achieving monopoly power.

ADM argues that, even if Plaintiff had alleged an antitrust injury, Plaintiff did not adequately plead that ADM has achieved monopoly power or a dangerous probability of achieving monopoly power.

A plaintiff may allege monopoly power in one of two ways:

> One is through direct evidence of anticompetitive effects. See *FTC v. Indiana Fed'n of Dentists, 476 U.S. 447, 460-61, 106 S.Ct. 2009, 90 L.Ed.2d 445 (1986)* ("the finding of actual, sustained adverse effects on competition in those areas where IFD dentists predominated, viewed in light of the reality that markets for dental services tend to be relatively localized, is legally sufficient to support a finding that the challenged restraint was unreasonable even in the absence of elaborate market analysis."). The other, more conventional way, is by proving relevant product and geographic markets and by showing that the defendant's share exceeds whatever threshold is important for the practice in the case.

Toys "R" Us, Inc. v. F.T.C., 221 F.3d 928, 937 (7th Cir. 2000). Plaintiff argues that it has properly alleged monopoly power by either means.

1. *Direct Evidence of Anticompetitive Effects*

Plaintiff maintains that its Complaint alleges direct evidence of anticompetitive effects. Specifically, the Complaint alleges that ADM acquired **[*12]** the power to depress prices at the Argo Terminal by 5 to 15 cents per gallon as compared to prices at other terminals, and decreased the Chicago Ethanol Derivative Prices and other Benchmark Prices that are determined by the daily MOC prices at the Argo Terminal.

However, as previously discussed, in the context of depressed prices "only predatory pricing has the requisite anticompetitive effect." *Atlantic Richfield Co., 495 U.S. at 339*. Because Plaintiff has not adequately alleged predatory pricing, the Complaint does not allege direct evidence of anticompetitive effects.

2. *Share of Relevant Market*

In paragraph 22 of the Complaint, Plaintiff proposes the following market: "the market for First Level Sales of ethanol made by ethanol producers (i) in the Argo market, or (ii) pursuant to First Level Sales Contracts in which the price term is expressly based, in whole or in part, upon a Formula Price."

ADM argues that Plaintiff does not define a plausible relevant market because the Complaint does not account for potential substitutes or interchangeable goods, such as sales based on non-Argo Terminal prices, resales by non-producers of ethanol and other middlemen, and sales of renewable fuels other than ethanol.

ADM is correct **[*13]** that, for purposes of Sherman Antitrust Act claims, a "market is defined by the reasonable interchangeability of the products and the cross-elasticity of demand for those products." *In re Dairy Farmers of America, Inc. Cheese Antitrust Litigation, 767 F.Supp.2d 880, 901 (N.D. Ill. 2011)*, citing *United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 394-95, 76 S. Ct. 994, 100 L. Ed. 1264 (1956)*. Therefore, "the products in a market must have unique attributes that allow them to be substituted for one another, but make them difficult to replace with substitute products from outside the market." *In re Dairy Farmers of America, 767 F.Supp.2d at 901*.

However, "[b]ecause market definition is a deeply fact-intensive inquiry, courts hesitate to grant motions to dismiss for failure to plead a relevant product market." *Todd v. Exxon Corp., 275 F.3d 191, 199-200 (7th Cir. 2001)*. District courts only dismiss antitrust claims based on inadequate market definition when "the alleged relevant market clearly does not encompass all interchangeable substitute products or when a plaintiff fail[s] even to attempt a plausible explanation as to why a market should be limited in a particular way." *Ploss v. Kraft Foods Group, Inc., 197 F.Supp.3d 1037, 1070-1071 (N.D. Ill. 2016)*; see also *In re Dairy Farmers of America, 767 F.Supp.2d at 901*.

Here, Plaintiff has plausibly explained the distinctive features of First Level Sales at the Argo Terminal and the related Argo-based pricing formulas incorporated into First Level Sales Contracts. For example, the Complaint alleges in paragraph 34:

> The Argo Terminal is a critical locus for the spot sale of ethanol, **[*14]** for price discovery in the broader U.S. ethanol market, and for transporting ethanol domestically and internationally to meet demand. Accordingly, Argo prices for ethanol influence and act as a price beacon for the prices of ethanol sold at other terminals, as

> well as the prices that First Level Sellers and other private parties negotiate in non-terminal ethanol sales contracts.

Therefore, the court finds that, at this stage, before procedural rules allow for fact-intensive inquiry, Plaintiff has adequately proposed a relevant market for purposes of the Sherman Antitrust Act.

Still, in its Complaint Plaintiff must also allege ADM's *share* of the relevant market. See, e.g., *Walter Kidde Portable Equipment, Inc. v. Universal Security Instruments, Inc., 669 F.Supp.2d 895, 902 (N.D. Ill. 2009)* (holding that allegation defendant controlled sixty-five percent of market is sufficient at pleading stage to establish market share); *American Tobacco Co. v. United States, 328 U.S. 781, 797, 66 S. Ct. 1125, 90 L. Ed. 1575 (1946)* (describing defendant's control of two-thirds of the market as a "substantial monopoly"); *International Equipment Trading, Ltd. v. Illumina, Inc., 2018 U.S. Dist. LEXIS 136718, 2018 WL 3861575, *7 (N.D. Ill. Aug. 14, 2018)* (collecting cases).

In the Complaint, Plaintiff alleges that, after November 1, 2017, ADM captured 90 to 100 percent of sales during the half hour MOC window at the Argo Terminal. However, the proposed market is not limited to the MOC. The Complaint does not allege ADM's share of the relevant **[*15]** market, as defined in paragraph 22 of the Complaint.

Because the Complaint does not adequately allege either direct evidence of anticompetitive effects or ADM's share of the relevant market, it is DISMISSED without prejudice for these reasons as well.

C. Willful Acquisition of Power

The second element of a monopolization claim under *Section 2* of the Sherman Antitrust Act requires allegation of a defendant's "willful acquisition or maintenance of [monopoly] power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." *Grinnell, 384 U.S. at 570-71*. This element is also, at times, referred to simply as "anticompetitive conduct." *Verizon Communications Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 407, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)*. ADM argues that, as with antitrust injury and direct evidence of anticompetitive effects, Plaintiff failed to allege anticompetitive conduct because Plaintiff alleges lower - not higher - prices.

With regard to the element of willful acquisition of power,

> [t]he precise boundaries of anticompetitive conduct are sometimes difficult to define, but as the Supreme Court put it, "[i]f a firm has been attempting to exclude rivals on some basis other than efficiency, it is fair to characterize its behavior as predatory [or exclusionary]." *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 605, 105 S.Ct. 2847, 86 L.Ed.2d 467 (1985)* **[*16]** (citation and internal quotation marks omitted).

Ploss, 197 F.Supp.2d at 1073.

Plaintiff's Complaint contains numerous allegations of uneconomic and financially irrational behavior by ADM, including shipping ethanol to Argo when prices at the Argo Terminal were already lower than those at other terminals; selling ethanol at the Argo Terminal for less than ADM's variable cost to produce or obtain the ethanol; selling during the MOC even when ADM did not have physical ethanol to deliver to satisfy the sales contracts; and purchasing ethanol at the Argo Terminal outside of the MOC for higher prices than it sold ethanol during the MOC.

Here, the allegations are of "conduct that, were it not intended to obtain or sustain monopoly power, would be uneconomic and irrational." *Ploss, 197 F.Supp.3d at 1073*, quoting *Shak v. JPMorgan Chase & Co., 156 F.Supp.3d 462, 487 (S.D.N.Y. 2016)*.

Therefore, the court finds that Plaintiff has adequately pled facts sufficient to allege that ADM pursued the willful acquisition of power.

IT IS THEREFORE ORDERED:

1) The Motion to Dismiss (#14) is GRANTED.

2) The Complaint (#1) is DISMISSED without prejudice. Plaintiff has 21 days to file an amended complaint, if it believes it can plausibly allege both antitrust injury and either direct evidence of anticompetitive effects or ADM's share **[*17]** of the relevant market. If it does not do so, the Complaint will be dismissed with prejudice.

3) This matter is referred to the Magistrate Judge for further proceedings consistent with this order.

ENTERED this 9th day of August, 2021.

/s/ Colin Stirling Bruce

COLIN S. BRUCE

U.S. DISTRICT JUDGE

Pluspass, Inc. v. Verra Mobility Corp.

United States District Court for the Central District of California

August 9, 2021, Decided; August 9, 2021, Filed

2:20-cv-10078-SB (SKx)

Reporter
2021 U.S. Dist. LEXIS 201843 *; 2021 WL 4775573

LexisNexis® Headnotes

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN1[] **Motions to Dismiss, Failure to State Claim**

On a motion to dismiss, a court generally must accept as true the factual allegations in the complaint.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN2[] **Motions to Dismiss, Failure to State Claim**

Under Fed. R. Civ. P. 12(b)(6), a defendant may move to dismiss for failure to state a claim upon which relief can be granted. A plaintiff must state enough facts to state a claim to relief that is plausible on its face. A claim has facial plausibility if the plaintiff pleads facts that allow the court to draw the reasonable inference that the defendant is liable for the misconduct alleged.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN3[] **Motions to Dismiss, Failure to State Claim**

In resolving a Fed. R. Civ. P. 12(b)(6), a court must accept all well-pleaded factual allegations as true, but threadbare recitals of the elements of a cause of action, supported by mere conclusory statements, do not suffice. That is, a pleading must set forth allegations that have factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged. Courts are not bound to accept as true a legal conclusion couched as a factual allegation. Assuming the veracity of well-pleaded factual allegations, a court next must determine whether they plausibly give rise to an entitlement to relief. There is no plausibility where the well-pleaded facts do not permit the court to infer more than the mere possibility of misconduct.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Evidence > Judicial Notice > Adjudicative Facts > Facts Generally Known

Evidence > Judicial Notice > Adjudicative Facts > Public Records

HN4[] **Motions to Dismiss, Failure to State Claim**

A court generally may not consider material beyond the pleadings in ruling on a motion to dismiss. One exception is that a court may take judicial notice of undisputed facts contained in public records. See Fed. R. Evid. 201(b). Courts may also take judicial notice of documents incorporated by reference into the complaint.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN5[] **Motions to Dismiss, Failure to State Claim**

A court may take judicial notice of court records—including judicial rulings—but not of facts in those records that are subject to reasonable dispute. Just because a document itself is susceptible to judicial notice does not mean that every assertion of fact within that document is judicially noticeable for its truth. On a Fed. R. Civ. P. 12(b)(6) motion to dismiss, when a court takes judicial notice of another court's opinion, it may do so not for the truth of the facts recited therein, but for the existence of the opinion, which is not subject to reasonable dispute over its authenticity.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN6[] **Relevant Market, Geographic Market Definition**

A threshold step in any antitrust case is to accurately define the relevant market, which refers to the area of effective competition. The relevant market encompasses notions of geography as well as product use, quality, and description. ***Antitrust law*** requires allegation of both a product market and a geographic market.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN7[] **Relevant Market, Product Market Definition**

Market definition for an antitrust case is said to be a fact question. However, a court may dismiss a complaint when the complaint's relevant market definition is facially unsustainable. A definition is facially unsustainable where the plaintiff fails to define its proposed relevant market with reference to the rule of reasonable interchangeability and cross-elasticity of demand, or alleges a proposed relevant market that clearly does not encompass all interchangeable substitute products even when all factual inferences are granted in plaintiff's favor.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN8[] **Relevant Market, Geographic Market Definition**

The relevant geographic market for an antitrust case includes the area of effective competition, or the area where buyers can turn for alternative sources of supply. A geographic market must correspond to the commercial realities' of the industry and be economically significant.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN9[] **Relevant Market, Product Market Definition**

Where a defendant competes does not define the market for an antitrust case. Indeed, the existence of a national market does not automatically preclude the existence of regional submarkets.

Civil Procedure > ... > Preclusion of Judgments > Estoppel > Judicial Estoppel

HN10[] **Estoppel, Judicial Estoppel**

Judicial estoppel is an equitable doctrine that precludes a party from gaining an advantage by asserting one position, and then later seeking an advantage by taking a clearly inconsistent position. When considering whether to apply the doctrine of judicial estoppel, the U.S. Supreme Court has stated that three factors should inform the court's analysis: (1) whether the party's later position is clearly inconsistent with its earlier position; (2) whether the party was successful in advancing its first position such that judicial acceptance of an inconsistent position in a later proceeding would create the perception that either the first or second court was misled; and (3) whether asserting the inconsistent position would derive an unfair advantage or impose an unfair detriment on the opposing party if not estopped.

Antitrust & Trade Law > Clayton Act > Claims

Mergers & Acquisitions Law > Antitrust > Antitrust Statutes > Clayton Act

Mergers & Acquisitions Law > Antitrust > Horizontal Mergers

Antitrust & Trade Law > Clayton Act > Scope

Antitrust & Trade Law > Clayton Act > Defenses

HN11[] **Clayton Act, Claims**

Illegal acquisition under Section 7 of the Clayton Act prohibits business acquisitions whose effect may be substantially to lessen competition, or tend to create a monopoly in a relevant market. 15 U.S.C.S. § 18. Under

Section 7, a plaintiff must first establish a prima facie case that a merger is anticompetitive. To establish a prima facie case under Section 7 of the Clayton Act, a plaintiff must first define the relevant market, and then establish that the proposed merger will create an appreciable danger of anticompetitive consequences.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > ... > Private Actions > Standing > Sherman Act

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN12[] **Standing, Requirements**

Antitrust injury is defined not merely as injury caused by an antitrust violation, but more restrictively as injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. In other words, antitrust laws are designed to protect competition, not competitors. An antitrust injury contains four elements: (1) unlawful conduct, (2) causing an injury to the plaintiff, (3) that flows from that which makes the conduct unlawful, and (4) that is of the type the antitrust laws were intended to prevent. The U.S. Court of Appeals for the Ninth Circuit also imposes a fifth requirement, that the injured party be a participant in the same market as the alleged malefactors.

Civil Procedure > ... > Defenses, Demurrers & Objections > Affirmative Defenses > Laches

Environmental Law > Administrative Proceedings & Litigation > Defenses

HN13[] **Affirmative Defenses, Laches**

Laches requires proof of (1) lack of diligence by the party against whom the defense is asserted, and (2) prejudice to the party asserting the defense.

Civil Procedure > ... > Defenses, Demurrers & Objections > Affirmative Defenses > Laches

HN14[] **Affirmative Defenses, Laches**

Laches is an affirmative defense, but a court may find laches at the pleading stage where it is clear on the face of the complaint that the plaintiff can prove no set of facts to avoid the defense.

Antitrust & Trade Law > Clayton Act > Claims

Governments > Legislation > Statute of Limitations > Time Limitations

Civil Procedure > ... > Defenses, Demurrers & Objections > Affirmative Defenses > Laches

Antitrust & Trade Law > Clayton Act > Defenses

Antitrust & Trade Law > Clayton Act > Scope

HN15[] **Clayton Act, Claims**

Courts have not created a presumption of laches because a merger has been consummated and typically only find a presumption of laches after the expiration of the statute of limitations. The limitations period for a Section 7 of the Clayton Act, 15 U.S.C.S. § 18, claim is four years.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > Exclusive Dealing

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN16[] **Sherman Act, Claims**

To state a claim under Section 1 of the Sherman Act, a plaintiff must allege (1) a contract, combination, or conspiracy between two or more entities; (2) in unreasonable restraint of trade; that (3) affects interstate commerce. 15 U.S.C.S. § 1. An exclusive dealing arrangement is an agreement in which a buyer agrees to purchase certain goods or services only from a particular seller for a certain period of time. There is no set formula for evaluating the legality of an exclusive dealing agreement, but ***antitrust law*** generally requires a showing of significant market power by the defendant, substantial foreclosure, contracts of sufficient duration to prevent meaningful competition by rivals, and an analysis of likely or actual anticompetitive effects considered in light of any procompetitive effects. Exclusive dealing will generally only be unlawful where the market is highly concentrated, the defendant possesses significant market power, and there is some element of coercion present.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > ... > US Department of Justice Actions > Criminal Actions > Intent

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN17[] **Actual Monopolization, Claims**

The offense of monopoly under § 2 of the Sherman Act has two elements: (1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident. The second element of a § 2 claim is the use of monopoly power to foreclose competition, to gain a competitive advantage, or to destroy a competitor.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN18[] **Motions to Dismiss, Failure to State Claim**

It is axiomatic that on a motion to dismiss for failure to state a claim, the court must accept well-pleaded allegations as true.

Opinion

CIVIL MINUTES - GENERAL

Proceedings: ORDER DENYING DEFENDANT'S MOTION TO DISMISS [DKT. NO. 61]

Plaintiff PlusPass, Inc. and Defendant Verra Mobility Corp. are each in the business of processing electronic toll payments for rental cars. In 2018, Defendant acquired the two dominant market competitors, consolidating them into an entity that controlled 95.5% **[*2]** of the rental car market post-merger. Plaintiff alleges that Defendant orchestrated the merger with the express goal of excluding Plaintiff and other competitors from the market using anticompetitive means. Plaintiff brings several claims under the antitrust laws, and Defendant has filed this motion to dismiss. (Mot., Dkt. No. 61.) Plaintiff has filed an opposition, and Defendant has filed a reply. (Opp., Dkt. No. 67; Reply, Dkt. No. 71.) For the reasons below, the Court **DENIES** the motion.

I. FACTUAL BACKGROUND

HN1[] On a motion to dismiss, a court generally must accept as true the factual allegations in the complaint. The factual background below is therefore taken from the operative pleading in this case.

A. History and Market Background

Numerous states across the country have large toll road networks requiring electronic payment of tolls; however, the United States does not have a single, interoperable national payment collection system. (Second Amended Complaint (SAC) ¶ 12, Dkt. No. 56.) For example, California toll road payments are administered by a single agency, but payments on Texas toll road networks are administered by several different systems that are interchangeable with one another. **[*3]** (*Id.* ¶ 13.) By contrast, some states group together using an interoperable regional system that enables processing in any of the participating locations. (*Id.*)

When a vehicle uses these toll roads, the electronic systems will bill the account holder of the vehicle—if the vehicle is not connected to an account, the registered owner is billed. (*Id.* ¶ 14.) This system poses a unique obstacle for rent-a-car companies (RACs), which own and register large numbers of vehicles in the RAC's name. (*Id.*) When the renter of a rental car incurs an electronic toll, the RAC is billed instead of the renter. (*Id.*) However, there is typically a "lag time" between the time the electronic toll is processed and the time the renter returns the vehicle. (*Id.*) To solve this problem, RACs turn to third-party administrators to provide services for payment, management, and collection of the tolls from the renters. (*Id.*) These third-party administrators contract with local or state regional toll authorities and register the RAC's fleet, paying for any tolls incurred by those vehicles. (*Id.* ¶ 15.) The third-party administrators use software integrated with the RACs to identify the toll and the renter and provide **[*4]** the RAC the billing information or bill the renter directly. (*Id.*) Third-party administrators also use certain devices such as radio-frequency identification or toll tags to track their fleet vehicles. (*Id.*)

Defendant and Plaintiff are both third-party administrators for electronic toll payments to RACs. (*Id.* ¶ 16.) For years, the two dominant market competitors were Highway Toll Administration, LLC (HTA) and American Traffic Solutions, Inc. (ATS). (*Id.* ¶ 2.) Starting in 2002 and 2004 respectively, HTA and ATS began offering their services and attracted RACs such as Enterprise, Alamo, National, and Hertz. (*Id.* ¶¶ 17-18.) HTA and ATS charged high prices for their services and billed renters the highest posted rate for tolls, regardless of the rate actually paid. (*Id.* ¶ 20.) These charges exceeded "any justifiable relationship to just profits" and resulted in a "kick-back" scheme to the RACs. (*Id.*) Ultimately, these high charges garnered significant negative press, complaints, and consumer lawsuits from renters. (*Id.* ¶ 21.) As a result, prices dropped for a short period due to competition between ATS and HTA. (*Id.*)

B. <u>Plaintiff Attempts to Enter the Market</u>

In 2013, Plaintiff saw an opportunity **[*5]** to enter the market and to challenge the structure of electronic toll payment administration by offering an inexpensive "direct-to-consumer" option—an app known as "PToll." (*Id.* ¶¶ 2, 22.) PToll allowed renters to use their smartphones to read the rental car license plate, which would then "move" the rental car to the Plaintiff's fleet for electronic toll payment for the duration of the rental. (*Id.* ¶ 23.) Plaintiff would pay the toll authority for any electronic tolls incurred and then charge the fees to the renter directly through the app. (*Id.*) This streamlined process alleviated administrative burdens on RACs and reduced costs for consumers. (*Id.*) Specifically, Plaintiff alleges that its patented app has two main advantages over the "legacy" systems created and offered by HTA and ATS. (*Id.* ¶¶ 24-25.) First, the app is more efficient and less costly for consumers and RACs, allowing direct billing and at a lower rate (15% above the actual toll fee) than those offered by HTA and ATS. (*Id.* ¶¶ 24, 26.) Second, the app's use of license plate reading technology coupled with machine learning obviates the need for RAC's employees to place and maintain toll tags on their vehicles by hand. **[*6]** (*Id.* ¶ 24.)

Plaintiff's app was first introduced in early 2012 and became publicly available in January 2013. (*Id.* ¶ 27.) Plaintiff saw initial success, starting in Texas and eventually gaining authorization from nine states including California, Colorado, Florida, Georgia, Illinois, Massachusetts, North Carolina, Texas, and Washington. (*Id.* ¶ 28.) Plaintiff expected continued growth in part due to its well-established leadership team, use of technology, and sufficient resources. (*Id.* ¶ 29.)

C. <u>Defendant Obtains HTA and ATS</u>

Plaintiff alleges that Defendant obtained monopoly power when it acquired HTA and ATS. (*Id.* ¶¶ 30-31.) To accomplish this merger, Defendant utilized an equity firm, Platinum Equity LLC, to acquire both HTA and ATS, which were then rebranded as the combined entity known as Verra Mobility LLC. (*Id.* ¶ 31.) Then, Platinum Equity LLC and another equity firm, The Gores Group, "raised hundreds of millions of dollars in capital and merged Verra Mobility LLC with a Special Purpose Acquisition Company ("SPAC"), named Gores Holding II to form [Defendant] - a publicly-traded company." (*Id.*) After this consolidation, Defendant now administers electronic toll payments for 95.5% **[*7]** of rental cars in the market. (*Id.* ¶ 32.)

D. <u>Defendant's Alleged Anticompetitive Activities</u>

Plaintiff alleges that, after obtaining a dominant market share, Defendant has wielded its monopoly power to thwart Plaintiff's entry into the market. (*Id.* ¶¶ 36-51.) Specifically, Defendant was able to acquire and maintain long-term contracts for 95% of rental cars in the market. (*Id.* ¶ 37.) These contracts—some lasting until 2024—were designed to foreclose rivals from entering the market by depriving them of the ability to gain enough customers to achieve economies of scale. (*Id.*) These contracts were also exclusive: the RACs using Defendant's services were precluded from using any other service or even testing other producer's services to evaluate it for potential inclusion in their business in the future. (*Id.* ¶ 38.) And RACs abided by these exclusivity provisions. (*Id.* ¶ 39.) Ultimately, the merger left RACs with no other competitive options. (*Id.* ¶ 40.)

As a practical matter, Defendant's activities have rendered the direct-to-consumer model a nonviable alternative. (*Id.* ¶ 41.) First, as noted above, the exclusive nature of Defendant's contracts with the RACs prevents them from using or promoting **[*8]** Plaintiff's app. (*Id.*) The only two alternatives the RACs offer are (1) using cash or (2) providing their own toll tags. (*Id.*) These are not true alternatives, however, as most toll roads do not accept cash payment, and it is impracticable for most renters (tourists) to obtain a toll tag. (*Id.*) Finally, simply "avoiding toll roads" is impracticable as in many places toll roads are the only available direct route. (*Id.*)

In addition to the exclusionary nature of Defendant's contracts, Plaintiff alleges that Defendant has engaged in other forms of anticompetitive subterfuge. First, Plaintiff alleges that Defendant has fraudulently registered its fleet vehicles with false license plates to prevent a consumer from utilizing Plaintiff's license-plate reading app. (*Id.* ¶¶ 44-45.) Second, Plaintiff alleges that Defendant has instructed its employees to obscure toll tag numbers and place deceptive stickers in their place. (*Id.* ¶ 46.) Third, Plaintiff alleges that Defendant has manipulated electronic tolling systems by unnecessarily updating its fleet registration information, which allows Defendant to "re-register" a vehicle, undermining Plaintiff's technology. (*Id.* ¶ 47.) Finally, Plaintiff **[*9]** alleges that Defendant has created a "copycat app" but has deliberately disabled it to limit renter choice. (*Id.* ¶ 49.) In sum, Plaintiff alleges that Defendant's acts are without justification and were instead designed solely to exclude Plaintiff and similar competitors from the market. (*Id.* ¶¶ 48, 50-51.)

II. LEGAL STANDARDS

A. Rule 12(b)(6)

HN2[] Under Rule 12(b)(6), a defendant may move to dismiss for failure to state a claim upon which relief can be granted. A plaintiff must state "enough facts to state a claim to relief that is plausible on its face." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. A claim has "facial plausibility" if the plaintiff pleads facts that "allow[] the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*.

HN3[] In resolving a Rule 12(b)(6), a court must accept all well-pleaded factual allegations as true, but "[t]hreadbare recitals of the elements of a cause of action, supported by mere conclusory statements, do not suffice." *Iqbal, 556 U.S. at 678*. That is, a pleading must set forth allegations that have "factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Id.* Courts "'are not bound to accept as true a legal conclusion couched as a factual allegation.'" **[*10]** *Id.* (quoting *Twombly, 550 U.S. at 555*). Assuming the veracity of well-pleaded factual allegations, a court next must "determine whether they plausibly give rise to an entitlement to relief." *Id. at 679*. There is no plausibility "where the well-pleaded facts do not permit the court to infer more than the mere possibility of misconduct." *Id.*

B. Judicial Notice

HN4[] A court generally may not consider material beyond the pleadings in ruling on a motion to dismiss. *Cervantes v. City of San Diego, 5 F.3d 1273, 1274 (9th Cir. 1993)*. One exception is that a court may take judicial notice of undisputed facts contained in public records. *Reyn's Pasta Bella, LLC v. Visa USA, Inc., 442 F.3d 741, 746 n.6 (9th Cir. 2006)*; *see* *Fed. R. Evid. 201(b)*. Courts may also take judicial notice of documents incorporated by reference into the complaint. *Lee v. City of Los Angeles, 250 F.3d 668, 688 (9th Cir. 2001)*.

In support of its motion, Defendant asks the Court take judicial notice of 20 separate documents. (RJN, Dkt. No. 61-1.) These documents include filings from previous litigation in Texas (Exhibits 1-11), press releases (Exhibits 12-14), and other printouts from publicly available websites (Exhibits 15-20). Plaintiff opposes Defendant's RJN as to Exhibits 1-3, 5-9, 11, and 12-19, and Defendant has filed a reply. (RJN Opp., Dkt. No. 68; RJN Reply, Dkt. No. 72.) Among other reasons, Plaintiff objects on the ground that Defendant is inappropriately seeking judicial **[*11]** notice of the documents to rely on the truth of the facts contained therein in a premature attempt to raise a judicial estoppel defense. ***HN5***[] A court may take judicial notice of court records—including judicial rulings—but not of facts in those records that are subject to reasonable dispute. *Khoja v. Orexigen Therapeutics, Inc., 899 F.3d 988, 999 (9th Cir. 2018)* ("Just because [a] document itself is susceptible to judicial notice does not mean that every assertion of fact within that document is judicially noticeable for its truth."); *see* *Lee, 250 F.3d at 690* ("On a Rule 12(b)(6) motion to dismiss, when a court takes judicial notice of another court's opinion, it may do so not for the truth of the facts recited therein, but for the existence of the opinion, which is not subject to reasonable dispute over its authenticity."). Accordingly, the Court takes judicial notice of the summary judgment ruling and the adjudicative facts not subject to dispute because of the limited purpose for which they are offered. As to the website printouts from unverified sources that are not incorporated by reference into the SAC, they are being offered for the truth of their content. Accordingly, Defendant's RJN is granted as to Exhibits 1-11 but denied as to Exhibits 12-19.

III. DISCUSSION

Defendant moves to dismiss **[*12]** Plaintiff's SAC in its entirety on two grounds: first, Defendant argues that Plaintiff offers a facially implausible market definition, which is fatal to the SAC; and second, Defendant argues that Plaintiff's claims are barred by the doctrine of judicial estoppel. (Mot. at 12-14.) In addition, Defendant moves to dismiss Plaintiff's individual claims for separate reasons. Defendant argues that Plaintiff's claim for illegal acquisition under *Clayton Act § 7* fails because Plaintiff has failed to plead antitrust injury and that the claim is also barred by laches. (*Id.* at 14-18.) Defendant next contends that Plaintiff's claims for exclusive dealing under *Sherman Act § 1* and illegal monopolization under Sherman Act *§ 2* are deficiently pleaded. (*Id.* at 18-25.) The Court addresses each argument in turn.

A. Market Definition

HN6[] "A threshold step in any antitrust case is to accurately define the relevant market, which refers to 'the area of effective competition.'" *FTC v. Qualcomm Inc., 969 F.3d 974, 992 (9th Cir. 2020)* (quoting *Ohio v. Am. Express Co., 138 S. Ct. 2274, 2285, 201 L. Ed. 2d 678 (2018)*). "The relevant market encompasses notions of geography as well as product use, quality, and description." *Vesta Corp. v. Amdocs Mgmt. Ltd., 129 F. Supp. 3d 1012, 1023 (D. Or. 2015)*; *see* *Newcal Indus., Inc. v. Ikon Office Solution, 513 F.3d 1038, 1045 n.4 (9th Cir. 2008)* ("***Antitrust law*** requires allegation of both a product market and a geographic market.").

HN7[] Market definition is said to be a fact question. *In re Se. Milk Antitrust Litig., 739 F.3d 262, 282-83 (6th Cir. 2014)*. However, a court **[*13]** may dismiss a complaint when "the complaint's 'relevant market' definition is facially unsustainable." *Newcal Indus., 513 F.3d at 1045*. A definition is "facially unsustainable" where "the plaintiff fails to define its proposed relevant market with reference to the rule of reasonable interchangeability and cross-elasticity of demand, or alleges a proposed relevant market that clearly does not encompass all interchangeable substitute products even when all factual inferences are granted in plaintiff's favor." *Vesta Corp., 129 F. Supp. 3d at 1023*. Plaintiff defines the relevant product market as "the market for administration of electronic toll payment collection for rental cars." (SAC ¶ 54.) Defendant does not appear to challenge Plaintiff's product market definition. (Mot. at 12.) Defendant instead attacks Plaintiff's geographic market definition. (*Id.*) The Court thus focuses on the geographic market.

