Second, NPT alleges that CGP also misrepresented to PCC "the amount that would be spent on capital improvements." (*Id.* at ¶¶ 177-78.) In an internal November 21, 2016 email, Nanula wrote, "The wild ideas the Board has about a 'master plan for the North Course are probably way overblown, and we have huge capital needs in the clubhouse, HVAC, etc. You will see. We will want to 'nod' to some master plan elements so the members are excited about their North Course being updated a bit, but we want to spend the smallest dollars possible to get the maximum member impact." (Doc. No. 1-4, Ex. 35 at p. 114.) Then, on January 2017, Nanula complimented CGP's counsel for the "nicely vague" language in the PSA about the capital improvement projects CGP would undertake. (Doc. No. 1 at ¶ 181; Doc. No. 1-4, Ex. 36 at p. 118.) Nanula also shared with counsel a list of the initial capital projects that CGP "actually . . . planned" to undertake, which were "[n]ot to be shared with" PCC. (Doc. No. 1-4, Ex. 36 at pp. 117-18.)

In sum, according to NPT, "CGP never intended to expend the full $5,00,000 towards capital **[**34]** improvements that it promised to make upon the sale of the Property. Rather, CGP intended to expend a significantly smaller amount and keep the remainder as profit." (Doc. No. 1 at ¶ 180.)

L. The Limited Assignment Agreement Between PCC and NPT

---

[8] To that end, PCC remained completely unaware that Ridgewood and CGP had even been communicating since September 2016. (*Id.* at ¶ 168.) Ridgewood and CGP never informed PCC of this fact, "much less that they had been working together to acquire Philmont Club and develop the Property since October 2016 at the latest." (*Id.*) In fact, Meyer first learned that Ridgewood and CGP had "teamed up on the development of the Property" during his deposition on July 25, 2018. (*Id.* at ¶ 169.)

On September 18, 2019—approximately two-and-a-half years after NPT sued PCC and CGP in state court—NPT and PCC entered into a Limited Assignment of Claims Agreement. (*See* Doc. No. 1-1, Ex. 1 at pp. 2-4.) Under the agreement, PCC (the Assignor) agreed to assign NPT (the Assignee)

> any and all claims, demands, and cause or causes of action of any kind whatsoever which Assignor has, may have, may have [sic], or may have had on or before March 1, 2017 against Concert Golf Partners LLC, Concert Philmont Properties, LLC, Concert Philmont, LLC, Peter Nanula, Ridgewood Real Estate Partners, Michael Plotnick, and Jonathan Grebow . . .

(*Id.*) In addition, the assignment agreement contained a categorical exclusion for all claims arising under the PSA:

> **[*687]** Assignee expressly acknowledges and agrees that Assignor is not assigning, and is specifically reserving to itself, any and all claims that it has against any/or all the Concert and Ridgewood Real Estate Partners, **[**35]** Michael Plotnick, and Jonathan Grebow under that certain Purchase and Sale Agreement dated February 6, 2017 by and among Philmont Country Club, Concert Philmont, LLC, and Concert Philmont Properties, LLC.

(*Id.*)

M. The Instant Case

Shortly thereafter, on October 1, 2019, NPT initiated this lawsuit against Concert Defendants and Ridgewood Defendants. (Doc. No. 1.) The claims fall into four categories: (1) antitrust, (2) fraud, (3) civil conspiracy, and (4) breach of contract. With the exception of one of the antitrust counts (Count II), NPT asserts all of the claims against Defendants as PCC's assignee.

Antitrust. NPT claims that CGP, Nanula, Ridgewood, Grebow, and Plotnick violated the Sherman Antitrust Act, *15 U.S.C. § 1*, by conspiring to "not compete against themselves in the purchase of Philmont Club, but rather, to work jointly to reduce the price" of the club and by providing PCC with "false information to cast doubt in [PCC's] mind about the viability of selling the Property to NPT or another developer and thereby positioning CGP as the only viable option for [PCC] to solve its financial issues." (Doc. No. 1 at ¶¶ 187-224 (Counts I & II).) NPT asserts its antitrust claims directly and as assignee. **[**36]** (*See id.*)

Fraud. NPT brings five fraud-related claims against various Ridgewood and Concert Golf Defendants. (*See id.* at pp. 32-43.) First, NPT alleges that Ridgewood, Grebow, and Plotnick committed fraud, based on Plotnick and Grebow's misrepresentations to PCC (namely, telling PCC that Ridgewood was not interested in developing the Property when it was, in fact, interested and had an agreement with CGP about obtaining development approvals). (*Id.* at ¶¶ 225-41 (Count III).) Second, NPT claims that CGP and Nanula aided and abetted Ridgewood's fraud by "actively encourag[ing]" Ridgewood to profess concerns about developing the Property and stand back. (*Id.* at ¶¶ 242-54 (Count IV).) Next, NPT brings a separate claim for fraud against CGP and Nanula based on CGP's statements to PCC that the ability to develop the Property was speculative and risky, that CGP would retain 27 holes of golf at Philmont Club after the transaction, and that CGP would spend $5 million in capital improvements. (*Id.* at ¶¶ 255-75 (Count V).) Fourth, NPT claims that Ridgewood, Grewbow, and Plotnick aided and abetted CGP's fraud. (*Id.* at ¶¶ 276-87 (Count VI).) Last, NPT asserts a fraudulent concealment claim against **[**37]** CGP, Nanula, Ridgewood, Grebow, and Plotnick, again based on their failure to disclose the fact that they were working together to acquire Philmont Club. (*Id.* at ¶¶ 288-99 (Count VII).)

Civil Conspiracy. NPT alleges that all Defendants conspired with each other to engage in anti-competitive behavior in violation of the Sherman Act and Clayton Act, for Ridgewood and CGP to "fraudulently express concerns about the ability to obtain development approvals and the risks associated with" developing the Property, and "for CGP to acquire Philmont Club at a drastically reduced rate," among other things. (*Id.* at ¶¶ 300-08 (Count VIII).)

Breach of Contract. Finally, NPT claims that Ridgewood breached its September 29, 2016 confidentiality agreement with PCC when it disseminated some of PCC's confidential financial information to **[*688]** third parties.[9] (*Id.* at ¶¶ 309-314 (Count IX).) Subsequently, the Ridgewood Defendants and Concert Defendants filed a joint motion to dismiss, arguing that NPT cannot bring claims as an assignee of PCC; that NPT fails to state an antitrust claim because it, among other things, does not define a relevant market in which competition has been harmed; and that NPT did not satisfy **[**38]** the heightened pleading standard for fraud claims. (Doc. Nos. 13, 21.) NPT opposed the motion. (Doc. Nos. 17, 22, 33.) The Court held oral argument on the motion on July 22, 2021.

II. Legal Standard

HN1[] In deciding a motion to dismiss under *Rule 12(b)(6)*, the Court must determine whether the complaint contains "sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quotation marks omitted). "A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Id.*

HN2[] "As a general matter, a district court ruling on a motion to dismiss may not consider matters extraneous to the pleadings." *In re Burlington Coat Factory Sec. Litig., 114 F.3d 1410, 1426 (3d Cir. 1997)*. "However an exception to the general rule is that a document *integral to or explicitly relied* upon in the complaint may be considered without converting the motion to dismiss into one for summary judgment." *Id.* (quotation marks and alterations omitted). Similarly, the Court "may consider an undisputably authentic document that a defendant attaches as an exhibit to a motion to dismiss if the plaintiff's claims are based on the document." *Pension Benefit Guar. Corp. v. White Consol. Indus., Inc., 998 F.2d 1192, 1196 (3d Cir. 1993)*.

III. Discussion [**39]

In moving to dismiss, Concert Defendants and Ridgewood Defendants argue that:

- Counts I, III, IV, VI, VII, and VIII must be dismissed because NPT cannot assert those claims as an assignee;
- The antitrust claims (Counts I and II) must be dismissed because NPT fails to allege a violation of *Section 1* of the Sherman Act;
- The fraud and fraudulent concealment claims (Counts III, IV, V, VI, and VII) must be dismissed because NPT fails to demonstrate that any of the Defendants had a duty to speak or that NPT justifiably relied on the alleged false representations;
- The aiding and abetting fraud claims (Counts IV and VI) must be dismissed because NPT does not plead a viable fraud claim;
- The civil conspiracy claim (Count VIII) must be dismissed because it is based upon legally insufficient claims of antitrust violations and fraud and because NPT fails to plead malice;
- The breach of contract claim (Count IX) must be dismissed because NPT alleges no damages.

(Doc. No. 13-2.) We address each contention in turn.

[*689] *A. Assignment*

Defendants argue that NPT's complaint must be dismissed because (1) the claims NPT asserts as assignee "arise under" the PSA and therefore are barred by the express language of the **[**40]** Limited Assignment of Claims Agreement; (2) the PSA contained an anti-assignment clause; and (3) PCC did not expressly assign its antitrust claims to NPT, in contravention of Third Circuit law. (*See* Doc. No. 13 at pp. 11-13 & Doc. No. 21 at pp. 2-4.) For

---

[9] Specifically, NPT alleges that, just days after signing the confidentiality agreement, Ridgewood transmitted PCC's financial information to ClubCorp and to Morningstar Golf & Hospitality, LLC. (*Id.* at ¶¶ 183-86.)

the reasons discussed below, the Court is unpersuaded by Defendants' arguments and denies Defendants' motion to dismiss on those grounds.

i. The Claims NPT Asserts as Assignee Do Not "Arise Under" the PSA

As noted above, in September 2019, NPT and PCC entered into a Limited Assignment of Claims Agreement. (*See* Doc. No. 1-1, Ex. 1 at pp. 2-4.) Pursuant to the agreement, PCC assigned NPT:

> any and all claims, demands, and cause or causes of action of any kind whatsoever which Assignor has, may have, may have [sic], or may have had on or before March 1, 2017 against Concert Golf Partners LLC, Concert Philmont Properties, LLC, Concert Philmont, LLC, Peter Nanula, Ridgewood Real Estate Partners, Michael Plotnick, and Jonathan Grebow . . .

(*Id.*) However, the agreement also contained a categorical exclusion for all claims arising under the PSA. To that effect, "[NPT] expressly acknowledge[d] and agree[d] that [PCC] [wa]s not assigning, and [wa]s **[**41]** *specifically reserving to itself*, any and all claims that it has against any/or all the Concert and Ridgewood Real Estate Partners, Michael Plotnick, and Jonathan Grebow *under that certain Purchase and Sale Agreement* dated February 6, 2017 by and among Philmont Country Club, Concert Philmont, LLC, and Concert Philmont Properties, LLC." (*Id.* (emphasis added).)

In their motion to dismiss, Defendants argue that the antitrust, fraud, and civil conspiracy claims that NPT asserts as assignee arise under the PSA and that those claims are reserved for PCC to bring itself. (Doc. No. 13-2 at pp. 11-12 ("The Complaint expressly states that, because of the Defendants' unlawful conduct, Concert Golf was able to 'obtain Philmont Club at an unfair and unjust price.' The Concert Defendants purchased Philmont Club pursuant to the PSA. Hence, NPT's claims in this case (with the exception of Count IX against certain Ridgewood Defendants) as assignee arise under the PSA, which [PCC] expressly reserved for itself.").)

In response, NPT argues that the claims they bring as assignee do not arise under the PSA because the claims all relate to actions taken *before* the PSA was executed. (Doc. No. 17 at pp. 16-18.) **[**42]** In addition, NPT states that the antitrust claims arise out the Sherman and Clayton Acts, not the PSA, and that the fraud claims "arise in tort." (*Id.* at p. 17.)

a. Fraud

At this stage in the litigation, the Court is not persuaded by Defendants' contention that the fraud claims arise under the PSA. Notably, Defendants fail to cite to any applicable case law to support their position. (*See* Doc. No. 13-2 at pp. 11-12 & Doc. No. 21 at p. 3.)

Although Defendants did not raise the gist of the action doctrine in their briefing, the Court finds the doctrine instructive, insofar as it sheds light on the distinction between claims sounding in tort versus in contract. ***HN3***[] Under Pennsylvania law, the gist of the action doctrine "prevents a plaintiff from recasting ordinary breach of contract claims into tort claims." *Investors Trust LC v. TD Bank, Civil Action No.* ***[*690]*** *11-1551, 2011 U.S. Dist. LEXIS 160608, 2011 WL 13141657, at *1 n.1 (E.D. Pa. May 26, 2011)*; *Weed v. Ally Fin. Inc., Civil Action No. 11-2808, 2011 U.S. Dist. LEXIS 96670, 2011 WL 3803719, at *4 (E.D. Pa. Aug. 26, 2011)*. Pennsylvania courts and courts in this District have repeatedly recognized that the purpose of the doctrine is "to maintain the distinction between the theories of contract and tort." *Invs. Tr. LC, 2011 U.S. Dist. LEXIS 160608, 2011 WL 13141657, at *1 n.1*; *Weed, 2011 U.S. Dist. LEXIS 96670, 2011 WL 3803719, at *4*; *see also* *eToll, Inc. v. Elias/Savion Advert., Inc., 811 A.2d 10, 14 (Pa. Super. Ct. 2002)*. Accordingly, the doctrine does not bar tort claims where the claims "arise independently of the underlying contract, with the contract being merely collateral." *Invs. Tr. LC, 2011 U.S. Dist. LEXIS 160608, 2011 WL 13141657, at *1 n.1*; *see also* *Weed, 2011 U.S. Dist. LEXIS 96670, 2011 WL 3803719, at *5*.

HN4[] As it relates **[**43]** to fraud, "fraud in the inducement claims are much more likely to present cases in which a social policy against the fraud, external to the contractual obligations of the parties, exists." *U.S. Claims, Inc. v. Saffren & Weinberg, LLP, Civil Action No. 07-0543, 2007 U.S. Dist. LEXIS 88022, 2007 WL 4225536, at *11 (E.D. Pa. Nov. 29, 2007)*; *see also* *CRS Auto Parts, Inc. v. Nat'l Grange Mut. Ins. Co., 645 F. Supp. 2d 354, 377-78 (E.D. Pa. 2009)* ("Where . . . the fraud concerns an act collateral to and not interwoven with the terms of the parties' contract, such as fraudulent inducement to enter the contract, courts have been less willing to bar claims . . . [However,] [w]here the pre-contractual statements that are the basis for the fraudulent inducement claim concern specific duties that are later outlined in the contract, courts have repeatedly dismissed such claims as sounding in contract and, thus, barred by the gist of the action doctrine."); *Morales v. Superior Living Prods., LLC, Civil Action No. 07-cv-04419, 2009 U.S. Dist. LEXIS 91578, 2009 WL 3234434, at *8 (E.D. Pa. Sept. 30, 2009)* ("Courts have held that fraudulent inducement claims are not barred by the gist-of-the-action doctrine where the alleged fraud is collateral to the contract. However, fraudulent inducement claims are barred by the gist-of-the-action doctrine where the claims relate to the performance of the contract.").

Here, the allegations make clear that NPT is asserting a fraud in the inducement claim on PCC's behalf. (*See generally* Doc. No. 1.) Namely, NPT alleges that but for Ridgewood and CGP's **[**44]** misrepresentations as to the riskiness of developing the Property, PCC would not have sold Philmont Club to Concert Defendants and entered into the PSA. (*See, e.g.*, Doc. No. 1 at ¶¶ 226-41 ("Michael Plotnick and Jonathan Grebow . . . told Meyer and [PCC] that . . . it was speculative that the Property could be developed and that there were significant risks involved in the development of the Property . . . Ridgewood knew its representations to be false and purposely made the misrepresentation to cause [PCC] to rely on it and agree to CGP's proposal instead of pursing other options, including a sale of Property to NPT."); *id.* at ¶¶ 256-75 ("CGP represented to [PCC] that obtaining development approvals for the Property would be difficult and speculative . . . [PCC] was harmed as a result of its reliance upon CGP's representations by way of selling Philmont Club to Concert Philmont for below market value.").)

The Court finds that the alleged fraud is collateral to the PSA and that the fraud claims do not relate to the performance of the PSA. Nowhere in the complaint does NPT plead that Concert Defendants did not purchase Philmont Club for the price agreed upon or that Concert Defendants **[**45]** otherwise did not follow through on promises they made in the PSA. (*See generally* Doc. No. 1.) *Cf.* *Morales, 2009 U.S. Dist. LEXIS 91578, 2009 WL 3234434, at *8* ("Because the . . . fraudulent **[*691]** misrepresentation claims and the fraud claim essentially allege that defendants failed to honor their alleged promise to deliver bathtubs manufactured by Superior in accordance with the parties' agreement, I conclude that those claims are related to the performance of the contract[.]"). Taken together, the Court concludes that NPT's fraud claims sound in tort and do not arise under the PSA.

b. Antitrust

Next, the Court holds that the antitrust claim NPT asserts as assignee is statutory in nature and arises out of federal ***antitrust law***, not under the PSA. *See* *Walgreen Co. v. Johnson & Johnson, 950 F.3d 195, 299 (3d Cir. 2020)* ("The statutory federal antitrust claims asserted in Walgreen's complaint are extrinsic to, and not 'rights under,' the Distribution Agreement."); *see also* *id. at 202* ("Walgreen is seeking to enforce a purely statutory right, not a substantive right originating from the Distribution Agreement").

c. Civil Conspiracy

Last, the Court concludes that the civil conspiracy claim does not arise under the PSA either. The civil conspiracy claim is based entirely on the fraud and antitrust allegations— specifically, NPT alleges **[**46]** that CGP, Nanula, Ridgewood, Grebow, and Plotnick conspired with each other to (1) violate the federal antitrust laws and (2) commit fraud, including making fraudulent misrepresentations as to the ability to obtain development approvals for the Property, so that CGP could acquire Philmont Club at a drastically reduced rate. (*See* Doc. No. 1 at ¶¶ 300-08.) Because the fraud and antitrust claims do not arise under the PSA—and the civil conspiracy claim is grounded entirely on allegations that Defendants committed fraud and violated federal antitrust laws—the civil conspiracy claim necessarily cannot arise under the PSA.

ii. The Limited Assignment Did Not Violate the PSA's Anti-Assignment Provision

Defendants argue that NPT is barred from bringing antitrust and state law claims as an assignee because the PSA included an anti-assignment provision and, therefore, PCC could not assign those claims to NPT. (Doc. No. 13-2 at pp. 12-13.) The anti-assignment clause states: "[N]either the Seller nor the Buyer may assign this Agreement *nor any of the rights and/or obligations under this Agreement* either directly, indirectly or by operation of law either prior to or after the Closing Date without **[**47]** the approval of the other Party, which approval will not be unreasonably withheld, delayed or conditioned." (Doc. No. 13-3 at p. 48, § 17.4 (emphasis added).)

As Defendants recognized during oral argument (Hr'g Tr. at 6:19-7:10), the Third Circuit recently rejected the notion that an anti-assignment clause can preclude an assignee from bringing a federal antitrust claim. *See* *Walgreen Co., 950 F.3d at 196, 199, 203* (considering "whether an assignment of federal antitrust claims is barred by a contract provision proscribing the assignment of any 'rights and obligations' under that contract" and determining that the answer was a resounding "no"). This is because the federal antitrust claims were "a product of federal statute and thus [we]re extrinsic to, and not rights 'under,' a commercial agreement." *Id. at 196*. So too here.

Defendants' argument that the anti-assignment clause prohibited PCC from assigning the common law fraud and civil conspiracy claims fails as well. This is because the anti-assignment clause *only* proscribes the assignment of claims *arising under the PSA*. But, for the reasons discussed **[*692]** above, the fraud and civil conspiracy claims do not arise under the PSA. Therefore, the anti-assignment clause is inapplicable.

iii. [48] PCC Expressly Assigned its Antitrust Claim to NPT**

Third, Defendants argue that PCC did not expressly assign its antitrust claims to NPT, rendering the assignment of that claim unenforceable. (Doc. No. 13-2 at p. 13.) We disagree.

HN5[] In *Gulfstream III Associates, Inc. v. Gulfstream Aerospace Corp.*, the Third Circuit held that an assignment of an antitrust claim under *Section 4* of the Clayton Act, *15 U.S.C. § 15*, must be "express." *995 F.2d 425, 438-39 (3d Cir. 1993)* ("[W]e hold that only an express assignment of an antitrust claim can be valid."); *id. at 440* (holding that "any assignment of antitrust claims, as a matter of federal common law, must be an express assignment; general assignments, without specific reference to antitrust claims, cannot validly transfer the right to pursue those claims"). In that case, Gulfstream III Associates purchased an aircraft, which it resold to JB & A. Gulfstream then assigned its "rights, title and interest" in the aircraft and its purchase agreement with the manufacturer to JB & A. *Id. at 431, 437*. The Third Circuit held that the general assignment "of Gulfstream III's rights, title, and interest in" the aircraft and original purchase agreement did not suffice to assign its federal antitrust claims because it was not express. *Id. at 440* ("Gulfstream **[**49]** III Associates made no express assignment of its antitrust claims to JB & A[.]").

Six months after *Gulfstream*, the Third Circuit closely examined that decision and applied the *Gulfstream* rule that assignments must be express, this time in the context of a Racketeer Influenced and Corrupt Organizations ("RICO") claim. *Lerman v. Joyce Int'l, Inc., 10 F.3d 106, 111-12 (3d Cir. 1993)*. In *Lerman*, Litton had assigned "all of" LOPC's "causes of action, . . . claims and demands of whatsoever nature," and the Third Circuit held that this assignment was "'express' within the meaning of *Gulfstream*." *Id. at 112*; *see also* *In re Linerboard Antitrust Litig., 443 F. Supp. 2d 703, 712 (E.D. Pa. 2006)* ("[T]he *Lerman* Court held that an unambiguous and all-inclusive assignment of claims, even without specifying the types of causes of action assigned, satisfies the express assignment requirement."). In its analysis, the Third Circuit distinguished from the assignment at issue in *Gulfstream*:

> The wording of the assignment in this case contrasts sharply with that in *Gulfstream*. Here, Litton expressly assigned to Joye "all of" LOPC's "causes of action, . . . claims and demands of whatsoever nature." In *Gulfstream*, on the other hand, the purchase agreement made no reference to legal causes of action or claims. Rather, it referred only to Gulfstream III's **[**50]** "rights, title and interest" in the aircraft and the contract with the manufacturer. As a result of the wording used in the assignment at issue here, we believe that the concern underlying the express assignment rule adopted in *Gulfstream* is satisfied. The *Gulfstream* court appears to have been troubled by the difficulty of determining on a case-by-case basis whether an assignment such as the one in that case had been intended by the parties to transfer antitrust claims. The wording of the assignment in this case, however, could not reasonably lead to such difficulty. The assignment refers to Joye "all of" LOPC's "causes of action" and "claims of . . . whatsoever nature." This language is unambiguous and all-inclusive. Consequently, we hold that this assignment **[*693]** is "express" within the meaning of *Gulfstream*.

10 F.3d at 112.

Here, the Court concludes that PCC expressly assigned its federal antitrust claims to NPT in the Limited Assignment of Claims Agreement. Under the terms of that agreement, PCC assigned NPT "*any and all claims, demands, and cause or causes of action of any kind whatsoever* which Assignor has, may have, may have [sic], or may have had on or before March 1, 2017 against Concert Golf **[**51]** Partners LLC, Concert Philmont Properties, LLC, Concert Philmont, LLC, Peter Nanula, Ridgewood Real Estate Partners, Michael Plotnick, and Jonathan Grebow . . ." (Doc. No. 1-1, Ex. 1 at pp. 2-4.) This language is nearly identical to the assignment provision in *Lerman*, which the Third Circuit held to be "express" within the meaning of *Gulfstream. Compare id.*, *with Lerman, 10 F.3d at 112* ("The assignment refers to Joye 'all of' LOPC's 'causes of action' and 'claims of . . . whatsoever nature.'"). In addition, this language is distinguishable from the language that concerned the Third Circuit in *Gulfstream*. As the *Lerman* court noted, the purchase agreement in *Gulfstream* "made no reference to legal causes of action or claims" and "referred only to Gulfstream III's 'rights, title and interest' in the aircraft and the contract with the manufacturer." *See Lerman, 10 F.3d at 112*. In contrast, the language in the Limited Assignment of Claims Agreement unambiguously assigns *all* legal causes of action to NPT, with the exception of those that arise under the PSA, as discussed above.

Defendants' reliance on the Third Circuit's 2016 decision, *Wallach v. Eaton Corp.*, is unavailing. (*See* Doc. No. 13-2 at p. 13; Doc. No. 21 at pp. 1-3.) Citing **[**52]** to *Gulfstream*, the *Wallach* court noted that the Third Circuit has "long required that . . . assignments [of antitrust claims] be express." *837 F.3d 356, 366 (3d. Cir. 2016)*. However, Defendants are mistaken when they say that the holding of *Wallach* dealt with what constituted an express assignment. (*See* Doc. No. 21 at pp. 2-3 ("The Third Circuit [in *Wallach*] rejected the concept that an effective assignment of an antitrust claim is accomplished by a general assignment of 'all claims' or all 'causes of action' without specific reference to antitrust claims."); Hr'g Tr. at 8:2-10:1, 19:22-24.) As the *Wallach* court explicitly recognized, "*[a]t issue in this case . . . is not whether the assignment was express*. Rather, we are asked to determine whether an assignment of a federal antitrust claim must also reflect consideration to be valid." *837 F.3d at 366* (emphasis added); *see also id. at 371* ("In sum, we conclude that consideration has little role in advancing the goals of *Illinois Brick* and requiring it could affirmatively undermine one of them by, in certain circumstances, discouraging private enforcement of the federal antitrust laws. We therefore hold, consistent with the Second Restatement of Contracts, that consideration is not required **[**53]** under federal common law to give effect to an otherwise express assignment."); *id. at 361* ("[W]e hold that an assignment of a federal antitrust claim need not be supported by bargained-for consideration in order to confer direct purchaser standing on an indirect purchaser; such assignment need only be express, and that requirement was met here.").

The fact that the Third Circuit in *Wallach* never considered whether the assignment was express is further underscored by the court's analysis and the case's procedural history. First, unlike in *Gulfstream* and *Lerman*, in *Wallach*, the Third Circuit never mentioned the wording of the assignment. *See generally id.* Second, the district court had dismissed the action **[*694]** for lack of consideration and noted that the parties never disputed the fact that the antitrust claims were expressly assigned. *See id. at 363* ("Tauro . . . purchases trucks from R&R—a company that . . . expressly assigned Tauro its direct purchaser antitrust claims stemming from the alleged conspiracy between the OEMs and Eaten. Before the District Court, Appellees challenged the propriety and effect of this assignment, urging that it lacked bargained-for consideration . . . The District Court agreed **[**54]** and dismissed Tauro from the suit."); *see also* *Wallach v. Eaton Corp., 125 F. Supp. 3d 487, 493 (D. Del. 2015)*, *rev'd*, *837 F.3d 356 (3d. Cir. 2016)* ("Defendants do not dispute that 'an antitrust claim can be expressly assigned.' Instead, defendants allege that the purported assignment is legally invalid for lack of consideration.").

Because PCC expressly assigned its federal antitrust claims to NPT, we deny Defendants' motion to dismiss on this ground.

B. Antitrust Claims

Next, the Court addresses Defendants' argument that the two antitrust claims—Count I, which NPT brings directly, and Count II, which NPT asserts as assignee—must be dismissed for failure to state a claim. (Doc. No. 13-2 at pp. 13-20; Doc. No. 21 at pp. 4-8.)

HN6[] *Section 1* of the Sherman Act makes illegal "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce[.]" *15 U.S.C. § 1*. To state a *Section 1* claim, a plaintiff must allege (1) an agreement (2) to restrain trade unreasonably. *Lifewatch Servs. Inc. v. Highmark Inc., 902 F.3d 323, 331 (3d Cir. 2018)*. In turn, *Section 4* of the Clayton Act provides a private right of action for plaintiffs seeking to allege an antitrust violation. *See, e.g., Warren Gen. Hosp. v. Amgen Inc., 643 F.3d 77, 81 (3d Cir. 2011)* ("*Section 4* of the Clayton Act . . . provides a private right of action for 'any person who shall be injured . . . by reason of anything forbidden in the antitrust laws." (cleaned up)); **[**55]** *Gorrio v. Corr. Officer Francis, Civil Action No. 2:19-1297, 2021 U.S. Dist. LEXIS 87570, 2021 WL 3023736, at *17 (W.D. Pa. May 7, 2021)* ("The Clayton Act provides a private right of action for violations of the Sherman Act."); *World Wrestling Ent., Inc. v. Jakks Pac., Inc., 425 F. Supp. 2d 484, 518 (S.D.N.Y. 2006)* ("[A] plaintiff alleging injury from an antitrust violation may seek damages only under *§ 4* of the Clayton Act, which authorizes private lawsuits . . .").

Defendants argue that Plaintiff's antitrust claims must be dismissed because (1) the complaint fails to establish an unreasonable restraint of trade, (2) the complaint fails to plausibly allege the existence of an agreement between Ridgewood and CGP, and (3) the complaint fails to allege an antitrust injury. (*See* Doc. No. 13-2 at pp. 14-23.) Because the Court finds that NPT fails to establish an unreasonable restraint of trade, we do not address the other two arguments.

i. Plaintiff Fails to Plead that Defendants Unreasonably Restrained Trade

HN7[] The Supreme Court "has repeated time and again that *§ 1* outlaws only unreasonable restraints." *Leegin Creative Leather Prods., Inc. v. PSKS, Inc., 551 U.S. 877, 885, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007)*. "An 'unreasonable' restraint is one that inhibits competition in the relevant market." *Lifewatch Servs. Inc., 902 F.3d at 335* (citation omitted).

HN8[] There are two tests for determining whether a practice restrains trade in violation of *Section 1* of the Sherman Act: the rule of reason and the *per se* rule. *See, e.g., Leegin, 551 U.S. at 885-86*. **[*695]** Typically, courts determine whether a restraint **[**56]** violates *Section 1* of the Sherman Act by applying the rule of reason. *See* *Nat'l Collegiate Athletic Ass'n v. Alston, 141 S. Ct. 2141, 2151 (2021)* ("*NCAA*") ("Determining whether a restraint is undue for purposes of the Sherman Act 'presumptively' calls for what we have described as a 'rule of reason analysis.'"); *see also* *id. at 2155* ("Most restraints challenged under the Sherman Act—including most joint venture restrictions—are subject to the rule of reason, which (again) we have described as a fact-specific assessment of market power and market structure aimed at assessing the challenged restraint's actual effect on competition." (cleaned up)).

HN9[] Under the rule of reason, "the factfinder weighs all of the circumstances of a case in deciding whether a restrictive practice should be prohibited as imposing an unreasonable restraint on competition." *Leegin, 551 U.S. at 885-86* (cleaned up). Courts consider "specific information about the relevant business," "the restraint's history, nature, and effect," and "[w]hether the businesses involved have market power." *Id.* (cleaned up)); *see also* [NCAA, 141 S. Ct. at 2151, 2155](); [Eichorn v. AT & T Corp., 248 F.3d 131, 144-45 (3d Cir. 2001)](). "In applying this test, we examine the competitive significance of the alleged restraint to determine whether it has an anti-competitive effect on the market and is an unreasonable restraint on trade." [Eichorn, 248 F.3d at 145](). As the Supreme **[**57]** Court has explained, the rule of reason "distinguishes between restraints with anticompetitive effect that are harmful to the consumer and restraints stimulating competition that are in the consumer's best interest." [Leegin, 551 U.S. at 886]().

HN10[] Some types of restraints, however, "are deemed unlawful *per se*." *Id.* (cleaned up). The *per se* rule "treat[s] categories of restraints as necessarily illegal." *Id.* As a result, if the *per se* rule applies, the court need not "study the reasonableness of an individual restraint in light of the real market forces at work." *Id.* In other words, the court conducts a truncated analysis if the restraint is *per se* illegal.

Because of this, ***HN11***[] "the per se rules of illegality are the exception to antitrust analysis and are only employed in certain recognized categories." [Eichorn, 248 F.3d at 144](). The Supreme Court has cautioned that "[r]esort to *per se* rules is confined to restraints that would always or almost always tend to restrict competition and decrease output," such as "horizontal agreements among competitors to fix prices or to divide markets." [Leegin, 551 U.S. at 886](). At bottom, "a *per se* rule is appropriate only after courts have had considerable experience with the type of restraint at issue, and only if courts can predict **[**58]** with confidence that the restraint would be invalidated in all or almost all instances under the rule of reason." [Id. at 886-87](). To that end, the Supreme Court has "expressed reluctance to adopt per se rules with regard to restraints imposed in the context of business relationships where the economic impact of certain practices is not immediately obvious." [Id. at 887]() (cleaned up). The Supreme Court has also instructed that "departure from the rule-of-reason standard must be based upon demonstrable economic effect rather than . . . upon formalistic line drawing." *Id.*

Here, NPT argues that the *per se* rule applies, and the Court need not conduct a rule of reason analysis. (Doc. No. 17 at p. 20.) In contrast, Defendants maintain that the rule of reason applies. (Doc. No. 13-2 **[*696]** at pp. 20-23; Doc. No. 21 at p. 6.) For the reasons discussed below, the Court finds that the rule of reason applies, and that Plaintiff fails to establish an unreasonable restraint of trade under the rule of reason.

a. Per Se Analysis

NPT alleges that Defendants engaged in bid-rigging,[10] a *per se* violation. (Doc. No. 17 at pp. 20-28; Doc. No. 22 at pp. 3-4.) *See* [SmithKline Beecham Corp. v. E. Applicators, Inc., No. CIV.A. 99-CV-6552, 2002 U.S. Dist. LEXIS 10061, 2002 WL 1197763, at *2 (E.D. Pa. May 24, 2002)]() ("Bid-rigging . . . falls within the ambit of a *per se* violation."). NPT claims **[**59]** that CGP and Ridgewood were competitors since they were both interested in purchasing either Philmont Club or the Property and that they agreed not to compete when Nanula asked Ridgewood to "stand back, profess some concerns about the real estate risks, and just wait to see if I can strike a

---

[10] During oral argument, Plaintiff's counsel—for the very first time—attempted to distinguish between the two antitrust claims, arguing that they were premised on different *per se* violations. Specifically, counsel contended that the antitrust claim NPT brought as PCC's assignee was based on bid-rigging, while the antitrust claim NPT brought directly was based on illegal boycotting. (*See, e.g.*, Hr'g Tr. at 43:2-20, 57:7-22.) Any mention of illegal boycotting is conspicuously absent from the voluminous briefing done on this motion. (*See* Doc. Nos. 17 & 22.) As a result, the Court finds that Plaintiff waived its illegal boycotting argument. *See* [Tomasko v. Iran H. Weinstock, P.C., 357 F. App'x 472, 479 (3d Cir. 2009)]() (finding that "the specific objections that Weinstock raised for the first time at oral argument in the District Court have been waived"); [In re Corio, 371 F. App'x 352, 355 (3d Cir. 2010)]() (finding that the bankruptcy court did not abuse its discretion when it refused to consider an argument raised for the first time during oral argument); [Doherty v. Allstate Indem. Co., Civ. A. No. 15-05165, 2017 U.S. Dist. LEXIS 52795, 2017 WL 1283942, at *23 (E.D. Pa. Apr. 6, 2017)]() ("[B]ecause this argument was asserted for the first time in Doherty's reply and at oral argument, it is waived."); [McCowan v. City of Philadelphia, Civil Action No. 2:19-cv-03326-KSM, 2020 U.S. Dist. LEXIS 205909, 2020 WL 6485097, at *3 n.5 (E.D. Pa. Nov. 4, 2020)]() ("During oral argument, Defendants for the first time referred to the subpoena as a 'deep sea fishing' expedition . . . The Court does not consider Defendants' relevancy argument, which was raised for the first time at oral argument[.]").

better deal for all of us here" and Ridgewood agreed to "continue to stand on the sidelines and let [CGP] do [its] thing" and, therefore, they engaged in bid-rigging. (*See* Doc. No. 17 at pp. 22-24.)

To support its contention, NPT cites to *United States v. Portsmouth Paving Co.*, a Fourth Circuit decision that is non-binding on the Court, for the proposition that "[a]ny agreement between competitors pursuant to which contract offers are to be submitted to *or withheld* from a third party constitutes bid rigging per se violative of *15 U.S.C. section 1*." (*Id.* at p. 20 (citing *Portsmouth, 694 F.2d 312 (4th Cir. 1982)*).) However, NPT omits the footnote that immediately follows, which explains that "collusive bidding is an agreement between competitors *in a bidding contest* to submit identical bids or, by preselecting the lowest bidder, to abstain from all bona fide effort to obtain the contract." *Portsmouth, 694 F.3d at 325 n.18* (cleaned up) **[**60]** (emphasis added). Here, the complaint is devoid of any allegations that PCC had a bidding contest or auction for the sale of Philmont Club or the Property.[11]

The death knell for Plaintiff's argument that Defendants engaged in bid-rigging is its failure to cite to any analogous case law. *Accord* *Eichorn, 248 F.3d at 143* ("Acknowledging **[*697]** this judicial hesitance to extend the *per se* rule to new categories of antitrust claims, *we note there are no Supreme Court cases nor any federal cases that have applied the per se rule in similar factual circumstances*." (emphasis added)). Indeed, as Defendants aptly point out (Doc. No. 21 at pp. 5-6), NPT fails to cite to a single case where a court held that the defendants engaged in bid-rigging either (a) in absence of a competitive bidding process or (b) in connection with a one-time private sale of real estate (*see* Doc. No. 17 at pp. 20-21). As such, Plaintiff's cases are inapposite. *See* *United States v. Sargent Elec. Co., 785 F.2d 1123, 1124-25 (3d Cir. 1986)* (indictment charged electrical contractors with conspiring to rig bids for electrical construction work over the course of seven years); *United States v. Koppers, Inc., 652 F.2d 290, 291 (3d Cir. 1981)* (involving "a conspiracy to rig bids and allocate territories in the sale of road tar to the State of Connecticut and its subdivisions," where the State **[**61]** "solicited bids on an annual basis for the sale and application of road tar")*Portsmouth, 694 F.2d at 316, 325 n.18* (involving construction and surface paving contracts in the Tidewater region where the "conspirators would trade projects among themselves by agreeing to withhold bids or to submit artificially high 'complementary' bids on certain projects"); *Branta, LLC v. Newfield Prod. Co., 310 F. Supp. 3d 1166, 1177 (D. Colo. 2018)* (auction for sale of oil and natural gas assets where the selling parties "controlled the auction's rules for bidding and the identities and number of competitors allowed to participate in the auction"); *United States v. Flom, 558 F.2d 1179, 1182 (5th Cir. 1977)* (officers of companies that sold reinforcing steel bars for use in construction projects "met on a regular basis" to "allocate[] the business on upcoming construction contracts among their respective companies" and agreed that the "losing bidders" would submit "a complimentary bid, or no bid at all"); *United States v. Seville Indus. Mach. Corp., 696 F. Supp. 986 (D.N.J. 1988)* (involving bankruptcy auctions); *United States v. W.F. Brinkley & Son, 783 F.2d 1157, 1158 (4th Cir. 1986)* ("concern[ing] the 1979 bidding process for a portion of the Pasquotank River Supply Project," where "[t]he overall project was divided into several subprojects, each of which was to be awarded through a competitive bidding process"); *Williams v. Estates LLC, 1:19-CV-1076, 2020 U.S. Dist. LEXIS 30932, 2020 WL 887997, at *9 (M.D.N.C. Feb. 24, 2020)* (involving multiple foreclosure sales).

Because NPT fails to allege that Defendants engaged in behavior **[**62]** that was *per se* illegal, the Court now considers whether Defendants' conduct constituted an unreasonable restraint of trade under the rule of reason.

b. Rule of Reason Analysis

HN12[] "In order to state a Sherman Act claim under *§ 1* . . . a plaintiff must identify the relevant product and geographic markets and allege that the defendant exercises market power within those markets." *Queen City Pizza, Inc v. Domino's Pizza, Inc., 124 F.3d 430, 435 (3d Cir. 1997)*; *see also* *Lifewatch Servs. Inc., 902 F.3d at 337* ("A plaintiff bears the burden of defining both a relevant geographic and a relevant product market."). Defendants argue that under the rule of reason, the antitrust claims must fail because (1) NPT fails to define a relevant product

---

[11] In its sur-reply, NPT argues that it is "illogical" to focus this narrowly on semantics. (*See* Doc. No. 22 at pp. 3-4.) But NPT fails to cite to any case law to support its argument that Defendants were engaged in a bidding contest given the facts at play here or that an "offer" versus a "bid" is a distinction without a difference.

market; (2) NPT fails to define a relevant geographic market; and (3) NPT fails to allege market power or anticompetitive effects. (Doc. No. 13-2 at pp. 20-23.)

HN13[] NPT bears the burden of defining the relevant product market. *See Queen City Pizza, Inc., 124 F.3d at 436*; *Lifewatch Servs. Inc., 902 F.3d at 337*. To **[*698]** determine whether the relevant market was adequately defined, the Court must first consider "the extent to which [the] product is interchangeable with alternative products within the field." *Mylan Pharma. Inc. v. Warner Chilcott Pub. Ltd. Co., 838 F.3d 421, 436 (3d Cir. 2016)*. "The term interchangeability implies that one product is roughly equivalent to another for the use to which it is put. It also means that while there might **[**63]** be some degree of preference for one product over the other, either would work efficiently." *Id.* (cleaned up). In addition, courts must consider the "cross-elasticity of demand, which is defined as a relationship between two products, usually substitutes for each other, in which a price change for one product affects the price of the other." *Lifewatch Servs. Inc., 902 F.3d at 337* (cleaned up); *see also Queen City Pizza, Inc., 124 F.3d at 437-38* ("[P]roducts in a relevant market are characterized by a cross-elasticity of demand, in other words, the rise in the price of a good within a relevant product market would tend to create a greater demand for other like goods in that market" (cleaned up)). Ultimately, "[t]he outer boundaries of the market are determined by the reasonable interchangeability of use or the crosselasticity of demand between the product itself and substitutes for it." *Queen City Pizza, Inc., 123 F.3d at 436*.

HN14[] "The Third Circuit has instructed that although in most cases, proper market definition can be determined only after a factual inquiry into the commercial realities faced by consumers, there is no prohibition against dismissal of antitrust claims for failure to plead a relevant market." *Fresh Made, Inc. v. Lifeway Foods, No. Civ.A. 01-4254, 2002 U.S. Dist. LEXIS 15098, 2002 WL 31246922, at *5 (E.D. Pa. Aug. 9, 2002)* (cleaned up); *see also Queen City Pizza, Inc., 124 F.3d at 436*. Accordingly, courts may find that a relevant market is legally insufficient **[**64]** and grant a motion to dismiss "[w]here the plaintiff fails to define its proposed relevant market with reference to the rule of reasonable interchangeability and cross-elasticity of demand, or alleges a proposed relevant market that clearly does not encompass all interchangeable substitute products even when all factual inferences are granted in plaintiff's favor." *Queen City Pizza, Inc., 124 F.3d at 436-37* (collecting cases); *see also Lifewatch Servs. Inc., 902 F.3d at 337* ("A complaint may be properly dismissed if it defines the relevant market without reference to interchangeability or crosselasticity of demand or if it alleges a proposed relevant market that clearly does not encompass all interchangeable substitute products even when all factual inferences are granted in plaintiff's favor." (cleaned up)); *Bldg. Materials Corp. of Am. v. Rotter, 535 F. Supp. 2d 518, 524 (E.D. Pa. 2008)* ("If a complaint fails to allege facts regarding substitute products, to distinguish among apparently comparable products, or to allege other pertinent facts relating to cross-elasticity of demand, . . . a court may grant a *Rule 12(b)(6)* motion." (cleaned up)).

Fresh Made, Inc v. Lifeway Foods, Inc. is instructive. The plaintiff in that case manufactured, distributed, and sold certain "specialty dairy products, such as kefir, a fermented yogurt-style drink," and asserted **[**65]** that the relevant product market was "specialty Russian dairy foods, including kefir." *2002 U.S. Dist. LEXIS 15098, 2002 WL 31246922, at *5*. The court held that the plaintiff failed to plead a relevant product market because it did not reference the rule of reasonable interchangeability and cross elasticity of demand in its amended complaint; accordingly, it granted the defendant's motion to dismiss. *2002 U.S. Dist. LEXIS 15098, [WL] at *5-6* ("Fresh Made does not allege facts establishing that the market for specialty Russian dairy products, such as kefir, is distinct from the market for yogurt, other drinkable yogurt products, **[*699]** or from other dairy products in general. The amended complaint contains no allegations relating to the price of and/or demand for kefir and other specialty Russian dairy products relative to products in the larger dairy market as a whole. Fresh Made simply fails to allege whether there are reasonably interchangeable alternatives for its products."); *see also Bldg. Materials Corp. of Am., 535 F. Supp. 2d at 525* (granting motion to dismiss where the plaintiff defined the relevant product market as "asphalt shingle roof ridge vents" but failed to "explain why asphalt shingle roof ridge vents are distinct from the market for shingle roof ridge vents, roof ridge vents in general or any other roofing products," **[**66]** made "no reference to the price and/or demand for asphalt shingle roof ridge vents relate to the roofing products industry as a whole," and failed to "reference to the rule of reasonable interchangeability and the cross-elasticity of demand"); *Queen City Pizza, Inc., 124 F.3d at 432-33, 437-38* (holding that "ingredients, supplies, materials and distribution services used by and in the operation of Domino's pizza stores" did not constitute a relevant product market because "the dough, tomato sauce, and paper cups that meet Domino's Pizza, Inc. standards and are used by Domino's stores are interchangeable with dough, sauce and cups available from other suppliers and used by other pizza companies" and affirming the district court's dismissal of the complaint).

Here, the Court concludes that NPT failed to define a relevant product market. Noticeably absent from the complaint (or NPT's response brief or sur-reply) is any reference to the rule of reasonable interchangeability or the cross-elasticity of demand. (*See generally* Doc. Nos. 1, 17 & 22.) From the face of the complaint, it is unclear whether the relevant market is, for instance, country clubs, golf courses, or development properties, or how those are distinct from one another.

During **[**67]** oral argument, NPT argued that the relevant market was "a market of one." (Hr'g Tr. at 54:8-55:17.) However, this Court is unpersuaded by NPT's contention that Philmont Club alone constitutes a relevant product market under the rule of reason. ***HN15***[] To the contrary, courts routinely hold that a product market is insufficient if it is comprised of a single brand or a single entity. *See, e.g.*, *Satnam Distribs. LLC v. Commonwealth-Altadis, Inc., 140 F. Supp. 3d 405, 419 (E.D. Pa. 2015)* (noting that "[c]ourts routinely reject Sherman Act claims at the motion to dismiss stage where such claims involve single-brand or single-manufacturer products" and collecting cases); *Molinari v. Consol Energy Inc., No. 12cv1085, 2012 U.S. Dist. LEXIS 168171, 2012 WL 5932979, at *6 (W.D. Pa. Nov. 27, 2012)* (stating that "[c]ourts have frequently granted Motions to Dismiss in which the relevant market has been limited to a single entity" and collecting cases); *see also* *2012 U.S. Dist. LEXIS 168171, [WL] at *5* ("Cases in which dismissal on the pleadings is appropriate frequently involve . . . failed attempts to limit a product market to a single brand, franchise, institution, or comparable entity that competes with potential substitutes." (cleaned up)).

For example, in *Right Field Rooftops, LLC v. Chicago Baseball Holdings, LLC*, the plaintiffs proposed a relevant product market of "live Cubs games," and the court held that the proposed market could not "stand because **[**68]** it comprise[d] a single brand product." *87 F. Supp. 3d 874, 886-87 (N.D. Ill. 2015)*. The court found that it was not plausible that there were "no interchangeable substitutes for live Cubs games," given that "the Cubs necessarily compete with other Major League Baseball teams, sporting events, and other live entertainment for revenue." *Id.* ("While the Court accepts that there are some die-hard **[*700]** Cubs fans that would never attend a White Sox game, that does not mean that Cubs games constitute their own market . . . [A]rguments of consumer preferences . . . fall short of rendering it plausible that there are no interchangeable substitutes for live Cubs games."); *see also* *Satnam Distribs. LLC, 140 F. Supp. 3d at 419* (concluding that the plaintiff "failed to carry its burden of alleging a plausible product market," where the proposed market was "the market for distribution of a single manufacturer's brands"); *Molinari, 2012 U.S. Dist. LEXIS 168171, 2012 WL 5932979, at *6* ("Plaintiff's Amended Complaint is void of any factual allegation that Consol is so unique as an employer . . . to constitute its own market."); *Tanaka v. Univ. of S. Cal., 252 F.3d 1059, 1063-64 (9th Cir. 2001)* (holding that the plaintiff "failed to identify an appropriately defined product market" where the proposed market was "UCLA women's soccer program" and reasoning that "[the plaintiff's] limitation of the relevant product market **[**69]** to a single athletic program is especially unavailing insofar as the very existence of any given intercollegiate athletic program is predicated upon the existence of a field of competition composed of other, similar programs").

The same logic applies with equal force here. When NPT identified "Philmont Club" as the relevant product market during oral argument, it failed to explain how Philmont Club is unique and why it is not interchangeable with any other country club. A close review of NPT's complaint also illustrates the lack of any allegation that Philmont Club is so unique as to constitute its own market.

NPT's reliance on *Eastman Kodak Co. v. Image Technical Servs., Inc., 504 U.S. 451, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)* fails to move the needle. (*See* Hr'g Tr. at 54:22-25 ("We have an *Eastman Kodak* case which talks about [sic] a relevant market can be limited to one single brand.").) In *Queen City Pizza, Inc. v. Domino's Pizza, Inc.*, the Third Circuit outlined the limited circumstances in which *Kodak* applies. *124 F.3d at 439*; *see also* *Satnam Distribs. LLC, 140 F. Supp. 3d at 419* (explaining that courts permit claims that involve single-brand or single-manufacturer product markets "[o]nly in rare, fact-specific circumstances" such as "where customers were locked into purchasing a manufacturer's tying products, often aftermarket parts **[**70]** and services" as in *Kodak*). *Kodak* "held that the market for repair parts and services for Kodak photo-copiers was a relevant market because repair parts and services for Kodak machines are not interchangeable with the service and parts used to fix other copiers." Queen City Pizza, Inc., 124 F.3d at 439 (citation omitted).

In *Queen City Pizza*, the plaintiffs, Domino's franchisees, argued that Domino's violated the Sherman Act by requiring its franchisees to purchase its ingredients, supplies, and materials either directly from it or from an approved list of suppliers. *Id. at 433*. The plaintiffs proposed a relevant product market of "ingredients, supplies, materials and distribution services used by and in the operation of Domino's pizza stores" and argued that *Kodak* "support[ed] its proposed relevant market because it indicates that in some circumstances, a single brand of a product or service may constitute a relevant market." *Id. at 439*. The Third Circuit explained that the plaintiffs' interpretation of *Kodak* was too far-reaching and that, under *Kodak*, a single brand product may constitute a relevant market only "where the commodity is unique, and therefore not interchangeable with other products." *Id.* The Third Circuit found *Kodak* inapplicable **[**71]** to the case before it because "contractual restraints aside, the sauce, dough, and other products and ingredients approved for use **[*701]** by Domino's franchisees are interchangeable with other items available on the market." *Id.*

As in *Queen City Pizza*, this Court finds that *Kodak* is distinguishable because NPT has given no indication Philmont Club is "unique" and "therefore not interchangeable with other products" or entities. As noted above, NPT has given us no reason to conclude that Philmont Club is not interchangeable with other country clubs.

Because NPT fails to adequately plead a relevant product market, the Court does not address the other factors in the rule of reason test—namely, whether NPT defined a relevant geographic market or alleged market power or anticompetitive effects. *See, e.g.*, Bldg. Materials Corp. of Am., 535 F. Supp. 2d at 525 ("There is no need to examine the other factors in the rule of reason test because Rotter's counterclaim fails to state a relevant product market for antitrust purposes.").

Given NPT's failure to establish an unreasonable restraint of trade under either the *per se* rule or the rule of reason, the Court finds that NPT fails to state a claim under Section 1 of the Sherman Act and dismisses Counts I and II.

[72]** Having decided that the federal claims are subject to dismissal, we now turn to the state law claims—fraud, fraudulent concealment, aiding and abetting fraud, civil conspiracy, and breach of contract.[12]

C. Fraud and Fraudulent Concealment Claims

As assignee, NPT asserts fraud claims against Ridgewood, Grebow, and Plotnick (Count III) and CGP and Peter Nanula (Count V), which it bases on both alleged affirmative misrepresentations and omissions. NPT also brings a fraudulent concealment claim against CGP, Nanula, Ridgewood, Grebow, and Plotnick (Count VII) as PCC's assignee.

HN16[] Under Pennsylvania law, to state a *prima facie* case of fraud, a plaintiff must plead that the defendant made (1) a false representation, (2) with knowledge of its falsity or recklessness as to whether it is true or false, (3) which was intended to make the plaintiff act, (5) that the plaintiff justifiably relied on the misrepresentation, and (6) that the plaintiff suffered damages as a proximate result of its reliance. *Bucci v. Wachovia Bank, N.A., 591 F. Supp. 2d 773, 782 (E.D. Pa. 2008)*. A fraud claim based on an omission has the same elements as fraud, "except that an omission is actionable as fraud only where there is an independent duty to disclose the omitted **[**73]** information." *Id. at 783* (cleaned up). Fraudulent concealment has similar elements as fraud in the omission and likewise requires a plaintiff to show that the party that fraudulently concealed the information had a duty to speak. *See* *Marcum v. Columbia Gas Transmission, LLC, 423 F. Supp. 3d 115, 121 (E.D. Pa. 2019)* ("Plaintiffs must show: (1) [Defendant

[12] In their reply brief and during oral argument, Defendants argued that the Court should dismiss the state law claims for lack of supplemental jurisdiction. (*See* Doc. No. 21 at pp. 11-12; Hr'g Tr. at 15:4-7.) Defendants are wrong. NPT has pled facts showing that the Court can properly exercise *diversity* jurisdiction over this case. (*See, e.g.*, Doc. No. 1 at ¶¶ 2, 4-27; *accord* Hr'g Tr. at 82:19-83:1.)

caused] an omission; (2) the omission was material to the transaction at hand; (3) the omission was made falsely, with knowledge of its falsity or recklessness as to whether it is true or false; (4) the omission was made with the intent of misleading another into relying on it; (5) the plaintiff justifiably relied on the omission; and (6) the resulting injury was proximately caused by the reliance. In addition to those six elements, Plaintiffs must show a special **[*702]** relationship that would give rise to a duty to speak between them and the party that fraudulently concealed the information." (cleaned up)).

Defendants contend that the fraud and fraudulent concealment claims must be dismissed because (1) NPT fails to allege fraud with particularity; (2) the PSA was fully integrated and thus NPT cannot assert fraud claims against the Concert Defendants; (3) Defendants did not have a duty to speak; (4) some of the alleged misrepresentations **[**74]** are based on future promises and therefore are unactionable; and (5) NPT has failed to plead justifiable reliance. (Doc. No. 13-2 at pp. 24-32.) The Court addresses each argument below.

i. NPT Alleges Fraud with Particularity

HN17[] Under *Federal Rule of Civil Procedure 9(b)*, a party alleging fraud or mistake "must state with particularity the circumstances constituting fraud or mistake. Malice, intent, knowledge, and other conditions of a person's mind may be alleged generally." *Fed. R. Civ. P. 9(b)*; *see also* *Frederico v. Home Depot, 507 F.3d 188, 200 (3d Cir. 2007)* ("Pursuant to *Rule 9(b)*, a plaintiff alleging fraud must state the circumstances of the alleged fraud with sufficient particularity to place the defendant on notice of the precise misconduct with which [it is] charged."). The Third Circuit has explained that to comply with *Rule 9(b)*, a plaintiff "must plead or allege the date, time and place of the alleged fraud or otherwise inject precision or some measure of substantiation into a fraud allegation." *Id.*

Plaintiff has undoubtedly satisfied this standard here. With respect to false representations, NPT alleges that:

- In the fall of 2016, "Ridgewood told [PCC] that it was no longer interested in purchasing the Property as the ability to obtain approvals for 162 Units was speculative and the risks associated with **[**75]** the development of the Property were too high" (Doc. No. 1 at ¶ 92);

- On November 1, 2016, CGP and Nanula promised to make $5 million in capital improvements once the Property was sold (*id.* at ¶ 96);

- On November 1 and November 17, CGP and Nanula represented that they would retain at least 27 holes of golf at Philmont Club after the South Course was sold (*id.* at ¶¶ 97, 104);

- On November 2, CGP and Nanula represented to PCC that the sale of the Property may never occur and the terms of the proposal balanced out that risk (*Id.* at ¶ 102).

And as to the alleged omissions, NPT pled that:

- Beginning in October 2016, Ridgewood, CGP, Nanula, Plotnick, and Grebow worked closely together to acquire Philmont Club and develop the Property, yet never told PCC that they were teaming up (*see, e.g., id.* at ¶¶ 167-68); and

- By January 20, 2017, Ridgewood had met with the Township, the Township manager "didn't flinch at 160 units," and over the next month Ridgewood and CGP discussed the Township's positive "body language"—all while failing to tell PCC about this progress towards getting development approvals (*see, e.g., id.* at ¶¶ 159, 162-63, 167).

In sum, the complaint provides the who, what, where, **[**76]** and when of the alleged fraud and clearly puts Defendants on notice of the cause of action against them, which is all that *Rule 9(b)* requires. *See, e.g.,* *Kunkle v. Cmty. Health Sys. Prof'l Servs. Corp., CIV. No. 09-0208, 2009 U.S. Dist. LEXIS 149816, 2009 WL 10737883, at *1 (E.D. Pa. Apr. 22, 2009)* ("Although **[*703]** Plaintiff does not include quotes or exact dates, he does provide names, a general time-frame, and the substance of the allegedly fraudulent statements. This is sufficient to provide [the defendant] the notice it needs to begin to prepare its defense."); *cf.* *Int'l Strategic Cancer Alliance, LLC v.*

*Stichting Katholieke Universiteit, Civil Action No. 17-2024, 2017 U.S. Dist. LEXIS 172163, 2017 WL 4681789, at *6 (E.D. Pa. Oct. 18, 2017)* ("[T]he Complaint does not provide details regarding any specific representation made by Defendant, in terms of content, location, time, or speaker.").

ii. The PSA Does Not Bar NPT from Asserting Fraud Claims Against CGP and Nanula

Defendants' next argument is more complex, but similarly flawed. NPT brings its fraud claims as PCC's assignee, and Defendants contend that because the PSA was fully integrated, the parol evidence rule[13] bars NPT from relying on representations the Concert Defendants made to PCC prior to executing the agreement. (Doc. No. 13-2 at pp. 27-28.) Because prior misrepresentations form the entire basis for Plaintiff's fraud claims (i.e., but for Concert Defendants' representations that obtaining development approval would be risky and a sale of the Property **[**77]** may never transpire, PCC would not have entered into the PSA), the parol evidence rule would, in effect, proscribe Plaintiff from asserting any of its fraud claims (except for those against Ridgewood Defendants, who were not party to the PSA).

In response, NPT asserts that only Concert Philmont and Concert Philmont Properties are bound by the PSA and accordingly the PSA is of no moment since the fraud claims are asserted against *CGP* and *Nanula—not Concert Philmont or Concert Philmont Properties*. (Doc. No. 17 at pp. 33-24.) Defendants counter that because Nanula signed the PSA in his capacity as an agent of Concert Philmont and Concert Philmont Properties, "[i]t would conflict with agency principles" if NPT were allowed to bring the fraud claims against him and CGP (the agents) and not the principals. (Hr'g Tr. at 17:4-20; *see also* Doc. No. 21 at pp. 3-4 ("While they are not signatories to the PSA, both Nanula and Concert Golf were acting on behalf of Concert Philmont Defendants, the special purpose entities formed to acquire the Philmont Club, in negotiating the PSA. Agents of disclosed principals acting within the course and scope of their agency have no independent **[**78]** liability to those with whom they negotiate on behalf of their principal." (citations omitted)).)

Defendants are mistaken. In *Interwave Technologies, Inc. v. Rockwell Automatic, Inc.*, the court rejected a similar argument. *No. Civ.A. 05-398, 2005 U.S. Dist. LEXIS 37980, 2005 WL 3605272, at *14-19 (E.D. Pa. Dec. 30, 2005)*. That case involved a commercial dispute, where Interwave and its assignee sued defendants Rockwell Automatic, Inc. and Richard Ryan for breach of contract and fraudulent inducement. *2005 U.S. Dist. LEXIS 37980, [WL] at *1*. Rockwell had purchased nearly all of Interwave's assets **[*704]** pursuant to an Asset Purchase Agreement (the "APA"), and Ryan had acted as Rockwell's agent during the transaction but was not a party to the agreement himself. *See* *2005 U.S. Dist. LEXIS 37980, [WL] at *2* (explaining that Ryan "was Rockwell's chief negotiator and conduit of information between Rockwell and Interwave regarding the transaction between the parties that is the focal point of the litigation"); *2005 U.S. Dist. LEXIS 37980, [WL] at *19* (noting that Ryan was not a party to the APA). The plaintiffs alleged that Ryan and Rockwell fraudulently induced Interwave to enter into the APA, and the defendants moved to dismiss, arguing that the parol evidence rule and integration clause barred that claim. The APA's integration clause stated:

> This Agreement and the Confidentiality Agreement **[**79]** collectively constitute the entire agreement between the parties with respect to the subject matter hereof and thereof and this Agreement and the Confidentiality Agreement supersede all prior negotiations, agreements and understandings of any nature, whether oral or written, relating thereto.