HN8[] The relevant geographic market includes the area of "effective competition," or the area "where buyers can turn for alternative sources of supply." *See Tanaka v. Univ. of S. California, 252 F.3d 1059, 1063 (9th Cir. 2001)*. A geographic market must "'correspond to the commercial realities' of the industry and be economically significant." *Brown Shoe Co. v. United States, 370 U.S. 294, 336, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)*. Plaintiff alleges that "[t]he relevant geographic market consists of the twenty-two **[*14]** states, the District of Columbia, and Puerto Rico that have electronic tolls for roads, bridges, or tunnels, or the regional submarkets therein of interoperable electronic toll payment systems." (SAC ¶ 57.) These regional submarkets include states, or groups of states that have agreements with agencies to handle payments using distinct systems such as "EZPass," "TxTag," or "FasTrak." (*Id.* ¶¶ 58a-g.)

Defendant argues that the geographic market definition is facially implausible because the market in which it operates and the location where the RACs can "turn for alternative supplies" points to a national market. (Mot. at 12-13.) Specifically, it argues that because HTA and ATS competed at a national level, the mere fact that Plaintiff was unable to compete at that level does not justify a segmented sub-market definition. (*Id.*) Defendant's argument misses the mark. *HN9*[] "Where [a defendant] competes does not define the market." *Morgan, Strand, Wheeler & Biggs v. Radiology, Ltd., 924 F.2d 1484, 1490 (9th Cir. 1991)*. Indeed, the existence of a national market does not automatically preclude the existence of regional submarkets. *See* *Oltz v. St. Peter's Cmty. Hosp., 861 F.2d 1440, 1446 (9th Cir. 1988)* (rejecting the choice to adopt a national market over a local market).

While Defendant may be successful enough to operate at a national level, Plaintiff's **[*15]** SAC offers sufficient detail to justify its more focused geographic definition. First, from the standpoint of the buyer, there is no true national market. Because there is no universal electronic toll collection system in the United States, toll authorities tend to utilize their own systems at the state or regional level. (SAC ¶ 58.) Second, as a practical matter, Plaintiff alleges that the market is appropriately defined because the RACs' customers tend to drive within a certain region. (*Id.* ¶ 59.) To support a localized market based on similar economic concerns, Plaintiff cites several cases finding similar allegations to be sufficient. (Opp. at 6.) For instance, in *Sidibe v. Health*, the plaintiffs alleged that the defendant was illegally "tying" geographic markets it defined based on zip code. *667 Fed. App'x 641, 642 (9th Cir. 2016)*. In a memorandum disposition, the Ninth Circuit reversed the district court's grant of summary judgment, finding that the plaintiff's geographic market definition was not inherently implausible. *Id. at 643*. Specifically, the court found sufficient allegations that customers within those zip codes were either unwilling or unable to obtain services outside of their zip code. *Id.* In reply, Defendant attempts **[*16]** to distinguish Plaintiff's cited cases on their facts, suggesting that because those cases involved inherently localized concerns such as hospitals and airports, a regional market was more appropriate. (Reply at 3.) The factual distinction is one without legal significance here and contradicts Plaintiff's allegation that renters' toll usage is tied closely to the region in which they rent.

In short, the Court cannot say based on the allegations in the SAC that Plaintiff's geographic market definition is inherently implausible. Accordingly, Defendant's motion to dismiss the SAC on this basis is denied.

B. Judicial Estoppel

Defendant contends that Plaintiff is judicially estopped from arguing that Defendant's contracts with the RACs prevent customers from using Plaintiff's app because Plaintiff previously sought and obtained a ruling that Defendant's agreements were non-exclusive.

HN10[] "Judicial estoppel is an equitable doctrine that precludes a party from gaining an advantage by asserting one position, and then later seeking an advantage by taking a clearly inconsistent position." *Hamilton v. State Farm Fire & Cas. Co., 270 F.3d 778, 782 (9th Cir. 2001)* (citations omitted). When considering whether to apply the doctrine of judicial estoppel, the Supreme Court has **[*17]** stated that three factors should inform the court's analysis: (1) whether the party's later position is "clearly inconsistent" with its earlier position; (2) whether the party was successful in advancing its first position such that "judicial acceptance of an inconsistent position in a later proceeding would create 'the perception that either the first or second court was misled'"; and (3) whether asserting the inconsistent position would "derive an unfair advantage or impose an unfair detriment on the opposing party if not estopped." *New Hampshire v. Maine, 532 U.S. 742, 750-51, 121 S. Ct. 1808, 149 L. Ed. 2d 968 (2001)* (citations omitted).

Defendant argues that all three factors are met. (Mot. at 14.) First, Defendant argues that Plaintiff (under its previous name, BancPass, Inc.) previously sued HTA in a district court in Texas (Texas Litigation) and inconsistently alleged that HTA's contracts with RACs did not prevent renters from using Plaintiff's app. (Mot. at 4, 14 (citing RJN, Ex. 10).) Plaintiff argues that it did not take an inconsistent position in that case because the Texas Litigation involved materially different agreements—i.e., the RACs' "downstream" agreements with its renters rather than the "upstream" post-merger agreements at issue here—and materially **[*18]** different issues. (Opp. at 23-24.) Reading the SAC in the light most favorable to Plaintiff, the Court cannot conclude at this point that Plaintiff is taking a "clearly inconsistent" position (and thus cannot conclude, under the second factor, that Plaintiff succeeded in advancing a position inconsistent with the one now presented). Finally, Defendant conclusorily asserts that allowing this suit would cause it prejudice. (*Id.*) Defendant's motion to dismiss the SAC on the ground of judicial estoppel is denied without prejudice to reconsideration at an appropriate stage of the litigation.

C. Clayton Act § 7

HN11[] Plaintiff's first cause of action is for illegal acquisition under *Section 7* of the Clayton Act, which prohibits business acquisitions whose effect "may be substantially to lessen competition, or tend to create a monopoly" in a relevant market. *15 U.S.C. § 18*. Under *Section 7*, Plaintiff "must first establish a prima facie case that a merger is anticompetitive." *Saint Alphonsus Med. Ctr.-Nampa, Inc. v. St. Luke's Health Sys., Ltd., 778 F.3d 775, 783 (9th Cir. 2015)*. "To establish a prima facie case under *Section 7* of the Clayton Act, a plaintiff must first define the relevant market, and then establish that the proposed merger will create an appreciable danger of anticompetitive consequences." *California v. Sutter Health Sys., 130 F. Supp. 2d 1109, 1118 (N.D. Cal. 2001)* (citing *United States v. Philadelphia Nat'l Bank, 374 U.S. 321, 362, 83 S. Ct. 1715, 10 L. Ed. 2d 915 (1963)*).

Defendant challenges Plaintiff's *Section 7* claim on two grounds. **[*19]** First, that Plaintiff has failed to adequately allege antitrust harm flowing from the merger and thus lacks standing. (Mot. at 14-16.) Second, that Plaintiff's claim is barred by laches. (*Id.* at 16-18.)

1. Antitrust Injury

HN12[] "Antitrust injury is defined not merely as injury caused by an antitrust violation, but more restrictively as 'injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful.'" *Glen Holly Entm't, Inc. v. Tektronix Inc., 343 F.3d 1000, 1007-08 (9th Cir. 2003)* (quoting *Brunswick Corp. v. Pueblo Bowl—O-Mat, Inc., 429 U.S. 477, 489 (1977)*). In other words, antitrust laws are designed to protect competition, not competitors. *Brunswick, 429 U.S. at 488*. An antitrust injury contains four elements: "(1) unlawful conduct, (2) causing an injury to the plaintiff, (3) that flows from that which makes the conduct unlawful, and (4) that is of the type the antitrust laws were intended to prevent." *Am. Ad Mgmt., Inc. v. Gen. Tel. Co. of Cal., 190 F.3d 1051, 1055 (9th Cir. 1999)*. The Ninth Circuit also imposes a fifth requirement, that "the injured party be a participant in the same market as the alleged malefactors." *Glen Holly Entm't, 343 F.3d at 1008* (internal quotations and citation omitted).

Defendant contends that no antitrust injury exists because the merger and corresponding increase in concentration did not fundamentally change Plaintiff's ability (or inability) to compete in the market. (Mot. at **[*20]** 15.) Stated differently, Defendant argues that Plaintiff is in the same position it has always been because it has an inferior business model. (*Id.*) Defendant's arguments largely ignore the post-merger allegations in the SAC. Here, Plaintiff alleges several forms of anticompetitive harm post-merger. For instance, Plaintiff alleges that by capturing 95.5% of the RACs in the market and binding them to exclusive dealing contracts, Defendant has prevented the RACs from negotiating better terms or seeking alternative options. (SAC ¶ 40.) But Plaintiff's allegations in the SAC do not rest entirely on Defendant's post-merger market power. Rather, Plaintiff also alleges that Defendant engages in several forms of anticompetitive activity, post-merger, that hampers Plaintiff's ability to compete. Defendant's activity such as altering toll tags, using false license plates, and manipulating the registration system has limited RAC choice, and ultimately limits consumer choice because the RACs may not use, test, or promote any other alternative. (*Id.* ¶¶ 41, 44-48.) Plaintiff alleges that but for these artificial barriers, it would grow in scale and compete at a national level. (*Id.* ¶¶ 59-60.) The **[*21]** allegations that Defendant's actions will lessen competition set forth in the SAC are sufficient to plead an antitrust injury.

2. Laches

As a remedy for its *Section 7* claim, Plaintiff is seeking divestiture. (*Id.* ¶ 73.) Defendant asserts that because Plaintiff has waited over three years to complain about the merger, its claim is barred by laches. ***HN13***[] "Laches requires proof of (1) lack of diligence by the party against whom the defense is asserted, and (2) prejudice to the party asserting the defense." *Costello v. United States, 365 U.S. 265, 282, 81 S. Ct. 534, 5 L. Ed. 2d 551 (1961)*. Plaintiff's primary response is that laches cannot be decided at the pleading stage. (Opp. at 21-22.)

HN14[] Laches is an affirmative defense, but a court may find laches at the pleading stage "where it is clear [on the face of the complaint] that the plaintiff can prove no set of facts to avoid the [defense]." *Planet Drum Found. v. Hart, No. 17-cv-02676-JCS, 2017 U.S. Dist. LEXIS 156674, 2017 WL 4236932, at *7 (N.D. Cal. Sept. 24, 2017)* (citation omitted). Defendant has not shown that such a finding is appropriate at this point in the case here. Although Plaintiff's delay raises serious concerns about the propriety of divestiture, *see* *Ginsburg v. InBev NV/SA, 623 F.3d 1229, 1234-36 (8th Cir. 2010)* (explaining the drastic nature and hardship of unwinding a merger), the Court cannot say on this undeveloped record that the remedy sought is barred by the doctrine of laches. ***HN15***[] Courts have not created **[*22]** a presumption of laches because a merger has been consummated and typically only find a presumption of laches after the expiration of the statute of limitations. *See* *Internet Specialties W., Inc. v. Milon-DiGiorgio Enterprises, Inc., 559 F.3d 985, 990 (9th Cir. 2009)* (suit filed within the applicable statute-of-limitations period creates a presumption against laches). The limitations period for a *Section 7* claim is four years. *See* *Int'l Tel. & Tel. Corp. v. Gen. Tel. & Elecs. Corp. and Electronics Corp., 518 F.2d 913, 928 (9th Cir. 1975)*, *disapproved of on other grounds by* *California v. Am. Stores Co., 495 U.S. 271, 110 S. Ct. 1853, 109 L. Ed. 2d 240 (1990)*. Because this suit was filed within the limitations period, no presumption of laches applies. Accordingly, Defendant's motion to dismiss based on laches is denied without prejudice.

D. Sherman Act § 1

Plaintiff's third cause of action is for exclusive dealing in violation of *Section 1* of the Sherman Act. ***HN16***[] "To state a claim under *Section 1*, a plaintiff must allege (1) a contract, combination, or conspiracy between two or more entities; (2) in unreasonable restraint of trade; that (3) affects interstate commerce." *Pro Search Plus, LLC v. VFM Leonardo, Inc., No. SACV 12-2102-JLS ANX, 2013 U.S. Dist. LEXIS 169856, 2013 WL 6229141, at *5 (C.D. Cal. Dec. 2, 2013)* (citing *15 U.S.C. § 1*; *Am. Ad Mgmt., 92 F.3d at 788*). "An exclusive dealing arrangement is an agreement in which a buyer agrees to purchase certain goods or services only from a particular seller for a certain period of time." *Id.* (quoting *ZF Meritor, LLC v. Eaton Corp., 696 F.3d 254, 270 (3d Cir. 2012)*).

"There is no set formula for evaluating the legality of an exclusive dealing agreement, but modern ***antitrust law*** generally requires a showing of significant market **[*23]** power by the defendant, substantial foreclosure, contracts of sufficient duration to prevent meaningful competition by rivals, and an analysis of likely or actual anticompetitive effects considered in light of any procompetitive effects." *ZF Meritor, 696 F.3d at 271* (citations omitted). "Exclusive dealing will generally only be unlawful where the market is highly concentrated, the defendant possesses significant market power, and there is some element of coercion present." *Id. at 284* (citations omitted).

Analyzing the factors set forth in *ZF Meritor*, Plaintiff has adequately stated a claim for *de facto* exclusive dealing. First, Plaintiff alleges—and Defendant does not dispute that it possesses—monopoly power in the relevant market. (*See, e.g.*, SAC ¶ 88; Mot. at 18 (arguing mere possession of monopoly power not illegal).) Second, Plaintiff alleges that Defendant has exclusive contracts with virtually every RAC, controlling 95.5% of the market. (SAC ¶ 89.) Third, Plaintiff alleges these agreements are long term in nature, lasting a minimum of 5 to 7 years. (*Id.*) Fourth, Plaintiff alleges that these agreements eliminate competition, stifle innovation, reduce output and serve no procompetitive purpose. (*Id.* ¶¶ 90-91.) Finally, Plaintiff **[*24]** alleges that the RACs are left with no other viable, cost-effective alternatives and are thus forced to deal with Defendant against their self-interest. (*Id.* ¶¶ 42-43.) Accordingly, Defendant's motion to dismiss Plaintiff's exclusive dealing claim is denied.

E. Sherman Act § 2

Plaintiff's second cause of action is for illegal monopolization in violation of *Section 2* of the Sherman Act. ***HN17***[] "The offense of monopoly under *§ 2* of the Sherman Act has two elements: (1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." *Eastman Kodak Co. v. Image Tech. Servs., Inc., 504 U.S. 451, 481, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)* (quoting *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*). As noted above, Defendant does not dispute Plaintiff's allegations of monopoly power in the relevant market.

"The second element of a *§ 2* claim is the use of monopoly power to foreclose competition, to gain a competitive advantage, or to destroy a competitor." *Eastman Kodak, 504 U.S. at 482-83* (internal quotations and citation omitted). Plaintiff alleges that Defendant acquired and maintains its monopoly by "consolidating long-term exclusive dealing agreements with rental car companies, enforcing those agreements, and engaging in anticompetitive conduct to undermine **[*25]** [Plaintiff's] technology and ability to compete." (SAC ¶ 78.) These allegations of exclusive dealing under *Section 1*, which the Court has already found adequately pleaded, may also support a claim under *Section 2*. *See, e.g., Pro Search Plus, LLC, 2013 U.S. Dist. LEXIS 169856, 2013 WL 6229141, at *9* ("For the reasons stated above, the Court finds that [Plaintiff] has adequately alleged a claim for *de facto* exclusive dealing, and therefore has alleged anticompetitive conduct."). Moreover, Plaintiff alleges that Defendant engages in other anticompetitive behavior to maintain its monopoly, including preventing RACs from "testing" or using "pilot programs" (SAC ¶ 38), interfering with Plaintiff's technology (*id.* ¶¶ 41, 45), and manually altering vehicle toll tags and license plates to eliminate competition (*id.* ¶¶ 45-48). ***HN18***[] While Defendant repeatedly disputes the veracity of these allegations, or offers its own explanation, it is axiomatic that the Court must accept well-pleaded allegations as true. *Iqbal, 556 U.S. at 678*. Accordingly, Defendant's motion to dismiss Plaintiff's illegal monopolization claim is denied.

IV. CONCLUSION

For the foregoing reasons, Defendant's motion is **DENIED**. Defendant is to file an answer by August 20, 2021.

Animal Sci. Prods. v. Hebei Welcome Pharm. Co. (In re Vitamin C Antitrust Litig.)

United States Court of Appeals for the Second Circuit

March 17, 2021, Argued; August 10, 2021, Decided

No. 13-4791-cv

Reporter
8 F.4th 136 *; 2021 U.S. App. LEXIS 23641 **

IN RE: VITAMIN C ANTITRUST LITIGATION; ANIMAL SCIENCE PRODUCTS, INC., THE RANIS COMPANY, INC., Plaintiffs-Appellees, v. HEBEI WELCOME PHARMACEUTICAL CO. LTD., NORTH CHINA PHARMACEUTICAL GROUP CORPORATION, Defendants-Appellants.

Subsequent History: US Supreme Court certiorari denied by *Animal Sci. Prods. v. Hebei Welcome Co., 2022 U.S. LEXIS 4295 (U.S., Oct. 3, 2022)*

Prior History: [1]** Appeal from the United States District Court for the Eastern District of New York. No. 1:06-md-1738 — Brian M. Cogan, Judge.

Animal Science Products, Inc. and The Ranis Company, Inc. (the "plaintiffs"), American purchasers of bulk Vitamin C, brought this class action alleging that four Chinese exporters of Vitamin C conspired to inflate prices and restrict supply in violation of the *Sherman Act, 15 U.S.C. § 1*, and the Clayton Act, *15 U.S.C. §§ 4*, *16*. The United States District Court for the Eastern District of New York (Trager, J.) denied the defendants' motion to dismiss on the basis of the act of state doctrine, foreign sovereign compulsion, and international comity. The district court (Cogan, J.) subsequently denied the defendants' motion for summary judgment on the same grounds, and the case proceeded to trial. All defendants settled other than Hebei Welcome Pharmaceutical Co. Ltd. ("Hebei") and its parent company North China Pharmaceutical Group Corp ("NCPG"). Following a jury verdict of liability, the district court entered a trebled damages award of $147,831,471.03, plus interest, and permanently enjoined Hebei and NCPG from future anti-competitive behavior. The district court then denied Hebei and NCPG's renewed **[**2]** motion for judgment as a matter of law. In this case's first trip to our Court, we reversed. We held that the district court was bound to defer to the facially reasonable explanation of Chinese law submitted by the Ministry of Commerce of the People's Republic of China (the "Ministry"). According to the Ministry's explanation, Chinese law required the defendants to undertake the anticompetitive conduct at issue, and—accepting this explanation as reasonable under the circumstances—we concluded that such a "true conflict" between China's regulatory scheme and U.S. antitrust laws, in combination with other international comity factors, mandated dismissal of the plaintiffs' suit. The Supreme Court reversed, holding that we afforded too much deference to the Ministry's submissions, and remanded for us to carefully consider but not conclusively defer to the Ministry's views pursuant to *Rule 44.1 of the Federal Rules of Civil Procedure*. Applying the Supreme Court's instructions, we conclude once again that this case should be dismissed on international comity grounds. Giving careful consideration but not conclusive deference to the Ministry's views, we read the relevant Chinese regulations—as illuminated by contemporaneous administrative **[**3]** documents and industry reports—to have required the defendants to collude on Vitamin C export prices and quantities as part and parcel of China's export regime for Vitamin C. Balancing this true conflict between U.S. and Chinese law together with other established principles of international comity, we decline to construe U.S. ***antitrust law*** to reach the defendants' conduct. Accordingly, we REVERSE and REMAND with instructions to dismiss the case. Judge WESLEY dissents in a separate opinion.

HN1[] **Conflict of Law, Choice of Law**

An appellate court reviews a district court's denial of a *Fed. R. Civ. P. 50* motion de novo, including its determination of foreign law under *Fed. R. Civ. P. 44.1*. As to whether a district court erroneously declined to dismiss an action on international comity grounds, an appellate court reviews relevant questions of statutory interpretation de novo.

Governments > Courts > Judicial Comity

International Law > ... > Comity Doctrine > Comity Doctrine Procedures > Discretion Regarding Procedures

International Law > ... > Comity Doctrine > Areas of Law > Family Law

HN2[] **Courts, Judicial Comity**

Comity is both a principle guiding relations between foreign governments and a legal doctrine by which U.S. courts recognize an individual's acts under foreign law. It is the recognition which one nation allows within its territory to the legislative, executive, or judicial acts of another nation, having due regard both to international duty and convenience, and to the rights of its own citizens or other persons who are under the protection of its laws. As a general matter, international comity takes into account the interests of the United States, the interests of the foreign state, and those mutual interests the family of nations have in just and efficiently functioning rules of international law. To determine whether international comity principles require dismissal of a lawsuit, a court applies a multi-factor balancing test as set forth in Timberlane Lumber Company and revised in Mannington Mills.

Business & Corporate Compliance > ... > Dispute Resolution > Conflict of Law > Choice of Law

International Law > ... > Comity Doctrine > Comity Doctrine Procedures > Discretion Regarding Procedures

Governments > Courts > Judicial Comity

HN3[] **Conflict of Law, Choice of Law**

To warrant dismissal on the basis of international comity, the two countries' legal demands must be irreconcilable. In other words, there must be a true conflict between U.S. law and that of the foreign nation to warrant dismissal of a claim pursuant to international comity.

International Law > Authority to Regulate > Anticompetitive Activities

HN4[] **Authority to Regulate, Anticompetitive Activities**

A defendant invoking foreign sovereign compulsion (FSC) must show that a foreign government's order compelled its business to violate American ***antitrust law***. In probing for bona fide compulsion, courts require defendants asserting FSC to show that non-compliance with foreign law portends a significant risk of substantial sanctions.

Governments > Courts > Judicial Comity

International Law > ... > Comity Doctrine > Comity Doctrine Procedures > Discretion Regarding Procedures

HN5[] **Courts, Judicial Comity**

As a matter of first principles, comity is characterized by respect for another country's sovereign authority within its borders, not by examination of whether such authority exerts duress-like pressure that leaves defendants little or no choice but to engage in the prohibited conduct. A a true conflict is present even where a foreign government grants defendants some discretion in choosing how to carry out the legally mandated conduct, so long as compliance with the laws of both countries is impossible. Foreign sovereign compulsion (FSC) by contrast, applies only to the scope of conduct actually compelled under threat of severe sanctions. Whereas FSC is a standalone basis for abstention, the finding of a true conflict is only one step, albeit a critical one, in a comity analysis.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

HN6[] **Per Se Rule & Rule of Reason, Per Se Violations**

The Sherman Act prohibits every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce. *15 U.S.C.S. § 1*. While the language is interpreted to outlaw only unreasonable restraints on trade, certain types of anticompetitive conduct are so plainly anticompetitive that no elaborate study of the industry is needed to establish their illegality. Price-fixing agreements between two or more competitors, otherwise known as horizontal price-fixing agreements, fall into the category of arrangements that are per se unlawful.

Governments > Legislation > Interpretation

HN7[] Legislation, Interpretation

In considering a statement on the meaning of another country's law, a court weighs the explanation's clarity, thoroughness, and support; its context and purpose; the transparency of the foreign legal system; the role and authority of the entity or official offering the statement; and the statement's consistency with the foreign government's past positions.

Judges: Before: CABRANES, WESLEY, and NARDINI, Circuit Judges. WESLEY, Circuit Judge, dissenting.

Opinion by: WILLIAM J. **[**4]** NARDINI

Opinion

[*140] WILLIAM J. NARDINI, *Circuit Judge*:

We consider this appeal, which arises from an antitrust action brought against Defendants-Appellants Hebei Welcome Pharmaceutical Co. Ltd. ("Hebei"), North China Pharmaceutical Group Corporation ("NCPG"), and other entities incorporated under the laws of the People's Republic of China ("PRC" or "China") (together, "Defendants-Appellants"), on remand from the Supreme Court. *See* *Animal Sci. Prods., Inc. v. Hebei Welcome Pharm. Co., 138 S. Ct. 1865, 201 L. Ed. 2d 225 (2018)*. Plaintiffs-Appellees Animal Science Products, Inc. and The Ranis Company, Inc. (together, "plaintiffs"), are U.S. purchasers of Vitamin C that allege Defendants-Appellants and others conspired to fix the price and supply of Vitamin C sold to U.S. companies on the international market in violation of *Section 1* of the Sherman Act, *15 U.S.C. § 1*, and *Sections 4* and *16* of the Clayton Act, *15 U.S.C. §§ 4*, *16*.

This antitrust case is unusual in that the parties before us generally agree that the alleged anticompetitive conduct occurred. The dispute centers instead on "whether Chinese law required the Chinese sellers' conduct." *Animal Sci. Prods., 138 S. Ct. at 1875*. Thus, we must decide whether Chinese law made it impossible for the Defendants-Appellants to comply with U.S. ***antitrust law***, such that a so-called "true conflict" exists. This determination is critical **[**5]** because the existence of a true conflict, balanced in combination with other principles of international comity, may weigh against construing U.S. ***antitrust law*** to reach anticompetitive conduct occurring abroad.

We ultimately conclude that Chinese law required Defendants-Appellants to engage in price-fixing of Vitamin C sold on the international market. Defendants-Appellants thus could not comply with both Chinese law and U.S. ***antitrust law***. In light of this true conflict, we apply the remaining principles of international comity to balance the United States' interest in the enforcement of its antitrust laws abroad against the international comity concerns implicated when those laws conflict with the laws of China. We conclude that principles of international comity required the district court to dismiss this action. We therefore **REVERSE** the judgment and **REMAND** with instructions to **DISMISS** the complaint with prejudice.

I. BACKGROUND

For more than half a century, China has been a leading producer and exporter of Vitamin C.[1] In the 1970s, as China began to move into the competitive international **[*141]** economy under the general direction of the Communist Party of China, the Chinese government implemented **[**6]** various export controls to gain a competitive edge over other producers of Vitamin C on the international market. In the intervening years, the Chinese government continued to develop policies to retain its domestic producers' competitive advantage. In the 1990s, for example, following a price war between producers in China, the Chinese government facilitated industry-wide consolidation and implemented regulations to control the prices of Vitamin C exports. By 2001, Chinese suppliers had captured 60% of the global Vitamin C market.

Several years later, in 2005, plaintiffs filed this antitrust action. The original complaint named four defendants, all of which are entities incorporated under the laws of China: Hebei, Jiangsu Jiangshan Pharmaceutical Co. Ltd. ("Jiangshan"), Northeast Pharmaceutical Group Co. Ltd. ("Northeast"), and Weisheng Pharmaceutical Co. Ltd. ("Weisheng") (together, "defendants").[2] The plaintiffs later added as a defendant Hebei's holding company, NCPG.[3]

In the district court, the defendants moved to dismiss based on the foreign sovereign compulsion doctrine, the act of state doctrine, and principles of international comity. In an historic act—the first official appearance **[**7]** by the Chinese government in a U.S. court—China's Ministry of Commerce (the "Ministry") filed an *amicus curiae* brief and several other submissions in support of the motion to dismiss.[4] The district court rejected all three grounds for dismissal and denied the motion so as to permit discovery with respect to the defendants' assertion that the Chinese government compelled the actions constituting the basis of the antitrust violations. *In re Vitamin C Antitrust Litig., 584 F. Supp. 2d 546, 552 (E.D.N.Y. 2008)* (David G. Trager, *Judge*). The district court subsequently denied the defendants' motion for summary judgment, or, alternatively, a motion for a determination of foreign law under *Federal Rule of Civil Procedure 44.1*. *In re Vitamin C Antitrust Litig., 810 F. Supp. 2d 522 (E.D.N.Y. 2011)* (Brian M. Cogan, *Judge*).

In denying the defendants' motion for summary judgment, the district court again rejected application of the act of state doctrine and the foreign sovereign compulsion doctrine, *id. at 548-49*,[5] which it appeared to equate with the true conflict inquiry under an international comity analysis, *id. at 543*. The district court also concluded that there was no bar to the exercise of its jurisdiction due to international comity principles. *Id. at 542-44*.

After the district court denied the defendants' motion for summary judgment, Jiangshan settled the claims against it for $10.5 million. **[**8]** Jury trial began on February 25, 2013. On the eve of the jury's deliberations, **[*142]** Weisheng settled for $22.5 million and Northeast for $500,000. On March 14, 2013, the jury returned its verdict, finding the remaining defendants—Hebei and NCPG—liable in the amount of $54.1 million. After accounting for the settlement amounts and attorneys' fees, the district court entered a trebled damages award of $147,831,471.03 plus interest from the date of judgment, as well as a permanent injunction against future anticompetitive behavior.

---

[1] We set forth here only those facts necessary to resolve the issues on appeal.

[2] The complaint also named Weisheng's affiliates Shijiazhuang Pharmaceutical (USA) Inc. and China Pharmaceutical Group, Ltd.

[3] As explained below, the other defendants settled before or during trial, and therefore only Hebei and NCPG brought this appeal.

[4] We discuss in detail the Ministry's submissions, four in total, later in our analysis. *See* Section III.C.3, *infra*.

[5] The district court determined that there had been no foreign sovereign compulsion because the defendants' anticompetitive conduct was voluntary, not compelled, and the defendants had not shown that they faced a risk of severe sanctions for noncompliance. *Id. at 554-58*. Further, even if Chinese law did involve some compulsion, it "assuredly did not compel all of defendants' illegal conduct," and therefore the defense did not extend to anticompetitive measures affirmatively adopted by the defendants. *Id. at 554*.

The district court denied Hebei and NCPG's renewed motion for judgment as a matter of law pursuant to *Rule 50(b) of the Federal Rules of Civil Procedure*. *In re Vitamin C Antitrust Litig., 1:06-md-1738, 2013 U.S. Dist. LEXIS 169083, 2013 WL 6191945 (E.D.N.Y. Nov. 26, 2013)*. In that ruling, the district court stated that it "stands by and reaffirms its prior rulings that Chinese law did not compel defendants to engage in antitrust violations, [and] that the doctrines of act of state and international comity do not bar plaintiffs' suit." *2013 U.S. Dist. LEXIS 169083, [WL] at *1*.

This Court reversed, finding that the district court erred, or "abused its discretion,"[6] by failing to abstain on international comity grounds in light of the Ministry's submissions showing a true conflict between U.S. ***antitrust law*** and Chinese export regulations for Vitamin C. *In re Vitamin C Antitrust Litig., 837 F.3d 175, 189 (2d Cir. 2016)*. In doing so, we held **[**9]** that when a foreign government directly participates in U.S. court proceedings by providing an official representation regarding the proper interpretation of its laws, the U.S. court is bound to defer to that interpretation so long as it is reasonable under the circumstances. *Id.* The Supreme Court then reversed, holding that our Court gave too much deference to the Ministry's submissions, and remanded for us to carefully consider the Ministry's views without giving them dispositive effect. *Animal Sci. Prods., 138 S. Ct. at 1873*.

II. STANDARD OF REVIEW

HN1[] We review the district court's denial of a *Rule 50* motion *de novo, see* *Legg v. Ulster Cty., 979 F.3d 101, 114 (2d Cir. 2020)*, including its determination of foreign law under *Rule 44.1*, *see* *Animal Sci. Prods., 138 S. Ct. at 1873*. As to whether the district court erroneously declined to dismiss this action on international comity grounds, we review relevant questions of statutory interpretation *de novo*. *See* *In re Picard, Tr. for Liquidation of Bernard L. Madoff Inv. Sec. LLC, 917 F.3d 85, 101 (2d Cir. 2019)*, *cert. denied sub nom. HSBC Holdings PLC v. Picard, 140 S. Ct. 2824, 207 L. Ed. 2d 157 (2020)*.[7]

[*143] III. DISCUSSION

The central issue we address is whether the district court should have dismissed this antitrust action for reasons of international comity. As required by *Hartford Fire Ins. Co. v. California, 509 U.S. 764, 799, 113 S. Ct. 2891, 125 L. Ed. 2d 612 (1993)*, our comity analysis begins by asking whether Chinese law required defendants to engage in anticompetitive conduct that violated U.S. antitrust laws, such that a **[**10]** true conflict exists. As part of that inquiry, and pursuant to the Supreme Court's direction to us on remand, we carefully consider the statements from the Chinese government as to the proper interpretation of its laws and what requirements those laws imposed on the defendants.

We conclude that Chinese law required the defendants to engage in price-fixing of Vitamin C sold on the international market. Because defendants could not comply with both Chinese law and U.S. ***antitrust law***, there is a true conflict for international comity purposes. After balancing the United States' interest in adjudicating antitrust

---

[6] *See* *United States v. Park, 758 F.3d 193, 199-200 (2d Cir. 2014)* (explaining that "abuse of discretion" is a "distinctive term of art that is not meant as a derogatory statement about the district judge whose decision is found wanting").

[7] As explained below, *see* Section III.A n.8, *infra*, we understand international comity to apply here as a form of prescriptive comity: "a canon of [statutory] construction" that may serve to "shorten the reach of a statute." *In re Picard, Tr., 917 F.3d at 100* (internal quotation marks omitted). In other contexts, international comity functions instead as a type of "adjudicative comity," "the so-called comity among courts," which "may be viewed as a discretionary act of deference by a national court to decline to exercise jurisdiction in a case properly adjudicated in a foreign state." *Id.* (internal quotation marks omitted). Even were we to consider this case under the rubric of adjudicative comity—which principally applies when a district court has declined to exercise jurisdiction in deference to ongoing proceedings in a foreign court—we would in any event review that decision under an unusually rigorous abuse-of-discretion standard that leaves "little practical distinction between review for abuse of discretion and review *de novo*." *Id. at 102* (quoting *Hachamovitch v. DeBuono, 159 F.3d 687, 693 (2d Cir. 1998)*).

violations alleged to have harmed those within its jurisdiction with the PRC's interest in regulating its economy within its borders, we hold that principles of international comity required the district court to dismiss this action.

We start with the doctrine of international comity, paying particular attention to the true conflict standard established in *Hartford Fire, 509 U.S. at 799*.

A. International Comity

Defendants principally argue that the district court erred, at multiple intervals, in declining to dismiss this action under principles of international comity. ***HN2***[] Comity is both a principle guiding relations **[**11]** between foreign governments and a legal doctrine by which U.S. courts recognize an individual's acts under foreign law. *See In re Maxwell Commc'n Corp., 93 F.3d 1036, 1046 (2d Cir. 1996)*.[8] It is the **[*144]** "recognition which one nation allows within its territory to the legislative, executive or judicial acts of another nation, having due regard both to international duty and convenience, and to the rights of its own citizens or other persons who are under the protection of its laws." *Hilton v. Guyot, 159 U.S. 113, 164, 16 S. Ct. 139, 40 L. Ed. 95 (1895)*. As a general matter, international comity "takes into account the interests of the United States, the interests of the foreign state, and those mutual interests the family of nations have in just and efficiently functioning rules of international law." *In re Maxwell, 93 F.3d at 1048*. To determine whether international comity principles require dismissal of a lawsuit, we apply a multi—factor balancing test as set forth by the Ninth Circuit in *Timberlane Lumber Co. v. Bank of Am., N.T. & S.A., 549 F.2d 597, 614-15 (9th Cir. 1976)*, and then revised by the Third Circuit in *Mannington Mills, Inc. v. Congoleum Corp., 595 F.2d 1287, 1297-98 (3d Cir. 1979)*. *See O.N.E. Shipping, 830 F.2d at 451* ("The comity balancing test has been explicitly used [by the Second Circuit]. ").[9]

---

[8] As noted above, our application of international comity in this case involves "prescriptive comity"—a form of statutory interpretation—rather than the abstention-based doctrine of "adjudicatory comity." These are "two district legal doctrines," *In re Maxwell, 93 F.3d at 1047*, and although they "sometimes demand similar analysis, each asks a different question and is rooted in a different legal theory," *In re Picard, 917 F.3d at 101* (internal quotation marks omitted).

In *Hartford Fire*, the Supreme Court seemed to assume that international comity should be treated as an abstention doctrine. *See 509 U.S. at 798* (considering, but not deciding, "whether a court with Sherman Act jurisdiction should ever *decline to exercise such jurisdiction* on grounds of international comity." (emphasis added)). In dissent, Justice Scalia proposed an alternative analysis based on prescriptive comity: "Congress is generally presumed not to have exceeded . . . customary international-law limits" and therefore "statutes should not be interpreted to regulate foreign persons or conduct if that regulation would conflict with principles of international law." *509 U.S. at 815* (Scalia, *J.*, dissenting). The Supreme Court's subsequent decision in *F. Hoffmann-La Roche Ltd. v. Empagran S.A.*, cited Justice Scalia's dissent in *Hartford Fire* with approval, and it relied on this rule of prescriptive comity, based in statutory construction, which "cautions courts to assume that legislators take account of the legitimate sovereign interests of other nations when they write American laws [and] thereby helps the potentially conflicting laws of different nations work together in harmony." *542 U.S. 155, 164, 124 S. Ct. 2359, 159 L. Ed. 2d 226 (2004)*.

In keeping with *F. Hoffman-La Roche*, we consider how Congress presumably intended courts to construe U.S. ***antitrust law*** "to avoid unreasonable interference with the sovereign authority of other nations." *Id; see also In re Maxwell, 93 F.3d at 1047* ("When construing a statute, the doctrine of international comity is best understood as a guide where the issues to be resolved are entangled in international relations."). That approach to understanding statutes is not of recent vintage—indeed, it has been here all along. As Chief Justice Marshall explained long ago in the case of the *Charming Betsy*, "an act of Congress ought never to be construed to violate the law of nations if any other possible construction remains." *Murray v. Schooner Charming Betsy, 6 U.S. 64, 118, 2 L. Ed. 208 (1804)*.

[9] In *Timberlane*, the Ninth Circuit identified seven factors for courts to balance when considering when an extraterritorial assertion of jurisdiction is justified. *549 F.2d at 614*. In *Mannington Mills*, the Third Circuit expressed "substantial agreement" with *Timberlane*'s balancing test. *595 F.2d at 1297*. The court noted that "foreign policy, reciprocity, comity, and limitations of judicial power are considerations that should have a bearing on the decision to exercise or decline jurisdiction" when foreign nations are involved. *Id. at 1296*. It then distilled those concerns into ten factors:

In applying this multi-factor balancing test, we are mindful of the Supreme Court's explanation in *Hartford Fire* that, ***HN3***[] to warrant dismissal on the basis of international comity, the two countries' legal demands must be irreconcilable. *509 U.S. at 799* (explaining that "[n]o conflict exists . . . where a person subject to regulation by two states can comply with the laws of both." (internal **[**13]** quotation marks omitted).[10] In other **[*145]** words, there must be a "true conflict" between U.S. law and that of the foreign nation to warrant dismissal of a claim pursuant to international comity.

Our analysis centers on the existence of a true conflict, but other international comity factors remain relevant. While the Supreme Court in *Hartford Fire* found "no need . . . to address other considerations" respecting international comity," *509 U.S. at 799*, our Circuit has favored the view that *Hartford Fire* did not mean to thereby extinguish the remaining comity factors *sub silentio*.[11] It is for this reason that we have described the "conflict between domestic and foreign law" as merely "an important criterion for a comity dismissal." *Figueiredo Ferraz E Engenharia de Projeto Ltda. v. Republic of Peru, 665 F.3d 384, 391 (2d Cir. 2011)*.

---

(1) Degree of conflict with foreign law **[**12]** or policy;

(2) Nationality of the parties;

(3) Relative importance of the alleged violation of conduct here compared to that abroad;

(4) Availability of a remedy abroad and the pendency of litigation there;

(5) Existence of intent to harm or affect American commerce and its foreseeability;

(6) Possible effect upon foreign relations if the court exercises jurisdiction and grants relief;

(7) If relief is granted, whether a party will be placed in the position of being forced to perform an act illegal in either country or be under conflicting requirements by both countries;

(8) Whether the court can make its order effective;

(9) Whether an order for relief would be acceptable in this country if made by the foreign nation under similar circumstances; [and]

(10) Whether a treaty with the affected nations has addressed the issue.

Id. at 1297-98 (internal footnote omitted).

[10] In *Hartford Fire*, certain American insurance companies and their London-based reinsurers allegedly conspired to restrict the sale of reinsurance to the American insurance market unless designated terms more favorable to insurers were incorporated into standard insurance contracts. *Id. at 775-76*. The London reinsurers argued that holding them liable under U.S. ***antitrust law*** would "conflict significantly with British law," and the British Government, appearing as *amicus curiae*, concurred, asserting that "Parliament ha[d] established a comprehensive regulatory regime over the London reinsurance market and that the conduct alleged . . . was perfectly consistent with British law and policy." *Id. at 798-99*. The Court said this was insufficient to create a true conflict: "The fact that conduct is lawful in the state in which it took place will not, of itself, bar application of the United States antitrust laws, even where the foreign state has a strong policy to permit or encourage such conduct." *Id. at 799* (internal quotation marks and alteration omitted).

[11] In *In re Maxwell*, we noted that "*Hartford Fire* recognized that other concerns might be implicated if the context were different." *93 F.3d at 1050* (internal quotation marks omitted). We then concluded that a dispute over the applicability of the avoidance provision of the Bankruptcy Code was "significantly different from the circumstances confronting the Supreme Court in *Hartford Fire*" such that a full comity analysis was appropriate, even after finding a true conflict. *Id.*

In our prior opinion, we read *Hartford Fire* "narrowly," limiting its singular focus on the existence of a true conflict to that case's facts and considering the "remaining factors in the comity balancing test" even after concluding that a true conflict existed. *In re Vitamin C Antitrust Litig., 837 F.3d at 185*. The Supreme Court did not disturb this portion of our decision, and we maintain that approach here. *Accord* *In re Sealed Case, 932 F.3d 915, 931-32, 442 U.S. App. D.C. 378 (D.C. Cir. 2019)*; *see also* *United States v. Brodie, 174 F. Supp. 2d 294, 305 (E.D. Pa. 2001)* ("The Supreme Court did not purport [in *Hartford Fire*] to replace the multi-factor analysis of *Mannington Mills* and other cases.").

B. Distinguishing True Conflicts from Foreign Sovereign Compulsion

The true conflict requirement of *Hartford Fire* shares much in common with the foreign sovereign compulsion ("FSC") doctrine, and some courts (including the district court) have treated the two alike.[12] But we detect important distinctions between the FSC doctrine and the true conflict inquiry for **[**14]** international comity purposes. ***HN4***[] A defendant invoking FSC must show that a "foreign government's order . . . compelled [its] business to violate American ***antitrust law***." *Mannington Mills, 595 F.2d at 1293*.[13] In probing for **[*146]** bona fide compulsion, courts have required defendants asserting FSC to show that non-compliance with foreign law portends a significant risk of substantial sanctions.[14] Some courts have also required the party asserting the defense to act in good faith by "mak[ing] all efforts to comply with U.S. law," *Brodie, 174 F. Supp. at 300* & n.5, on the grounds that the foreign party is in the best position to "plead with its own sovereign for relaxation of penal laws or for adoption of plans which will at the least achieve a significant measure of compliance" with U.S. law, *Société Internationale, 357 U.S. at 205*.[15]

In its discussion of international comity, the Court in *Hartford Fire* made no mention of sovereign compulsion or the coercive nature of sanctions available under foreign law, instead focusing entirely on whether foreign law, taken at face value, "requires [the defendants] to act in some fashion prohibited by the law of the United States." *509 U.S. at 799*. Exclusive attention to what foreign law facially requires makes sense in the context of international **[**15]**

---

[12] *See, e.g.*, *In re Vitamin C Antitrust Litig., 810 F. Supp. 2d at 546* ("[A]bsent compulsion, dismissal on comity grounds is not warranted."); *Trugman-Nash, Inc. v. New Zealand Dairy Bd., Milk Prods. Holdings (N. Am.) Inc., 954 F. Supp. 733, 736 (S.D.N.Y. 1997)* ("[T]here is an actual and material conflict between American ***antitrust law*** and New Zealand law . . . sufficient to entitle defendants to invoke . . . foreign sovereign compulsion[] and international comity.").

[13] Courts have consistently declined to apply FSC absent genuine compulsion by the foreign sovereign. For example, the FSC defense was unavailable to American banks that induced Mexican officials in 1919 to grant them tax preferences and a commercial monopoly over sisal because, while the restraints on trade were "aided by discriminating legislation," the conspirators "by their own deliberate acts . . . brought about forbidden results within the United States." *United States v. Sisal Sales Corp., 274 U.S. 268, 276, 47 S. Ct. 592, 71 L. Ed. 1042 (1927)*. Similarly, FSC did not shield from antitrust liability companies who monopolized vanadium supply and fixed prices in Canada and the United States from 1933 to 1949 where there was "no indication that the [Canadian Government Metals] Controller or any other official within the structure of the Canadian Government approved or would have approved of joint efforts to monopolize the production and sale of vanadium or directed that purchases from [the plaintiff] be stopped." *Cont'l Ore Co., 370 U.S. at 706*. The fact that one defendant, appointed by the Canadian government to be exclusive wartime purchasing agent for vanadium, "was acting in a manner permitted by Canadian law" did not establish a basis for FSC, as there was "nothing to indicate that such law in any way compelled discriminatory purchasing." *Id. at 707*.

[14] *See, e.g.*, *Société Internationale Pour Participations Industrielles et Commerciales, S.A. v. Rogers, 357 U.S. 197, 211, 78 S. Ct. 1087, 2 L. Ed. 2d 1255 (1958)* (excusing Swiss party's "failure to satisfy fully the requirements of [a] production order . . . because production of documents in Switzerland pursuant to the order of a United States court might violate Swiss laws" and thus subject the party to "criminal sanctions"); *United States v. First Nat. City Bank, 396 F.2d 897, 905 (2d Cir. 1968)* (refusing to excuse compliance with a grand jury subpoena when "risk of civil damages was slight and speculative"); *Brodie, 174 F. Supp. at 301* (rejecting FSC defense based on foreign "blocking statutes" designed to counteract U.S. Cuban Assets Control Regulations because it "would be very difficult for the Canadian or U.K. government to mount a prosecution under the blocking statutes" and there was no evidence of past enforcement); *Interamerican Ref. Corp. v. Texaco Maracaibo, Inc., 307 F. Supp. 1291, 1294 (D. Del. 1970)* (granting FSC defense where Venezuelan oil ministry "supervised concessionaires rigorously and conducted regular reviews of their sales policies," "promulgated rules regarding the sale of oil extracted there," and imposed "[s]anctions for violation of the rules includ[ing] suspension of the right to ship oil out of the country").

[15] *See also* *In re Sealed Case, 932 F.3d at 940* (affirming district court's civil contempt citation of Chinese banks for failure to comply with discovery order—notwithstanding Chinese law forbidding disclosure—because the banks had "not demonstrated good faith" and "the requested records [we]re essential to an investigation into a matter of national security" (internal quotation marks omitted)).

comity for several reasons. ***HN5***[] As a matter of first principles, "comity" is characterized by respect for another country's sovereign authority within its borders, not by examination of whether such authority exerts duress-like pressure that leaves defendants little or no choice but to engage in the prohibited conduct.[16] In focusing **[*147]** on the foreign state rather than the defendants, we consider primarily what the state as sovereign legislates—not the severity of the penalties the state imposes on non-compliance. Second, a true conflict is present even where the foreign government grants the defendants some discretion in choosing how to carry out the legally mandated conduct, so long as "compliance with the laws of both countries is . . . impossible." *Hartford Fire, 509 U.S. at 799*. FSC, by contrast, applies only to the scope of conduct actually compelled under threat of severe sanctions. *See Continental Ore, 370 U.S. at 706-07*. Third, whereas FSC is a standalone basis for abstention, the finding of a true conflict is only one step—albeit a critical one—in a comity analysis. A false equivalency of FSC and true conflict analysis would convert the "degree of conflict with foreign law" factor into the be-all and end-all of the international comity analysis, **[**16]** rendering mere surplusage much of that longstanding doctrine. Accordingly, our discussion of international comity does not feature consideration of the threat of compulsive sanctions. Instead, we look to the laws of each country in turn to determine whether, taking those laws at face value, a true conflict exists.

C. True Conflict Analysis

HN6[] The Sherman Act prohibits "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce." *15 U.S.C. § 1*. While this language has been interpreted to outlaw only unreasonable restraints on trade, *see, e.g., State Oil Co. v. Khan, 522 U.S. 3, 10, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997)*, certain types of anticompetitive conduct are "so plainly anticompetitive that no elaborate study of the industry is needed to establish their illegality," *Nat. Soc. of Prof'l Eng'rs v. United States, 435 U.S. 679, 692, 98 S. Ct. 1355, 55 L. Ed. 2d 637 (1978)*. "Price—fixing agreements between two or more competitors, otherwise known as horizontal price—fixing agreements, fall into the category of arrangements that are per se unlawful." *Texaco Inc. v. Dagher, 547 U.S. 1, 5, 126 S. Ct. 1276, 164 L. Ed. 2d 1 (2006)*. Thus, if Chinese law required defendants to enter into horizontal price—fixing agreements, "compliance with the laws of both countries [would be] impossible," *Hartford Fire, 509 U.S. at 799*, and there would be a true conflict.

We follow the Supreme Court's approach in *Hartford Fire* and begin our inquiry **[**17]** by asking whether Chinese law governing the Vitamin C industry, on its face, required defendants to engage in conduct that violates U.S. antitrust laws. We therefore scrutinize whether defendants *could have* sold and distributed Vitamin C while in compliance with both Chinese and U.S. ***antitrust law*** or "whether Chinese law required the Chinese sellers' conduct" in violation of U.S. ***antitrust law***. *Animal Sci. Prods., 138 S. Ct. at 1875*. As we explain below, it did. To determine what Chinese law required, we consider the "relevant material" and "source[s]." *See Fed. R. Civ. P. 44.1*; *Animal Sci. Prods., 138 S. Ct. at 1873*.[17]

[*148] 1. Chinese Law Facially Required Vitamin C Price-Fixing

---

[16] *See F. Hoffmann-La Roche, 542 U.S. at 165* (recognizing that the application of U.S. ***antitrust law*** to foreign conduct "creates a serious risk of interference with a foreign nation's ability independently to regulate its own commercial affairs").

[17] *Rule 44.1* provides that "[i]n determining foreign law, the court may consider any relevant material or source, including testimony, whether or not submitted by a party or admissible under the Federal Rules of Evidence." As the Supreme Court noted, "*Rule 44.1* frees courts 'to reexamine and amplify material . . . presented by counsel in partisan fashion or in insufficient detail.'" *Animal Sci. Prods., 138 S. Ct. at 1873* (quoting the Advisory Committee's Note on *Rule 44.1*'s adoption in 1966). The *Rule 44.1* materials relevant to this case—which we explore in detail in the remainder of this Section—include the Chinese regulations at issue, the charters of the Chinese agencies responsible for overseeing the export regime, internal industry records and trial testimony describing how that regime actually functioned, the Ministry's statements interpreting Chinese law, and China's representations to the World Trade Organization concerning its export controls on Vitamin C.

China's regulations for its Vitamin C industry evolved considerably between the founding of the Chamber of Commerce of Medicines & Health Products Importers & Exporters (the "Chamber") in 1989 and the filing of this antitrust action in 2005. In the early 1990s, the Ministry of Foreign Trade and Economic Cooperation (which is now known as the Ministry of Commerce, or the "Ministry") exercised near-total control over the "foreign trade and economic social organizations," also known as "chambers," which were responsible for the administration of export controls.[18] Once the Ministry ratified and registered each chamber, **[**18]** it provided "operation guidance" on matters such as the "development of foreign trade." App'x 3715. The 1991 Regime provided that the chambers "must accept the daily management by [the Ministry] or its authorized departments," and thus, that the Ministry was "directly responsible" for managing each chamber's daily activities and inspecting its records, including leadership candidates, personnel structure, budget, salaries, and meetings of representatives. App'x 3716-17. The Chamber, in its own right a governmental entity with the power to act with the force and effect of law, was one such entity under the Ministry's direct and active supervision.

Beginning in 1996, a price war among Chinese Vitamin C exporters led to industry consolidation among four major manufacturers, the original defendants in this action. *See* [In re Vitamin C Antitrust Litig., 584 F. Supp. 2d at 548](). In 1997, the Ministry and the PRC's State Drug Administration promulgated a "Notice Relating to Strengthening the Administration of Vitamin C Production and Export by Ministry of Foreign Trade and Economic Cooperation and State Drug Administration" (the "1997 Notice"). A primary objective of the 1997 Notice was to "promote the healthy development of Vitamin C export and **[**19]** maintain the interest[s] of [China] and [exporting] enterprises." Sp. App'x 298. Accordingly, the 1997 Notice provided that the "scale of Vitamin C production shall be strictly controlled." *Id.* These controls included production quotas set by the Ministry, a licensing system for all exporters, and, within the Chamber, the creation of a "Vitamin C Coordination Group"—later known as the Vitamin C Sub-Committee (the "Sub-Committee")—which was formally established in March 1998.[19]

[*149] The Sub-Committee's function was to "coordinate and administrate market, price, customer and operation order of Vitamin C export." Sp. App'x 318. The Sub-Committee was also required to "hold, periodically or otherwise, working meetings for Vitamin C export to exchange information, summarize and communicate experience, analyze and work out coordinated prices for Vitamin C export, [and] to supervise and inspect the implementation of such coordinated export prices set by the Sub-Committee and relevant business activities related to the enterprises." Sp. App'x 319. At these meetings, members would "discuss and set export coordinated price." Sp. App'x 320. Only Sub-Committee members were entitled to export Vitamin **[**20]** C. Members were obligated to comply with all regulations from the Ministry and the Sub-Committee, to "voluntarily adjust their production outputs according to changes of supplies and demands on international market" and to "[s]trictly execute export coordinate price set by the Chamber and keep it confidential." Sp. App'x 319-20. Violations of these obligations subjected a firm to "warning, open criticism[20] and even revocation of its membership." Sp. App'x 320. Members could withdraw only "subject to approval by the Sub-Committee's Council." Sp. App'x 319. And the "Council," an executive body created within the Sub-Committee composed of the four original defendants, was responsible for proposing annual quotas and coordinating prices under "urgent circumstances." Sp. App'x 321.

---

[18] Pursuant to the Measures for Administration over Foreign Trade and Economic Social Organizations promulgated in 1991 (the "1991 Regime"), the Ministry oversaw the establishment of chambers dedicated to protecting Chinese national interests, including "the development of foreign trade and economy, the enhancement of the relationship between domestic and foreign enterprises and relevant organizations, and the order of foreign trade and economy." App'x 3713-14.

[19] Pursuant to the 1997 Notice, the Sub-Committee would hold regular meetings at which the Vitamin C firms would be expected to "timely formulate and adjust export coordination price" using a "specific method for coordination . . . formulated by the Chamber, and filed to [the Ministry] for record." Sp. App'x 299. All licensed Vitamin C exporters would be required to participate in the Sub-Committee and "strictly implement" its "coordination" of "Vitamin C export market, price and customers." *Id.* Any exporter selling Vitamin C at a below-coordination price would be penalized by reduction of its export quota or revocation of its export rights.

[20] "Open criticism" was a serious penalty in the Maoist system of governance. *See generally* JONATHAN SPENCE, THE SEARCH FOR MODERN CHINA (2001).

Beginning in 2000, another price war flattened Chinese Vitamin C export prices, and by 2001, the defendants succeeded in capturing about 60% of the global market for Vitamin C. *See* *In re Vitamin C Antitrust Litig., 584 F. Supp. 2d at 548*. In late 2001, after importing countries threatened anti-dumping lawsuits against China, the Chamber held a meeting with the Sub-Committee's Council and procured an agreement that **[**21]** "[t]he committed export volume as part of the industry self-discipline shall be strictly implemented." App'x 3880. To further "the self-discipline for Vitamin C export industry in 2002," total export volumes for each manufacturer would be recorded and "export enterprises that [we]re not in strict compliance with this requirement w[ould] be punished by [the] Sub-Committee." *Id.* Violations of "disguised low prices or exporting beyond given volume" would be punishable by a deduction of "five times of the export volume that is in violation . . . from the total allocated export volume of the violating manufacturer." App'x 3881.

In December 2001, China acceded to, or became a member of, the World Trade Organization ("WTO"). Both before and after its WTO accession, China "systematically overhauled existing laws, administrative regulations and department rules to comply with WTO rules and accession commitments."[21] In particular, China represented to the WTO that, beginning in January 2002, it "gave up export administration of . . . vitamin C."[22]

[*150] Thus, in 2002, to "adapt to the new situation of [China's] opening-up to the outside world" and to "earnestly perform the promises of [China's] entry to the WTO," the Ministry abolished the 1997 Notice. App'x 3886. In its place, the Ministry and the PRC's General Administration of Customs ("Customs") together promulgated a "Notice for the Adjustment of the Catalogue of Export Products Subject to Price Review by the Customs" (the "2002 Notice"). Sp. App'x 301. The stated purpose of the 2002 Notice, in replacing the 1997 Notice, was to "maintain the order of market competition, make active efforts to avoid anti-dumping sanctions imposed by foreign countries on China's exports, promote industry self-discipline and facilitate the healthy development of exports." *Id.*

The 2002 Notice implemented a Price Verification and Chop[23] ("PVC") system that made certain export products, including Vitamin C, subject to price review by each import and export chamber rather than Customs.[24] Under this PVC regime, each chamber was required to submit "industry-wide negotiated prices" to Customs and the Ministry. Sp. App'x 302. This would make it "conducive for the chambers to coordinate **[**23]** export price and industry self-discipline," thereby "maintaining good export order" and "promoting the development of the industries and exports." *Id.* And, if required by the "drastically changing international market," Customs and the chambers could suspend PVC review for certain products "with the approvals of the [Sub-Committee] and filing with [Customs] and [the Ministry]." *Id.*

The Chamber amended its charter in March 2002. Under the new charter, members could "freely quit" the Chamber by written application, with no specified consequence. Sp. App'x 313. To punish violations of its charter or export

---

[21] App'x 468 (quoting World Trade Organization, *Trade Policy Review Report by the People's Republic of China*, WT/TPR/G/161 at 12 (2006)).

[22] *Id.* (quoting World Trade Organization, *Statement by the Head of the Chinese Delegation on the Transitional Review of China by the **[**22]** Council for Trade and Goods*, G/C/W/441 (2002)).

[23] A **"**chop" is a seal recognized by Chinese customs officials indicating that an export contract or shipment conforms to the relevant rules and regulations.

[24] Later, in a 2003 Announcement, the Ministry explained that the PVC system involved three steps:

1. Exporters deliver contracts to the chambers for verification.

2. The chambers verify based on (i) industry-wide price agreements (filed with the Ministry) and (ii) relevant regulations of the Ministry and Customs. The chambers must affix a chop only to conforming export contracts.

3. Exporters declare to Customs with a chop on export forms and contracts.

SPA. 310-11. According to the 2003 Announcement, the chambers would treat PVC applications from exporters who were not members of the relevant chamber the same as PVC applications from those of chamber members. **SPA. 311**.

regulations, the Chamber was authorized to "circulate a notice of criticism, issue a warning or suspend the membership of this member, or in case of fairly serious violation in nature, . . . with the approval of the **[**24]** board of directors or the standing board of directors, deprive this member of its membership." Sp. App'x 313.

In June 2002, the Chamber delegated authority by administrative rule to the Sub-Committee to "coordinate and guide vitamin C import and export business as well as relevant activities" and "promote healthy development of vitamin C import and export trade" in compliance with all laws and regulations of the Ministry, Customs and the Chamber. Sp. App'x 325. The Sub-Committee also revised its charter, adding 11 non-manufacturer export trading companies and smaller manufacturers as member enterprises and recognizing its members' "[f]reedom to withdraw from the Subcommittee." Sp. App'x 326. The Council continued to serve as the "executive body" of the Sub-Committee, with members **[*151]** of the Council elected to four-year terms. Sp. App'x 328.