---

[13] ***HN18***[] Under Pennsylvania law, "[t]he parol evidence rule forbids admitting evidence of prior representations to fully integrated written agreements, even for claims of fraudulent inducement." *Berardine v. Weiner, 198 F. Supp. 3d 439, 444 (E.D. Pa. 2016)*. "Fraud in the inducement does not involve terms omitted from an agreement, but rather allegations of oral representations on which the other party relied in entering into the agreement but which are contrary to the express terms of the agreement." *Id.* Here, the complaint alleges that the CGP and Nanula committed fraud in the inducement by, *inter alia*, falsely representing that obtaining development approvals would be risky and that it would maintain 27 holes of golf—statements PCC then relied on in agreeing to enter into the PSA. (*See generally* Doc. No. 1.)

*2005 U.S. Dist. LEXIS 37980, [WL] at *15*.

Because the APA was fully integrated and Rockwell was a party to the APA, the court dismissed the fraudulent inducement claim against it. *2005 U.S. Dist. LEXIS 37980, [WL] at *19* ("Fully integrated contracts preclude fraudulent inducement claims. It is no different here. Therefore, Interwave's and Kall's claim of fraudulent inducement against Rockwell as a party to the APA will be dismissed."). However, the court allowed the fraudulent inducement claim against Ryan to proceed *because he was not a party to the APA. Id.* In its analysis, the court distinguished from two other cases that found that the integration clauses also applied to agents, observing that in those cases "the integration clauses, unlike here, specifically referred to the representations of the agents as barred." *Id.* (cleaned up); *see also* *Sunquest Info. Sys., Inc. v. Dean Witter Reynolds, Inc., 40 F. Supp. 2d 644, 656 & n.7 (W.D. Pa. 1999)* (holding that the integration clause barred the plaintiff's fraud in the inducement claims against Compucare but did not bar those **[**80]** claims against Compucare's agent, who was not a party to the agreement).

We are persuaded by the rationale in *Interwave*. Here, the integration clause in the PSA provides:

> This Agreement and the exhibits attached hereto represent the entire understanding of the agreement between the Parties with respect to the subject matter hereof, and supersedes the Letter of Intent, all other negotiations, understandings and representations, if any, made between such Parties.

(Doc. No. 13-9 at p. 47, § 17.1.) This integration clause is nearly identical to the one in *Interwave*. Accordingly, if Plaintiff had asserted fraud in the inducement claims against Concert Philmont and Concert Philmont properties—who were parties to the PSA—then those claims would be dismissed. However, Plaintiff did not; rather, Plaintiff sued CGP and Nanula, who Defendants admit were not parties to the PSA. (*See* Doc. No. 21 at pp. 3-4; *see also* Doc. No. 13-9 at p. 56 (indicating that Nanula signed the PSA as agent of Concert Philmont and Concert Philmont Properties, not in his own capacity).) Because CGP and Nanula were not parties to the PSA, the integration clause does not apply to them and NPT's fraud claims against them survive **[**81]** the motion to dismiss.

iii. Defendants Did Not Have a Duty to Speak

NPT claims that CGP, Nanula, Ridgewood, Grebow, and Plotnick fraudulently failed "to inform [PCC] that they were working together towards purchasing Philmont Club and developing the Property" **[*705]** and "to inform [PCC] that Defendants were in active discussions with the Township about developing the Property and had confirmed that they would be able to finalize [the] development plans to not only develop the Property but to achieve a Unit yield in excess of 162." (Doc. No. 17 at p. 31.) Defendants argue that the fraud in the omission and fraudulent concealment claims must be dismissed because the Defendants had no duty to speak. (*See* Doc. No. 13-2 at pp. 28-30.)

HN19[] As noted above, fraud in the omission and fraudulent concealment claims can only lie where there is a duty to disclose the omitted information. *See* *Bucci, 591 F. Supp. 2d at 783* (cleaned up); *Marcum, 423 F. Supp. 3d at 121*; *Duquesne Light Co. v. Westinghouse Elec. Corp., 66 F.3d 604, 612 (3d Cir. 1995)*. Under Pennsylvania law, the duty to speak "exists only in limited circumstances," such as (1) "when there is a fiduciary, or confidential, relationship between the parties"; (2) where one party is the only source of information to the other party or the problems are not discoverable by other reasonable **[**82]** means; (3) "when disclosure is necessary to prevent an ambiguous or partial statement from being misleading"; (4) "where subsequently acquired knowledge makes a previous representation false"; or (5) "where the undisclosed fact is basic to the transaction." *Bucci, 591 F. Supp. 2d at 783*; *Duquesne Light Co., 66 F.3d at 611*; *see also* *Marcum, 423 F. Supp. 3d at 122* (explaining that the "duty to speak often arises in the home purchase setting where one party has unique knowledge"; for example "a seller who knows of a termite infestation has a duty to tell an unwitting buyer about it," and "when one party has a special vulnerability," such as neighbors who convinced an elderly and infirm 86-year-old neighbor to sell her house).

Here, NPT argues that Defendants had a duty to speak because the omissions were "basic to the transaction" (i.e., PCC would not have entered into the PSA had it known that the development approvals were forthcoming and/or that Ridgewood and CGP were working together) and that subsequently acquired knowledge rendered previous representations Defendants made to PCC false (i.e., after discussing development approvals with the Township, Defendants had confirmed they would be able to develop the Property). (*See* Doc. No. 17 at pp. 31-33.) We disagree.

HN20[] Where, as **[**83]** here, "both the plaintiff and defendant were sophisticated business entities, entrusted with equal knowledge of the facts," the duty to speak does not arise. *Bucci, 591 F. Supp. 2d at 783* (quoting *Duquesne Light Co., 66 F.3d at 612*); *see also* *Duquesne Light Co., 66 F.3d at 612* ("[T]here is virtually no Pennsylvania case in which a defendant has been held to have a duty to speak when both the plaintiff and defendant were sophisticated business entities, entrusted with equal knowledge of facts."); *Paramount Fin. Communs., Inc. v. Broadridge Inv. Commun. Sols., Inc., Civil Action No. 15-405, 2015 U.S. Dist. LEXIS 87622, 2015 WL 4093932, at *5 (E.D. Pa. July 7, 2015)* ("The parties have not cited any Pennsylvania cases imposing a duty to speak on sophisticated business entities, absent a special or fiduciary relationship, and the Court has found none."); *accord* *Marcum, 423 F. Supp. 3d at 122* (explaining that a special relationship giving rise to the duty to speak "generally does not arise in a typical, arms-length business transaction unless one party surrenders substantial control over some portion of its affairs to the other," which is "often described as requiring 'overmastering influence' on one side or 'weakness, dependence, or trust, justifiably reposed' on the other side." (cleaned up)).

[*706] The face of the complaint shows that PCC and Defendants were both sophisticated parties,[14] engaging in an arms-length transaction. *See* *Marcum, 423 F. Supp. 3d at 122* (dismissing fraudulent concealment claim where "Plaintiffs **[**84]** appear to be in a standard, armslength business relationship" and the plaintiffs failed to identify a basis for a fiduciary duty existing between the parties); *see also* *Paramount Fin. Communs., Inc., 2015 U.S. Dist. LEXIS 87622, 2015 WL 4093932, at *5* (concluding that the defendant had no duty to speak and granting motion to dismiss where the parties "ha[d] not entered into a fiduciary or special relationship" and where the claims arose "out of arms-length transactions between sophisticated parties: namely, the agreement between Plan Management, Miller, and Broadridge to enter into the Marketing Agreement and between Miller and BOSI to enter into the Stock Purchasing Agreement"); *accord* *Morton's Rest. Grp., Inc. v. Charest, No. CIV. A. 97-7013, 1998 U.S. Dist. LEXIS 17294, 1998 WL 767444, at *5 (E.D. Pa. Nov. 4, 1998)* (granting motion for summary judgment and finding no "duty to speak and, therefore, no fraud" where "Morton and Corsica were both represented by counsel and engaged in arm's length negotiations").[15]

Plaintiff fails to plead that the rezoning information was not reasonably discoverable to PCC or that Defendants had sole, or unequal, access to the Township. *See* *Duquesne Light Co., 66 F.3d at 612* (distinguishing from cases where the omitted information was "not discoverable by other reasonable means" and the defendant was "the only reasonable source of the information," **[**85]** and explaining that "[n]one of these cases is applicable to the situation present here, where the two parties are sophisticated business entities, with equal and ample access to legal representation. Superior information and better business acumen are legitimate advantages, which lead to no liability").[16]

---

[14] The fact that PCC had amended its AOS with NPT eight times (and proposed a *ninth amendment*) underscores the fact that it is a sophisticated business entity.

[15] ***HN21***[] In *Morton's Restaurant Group, Inc. v. Charest*, the court stated that even if a confidential or fiduciary relationship did not exist, "there may still be a heightened responsibility based on the dealings of the parties." *1998 U.S. Dist. LEXIS 17294, 1998 WL 767444, at *5* ("Thus, one may justifiably rely on silence where there is no confidential relationship only if a specific relationship of trust has been developed with regard to a certain matter."). As in *Morton's*, NPT fails to allege that "a specific relationship of trust developed" between PCC and Defendants to give rise to a duty to speak.

[16] The sole case NPT relies on applies New York law and is inapposite. *See* *Zaccaro v. Shah, 746 F. Supp. 2d 508, 520, 522 (S.D.N.Y. 2010)* ("*Under New York law*, Shah, possessed a superior knowledge not readily available to Zaccaro as to the REIT's interest in purchasing AHA, had a duty to disclose that knowledge to Zaccaro to correct his mistaken belief that the REIT was not interested in purchasing AHA, particularly in view of Shah's prior statement that the REIT was not interest [sic] in purchasing the Hotel." (emphasis added)).

In addition, Plaintiff's allegation that Defendants "had confirmed that they would be able to finalize [the] development plans to not only develop the Property but to achieve a Unit yield in excess of 162 units"—one of the alleged omissions—is conclusory. None of the exhibits Plaintiff relies on in its complaint indicates that was the case. (*See* Doc. No. 1 at ¶¶ 159-63 (citing Exs. 27-29).) To the contrary, the emails show that, at most, CGP and Ridgewood believed that the Township was *enthusiastic* about the potential deal—not that Defendants had received *confirmation* that they would receive the zoning approvals. (*See* Doc. No. 1-4, Ex. 27 at p. 89 (noting that the meeting with the Township's manager "went well" and that the manager **[*707]** "[d]idn't flinch on the 160 units"); Doc. No. 1-5, Ex. 28 at p. 92 (noting that the Township "want[s] to get this deal done with us"); **[**86]** Doc. No. 1-6, Ex. 29 at pp. 95-96 (surmising that the Township was "not wasting any time here" and had "[g]ood body language").) Furthermore, documents from the Township indicate that the zoning approvals did not come to fruition until 2018—*a year after* PCC entered into the PSA with Concert Philmont and Concert Philmont Properties. (*See* Doc. No. 13-5 at pp. 1-9 (granting Concert Philmont's conditional use application on March 13, 2018 and amending the Township's zoning ordinance); *see also id.* at pp. 14-18 (letter dated September 13, 2018, in which the Township advised Grebow that the Township had approved the "Preliminary Land Development Plan . . . for an Active Adult Housing Development Consisting of 176 Units").) Accordingly, the evidence belies Plaintiff's assertion that Defendants subsequently acquired information from the Township on the zoning approvals that gave rise to a duty to speak.

Because Defendants did not have a duty to speak, the Court grants Defendants' motion to dismiss NPT's fraud in the omission and fraudulent concealment claims.

iv. NPT Can Establish Fraud in Connection with Future Promises

Turning back to affirmative misrepresentations, NPT alleges that CGP and **[**87]** Nanula committed fraud when they told PCC that they would retain 27 holes of golf and would spend $5 million in capital improvements. (*See* Doc. No. 1 at ¶¶ 258-59, 261-63 (Count V).) Defendants argue that Count V must be dismissed to the extent it is based on these representations, because they are promises to do something in the future and therefore are insufficient to establish a fraud claim. (Doc. No. 13-2 at pp. 30-31.)

Although Defendants correctly recite the general principle that "the breach of a promise to do something in the future is not actionable in fraud," *see* *Shoemaker v. Commonwealth Bank, 700 A.2d 1003, 1006 (Pa. Super. Ct. 1997)*, Defendants misstate the law when they argue that a future promise can *never* support a fraud claim (*see* Hr'g Tr. at 22:1-22). ***HN22***[] To the contrary, under Pennsylvania law, "an expressed intention to take a future action that does not actually comport with one's true state of mind at that time is a misrepresentation of existing fact and may serve as the basis for a fraud claim." *Giordano v. Claudio, 714 F. Supp. 2d 508, 518 (E.D. Pa. 2010)* (cleaned up); *see also* *Mellon Bank Corp. v. First Union Real Estate Equity & Mortg. Invs., 951 F.2d 1399, 1410 (3d Cir. 1991)*.

HN23[] Courts deny motions to dismiss where the plaintiff alleges that, from the outset, the defendant never intended to keep its promise to do something in the future. *See, e.g.,* *Giordano, 714 F. Supp. 2d at 519* (denying motion to dismiss the fraud counterclaim **[**88]** where the defendant alleged that the plaintiff promised to give the defendant authorship credit in an article and "did so knowing that he intended to omit [the defendant's] name as an author when he submitted the Article for publication"); *SSC Manager, LLC v. Venezia FC 1907 LP, Civil Action No. 17-1042, 2017 U.S. Dist. LEXIS 118294, 2017 WL 3225851, at *5-6 (E.D. Pa. July 27, 2017)* (denying motion to dismiss the fraud claim where the plaintiff pleaded sufficient facts to show that defendants' statements "may have been contrary to the speakers' present intention" and thus "fraudulent when made"); *cf.* *Rapid Circuits, Inc. v. Sun Nat'l Bank, Civil Action No. 10-6401, 2011 U.S. Dist. LEXIS 47231, 2011 WL 1666919, at *10 (E.D. Pa. May 3, 2011)* ("[T]he Court cannot identify any allegation that the Bank had no present intention to attempt to **[*708]** restructure the loans when that statement was made . . . Absent an allegation that Mr. Brehm falsely represented his (or the Bank's) present intention regarding any attempt to restructure the SBA loans when he allegedly made the statement, the claim for fraudulent misrepresentation based upon this statement must be dismissed."). Thus, the Court must determine whether NPT has adequately pleaded facts showing that, at the time CGP and Nanula promised to keep 27 holes of golf and to make $5 million in capital improvements, they "had no intention of following through" on those promises. *SSC Manager, LLC, 2017 U.S. Dist. LEXIS 118294, 2017 WL 3225851, at *5* ("[T]he crux of th[e] analysis is whether [the **[**89]** claimant] has adequately pleaded facts showing that, at the time these statements were made, the speaker had no intention on following through on them.").

Viewing all facts in the light most favorable to NPT and drawing all inferences in its favor, this Court concludes that NPT has met its burden. First, NPT has alleged that CGP had no intention to maintain 27 holes of golf at the time it made that promise. (*See* Doc. No. 1 at ¶ 171 ("[B]efore even making the pledge [to keep 27 holes of golf], Nanula had shared his opinion with Cicerco that "only 18 or [sic] 27 holes are truly needed"); ¶¶ 258-59 ("CGP represented to [PCC] that Philmont Club would retain 'at least 27 holes after South Course real estate transaction.' CGP never intended to abide by its representation it would maintain twenty-seven holes of golf.").) Likewise, the complaint pleads that at the time CGP promised to spend $5 million in capital improvement projects, it never intended to follow through with that promise. (*See id.* at ¶ 263 ("CGP represented to Philmont Club that it would make $5,000,000 in capital improvement projects upon the sale of the Property, but in reality, had no intention of expending the full $5,000,000.").) **[**90]** [17]

Because NPT alleges that CGP and Nanula never intended to follow through on their promise to keep 27 holes of golf or spend $5 million in capital improvements, it has adequately pled a misrepresentation of present fact and, therefore, we deny Defendants' motion to dismiss on that basis.

v. NPT Has Not Established Justifiable Reliance

As noted above, ***HN24***[] a plaintiff must show that it justifiably relied on the false representation to state a fraud claim. Defendants argue that NPT's fraud claims must fail because it has not shown justifiable reliance.[18] (*See* Doc. No. 13-2 at pp. 31-32.)

The Court must determine whether NPT justifiably relied on the following:

- Ridgewood's representation "that it was no longer interested in purchasing the Property as the ability to obtain approvals for 162 Units was speculative and the risks associated with the development of the Property **[*709]** were too high" (Doc. No. 1 at ¶ 92);

- CGP and Nanula's promise to make $5 million in capital improvements once the Property was sold (*id.* at ¶ 96);

- CGP and Nanula's promise to retain at least 27 holes of golf at Philmont Club after the South Course was sold (*id.* at ¶¶ 97, 104);

- CGP and Nanula's representation that **[**91]** the sale of the Property may never occur and the terms of the proposal balanced out that risk (*id.* at ¶ 102).

The Court considers the first and fourth statements together, since the crux of each is the same—namely, that Defendants told PCC that the ability to develop the Property and to obtain approvals from the Township was speculative and risky. (*See also* Doc. No. 52-2 at p. 4 (explaining that the basis for the fraud claims "is that

---

[17] (*See also* Doc. No. 1-4, Ex. 35 at p. 114 ("The wild ideas the Board has about a 'master plan for the North Course are probably way overblown, and we have huge capital needs in the clubhouse, HVAC, etc. You will see. We will want to 'nod' to some master plan elements so the members are excited about their North Course being updated a bit, but we want to spend the smallest dollars possible to get the maximum member impact."); Doc. No. 1-4, Ex. 36 at p. 118 (complimenting CGP's counsel for the "nicely vague" language in the PSA about the capital improvement projects CGP would undertake).)

[18] Notably, in its response brief, NPT fails to cite to a single case to support its contention that PCC justifiably relied on Defendants' misrepresentations. (*See* Doc. No. 17 at pp. 34-35.)

Defendants falsely told [PCC] that obtaining development approvals would be difficult to obtain [sic] and purposely withheld from [PCC] that Defendants 'had confirmed that [they] would be able to obtain approvals for 160 or more Units on the Property and would be able to develop and sell the Property'").)

HN25[] "[I]n deciding whether the plaintiff justifiably relied on the information, a court may consider the degree of sophistication of the parties and the history of the negotiation process between them." *Boardakan Rest. LLC v. Gordon Grp. Holdings, LLC, Civil Action No. 11-5676, 2016 U.S. Dist. LEXIS 147298, 2016 WL 6213035, at *13 (E.D. Pa. Oct. 14, 2016)*; *see also* *Wittekamp v. Gulf & W., Inc., 991 F.2d 1137, 1144-45 (3d Cir. 1993)* ("We note further that as the President of Mac-Hemp and the former CEO of another company, and as a person having long business experience, [the plaintiff] was clearly a sophisticated party. . . . In light of his sophistication, as well as the absence **[**92]** of any special fiduciary or longstanding business relationship with [the defendant], giving him a basis for relying on representations made by [the defendant]; the questions that reading the past collective bargaining agreements and group health insurance documents should have raised in his mind; and the considerable amount of money involved, [the plaintiff] was wholly unjustified in" relying on the defendant's nondisclosures).

HN26[] Although courts may consider "the nature of the relationship between the parties" when analyzing the justifiable reliance element of a fraud claim, the Pennsylvania Supreme Court has "hesitate[d] to find reliance justified where the party claiming reliance had an adequate opportunity to verify the allegedly fraudulent statements." *Porreco v. Porreco, 571 Pa. 61, 811 A.2d 566, 571 (Pa. 2002)* (holding that the plaintiff's reliance on her husband's valuation of a ring and assets in the prenuptial agreement was not justifiable because "she had possession of the ring and was not impeded from . . . obtain[ing] an appraisal of the ring" and she "had sufficient opportunity to inform herself fully of the nature and extent of her own assets, rather than rely on [her husband's] statements"); *see also* *Moore v. Steinman Hardware Co., 319 Pa. 430, 179 A. 565, 566 (Pa. 1935)* ("It has many times been pointed **[**93]** out that a buyer or seller is not entitled to rely on such statements where he has an equal opportunity to ascertain the facts affecting the value of the thing to be sold."); *id.* ("Nor is there merit in the contention that the plaintiffs did not have equal opportunity to discover the facts relating to the value of the shares. As owners of a majority of the shares they controlled the corporation, upon whose assets the value of the shares depended. Obviously **[*710]** the corporate books and records were available to them for the purpose of determining that value. In any case, their status as shareholders clearly entitled them to an examination of the books in order to determine the value of their shares in connection with the proposed sale."); *Martinez v. Russo, No. 1943, 2000 Phila. Ct. Com. Pl. LEXIS 77, 2000 WL 33711034, at *3 (Pa. Commw. Ct. Aug. 8, 2000)* ("A party's right to rely on a false assertion of value is diminished further where the one supposed to rely on such statement has an equal opportunity to ascertain the facts on which such opinion might be based." (cleaned up)).

Here, PCC was a sophisticated business entity engaging in a transaction that involved over 200 acres of property and a considerable amount of money. PCC knew that Philmont Club had been appraised in 2003 for $10.6 million "solely **[**94]** as a country club (i.e., not factoring selling the Property for development purposes)." (Doc. No. 1 at ¶ 150; *see also* Doc. No. 1-4, Ex. 23.) PCC easily could have asked the Township if it intended on giving development approvals or amending its zoning regulations.[19] Nothing in the pleadings indicates that CGP or Ridgewood had sole access to the Township or an upper hand in obtaining information from the Township. Given the previous appraisal and the amount of money at stake—and the fact that PCC had sole possession of the property—PCC also could have asked another developer or golf course operator (outside of Ridgewood and CGP) for its opinion on the riskiness (or lack thereof) of developing the Property. Moreover, Plaintiff never claims that PCC engaged in prior real estate transactions with Defendants or had regular business dealings with Defendants,

---

[19] In that vein, the complaint indicates that PCC knew by September 2016, that the Township was inclined to grant approval if certain conditions were met when NVR, NPT, and PCC were negotiating an amendment to the LPA and the proposed *ninth amendment* to the AOS. According to Plaintiff, NPT had extensive discussions with the Township to determine what development plans the Township would find favorable, including making a $1 million donation to the Township for roadway improvements and making the development age-restricted—the very same conditions that provided the basis for the eventual deal between CGP and PCC, the deal that CGP and Ridgewood indicated that the Township was enthusiastic about.

such that it would have a basis for trusting their representations.[20] *Cf.* [*Scaife v. Rockwell-Standard Corp., 446 Pa. 280, 285 A.2d 451, 455-56 (Pa. 1971)*] (finding that the jury could have concluded that the defendant "knowingly abused [the plaintiff's] confidence which would further justify [the plaintiff's] reliance," given that there was "evidence of continuous, business transactions between the corporations" and **[**95]** "close, personal relationships existed between the executives of both companies"); [*Silverman v. Bell Sav. & Loan Ass'n, 367 Pa. Super. 464, 533 A.2d 110, (Pa. Super. Ct. 1987)*] (concluding that the trial court correctly determined that the plaintiff's reliance was justified, given "the fact that [the plaintiffs] had engaged in numerous prior real estate transactions with Bell and, therefore, had a basis for trusting the **[*711]** representations made by Bell's employees").

HN27[] Moreover, statements as to the riskiness of developing and/or selling the Property are "statements of value," and therefore are "a part of 'trade talk' and bargaining which customarily accompany negotiations for the sale of property." *Moore, 179 A. at 566* (affirming the trial court's conclusion that there was no fraud where the plaintiff alleged that the defendant's president proposed purchasing her deceased husband's shares in the company at a rate of $300 per share and "fraudulently represented" during "negotiations" that the shares were "not worth more than he was offering"); *see also Binns*, 6 A.2d at 897, 899 (fraud claim not actionable where the plaintiff alleged that the defendant-company's treasurer said that the stock "was not worth any more than $10 a share"); *Martinez, 2000 Phila. Ct. Com. Pl. LEXIS 77, 2000 WL 33711034, at *3* ("Here, the entire basis for EMVEST's fraudulent misrepresentation claim is the **[**96]** false nature of the Defendants' statements about the Formed Steel share value prior to the execution of the Arbitration Award. However, even if Defendants' statements were inaccurate, EMVEST cannot rely on such 'trade talk' to support a claim for fraudulent misrepresentation."). Because NPT cannot rely on "trade talk" to support its fraud claim, the Court grants Defendants' motion to dismiss to the extent it is based on representations relating to the riskiness of the sale of the Property and/or obtaining development approvals.

NPT also has not shown that it justifiably relied on CGP and Nanula's assertion that they would keep 27 holes of golf. An email attached to Plaintiff's complaint suggests that Glenn Meyer, PCC's President, knew *before* the PSA was executed that Concert Defendants may reduce the number of holes to below 27. (*See* Doc. No. 1-4 at p. 107 ("Good news from Glenn Meyer. He is OK with giving us carte blanche on the golf courses, so long as there is a great North Course . . . He doesn't understand what we will do with the $5-6k dues preview members who only get South Course access now, but that is our problem. There will be howling and lots of questions from the members, **[**97]** but we will stay flexible until we know what is best to do in terms of the South Course.").)

However, the Court denies Defendants' motion to dismiss the fraud claim to extent the claim is based on CGP's statement that it would spend $5 million in capital improvements. Defendants have not addressed this in their briefing and the Court finds that, at the motion to dismiss stage, NPT has sufficiently alleged that PCC justifiably relied on CGP and Nanula's assertion that it would spend $5 million in capital improvements.

D. Aiding and Abetting Fraud Claims

i. Count IV

In Count IV, NPT first alleges that CGP and Nanula aided and abetted Ridgewood's commission of fraud by "actively encourag[ing] Ridgewood" to make false representations to PCC "regarding the speculation and risks

---

[20] Plaintiff alleges that it justifiably relied on Ridgewood's representations because "Ridgewood is a professional real estate developer who purports to be knowledgeable in such matters." (Doc. No. 1 at ¶ 236; *see also id.* at ¶ 295 (claiming that PCC justifiably relied on Ridgewood representations because "Ridgewood represented itself as a professional real estate developer knowledgeable in development matters"). However, Plaintiff fails to cite to any case law indicating that a defendant's expertise or professional knowledge is, without more, sufficient to establish justifiable reliance, particularly when both sides to the negotiations are sophisticated business entities. Therefore, even when taking all allegations in the light most favorable to Plaintiff, we cannot find that PCC justifiably relied on Defendants' representations.

associated with the Property." (Doc. No. 1 at pp. 35-36.) In addition, NPT claims that CGP and Nanula "encouraged" Ridgewood to make fraudulent omissions, such as "neglect[ing] to inform [PCC] that Ridgewood and CGP were in communication about Philmont and were working together to acquire Philmont Club at a below market rate" and that "neglect[ing] to inform [PCC] that it was actively engaged in discussions with the **[**98]** Township prior to the closing of the PSA and that it had confirmed that it would be able to obtain approvals for 160 or more Units on the Property and would **[*712]** be able to develop and sell the Property." (*Id.* at ¶¶ 245-47.)

It is obvious that if there is no underlying fraud claim against Ridgewood, CGP cannot be said to have aided and abetted Ridgewood's fraud. *See* *The Roskamp Inst., Inc. v. Alzheimer's Inst. of Am., Inc., Civil Action No. 15-3641, 2015 U.S. Dist. LEXIS 144083, 2015 WL 6438093, at *10 (E.D. Pa. Oct. 23, 2015)* ("Plaintiffs in this case fail to allege an actionable underlying fraud that the Foundation could have aided and abetted . . . Absent a viable claim of fraud, the Foundation could not have aided and abetted any tort.").

Accordingly, because the Court has (a) dismissed NPT's fraud claims to the extent they are based on statements about the riskiness of developing the Property given Plaintiff's failure to show justifiable reliance and (b) has dismissed the fraud in the omission claims because Defendants had no duty to speak, Count IV must also be dismissed.

ii. Count VI

In Count VI, NPT alleges that Ridgewood, Grebow, and Plotnick aided and abetted CGP and Nanula's commission of fraud. (*See id.* at pp. 39-41.) NPT claims that CGP made fraudulent representations to PCC "regarding (1) the speculation and risks associated with the Property, **[**99]** (2) the number of holes of golf CGP would retain at Philmont Club, (3) and the nature and amount of the capital improvements CGP would make to Philmont Club. (*Id.* at ¶ 277.) NPT also alleges that CGP and Nanula committed fraud in the omission regarding their partnership with Ridgewood and their ongoing discussions with the Township. (*Id.* at ¶ 278.) Plaintiff then pleads, in a conclusory fashion, that the Ridgewood Defendants "actively encouraged CGP to make such statements and omissions." (*Id.* at ¶ 279; *see also id.* at ¶ 280.)

Again, this Court has dismissed NPT's fraud in the omission claims because Defendants had no duty to speak and has dismissed NPT's fraud claims to the extent they were based on statements about the riskiness of developing the Property and how many holes of golf Defendants would retain after the sale given Plaintiff's failure to show justifiable reliance. Accordingly, the only underlying fraud claim remaining—and thus the only fraud Ridgewood could have possibly aided and abetted—is based on CGP's representation that it would make $5 million in capital improvements.

But, missing from the complaint (or, for that matter, Plaintiff's response or sur-reply briefs) are **[**100]** any allegations that Ridgewood acted in concert with CGP or substantially assisted CGP in making misrepresentations as to how much money it would spend on *capital improvements* or what kind of projects it would undertake. (*See id.* at pp. 39-41; *see also id.* at ¶¶ 177-82.)[21] *See* *The Roskamp Inst., Inc., 2015 U.S. Dist. LEXIS 144083, 2015 WL 6438093, at *10* (explaining that under the Restatement, "a defendant is subject to liability for the tortious action of another if he (a) does a tortious act in concert with the other or pursuant to a common design with him, (b) knows that the other's conduct constitutes a breach of duty and gives substantial assistance or encouragement to the other so to conduct himself, or (c) gives substantial assistance to the other in accomplishing a tortious result and his own conduct, separately considered, constitutes **[*713]** a breach of duty to the third person"); *see also* *Marion v. Bryn Mawr Trust Co., No. 2470 EDA 2018, 2021 Pa. Super. LEXIS 60, 2021 WL 565481, at *3 (Pa. Super. Ct. Feb. 16, 2021)* (same). The allegations are either conclusory or focus on Ridgewood and CGP's communications about

[21] Nor do the exhibits on which NPT relies to show that CGP misrepresented the nature of the capital improvement projects it would undertake support NPT's argument. (*See* Doc. No. 1-4, Ex. 35 at pp. 114 (internal CGP email that did not include Grebow or Plotnick); Doc. No. 1-4, Ex. 36, at pp. 116-18 (email between CGP employees and CGP's counsel).)

what they should tell PCC about the Property's development potential. This is fatal to NPT's aiding and abetting claim. Therefore, the Court also dismisses Count VI for failure to state a claim.

E. Civil Conspiracy

Next, Defendants argue that Plaintiff's state law civil conspiracy **[**101]** claim must be dismissed because NPT has failed to state an underlying claim that Defendants could have conspired to commit (i.e., antitrust violations or fraud) *and* NPT failed to allege malice, an essential element of civil conspiracy. (Doc. No. 13-2 at p. 35.)

HN28[] To state a cause of action for civil conspiracy, a plaintiff must show: "(1) a combination of two or more persons acting with a common purpose to do an unlawful act or to do a lawful act by unlawful means or for an unlawful purpose; (2) an overt act done in pursuance of the common purpose; and (3) actual legal damage." *Morilus v. Countrywide Home Loans, Inc., 651 F. Supp. 2d 292, 312 (E.D. Pa. 2008)* (quotation marks and citations omitted); *see also Zafarana v. Pfizer, Inc., 724 F. Supp. 2d 545, 559 (E.D. Pa. 2010)*. A viable civil conspiracy claim also requires "malice or intent to injure." *Morilus, 651 F. Supp. 2d at 313*. "Bald assertions that certain actions were malicious are insufficient; it must be alleged that the '*sole* purpose of the conspiracy was to injure the Plaintiffs.'" *Id.* (citation omitted)); *see also Sarpolis v. Tereshko, 625 F. App'x 594, 601 (3d Cir. 2016)* ("Proof of malice is an essential part of a cause of action for conspiracy, and malice requires that the conspirators act with the sole purpose of injuring the plaintiff." (cleaned up)); *Barker v. Hostetter, Civil Action No. 13-5081, 2014 U.S. Dist. LEXIS 51688, 2014 WL 1464319, at *31 (E.D. Pa. Apr. 15, 2014)* ("[A] successful claim for civil conspiracy also requires that 'the *sole* purpose of the conspiracy is **[**102]** to injure the plaintiff,' not just that the plaintiff was injured." (citation omitted)); *Three Rivers Hydroponics, LLC v. Florists' Mut. Ins. Co., 2:15-cv-00809, 2018 U.S. Dist. LEXIS 20699, 2018 WL 791405, at *6 (E.D. Pa. Feb. 8, 2018)* ("Malicious intent requires that a defendant acted 'solely to injure' a plaintiff; injury that is incidental to another purpose, even if it appears 'selfish or unreasonable,' is not malicious." (citation omitted)). "A showing that the acts alleged were done to advance the defendant's business interests, such as to increase company profits, precludes a civil conspiracy claim, since this means injuring the plaintiff was not the *sole* purpose of the conspiracy." *Three Rivers Hydroponics, LLC, 2018 U.S. Dist. LEXIS 20699, 2018 WL 791405, at *6*.

HN29[] Courts routinely dismiss civil conspiracy claims where the plaintiff failed to allege that the defendants acted maliciously or acted with the sole intent to injure him or her. *See, e.g., Zafarana, 724 F. Supp. 2d at 559* ("Nowhere in Plaintiffs' Amended Complaint are Defendants alleged to have acted with an intent to harm Plaintiffs, much less that it was Defendants' sole intent to harm Plaintiffs. With these allegations, we cannot find that Plaintiffs have pled a cause of action for conspiracy under Pennsylvania law." (citation omitted)); *Barker, 2014 U.S. Dist. LEXIS 51688, 2014 WL 1464319, at *31* ("At no point in the Amended Complaint do Plaintiffs expressly state the sole purpose of the conspiracy was to injure them. Accordingly, **[**103]** the Court will grant the Motion to Dismiss Plaintiffs' civil conspiracy claim."); *Three Rivers Hydroponics, LLC, 2018 U.S. Dist. LEXIS 20699, 2018 WL 791405, at *6-7* (dismissing the plaintiff's civil conspiracy claim where the amended complaint alleged that the defendants conspired "to place company **[*714]** profits over its insured" and that the defendants acted "solely to increase company commissions and profits," and therefore "injuring the plaintiff was not the sole purpose of the conspiracy"); *accord Morilus, 651 F. Supp. 2d at 313* (granting motion for summary judgment on the defendant's counterclaim because the facts showed that the "plaintiffs were guided by personal interests separate and apart from any alleged desire to cause harm to Countrywide").

Here, NPT claims that PCC was injured by Defendants' conduct. (*See, e.g.*, Doc. No. 1 at ¶¶ 272-73; *id.* at ¶¶ 305-06 ("[PCC] was harmed as a result of the Defendants' conspiracy by way of selling Philmont Club to Concert Philmont for below market value. Because of the Defendants' conspiracy, Philmont Club was effectively sold for its value as a country club and not its value as a country club *and* a development parcel.").) But injury alone is insufficient to support a civil conspiracy claim; critically, NPT fails to allege that Defendants acted with the **[**104]** intent to injure PCC, let alone with the sole intent to injure PCC. Moreover, allegations in the complaint and emails NPT attaches to its complaint lead the Court to the very opposite conclusion—specifically, they show that Defendants were motivated by their own business concerns, not just the desire to injure PCC. (*See* Doc. No. 1 at ¶

137 ("Even with giving Ridgewood an 'awfully high' rate of return, Nanula noted that the sale of the Property '*[j]uices our normal deal returns quite nicely*.'" (emphasis added)); Doc. No. 1-3, Ex. 19 at pp. 54, 56; Doc. No. 1 at ¶ 140 (alleging that Nanula told Plotnick to "wait to see *if I can strike a better deal for all of us* here" (emphasis added)); Doc. No. 1-3, Ex. 20 at p. 64.) Given NPT's failure to adequately plead malice, the Court must dismiss the civil conspiracy claim.[22]

F. Breach of Contract

As assignee, NPT asserts a breach of contract claim against Ridgewood, claiming that Ridgewood breached its confidentiality agreement with PCC when Ridgewood disseminated PCC's confidential financial information to third parties, ClubCorp and Morningstar Golf & Hospitality, LLC. (Doc. No. 1 at ¶¶ 310-11; Doc. No. 1-4, Exs. 37, 38, 39 at pp. 127-34.)

HN30[] "To **[**105]** state a claim for breach of contract under Pennsylvania law, a plaintiff is required to plead: (1) the existence of a contract, including its essential terms, (2) a breach of duty imposed by the contract, and (3) resultant damages." *Clapps v. State Farm Ins. Cos., 447 F. Supp. 3d 293, 297 (E.D. Pa. 2020)* (cleaned up). Defendants argue that the breach of contract claim must be dismissed because NPT failed to plead that PCC suffered damages that were causally related to Ridgewood's breach. (Doc. No. 13 at pp. 35-36.)

We disagree. Here, NPT has pled that "[PCC] was harmed by Ridgewood's . . . breach of confidentiality agreement by way of having its financial information disclosed to third parties" and that "[PCC] is entitled to attorneys' fees from Ridgewood as a result of the breach." (Doc. No. 1 at ¶¶ 312-13.) The Court finds this sufficient at the motion to dismiss stage. *See* *Walsh v. Amerisource Bergen Corp., Civil Action No. 11-7584, 2014 U.S. Dist. LEXIS 82064, 2014 WL 2738215, at *4 (E.D.* ***[*715]*** *Pa. June 17, 2014)* (holding that the defendants sufficiently alleged that they suffered damages as a result of the plaintiff's breach of a confidentiality agreement because at minimum, they would be entitled to "nominal damages" if they prevailed on the counterclaim, since the contract provided that they would "be entitled to attorneys' fees and costs incurred in protecting their confidential information"); **[**106]** *AscellaHealth, LLC v. CRx Health Servs., LLC, Civil Action No. 14-5949, 2015 U.S. Dist. LEXIS 46313, 2015 WL 1573395, at *5 (E.D. Pa. Apr. 9, 2015)* ("CRx has alleged that Ascella . . . failed to maintain its confidential and proprietary information . . . [a]nd CRx alleges it suffered damages as a result of Ascella's alleged breach. While the allegations are thin, they contain sufficient factual content to draw a reasonable inference that a claim is plausible and, thus, the Court finds that they pass muster at this stage of the proceedings.").

IV. Conclusion

For the foregoing reasons, this Court dismisses the federal antitrust claims (Counts I and II) and the fraud in the omission and fraudulent concealment claims. The Court dismisses the fraud claim asserted against the Ridgewood, Plotnick, and Grebow (Count III). The Court also dismisses the fraud claim asserted against CGP and Nanula (Count V) to the extent it is based on representations about the riskiness of developing the Property or retaining 27 holes of golf, but the Court denies the motion to dismiss to the extent that claim is based on CGP's statement that it would spend $5 million in capital improvements. Next, the Court dismisses the aiding and abetting fraud claims (Counts IV & VI) and the civil conspiracy claim (Count VIII). Finally, the Court denies Defendants' motion **[**107]** to dismiss the breach of contract claim against Ridgewood (Count X).

An appropriate Order follows.

---

[22] Because the Court finds that NPT failed to plead malice, the Court does not address Defendants' alternative argument—that NPT also failed to allege an underlying tort claim to support the civil conspiracy claim. However, the Court notes that the only remaining claim that could plausibly support the civil conspiracy claim is the fraud claim against CGP, to the extent it is based on the alleged misrepresentation that CGP would make $5 million in capital improvements.

ORDER

AND NOW, this 12th day of August, 2021, upon consideration of Defendants' Motion to Dismiss (Doc. No. 13), Plaintiff's response (Doc. No. 17), Defendants' reply (Doc. No. 21), Plaintiff's sur-reply (Doc. No. 22), Plaintiff's supplemental authority (Doc. No. 33), the parties' oral arguments on the motion, and the parties supplemental letter briefs (Doc. Nos. 50, 52), and for the reasons set forth in the Memorandum, it is hereby **ORDERED** that Defendants' motion is **GRANTED** with respect to Plaintiffs' federal antitrust claims (Counts I and II); the fraud in the omission and fraudulent concealment claims; the fraud claim asserted against Ridgewood, Plotnick, and Grebow (Count III); the fraud claim asserted against CGP and Nanula (Count V) to the extent it is based on representations about the riskiness of developing the Property or retaining 27 holes of golf; the aiding and abetting fraud claims (Counts IV and VI); and the civil conspiracy claim (Count VIII). Defendants' motion is **DENIED** with respect to the remainder of its arguments (i.e., the breach of contract claim against Ridgewood **[**108]** and the fraud claim asserted against CGP and Nanula to the extent it is based on CGP's representation about capital improvements).

IT IS FURTHER ORDERED that in light of the Court's decision, the stay currently in place (Doc. Nos. 20, 30, 40) is lifted, and a telephone conference to discuss scheduling and other pretrial matters is **SCHEDULED** for **August 31, 2021 at 9:00 a.m**. At least seven (7) days prior to the conference, the parties should submit a joint status report with proposed scheduling deadlines.

IT IS SO ORDERED.

/s/ KAREN SPENCER MARSTON

Judges: WENDY BEETLESTONE, UNITED STATES DISTRICT JUDGE.

Opinion by: WENDY BEETLESTONE

Opinion

In this proposed securities fraud class action against Defendants Lannett Company, Inc., Arthur P. Bedrosian (Lannett's former chief executive officer) and Martin P. Galvan (its former chief financial officer) (collectively, **[*2]** "Defendants"), Lead Plaintiff University of Puerto Rico Retirement System ("UPRRS") and Plaintiffs Ironworkers Locals 40, 361, and 417 Union Security Funds (collectively "Plaintiffs") assert securities fraud claims under *Section 10(b)* of the Securities Exchange Act of 1934 ("the Exchange Act") and *Rule 10b-5* against all Defendants, and claims against the individual defendants under *Section 20(a)* of the Exchange Act. *See* *15 U.S.C. § 78j(b)*; *17 C.F.R. § 240.10b-5*; *15 U.S.C. § 78t(a)*.

Plaintiffs now move to certify a class pursuant to *Federal Rules of Civil Procedure 23(a)* and *(b)(3)*, to be appointed class representatives, and for the appointment of class counsel. Both Plaintiffs and Defendants seek to exclude the opposing party's expert report for failure to comply with the standard of *Daubert v. Merrell Dow Pharmaceuticals, Inc., 509 U.S. 579, 113 S. Ct. 2786, 125 L. Ed. 2d 469 (1993)*. For the following reasons, the motions to exclude will be denied and the class certification motion will be granted.

I. BACKGROUND AND PROCEDURAL HISTORY

During the presented class period - July 15, 2014, to October 31, 2017 - Plaintiffs allege that they purchased Lannett's common stock at prices that were artificially inflated because of Defendants' false and misleading statements concerning the pricing of generic drugs and investigations into price-fixing in the generic drug market.

Plaintiffs allege that anticompetitive conduct among Lannett's **[*3]** competitors caused price increases for five generic drugs which together accounted for most of Lannett's total annual sales from 2013 to 2016. Lannett publicly disclosed that it received a subpoena and interrogatories from the Connecticut Attorney General in connection with an investigation of anticompetitive conduct in the generic drug industry at the start of the class period in July 2014, and grand jury subpoenas in connection with a federal investigation in November and December 2014. However, say Plaintiffs, "[e]ven as it began to be revealed during the Class Period that several of Lannett's competitors were implicated in illegal price-fixing and anti-competitive conduct, Defendants assured investors that Lannett's past financial results were the product of competitive market forces; and, that the Company's pricing strategy and future results would not be impacted by regulatory scrutiny of anticompetitive conduct in the industry, or the threat of being implicated in any price-fixing or anticompetitive scheme." More specifically, Plaintiffs contend that Defendants' statements during the class period in public regulatory filings, press releases, and by the individual defendants **[*4]** during earnings calls and other public events were materially false or misleading in that: (1) "Defendants misrepresented to Class members that Lannett's growth was the result of competitive market forces that afforded an opportunity for Lannett's aggressive pricing campaign," whereas Lannett's price increases in actuality were caused by "extensive price-fixing schemes and anticompetitive conduct throughout that generic drug industry that directly implicated Lannett's competitors in markets for key Lannett products"; (2) "[a]s regulatory scrutiny into price-fixing and anticompetitive conduct increased, Defendants issued a series of misleading statements and omissions of material fact that misled Plaintiffs and Class members regarding the risk that Lannett would be implicated in price-fixing and anticompetitive conduct"; and, (3) Defendants' statements that the company had complied with the law in the pricing of its products "created the false impression that [] Lannett . . . had conducted a complete and thorough investigation as to whether Lannett engaged in anticompetitive conduct, and the risk that Lannett would be implicated in an action alleging anticompetitive conduct," but in **[*5]** actuality Lannett's "internal investigation was no[t] completed, and had a limited focus."

Throughout the class period, Lannett's stock price fell as information became public that revealed potential anticompetitive conduct in the generic drug industry and Lannett's potential exposure to liability. Plaintiffs allege that Lannett's stock value fell 13% in December 2014 after Lannett disclosed that it had received the federal grand jury subpoenas, and fell 26% following the publication of a *Bloomberg* article in November 2016 describing the possibility that criminal charges would be filed against pharmaceutical companies, including Lannett. At the close of the class period, on October 31, 2017, Lannett's stock price dropped 14% after the Connecticut Attorney General filed a complaint alleging a conspiracy among generic drugs makers, including Lannett, to engage in anticompetitive conduct and price-fixing.

Plaintiffs now move to certify the following damages class:

> All persons and entities who purchased or acquired the publicly traded common stock of Lannett Company, Inc. . . . during the period from July 15, 2014 and October 31, 2017, inclusive[,] . . . and who were damaged thereby. . . **[*6]** .[1]

II. LEGAL STANDARDS

"The class-action device is an exception to the rule that litigation is usually conducted by and on behalf of the individual named parties only. Accordingly, the party proposing class-action certification bears the burden of affirmatively demonstrating by a preponderance of the evidence her compliance with the requirements of *Rule 23*." *Byrd v. Aaron's Inc., 784 F.3d 154, 163 (3d Cir. 2015)* (quotation marks and citations omitted). To proceed as a certified class action, "every putative class action must satisfy the four requirements of *Rule 23(a)* and the requirements of either *Rule 23(b)(1)*, *(2)*, or *(3)*." *Marcus v. BMW of N. Am., LLC, 687 F.3d 583, 590 (3d Cir. 2012)* (citation omitted). Failure to satisfy any of these requirements precludes certification. *Danvers Motor Co. v. Ford Motor Co., 543 F.3d 141, 147 (3d Cir. 2008)*.

"*Rule 23* does not set forth a mere pleading standard." *Wal-Mart Stores, Inc. v. Dukes, 564 U.S. 338, 350, 131 S. Ct. 2541, 180 L. Ed. 2d 374 (2011)*. "Rather, a party must not only be prepared to prove that there are *in fact* sufficiently numerous parties, common questions of law or fact, typicality of claims or defenses, and adequacy of representation, as required by *Rule 23(a)*," but "must also satisfy through evidentiary proof at least one of the provisions of *Rule 23(b)*." *Comcast Corp. v. Behrend, 569 U.S. 27, 33, 133 S. Ct. 1426, 185 L. Ed. 2d 515 (2013)* (quotation marks and citation omitted). "A party's assurance to the court that it intends or plans to meet the requirements is insufficient." *In re Hydrogen Peroxide Antitrust Litig., 552 F.3d 305, 318 (3d Cir. 2008)* (citations omitted).

"Class certification is proper only if the **[*7]** trial court is satisfied, after a rigorous analysis, that the prerequisites of *Rule 23* are met." *Id. at 309* (quotation marks and citation omitted). In conducting this analysis, "the court cannot be bashful." *Marcus, 687 F.3d at 591*. "[T]he district court must make whatever factual and legal inquiries are necessary and must consider all relevant evidence and arguments presented by the parties." *Hydrogen Peroxide, 552 F.3d at 307* (citations omitted).

Accordingly, the evaluation of whether a plaintiff has satisfied the requirements of *Rule 23* can, as necessary, "delve beyond the pleadings" to the factual record, *id. at 316* (quotation marks and citation omitted), and it is appropriate to "resolve all factual or legal disputes relevant to class certification, even if they overlap with the merits - including disputes touching on elements of the cause of action," *Marcus, 687 F.3d at 591* (quotation marks and citation omitted). Indeed, as "class determination generally involves considerations that are enmeshed in the factual and legal issues comprising the plaintiff's cause of action," rigorous analysis "frequently . . . entail[s] some overlap with the merits of the plaintiff's underlying claim." *Wal-Mart, 564 U.S. at 351* (quotation marks and citation omitted). The merits of a plaintiff's claims may be considered, however, "only **[*8]** to the extent . . . that they are relevant to determining whether the *Rule 23* prerequisites for class certification are satisfied." *Amgen Inc. v. Conn. Ret. Plans & Tr. Funds, 568 U.S. 455, 466, 133 S. Ct. 1184, 185 L. Ed. 2d 308 (2013)* (citations omitted); *see also* *Sullivan v. DB Invs., Inc., 667 F.3d 273, 305 (3d Cir. 2011)* ("[A] district court has limited authority to examine the merits when conducting the certification inquiry").

In this case, as we shall see *infra*, there is some need to look into the merits of Plaintiffs' claims - specifically, the reliance element of a *Section 10(b)* and *Rule 10b-5* claim - thus, the prima facie elements of those claims are set forth here:[2] To recover damages for violations of *Section 10(b)* and *Rule 10b-5*, "a plaintiff must prove (1) a material

---

[1] Excluded from the Class are Defendants, the officers and directors of Lannett, at all relevant times, members of their immediate families and their legal representatives, heirs, successors or assigns and any entity in which Defendants have or had a controlling interest.

misrepresentation or omission by the defendant; (2) scienter; (3) a connection between the misrepresentation or omission and the purchase or sale of a security; (4) reliance upon the misrepresentation or omission; (5) economic loss; and (6) loss causation." *Halliburton Co. v. Erica P. John Fund, Inc. ("Halliburton II"), 573 U.S. 258, 267, 134 S. Ct. 2398, 189 L. Ed. 2d 339 (2014)* (quotation marks and citation omitted).

III. DISCUSSION

A. *Rule 23(a)* Pre-Requisites

"The requirements of *Rule 23(a)* are meant to assure both that class action treatment is necessary and efficient and that it is fair to the absentees under the particular circumstances." *Baby Neal for and by Kanter v. Casey, 43 F.3d 48, 55 (3d Cir. 1994)*. To satisfy *Rule 23(a)*, the proponent of class certification must establish that (1) "the class is **[*9]** so numerous that joinder of all members is impracticable" (numerosity); (2) "there are questions of law or fact common to the class" (commonality); (3) "the claims or defenses of the representative parties are typical of the claims or defenses of the class" (typicality); and, (4) "the representative parties will fairly and adequately protect the interests of the class" (adequacy of representation). *Fed. R. Civ. P. 23(a)*. Defendants do not dispute that Plaintiffs have established numerosity and commonality, but do argue that Plaintiffs have failed to establish typicality and adequacy. Nevertheless, in the interests of completion, each requirement is considered below.

i. Numerosity

Although "[t]here is no minimum number of members needed for a suit to proceed as a class action," generally the numerosity requirement is satisfied if the named plaintiff demonstrates greater than 40 potential plaintiffs. *Marcus, 687 F.3d at 595* (citation omitted). "Mere speculation is insufficient," however, and "*Rule 23(a)(1)* requires the examination of the specific facts of each case." *Id. at 595-96* (quotation marks and citations omitted). The plaintiff need not "offer direct evidence of the exact number and identities of the class members[, b]ut in the absence of direct evidence, **[*10]** a plaintiff must show sufficient circumstantial evidence specific to the products, problems, parties, and geographic areas actually covered by the class definition to allow a district court to make a factual finding." *Id. at 596*. Here, Lannett's common stock traded on the New York Stock Exchange, there were a minimum of 35.6 million shares of Lannett's common stock outstanding during the class period, and an average of approximately 12% of Lannett's outstanding shares were traded on a weekly basis during the class period. This is sufficient to establish by a preponderance of the evidence that there are greater than 40 persons in the proposed class who "purchased or acquired the publicly traded common stock of Lannett Company" during the class period, and therefore that "the class is so numerous that joinder of all members is impracticable." *Fed. R. Civ. P. 23(a)(1)*.

ii. Commonality

The commonality requirement of *Rule 23(a)(2)* demands that class members' claims "depend upon a common contention . . . of such a nature that it is capable of classwide resolution - which means that determination of its truth or falsity will resolve an issue that is central to the validity of each one of the claims in one stroke." *Wal-Mart,*

---

[2] In addition to these and the *Section 20(a)* claims, the Complaint also asserts that Defendants violated *Subsections (a)* and *(c)* of *Rule 10b-5*, which respectively make it unlawful to "employ any device, scheme, or artifice to defraud" and "engage in any act, practice, or course of business which operates . . . as a fraud." *17 C.F.R. § 240.10b-5(a)*, *(c)*. Claims under these subsections are referred to as "'scheme liability claims' because they make deceptive conduct actionable, as opposed to *Rule 10b-5(b)*, which relates to deceptive statements." *In re DVI, Inc. Sec. Litig., 639 F.3d 623, 643 n.29 (3d Cir. 2011)*, *abrogated on other grounds by Amgen, 568 U.S. at 465*. Plaintiffs' Motion and briefing in support of their Motion do not raise the scheme liability claim of the Complaint for class certification. Accordingly, this claim will not be certified for class treatment.

564 U.S. at 350. Rule 23(a)(2) "does not require identical **[*11]** claims or facts among class members." Marcus, 687 F.3d at 597 (quotation marks, brackets, and citation omitted). Instead, commonality is established "if the named plaintiffs share at least one question of fact or law with the grievances of the prospective class." Baby Neal, 43 F.3d at 56 (citations omitted). Here, the commonality requirement is satisfied. To succeed on their securities fraud claims Plaintiffs must establish that Lannett made material misrepresentations or omissions and did so with scienter. The inquiry would necessarily focus on Lannett's actions, and the answers to questions raised in the inquiry would be answered not from the perspective of each prospective class member, but from an examination of what Lannett did and said. The "classwide answers" to these questions lead inexorably to the conclusion that the commonality requirement of Rule 23(a) is met. Reyes v. Netdeposit, LLC, 802 F.3d 469, 482 (3d Cir. 2015) (citation omitted).

iii. Adequacy

Plaintiffs similarly meet Rule 23(a)'s adequacy requirement. "The principal purpose of the adequacy requirement is to determine whether the named plaintiffs have the ability and the incentive to vigorously represent the claims of the class." In re Cmty. Bank of N. Va. Mortg. Lending Pracs. Litig., 795 F.3d 380, 393 (3d Cir. 2015) (citation omitted). "[T]he linchpin of the adequacy requirement is the alignment of interests and incentives **[*12]** between the representative plaintiffs and the rest of the class." *Id.* (quotation marks and citation omitted). "The adequacy inquiry has two components designed to ensure that absentees' interests are fully pursued," In re Schering Plough Corp. ERISA Litig., 589 F.3d 585, 601-02 (3d Cir. 2009) (quotation marks and citation omitted): "(1) whether the representatives' interests conflict with those of the class and (2) whether the class attorney is capable of representing the class," Newton v. Merrill Lynch, Pierce, Fenner & Smith, Inc., 259 F.3d 154, 185 (3d Cir. 2001) (citations omitted).

Turning first to the adequacy of Plaintiffs' proposed class counsel, Abraham, Fruchter & Twersky, LLP: Plaintiffs have established that their counsel is "qualified, experienced, and generally able to conduct the proposed litigation," and is therefore adequate. Hoxworth v. Blinder, Robinson & Co., 980 F.2d 912, 923 (3d Cir. 1992) (quotation marks and citation omitted). The law firm resumé of Plaintiffs' proposed class counsel illustrates that counsel has substantial experience in litigating securities fraud class actions. Furthermore, Plaintiffs' proposed counsel, appointed as lead counsel in this action in March 2017, has vigorously litigated the case including through opposition to motions to dismiss and in discovery disputes.[3]

The named Plaintiffs also establish that they have "the ability and the incentive to represent the claims **[*13]** of the class vigorously . . . and that there is no conflict between the individual's claims and those asserted on behalf of the class." Hassine v. Jeffes, 846 F.2d 169, 179 (3d Cir. 1988) (citations omitted).[4] Plaintiffs' and class members'

---

[3] Rule 23(g) provides that "a court that certifies a class must appoint class counsel," and sets out a non-exhaustive list of factors governing the appointment of class counsel, including: (1) "the work counsel has done in identifying or investigating potential claims in the action"; (2) "counsel's experience in handling class actions, other complex litigation, and the types of claims asserted in the action"; (3) "counsel's knowledge of the applicable law"; and, (4) "the resources that counsel will commit to representing the class." Fed. R. Civ. P. 23(g)(1). For the reasons set forth above, Abraham, Fruchter & Twersky, LLP, satisfies the criteria of Rule 23(g), and will be appointed class counsel.

[4] Defendants contend that adequacy is not established because both UPRRS and Ironworkers "lack even a basic understanding of the facts underlying this action" and defer to counsel in making decisions about the case. But, "[a] class representative need only possess a minimal degree of knowledge necessary to meet the adequacy standard." New Directions Treatment Servs. v. City of Reading, 490 F.3d 293, 313 (3d Cir. 2007) (quotation marks and citation omitted). The deposition testimony of Plaintiffs' designated Rule 30(b)(6) witnesses demonstrate that Plaintiffs understand the nature of their causes of action - to wit, that this is a class action lawsuit against Lannett and its executives premised on their false and misleading statements about drug pricing which caused investors, including Plaintiffs and class members, to lose money. There is no need for Plaintiffs to have mastered the factual and legal issues presented in the case to satisfy the adequacy requirement, because their representation of the class will be accomplished through adequate counsel. *See, e.g.,* Lewis v. Curtis, 671 F.2d 779, 789 (3d Cir. 1982), *abrogated on other*

interests are aligned in that they all purchased or acquired and lost money on Lannett's artificially inflated common stock during the class period.[5] Accordingly, adequacy is satisfied.

iv. Typicality

Defendants argue that the representative parties are not typical of the class because they are subject to unique defenses as to the element of reliance in their Section 10(b) claim. *See* Erica P. John Fund, Inc. v. Halliburton Co. ("Halliburton I"), 563 U.S. 804, 810, 131 S. Ct. 2179, 180 L. Ed. 2d 24 (2011).

a. Unique Defense: Legal Precepts

On a motion for class certification, the proposed class representatives must meet the typicality requirements of Rule 23(a) by showing that the "claims or defenses" of proposed class representatives are "typical of the claims or defenses of the class." Fed. R. Civ. P. 23(a)(3). This requirement "ensur[es] that the class representatives are sufficiently *similar* to the rest of the class - in terms of their legal claims, factual circumstances, and stake in the litigation - so that certifying those individuals to represent the class will be fair to the rest of the proposed class." Schering Plough, 589 F.3d at 597 (citations **[*14]** omitted). Accordingly, "a proposed class representative is not 'typical' under Rule 23(a)(3)" if (1) "the representative is subject to a unique defense" that (2) "is likely to become a major focus of the litigation." Id. at 598 (quotation marks and citation omitted).[6] As with typicality generally, the atypicality of a potential defense depends on "the attributes of the proposed representatives, the class as a whole, and the similarity between the proposed representatives and the class." Id. at 597. It is the defendant's burden to show that a unique defense defeats typicality. *See* Beck v. Maximus, 457 F.3d 291, 300 (3d Cir. 2006). Merely "seeking to disqualify the representative [by raising] a speculative defense" is insufficient to meet this burden. Id. at 301.

It is not necessary for a defendant to show that a prospective class representative is the *only* member of the proposed class who is subject to a "unique defense." Indeed, typicality may be defeated where a defense is "inapplicable to many members of the class." Schering Plough, 589 F.3d at 599. If, however, a defense is broadly applicable to the class, then the defense is not "unique or atypical" to the proposed representative and will not defeat certification. Id. at 598; *see also* 1 *Newberg on Class Actions* § 3:45 ("[A] defense will not defeat typicality

---

grounds by Kamen v. Kemper Fin. Servs., Inc., 500 U.S. 90, 111 S. Ct. 1711, 114 L. Ed. 2d 152 (1991); *see also* In re Suboxone (Buprenorphine Hydrochlorine & Naloxone) Antitrust Litig., 967 F.3d 264, 273 (3d Cir. 2020).

[5] Defendants also contest adequacy on the grounds that UPRRS is underfunded, arguing that UPRRS's "precarious financial position raises serious concerns about potential conflicts of interest and whether it could represent the putative class if it is forced to declare bankruptcy or faces an immediate liquidity crunch." To preclude class certification, a conflict of interest "must be fundamental" and cannot be "unduly speculative." Dewey v. Volkswagen Aktiengesellschaft, 681 F.3d 170, 184 (3d Cir. 2012) (quotation marks and citations omitted). "A fundamental conflict exists where some class members claim to have been harmed by the same conduct that benefitted other members of the class" and "touches the specific issues in controversy." *Id.* (quotation marks, brackets, and citations omitted). Although Defendants suggest that UPRRS's financial status could pressure UPRRS to settle the case, this does not constitute a fundamental conflict as the Third Circuit has defined it. Further, UPRRS has vigorously litigated the case since its appointment as lead plaintiff over four years ago. Potential adverse consequences of UPRRS's financial situation are speculative, and do not render UPRRS inadequate.

[6] One focus of the typicality inquiry is "the extent to which the proposed representative may face significant unique or atypical defenses to her claims." Id. at 597-98 (citation omitted). Even where a proposed class representative's claims are the same as those of class members, its individual factual circumstances may allow a defendant to assert a unique or atypical defense to the proposed representative's claims - that is, a "defense[] against it which would not be applicable to the class as a whole." Zenith Lab'ys, Inc. v. Carter-Wallace, Inc., 530 F.2d 508, 512 (3d Cir. 1976). If the proposed representative faces a defense that is unique to them, "the representative's interests might not be aligned with those of the class, and the representative might devote time and effort to the defense at the expense of issues that are common and controlling for the class." Schering Plough, 589 F.3d at 598 (quotation marks and citation omitted).

if **[*15]** . . . it applies to all members of the proposed class" because "the defense's application to the proposed class representative in that situation renders her situation typical of the rest of the class").

Regardless, only a defense that will become a "major focus" of the litigation precludes certification. *Beck, 457 F.3d at 300* (citations omitted). To pose a risk of becoming a "major focus," the defense must present a risk that the class representative will be preoccupied with litigating the defense to the detriment of litigating issues common to the class on behalf of absent class members. *See* *Schering Plough, 589 F.3d at 598*; *see also* *Beck, 457 F.3d at 301* (the "major focus" standard operates to "protect[] class members from a representative who is not focused on common concerns of the class"). Considerations in evaluating whether a defense will become a major focus of the litigation include whether the unique defense is unlikely to be meritorious; whether challenging the defense will impose exacting requirements on the proposed class representative; and, if meritorious, whether the defense would completely dispose of the proposed class representative's claims. *See* *Beck, 457 F.3d at 300* ("If a court determines an asserted unique defense has no merit, the defense will not preclude **[*16]** class certification"); *Zenith, 530 F.2d at 512* (defense could "divert much of [the plaintiff's] attention from the suit as a whole"); *Schering Plough, 589 F.3d at 599* (defense could "bar[]" the plaintiff from suing the defendant).

b. Unique Defense: Analysis

Plaintiffs' claims arise "from the same event, practice or course of conduct" as that of the class members and are "based on the same legal theory as the claims of the class." *Marcus, 687 F.3d at 598* (citation omitted). Plaintiffs' and class members' claims under *Sections 10(b)* and *20(a)* of the Exchange Act and *Rule 10b-5* arise from the same set of alleged misrepresentations, and the same set of allegations that they purchased Lannett's stock at artificially inflated prices and were injured when the stock price dropped after the alleged fraud was revealed. Accordingly, absent a finding that Defendants have defenses that are unique to the Plaintiff representatives, Plaintiffs are typical of the class. *See, e.g.,* *Hoxworth, 980 F.2d at 923 (3d Cir. 1992)* (typicality satisfied where plaintiffs' claim "for damages stemm[ed] solely from [defendant's] course of conduct" in violation of securities laws).

But Defendants, focusing on the reliance element of a cause of action for violations of *Section 10(b)* and *Rule 10b-5*, contend that Plaintiffs did not rely on the alleged misstatements and omissions alleged **[*17]** in the Complaint and therefore are susceptible to defenses that are atypical of the putative class. Specifically, Defendants contend that Plaintiffs' designated corporate representatives have admitted under oath at their depositions that Plaintiffs had no input on the decision to buy, hold, or sell Lannett common stock during the putative class period; rather, investment decisions were made by their investment managers without Plaintiffs' oversight or guidance. They further contend that the investment managers agreed that they placed no reliance on the alleged misstatements when making their investment decisions. Accordingly, Defendants' argument is that because Plaintiffs did not participate in the investment decisions and because Plaintiffs' investment managers did not rely on the alleged misrepresentations, Plaintiffs are not typical of the putative class they seek to have certified. As a preliminary matter, Plaintiffs respond by citation to two cases for the proposition that reliance on an investment manager or broker does not constitute a unique defense, as it is "quite likely" that other class members similarly relied on a manager or broker. *Pub. Emps.' Ret. Sys. of Miss. v. TreeHouse Foods, Inc., 2020 U.S. Dist. LEXIS 32586, 2020 WL 919249, at *5 (N.D. Ill. 2020)*; *Howard v. Liquidity Servs. Inc., 322 F.R.D. 103, 127 (D.D.C. 2017)*. Other than citing them, Plaintiffs **[*18]** make no argument and provide no rationale as to why this Court should adopt wholesale the holdings of these non-precedential out-of-circuit cases.

They do, however, persuade the Court that insofar as they are relying on a fraud-on-the market presumption of reliance, such presumption applies equally to all potential class members. To set the stage for this argument: In a securities fraud action, reliance on misrepresentations can be established directly or indirectly. A plaintiff can prove direct reliance by establishing that "they were aware of, and directly misled by, an alleged misrepresentation." *Semerenko v. Cendant Corp., 223 F.3d 165, 178 (3d Cir. 2000)* (citation omitted). A plaintiff also can prove reliance indirectly via the fraud-on-the-market theory, pursuant to which "a plaintiff in a securities action is generally entitled to a rebuttable presumption of reliance if he or she purchased or sold securities in an efficient market." *Id.* (citation omitted). As *Basic Inc. v. Levinson* explained, the premise of the fraud-on-the-market theory is that "in an open and developed securities market, the price of a company's stock is determined by the available material information regarding the company and its business." *485 U.S. 224, 241, 108 S. Ct. 978, 99 L. Ed. 2d 194 (1988)* (quotation marks and citation **[*19]** omitted). Accordingly, in such a market, "[m]isleading statements will . . . defraud purchasers of stock even if the purchasers do not directly rely on the misstatements." *Id. at 241-42* (quotation marks and citation omitted). "An investor who buys or sells stock at the price set by the market does so in reliance on the integrity of that price. Because most publicly available information is reflected in market price, an investor's reliance on any public material misrepresentations, therefore, may be presumed for purposes of a *Rule 10b-5* action." *Id. at 247*. Thus, where the fraud-on-the-market theory applies, "the court presumes . . . that the plaintiff actually relied on the market price of the security as an indicator of its value," and therefore that the plaintiff relied on the defendant's misrepresentations. *Semerenko, 223 F.3d at 178-79* (citation omitted).

"The fraud on the market theory of reliance, however, creates only a presumption, which a defendant may rebut by raising any defense to actual reliance." *Id. at 179* (citation omitted). "Any showing that severs the link between the alleged misrepresentation and . . . [the plaintiff's] decision to trade at a fair market price . . . [is] sufficient to rebut the presumption of reliance." *Basic, 485 U.S. at 248*. A party's presumptive **[*20]** reliance on misrepresentations can be rebutted "by showing that the investor would have purchased or sold the securities at [the market] price even with full knowledge of the misrepresentation, that the investor traded in the securities based on an actual belief that the market price was inaccurate, or that the investor's decision to trade was based on some factor other than the market price." *Semerenko, 223 F.3d at 179 n.7* (citations omitted). The defendant has the burden of persuasion to rebut presumptive reliance by a preponderance of the evidence. *Goldman Sachs Grp., Inc. v. Ark. Tchr. Ret. Sys., 141 S. Ct. 1951, 210 L. Ed. 2d 347, 2021 WL 2519035, at *7 (2021)*. If presumptive reliance is rebutted, then the "plaintiff would have to prove that he directly relied on the defendant's misrepresentation in buying or selling the stock." *Halliburton II, 573 U.S. at 269*.

Here, Defendants do not dispute that the fraud-on-the-market theory applies, and thus that class members are entitled to a rebuttable presumption of reliance.[7] Instead, they contend that the evidentiary record rebuts the presumption of reliance as to Plaintiffs UPRRS and Ironworkers and that they are therefore subject to unique defenses which render them atypical of the class. Plaintiffs of course argue otherwise. In evaluating each of their arguments, it is necessary to dip a toe into the merits **[*21]** of the matter.

1. Post-Disclosure Purchases

Defendants first argue that UPRRS and Ironworkers are subject to a unique defense because they purchased Lannett stock after "corrective disclosures," each of which are mentioned in the Complaint: (1) a July 16, 2014 regulatory filing disclosing Lannett's receipt of a subpoena and interrogatories from the Connecticut Attorney General regarding Lannett's pricing of a generic drug; (2) a November 6, 2014 regulatory filing disclosing a federal grand jury subpoena served on a Lannett executive arising out of an antitrust investigation of the pharmaceutical industry; (3) a December 8, 2014 regulatory filing disclosing Lannett's receipt of a federal grand jury subpoena arising out of the investigation; (4) a November 3, 2016 *Bloomberg* article concerning an ongoing federal antitrust investigation into price-fixing of generic drugs; and, (5) an October 31, 2017 complaint filed by the Connecticut Attorney General alleging a price-fixing conspiracy by generic drug makers. The records of UPRRS's and Ironworkers' transactions in Lannett stock establish that both purchased Lannett stock for the first time after the first three of these disclosures **[*22]** and purchased more stock after the fourth disclosure.

---

[7] To invoke the *Basic* presumption of reliance, "a plaintiff must prove that: (1) the alleged misrepresentations were publicly known, (2) they were material, (3) the stock traded in an efficient market, and (4) the plaintiff traded the stock between when the misrepresentations were made and when the truth was revealed." *Id. at 277-78* (citations omitted). Plaintiffs need not demonstrate materiality to establish that the fraud-on-the-market theory applies at class certification. *Amgen, 568 U.S. at 459-60*. Here, as to the remaining elements, Plaintiffs allege misrepresentations that were publicly known, including in public regulatory filings, press releases, and public statements, Plaintiffs purchased stock during the class period, and Lannett's common stock traded on a quintessential efficient market, the New York Stock Exchange. *See Oran v. Stafford, 226 F.3d 275, 282 (3d Cir. 2000)* ("[I]n an open and developed securities market like the New York Stock Exchange, the price of a company's stock is determined by all available material information regarding the company and its business"). Plaintiffs thus have satisfied the pre-requisites required to establish that the *Basic* presumption of reliance applies for purposes of class certification.

Defendants posit that the timing of these purchases rebuts the presumption of reliance for both Plaintiffs because their post-disclosure purchases are "strong evidence" that they would have, and did, purchase Lannett stock regardless of the alleged fraud. But, if after class certification Defendants try to rebut Plaintiffs' presumption of reliance based on the timing of Plaintiffs' stock transactions, the issues litigated will be broadly applicable to the class. The putative class includes all persons and entities that purchased Lannett stock from July 15, 2014, to October 31, 2017. The first three corrective disclosures occurred in the first six months of the class period, and the fourth corrective disclosure occurred approximately one year before the end of the class period. Because these disclosures were made early in or in the midst of the class period, many other class members likely will have purchased Lannett stock after these disclosures, just as Plaintiffs did. The question of whether the purchase of stock before or after a corrective disclosure defeats reliance is one that is salient across the class and is not unique to **[*23]** the named Plaintiffs.

2. Ironworkers' Investment Advisor

Defendants next argue that Ironworkers' presumption of reliance is rebutted because the testimony of the designated corporate representative of Ironworkers' investment manager, Snow Capital Management ("SCM"), proves that SCM would have decided to buy Lannett stock "even if the alleged misstatements had never been made." This argument, however, is countermanded by *Peil v. Speiser*, which explained that a party's failure to directly rely on misrepresentations fails to rebut the presumption of reliance because it "misses the point of the fraud on the market theory, under which a plaintiff may prevail even if he was entirely unaware of the alleged misrepresentations." *806 F.2d 1154, 1163 (3d Cir. 1986)*.

Defendants next argue that SCM's views were "atypical of the putative class" because SCM believed Lannett stock was undervalued due to concerns that Lannett would be implicated in price-fixing, whereas the Complaint alleges that Defendants' misrepresentations "created the false impression among investors . . . [that] there was no risk that Lannett would be implicated . . . [in] any illegal price-fixing scheme." Certainly SCM's corporate representative testified that **[*24]** after "spen[ding] considerable time" researching Lannett, SCM concluded that the market price of Lannett's stock was "cheap" because of "surrounding pressures that were possibly impacting the company's valuation," including "pricing erosion" - that is, decreasing drug prices - "in the generic industry" and "investigations by the Department of Justice and Attorney Generals . . . of various states into various generic drug manufacturers." But that some members of the class were focused on undervalued stock and others were not does not defeat *Basic*'s presumption of reliance which extends to "value investors," who "believe[] that certain stocks are undervalued or overvalued and attempt[] to 'beat the market' by buying the undervalued stocks and selling the overvalued ones." *Halliburton II, 573 U.S. at 273*. *Halliburton II* rejected the argument that value investors do not rely on the market price of a security because they "implicitly rel[y] on the fact that a stock's market price will eventually reflect material information," thereby allowing the investor to make a profit. *Id.* The value investor "tries to estimate *how* undervalued or overvalued a particular stock is, and such estimates can be skewed by a market price **[*25]** tainted by fraud." *Id. at 274*. "[T]o indirectly rely on a misstatement in the sense relevant for the *Basic* presumption, [the value investor] need only trade stock based on the belief that the market price will incorporate public information within a reasonable period." *Id.*

3. UPRRS's Investment Advisor

Defendants next argue that UPRRS's presumptive reliance is rebutted because the testimony of Roger Porter - the designated corporate representative of UPRRS's investment manager, Thompson, Siegel, and Walmsley ("TSW") - and internal e-mails between TSW employees prove that "TSW did not rely on the alleged misstatements or the integrity of the market price" in deciding to invest in Lannett stock. Defendants' first argument, that TSW invested in Lannett because it believed Lannett stock was undervalued, fails for the same reason set forth above.[8]

---

[8] Porter testified that TSW has a "value shop" investment approach and tries "to buy companies for some value below their intrinsic value and hopefully sell them at their intrinsic value or above." As to TSW's purchase of Lannett stock, Porter testified

Similarly, Defendants' argument that the presumption is undercut because TSW did not directly rely on the statements of the individual defendants has no traction because, as discussed *supra*, arguments premised on a party's failure to directly rely on misrepresentations do not necessarily rebut the presumption of reliance. *See* Peil, 806 F.2d at 1163.[9]

Defendants next argue that UPRRS's **[*26]** presumptive reliance is rebutted because TSW would have invested in Lannett regardless of whether TSW knew that Lannett's price increases on generic drugs were the result of anticompetitive conduct in the generic drug industry, which the alleged fraud purportedly concealed. This argument is not supported by the record. For evidentiary support, Defendants point to June 2015 e-mails between Porter and TSW research analysts discussing the prospects of Lannett's stock - specifically, Porter explains that, in his opinion, the "real driver" for the growth in Lannett's stock would be management and acquisitions because "gross margins" on Lannett drugs "are clearly coming down." Although these e-mails are evidence that at least some TSW employees - Porter and the two research analysts - believed that Lannett's drug price increases would not be a continuing source of growth for the company, these e-mails do not discuss the suspected causes of Lannett's drug price increases, let alone attribute these price increases to anticompetitive conduct.

Defendants finally argue that UPRRS's presumptive reliance is rebutted because TSW "fully appreciated" the risk that Lannett would be implicated in government **[*27]** investigations and enforcement actions. In essence, Defendants argue that TSW saw through Defendants' alleged fraud but invested anyway, "sever[ing] the link between the alleged misrepresentation" and the "decision to trade at a fair market price." Basic, 485 U.S. at 248. Neither does the record support this argument. Defendants rely on a series of November 2016 e-mails in which two TSW research analysts and other TSW employees received a third-party research report that analyzed the risks posed by the Department of Justice's probe of price-fixing in the generic drugs market and identified subpoenas of persons at Lannett as an "unfavorable" factor in evaluating the strength of the government's case. The e-mails between the two TSW research analysts indicate that far from fully appreciating the risks, the employees dismissed the potential case as a "big overshoot" and questioned whether there was "enough circumstantial evidence to suggest that an illegal pricing action has taken place." This correspondence fails to show that TSW invested in Lannett despite knowing the risks that Lannett would be implicated in government investigations and enforcement actions.

****

For the reasons set forth above, Defendants **[*28]** have not met their burden to show by a preponderance of the evidence that the named Plaintiffs are subject to a unique or atypical defense that is likely to become a major focus of the litigation. Because UPRRS and Ironworkers have satisfied each of the requirements of Rule 23(a), they will be appointed as representatives of the class. *See* Fed. R. Civ. P. 23(a) ("One or more members of a class may sue . . . as representative parties" where Rule 23(a) pre-requisites are satisfied).

B. *Rule 23(b)* Requirements

---

that TSW "took a position in Lannett . . . thinking that [it] had a favorable risk/reward relationship," explaining further that Lannett had "large cash position, a backlog of generic drugs that hadn't been approved yet, the opportunity to deploy their balance sheet for M&A opportunities," and other opportunities. As to potential "negatives" in investing in Lannett, Porter agreed that "one of the primary risks" included "price erosion" in the pricing of generic drugs.

[9] Further, the testimony cited by Defendants fails to establish that TSW did not directly rely on the misrepresentations of the individual defendants alleged in the Complaint. In this testimony, when asked if TSW "generally" relied on what Bedrosian said about Lannett, Porter testified that he "wouldn't say we rely" because "we really rely on ourselves" by "collect[ing] information" and "form[ing] our own risk/reward analysis." Porter then explained that TSW "listen[s]" to "management's discussions about risks and opportunities" and "factor that into our case." In other words, Porter confirmed that companies' management's statements are a factor in TSW's decision to trade in a security.

Having determined that Plaintiffs have established numerosity, commonality, adequacy and typicality as required by *Federal Rule of Civil Procedure 23(a)*, the question is now whether they can meet the requirements of *Rule 23(b)(3)*, to wit that (1) "questions of law or fact common to class members predominate over any questions affecting only individual members" (predominance); and, (2) "a class action is superior to other available methods for fairly and efficiently adjudicating the controversy" (superiority). *Fed. R. Civ. P. 23(b)(3)*. In addition, the concept of ascertainability is an implied additional requirement of *Rule 23(b)(3)*, because "[i]f class members are impossible to identify without extensive and individualized fact-finding or 'mini-trials,' then a class action is inappropriate." *Marcus, 687 F.3d at 593*.

Here, Defendants do not **[*29]** dispute that Plaintiffs have established superiority and ascertainability. They do argue, however, that Plaintiffs have not established predominance specifically because they have failed to comply with the requirements of *Comcast Corp. v. Behrend, 569 U.S. 27, 133 S. Ct. 1426, 185 L. Ed. 2d 515 (2013)*. First, however, again in the interest in clearing away the brush before reaching the core of that challenge, a quick analysis of the superiority and ascertainability requirements is warranted.

i. Superiority

"The superiority requirement [of *Rule 23(b)(3)*] asks the court to balance, in terms of fairness and efficiency, the merits of a class action against those of alternative available methods of adjudication." *In re Warfarin Sodium Antitrust Litig., 391 F.3d 516, 533-34 (3d Cir. 2004)* (quotation marks and citation omitted). The Rule provides a "nonexhaustive list of factors" relevant to evaluating the superiority of adjudication via class action, *Amchem Prods., Inc. v. Windsor, 521 U.S. 591, 615, 117 S. Ct. 2231, 138 L. Ed. 2d 689 (1997)*, including: (1) "the class members' interests in individually controlling the prosecution or defense of separate actions"; (2) "the extent and nature of any litigation concerning the controversy already begun by or against class members"; (3) "the desirability or undesirability of concentrating the litigation of the claims in the particular forum"; and, (4) "the likely difficulties in managing a class action," **[*30]** *Fed. R. Civ. P. 23(b)(3)*.

Here, absent the class action device many potential claims would not be filed: Numerous potential plaintiffs with small damages claims would not be warranted in litigating a lengthy securities fraud action such as this, while others, who may have more at stake, would flood the courts with individual cases seeking damages on the same theory. Certainly, class members would have no ability to control the prosecution of separate actions. Further, concentration of the case in a class action would be an efficient use of limited judicial resources. Adjudication by class action presents no obvious manageability problems, as common questions of law and fact are central to each class member's claims. As such, a class action is superior to alternative methods for adjudicating the case.

ii. Ascertainability

To establish ascertainability, the proponent of class certification must prove by a preponderance of the evidence that "(1) the class is defined with reference to objective criteria; and (2) there is a reliable and administratively feasible mechanism for determining whether putative class members fall within the class definition." *Byrd, 784 F.3d at 163* (quotation marks and citations omitted). They need not "be able **[*31]** to identify all class members at class certification - instead, a plaintiff need only show that class members *can* be identified." *Id.* (quotation marks and citation omitted). Here, Plaintiffs propose a definite class relying on objective criteria: all persons and entities (excluding Defendants and their officers and directors) that purchased or acquired Lannett's publicly traded common stock from July 15, 2014, to October 31, 2017. Plaintiffs explain and Defendants do not dispute that class members can be identified using records of shareholder acquisitions. Thus, the ascertainability requirement is met.

iii. Preliminary Issues Concerning the Predominance Inquiry

Before determining whether Plaintiffs have satisfied the predominance requirement, two preliminary issues must be resolved: first, whether, as Defendants argue, the Supreme Court's decision in *Comcast v. Behrend, 569 U.S. 27, 133 S. Ct. 1426, 185 L. Ed. 2d 515 (2013)* precludes certification here; and, second, whether the opinions of the parties' respective damages experts should be excluded for failure to satisfy the *Daubert* standard.

a. Applicability of *Comcast v. Behrend*

Defendants raise only one argument in their predominance challenge. Relying on *Comcast v. Behrend*, they argue that Plaintiffs fail **[*32]** to put forward a damages model that is consistent with their theory of liability. Contrary to Defendants' position, *Comcast* does not move the needle.

Comcast was an antitrust case, brought by subscribers to Comcast's cable-television services. *569 U.S. at 29-30*. These subscribers alleged that Comcast was engaged in a scheme to buy up competitor cable providers in Philadelphia and the surrounding area, which enabled the company to hold cable prices in this region at supra-competitive levels. *Id.*

The plaintiffs sought to certify a class under *Rule 23(b)(3)*. To establish predominance, the district court required plaintiffs to show both "(1) that the existence of individual injury resulting from the alleged antitrust violation (referred to as 'antitrust impact') was 'capable of proof at trial through evidence that [was] common to the class rather than individual to its members'; and (2) that the damages resulting from that injury were measurable 'on a class-wide basis' through use of a 'common methodology.'" *Id.* (quoting *Behrend v. Comcast Corp., 264 F.R.D. 150, 154 (E.D. Pa. 2010)*). The plaintiffs offered four theories of antitrust impact, only one of which - their so-called "overbuilder" theory - was accepted by the district court as capable of class-wide proof. *Id. at 31*. Under this **[*33]** theory, Comcast's conduct reduced competition from "overbuilders," companies that build competing cable networks in regions where an incumbent cable provider operates. *Id.*

The plaintiffs maintained that their damages could be measured on a class-wide basis, pursuant to a regression model which compared actual prices in the region affected by the alleged anticompetitive conduct with hypothetical prices in an unaffected region. *Id. at 32*. Importantly, the model purported to measure the cumulative effect of the plaintiffs' four antitrust impact theories on cable subscription prices, and was incapable of isolating damages attributable to plaintiffs' sole surviving liability theory. *Id.*

Neither the district court nor the Third Circuit saw this as a predominance-defeating issue, but the Supreme Court did. According to the Supreme Court, if the plaintiffs were to:

> prevail on their claims, they would be entitled only to damages resulting from reduced overbuilder competition, since that is the only theory of antitrust impact accepted for class-action treatment by the District Court. It follows that a model purporting to serve as evidence of damages in this class action must measure only those damages attributable **[*34]** to that theory. If the model does not even attempt to do that, it cannot possibly establish that damages are susceptible of measurement across the entire class for purposes of *Rule 23(b)(3)*.

Id. at 35. The Court noted that "[f]or all we know, subscribers in Gloucester County may have been overcharged" not because of reduced overbuilder competition, but because of Comcast's "alleged elimination of satellite competition (a theory of liability that is not capable of class-wide proof)." *Id.* Because the plaintiffs' proposed damages model could not "bridge the differences between supra-competitive prices in general and supra-competitive prices attributable to the deterrence of overbuilding, *Rule 23(b)(3)* [could not] authorize treating subscribers . . . as members of a single class." *Id. at 38*.

Lower courts have since spilt much ink attempting to decipher *Comcast*'s impact on the *Rule 23(b)(3)* predominance analysis. *See, e.g.*, Alex Parkinson, *Comcast Corp. v. Behrend and Chaos on the Ground*, *81 U. Chi. L. Rev. 1213, 1225-38 (2014)* (describing chaos among the lower courts as to *Comcast*'s implications). In *Neale v. Volvo Cars of North America, LLC*, the Third Circuit limited *Comcast* to its unique facts, finding the case "inapposite" to the predominance analysis in a products liability action. **[*35]** *794 F.3d 353, 374 (3d Cir. 2015)*. There, plaintiffs sought certification of six state-wide damages classes composed of consumers who alleged that

Volvo sold vehicles with a uniform design defect. *Id. at 357*. The district court granted the plaintiffs' request and Volvo appealed, arguing that certification was inappropriate under *Comcast*.

The Third Circuit disagreed, interpreting the *Comcast* decision thus: "Comcast held that an antitrust litigation class could not be certified because the plaintiffs' damages model did not demonstrate the theory of antitrust impact that the district court accepted for class action treatment." *Id. at 374*; *see also* *Suboxone, 967 F.3d at 270* (*Comcast* held "that class certification was inappropriate when a damages model reflected injury from four antitrust injuries, but only one viable theory of antitrust liability and injury remained in the case"). The court explained: "Because [the *Comcast* plaintiffs'] evidence could not translate the relevant legal theory of the harmful event into an analysis of the economic impact of that event, [the Supreme Court] determined that common questions could not predominate over individual ones." *Neale, 794 F.3d at 374* (quotation marks, italics, and citation omitted). In *Neale*, however, there was no question that the class **[*36]** members' damages flowed from the defendant's conduct that created the legal liability; thus, *Comcast* did not apply. *See id.*; *see also* *Butler v. Sears, Roebuck & Co., 727 F.3d 796, 800 (7th Cir. 2013)* ("Unlike the situation in *Comcast*, there is no possibility in this case that damages could be attributed to acts of the defendants that are not challenged on a classwide basis; all members of the mold class attribute their damages to mold and all members of the control-unit class to a defect in the control unit").

Plaintiffs suggest that neither does *Comcast* apply to this securities action, where Plaintiffs propose to measure out-of-pocket damages based on the difference in the amount of artificial inflation in Defendants' stock price at the time of purchase and at the time of sale. There is some merit to this assertion: Unlike in *Comcast*, where the plaintiffs offered multiple different theories of how the defendant's conduct violated federal ***antitrust law***, here in this securities fraud case Plaintiffs (having toyed with various other theories during this litigation)[10] now focus on a single theory of liability - that the Defendants made material misrepresentations or omissions; that Defendants' misrepresentations artificially inflated Lannett's stock price; **[*37]** and the stock price declined when the truth emerged causing financial loss to Plaintiffs and the class. Although the Complaint alleges many misrepresentations about various, interrelated topics, because each of Defendants' alleged misrepresentations is part of their broader alleged concealment of the lack of competition in the generic drug market and the potential adverse consequences on Lannett's business, each misrepresentation is categorically part of the same, single theory. *See, e.g., In re Vivendi, S.A. Sec. Litig., 838 F.3d 223, 250 (2d Cir. 2016)* ("individual alleged misstatements . . . relat[ing] to different aspects of a larger problem" were part of "a network of interrelated lies, each one slightly distinct from the other, but all collectively aimed at perpetuating a broader, material lie").

Comcast is "inapposite" here because the numerical mismatch between damages model (one model) and liability theory (four theories) at issue in that case is not present here. To recap, the *Comcast* plaintiffs pursued four liability theories prior to certification, and their damages expert developed a model that calculated damages based on all four theories. The district court rejected three of these theories at class certification, after the damages **[*38]** model had been developed. This resulted in a mismatch between the sole theory of liability remaining at class certification and the damages model, which calculated damages as if all four liability theories remained. Here, at class certification, Plaintiffs advance a single theory of liability, as delineated by their proposed damages expert, Chad Coffman, thus:

> Defendants repeatedly issued materially false or misleading statements and financial results throughout the Class Period, even as the details of the pricefixing scheme under investigation came to light and as the investigation widened to include Lannett itself. The Complaint alleges that through a series of corrective disclosures, the market finally learned the truth about Lannett's fraudulent scheme, and once revealed, the price of Lannett Common Stock fell, harming investors who bought at inflated prices.

---

[10] The Complaint does, at points, mention Lannett's potential involvement in anticompetitive conduct. However, to the extent that Plaintiffs' Complaint might have espoused a theory of liability that Lannett concealed its own involvement in anticompetitive conduct, this Court's May 15, 2019 Opinion put paid to that theory. *See* *Utesch v. Lannett Co., Inc., 385 F.Supp.3d 408, 417 n.4 (E.D. Pa. 2019)* ("Defendants' arguments as to this theory [went] without response from Plaintiffs, and therefore the theory [was] waived").

Coffman employed that theory in his expert report and testified unequivocally during the hearing on Defendants' motion to exclude his opinion that he did not incorporate Plaintiffs' prior theories of liability at any point in drafting his report. The issue that led to a mismatch between damages model and liability theory fatal **[*39]** to certification in *Comcast* - *i.e.*, that the expert damages opinion was prepared to measure damages for four different theories of liability, and could not disaggregate damages for the one remaining theory of liability after three theories were rejected - is, accordingly, not presented here. That said, the Supreme Court's explanation that "[t]he first step in a damages study is the translation of the *legal theory of the harmful event* into an analysis of the economic impact *of that event*" does have application to the predominance analysis which application will be explored *infra.* Comcast, 569 U.S. at 38 (quoting Federal Judicial Center, Reference Manual on Scientific Evidence 432 (3d ed. 2011)).

b. *Daubert* Motions

Coffman's report focuses on whether the market for Lannett common stock was efficient during the class period and whether calculating damages is subject to a common methodology under Section 10(b) and Rule 10b-5. He concludes that the answer to both questions is yes. In response, Defendants submitted a report by Jennifer Marietta-Westberg ("the Marietta-Westberg Report") opining to the contrary that Coffman did not put forth a methodology for calculating damages on a class-wide basis in a manner consistent with Plaintiffs' **[*40]** theory of liability. Both parties argue that the other party's expert fails to satisfy the *Daubert* standard for the admission of expert evidence. Thus, before finally getting to the predominance analysis it is necessary to address the parties' respective *Daubert* motions.

1. Daubert Standard

Federal Rule of Evidence 702, which codified the *Daubert* standard and governs the admissibility of expert testimony, states:

> A witness who is qualified as an expert by knowledge, skill, experience, training, or education may testify in the form of an opinion or otherwise if: (a) the expert's scientific, technical, or other specialized knowledge will help the trier of fact to understand the evidence or to determine a fact in issue; (b) the testimony is based on sufficient facts or data; (c) the testimony is the product of reliable principles and methods; and (d) the expert has reliably applied the principles and methods to the facts of the case.

Fed. R. Evid. 702. The *Daubert* standard "has three major requirements: (1) the proffered witness must be an expert, *i.e.*, must be qualified; (2) the expert must testify about matters requiring scientific, technical or specialized knowledge, *i.e.*, reliability; and (3) the expert's testimony must assist the **[*41]** [finder] of fact, *i.e.*, fit." United States v. Schiff, 602 F.3d 152, 172 (3d Cir. 2010) (quotation marks, brackets, and citation omitted). The party offering the expert must satisfy each requirement by a preponderance of the evidence. In re TMI Litig., 193 F.3d 613, 663 (3d Cir. 1999).

To satisfy the qualification requirement, an expert must possess "specialized knowledge regarding the area of testimony." Betterbox Comm'ns Ltd. v. BB Techs., Inc., 300 F.3d 325, 327 (3d Cir. 2002) (quotation marks and citation omitted). "The basis of this specialized knowledge can be practical experience as well as academic training and credentials." Waldorf v. Shuta, 142 F.3d 601, 625 (3d Cir. 1998) (quotation marks and citations omitted). The qualification requirement is interpreted "liberally," Pineda v. Ford Motor Co., 520 F.3d 237, 244 (3d Cir. 2008), and "a broad range of knowledge, skills, and training qualify an expert as such," In re Paoli R.R. Yard PCB Litig., 35 F.3d 717, 741 (3d Cir. 1994) (citation omitted). The expert need not "be the best qualified or . . . have the specialization that the court considers most appropriate," Pineda, 520 F.3d at 244, and "[i]f the expert meets liberal minimum qualifications, then the level of the expert's expertise goes to credibility and weight, not admissibility," Kannankeril v. Terminix Int'l, Inc., 128 F.3d 802, 809 (3d Cir. 1997) (citation omitted).

To satisfy the reliability requirement, "the expert must have good grounds for his or her belief," not "subjective belief or unsupported speculation." Paoli, 35 F.3d at 742 (quotation marks and citation omitted). Expert opinion need not possess the "best foundation, **[*42]** or even . . . the best methodology or unassailable research. Rather, the test is whether the particular opinion is based on valid reasoning and reliable methodology." TMI, 193 F.3d at 665 (quotation marks and citation omitted). "The evidentiary requirement of reliability is lower than the merits standard of correctness," and Plaintiffs seeking introduction of expert evidence do not "have to prove their case twice - they do not have to demonstrate to the judge by a preponderance of the evidence that the assessments of their experts are *correct*, they only have to demonstrate by a preponderance of evidence that their opinions are reliable." Paoli, 35 F.3d at 744. *Daubert* offers multiple factors to evaluate reliability, including, *inter alia*, "whether the method is generally accepted" and "the qualifications of the expert witness testifying based on the methodology." Id. at 742 n.8 (citations omitted). However, there is "considerable leeway in deciding in a particular case how to go about determining whether particular expert testimony is reliable," and the "reasonable measures of reliability in a particular case is a matter that the law grants the trial judge broad latitude to determine." Kumho Tire Co. v. Carmichael, 526 U.S. 137, 152, 153, 119 S. Ct. 1167, 143 L. Ed. 2d 238 (1999) (citation omitted).

The final requirement of Rule 702 demands **[*43]** that "expert testimony . . . fit the issues in the case." Schneider ex rel. Est. of Schneider v. Fried, 320 F.3d 396, 404 (3d Cir. 2003). "In assessing whether an expert's proposed testimony fits, we are asking whether the expert testimony proffered is sufficiently tied to the facts of the case that it will aid the jury in resolving a factual dispute." Schiff, 602 F.3d at 173 (quotation marks, ellipses, and citation omitted). "[T]his is a question of relevance, and Rule 702, which governs the admissibility of expert testimony, has a liberal policy of admissibility if it has the potential for assisting the trier of fact." *Id.* (quotation marks and citations omitted). "The standard is not that high, but is higher than bare relevance." *Id.* (internal quotation marks and citation omitted). However, "[e]xpert testimony which does not relate to any issue in the case is not relevant and, ergo, non-helpful." Daubert, 509 U.S. at 591 (quotation marks and citations omitted).

Here, in addition to the questions regarding qualifications, reliability, and fit, there is an additional overlay - the expert's relevance to the class certification determination - that must be considered. Specifically, under *In re Blood Reagents Antitrust Litigation*, where a party relies on expert testimony to meet class certification requirements the **[*44]** court must evaluate any *Daubert* challenges to such expert testimony in deciding the class certification motion. 783 F.3d 183 (3d Cir. 2015). That is because the proponent of certification must satisfy Rule 23(b) with "evidentiary proof," and "[e]xpert testimony that is insufficiently reliable to satisfy the *Daubert* standard cannot . . . establish through evidentiary proof that Rule 23(b) is satisfied." Id. at 187 (quotation marks and citations omitted). Accordingly, "a plaintiff cannot rely on challenged expert testimony, when critical to class certification, to demonstrate conformity with Rule 23 unless the plaintiff also demonstrates, and the trial court finds, that the expert testimony satisfies the standard set out in *Daubert*." *Id.* (quotation marks and citation omitted).

Blood Reagents sets out a two-step process for addressing *Daubert* challenges in the context of class certification proceedings. The first question to be answered is whether the "aspects of plaintiffs' expert testimony offered to satisfy Rule 23" are "critical to class certification." Id. at 187-88. If they are, then the Court turns to deciding whether the expert evidence is admissible under *Daubert.* Id. at 188. If they are not, there is no need to address the *Daubert* challenge in that the expert testimony **[*45]** would have no bearing on whether the class should be certified.

2. The Coffman Report

Defendants contend that Coffman's opinion fails to satisfy the *Daubert* standard because it is unreliable and fails to fit the facts of the case, but do not contend that he is unqualified to serve as an expert.

Coffman opines that although damages "calculations would likely depend, in part, on the completion of discovery, and full development of the case record, based on [his] expertise and experience in dozens of similar matters and understanding the nature of the claims in this case, . . . damages in this action are subject to a well-settled, common methodology that can be applied to the Class as a whole," to wit, the out-of-pocket damages methodology. Under this method, "damages are equal to the artificial inflation in the share price at the time of purchase minus the artificial inflation per share at the time of sale." After artificial inflation - that is, the increase in Lannett's stock price caused by the fraudulent misrepresentations - is "quantified on each day during the class period," calculating damages "for each class member is formulaic based upon information collected in the claims process," **[*46]** including the record of each class member's purchase and sale of a security.

In response to Defendants' *Daubert* motion to exclude Coffman's opinion, Plaintiffs, interestingly, contend that there is no need to go beyond the first step of the *Blood Reagents* analysis and that, accordingly, there is no need to decide the motion. Specifically, they suggest that Coffman's opinion is "helpful, but not critical to showing that damages can be calculated consistent with Plaintiffs' theory of liability,"[11] because the out-of-pocket damages method is widely recognized as standard in securities fraud cases. However, it cannot be presumed that *Rule 23* is satisfied merely because a case involves securities fraud claims. *See* *Hydrogen Peroxide, 552 F.3d at 322*. Something more is required and, in the absence of other evidence, the Coffman Report is critical to certification and must meet the *Daubert* standard.

Turning now to the *Daubert* analysis. As stated, it is not disputed that Coffman possesses the requisite specialized knowledge to be qualified as an expert. He holds advanced degrees in economics and public policy, is a certified chartered financial analyst, and has substantial experience in securities valuation and damages analysis. Specifically, **[*47]** he is currently president of Global Economics Group, which he founded in 2008 and which "specializes in the application of economics, finance, statistics, and valuation principles" in a variety of contexts, including securities litigation. He was previously employed for 12 years at Chicago Partners LLC, during which he conducted and managed analysis of securities valuation and damages. He testified during his deposition that he has served as an expert in between 50 and 100 securities class actions, and his resume reflects that he regularly serves as a damages expert in such cases.

With respect to the reliability requirement, that too is satisfied. Coffman's opinion that "damages in this action are subject to a well-settled, common methodology that can be applied to the Class as a whole" is based on his expertise and experience in dozens of similar matters, understanding of the nature of the claims in this case, and explanation of the out-of-pocket method. As noted, Coffman has ample experience as a damages expert in securities fraud cases. *See* *Paoli, 35 F.3d at 742 n.8* (recognizing that "the qualifications of the expert witness testifying based on the methodology" supports reliability). Further, he explains **[*48]** that the out-of-pocket method "has been applied in virtually every matter in which [he has] observed or participated in" as an expert, and correctly states that the out-of-pocket damages methodology is a "standard and well-accepted method for calculating class wide damages" for claims under *Section 10(b)*, as are at issue here. *See e.g.*, 7 Newberg on Class Actions § 22:81 (5th ed.) (explaining that "most courts utiliz[e] an 'out of pocket' damage measurement that similarly applies across the class" to calculate damages for *Section 10* and *Rule 10b-5* claims). Moreover, Coffman's report, deposition testimony, and testimony at the *Daubert* hearing clearly show Coffman examined and relied on the case-specific allegations of the Complaint in this matter.[12] Lastly, Coffman describes how the out-of-pocket method works,[13] including how damages are calculated (as the difference in the artificial inflation of Lannett's stock at the time of purchase and sale) across the class (that is, by calculating for each class member the difference in artificial inflation when they bought and sold Lannett stock using purchase and sale information gathered during the claims

[11] But this suggestion is directly contradicted by (1) other portions of their briefing in which they argue that "the Coffman Report demonstrates that damages in this action are capable of being calculated on a class-wide basis using the out-of-pocket damages methodology"; and, (2) that they offer no other "evidentiary proof" in support of this proposition.

[12] Defendants suggest that Coffman conducted no case-specific analysis in support of his opinion, making much of his testimony that the language of the damages section of the Coffman Report was "language [he'd] used before" in past cases and that the "language describing the out-of-pocket damages methodology and the rationale behind it . . . doesn't change from report to report." That Coffman is a frequent flyer in these kinds of cases in the context of this *Daubert* motion cuts in favor of his reliability rather than against it.

[13] Defendants argue that Coffman's opinion is unreliable because he does not propose a damages method, but instead offers only a definition of out-of-pocket loss. But he does more than that - he proposes a method of calculating damages on a class-wide basis. He also summarizes, albeit in general terms, the steps by which out-of-pocket losses would be calculated for the class (that is, by quantifying levels of inflation of Lannett's stock during the class period, then performing a "formulaic" calculation of class members' damages by subtracting the level of inflation of Lannett's stock at the time of each investor's sale from the level of inflation at the time of purchase). *See also, e.g.*, 4 Newberg on Class Actions § 12:5 (5th ed.) (listing "common methods" of proving class-wide damages, including a "formula derived from the facts of the case that can be applied generally to all class members").

process).[14] Coffman's experience, expertise, understanding of Plaintiffs' **[*49]** claims, and explanation of the out-of-pocket method render him reliable.[15]

Coffman's opinion also satisfies the fit requirement. In opining that damages "in this action are subject to a well-settled, common methodology that can be applied to the Class as a whole," the Coffman Report is squarely relevant to the dispute at issue: whether Plaintiffs have established by a preponderance of the evidence for purposes of certification that damages will be susceptible to class-wide measurement. It is therefore helpful for purposes of resolving "the particular disputed factual issues in the case." *TMI, 193 F.3d at 670* (citation omitted).

Because Coffman is qualified as a damages expert, and his opinion is reliable and fits with this case, Coffman's opinion meets the *Daubert* standard and Defendants' motion to exclude will be denied.

3. The Marietta-Westberg Report

Plaintiffs move to exclude Marietta-Westberg's opinion, contending that Marietta-Westberg is unqualified, her opinion is unreliable, and that it fails to fit the issues presented at class certification.

Marietta-Westberg opines that Coffman "has not put forth an appropriate methodology that can measure damages in a manner consistent **[*50]** with Plaintiffs' theory of liability." Specifically, she opines that Coffman has not adequately explained how Plaintiffs will calculate (1) the impact on Lannett's stock price of the alleged misrepresentations and corrective disclosures; (2) the impact on Lannett's stock price of Defendants' alleged risk-related misrepresentations (that is, misrepresentations of Lannett's risk of being implicated in government investigations and enforcement actions against anticompetitive conduct) and the materialization of these risks; and, (3) "time-varying inflation" (that is, how the level of fraudulent inflation of Lannett's stock varied during the class period). She further goes on to state that "there is reason to believe" that the drop in Lannett's stock price after the alleged corrective disclosures cannot be a "reliable measure" of the inflation in Lannett's stock because the drop is attributable to factors other than revelations of Defendants' alleged fraud.

However, her report challenges neither the use of the out-of-pocket method in this case nor that this method could be applied on a class-wide basis. To the contrary, she testified during the *Daubert* hearing that she "does not dispute **[*51]** the out-of-pocket method," but instead "disputes . . . the lack of detail in the damages method." In other words, her report does not challenge the central premise of Plaintiffs' argument for why predominance is satisfied as to damages - that is, because damages can be calculated on a class-wide basis using the out-of-pocket

---

[14] Coffman concedes that Plaintiffs have more work to do to calculate damages using the out-of-pocket method. Specifically, his report explains, to calculate the level of inflation of Lannett's stock caused by Defendants' fraud, which is the "input" for the out-of-pocket method, Plaintiffs will have to perform a "detailed" analysis "informed by information learned in discovery." His report identifies multiple frequently-used methods and techniques to calculate artificial inflation and distinguish "confounding" sources of increases or decreases in a stock price from the impact of an alleged fraud. Although the Report does not identify the specific methods or techniques to be deployed here, the method of determining the inflation of Lannett's stock price caused by the alleged fraud is common to the class. Moreover, a plaintiff's "damages model does not need to be exact" at class certification. *In re Modafinil Antitrust Litig., 837 F.3d 238, 261 (3d Cir. 2016)* (citation omitted). Thus, Coffman need not support his opinion with a damages model specifying precisely how Plaintiffs will measure the price impact of the various misrepresentations and corrective disclosures alleged here, nor specify exactly how Plaintiffs will distinguish the impact of various other factors to be uncovered in discovery that may have affected Lannett's stock price during the class period.

[15] Defendants also challenge Coffman's opinion as unreliable and not fitting the case based on an event study model Coffman used to assess market efficiency for purposes of determining if the *Basic* presumption of reliance applies. Because, Defendants argue, this event study model can measure only the impact on Lannett's stock price of news specific to Lannett, and not the impact of news concerning Lannett's competitors, the event study model cannot support Coffman's damages opinion and does not fit the facts of the case. However, this event study is not the basis of Coffman's opinion: the Coffman Report's section on damages explicitly states that "[t]he event study [he] performed for th[e] report is for Market Efficiency purposes and is not an attempt at valuing artificial inflation" of Lannett's stock price.

method - but only raises issues regarding the details of how this method will be applied. Indeed, Marietta-Westberg concurred during the *Daubert* hearing that the artificial inflation of Lannett's stock price will "be determined based upon proof that is common to all class members," and similarly that an analysis of the drop in Lannett's stock price following alleged corrective disclosures would not differ as to particular Plaintiffs or class members. She is correct: each of the issues raised in her report concern a matter entirely common to the class, to wit, whether Plaintiffs will be able to accurately calculate how much of the increase or decrease in Lannett's stock price is attributable to Defendants' alleged fraud, and the revelation of that fraud, rather than other potential factors.

Although "[w]eighing conflicting expert testimony at the certification stage **[*52]** . . . may be integral to the rigorous analysis *Rule 23* demands," *Hydrogen Peroxide, 552 F.3d at 323*, "a court should not address merits-related issues beyond what is necessary to determine preliminarily whether certain elements will necessitate individual or common proof," *Harnish v. Widener Univ. Sch. of L., 833 F.3d 298, 305 (3d Cir. 2016)* (quotation marks and citation omitted). Undoubtedly at the merits stage of this litigation Marietta-Westberg and Coffman will go head-to-head regarding the viability of Plaintiffs' damages model. Certainly, the soundness of Coffman's analysis can be appropriately challenged at the merits stage of this litigation, but it is not necessary to address it here. *See, e.g., Amgen, 568 U.S. at 466* ("*Rule 23* grants courts no license to engage in free-ranging merits inquiries at the certification stage"). Because Plaintiffs' answers for these issues will be the same for each class member, their resolution is not necessary to determine if Plaintiffs have satisfied the predominance requirement.[16] Accordingly, because predominance - the sole disputed class certification requirement for which the Marietta-Westberg Report is offered - does not turn on her report, it is not critical to class certification, *see Blood Reagents, 783 F.3d at 187*, and therefore, Plaintiffs' *Daubert* challenge need not be addressed.

iv. Predominance

Now **[*53]** that the preliminary issues - the applicability (or rather non-applicability) of *Comcast v. Behrend* to this matter and the parties' respective *Daubert* motions - are resolved, what remains is to determine if Plaintiffs have shown that "questions of law or fact common to class members predominate over any questions affecting only individual members." *Fed. R. Civ. P. 23(b)(3)*.

Defendants do not dispute that predominance is satisfied as to Defendants' liability for Plaintiffs' claims. They do, however, argue that Plaintiffs have failed to establish that damages can be calculated consistent with Plaintiffs' theory of liability. Their challenge to predominance arises in the context of their discussion of the applicability of *Comcast*. And, while, as discussed supra *, Comcast* is distinguishable, its central and uncontroversial premise - that "[t]he first step in a damages study is the translation of the *legal theory of the harmful event* into an analysis of the economic impact *of that event*" - drives the predominance inquiry here. *Comcast, 569 U.S. at 38* (quotation marks and citation omitted)).

The predominance analysis "look[s] first to the elements of the plaintiffs' underlying claims and then, through the prism of *Rule 23*, undertake[s] a rigorous **[*54]** assessment of the available evidence and the method or methods by which the plaintiffs propose to use the evidence to prove those elements." *Reinig v. RBS Citizens, N.A., 912 F.3d 115, 128 (3d Cir. 2018)* (quotation marks, brackets, and citations omitted). "Because the nature of the evidence that will suffice to resolve a question determines whether the question is common or individual, a district court must formulate some prediction as to how specific issues will play out in order to determine whether common or individual issues predominate in a given case." *Hydrogen Peroxide, 552 F.3d at 311* (quotation marks and citations omitted).

[16] Further, to the extent that Marietta-Westberg is opining that Plaintiffs will be unable to prove that class members' losses were not "caused by factors other than the revelation of a misrepresentation" such as "changed investor expectations, new industry-specific or firm-specific facts, conditions, or other events," this is squarely an issue of loss causation, and Plaintiffs need not prove loss causation at class certification. *Halliburton I, 563 U.S. at 812-813* (quotation marks and citations omitted).

"An individual question is one where members of a proposed class will need to present evidence that varies from member to member, while a common question is one where the same evidence will suffice for each member to make a prima facie showing or the issue is susceptible to generalized, class-wide proof." *Tyson Foods, Inc. v. Bouaphakeo, 577 U.S. 442, 453, 136 S. Ct. 1036, 194 L. Ed. 2d 124 (2016)* (quotation marks, brackets, and citation omitted). If "proof of the essential elements of the cause of action requires individual treatment, then class certification is unsuitable." *Newton, 259 F.3d at 172*. However, if "the common, aggregation-enabling, issues in the case are more prevalent or important than the non-common, aggregation-defeating, individual issues," the **[*55]** predominance requirement is satisfied. *Tyson Foods, 577 U.S. at 453* (quotation marks and citations omitted).

Because "the focus of the predominance inquiry is on whether the defendant's conduct was common as to all of the class members, and whether all of the class members were harmed by the defendant's conduct," *Sullivan, 667 F.3d at 298*, "[p]redominance is a test readily met in certain cases alleging consumer or securities fraud," *Amchem, 521 U.S. at 625* (citation omitted); *see also* *Sullivan, 667 F.3d at 297-300* (explaining that "the presence of . . . questions stemming solely from [the defendant's] asserted behavior" is an "apt illustration" of why predominance is "readily met" in cases alleging fraud (quotation marks and citations omitted)).

Plaintiffs have established by a preponderance of the evidence that the predominance requirement is satisfied as to damages. Here, they have adequately established that damages are susceptible to class-wide proof by showing that damages can be measured on a class-wide basis. As set out in the Coffman Report, Plaintiffs propose to calculate damages using a damages methodology that is applicable to the entire class: the out-of-pocket method. The Coffman Report explains how, after calculating the impact of Defendants' misrepresentations on Lannett's **[*56]** stock price, calculating damages under the out-of-pocket method is "formulaic" for each class member based on a simple calculation of the difference between the amount of fraud-induced inflation of Lannett's stock price at the time of purchase and sale. As Plaintiffs contend, calculating damages using the out-of-pocket method is standard in securities fraud class actions, and Defendants have not contended to the contrary. *See also, e.g., Sowell v. Butcher & Singer, Inc., 926 F.2d 289, 297 (3d Cir. 1991)*; *Levy v. Gutierrez, 448 F.Supp.3d 46, 65 (D.N.H. 2019)* (explaining that "courts have found that Coffman's [out-of-pocket damages] methodology . . . provides a workable method for measuring damages" in securities fraud class actions, and collecting cases). Further, the out-of-pocket method is consistent with Plaintiffs' liability theory. As Plaintiffs explain, their theory of liability is that "Defendants' misrepresentations artificially inflated Lannett stock, and that the stock price declined when the truth emerged causing financial loss to those who purchased at inflated prices." Plaintiffs' proposal of the out-of-pocket method to measure this loss is consistent with their theory of liability.

Plaintiffs concede that calculating damages using the out-of-pocket damages method will require individual **[*57]** damages calculations based on the record of each class member's transactions in Lannett stock. Individual class members' damages will differ depending on when and how much Lannett stock they purchased or sold. However, such individualized damages calculations do not defeat predominance. *See, e.g., In re Cmty. Bank of N. Va., 418 F.3d 277, 305-06 (3d Cir. 2005)* ("Although the calculation of individual damages is necessarily an individual inquiry, . . . the necessity of this inquiry does not preclude class action treatment where class issues predominate" (citations omitted)). As it is undisputed that common issues will predominate as to Defendants' liability, and because Plaintiffs have adequately established that damages can be calculated on a class-wide basis and that the necessity of individualized damages calculations for each class member does not defeat predominance, the predominance requirement is satisfied.

****

Accordingly, Plaintiffs have satisfied each of the superiority, ascertainability, and predominance requirements of *Rule 23(b)*, as well as each of the class action pre-requisites of *Rule 23(a)*. The case therefore may proceed as a certified class action.

IV. CONCLUSION

For the foregoing reasons, the *Daubert* motions will be denied, the motion for class certification **[*58]** will be granted, UPRRS and Ironworkers will be appointed class representatives, and Abraham, Fruchter & Twersky, LLP will be appointed class counsel. An appropriate order follows.

BY THE COURT:

/s/Wendy Beetlestone, J.

WENDY BEETLESTONE, J.

ORDER

AND NOW, this 12th day of August 2021, upon consideration of Plaintiffs University of the following: Puerto Rico Retirement System and Ironworkers Locals 40, 361 & 417 Union Security Funds' Motion for Class Certification (ECF No. 121), Defendants Lannett Company, Inc., Arthur P. Bedrosian, and Martin P. Galvan's Response thereto (ECF No. 156), and Plaintiffs' Reply in further support thereof (ECF No. 168); Plaintiffs' Motion to Exclude the Report and Testimony of Jennifer Marietta-Westberg (ECF No. 175), Defendants' Response thereto (ECF No. 180), and Plaintiffs' Reply in further support thereof (ECF No. 181); and, Defendants' Motion to Exclude the Opinions of Chad Coffman (ECF No. 177), Plaintiffs' Response thereto (ECF No. 179), and Defendants' Reply in further support thereof (ECF No. 182); and, following oral argument held on the Motion for Class Certification on May 24, 2021 (ECF No. 170) and a hearing on Defendants' Motion to Exclude on July **[*59]** 27, 2021 (ECF 191), for the reasons set forth in the accompanying Opinion entered this day, it is **HEREBY ORDERED** as follows:

1. Plaintiffs' Motion to Exclude (ECF 175) is **DENIED**;

2. Defendants' Motion to Exclude (ECF 177) is **DENIED**;

3. Plaintiff's Motion for Class Certification (ECF 121) is **GRANTED**, and the following class is **CERTIFIED** pursuant to *Federal Rule of Civil Procedure 23(b)(3)*:

    a. All persons and entities who purchased or acquired the publicly traded common stock of Lannett Company, Inc. ("Lannett" or the "Company") during the period from July 15, 2014 and October 31, 2017, inclusive (the "Class Period"), and who were damaged thereby (the "Class"). Excluded from the Class are Defendants, the officers and directors of the Company, at all relevant times, members of their immediate families and their legal representatives, heirs, successors or assigns and any entity in which Defendants have or had a controlling interest.

4. Lead Plaintiff University of Puerto Rico Retirement System and Plaintiff Ironworkers Locals 40, 361 & 417 Union Security Funds are appointed as Class Representatives.

5. Lead Counsel Abraham, Fruchter & Twersky, LLP is appointed as Class Counsel pursuant to *Federal Rule of Civil Procedure 23(g)*.

BY THE COURT:

Core Terms

generic, manufacturer, patent, FDA, Plaintiffs', acceleration clause, antitrust, settlements, Defendants', allegations, brand, license, motion to dismiss, Pharmaceuticals, launch, conspiracy, Counts, sales, no-AG, purchasers, estimate, cases, class plaintiff, market share, Drugs, prices, marketing, anticompetitive, lawsuits, royalty

LexisNexis® Headnotes

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Federal Food, Drug & Cosmetic Act

HN1[] **Agriculture & Food, Federal Food, Drug & Cosmetic Act**

Under the Hatch-Waxman Act, the first company that applies to produce an AB-rated generic (the first filer) receives a 180-day period of exclusivity during which no other non-AB-rated generic can compete with the brand-name drug.

Patent Law > Remedies > Damages > Infringer's Profits

HN2[] **Damages, Infringer's Profits**

A reverse payment settlement settles patent infringement litigation in a manner virtually unheard of outside of pharmaceuticals. Specifically, a reverse payment settlement requires the patentee to pay the alleged infringer, rather than the other way around. In exchange, the alleged infringer agrees not to produce the patented product for some time.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Federal Food & Drugs Act

HN3[] **Agriculture & Food, Federal Food & Drugs Act**

To receive Food and Drug Administration approval, a proposed Risk Evaluation and Mitigation Strategy (REMS) must balance (1) the need to evaluate and mitigate risk of a drug to ensure that the drug's benefits outweigh its risks; and (2) the potential burdens of REMS elements on patient access and the health care delivery system. A REMS can include a medication guide, patient package inserts, and/or restrictions on the distribution of the drug.

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

HN4[] **Inequitable Conduct, Anticompetitive Conduct**

A reverse payment settlement is one wherein the patentee pays the alleged infringer, rather than the other way around. In exchange, the alleged infringer delays entry into the patentee's market. These reverse payment settlements are virtually unheard of outside of pharmaceuticals. Such settlements also sometimes violate the antitrust laws.

Business & Corporate Compliance > ... > Negotiable Instruments > Discharge & Payment > Time for Payments

HN5[] **Discharge & Payment, Time for Payments**

An acceleration clause is a type of most-favored-entry clause that allows a generic manufacturer to enter a market sooner if certain contingencies occur.

Evidence > Judicial Notice > Adjudicative Facts > Facts Generally Known

Evidence > Judicial Notice > Adjudicative Facts > Verifiable Facts

HN6[] **Adjudicative Facts, Facts Generally Known**

A trial court may take judicial notice of matters that are either generally known within the trial court's territorial jurisdiction or can be accurately and readily determined from sources whose accuracy cannot reasonably be questioned. Fed. R. Evid. 201(b). Moreover, courts may consider materials referenced in the complaint under the incorporation by reference doctrine, even if a plaintiff did not attach those materials to the complaint.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN7[] **Motions to Dismiss, Failure to State Claim**

Fed. R. Civ. P. 8(a)(2) requires a complaint to include a short and plain statement of the claim showing that the pleader is entitled to relief. A complaint that fails to meet this standard may be dismissed pursuant to Fed. R. Civ. P. 12(b)(6). Fed. R. Civ. P. 8(a) requires a plaintiff to plead enough facts to state a claim to relief that is plausible on its face. A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged. The plausibility standard is not akin to a probability requirement, but it asks for more than a sheer possibility that a defendant has acted unlawfully. For purposes of ruling on a Rule 12(b)(6) motion, the court accepts factual allegations in the complaint as true and construes the pleadings in the light most favorable to the nonmoving party. The court, however, need not assume the truth of legal conclusions merely because they are cast in the form of factual allegations. Additionally, mere conclusory allegations of law and unwarranted inferences are insufficient to defeat a motion to dismiss.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

HN8[] Motions to Dismiss, Failure to State Claim

If a court determines that a complaint should be dismissed, it must then decide whether to grant leave to amend. Under Fed. R. Civ. P. 15(a), leave to amend shall be freely given when justice so requires, bearing in mind the underlying purpose of Fed. R. Civ. P. 15 to facilitate decisions on the merits, rather than on the pleadings or technicalities. When dismissing a complaint for failure to state a claim, a district court should grant leave to amend even if no request to amend the pleading was made, unless it determines that the pleading could not possibly be cured by the allegation of other facts.

Civil Procedure > Judicial Officers > Judges > Discretionary Powers

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

HN9[] Judges, Discretionary Powers

Leave to amend generally shall be denied only if allowing amendment would unduly prejudice the opposing party, cause undue delay, or be futile, or if the moving party has acted in bad faith. At the same time, a court is justified in denying leave to amend when a plaintiff repeatedly fails to cure deficiencies by amendments previously allowed. Indeed, a district court's discretion to deny leave to amend is particularly broad when a plaintiff has previously amended the complaint.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Federal Food, Drug & Cosmetic Act

HN10[] Agriculture & Food, Federal Food, Drug & Cosmetic Act

Under the Hatch-Waxman Act, the first company that applies to produce an AB-rated generic (the first filer) receives a 180-day period of exclusivity during which no other non-AB-rated generic can compete with the brand-name drug.