In 2003, the Chamber published a notice informing members that "industry agreed export prices [for Vitamin C]. . . have been revised" and that the "agreed prices are the minimum prices." 1:06-md-1738, Doc. 397-22 at 12 (the "2003 Notice"). The Chamber explained: "We put the limit on the floor prices but not the ceiling prices." *Id.*

Taken at face value, **[**25]** the applicable Chinese law during the relevant period—including both the PVC regime and the Chamber's 2002 delegation of price-coordination authority to the Sub-Committee—required the defendants, as Vitamin C manufacturers and exporters, to fix the price of Vitamin C sold on the international market.[25]

2. <u>Other Records Corroborate Chinese Law's Price-Fixing Requirement</u>

This understanding—that Chinese law on its face required the defendants to fix the price of Vitamin C exports—is consistent with other information in the record, such as materials that showcase the Chamber's role in coordinating the Chinese Vitamin C industry. Indeed, from its inception, the Chinese government created the Chamber to promote "the order of foreign trade and economy." App'x 3713-14. The 1997 Notice and original charter of the "Vitamin C Coordination Group" within the Chamber (which became the Sub-Committee) made explicit what sort of "order" the Chamber served to ensure: the "coordination" of "Vitamin C export . . . price" through regular meetings at which members would "discuss and set export coordinated price." Sp. App'x 299, 320. While the 2002 Notice delegated the Ministry's reviewing authority **[**26]** to the Chamber, its stated goal remained "maintaining good export order." Sp. App'x 302. How did the 2002 Notice accomplish that objective? By requiring the defendants "to coordinate export price and industry self-discipline" under the Chamber's auspices. *Id.* The Chamber then had to report these "industry-wide negotiated prices" to Customs and the Ministry. *Id.* Finally, the Chamber was authorized to affix a chop only to contracts that conformed to such "industry wide price agreements." *Id.* at 310-11. The ubiquitous references to "price coordination" in these regulations leave little doubt that the 2002 Notice instituted by the Ministry required the defendants to engage in price-fixing through the Chamber and Sub-Committee.

Administrative documents from the period corroborate this understanding of the Chamber's price-coordination role with respect to the Vitamin C industry. As described in a 2003 administrative publication, one of the Chamber's principal tasks was "[c]oordinating price." App'x 412. In the same publication, the Chamber noted that "the government and charter members" entrusted it with responsibility "to help the government manage the import and export of . . . Vitamin[] **[**27]** C." *Id.* at 418. Indeed, shortly after the promulgation of the 2002 Notice, the Chamber enacted an administrative rule tapping the Sub-Committee to "coordinate and guide Vitamin C import and export business as well as relevant **[*152]** activities." Sp. App'x 325. Then, as noted above, the Chamber published the 2003 Notice, informing member enterprises that "industry agreed export prices . . . have been revised" and that the "agreed prices are the minimum prices." 1:06-md-1738, Doc. 397-22 at 12.

---

[25] While the district court reached the opposite conclusion based on (1) the apparent spottiness of enforcement during a specific period; (2) its surmise that the available sanctions were not sufficiently severe; and (3) the inference that the defendants were acting in their economic interest and thus did not need to be compelled, we find these issues largely beside the point because, as explained in Section III.B, *infra*, our decision is based on the *prima facie* conflict between U.S. law and Chinese law rather than the degree of compulsion defendants faced.

Contemporaneous industry records also strongly suggest that Chinese law, as established by the 2002 Notice and overseen by the Chamber, required price-fixing. [26] The Chamber kept track of each firm's export volume, revenue, and average price, and reminded its members that "agreements reached . . . during the [Vitamin C] coordination meeting . . . still have to be carried out strictly." *Id.*, Doc. 397-23 at 3.[27] The Chamber set minimum prices and deterred members from undercutting those prices with the threat of discipline via chop disqualification or, *in extremis*, loss of membership rights. This system maintained order by preventing price wars, which had devastated the export industry in the past. As Qiao **[**28]** Haili, director of the Chamber's Western Medicine Department and Secretary General of the Sub-Committee, wrote to the Ministry in 2003, the Chamber's "coordination of [Vitamin C] has yielded notable results: through industry self-regulation, prices of [Vitamin C] exports have increased significantly and thus have recovered economic losses for the country." App'x 2173. This success avoided the ills of "severe low-priced competition in order to sell" and "anti-dumping law suits." *Id.*

Sub-Committee meeting records from 2003 and 2004 also show that Vitamin C exporters recognized the minimum prices set by the Chamber as being non-negotiable, even as the Sub-Committee members were able to exercise some discretion in determining actual market prices by consensus. The firms' efforts to "set the floor price" for the market significantly higher—such as $9.20 per kilogram—were not always successful, but market prices generally remained well above the minimum export price of $3.35 per kilogram. *See id.*, Doc. 299-8 at 1-2; Doc. 397-2 at 106. These records also document the Chamber's coordination of export quotas, and internal reports from Jiangshan show that, under the Chamber's direction, representatives **[**29]** from the "four major [Vitamin C] manufacturers in Beijing" agreed to "limit production during the first half of 2004 in order to stabilize the market." App'x 2100.

Our dissenting colleague correctly observes that the Chinese government appears to have been less preoccupied with orchestrating the defendants' coordination of market prices as opposed to minimum prices. *See* Dissent at 5-7. It is true that the Chamber "put the limit on the floor prices but not the ceiling prices," 1:06-md-1738, Doc. 397-22 at 12; that is, the Chinese governmental agencies involved expressly mandated only the minimum price and did not set the actual market price for Vitamin C exports. Yet Chinese law further required the defendants to coordinate—that is, to fix—market **[*153]** prices for Vitamin C exports. The Chamber specifically delegated responsibility to the Sub-Committee to "coordinate and guide Vitamin C . . . export business" such that the Chamber could report "industry-wide negotiated prices" to Customs and the Ministry. Sp. App'x 302, 325.[28] Since the Sub-Committee's establishment, its members—the defendants—had been expected to "discuss and set export coordinated price," *id.* at 320, and now they were tapped **[**30]** to "monitor the implementation of self-disciplinary agreements within the industry," including "coordination plans," *id.* at 331. Thus, contrary to the dissent's conjecture, the defendants could not have complied with Chinese law simply by "independently setting their prices at or above the industry-coordinated minimum price . . . ." Dissent at 3. Coordination of *market* prices as well as *minimum* prices was fundamental to the PRC's Vitamin C export system.

---

[26] We note that the U.S. Trade Representative reported similar findings to Congress in December 2003, concluding that "China maintains price controls on several products and services . . . in the form of either absolute mandated prices or specific pricing policy guidelines as directed by the government." App'x 1427. The Trade Representative reached the same conclusions in 2004 and 2006.

[27] The 2003 Notice from the Chamber did not include an agreed price for Vitamin C. But the Chamber clearly established minimum prices to which its members adhered. If a contract price term fell below the minimum price, the 2003 Notice instructed firms to "voluntarily convert the price term to be consistent with the agreed price term." 1:06-md-1738, Doc. 397-22 at 13.

[28] One of Jiangshan's executives, Wang Qi, testified that his company was "free to decide about prices above $3.35 [per kilogram] when that was the minimum price," and that "no one outside" the company "ordered" them to "charge prices higher than $3.35." App'x 1709-10. The dissent concludes from this evidence that colluding on prices above $3.35 per kilogram "was the defendants' choice, not their legal obligation." Dissent at 7. But Qi testified unambiguously that, throughout the relevant period, his company "communicated with other Chinese Vitamin C companies about increasing Vitamin C prices." App'x 1687. No one had to *order* Qi or Jiangshan to charge higher prices. The Chinese government's legal mandate was for Jiangshan and the other defendants, operating through the Chamber and its Sub-Committee, "to coordinate export price." Sp. App'x 302.

In practice, that system appears to have not always worked smoothly. As one defense expert explained, there were "occasions where agreements were not reached" on a market price because defendants "were mandated to engage in self-discipline to achieve basic policies, but had freedom in deciding the manner in which coordination was to be achieved consistent with national goals." App'x 325. For example, when the Chamber met with the four original defendants in November 2002, "[n]o consensus was reached about price at the meeting," such that while the "minimum price for export remain[ed] unchanged," each company was permitted to "provide price quote[s] based on its own judgment." 1:06-md-1738, Doc. 397-22 at 3. Even when consensus **[**31]** prices were reached, they were not always stable. According to an internal Jiangshan report, the Chamber met in June 2003 with six domestic manufacturers who "all agreed to set the floor price at 9.20 USD/kg, hoping to slow down the speed of market price falling." *Id.*, Doc. 299-8 at 1-2. Yet a few weeks later, "every manufacturer quoted prices lower than the floor price." *Id.* at 2. Future meetings returned to the question of a "[t]argeted price level" that would not "give[] profit room for western producers." *Id.*, Doc. 397-22 at 18. Nevertheless, while implementation may have imperfect, the instructions were clear: the Chinese government expected the defendants to agree on a profit-maximizing market price.

These marching orders came directly from the top. In his 2003 memo to the Ministry, Sub-Committee Secretary General Haili—directly appointed by the Ministry to be the "highest level official at the Chamber responsible for administering export regulation of vitamin C," App'x 685—requested "legislation to define the legal status of the chambers" and "support from relevant government departments to assist chambers of commerce in asserting their authority." App'x 2174. Haili apparently **[**32]** hoped these clarifying changes would ensure that the Chamber's "rules and regulations" for members not "simply become formality and only honest fellows will follow." **[*154]** *Id.* (internal quotation marks omitted). We understand this report and request to reflect Haili's understanding that the Ministry expected the Chamber to corral its members into participating in and adhering to the legally required coordination of market prices, to an extent not directly, or perhaps adequately, enforced through the PVC regime.

Consideration of all these records therefore supports our conclusion that the defendants faced a true conflict between U.S. ***antitrust law*** and the Chinese export regime's twin requirements of maintaining minimum prices and coordinating actual market price.

3. The Ministry's Submissions Regarding Chinese Law

To confirm our understanding about what Chinese law, taken at face value, required of the defendants, we "carefully consider" but do not defer conclusively to the Ministry's statement on the meaning of Chinese law. *Animal Sci. Prods., 138 S. Ct. at 1873*. ***HN7***[] In particular, we weigh that explanation's "clarity, thoroughness, and support; its context and purpose; the transparency of the foreign legal system; the role and authority **[**33]** of the entity or official offering the statement; and the statement's consistency with the foreign government's past positions." *Id. at 1873-74*. We first discuss the contents of the Ministry's submissions, then address the extent of our deference to their articulation of Chinese law under the standards supplied by the Supreme Court.

a. The Ministry's Submissions

The Ministry made four submissions in the district court.[29] The first was an *amicus curiae* brief in support of the defendants' motion to dismiss, submitted in June 2006 (the "Amicus Brief"). The Ministry submitted a subsequent statement in June 2008 (the "2008 Statement") in response to the plaintiff's briefing on the motion to dismiss. During discovery in 2008, the Ministry submitted a letter (the "2008 Letter") opposing a production request for

[29] China's embassy in Washington, DC, also sent a diplomatic note to the U.S. Department of State on April 9, 2014, requesting that it be permitted to join the Ministry in filing an amicus brief in our Court. *See* Diplomatic Note No. CE027/14 from the Embassy of the People's Republic of China to the State Department, Supreme Court J. App'x 782-83. "Diplomatic notes are used for correspondence between the U.S. Government and a foreign government. The Secretary of State corresponds with the diplomatic representatives of foreign governments at Washington, DC, U.S. embassies abroad, and foreign offices or ministries." United States Department of State, 5 Foreign Affairs Handbook 1 H-611(a). The Ministry filed its amicus brief in our Court on April 14, 2014. The Department of State has not filed a corresponding amicus brief.

confidential documents one defendant (Northeast) had exchanged with the Ministry and other governmental agencies. Finally, the Ministry submitted a statement in 2009 (the "2009 Statement") responding to statements made in the report issued by the plaintiffs' expert.

The Amicus Brief took the position that Chinese law required the defendants' conduct, such that both foreign sovereign compulsion and **[**34]** principles of international comity mandated dismissal of the antitrust action.[30] In explicating Chinese law, the Amicus Brief noted that "China's ongoing transformation from a state-run command **[*155]** economy to a market-driven economy" gave rise to terms and concepts such as "coordination" and "voluntary self-restraint" that a U.S. court would likely misunderstand. App'x 153. One such potential misunderstanding, fostered by the plaintiffs' allegations, was that the Chamber functioned within China's export economy as a mere "trade association" facilitating "the collusive actions of a cartel." App'x 155 (internal quotation marks omitted). Instead, the brief explained that the Chamber served "under the authority and direction of the Ministry and . . . Customs" as part of "a regulatory pricing regime mandated by the government of China" to stabilize its export market, promote profitability, and protect national interests. App'x 156-57.[31]

The 2008 Statement ratified the Amicus Brief as an accurate representation of the Ministry's official views, which the Ministry had actively participated in drafting and reviewing.[32] The 2008 Letter reiterated this position and explained that the **[**35]** Ministry, the Chamber and the defendants had entered into a written common interest agreement in the class action litigation.

The 2009 Statement recapitulated the Ministry's view that the defendants were "performing their obligations to comply with Chinese laws, rather than conduct on their own initiative." App'x at 650. The 2009 Statement acknowledged that "different regulatory measures may have been implemented in line with changes of circumstances at different times," but maintained that "[d]uring the relevant period . . . the Ministry required Vitamin C exporting companies to coordinate among themselves on export price and production volume." *Id.* at 650-51. The 2009 Statement further explained that the Chamber exercised delegated governmental authority over Chinese exporters of Vitamin C, who could neither "ignore these policies" nor "abstain from [mandated] coordination," which constituted "an integral part of the self-discipline process." *Id.* at 651-52. Finally, the 2009 Statement argued that China's statements to the WTO concerning **[*156]** the loosening of price controls on exports including Vitamin C were "irrelevant" because they were "made in a different context" and were "*general descriptions* ***[**36]*** . . . presented in [that] special context." *Id.* at 652. The 2009 Statement reasserted China's right as a sovereign nation

---

30 The Amicus Brief argued that dismissal was warranted under the foreign sovereign compulsion doctrine because the anticompetitive conduct was compelled and under principles of international comity because of the "irreconcilable conflict between the requirements of U.S. ***antitrust law*** and the laws and policies of China." App'x 167-71, 173-75.

31 To explain how such price coordination worked in practice, the Amicus Brief canvassed the evolution of China's system of export controls, beginning with the 1991 Regime and concluding with the 2003 Announcement. The brief noted that the defendants were compelled to become participating members of the Sub-Committee and to implement its price coordination responsibilities. In describing previous regulatory phases such as the 1991 Regime and the 1997 Notice, the Amicus Brief sometimes used the present tense in ways that conveyed the impression that defunct regulations were still in effect. *See, e.g.*, App'x at 159 ("The Ministry's authority over the Chamber is plenary . . . ." (citing regulation from the 1991 Regime)); *id.* at 159-60 ("The Sub-Committee . . . is responsible for 'coordinating the Vitamin C export market, price and customers . . . .'" (quoting the Sub-Committee's 1998 Notice of Establishment)); *id.* at 167 ("Government entities policed defendants' compliance with the resulting prices and volume limits, and non-compliance would subject defendants to severe penalties . . . .") (citing the 1997 Notice and the 1998 Sub-Committee Charter alongside the 2002 Notice)). Yet the Amicus Brief stated clearly that the 2002 Notice "changed the way in which compliance with the Chamber's 'coordination' was confirmed by abolishing the [1997 Notice] and establishing a [PVC] system," which the brief identified as governing "throughout the Relevant Period." *Id.* at 164-65.

32 In particular, the 2008 Statement emphasized that the Ministry authorized and supervised the Chamber in performing the governmental function of "regulating, through consultation, the price of Vitamin C manufactured for export from China so as to maintain an orderly export." *Id.* The 2008 Statement contended that the plaintiffs' claims—which implicated the Ministry's direct administration of Vitamin C exports—should be addressed through diplomatic engagement rather than litigation.

to enact limited export regulations in furtherance of its "national goal of establishing a socialist market economy." *Id.* at 652-53.

b. Deference to the Ministry's Submissions

We carefully consider the Ministry's statement on the meaning of Chinese law as articulated in its submissions, in accord with the Supreme Court's instructions. As to the submissions' "clarity, thoroughness, and support," *138 S. Ct. at 1873*, each submission articulated a coherent view of Chinese law based on the relevant supporting regulations. Although in several places the Amicus Brief failed to clearly distinguish between China's prior regulatory regimes and its post-reform export controls under the 2002 Notice, this conflation weakens only the brief's argument for *compulsion* based on licensing restrictions and sanctions that were no longer applicable after 2001.[33] It does not undermine the Amicus Brief's otherwise reasoned explication of mandatory price coordination, and we find the Ministry's explanation of that aspect of the governing export regime helpful in locating an "irreconcilable conflict between the requirements of U.S. **[**37]** ***antitrust law*** and the laws and policies of China." App'x 173.

Next, the submissions' "context and purpose" give us some "cause for caution" in evaluating the picture painted of Chinese law. *138 S. Ct. at 1873*. All four submissions "offer[] an account in the context of litigation," *id.*, and the Ministry has unambiguously staked out a common interest with defendants. Indeed, the Amicus Brief candidly portrays one of China's objectives in designing export controls as promoting "the profitability of the industry"—a goal that would be severely hampered by enforcement of an approximately $148 million judgment. App'x 156. Yet it is significant that this litigation represents the first official appearance by the Chinese government in a U.S. court, and the Ministry's submissions bespeak broader principles of international comity informing China's interest in this litigation.[34] While we take the **[*157]** Ministry's account of compulsive regulation with more than a grain of salt due to China's interest in avoiding the imposition of U.S. antitrust penalties on Chinese companies operating in a "socialist market economy" under the vanguard direction of the Communist Party of China,[35] we nevertheless think it appropriate to give **[**38]** some weight to these invocations of international comity.

Third, we are especially mindful of the Ministry's presentation of China's official views given its "role and authority" in the Chinese legal system. *138 S. Ct. at 1873*. The plaintiffs have not challenged the Amicus Brief's identification of the Ministry as "a component of the State Council (the central Chinese government) and . . . the highest administrative authority in China authorized to regulate foreign trade, including export commerce," such that it is the

---

[33] In particular, the Ministry's position on compulsion appears vulnerable with respect to the framework for the defendants' arrangement of actual market prices, often considerably in excess of the Chamber-mandated minimum price of $3.35 per kilogram. As we have explained, the PVC regime's enforcement scheme appears to have required only the latter price, whereas a consultative process among Chinese exporters yielded the additional price and volume coordination. Such coordination, while still clearly mandated by the Chinese government, does not appear to have been enforced with the "chop" in the same manner as the minimum price.

[34] *See* App'x 175 ("Insofar as China's sovereign policy decisions about how best to manage its economic transformation conflict with the policies embodied in U.S. antitrust laws, that conflict should be addressed 'through diplomatic channels,' and not through 'the unnecessary irritant of a private antitrust action.'" (quoting ***O.N.E. Shipping, 830 F.2d at 454***)); *id.* at 206 ("[T]he Chinese government respectfully submits that, to the extent the plaintiffs take issue with the Chinese government's sovereign actions over the conduct solely of its own citizens, that issue should not be addressed in the courts of the United States but rather through bilateral trade negotiations conducted by the executive branches of the respective sovereign nations involved consistent with recognized norms of international law and diplomacy."); *id.* at 653 ("China understands and believes that virtually all sovereign nations and regions (including the United States), proceeding from their own interests, have exercised various forms of government regulations over part of their private sector and certain industries. China's export regulations of Vitamin C at issue in this case are no different.").

[35] *See* ELIZABETH C. ECONOMY, THE THIRD REVOLUTION (2018); RICHARD MACGREGOR, THE PARTY (2d ed. 2013); *see generally* JOHN K. FAIRBANK & MERLE GOLDMAN, CHINA: A NEW HISTORY (2d ed. 2006).

equivalent of "a cabinet level department in the U.S. governmental system." App'x 151. As such, the Ministry was able to convey "the views and understandings of certain PRC government agencies" with the benefit of active participation and line editing by officials in Beijing. App'x 205. We find it significant that a governmental agency in the Ministry's position has "attached great importance" to this litigation, as evident in its unprecedented appearance on behalf of the Chinese government and repeated filings as an amicus in the district **[**39]** court, this Court, and the Supreme Court. App'x 650. In considering the implications for international comity of applying U.S. ***antitrust law*** to conduct by Chinese companies forming an integral part of the Chinese export regime, we give considerable weight to this consistently salient presentation of official views by China's highest administrative authority on export commerce.

We find inconclusive "the transparency of the foreign legal system" factor, the next factor the Supreme Court has instructed us to consider. *138 S. Ct. at 1873*. While China's legal system is "something of a departure from the concept of 'law' as we know it in this country—that is, a published series of specific conduct-dictating prohibitions or compulsions with an identified sanctions system," *In re Vitamin C Antitrust Litig., 810 F. Supp. 2d at 550*, this ambiguity cuts both ways. On the one hand, a reasonable interpretation offered by the responsible governmental authority is especially helpful in understanding a system that would be difficult for a U.S. court—unversed in Chinese law—to piece together on its own. On the other hand, we are less inclined to trust the representations of a regime lacking transparency or democratic accountability, especially when the opaque nature of the **[**40]** regulations in question frustrates our ability to check the Ministry's account against an objective standard. We are nonplussed by what we perceive to be a double-edged sword of transparency, so—having addressed why it cuts in both directions—we do not assign it significant weight among the relevant factors when considering the deference due to the Ministry's submissions.

Finally, we are mindful of the Supreme Court's instruction that we consider the Ministry's "statement's consistency with [China's] past positions," given "the submissions made by the U.S. purchasers casting doubt on the Ministry's account of Chinese law." *138 S. Ct. at 1872-74*. In **[*158]** particular, we must assess the credibility of the Ministry's account of the 2002 Notice as compulsory in light of China's representation to the WTO in 2002 that it "gave up export administration of vitamin C." *Id. at 1871* (ellipsis omitted).

As an initial matter, we find that China's statement to the WTO and others like it adduced by plaintiffs—when read alongside the 2002 Notice and 2003 Announcement—are consistent with the notion that China was *loosening* price controls by delegating regulatory authority *from* the Ministry and Customs *to* the Chamber and Sub-Committee, not **[**41]** abandoning export regulations altogether. Thus, we cannot be confident whether China has in fact "ma[de] conflicting statements." *Id. at 1873*. But even assuming a material contradiction, we find it entirely plausible that China sought to exaggerate to the WTO its compliance with that organization's accession principles in becoming a WTO member. So too, we must consider the prospect that, in this litigation, the Ministry may have an incentive to exaggerate the compulsory nature of its Vitamin C export regime in avoiding application of U.S. ***antitrust law*** to the defendants' conduct. After all, the Ministry's 2009 Statement appears to invite such an interpretation by insisting that China's earlier representations to the WTO belonged to an entirely different, "special context." App'x 652.

Yet to the extent there is any contradiction in China's representations, that contradiction undercuts only the Ministry's argument that the 2002 Notice subjected *all* of the defendants' conduct to the kind of coercive control that would potentially implicate considerations of the FSC doctrine. But, as we explained above, our international comity analysis focuses on whether Chinese law, taken at face value, requires **[**42]** the defendants to act in a way that violates U.S. law. We think the persuasiveness of the Ministry's submissions regarding the specific requirement that Chinese export firms coordinate market prices as well as adhere to minimum prices remains intact. Thus, while the Chinese government may not have compelled market price coordination in the same fashion that it enforced minimum prices, our conclusion that the price-fixing feature of the 2002 Notice was nonetheless mandatory remains in place.

We therefore conclude that the Ministry's submissions, when afforded careful consideration, support our determination that Chinese law required the defendants—as members of the executive Council within the Sub-

Committee charged with "coordinat[ing] and guid[ing] vitamin C import and export business," Sp. App'x 325—to be directly responsible for implementing price controls.

c. Chinese Law Required the Defendants to Price-Fix, Making It Impossible for Them to Comply with U.S. ***Antitrust Law***

Taking Chinese law at face value, and having given careful consideration to the Ministry's statements about what the applicable laws required, we conclude that defendants were required to engage in price-fixing conduct **[**43]** violative of U.S. ***antitrust law***. Furthermore, because Chinese law "require[d]" the defendants "to act in [a] fashion prohibited by the law of the United States" in their role as leading Vitamin C export firms, it was impossible for them to "comply with the laws of both" countries. *Hartford Fire, 509 U.S. at 799*.[36]

[*159] The dissent contends, nevertheless, that the defendants could have exercised their "legal right" to "freely resign" from the Sub-Committee, relieving them of their obligation under Chinese law to fix prices, in violation of U.S. ***antitrust law***. Dissent at 4. Affording some deference to the Ministry's submissions, however, we conclude that the 2002 Notice mandated the defendants to engage in price-fixing regardless of whether they remained Sub-Committee members. As the Amicus Brief explained, "while the [Chinese] Government did not, itself, determine specific prices or quantities, it most emphatically did insist on those matters being determined *through industry coordination*." App'x 168. The Ministry originally appointed the defendants to the Sub-Committee as industry leaders responsible for overseeing that coordination. Although the revised Sub-Committee Charter provided its newly expanded membership **[**44]** with the right to "freely resign" through a "formal membership resignation process," App'x 2182-83, as China's only Vitamin C manufacturers[37] the defendants were key players in an industry which the Chinese government required to engage in "industry-wide" negotiations to further "industry self-discipline," Sp. App'x 302. As such, the defendants could check out of the Sub-Committee any time they liked, but—vis-à-vis the more general obligation to exchange information and coordinate on price and volume—they could never leave.[38] In short, as industry leaders tapped for key roles in China's vitamin C export regime, the defendants had no exit from the irreconcilable conflict between Chinese law and U.S. ***antitrust law***.

---

[36] Our prior opinion deferred to the Ministry's submissions in finding that (1) vitamin C exporters were required to negotiate and agree upon an "industry-wide negotiated" price; (2) terms like "industry self-discipline" and "voluntary restraint" referred to the Chinese government's expectation that private firms engage in self-regulation with respect to agreed prices and quotas; and (3) such participation was mandatory even for non-members of the Sub-Committee. *837 F.3d at 190 & n.9*.

On remand, we have reached the first conclusion on the basis of the regulations themselves, as illuminated by contemporaneous industry records and trial testimony concerning the PVC regime. Because our analysis turns on the existence of a true conflict, we reach this conclusion in light of what Chinese law facially required rather than the Chinese regulatory program's track record of enforcement. Thus, we find a true conflict even though the defendants did not always reach or adhere to a coordinated market price.

On the second point, we find the Ministry's submissions worthy of deference, after careful consideration, insofar as they explain terms of art that are otherwise vague. *See, e.g.*, Sp. App'x 302 (Sub-Committee expected to "coordinate export price and industry self-discipline" to "assist in maintaining good export order"); 1:06-md-1738, Doc. 397-22 at 12 (an entity with contract price term below the minimum agreed export price is expected to "voluntarily convert the price term to be consistent with the agreed price term").

We address the third point next, in the text.

[37] *See* App'x 698 ("By the end of 2001, 21 companies remained in the vitamin C export business, of which four were manufacturers and the remainder were trading companies.").

[38] *See* The Eagles, Hotel California (Asylum Records, 1976); *see also* App'x 685, 701 (Sub-Committee Secretary General Haili described in his affidavit how, even after the 2002 reforms, "as a practical matter, no manufacturer could abandon participation in the Sub-Committee or the meetings that the Chamber called.").

Additional Relevant International Comity Factors

Having found a true conflict between Chinese and U.S. ***antitrust law***, we weigh that factor in combination with the other comity factors. *See* *Mannington Mills, 595 F.2d at 1297-98*.[39]

[*160] 1. Nationality of the Parties and Site of the Anticompetitive Conduct

The defendants are companies owned by Chinese nationals, located and headquartered in China and primarily doing business there. The anticompetitive conduct at issue took place among **[**45]** these companies in China. The international comity concerns attending extraterritorial enforcement of U.S. ***antitrust law*** therefore apply fully in this context. *See* *In re Maxwell, 93 F.3d at 1051-52*; *Bi v. Union Carbide Chemicals & Plastics Co., 984 F.2d 582, 586 (2d Cir. 1993)*; *Timberlane, 549 F.2d at 615*. Accordingly, that the nationalities of the parties and the location of the anticompetitive conduct are foreign weigh in favor of dismissal under international comity principles.

2. Effectiveness of Enforcement and Alternative Remedies

The judgment entered below would require collection from foreign defendants and enforcement of a permanent injunction abroad, which China may not tolerate.[40] If enforced, the trebled damage award and threat of future sanctions from violating a permanent injunction would be likely to deter defendants from future anticompetitive behavior. Yet it also seems likely that China will continue to set minimum prices. The consequences of enforcing the judgment are therefore uncertain.

As to alternative remedies, the parties have not brought to our attention any pending litigation in an international forum related to this case.[41] Recourse to the WTO or another international forum remains available to the United States.

Accordingly, these aspects of the comity **[**46]** inquiry do not weigh heavily either in favor of or against dismissal.

3. Foreseeable Harms to American Commerce

We find that harm to American commerce from China's export controls was foreseeable. The Ministry's Amicus Brief concedes that one goal of the 2002 Notice was to maximize "the profitability of the industry." App'x 156. The Chambers set price levels so as to "neither incur an anti-dumping lawsuit" nor concede "profit room for western producers." 1:06-md-1738, Doc. 397-22 at 18. Notably, the Chamber assumed that "[d]omestic anti-trust laws generally do not get involved in the foreign trade area." *Id.* Thus, the defendants actively sought to avoid U.S. liability while inflating profits at the expense of consumers, foreseeably including Americans such as the plaintiffs here. Yet the Ministry set that priority for the Chamber; the defendants did not act independently. Thus, because we find that harm to American commerce was foreseeable, even if we do not impute to the defendants any specific intent to harm American consumers, **[*161]** this factor likely weighs against dismissal for reasons of international comity.

---

[39] We have condensed these factors somewhat and have omitted one factor—regarding the existence of an international treaty on point—which is not relevant here.

[40] Notably, Article 276 of the Civil Procedure Law of the People's Republic of China (2017) provides that "[i]f any matter in which a foreign court requests assistance would harm the sovereignty, security or public interest of the People's Republic of China, the [Chinese] court shall refuse to comply with the request." Similarly, Article 282 forbids Chinese courts from executing any foreign judgment which "contradicts the basic principles of the law of the People's Republic of China or violates State sovereignty, security or the public interest."

[41] There was litigation of a similar case in the Third Circuit, but that Court of Appeals did not have occasion to reach the issues we address in today's decision. *See* *Animal Sci. Prods., Inc. v. China Nat. Metals & Mins. Imp. & Exp. Corp., 702 F. Supp. 2d 320 (D.N.J. 2010)*, *vacated and remanded sub nom.* *Animal Sci. Prods., Inc. v. China Minmetals Corp., 654 F.3d 462 (3d Cir. 2011)*, *as amended* (Oct. 7, 2011).