Trademark Law > ... > Infringement Actions > Defenses > Genericness

HN11[] Defenses, Genericness

A no-authorized generic (no-AG) agreement falls under Actavis's rule because it may represent an unusual, unexplained reverse transfer of considerable value from the patentee to the alleged infringer and may therefore give rise to the inference that it is a payment to eliminate the risk of competition. Indeed, no-AG agreements can in fact be more anticompetitive than a large cash payment for delay.

Trademark Law > ... > Infringement Actions > Defenses > Genericness

HN12[] Defenses, Genericness

Until generic production commences, no-authorized generic agreements are simply naked restraints on trade.

Energy & Utilities Law > Oil, Gas & Mineral Interests > Royalty Interests

HN13[ ] Oil, Gas & Mineral Interests, Royalty Interests

Courts have held that royalty payments may be effectively a kickback.

Patent Law > ... > Damages > Patentholder Losses > Reasonable Royalties

HN14[ ] Patentholder Losses, Reasonable Royalties

A common form of possible compensation in reverse settlements is a royalty structure. Specifically, a royalty structure may achieve the same effect as an explicit no-authorized (no-AG) generic commitment. This de facto no-AG agreement may be achieved when a result of the brand manufacturer launching an authorized generic would be that the generic company's obligation to pay royalties is reduced.

Business & Corporate Compliance > ... > Negotiable Instruments > Discharge & Payment > Time for Payments

Real Property Law > ... > Mortgages & Other Security Instruments > Transfers > Due on Sale Clauses

HN15[ ] Discharge & Payment, Time for Payments

Acceleration clauses plausibly cause anticompetitive harm as part of an alleged reverse payment scheme. Indeed, several courts have denied summary judgment against acceleration clause allegations despite various assertions of broad procompetitive justifications for such clauses.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN16[ ] Motions to Dismiss, Failure to State Claim

Plaintiffs' factual allegations must be accepted by a court as true and construed in the light most favorable to plaintiffs at the motion to dismiss stage.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN17[ ] Complaints, Requirements for Complaint

A plaintiff can meet Actavis's pleading standard without describing in perfect detail the world without the reverse payment, calculating reliably the payment's exact size, or preempting every possible explanation for it. For instance, non-cash payments are plausibly large and unjustified based on relatively general allegations. Payments may be sufficiently large because they allegedly are extremely valuable and exceed litigation costs saved through settlement. Similarly, reverse payments may be plausibly unjustified also because they exceed alleged litigation costs.

Antitrust & Trade Law > Sherman Act > Claims

HN18[] Sherman Act, Claims

Mere allegations of parallel conduct—even consciously parallel conduct—are insufficient to state a claim under § 1 of the Sherman Act. Plaintiffs must plead something more, some further factual enhancement, a further circumstance pointing toward a meeting of the minds of the alleged conspirators.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

HN19[] Conspiracy to Monopolize, Elements

An overarching conspiracy in the antitrust context plausibly exists when each defendant (1) had reason to know that other defendants were involved in the same broad project; and (2) had reason to believe that their own benefits derived from the operation were probably dependent upon the success of the entire venture.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

Evidence > Types of Evidence > Circumstantial Evidence

HN20[] Conspiracy to Monopolize, Elements

A conspiracy by its very nature is a secretive operation, and it is a rare case wherein all aspects of a conspiracy can be laid bare in court with the precision of a surgeon's scalpel. Even if a conspirator lacks awareness of much of a conspiracy, that ignorance is immaterial when the conspirator's acts were essential steps in a single scheme. Thus, an antitrust plaintiff may present direct or circumstantial evidence of a conspiracy.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN21[] Scope, Monopolization Offenses

An element of an overarching conspiracy is that defendants had reason to believe that their own benefits derived from the operation were probably dependent upon the success of the entire venture. Evidence of this shared belief includes economic actions and outcomes that are largely inconsistent with unilateral conduct but largely consistent with explicitly coordinated action. When firms act unilaterally in non-collusive markets, the goal of any profit-maximizing firm is to obtain a monopoly by capturing an ever increasing share of the market. Analogously, in a competitive market, attempts to grow the pie by charging supra-competitive prices will be tempered by price competition as individual firms attempt to capture greater market share. By contrast, when firms in a market are able to coordinate their pricing and production activities, they can increase their collective profits and reduce consumer welfare by raising price and reducing output.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

Business & Corporate Compliance > ... > Negotiable Instruments > Discharge & Payment > Time for Payments

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN22[] **Conspiracy to Monopolize, Elements**

Even at the summary judgment stage, courts have found it significant for inferring the existence of a conspiracy that each generic competitor agreed to an acceleration clause. It follows that acceleration clauses are even more potent evidence of a conspiracy to monopolize at the motion to dismiss stage.

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

HN23[] **Inequitable Conduct, Anticompetitive Conduct**

Patent and antitrust policies are both relevant in determining the scope of the patent monopoly—and consequently ***antitrust law*** immunity—that is conferred by a patent.

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Misuse

HN24[] **Defenses, Misuse**

Whether a particular restraint lies beyond the limits of a patent monopoly is a conclusion that flows from an analysis under the rule of reason, not the analysis's starting point.

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN25[] **Private Actions, Sherman Act**

The Ninth Circuit has instructed that, when analyzing the effect of agreements under the rule of reason, a court must give plaintiffs the full benefit of their proof without tightly compartmentalizing the various factual components and wiping the slate clean after scrutiny of each.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN26[] **Per Se Rule & Rule of Reason, Per Se Violations**

Sherman Act claims are examined under one of two distinct tests: per se violation or rule of reason. Under the per se test, agreements whose nature and necessary effect are so plainly anti-competitive that no elaborate study of the industry is needed to establish their illegality are found to be antitrust violations. For those activities not within the per se invalidity category, courts employ the rule of reason test.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN27[] **Complaints, Requirements for Complaint**

Fed. R. Civ. P. 8(d) expressly allows alternative statements of a claim or defense—regardless of consistency.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > ... > Private Actions > Standing > Sherman Act

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

Antitrust & Trade Law > Regulated Practices > Private Actions > Prioritizing Resources & Organization for Intellectual Property Act

HN28[] **Sherman Act, Claims**

To bring a federal antitrust claim, a private plaintiff must allege antitrust injury. 15 U.S.C.S. §§ 15 and 26. Antitrust injury is loss or damage of the type the antitrust laws were designed to prevent and that flows from that which makes defendants' acts unlawful. In turn, whether the plaintiffs' injury flows from the defendants' anticompetitive acts depends on common law principles of causation. Causation is an intensely factual question that should typically be resolved by a jury. Thus, once a plaintiff presents evidence that he suffered the sort of injury that would be the expected consequence of the defendant's wrongful conduct, he has done enough to withstand summary judgment—let alone a motion to dismiss—on the ground of absence of causation.

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

HN29[] **Inequitable Conduct, Anticompetitive Conduct**

It is normally not necessary to litigate patent validity to answer an antitrust question.

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

HN30[] **Inequitable Conduct, Anticompetitive Conduct**

A court, by examining the size of a challenged payment, may well be able in an antitrust case to assess its likely anticompetitive effects along with its potential justifications without litigating the validity of a patent. In a word, the size of the unexplained reverse payment can provide a workable surrogate for a patent's weakness, all without forcing a court to conduct a detailed exploration of the validity of the patent itself.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN31[] **Scope, Monopolization Offenses**

Monopoly exists when one firm controls all or the bulk of a product's output, and no other firm can enter the market, or expand output, at comparable costs.

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

HN32[] **Inequitable Conduct, Anticompetitive Conduct**

It is normally not necessary to litigate patent validity to answer an antitrust question.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN33[] **Motions to Dismiss, Failure to State Claim**

Patent validity merely raises a disputed issue of fact that cannot be resolved on a motion to dismiss.

Governments > Legislation > Statute of Limitations > Time Limitations

HN34[] **Statute of Limitations, Time Limitations**

Remove the pay, remove the delay.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Right to Petition Immunity

Constitutional Law > Bill of Rights > Fundamental Freedoms > Freedom to Petition

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Scope

HN35[] **Noerr-Pennington Doctrine, Right to Petition Immunity**

Under the Noerr-Pennington doctrine, those who petition the government for redress are generally immune from antitrust liability. This right to petition extends to all departments of the Government, including the courts. However, Noerr-Pennington immunity does not apply if a governmental petition is a mere sham to cover what is actually nothing more than an attempt to interfere directly with the business relationships of a competitor. This sham exception has two elements. First, the petition at issue must be objectively baseless in the sense that no reasonable litigant could realistically expect success on the merits. Second, the petitioner's subjective motivation must have been to thwart competition.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Right to Petition Immunity

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Scope

HN36[] **Noerr-Pennington Doctrine, Right to Petition Immunity**

The Ninth Circuit has held that whether something is a genuine effort to influence government action, or a mere sham for Noerr-Pennington purposes, is a question of fact. Thus, courts rarely award Noerr-Pennington immunity at the motion to dismiss stage.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Right to Petition Immunity

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Scope

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

HN37[] **Noerr-Pennington Doctrine, Right to Petition Immunity**

Passive government approval is insufficient for Noerr-Pennington immunity.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Right to Petition Immunity

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Scope

HN38[] **Noerr-Pennington Doctrine, Right to Petition Immunity**

The Ninth Circuit has explained that in the context of a series of alleged sham proceedings, the question is not whether any one suit has merit, but whether they are brought pursuant to a policy of starting legal proceedings without regard to the merits and for the purpose of injuring a market rival. In such a context, the legal success of an occasional sham suit is irrelevant with regard to Noerr-Pennington immunity.

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Experimental Use & Testing

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Federal Food, Drug & Cosmetic Act

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Federal Food & Drugs Act

HN39[] **Defenses, Experimental Use & Testing**

Under the Hatch-Waxman Act, the filing of a lawsuit triggers an automatic, 30-month stay of any Food and Drug Administration approval of an Abbreviated New Drug Application—regardless of a suit's outcome. Thus, the automatic, 30-month stay is a collateral injury the defendant's mere use of legal process invariably inflicts. From this collateral injury, a district court may conclude that in filing an objectively baseless lawsuit against the generic manufacturer, the brand name manufacturer was motivated not to assert a patent in good faith, but to impose expense and delay on the generic manufacturer to delay its entry into the drug market.

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

Antitrust & Trade Law > Sherman Act > Remedies > Damages

HN40[] **Standing, Clayton Act**

Illinois Brick constrains the class of parties that have statutory standing to recover damages through antitrust suits. Pepper constrains that class of plaintiffs further by holding that Illinois Brick set forth a bright-line rule, which means that there is no reason to ask whether the rationales of Illinois Brick apply with equal force in every individual case.

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

Antitrust & Trade Law > Sherman Act > Remedies > Damages

HN41[] **Standing, Clayton Act**

There is no reason to ask whether the rationales of Illinois Brick apply with equal force in every individual case to constrain the class of parties that have statutory standing to recover damages through antitrust suits. Courts should not engage in an unwarranted and counterproductive exercise to litigate a series of exceptions.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

HN42[] **Remedies, Damages**

When co-conspirators have jointly committed an antitrust violation, a plaintiff who is the immediate purchaser from any of the conspirators is directly injured by the violation.

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN43[] **Standing, Clayton Act**

Courts should not engage in an unwarranted and counterproductive exercise to litigate a series of exceptions to Illinois Brick for parties that have statutory standing to recover damages through antitrust suits.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

HN44[] **Remedies, Damages**

The Illinois Antitrust Act provides that no provision of the Act shall deny any person who is an indirect purchaser the right to sue for damages.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN45[] **Remedies, Damages**

740 ILCS 10/7 provides that that no person shall be authorized to maintain a class action in any court of the State of Illinois for indirect purchasers asserting claims under the Illinois Antitrust Act, with the sole exception of the Attorney General of the State of Illinois.

Governments > State & Territorial Governments > Claims By & Against

HN46[] **State & Territorial Governments, Claims By & Against**

The current New Hampshire version of RSA 356:11 provides that any person may bring suit regardless of whether that person dealt directly or indirectly with the defendant. RSA 356:11(II).

Civil Procedure > Appeals > Appellate Briefs

Civil Procedure > Appeals > Reviewability of Lower Court Decisions > Preservation for Review

Civil Procedure > Pleading & Practice > Motion Practice > Opposing Memoranda

Civil Procedure > Pleading & Practice > Motion Practice > Content & Form

Civil Procedure > ... > Summary Judgment > Supporting Materials > Memoranda of Law

HN47[] **Appeals, Appellate Briefs**

Arguments raised for the first time in a reply brief are waived.

Antitrust & Trade Law > ... > Private Actions > Purchasers > Direct Purchasers

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN48[] **Purchasers, Direct Purchasers**

Both the Puerto Rico Supreme Court and the U.S. District Court for the District of Puerto Rico have not limited antitrust standing to direct purchasers. Rather, Puerto Rico's district court has expressly held that it is immaterial whether plaintiffs are direct or indirect purchasers.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN49[] **Remedies, Damages**

The Utah Antitrust Act allows a person who is a citizen of the State of Utah or a resident of the State to bring suit for antitrust injury. Utah Code Ann. § 76-10-3109(1)(a).

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Constitutional Law > ... > Case or Controversy > Standing > Particular Parties

HN50[] **Standing, Requirements**

Unlike Article III standing, statutory standing considers whether a cause of action exists under a particular statute. Thus, it is often immaterial to Article III standing that class plaintiffs did not allege facts to show that they satisfied the statutory requirements of some states' antitrust laws. Those class plaintiffs may still have Article III standing to represent a class containing members who do satisfy those statutory requirements.

Counsel: **[**1]** For New York State Teamsters Council Health and Hospital Fund, 20-cv-4056, Plaintiff: Dena C. Sharp, LEAD ATTORNEY, Girard Sharp LLP, Interim Co-Lead Class Counsel, San Francisco, CA; Clark Craddock, Radice Law Firm, Princeton, NJ; Justin Nicholas Boley, Kenneth A. Opinion

[*836] ORDER GRANTING IN PART AND DENYING IN PART MOTION TO DISMISS

Re: Dkt. No. 109

PUBLIC REDACTED [8] VERSION**

In this multidistrict litigation, two sets of plaintiffs allege that certain manufacturers of the drug sodium oxybate (brand name Xyrem) have violated federal and state antitrust laws. The first set of plaintiffs, the Class Plaintiffs, comprise the following coalition of putative class representatives: (1) A.F. of L. — A.G.C. Building Trades Welfare Plan; (2) Blue Cross Blue Shield Association; (3) City of Providence, Rhode Island; (4) Government Employees Health Association, Inc.; (5) New York State Teamsters Council Health and Hospital Fund; (6) Self-Insured Schools of California; (7) UFCW Local 1500 Welfare Fund; and (8) Xyrem patient Ruth Hollman.

The second set of plaintiffs comprises United HealthCare Services, Inc., which brings an individual action against the same Defendants as the Class Plaintiffs.

Defendants are (1) Jazz Pharmaceuticals Plc, Jazz Pharmaceuticals, Inc., and Jazz Pharmaceuticals Ireland Limited (collectively, "Jazz"); (2) Hikma Labs, Inc. (formerly known as Roxane Laboratories, Inc.), Hikma Pharmaceuticals USA Inc. (formerly known as West-Ward Pharmaceuticals Corp.), Eurohealth (USA), Inc., and Hikma Pharmaceuticals plc. (collectively, "Hikma"); and (3) **[**9]** Amneal Pharmaceuticals LLC, Par Pharmaceuticals, Inc., and Lupin Ltd, Lupin Pharmaceuticals Inc., and Lupin, Inc. (collectively, the "Later Generic Defendants").

Before the Court is Defendants' Motion to Dismiss Counts 1, 5-12, and 17 of the Consolidated Class Action Complaint and Counts 1, 5-9, and 11 of United Healthcare Services' Complaint. ECF No. 109 ("motion to dismiss" or "Mot."). Having considered the parties' briefing, the relevant law, and the record in this case, the Court GRANTS IN PART and DENIES IN PART Defendants' motion to dismiss.

I. BACKGROUND

A. Factual Background

At issue in this antitrust case is the drug sodium oxybate. Sodium oxybate is older than aspirin. United HealthCare Services' Compl. ¶ 1, No. 21-CV-02710, ECF No. 1 **[*837]** ("UHS"). Since the 1960s, sodium oxybate has been a treatment for narcolepsy. *Id.* ¶ 2. In 2002, a drug company named Orphan Medical obtained Food and Drug Administration ("FDA") approval to market sodium oxybate as a treatment for cataplexy—the sudden loss of muscle control while awake—associated with narcolepsy. *Id.* Orphan Medical named this treatment Xyrem. *Id.*

In 2005, Defendant Jazz Pharmaceuticals, Inc. ("Jazz")[1] acquired Orphan Medical. *Id.* **[**10]** ¶ 3. The acquisition was unprofitable at first. *Id.* By 2009, Jazz was on the verge of bankruptcy. *Id.* Jazz responded by replacing its management team and allegedly "embark[ing] on a multifaceted scheme to dramatically increase the price of Xyrem." *Id.* As Jazz's co-founder and Chief Executive Officer ("CEO") Bruce Cozadd stated publicly, Jazz had "substantial pricing power" because "nothing else [] does what [Xyrem] does. There is no substitute." *Id.* ¶ 111 (quoting Final Transcript, Jazz Pharmaceuticals Inc. at LCM Annual Healthcare Conference (Nov. 17, 2010), https://tinyurl.com/y4lchnrs). As Jazz's CEO further stated, "there's really no competition" for Xyrem. *Id.* ¶ 4 (quoting Conference Call Transcript; Jazz Pharmaceuticals, Inc. at Piper Jaffray Health Care Conference, Jazz Pharmaceuticals (Nov. 30. 2011), https://investor.jazzpharma.com/node/12191/html).

To reinforce Xyrem's market power, Jazz filed for and obtained three families of patents. UHS ¶ 80. None of the patents claim the active pharmaceutical compound in Xyrem (sodium oxybate) because the sodium oxybate was discovered long ago. *Id.* ¶ 81. Jazz instead patented (1) certain formulations and methods of treatment; (2) a drug distribution system; and (3) certain methods of administrating sodium oxybate. *Id.* ¶¶ 81-93. These patents had or have expiration dates between December 2019 and March 2033. *Id.*

Xyrem's lack of competition allowed Jazz to raise its price. Based largely on Xyrem price increases, Jazz's stock price grew about 5,000% from its 2009 low to November 2010 price of over $50 per share. *Id.* ¶ 111. Specifically, according to a Bloomberg report in May 2014, the price of Xyrem increased about 841% from 2007 through 2014. Consolidated Class Action Compl. ¶ 188, ECF No. 62 ("CAC"). These price increases boosted **[**11]** Jazz's profits because gross margins on Xyrem were over 90%. *Id.* ¶ 149.

The profitability of Xyrem did not go unnoticed. Between July 2010 and November 2017, nine manufacturers of generic drugs sought to enter Xyrem's market before the expiration of Xyrem patents. CAC ¶¶ 148, 183 (listing generic manufacturers). Specifically, these generic drug manufacturers filed Abbreviated New Drug Applications ("ANDAs") seeking FDA approval to manufacture, market, and sell generic drugs that would be bioequivalent to Xyrem. *Id.* ¶¶ 148, 183. As a general matter, bioequivalent generic drugs are called "AB-rated" generics or commonly just "generics." UHS ¶ 47.

More than 11 years have passed since the first ANDA was filed on July 8, 2010. CAC ¶ 148. To date, however, no AB-rated generics for Xyrem are on the market. CAC ¶ 3. Nor will any AB-rated generic be on the market until at least December 31, 2025 if Plaintiffs' allegations prove true. CAC ¶ 453. Instead, the generic drug companies have allegedly agreed to sell only "authorized" generics from January 1, 2023 until at least December 31, 2025. *Id.* These authorized generics will merely **[*838]** comprise *Xyrem*, manufactured by *Jazz*, that is *relabeled* and marketed **[**12]** by the generic drug companies. CAC ¶ 5 (citing FDA, *FDA List of Authorized Generic Drugs* (July 1, 2021), https://www.fda.gov/drugs/abbreviated-new-drug-application-anda/fda-list-authorized-generic-drugs).

The Court describes this alleged series of events below in three parts. First, the Court summarizes the general difference between AB-rated generics and authorized generics. Second, the Court recounts nine ANDAs to manufacture, market, and sell an AB-rated generic version of Xyrem. Lastly, the Court outlines Jazz's allegedly anticompetitive scheme which successfully prevented generic entry into the market for sodium oxybate as a treatment for narcolepsy.

1. Structure of the generic market: "AB-rated" generics vs. "authorized" generics

As relevant here, a generic drug may be either an "AB-rated" generic or an "authorized" generic. An AB-rated generic is commonly called simply a "generic drug." *See FDA List of Authorized Generic Drugs, supra* (cited by CAC ¶ 5 & n.7). AB-rated generics are deemed by the FDA to be bioequivalent to the brand name drug. UHS ¶ 47; *accord* FDA, *Orange Book Preface* (41st ed. Jan. 1, 2021), https://www.fda.gov/drugs/development-approval-

---

[1] Unless otherwise noted, the Court uses "Jazz" to refer to Defendants Jazz Pharmaceuticals, Inc., Jass Pharmaceuticals Ireland Limited, and/or Jazz Pharmaceuticals Public Limited Company. *See, e.g.*, UHS ¶ 3 n.1 (same naming convention).

process-drugs/orange-book-preface **[**13]** (detailing AB rating). Even so, AB-rated generics differ from the brand name drug in two ways. First, despite their bioequivalence, AB-rated generics "may have certain minor differences from the brand-name product, such as different inactive ingredients." *FDA List of Authorized Generic Drugs, supra*.

Second and most important, AB-rated generics are "developed and made by a company other than the company that makes the brand-name drug." *Id.* When a company enters a market with an AB-rated generic, the generic typically captures about 90% of the branded drug's sales within one year—and sells for about *15%* of the brand name drug's price. UHS ¶ 51; *accord* FTC, *Pay-for-Delay: How Drug Company Pay-Offs Cost Consumers Billions* at 8 (Jan. 2010) (finding same). ***HN1***[] Under the Hatch-Waxman Act, the first company that applies to produce an AB-rated generic (the "first filer") receives a "180-day period of exclusivity" during which "no other [non-AB-rated] generic can compete with the brand-name drug." *Federal Trade Commission ("FTC") v. Actavis, Inc., 570 U.S. 136, 143-44, 133 S. Ct. 2223, 186 L. Ed. 2d 343 (2013)*.

An authorized generic ("AG"), by contrast, "is essentially a brand-name drug *produced by a brand manufacturer* but *marketed* under a generic label." *In re Nexium (Esomeprazole) Antitrust Litig., 968 F. Supp. 2d 367, 380 (D. Mass. 2013)* (emphasis added). "Other than the fact that [an AG] does not have the brand name on its label, it **[**14]** is the exact same drug product as the branded product." *FDA List of Authorized Generic Drugs, supra*. Thus, unlike AB-rated generics, AGs are marketed and sold "either by the brand manufacturer itself" or "another company *with the brand company's permission*." *Id.* (emphasis added); UHS ¶ 61 (same).

Importantly here, it is far more common that a third party markets an AG (with the brand manufacturer's permission) than the brand manufacturer doing so itself. For instance, the FTC has found that "out of 119 AG launches from 2001 to 2008, *only one* was distributed by a brand drug company without generic marketing." *In re Intuniv Antitrust Litig. ("Intuniv"), 496 F. Supp. 3d 639, 671 (D. Mass. 2020)* (emphasis added) (citing FTC, *Authorized Generic Drugs: Short-Term Effects & Long-Term Impact* (2011) ("FTC 2011 AG Study")); *see also* CAC ¶ 87 n.36 (same **[*839]** study). Moreover, at least one court has credited research that "out of the 529 AG launches since 2009 . . . only two were distributed by a brand company without generic expertise." *Intuniv, 496 F. Supp. 3d at 671*. In short, it is rare for a brand manufacturer to market and sell its own AG. Brand manufacturers instead tend to license marketing/relabeling rights to a third party.

Regardless of who markets them, AGs and AB-rated generics compete. AGs in fact enjoy an opportunity for competition that other **[**15]** generics lack. That unique opportunity is an AG's ability to compete with an AB-rated generic that is protected by the *Hatch-Waxman Act*'s 180-day period of exclusivity during which no other AB-rated generic can compete. AGs are thus the "only potential source of generic price competition during the first-to-file generic manufacturer's 180-day exclusivity period." CAC ¶ 99. Typically, this competition between an AG and a first-filer's AB-rated generic "reduc[es] the revenues generated by the first-filer's generic product by 40-52% during the 180-day exclusivity period." UHS ¶ 62 (citing FTC 2011 AG Study at iii). The competition also reduces generic prices by about 15%. CAC ¶ 99 (citing IMS Consulting, *Assessment of Authorized Generics in the U.S.* (2006), http://208.106.226.207/downloads/IMSAuthorizedGenericsReport 6-22-06.pdf). Drug purchasers benefit as a result.

In sum, AB-rated generics are manufactured and sold by generic drug manufacturers—and for about 15% of the brand name drug's price. AGs, by contrast, are often manufactured by the brand manufacturer itself because AGs are simply the brand name drug but relabeled. AGs are then marketed as a "generic" only with the brand manufacturer's **[**16]** permission (or, rarely, by the brand manufacturer itself). Lastly, when AB-rated generics and AGs compete during the first filer's 180-day exclusivity period, that competition lowers generic drug prices by about 15%.

2. From 2010 through 2017, first Hikma and then Later Generic Defendants apply to manufacture, market, and sell a generic version of Xyrem.

In July 2010, Defendant Hikma Labs, Inc. ("Hikma") submitted an Abbreviated New Drug Application ("ANDA") to manufacture, market, and sell an AB-rated generic version of Xyrem.[2] *Id.* ¶ 148. Under the Hatch-Waxman Act's procedures for generic drug applications, Hikma's ANDA certified that Jazz's Xyrem patents were either "'invalid or w[ould] not be infringed by the manufacture, use, or sale' of the drug described in the [ANDA]." *Actavis, 570 U.S. at 143 (2013)* (quoting *21 U.S.C. § 355(j)(2)(A)(vii)(IV)*) (summarizing ANDA process); *accord, e.g.*, CAC ¶ 149 (alleging same). This type of certification by a generic manufacturer against the patents of the brand-name manufacturer is called a "Paragraph IV certification." CAC ¶ 149.

Paragraph IV certifications have three important features, as detailed by the United States Supreme Court in *FTC v. Actavis*. The Court applies those features to the facts **[**17]** of this case. First, Hikma's Paragraph IV certification statutorily infringed Jazz's Xyrem patents. *Actavis, 570 U.S. at 143* (citing *35 U.S.C. § 271(e)(2)(A)*); ***[*840]*** *accord, e.g.*, CAC ¶ 150 (listing five patents).

Second, if Jazz responded with an infringement suit within 45 days, the FDA would be statutorily bound to "withhold approving the generic, usually for a 30-month period, while the parties litigate patent validity (or infringement) in court." *Actavis, 570 U.S. at 143*. This statutory delay would hinder Hikma and future ANDA filers alike. That is, if Jazz's suit against Hikma—the first to file an ANDA for generic Xyrem—were to settle, a subsequent "generic that files a [P]aragraph IV after learning that the first filer has settled will (if sued by the brand-name) have to wait out a stay period of (roughly) 30 months before the FDA may approve its application, just as the first filer did." *Id. at 155*.

Third, if Hikma were to "overcome any patent obstacle and bring the generic to market," Hikma's generic would be the exclusive AB-rated generic for 180 days. *Id.* "[T]his 180-day period of exclusivity can prove valuable, possibly 'worth several hundred million dollars.'" *Id. at 144* (quoting Hemphill, *Paying for Delay: Pharmaceutical Patent Settlement as a Regulatory Design Problem* ***[**18]*** , *81 N.Y.U. L. Rev. 1553, 1579 (2006)*); *accord, e.g.*, UHS ¶ 44 (alleging same). "The 180-day exclusivity period, however, can belong only to the first generic to file." *Actavis, 570 U.S. at 144*.

In sum, "[t]hese features together mean that a reverse payment settlement with the first filer (or . . . all of the initial filers) 'removes from consideration the most motivated challenger, and the one closest to introducing competition.'" *Id. at 155* (quoting Hemphill, *supra*, at 1586). As explained below in Section I-A-3, ***HN2***[] a "reverse payment settlement" settles patent infringement litigation in a manner "virtually unheard of outside of pharmaceuticals." *Actavis, 570 U.S. at 155*. Specifically, a reverse payment settlement "requires the patentee to pay the alleged infringer, rather than the other way around." *Id. at 141*. In exchange, the alleged infringer agrees "not to produce the patented product" for some time. *Id.*

After Hikma's 2010 ANDA, eight other generic manufacturers filed ANDAs between 2012 and 2017. CAC ¶ 183. Each submitted a Paragraph IV certification that Jazz's Xyrem patents were invalid or would not be infringed. *Id.*

3. Jazz's alleged anticompetitive scheme

In response to these ANDAs, Jazz allegedly schemed to preserve its multi-billion-dollar Xyrem monopoly. CAC ¶¶ 148-292; UHS ¶¶ 98-223. Jazz's alleged scheme **[**19]** had three main parts that operated in roughly chronological but overlapping order: (a) abuse of an FDA drug safety program called "Risk Evaluation and Mitigation Strategy"; (b) sham litigation; and (c) reverse payments to four of the generic manufacturers. The Court describes each part of the scheme below.

---

[2] Unless otherwise noted, the Court uses "Hikma" to refer to Defendants Hikma Labs, Inc. (formerly known as Roxane Laboratories, Inc.), Hikma Pharmaceuticals USA Inc. (formerly known as West-Ward Pharmaceuticals Corp.), Eurohealth (USA), Inc., and/or Hikma Pharmaceuticals plc. *See, e.g.*, CAC ¶ 2 n.2 (same naming convention). The Hikma entities acquired the original ANDA applicant for the generic version of Xyrem—Roxane Laboratories, Inc.—in 2016. UHS ¶ 17.

a. Jazz's alleged Risk Evaluation and Mitigation Strategy ("REMS") abuse

In general, the FDA may require that risky drugs implement a safety program called a Risk Evaluation and Mitigation Strategy ("REMS"). CAC ¶ 163; *see also* FDA, *FAQs about REMS* (Jan. 26, 2018), https://www.fda.gov/drugs/risk-evaluation-and-mitigation-strategies-rems/frequently-asked-questions-faqs-about-rems . REMS are proposed by a drug's manufacturer and then approved by the FDA. CAC ¶ 163. ***HN3***[] To receive FDA approval, a proposed REMS must balance (1) "the need to evaluate and mitigate risk of a drug to ensure that [the drug's] benefits outweigh its risks"; and (2) "the potential burdens of REMS elements on patient access and the **[*841]** health care delivery system." *Id.* "A REMS can include, *inter alia*, a medication guide, patient package inserts, and/or *restrictions on the distribution* of the drug." UHS ¶ 56 (emphasis added). **[**20]**

Most importantly here, the FDA ordinarily requires all manufacturers of a particularly risky drug—including the drug's generic manufacturers—to share one REMS. UHS ¶ 120; *see also* FDA, *Office of Surveillance & Epidemiology, Development of a Single, Shared System (SSS) Risk and Evaluation Mitigation Strategy* (Oct. 28, 2020) (detailing shared REMS requirement). Yet a "single, shared system" REMS has the potential for abuse. For instance, because REMS can restrict access to and distribution of a drug, the FDA has expressed concern that brand manufacturers abuse REMS to "delay the entry of generics." UHS ¶ 58 (quoting FDA Commissioner Scott Gottlieb, *FDA In Brief: FDA affirms its commitment to efficient adoption of Risk Evaluation and Mitigation Strategy plans and to making sure they do not impede generic drug development* (Apr. 4, 2019), https://tinyurl.com/y4je3kau). The annual cost of REMS abuse is about $13.3 billion according to one estimate: $5.2 billion from the federal government, $5.8 billion from private insurance companies, $1.8 billion from consumers, and $500 million from small payors such as state and local governments. UHS ¶ 60 (citing Alex Brill, *Unrealized Savings from the* ***[**21]*** *Misuse of REMS and Non-REMS Barriers*, Matrix Global Advisors (Sept. 2018), https://tinyurl.com/y272qvlb).

Here, Plaintiffs allege that Jazz abused the FDA's REMS process. CAC ¶¶ 165-73; UHS ¶¶ 54-60, 98-101, 112-13, 118-37. This alleged abuse resulted in FDA approval of Jazz's allegedly anticompetitive REMS: a REMS that mandates dispensing all Xyrem and Xyrem generics through a single centralized pharmacy, Express Scripts Specialty Distribution Services, Inc. ("Express Scripts"). CAC ¶ 287.

According to Plaintiffs, Jazz's alleged abuse of the REMS process spanned nearly seven years beginning in late August 2008. *Id.* ¶ 166. From late August 2008 through February 2015, Jazz took allegedly inconsistent and dilatory positions before the FDA on Xyrem's distribution restrictions. At first, Jazz advocated for a single-pharmacy distribution protocol in its REMS. UHS ¶ 55. In August 2009, however, Jazz "submitted a REMS proposal that would, among other things, remove the restriction to a single pharmacy and instead allow certification of multiple pharmacies." *Id.* ¶ 98.

Yet in "early 2011"—months after the FDA rejected Jazz's application to allow Xyrem as a fibromyalgia treatment—Jazz again reversed **[**22]** course and proposed a single-pharmacy REMS. *Id.* ¶ 100, 112. In the words of Jazz's CEO, "any generic company—[Hikma] included—will have a difficult time setting up their own distribution system that, A, doesn't infringe our intellectual property, and B, would successfully accomplish the goals of this REMS." UHS ¶ 40 (quoting Bruce Cozadd, Conference Call Tr. at Piper Jaffray Health Care Conference (Nov. 30, 2011), https://tinyurl.com/y5m5rb7n).

The FDA initially resisted Jazz's single-pharmacy REMS. In December 2013, "the FDA informed Jazz that the Agency was requiring a modification to the REMS under the FDA's statutory authority which, among other things, would have removed the single pharmacy restriction." UHS ¶ 127. Jazz formally disputed this FDA decision. *Id.* ¶ 132. By June 2014, the FDA had denied Jazz's dispute, and Jazz had further appealed to FDA's Director of the Office of New Drugs. *Id.* ¶ 132.

However, on February 27, 2015, the FDA approved Jazz's REMS application. **[*842]** *Id.* ¶ 135 (citing Letter from Billy Dunn, FDA Director of Neurology Products, to Jazz Pharmaceuticals (Feb. 27, 2015) (UHS Ex. C) ("FDA Dunn Letter")). In doing so, the FDA criticized Jazz's "repeated, lengthy **[**23]** delays" and Jazz's inconsistent position on whether "a single pharmacy is critical to the safe use of Xyrem." FDA Dunn Letter at 3. The FDA later recounted its reluctant approval of Jazz's REMS in a January 17, 2017 memorandum from Dr. Trueman W. Sharp, Deputy Director of the FDA's Office of Generic Drugs, to the manufacturers who had applied to make generic Xyrem (*i.e.*, filed ANDAs).

In that memo, the FDA wrote that it had approved Jazz's REMS to halt the "significant drain on [FDA] resources posed by the dispute." UHS ¶ 135 (quoting Memorandum from Trueman Sharp, Deputy Director for the Office of Generic Drugs, FDA, to ANDAs for sodium oxybate oral solution products, *et seq.* ("Sharp Memo") (Jan. 17, 2017) (UHS, Ex. B)). Even though it had approved Jazz's REMS, the FDA doubted both (1) the objective merits of Jazz's REMS; and (2) Jazz's subjective motivations in proposing a single-pharmacy REMS. As to the objective merits, the FDA reiterated concerns by Dr. John K. Jenkins, Director of the Office of New Drugs. Specifically, Dr. Jenkins noted the uniquely exclusionary nature of Xyrem REMS and its "burdens on patient access and the healthcare delivery system":

> Our action approving the **[**24]** REMS submitted by Jazz *should not be construed or understood as agreement* with Jazz that limiting dispensing to a single pharmacy is the only way to ensure that the benefits of Xyrem outweigh the risks under *section 505-1* of the FD&C Act. We continue to be concerned that limiting the distribution of Xyrem to one pharmacy *imposes burdens on patient access and the healthcare delivery system. No other currently approved REMS* requires a sponsor to limit dispensing to a single pharmacy.

Sharp Memo at 8 (emphasis added). As for subjective motivations, the FDA expressly "note[d] the inconsistent position Jazz has taken on [REMS safety]"—an inconsistency which "suggest[ed] [Jazz's] *knowledge* that this aspect of its REMS *could have the effect of preventing generic competition*." *Id.* at 26; *accord* at 12 (reiterating "Jazz's awareness that Xyrem REMS could have the effect of blocking or delaying approval of generic version of Xyrem"); UHS ¶ 136 (quoting same).

Generic manufacturers allegedly shared the FDA's fear that Jazz's REMS would block competition. After the FDA approved Jazz's REMS application in February 2015, generic manufacturers argued to the FDA that Jazz refused to negotiate in good faith to share **[**25]** access to Jazz's REMS. UHS ¶ 140; *see, e.g.*, CAC ¶¶ 200-08, 223, 227. A single, shared REMS is ordinarily required by the FDA for all versions of a risky drug—including AB-rated generics manufactured by generic manufacturers. CAC ¶ 73. Sharing a REMS entails co-administrating a safety system that gathers documentation on prescribers, dispensers, and patients. *Id. Id*. Here, that safety system also included the requirement that Xyrem and its generics be distributed exclusively through Express Scripts. CAC ¶ 287.

On January 17, 2017, in response to generic manufacturer's allegations, the FDA waived the single-pharmacy requirement for generic versions of Xyrem. In issuing this waiver, the FDA reiterated generic manufacturer's allegations that "Jazz ha[d] engaged in a strategy that 'entails serial attempts to impose unreasonable contractual terms and conditions on the ANDA [filers] while concurrently issuing self-serving statements to FDA **[*843]** and the ANDA [filers] about Jazz's commitment to the process." UHS ¶ 207 (quoting Sharp Memo at 11). The FDA then found that the "burden of creating a single, shared system outweighs the benefits." Sharp Memo at 13 (capitalization omitted). Among the burdens **[**26]** were Jazz's "obvious incentives" "to delay generic competition [] by failing to agree on [single, shared system] REMS terms." *Id.* at 17. The FDA thus concluded that allowing ANDA applicants to proceed with their own drug distribution systems would "remove a barrier to generic products coming to market." *Id.*

Among the ADNA applicants listed on the FDA's January 17, 2017 memo were Hikma and Amneal. Sharp Memo at 1; *accord* UHS ¶ 201. Yet, to date, at least Hikma has allegedly no plans to develop an alternative to Jazz's REMS. CAC ¶ 223. The reason, Plaintiffs allege, is that Hikma would contractually forfeit its lucrative reverse settlement with Jazz if Hikma tried to compete with Jazz. *Id.* ¶ 219; UHS ¶ 169. In fact, sometime after Jazz and Hikma settled their patent litigation, Jazz's CEO allegedly said on an earnings call that although "Hikma has a license to launch its [AB-rated] generic product as of July 1, 2023, [Hikma] will not longer have the right to sell an AG product through the Xyrem REMS if [Hikma] elects to do so." CAC ¶ 219 & n.66 (quoting earnings call; no date provided).

b. Jazz's alleged sham patent litigation against generic manufacturers

Sham patent litigation comprised **[**27]** the second part of Jazz's alleged monopolistic scheme. According to Plaintiffs, Jazz filed many meritless patent infringement cases against drug manufacturers who had filed ANDAs to market generic versions of Xyrem. CAC ¶¶ 150-61; UHS ¶¶ 104-09, 121-26, 133-34, 139, 151-52, 155-57. These cases were allegedly brought in a vicious cycle. Jazz would allegedly "assert a patent position, glean defenses to that position in the litigation, file new 'follow-on' patents, and then file a new lawsuit asserting those patents." Opp'n at 5 (citing CAC ¶¶ 155-61; UHS ¶¶ 104-09).

Among others, the targets of Jazz's suits included (1) Hikma, the filer of the first generic Xyrem ANDA; and (2) three other manufacturers who filed ANDAs after Hikma. Those three other manufacturers (the "Later Generic Defendants") were Amneal Pharmaceuticals LLC ("Amneal"), Par Pharmaceuticals, Inc. ("Par"), and Lupin Ltd, Lupin Pharmaceuticals Inc., and Lupin, Inc. (together, "Lupin"). CAC ¶ 2 n.2; UHS ¶¶ 20-23. Jazz sued Hikma for patent infringement *nine* times between November 2010 and August 2016. CAC ¶¶ 151-62 (detailing suits). Also, between at least December 2012 and November 2017, Jazz brought more than eight other **[**28]** suits against the Later Generic Defendants and five other later generics. *Id.* ¶¶ 183-85 (listing suits).

Pursuant to the Hatch-Waxman Act, each lawsuit automatically stayed the FDA's approval process for generic Xyrem ANDAs by approximately 30 months. CAC ¶ 185; *see generally* *Actavis, 570 U.S. at 143, 155* (explaining stay required by *21 U.S.C. § 355(j)(5)(B)(iii)*). These 30-month stays were statutorily automatic "irrespective of the[] [lawsuits'] prospects of success." CAC ¶ 185. Indeed, some of Jazz's asserted patents were eventually invalidated. In March 2017, the Patent Trial Appeal Board ("PTAB") invalidated as obvious one of Jazz's three asserted families of patents relating to REMS.[3] UHS ¶¶ 151- **[*844]** 57. The Federal Circuit affirmed the PTAB invalidity rulings. *Id.* ¶ 157 (citing *Jazz Pharms., Inc. v. Amneal Pharms., LLC, 895 F.3d 1347 (Fed. Cir. 2018)*).

c. Jazz's reverse payment settlements with first-filer Hikma and then Later Generic Defendants Par, Lupin, and Amneal

Lastly and most significantly, Plaintiffs allege that Jazz settled its patent cases with each Generic Defendant (Hikma, Amneal, Par, and Lupin) by way of unlawful "reverse payment" settlements. ***HN4***[] As the Supreme Court explained in *FTC v. Actavis*, a reverse payment settlement is one where "the patentee [] pay[s] the alleged infringer, rather than the other **[**29]** way around." *Actavis, 570 U.S. at 141*. In exchange, the alleged infringer delays entry into the patentee's market. *Id.* These reverse payment settlements (or "reverse settlements" for short) are "virtually unheard of outside of pharmaceuticals." *Id. at 155* (quoting 1 Herbert Hovenkamp, Mark D. Janis, Mark A. Lemley, and Christopher R. Leslie, *IP and Antitrust* § 15.3 & n.161 (2d ed. Supp. 2011)). Such settlements also "sometimes violate the antitrust laws." *Id. at 141*.

Plaintiffs allege that Jazz's reverse settlements with each Generic Defendant violated the antitrust laws. CAC ¶¶ 209-76; UHS ¶¶ 161-210. According to Plaintiffs, the value of these settlements was in the hundreds of millions of dollars for first-filer Hikma and the tens of millions of dollars each for Later Generic Defendants Par, Lupin, and Amneal. CAC ¶¶ 229-38, 255, 262, 269-70; UHS ¶¶ 179-83, 206. In exchange for making these large reverse payments, Jazz allegedly delayed generic entry into the Xyrem market. *See, e.g.*, CAC ¶ 275-76. The alleged result has been supra-competitive prices and lower output. CAC ¶ 276.

Although Jazz's settlements allegedly all delayed generic entry, the settlements with Hikma versus the Later Generic Defendants conveyed value in somewhat **[**30]** different ways. In the Jazz-Hikma agreement, Jazz licensed Hikma as the exclusive third-party marketer of an authorized generic ("AG") version of Xyrem between at least January 1, 2023 and July 1, 2023. CAC ¶¶ 110, 221 & n.67. This Hikma AG would be (1) Xyrem manufactured by Jazz that (2) Hikma would relabel and market as a Hikma product that (3) Jazz's REMS pharmacy, Express

---

[3] The invalidated REMS patents claimed methods of tracking drug prescriptions in a computer database. CAC ¶¶ 141-44.

Scripts, would distribute. *See, e.g.*, UHS ¶ 223 (alleging purchases "would follow the same route as Xyrem" and that Hikma will not take delivery); Hikma License Agreement §§ 1.3, 1.24, ECF No. 111-2 (providing that Hikma's AG will not bear Jazz's trademarks, such as the name Xyrem).

To incentivize this alleged "no-AG" agreement and convey further value to Hikma, Jazz made primarily the following three alleged reverse payments.

• First, Jazz promised not to license AG to any third party other than Hikma between at least January 1, 2023 and July 1, 2023. CAC ¶¶ 110, 221 & n.67.

• Second, Jazz created a royalty structure of escalating payments from Hikma to Jazz that undermined Jazz's economic interest in marketing its own AG. CAC ¶ 231.

• Third, the Jazz-Hikma agreement contained an "acceleration clause." *Id.* ¶ 232. **[**31]** ***HN5***[] An acceleration clause is a type of most-favored-entry clause that allows a generic manufacturer to enter a market sooner if certain contingencies occur. CAC ¶¶ 120-24 (citing Keith M. Drake & Thomas G. McGuire, *Generic Entry Before the Agreed-Upon Date in Pharmaceutical Patent Settlements*, 16 J. Competition L. & Econ. 188, 188 (2020) **[*845]** (available on Lexis+)). In the Jazz-Hikma agreement, the acceleration clause allegedly allowed Hikma to immediately market Hikma Authorized Generic ("AG") if (1) a generic version of Xyrem were to market itself without Jazz's permission; or (2) anyone were to successfully invalidate or render unenforceable Xyrem's unexpired patent claims. CAC ¶ 225; *accord* Hikma AG Agreement § 2.8, ECF No. 110-14 (acceleration provisions). According to Plaintiffs, acceleration clauses like Hikma's deter generic entry by warning potential entrants that they will face competition if they actually enter. *Id.* ¶¶ 123-24 (citing congressional testimony and Drake & McGuire, *supra*). The prospect of competition reduces the expected payoff of breaking up any collusive scheme. *Id.* ¶ 123.

Together, these parts of the Jazz-Hikma agreement were allegedly "designed to, and do[] have, the effect that during at least the first six months of entry (before **[**32]** subsequent generics were allocated a slice of the market in their own separate pay-for-delay agreements, as discussed below [in Section III-B]), the Hikma AG would be the only authorized generic." *Id.* ¶ 221. The alleged estimated value to Hikma of the Jazz-Hikma agreement is over $480 million just in the first six months after Hikma launches its AG. CAC ¶ 237 (estimating $480 million to $540 million); UHS ¶ 181 (estimating $705 million). Jazz's market capitalization also jumped by about $785 million after the Jazz-Hikma agreement was partially disclosed on April 6, 2017—a jump that Plaintiffs allege is attributable to investors' expectations that Xyrem would face reduced generic competition. UHS ¶ 185; CAC ¶ 246.

Jazz's settlements with the Later Generic Defendants made primarily the following three alleged reverse payments, as detailed in formerly confidential contracts that Defendants attached to their instant motion to dismiss:[4]

• First, Jazz made multi-million-dollar cash payments to each Later Generic Defendant—ostensibly for Jazz's avoided litigation costs. *See* Opp'n at 13 (citing Par Settlement Agreement § 3, ECF No. 110-15 (Ex. 4); Lupin Settlement Agreement § 3, ECF No. 110-17 **[**33]** (Ex. 7); Amneal Settlement Agreement § 3, ECF No. 110-19 (Ex. 10)).

• Second, Jazz allegedly gave each Later Generic Defendant a limited license to sell a constrained supply of AG. Each license (1) began only after the expiration of Hikma's 180-day exclusivity period in July 2023; (2) was

---

[4] Defendants filed a request for judicial notice on April 22, 2021. ECF No. 111. Defendants seek judicial notice of (1) the contracts between Jazz, Hikma, and the Later Generic Defendants, which are incorporated by reference in the CAC and UHS complaint; (2) public filings with the Securities and Exchange Commission ("SEC"); and (3) an FTC blog post cited in CAC ¶ 110 n.48. Plaintiffs have not opposed Defendants' request. ***HN6***[] The Court may take judicial notice of matters that are either "generally known within the trial court's territorial jurisdiction" or "can be accurately and readily determined from sources whose accuracy cannot reasonably be questioned." *Fed. R. Evid. 201(b)*. Moreover, courts may consider materials referenced in the complaint under the incorporation by reference doctrine, even if a plaintiff did not attach those materials to the complaint. *Knievel v. ESPN, 393 F.3d 1068, 1076 (9th Cir. 2005)*. Accordingly, the Court GRANTS Defendants' request for judicial notice, ECF No. 111.

capped at a low-single-digit market share; and (3) required a royalty payment, as a percentage of sales, that increased over time. *See, e.g.*, Lupin AG Agreement § 1.27, 5, ECF No. 110-18 (Exh. 8).

[*846] • Third, Jazz's agreements with each Later Generic Defendant contained acceleration clauses like the acceleration clause in the Jazz-Hikma agreement discussed above. *See, e.g.*, CAC ¶¶ 253, 260, 267 (alleging acceleration clauses); Section III-A-2-b-iii, *infra* (analyzing Jazz-Hikma acceleration clause and acceleration clauses generally).

Plaintiffs estimate the value to the Later Generic Defendants of these agreements to be in the tens of millions of dollars. CAC ¶¶ 255, 262, 269-70; UHS ¶¶ 193, 198, 205, 206. As with the Jazz-Hikma agreement, Jazz's agreements with Par, Lupin, and Amneal allegedly "will not increase overall output, reduce price, or increase consumer choice." UHS ¶ 207. Rather, the agreements **[**34]** will allegedly "merely substitute Par, Lupin, and Amneal as the sellers of millions of dollars' worth of Xyrem for the sole purpose of paying them to delay market entry of less expensive generic sodium oxybate, preserving Jazz's massive monopoly profits in exchange for doling out a small slice of them to Par, Lupin, and Amneal." *Id.*

In Plaintiffs' telling, Jazz executives publicly alluded to these anticompetitive effects on at least two occasions. At a conference on December 4, 2019, Jazz's CEO stated that "in terms of *dynamics on price*, it's — th[e] [market] is *not what you would think of as a generic free for all*" because of the "*very limited volumes*" for Par, Lupin, and Amneal. CAC ¶ 273 (emphasis added by Plaintiffs).

Similarly, on November 14, 2018, a senior Jazz executive explained that "after th[e] the 6-month exclusivity period for the first-filer [Hikma], 3 of the second filers [allegedly Par, Lupin, and Amneal] get to come again with a limited generic. And they are *limited to low single-digit volume* of the previous year Xyrem sales. So again, relatively *low incursion on Xyrem* here." *Id.* ¶ 274 (emphasis added).

Plaintiffs allege that because of all these agreements, Jazz has **[**35]** avoided judicial scrutiny of its (invalid and unenforceable) patents to this day. *See, e.g.*, CAC ¶ 278; UHS ¶ 172. Indeed, Jazz remains the sole supplier of sodium oxybate even though Hikma filed its ANDA in July 2010—more than 11 years ago. CAC ¶¶ 296, 307; UHS ¶ 237.

B. Procedural History

This is a multidistrict litigation with two operative complaints across nine actions. One action is an individual action brought by Plaintiff United HealthCare Services, Inc., which "serve[s] some 70 million individual insureds" as "the largest single health insurance carrier and services provider in the United States." UHS ¶ 7. The remaining actions are putative class actions brought by Class Plaintiffs, a coalition of four types of plaintiffs:

• Labor unions' health plans or welfare benefits funds, namely A.F. of L. — A.G.C. Building Trades Welfare Plan, New York State Teamsters Council Health and Hospital Fund, and UFCW Local 1500 Welfare Fund. These labor unions' funds bought or reimbursed Xyrem for their members.

• Associations of companies that provide health plans, namely Blue Cross Blue Shield Association and Government Employees Health Association. Together, these associations provide health **[**36]** benefits to more than 107 million people nationwide.

• Government entities, namely the Self-Insured Schools of California and the City of Providence, Rhode Island. These entities pay bought or reimbursed Xyrem for their employees and retirees.

[*847] • Xyrem patient Ruth Hollman, who has used Xyrem since 2009.

CAC ¶¶ 10-25.

This case's chronology is as follows. On December 16, 2020, the Judicial Panel on Multidistrict Litigation transferred six putative class actions to this Court. ECF No. 1. Two more putative class actions were transferred on January 4, 2021, followed by another putative class action on January 26, 2021. ECF No. 2, 38. On January 27, 2021, one of the nine transferred actions was voluntarily dismissed without prejudice in accordance with a tolling agreement. ECF No. 39. This dismissal left eight putative class actions.

On February 22, 2021, the Court appointed Interim Co-Lead Class Counsel and Plaintiffs' Steering Committee. ECF No. 59. For Interim Co-Lead Class Counsel, the Court appointed Dena Sharp of Girard Sharp LLP and Michael Buchman of Motley Rice LLC. For Plaintiffs' Steering Committee, the Court appointed Jessica R. MacAuley of Hagens Berman Sobol Shapiro LLP; Karin **[**37]** Garvey of Labaton Sucharow LLP; Joseph Saveri of Joseph Saveri Law Firm, Inc.; Kenneth Wexler of Wexler Wallace LLP; Clark Craddock of the Radice Law Firm; John Macoretta of Spector Roseman & Kodroff PC; and Mark Fischer of Rawlings & Associates, PLLC.

On March 8, 2021, the plaintiffs in the eight putative class actions (together, the "Class Plaintiffs") filed one of the operative complaints: the Consolidated Class Action Complaint ("CAC"). ECF No. 62. Class Plaintiffs comprise (1) A.F. of L. — A.G.C. Building Trades Welfare Plan; (2) Blue Cross Blue Shield Association; (3) City of Providence, Rhode Island; (4) Government Employees Health Association, Inc.; (5) New York State Teamsters Council Health and Hospital Fund; (6) Self-Insured Schools of California; (7) UFCW Local 1500 Welfare Fund; and (8) Ruth Hollman. CAC ¶¶ 10-25. Class Plaintiffs assert 17 claims against Defendants under both federal and state antitrust laws. CAC ¶¶ 352-518.

Defendants comprise three sets of entities known as (1) Jazz; (2) Hikma; and (3) the Later Generic Defendants. Each set of Defendants specifically comprises the following:

- The first set includes Jazz Pharmaceuticals Plc, Jazz Pharmaceuticals, Inc., **[**38]** and Jazz Pharmaceuticals Ireland Limited (together, "Jazz"). CAC ¶ 1; UHS ¶ 3 n.1. Jazz owns patents that claim aspects of Xyrem and its use. CAC ¶ 80.
- The second set of Defendants—which together are known as "Hikma"—includes Hikma Labs, Inc. (formerly known as Roxane Laboratories, Inc.), Hikma Pharmaceuticals USA Inc. (formerly known as West-Ward Pharmaceuticals Corp.), Eurohealth (USA), Inc., and Hikma Pharmaceuticals plc. CAC ¶ 2 n.2; UHS ¶ 18. Hikma was the first to file an ANDA to market a generic version of Xyrem. CAC ¶ 2; UHS ¶ 101.
- The third set of Defendants includes Amneal Pharmaceuticals LLC ("Amneal"), Par Pharmaceuticals, Inc. ("Par"), and Lupin Ltd, Lupin Pharmaceuticals Inc., and Lupin, Inc. (together, "Lupin"). CAC ¶ 2 n.2; UHS ¶¶ 20-23. These Defendants were among the generic manufacturers who filed ANDAs after Hikma. CAC ¶ 183. Together, Amneal, Par, and Lupin are known as the "Later Generic Defendants." Collectively with Hikma, they are known as the "Generic Defendants."

On March 19, 2021, the Court noted that the CAC—which sets forth 17 causes of action against 12 Defendants—is unmanageably large. ECF No. 66. The Court **[*848]** thus ordered Class Plaintiffs and Defendants **[**39]** to jointly identify "10 selected causes of action" to be litigated through resolution. ECF No. 66 at 2. Class Plaintiffs and Defendants filed their joint notice identifying 10 selected causes of action (the "Selected Claims") on March 29, 2021. ECF No. 81. The Selected Claims are the following:

- CAC Count 1 — Violation of *15 U.S.C. § 1* (against Jazz and Hikma)

CAC Count 5 — Violation of *15 U.S.C. § 1* (against all Defendants)

- CAC Count 6 — Violation of *15 U.S.C. § 2* (against Jazz)
- CAC Count 7 — Conspiracy and Combination in Restraint of Trade Under State Law (against Jazz and Hikma)
- CAC Count 8 — Conspiracy and Combination in Restraint of Trade Under State Law (against Jazz and Amneal)
- CAC Count 9 — Conspiracy and Combination in Restraint of Trade Under State Law (against Jazz and Lupin)
- CAC Count 10 — Conspiracy and Combination in Restraint of Trade Under State Law (against Jazz and Par)
- CAC Count 11 — Conspiracy and Combination in Restraint of Trade Under State Law (against all Defendants).
- CAC Count 12 — Monopolization and Monopolistic Scheme Under State Law (against Jazz)

- CAC Count 17 — For Declaratory and Injunctive Relief for Violations of *Sections 1* and *2 of the Sherman Act*, *15 U.S.C. §§ 1*, *2*, and *Section 16 of the Clayton Act*, *15 U.S.C. §§ 1-2*, *26* (against all **[**40]** Defendants)

Meanwhile, on March 24, 2021, Plaintiff United HealthCare Services, Inc. ("United") informed the Court that United's individual action against the same Defendants would soon be transferred to the instant multidistrict litigation. ECF No. 78. In response on March 30, 2021, the Court ordered the parties to address the overlap between (1) United's claims and (2) the Selected Claims. ECF No. 82. On April 2, 2021, United represented that its claims "largely overlap with the class action claims and advance materially the same theories of liability." ECF No. 84 at 1. United thus agreed to initially litigate through resolution only the claims that overlap with the Selected Claims. *Id.* at 2. United's complaint ("UHS") is at Case No. 21-CV-02710-LHK, ECF No. 1.

Accordingly, on April 7, 2021, the Court "order[ed] that U[nited] shall initially litigate only the Selected Claims. . . . After the resolution of the Selected Claims, the Court will discuss with U[nited] and [Class Plaintiffs] the remaining causes of action." ECF No. 85. United's claims relationship to the Selected Claims are as follows:

- UHS Count 1 overlaps with CAC Count 1 — Violation of *15 U.S.C. § 1* (against Jazz and Hikma)

- UHS Count **[**41]** 5 overlaps with CAC Count 5 — Violation of *15 U.S.C. § 1* (against all Defendants)

- UHS Count 6 overlaps with CAC Count 6 — Violation of *15 U.S.C. § 2* (against Jazz)
- UHS Counts 8 and 9 overlap with CAC Count 11 — Conspiracy and Combination in Restraint of Trade Under State Law (against all Defendants). However, UHS Count 9 is limited to the extent it overlaps with the Class Plaintiffs' Selected Claims.
- UHS Count 7 overlaps with CAC Count 12 — Monopolization and Monopolistic Scheme Under State Law (against Jazz)

[*849] • UHS Count 11 overlaps with CAC Count 17 — For Declaratory and Injunctive Relief for Violations of *Sections 1* and *2* of the Sherman Act, *15 U.S.C. §§ 1*, *2*, and *Section 16* of the Clayton Act, *15 U.S.C. §§ 1-2*, *26* (against all Defendants)

On April 22, 2021, Defendants filed the instant motion to dismiss the Selected Claims. ECF No. 109 ("motion to dismiss" or "Mot."). On May 20, 2021, Class Plaintiffs and United (together, "Plaintiffs") filed their consolidated opposition to Defendants' motion to dismiss. ECF No. 129 ("Opposition" or "Opp'n"). Defendants filed their reply on June 10, 2021. ECF No. 130 ("Reply").

II. LEGAL STANDARD

A. Motion to Dismiss Under *Rule 12(b)(6)*

HN7[] *Rule 8(a)(2) of the Federal Rules of Civil Procedure* requires a complaint to include "a short and plain statement of the claim showing that the pleader is **[**42]** entitled to relief." A complaint that fails to meet this standard may be dismissed pursuant to *Federal Rule of Civil Procedure 12(b)(6)*. The United States Supreme Court has held that *Rule 8(a)* requires a plaintiff to plead "enough facts to state a claim to relief that is plausible on its face." *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. "A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*. "The plausibility standard is not akin to a probability requirement, but it asks for more than a sheer possibility that a defendant has acted unlawfully." *Id.* (internal quotation marks omitted). For purposes of ruling on a *Rule 12(b)(6)* motion, the Court "accept[s] factual allegations in the complaint as true and construe[s] the pleadings in the light most favorable to the nonmoving party." *Manzarek v. St. Paul Fire & Marine Ins. Co., 519 F.3d 1025, 1031 (9th Cir. 2008)*. The Court, however, need not "assume the truth of legal conclusions merely because they are cast in the form of factual allegations." *Fayer v. Vaughn, 649 F.3d 1061, 1064 (9th Cir. 2011)* (per curiam) (internal quotation marks omitted). Additionally, mere "conclusory allegations of law and unwarranted inferences are insufficient to defeat a motion to dismiss." *Adams v. Johnson, 355 F.3d 1179, 1183 (9th Cir. 2004)*.

B. Leave to Amend

HN8[] If a court determines that a complaint should be dismissed, **[**43]** it must then decide whether to grant leave to amend. Under *Rule 15(a) of the Federal Rules of Civil Procedure*, leave to amend "shall be freely given when justice so requires," bearing in mind "the underlying purpose of *Rule 15* to facilitate decisions on the merits, rather than on the pleadings or technicalities." *Lopez v. Smith, 203 F.3d 1122, 1127 (9th Cir. 2000)* (en banc) (alterations and internal quotation marks omitted). When dismissing a complaint for failure to state a claim, "a district court should grant leave to amend even if no request to amend the pleading was made, unless it determines that the pleading could not possibly be cured by the allegation of other facts." *Id. at 1130* (internal quotation marks omitted).

HN9[] Accordingly, leave to amend generally shall be denied only if allowing amendment would unduly prejudice the opposing party, cause undue delay, or be futile, or if the moving party has acted in bad faith. *Leadsinger, Inc. v. BMG Music Publ'g, 512 F.3d 522, 532 (9th Cir. 2008)*. At the same time, a court is justified in **[*850]** denying leave to amend when a plaintiff "repeated[ly] fail[s] to cure deficiencies by amendments previously allowed." *See Carvalho v. Equifax Info. Servs., LLC, 629 F.3d 876, 892 (9th Cir. 2010)*. Indeed, a "district court's discretion to deny leave to amend is particularly broad where plaintiff has previously amended the complaint." *Cafasso, U.S. ex rel. v. Gen. Dynamics C4 Sys., Inc., 637 F.3d 1047, 1058 (9th Cir. 2011)* (quotation marks omitted).

III. DISCUSSION

Plaintiffs purchase or provide reimbursement **[**44]** for Xyrem nationwide. CAC ¶¶ 10-25 (Class Plaintiffs); UHS ¶¶ 6-10 (United HealthCare Services). Plaintiffs allege that Jazz has overcharged for Xyrem and will continue to do so. UHS ¶ 5. Specifically, Plaintiffs allege that Jazz has unlawfully blocked generic entry into the Xyrem market through at least July 1, 2023. CAC ¶ 6. Plaintiffs thus seek treble damages and injunctive relief under federal and state antitrust laws, including *Sections 1* and *2* of the Sherman Act (*15 U.S.C. §§ 1* and *2*). Because Plaintiffs bring at least 17 claims against 12 Defendants, only 10 claims (the "Selected Claims") will be initially litigated through resolution. *See* Section I-B, *supra* (detailing Selected Claims).

Defendants move to dismiss the Selected Claims on six grounds. First, Defendants argue that Jazz's settlements with Hikma and each of the Later Generic Defendants (Amneal, Par, and Lupin) are not unlawful reverse settlements under *FTC v. Actavis, Inc., 570 U.S. 136, 133 S. Ct. 2223, 186 L. Ed. 2d 343 (2013)*. Second, Defendants argue that Plaintiffs inadequately plead an overarching antitrust conspiracy or unlawful market allocation. Third, Defendants argue that Plaintiffs fail to allege antitrust injury. Fourth, Defendants argue that Plaintiffs' monopolization claims under *Sherman Act § 2* are barred by the *Noerr-Pennington* ***[**45]*** doctrine. Fifth, Defendants argue that Plaintiffs lack antitrust standing to pursue damages for violations of federal ***antitrust law***. Lastly, Defendants argue that Plaintiffs' state law claims fail.

Ultimately, the Court mostly denies Defendants' motion to dismiss. The Court dismisses, however, the following four allegations or claims: (1) Plaintiffs' allegation that Defendants' market allocations are per se violations of the antitrust laws; (2) Plaintiffs' allegations against Jazz's citizen petitions to the FDA; (3) Plaintiffs' federal claims for damages; and (4) some claims brought under the laws of Illinois and Utah. Below, the Court analyzes the six asserted grounds for dismissal in turn. Each section of analysis begins with a header, which lists the Counts of the CAC and UHS complaint at issue in that section.

A. Plaintiffs adequately plead unlawful reverse payments to Hikma (CAC Counts 1 and 7; UHS Counts 1, 5, and 8) and the Later Generic Defendants (CAC Counts 8-10; UHS Counts 5, 7, and 8).

Defendants argue that Plaintiffs inadequately plead that Jazz made unlawful reverse payments to Hikma and the Later Generic Defendants. As to Hikma, Defendants argue that Jazz's settlement was **[**46]** not a "no authorized generic" agreement ("no-AG" agreement). Specifically, although Jazz promised that Hikma would be the exclusive third-party licensee of AG, Jazz could theoretically compete with Hikma AG by marketing a Jazz AG. As for the Later Generic Defendants, Defendants argue that Jazz did not make reverse payments to Amneal, Par, or Lupin.

To provide context for the parties' arguments, the Court first describes the difference between a generic manufactured by a generic drug company ("AB-rated generic") and a "generic" that is identical to—and often manufactured and distributed **[*851]** by—the brand name drug company ("authorized generic"). The Court then analyzes the Jazz-Hikma agreement followed by Jazz's agreements with the Later Generic Defendants.

1. Background: "authorized generics" are often just the brand name drug made by the brand name manufacturer—but relabeled.

The Court first recounts the background on the generic drug market set forth in Section I-A-1, *supra*. As relevant here, a generic drug may be either an "AB-rated" generic or an "authorized" generic. An AB-rated generic is commonly called simply a "generic drug." *See FDA List of Authorized Generic Drugs, supra* (cited **[**47]** by CAC ¶ 5 & n.7). AB-rated generics are deemed by the FDA to be bioequivalent to the brand name drug. UHS ¶ 47; *accord* FDA, *Orange Book Preface* (41st ed. Jan. 1, 2021), https://www.fda.gov/drugs/development-approval-process-drugs/orange-book-preface (detailing AB rating). Even so, AB-rated generics differ from the brand name drug in two ways. First, despite their bioequivalence, AB-rated generics "may have certain minor differences from the brand-name product, such as different inactive ingredients." *FDA List of Authorized Generic Drugs, supra*.

Second and most important, AB-rated generics are "developed and made by a company other than the company that makes the brand-name drug." *Id.* When a company enters a market with an AB-rated generic, the generic typically captures about 90% of the branded drug's sales within one year—and sells for about *15%* of the brand name drug's price. UHS ¶ 51; *accord* FTC, *Pay-for-Delay: How Drug Company Pay-Offs Cost Consumers Billions* at 8 (Jan. 2010) (finding same). ***HN10***[] Under the Hatch-Waxman Act, the first company that applies to produce an AB-rated generic (the "first filer") receives a "180-day period of exclusivity" during which "no other [non-AB-rated] generic can compete with the brand-name drug." **[**48]** *Federal Trade Commission ("FTC") v. Actavis, Inc., 570 U.S. 136, 143-44, 133 S. Ct. 2223, 186 L. Ed. 2d 343 (2013)*.

An authorized generic ("AG"), by contrast, "is essentially a brand-name drug *produced by a brand manufacturer* but *marketed* under a generic label." *In re Nexium (Esomeprazole) Antitrust Litig., 968 F. Supp. 2d 367, 380 (D. Mass. 2013)* (emphasis added). "Other than the fact that [an AG] does not have the brand name on its label, it is the exact same drug product as the branded product." *FDA List of Authorized Generic Drugs, supra*. Thus, unlike AB-rated generics, AGs are marketed and sold "either by the brand manufacturer itself" or "another company *with the brand company's permission*." *Id.* (emphasis added); UHS ¶ 61 (same).

Importantly here, it is far more common that a third party markets an AG (with the brand manufacturer's permission) than the brand manufacturer doing so itself. For instance, the FTC has found that "out of 119 AG launches from 2001 to 2008, *only one* was distributed by a brand drug company without generic marketing." *In re Intuniv Antitrust Litig. ("Intuniv"), 496 F. Supp. 3d 639, 671 (D. Mass. 2020)* (emphasis added) (citing FTC, *Authorized Generic Drugs: Short-Term Effects & Long-Term Impact* (2011) ("FTC 2011 AG Study")); *see also* CAC ¶ 87 n.36 (same study). Moreover, at least one court has credited research that "out of the 529 AG launches since 2009 . . . only two were distributed by a brand company without generic expertise." *Intuniv, 496 F. Supp. 3d at 671*. In short, it is rare for a brand manufacturer **[**49]** to market and sell its own AG. Brand manufacturers instead tend to license marketing/relabeling rights to a third party.

[*852] Regardless of who markets them, AGs and AB-rated generics compete. AGs in fact enjoy an opportunity for competition that other generics lack. That unique opportunity is an AG's ability to compete with an AB-rated generic that is protected by the Hatch-Waxman Act's 180-day period of exclusivity during which no other AB-rated generic can compete. AGs are thus the "only potential source of generic price competition during the first-to-file generic manufacturer's 180-day exclusivity period." CAC ¶ 99. Typically, this competition between an AG and a first-filer's AB-rated generic "reduc[es] the revenues generated by the first-filer's generic product by 40-52% during the 180-day exclusivity period." UHS ¶ 62 (citing FTC 2011 AG Study at iii). The competition also reduces generic prices by about 15%. CAC ¶ 99 (citing IMS Consulting, *Assessment of Authorized Generics in the U.S.* (2006), http://208.106.226.207/downloads/IMSAuthorizedGenericsReport 6-22-06.pdf). Drug purchasers benefit as a result.

In sum, AB-rated generics are manufactured and sold by generic drug manufacturers—and **[**50]** for about 15% of the brand name drug's price. AGs, by contrast, are often manufactured by the brand manufacturer itself because AGs are simply the brand name drug but relabeled. AGs are then marketed as a "generic" only with the brand manufacturer's permission (or, rarely, by the brand manufacturer itself). Lastly, when AB-rated generics and AGs compete during the first filer's 180-day exclusivity period, that competition lowers generic drug prices by about 15%.

2. Plaintiffs adequately allege that the Jazz-Hikma agreement contains an implicit "no-AG" agreement (CAC Counts 1 and 7; UHS Counts 1, 5, and 8).

With the above background in mind, the Court returns to the case at hand. The Court starts by analyzing the Jazz's settlement with Hikma (the "Jazz-Hikma agreement"). Plaintiffs argue that the Jazz-Hikma agreement contains an implicit "no-AG" agreement. Specifically, this alleged "no-AG" agreement is that Jazz will not sell an authorized generic of Xyrem for "at least the first six months that Hikma is eventually on the market" with the Hikma AG, which is Jazz's Xyrem under the label of Hikma AG. *E.g.*, CAC ¶ 221.

The parties do not dispute that if the Jazz-Hikma agreement is in fact **[**51]** a "no-AG" agreement, it warrants antitrust scrutiny under the Supreme Court's *Actavis* framework for reverse payments. *See, e.g., Impax Labs., Inc. v. FTC, 994 F.3d 484, 494 (5th Cir. 2021)* (holding same and collecting cases); Mot. at 13 (not disputing that no-AG agreements "may trigger scrutiny under *Actavis*"). ***HN11***[] A no-AG agreement "falls under *Actavis*'s rule because it may represent an unusual, unexplained reverse transfer of considerable value from the patentee to the alleged infringer and may therefore give rise to the inference that it is a payment to eliminate the risk of competition." *King Drug Co. of Florence v. Smithkline Beecham Corp., 791 F.3d 388, 394 (3d Cir. 2015)*. Indeed, as the leading antitrust treatise has explained, no-AG agreements "can in fact be more anticompetitive than a large cash payment for delay." Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law****: An Analysis of Antitrust Principles & Their Application* ¶ 2045 (updated May 2021).

Defendants argue, however, that "this is not a 'no-AG' case." *Id.* For support, Defendants note that the Jazz-Hikma agreement "explicitly reserves Jazz's right to launch a Jazz AG." *Id.*

The Court addresses this defense of the Jazz-Hikma agreement in two parts. To start, the Court summarizes the leadup to **[*853]** the Jazz-Hikma agreement and the agreement's alleged "no-AG" effect. The **[**52]** Court then analyzes what allegedly evidences and incentivizes the no-AG agreement: at least three alleged reverse payments from Jazz to Hikma. These reverse payments suggest that Jazz "has serious doubts about [its] patent[s]' survival" and "in turn[] suggests that the payment[s]' objective is to maintain supracompetitive prices to be shared among [Jazz] and [Hikma] rather than face what might have been a competitive market." *Actavis, 570 U.S. at 157*.

a. Alleged background and effect of Jazz-Hikma agreement

The Court summarizes (i) Hikma's allegedly impending entry into the sodium oxybate market in Spring 2017; and (ii) how the Jazz-Hikma agreement replaced Hikma's impending manufacture of a new sodium oxybate generic with Hikma's mere resale of Jazz's Xyrem under Hikma's label. The alleged effect of this Jazz-Hikma agreement was to perpetuate Jazz's Xyrem monopoly. *See, e.g.*, UHS ¶¶ 172-85 (alleging harms).

i. Hikma's impending entry into Xyrem market in Spring 2017

Plaintiffs allege that in Spring 2017, Hikma's entry into Jazz's market was impending. CAC ¶ 209; UHS ¶ 161. Specifically, on January 17, 2017, the FDA granted Hikma final approval of its ANDA: Hikma's application to "manufacture, market, and sell **[**53]** an AB-rated generic version of Xyrem." CAC ¶¶ 148, 278.

This final approval was the culmination of nearly seven years of battle. Hikma's predecessor company, Roxane, had filed Hikma's ANDA in July 2010. *Id.* at ¶ 148. Jazz had fought back. Among other things, Jazz had (1) sued Roxane/Hikma nine times for patent infringement; and (2) received the FDA's reluctant permission to limit the distribution of sodium oxybate oral solutions (*i.e.*, Xyrem and any generics) to a single pharmacy. *See* Section I-A-1 and 2, *supra* (detailing lawsuits and alleged abuse of FDA's REMS process). Yet by January 17, 2017, Jazz's Xyrem monopoly was allegedly at risk in two ways.

First, Jazz's Xyrem patents appeared vulnerable. Starting in July 2016—and continuing through March 2017—the Patent Trial and Appeal Board invalidated many Xyrem patents during *inter partes* review. CAC ¶ 197. Meanwhile, other patent litigation was still proceeding. In particular, "Hikma's challenge to Jazz's remaining Xyrem patents was set for trial only a few weeks away." CAC ¶ 209.

Second, on January 17, 2017, Hikma had received FDA approval to circumvent Jazz's single-pharmacy REMS. CAC ¶¶ 208-09. In issuing this approval, the FDA reiterated **[**54]** generic manufacturers' allegations that "Jazz ha[d] engaged in a strategy that 'entails serial attempts to impose unreasonable contractual terms and conditions on the ANDA [filers] while concurrently issuing self-serving statements to FDA and the ANDA [filers] about Jazz's commitment to the process." *Id.* at 207 (quoting Sharp Memo at 11). The FDA then found that the "burden of creating a single, shared system outweighs the benefits." Sharp Memo at 13 (capitalization omitted). Among the burdens were Jazz's "obvious incentives" "to delay generic competition [] by failing to agree on [single, shared system] REMS terms." *Id.* at 17. The FDA therefore concluded that allowing Hikma to proceed with its own drug distribution system would "remove a barrier to generic products coming to market." *Id.*

In sum, by Spring 2017, Hikma's launch of an AB-rated generic was allegedly impending. Hikma had received FDA approval of its ANDA and alternative distribution strategy that circumvented Jazz's single-pharmacy REMS. Moreover, trial on Xyrem's **[*854]** remaining patents was "weeks away." CAC ¶ 209. Thus, Hikma could either launch (A) after potentially prevailing at trial; or (B) before a final litigation outcome. **[**55]** *See generally, e.g., In re Lipitor Antitrust Litig., 868 F.3d 231, 241 (3d Cir. 2017)* (describing generic manufacturer's option to launch "at risk" during ongoing litigation). Either way, Hikma's "manufacture, market[ing], and s[ale] of an AB-rated generic version of Xyrem" did not seem far off. CAC ¶ 126.

An alleged chain of events would follow Hikma's launch of an AB-rated generic. Jazz would likely launch an AG to compete with Hikma during Hikma's 180-day exclusivity period. CAC ¶ 210. Then after that six-month period, other generic manufacturers would presumably enter the market. CAC ¶¶ 183, 195-96 (listing other ANDA filers and two settlements). In fact, as of January 2017, six ANDA filers allegedly were maintaining their patent cases against Jazz. *Id.* The expected outcome of all this competition would be the price of sodium oxybate oral solution—a treatment for narcolepsy—dropping about 85%. *See* Section III-A-1, *supra* (summarizing average price drop upon entry of AB-rated generic).

ii. Jazz-Hikma agreement delays Hikma's entry; Hikma instead resells Jazz's sodium oxybate as Hikma's AG

On April 5, 2017, Hikma and Jazz settled their patent litigation by way of an allegedly unlawful reverse settlement, which Plaintiffs call the "Jazz-Hikma agreement." **[**56]** UHS ¶¶ 163-64. As a result, Hikma did not "manufacture, market, [or] sell an AB-rated generic version of Xyrem." CAC ¶ 148. Nor has Hikma done so to date.

Plaintiffs allege that the Jazz-Hikma agreement was, in part, memorialized in three interdependent documents executed contemporaneously: (1) a "Settlement Agreement"; (2) a "License Agreement"; and (3) and an "AG Agreement." UHS ¶ 164. The Settlement Agreement between Jazz and Hikma was partially disclosed in Jazz's April 5, 2017 Form 8-K. CAC ¶ 215 (citing Jazz Pharmaceuticals plc, Form 8-K at 2 (Apr. 5, 2017)). Jazz and Hikma allegedly agreed to keep the other two documents secret. UHS ¶ 164. In response to Plaintiffs' instant lawsuit, however, Defendants have attached the Hikma License Agreement and Hikma AG Agreement to the instant motion to dismiss.

Under this "Jazz-Hikma agreement," Jazz granted Hikma the right to sell an authorized generic version of Xyrem for an initial term of six months starting on January 1, 2023. *Id.* Specifically, Hikma agreed to buy Xyrem *from Jazz*—through *Jazz's* REMS—and resell that Xyrem under the label of a Hikma AG. UHS ¶ 167. Sales of this Hikma AG are also distributed through Xyrem's single pharmacy, **[**57]** Express Scripts. *Id.* In fact, Plaintiffs allege that Hikma would never take delivery of its AG from Jazz. *Id.*

In short, on April 5, 2017, after nearly seven years of trying to bring an AB-rated generic to market, Hikma agreed to buy and relabel Xyrem rather than manufacture a generic version of Xyrem. By agreeing to this, Hikma delayed its allegedly impending entry into Jazz's market over six years until at least July 1, 2023 (*i.e.*, the end of the six month term for Hikma's AG). CAC ¶ 214. That impending entry had been supported by (1) the possible vulnerability of Xyrem's patents; and (2) the FDA approving Hikma's plan to distribute through a pharmacy other than Express Scripts. *See* Section III-A-2-a-i, *supra* (detailing same).

In Plaintiffs' view, Hikma would not have agreed to Jazz's plan without a compelling economic reason. CAC ¶ 218. The key reason alleged here is that Jazz made a "no-AG" commitment to Hikma. That is, **[*855]** during at least the first 180 days that Hikma AG would be on the market, Jazz allegedly promised that Jazz would not license any other company to market an AG. CAC ¶ 215. The Hikma AG Agreement attached to Defendants' motion to dismiss confirms Jazz's commitment. ***[**58]*** *See* Hikma AG Agreement § 2.2, ECF No. 110-14 (Jazz promising not to "grant[] a license or sublicense to a Third Party to market an Authorized Generic" for approximately six months). Jazz would instead be content to (1) supply the Xyrem that Hikma would advertise and relabel as Hikma AG; and (2) receive an escalating royalty on sales, as analyzed in III-A-1-b-ii, *infra* (analyzing royalty structure).

With no competition from another AG for at least 180 days, Plaintiffs allege that Hikma could sell its AG at a supra-competitive price—and kick back some supra-competitive profits to Jazz. CAC ¶¶ 215, 239. In fact, Plaintiffs estimate Hikma's sales using the typical market share captured by AGs within 180 days of launch. The resulting estimate is that Hikma AG will generate over $480 million in sales between January 1, 2023 and July 1, 2023 alone. *See* CAC ¶ 237 (estimating $480 million to $540 million); UHS ¶ 181 (estimating $705 million).

If proven, this alleged "no-AG agreement transfers the profits the patentee would have made from its authorized generic to the settling generic." *King Drug, 791 F.3d at 405*. The no-AG agreement thus "may represent an unusual, unexplained transfer of value from the patent holder to **[**59]** the alleged infringer and may therefore give rise to the inference that it is a payment to eliminate the risk of competition." *King Drug, 791 F.3d at 394*.

In fact, as the leading antitrust treatise has explained, no-AG agreements "can in fact be more anticompetitive than a large cash payment for delay." Areeda & Hovenkamp, *supra*, ¶ 2045. The reason is that no-AG agreements replace "a generic duopoly" with a "a generic monopoly," which results in "higher prices." *King Drug, 791 F.3d at 394*. Here, the Jazz-Hikma agreement ensures that Hikma AG is the only "generic" for 180 days. Furthermore, Hikma AG is simply relabeled Xyrem manufactured by Jazz. The no-AG agreement thus allows Jazz to maintain its monopoly in exchange for sharing some monopolistic profits with Hikma. ***HN12***[] Put simply, "until generic *production* commences," no-AG agreements are "simply naked restraints on trade." Areeda & Hovenkamp, *supra*, ¶ 2045 & nn.186-87.

b. Alleged reverse payments from Jazz to Hikma

In short, the alleged no-AG agreement "uses valuable licensing in such a way as to induce a patent challenger's delay." *King Drug, 791 F.3d at 406*. Yet as the parties note, Jazz's alleged "no-AG" agreement had an explicit caveat. Jazz's written agreement merely promised not to "grant[] a license or sublicense to a Third Party to market an Authorized Generic." Hikma AG Agreement **[**60]** § 2.2, ECF No. 110-14. Jazz still reserved its right to market its *own* Jazz AG. *See* Hikma License Agreement §§ 1.14, 2.4, ECF No. 111-2 (expressly retaining rights to

"Market," defined as "use, advertise, market, sell, or offer to sell"). That is, at least under Jazz's written agreements, there theoretically could be two AGs between January 1, 2023 and July 1, 2023: Hikma AG and Jazz AG. Defendants thus argue that Plaintiffs fail to plausibly allege the existence of a no-AG agreement between Jazz and Hikma. Mot. at 14.

The Court disagrees. Plaintiffs plausibly allege the existence of an implicit or *de facto* no-AG agreement between Jazz and Hikma. As circumstantial evidence of an implicit no-AG agreement, Plaintiffs rely on explicit parts of the Jazz-Hikma agreement. **[*856]** These parts of the Jazz-Hikma agreement allegedly (1) disincentivize Jazz from marketing its own AG; and (2) further compensate Hikma in order "to maintain supracompetitive prices to be shared among the patentee [here, Jazz] and the challenger [here, Hikma] rather than face what might have been a competitive market." *Actavis, 570 U.S. at 157*.

Plaintiffs specifically identify three parts of the Jazz-Hikma agreement that disincentivize a Jazz AG and **[**61]** convey value to Hikma. The first is Jazz's promise not to license Jazz's AG through any third party for six months. The second is the royalty structure, which escalates kickbacks from Hikma to Jazz to undermine Jazz's economic interest in competing to sell Jazz's own AG. The third is the Jazz-Hikma agreement's "acceleration clause," a type of most-favored-entry clause that allows Hikma to sell AG immediately if (1) a generic version of Xyrem were to market itself without Jazz's permission; or (2) anyone were to successfully invalidate or render unenforceable Xyrem's unexpired patent claims. *See* Hikma AG Agreement § 2.8, ECF No. 110-14 (acceleration provisions). In Plaintiffs' view, the acceleration clause deters potential generic entrants by triggering competition if they actually enter.

Together, these parts of the Jazz-Hikma agreement were allegedly "designed to, and do[] have, the effect that during at least the first six months of entry (before subsequent generics were allocated a slice of the market in their own separate pay-for-delay agreements, as discussed below [in Section III-A-2]), the Hikma AG would be the only authorized generic." CAC ¶ 221. The alleged estimated value **[**62]** to Hikma of the Jazz-Hikma agreement is over $480 million just in the first six months after Hikma launches its AG (which is relabeled Xyrem made by Jazz). CAC ¶ 237 (estimating $480 million to $540 million); UHS ¶ 181 (estimating $705 million). Jazz's market capitalization also jumped by about $785 million after the Jazz-Hikma agreement was partially disclosed on April 6, 2017—a jump that Plaintiffs allege is attributable to investors' expectations that Xyrem would face reduced generic competition. UHS ¶ 185; CAC ¶ 246. Ultimately, in exchange for Hikma delaying its AB-rated generic, Jazz has allowed Hikma to relabel and sell Jazz Xyrem as Hikma AG.

Below, the Court details the three parts of the Jazz-Hikma agreement that disincentivize a Jazz AG and convey value to Hikma.

i. Reverse payment 1 of 3: Delay on third party licensing

First, Jazz promised not to license its AG through any other third party for Hikma's first 180 days selling Hikma AG—which, as stated, would simply be Jazz Xyrem but relabeled. This no *third-party* licensing period spans at least January 1, 2023 and July 1, 2023. CAC ¶ 6; *accord, e.g.*, Hikma License Agreement § 2.4 (expressly noting that Jazz's rights "specifically **[**63]** exclud[e] granting a license or sublicense to a Third Party for an Authorized Generic" for the "Initial Sales Period"); Hikma AG Agreement § 1.27 (defining Initial Sales Period as six-months from AG Launch Date). Jazz reserved the theoretical option of marketing and labeling an AG itself. Yet, as Plaintiffs plausibly allege, it is highly unlikely that Jazz would launch its own AG. Evidencing this *de facto* no-AG agreement are (1) Jazz's statements on its in-house manufacturing capacity; and (2) industry custom.

Jazz's statements suggest that its in-house manufacturing capacity is limited. Consequently, products that are manufactured by Jazz—including Xyrem, Hikma AG, and the Later Generic Defendants' AGs—must largely share the same limited **[*857]** output of sodium oxybate oral solution. *See* Section III-A-3, *infra* (detailing Jazz's licensing AGs to Later Generic Defendants). Statements to this effect are in Jazz's annual report (SEC Form 10-K) and the Jazz-Hikma AG Agreement. Specifically:

• Jazz's latest annual report shows that Jazz currently does not sell any AGs. Rather, "Jazz currently only sells branded (commercialized) products in the United States." CAC ¶ 221 n.67 (citing Jazz Pharmaceuticals **[**64]** plc, 2020 Annual Report (Form 10-K) at 6-11 (Feb 23, 2021)). As the FTC has found, "if [a] brand company does not market generics in the United States," a commitment from the brand manufacturer not to use a third party to distribute an authorized generic for a period of time . . . could have the same effect as an *explicit* no-AG agreement." FTC, *Overview of Agreements Filed in FY 2016: A Report by the Bureau of Competition* at 2 (May 2019) (emphasis added) ("2019 FTC Report").

• Jazz's annual report also states that Jazz's "ability to develop and supply products in a *timely and competitive* manner *depends primarily on third party suppliers* being able to meet our ongoing commercial and clinical trial needs for [active pharmaceutical ingredient], other raw materials, packaging materials and finished products." CAC ¶ 221 n.67 (quoting Annual Report at 16). Thus, by Jazz's own admission, Jazz would need to "depend[] primarily on third party suppliers" to develop and supply a new product such as a generic version of Xyrem. *Id.* Supplying an AG in-house would not be "timely and competitive." *Id.*

• The Jazz-Hikma AG Agreement further evinces Jazz's manufacturing constraints. Jazz and Hikma explicitly **[**65]** planned for the possibility of a supply shortage. Hikma AG Agreement § 3.3 contains a provision titled "Allocation if Supply Shortage." The provision allocates sodium oxybate between Jazz and Hikma in the event of "a shortage of any materials" or "insufficient [Drug Enforcement Administration] quota to Manufacture [Hikma]'s requirements for the [Hikma] Authorized Generic." *Id.*

Given these documents, it is plausible that Jazz cannot manufacture enough sodium oxybate to supply Xyrem, Hikma AG, *and* a theoretical Jazz AG—let alone those three labels *plus* the three additional AGs that Jazz will begin to supply for Amneal, Par, and Lupin on July 1, 2023. *See* Section III-A-3, *infra* (detailing Jazz's settlements with Later Generic Defendants). In other words, Jazz's statements suggest that Jazz only manufactures enough for its Xyrem label.

Industry custom confirms that Jazz likely faces manufacturing constraints. It is not customary in the pharmaceutical industry for a brand manufacturer (such as Jazz) to launch its own AG. CAC ¶¶ 87, 110, 221 n.67 (citing FTC studies). Indeed, the FTC has found that "[t]he *most common* form of possible compensation" in settlements between brand and generic manufacturers **[**66]** "is a commitment from the brand manufacturer *not to use a third party* to distribute an authorized generic for a period of time, such as during first-filer exclusivity." 2019 FTC Report at 2. These commitments often "have the same effect as an explicit no-AG commitment." *Id.*; *see* CAC ¶ 110 (citing same). Specifically, the FTC has found that "out of 119 AG launches from 2001 to 2008, *only one* was distributed by a brand drug company without generic marketing." *In re Intuniv Antitrust Litig. ("Intuniv"), 496 F. Supp. 3d 639, 671 (D. Mass. 2020)* (emphasis added) (citing FTC 2011 AG Study); **[*858]** *see also* CAC ¶ 87 n.36 (citing FTC 2011 AG Study). Moreover, at least one court has credited research that "out of the 529 AG launches since 2009 . . . only two were distributed by a brand company without generic expertise." *Intuniv, 496 F. Supp. 3d at 671*. Thus, it is at least plausible that Jazz—like almost all other brand drug companies—would not launch its own AG. All told, Plaintiffs plausibly allege that Jazz's promise to not license Jazz's AG through a third party for six months functioned to delay *any* Jazz AG for six months.

Defendants also fail to show that Jazz has the marketing expertise or economic incentive to sell an AG. Empirically, brand name manufacturers almost never launch their own AG. *See* *Intuniv, 496 F. Supp. 3d at 671* (citing **[**67]** FTC 2011 AG Study and other research). Instead, brand name manufacturers generally rely on companies that specialize in generic drugs to market an AG. *Id.* Here, at the motion to dismiss stage, it is plausible that Jazz would follow prevailing industry practice and not launch a Jazz AG.

In sum, it is plausible that Jazz's agreement to delay licensing Jazz AG through a third party delayed Jazz's ability to compete with Hikma and the other Generic Defendants. That delay would give Hikma at least a 180-day monopoly on the only Xyrem "generic"—specifically, an authorized generic manufactured by Jazz, but marketed by Hikma. The result will be "simply a horizontal market division" between Hikma (which will sell Jazz's Xyrem marketed as Hikma AG) and Jazz (which will sell Xyrem but no Jazz AG). Areeda & Hovenkamp, *supra*, ¶ 2045. This plausible no-AG agreement would constitute a transfer of value from Jazz to Hikma. *See, e.g.,* *Impax Labs.,* 994 F.3d at 494 (holding same and collecting cases); Areeda & Hovenkamp, *supra*, ¶ 2045 (arguing that no-AG agreements "can in fact be more anticompetitive than a large cash payment for delay").

ii. Reverse payment 2 of 3: Escalating royalty payments

Second, Plaintiffs allege escalating royalty payments from Hikma to Jazz that undermine Jazz's economic **[**68]** interest in selling its own AG. For support, Plaintiffs cite the royalty structure in the Hikma AG Agreement, one of the three contracts that partially constitute the Jazz-Hikma agreement. *See* Opp'n at 10-11 (citing Hikma AG Agreement § 5.2.1); *see also, e.g.*, UHS ¶ 166 (alleging that Hikma agreed to pay a "meaningful royalty" that increases with sales); CAC ¶ 231 (same). Under this AG Agreement, Hikma will pay increasingly higher percentages of revenue to Jazz as Hikma's market share increases. Specifically, Hikma will pay (1) a [TEXT REDACTED BY THE COURT] royalty on sales up to [TEXT REDACTED BY THE COURT] market share; (2)a [TEXT REDACTED BY THE COURT] royalty on incremental sales up to [TEXT REDACTED BY THE COURT] market share; (3) a [TEXT REDACTED BY THE COURT] royalty on incremental sales up to [TEXT REDACTED BY THE COURT] market share; (4) a [TEXT REDACTED BY THE COURT] royalty on incremental sales up to [TEXT REDACTED BY THE COURT] market share; (5) and a [TEXT REDACTED BY THE COURT] royalty on incremental sales up to a [TEXT REDACTED BY THE COURT] market share. Hikma AG Agreement § 5.2.1.

In turn, Hikma's market share is defined as Hikma's percentage of total units sold by **[**69]** Jazz and Hikma. *Id.* ¶¶ 1.53, 1.55, 5.2.1. Hikma takes "market share" as it sells more bottles of Hikma AG. Conversely, as Jazz sells bottles of its branded product (*i.e.*, Xyrem) or a theoretical Jazz AG, Hikma's market share and incremental royalty rate decrease. In sum, the more AG that Hikma sells, the more Hikma pays Jazz. All the while, Hikma AG is merely relabeled Xyrem that is manufactured by Jazz.

Plaintiffs allege that this royalty structure discourages Jazz from launching an AG in three ways. First, if Jazz were to **[*859]** launch its own AG, the resulting price competition would lower prices for all sodium oxybate products—branded and generic. *See, e.g.*, CAC ¶¶ 96-98 (citing, *e.g.*, Ernst R. Berndt et al., *Authorized Generic Drugs, Price Competition, and Consumers' Welfare*, 26 Health Affairs 790, 796 (2007)). Second, Jazz's competing AG would reduce Hikma's market share and selling price. In turn, that competition from Jazz would reduce Hikma's incremental royalty rate, Hikma's sales, and Hikma's royalty payments to Jazz. *See, e.g.*, UHS ¶¶ 61-63 (citing, *e.g.*, FTC 2011 AG Study). Third, a Jazz AG would cannibalize sales of Jazz's more profitable Xyrem-branded product. *See, e.g.*, CAC **[**70]** ¶ 83 (alleging that generics are "50% to 80% (or more) less expensive than their brand counterparts"). In fact, the FTC's 2011 AG Study found that within six months after the launch of a generic, the market share of the branded drug is "less than 20 percent." FTC2011 AG Study at 67; *see* CAC ¶ 91 (quoting same).

The Court agrees that Plaintiffs' allegations as to escalating royalties are plausible. Supporting this conclusion are findings by other courts and the FTC. ***HN13***[] Courts, for their part, have held that royalty payments may be "effectively a kickback." *FWK Holdings LLC v. Shire PLC, No. 16-CV-12653-ADB, 2017 U.S. Dist. LEXIS 224737, 2017 WL 11449668, at *8 (D. Mass. Oct. 10, 2017)*. In *FWK Holdings*, for instance, the court found plausible the allegation that "royalty payment[s] . . . both incentivized [the brand name manufacturer] not to launch an AG and evidence[d] the substantial value [the generic manufacturer] secured through the no-AG agreement." *Id.* Similarly, in *Intuniv*, the court held at summary judgment that royalty payments by a generic manufacturer could "effectively incentivize [the brand name manufacturer] to stay out of the generic market." *496 F. Supp. 3d at 670*. The *FWK Holdings* and *Intuiniv* courts thus rejected the argument that "a royalty payment cannot form the basis of a reverse payment claim." *2017 U.S. Dist. LEXIS 224737, [WL] at *9*; *accord* *Intuniv, 496 F. Supp. 3d at 670* (rejecting **[**71]** argument that "there is no evidence that the royalty provision acted as an enforcement mechanism for an implicit no-AG agreement"). That failed argument is the same argument Jazz makes against Plaintiffs' royalty allegations here. *See* Reply at 8 (arguing that "royalties are not 'reverse payments'").

HN14[] The FTC, for its part, has found that a "common form of possible compensation" in reverse settlements is a "royalty structure" like the one here. 2019 FTCReport at 2. Specifically, a royalty structure "may achieve the same effect as an explicit no-AG commitment." *Id.* This *de facto* no-AG agreement may be achieved where a result of the "brand [manufacturer] launch[ing] an authorized generic" would be that "the generic [company]'s obligation to pay royalties is reduced." *Id.*

Here too, if Jazz were to launch its own AG, Hikma's royalty obligations to Jazz would decrease. *See, e.g.*, UHS ¶¶ 61-63 (summarizing allegations). The reason, as discussed above, is the following chain of events plausibly triggered by a Jazz AG. A Jazz AG would plausibly (1) take market share from Hikma AG, which is merely relabeled Jazz Xyrem; and (2) compete on price with Hikma AG. Lowering Hikma AG market share would **[**72]** reduce Hikma's incremental royalty rate. Price competition would lower the prices of Hikma AG, the Jazz AG, and Xyrem—thereby potentially reducing the revenue of all three products. Together, lower incremental royalty rate and lower Hikma AG revenue would reduce Hikma's royalty payments. *Id.*

In sum, Plaintiffs plausibly allege that the Jazz-Hikma agreement's escalating royalty structure incentivized Jazz to delay its own AG.

[*860] iii. Reverse payment 3 of 3: Acceleration clause

Third, Plaintiffs allege that the Jazz-Hikma agreement contains a type of most-favored-entry clause called an "acceleration clause" or "poison pill," which hinders entry by later generics. *See, e.g.*, CAC ¶ 120, 225; UHS ¶ 177 (describing Hikma acceleration clause). The acceleration clause allows Hikma to immediately launch its AG if (1) a generic version of Xyrem were to market itself without Jazz's permission; or (2) anyone were to successfully invalidate or render unenforceable Xyrem's unexpired patent claims. CAC ¶ 225 (quoting alleged clause); *accord* Hikma AG Agreement § 2.8 (acceleration clause). Otherwise, the Jazz-Hikma agreement provides that Hikma may launch Hikma AG, which is relabeled Jazz Xyrem, on January **[**73]** 1, 2023. Hikma AG Agreement § 1.5.

This acceleration clause adds value to Hikma in two ways. First, the clause plausibly disincentivizes other generic manufacturers from litigating their patent claims and coming to market as soon as possible. *Id.* The clause has this anticompetitive harm because, if another generic manufacturer successfully enters the market, that manufacturer immediately faces competition from Jazz's Xyrem and Hikma AG. Competition reduces a prospective entrant's expected profits. *E.g., Musical Instruments, 798 F.3d at 1193 n.8*. The prospective entrant is less likely to enter as a result.

For instance, as the head of one of the world's largest generic manufacturers testified to Congress on March 31, 2009, acceleration clauses are "the primary anticompetitive aspects of settlements." Protecting Consumer Access to Generic Drugs Act of 2009: Hearing on H.R. 1706 Before the Subcomm. On Commerce, Trade, and Consumer Protection of the H. Comm. on Energy & Commerce, 111th Cong., at 228 (Mar. 31, 2009) (statement of Bernard Sherman, CEO, Apotex, Inc.; CAC ¶ 123 (quoting same). Specifically, the CEO of Apotex testified:

> At first blush, the acceleration of [a generic's] entry into the market . . . may sound like a good **[**74]** outcome for consumers because it expedited access to the generic. However, *no subsequent filer is going to take up the patent fight knowing it will get nothing if it wins*. Consumers are the biggest losers under this system. . . . Weak patents that should be knocked out will remain in place, unduly blocking consumer access to generics. . . . And settlements that delay consumer access to the generic will, in turn, increase.

111th Cong., at 218 (emphasis changed); CAC ¶ 123 (quoting same). In short, acceleration clauses may "very substantially diminish[], if not altogether eliminate[], the incentive for later generic filers to enter" before the scheduled entry date protected by the clause. *In re Loestrin 24 Fe Antitrust Litig. ("Loestrin"), 261 F. Supp. 3d 307, 333 (D.R.I. 2017)* (crediting allegation at motion to dismiss); *In re Loestrin 24 Fe Antitrust Litig. ("Loestrin"), 433 F. Supp. 3d 274, 321 (D.R.I. 2019)* (same at summary judgment).

Second, Hikma's acceleration clause—coupled with acceleration clauses in each of Jazz's agreements with the Later Generic Defendants (*see* Section III-A-3, *infra*)—plausibly operates as a cartel enforcement mechanism. *See* Hikma AG Agreement § 2.8 (acceleration clause); Par AG Agreement § 2.7 (same); Lupin AG Agreement § 2.7.1, ECF No. 110-18 (same); Amneal AG Agreement § 2.7.1, ECF No. 110-20 (same).

The acceleration clauses so operate **[**75]** by creating a "powerful threat": the "threat of reversion to competitive behavior." Robert C. Marshall & Leslie M. Marx, *The Economics of Collusion: Cartels and Bidding* ***[*861]*** *Rings* at 136 (2012). As explained by economists Robert Marshall and Leslie Marx, reversions to competitive behavior deny firms collusive profits and are thus well-documented as "punishment for deviations from collusion." *Id.* (citing Congressional testimony and economic studies).

Here, the acceleration clauses allow Hikma, Amneal, Par, and Lupin to revert to competitive behavior (*i.e.*, quickly market an AG) if *any* generic manufacturer defects from the alleged scheme to delay and restrain generic output. These acceleration clauses allegedly all function like the Hikma clause just described. CAC ¶¶ 225, 232, 253, 260, 267; UHS ¶¶ 177, 188, 191, 196, 203 (describing acceleration clauses). Specifically, each Later Generic Defendant contractually received a default launch date of July 1, 2023 for their AGs. CAC ¶¶ 250, 257, 264. That default launch date coincides with the end of Hikma's exclusive licensing period for Hikma's AG. However, if a third party sells a generic without Jazz's permission before July 1, 2023, Hikma **[**76]** and each Later Generic Defendant may immediately start selling its AG to compete with that unauthorized entrant. *See* Par AG Agreement § 2.7 (acceleration provision); Lupin AG Agreement § 2.7.1 (same); Amneal AG Agreement § 2.7.1 (same). Consequently, any unauthorized generic entrant faces the unprofitable prospect of immediately competing with Hikma, Amneal, Par, and Lupin.

All told, the Hikma acceleration clause has plausibly deterred generic entry. Indeed, this conclusion tracks research on the empirical result of acceleration clauses in the pharmaceutical industry. Health economists Thomas G. McGuire and Keith M. Drake have found that acceleration clauses have never promoted earlier generic entry where, as here, the first-filer (Hikma) has retained its 180-day period of exclusivity. Keith M. Drake & Thomas G. McGuire, *Generic Entry Before the Agreed-Upon Date in Pharmaceutical Patent Settlements*, 16 J. Competition L. & Econ. 188, 188 (2020) (available on Lexis+); *see* CAC ¶ 124 (citing same); *see generally* *Actavis, 570 U.S. at 144* (summarizing 180-day period of exclusivity under Hatch-Waxman Act). Specifically, "[a]mong the 54 cases in which the first filer retained sole rights to the 180-day exclusivity period, there were no cases of early generic **[**77]** entry. In other words, there were no cases in which the first-filer's entry was accelerated, and there were no cases in which a different generic entered before the entry date set in the first-filer's settlement." Drake & McGuire, *supra*, at 194.

HN15[] Accordingly, like other courts analyzing acceleration clauses at the motion to dismiss stage, the Court holds that acceleration clauses plausibly cause anticompetitive harm as part of an alleged reverse payment scheme. *See, e.g.,* *In re Sensipar Cinacalcet Hydrochloride Tablets Antitrust Litig., No. 19-CV-1460-LPS, 2020 U.S. Dist. LEXIS 223786, 2020 WL 7022364, at *6 (D. Del. Nov. 30, 2020)* (denying motion to dismiss because "acceleration provision [] could be proven to constitute value transferred"); *Loestrin, 261 F. Supp. 3d at 334* (same because acceleration clause is "cognizable as a component of a complex settlement agreement"); *Staley v. Gilead Scis., Inc., 446 F. Supp. 3d 578, 610 (N.D. Cal. 2020)* (same because acceleration clause, also known as a most favored entry clause, limits "entry, *i.e.*, when competition is allowed into a market"). Indeed, several courts have denied *summary judgment* against acceleration clause allegations despite "various [assertions of] broad procompetitive justifications" for such clauses. *Loestrin, 433 F. Supp. 3d at 321*; *see, e.g.,* *In re Namenda Indirect Purchaser Antitrust Litig., No. 15-CV-6549-CM, 2021 U.S. Dist. LEXIS 110081, 2021 WL 2403727, at *26, *29 (S.D.N.Y. June 11, 2021)* (denying summary judgment based on "potential **[*862]** anticompetitive impact from [] acceleration clause").

Defendants respond that Jazz's acceleration clauses failed to actually deter generic entry. Reply at **[**78]** 8-9. For support, Defendants note that after Jazz and Hikma settled, between nine to 18 months passed before the Later Generic Defendants settled with Jazz. *Id.* at 9 (citing CAC ¶¶ 249, 263; UHS ¶¶ 190, 199). Thus, in Defendants' view, the Later Generic Defendants should have settled sooner if Jazz's acceleration clauses in fact deterred generic entry.

Defendants' argument lacks merit for three reasons. First, Plaintiffs allege—and Defendants do not dispute—that "several other generics [] abandoned their challenges to the Xyrem patents" after the Hikma settlement. CAC ¶ 247 & n.68 (citing settlements with Wockhardt Bio AG, Ranbaxy Laboratories Limited, and Ranbaxy Inc.). These generic manufacturers plausibly abandoned their patent challenges because the acceleration clauses "very substantially diminished, if not altogether eliminated," the expected payoff from entering the Xyrem market with an AB-rated generic. Loestrin, 261 F. Supp. 3d at 333 (crediting same reasoning). Thus, even if Jazz's acceleration clauses failed to *completely* deter all potential generics, the clauses at least plausibly deterred some generics.

Second, Defendants cite only one authority for the proposition that continued litigation requires dismissal **[**79]** of acceleration clause allegations—and that authority is inapposite. Mot. at 26. Specifically, Defendants cite *In re Actos End Payor Antitrust Litig., No. 13-CV-9244-RA, 2015 U.S. Dist. LEXIS 127748, 2015 WL 5610752, at *15 (S.D.N.Y. Sept. 22, 2015)*, *aff'd in part, vacated in part*, 848 F.3d 89 (2d Cir. 2017). There, the district court relied on at least two grounds absent here. The first ground was that "[s]ignificantly, [p]laintiffs d[id] not allege that the [g]eneric [d]efendants shared in the [brand name manufacturer]'s monopoly profits by charging supracompetitive prices when they entered the market." *Actos, 2015 U.S. Dist. LEXIS 127748, 2015 WL 5610752, at *15*. Here, by contrast, Plaintiffs allege in detail that Hikma—along with the other Generic Defendants—"shar[ed] supra-competitive pricing of Xyrem products." CAC ¶ 259; *see, e.g., id.* ¶¶ 190 (graph of allegedly supra-competitive pricing history), 273-75 (quoting Jazz CEO discussing elevated prices, "very limited volumes," and successfully avoiding "a generic free for all").

Actos's other inapposite ground for dismissal was that, as of 2015, "no other court ha[d] found an acceleration clause to constitute a reverse payment." *Actos, 2015 U.S. Dist. LEXIS 127748, 2015 WL 5610752, at *16*. "In fact," the *Actos* court reasoned, "acceleration clauses were pleaded as an alleged 'payment' in *In re Loestrin*, but th[at] [c]ourt summarily rejected plaintiffs' **[**80]** theory." *Id. n.13* (citing *In re Loestrin 24 Fe Antitrust Litig., 45 F. Supp. 3d 180, 191 (D.R.I. 2014)*, *vacated and remanded*, 814 F.3d 538 (1st Cir. 2016)). Since 2015, however, many courts have denied motions to dismiss or summary judgment because "acceleration provision[s] [] could be proven to constitute value transferred" in a reverse payment scheme. *In re Sensipar, 2020 U.S. Dist. LEXIS 223786, 2020 WL 7022364, at *6*; *see, e.g., In re Namenda Indirect Purchaser Antitrust Litig., 2021 U.S. Dist. LEXIS 110081, 2021 WL 2403727, at *26, *29* (denying summary judgment based on "potential anticompetitive impact from [] acceleration clause"). For instance, the *Loestrin* case on which the *Actos* court relied was vacated and remanded by the First Circuit. *See In re Loestrin 24 Fe Antitrust Litig., 814 F.3d 538 (1st Cir. 2016)*. Then, both on remand and at summary judgment, the *Loestrin* court which had erroneously dismissed the acceleration clause allegations allowed them to proceed to trial. *See In re Loestrin 24 Fe Antitrust Litig., 261 F. Supp. 3d* ***[*863]*** *at 334* (denying motion to dismiss on remand); *In re Loestrin 24 Fe Antitrust Litig., 433 F. Supp. 3d at 321* (denying summary judgment). Thus, both the factual and legal premises of *Actos* are inapplicable here. Jazz's acceleration clauses plausibly convey value as part of an alleged reverse payment scheme.

Lastly, Defendants' argument threatens to create an antitrust loophole at the motion to dismiss stage. Under Defendants' reasoning, a generic manufacturer need only let a lawsuit sit idle for several months to defeat any allegation that an acceleration clause deterred generic entry. Similarly, a generic manufacturer **[**81]** could litigate feebly so that it intentionally fails to trigger any acceleration clause. *Cf., e.g., Miller & Lux v. E. Side Canal & Irrigation Co., 211 U.S. 293, 303, 29 S. Ct. 111, 53 L. Ed. 189 (1908)* (identifying and criticizing a collusive lawsuit); *IP and Antitrust* § 3.03 & n.155 (same in patent context). Thus, the time lapsed on a lawsuit should be insufficient to show whether an acceleration clause deterred the vigorous prosecution of that lawsuit.

In sum, Plaintiffs have plausibly alleged at least three reverse payments in the Jazz-Hikma agreement: (1) Jazz's six-month delay on third-party licensing; (2) the escalating royalty structure for Hikma's AG sales; and (3) an acceleration clause that deters generic entry and enforces collusion among all Defendants. The alleged estimated value to Hikma of the Jazz-Hikma agreement is over $480 million just in the first six months after Hikma launches its AG. CAC ¶ 237 (estimating $480 million to $540 million); UHS ¶ 181 (estimating $705 million). This is more than enough to support a reverse payment claim under *Actavis. See, e.g., Actavis, 570 U.S. at 145* (reversing dismissal of claims challenging payments as small as $12 million to one defendant); *Impax, 994 F.3d at 494* (affirming reverse payment claim against payment that increased generic's profits by $24.5 million). Accordingly, **[**82]** the Court denies Defendants' motion to dismiss Plaintiffs' reverse payment claims (CAC Counts 1 and 7; UHS counts 1, 5, and 8).

3. Plaintiffs adequately allege that Jazz's settlements with the Later Generic Defendants contain reverse payments (CAC Counts 8-10; UHS Counts 5, 7, and 8).

Plaintiffs also allege that the Later Generic Defendants (Par, Lupin, and Amneal) received large unjustified payments from Jazz. These reverse payments took three forms. First, Jazz made multi-million-dollar cash payments to each Later Generic Defendant—ostensibly for Jazz's avoided litigation costs. *See* Opp'n at 13 (citing Par Settlement Agreement § 3, ECF No. 110-15 (Ex. 4); Lupin Settlement Agreement § 3, ECF No. 110-17 (Ex. 7); Amneal Settlement Agreement § 3, ECF No. 110-19 (Ex. 10)). Jazz paid [TEXT REDACTED BY THE COURT] to Par, Lupin, and Amneal respectively. *See* Par Settlement Agreement § 3; Lupin Settlement Agreement § 3; Amneal Settlement Agreement § 3.

Second, Jazz gave each Later Generic Defendant a limited license to sell a constrained supply of AG. Specifically, each license (1) began only after the expiration of Hikma's 180-day exclusivity period in July 2023; (2) was capped at a low-single-digit **[**83]** market share; and (3) required a royalty payment, as a percentage of sales, that increased over time. *See, e.g.*, Lupin AG Agreement § 1.27, 5, ECF No. 110-18 (Exh. 8).

Third, Jazz's agreements with each Later Generic Defendant contained acceleration clauses like the acceleration clause in the Jazz-Hikma agreement discussed above. *See, e.g.*, CAC ¶¶ 253, 260, 267 (alleging acceleration clauses); Section III-A-2-b-iii, *supra* (analyzing Jazz-Hikma acceleration **[*864]** clause and acceleration clauses generally). The acceleration clauses appear in the contracts that Defendants have attached to their motion to dismiss. *See, e.g.*, Par AG Agreement § 2.7; Lupin AG Agreement § 2.7.1; Amneal AG Agreement § 2.7.1.

Plaintiffs estimate the value to the Later Generic Defendants of these agreements to be in the tens of millions of dollars. CAC ¶¶ 255, 262, 269-70; UHS ¶¶ 193, 198, 205, 206. In exchange for these reverse payments, Plaintiffs allege that the Later Generic Defendants agreed to (1) surrender their patent challenges; and (2) delay and limit the entry of generic versions of Xyrem. *See* CAC ¶¶ 247-46 (allegations of quid pro quo). Had the Later Generic Defendants not entered reverse settlements, the **[**84]** Later Generic Defendants would have allegedly entered the market long before 2023. UHS ¶ 188.

Defendants offer two arguments for dismissing the reverse payment allegations against the Later Generic Defendants, but neither is persuasive. Defendants first argue that Jazz did not make any reverse payments to the Later Generic Defendants. Instead, in Defendants' telling, "Jazz's agreements with the Later Generic[] [Defendants] simply permit those companies to enter the market before patent expiry, first with volume-limited AG sales and then with full entry 2.5 years later."

This first argument mischaracterizes ***HN16***[] Plaintiffs' factual allegations, which the Court must accept as true and construe in the light most favorable to Plaintiffs at the motion to dismiss stage. *Manzarek v. St. Paul Fire & Marine Ins. Co., 519 F.3d 1025, 1031 (9th Cir. 2008)*. Those allegations, as detailed above, are that Jazz (1) paid each Later Generic Defendant millions of dollars; (2) gave each Later Generic Defendant a limited license to sell a constrained supply of AG; and (3) agreed to acceleration clauses that disincentivized entry by any generic and served as a cartel enforcement mechanism. The value of each of Jazz's agreements with the Later Generic Defendants is allegedly "at least" in **[**85]** the "tens of millions of dollars." *E.g.*, CAC ¶¶ 255, 262, 269-70; UHS ¶¶ 193, 198, 205, 206. Moreover, Jazz's alleged cash payment of "many millions of dollars" to a generic manufacturer is what the *Actavis* Court described as the paradigmatic reverse payment. *Actavis, 570 U.S. at 140*. Defendants are thus wrong that Plaintiffs have not alleged any "payments." Mot. at 19.

Defendants' other argument is that, even if Plaintiffs have alleged reverse payments, those payments are not "large" and "unexplained." Mot. at 19. Specifically, in Defendants' view, "[t]here is simply no way to plausibly value the volume-limited AG sales provisions." This argument fails on two independent grounds. To start, the volume-limited AG licenses are only one of the three forms of reverse payment summarized above. Defendants thus ignore the alleged cash payments and acceleration clauses—either of which may constitute actionable reverse payments. *See Actavis, 570 U.S. at 140* (discussing cash payment); Section III-A-1-a, *supra* (discussing acceleration clauses).

In addition, Defendants' demand for a more precise valuation of non-cash payments (such as the AG licenses) is unjustified. ***HN17***[] As the Third Circuit recently explained in reversing a district court's dismissal **[**86]** of a reverse payment claim, a plaintiff can meet *Actavis*'s "pleading standard without describing in perfect detail the world without the reverse payment, *calculating reliably the payment's exact size*, or preempting every possible explanation for it." *FTC v. AbbVie Inc, 976 F.3d 327, 356 (3d Cir. 2020)* (emphasis added), *cert. denied*, *No. 20-1293, **[*865]** 141 S. Ct. 2838, 210 L. Ed. 2d 951, 2021 U.S. LEXIS 3233, 2021 WL 2519407 (U.S. June 21, 2021)*. The Third Circuit has found, for instance, that non-cash payments are plausibly "large" and "unjustified" based on relatively general allegations. *Id. at 357*. Payments may be sufficiently "large" because they allegedly are "extremely valuable" and exceed litigation costs saved through settlement. *Id.* Similarly, reverse payments may be plausibly "unjustified" also because they exceed alleged litigation costs. *Lipitor, 868 F.3d at 261*; *accord* *AbbVie, 76 F.3d at 355-56* (summarizing *Lipitor*'s holdings).

Here too, Plaintiffs allege non-cash payments that are both extremely valuable and exceed alleged litigation costs. *E.g.*, CAC ¶ 269. Specifically, Plaintiffs plausibly estimate that *each percent* of market share allocated to the Generic Defendants represents about $13.5 million per year: a calculation based on Xyrem's annual sales discounted by 10% for price competition even in an allegedly collusive market. CAC ¶ 270. Jazz allegedly allocated several percentage points **[**87]** of market share to each Later Generic Defendant. *See, e.g.*, Lupin AG Agreement § 1.27, 5; CAC ¶ 264 (alleging same). The resulting estimate of value is $13.5 million multiplied by each percent of market share—*i.e.*, "tens of millions of dollars" to each Later Generic Defendant. *E.g.*, CAC ¶ 269. At this early stage in the litigation, this estimate is sufficient. Again, as the Third Circuit has warned, Plaintiffs need not "calculat[e] reliably the payment's exact size." *AbbVie Inc, 976 F.3d at 356*.

B. Plaintiffs adequately plead an overarching antitrust conspiracy (CAC Counts 5 and 11; UHS Counts 5, 7, and 8) that unlawfully allocates the Xyrem market (CAC Counts 8-10; UHS Counts 5, 7, and 8).

Defendants' second ground for dismissal is that Plaintiffs fail to plead either (1) an overarching antitrust conspiracy; or (2) an unlawful horizontal market allocation. The Court agrees that the alleged market allocation is not per se unlawful, but otherwise disagrees with Defendants here. Below, the Court analyzes Plaintiffs' allegations of conspiracy followed by market allocation.

1. Plaintiffs adequately allege an overarching conspiracy among all Defendants.

Defendants argue that "Plaintiffs' allegations of bilateral litigation **[**88]** settlements between Jazz and each individual Generic Defendants do not plausibly allege an overarching conspiracy." Mot. at 23. For support, Defendants cite the rule that ***HN18***[] "mere allegations of parallel conduct—even consciously parallel conduct—are insufficient to state a claim under *§ 1* [of the Sherman Act]." *Id.* (quoting *In re Musical Instruments & Equip. Antitrust Litig., 798 F.3d 1186, 1193 (9th Cir. 2015)*). "Plaintiffs must plead 'something more,' 'some further factual enhancement,' a 'further circumstance pointing toward a meeting of the minds' of the alleged conspirators." *Musical Instruments, 798 F.3d at 1193* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 557, 560, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*). Applying this rule to reverse payment cases, Defendants concede that Plaintiffs plead an overarching conspiracy if Plaintiffs plausibly show that "each generic had an understanding about the nature of the conspiracy and its scope—which would include that there was more than just a bilateral conspiracy between each generic and the brand." Mot. at 23 (alterations omitted) (quoting *Staley v. Gilead Scis., Inc. ("Gilead II"), No. 19-CV-02573-EMC, 2020 U.S. Dist. LEXIS 167071, 2020 WL 5507555, at *7 (N.D. Cal. July 29, 2020)*).

Plaintiffs show what Defendants concede would constitute an overarching conspiracy. ***HN19***[] As the *Gilead II* Court explained, an overarching conspiracy plausibly **[*866]** exists where, as here, each Defendant (1) "had reason to know" that other Defendants were involved in the same "broad project"; and (2) "had reason to believe **[**89]** that their own benefits derived from the operation were probably *dependent upon the success of the entire venture*." *Gilead II, 2020 U.S. Dist. LEXIS 167071, 2020 WL 5507555, at *8* (emphasis in original) (quoting

United States v. Briscoe, 896 F.2d 1476, 1505 (7th Cir. 1990)). The Court addresses each element of the plausible conspiracy in turn.

a. Each Defendant plausibly had reason to know that other Defendants were involved in the same "broad project" to allocate the market.

As to shared knowledge of the same "broad project," each Defendant had reason to know—or actually knew—that Jazz was allegedly allocating the market for Xyrem and its generics. This knowledge stemmed from, at a minimum, public information on Jazz's response to generic manufacturers' public ANDAs. *See, e.g.*, CAC ¶¶ 149-151 (detailing Hikma ANDA and Jazz's lawsuits), 183 (detailing other generics' ANDAs for generic version of Xyrem). In quick succession, Jazz settled its long-running patent lawsuits with Hikma, Par, Lupin, and Amneal.

Starting with Hikma, Jazz's response was to publicly allocate "limited volume[s]" to ensure "relatively low incursion on Xyrem." UHS ¶ 209 (quoting Jazz healthcare conference call on Nov. 14, 2018 and Jazz's Dec. 4, 2019 presentation). This public allocation started with the Jazz-Hikma agreement. Jazz partially **[**90]** disclosed the agreement in an August 5, 2017 securities filing. CAC ¶ 213 (citing https://www.sec.gov/Archives/edgar/data/1232524/000123252417000134/jazzq22017ex101.htm). The next day, Jazz's stock trading volumes spiked about five times their rolling average, and Jazz's market capitalization increased about 9% ($785 million). *Id.* ¶¶ 241-43. The jump in trading volume and Jazz's equity value reflected the high public impact of the Jazz-Hikma settlement. *Id.* ¶¶ 243-46.