4. Reciprocity

The parties have not brought to our attention any circumstances **[**47]** under which the U.S. Government mandates price-fixing by American export companies. Nonetheless, if U.S. companies fixed prices in the United States pursuant to such a policy and a Chinese party sued in China for a violation of Chinese law, the U.S. Government would undoubtedly expect the Chinese court to recognize as a valid defense that U.S. law required the American exporter's conduct. A Chinese court's refusal to consider that irreconcilable legal conflict as a basis for dismissing a civil action would be an affront to the United States, both because of the Chinese court's second-guessing of U.S. sovereignty over the American export industry and because that decision would set a precedent for foreign judgments against American companies acting in accord with requirements of the U.S. Government. This factor, therefore, weighs heavily in favor of dismissal on comity grounds.

5. Possible Effect upon Foreign Relations

The Ministry emphasizes that China "has attached great importance to" this case. App'x 650. In a brief filed in the Supreme Court, the Ministry stated

> The Ministry has been actively involved in this litigation since 2005. It first presented the Chinese government's authoritative **[**48]** interpretation of Chinese law in 2006, when it filed an *amicus* brief in the district court. It reaffirmed its position in supplemental submissions to the district court in 2008 and 2009, and in an *amicus* brief in the court of appeals in 2014. As both courts [] observed, this was 'historic.'

Brief of *Amicus Curiae* Ministry of Commerce of the People's Republic of China in Support of Respondents, No. 16-1220 (U.S.) at 1. It appears that China perceives this case as threatening its rights as a sovereign to enact and enforce regulations governing Chinese companies conducting business within China's borders.[42] We discern that China has already taken umbrage at the district court's treatment of its representations about the meaning and operation of its law. In our judgment, the enforcement of a sizeable damages award and permanent injunction against defendants is likely to prove a considerable further "irritant." App'x 175 (quoting *O.N.E. Shipping, 830 F.2d at 454*). On such matters, we generally assign considerable significance to the views of the U.S. Department of State, for the Constitution primarily entrusts foreign relations to the Executive Branch, and we are ill-equipped to assess the numerous, cross-cutting bilateral **[**49]** and multilateral issues properly informing such decisions. As the Department of State has not weighed in or otherwise signaled a view one way or another on this case, we are left somewhat in the dark.[43] Nonetheless, we remain cognizant of the Supreme Court's **[*162]** general observation—raised in the context of the presumption against extraterritoriality—that the Judiciary is understandably cautious not to "erroneously adopt an interpretation of U.S. law that carries foreign policy consequences not clearly intended by the political branches." *Kiobel v. Royal Dutch Petroleum Co., 569 U.S. 108, 116, 133 S. Ct. 1659, 185 L. Ed. 2d 671 (2013)*. This presumption "serves to avoid the international discord that can result when U.S. law is applied to conduct in foreign countries." *RJR Nabisco, Inc. v. Eur. Cmty., 579 U.S. 325, 136 S. Ct. 2090, 2100, 195 L. Ed. 2d 476 (2016)*. After all, "[t]he Judiciary does not have the institutional capacity to consider all factors relevant to creating a cause of action that will inherently affect foreign policy." *Nestlé USA, Inc. v. Doe, 141 S. Ct. 1931, 1940, 210 L. Ed. 2d 207 (2021)*.

Consequently, to the extent the record reflects protestations of the Chinese government at the application of U.S. ***antitrust law*** to Chinese companies implementing export policy in China, and no contrary view of the Executive Branch is expressed, this factor tips in favor of dismissal for reasons of international comity.

---

[42] *See* App'x 175 (respecting "China's sovereign policy decisions about how best to manage its economic transformation"); *id.* at 206-07 (respecting "Chinese government's sovereign actions over the conduct solely of its own citizens"); *id.* at 653 (respecting "China's export regulations of Vitamin C at issue in this case").

[43] This should come as no surprise, as the Department of State generally "adheres to a policy that it does not take positions regarding, or participate in, litigation between private parties, unless required to do so by applicable law." *Société Nationale Industrielle Aérospatiale, 482 U.S. at 554 n.5* (Blackmun, *J.*, concurring in part and dissenting in part).

International Comity [50] Principles Favor Dismissal** [44]

Balancing these factors, we decline to construe U.S. ***antitrust law*** as reaching defendants' conduct in the circumstances presented here, and we conclude that principles of international comity warrant dismissal. The existence of a true conflict between Chinese and U.S. ***antitrust law***, Chinese nationality of all of the defendants, extraterritorial nature of **[*163]** the anticompetitive conduct, and potential impact upon foreign relations together strongly favor dismissal.[45] While the efficacy of enforcing a judgment is unclear, we acknowledge that enforcement could be salutary for the international Vitamin C market, especially given that economic harm to American consumers was foreseeable. The United States undoubtedly has a substantial interest in the uniform enforcement of its antitrust laws, including the deterrence value of treble damages against foreign companies whose anticompetitive conduct causes substantial and foreseeable economic injury to American consumers. Yet the U.S. Department of Justice has not brought criminal antitrust enforcement actions against these defendants, and the Department of State has not weighed in as an *amicus curiae* on either side of the **[**51]** issue.[46] There are also alternate means for the United States to vindicate those interests, such as through bilateral diplomatic efforts, multilateral discussions, trade proceedings in the WTO, or dispute resolution in another international forum. While

---

[44] Defendants relied on two other closely related doctrines in defense of their conduct abroad, act of state and foreign sovereign compulsion, but we find it unnecessary to reach a decision as to the applicability of either doctrine in light of our international comity holding.

As to the act of state doctrine, because our analysis is centered on whether defendants were required under Chinese law to engage in anticompetitive conduct, we are concerned with whether China's regulatory regime was responsible for that conduct, not whether such a Chinese governmental mandate (if there was one) would itself be legal or valid. Accordingly, "the factual predicate for application of the act of state doctrine does not exist" here because "[n]othing in the present suit requires the Court to declare invalid, and thus ineffective as a rule of decision for the courts of this country the official act of a foreign sovereign." *W.S. Kirkpatrick, 493 U.S. at 405* (internal quotation marks and citation omitted). We are thus not called upon to express any view about the legality — under Chinese or international law — of the vitamin C export regime that the Chinese government implemented. Nor, by taking into account the Ministry's submissions to the district court, this Court, and the Supreme Court concerning the nature of Chinese law, do we sit in judgment of any official act of the Chinese government in formulating or transmitting those submissions. We merely afford those submissions careful consideration (but not conclusive deference) as we reach our conclusions about the reach of the U.S. ***antitrust law***.

As to foreign sovereign compulsion, we might be inclined to the view that Chinese law compelled at least part of the defendants' anticompetitive conduct with sufficient coercive force to trigger this doctrine. But there is good reason to proceed with caution in such a high-stakes arena fraught with uncertainty. To conclude that this action merits dismissal on foreign sovereign compulsion grounds, we would be required to predict the severity of sanctions defendants might have faced in China for noncompliance, as well as pass on whether the defendants acted in bad faith—or simply had no alternative—given that they did not petition Chinese authorities to harmonize their vitamin C export regime with U.S. ***antitrust law***. Yet we need not reach these vexed questions because international comity provides ample basis for declining to apply U.S. ***antitrust law*** to defendants' conduct in this case.

[45] *See* ***O.N.E. Shipping, 830 F.2d at 453*** (affirming dismissal of complaint for reasons of international comity where foreign sovereign's cargo reservation laws "were alleged to be at the core of" the anticompetitive harm).

[46] While the Office of the Solicitor General filed a brief in support of plaintiffs' petition for certiorari in the Supreme Court, that brief primarily addressed the question of what level of deference U.S. courts should extend to a foreign sovereign's statement of its own law. *See* *Brief for the United States as Amicus Curiae Supporting Petitioners, 138 S. Ct. 1865* (No. 16-1220), at 12-29. As the dissent observes, *see* Dissent at 9 n.4, the Solicitor General criticized our prior opinion in passing for giving "inadequate weight to the interests of the U.S. victims of the alleged price-fixing cartel and to the interests of the United States in enforcement of its antitrust laws," and "too much weight to China's objections to this suit," Brief for the United States at 20. But it is the Legal Adviser of the Department of State who expresses the Executive Branch's view on internationally significant cases and their ramifications for foreign relations. *See, e.g.,* *Khulumani v. Barclay Nat. Bank Ltd., 504 F.3d 254, 296 (2d Cir. 2007)* (Korman, *J.*, concurring in part and dissenting in part). The Solicitor General's brief neither claimed to report the views of the Executive Branch or the Department of State in this respect, nor otherwise purported to represent that a decision one way or the other in this case might have any particular effect on foreign relations.

the stakes are high for both countries, we conclude that the United States' concern with extraterritorial enforcement of a private civil judgment under its antitrust laws is substantially diminished in these circumstances. In light of these considerations of international comity, we do not construe the Sherman and Clayton Acts to reach the present controversy.

IV. CONCLUSION

We therefore **REVERSE** the judgment of the district court, and **REMAND** with instructions to **DISMISS** the complaint with prejudice.

Dissent by: WESLEY

Dissent

WESLEY, *Circuit Judge*, dissenting:

Did "Chinese law require[] the Chinese sellers' conduct[?]" *Animal Sci. Prods., Inc. v. Hebei Welcome Pharm. Co., 138 S. Ct. 1865, 1875, 201 L. Ed. 2d 225 (2018)*. The majority never really answers. Instead, it improperly applies the doctrine of international comity to avoid a finding it cannot contest: that Chinese law did not require the defendants to fix prices above the minimum of $3.35/kg, which is what Hebei and NCPG (the "defendants") did. Because it was not impossible for **[**52]** the defendants to comply with both Chinese and U.S. law, this case should not be dismissed on international comity grounds. *See* *Hartford Fire Ins. Co. v. California, 509 U.S. 764, 799, 113 S. Ct. 2891, 125 L. Ed. 2d 612 (1993)*.

[*164] *Section 1* of the Sherman Act prohibits "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several [s]tates, or with foreign nations." *15 U.S.C. § 1*. "[P]rice-fixing agreements are unlawful *per se* under the Sherman Act." *Arizona v. Maricopa Cty. Med. Soc., 457 U.S. 332, 345, 102 S. Ct. 2466, 73 L. Ed. 2d 48 (1982)*. It is well established that *§ 1* proscribes only concerted, not unilateral, action. *See* *Fisher v. City of Berkeley, Cal., 475 U.S. 260, 266, 106 S. Ct. 1045, 89 L. Ed. 2d 206 (1986)*. "Even where a single firm's restraints directly affect prices and have the same economic effect as concerted action might have, there can be no liability under *§ 1* in the absence of agreement [with another, separate entity]." *Id.*

As a threshold matter, the plain text of the regulations and agency charter demonstrates Chinese law did not *require* the defendants to *coordinate* vitamin C prices and quantities at all. The 2002 Notice establishing the Price Verification and Chop ("PVC") system stated "the relevant chambers must . . . submit to [Customs] information on industry-wide negotiated prices." Sp. App'x 302. The 2003 Announcement explained "the Chambers shall . . . affix the . . . chop . . . to the export **[**53]** contracts at the blocks where the prices and quantities are specified" and "verify the submissions by the exporters based on the industry agreements." *Id.* at 310. The Vitamin C Subcommittee, "a self-disciplinary trade organization jointly established on [a] voluntary basis" to, *inter alia*, "coordinate and guide vitamin C import and export business," expressly gave members "[f]reedom to withdraw from the Subcommittee" in its amended 2002 Charter. *Id.* at 325-26. The 2003 Announcement acknowledged membership was optional, instructing the Chambers to "give [non-member exporters] the same treatment as to member exporters." *Id.* at 311. In other words, under the PVC regime, the defendants were not legally required to engage in any concerted action. They could have complied with Chinese law without violating the Sherman Act by resigning from the Subcommittee and thereby independently setting their prices at or above the industry-coordinated minimum price, abstaining from any "meeting of the minds" to agree on price.[1] *See* *Fisher, 475 U.S. at 267*.

---

[1] The majority concludes that "[a]ffording some deference to the Ministry's submissions . . . the 2002 Notice mandated the defendants to engage in price-fixing regardless of whether they remained [Subcommittee] members." Maj. Op. at 54-55.

The Ministry and defendants do not dispute this conclusion. The Ministry explicitly agreed that "[u]nder the [Vitamin C Subcommittee's] 2002 Charter . . **[**54]** . [Subcommittee] membership was no longer necessary to export vitamin C." Ministry's Letter Br. at 5. Its argument that "through the PVC system . . . the Chamber . . . ensured that each manufacturer complied with the industry's price and volume restrictions," *id.*, does not amount to a violation of the Sherman Act. *See* *Fisher, 475 U.S. at 267* (holding that "the mere fact that all competing **[*165]** property owners must comply with the same provisions of the [city's rent control] [o]rdinance is not enough to establish a conspiracy among landlords"). The defendants concede members were able to freely resign, but contend they could not because they were members of the executive "Council" elected to four-year terms. *See* Appellants' Letter Br. at 3. However, there is no indication their status impeded their legal right to resign. Their argument they could not as "a practical matter," *id.*, is inapposite; we are concerned only with what Chinese law required.

Despite recognizing that members could resign from the Subcommittee, the Ministry avers that the PVC regime required the defendants to violate the Sherman Act. I do not think the Ministry's submissions merit deference under the Supreme Court's five-factor test. *See* *Animal Sci. Prods., 138 S. Ct. at 1873*. **[**55]** They lack sufficient "clarity, thoroughness, and support," *id.*, as they conflate China's 2002 PVC regime with its 1997 regime and fail to address salient issues such as the "suspension provision" of the 2002 Notice permitting "the customs and chambers [to] suspend export price review," Sp. App'x 302, and the right under the 2002 Charter to freely resign from the Vitamin C Subcommittee. The "context and purpose" factor, *Animal Sci. Prods., 138 S. Ct. at 1873*, cuts strongly against the Ministry; I do not see how this being the Chinese government's first official appearance in a U.S. court mitigates the fact that the Ministry has only taken this --as the majority recognizes--self-serving position for the first time in the context of this litigation. *See* Maj. Op. at 47-48. Its view conflicts with China's public representation to the World Trade Organization ("WTO") in 2002 that it "gave up export administration of . . . vitamin C," noted under the heading "any restrictions on exports through non-automatic licensing *or other means* . . . ." World Trade Organization, *Transitional Review under Art. 18 of the Protocol of Accession of the People's Republic of China*, G/C/W/438, at 2-3 (2002) (some emphasis omitted). Upon careful **[**56]** and respectful consideration, these deficiencies prevent me from finding the submissions worthy of deference.

Moreover, the record makes clear that Chinese law did not require the defendants to agree on prices above the minimum of $3.35/kg, which is what the defendants did. In a 2003 Notice informing "member enterprises" of the "industry[-]agreed export prices," the Chamber asserted "[t]he agreed prices are the *minimum prices*. We put the limit on the *floor prices* but not the *ceiling prices*." App'x 1934 (emphases added). Wang Qi, an executive of one of the original defendants that settled before trial, testified:

> Question: And when the minimum price for verification and chop was $3.35, the Chamber of Commerce did not care if your company sold Vitamin C at a price higher than $3.35; isn't that right?
>
> Answer (Qi): Correct. That is like a minimum price.
>
> Question: *You were free to decide about prices above $3.35 when that was the minimum price*?
>
> Answer (Qi): *Yes, when it's over they don't care*.
> . . .
>
> Question: And no one ordered you outside of your company to charge prices higher than $3.35 when that was the minimum price?
> . . . [(Qi asks to clarify question)]
>
> Answer (Qi): No.

However, the Ministry did not argue vitamin C exporters who were not members of the Subcommittee still needed to *coordinate* prices. In fact, both the Ministry and the majority emphasize that price coordination occurred through the Vitamin C Subcommittee. *See, e.g.*, App'x 159 (Ministry's 2006 amicus brief) ("Throughout the [r]elevant [p]eriod, the Chamber exercised its regulatory authority with respect to vitamin C exports through its Vitamin C [Subcommittee]."); Maj. Op. at 31 ("[T]he Chamber delegated authority by administrative rule to the [Subcommittee] to 'coordinate and guide vitamin C import and export business as well as relevant activities.'") (citation omitted).

Id. at 1709-10 (emphases **[**57]** added). Qi's testimony is consistent with the Ministry's and defendants' accounts. The Ministry described the PVC regime as "the minimum **[*166]** export price rule," explaining that "Chinese law imposed *minimum price thresholds* via PVC," Ministry's Letter Br. at 2, 4 (emphasis added), and "[i]f the price was at or above *the minimum acceptable price set by coordination* through the Chamber, the Chamber affixed a . . . 'chop,' on the contract," App'x 164 (emphasis added). This accords with the Ministry's consistent contention that China adopted the PVC system to "avoid anti-dumping sanctions imposed by foreign countries on China's exports," *id.*, also identified as a goal in the 2002 Notice. *See also* Appellants' Letter Br. at 4 ("The prices agreed on were up to the companies so long as they exceeded anti-dumping minima."). As a result, even if Chinese law required vitamin C exporters to coordinate in setting a price, it was only a minimum price; to collude on prices above that was the defendants' choice, not their legal obligation.

The majority acknowledges that "the [Subcommittee] members were able to exercise some discretion in determining actual market prices by consensus," Maj. Op. at 36, and **[**58]** that "the PVC regime's enforcement scheme appears to have required only the [minimum price of $3.35/kg]," *id.* at 47 n.33. Yet it surmises that "the additional price and volume coordination" above the minimum was "still clearly mandated by the Chinese government," without any support.[2] *Id.* Neither the defendants nor the majority proffer any evidence suggesting vitamin C exporters needed to agree on *every* price rather than just the minimum price. Instead, the defendants argue that "the price level established does not matter" because the Sherman Act prohibits price fixing *per se*. Appellants' Letter Br. at 6. However, international comity does not work that way.

International comity is a careful balancing act.[3] It requires "tak[ing] into account the interests of the United States, the interests of the foreign state, and those mutual interests the family of nations have in just and efficiently functioning rules of international law." *In re Maxwell Commc'n Corp., 93 F.3d 1036, 1048 (2d Cir. 1996)*. Accordingly, "[w]hen there is a conflict, a court should seek a reasonable accommodation that reconciles the central concerns of both sets of laws." *Societe Nationale Industrielle Aerospatiale v. U.S. Dist. Ct. for S. Dist. of Iowa, 482 U.S. 522, 555, 107 S. Ct. 2542, 96 L. Ed. 2d 461 (1987)* (Blackmun, *J.*, concurring). China's purpose in enacting the PVC regime, as characterized by the Ministry, **[**59]** was to "transition from a State-controlled economy" as it entered the WTO and to avoid anti-dumping sanctions. Ministry's Letter Br. at 3. Even accepting for argument's sake that Chinese law required the defendants to coordinate on a minimum price to achieve its concern about anti-dumping claims, applying comity for agreements above the minimum goes above and beyond accommodating the central interests of the foreign state.

Nothing in the international comity precedents implies a true conflict exists **[*167]** where only part of the defendants' conduct was required under foreign law. As the Supreme Court held in *Hartford Fire*, there is no true conflict if foreign law did not "require[] [defendants] to act in some fashion prohibited by the law of the United States" or if the defendants' "compliance with the laws of both countries" was possible. *509 U.S. at 799*. The phrase "act in some fashion" does not direct courts to ignore whether there exists a true conflict as to the defendants' actual conduct at issue. Indeed, as the majority recites repeatedly, the comity analysis looks to the "*degree* of conflict with foreign law," not simply whether there is any conflict period. *See* *Timberlane Lumber Co. v. Bank of Am., N.T. & S.A., 549 F.2d 597, 614 (9th Cir. 1976)* (emphasis added).[4] Accordingly, **[**60]** even if the PVC regime

---

[2] Indeed, if not for the PVC regime--instituted by the 2002 Notice and equated with "Chinese law" during the relevant period by the Ministry and defendants--it is unclear what "material or source" establishes that Chinese law required the defendants to fix prices above the minimum. *See* *Fed. R. Civ. P. 44.1*.

[3] Some scholars have raised concerns regarding the ten-factor balancing test applied by the majority to determine the extraterritorial reach of a federal statue, arguing that the Supreme Court has rejected this approach as unworkable. *See* *Brief for Professors of International Litigation as Amici Curiae Supporting Neither Party, Animal Sci. Prods., 138 S. Ct. 1865* (No. 16-1220), at 11-13. For my purpose here, I do not address whether the multi-factor balancing test should not be applied at all.

[4] Because I find there is no true conflict, I do not address the remaining comity factors. However, I note that the majority's analysis, which is very similar to our 2016 decision, was criticized by the Solicitor General "express[ing] the views of the United States" in its amicus brief in support of the second question presented in the plaintiffs' petition for a writ of certiorari to the

required the defendants to agree on a minimum price and the defendants could not have complied with the Sherman Act because it prohibits price fixing *per se*, comity does not demand that we set aside examining if their actual price-fixing conduct was required under Chinese law.

The defendants could have complied with Chinese law and the Sherman Act by: (1) exercising their legal right to resign from the Subcommittee and not participating in any conspiracy to set prices, or (2) not colluding on prices above the minimum, the only price needed to receive a chop. Given the "virtually unflagging obligation of the federal courts to exercise the jurisdiction given them," *Colorado River Water Conservation Dist. v. United States, 424 U.S. 800, 817, 96 S. Ct. 1236, 47 L. Ed. 2d 483 (1976)*, this is not the "rare" case presenting "extraordinary circumstances" that **[**61]** warrants dismissal on the basis of comity, *see* *Brief for U.S. Gov't as Amicus Curiae, Animal Sci. Prods., 138 S. Ct. 1865* (No. 16-1220), at 19. I would affirm the judgment of the district court.[5]

End of Document

Supreme Court. *Brief for U.S. Gov't as Amicus Curiae, Animal Sci. Prods., 138 S. Ct. 1865* (No. 16-1220), at 1. The government remarked that we "gave inadequate weight to the interests of the U.S. victims of the alleged price-fixing cartel and to the interests of the United States in enforcement of its antitrust laws" and "gave too much weight to China's objections to this suit." *Id.* at 20. Instead, the government suggested "under the circumstances presented here, [defendants'] argument that Chinese law required them to engage in the challenged conduct might have been better analyzed under the rubric of the foreign sovereign compulsion doctrine rather than through a comity analysis." *Id.*

[5] Even if Chinese law required the defendants to agree on a minimum price, which I do not find, comity would not demand dismissal of the entire case. At the very least, I would vacate and remand for the district court to calculate damages based on prices that were above the minimum. *See* Appellees' Br. at 10 n.9 (explaining that "[p]laintiffs' damages expert 'calculated damages under the assumption that the Chinese government would have enforced a rigid price floor of $3.35 per kilogram'") (citation omitted).

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

Civil Procedure > ... > Injunctions > Grounds for Injunctions > Public Interest

HN1[] **Injunctions, Preliminary & Temporary Injunctions**

Four factors guide review of a district court's preliminary injunction: (1) the likelihood of success on the merits, (2) the threat of irreparable harm absent an injunction, (3) the risk of harm to others, and (4) the broader public interest.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Antitrust & Trade Law > ... > US Department of Justice Actions > Criminal Actions > Intent

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > Sherman Act > Claims

HN2[] **Actual Monopolization, Claims**

Section 2 of the Sherman Act makes it illegal to monopolize, or attempt to monopolize any part of the trade or commerce among the several States, or with foreign nations. *15 U.S.C.S. § 2*. By themselves, possessing monopoly power and charging monopoly prices do not violate *§ 2*. The Act targets the possession of monopoly power coupled with the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident. The focus is on guarding the competitive process and on protecting the welfare of consumers, not on ensuring the economic fortunes of competitors. A monopolist's actions thus must harm the competitive process and thereby harm consumers, as mere harm to one or more competitors will not suffice.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN3[] **Sherman Act, Claims**

In some settings, *§ 2 of the Sherman Act, 15 U.S.C.S. § 2*, prohibits a company from refusing to contract—from refusing to deal—with another company. Just as the statute prohibits two companies from entering a contract that permits an anticompetitive monopoly, so it also prohibits a company from refusing to deal with another company in aid of such practices. Even so, refusal-to-deal claims face a steep and obstacle-laden climb. Courts start with the liberty-based assumption that individuals and companies may do business with whomever they please. As a general rule, businesses are free to choose the parties with whom they will deal, as well as the prices, terms, and conditions of that dealing.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

HN4[] **Actual Monopolization, Claims**

Under discrete circumstances, a refusal to cooperate with rivals can constitute anticompetitive conduct and violate § 2 of the Sherman Act, 15 U.S.C.S. § 2. The course of liability requires a showing that the monopolist's conduct is irrational but for its anticompetitive effect.

Governments > Courts > Authority to Adjudicate

HN5[] **Courts, Authority to Adjudicate**

As generalists, as lawyers, and as outsiders trying to understand intricate business relationships, judges have limitations in gauging when a refusal to deal will hurt competition as opposed to the expectations of a single competitor.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Private Actions > Standing > Sherman Act

HN6[] **Sherman Act, Claims**

A few questions inform the inquiry. Did the monopolist enter a voluntary course of dealing with its rival. Did the monopolist willingly sacrifice shortrun benefits in exchange for a perceived long-run impact on its smaller rival? If so, did the monopolist ignore efficiency concerns or act without valid business reasons? Answering "yes" to the above questions signals a potential § 2 of the Sherman Act, 15 U.S.C.S. § 2, problem. Answering "no" to any of them signals that the antitrust laws do not apply.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN7[] **Standing, Requirements**

Forcing rivals to share—to continue doing business together—pushes the bounds of the court's expertise, and when it comes to fashioning an antitrust remedy in this area, caution is key.

Civil Procedure > ... > Injunctions > Grounds for Injunctions > Irreparable Harm

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN8[] **Grounds for Injunctions, Irreparable Harm**

As a general matter, a plaintiff's harm from the denial of a preliminary injunction does not count as irreparable if it is, or can be, fully compensable by monetary damages.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN9[] **Sherman Act, Claims**

Harming a competitor, even wishing to harm a competitor, by itself falls short of what *§ 2 of the Sherman Act, 15 U.S.C.S. § 2*, requires.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

HN10[] **Scope, Monopolization Offenses**

The mere possession of monopoly power is not only not unlawful; it is an important element of the free-market system, for the opportunity to charge monopoly prices—at least for a short period—is what attracts business acumen in the first place.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN11[] **Per Se Rule & Rule of Reason, Sherman Act**

Antitrust law concerns itself with the protection of competition, not competitors.

Antitrust & Trade Law > Sherman Act > Claims

Contracts Law > Defenses > Illegal Bargains

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Sherman Act

HN12[] **Sherman Act, Claims**

Section 1 of the Sherman Act makes every contract in restraint of trade or commerce among the several States illegal. *15 U.S.C.S. § 1*.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > ... > Private Actions > Standing > Sherman Act

HN13[] **Standing, Requirements**

An antitrust plaintiff must do more than merely allege harm flowing from antitrust violations to meet the freestanding antitrust standing requirement. It must also show that the loss stems from a competition-reducing aspect or effect of the defendant's behavior. A plaintiff must seek to defend marketplace competition and not merely allege harm to its capacity as a competitor.

Opinion by: SUTTON

Opinion

[*482] [*2]** SUTTON, Chief Judge. In phase one of this dispute, our court affirmed the Federal **[**2]** Trade Commission's decision to block a merger of ProMedica Health System and St. Luke's Hospital in Lucas County, Ohio. As part of the unwinding of the merger, ProMedica and St. Luke's signed an agreement in which ProMedica's insurance subsidiary, Paramount, **[*483]** agreed to maintain St. Luke's as a within-network provider. But that contractual obligation came with a caveat: Paramount could drop St. Luke's if ownership of the hospital changed. The qualification came to fruition when a large healthcare company based in Michigan, McLaren Health, merged with St. Luke's. In response, Paramount ended its relationship with St. Luke's, removing the hospital from its provider network.

All of this prompted a second antitrust charge against ProMedica, this one by St. Luke's. It alleged that ProMedica's refusal to do business with it violated the antitrust laws. The district court preliminarily enjoined ProMedica from pulling the plug on the agreement. Because ProMedica had a legitimate business explanation for ending the relationship, St. Luke's is unlikely to show that ProMedica unlawfully refused to continue doing business with it. On top of that, it has little likelihood of establishing an irreparable **[**3]** injury given the option of money damages. For these reasons and those elaborated below, we vacate the preliminary injunction.

I.

A.

Typical economic transactions involve single buyers and single sellers and a straightforward price. Not so in the healthcare market. It includes a diverse cast of players for each treatment and variable, often unknown, prices.

Take account of the many potential sellers: individual doctors, physician practices, pharmacies, hospitals, and others. So too of buyers. Rarely is there just one of them, with state and federal governments, private insurance companies, and individuals all participating. Making **[***3]** matters more complicated, many players often take on more than one role, with healthcare companies and insurance companies frequently acting as sellers and buyers.

Pricing is unique too. Consumers rarely know the cost of any one procedure. And healthcare providers often charge different rates for care depending on who foots the bill. The federal government, for example, tends to pay less for services and procedures than do private insurance plans. Medicare and Medicaid rarely cover "providers' actual cost of services." *ProMedica Health Sys., Inc. v. FTC, 749 F.3d 559, 561 (6th Cir. 2014)*.

Private health insurance stands in the middle **[**4]** of the healthcare market. Although some patients shop for health insurance on their own, most Americans receive coverage through their employers, a vestige of 1940s wage policies. Atul Gawande, *Is Health Care a Right*?, The New Yorker, Oct. 2, 2017, at 48. Employers thus negotiate rates with commercial insurance companies. If an employer is self-insured, it foots the cost of care itself and pays only administrative fees. If not, the insurance company covers the cost of care in exchange for a premium per covered employee.

Health insurance companies in turn contract with providers to set rates and bundle providers into "networks" that they can then market to employers. When insurance companies include as many providers as possible in their network, that adds flexibility and enhanced choice. But it costs more. When insurance companies include only a subset of providers in a narrow network, the opposite usually is true. An insurer "may be able to negotiate lower rates from providers for narrow network plans," which may then "enable the insurer to offer consumers lower premiums." R.49 at 11. Because narrow networks funnel more patient traffic to their contracted providers, insurance companies **[**5]** pay less **[*484]** for care and pass some of those savings on to employers and patients.

B.