Then, "over the course of 2018, [] Jazz worked a series of anticompetitive reverse payment settlements with the three remaining serious challengers to the Xyrem patents [*i.e.*, the Later Generic Defendants]." *Id.* ¶ 248. Each settlement halted the potential manufacture, marketing, and sale of an AB-rated generic manufactured by each Later Generic Defendant. In exchange, the settlements licensed each Later Generic Defendant the right to sell a limited quantity of authorized generic ("AG"). Each AG, like Hikma AG, would be simply brand name Xyrem manufactured by Jazz and then *relabeled* by each Later Generic Defendant.

The first such settlement was with Par in January 2018. *Id.* ¶ 249. Jazz allocated Par "'a low single digit **[**91]** percentage' of Xyrem sales volume during the calendar year preceding the entry date of the Par AG," and protected that allocation with an acceleration clause. *Id.* ¶¶ 250, 253; *accord, e.g.*, Par AG Agreement § 1.28, ECF No. 110-16 (sealed percentage); *see* Section III-A-2-b-iii (discussing acceleration clauses). Importantly, at the time Par entered this settlement, Par was plausibly aware of the Jazz-Hikma agreement that had recently increased Jazz's public equity value by 9%. *Id.* ¶ 250.

Next, in June 2018, Lupin settled with Jazz. Lupin's settlement paralleled Par's settlement. Jazz allocated Lupin "'a low single digit percentage' of Xyrem sales volume" and shielded that allocation with an acceleration clause. CAC ¶¶ 257, 260; *accord, e.g.*, Lupin AG Agreement § 1.27 (sealed percentage). Lupin was also allegedly aware of the Jazz-Hikma and Jazz-Par agreements. CAC ¶ 259; UHS ¶ 197.

Lastly, in October 2018, Amneal settled with Jazz. Amneal's settlement also mirrored the others in its market allocation **[*867]** and acceleration clause. CAC ¶¶ 264, 267; *accord, e.g.*, Amneal AG Agreement § 1.30, ECF No. 110-20 (Ex. 11) (sealed percentage). Likewise, Amneal was plausibly aware of Jazz's similar agreements **[**92]** with the other Generic Defendants that had occurred just months before. CAC ¶ 266. In fact, in patent litigation, a judge ordered Jazz to disclose Jazz's agreements with Hikma and two other generic manufacturers to Amneal. *See* Letter Order at 4, Jazz Pharms., Inc. v. Amneal Pharms., LLC, No. 13-CV-00391-ES-JAD, 2017 U.S. Dist. LEXIS 183344 (D.N.J. Nov. 6, 2017), ECF No. 411 (ordering disclosure of "settlement / license agreements").

Given Jazz's public and tightly sequenced settlements of longstanding patent cases, Defendants "had reason to know" that other Generic Defendants were involved in the same "broad project" of market allocation. *Gilead II, 2020 U.S. Dist. LEXIS 167071, 2020 WL 5507555, at *8* (quoting *Briscoe, 896 F.2d at 1505*). Indeed, by November 2018, a senior Jazz executive was publicly boasting of Jazz's limited output allocations to Hikma and "3 of the second filers"—plausibly Par, Lupin, and Amneal. CAC ¶ 274 (quoting Nov. 14, 2018 conference call). In Jazz's telling, those three second filers "are limited to low single-digit volume of the previous year Xyrem sales" so that "again," like with the Hikma settlement, "relatively low incursion on Xyrem" would result. *Id.* (quoting same). Similarly, by December 2019, Jazz CEO Bruce Cozadd was publicly stating that "the other couple folks **[**93]** with authorized generics have very limited volumes. So in terms of dynamics on price, it's - this is not what you would think of as a generic free for all." *Id.* ¶ 273 (quoting Dec. 4, 2019 presentation); UHS ¶ 208. These public statements underscore the likelihood that Jazz and the Generic Defendants shared a common understanding.

Nonetheless, Defendants insist that Plaintiffs fail to plead sufficient knowledge because Plaintiffs fail to "explain[] how each Generic Defendant conceivably was made aware of the terms of its competitors' litigation settlements with Jazz." Mot. at 24; Reply at 14. This argument overstates Plaintiffs' burden at the motion to dismiss stage. ***HN20***[] A "conspiracy by its very nature is a secretive operation, and it is a rare case where all aspects of a conspiracy can be laid bare in court with the precision of a surgeon's scalpel." *Anderson News, L.L.C. v. Am. Media, Inc., 680 F.3d 162, 183 (2d Cir. 2012)* (altered to include full quotation) (quoting *United States v. Snow, 462 F.3d 55, 68 (2d Cir. 2006)*) (reversing dismissal of antitrust claims). Even if a conspirator lacks "awareness" of much of a conspiracy, that ignorance is "immaterial" where, as here, the conspirator's acts "were essential steps in a single scheme." *United States v. Downing, 297 F.3d 52, 57 (2d Cir. 2002)* (quoting *United States v. Benjamin, 328 F.2d 854, 864 (2d Cir. 1964)* (Friendly, J.)). Thus, an antitrust plaintiff may present "direct **[**94]** *or circumstantial* evidence" of a conspiracy. *Anderson News, 680 F.3d at 183* (emphasis in original) (quoting *Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 764, 104 S. Ct. 1464, 79 L. Ed. 2d 775 (1984)*). Plaintiffs present such evidence here through (1) Jazz's public statements, Jazz's public conduct, and the stock market's response; and (2) the co-dependent economic incentives described next.

b. Defendants plausibly had reason to know that other Defendants were involved in the same "broad project" to allocate the market.

HN21[] The other element of an overarching conspiracy is that Defendants "had reason to believe that their own benefits derived from the operation were probably *dependent upon the success of the entire **[*868]** venture*." *Gilead II, 2020 U.S. Dist. LEXIS 167071, 2020 WL 5507555, at *8* (emphasis in original) (quoting *Briscoe, 896 F.2d at 1505*). Evidence of this shared belief includes "economic actions and outcomes that are largely inconsistent with unilateral conduct but largely consistent with explicitly coordinated action." *Musical Instruments, 798 F.3d at 1194*. When firms act unilaterally in non-collusive markets, "the goal of any profit-maximizing firm is to obtain a monopoly by *capturing an ever increasing share* of the market." *State of Ill., ex rel. Burris v. Panhandle E. Pipe Line Co., 935 F.2d 1469, 1481 (7th Cir. 1991)* (emphasis added). Analogously, "[i]n a competitive market, attempts to grow the pie by charging supracompetitive prices will be tempered by *price competition* as individual firms attempt to capture **[**95]** greater market share." *Musical Instruments, 798 F.3d at 1195* (emphasis added). By contrast, "[w]hen firms in a market are able to coordinate their pricing and production activities, they can increase their collective profits and reduce consumer welfare by raising price and reducing output." *Costco Wholesale Corp. v. Maleng, 522 F.3d 874, 896 (9th Cir. 2008)* (citing John E. Lopatka & William H. Page, *State Action and the Meaning of Agreement Under the Sherman Act: An Approach to Hybrid Restraints*, *20 Yale J. on Reg.. 269, 311 (2003)*).

Jazz's agreements with each Generic Defendant incentivized lower output and higher prices—the opposite of competitive behavior. The Jazz-Hikma agreement did so in two ways. To start, the Jazz-Hikma agreement plausibly delayed any Jazz AG for at least six months, thereby delaying any price competition between Jazz AG, Hikma AG, and Xyrem. Next, the agreement created a royalty structure that will charge Hikma a royalty rate that increases with Hikma's market share. This escalating royalty structure (1) disincentivizes output because "market share" is defined in terms of unit volume (*e.g.*, number of bottles); and (2) incentivizes higher prices because Jazz and Hikma can boost revenue while keeping volume low by raising prices. *See* Section III-A-2, *supra* (analyzing Jazz-Hikma agreement); *see generally, **[**96]** e.g., Crystal Semiconductor Corp. v. TriTech Microelectronics Intern., Inc., 246 F.3d 1336, 1359 (Fed. Cir. 2001)* ("[C]onsumers will almost always purchase fewer units of a product at a higher price than at a lower price . . . ."). Supra-competitive prices are the result. *See, e.g., Actavis, 570 U.S. at 157* (discussing pharmaceutical collusion "to maintain supracompetitive prices").

Similarly, the Later Generic Defendants' agreements also limited each Later Generic Defendant to a low single-digit market share as defined by total units sold—again incentivizing higher prices because volumes were capped. *See* Sections III-A-3 and III-B-2, *supra* (analyzing agreements with Later Generic Defendants). The Later Generic Defendants' Agreements also immediately paid each Later Generic Defendant millions in cash to cease potentially meritorious patent challenges. These payments of "many millions of dollars" to a generic manufacturer are paradigmatic reverse payments. *Actavis, 570 U.S. at 140*.

Furthermore, *all* the agreements contained an acceleration clause. *See* CAC ¶¶ 225, 232, 253, 260, 267; UHS ¶¶ 177, 188, 191, 196, 203 (describing acceleration clauses). The acceleration clauses plausibly function as a cartel enforcement mechanism. *See* Section III-A-1-a, *supra* (detailing acceleration clauses). They do so by threatening a "reversion to competitive **[**97]** behavior"—*i.e.*, immediate entry by Hikma, Amneal, Par, and Lupin—if certain market events were to occur. Specifically, the acceleration clauses allow every Generic Defendant to immediately market their AG if (1) a generic version of Xyrem were to **[*869]** market itself without Jazz's permission; or (2) anyone were to successfully invalidate or render unenforceable Xyrem's unexpired patent claims. CAC ¶ 225; UHS ¶¶ 191, 196, 203; *accord, e.g.*, Hikma AG Agreement §§ 1.5.5, 2.8 (acceleration clause); Lupin AG Agreement § 1.4 (same). Thus, if any Generic Defendant were to try to seize more profit than its agreement with Jazz provides, that Generic Defendant would immediately face profit-crushing competition from the other Generic Defendants.

Such "penalt[ies]" for "firms exceeding their agreed upon shares" are cartel mechanisms that "give the firms a disincentive to steal sales from one another." Areeda & Hovenkamp, *supra*, ¶ 2006 & n.5. In other words, the Generic Defendants are bound together through mutually assured competition, if not mutually assured destruction. ***HN22***[] Thus, "[e]ven at the summary judgment stage," courts have "found it significant for inferring the existence of a conspiracy that each generic competitor" agreed to **[**98]** an acceleration clause. *Sergeants Benevolent Ass'n Health & Welfare Fund v. Actavis, PLC, No. 15-CIV-6549-CM, 2018 U.S. Dist. LEXIS 220574, 2018 WL 7197233, at *31 (S.D.N.Y. Dec. 26, 2018)* (citing *In re Nexium (Esomeprazole) Antitrust Litig., 42 F. Supp. 3d 231, 254 (D. Mass. 2014)*, *aff'd*, *842 F.3d 34 (1st Cir. 2016)*). It follows that acceleration clauses are even more "potent" evidence of a "conspiracy to monopolize" at the motion to dismiss stage. *Id.* (denying motion to dismiss).

In sum, Jazz's agreements with each Generic Defendant included "economic actions and outcomes that are largely inconsistent with unilateral conduct." *Musical Instruments, 798 F.3d at 1194*. It is thus plausible that Defendants "had reason to believe that their own benefits derived from the operation were probably *dependent upon the success of the entire venture*." *Gilead II, 2020 U.S. Dist. LEXIS 167071, 2020 WL 5507555, at *8* (emphasis in original) (quoting *Briscoe, 896 F.2d at 1505*). Accordingly, Plaintiffs have plausibly pled an overarching conspiracy to allocate the Xyrem market. In fact, if Jazz's agreements had not settled patent lawsuits, they would be "condemned as per se unlawful." *O'Bannon v. Nat'l Collegiate Athletic Ass'n, 802 F.3d 1049, 1063 (9th Cir. 2015)*.

2. Plaintiffs adequately allege that Jazz's settlements with the Later Generic Defendants are market allocation agreements (CAC Counts 8-10; UHS Counts 5, 7, and 8) under the rule of reason.

Despite the plausible overarching conspiracy just described, Defendants also argue that Plaintiffs "fail to state a claim for unlawful horizontal market allocation." Mot. at 20. Specifically, Defendants argue that Jazz's volume-limited **[**99]** licenses are "generally exempt from antitrust scrutiny" because they merely exercise Jazz's patent rights. *Id.*

The Court disagrees. Granting Defendants a "general[] exempt[ion]" from antitrust scrutiny would contravene binding precedent. ***HN23***[] In *Actavis*, the Supreme Court squarely held that "patent and antitrust policies are both relevant in determining the 'scope of the patent monopoly'—and consequently ***antitrust law*** immunity—that is conferred by a patent." *Actavis, 570 U.S. at 148*. In fact, even before *Actavis*, "the [Supreme] Court ha[d] struck down overly restrictive patent licensing agreements—irrespective of whether those agreements produced supra-patent-permitted revenues." *Id. at 150*. ***HN24***[] Thus, "[w]hether a particular restraint lies 'beyond the limits of the patent monopoly' is a *conclusion* that flows from [an] analysis" under the rule of reason, "not [the analysis's] starting point." *Id. at 149* (emphasis in original).

[*870] Ninth Circuit precedent emphasizes the light burden Plaintiffs bear at the motion to dismiss stage. ***HN25***[] The Ninth Circuit has instructed that, when analyzing the effect of agreements under the rule of reason, "we must give plaintiffs 'the full benefit of their proof without tightly compartmentalizing the various factual **[**100]** components and wiping the slate clean after scrutiny of each.'" *In re Nat'l Football League's Sunday Ticket Antitrust Litig. ("NFL Sunday Ticket"), 933 F.3d 1136, 1152 (9th Cir. 2019)* (quoting *City of Long Beach v. Standard Oil Co., 872 F.2d 1401, 1404-05 (9th Cir. 1989)*, *opinion amended on denial of reh'g*, *886 F.2d 246 (9th Cir. 1989)*), *cert. denied sub nom. Nat'l Football League v. Ninth Inning, Inc., 141 S. Ct. 56, 208 L. Ed. 2d 291 (2020)*. Applying this standard in *NFL Sunday Ticket*, the Ninth Circuit reversed the dismissal of claims that "defendants' interlocking agreements reduce[d] [] output" and raised prices. *Id. at 1155, 1158*.

Here too, Jazz's volume-limited licenses are plausibly anticompetitive market allocations that reduced output and raised prices. These licenses, as detailed in Section III-A-2 above, gave each Later Generic Defendant a limited right to sell a constrained supply of AG. Specifically, each license (1) began only after the expiration of Hikma's 180-day exclusivity period in July 2023; (2) was capped at a low-single-digit market share; and (3) required a royalty payment, as a percentage of sales, that increased over time. *See, e.g.*, Lupin AG Agreement § 1.27, 5, ECF No. 110-18 (Exh. 8). These licenses were also paired with acceleration clauses that plausibly deterred generic entry. *See* Section III-A-2-b-iii, *supra* (analyzing Jazz-Hikma acceleration clause and acceleration clauses generally). Giving Plaintiffs "the full benefit of their proof," the effect of this licensing scheme **[**101]** was anticompetitive. *NFL Sunday Ticket, 933 F.3d at 1152* (quoting *City of Long Beach, 872 F.2d at 1404-05*). Indeed, in December 2019, Jazz's CEO boasted that "in terms of dynamics on price, it's - th[e] [market] is not what you would think of as a generic free for all" because of the "very limited volumes" for Par, Lupin, and Amneal. CAC ¶ 273 (emphasis omitted).

Furthermore, the authorities Defendants cite largely support *Plaintiffs*' position. Mot. at 20. Defendants cite three cases to argue that Jazz's licensing agreements are "generally exempt from antitrust scrutiny." Yet those cases subjected licensing agreements to rule of reason antitrust scrutiny. *See In re Humira (Adalimumab) Antitrust Litig., 465 F. Supp. 3d 811, 838 (N.D. Ill. 2020)* (applying the rule of reason); *In re Zetia Ezetimibe Antitrust Litig., No. CV 2:18-MD-2836, 2019 U.S. Dist. LEXIS 59469, 2019 WL 1397228, at *20 (E.D. Va. Feb. 6, 2019)* (same), *report and recommendation adopted as modified*, *400 F. Supp. 3d 418 (E.D. Va. 2019)*; *In re Novartis & Par Antitrust Litig., No. 18-CV-11835-AKH, 2019 U.S. Dist. LEXIS 138133, 2019 WL 3841711, at *4 (S.D.N.Y. Aug. 15, 2019)* ("[C]ase law uniformly supports the application of *Actavis* and the rule of reason approach to" market allocation claims). Defendants also cite the treatise *IP and Antitrust* to further argue against antitrust scrutiny of Jazz's licensing agreements with Generic Defendants. Yet that same treatise warns that "fears of competitive harm grow" where, as here, "the licensor [*i.e.*, Jazz] is itself a manufacturer" and licenses to other manufacturers. Herbert **[**102]** Hovenkamp, Mark D. Janis, Mark A. Lemley, Christopher R. Leslie, and Michael A. Carrier, *IP and Antitrust* § 32.01 (updated Nov. 2020).

Defendants are correct as to one point they make for the first time on reply, however. Reply at 11. Nothing supports United's allegations that Jazz's licensing agreements are per se violations of the Sherman Act. ***HN26***[] Sherman Act claims are examined "under one of two distinct tests: **[*871]** per se violation or rule of reason. Under the per se test, 'agreements whose nature and necessary effect are so plainly anti-competitive that no elaborate study of the industry is needed to establish their illegality' are found to be antitrust violations. For those activities not within the per se invalidity category, courts employ the rule of reason test." *Eichorn v. AT & T Corp., 248 F.3d 131, 138 (3d Cir. 2001)*, as amended (June 12, 2001) (quoting *Nat'l Soc'y of Prof. Eng'rs v. United States, 435 U.S. 679, 692, 98 S. Ct. 1355, 55 L. Ed. 2d 637 (1978)*). Here, as to allegations that Defendants have allocated a patented drug market, "case law uniformly supports the application of *Actavis* and the rule of reason approach." *In re Novartis & Par Antitrust Litig., 2019 U.S. Dist. LEXIS 138133, 2019 WL 3841711, at *4* (collecting cases). Plaintiffs' per se allegations are few but do exist in United's complaint. *See* UHS ¶¶ 263, 292 (alleging "per se violations" of the Sherman Act and Minnesota ***Antitrust Law***). Because the inapplicability **[**103]** of the per se rule is clear here, the Court considers the argument that Defendants raise on reply and dismisses United's per se allegations against Defendants' market allocation scheme. Class Plaintiffs do not appear to make per se claims.

In sum, Defendants are wrong that Jazz's volume-limited licenses are "generally exempt from antitrust scrutiny." Mot. at 20. Those licenses receive antitrust scrutiny under the rule of reason. Accordingly, the Court grants in part and denies in part Defendants' motion to dismiss Plaintiffs' market allocation claims. Specifically, the Court only dismisses United's market allocation claims to the extent they allege that Jazz's licenses are antitrust violations per se. Lastly, because such per se allegations are legally futile, the Court dismisses them with prejudice. *See* *Leadsinger, 512 F.3d at 532*.

3. Count 5 of the CAC and the UHS Complaint adequately notify Defendants of the challenged misconduct.

Next, Defendants briefly argue that Count 5 of both the CAC and UHS complaint "fail to articulate the conduct they challenge" in three ways. Mot. at 22. First, Count 5 of the CAC—which is pleaded "against all Defendants," CAC ¶ 380—supposedly confuses Defendants because it "simply **[**104]** refer[s] to the individual patent litigation settlements entered into by each Defendant." Mot. at 22. Second, Count 5 of the UHS complaint supposedly confuses Defendants because it pleads not only an overarching conspiracy, but also four bilateral conspiracies "in the alternative." *Id.* (citing UHS ¶¶ 262-64). Third, Defendants argue that UHS Count 5 impermissibly "bring[s] [UHS] Counts 2, 3, and 4 back into the litigation" in violation of the Court's order limiting the number of claims to be initially litigated. *Id.* n.13 (citing Case Management Order, ECF No. 66 filed on March 19, 2021).

None of these arguments has merit. The Court addresses each in turn. To start, as summarized above, the complaints detail Defendants' alleged agreements and their alleged anticompetitive effects. *See, e.g.*, Section III-B-1, *supra* (summarizing alleged conspiracy); CAC ¶¶ 209-76; UHS ¶¶ 161-223 (alleging same). It thus strains credulity for Defendants to argue that they lack "'an idea of where to begin' in defending themselves." Mot. at 22 (quoting *Kendall v. Visa USA, Inc., 518 F.3d 1042, 1047 (9th Cir. 2008)*). ***HN27***[] Second, *Federal Rule of Civil Procedure 8(d)* expressly allows "alternative statements of a claim or defense"—"regardless of consistency." *Accord, e.g., Molsbergen v. United States, 757 F.2d 1016, 1018 (9th Cir. 1985)* (holding same).

Lastly, Plaintiffs did **[**105]** not violate the Court's March 19, 2021 Case Management **[*872]** Order ("CMO") or any other order. That CMO ordered the Class Plaintiffs and Defendants to select 10 claims to initially litigate through resolution. ECF No. 66 at 2. Then, on March 24, 2021, United informed the Court that United's individual action against the same Defendants would soon be transferred to the instant multidistrict litigation. ECF No. 78. In response on March 30, 2021, the Court ordered the parties to address the overlap between (1) United's claims and (2) the Selected Claims. ECF No. 82.

On April 2, 2021, United represented that its claims "largely overlap with the class action claims and advance materially the same theories of liability." ECF No. 84 at 1. United thus agreed to initially litigate through resolution only the claims that overlap with the Selected Claims. *Id.* at 2. One of the claims that United publicly noticed was "Count 5" of its complaint, which had been filed on March 18, 2021 in Case No. 21-CV-02710-LHK, ECF No. 1. On April 7, 2021, the Court adopted United's proposal on which of United's claims should be first litigated through resolution. ECF No. 85. That adopted proposal included UHS Count 5. **[**106]** All told, Defendants have received fair notice of Plaintiffs' conspiracy claims.

C. Plaintiffs adequately plead antitrust injury (CAC Counts 1, 5, 6, and 12; UHS Counts 1, 5, 6, and 11).

Defendants' third ground for dismissal is that Plaintiffs inadequately plead antitrust injury. ***HN28***[] For context, to bring a federal antitrust claim, a private plaintiff must allege "antitrust injury." *15 U.S.C. §§ 15*, *26* (*Clayton Act §§ 4*, *16*); *see* Areeda & Hovenkamp, *supra*, ¶ 335 (summarizing antitrust injury requirement). Antitrust injury is "loss or damage 'of the type the antitrust laws were designed to prevent and that flows from that which makes defendants' acts unlawful.'" *Cargill, Inc. v. Monfort of Colo., Inc., 479 U.S. 104, 113, 107 S. Ct. 484, 93 L. Ed. 2d 427 (1986)* (quoting *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*). In turn, whether Plaintiffs' injury "flows from" Defendants' anticompetitive acts depends on "common law principles of causation." *Pac. Shores Properties, LLC v. City of Newport Beach, 730 F.3d 1142, 1169 (9th Cir. 2013)* (quoting

Mead v. Retail Clerks International Asso., 523 F.2d 1371, 1376 (9th Cir. 1975)). "Causation is an intensely factual question that should typically be resolved by a jury." Id. at 1168. Thus, "once a plaintiff presents evidence that he suffered the sort of injury that would be the expected consequence of the defendant's wrongful conduct, he has done enough to withstand *summary judgment*"—let alone a motion to dismiss—"on the ground of absence of causation." *Id.* (emphasis added) (quoting BCS Servs., Inc. v. Heartwood 88, LLC, 637 F.3d 750, 758 (7th Cir. 2011)).

Despite the lenient standard set forth above, **[**107]** Defendants make two arguments why "the complained-of-settlement agreements" did not cause Plaintiffs antitrust injury. Mot. at 10. Defendants first argue that "Plaintiffs fail to allege the Generic Defendants would have surmounted Jazz's patent portfolio." *Id.* at 10. Defendants next argue that, because the Later Generic Defendants may start to sell AGs in July 2023, the Jazz's settlements with the Later Generic Defendants will not prolong the period of supra-competitive prices. *Id.* at 12. As explained below, neither argument is persuasive.

1. Plaintiffs need not allege how the Generic Defendants would have prevailed in the patent litigations.

Defendants first argue that because Jazz's patents are allegedly valid, no injury stems from the challenged settlement **[*873]** agreements. Mot. at 10. Specifically, Defendants argue that Plaintiffs have inadequately pled that "'the outcome of the patent litigation [between the Generic Defendants and Jazz] was reasonably certain to favor' the Generic Defendants." Mot. at 11 (quoting United Food & Com. Workers Loc. 1776 & Participating Emps. Health & Welfare Fund v. Teikoku Pharma USA, Inc. ("Lidoderm"), 74 F. Supp. 3d 1052, 1072 & n.25 (N.D. Cal. 2014)). Defendants thus argue that regardless of the settlement agreements, Jazz's patents block the Generic Defendants from selling generic Xyrem. In short, the strength of Jazz's **[**108]** patents supposedly "act as an independent bar to Plaintiffs' claims of antitrust injury." *Id.*

HN29[] The Court disagrees. As the United States Supreme Court has held—and the Fifth Circuit and unanimous California Supreme Court have confirmed—"it is normally not necessary to litigate patent validity to answer the antitrust question." Impax Lab'ys, Inc. v. FTC, 994 F.3d 484, 495 (5th Cir. 2021) (quoting Actavis, 570 U.S. at 157); *accord, e.g.,* In re Cipro Cases I & II, 61 Cal. 4th 116, 187 Cal. Rptr. 3d 632, 348 P.3d 845, 870-71 & n.19 (Cal. 2015) (quoting and holding same); Herbert Hovenkamp, Mark D. Janis, Mark A. Lemley, Christopher R. Leslie, and Michael A. Carrier, *IP and Antitrust* § 16.01 & nn.276.44-49 (updated Nov. 2020) (collecting cases). Indeed, the case Defendants quote, *Lidoderm*, only reiterates this holding. In *denying* a motion to dismiss, *Lidoderm* held that a court "do[es] not need analyze the validity of the patents in the settled litigation in order to find the allegations adequate to meet the rule of reason." Lidoderm, 74 F. Supp. 3d at 1072.

Actavis explained why. There, the Supreme Court reasoned that "even a *small* risk of [patent] invalidity" often results in a reverse payment that "likely seeks to prevent the risk of competition"—a "consequence constitut[ing] the relevant anticompetitive harm." Actavis, 570 U.S. at 157 (emphasis added). ***HN30***[] Thus, "a court, by examining the size of the [challenged] payment, may well **[**109]** be able to assess its likely anticompetitive effects along with its potential justifications *without litigating the validity of the patent*." Id. at 158 (emphasis added). "In a word, the size of the unexplained reverse payment can provide a workable surrogate for a patent's weakness, all *without forcing a court to conduct a detailed exploration of the validity of the patent* itself." *Id.* (emphasis added).

Here, the alleged reverse payments are plausibly large and unexplained. The Court analyzes the reverse payment to Hikma first, followed by the reverse payments to the Later Generic Defendants.

Plaintiffs estimate that the value to Hikma from the Jazz-Hikma agreement is over $480 million just in the first 180 days after Hikma launches its AG (which is relabeled Jazz Xyrem). CAC ¶ 237 (estimating $480 million to $540 million); UHS ¶ 181 (estimating $705 million). During at least those 180 days, Hikma AG will be the only generic version of Xyrem on the market. Furthermore, in addition to being manufactured by Jazz, Hikma AG will be distributed by Jazz's pharmacy, Express Scripts. Hikma and Jazz will thus share a "horizontal market division"—*i.e.*, an agreement among direct competitors to split the **[**110]** market—while Hikma AG is the only generic. Areeda & Hovenkamp, *supra*, ¶ 2045; *see generally, e.g.,* California ex rel. Harris v. Safeway, Inc., 651 F.3d 1118, 1137 (9th

Cir. 2011) (defining horizontal market division). In fact, because Jazz is the only manufacturer under the Jazz-Hikma agreement, Hikma and Jazz's market division is worse than a duopoly. "***HN31***[] *Monopoly* exists when one firm controls **[*874]** all or the bulk of a product's output, and no other firm can enter the market, or expand output, at comparable costs." Areeda & Hovenkamp, *supra*, ¶ 403 (footnote omitted). Hikma and Jazz simply share Jazz's monopoly for at least 180 days.

Plaintiffs value Hikma's share of this monopoly at over $480 million based on the typical market share and price of generic drugs. As to market share, Plaintiffs allege that the Hikma AG—as the only generic—will capture approximately 80% to 90% of Xyrem sales. CAC ¶ 91, 237 (citing FTC 2011 AG Study); UHS ¶ 181. That is a plausible market share for a sole generic. *See, e.g., Lidoderm, 74 F. Supp. 3d at 1071* (holding same and citing FDA study); Victor E. Schwartz et al., *Warning: Shifting Liability to Manufacturers of Brand-Name Medicines When the Harm was Allegedly Caused by Generic Drugs Has Severe Side Effects*, *81 Fordham L. Rev. 1835, 1848 (2013)* ("[T]he generic version of a drug, on average, seizes 80 percent of brand-name drug sales within six months of the loss of **[**111]** patent protection."). As for price, Plaintiffs allege that "Hikma can price its generic product at a smaller discount (20%) to the branded price." UHS ¶ 181. This price difference is also plausible. "The first generic to enter the market typically costs 10 to 25 percent less than the branded drug; those discounts grow to between 50 and 80 percent once other generics enter." *Impax, 994 F.3d at 488*. Together, these market share and pricing assumptions value Hikma's settlement between $480 million and $540 million—even if Xyrem sales stay flat at approximately $1.5 billion and fail to grow through 2023. CAC ¶ 237. If, by contrast, "one conservatively assumes 8% annual increases" in Xyrem sales, Hikma's settlement is worth about $705 million. UHS ¶ 181; *see also* Jazz Form 10-K for 2020, at 76 (reporting 6% annual growth in Xyrem net sales); Jazz Form 10-K for 2019, at 63 (reporting 17% annual growth in Xyrem net sales).

Yet it is immaterial whether the $480 million or $705 million estimate is more accurate. Even the lower estimate is more than enough to suggest that Jazz and Hikma "likely s[ought] to prevent the risk of competition" by shielding potentially invalid patents. *Actavis, 570 U.S. at 157*. The reason, as the *Actavis* Court **[**112]** explained, is that "[a]n unexplained large reverse payment itself would normally suggest that the patentee has serious doubts about the patent's survival. And that fact, in turn, suggests that the payment's objective is to maintain supracompetitive prices to be shared among the patentee and the challenger rather than face what might have been a competitive market." *Id.* Applying this analysis, both the *Actavis* Court and other courts have found that reverse payments in the tens of millions state an antitrust injury. *See, e.g., Actavis, 570 U.S. at 145* (payments of $12 million, $60 million, and $171-270 million); *Impax, 994 F.3d at 494* (payment of $24.5 million). Accordingly, the Jazz-Hikma payment of over $480 million more than suffices.

Jazz's payments to the Later Generic Defendants are similarly suspect. The payments included (1) millions in cash; (2) a license to sell AG at a supra-competitive price; and (3) and acceleration clauses that enforce supra-competitive pricing. *See* Section III-A-2 (detailing reverse payments to Later Generic Defendants). The valuation of the license component alone is in the tens of millions. Specifically, Plaintiffs estimate that "every one percent of brand sales allocated in 2023"—the start of the **[**113]** licensing period—represents between $13.5 million to $19.8 million in sales. CAC ¶ 270 (estimating $13.5 million); UHS ¶ 206 (estimating $19.8 million). The range of the estimate depends on whether Xyrem sales stay flat or grow through 2023—the same plausible assumption from the Hikma settlement. *Id.* In any event, Jazz allocated **[*875]** each Later Generic Defendant several percentage points of the Xyrem market. *See, e.g.*, Lupin AG Agreement § 1.27, 5 (sealed low-single-digit percentage). Thus, the resulting value of each Later Generic Defendant's settlement is "at least [] tens of millions of dollars." CAC ¶¶ 255, 262, 269-70; UHS ¶¶ 193, 198, 205, 206. Again, these are "large and unexplain[ed] payment[s] exceeding any reasonable estimate of saved litigation costs." UHS ¶¶ 193, 198, 205, 206; *accord, e.g., Actavis, 570 U.S. at 145* (reversing dismissal of alleged $12 million reverse payment); *Impax, 994 F.3d at 494* (estimating average litigation costs to be "in the $5-$10 million range").

In sum, Plaintiffs have plausibly alleged reverse payments that, under *Actavis*, "suggest that [Jazz] has serious doubts about the patent[s]' survival." *Actavis, 570 U.S. at 157*. Accordingly, Plaintiffs need not detail how the Generic Defendants would have prevailed in the patent **[**114]** litigations. Rather, Plaintiffs' reverse payment allegations are enough to plead an antitrust injury. ***HN32***[] In short, "it is normally not necessary to litigate patent validity to answer the antitrust question." *Impax, 994 F.3d at 495*.

To argue otherwise, Defendants rely on two inapposite court of appeals cases. Mot. at 11. In *In re Wellbutrin XL Antitrust Litigation*, the Third Circuit relied on two factual findings at *summary judgment*. *868 F.3d 132, 169 (3d. Cir. 2017)*. First, the record at summary judgment showed that "assignor estoppel would have prevented [the generic] from arguing that the [] patent was invalid or that the patent was unenforceable because of inequitable conduct." *Id.* Second, an expert witness's "*unrebutted analysis*" showed that the generic "would only have a 20% chance of winning [its infringement] suit." *Id.* (emphasis added). The instant case is different. Here, Plaintiffs' detailed allegations at the motion to dismiss stage do not face an undisputed factual record of assignor estoppel or a mere 20% chance of prevailing in a patent infringement suit. *Wellbutrin* is thus inapposite. *See also, e.g., In re Effexor Antitrust Litig., 337 F. Supp. 3d 435, 452 (D.N.J. 2018)* (denying judgment on the pleadings and distinguishing *Wellbutrin* on similar grounds).

Defendants' other case, *In re Nexium (Esomeprazole) Antitrust Litigation, 842 F.3d 34 (1st Cir. 2016)*, is even less apt. **[**115]** There, "upon the conclusion of plaintiffs' case in chief" at a *jury trial*, the district court saw "no evidence" that the brand manufacturer's patents were invalid. *Id. at 63*. The district court thus "requir[ed] some evidence of the patents' invalidity or non-infringement before allowing the plaintiffs to pursue an at-risk launch theory." *Id.* The First Circuit affirmed this trial requirement. *Id.* In affirming, the First Circuit expressly distinguished "allegations of antitrust injury at the *Rule 12(b)(6)* stage." *Id. at 62-63*. The First Circuit further cited two other cases where courts of appeals rejected arguments like Defendants' arguments here. *See In re Cardizem CD Antitrust Litig., 332 F.3d 896, 900 (6th Cir. 2003)* (holding that ***HN33***[] patent validity "merely raises a disputed issue of fact that cannot be resolved on a motion to dismiss"); *Andrx Pharms., Inc. v. Biovail Corp. Int'l, 256 F.3d 799, 809, 347 U.S. App. D.C. 178 (D.C. Cir. 2001)* (rejecting argument that pending patent infringement suit blocks claim of anticompetitive delay).

Accordingly, at the motion to dismiss stage, Plaintiffs need not allege how the Generic Defendants would have prevailed in the patent lawsuits against Jazz.

2. Plaintiffs adequately plead that the Later Generic Defendants caused antitrust injury.

Defendants' other argument against antitrust injury also lacks merit. **[*876]** This argument, which spans only one paragraph **[**116]** in Defendants' 35-page motion, is that Jazz's settlements with the Later Generic Defendants will not prolong the period of supra-competitive prices allegedly caused by the Jazz-Hikma agreement. Mot. at 12. Defendants reason that the period of higher prices "is alleged to exist only between January 1, 2023 and July 1, 2023"—the 180 days during which Jazz has explicitly agreed that Hikma AG will be the sole third-party AG. *Id.* After July 1, 2023, Jazz will have the option to license an AG to other third parties, and Hikma will have the option to manufacture, market, and independently distribute an AB-rated generic. *Id.* (citing CAC ¶ 218; UHS ¶¶ 165-69). Defendants thus argue that, by the time the Later Generic Defendants begin to sell AGs in July 2023, the Jazz and Hikma generics will have reduced prices to competitive levels. *Id.*

Defendants' argument fails for two reasons. First, it ignores another competitive harm: if the Later Generic Defendants had not settled, they could have launched an AG or AB-rated generic *before* July 2023. Specifically, the Later Generic Defendants could have launched earlier in at least three ways. First, the Later Generic Defendants could have reached an alternative **[**117]** settlement with an earlier entry date and no reverse payments. *See, e.g., Actavis, 570 U.S. at 158* (describing such settlements). Second, the Later Generic Defendants could have pursued—and prevailed in—their patent litigation. *See id. at 154-55* (describing same). Third, the Later Generic Defendants could have launched their AB-rated generics at risk while simultaneously pursuing patent litigation. *See, e.g., In re Glumetza Antitrust Litig., No. 19-CV-05822-WHA, 2021 U.S. Dist. LEXIS 87085, 2021 WL 1817092, at *3 (N.D. Cal. May 6, 2021)* (describing same).

The other reason Defendants' argument fails is that Plaintiffs plausibly allege that all Defendants were engaged in an overarching conspiracy to allocate the market for Xyrem and its generics. *See* Section III-B-2, *supra* (detailing alleged conspiracy). In this conspiracy, Defendants "ha[ve] reason to believe that their own benefits derived from the operation [are] *probably dependent upon the success of the entire venture*." *Gilead II, 2020 U.S. Dist. LEXIS 167071, 2020 WL 5507555, at *8* (emphasis in original) (quoting *Briscoe, 896 F.2d at 1505*). Price competition and increased output would plausibly doom the venture. *See* Section III-B-2, *supra* (analyzing, *e.g.*, single-digit market share allocations and acceleration clauses as cartel enforcement mechanisms). Thus, Jazz and Hikma lack an incentive to engage in the price competition that Defendants posit.

In short, Plaintiffs plausibly **[**118]** allege how Jazz's reverse payment settlements with the Later Generic Defendants delayed generic competition that otherwise would have occurred, thereby injuring consumers and entities, such as Plaintiffs, who pay for Xyrem. *See* Section III-A-2 and 3, *supra* (detailing reverse payments and market allocations); Section III-B, *supra* (detailing conspiracy). ***HN34***[] "Remove the pay, remove the delay." *Glumetza, 2021 U.S. Dist. LEXIS 87085, 2021 WL 1817092, at *14*. Accordingly, Plaintiffs have adequately pled that Jazz's settlements caused antitrust injury.

D. *Noerr-Pennington* doctrine does not require dismissal of Plaintiffs' monopolization claims under *Sherman Act § 2* (CAC Count 6 and UHS Count 6).

As their fourth ground for dismissal, Defendants contend the *Noerr-Pennington* doctrine requires dismissal of Plaintiffs' monopolization claims under *Sherman Act § 2*. The Court first summarizes the *Noerr-Pennington* doctrine and its exception for sham litigation. The Court **[*877]** then analyzes Defendants' *Noerr-Pennington* argument.

HN35[] "Under the *Noerr-Pennington* doctrine, 'those who petition the government for redress are generally immune from antitrust liability.'" *AbbVie, 976 F.3d at 359-60* (quoting *Pro. Real Est. Invs., Inc. v. Columbia Pictures Indus., Inc. ("PRE"), 508 U.S. 49, 56, 113 S. Ct. 1920, 123 L. Ed. 2d 611 (1993)*). This "'right to petition extends to all departments of the Government,' including the courts." *Id.* (quoting *Cal. Motor Transp. Co. v. Trucking Unlimited, 404 U.S. 508, 510, 92 S. Ct. 609, 30 L. Ed. 2d 642 (1972)*). However, *Noerr-Pennington* ***[**119]*** immunity does not apply if a governmental petition is "a mere sham to cover what is actually nothing more than an attempt to interfere directly with the business relationships of a competitor." *Id.* (quoting *E.R.R. Presidents Conference v. Noerr Motor Freight, Inc., 365 U.S. 127, 144, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961)*). This sham exception has two elements. First, the petition at issue "must be objectively baseless in the sense that no reasonable litigant could realistically expect success on the merits." *Id.* (quoting *PRE, 508 U.S. at 60-61*). Second, the petitioner's "subjective motivation" must have been "to thwart competition." *Id.* (quoting *Octane Fitness, LLC v. ICON Health & Fitness, Inc., 572 U.S. 545, 556, 134 S. Ct. 1749, 188 L. Ed. 2d 816 (2014)*).

The sham exception is further strengthened by Ninth Circuit precedent. ***HN36***[] "The Ninth Circuit has held that 'whether something is a genuine effort to influence government action, or a mere sham for *Noerr-Pennington* purposes, is a question of fact." *Sonus Networks, Inc. v. Inventergy, Inc., No. 15-CV-0322-EMC, 2015 U.S. Dist. LEXIS 97748, 2015 WL 4539814, at *2 (N.D. Cal. July 27, 2015)* (original alterations omitted) (quoting *Clipper Exxpress v. Rocky Mountain Motor Tariff Bureau, Inc., 690 F.2d 1240, 1253 (9th Cir. 1982)*). Thus, "courts rarely award *Noerr-Pennington* immunity at the motion to dismiss stage." *AbCellera Biologics Inc. v. Berkeley Lights, Inc., No. 20-CV-08624-LHK, 2021 U.S. Dist. LEXIS 123839, 2021 WL 2719264, at *6 (N.D. Cal. July 1, 2021)* (quoting *Sonus Networks, 2015 U.S. Dist. LEXIS 97748, 2015 WL 4539814, at *2*).

With this framework in mind, the Court analyzes Defendants' *Noerr-Pennington* arguments below. Defendants' three arguments are that *Noerr-Pennington* immunizes (1) Jazz's REMS-related petitioning to the FDA; (2) Jazz's allegedly sham citizen petitions to the FDA; and (3) Jazz's allegedly sham litigation **[**120]** against generic manufacturers. The Court finds that *Noerr-Pennington* does not immunize Jazz's REMS-related petitioning or Jazz's allegedly sham litigation. As for Plaintiffs claims against Jazz's allegedly citizen petitions to the FDA, however, the Court finds those claims time-barred.

The Court notes that Defendants also moved to dismiss Plaintiffs' "product hop" allegations as not actionable under *Sherman Act § 2*. Mot. at 29-30. The product hop allegations, in brief, are that Jazz has launched a new product (called Xywav) that extends Xyrem's patents and further deters the entry of any AB-rated generic. *See, e.g.*, UHS ¶¶ 2, 210, 230, 236. In their opposition, Plaintiffs clarified that the product hop allegations do not constitute a "viable standalone" claim. Thus, on reply, Defendants no longer sought to dismiss the product hop allegations after. Opp'n at 29 n.11 (clarifying product hop); *see* Reply (no longer mentioning product hop). Accordingly, the Court need not address the product hop allegations. *See, e.g., Maciel v. Cate, 731 F.3d 928, 932 n.4 (9th Cir. 2013)* (holding that "failing to address [an argument] in [ ] reply brief" forfeits the argument).

[*878] 1. Jazz's REMS-related petitioning is not entitled to *Noerr-Pennington* immunity at the motion [121] to dismiss stage**.

Defendants first argue that "Jazz's REMS-related petitioning to the FDA" is immune because Jazz prevailed before the FDA. Mot. at 28. Specifically, Defendants note that the FDA approved Jazz's petition for a single-pharmacy REMS, under which only Express Scripts may dispense Xyrem. *Id.* Defendants therefore assert that their REMS petitions were not "objectively baseless" under the first element of the sham exception to *Noerr-Pennington*.

The Court disagrees. Although Defendants are correct that "a *successful* action self-proves its [objective] reasonableness," Defendants' REMS petitions are not "successful" on the allegations here. *U.S. Futures Exch., L.L.C. v. Bd. of Trade of the City of Chicago, Inc., 953 F.3d 955, 963 (7th Cir. 2020)* (emphasis in original). The FDA expressly held that its approval of Jazz's REMS "should not be construed or understood as agreement with Jazz." Memorandum from Trueman Sharp, Deputy Director for the Office of Generic Drugs, to ANDAs for sodium oxybate oral solution products, *et seq.* ("Sharp Memo") (Jan. 17, 2017) (UHS, Ex. B). Rather, the FDA approved Jazz's REMS to halt the "significant drain on [FDA] resources posed by the dispute, and the fact that the outcome of Jazz's challenge to the [FDA]'s legal authority to require a modification to **[**122]** a 'deemed REMS' had the potential to affect only a small number of drug products." Sharp Memo at 7-8. ***HN37***[] Such "[p]assive government approval is insufficient" for *Noerr-Pennington* immunity. *A.D. Bedell Wholesale Co. v. Philip Morris Inc., 263 F.3d 239, 251 (3d Cir. 2001)*.

Moreover, as Plaintiffs note, the FDA expressly doubted both (1) the objective merits of Jazz's REMS; and (2) Jazz's subjective motivations in proposing a single-pharmacy REMS. As to the objective merits, the FDA reiterated concerns by Dr. John K. Jenkins, Director of the Office of New Drugs. Specifically, Dr. Jenkins noted the uniquely exclusionary nature of Xyrem REMS and its "burdens on patient access and the healthcare delivery system":

> Our action approving the REMS submitted by Jazz *should not be construed or understood as agreement* with Jazz that limiting dispensing to a single pharmacy is the only way to ensure that the benefits of Xyrem outweigh the risks under *section 505-1* of the FD&C Act. We continue to be concerned that limiting the distribution of Xyrem to one pharmacy *imposes burdens on patient access and the healthcare delivery system. No other currently approved REMS* requires a sponsor to limit dispensing to a single pharmacy.

Sharp Memo at 8 (emphasis added). As for subjective motivations, the FDA **[**123]** expressly "note[d] the inconsistent position Jazz has taken on [REMS safety]"—an inconsistency which "suggest[ed] [Jazz's] *knowledge* that this aspect of its REMS *could have the effect of preventing generic competition*." *Id.* at 26 (emphasis added). The FDA reiterated this antitrust concern elsewhere in the Sharp Memo by again noting "Jazz's awareness that Xyrem REMS could have the effect of blocking or delaying approval of generic version of Xyrem." *Id.* at 12; UHS ¶ 136 (quoting same). Accordingly, Plaintiffs plausibly allege that Jazz's REMS-related petitioning to the FDA meets the sham exception to *Noerr-Pennington* immunity.

2. Plaintiffs' sham citizen petition allegations are time-barred.

Defendants next challenge Plaintiffs' allegations that Jazz filed "'baseless' citizen petitions with the FDA in an effort to slow **[*879]** down the ANDA review and approval process." Mot. at 29 (citing CAC ¶¶ 175-178; UHS ¶¶ 114-117). In Defendants' view, these allegations should be dismissed on two independent grounds. The first ground is *Noerr-Pennington* immunity. *Id.* The second ground is that Plaintiffs' claims are time-barred. *Id.*

The Court need not reach *Noerr-Pennington* immunity because the Court agrees—and **[**124]** Plaintiffs implicitly concede—that Plaintiffs' citizen petition allegations are time-barred. The challenged citizen petitions were filed and addressed by the FDA in 2012. *See, e.g.*, CAC ¶¶ 175-81 (detailing timeline). As Defendants note, "[t]he longest conceivable limitations period for Plaintiffs' claims is six years (*see* *Me. Rev. Stat. tit. 14, § 752*; *Wis. Stat. § 133.18(2)*), meaning that the time for Plaintiffs to file any such claim ran in 2018." Mot. at 29. Plaintiffs fail to respond to this argument. *See* Opp'n 28-29 (failing to mention statute of limitations); Reply at 16-17 (noting failure to respond). Nor do Plaintiffs argue that equitable tolling may apply. Plaintiffs "ha[ve] forfeited this argument by failing to address it in [their] reply brief." *Maciel, 731 F.3d at 932 n.4*; *see also, e.g.,* *Stichting Pensioenfonds ABP v. Countrywide Fin. Corp., 802 F. Supp. 2d 1125, 1132 (C.D. Cal. 2011)* (collecting cases holding same). Plaintiffs have thus conceded that their citizen petition allegations are time-barred.

Accordingly, the Court grants Defendants' motion to dismiss Plaintiffs' citizen petition allegations. "Because th[ese] [allegations] [are] time-barred, leave to amend [] would be futile." *Castillo v. Countrywide Home Loans, Inc., No. 10-CV-03538-LHK, 2010 U.S. Dist. LEXIS 120238, 2010 WL 4704429, at *4 (N.D. Cal. Nov. 12, 2010)*; *accord* *Toro v. Centene Corp., No. 19-CV-05163-LHK, 2020 U.S. Dist. LEXIS 191368, 2020 WL 6081738, at *5 (N.D. Cal. Oct. 14, 2020)* (collecting cases holding same). The Court thus dismisses with prejudice Plaintiffs' citizen petition allegations.

3. Plaintiffs adequately plead the [125] sham litigation exception to *Noerr-Pennington* immunity**.

Defendants again invoke *Noerr-Pennington* immunity against allegations that Jazz's serial patent infringement lawsuits abused the court system. Mot. at 30-31; *see also* Section I-A-2, *supra* (detailing sham litigation allegations). Specifically, Defendants argue that Plaintiffs' allegations "fail on the first prong" of the sham litigation exception: objective baselessness. Mot at 31. For support, Defendants rely on *International Longshore & Warehouse Union v. ICTSI Oregon, Inc., 863 F.3d 1178, 1188-89 (9th Cir. 2017)*, and *Kaiser Foundation Health Plan, Inc. v. Abbott Laboratories, Inc., 552 F.3d 1033, 1044, 1046 (9th Cir. 2009)*. Reply at 16.

The Court disagrees with Defendants. In fact, both of Defendants' cited cases show that Plaintiffs have adequately pleaded the sham litigation exception to *Noerr-Pennington* immunity. The Court addresses each case in turn. In *International Longshore, 863 F.3d at 1187*, the Ninth Circuit gave nuance to the usual rule for objective baselessness. ***HN38***[] Specifically, the Ninth Circuit explained that "[i]n the context of a *series of alleged sham proceedings*, [] 'the question is *not whether any one suit has merit*[,] but whether they are *brought pursuant to a policy* of starting legal proceedings without regard to the merits and for the purpose of injuring a market rival.' In such a context, the legal success of an occasional sham suit is irrelevant." *Id.* **[**126]** (emphasis added) (quoting *PRE, 508 U.S. at 60-61*).

Here, Plaintiffs allege "a series of alleged sham proceedings" against generic manufacturers to delay generic entry. *Id.* Specifically, Jazz allegedly brought cyclical litigation in which Jazz would "assert a **[*880]** patent position, glean defenses to that position in the litigation, file new 'follow-on' patents, and then file a new lawsuit asserting those patents." Opp'n at 5 (citing CAC ¶¶ 155-61; UHS ¶¶ 104-09). For instance, Jazz sued Hikma for patent infringement *nine* times. CAC ¶¶ 151-62 (detailing suits). Jazz also brought at least eight other suits against Later Generic Defendants and five other later generics. CAC ¶¶ 183-85 (listing suits). Yet by March 2017, the Patent Trial Appeal Board ("PTAB") had invalidated as obvious one of Jazz's three asserted families of patents relating to REMS.[5] UHS ¶¶ 151-57.

Moreover, Jazz's lawsuits were plausibly "brought pursuant to a policy of starting legal proceedings without regard to the merits and for the purpose of injuring a market rival." *Int'l Longshore, 863 F.3d at 1187* (quoting *PRE, 508 U.S. at 60-61*). This type of anticompetitive policy is incentivized by "the ANDA context," as the Third Circuit recently explained. *AbbVie, 976 F.3d at 361*. ***HN39***[] Under the Hatch-Waxman Act, the filing of a lawsuit **[**127]** triggers an "automatic, 30-month stay" of any FDA approval of an ANDA—regardless of a suit's outcome. *Id. at 340,*

[5] The invalidated REMS patents claimed methods of tracking drug prescriptions in a computer database. CAC ¶¶ 141-44.

361; *accord* Actavis, 570 U.S. at 143 (explaining same). Thus, "[t]he automatic, 30-month stay is a collateral injury the defendant's mere use of legal process invariably inflicts." AbbVie, 976 F.3d at 361. From this "collateral injury," a district court may conclude that "in filing an objectively baseless lawsuit against [the generic manufacturer], the [brand name manufacturer] w[as] motivated not to assert a patent in good faith, but to impose expense and delay on [the generic manufacturer] to delay its entry into the [drug] market." Id. at 371.

Plaintiffs allege that Jazz exploited this 30-month stay to delay generic entry. Namely, Plaintiffs allege that each of Jazz's lawsuits—"irrespective of their prospects of success—triggered automatic 30-month stays, running from the date Jazz received the generic manufacturer's paragraph IV notice letter." CAC ¶ 185. These lawsuits began in November 2010 with Hikma's ANDA, CAC ¶ 151, and continued at least through November 2017 with a later generic manufacturer's ANDA. CAC ¶ 183. Jazz's lawsuits thus imposed a stay on ANDA approvals through at least mid-2020 (*i.e.*, 30 months from November 2017). Indeed, **[**128]** as of today, more than a decade later, there is no generic version of Xyrem. *E.g.*, UHS ¶ 5 (alleging monopoly through "at least 2023"). All told, Plaintiffs' allegations show that under *International Longshore*, it is plausible that Jazz brought lawsuits pursuant to an anticompetitive policy. *See* Int'l Longshore, 863 F.3d at 1187.

Defendants' other main case is Kaiser Foundation, 552 F.3d 1033. There, the Ninth Circuit rejected the sham litigation exception as to 17 infringement suits. Id. at 1046. Yet those 17 suits were, on their face, much more meritorious than Jazz's lawsuits here. Of the 17 suits in *Kaiser Foundation*, the patent holder "won seven." *Id.* Of the remaining ten suits, six were resolved in a published opinion by the Federal Circuit in light of intervening Supreme Court precedent. Id. at 1047. The last four suits either involved "a question of first impression" or a treaty provision that "had not been the subject of prior interpretation." Id. at 1046-47 (quoting In re Terazosin Hydrochloride Antitrust Litig., 335 F. Supp. 2d 1336, 1359 (S.D. Fla. 2004)).

[*881] Here, by contrast, Jazz did not prevail in any of its patent suits. To the contrary, the PTAB invalidated as obvious one of Jazz's three asserted families of patents relating to REMS. UHS ¶¶ 151-57. Nor is there any indication that Jazz's suits involved legal issues of first impression or issues subject to intervening **[**129]** Supreme Court precedent. On the pleadings and briefing here, Jazz's suits plausibly involved one overarching purpose: imposing the "crushing burden" of litigation and the 30-month automatic stay to delay generic entry into the Xyrem market. Kaiser Found., 552 F.3d at 1046 (quoting USS-POSCO Industries v. Contra Costa County Building & Construction Trades Council, 31 F.3d 800, 810-11 (9th Cir. 1994)). This is a harm that the sham litigation exception to *Noerr-Pennington* aims to prevent. *See, e.g.,* AbbVie, 976 F.3d at 371 (affirming that lawsuits were "an anticompetitive weapon" under the sham exception). Plaintiffs thus adequately plead the sham litigation exception to *Noerr-Pennington* immunity.

In sum, *Noerr-Pennington* doctrine does not require dismissal of Plaintiffs' monopolization claims under Sherman Act § 2. The Court therefore denies Defendants' motion to dismiss CAC Count 6 and UHS Count 6 on this ground.

E. Plaintiffs inadequately plead federal antitrust standing for damages (CAC Counts 5, 6, and 12; UHS Counts 1, 5, 6, and 11).

As noted in background Section I-B, Plaintiffs purchase or provide reimbursement for Xyrem nationwide. However, according to Defendants, Plaintiffs' federal antitrust claims for damages fail because "Plaintiffs are *indirect* purchasers who lack [antitrust] standing." Mot. at 31 (emphasis added). For support, Defendants rely on Apple Inc. v. Pepper, 139 S. Ct. 1514, 203 L. Ed. 2d 802 (2019). In *Pepper* ***[**130]*** , the United States Supreme Court held that "[its] decision in *Illinois Brick* established a *bright-line rule* that authorizes suits by direct purchasers but *bars suits by indirect purchasers*." 139 S. Ct. at 1520 (emphasis added) (citing Illinois Brick Co. v. Illinois, 431 U.S. 720, 746, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)). Defendants note that "Plaintiffs do not allege—nor can they—that they purchased Xyrem from any named Defendant and therefore cannot claim to be direct purchasers. Rather, Plaintiffs purchased Xyrem from a non-party, Express Scripts." Mot. at 32. Express Scripts is the exclusive pharmacy for Xyrem. *See* Section I-A-3-a (summarizing Jazz REMS). Thus, in Defendants' view, *Illinois Brick* and *Pepper* bar Plaintiffs' federal antitrust claims for damages.[6]

HN40[] The Court agrees with Defendants. *Illinois Brick* "constrain[s] the class of parties that have statutory standing to recover damages through antitrust suits." *Del. Valley Surgical Supply Inc. v. Johnson & Johnson, 523 F.3d 1116, 1120 (9th Cir. 2008)*. *Pepper* constrains that class of plaintiffs further by holding that *Illinois Brick* set forth a "bright-line rule," which "means that there is no reason to ask whether the rationales of *Illinois Brick* 'apply with equal force' in every individual case." *Pepper, 139 S. Ct. at 1524* (quoting *Kansas v. UtiliCorp United, Inc., 497 U.S. 199, 216, 110 S. Ct. 2807, 111 L. Ed. 2d 169 (1990)*).

Plaintiffs offer three arguments in response, but none is persuasive on the pleadings here. **[**131]** The first argument is that Plaintiffs' federal damages claims must survive because "[t]he rationale underlying **[*882]** *Illinois Brick* was to promote private antitrust claims, not discourage them." Opp'n at 33. The Supreme Court rejected a purposivist argument just like this in *Pepper*. Again, the *Pepper* Court held that ***HN41***[] "there is no reason to ask whether the rationales of *Illinois Brick* 'apply with equal force' in every individual case." *Pepper, 139 S. Ct. at 1524* (quoting *UtiliCorp, 497 U.S. at 216*). The *Pepper* Court further stressed that "[w]e should not engage in 'an unwarranted and counterproductive exercise to litigate a series of exceptions.'" *Id.* (quoting *UtiliCorp, 497 U.S. at 216*). Following *Pepper*, this Court cannot explore whether Plaintiffs' "individual case" might qualify for some novel exception to *Illinois Brick*'s direct purchaser rule. *Id.*

Plaintiffs' second argument relies on *In re National Football League's Sunday Ticket Antitrust Litigation ("NFL Sunday Ticket"), 933 F.3d 1136 (9th Cir. 2019)*, *cert. denied sub nom. Nat'l Football League v. Ninth Inning, Inc., 141 S. Ct. 56, 208 L. Ed. 2d 291 (2020)*. According to Plaintiffs, *NFL Sunday Ticket* allows antitrust damages claims to proceed whenever Plaintiffs allege an antitrust conspiracy. Opp'n at 33 (citing *NFL Sunday Ticket, 933 F.3d at 1156-58*). Plaintiffs overread *NFL Sunday Ticket*. That case merely applied the settled co-conspirator exception to *Illinois Brick*. ***HN42***[] "[W]hen co-conspirators have jointly committed the antitrust violation, a plaintiff **[**132]** who is the immediate purchaser from any of the conspirators is directly injured by the violation." *NFL Sunday Ticket, 933 F.3d at 1157*.

Here, there is no allegation that any Plaintiff directly bought Xyrem from any Defendant. Instead, Plaintiffs allege that they buy Xyrem through Express Scripts—"the sole specialty central pharmacy through which Xyrem is distributed." Opp'n at 32 (CAC ¶¶ 288-291; UHS ¶¶ 211-212). Express Scripts is not a Defendant, let alone an alleged co-conspirator in the conspiracy detailed in Section III-B-2, *supra. NFL Sunday Ticket* is thus inapposite.

Third and most significantly, Plaintiffs argue that Express Scripts is "owned or controlled" by Jazz. Opp'n at 29 (quoting *Illinois Brick, 431 U.S. at 736 n.16*). Such "owne[rship] or control[]" would allow Plaintiffs to sue Jazz (and its co-conspirators) for damages. *Illinois Brick, 431 U.S. at 736 n.16*. Yet Plaintiffs fail to show ownership and control here. Plaintiffs instead rely on distinguishable cases which, if applied here, would violate the Supreme Court's rule that "[w]e should not engage in 'an unwarranted and counterproductive exercise to litigate a series of exceptions.'" *Pepper, 139 S. Ct. at 1524* (quoting *UtiliCorp, 497 U.S. at 216*); *accord UtiliCorp, 497 U.S. at 216* ("The possibility of allowing an exception, even in rather meritorious circumstances, would undermine the [*Illinois* ***[**133]*** *Brick*] rule."). Neither Plaintiffs' in-circuit authority or out-of-circuit authority is availing. The Court addresses each set of authority in turn.

Plaintiffs cite two Ninth Circuit cases finding ownership or control. In those cases, the alleged antitrust violator actually owned the direct purchaser at issue. Specifically, in *Royal Printing Co. v. Kimberly Clark Corp.*, the Ninth Circuit held that "*Illinois Brick* does not bar an indirect purchaser's suit where the direct purchaser is a *division* or *subsidiary*." *621 F.2d 323, 326 (9th Cir. 1980)* (emphasis added); *see* Opp'n at 30 (citing same). *Freeman v. San Diego Ass'n of Realtors* accordingly held that "*Royal Printing* applies because the associations [(*i.e.*, the antitrust defendants] own [the direct purchaser]." *322 F.3d 1133, 1146 & n.12 (9th* ***[*883]*** *Cir. 2003)*; *see* Opp'n at 29-30

---

[6] The Ninth Circuit has held, and Defendants do not dispute, that "*Illinois Brick* doesn't apply to equitable relief." *Freeman v. San Diego Ass'n of Realtors, 322 F.3d 1133, 1145 (9th Cir. 2003)*; *accord* Reply at 17 (not disputing same).

(citing same). Here, by contrast, there is no allegation that Express Scripts is a division or subsidiary of any Defendant.

Plaintiffs' three out-of-circuit cases—which are district court cases predating *Pepper*—are also inapposite. *See* Opp'n at 30 (citing cases). In *Kentucky v. Marathon Petroleum Co.*, plaintiffs' sufficient allegations included that (1) the direct purchaser was in "economic unity" with defendant; and that (2) defendant, as **[**134]** a petroleum refiner, "control[ed] certain of its direct-purchaser retailers through contractual provisions that waive the ability of those retailers to bring antitrust suits on their own." *2018 U.S. Dist. LEXIS 165270, 2018 WL 4620621, at *10-11 (W.D. Ky. Sept. 26, 2018)*. Similarly, in *In re Mercedes-Benz Antitrust Litigation*, the leasing agent that stood between plaintiffs and defendants was "said to be a subsidiary" of a defendant. *157 F. Supp. 2d 355, 366 (D.N.J. 2001)*.

Here, by contrast, Plaintiffs do not allege that Express Scripts is in "economic unity" with a Defendant, let alone a subsidiary of a Defendant. Nor do Plaintiffs allege that Jazz controls Express Scripts "through contractual provisions that waive the ability of [Express Scripts] to bring antitrust suits." *Id.* at *11. To the contrary, the Jazz-Express Scripts Master Services Agreement[7] provides that "[Express Scripts] shall have sole discretion over the management and oversight of its Personnel," and will "reasonably consult" with respect to Jazz's "personnel recommendations." Jazz-Express Scripts Pharmacy Master Services Agreement § 2.7 (July 1, 2017), https://www.sec.gov/Archives/edgar/data/1232524/000123252417000134/jazzq22017ex102.htm. This provision belies Plaintiffs' assertion that Jazz controls Express Scripts.

Plaintiffs' last **[**135]** out-of-circuit case is *In re Lorazepam & Clorazepate Antitrust Litigation, 202 F.R.D. 12, 25 (D.D.C. 2001)*. There, the direct purchasers at issue were *plaintiffs*' agents. *Id.* Specifically, the *Lorazepam* plaintiffs had each "execute[d] a written agreement appointing [the direct purchaser] as its agent." *Id.* (emphasis omitted) (quoting plaintiffs' affidavit). Here, by contrast, the issue is whether Express Scripts is a *Defendant's* agent. Moreover, there is no allegation that Jazz executed a written agreement expressly appointing Express Scripts as its agent.

All told, none of Plaintiffs' cited authority is persuasive. ***HN43***[] The Court therefore must heed the Supreme Court's rule that "[w]e should not engage in 'an unwarranted and counterproductive exercise to litigate a series of exceptions'" to *Illinois Brick*. *Pepper, 139 S. Ct. at 1524* (quoting *UtiliCorp, 497 U.S. at 216*). Accordingly, the Court grants Defendants' motion to dismiss Plaintiffs' federal antitrust claims for damages. However, because granting Plaintiffs leave to amend would not be futile, cause undue delay, or unduly prejudice Defendants, and Plaintiffs have not acted in bad faith, the Court dismisses with leave to amend Plaintiffs federal antitrust claims for damages. *See* *Leadsinger, 512 F.3d at 532*.

F. Plaintiffs' state law claims survive Defendants' motion to dismiss (CAC Counts 7-12; [136] UHS Counts 7-9)**.

Lastly, Defendants briefly argue that Plaintiffs' state law claims fail on three grounds. Mot. at 34-35. First, Defendants argue that the state law claims fail on the merits for the same reason that the federal claims purportedly fail on the merits. Second, Defendants argue Illinois, New **[*884]** Hampshire, Connecticut, Puerto Rico, and Utah have adopted *Illinois Brick*'s bar against lawsuits by indirect purchasers. Third, Defendants argue that Plaintiffs lack Article III standing within Hawaii, North Dakota, Vermont, Wyoming, and Puerto Rico.

The Court addresses each asserted ground for dismissal in turn. Ultimately, the Court dismisses just a few of Plaintiffs' state law claims. Specifically, the Court dismisses (1) state law claims to the extent they rely on the already dismissed sham citizen petition allegations; (2) Class Plaintiffs' class claims under Illinois law; and (3) Class Plaintiffs' individual claims under Utah law.

---

[7] The Jazz-Express Scripts Master Services Agreement is incorporated by reference in UHS ¶ 213, which cites the agreement and links to it in full.

1. Plaintiffs' state law claims do not fail on the merits.

First, Defendants argue that Plaintiffs' state law claims fail on the merits. For support, Defendants note that the merits of the state law claims rise and fall with the federal claims. Mot. at 34. Plaintiffs **[**137]** do not dispute this. Opp'n at 33. As detailed in this order, however, only one of Plaintiffs' federal antitrust claims fail on the merits: Plaintiffs' sham citizen petition allegations are time-barred. *See* Section III-D-2, *supra* (analyzing and dismissing with prejudice citizen petition allegations).

Accordingly, as to Defendants' motion to dismiss Plaintiffs' state law claims on the merits, the Court grants the motion just on the sham citizen petition allegations. Because those allegations are time-barred and dismissed with prejudice, they cannot support Plaintiffs' state law claims. Otherwise, the Court denies Defendants' motion to dismiss Plaintiffs' state law claims on the merits.

Having addressed Defendants' argument against the merits of the state law claims, the Court now turns to Defendants' next argument: that indirect purchasers such as Plaintiffs cannot bring suit under some state laws.

2. Plaintiffs can largely bring indirect purchaser claims under state law.

Second, Defendants argue that because Plaintiffs lack direct purchaser standing under *Illinois Brick*, Plaintiffs cannot bring claims under state laws that bar indirect-purchaser suits. Mot. at 35; *see* Section III-E, *supra* ***[**138]*** (analyzing *Illinois Brick*). Those laws include the antitrust statutes of Illinois, New Hampshire, Connecticut, Puerto Rico, and Utah. *See* Reply at 19 (not disputing Plaintiffs' arguments for Florida and Massachusetts law). Given the parties' perfunctory briefing here, the Court briefly addresses each state's law in turn.

a. Illinois: Class Plaintiffs cannot maintain class claims.

HN44[] The Illinois Antitrust Act provides that "[n]o provision of this Act shall deny any person who is an indirect purchaser the right to sue for damages." Opp'n at 43 (quoting *740 Ill. Comp. Stat. Ann. 10/7*). At first glance, this provision seems to foreclose Defendants' argument that only direct purchasers may bring suit. However, Defendants cite a proviso immediately following the general statement that Plaintiffs cite. ***HN45***[] This proviso provides that "that *no person* shall be authorized to maintain a class action in any court of this State *for indirect purchasers* asserting claims under this Act, with the sole exception of this State's Attorney General." *740 Ill. Comp. Stat. Ann. 10/7*.

On the cursory briefing here, the Court agrees with Defendants. In particular, the Court is persuaded by the detailed analysis of its sister court in *Lidoderm, 74 F. Supp. 3d at 1083*. There, United States District Judge William **[**139]** Orrick III explained why the class action limitation in the Illinois Antitrust Act is in fact "intertwined with Illinois substantive rights and remedies." *Id. at 1084* (citing *In re Wellbutrin XL Antitrust Litig., 756 F. Supp. 2d 670, 677* ***[*885]*** *(E.D. Pa. 2010)*. Because that class action limitation is substantive, it displaces *Federal Rule of Civil Procedure 23*'s usual allowance of class actions in diversity actions. *Id.* (distinguishing *Shady Grove Orthopedic Assocs., P.A. v. Allstate Ins. Co., 559 U.S. 393, 130 S. Ct. 1431, 176 L. Ed. 2d 311 (2010)*). Judge Orrick therefore dismissed the *Lidoderm* plaintiffs' Illinois Antitrust Act claims. *Id.*

Applying *Lidoderm*'s holding here, Class Plaintiffs cannot maintain their class claims against Defendants under Illinois law. By contrast, as an individual plaintiff, United may proceed with any indirect purchaser claim under Illinois law.

b. New Hampshire: Plaintiffs' claims survive.

Defendants' argument as to New Hampshire is meritless. Defendants argue that "[t]he New Hampshire Supreme Court expressly adopted the *Illinois Brick* rule against indirect purchaser suits in *Minuteman, LLC v. Microsoft Corp., 147 N.H. 634, 795 A.2d 833, 838 (N.H. 2002)*," a case which construed *N.H. Rev. Stat. § 356:11* (1995). Reply at 19. Yet Defendants fail to mention that effective January 1, 2008, New Hampshire superseded *Minuteman* by statute. ***HN46***[] The current version of *N.H. Rev. Stat. § 356:11* provides that "any person" may bring suit "*regardless of whether that person dealt directly or indirectly with the defendant*." *N.H. Rev. Stat. § 356:11(II)* (adding emphasis **[**140]** on new statutory text). Defense counsel—who include at least 16 lawyers across six major law firms—should have brought this statutory revision to the Court's attention. In short, Plaintiffs' claims under New Hampshire law may proceed.

c. Connecticut: Plaintiffs' claims survive.

Defendants' argument as to Connecticut law also lacks merit. In their motion to dismiss, Defendants' only support for its conclusory argument against Connecticut (as well as Florida, Illinois, Massachusetts, and Puerto Rico) was one citation—in a footnote—to a 2015 case from this district. Mot. at 35 & n.20 (citing *In re Lidoderm Antitrust Litig., 103 F. Supp. 3d 1155, 1163-64 (N.D. Cal. 2015)*). Yet as Plaintiffs correctly noted in their opposition, Connecticut passed a law abrogating any *Illinois Brick* requirement in October 2017. *See Health Care Providers—Pharmacists—Confidential or Privileged Information*, 2017 Conn. Legis. Serv. P.A. 17-241 (S.B. 445) (West) (providing that an antitrust defendant "[m]ay not assert as a defense that the defendant did not deal directly with the person on whose behalf the action is brought" (codified at *Conn. Gen. Stat. Ann. § 35-46a(1)*)).

On reply, Defendants failed to acknowledge another misleading omission of an intervening change in law. Instead, Defendants proffered a new argument: **[**141]** that Connecticut's statutory amendment is not retroactive. Reply at 20. Defendants cite only *Spinner Consulting LLC v. Stone Point Cap. LLC, 623 B.R. 671, 678 (D. Conn. 2020)*, *aff'd on other grounds*, *843 F. App'x 411 (2d Cir. 2021)*, for this retroactivity point.

Spinner is unpersuasive. In *Spinner*, the challenged conduct ceased before 2018. *Spinner, 623 B.R. at 675, 677*. Here, by contrast, Plaintiffs allege that Jazz's anticompetitive agreements will maintain Jazz's unlawful monopoly "through at least January 1, 2023." CAC ¶ 296. ***HN47***[] Regardless, "[a]rguments raised for the first time in a reply brief are waived." *E.g., McReynolds v. Merrill Lynch & Co., 694 F.3d 873, 889 n.9 (7th Cir. 2012)*. Thus, Plaintiffs' Connecticut law claims may proceed.

d. Puerto Rico: Plaintiffs' claims survive.

To argue that Plaintiffs' Puerto Rico law claims should be dismissed, Defendants **[*886]** cite one case: *Staley v. Gilead Sciences, Inc. ("Gilead I"), 446 F. Supp. 3d 578, 626-28 (N.D. Cal. 2020)*. There, United States District Judge Edward Chen surveyed the conflicting district court authority on whether Puerto Rico allows indirect purchaser suits. Following several district courts and colleague Judge Orrick from this district, Judge Chen concluded that Puerto Rico has adopted the *Illinois Brick* rule. *Id. at 628* (citing *United Food & Com. Workers Loc. 1776 & Participating Emps. Health & Welfare Fund v. Teikoku Pharma USA, Inc., 74 F. Supp. 3d 1052, 1086 (N.D. Cal. 2014)*). Judge Chen thus held that Puerto Rico law bars indirect purchaser suits.

The Court respectfully disagrees with Judges Chen and Orrick on this question. ***HN48***[] As some district courts have recognized, both the **[**142]** Puerto Rico Supreme Court and the U.S. District Court for the District of Puerto Rico have not limited antitrust standing to direct purchasers. *See, e.g., In re Zetia (Ezetimibe) Antitrust Litig., 400 F. Supp. 3d 418, 433 (E.D. Va. 2019)* (holding same); *Sergeants Benevolent Ass'n Health & Welfare Fund v. Actavis, PLC, No. 15-CV-06549-CM, 2018 U.S. Dist. LEXIS 220574, 2018 WL 7197233, at *23 (S.D.N.Y. Dec. 26, 2018)* (same). Rather, Puerto Rico's district court has expressly held that "it is immaterial whether Plaintiffs are direct or indirect purchasers." *Rivera-Muniz v. Horizon Lines Inc., 737 F. Supp. 2d 57, 61 (D.P.R. 2010)* (citing *Pressure Vessels of P.R., Inc. v. Empire Gas de P.R., 137 D.P.R. 497, 509-18, 1994 Juris P.R. 144 (1994)*). For support, the *Rivera-Muniz* Court cited the Puerto Rico Supreme Court's decision in *Pressure Vessels*. There, the Puerto Rico

Supreme Court held, somewhat circumspectly, "that the plaintiff need not establish anything beyond a factual causal relation between the injury and the violation" to have antitrust standing under Puerto Rico law. *Pressure Vessels, 137 P.R. Dec. 497* (English translation; no pincite).

Following Judge Orrick, Judge Chen found *Pressure Vessels* inapposite because it did not expressly discuss *Illinois Brick. Gilead I, 446 F. Supp. 3d at 627*. Judge Chen thus found *Rivera-Muniz* unpersuasive because it appeared to overread *Pressure Vessels*, a Puerto Rico Supreme Court case. *Id.*

By contrast, the Court finds that *Pressure Vessels* did address *Illinois Brick*. Even though the *Pressure Vessels* Court did not cite *Illinois Brick* itself, it did cite and criticize four United States Supreme Court cases that explicitly applied **[**143]** *Illinois Brick. See Pressure Vessels, 137 P.R. Dec. 497* (citing *Kansas v. Utilicorp United, Inc., 497 U.S. 199, 110 S. Ct. 2807, 111 L. Ed. 2d 169 (1990)*; *Blue Shield of Virginia v. McCready, 457 U.S. 465, 102 S. Ct. 2540, 73 L. Ed. 2d 149 (1982)*; *Associated General Contractors v. Carpenters, 459 U.S. 519, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)*; and *Pfizer, Inc. v. Gov't of India, 434 U.S. 308, 98 S. Ct. 584, 54 L. Ed. 2d 563 (1978)*). In *UtiliCorp*, for instance, the U.S. Supreme Court strictly barred indirect purchaser suits "even assuming that any economic assumptions underlying the *Illinois Brick* rule might be *disproved* in a specific case." *UtiliCorp, 497 U.S. at 217* (emphasis added). Thus, the Puerto Rico Supreme Court was almost certainly aware of *Illinois Brick* when the Puerto Rico Supreme Court held—contrary to *Illinois Brick*—that an antitrust plaintiff "need not establish anything beyond a factual causal relation between the injury and the violation." *137 P.R. Dec. 497, 1994 Juris P.R. 144*.

If the Court's reading of *Pressure Vessels* is correct, then the Court must also hold that indirect purchaser standing is allowed under Puerto Rico law. *See Vazquez-Filippetti v. Banco Popular de Puerto Rico, 504 F.3d 43, 48 (1st Cir. 2007)* (holding that the First Circuit is bound by **[*887]** the Puerto Rico Supreme Court in diversity cases). Yet even if the correct reading of *Pressure Vessels* is unclear, what is clear is that the Court owes "deference to the local district judges of Puerto Rico on matters of Puerto Rican law." *Rodriguez v. Escambron Dev. Corp., 740 F.2d 92, 96 (1st Cir. 1984)* (collecting cases). In *Rivera-Muniz*, the Honorable Gustavo Gelpí—the Chief Judge of the U.S. District Court for the District of Puerto Rico and present nominee to the U.S. Court of Appeals for the First Circuit—held **[**144]** that indirect purchasers have standing under Puerto Rico law. *See Rivera-Muniz, 737 F. Supp. 2d at 61* ("[I]t is immaterial whether Plaintiffs are direct or indirect purchasers.").

In sum, given the Court's own reading of *Pressure Vessels* and the deference owed to Judge Gelpí's *Rivera-Muniz* decision, the Court holds that indirect purchasers have antitrust standing under Puerto Rico law. Thus, Plaintiffs' Puerto Rico claims may also proceed.

e. Utah: Class Plaintiffs can maintain class claims, but not individual claims.

HN49[] The Utah Antitrust Act allows "[a] person who is a *citizen of this state or a resident of this state*" to bring suit for antitrust injury. *Utah Code Ann. § 76-10-3109(1)(a)* (emphasis added). Defendants argue that because no Plaintiff is a citizen or resident of Utah, Plaintiffs' claims under Utah law must be dismissed. Mot. at 35.

The Court agrees in part as to Class Plaintiffs, but entirely disagrees as to United. Informing this conclusion is the Fourth Circuit's recent decision *Mayor & City Council of Balt. v. Actelion Pharms. Ltd., 995 F.3d 123 (4th Cir. 2021)*. There, the Fourth Circuit synthesized a twopart approach for evaluating, at the motion to dismiss stage, the standing of class plaintiffs who cannot "satisfy the statutory requirements of the laws of the States they are invoking." *Id. at 133-34*. The Fourth Circuit explained **[**145]** that, on the one hand, these class plaintiffs "may not seek relief for their *own* injuries under those States' statutes." *Id.* (emphasis added). On other hand, these class plaintiffs have standing to assert "*class members*' claims" on behalf of class members who *can* satisfy states' statutory requirements. *Id.* (emphasis in original); *accord, e.g., In re Asacol Antitrust Litig., 907 F.3d 42, 50 (1st Cir. 2018)* (holding same and collecting court of appeals precedent); *Langan v. Johnson & Johnson Consumer Companies, Inc., 897 F.3d 88, 93 (2d Cir. 2018)* (same). Thus, it was reversible error for the *Actelion* district court to dismiss the class plaintiffs' class claims. *Actelion Pharms., 995 F.3d at 134*. The Fourth Circuit held that the district court should have delayed concerns about class treatment to the class certification stage. *Id.*

The Court follows the Fourth Circuit's approach here. Because Class Plaintiffs do not personally satisfy the citizenship or residency requirement of the Utah Antitrust Act, Class Plaintiffs "may not seek relief for their own injuries under" the Utah Antitrust Act. *Id.* Yet Class Plaintiffs' class claims on behalf of Utah citizens or residents "need not be stricken or disregarded." *Id.*

United, for its part, has asserted claims of its UnitedHealthcare Plans affiliate assignors, including "UnitedHealthcare of Utah, Inc." Opp'n at 34 (citing **[**146]** UHS ¶ 10, Ex. A). Defendants do not argue that this Utah assignor-plaintiff would be inadequate. Reply at 20. Thus, United's claim under Utah law may proceed.

In sum, the Court grants Defendants' motion to dismiss Class Plaintiffs' (1) class claims under Illinois law; and (2) individual claims only under Utah law. The Court otherwise denies Defendants' motion to **[*888]** dismiss Plaintiffs' other state law claims. Moreover, because granting Class Plaintiffs leave to amend would not be futile, cause undue delay, or unduly prejudice Defendants, and Class Plaintiffs have not acted in bad faith, the Court grants the Class Plaintiffs leave to amend the dismissed claims. *See Leadsinger, 512 F.3d at 532*.

3. Plaintiffs have Article III standing.

Finally, Defendants argue that Plaintiffs lack Article III standing to bring claims under the laws of five jurisdictions: Hawaii, North Dakota, Vermont, Wyoming, and Puerto Rico. Mot. at 35. Defendants reason that Plaintiffs have failed to allege that any Plaintiff "paid for and/or provided reimbursement for Xyrem in" those five jurisdictions. Mot. at 35.

The Court disagrees. Defendants have conflated Article III standing with so-called "statutory standing." ***HN50***[] As the Fourth Circuit explained in *Actelion Pharmaceutical* ***[**147]*** , "unlike Article III standing, statutory standing considers 'whether a cause of action exists under a particular statute.'" *Actelion Pharms., 995 F.3d at 134* (quoting *Steel Co. v. Citizens for a Better Env't, 523 U.S. 83, 97, 118 S. Ct. 1003, 140 L. Ed. 2d 210 & n.2 (1998)*). Thus, it is often immaterial to Article III standing that class plaintiffs "did not allege facts to show that they satisfied the statutory requirements of" some states' antitrust laws. *Id.* Those class plaintiffs may still have Article III standing to represent a class containing members who *do* satisfy those statutory requirements. *Id.* Several other circuits have held the same. *See In re Asacol Antitrust Litig., 907 F.3d at 49-50* (holding same); *Langan, 897 F.3d at 93* (same); *Morrison v. YTB Int'l, Inc., 649 F.3d 533, 536 (7th Cir. 2011)* (same).

Here too, Class Plaintiffs have Article III standing to represent individuals affected by Xyrem overcharges in at least the five jurisdictions that Defendants challenge. Whether Class Plaintiffs are typical representatives of such individuals—or whether all these individuals together satisfy *Rule 23(b)(3)* predominance—is a question for class certification. *See Actelion Pharms., 995 F.3d at 134* (deferring same to class certification).

As to United, Defendants' standing argument is inapposite. United, as a third-party payor, paid for and/or provided reimbursement for United members "in all 50 states, the District of Columbia, and Puerto Rico." UHS ¶¶ 7-9. United therefore has Article III standing where its **[**148]** members transacted with a pharmacy to obtain Xyrem. *See In re Suboxone Antitrust Litig., 64 F. Supp. 3d 665, 695 (E.D. Pa. 2014)* (collecting cases). Defendants do not argue otherwise. In short, Plaintiffs have adequately pleaded Article III standing.

IV. CONCLUSION

For the foregoing reasons, the Court GRANTS IN PART and DENIES IN PART Defendants' Motion to Dismiss Counts 1, 5-12, and 17 of the Consolidated Class Action Complaint and Counts 1, 5-9, and 11 of United Healthcare Services' Complaint. ECF No. 109. Specifically, the Court GRANTS the motion to dismiss the following with prejudice:

- In UHS Counts 5, 7, and 8: United's market allocation claims to the extent they allege that Jazz's licenses are antitrust violations per se.

• In CAC Count 6; UHS Count 6; and any related state law Counts (CAC Counts 7-12; UHS Counts 7-9): Plaintiffs' allegations against Jazz's citizen petitions to the FDA.

The Court GRANTS the motion to dismiss the following with leave to amend:

• In CAC Counts 5, 6, and 12; UHS Counts 1, 5, 6, and 11: Plaintiffs' federal antitrust claims for damages.

[*889] • In CAC Counts 7-12; UHS Counts 7-9: Class Plaintiffs' class claims under Illinois law and individual claims under Utah law.

The Court DENIES the motion to dismiss as to all remaining claims.

Should Plaintiffs **[**149]** elect to file one consolidated amended complaint curing the deficiencies identified herein, Plaintiffs shall do so within 30 days of the date of this order. Failure to meet the 30-day deadline to file an amended complaint or failure to cure the deficiencies identified in this order or Defendants' motion to dismiss will result in dismissal of the deficient claims with prejudice. Plaintiffs may not add new causes of action or parties without leave of the Court or stipulation of the parties pursuant to *Federal Rule of Civil Procedure 15*. Plaintiffs are directed to file redlines comparing the CAC and UHS complaint to any amended complaint as an attachment to Plaintiffs' amended complaint.

IT IS SO ORDERED.

Opinion

[*312] MEMORANDUM AND ORDER

TALWANI, D.J.

Plaintiffs Karen Morales Posada, Amanda Sarmento Ferreira Guimaraes, Williana Rocha, and Sara Barrientos are foreign nationals who participated as *au pairs* in the federal *au pair* program (under the J-1 Exchange Visitor Visa Program). Sec. Amend. Compl. ("SAC") ¶¶ 7-10 [#43]. Defendant Cultural Care, Inc. ("Cultural **[**2]** Care") sponsored Plaintiffs, coordinated their immigration process, and placed them with a host family. Id. at ¶¶ 3-4, 31, 50, 60, 71, 84. Plaintiffs allege that Cultural Care, through its failure to adequately pay them and to provide certain disclosures, has violated the *Fair Labor Standards Act ("FLSA"), 29 U.S.C. § 201 et seq.*, and New York, California, New Jersey, and Illinois minimum wage, overtime and wage statement laws. Plaintiffs also allege that Cultural Care has engaged in deceptive trade practices.

Their complaint includes fourteen separate counts. Counts 1-11 allege, as *Rule 23* class actions, violations of California, New York, New Jersey, and Illinois minimum wage, overtime, and wage statement laws. SAC ¶¶ 123-47 (counts 1-4), 84 (class definition counts 1-3), 148-63 (counts 5-7), 91 (class definition counts 5-7), 164-71 (counts 8-9), 98 (class definition counts 8-9), 172-82 (counts 10-11), 105 (class definition counts **[*313]** 10-11). Counts 12-13 allege, as a collective action on behalf of the named plaintiffs and any similarly situated individuals in the three years prior to filing this suit, violations of the FLSA for failure to pay minimum wages and failure to pay overtime. Id. at ¶¶ 183-212 (counts), 120 (collective action class definition). **[**3]** Finally, Count 14 alleges, as a *Rule 23* class action on behalf of the named plaintiffs and all individuals who were sponsored by Cultural Care and worked as *au pairs* in the states of New York, Illinois, New Jersey, Connecticut, and Washington during "any portion of the period commencing during the applicable statute of limitations prior to the filing of this action through the entry of final judgment in this action," that Cultural Care engaged in deceptive trade practices in violation of the consumer protection laws of aforementioned states. Id. at ¶¶ 213-17 (count), 112 (class definition).

Pending before the court is Cultural Care's Motion to Dismiss [#66] for lack of subject matter jurisdiction and for failure to state a claim.[1] Cultural Care argues that it is entitled to derivative sovereign immunity (asserted via *Rule 12(b)(1) of the Federal Rules of Civil Procedure*), that the wage and employment laws allegedly violated are preempted by federal regulations (asserted via *Rule 12(b)(6)*), and that Plaintiffs failed to allege facts establishing either that Cultural Care "employs" *au pairs* or that Cultural Care engaged in any deceptive practices (both also asserted via *Rule 12(b)(6)*). Def's Mem. 2-3 [#67].

For the following reasons, the Motion to Dismiss [#66] DENIED as to Counts 1 through 13 and GRANTED IN PART and DENIED IN PART as to Count 14.

I. Background

A. Overview of Federal Statutes and Regulations

The *au pair* program is a part of the J-1 Exchange Visitor Program through which foreign nationals can come live and study in the United States. *22 C.F.R. § 62 et seq.* (general program regulations); id. at *§ 62.31* (*au pair* program specific regulations). To be eligible to receive a J-1 visa, a person must be:

> an alien having a residence in a foreign country which he has no intention of abandoning who is a bona fide student, scholar, trainee, teacher, professor, research assistant, specialist, or leader in a field of specialized knowledge or skill, or other person of similar description, who is coming temporarily to the United States as a participant in a program . . . for the purpose of teaching, instructing or lecturing, studying, observing, conducting research, consulting, demonstrating special skills, or receiving training . . . .

8 U.S.C. § 1101(a)(15)(J). The *au pair* program is open to foreign nationals between the ages of 18 and 26 and allows such individuals to reside in the United States with an American host family for up to **[**5]** two years, where

---

[1] Plaintiffs' Motion to Certify a Collective Action [#98] and Cultural Care's Motion to Strike Pre-Certification **[**4]** Consents [#114] are also pending and will be addressed in a separate order.

they provide childcare services and complete coursework at a local college or university. 22 C.F.R. § 62.31(a), (c)(1), (d), (o).

Exchange Visitor Program Sponsors are "legal entit[ies] designated by the Secretary of State to conduct an exchange visitor program." Id. at § 62.2. Organizations must apply to the Department of State (the "State Department") to become sponsors. Id. at § 62.5. If an applicant meets "all the statutory and regulatory requirements," **[*314]** the State Department may grant designation via a letter specifying what activities the applicant may undertake. Id. at § 62.6(a), (c). Designation can last up to two years, id. at § 62.6(b), 62.7(d), and sponsors can apply for redesignation in advance of the expiration. Id. at 62.7. Sponsors are responsible for choosing, in accordance with the regulatory eligibility rules, who participates in the *au pair* program. Id. at 62.4. Sponsors also have certain financial, insurance, and reporting obligations. Id. at § 62.8-15.

Sponsors designated by the Department of State to conduct an *au pair* exchange program have additional responsibilities, including limiting the *au pair's* initial participation to one year; requiring the *au pair* to register for and attend educational programs; **[**6]** and maintaining a record of monthly (or more frequent) contacts with each *au pair* and host family. 22 C.F.R. § 62.31(c).

The *au pair* specific regulations also require sponsors to provide the *au pair* and the host family documentation about: the *au pair* program rules, a participant's host family and the surrounding community, the participant's educational institution, travel arrangements, and the State Department's "written statement and brochure" about the program. Id. at 62.31(f), (i).[2] Sponsors must also select and screen host families in accordance with State Department criteria. Id. at § 62.31(e), (h). And there are specific *au pair* program monitoring and reporting obligations. Id. at 62.31(c)(5)-(9), (l), (m).

Of particular relevance here, the regulations address *au pair* wages and hours in a few places. First, *au pair* sponsors are specifically charged with limiting the number of hours per day and per week that the *au pair* participant is obligated to provide child care services. Id. at 62.31(c). The sponsor may not place an *au pair* with a host family unless the family signs a written agreement limiting the obligation to provide child care services for the *au pair* to ten hours per day and forty-five hours per week. Id. at 62.31(e)(5). **[**7]** Sponsors also must require that *au pair* participants "[a]re compensated at a weekly rate based upon forty-five hours of child care services per week and paid in conformance with the requirements of the Fair Labor Standards Act as interpreted and implemented by the United States Department of Labor." Id. at 62.31(j)(1). The regulations make the aforementioned hourly limitations binding on sponsors and require that *au pairs* receive at least one and a half days off each week, one full weekend off each **[*315]** month, and two weeks of paid vacation. Id. at § 62.31(j)(2)-(4). In 2009, when the federal minimum wage increased to its current rate, see 29 U.S.C. § 206(a)(1)(C), the State Department issued a notice indicating that in its view a weekly stipend of $195.75 complies with the federal minimum wage rate of $7.25/hour based on crediting room and board as 40% of an *au pair*'s compensation.[3]

---

[2] Cultural Care asks the court to take judicial notice of what it claims is a copy of the State Department brochure. Courts can take judicial notice of information from an official government website that is "not subject to reasonable dispute." *Gent v. CUNA Mut. Ins. Soc'y, 611 F.3d 79, 84 n.5 (1st Cir. 2010)* (citing *Denius v. Dunlap, 330 F.3d 919, 926-27 (7th Cir. 2003)*) (taking judicial notice of information on the CDC website). The brochure, filed as an exhibit to Cultural Care's motion, appears on a webpage with a government domain (https://j1.state.gov) and thus seems to be from a government website. Def's Mem. 9 [#67]. The webpage only contains the brochure, so it is not possible to confirm that the brochure is current. Plaintiffs, however, also cite to the brochure in their memorandum opposing the motion to dismiss, Pl.'s Mem. 3 n.1 [#78], so it appears they do not contest the authenticity of the document. It is therefore appropriate for the court to take judicial notice. See *Watterson v. Page, 987 F.2d 1, 3 (1st Cir. 1993)* ("Ordinarily . . . consideration of documents not attached to the complaint . . . is forbidden, unless the proceeding is properly converted into one for summary judgment . . . . However, courts have made narrow exceptions for documents the authenticity of which are not disputed by the parties . . . .") (citation omitted); *O'Hara v. Diageo-Guinness, USA, Inc., 306 F. Supp. 3d 441, 457 (D. Mass. 2018)*, on reconsideration, *370 F. Supp. 3d 204 (D. Mass. 2019)*.

[3] Cultural Care asks the court to take judicial notice of two documents, Wolkoff Decl. Exs. B, C [#68], that Cultural Care claims are notices issued in 2007 and 2009 by the State Department in which the department calculated the minimum weekly stipend

B. *Factual Allegations*

As alleged in the Second Amended Complaint [#43] and the incorporated documents, the facts are as follows.

According to the State Department, each year approximately 3,100 *au pairs* work in California, 2,500 *au pairs* work in New York, 1,700 *au pairs* work in New Jersey, and 1,100 *au pairs* work in Illinois, and Cultural Care, a sponsor **[**8]** under the federal program, sponsors the visas for at least 10% of these *au pairs*. Id. at ¶ 13. *Au pairs* sponsored by Cultural Care typically work at least forty hours per week and fifty weeks per year. Id. at ¶ 14. Cultural Care instructs host families to pay a weekly stipend of at least $195.75. Id. at ¶¶ 17, 21, 23. Cultural Care advertises the annual cost to a host family for an *au pair* as $19,553.25, comprised of $9,570 in fees to Cultural Care and $9,983.25 in payment to *au pairs*. Id. at ¶ 17. Cultural Care has distinct instructions for Massachusetts host families, who are told the following:

> **Paid weekly to your au pair:**
> Au pairs who live with a host family in Massachusetts are entitled to a weekly payment directly from their host family, that is at least the greater of either:
> • The minimum federal stipend of $195.75[1]
>
> • The MA minimum wage ($12.75/hour in 2020) times the number of hours the au pair is on duty for the week up to 40. If the au pair works between 41-45 hours during a week, you must pay time-and-a-half for the hours worked over the 40 hour limit. You may be able to deduce from the weekly pay to your au pair under the MA minimum wage laws for a meal credit of up to $42 **[**9]** per week and/or a lodging credit of up to $35 per week if you determine all state requirements for these credits are met.

Id. at ¶ 20 (content of footnote omitted in the original). Cultural Care does not have unique payment instructions for host families in any other state, stating instead that the minimum *au pair* stipend calculation "is based on a weekly stipend of at least $195.75[1] paid to your au pair for 51 weeks, including 2 weeks of paid vacation." Id. at ¶ 21 (content of footnote omitted in the original). Cultural Care provides the Massachusetts instructions because, "[o]n December 2, 2019, the U.S. Court of Appeals for the First Circuit issued its decision that host families must comply with Massachusetts labor laws applicable to domestic workers, including the Massachusetts Domestic Workers' *Bill of Rights*." Id. at ¶ 19.

Cultural Care communicates with *au pairs* regarding their maximum work hours, the performance of their job duties, and other terms and conditions of their employment. Id. at ¶ 24. It also retains the **[*316]** right to terminate an *au pair*'s assignment to a host family (upon a finding, to be made exclusively by Cultural Care, that an *au pair* has been unable to perform his or her duties **[**10]** for an extended period of time), to reassign an *au pair*, to determine that a host family's home is unsuitable, to terminate a host family's participation in the program, and to mediate disputes between *au pairs* and host families. Id. at ¶ 24.

Cultural Care specifically requires: (1) that if the host family has an infant less than three months old in the home, a parent or other responsible adult shall be present at all times, and a parent or responsible adult shall stay in the home for the first three days of an *au pair*'s assignment; (2) that the *au pair*'s schedule be limited to 45 hours per week, with a maximum of 10 hours per day and no more than 5.5 days per week of work, and failure to comply will result in Cultural Care terminating the host family from the program; (3) that the host family notify Cultural Care immediately if there is a change in the composition of the family and if there are any incidents involving law enforcement; (4) that any adults residing in the host family's home be screened by Cultural Care; (5) that the *au pair* perform only childcare services and light housework relating to childcare services (host families may not ask *au pairs* to do general housekeeping **[**11]** or heavy chores); (6) that the host family provide automobile insurance for *au pairs* who drive; (7) that the *au pair* contact Cultural Care if the family wishes to take the *au pair* out of the

---

payments owed to *au pair*s under the federal minimum wage. Def's Mem. 12 [#67]. Plaintiffs reference the notices in their memorandum opposing the motion to dismiss and do not contest their authenticity. Pl.'s Mem. 26 [#78]. The court therefore finds it appropriate to take judicial notice of both documents. See *Watterson, 987 F.2d at 3*.

country on vacation; and (8) that the host family notify Cultural Care if the *au pair* needs medical attention. Id. at ¶ 24.

Cultural Care also retains the right to reject any *au pair* application for any reason it deems advisable and to end an *au pair*'s placement if the *au pair* engages in conduct that Cultural Care believes is not in the best interest of the program. Id. at ¶¶ 25-26. Cultural Care does not provide wage statements to *au pairs* with information about pay, deductions, and withholdings. Id. at ¶ 18. Cultural Care also does not retain records of hours worked, breaks taken, or the specific value of room and board provided for Plaintiffs and other *au pairs*. Id. at ¶ 27. Cultural Care does keep records of meetings between *au pairs* and their regional points of contact and documents regarding immigration and visa status. Id. at ¶ 28. Cultural Care requires all *au pairs* it places to attend four days of training prior to their placement. Id. at ¶ 29. The training is uncompensated, and until recently **[**12]** took place in Tarrytown, New York. Id. at ¶¶ 29, 30.

Plaintiff Karen Morales Posada ("Morales Posada") has been an *au pair* since January 2019. Id. at ¶ 7. She worked in New York from January 2019 until December 2019, and since January 7, 2020, she has been working in San Francisco, California. Id. Morales Posada attended three days of training in New York conducted by Cultural Care upon her arrival in the United States. Id. at ¶ 33. For roughly her first six months Morales Posada was paid $200 per week for every week worked and usually worked about 8.5 hours per day, five days a week (42.5 hours per week). Id. at ¶¶ 34-35. In one of those six months she worked two hours on the weekend on top of her usual 42.5 hours during the week. Id. at ¶¶ 35-36. For the second six months Morales Posada was also paid $200 per work week along with $50 for transportation. Id. at ¶ 39. During this period, she usually worked about eleven hours per day on Monday, Wednesday, and Friday and 8.5 hours a day on Tuesday and Thursday (fifty hours total). Id. at ¶ 40. From January 2020 through the start of the COVID-19 pandemic in March 2020, Morales Posada worked about forty hours per week. Id. at ¶ 45. From **[**13]** the start of the pandemic **[*317]** through the filing of the complaint, except for June 2020 when Morales Posada worked fewer hours while her host family's children attended camp, on "many days she worked 10 hours straight with no breaks." Id. at ¶¶ 45-46. She did receive "marginally more" payment during this period. Id. at ¶ 45. During this period she worked roughly forty-nine hours per week. Id. Cultural Care has not maintained any time records for her work, nor has Cultural Care provided any pay statements. Id. at ¶¶ 48-49.

Plaintiff Amanda Sarmento Ferreira Guimaraes ("Guimaraes") has been an *au pair* since September 2018, working in Utah from September 2018 through October 2018, and then in New York since October 2018. Id. at ¶ 8. Guimaraes attended "three or four" days of training in New York conducted by Cultural Care. Id. at ¶ 53. She has been paid $200 per week for every week worked since starting as an *au pair*. Id. at ¶ 54. From about September 2018 to September 2019, Guimaraes worked about nine hours per day, five days a week (forty-five hours). Id. at ¶ 55. From about September 2019 to November 2020, she worked about 6.5 hours a day, five days a week (32.5 hours). Id. at ¶ 56. From **[**14]** about November 2020 through the filing of the complaint here, she worked about nine hours a day, five days a week (forty-five hours). Id. at ¶ 57. She has never received any pay statements. Id. at ¶ 59.

Plaintiff Williana Rocha ("Rocha") has worked as an *au pair* in New Jersey since January 2020. Id. at ¶ 9. Rocha participated in three to four days of training in New York conducted by Cultural Care. Id. at ¶ 62. She was initially paid $195.75 for every week worked. Id. at ¶ 64. After about nine months, the weekly amount was rounded to $200 and from January 1, 2020, through filing the complaint she received $250 per week. Id. at ¶ 64. From January 2020 through March 2020 (i.e. the onset of the pandemic), she usually worked about seven hours per day, five days a week (thirty-five hours). Id. at ¶ 65. From the start of the pandemic through filing the complaint here she worked 8.5 hours per day, five days a week (forty-two hours). Id. at ¶ 66. Cultural Care has not kept time records regarding Rocha's work, and she has not received any pay statements from Cultural Care. Id. at ¶ 69.

Plaintiff Sara Barrientos ("Barrientos") has been an *au pair* in Illinois since August 2018. Id. at ¶ 10. Barrientos **[**15]** attended a "several day" training conducted in New York by Cultural Care. Id. at ¶ 71. From August 2018 through April 2020, setting aside a two-week period at the beginning of the month, she was paid $200 per week for every week worked. Id. at ¶¶ 72, 74. She usually worked about ten hours per day, five days a week (fifty hours). Id. at ¶ 75. She "occasionally" worked a few hours on the weekend for which she "might" have been paid an extra $10 per hour. Id. at ¶ 77. From April 2020 to through June 2020, she was paid $200 for every week worked and usually worked six hours per day, five days a week (thirty hours). Id. at ¶ 80. Cultural Care has not kept time records regarding Barrientos's work, and she has not received any pay statements from Cultural Care. Id. at ¶¶ 82-83.

Morales Posada, Rocha, Guimaraes and Barrienots had their J-1 visa—which allows each to work as an *au pair*—sponsored by Cultural Care. Id. at ¶¶ 7-10.

II. Standard of Review

A. *12(b)(1) Standard*

Rule 12(b)(1) is the "proper vehicle for challenging a court's subject-matter jurisdiction . . . ." *Valentin v. Hospital Bella Vista, 254 F.3d 358, 362 (1st Cir. 2001)*. Federal courts are courts of limited jurisdiction, **[*318]** so federal jurisdiction is never presumed. *Viqueira v. First Bank, 140 F.3d 12, 16 (1st Cir. 1998)*. The party asserting jurisdiction has the burden of **[**16]** demonstrating the existence of federal jurisdiction. Id. A court should treat all well-pleaded facts as true and provide the plaintiff the benefit of all reasonable inferences. *Fothergill v. United States, 566 F.3d 248, 251 (1st Cir. 2009)*. Dismissal is appropriate only when the facts alleged in the complaint, taken as true, do not support a finding of federal subject matter jurisdiction. Id. A challenge to the court's subject matter jurisdiction must be addressed before addressing the merits of a case. See *Acosta-Ramirez v. Banco Popular de P.R., 712 F.3d 14, 18 (1st Cir. 2013)* ("Federal courts are obliged to resolve questions pertaining to subject-matter jurisdiction before addressing the merits of a case").

B. *12(b)(6) Standard*

In evaluating a motion to dismiss, this court assumes "the truth of all well-pleaded facts" and draws "all reasonable inferences in the plaintiff's favor." *Nisselson v. Lernout, 469 F.3d 143, 150 (1st Cir. 2006)*. To survive dismissal, a complaint must contain sufficient factual material to "state a claim to relief that is plausible on its face." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. "While a complaint attacked by a *Rule 12(b)(6)* motion to dismiss does not need detailed factual allegations . . . [f]actual allegations must be enough to raise a right to relief above the speculative level . . . ." *Twombly, 550 U.S. at 555* (citations omitted). "A claim has facial plausibility when the pleaded factual content allows the court to **[**17]** draw the reasonable inference that the defendant is liable for the misconduct alleged." *Ashcroft v. Iqbal, 556 U.S. 662, 663, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*. In ruling on a motion to dismiss, "a judge can mull over 'documents incorporated by reference in [the complaint], matters of public record, and other matters susceptible to judicial notice.'" *Lydon v. Local 103, Int'l Brotherhood of Elec. Workers, 770 F.3d 48, 53 (1st Cir. 2014)* (quoting *Giragosian v. Ryan, 547 F.3d 59, 65 (1st Cir. 2008)*) (alteration in original).

III. Discussion

A. *Derivative Sovereign Immunity*

Cultural Care argues, under *Rule 12(b)(1)*, that the court lacks subject matter jurisdiction over all fourteen counts alleged in Plaintiffs' complaint because Cultural Care is entitled to derivative sovereign immunity. Def's Mem. 18-22 [#67]. *Yearsley v. W. A. Ross Constr. Co., 309 U.S. 18, 60 S. Ct. 413, 84 L. Ed. 554 (1940)*, is the wellhead for derivative sovereign immunity doctrine. The plaintiff in the case was a landowner whose property had been damaged by flooding that occurred as a result of a private construction contractor's work, and the Court held that the contractor was protected from suit by sovereign immunity because it had been hired by the federal government. Id. at 20-21. Yearsley and its progeny dictate that to receive this kind of protection a private party must be performing exactly as expressly directed by the government. See *Campbell-Ewald Co. v. Gomez, 577 U.S. 153, 166-68, 136 S. Ct. 663, 193 L. Ed. 2d 571 (2016)*; *Cunningham v. Gen. Dynamics Info. Tech., Inc., 888 F.3d 640, 646-48 (4th Cir. 2018)*.

Unlike the parties that successfully invoked derivative sovereign immunity **[**18]** in *Yearsley* and *Cunningham*, Cultural Care was not hired by the government to perform certain tasks; it voluntarily decided to apply to be a sponsor organization and operate an *au pair* program, and a condition of doing that was complying with **[*319]** the applicable regulations. Cultural Care is thus more akin to a company operating in a heavily regulated industry, like a bank, than a contractor hired by the government to perform a specific task. Cf. *City of Worcester v. HCA Management Co., Inc., 753 F.Supp. 31, 37-38 (D. Mass. 1990)* ("The Supreme Court has long held that, pursuant to sovereign immunity, a private company which contracts with the federal government to perform the duties of the government will not be held liable for its actions on behalf of the government." (emphasis added)).

Cultural Care repeatedly emphasizes that it exists only because of, and subject to, the comprehensive commands of the federal government. The regulations, however, make clear that sponsors may be entities that have been operating for some time in other lines of business: there are regulations specifically addressing the financial information required from established entities applying to become sponsors. *22 C.F.R. § 62.5(c)(3)(i)*. True, the concept of an exchange visitor program "sponsor" is a creation of federal **[**19]** regulations, but this is not uncommon. For example, the concept of an "authorized dispenser" is created by federal regulations governing prescription drug distribution. See *21 C.F.R. § 209.2*. And the fact that sponsors must run *au pair* programs in accordance with exhaustive and detailed regulations is much like the situation of a federally chartered bank. See *12 C.F.R. § 5.20*. Cultural Care's arguments amount to saying that it operates in a heavily regulated area and therefore should have derivative sovereign immunity, a principle that is far broader than the court can accept. Accordingly, Cultural Care is not entitled to derivative sovereign immunity.[4]

B. *Preemption*

Cultural Care argues, under *Rule 12(b)(6)*, Plaintiffs' state law class action claims—Counts 1-11 and 14—are preempted by federal law and regulations via field preemption and conflict preemption. Def's Mem. 22-28 [#67]. In an earlier action, Cultural Care asked the court to determine that Massachusetts wage and hour laws were preempted and could not be enforced against Cultural Care or its host families. *Capron v. Off. of Att'y Gen. of Massachusetts, 944 F. 3d 9, 13 (1st Cir. 2019)*. In that case, Cultural Care did not develop its argument as to sponsors, however, and focused instead on host families. *Id. at 20 n.5*. The First Circuit held that state **[**20]** wage regulations are not preempted as applied to host families, *id. at 43-44*, but left open the separate question of whether state wage laws were preempted as applied to sponsor organizations as not properly before it and premature. *Id. at 20 n.5*. Cultural Care's preemption arguments here now seek to have this question addressed.

1. Field Preemption

In cases of field preemption, "the States are precluded from regulating conduct in a field that Congress, acting within its proper authority, has determined **[*320]** must be regulated by its exclusive governance." *Arizona v. United States, 567 U.S. 387, 399, 132 S. Ct. 2492, 183 L. Ed. 2d 351 (2012)*. "[W]hether the regulation of an entire field has been reserved by the Federal Government is, essentially, a question of ascertaining the intent underlying the federal scheme." *Hillsborough Cnty. v. Automated Med. Lab'ys., Inc., 471 U.S. 707, 714, 105 S. Ct. 2371, 85 L. Ed. 2d 714 (1985)*. Even when no conflict exists between state and federal law, "[t]he intent to displace state law altogether can be inferred from a framework of regulation 'so pervasive . . . that Congress left no room for the States to supplement it' or where there is a 'federal interest . . . so dominant that the federal system will be assumed to preclude enforcement of state laws on the same subject.'" *Arizona, 567 U.S. at 399* (quoting *Rice v. Santa Fe Elevator Corp., 331 U.S. 218, 230, 67 S. Ct. 1146, 91 L. Ed. 1447 (1947)*). This is determined by considering the totality of the circumstances. *Bldg. & Constr. Trades Council of Metro. Dist. v. Associated Builders & Contractors of*

---

[4] Cultural Care's claim of derivative sovereign immunity as to the FLSA claims fails for the additional reason that the FLSA waives sovereign immunity by permitting suits against public agencies. *29 U.S.C. § 216(b)* (applying the FLSA's penalties to provision to any "employer"), *§ 203(d)* (defining "employer" to include public agencies). Cultural Care says that because *au pairs* are not employed by the State Department it cannot be sued under this provision. Def's Reply Mem. 1-2 [#86]. But Cultural Care's argument for derivative sovereign immunity is premised on the idea that it is standing in the shoes of the government by acting as a sponsor organization. Def's Mem. 18. [#67]. It cannot then argue that it is not standing in the shoes of the government where the government has waived sovereign immunity.

Mass./R.I., Inc., 507 U.S. 218, 224, 113 S. Ct. 1190, 122 L. Ed. 2d 565 (1993). Federal regulations—as **[**21]** opposed to statutes—can have preemptive effect when they are within the promulgating agency's delegated authority. See Fid. Fed. Sav. & Loan Ass'n v. de la Cuesta, 458 U.S. 141, 153-54, 102 S. Ct. 3014, 73 L. Ed. 2d 664 (1982)

Cultural Care points out that unlike host families, sponsors have extensive reporting, insurance, *au pair* selection, *au pair* monitoring, and host family selection obligations. See 22 C.F.R. § 62.31. But nothing in those regulations suggest an intent to displace state wage and hour laws.

The *au pair* program's circuitous history supports this conclusion. In 1986 the U.S. Information Agency ("USIA") piloted the program under the Fulbright-Hays Act, Pub. L. No. 87-256 § 102, 75 Stat. 527 (1961) (codified at 22 U.S.C. § 2452). Capron, 944 F.3d at 15. The pilot ended after two years due to the USIA's misgivings about the statutory legitimacy of the program, but Congress then passed "special legislation" to authorize the program on a temporary basis. Id. The GAO, at Congress's behest, then issued a report concluding that the program was not authorized by the Fulbright-Hays Act, id. at 15-16, but Congress authorized the program on a temporary basis in targeted legislation that did not provide much elaboration. Cultural Care, Inc. v. Off. of Att'y Gen. of Massachusetts, No. 16-CV-11777-IT, 2017 U.S. Dist. LEXIS 120649, 2017 WL 3272011, at *4 (D. Mass. Aug. 1, 2017). Eventually, in 1997 Congress removed the temporary nature of the authorization, but the Act that did so is cursory and simply removes the time limit on the authorization. 2017 U.S. Dist. LEXIS 120649, [WL] at *5 (citing Act of Oct. 1., **[**22]** 1997, *Pub. L. No. 105-48, 111 Stat. 1165 (1997)*).

This history certainly offers no indication of preemptive intent; it does not suggest anything more than a very limited intent that the program continue to operate. And while regulations can have preemptive effect, the agency must be acting within its statutory authority if promulgating preemptive regulations. See de la Cuesta, 458 U.S. at 154**.** The court finds nothing in the extremely limited statutory history here that would give the current administrator of the *au pair* program, the State Department, the authority to preempt state wage regulation.

Even setting that aside, the First Circuit's comprehensive analysis of the specific *au pair* program regulations reveals no intent by the State Department—or its precursor the USIA—to displace state wage regulation in any context, see Capron, 944 F.3d at 29-44, and Cultural Care **[*321]** has introduced no new evidence of agency preemptive intent that the First Circuit did not consider. Although the *au pair* program arguably touches on the peculiarly federal arena of foreign affairs, the First Circuit has observed that ensuring *au pairs* are adequately paid probably does not jeopardize any significant foreign affairs objectives. Id. at 26. Put another way, the federal government has a strong interest in seeing **[**23]** that the *au pair* program is run according to its specifications, but there is nothing to suggest that interest is adverse to requiring sponsors to be jointly liable with host families for ensuring *au pairs* are paid in accordance with state minimum wage laws.

Cultural Care briefly argues that preemption is particularly appropriate where state law is invoked "in an area there has been a history of significant federal presence." Def's Mem. 23 [#67] (quoting United States v. Locke, 529 U.S. 89, 108, 120 S. Ct. 1135, 146 L. Ed. 2d 69 (2000)). The *au pair* program has only been authorized on a permanent basis since 1997. See Cultural Care, 2017 U.S. Dist. LEXIS 120649, 2017 WL 3272011, at *5. That is hardly history of a significant presence, and employment is usually regarded a matter of "quintessentially local concern." Capron, 944 F.3d at 24.

2. Conflict Preemption

Conflict preemption may occur "where the challenged state law 'stands as an obstacle to the accomplishment and execution of the full purposes and objectives of Congress.'" Arizona, 567 U.S. at 399 (quoting Hines v. Davidowitz, 312 U.S. 52, 67, 61 S. Ct. 399, 85 L. Ed. 581 (1941)). In passing on a conflict preemption claim, the court may not engage in a "freewheeling judicial inquiry into whether a state statute is in tension with federal objectives," because "such an endeavor 'would undercut the principle that it is Congress rather than the courts that preempts state law.'" Chamber of Commerce of the United States v. Whiting, 563 U.S. 582, 607, 131 S. Ct. 1968, 179 L. Ed. 2d 1031 (2011) (quoting Gade v. Nat'l Solid Wastes Mgm't Ass'n, 505 U.S. 88, 111, 112 S. Ct. 2374, 120 L. Ed. 2d 73

(1992) (Kennedy, **[**24]** J., concurring in part and concurring in judgment). "[A] high threshold must be met if a state law is to be preempted for conflicting with the purposes of a federal Act." Id. (quoting Gade, 505 U.S. at 110).

"Conflict preemption is particularly difficult to show when 'the most that can be said about the state law is that the direction in which state law pushes behavior is in general tension with broad or abstract goals that may be attributed to . . . federal laws.'" Fitzgerald v. Harris, 549 F. 3d 46, 53 (1st Cir. 2008) (quoting L.H. Tribe American Constitutional Law § 6-26, at 487 (2d ed.1988)). Nevertheless, "[a] direct, facial contradiction between state and federal law is not necessary to catalyze an 'actual[ ]conflict' within the doctrinal parameters of the Supremacy Clause . . . ." KKW Enters., Inc. v. Gloria Jean's Gourmet Coffees Franchising Corp., 184 F.3d 42, 49 (1st Cir. 1999) (quoting Securities Industry Asso. v. Connolly, 883 F.2d 1114, 1118 (1st Cir. 1989)).

Cultural Care's conflict preemption argument is premised on there being significant federal interests. Def's Mem. 26-28 [#67]. As noted above, there is no history of a significant federal presence, and the First Circuit has rejected the idea that applying state wage laws to *au pairs* impedes the government's foreign affairs interests. Capron, 944 F.3d at 26. The rest of Cultural Care's argument focuses heavily on the idea that complying with fifty different state wage laws would be expensive and burdensome **[**25]** for sponsors. Def's Mem. 27 [#67]. Complying with state wage laws would no doubt impose new, and perhaps significant, costs on Cultural Care. **[*322]** "But . . . possible increased costs do not stand as an obstacle sufficient to meet the high threshold required for conflict preemption." Cultural Care, 2017 U.S. Dist. LEXIS 120649, 2017 WL 3272011, at *8. And there is no inconsistency with the federal regulations that require compliance with the FLSA given that the FLSA sets a floor for wages. 29 U.S.C. § 218(a); Capron, 944 F.3d at 34 (noting the "expressly floor-setting" nature of the FLSA).

The only actual conflict Cultural Care identifies is that state employment laws generally prohibit age and national origin discrimination while the *au pair* regulations require selection based on those characteristics. Def's Mem. 28 [#67]. But the First Circuit has already rejected that exact argument, id. at 25 n.9, and there is no reason to believe that the logic does not apply equally in the context of sponsor organizations. Cultural Care's preemption argument, as to both field and conflict preemption, fails.

C. *Whether Cultural Care "Employs" Au Pairs*

Cultural Care next argues, under Rule 12(b)(6), that Plaintiffs did not adequately allege that Cultural Care "employs" *au pairs* because merely following federal regulations—as **[**26]** Cultural Care argues is the full extent of its role and the full extent of Plaintiffs' allegations—does not make it an employer. Def's Mem. 28-29 [#67]. Though there is some support for the idea that merely following regulations does not make an organization an employer, the principle is not applicable here given the extent of Cultural Care's alleged activities.

A comparison to Cultural Care's two supporting citations bears this out. The more recent case, Ivanov v. Sunset Pools Mgmt. Inc., involved plaintiffs who came to the United States to work as lifeguards and subsequently sued both the lifeguard company they worked for and the recruiting agency they worked with to arrange their immigration paperwork and initial travel arrangements. 567 F. Supp. 2d 189, 190-91 (D.D.C. 2008). The court found the recruiting agency was not liable as an employer because it was essentially implementing regulations, but the agency exercised much less control than Cultural Care does over the employees. First, the agency exercised no discretion in determining where to place to the plaintiffs; it was the lifeguard company that "interviewed and hired" the plaintiffs. Id. at 196. Cultural Care, in comparison, allegedly retains full discretion of whether to **[**27]** end an *au pair*'s placement, SAC ¶ 24(j), whether to end an *au pair*'s participation in the program entirely, id. at ¶ 26, and whether to permit their participation in the first place. Id. at ¶ 25. And the full discretion Cultural Care allegedly exercises in these areas goes beyond the explicit requirements of the relevant regulations. See 22 C.F.R. § 62.4, 62.10(a). The plaintiffs in Ivanov also paid the recruiting agency, 567 F.Supp.2d at 196, but here Cultural Care allegedly receives payment from the host family in exchange for the placement—and arguably services—of an *au pair*.

The other citation is from California state court and is cited for the proposition that "where the method of performing a task is dictated by . . . regulations imposed by the government, the principal is not exercising the manner and means of control as an employer." Sw. Research Inst. v. Unemployment. Ins. Appeals Bd., 81 Cal. App. 4th 705, 709, 96 Cal. Rptr. 2d 769 (2000). But as noted above Cultural Care does exercise authority beyond those required by federal regulations. In addition to the distinctions noted above, sponsors must ensure that host families are U.S. citizens, are fluent in English, have passed background checks, and have enough financial **[*323]** resources to be hosts. 22 C.F.R. § 62.31(j). But Plaintiffs allege that Cultural Care retains the exclusive right to determine—for reasons **[**28]** not necessarily dictated by these regulatory stipulations—that a host family isn't suitable and to remove the family from the program. SAC ¶ 24(c) [#43]. Sponsors must have local regional counselors that report "unusual or serious situations or incidents involving either the *au pair* or the host family." 22 C.F.R. § 62.31(l)(3). Yet Cultural Care requires host family to notify Cultural Care if an *au pair* needs medical attention, a category that is not co-extensive with "serious situations or incidents." And finally, Cultural Care retains discretion on what to instruct host families to pay *au pairs*, though it is limited at the lower end by required compliance with the FLSA. 22 C.F.R. § 62.31(j)(1). Cultural Care's policies, as alleged by Plaintiffs, are clearly designed to enforce the government's regulations, but they are also broader than is strictly required by the regulations.

The court's finding is in line with the conclusions of other courts that have examined this issue. A California state court has rejected Cultural Care's challenge to its employer status under California wage law. Kudlacz v. Cultural Care, Inc., Case No. CGC-20-584567, Slip. Op. p. 3. (Cal. Sup. Ct. Sept. 3, 2020) Helland Decl. Ex. 1 at 12-13 [#78-2]. A **[**29]** magistrate judge from the District of Colorado also rejected a challenge to Cultural Care's status as an employer of *au pairs* at the motion to dismiss stage. Beltran v. Interexchange, Inc, No. 14-CV-03074-CMA-KMT, 2016 U.S. Dist. LEXIS 21065, 2016 WL 695967, at *10 (D. Colo. Feb. 22, 2016), report and recommendation adopted in part, rejected in part, 176 F. Supp. 3d 1066 (D. Colo. 2016). And the Beltran court considered Ivanov in detail and arrived at the same answer as this court, emphasizing Cultural Care's ability to end an *au pair*'s assignment and the defendant's lack of ability to fire the plaintiffs in Ivanov. Id. at 9-10. There is no good reason to break from this trend.