Anchored by underappreciated Toledo, Lucas County has four main hospital systems: ProMedica, Mercy Hospitals, the University of Toledo Medical Center, and St. Luke's. *ProMedica, 749 F.3d at 562*. Two-thirds of Lucas County's patients have insurance through the government. *Id. at 561*. The rest receive insurance through private plans.

[*4]** ProMedica acts as a healthcare buyer and seller. As a seller, it holds a prominent place in the market. ProMedica's hospital system holds 56% of the county's market for "inpatient general acute care services" that are "offered to commercially insured patients." R.22-4 at 2.

As a buyer, ProMedica has a more modest position. It offers health insurance through a subsidiary, Paramount, which purchases healthcare from providers. Rather than include many hospitals in its network, Paramount employs a narrow-network strategy that steers patients toward ProMedica's hospitals. This vertically integrated approach allows Paramount to lower prices and permits ProMedica to recoup those savings down the line as a provider. Far from dominant in this market, Paramount competes alongside national insurers like Aetna and Anthem and **[**6]** regional insurers like Buckeye Insurance Group and Medical Mutual of Ohio. Paramount has "about 78,000 commercial members and fewer than 20,000 Medicare Advantage members" in the region. R.40 at 6.

St. Luke's, a healthcare seller located southwest of Toledo in the city of Maumee, has a smaller market share. Until recently, it operated as an independent community hospital, capturing roughly 10% of the local commercial market. *ProMedica, 749 F.3d at 562*. Mercy and the University make up the remainder.

Despite its size, St. Luke's has some comparative advantages. It offers premium care at competitive rates. And it operates in the wealthier southwestern portion of Lucas County, attracting a large number of privately insured patients. Those patients represent a critical revenue source for St. Luke's, offsetting the losses incurred from treating patients covered by government plans.

These twin advantages help to explain why ProMedica sought to merge with St. Luke's in 2010. After agreeing to join forces, ProMedica sought to integrate St. Luke's operation by melding back offices and transferring employees. Paramount, ProMedica's insurance arm, contracted with St. Luke's around this time to include the hospital as an **[**7]** in-network provider. The partnership proved lucrative. Paramount won over "major employers in the areas most served by St. Luke's," gaining over 10,000 covered individuals after adding St. Luke's to its **[***5]** provider network. R.22-7 at 2. ProMedica also continued to work with WellCare, the St. Luke's physician group.

Wary of ProMedica's market dominance and concerned about the downstream effects of market consolidation, the Federal Trade Commission objected to the merger. *ProMedica, 749 F.3d 559*. After an investigation, the Commission ordered ProMedica to divest St. Luke's. *ProMedica Health Sys., Inc., 2012-1 Trade Cas. 77840, 2012 WL 1155392, at *48 (F.T.C. Mar. 22, 2012)*. Our court rejected ProMedica's petition to overturn the order. *ProMedica, 749 F.3d at 561*.

C.

That brings us to the second, perhaps final, phase of this dispute. In 2016, the parties negotiated, and the Commission **[*485]** approved, a divestiture agreement establishing that Paramount would continue contracting with St. Luke's as an in-network healthcare provider. But the provision contained an out. If St. Luke's underwent "a Change in Control," Paramount could "immediately terminate" its contracts with the hospital and its physician group. R.32 at 19.

The arrangement initially worked well, so well that the parties re-upped the "mutually beneficial" contract two years later, **[**8]** extending it through 2023. R.22-8 at 2. For St. Luke's, the agreement guaranteed a steady stream of traffic from patients with Paramount insurance in the wealthier southwestern portion of the county.

Paramount benefited as well in obvious and not-so-obvious ways. The obvious: It could advertise St. Luke's as an in-network provider to private insurance customers, an easy way to boost revenue. The not-so-obvious: ProMedica generated revenue from patients who needed advanced care that St. Luke's could not provide. Keep in mind that not every hospital provides every kind of service. St. Luke's offers just primary and secondary services (think "basic medical and surgical" care), while ProMedica offers more sophisticated tertiary services like cardiothoracic surgeries and advanced cancer care. R.32 at 65. By maintaining St. Luke's as an in-network provider, Paramount could attract members who might go to St. Luke's for basic services but move to ProMedica's hospitals for more complex treatment. St. Luke's also allowed **[***6]** ProMedica to operate a cancer center on St. Luke's campus, giving ProMedica an "access point" in southwestern Lucas County. R.44 at 3.

This picture changed when McLaren Health **[**9]** Systems agreed to buy St. Luke's in October 2020. A large healthcare provider itself, McLaren "agreed to commit to at least $100 million in a capital investment in St. Luke's." R.22-5 at 2. ProMedica viewed McLaren St. Luke's as "a completely different type of competitor." R.43 at 2. McLaren offers complex cancer services that "compete directly" with ProMedica and could siphon off patients needing advanced care from ProMedica's hospitals. R.44 at 5.

With these considerations in mind, ProMedica ended its relationship with St. Luke's. The day after McLaren finalized its acquisition of St. Luke's, ProMedica terminated several agreements, including Paramount's agreement to include St. Luke's as an in-network provider and the ongoing relationship between ProMedica and the WellCare physician group at St. Luke's.

St. Luke's sued ProMedica, alleging that, by refusing to continue the contract, ProMedica violated the Sherman Act—mainly *§ 2* of the Act. St. Luke's also sought a preliminary injunction to prevent ProMedica from canceling its contracts with the hospital. ProMedica opposed the request for an injunction and filed a motion to dismiss the case. The district court denied ProMedica's motion **[**10]** to dismiss and granted St. Luke's motion for a preliminary injunction.

II.

A.

HN1[] Four factors guide our review of a district court's preliminary injunction: (1) the likelihood of success on the merits, (2) the threat of irreparable harm absent an injunction, (3) the risk of harm to others, and (4) the broader public interest. *A1 Diabetes & Med. Supply v. Azar, 937 F.3d 613, 618 (6th Cir. 2019)*. In this case, those inquiries largely boil down to two. Because St. Luke's has little chance of success on its antitrust claims and because St. Luke's has **[***7]** failed to establish a risk of irreparable **[*486]** harm, the district court should not have preliminarily enjoined ProMedica's termination of the contracts.

HN2[] *Section 2* of the Sherman Act makes it illegal to "monopolize, or attempt to monopolize . . . any part of the trade or commerce among the several States, or with foreign nations." *15 U.S.C. § 2*. By themselves, "possessing monopoly power and charging monopoly prices" do "not violate *§ 2*." *Pac. Bell Tel. Co. v. linkLine Comms., Inc., 555 U.S. 438, 447-48, 129 S. Ct. 1109, 172 L. Ed. 2d 836 (2009)*. The Act targets "the possession of monopoly power" coupled with "the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*. The focus is on guarding the competitive process and on protecting **[**11]** the welfare of consumers, not on ensuring the economic fortunes of competitors. A monopolist's actions thus must "harm the competitive *process* and thereby harm consumers," as mere "harm to one or more *competitors* will not suffice." *United States v. Microsoft Corp., 253 F.3d 34, 58, 346 U.S. App. D.C. 330 (D.C. Cir. 2001)* (per curiam).

HN3[] In some settings, *§ 2* of the Sherman Act prohibits a company from refusing to contract—from "refusing to deal"—with another company. Just as the statute prohibits two companies from entering a contract that permits an anticompetitive monopoly, so it also prohibits a company from refusing to deal with another company in aid of such practices. Even so, refusal-to-deal claims face a steep and obstacle-laden climb. Courts start with the liberty-based assumption that individuals and companies may do business with whomever they please. "As a general rule, businesses are free to choose the parties with whom they will deal, as well as the prices, terms, and conditions of that dealing." *linkLine, 555 U.S. at 448*. This "presumption of freedom" has deep roots. Robert H. Bork, *The Antitrust Paradox* 344 (1978). Even the earliest *§ 2* cases note that the Sherman Act "does not restrict the long recognized right of trader or manufacturer engaged in an entirely private business, freely to **[**12]** exercise his own independent discretion as to parties with whom he will deal." *United States v. Colgate & Co., 250 U.S. 300, 307, 39 S. Ct. 465, 63 L. Ed. 992, 1919 Dec. Comm'r Pat. 460 (1919)*.

But generally and traditionally are not always and forever. ***HN4***[] Under discrete circumstances, "a refusal to cooperate with rivals can constitute anticompetitive conduct and violate *§ 2*." **[***8]** *Verizon Comms. Inc. v. Law Offs. of Curtis Trinko, 540 U.S. 398, 408, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)*. The course of liability requires a showing that the "monopolist's conduct" is "irrational but for its anticompetitive effect." *Novell, Inc. v. Microsoft Corp., 731 F.3d 1064, 1075 (10th Cir. 2013)* (Gorsuch, J.); *see also* *Viamedia, Inc. v. Comcast Corp., 951 F.3d 429, 462 (7th Cir. 2020)*. Because separating "anticompetitive malice" from "competitive zeal" tries the most acute and fair-minded judges and because there is a rational explanation for most business conduct, far more claims are lost than won on this ground. *Trinko, 540 U.S. at 409*. ***HN5***[] "[A]s generalists, as lawyers, and as outsiders trying to understand intricate business relationships," judges have "limitations" in gauging when a refusal to deal will hurt competition as opposed to the expectations of a single competitor. *Nat'l Collegiate Athletic Ass'n v. Alston, 141 S. Ct. 2141, 2166, 210 L. Ed. 2d 314 (2021)*.

HN6[] A few questions inform the inquiry. Did the monopolist enter a "voluntary . . . course of dealing" with its rival? *Trinko, **[*487]** 540 U.S. at 409*. Did the monopolist willingly sacrifice "shortrun benefits . . . in exchange for a perceived long-run impact on its smaller rival"? *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 611, 105 S. Ct. 2847, 86 L. Ed. 2d 467 (1985)*; *see also* 3 Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust*** ***[**13]*** ***Law*** P 651 (4th ed. 2015). If so, did the monopolist ignore "efficiency concerns," *Aspen Skiing, 472 U.S. at 610*, or act without "valid business reasons," *id. at 605*? Answering "yes" to the above questions signals a potential *§ 2* problem. Answering "no" to any of them signals that the antitrust laws do not apply. *Novell, 731 F.3d at 1074-75*; *see also* *FTC v. Qualcomm Inc., 969 F.3d 974, 993-94 (9th Cir. 2020)*; *New York v. Facebook, No. 20-3589, 2021 U.S. Dist. LEXIS 127227, 2021 WL 2643724, at *11 (D.D.C. June 28, 2021)*.

B.

One impediment to St. Luke's refusal-to-deal claim is that the parties' prior course of dealings demonstrates that ProMedica had a valid business reason for ending the contract. ProMedica and St. Luke's, and the Federal Trade Commission to boot, anticipated the possibility that St. Luke's might merge with another healthcare company, and as a result they agreed to give ProMedica the right to end the contract with St. Luke's under those circumstances. The "Change in Control" provision in the divestiture agreement—a contract St. Luke's signed and the Commission approved—allowed ProMedica to "immediately terminate" its ongoing arrangement **[***9]** with St. Luke's if St. Luke's were acquired. R.32 at 19. Possibilities became realities when McLaren acquired St. Luke's, and ProMedica exercised the contractual right St. Luke's gave it. St. Luke's knew from the beginning that its ability to maintain its status as an **[**14]** in-network provider might be affected if it were acquired by another company. The deal between ProMedica and St. Luke's was predicated upon the latter's status at the time of the contract. The two firms may have entered a "voluntary . . . course of dealing" in one sense, *Trinko, 540 U.S. at 409*, but it included a voluntary, mutually agreed, and government-approved basis for ending that course of dealing. In other words, ProMedica had a legitimate business reason from the outset to end this arrangement, as evidenced by the "Change in Control" clause.

In addition to this pre-approved exit ramp, other factors used to assess refusal-to-deal claims favor ProMedica's right to end Paramount's relationship with St. Luke's. Start by asking whether the evidence signals that ProMedica willingly forsook "short-term profits" by pulling out of its agreements. *Id.* Considerable record evidence shows how ProMedica could benefit from encouraging patients to seek care at ProMedica hospitals and from ProMedica's doctors rather than at St. Luke's and by extension at McLaren. Steve Cavanaugh, ProMedica's Chief Financial Officer, explained that after McLaren's acquisition, St. Luke's began offering "advanced care at McLaren hospitals" **[**15]** by "hundreds of specialists and primary care physicians." R.43 at 2-3. Those changes made "St. Luke's a completely different type of competitor," *id.* at 2, and the ProMedica system would "lose revenue if . . . forced to contract with McLaren," *id.* at 5. Others echoed the point, explaining that ending the relationship with St. Luke's would "bring revenue back to ProMedica," R.41 at 12, by ensuring that patients are "treated by ProMedica providers," R.47 at 8.

The one economist to analyze the market shared this perspective. He concluded that for "both commercial members and **[*488]** Medicare Advantage members, the increases in profit from ProMedica treating patients instead of St. Luke's likely are greater than the decreases in profit from lost Paramount enrollment." R.49 at 18.

Nothing in the record establishes that Paramount would suffer serious losses by cutting St. Luke's loose from its provider network. Paramount found that it did "not need St. Luke's in its network to offer an attractive plan to local employers." R.43 at 5. It suffered only "nominal" **[***10]** membership losses after canceling its in-network agreement with St. Luke's, and the decision produced "no material impact" on the bottom line. **[**16]** R.42 at 4. The only customer Paramount seems to have lost is St. Luke's itself, whose employees were insured through Paramount prior to McLaren's acquisition. Even if Paramount suffered limited losses by eliminating St. Luke's from its provider network, ProMedica reasoned that it would make up the difference by capturing more advanced-care patients who might otherwise go to McLaren for treatment.

Cancer care offers a good example of how the terrain shifted under ProMedica's feet once McLaren entered the scene. According to Dr. Lee Hammerling, ProMedica's Chief Academic Officer, ProMedica agreed to extend Paramount's in-network contract with St. Luke's "[i]n return" for a promise by St. Luke's to extend ProMedica's cancer center lease on the St. Luke's campus and to refrain from opening "a competing cancer center within five miles." R.44 at 4. But once McLaren purchased St. Luke's, it became likely that ProMedica's cancer center would take a hit. Hammerling expected "McLaren St. Luke's" to "begin referring its cancer patients" to McLaren facilities rather than to ProMedica. *Id.* at 5. Other ProMedica leaders expressed similar fears, exacerbated by the possibility that McLaren would open **[**17]** "a joint cancer center across from" St. Luke's. R.47 at 7. Cancer care captures the economic challenge ProMedica faced once St. Luke's became McLaren St. Luke's.

McLaren scrambled ProMedica's approach. Even if ProMedica and St. Luke's entered a "voluntary . . . course of dealing," *Trinko, 540 U.S. at 409*, the facts before us do not show that ProMedica willingly surrendered "short-run benefits" to undercut St. Luke's, *Aspen Skiing, 472 U.S. at 611*.

The answer to this last question takes us part of the way to answering the next question: Did ProMedica offer a "valid business reason" for its decision to cancel its ongoing contracts with McLaren St. Luke's? *Id.* at 599. St. Luke's, all agree, is no longer the "independent community hospital" we encountered in 2014. *ProMedica, 749 F.3d at 561*. McLaren has promised to invest $100 million into St. Luke's and "to assume $65 million of St. Luke's debt and $55 million of St. Luke's pension liability." R.22-5 at 2. Along with a capital infusion, McLaren has brought to the table facilities and healthcare offerings likely to siphon patient revenue from ProMedica. We cannot say ProMedica lacked "legitimate business purposes" in **[***11]** refusing to continue its contracts with a different competitor. 3B Areeda & Hovenkamp, ***Antitrust Law*** ¶ 772. **[**18]**

ProMedica did what many companies do when circumstances change. Reassessing the landscape after McLaren's acquisition is hardly "irrational but for its anticompetitive effect." *Novell, 731 F.3d at 1075*. A prior decision "to adopt one business model" did "not lock" ProMedica "into that approach and preclude adoption of" a different approach "at a later time." *Christy Sports, LLC v. Deer Valley Resort Co., 555 F.3d 1188, 1196 (10th Cir. 2009)*. That is hardly an unusual approach in the world of **[*489]** business or economics. "When my information changes," John Maynard Keynes reputedly quipped, "I change my mind. What do you do?" In a competitive market, businesses that do not tack when economic winds change are doomed to fail. The antitrust laws promote competition, not sclerosis.

Recall as well the relevant markets. While St. Luke's wishes to focus on ProMedica's 56% market share, it overlooks the reality that this refusal to deal involves ProMedica's insurance arm, Paramount. It is Paramount after all that removed St. Luke's from its provider network. Paramount has just a 17% market share in the relevant medical insurance market and must compete with the likes of Anthem, Aetna, Buckeye Insurance, Medical Mutual, and others. In this context, it is difficult to maintain that Paramount's contractually **[**19]** permitted refusal to deal will lead to any anticompetitive monopolies.

We also remain wary of differentiating the effects on the market between refusals to deal and mandates to deal, between facilitating competition and forcing cooperation. ***HN7***[] Forcing rivals to share—to continue doing business together—pushes the bounds of our expertise, and "[w]hen it comes to fashioning an antitrust remedy" in this area, "caution is key." *Alston, 141 S. Ct. at 2166*. If the record before us makes anything clear, it is that there is more change than continuity in the Toledo healthcare market. McLaren's entry into the market and capital infusions promise to alter products and services, and many ineffable incentives along the way. "[C]entral planners" we are not. *Trinko, 540 U.S. at 408*.

Although our estimation of St. Luke's chance of success anchors our decision, another preliminary injunction factor bolsters it. ***HN8***[] As a general matter, a "plaintiff's harm from the denial **[***12]** of a preliminary injunction" does not count as "irreparable" if it is, or can be, "fully compensable by monetary damages." *Overstreet v. Lexington-Fayette Urban Cnty. Gov't, 305 F.3d 566, 578 (6th Cir. 2002)*; *see* *Teva Pharms. USA, Inc. v. Sandoz, Inc., 572 U.S. 1301, 1301-02, 134 S. Ct. 1621, 188 L. Ed. 2d 754 (2014)* (Roberts, C.J., in chambers). St. Luke's fails to meet that bar. Its complaint primarily emphasizes the loss of patients and market share. But economists can **[**20]** and do assess such injuries in monetary terms. Confirming the point, St. Luke's has asked for damages addressing those very losses. As for its other alleged less tangible economic injuries—harm to reputation and goodwill—they do not suffice at this fledgling stage of the case to warrant the rare remedy of forcing someone to do business with a competitor. Even in *Aspen Skiing*, it was the district court, not the Supreme Court, that granted an injunction, *472 U.S. at 598 n.23*, and it did so only after a jury trial on the merits. In this instance, St. Luke's has not shown that money damages would fail to compensate any antitrust injuries.

Other dynamics also give us pause. If Paramount's members in the southwestern portion of the county wish to go to St. Luke's as an in-network provider, they can push their employers to change course when businesses craft their health insurance plans for the upcoming enrollment season. St. Luke's has already advocated such an approach by publishing an open letter "urg[ing]" Paramount members "to consider choosing a plan that includes" St. Luke's and its physicians. R.22-18 at 2.

C.

St. Luke's hammers one chord in particular in rebuttal, the Supreme Court's decision in *Aspen **[**21]** Skiing*. But that case is "at or near the outer boundary of *§ 2* liability," *Trinko, 540 U.S. at 409*, and **[*490]** it does not apply by its own reasoning. *Aspen Skiing* involved a dispute between the defendant (a dominant ski resort that controlled three of four mountains in the area) and the plaintiff (a diminutive rival in control of the fourth mountain). *472 U.S. at 587-98*. The two rivals had teamed up to offer a joint pass for skiers hoping to use all four mountains. *Id. at 589-91*. After the defendant cut off the joint ticket offering, the plaintiff "tried a variety of increasingly desperate measures to re-create the joint ticket, even to the point of in effect offering to buy the defendant's tickets at retail price." *Trinko, 540 U.S. at 409*. The district court compelled the two to continue to offer a joint ticket, and on review the Supreme Court reasoned **[***13]** that the dominant resort failed "to offer any efficiency justification whatever for its pattern of conduct." *Aspen Skiing, 472 U.S. at 608*.

Aspen Skiing differs from today's case in more ways than one. ProMedica *has* offered an "efficiency justification" for its decision to back out of its agreements with St. Luke's. McLaren's acquisition changed the economic calculus of the prior relationship and prompted a course correction grounded in financial **[**22]** realities, not "anticompetitive malice." *Trinko, 540 U.S. at 409*. By the same token, ProMedica did not act solely to "avoid providing any benefit" to St. Luke's, *Aspen Skiing, 472 U.S. at 610*, but advanced its own interests as a competitor in the market. Imagine how *Aspen Skiing* would have turned out if the large resort made these decisions only after the small resort merged with another large resort. Such a different explanation for ending their cooperation, it is fair to think, would have led to a different outcome. A contrary approach might even have led to inklings of an antitrust *conspiracy* charge. Last, but hardly least, *Aspen Skiing* did not involve a preexisting agreement that permitted the resort to end its ongoing contracts. *Christy Sports, 555 F.3d at 1196*. The more one compares the two situations, the less flattering the comparison becomes to St. Luke's.

Also unhelpful is *Otter Tail Power Co. v. United States, 410 U.S. 366, 93 S. Ct. 1022, 35 L. Ed. 2d 359 (1973)*. It concerned an electric utility's refusal to sell power at wholesale prices to municipalities. *Id. at 371*. The Court held that the utility violated *§ 2* by refusing to contract with certain cities, explaining that "[i]nterconnection with other utilities is frequently the only solution" to "the difficulties and problems of . . . isolated electric power systems" and that the utility refused to sell **[**23]** power "solely to prevent municipal power systems from eroding its monopolistic position." *Id. at 378*. Unlike municipalities hoping to buy power, McLaren St. Luke's does not depend wholly on ProMedica for treating patients as a healthcare provider. Other insurance companies continue to include St. Luke's as an in-network provider. The hospital can tell patients, indeed it already has told patients, to switch to those plans if they wish to continue going to St. Luke's for care. More, McLaren can enter the healthcare market and offer its own insurance plan to compete alongside Paramount's narrow network. Unlike industries requiring extensive infrastructure, new firms can easily enter the "market for medical insurance." *Ball Mem'l Hosp., Inc. v. Mut. Hosp. Ins. Inc., 784 F.2d 1325, 1335 (7th Cir. 1986)*. **[***14]**

Otter Tail and *Aspen Skiing* each concerned small competitors that could not survive without the monopolist's help. By refusing to deal, the monopolists could starve their emaciated rivals out of the market. Thanks to McLaren, St. Luke's occupies a far different position. As in *Aspen Skiing*, the defendants in *Otter Tail* **[*491]** could not offer an efficiency rationale explaining their conduct. *See* Bork, *The Antitrust Paradox*, at 346. ProMedica has by contrast given sound explanations for **[**24]** refusing to continue dealing with its new, much larger rival: McLaren St. Luke's.

The district court's preliminary findings do not alter this conclusion. Because Paramount and St. Luke's renewed their contractual relationship in 2018 to run through 2023 and because Paramount's president said that including St. Luke's made Paramount "more attractive to employers," R.68 at 10, the district court thought it "abundantly clear" that ProMedica "would not suffer harm from a short-term continuation of these agreements," *id.* at 11. But the same contract, even as continued, permitted ProMedica to cancel it if St. Luke's were acquired. That cancellation option makes it difficult to draw the conclusion, factually or otherwise, that ProMedica necessarily would benefit financially from continuing the contract. By *all* of its terms, the contract would benefit ProMedica only as long as St. Luke's did not merge—and especially did not merge with an equal-sized competitor. The reality that ProMedica did not enter an unconditional five-year relationship with St. Luke's undermines the district court's conclusion that ProMedica would not suffer by continuing its relationship with St. Luke's, and it sets this **[**25]** case apart from the kind of refusal-to-deal claim *Aspen Skiing* allowed. *Christy Sports, 555 F.3d at 1196-97*.

St. Luke's insists that, because ProMedica *intended* to harm its economic prospects, ProMedica's conduct violates *§ 2*. To bolster the charge, St. Luke's emphasizes that ProMedica lacked any business justification to cancel its contracts with St. Luke's physician group as well as its contract with Paramount. This WellCare cancellation, St. Luke's thinks, shows that ProMedica acted only out of spite. But the markets for physician services and for general acute care are distinct, and the complaint targets the latter. ***HN9***[] More fundamentally, harming a competitor, even wishing to harm a competitor, by itself falls short of what *§ 2* requires. *Microsoft, 253 F.3d at 58*; *see also* *Facebook, 2021 U.S. Dist. LEXIS 127227, 2021 WL 2643724, at *11* (requiring more than "an intent to harm" to **[***15]** state a refusal-to-deal claim). Every shrewd businessperson, and every athlete and politician to boot, intends to beat her competitors. Just so for companies, the most strategic of which hope to squash the competition by delivering a superior product. ***HN10***[] "The mere possession of monopoly power . . . is not only not unlawful; it is an important element of the free-market system," for "[t]he opportunity to charge monopoly prices—at least **[**26]** for a short period—is what attracts 'business acumen' in the first place." *Trinko, 540 U.S. at 407*. That ProMedica might want to beat McLaren St. Luke's by delivering less expensive, vertically integrated healthcare in Lucas County is not a sign of market forces failing. It is just the opposite.

HN11[] ***Antitrust law***, remember, concerns itself "with the protection of competition, not competitors." *Brown Shoe Co. v. United States, 370 U.S. 294, 320, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)*; *Energy Conversion Devices Liquidation Tr. v. Trina Solar Ltd., 833 F.3d 680, 682 (6th Cir. 2016)*. True enough, Paramount's decision to cancel its contract with St. Luke's means that McLaren St. Luke's may see fewer patients—and thereby earn less revenue—in the short run. Competition is, after all, "a ruthless process." *Ball Mem'l, 784 F.2d at 1338*. Yet "the antitrust laws are not balm for rivals' wounds." *Id.* McLaren has its chance to compete in Lucas County by introducing new health **[*492]** insurance plans and by attracting Paramount members who may want the option to visit St. Luke's as an in-network provider. Forcing ProMedica to continue dealing with St. Luke's may even lessen incentives to compete—that's what happens with some antitrust conspiracies—an outcome antithetical to a central aim of ***antitrust law***.

Switching gears, St. Luke's alleges a violation of *§ 1 of the Sherman Act*, arguing that the "change in control provision in the divestiture agreement **[**27]** is anticompetitive and an illegal restraint of trade." R.1 at 60. We fail to see how. ***HN12***[] *Section 1* makes "[e]very contract . . . in restraint of trade or commerce among the several States . . . illegal." *15 U.S.C. § 1*. The "Change in Control" provision does not restrain trade; it does the opposite by allowing one party to back out of a cooperative venture in view of changed business circumstances. St. Luke's cannot "use the antitrust laws to sue a rival merely for vigorous or intensified competition." *NicSand, Inc. v. 3M Co., 507 F.3d 442, 450 (6th Cir. 2007)* (en banc). Even if we were to subject the "Change in Control" provision to rule-of-reason analysis, St. Luke's has failed to meet its "initial burden to prove that the challenged restraint has a substantial anticompetitive **[***16]** effect." *Ohio v. Am. Express Co., 138 S. Ct. 2274, 2284, 201 L. Ed. 2d 678 (2018)*. The provision at issue here allows ProMedica to compete more directly with McLaren St. Luke's. Promoting competition is what the antitrust laws seek to achieve, not what they seek to halt.

Surely St. Luke's does not suggest the divestiture agreement *itself* violated *§ 1*, for that would mean St. Luke's broke the antitrust laws by agreeing to it. Remember too that the Commission blessed the arrangement. How, then, does a provision allowing one party to back out of the arrangement restrain **[**28]** trade? St. Luke's offers no answer. Its arguments boil down to an assertion that ProMedica acted unilaterally to monopolize the market. "If that allegation states an antitrust claim at all, it does so under *§ 2*." *Trinko, 540 U.S. at 407*.

St. Luke's adds that ProMedica is "even more dominant today than in 2010, when the Commission and this Court found that ProMedica's efforts to eliminate competition with St. Luke's through a merger would be anticompetitive." Appellee's Br. at 15. But it is one thing for the Federal Trade Commission to stop a merger. It is quite another to force two rivals to continue to do business together even after both parties to the contract agreed they could end the relationship after a change in control. "If the law were to make a habit of forcing monopolists to help competitors . . . courts would paradoxically risk encouraging collusion between rivals." *Novell, 731 F.3d at 1073*.

The discerning reader might wonder whether St. Luke's complaint has established antitrust standing. ***HN13***[] We have said that an antitrust plaintiff must "do more" than merely allege harm flowing from antitrust violations to meet the freestanding antitrust standing requirement. *NicSand, 507 F.3d at 449*. It must also show that the loss "stems from a competition-*reducing* ***[**29]*** aspect or effect of the defendant's behavior." *Atl. Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 344, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)*. As we have made clear, a plaintiff must seek to defend "marketplace competition" and not merely allege harm to its "capacity as a competitor." *Indeck Energy Servs., Inc. v. Consumers Energy Co., 250 F.3d 972, 977 (6th Cir. 2000)*. One might fairly wonder whether

St. Luke's meets the bar, particularly because ProMedica's exercise of its contractual right seemingly promotes, rather **[*493]** than hampers, competition for general acute care services in the Toledo area. But we need not decide the question. We have before us only the district court's **[***17]** decision to grant a preliminary injunction. And antitrust standing—or the lack thereof—does not affect our jurisdiction to consider that issue. *NicSand, 507 F.3d at 449*.

ProMedica separately appeals the district court's decision not to award a bond pending this appeal. As both parties agree, the issue is moot in view of our decision to vacate the preliminary injunction.

St. Luke's tries to cast this narrative as a David versus Goliath story, forgetting that David competed ably in the end. Even on its own terms, the theory that ProMedica has long dominated the market and that its cancellation of the Paramount contracts is just one more mile marker on its road to monopolization does not work. As time has shown, St. **[**30]** Luke's has survived long enough to take on gigantic qualities of its own. The new *McLaren* St. Luke's by every measure is well-resourced and well-positioned to compete with ProMedica. If anything, ProMedica's cancellation may well prompt McLaren to enter the market sooner, and with more vigor, than it otherwise would. Our economic system and the antitrust laws are premised on the assumption that consumers will be better off for it.

We vacate the preliminary injunction.

Opinion

ORDER RE MOTION FOR LEAVE TO FILE THIRD AMENDED COMPLAINT

In this action for unfair business practices, plaintiffs move for leave to file their third amended complaint. Because the standard for granting leave to amend is liberal, to the extent stated, plaintiffs' motion is **GRANTED IN PART** and **DENIED IN PART**.

Prior orders detail our facts (Dkt. Nos. 121, 140). In short, defendant Vivint Solar, Inc., in its various corporate forms, installs solar panels on customers' roofs and, at least as advertised, sells those customers the low cost, clean energy produced over a twenty-year term pursuant to their "power purchase agreement" ("PPA") (Second

Amd. Compl. ¶¶ 1-11). Plaintiffs allege, however, that Vivint's contract contains unlawful liquidated-damages clauses, provisions which impose harsh and unlawful penalties onto dissatisfied customers.

A recent order dated June 8, 2021, granted Vivint's motion for judgment on the pleadings as to an aspect of plaintiffs' *Section 17200* claim. Vivint's timely appeal of that order is now pending before our court of appeals (Dkt. No. 141). In the meantime, plaintiffs now move to amend their complaint in an attempt to rectify the deficiencies **[*3]** in their *Section 17200* claim and to add non-injunctive relief under *Section 17200* and the CLRA. This order follows full briefing and oral argument.

The lenient *Rule 15* standard, and not the elevated standard of *Rule 16*, governs here (Dkt. No. 131). *Rule 15* dictates that leave to amend shall be freely given when justice so requires, and so a district court considers: (1) bad faith; (2) undue delay; (3) prejudice to the opposing party; (4) futility of amendment; and (5) whether the plaintiff has previously amended the complaint. *Johnson v. Buckley, 356 F.3d 1067, 1077 (9th Cir. 2004)*; *Foman v. Davis, 371 U.S. 178, 182, 83 S. Ct. 227, 9 L. Ed. 2d 222 (1962)*. "A motion to make an amendment is to be liberally granted where from the underlying facts or circumstances, the plaintiff may be able to state a claim." *DCD Programs, Ltd. v. Leighton, 833 F.2d 183, 186 (9th Cir. 1987)*. As in a motion to dismiss, a complaint properly states a claim when the factual allegations permit a reasonable inference, not just speculation, that defendants are liable for the misconduct alleged. All factual allegations rate as true, but legal conclusions merely couched as fact may be disregarded. *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*; *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*.

First, Vivint argues that plaintiffs' proposed amendments to their *Section 17200* claim do not address the deficiencies called out by the June 2021 order. California appellate courts have recently articulated several revised standards for "unfair" within the meaning **[*4]** of *Section 17200* in the wake of the Supreme Court of California's decision in *Cal-Tech Comms., Inc. v. Los Angeles Cellular Tel. Co., 20 Cal. 4th 163, 83 Cal. Rptr. 2d 548, 973 P.2d 527, 543 (Cal. 1999)*. Our court of appeals has consolidated the various standards a court should consider for a *Section 17200* unfairness-prong claim: (1) whether the underlying public policy violated by the challenged conduct is tethered to a specific constitutional, statutory or regulatory provision; (2) whether the challenged conduct significantly threatens or harms competition, including by threatening an incipient violation of an ***antitrust law*** or the policy or spirit of an ***antitrust law***; (3) whether the practice is immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers; or (4) whether the practice's impact on the victim outweighs the reasons, justifications and motives of the alleged wrongdoer. *See* *Doe v. CVS Pharmacy, Inc., 982 F.3d 1204, 1214-15 (9th Cir. 2020)*.

Plaintiffs have not meaningfully addressed their *Section 17200* claim alleging unfairness based on the contract-translation issue allegedly experienced by Mr. Bautista. Rather, the proposed third amended complaint only revises those allegations to describe the practice as "unconscionable" (Proposed Third Amd. Compl. ¶ 104). This does not suffice — plaintiffs have provided no explanation of how merely inserting the word "unconscionable" **[*5]** fulfills any of the standards articulated in *CVS*. This aspect of plaintiffs' unfairness-prong claim remains deficiently tethered to the dismissed Translation Act claim. *See* *Bothwell v. Abbott Laboratories, Inc. (In re Vaccine Cases), 134 Cal. App. 4th 438, 457-58, 36 Cal. Rptr. 3d 80 (Cal. Ct. App. 2005)*.

At the hearing, plaintiffs' counsel argued that the insertion of "unconscionable" connects the contract-translation unfairness claim with the subsequent, newly added paragraphs regarding Vivint's practice of imposing, or seeking to impose, various unfair provisions of the PPA. Specifically, plaintiffs cite: the PPA's unfair imposition of cumulative remedies; the PPA's unfair transfer provisions; and the PPA's unfair requirement for customers to pay for all electricity generated by the system (rather than just the electricity used by the consumer) (Proposed Third Amd. Compl. ¶¶ 105-07). These allegations, while otherwise legitimate, have no direct connection to the translation issues experienced by Mr. Bautista, where Vivint's salesperson allegedly conducted negotiations in Spanish and failed to provide a corresponding translation of the English contract to a potential customer with essentially no English proficiency. Instead, the newly added paragraphs solely concern the PPA itself, separate from any antecedent **[*6]** translation issue. While paragraphs 105 through 107 do not salvage the unfairness-prong claim as to the translation issue, they otherwise sufficiently allege Vivint imposed, or threatened to impose, oppressive and unethical provisions in the PPA.

Accordingly, plaintiffs' motion to amend to rectify the deficiencies of their *Section 17200* claim alleging unfairness based on the contract-translation issue experienced by Mr. Bautista is **DENIED**. However, leave to amend plaintiffs' unfairness-prong claim regarding the PPA's cumulative remedies, transfer provisions, and inequitable payments for generated electricity is **GRANTED.**

Second, Vivint challenges the new claims for damages and restitution under the CLRA as well as the claim for restitution under *Section 17200*. The proposed third amended complaint expressly limits those newly added requests to members of the "Translation Class, and those consumers like Plaintiff Dekker, who do not have arbitration agreements" with Vivint (*id.* at ¶¶ 110, 117). Vivint argues these revisions do not rectify deficiencies in the second amended complaint, that the revisions fail to meet the pleading standards of *Rule 8*, and that, for restitution specifically, the revisions fail to allege there **[*7]** is no adequate remedy at law (Opp. 6-8). Initially, while the June 2021 order certainly mandated that "the proposed amended complaint correct[] the deficiencies identified in [the] order," it by no means proscribed plaintiffs from amending in due course per *Rule 15*. Plaintiffs here, in fact, met the scheduling order's July 29 deadline to amend their pleadings (Dkt. No. 131). Vivint's next argument that the damages claim under the CLRA does not meet the pleading standards of *Rule 8* also fails. In the proposed third amended complaint, plaintiffs allege, for example, that Vivint imposed or sought to impose, unenforceable termination fees (Proposed Third Amd. Compl. ¶ 113-15). These and other allegations satisfy the *Rule 8* standard for the purposes of this motion.

Regarding restitution, our court of appeals recently held that "the traditional principles governing equitable remedies in federal courts, including the requisite inadequacy of legal remedies, apply when a party requests restitution under the UCL and CLRA in a diversity action." *Sonner v. Premier Nutrition Co., 971 F.3d 834, 844 (9th Cir. 2020)*. "The object of restitution is to restore the status quo by returning to the plaintiff funds in which he or she has an ownership interest." *Korea Supply Co. v. Lockheed Martin Corp., 29 Cal. 4th 1134, 131 Cal. Rptr. 2d 29, 63 P.3d 937, 947 (Cal. 2003)*. Plaintiffs do not state or **[*8]** otherwise explain how damages are an inadequate legal remedy in their proposed third amended complaint. Plaintiffs also fail to differentiate their request for restitution from their request for damages. Because plaintiffs "fail[] to establish that [they] lack an adequate remedy at law," inclusion of a restitution claim is futile. *See Sonner, 971 F.3d at 844*.

Accordingly, plaintiffs' motion to amend to include a damages claim under the CLRA is **GRANTED**; plaintiffs' motion to amend to include a restitution claim under the CLRA and *Section 17200* is **DENIED.**

IT IS SO ORDERED.

LexisNexis® Headnotes

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN1[] **Motions to Dismiss, Failure to State Claim**

In deciding a motion to dismiss under *Fed. R. Civ. P.12(b)(6)*, the Court must determine whether the complaint contains sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face. A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN2[] Motions to Dismiss, Failure to State Claim

As a general matter, a district court ruling on a motion to dismiss may not consider matters extraneous to the pleadings. However an exception to the general rule is that a document integral to or explicitly relied upon in the complaint may be considered without converting the motion to dismiss into one for summary judgment. Similarly, the Court may consider an indisputably authentic document that a defendant attaches as an exhibit to a motion to dismiss if the plaintiff's claims are based on the document.

Business & Corporate Compliance > ... > Contracts Law > Breach > Breach of Contract Actions

Contracts Law > Remedies > Election of Remedies

HN3[] Breach, Breach of Contract Actions

Under Pennsylvania law, the gist of the "action doctrine" prevents a plaintiff from recasting ordinary breach of contract claims into tort claims. Pennsylvania courts and courts in this District have repeatedly recognized that the purpose of the doctrine is to maintain the distinction between the theories of contract and tort. Accordingly, the doctrine does not bar tort claims where the claims arise independently of the underlying contract, with the contract being merely collateral.

Contracts Law > ... > Affirmative Defenses > Fraud & Misrepresentation > Constructive Fraud

Contracts Law > ... > Affirmative Defenses > Fraud & Misrepresentation > Intentional Fraud

HN4[] Fraud & Misrepresentation, Constructive Fraud

As it relates to fraud, fraud in the inducement claims are much more likely to present cases in which a social policy against the fraud, external to the contractual obligations of the parties, exists. Where the fraud concerns an act collateral to and not interwoven with the terms of the parties' contract, such as fraudulent inducement to enter the contract, courts have been less willing to bar claims However, where the pre-contractual statements that are the basis for the fraudulent inducement claim concern specific duties that are later outlined in the contract, courts have repeatedly dismissed such claims as sounding in contract and, thus, barred by the gist of the action doctrine. Courts have held that fraudulent inducement claims are not barred by the gist-of-the-action doctrine where the alleged fraud is collateral to the contract.

Antitrust & Trade Law > Clayton Act > Claims

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

Antitrust & Trade Law > Clayton Act > Remedies > Damages

Antitrust & Trade Law > Clayton Act > Scope

HN5[] Clayton Act, Claims

The Third Circuit has held that an assignment of an antitrust claim under *Section 4* of the Clayton Act, *15 U.S.C.S. § 15*, must be express.

Antitrust & Trade Law > Clayton Act > Claims

Antitrust & Trade Law > Clayton Act > Scope

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Sherman Act

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

HN6[] Clayton Act, Claims

15 U.S.C.S. § 1 of the Sherman Act makes illegal every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce. To state a § 1 claim, a plaintiff must allege: (1) an agreement; (2) to restrain trade unreasonably. In turn, 15 U.S.C.S. § 4 of the Clayton Act provides a private right of action for plaintiffs seeking to allege an antitrust violation.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN7[] Sherman Act, Claims

The Supreme Court has repeated time and again that 15 U.S.C.S. § 1 of the Sherman Act outlaws only unreasonable restraints. An unreasonable restraint is one that inhibits competition in the relevant market.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Sherman Act

HN8[] Sherman Act, Claims

There are two tests for determining whether a practice restrains trade in violation of 15 U.S.C.S. § 1 of the Sherman Act: the rule of reason and the per se rule. Typically, courts determine whether a restraint violates 15 U.S.C.S. § 1 of the Sherman Act by applying the rule of reason.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Sherman Act

HN9[] **Per Se Rule Tests, Manifestly Anticompetitive Effects**

Pursuant to *15 U.S.C.S. § 1* of the Sherman Act, under the "rule of reason," the factfinder weighs all of the circumstances of a case in deciding whether a restrictive practice should be prohibited as imposing an unreasonable restraint on competition. Courts consider specific information about the relevant business, the restraint's history, nature, and effect, and whether the businesses involved have market power. In applying this test, the court examines the competitive significance of the alleged restraint to determine whether it has an anti-competitive effect on the market and is an unreasonable restraint on trade. As the Supreme Court has explained, the rule of reason distinguishes between restraints with anticompetitive effect that are harmful to the consumer and restraints stimulating competition that are in the consumer's best interest.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Sherman Act

HN10[] **Scope, Monopolization Offenses**

Pursuant to *15 U.S.C.S. § 1* of the Sherman Act, some types of restraints are deemed unlawful per se. The "per se rule" treats categories of restraints as necessarily illegal. As a result, if the per se rule applies, the court need not study the reasonableness of an individual restraint in light of the real market forces at work. In other words, the court conducts a truncated analysis if the restraint is per se illegal.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Sherman Act

HN11[] **Per Se Rule Tests, Manifestly Anticompetitive Effects**

Pursuant to *15 U.S.C.S. § 1* of the Sherman Act, the per se rules of illegality are the exception to antitrust analysis and are only employed in certain recognized categories. The Supreme Court has cautioned that resort to per se rules is confined to restraints that would always or almost always tend to restrict competition and decrease output, such as horizontal agreements among competitors to fix prices or to divide markets. At bottom, a per se rule is appropriate only after courts have had considerable experience with the type of restraint at issue, and only if courts can predict with confidence that the restraint would be invalidated in all or almost all instances under the rule of reason. To that end, the Supreme Court has expressed reluctance to adopt per se rules with regard to restraints imposed in the context of business relationships where the economic impact of certain practices is not immediately obvious. The Supreme Court has also instructed that departure from the rule-of-reason standard must be based upon demonstrable economic effect rather than upon formalistic line drawing.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN12[] **Sherman Act, Claims**

In order to state a Sherman Act claim under *15 U.S.C.S. § 1* a plaintiff must identify the relevant product and geographic markets and allege that the defendant exercises market power within those markets.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN13[] **Sherman Act, Claims**

Pursuant to *15 U.S.C.S. § 1* of the Sherman Act, the plaintiff bears the burden of defining the relevant product market. To determine whether the relevant market was adequately defined, the Court must first consider the extent to which the product is interchangeable with alternative products within the field. The term interchangeability implies that one product is roughly equivalent to another for the use to which it is put. It also means that while there might be some degree of preference for one product over the other, either would work efficiently. In addition, courts must consider the cross-elasticity of demand, which is defined as a relationship between two products, usually substitutes for each other, in which a price change for one product affects the price of the other. Ultimately, the outer boundaries of the market are determined by the reasonable interchangeability of use or the cross-elasticity of demand between the product itself and substitutes for it.

Antitrust & Trade Law > Sherman Act > Claims

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Private Actions > Standing > Sherman Act

HN14[] **Sherman Act, Claims**

Pursuant to *15 U.S.C.S. § 1* of the Sherman Act, the Third Circuit has instructed that although in most cases, proper market definition can be determined only after a factual inquiry into the commercial realities faced by consumers, there is no prohibition against dismissal of antitrust claims for failure to plead a relevant market. Accordingly, courts may find that a relevant market is legally insufficient and grant a motion to dismiss where the plaintiff fails to define its proposed relevant market with reference to the rule of reasonable interchangeability and cross-elasticity of demand, or alleges a proposed relevant market that clearly does not encompass all interchangeable substitute products even when all factual inferences are granted in plaintiff's favor.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN15[] **Sherman Act, Claims**

Pursuant to *15 U.S.C.S. § 1* of the Sherman Act, courts routinely hold that a product market is insufficient if it is comprised of a single brand or a single entity.

Torts > ... > Fraud & Misrepresentation > Actual Fraud > Elements

Torts > ... > Fraud & Misrepresentation > Nondisclosure > Elements

HN16[] **Actual Fraud, Elements**

Under Pennsylvania law, to state a prima facie case of fraud, a plaintiff must plead that the defendant made: (1) a false representation; (2) with knowledge of its falsity or recklessness as to whether it is true or false; (3) which was intended to make the plaintiff act; (5) that the plaintiff justifiably relied on the misrepresentation; and (6) that the plaintiff suffered damages as a proximate result of its reliance. A fraud claim based on an omission has the same elements as fraud, except that an omission is actionable as fraud only where there is an independent duty to disclose the omitted information. Fraudulent concealment has similar elements as fraud in the omission and likewise requires a plaintiff to show that the party that fraudulently concealed the information had a duty to speak.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Conditions Precedent

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Mistake

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

HN17[] **Heightened Pleading Requirements, Conditions Precedent**

Under *Fed. R. Civ. P. 9(b)*, a party alleging fraud or mistake must state with particularity the circumstances constituting fraud or mistake. Malice, intent, knowledge, and other conditions of a person's mind may be alleged generally. The Third Circuit has explained that to comply with *Rule 9(b)*, a plaintiff must plead or allege the date, time and place of the alleged fraud or otherwise inject precision or some measure of substantiation into a fraud allegation.

Business & Corporate Compliance > ... > Contracts Law > Contract Conditions & Provisions > Integration Clauses

Evidence > Types of Evidence > Documentary Evidence > Parol Evidence

Contracts Law > ... > Affirmative Defenses > Fraud & Misrepresentation > Intentional Fraud

HN18[] **Contract Conditions & Provisions, Integration Clauses**

Under Pennsylvania law, the parol evidence rule forbids admitting evidence of prior representations to fully integrated written agreements, even for claims of fraudulent inducement. Fraud in the inducement does not involve terms omitted from an agreement, but rather allegations of oral representations on which the other party relied in entering into the agreement but which are contrary to the express terms of the agreement.

Torts > ... > Fraud & Misrepresentation > Nondisclosure > Elements

HN19[] **Nondisclosure, Elements**

Fraud in the omission and fraudulent concealment claims can only lie where there is a duty to disclose the omitted information. Under Pennsylvania law, the duty to speak exists only in limited circumstances, such as: (1) when there is a fiduciary, or confidential, relationship between the parties; (2) where one party is the only source of information to the other party or the problems are not discoverable by other reasonable means; (3) when disclosure is necessary to prevent an ambiguous or partial statement from being misleading; (4) where subsequently acquired knowledge makes a previous representation false; or (5) where the undisclosed fact is basic to the transaction.

Torts > ... > Duty > Affirmative Duty to Act > Voluntary Assumption of Duty

HN20[] **Affirmative Duty to Act, Voluntary Assumption of Duty**

Where both the plaintiff and defendant are sophisticated business entities, entrusted with equal knowledge of the facts, the duty to speak does not arise.

Contracts Law > Contract Interpretation > Fiduciary Responsibilities

HN21[] **Contract Interpretation, Fiduciary Responsibilities**

Regarding the duty to speak, even if a confidential or fiduciary relationship did not exist, there may still be a heightened responsibility based on the dealings of the parties. Thus, one may justifiably rely on silence where there is no confidential relationship only if a specific relationship of trust has been developed with regard to a certain matter.

Torts > ... > Fraud & Misrepresentation > Actual Fraud > Elements

HN22[] Actual Fraud, Elements

Under Pennsylvania law, an expressed intention to take a future action that does not actually comport with one's true state of mind at that time is a misrepresentation of existing fact and may serve as the basis for a fraud claim.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Torts > ... > Fraud & Misrepresentation > Actual Fraud > Elements

HN23[] Motions to Dismiss, Failure to State Claim

Courts deny motions to dismiss where the plaintiff alleges that, from the outset, the defendant never intended to keep its promise to do something in the future.

Torts > ... > Fraud & Misrepresentation > Actual Fraud > Elements

HN24[] Actual Fraud, Elements

A plaintiff must show that it justifiably relied on the false representation to state a fraud claim.

Torts > ... > Fraud & Misrepresentation > Actual Fraud > Elements

HN25[] Actual Fraud, Elements

In deciding whether a plaintiff justifiably relied on the information for a fraud claim, a court may consider the degree of sophistication of the parties and the history of the negotiation process between them.

Torts > ... > Fraud & Misrepresentation > Actual Fraud > Elements

HN26[] Actual Fraud, Elements

Although courts may consider the nature of the relationship between the parties when analyzing the justifiable reliance element of a fraud claim, the Pennsylvania Supreme Court has hesitated to find reliance justified where the party claiming reliance had an adequate opportunity to verify the allegedly fraudulent statements.

Torts > ... > Fraud & Misrepresentation > Actual Fraud > Elements

HN27[] Actual Fraud, Elements

Regarding the justifiable reliance element of a fraud claim, statements as to the riskiness of developing and/or selling the Property are statements of value, and therefore are a part of trade talk and bargaining which customarily accompany negotiations for the sale of property.

Torts > ... > Concerted Action > Civil Conspiracy > Elements

HN28[] **Civil Conspiracy, Elements**

To state a cause of action for civil conspiracy, a plaintiff must show: (1) a combination of two or more persons acting with a common purpose to do an unlawful act or to do a lawful act by unlawful means or for an unlawful purpose; (2) an overt act done in pursuance of the common purpose; and (3) actual legal damage. A viable civil conspiracy claim also requires malice or intent to injure. Bald assertions that certain actions were malicious are insufficient; it must be alleged that the sole purpose of the conspiracy was to injure the Plaintiffs.

Torts > ... > Concerted Action > Civil Conspiracy > Elements

HN29[] **Civil Conspiracy, Elements**

Courts routinely dismiss civil conspiracy claims where the plaintiff failed to allege that the defendants acted maliciously or acted with the sole intent to injure him or her.

Business & Corporate Compliance > ... > Breach > Breach of Contract Actions > Elements of Contract Claims

HN30[] **Breach of Contract Actions, Elements of Contract Claims**

To state a claim for breach of contract under Pennsylvania law, a plaintiff is required to plead: (1) the existence of a contract, including its essential terms; (2) a breach of duty imposed by the contract; and (3) resultant damages.

Opinion

[*674] MEMORANDUM

Marston, J.

As part of the fallout of a botched real estate transaction, Plaintiff North Penn Towns, L.P. ("NPT"), **[**2]** directly and as assignee **[*675]** of Philmont Country Club ("PCC"), has sued Defendants Concert Golf Partners, LLC ("CGP"), Concert Philmont, LLC, Concert Philmont Properties LLC, and Peter Nanula (collectively, "the Concert Defendants") and Ridgewood Real Estate Partners, LLC ("Ridgewood"), Ridgewood Philmont, LLC, Jonathan Grebow, and Michael Plotnick (collectively, the "Ridgewood Defendants") for fraud, breach of contract, conspiracy, and violations of federal ***antitrust law***. (Doc. No. 1.)

The Concert Defendants and Ridgewood Defendants filed a joint motion to dismiss, arguing that NPT cannot bring claims as an assignee of PCC; that NPT fails to state an antitrust claim because it, among other things, does not define a relevant market in which competition has been harmed; and that NPT did not satisfy the heightened pleading standard for fraud claims. (Doc. Nos. 13, 21.) NPT opposed the motion. (Doc. Nos. 17, 22, 33.) The Court held oral argument on the motion on July 22, 2021.

For the reasons that follow, the Court grants in part and denies in part Defendants' motion.

I. Factual Background

A. PCC Decides to Sell Part of Its Property to Raise Money for Improvement Projects

PCC operated a member-owned **[**3]** country club ("Philmont Club") located in Huntington Valley, Pennsylvania.[1] (Doc. No. 1 at ¶ 28.) Founded in 1906, Philmont Club boasted many amenities, including two 18-hole golf courses (the "North Course" and the "South Course"), tennis courts, a swimming pool, and a clubhouse. (*Id.* at ¶ 29.) However, in the early 2000s, PCC "found itself in poor financial and physical shape." (*Id.* at ¶ 30.) Because it needed to raise money to improve Philmont Club's facilities, PCC decided to sell nine of the South Course's eighteen holes (the "Property") to a residential real estate developer. (*Id.* at ¶ 31.)

At first, PCC agreed to sell the Property to Toll Brothers, a homebuilder. (*Id.* at ¶ 32.) However, that arrangement quickly fell apart, and the Toll Brothers agreement was terminated in July 2014. (*Id.* at ¶ 33.)

B. NPT Enters the Picture and Agrees to Develop the Property

About a year later, in May 2015, PCC agreed to sell the Property to another homebuilder, NVR, Inc. (*Id.* at ¶ 34.) However, because NVR "does not engage in property development—that is, the process of taking raw land and readying it for home construction, including . . . grading the land and installing infrastructure such as sewer **[**4]** and electrical lines," NVR assigned the agreement of sale to NPT, a property developer. (*Id.* at ¶¶ 35-36.) The plan was for NPT to develop the Property into developed lots which NVR would then purchase from NPT. (*See id.* at ¶¶ 35-37.) NPT and NVR entered into a Lot Purchase Agreement ("LPA") to this effect on July 22, 2015. (*Id.* at ¶ 37.) The following day, July 23, NPT and PCC entered into an agreement of sale ("AOS"), pursuant to which PCC agreed to sell the Property to NPT. (*Id.* at ¶ 38; Doc. No. 1-1, Ex. 2.)

Taken together, under the AOS and LPA, NPT would first purchase the Property from PCC and then obtain development approvals from Lower Moreland township (the "Township"), develop the Property into individual development lots ("units"), and sell the units to NVR, who would ultimately construct the homes and **[*676]** sell them to consumers. (Doc. No. 1 at ¶ 39.)

Under the AOS, the purchase price for the Property was based on a per unit yield; each unit approved for development by the Township cost $75,308.64. (*Id.* at ¶ 40.) Although the final yield was uncertain, the AOS anticipated that the Township would approve 162 units, resulting in an anticipated purchase price of $12.2 million.

---

[1] PCC is a non-profit corporation that owned and operated the country club also bearing the name Philmont Country Club. (Doc. No. 1 at ¶¶ 7, 28.)

(**[**5]** *Id.* at ¶ 41.) The AOS contemplated that, at minimum, the yield would be 150 units (*id.*) and, accordingly, the minimum purchase price for the Property was $11,296,296 (*id.* at ¶ 42).

C. Zoning Issues Emerge, Causing NPT and PCC to Repeatedly Amend the Agreement of Sale

The AOS also provided NPT with a 90-day due diligence period, during which NPT could conduct commercially reasonable studies on the Property and terminate the AOS for any reason. (*Id.* at ¶ 43.) During this time frame, NPT and PCC learned of recent changes to the Township's zoning regulations. (*Id.* at ¶ 44.) The impact of those regulations was that the Property could only yield a maximum of 105 units—far below the minimum yield of 150 units and anticipated yield of 162 units. (*Id.*)

Due diligence also revealed that the Property had high levels of mercury and arsenic due to decades of pesticide use, and these environmental conditions needed to be remedied before the Property could be developed. (*Id.* at ¶ 45.)

The zoning issues meant that NPT would essentially be purchasing the Property at the price of 150 units while only obtaining 105 units. (*Id.* at ¶ 46.) This arrangement "was not economically viable for NPT." (*Id.*) Furthermore, **[**6]** "selling the Property for a potential unit yield of only 105 units was not a viable option to solve [PCC's] financial issues." (*Id.* at ¶ 47; *see also id.* at ¶ 46 ("[T]he revenue from 105 units was not sufficient to serve [PCC's] purposes in selling the Property.").)

After the zoning issues emerged, NPT and PCC agreed to extend the due diligence period so that they could seek zoning relief from the Township. (*Id.* at ¶ 48.) NPT and PCC wanted the Township's permission to develop 162 or more units. (*Id.*) Accordingly, NPT and PCC amended the AOS eight times, ultimately extending the due diligence period to September 26, 2016. (*Id.* at ¶ 49; *see also* Doc. No. 1-1, Ex. 3.)

During the extended due diligence period, NPT engaged in extensive discussions with the Township about creating plans to develop the Property that the Township would find agreeable and which would warrant zoning relief to allow 162 or more units be developed. (*Id.* at ¶ 50.) However, the Township expressed concerns about the impact any development of the Property would have on the school system and roadway congestion. (*Id.* at ¶ 51.) NPT suggested making the development age-restricted (i.e., no residents under the age of 19 **[**7]** allowed) as well as making a $1 million contribution to roadway improvements to increase the unit yield. (*Id.* at ¶ 52.) NPT also suggested restricting 22 acres of PCC's property from further development, to meet the Township's open space requirements. (*Id.* at ¶ 53.)

NPT's suggestion to implement age restrictions raised new concerns—namely, to make an age-restricted development marketable, it must include a clubhouse, which would cost approximately $1.6 million to build. (*Id.* at ¶¶ 54-55.) Therefore, increasing the yield to 160 units or more would come at an additional cost of $2.6 million (the $1.6 million for the clubhouse coupled with the $1 million roadway contribution), **[*677]** plus the environmental remediation costs. (*Id.* at ¶ 56.)

On September 7, 2016, NPT, NVR, and PCC met to determine the allocation of the increased cost so that the parties could modify the AOS and LPA accordingly and move forward. (*Id.* at ¶ 57.) NPT and PCC reached an agreement in principle, pursuant to which PCC would provide NPT with (a) a $375,000 purchase price credit, which would be decreased if the clubhouse came in under budget, and (b) a potential price reduction of up to $151,543.20 depending on the number **[**8]** of units approved. (*Id.* at ¶ 58.) This agreement is encompassed in the proposed *Ninth Amendment* to the AOS. (*Id.* at ¶ 59; Doc. No. 1-2, Ex. 4.)

D. CGP Expresses Interest in a Potential Transaction with PCC

In the midst of these negotiations, on August 30, 2016, longtime PCC and Philmont Club member David Fields had a 35-minute phone call with Defendant Nanula, the sole member of CGP.[2] (Doc. No. 1 at ¶¶ 9, 60.) The pair spoke "about CGP potentially investing in the Philmont Club to assist [PCC] with its pressing financial needs." (*Id.* at ¶ 60.) After the call, Nanula emailed Fields, requesting information about Philmont Club, including "A summary of your current real estate deal and the Toll [Brothers] deal." (*Id.* at ¶ 61; Doc. No. 1-2, Ex. 5 at p. 14.)[3]

Fields called PCC's President, Glenn Meyer, and asked if Meyer would be interested in pursuing discussions with CGP. (Doc. No. 1 at ¶ 62.) Meyer indicated that he would. (*Id.*) Fields also forwarded Nanula's email to PCC's Treasurer, Sam Silverman. (*Id.* at ¶ 63; Doc. No. 1-2, Ex. 5.) On September 10, 2016, Silverman provided Nanula with the requested information and explained that "it would be easier to provide a summary of the NPT real estate deal **[**9]** verbally since [PCC] was 'in the process of receiving an amendment to the [AOS] that will better clarify the details.'" (Doc. No. 1 at ¶ 64; Doc. No. 1-2, Ex. 5 at p. 13.)

Nanula forwarded the information to CGP's Director of Acquisitions, Tom Moran, and sent several follow up questions to Silverman, which Silverman responded to. (Doc. No. 1 at ¶¶ 65-66; Doc. No. 1-2, Ex. 5 at pp. 10-12.) On September 19, 2016, Nanula requested additional information, including "any and all details on the pending NVR deal for the South Course acreage." (Doc. No. 1-2, Ex. 5 at p. 9; Doc. No. 1 at ¶ 67.) Nanula also stated that he would "work on a preliminary proposal to share [that] week" about CGP's potential investment in Philmont Club. (*Id.*)

That same day, Meyer and Nanula had a phone call, during which Meyer updated Nanula on the NVR/NPT deal and Nanula explained CGP's typical process for acquiring a country club. (*Id.* at ¶¶ 68-69.) Nanula also conveyed CGP's "preliminary terms" for purchasing Philmont Club. (*Id.* at ¶ 69.) The preliminary terms included: CGP would pay off PCC's debt, make a few million dollars' worth of capital improvements to Philmont Club, and use the proceeds from selling the Property **[**10]** for additional capital improvements. (*Id.* at ¶ 70.)

The next day, September 20, Moran provided Nanula with a preliminary analysis of Philmont Club's finances and Nanula replied,

> **[*678]** Plenty for now. This deal will be long and slow.
> They are under contract with our pals at NVR homes to sell off 9 of their 36 holes for $12.2m. Not sure how they would sell the club to us, and let us have the real estate upside. Trying for that. Enough work on the pro forma for now.

(*Id.* at ¶ 71; Doc. No. 1-2, Ex. 7 at p. 21)

E. Ridgewood Is also Interested in a Potential Transaction with PCC

In late 2014—shortly after the Toll Brothers deal fell apart—the Vice President of Ridgewood, Defendant Plotnick, began emailing Meyer to inquire whether PCC was interested in pursuing a potential transaction with Ridgewood. (*See id.* at ¶¶ 72-73 (alleging Plotnick emailed Meyer in December 2014, October 2015, and March 2016).) Meyer did not respond to Plotnick's inquiries. (*Id.* at ¶ 73.)

However, in mid-September 2016, Plotnick attended an industry conference, where he met John Brown, whose company, Brown Golf Management, had been hired by PCC to manage Philmont Club. (*Id.* at ¶ 74.) After Plotnick told Brown that Ridgewood was **[**11]** interested in becoming involved with Philmont Club (*id.* at ¶ 75; Doc. No. 1-3, Ex. 8), Brown introduced Plotnick to Meyer. Meyer and Plotnick then arranged for Plotnick and his colleague—

[2] CGP is a golf course operator. (Doc. No. 1 at ¶ 125; *see also* Doc. No. 1-3, Ex. 15 at p. 34 ("Having invested in, operated, or made loans on 100+ properties, we pride ourselves on quickly and discreetly closing golf transactions on an all-cash basis from our committed funds.").)

[3] The Court adopts the pagination used by the CM/ECF docketing system.

Ridgewood's CEO, Defendant Grebow—to visit Philmont Club on September 27, 2016. (Doc. No. 1 at ¶¶ 76-78; Doc. No. 1-3, Exs. 8 & 9.)

F. NPT Terminates the AOS After PCC Refuses to Execute the Proposed Ninth Amendment

As noted above, during the September 7, 2016 meeting that NPT, PCC, and NVR attended to discuss the allocation of the new costs created by the age restriction, addition of a clubhouse, and roadway improvements, NPT and PCC reached an agreement in principle to move forward with the transaction.[4] (Doc. No. 1 at ¶¶ 57-59.) However, NPT and NVR did not reach a resolution on how to modify the LPA to account for those additional costs. (*Id.* at ¶ 79.)

While NPT and PCC worked towards memorializing the September 7, 2016 agreement in writing and NPT and NVR worked to modify the LPA, NPT and PCC executed the Seventh and *Eighth Amendments* to the AOS, both of which extended the due diligence period. (*Id.* at ¶ 80.) Under the *Eighth Amendment* to the AOS, the due diligence period was extended to September 26, 2016. (*Id.*)

On September 22, just days **[**12]** before the due diligence period was set to expire, Meyer and Silverman, on behalf of PCC, "were prepared to re-enter into a new agreement with NPT." (*Id.* at ¶ 81.) This agreement would have "similar terms to the AOS as intended to be modified by the terms of the *Ninth Amendment* should the AOS need to be terminated as a result of an inability to modify the LPA to address the issues with Unit yield." (*Id.*)

However, the following day, Meyer spoke to Plotnick for the first time, which prompted Meyer to reevaluate and change course. (*Id.* at ¶ 82.) Instead of moving forward with NPT, Meyer told PCC's counsel: "After further thought, we have decided to let the [AOS] expire and evaluate our position rather than continue to negotiate with NVR." (*Id.*; Doc. No. 1-3, Ex. 11 at p. 24.)

[*679] In the meantime, NPT and NVR reached an agreement on how to amend the LPA. (Doc. No. 1 at ¶ 83.) Accordingly, NPT executed the *Ninth Amendment* to the AOS and sent it to PCC for countersignature. (*Id.*) But PCC refused to execute the *Ninth Amendment*. (*Id.* at ¶ 84.) PCC's refusal to execute the *Ninth Amendment* left NPT with "no reasonable option but to terminate the AOS to save NPT's deposit money." (*Id.* at ¶ 85.) NPT terminated the AOS on September 26, 2016. (*Id.* at ¶ 86.)

*G. [**13] PCC Separately Talks to NPT, Ridgewood, and CGP about Selling the Property and/or Philmont Club, and After Expressing Interest, Ridgewood Backs Out of a Potential Transaction*

After NPT terminated the AOS, PCC pursued separate discussions with NPT, Ridgewood, and CGP about selling the Property and/or the entire Philmont Club. (*Id.* at ¶ 87.) At the time, NPT was unaware that PCC was also engaging in discussions with Ridgewood and CGP. (*Id.* at ¶ 88.)

On September 27, 2016—the day after the AOS terminated—NPT discussed the terms of the deposits it would render to PCC if PCC re-entered into the AOS. (*Id.* at ¶ 89; Doc. No. 1-3, Ex. 12 at p. 27.)

That same day, Meyer met with Plotnick and Grebow at Philmont Club to discuss Ridgewood's interest in the Property. (Doc. No. 1 at ¶ 90.) Plotnick and Grebow then expressed their intent to provide PCC with a proposal for the transaction. (*Id.* at ¶ 91; Doc. No. 1-3, Ex. 13 at p. 29.) But Ridgewood later changed its mind and told PCC that it was no longer interested in purchasing the Property, reasoning that the ability to obtain approvals for 162 units was speculative and the risks associated with the development of the Property were too high. (Doc. **[**14]** No. 1 at ¶ 92.) "In other words, Ridgewood expressed doubt that it, or any other developer, would be able to obtain sufficient confidence in the feasibility of the profitable development of the Property such that purchasing the Property could be justified." (*Id.* at ¶ 93.)

---

[4] This agreement in principle was later memorialized in the proposed *Ninth Amendment* to the AOS.

H. CGP's Proposal to Buy Philmont Club

Meanwhile, PCC's financial condition continued to deteriorate. (*Id.* at ¶ 95.)

On November 1, 2016, Nanula provided PCC with a formal written proposal for CGP's purchase of Philmont Club in its entirety. (*Id.* at ¶ 94; Doc. No. 1-3, Ex. 14.) CGP proposed to (1) immediately pay off PCC's $1 million in debt, (2) make $4 million in capital improvements to Philmont Club, and (3) upon the sale of the Property, make an additional $5 million in capital improvements.[5] (Doc. No. 1 at ¶ 96; Doc. No. 1-3, Ex. 14.) CGP also promised that Philmont Club would "remain an exclusive private club with at least 27 holes [of golf] after the South Course real estate transaction." (Doc. No. 1-3, Ex. 14; Doc. No. 1 at ¶ 97.) "Nanula purposely crafted the proposal" so that the amount of cash PCC would receive from CGP "roughly align[ed]" with the amount that PCC would have received under the AOS it had with **[**15]** NPT and NVR. (Doc. No. 1 at ¶ 98.)

According to CGP, the advantage of selling Philmont Club to it instead of selling **[*680]** the Property to NPT was that CGP "would immediately purchase Philmont Club and worry about obtaining development approvals for the Property later," whereas a developer like NPT would only be "willing to pay full price for the Property upon obtaining development approvals which may never come." (*Id.* at ¶ 99.) CGP's website touts that the company "pride[s] [itself] on quickly and discreetly closing golf transactions on an all-cash basis." (*Id.* at ¶ 100; Doc. No. 1-3, Ex. 15.) In addition, one of CGP's main selling points was that it "only require[s] 30 days for due diligence and 5 days to close." (Doc. No. 1-3, Ex. 15; Doc. No. 1 at ¶ 100.)

After Meyer reviewed CGP's proposal, he responded to Nanula, "I thought upon closing the real estate transaction we would have the full proceeds of the sale available towards capital improvements but I'm only seeing $5M listed." (Doc. No. 1 at ¶ 101; Doc. No. 1-3, Ex. 16 at p. 36.) In response, Nanula explained that PCC had two choices: (1) they could either get the full proceeds of the sale of the Property, if a sale ever even **[**16]** occurred, "and bear all the risks and costs during the process" or (2) allow CGP to "rescue and fix the club now" "without taking any risk or bearing any cost at all." (Doc. No. 1-3, Ex. 16 at p. 36.) In other words, because the sale of the Property may never come to fruition, CGP crafted a proposal that "balanced out that risk by allowing CGP to recover some of its initial investment if the Property were sold." (Doc. No. 1 at ¶ 102; Doc. No. 1-3, Ex. 16 at p. 36 ("If we can pull this off, we could get back some of our initial risk capital from future real estate proceeds - maybe zero, maybe never - and this prospect allows us to be interested in PCC."); *see also* Doc. No. 1-3, Ex. 20 at p. 64 ("Sent Glenn a proposal yesterday . . . He wanted to explore how we could give the club 100% of all our real estate proceeds . . . I said no; about $5m is all we could afford to plow back. We are taking the risk in this scenario, not the club.").) This explanation was consistent with Nanula's position that: "We have to assume no real estate transaction might ever be possible, due to the environmental remediation vagaries and cost; the extensive infrastructure costs for the Philmont Ave. intersection **[**17]** project; and the Town approval uncertainties." (Doc. No. 1-3, Ex. 20 at p. 64; Doc. No. 1 at ¶ 103.)

I. PCC Sells Philmont Club to CGP, and Ridgewood Re-Enters the Picture

On November 17, PCC's Board of Directors voted to approve CGP's proposal. (*See* Doc. No. 1-3, Ex. 21 at p. 66.) That same day, Meyer sent a letter to PCC's membership, informing them of the terms of CGP's proposal to convert Philmont Club to a non-equity club, including the "Guarantee of maintaining 27 holes of golf after the South Course is sold." (Doc. No. 1 at ¶¶ 104-05; Doc. No. 1-3, Ex. 17 at pp. 48-49.)

---

[5] Notably, Philmont Club was appraised in 2003 at $10.6 million solely as a country club (i.e., this figure did not take into account the possibility of selling the Property for development purposes). (*Id.* at ¶ 150.) Here, CGP promised PCC $10 million in debt payoff and capital improvements, meaning that "CGP's offer [in 2016] was not far removed from the appraised value of Philmont Club [in 2003]." (*Id.* at ¶¶ 150, 152.) NPT alleges that this shows that "Philmont Club was worth many millions of dollars more than what it was sold . . . for." (*Id.* at ¶ 151.)

The next month, on December 12, 2016, a townhall-style meeting was held at Philmont Club, and Nanula pitched PCC's membership on why they should accept CGP's offer and answered members' questions about the deal. (Doc. No. 1 at ¶ 106.) PCC and CGP's counsel proceeded to negotiate a proposed Purchase and Sale Agreement (the "PSA") and on January 19, 2017, PCC's Board of Directors voted to approve the PSA and scheduled a date for PCC's membership to vote on it. (*Id.* at ¶ 108.)

Because CGP insisted that the PSA be kept confidential, PCC members were only permitted to view the 50-page PSA in person at Philmont Club and **[**18]** were prohibited from reproducing the PSA or taking any notes on it. (*Id.* at ¶¶ 109-10.) As a result, PCC members could not obtain any independent **[*681]** legal advice on the PSA before voting on whether to sell Philmont Club to CGP. (*Id.* at ¶ 109.)

Meanwhile, on January 23, 2017, CGP incorporated Concert Philmont and Concert Philmont Properties as single purchase entities to make the purchase of Philmont Club. (*Id.* at ¶ 112.) In other words, CGP would not be purchasing Philmont Club directly. (*Id.*) Initially, CGP contemplated Concert Philmont Properties taking title to the Property and Concert Philmont taking title to the remainder of Philmont Club. (*Id.* at ¶ 113.)

On February 1, 2017, PCC's membership voted to approve the PSA and sell Philmont Club to CGP. (*Id.* at ¶ 114.) The PSA was executed on February 6, and closing took place around March 1. (*Id.* at ¶¶ 115-16.) The PSA included an integration clause, which stated: "This Agreement and the exhibits attached hereto represent the entire understanding of the agreement between the Parties with respect to the subject matter hereof, and supersedes the Letter of Intent, all other negotiations, understandings and representations, if any, made between **[**19]** such Parties." (Doc. No. 13-9 at p. 47, § 17.1.) Nanula signed the PSA on behalf of Concert Philmont and Concert Philmont Properties. (*See id.* at p. 55.)

Because it was more complicated to separate title to the Property from title to the remainder of Philmont Club than CGP had originally contemplated, the entirety of Philmont Club was conveyed to Concert Philmont. (*Id.* at ¶ 117.) Therefore, Concert Philmont owned Philmont Club in its entirety but intended to convey the Property to Concert Philmont Properties in the future. (*Id.* at ¶ 118.)

The following month, on March 2, 2017, Concert Philmont Properties and Ridgewood Philmont[6] entered into a Development Services Agreement (the "DSA"), which provided that Ridgewood Philmont would be responsible for obtaining development approvals for the Property as well as marketing and selling the Property to a developer. (*Id.* at ¶ 119.)

J. NPT Files Suit in State Court, and Discovery Reveals that Ridgewood and CGP Plotted Together to Acquire Philmont Club

On March 3, 2017, NPT initiated a lawsuit against CGP and PCC in the Montgomery County Pennsylvania Court of Common Pleas (Case No. 2017-04395) (the "Original Action"), alleging that CGP tortiously **[**20]** interfered with its contract with PCC and that PCC breached its contract with NPT. (*Id.* at ¶ 121.) Discovery revealed that, unbeknownst to PCC, CGP had engaged in several covert actions leading up to the sale of Philmont Club, including communicating at length with Ridgewood. (*See, e.g., id.* at ¶¶ 122-25, 128-31.) These revelations are discussed in turn below.

i. CGP and Ridgewood's Initial Interactions in Fall 2016

In September 2016, Nanula actually met Plotnick at the same industry conference where Plotnick met Brown. (*Id.* at ¶ 123.) During that conference, Plotnick and Nanula discussed the possibility of Ridgewood and CGP working

---

[6] Ridgewood Philmont is an entity created by Ridgewood for the purpose of entering into the DSA. (*Id.* at ¶ 120.)

together on future country club acquisitions that would involve excess land that could be developed for residential purposes. (*Id.* at ¶ 124.)

Shortly thereafter, Plotnick and Grebow toured Philmont Club on September 27, 2016, and they decided to try to partner **[*682]** with a golf course operator, such as CGP, so as to better position Ridgewood to be able to purchase Philmont Club. (*Id.* at ¶ 125.)

Nanula kept in touch with Plotnick throughout this time. For example, on October 10, 2016, after Nanula spoke to Meyer at PCC, Nanula immediately turned around and called **[**21]** Plotnick. (*Id.* at ¶¶ 126-27.)

ii. Ridgewood and CGP Begin Exchanging Terms of a Proposed Deal

On October 21, 2016, Plotnick and Nanula began exchanging the terms of the deal that would eventually become the DSA (which was ultimately executed in March 2017). (*Id.* at ¶ 128; Doc. No. 1-3, Ex. 18 at p. 51.) Specifically, Plotnick proposed that in exchange for paying half of the costs of obtaining development approvals and finding a buyer for the Property, Ridgewood would receive half the sales of the Property above the costs of obtaining development proposals, plus $5 million. (Doc. No. 1 at ¶ 129; Doc. No. 1-3, Ex. 18 at p. 51.) Plotnick also suggested that $5 million from the sale of the Property be reinvested in Philmont Club as capital expenditures. (*See* Doc. No. 1-3, Ex. 18 at p. 51; Doc. No. 1 at ¶ 130.) Nanula eventually incorporated this suggestion into his November 1, 2016 proposal to PCC. (Doc. No. 1 at ¶ 131; Doc. No. 1-3, Ex. 14.)

After receiving Ridgewood's proposal, Nanula forwarded the email to Nick Cicero, a partner at Freestone Capital Management.[7] (Doc. No. 1 at ¶ 132; Doc. No. 1-3, Ex. 19 at pp. 55-56.) Nanula explained that CGP was in the early stages of trying to purchase **[**22]** Philmont Club and had received an initial proposal from Ridgewood. (Doc. No. 1-3, Ex. 19 at p. 56.) Nanula noted that Ridgewood had "been talking to [the] Club about buying the 9 holes for [redacted] but they need a credible golf operator to sell the members on this" and that he "told them to back off completely so I can buy the whole Club and then deal them in as our real estate partner." (*Id.*) However, Nanula wondered, "why do we need Ridgewood at all? They are not putting up any real capital at all here," and asked Cicero for his advice. (*Id.*; Doc. No. 1 at ¶ 134.)

Cicero agreed that the return Ridgewood would receive under the proposal "seems awfully high instead of just some set fee that is relatively nominal." (Doc. No. 1 at ¶ 135; Doc. No. 1-3, Ex. 19 at p. 54.) Acknowledging that Ridgewood had already expressed interest to PCC directly, Nanula responded, "Yes, but this firm is in advanced talks with club president about buying this 35 acre parcel from the club . . . So getting them to back off to a small fee will be difficult." (Doc. No. 1-3, Ex. 19 at p. 53; Doc. No. 1 at ¶ 137.) Ultimately, Nanula recognized that the proposed deal with Ridgewood was "[n]ot too shabby" and **[**23]** "juice[d] [CGP's] normal deal returns nicely." (Doc. No. 1-3, Ex. 19 at p. 56.)

iii. After CGP Submits Its Proposal to PCC, CGP and Ridgewood Continue to Discuss Working Together and a Potential Deal

On November 2, Nanula emailed Plotnick to bring him up to date on PCC's reaction to CGP's proposal to purchase Philmont Club. (Doc. No. 1 at ¶ 140; Doc. No. 1-3, Ex. 20 at p. 64.) Nanula explained that Meyer wanted the club to receive 100% of the real estate proceeds but that he put his foot down and "said no; about **[*683]** $5m is all we could afford to plow back," given that CGP is "taking the risk in this scenario, not the club." (Doc. No. 1-3, Ex. 20 at p. 64.) Nanula predicted that Meyer "may come back to you, and ask for $7m instead of $5m." (*Id.*) As a result, Nanula made the following request: "For now, I hope you guys will stand back, profess some concerns about the real estate risks, and just wait to see if I can strike a better deal for all of us here." (*Id.*) A few hours later, Nanula

---

[7] Freestone Capital Management is the company responsible for managing the various entities that provided the financing for Concert Philmont's purchase of Philmont Club. (Doc. No. 1 at ¶ 132.)

sent a follow up email, stating that CGP "would only pursue the real estate angle with Ridgewood" and that he was "prepared to sign an agreement to that effect." (*Id.* at p. 63; Doc. No. 1-3, Ex. 21 at p. 68.) **[**24]**

Two days later, on November 4, Plotnick responded, "I completely understand what you are trying to do" and believed they had "the basis for a deal," with just a few minor tweaks. (Doc. No. 1-3, Ex. 21 at p. 68) Plotnick also suggested that Nanula get feedback from Meyer and PCC's Board before putting their agreement in writing. (*Id.*) Plotnick added, "In the meantime, we will continue to stand on the sidelines and let you do your thing. Keep me posted as to any progress made, and when you are closer to a deal with the club, we can paper our agreement." (*Id.*)

Accordingly, Ridgewood told Meyer/PCC that it was not interested in the Property anymore because of risks with the development. (*See* Doc. No. 1 at ¶¶ 92-93, 144.) Ridgewood failed to disclose, however, that Ridgewood and CGP knew each other and had been working together behind the scenes, plotting for Ridgewood to "stand back." (*Id.* at ¶ 144.)

Ridgewood and CGP continued to keep in touch as things moved ahead with CGP and PCC. For example, on November 19, two days after PCC's Board of Directors voted to accept CGP's proposal, Nanula told Plotnick that the Board "want[s] to move fast and get this closed asap." (Doc. No. 1-3, Ex. 21 **[**25]** at p. 66.) Nanula estimated that "the member vote will be 90%+ in favor." (*Id.*) Speaking of PCC's Board, Nanula surmised, "They need us, they want us, and they have capitulated in every respect. Now it is just a matter of executing." (*Id.*) At this point, given their success, Nanula decided it was time for Ridgewood and CGP to "paper our deal on the real estate opportunity." (*Id.*)

iv. PCC Decides Not to Pursue a Deal with NPT, Twice

All the while, PCC remained completely unaware that Ridgewood and CGP were working together on the deal behind its back. (*See generally* Doc. No. 1.)

Thus, in the fall of 2016, after Ridgewood and CGP both cast doubt on the feasibility of the Property development (Ridgewood when it told Meyer it was no longer interested and CGP when it explained why its proposal did not allow PCC to receive the full proceeds of any sale of the Property), PCC "decided to go with the sure thing—the sale of Philmont Club to CGP—rather than risk a sale to NPT failing to materialize months down the road" and refused to engage further with NPT or execute the *Ninth Amendment* to the AOS. (*Id.* at ¶¶ 84, 145; *see also id.* at ¶¶ 147-48 ("The doubt cast by Ridgewood and CGP on the viability of the development **[**26]** of the Property at a time when [PCC] had pressing financial challenges caused [PCC] to sell Philmont Club to Concert Philmont at a rate significantly lower than [PCC] otherwise would have sold it. Had it known that the doubts and concerns expressed by Ridgewood and CGP were contrived to get Philmont Club for a cheap price rather than at a cost based in reality, [PCC] would not have sold Philmont Club to Concert Philmont.").)

[*684] In December 2016—after PCC's Board approved CGP's proposal but before it approved the PSA—NPT approached PCC again about renewing the AOS, but to no avail. On December 20, 2016, NPT sent Meyer a revised proposal to buy the Property, which Meyer immediately forwarded to Silverman, stating, "Hot off the press. Not interested." (*Id.* at ¶ 146; Doc. No. 1-3, Ex. 22 at p. 72.) In short, Meyer did not give the proposal "any consideration" and PCC turned down NPT yet again. (Doc. No. 1 at ¶ 146.)

v. CGP Tries to Ensure that the Risks Regarding Developing the Property are Eliminated

As noted above, Nanula told Meyer that CGP had to "assume no real estate transaction might ever be possible" and asked Ridgewood to "profess some concerns about the real estate risks." (*Id.* at **[**27]** ¶ 153; Doc. No. 1-3, Exs. 16, 20.) Nonetheless, CGP wanted to minimize the risk it took when buying Philmont Club. (*See* Doc. No. 1 at ¶ 153.) Thus, CGP tried to buy time so it could "confirm that the Property could be developed." (*Id.*)

For example, even though CGP's website touted that the company "only require[s] 30 days for due diligence" (Doc. No. 1-3, Ex. 15), CGP pushed for a longer due diligence period on this transaction (*see* Doc. No. 1 at ¶¶ 154-55). On December 13, 2016, Moran asked Nanula, "Are we still going for a 60 day DD period here to better understand the real estate play? Which would push the close into late March?" (Doc. No. 1-4, Ex. 24 at p. 76.) Later that day, Moran stated, "Understood on the 45 day DD so early March close." (Doc. No. 1-4, Ex. 25 at p. 80.) "CGP never informed [PCC] that it was delaying closing to ensure that it could obtain development approvals for 160 or more Units on the Property and ensure that the Property could be sold." (Doc. No. 1 at ¶ 156.)

Then, on January 16, 2017, Nanula informed Ridgewood that the PSA was "moving along quickly," with an expected timeline of: PCC's Board of Directors' approval on January 18, PCC's members' approval on **[**28]** February 1, and a target closing date of February 28. (Doc. No. 1-4, Ex. 26 at p. 86.) Mindful of Ridgewood's role in obtaining development approvals for the Property, Nanula asked, "Does this give you guys enough time to get through environmental and Town meetings, or should I buy some more time on our closing." (*Id.*)

By January 20, 2017, Ridgewood had met with the Township's manager, who "[w]as thrilled that there was going to be one owner who wanted to integrate homes into club" and "[d]idn't flinch on the 160 units." (Doc. No. 1-4, Ex. 27 at pp. 88-89.) Grebow explained, "As expected they want the $1mm contribution for traffic. Standard 55 and over community — mentioned something about no kids under 19 allowed." (*Id.* at p. 89.) Notably, the Township "[w]ant[ed] to get the deal done." (*Id.*; *see also* Doc. No. 1-4, Ex. 28 at p. 92 (Nanula's email to CGP's Chief Operating Officer, Susan Dunnavant, stating "[T]he South Course real estate development is looking good for now; met with the Town this week, and they want to get this deal done with us.").)

A few days later, on January 24, 2017, Nanula told Ridgewood: "Town not wasting any time here. Good body language." (Doc. No. 1-4, Ex. 29 **[**29]** at p. 96.) Grebow responded, "Definitely great body language. Last step in DD is the environmental cost analysis. Our attorney went through things with the consultant today and we should have that in about 2 weeks." (*Id.* at p. 95.)

A couple of weeks later, on February 14, Nanula informed his colleagues that **[*685]** "Ridgewood came back optimistic about enviro remediation on the South Course, so we are a go on the real estate project. They say it will take 12-18 months to get through Penn DEP [Pennsylvania Department of Environmental Protection], and we should have our entitlements for 165+ 'carriage homes' within 24 months. Then we sell the nicely entitled 6[0] acre parcel to [a builder], and they start moving dirt and building homes about 2 years from now." (Doc. No. 1 at ¶ 165; Doc. No. 1-4, Ex. 30 at pp. 99-100.) Nanula then explained that the "big issue" was "dirt," since approximately 60,000 yards of the South Course dirt was "arsenic-infected" and may "need to be moved." (Doc. No. 1-4, Ex. 30 at p. 100.) Ridgewood "talk[ed] about putting it on the driving range and some berms to shield the new homes," but Nanula cautioned his team to carefully evaluate that plan. (*Id.* ("Ridgewood just **[**30]** wants to maximize our proceeds from selling the entitled parcel [redacted]; they are our partner on the land deal, so it makes sense they are focused on that. But they don't own any part of the Club and don't need to care about it. We need to make sure we end up with a great North Course and some other workable club facilities. So **<u>you</u>** will be telling **<u>them</u>** where that 60k yards of dirt goes.").) According to NPT, Nanula's email illustrates that by mid-February, "CGP had satisfied any concerns [it had] about the scope and cost of the environmental remediation." (Doc. No. 1 at ¶ 164.)

At bottom, NPT asserts that the email exchanges discussing the Town's desire to move the deal along and the environmental remediation plans show that the risks with the development of the Property that CGP and Ridgewood had "professed" concerns about "had, in fact, been confirmed to be non-existent." (*See id.* at ¶ 167.) Moreover, CGP and Nanula never told PCC how they had resolved the environmental remediation and Township approval issues. (*Id.*)

K. Contrary to its Proposal, CGP Never Intended to Keep 27 Holes of Golf at Philmont Club or to Spend $5 Million on Capital Improvements to the Club

NPT alleges that, **[**31]** in addition to CGP keeping its relationship with Ridgewood a secret,[8] CGP made other misrepresentations to PCC. (*See generally id.* at ¶¶ 170-182.)

First, even though CGP's November 1 proposal stated that "PCC will remain an exclusive private club with at least 27 holes after the South Course real estate transaction" (Doc. No. 1-3, Ex. 14 at p. 32), CGP emails illustrate that "CGP had no intention" to follow through on its promise (Doc. No. 1 at ¶ 170).

For example, on October 21, 2016—shortly before sending CGP's proposal to PCC— Nanula told Cicero that "[o]nly 18 or [sic] 27 holes truly needed for the membership." (Doc. No. 1-3, Ex. 19 at p. 56). Then, on December 8, 2016, Dunnavant asked Nanula whether CGP should "[g]o down to 18 hole [sic] immediately and maintain at levels that warrant the current higher level of dues" or "get North Course to sellable conditions and have South Course OK — Maybe do the public course?" (Doc. No. 1-4, Ex. 31 at p. 102.) The next day, December 9, CGP internally discussed turning the South Course into a **[*686]** "short course" of "3-6 holes" and "abandon[ing] the other 12-15 and kill[ing] off and re-grass[ing] these." (Doc. No. 1-4, Ex. 32 at p. 105.) **[**32]** And on December 9, after speaking to Meyer, Nanula emailed Dunnavant and Moran that Meyer was "OK with giving us carte blanche on the golf courses, so long as there is a great North Course." (Doc. No. 1-5, Ex. 33 at p. 107.) Nanula added, "[Meyer] doesn't understand what we will do with the $5-6k dues preview [sic] members who only get South Course access now, but that is our problem. There will be howling and lots of questions from the members, but we will stay flexible until we know what is best to do in terms of the South Course." (*Id.*)

At the town hall meeting the following day, when Nanula pitched PCC's membership, he never mentioned CGP's intent to reduce the number of holes of golf below 27. (Doc. No. 1 at ¶ 175.) Nor did he inform them of this "at any other time before the closing on the PSA." (*Id.*) Nanula also did not appear to change his mind on downsizing the number of holes of golf as the transaction proceeded: on March 1, 2017—the day Concert Philmont became owner of Philmont Club—Nanula told Dunnavant that they needed to consider "how the remaining 6-7 holes on the South Course will really work for our membership once remodeled" (Doc. No. 1-4, Ex. 34 at p. 109), "indicating **[**33]** that CGP planned to only maintain [24] to [25] holes of golf," not 27. (Doc. No. 1 at ¶ 176.)