D. *Deceptive Practices Claim*

Cultural Care argues, under Rule 12(b)(6), that Count 14, the deceptive practices claims, should be dismissed because Plaintiffs failed to include the specific consumer protection laws that Cultural Care allegedly violated. Def's Mem. 29-30 [#67]. But it is not necessary to cite the specific provision allegedly violated. Skinner v. Switzer, 562 U.S. 521, 530, 131 S. Ct. 1289, 179 L. Ed. 2d 233 (2011); Johnson v. City of Shelby, 574 U.S. 10, 135 S. Ct. 346, 346, 190 L. Ed. 2d 309 (2014); Saintcome v. Tully, 296 F. Supp. 3d 377, 382 (D. Mass. 2017). Cultural Care's citation to the contrary is once again distinguishable, as the plaintiffs in that case, Galvin v. U.S. Bank, N.A., 852 F.3d 146, 160 (1st Cir. 2017), merely claimed a violation of a contractual provision prohibiting violating "applicable law"; this is of course noticeably less specific than the claims asserted here.

Cultural Care also **[**30]** complains that Plaintiffs asserted violations of Washington and Connecticut consumer protection law but none of the named plaintiffs worked in those states. Plaintiffs do not dispute that they did not work in those states, but argue that it is not necessary to have a named plaintiff in each jurisdiction whose laws were allegedly violated, relying on In re Asacol Antitrust Litig., 907 F.3d 42, 49-50 (1st Cir. 2018). Asacol does not establish such a broad principle. The case was an antitrust class action brought under the antitrust laws of twenty-five states and the District of Columbia. Id. at 46. The plaintiffs used state antitrust laws because they were suing a drug manufacturer but had purchased the relevant drug from intermediaries; federal antitrust laws bar such actions, but all twenty-six states had laws allowing such actions. Id. The plaintiffs **[*324]** noted that all "twenty-six jurisdictions . . . generally interpret[ed] state law restraints on anticompetitive activity consistently with federal courts' interpretation of federal ***antitrust law***." Id.

The First Circuit rejected the defendant's Article III standing challenge to the inclusion of unnamed plaintiffs who made purchases outside the states where the named plaintiffs made purchases. Id. at 47-51. This superficially **[**31]** supports Plaintiffs' argument, but the plaintiffs in Asocal argued—and the court agreed—that the state laws were "parallel" to each other. Id. at 49. The court rejected the standing challenge because it was convinced the named plaintiffs would adequately protect the interests of unnamed plaintiffs, and it was convinced because of the parallelism of the state laws. Id. at 49-50. Plaintiffs here made no such allegation of parallelism in their complaint, nor did they allege that any *au pairs* sponsored by Cultural Care were placed in Connecticut or Washington. Legal theories need not be fully fleshed out in complaints, see Skinner, 562 U.S. at 530, but the allegations here are insufficient to allow the named Plaintiffs to bring the claims on their own behalf under Connecticut or Washington consumer protection law or to establish standing for unnamed plaintiffs from Connecticut and Washington for claims under those state laws.

IV. Conclusion

For the forgoing reasons: Cultural Care's Motion to Dismiss [#66] is DENIED as to Counts 1 through 13, GRANTED regarding the Connecticut and Washington elements of Count 14, and DENIED as to the rest of Count 14.

IT IS SO ORDERED.

MOTIONS IN LIMINE -TENTATIVE RULINGS

TENTATIVE RULINGS - MOTIONS IN LIMINE

These tentative rulings and thoughts are issued in advance of argument on all parties' motions *in limine* set for 08/18/2021 at 8:30 AM in Department 22 (via Bluejeans.)

PLAINTIFF

1.Plaintiffs Motion in Limine No. 1 to Preclude Personal Attacks on Counsel While Characterizing J&J as "Good People" - GRANTED IN PART AND RULING RESERVED IN PART

Plaintiffs Motion in Limine No. 1 seeks to Preclude Personal Attacks on Counsel While Characterizing J&J as "Good People." The Court will not make rulings based on hypothetical evidence. To that extent, the motion is premature and ruling is RESERVED.

That said, the Court offers the following as guidance to the parties:

Arguments that "appeal primarily to passion or prejudice" of the jurors are improper. *Garcia* v. *ConMed Corp.* (2012) 204 CaLApp¶* 144.

The parties are reminded that *Cal. Evi. Code 780* limits the means by which the credibility of a witness may be attacked, including its limits on the use of character evidence. *See* *Sec. 780(e)*. *Cal Evi. Code Secs. 1100-1103* limits the use of character evidence more generally.

Expressions of sympathy, gratuitous references to family members, and intimations that counsel are unethical and solely involved in **[*2]** the litigation for financial gain are inadmissible. The Court agrees with the sentiments of the Court in *Schmitz* that "you are not going to be trying this case against plaintiffs lawyers." Plaintiffs brief p. 9 *citing Schmitz* Transcript 146:25-147:6. In sum, Counsel shall not impugn each other's motives.

In its opposing brief, Defendants' counsel argue that "the appropriate course for Plaintiff is to object to questions, argument and evidence as these issues arise, so that the Court has a proper context in which to analyze and rule upon the objection." Defendants' brief at p. 3. As a general rule, that is true, however, sometimes it is difficult to "unring" a bell. Thus, these guidelines are offered in the spirit of avoiding needing to confront these issues after the fact.

No definitive ruling on any evidence is made here, but the parties are cautioned to heed these guidelines and to request guidance from the Court where concern about specific questions and argument exist. The Court is confident that counsel will sense when they are about to cross the line.

2.Plaintiffs Evidence Motion in Limine No. 2 to Exclude Personal-Use Testimony by Defendants' Witnesses - GRANTED

Plaintiff seeks **[*3]** to exclude "personal use" testimony from at least 7 J&J witnesses, most notably Dr. Hopkins, J&J's corporate representative witness "on the general topic of talc powder," and Dr. Nicholson, who joined J&J in 2006 and "now focuses on women's health." All have testified at deposition to their own or their family's use of J&J talcum powder, presumably to demonstrate that it is safe.

Plaintiff contends that these witnesses may lack foundation to testify to the safety of J&J talcum powder. Plaintiff further contends that even if a proper foundation exists, personal use testimony is irrelevant and its probative value is substantially outweighed by its prejudicial value, diverting jurors from complex expert testimony needed to resolve the factual issues here and necessitating undue expenditure of time to explore the witness' knowledge regarding asbestos, family and health histories and potential areas of bias attendant to the witness' testimony.

Defendants contend that the testimony is relevant to rebut plaintiffs allegation of "secret knowledge" on the part of J&J executives regarding the "deadly" consequences of talcum powder usage. Defendants further contend that the evidence is directly **[*4]** relevant to rebut claims for punitive damages and its requisite mental states, and, at a minimum, to rehabilitate the credibility of defense witnesses. Finally, defendants claim that Plaintiff exaggerates the prejudicial impact of testimony relating to personal use.

Cal. Evi. Code Secs. 210 and *350* sets a low bar to determine whether evidence is relevant ("any tendency in reason.") That said, the court finds that the proffered personal-use testimony would be of minimal, if any, probative value. Moreover, each account of personal use to demonstrate the product's safety raises multiple questions, including the foundation of the user to make such claims, the medical history of the user, and a user's training, if any, to warrant such an opinion - too many questions to be answered and inferences to be drawn to merit the admissibility of testimony that at best has marginal relevance. In sum, the Court finds that the probative value of "personal use" evidence is substantially outweighed by its prejudicial value.

The Court emphasizes that it is particularly concerned about the degree to which such anecdotal testimony would distract from and confuse the jury with regard to the difficult scientific evidence it will inevitably **[*5]** encounter. The stakes in this action for all parties are simply too great to divert the jury's focus with testimony that amounts to random accounts of personal use by corporate personnel and their families - a risk that the Court finds cannot be obviated by a limiting instruction.

3.Plaintiffs Motion in Limine No. 3 to Exclude Argument that Jurors Should use their Subjective Experience in Place of Scientific Evidence as it Relates to Disease Rates and Causation - GRANTED IN PART AND RULING RESERVED IN PART

Plaintiffs Motion in Limine No. 3 seeks to Exclude Argument that Jurors Should Use Their Subjective Experience in Place of Scientific Evidence As It Relates to Disease Rates and Causation. At bottom, Plaintiffs *In Limine Motion* No. 3 expresses concern that such arguments will make an end run around the rules of evidence, permitting improper opinion evidence (e.g. a claim by defendants that there should be an "epidemic" of mesothelioma,) consideration of evidence by the jury that is extraneous to the record, and the improper use of "common sense" to the exclusion of the complex expert testimony that will be presented in this case.

Defendants contend that Plaintiffs motion is "nothing **[*6]** more than a strategic attempt to preclude Defendants from pointing to evidence which disproves the most critical element of their case - causation."

The Court will not make rulings based on hypothetical evidence. To that extent, the motion is premature and ruling is reserved. The Court in *O'Hagan* v*Johnson & Johnson* (RG19019699), however, articulated the principle that also controls here: Any discussion of the incidence of mesothelioma or ovarian cancer and talc use will be based on evidence offered at trial and not on jury awareness from other sources.

The Court will not bar defendants from proving their case based on admissible evidence, including admissible expert evidence to prove its theses that plaintiffs tumors are not ovarian cancer or mesothelioma. In ruling on this motion, the Court makes no findings as to whether any proffered evidence is admissible, particularly expert testimony. Such determinations will depend on the Court's rulings on other motions in limine and on rulings made at trial.

The Court will not permit end runs around the rules of evidence to permit improper opinions as feared by plaintiffs, including the "epidemic" example cited in its brief, or the improper use **[*7]** of notions of "commonsense." The Court's ruling in *Prudencio v. Johnson & Johnson* (RG20061303) is applicable here: "Any argument that there should be widespread mesothelioma because talc use is so common is precluded unless Defendants offer evidence or make a supported offer of proof to that effect."

4.Plaintiffs Motion in Limine No. 4 to Exclude Argument and Evidence that Cosmetic Talc is "FDA Approved." GRANTED IN PART AND RULING RESERVED IN PART

Plaintiffs Motion in Limine No 4 is titled "Plaintiffs Motion in Limine No. 4 to Exclude Argument and Evidence that Cosmetic Talc is "FDA Approved," yet Plaintiff s brief in support, spends most of its time discussing whether talcum powder is "regulated" by the FDA. In fact, Plaintiff seeks the exclusion of any argument or evidence that talcum powder is "approved" or "regulated" by the FDA. There is a difference and the Court addresses both.

Approval

There appears to be no disagreement whether the FDA requires pre-approval of talcum power. It does not. *See* Plaintiffs brief at pp. 5-6 and Defendants' agreement with that proposition at pp. 1-2 of its opposition. As such, no party is to reference FDA approval of talcum powder during voir dire, **[*8]** in opening statements, argument or the presentation of testimonial or documentary proof, absent leave of the Court.

Regulation

Whether the FDA "regulates" talcum power is a more complicated question. There seems to be general agreement among the parties that the FDA has not regulated talcum powder in the past. Plaintiffs brief cites numerous discovery responses and past trial testimony where Defendants appear to concede that the FDA does not regulate talcum powder. *See e.g.* sworn Answers to Interrogatories in *Gambino* "Johnson's Baby powder is not an FDA regulated product." Plaintiffs brief, Exhibit 4 at p. 7. *See also*: Testimony Dr. John Hopkins: "[T]he FDA has never regulated the cosmetic talc industry." (Deposition testimony 8/15/17 at 10:20-11:15.)

Defendants maintain, however, that the FDA has the "authority" to regulate talcum powder, even if it has never done so in the past. The FDA web site states: "The FDA monitors for potential safety problems with cosmetic products on the market and takes action when needed to protect public health." The web site also states: "The two most important laws pertaining to cosmetics marketed in the United States are the Federal Food, Drug, and Cosmetic **[*9]** Act (FD&C Act) and the Fair Packaging and Labeling Act (FPLA). FDA regulates cosmetics under the authority of these laws." *See:* https://www.fda.gov/cosmetics/cosmetic-ingredients/talc and https://www.fda.gov/cosmetics/cosmetics-laws-regulations/fda-authority-over-cosmetics- how-cosmetics-arenot-fda-approved-are-fda-regulated.

Plaintiff contests Defendants' broad assertions regarding the FDA's regulatory authority over talcum power, citing to FDA authority stating "cosmetic products and ingredients, with the exception of color additives, do not have to undergo FDA review or approval before they go on the market." Plaintiff s brief at pp. 5-6.

Based on the current state of the record, it appears that the FDA does have some regulatory authority over talcum power. That said, the current state of the record does not give Defendants *carte blanche* to reference such regulatory authority or to admit evidence relating to it. Questions remain:

To what extent does the statutory authority of the FDA permit regulation of talcum powder beyond the question of "color additives?"

What is the specific evidence relating to FDA regulation of talcum powder being proffered and what is its relevance?

Is it being **[*10]** offered as reliance testimony relating to an expert's opinion? If so, are there *Sargon* or *Sanchez* reasons to bar its admissibility?

Is it being offered for another reason?

The Court will not make rulings based on hypothetical evidence. To that extent, the motion is premature and ruling is reserved pending a review of any specific proffer relating to such regulation.

The Court cautions both parties as follows:

There shall be no reference to FDA *approval* or *regulation* during voir dire, in opening statements, argument or the presentation of testimonial or documentary proof, absent leave of the Court.

A large portion of Plaintiffs brief appears to relate to alleged misconduct on the part of the talcum powder industry with regard to "hiding" information from the FDA and/or making misrepresentations. Such evidence shall not be referred to in *voir dire*, opening statement, or through testimonial or documentary proof absent leave of the Court.

5.Plaintiffs Motion in Limine No. 5 to Exclude Argument and Evidence Regarding Plaintiffs Abortion History and Sexual History - RULING RESERVED

Plaintiffs Motion in Limine No. 5 seeks to exclude evidence of Plaintiffs abortion and sexual histories, evidenced **[*11]** primarily by her medical records while being treated by Dr. Franz Theard. The medical records contain entries regarding plaintiffs examination for sexually transmitted diseases, information regarding abortion and other personal information regarding family planning. *See* Plaintiffs Exhibit 1. Ruling on the motion is RESERVED.

Plaintiffs and Defendants each paint with too broad a brush. Plaintiff: "Any such evidence would be irrelevant at this trial." Plaintiffs brief at p. 4. Defendants: "Plaintiff has put her reproductive and gynecologic health at issue in this case, including the cause of her fallopian tube tumor." Missing from the discussion is an analysis of whether a specific prior abortion or sexually transmitted disease has a tendency in reason (*Cal. Evi. Code Secs. 210*,*350*) to prove or disprove the allegations herein regarding ovarian cancer and mesothelioma, and, that the probative value is not substantially outweighed by its prejudicial impact. (*Cal. Evi. Code 352*.)

That inquiry will require a demonstration by defendants that Plaintiffs sexual and/or abortion histories are medically relevant to the case. Absent such a showing, the evidence will be excluded. The Court will be cognizant of the potential for prejudice of **[*12]** such highly charged topics and the privacy rights of the Plaintiff and factor that into solving the relevance equation. Pending that inquiry, perhaps in a 402 hearing, the Court orders the following:

The parties are to meet and confer to determine whether stipulated redactions might resolve the problem raised by Plaintiffs motion in limine.

No party shall reference Plaintiffs sexual or abortion history during voir dire, opening statements, argument or the presentation of testimonial or documentary proof, absent leave of the Court.

6.Plaintiffs Motion in Limine No. 6 to Exclude Argument and Evidence that the Plastic Products Plaintiff and her Coworkers Made and Packaged were Sex Toys; and Request to File Additional MIL - RULING RESERVED

It appears that Plaintiff claims exposure to talcum powder from two sources: (1) Personal use and bystander exposure; and, (2) workplace exposure, specifically while working at a plant that manufactured "sex toys" where talcum powder was used in the packaging process. Plaintiffs Motion in Limine No. 6 seeks to exclude graphic evidence of those products and their written descriptions (e.g. "ayana cyberskin pussy and ass") on grounds of relevance (*Cal. Evi. Code Secs. 210*,*350*) and that **[*13]** their prejudicial value substantially outweighs their prejudicial value (*Cal Evi. Code Sec. 352*.) Ruling is RESERVED on the motion.

The Court cannot make a final ruling at this time. The Court is inclined to make severe redactions to the documents because of the inflammatory nature of the descriptors. That said, the Court can envision a need for some indication of the nature of the items to fully inform the jury of the amount of talc exposure that might have occurred during the course of Plaintiffs employment.

The parties are to meet and confer to determine whether stipulated redactions might resolve the problem raised by Plaintiffs motion in limine.

The Court orders that no party shall reference or publish the images or language at issue here during voir dire, in opening statements, argument or the presentation of testimonial or documentary proof, absent leave of the Court.

7.Plaintiffs Motion in Limine No. 7 to Preclude Defense Expert Opinion, Argument, or Reference to Speculative Alternative Exposures to Asbestos - Ruling Reserved

Ruling reserved. Briefing incomplete.

JOINT DEFENSE

1.Joint Defense Motion in Limine No. 1 - To Exclude all Evidence of and References to Other Claims, Lawsuits and Verdicts - RULING [*14] RESERVED

Joint Defense Motion in Limine No. 1 seeks to exclude all evidence of and references to other claims, lawsuits and verdicts against any of the defendants. Defendants posit the blanket statement that "[L]awsuits filed against Defendants or any…related company…on wholly unrelated products are wholly irrelevant," and that "[c]laims in other cases are not proof that Defendants' cosmetic talc products were defective, contaminated (or) caused disease"…"in this case."

The Court's response to these assertions is simply this: It depends. Surely, evidence that is not relevant or violates *Cal. Evi. Code Sec. 352* should be excluded as should evidence that seeks to inflict punishment against those who are strangers to the action. Defendants' brief at pp. 3-4 and 7, *citing* *Phillip Morris USA v. Williams (2007) 549 U.S. 346,353-354*.

On the other hand, relevant evidence, the prejudicial value of which does not outweigh its probative value, perhaps in conjunction with the mandate of *Evi. Code Sec. 1101(b)* (admissibility of evidence for a limited purpose,) may very well make the evidence Defendants seek to preclude admissible.

The Court will not make rulings based on hypothetical evidence. To that extent, the motion is premature and ruling is RESERVED.

The Court, however, provides the following guidance **[*15]** proffers of proof from other cases or other past incidents:

The proffer should be made outside the presence of the jury with as much advance notice as possible.

The admissibility of "other act" evidence is ultimately a multi-pronged analysis in which the proffering party must demonstrate the relevance of the limited purpose and its reliability (i.e. that it does not violate hearsay rules.)

The Court is particularly concerned with reference to "other act" evidence during voir dire and opening statements. The parties are cautioned that they are not to reference such evidence without leave of the Court. The Court may order individual voir of jurors to the extent that the topic of other cases or other potentially prejudicial issues may taint the jury panel as a whole.

To the extent such proof is admissible, the Court will entertain suggestions from the parties as to how particular testimony might be tailored to minimize its prejudicial impact. For example, witnesses who have testified in prior cases may be cross-examined regarding that testimony and it may be necessary to put that testimony into context without bringing out the facts of that case, the parties or the results.

The Court notes **[*16]** that references to products of any particular defendant not at issue in this case likely will be deemed inadmissible absent plaintiff opening the door to its admissibility.

2.Joint Defense Motion in Limine No. 2 - To Exclude all Evidence and Expert Testimony Regarding Dr. Moline's Article Entitled "Mesothelioma Associated with the Use of Cosmetic Talc" and Dr. Kradin's Article Entitled "Malignant Mesothelioma Following Repeated Exposures to Cosmetic Talc: A Case Series of 75 Patients" - DENIED

Defendants' Joint Motion in Limine No. 2 seeks to exclude all evidence of and expert testimony regarding an article co-authored by Dr. Moline, "Mesothelioma Associated with the Use of Cosmetic Talc," and an article authored by Dr. Karkin entitled "Malignant Mesothelioma Following Repeated Exposures to Cosmetic Talc: A Case

Series of 75 Patients." It appears that Plaintiff will seek to admit the articles through their experts as evidence on which they reasonably relied in forming their opinions.

Defendants' motion asserts that the Court should exercise its discretion to exclude any reference to or testimony about the articles pursuant to the Supreme Court's seminal ruling in *Sargon Enter. Inc. v. University of Southern California* 2012) 55 Cal.¶ 747 (In its "gatekeeper" **[*17]** capacity, trial courts must exclude opinions premised upon assumption, conjecture, guesses, or surmise. *Id.* at 771-72.) In support of its contentions, Defendants argue that the articles cannot be reasonably relied upon by experts because they (1) involve a "case series of individuals," all of whom are plaintiffs in lawsuits alleging talcum powder induced cancers, (2) are not the product of "impartial research" or sufficient investigation, (3) are merely "compilations and regurgitations of plaintiffs' experts' opinions regarding other plaintiffs in other litigation," (4) consist of opinions never before articulated until the authors were involved in litigation, (5) make unsubstantiated claims that talc was the sole cause of the plaintiffs' cancers, (6) were not peer reviewed, (7) rely on depositions taken by counsel and were based on limited materials provided by plaintiffs' counsel, and, (8) fail to consider alternative exposures to commercial asbestos.

Plaintiff paints an entirely different portrait of the articles contending that (1) they were peer reviewed, (2) the exposure data is reliable because it was taken under oath at depositions, and, (3) reliance on "case series reports" **[*18]** do not do not make the articles unreliable, *citing* *Davis v. Honeywell (2016) 245 Cal.App.4th 477,491*.

It is well-settled law that experts can cite to and comment on the sources they rely on during direct examination and "may relate information acquired through their training and experience, even though that information may have been derived from conversations with others, lectures, study of learned treaties, etc." *See: People* v *Veamatahau* (2020) 9 Ca.App.5th 16, 25, *citing Sargon, supra*. That said, such reliance is not without its limits and the Court's "gatekeeper" responsibilities require it to keep from the jury opinions which it deems unreliable and lacking in the intellectual rigor of an expert in the particular field.

The Court's gatekeeper role, however, is circumscribed:

The trial court's preliminary determination whether the expert opinion is founded on sound logic is not a decision on its persuasiveness. The court must not weigh an opinion's probative value or substitute its own opinion for the expert's opinion. Rather, the court must simply determine whether the matter relied on can provide a reasonable basis for the opinion or whether that opinion is based on a leap of logic or conjecture. The court does not resolve scientific controversies. Rather, it conducts a "circumscribed inquiry" **[*19]** to "determine whether, as a matter of logic, the studies and other information cited by experts adequately support the conclusion that the expert's general theory or technique is valid." (Imwinkelried & Faigman, *supra*, 42 Loyola L.A. L.Rev. at p. 449.) The goal of trial court

gatekeeping is simply to exclude "clearly invalid and unreliable" expert opinion. (Black et al., *Science and the Law in the Wake* o/Daubert: *A New Search for Scientific Knowledge* (1994) *72 Tex. L.Rev. 715, 788*.) In short, the gatekeeper's role "is to make certain that an expert, whether basing testimony upon professional studies or personal experience, employs in the courtroom the same level of intellectual rigor that characterizes the practice of an expert in the relevant field." *(Kumho Tire Co. v. Carmichael, supra, 526 U.S. atp. 152,119 S.Ct. 1167*.)

Based on the current state of the record, the Court finds that the Moline and Kardin studies may be reasonably relied upon by experts and presented to the jury as such. To be sure, Defendants' make serious points about the studies' lack of reliability, points that can be brought out on cross examination and which the jury can give the weight it deems appropriate. Neither study, however, is so "clearly invalid and unreliable" that it should be excluded.

The Court notes, however, that in **[*20]** its use of the articles, the experts relying on them must give a top level summary of their findings, such as "a study of X individuals with (mesothelioma or ovarian cancer) that the authors believe used talc and are not aware of other potential causes." By DENYING on Defendants' Joint Motion in Limine No. 2 the Court makes no findings regarding other objections, which may preclude the articles' admissibility, objections which may be the subject of other motions in limine or which Defendants may make at trial.

3.Joint Defense Motion in Limine No. 3 - Expert: to Exclude all Evidence, Testimony of Argument that Fibrous Talc or "Asbestiform Talc" Causes Mesothelioma

Briefing is incomplete.

4.Joint Defense Motion in Limine No. 4 - To Exclude all Evidence, Argument or Reference to the Interagency Working Group on Asbestos in Consumer Products - RULING RESERVED

Joint Defense Motion in Limine No. 4 seeks to Exclude All Evidence, Argument or Reference to the Interagency Working Group on Asbestos in Consumer Products. In 2018, the Food and Drug Administration (FDA) formed the Interagency Working Group on Asbestos in Consumer Products (IWGACP), consisting of 38 experts versed in the subject matter, **[*21]** to discuss and provide recommendations regarding terminology and definitions related to asbestos, to develop "a robust analytical protocol for detecting asbestos," and to promote data reporting and analysis. The work of the IWGACP is preliminary and a work-in-progress, as reflected in a 08/19/2020 FDA statement that the IWGACP continues to "evaluate the scientific literature and public feedback to the docket" and should any recommendations be made, the IWGACP will follow "the public notice and comment process."

Defendants anticipate that Plaintiffs experts - Drs. Compton and Longo - will seek to reference the discussions of the IWGACP as a basis for their expert opinions, since both have made presentations to the IWGACP. Defendants do not point to any specific portion of the IWGACP proceedings that it seeks to exclude, whether it is statements made at meetings, minutes of meetings or an Executive Summary of Proceedings issued on 01/06/2020. Rather, Defendants blanketly seek to exclude any such reference. The Court will not make rulings based on hypothetical evidence. To that extent, the motion is premature and ruling is RESERVED.

The Court Offers the following regarding the manner in **[*22]** which rulings relating to any specific portion of the work of the IWGACP will be made:

Plaintiff should notify the Court as soon as possible regarding portions of the IWGACP materials that it seeks to introduce to avoid unnecessary interruptions to the jury. The Court recognizes that Plaintiff will not be fully able to anticipate how it may use the IWGACP materials because it appears that Defendants' experts, Drs. Brandli and Sanchez, also have been involved in IWGACP proceedings, and, the proceedings may be relevant on cross examination to attack their credibility pursuant to *Cal. Evi. Code Sec. 780*.

The Court is unlikely to find any of the material admissible for its truth. No hearsay exception appears to be applicable, including *Cal. Evi. Code Sec. 1280*, the public records exception, since the work of the IWGACP is preliminary and, at this stage, is unlikely to meet *Sec. 1280*'s trustworthiness requirement.

More likely, is consideration of the evidence as a proper basis for an expert's opinion or for impeachment.

The Court will be cognizant of its "gatekeeper" functions pursuant to *Sargon,* particularly in light of the preliminary nature of the IWGACP's work and the possibility that a jury might give IWGACP's utterances undue weight because **[*23]** of the government imprimatur that attaches to it.

Should any portion of the IWGACP's work be admitted as reliance testimony, the parties should be mindful of the admonitions of *People v. Coleman (1985) 38 Cal.3d 69,92*, quoting *Grimshaw v. Ford Motor Company (1981) 119 Cal.App.3d, 757, 788-789* regarding the impropriety of presenting hearsay testimony to the jury through an expert. *See also People* v. *Sanchez* (2016) 52 Cal.4* 953.

The parties should take care not to misrepresent any IWGACP material given that is at best preliminary recommendations of a working group of scientists.

5.Joint Defense Motion in Limine No. 5 - Expert: to Exclude Certain Opinions and Testimony from Plaintiffs Experts, or Alternatively, for an Evidence Code Section 402 Hearing (Placeholder) Supplement/Update to Joint Defense Motion in Limine No. 5 - Expert: to Exclude Certain Opinions and Testimony From Plaintiffs Experts, or Alternatively, for an Evidence Code Section 402 Hearing (Placeholder)

Placeholder motions regarding various experts not yet fully briefed.

AND I

1.J&J Defendants' Motion in Limine No. 1 - Exclude All Evidence Regarding Chinese Talc - GRANTED

J&J's Motion in Limine No. 1 seeks to Exclude All Evidence Regarding Chinese Talc. The ruling on this motion is considered in conjunction with the Court's ruling on J&J Motion in Limine No.2 regarding **[*24]** J&J's decision to discontinue the sale of talccontaining powder in the U.S. and Canada. Both rulings involve the applicability of the California Supreme Court's decision in *International Harvest v. Ault (1974) 13 Cal.3d 113*. In addition, both rulings discuss the relevance of Chinese talc and the confusion and consumption of time that may occur by its introduction into evidence. A summary of the rulings on both motions is provided at the conclusion of the Court's ruling on J&J's Motion in Limine No. 2.

Defendants contend it is uncontested that Chinese talc was not used in the U.S. until 2003, years after Plaintiffs alleged last exposure, and, as such, has "zero relevance" on the issues of notice and punitive damages. With regard to the issue of notice, Defendants note that since its use began *after* post plaintiffs final alleged exposure, it is, by definition, irrelevant. Defendants similarly contend that the timing of Chinese talc's first use also makes it irrelevant on the issue of punitive damages because it does not relate to plaintiffs case, but rather to general allegations of malice of others in violation of the United States Supreme Court's holding in *State Farm Mut. Auto Ins. Co. v. Campbell (2003), 538 U.S. 408*. Defendants also contend that even if there is some marginal relevance to **[*25]** evidence relating to Chinese talc in J&J products, its probative value is substantially outweighed by its prejudicial value.

Plaintiff contends that Chinese talc sales after its introduction in 2003 is relevant on an *Ault* theory to demonstrate a design defect and feasibility of correcting the defect. Plaintiff also argues that it is admissible on the issue of punitive damage because J&J knew "that its dangerous product should be completely discontinued, but the defendant instead [sold] it… in other countries." Plaintiffs brief at p. 5.

The Court finds that J&J's use of Chinese talc after 2003 is inadmissible. Plaintiff seeks to have it both ways, positing two theories regarding the admissibility of the Chinese talc: Either it demonstrates a design defect and feasibility *if Defendants'* expert's testimony is credited by the jury (Dr. Sanchez' expected testimony that it *did not* contain asbestos;) or, it is relevant to punitive damages if *Plaintiffs* expert's testimony is credited by the jury (Dr. Longo's expected testimony that it *did* contain asbestos and therefore shows reprehensible conduct by J&J's continuing to sell a product containing asbestos.)

The Court can envision the need to give conflicting **[*26]** limiting instructions to the jury to ensure that the evidence is used for a proper limited purpose. The risk of confusion is significant, and not worth incurring, particularly given that other significant evidence is likely available to Plaintiff on both issues: J&J's discontinuation of the sale of talc containing asbestos and its subsequent reliance on the sale of a corn starch alternative to demonstrate design defect and feasibility; and, on the issue of punitive damages, J&J's continuing to sell existing inventory of talc containing asbestos in the U.S. and Canada despite its having "discontinued" such sales. *[See* discussion J&J's Motion in Limine No. 2.) The Court also notes the 7 year gap between Plaintiffs last alleged exposure and the introduction of Chinese talc into J&J's product line, further bolsters the Court's finding that any marginal relevance of J&J's use of Chinese talc is substantially outweighed by its prejudicial value, including the manner in which it might mislead and confuse the jury.

2.J&J Defendants' Motion in Limine No. 2 to Exclude all Evidence of and References to J&J's Decision to Discontinue Talc-Based Johnson's Baby Powder in the U.S. and Canada - DENIED [*27]

J&J Defendants' Motion in Limine No. 2 seeks to exclude all Evidence of and References to J&J's Decision to Discontinue Talc-Based Johnson's Baby Powder in the U.S. and Canada. Defendants' motion is rooted in considerations of lack of relevance and prejudice. J&J argues that (1) the decision to suspend such sales in May 2020 occurred almost 15 years after the alleged exposure here and at a time when Johnson's Baby Power contained "Chinese talc" rather than the "Vermont talc" found in the product at the time of the alleged exposure, (2) the decision was based solely on business considerations (a "portfolio assessment" made during the pandemic) and not for health or safety-related reasons thereby, obviating the applicability of *International Harvest v. Ault (1974) 13 Cal.3d 113*, and (3) the prejudicial impact of such evidence would substantially outweigh its probative value (*Cal. Evi. Code Sec. 352*.)

Defendants' contentions are not persuasive and its motion to exclude such evidence is DENIED. The starting point is the California Supreme Court's analysis in *Ault*, involving a motorcycle accident in which a gearbox failed. The Court held that *Cal. Evi. Code Sec. 1151*, which generally bars proof of subsequent repairs for the policy reason of promoting such repairs, did not bar the admissibility **[*28]** of a subsequent design change of the gearbox from aluminum to a malleable iron to enhance its strength. The Court opined that "[T]hat the history and purpose of *section 1151…was* not intended to apply to cases found on the theory of strict liability in a products liability action." *Ault, supra, at 118*.

The *Ault* Court explained:

When the context is transformed from a typical negligence setting to the modem products liability field, however, the 'public policy' assumptions justifying this evidentiary rule are no longer valid. The contemporary corporate mass producer of goods, the normal products liability defendant, manufactures tens of thousands of units of goods; it is manifestly unrealistic to suggest that such a producer will forego making improvements in its product, and risk innumerable additional lawsuits and the attendant adverse effect upon its public image, simply because evidence of adoption of such improvement may be admitted in an action founded on strict liability for recovery on an injury that preceded the improvement. In the products liability area, the exclusionary rule of *section 1151* does not affect the primary conduct of the mass producer of goods, but serves merely as a shield against potential liability. In short, **[*29]** the purpose of *section 1151* is not applicable to a strict liability case and hence its exclusionary rule should not be gratuitously extended to that field. *Ault, supra, at 120*.

Ault's reasoning has been applied in the context of products alleged to cause cancer (See *Sailer v. Crown Cork & Seal Co., Inc. (2010) 187 Cal.App.4th 1220*,) as well as in the negligence context to show that a dangerous product was negligently designed. *See* *Barker v. Lull Engineering Co. (1978) 20 Cal.3d 413, 431*.

Defendants argue that *Ault* is in inapplicable because "that case concerned only 'subsequent repairs' and 'improvements' or changes to a product and the interplay of Code of Civil procedure (sic) *section 1151*; specifically whether changes in a vehicle gearbox.. *.after the plaintiff's accident* could be utilized at trial in his products liability action." Defendants read *Ault* too narrowly. Here, as in *Ault*, a product (J&J's talcum powder) arguably contained a "design defect" (fiber-like materials from asbestos) which, Plaintiff argues, prompted J&J to discontinue the sale of talcum power and to substitute its com starch product which did not contain the design defect - just as the substitution of malleable iron for aluminum obviated the design defect in *Ault*.

Defendants counter that a design defect had nothing to do with the discontinuation of the sale of its talc product. Indeed, **[*30]** that may be accurate, but it is a finding that should be made by the jury and not taken from its province by the Court's ruling on a motion *in limine*.

The 15-year time lapse from Plaintiff's alleged last exposure until the date the baby powder was discontinued, does not alter the Court's conclusion. In fact, the alleged exposure occurred when asbestos fiber-like materials were in the J&J product and a change was made to remove those materials. The length of time between the exposure and the change may support J&J's argument that the change was made for purely business purposes, an argument J&J may make to the jury. It will be for the jury to give it the weight it deems appropriate. The time gap, however, does not preclude the jury from considering the evidence.

The Court also finds that the prejudice caused by the admission of evidence that J&J discontinued its talcum powder product does not substantially outweigh its probative value. First, defendants' argument that confusion will result because the jury might "infer that the J&J Defendants believe talcum powder products pose a health risk" is not the point. The issue is not defendants' belief but whether, in fact, the products did **[*31]** cause a health risk. The evidence of the discontinuation of sales is relevant on that issue.

Finally, with respect to Defendants' concern about the admission of discontinuation evidence leading to a "lengthy side show," the Court is confident that Defendants will be able to produce evidence to support its "business-related" contentions within reasonable limits.

The record also demonstrates that J&J did not discontinue all sales sales of powder containing talc with asbestos. It appears that remaining inventory was left on the shelves and J&J continued selling it after the "discontinuation" was implemented. In addition, there is evidence that that J&J continued to sell talc containing asbestos in other countries. Plaintiff argues that the continued sale of remaining inventory *and* the sale of the product in other countries at a time when J&J was aware of its dangerous, are admissible to demonstrate the reprehensible nature of J&J's conduct to prove punitive damages.

With regard to the former - remaining inventory, the Court finds that it may very be admissible to prove punitive damages. With regard to sales to other countries, however, the Court reserves ruling. The Court has serious concerns **[*32]** about the time it may take to prove such foreign sales, the confusion it may cause the jury, and the constitutional issues raised by the admission of such evidence. *See:* *State Farm Mut. Auto Ins. Co. v. Campbell (2003) 538 U.S. 408,422*.

J&J's Motions in Limine No. 1 and No. 2 - A Summary

Because J&J's motions in limine Nos. 1 and 2 raise similar issues, sometimes in the same context and at times in other contexts, the Court provides this summary of its rulings.

Evidence that J&J sold products in the U.S. containing Chinese talc 7 years after plaintiffs last alleged exposure *is inadmissible* at this point in the proceedings.

Evidence that J&J discontinued the sale of its talc products in the U.S. and Canada *is admissible* pursuant to *Ault*

Evidence that J&J continued to sell existing inventory in the U.S. and Canada *after* it "discontinued" sales in the U.S. and Canada *is admissible* on the issue of punitive damages.

Evidence that J&J sold asbestos containing talc in "other countries" *may be admissible* on the issue of punitive damages, but the Court has serious questions regarding the degree to which it will confuse the jury and the time it will take to present such proof. Ruling is reserved on the issue.

3.J&J Defendants' Motion in Limine No. 3 - Evidence: to Exclude [*33] Evidence and Argument that J&J Defendants Improperly Marketed or Targeted Consumers Based on Demographic Characteristics - GRANTED IN PART AND DENIED IN PART

J&J's Motion in Limine No. 3 seeks to exclude Evidence and Argument that J&J Improperly Marketed or Targeted Consumers Based on Geographic Characteristics. Two documents appear to be at issue in this motion: An 08/05/1992 memo entitled "Johnson's Baby Powder" with the headings "Major Opportunities" and "Major Obstacles," each section containing bullet points. The second is a 07/14/2004 document entitled "SHOWER TO SHOWER@ Task Force - BP Brainstorm," listing 3 "challenges" with multiple bullet points under each. Plaintiffs brief in opposition seems to suggest its intent to introduce both documents at trial, each of which is related to the promotion of sales of J&J products and contain references to particular racial, ethnic and gender constituencies.

J&J argues that the documents "have nothing to do" with the issues at bar and will be used by counsel to enflame the jury by suggesting that J&J defendants are racist and sexist. Plaintiff counters that the documents are relevant to demonstrate J&J's placing profits over safety and **[*34]** do not demonstrate or suggest any bias on the part of J&J: "[The] jury should gain a full appreciation of the extent to which J&J, motivated by profit rather than sexism or racism, forcefully promoted its sales of talc powder while knowing about the cancer risk to all consumers." Plaintiff s brief at p. 4.

Both sides cite the Court's previous orders on similar motions, J&J to the order in *O'Hagan v. Johnson and Johnson*, RG19019699 and Plaintiffs to *O'Hagan, Prudencio* v. *Johnson and Johnson*, RG20061303, and *Reyes* v. *Johnson & Johnson*, RG20005239. The Court believes that those orders in combination reach the proper balance and ORDERS that Defendant's motion is GRANTED IN PART and DENIED IN PART.

As a preliminary matter:

Each document, or for that matter any document raising the "targeting" issue must be viewed individually and in its own context. Thus, at trial, the portions of the documents redacted here may be revisited should changed circumstances warrant their admission

The Court finds that Plaintiff may properly use the memos to argue that J&J's placed profits over safety. To do so, however, it is not necessary to include *racial and ethnic* references that may enflame jurors and suggest **[*35]** racism and sexism when, in fact, even plaintiff disclaims that either motivated the writing of the memos. As to those references, the Court finds that the probative value is substantially outweighed by their prejudicial value.

Therefore, should Plaintiff seek to use either document:

Racial and ethnic references shall be redacted as follows: Item 2. In its entirety under "Major Opportunities" in the 8/5/1992 memo; and, specific references to African American and Hispanic users of J&J products in the 7/14/2004 memo. The Court will review redacted versions of the memo prior to their being referred to by any party.

The references that affect only one gender may remain.

The Court expects that all parties will be mindful of the difficult judgment calls necessary to ensure a fair and unbiased trial, free of unwarranted racial, ethnic and gender-based innuendo throughout the trial. The Court's redactions seek to achieve that delicate balance.

4.J&J Defendants' Motion in Limine No. 4 to Exclude Certain Testimony of Plaintiffs Proffered Testing Experts—or, Alternatively, for an Evidence Code Section 402 Hearing - 402 HEARING ORDERED

J&J Defendants' Motion in Limine No. 4 to Exclude Certain Testimony **[*36]** of Plaintiffs Proffered Testing Experts (specifically Drs. Longo and Compton) or, in the alternative, for an Evidence Code *Section 402* hearing for the Court to determine whether admission of the experts' testimony violates the mandate of *Sargon Enterprises, inc.* v. *University of Southern California* (2012) 55 Cal.4th 747.

The Essence of the Debate

The debate between Plaintiffs experts, Drs. Longo and Compton, and Defendants' expert, Dr. Sanchez, in its most general terms, centers around (1) definitions of asbestos and terms such as "cleavage," "mineral" fragments and elongated fibers, (2) whether "bundles" are present which, according to J&J, denote "a hallmark of true asbestos," and (3) whether Dr. Longo "has now developed a new methodology by which he claims to find chrysotile asbestos in every talc mine and essentially in every talc bottle," as J&J contends.

Defendants contend that Plaintiffs experts "use various 'counting criteria' contained in regulations and testing methodologies as an improper substitute for a definition of asbestos, that the experts "falsely" attemto to make it appear that the mineral strucrure they are finding J&J talcum powder contain "bundles," which are the true hallmarks **[*37]** of asbestos (Dr. Longo's "fake bundles,") and, that Dr. Longo has "now developed a new methodology by which he claims to find chrysotile asbestos in ever talc mine and essentially in every talc bottle."

Plaintiffs counter that Drs. Longo and Compton are well qualified experts relying on "generally accepted testing procedures" to which Defendants "mystifyingly" demand that Plaintiff add a "fourth step," and that Plaintiffs experts "follow the very criteria" of various governmental agencies and academic organizations" and followed "protocols as set out in the published methodologies." In addition, Plaintiff contends that Defendants' objection is based on counsel's opinions rather than expert evidence and that it is the results of the application of the methodology, rather than the methodology itself, to which Defendants' actually object.

Sargon

In *Sargon*, the Supreme Court defined the trial court's "gatekeeper" role with respect to the admissibility of expert testimony "to make certain that an expert, whether basing testimony upon professional studies or personal experience, employs in the courtroom the same level of intellectual rigor that characterized the practice of an expert in the relevant field." **[*38]** *Sargon, supra*, at 772. In its "gatekeeper" capacity, trial courts must exclude opinions premised upon assumption, conjecture, guesses, or surmise. *Id.* Presumably that role includes ensuring that the Kelly/Frye "general acceptance of [a] new technique in the relevant scientific community" is met. *Id.*

The trial court's gatekeeper role, however, is not without its limits. It "does not involve choosing between competing expert opinions" and is not a "partisan checkpoint" for the exclusion of expert testimony. Rather, the role seeks to exclude "clearly invalid and unreliable expert opinion…that fails to meet minimum qualifications for admission." *Sargon, supra, at 771-772. See also: Davis v. Honeywell International Inc. (2016) 245 Cal.App.4th 477,492*.

Findings

The Court finds that the opinions of Drs. Longo and Compton are not the stuff of "assumption, conjecture, guesses, or surmise" or that their testimony violates the principle of general acceptance within the scientific community as set forth in Kelly/Frye. Drs. Longo and Compton are well-qualified experts in their field and engaged in a scientific debate with Defendants' experts (most notably Dr. Sanchez) regarding very complicated scientific principles, which have been reviewed by, commented on and written about by innumerable scientists, government **[*39]** agencies, and academic organizations. The proper finder of fact in this instance is the jury not the Court through a motion in limine or a 402 hearing.

In reaching its conclusions, the Court notes:

It has reviewed the declarations of Drs. Longo and Compton and concludes that a prima facie showing has been made that they are qualified to testify in this matter. The Court will make its final determination when Plaintiff offers them at trial.

The methodology used by Dr. Longo to reach his conclusions - the heavy liquid concentration method aka the "Blount method" - meets Kelly/Frye standards in that it has been critiqued in academic journals and appears to have been adopted by the International Organization of Standards (ISO.) The same appears to be true with respect to Dr. Longo's application of the peer-reviewed three-step TEM method to determine the presence of asbestos, a process apparently recommended by government agencies and the ISO.

Defendants' submitted 38 exhibits in support of their motion to exclude, but none of them appear to be declarations of experts refuting the methodologies propounded by Plaintiff s experts. Rather they are primarily articles and transcripts of prior testimony **[*40]** of Longo and Compton which, to the extent they are admissible evidence at trial, may be considered by the jury to determine the weight to be given to Drs. Longo and Compton or to Dr. Sanchez in this quintessential "battle of experts."

The court emphasizes that in making its findings it makes no final determination other than Drs. Longo's and Compton's testimony should not be excluded through a motion in limine or a 402 hearing. Pursuant to Sargon's "gatekeeper" mandate, the Court declines to find that the testimony of either is so "clearly invalid and unreliable" that it should be excluded. At trial, Defendants may cross-examine Drs. Longo and Compton, subject to objections by Plaintiff s counsel, with the considerable fodder they have to counter the opinions of each. Similarly, at trial, Defendants may object to testimony as they deem fit, and the Court will make rulings contemporaneous with any objection.

6J&J Defendants' Motion in Limine No. 5 - Expert: to Exclude Dr. Egilman's Unsupported Causation Opinion Regarding Ms. Vanklive's Fallopian Tube Tumor—or, Alternatively, for an Evidence Code Section 402 Hearing

AND

7.J&J Defendants' Motion in Limine No. 6 - Expert: to Exclude Dr. Smith's [*41] Unsupported Causation Opinion Regarding Ms. Vanklive's Fallopian Tube Tumor - RULING RESERVED PENDING ORAL ARGUMENT

The Court considers J&J Defendants Motions in Limine 5 and 6 together as they each revolve around whether evidence of Drs. Egilman and Smith's "Causation Opinion(s) Regarding Ms. VanKlive's Fallopian Tube Tumor" should be excluded.

Dr. Egilman

With respect to Dr. Egilman, J &J argues that any claim that "Defendants' alleged asbestos-contaminated talc products" "caused (Plaintiffs) fallopian tube tumor" is "nothing more than sheer speculation and conjecture," and should be excluded as irrelevant and violative of *Cal. Evi. Code 352* (the probative value is substantially outweighed by the prejudicial value.)

Defendants explain that "it is undisputed that (Plaintiff) does not have ovarian cancer," *(emphasis* Defendants,) but was diagnosed with "endometrioid adenocarcinoma of the right fallopian tube" in 2017. J&J concludes that Plaintiff cannot produce any evidence that J&J talc products caused the adenocarcinoma of the right fallopian tube, including 6 articles referenced by Dr. Egilman at his deposition in support of his diagnosis. As such, Dr. Egilman's opinion, must be excluded under *Sargon* ***[*42]*** *Enter., Inc.* v. *University of Southern California* (2012) 55 Cal.4th 747,753 and Cal. Evi. Code Sec. 801.

Plaintiff takes a polar opposition position, observing that Dr. Egilman will not offer an opinion that Plaintiff has fallopian tube cancer, characterizing that assertion as a "fabrication." Rather, Plaintiff claims that Ms. VanKlive's "treating physicians have diagnosed her with pleural mesothelioma, peritoneal mesothelioma, and endometrioid adenocarcinoma *of the ovary (ovarian cancer.)" (Emphasis* the Court's.) According to Plaintiff, it is these three diagnoses, which are not subject to any genuine dispute. Plaintiff characterizes Defendants' claim that there is no dispute that Plaintiff does not have ovarian cancer as "extraordinary."

Plaintiff posits that Dr. Egilman has testified at deposition and will testify at trial "Plaintiff s endometrioid adenocarcinoma is an *ovarian* cancer," a form of cancer that "can…originate in the fallopian tube before spreading to the ovary." *[Emphasis* Plaintiff s.) Concludes Plaintiff: "[T]he entire motion is premised on a fabricated 'anticipation' that Dr. Egilman 'will attempt' at trial to testify that Plaintiff has fallopian tube cancer."

With regard **[*43]** to the articles Dr. Egilman produced at his deposition, Plaintiff states that he only presented evidence relating to "fallopian tube cancer" because Defendants requested that he do so, "despite (Dr. Egilman's) express opinion that Plaintiff has ovarian cancer." According to Plaintiff, Ms. VanKlive "has ovarian cancer and it is the J&J Defendants who have failed to come forward with any evidence to the contrary."

Dr. Smith

Both sides make virtually the same arguments with regard to Dr. Smith (J&J Defendants In Limine Motion No. 6.) With regard to Dr. Smith, additional arguments are made regarding his qualifications to testify to ovarian cancer and the materials he relied on to form his opinions. Nonetheless, the essence of the arguments is the same.

A 402 Hearing

It is a tangled web of diagnoses and charges and countercharges that the parties weave. Based on the evidence currently in the record, the Court is inclined to rule that the causation issue is for the jury to sort out, including the testimony of Drs. Egilman and Smith to help solve the equation. Perhaps the scheduled oral argument on this motion will confirm that conclusion.

Should it not provide clarity, however, the Court and **[*44]** ultimately the jury would benefit from a 402 hearing exploring assertions made by both parties, including:

Defendants' claims that the experts intend to testify to an unsupported diagnosis of endometrioid adenocarcinoma of the right fallopian tube, and, that the correct diagnosis of Plaintiff s cancer is "a rare Wolffian tumor that originated in the fallopian tube and metastasized to her pleural and peritoneal cavities; she does not have mesothelioma." *See* footnote 3, Defendants' brief at p. 2.

Plaintiffs claims that neither doctor intends to present a diagnosis of endometrioid adenocarcinoma of the right fallopian tube, that there is no evidence to rebut Plaintiffs ovarian cancer diagnosis other than "attorney argument in a single footnote" regarding a rare Wolffian tumor, and, that

"ovarian cancer epidemiology applies to all epithelial ovarian tumors regardless of whether they originate in the epithelium of the fallopian but, because the point of origination has no bearing on the classification of an epithelial ovarian cell type." Plaintiffs brief at p. 6.

VANDERBILT

1.Defendant Vanderbilt Minerals, LLC's Motion in Limine No. 1 to Exclude Prior Vanderbilt Worker Claims and Allegations [*45] - RULING RESERVED

Background

Defendant Vanderbilt Minerals, LLC's Motion in Limine No. 1 seeks to exclude reference to and evidence of prior Vanderbilt workers' compensation claims relating to asbestos in talc. In the typical asbestos case, workers' compensation claim evidence consists of documents from the Workers' Compensation Appeals Board and from the administrative tribunal below regarding the particular claim, whether it be a complaint, a transcript, or findings of the administrative trial court or the WCAB. This court has often excluded such evidence, finding the information fragmentary and incomplete, lacking context, often confusing, and failing to indicate who in the company may have been aware of the proceedings and its results.

Here it is unclear precisely what evidence Plaintiff seeks to introduce. Vanderbilt's brief implies that it expects Plaintiff to offer all of the records of workers' compensation proceedings for at least 10 workers. Plaintiffs exhibits attached to its brief in opposition, however, only refer to a chart of 10 workers and transcript testimony, primarily focusing on the high incidence of mesothelioma related illness at Defendants' Gouverneur mine.

As noted **[*46]** below, the Court cannot make a final determination on this motion without knowing precisely what evidence Plaintiff seeks to introduce. That said, to the extent the evidence consists of a chart relating to 10 workers, it is unique and different from the evidence generally offered by plaintiffs relating to workers compensation claims.

The chart was prepared by Vanderbilt and chronicles the history of 10 workers who apparently had, or were suspected of having mesothelioma-related diseases, resulting from their work at Vanderbilt's mine. The chart was presented during the deposition of Vanderbilt's corporate representative Matthew Stewart, and details Name, Date of Birth, Date of Hire, End Date of Employment, Years Employed, Year of Death, "Years Between … Work and Death (Latency)," whether there was a worker's compensation case, "Diagnosis Basis," "Questions Regarding Meso Diagnosis," Employment History at Defendant, Prior Employment History, Potential Asbestos Exposure, "Smoker," Autopsy, Medical Details, and "Rubin Comments." By the Court's count, it appears that for 5 of the workers there was company confirmation of an asbestos-related disease (Pike, McIntosh, Labow, Malbauf, and Gaumes,), **[*47]** for 3 there was not (Hosmer, Evans and Rice,) and for 2 it was not discernable whether or not the disease was related to talc containing asbestos (Smith and Bickford.) All of the workers had exposure to Vanderbilt's talc mined from the Gouverneur Talc Mine in New York. Vanderbilt brief at p. 13.

Vanderbilt claims that the evidence relating to workers' compensation claims is inadmissible for a variety of reasons, including a lesser burden of proof at a workers' compensation hearing than exists in a civil trial and different purposes that the company may have in defending a worker's compensation claim relative to a civil trial, the lack of discovery and incentive to investigate at a workers' compensation hearing, the difference in Ms. VanKIive's work environment relative to the conditions experienced by workers at the Gouverneur mine, and various evidentiary objections, including hearsay, inadmissible character evidence (*Cal. Evi. Code 1101(a)*), improper proof of settlement or compromise barred by *Cal. Evi. Code Sec. 1152(a)*, and, "undisclosed expert testimony." Defendant also contends that admission of the evidence would violate New York privacy laws.

Plaintiff counters that the evidence is admissible for the limited purposes of demonstrating **[*48]** knowledge, causation and punitive damages, *citing* *Cal. Evi. Code Sec. 1101(b)* and *In re Asbestos Related Cases (1982 N.D. Cal.) 543 F.Supp. 1152* as to notice, *Aultv. International Harvester Co. (1974) 13 Cal.3d 113,121-1223* as to causation, and *Izell* v. *Union Carbide Corporation* (2014) 231 CaLApp¶* 962 and, *State Farm Mat. Automobile Ins. Co. v. Campbell (2003) 538 US 408* as to punitive damages.

Discussion, Guidance and Orders

Regardless of the universe of evidence Plaintiff contemplates introducing to prove the prior workers' compensation claims, they are almost certainly *not* admissible for the truth of the assertions contained there. Rather, the records would be admissible, if at all, for a proper limited purpose. Whether evidence of the WC claims is admissible to prove such a limited purpose (e.g. notice and awareness of the dangers of asbestos) is a "question of fact" within the discretion of the trial court. *In re Related Asbestos Cases 543 F.Supp. 1152,1155 (1982)*.

As noted, it is impossible for the Court to rule on this motion at this time, given the lack of specificity of the precise records that Plaintiff intends to produce. Perhaps the Court has missed something in the briefing, and welcomes guidance as to precisely what evidence Plaintiff intends to introduce.

Thus, as next steps, the Court provides the following guidance to the parties and makes the following orders:

Plaintiff is ORDERED to provide defendant and the Court the precise materials **[*49]** it intends to offer at trial regarding workers' compensation claims by 08/27/2021. To the extent there are no additional materials other than those attached to Plaintiffs brief in opposition, Plaintiff should so state.

The Court makes no final determinations at this time regarding the admissibility of any workers' compensation evidence until it and Defendants have had the opportunity to review all of Plaintiff s proffers.

The Court *might* admit redacted portions of the chart for the limited purpose of notice. The circumstances regarding the chart's preparation are not clear to the Court and will likely be determinative as to whether any portion of the chart is admissible. If the chart was prepared solely in preparation for Stewart's deposition, it would militate against its admissibility. If, on the other hand, Vanderbilt prepared it prior to this litigation out of concern that its product might contain asbestos, it may dictate a different result. If it were the latter, it might be akin to a statement of a party. This is *not* to say that the Court would admit the document for its truth under *Cal. Evi. Code Sec. 1220*, but rather, the Court would do so solely for a limited purpose with an appropriate limiting instruction. **[*50]** (In this regard the Court notes that Vanderbilt's objection on *Cal. Evi. Code Sec. 1152* grounds is not persuasive. By its terms, *Sec. 1152* envisions admission of evidence for limited purposes that do not undermine the policy objectives of the statute.]

The Court does not find persuasive Plaintiffs argument that any workers' compensation evidence should be admissible for any limited purpose other than notice. As Plaintiff notes, notice does not require a showing of "similarity," however, proof of causation demands a greater showing of similarity, albeit not a showing of "identical" conditions. It seems to the Court that Plaintiff cannot have it both ways, particularly given the complicated causation issues confronting the Court and ultimately the jury as presaged by these motions *in limine*. To the extent that workers' compensation evidence is admissible, the jury will be instructed that they cannot use such evidence to prove causation.

As the Court reviews the documents, it will consider carefully the dictates of *Cal. Evi. Code Sec. 352*, whether it be relating to documents from the administrative proceedings or those prepared by Vanderbilt.

Finally, any evidence relating to expert testimony present in this motion, such as that of Linda Dell, **[*51]** will judged on the basis of the admissibility of criteria applicable to the admission of any expert testimony and will not be bootstrapped into evidence along with evidence of workers' compensation evidence that might be admissible.

2.Defendant Vanderbilt Minerals, LLC's Motion in Limine No. 2 to Exclude Evidence and Testimony Vilifying Vanderbilt For Exercising its First Amendment Right to Petition the Government for a Proper Definition of Asbestos - RULING RESERVED

Background

Defendant Vanderbilt Minerals, LLC's (Vanderbilt) Motion in Limine No. 2 seeks to Exclude Evidence and Testimony Vilifying Vanderbilt For Exercising its First Amendment Right to Petition the Government for a Proper Definition of Asbestos. Specifically, Vanderbilt objects to the admission of any evidence of or references to efforts that it lobbied OSHA to change its definitions regarding asbestos, which Vanderbilt claimed were overbroad and failed to distinguish between fibers in "asbesti-form or non-asbesti-form habit."

Vanderbilt contends that such evidence will only serve to "vilify" Vanderbilt in its efforts to insure accuracy in OSHA definitions relating to asbestos, and, furthermore, is in admissible under the Supreme Court's decisions **[*52]** in *E.R.R*.

Railroad Presidents Conference v. Noerr Motors Freight, Inc. (1960) 365 U.S. 127 and United Mine Workers v. Pennington (1965) 365 U.S. 127,81 S.Ct. 523, which considered together have become known as the "Noerr-Pennington doctrine.

Plaintiffs opposition brief confirms that it intends to introduce at least 4 items of evidence relating to agency regulation of asbestos and Vanderbilt's efforts to change them:

A February 1974 inter-office memo discussing the effect of OSHA regulations on the New York talc industry.

A second 1974 memorandum that expresses concern that Vanderbilt's products "may be classified as asbesti-form and would come under the OSHA asbestos standards for manufacture and use even if we are able to sustain our petition to OSHA that (the) tremolite is non-asbesti-form."

A third 1974 memo regarding Vanderbilt's presentations to OSHA, NIOSH, FDA, and MESA, which states that the information provided the agencies "are based on something less than the truth." The memo's author concludes: "I find it difficult to believe that they (Vanderbilt) could be so grossly misinformed as to what their materials really are."

A June 1986 letter from Vanderbilt's industrial hygienist Dr. Gamble to NIOSH regarding Vanderbilt's efforts to change non-asbesti-form OSHA definitions and a subsequent entry in the Federal Register indicating **[*53]** that NIOSH was distancing itself from Dr. Gamble's opinions which "are not supported by data."

Plaintiffs cite *Hernandez v. Amcord, Inc. (2013) 215 Cal.App.4th 669*, arguing that Defendants misconstrue *Noerr-Pennington* and that the evidence is admissible pursuant to *Hernandez* for any one of a number of limited purposes.

The Noerr-Pennington Doctrine and Herandez v. *Amcord Inc. Noerr-Pennington* involved anti-trust actions brought under the Sherman Act. In *Noerr*, the Court held as a matter of substantive federal ***antitrust law*** that industry-wide lobbying efforts by the railroads to pass legislation "designed to destroy the trucking industry as a competitor" could not serve as a basis to find a violation of the Act." (*Noerr, supra, at 131-132*.) Citing the First Amendment's guarantees of the rights of to free speech and to petition the government, the Court concluded that the Sherman Act could not prohibit trade associations from attempting to persuade the Congress or the Executive Branch to pass laws or take actions that might involve a restraint of trade. *Pennington* held similarly: "Joint efforts to influence public officials do not violate the antitrust laws even though intended to eliminate competition." *(Pennington, supra*, at 670) The doctrine is applicable in negligence and products liability cases. *Theme Promotions, Inc. v. New Am. Mktg FSI (9th Cir. 2008) 539 F.2nd 1046,1058*.

By contrast, the California **[*54]** Court of Appeal in *Hernandez, supra*, held that lobbying efforts by a defendant in an asbestos case *might* be admissible and that the *Noerr/Pennington* doctrine might not be a bar. The *Hernandez* Court distinguished a situation where there was a substantive claim that lobbying efforts constituted a substantive violation of a law versus a situation where the lobbying efforts were being offered for a limited purpose such as knowledge of the dangers of asbestos. The former implicated the *Noerr-Pennington* doctrine while the latter required the application of evidentiary rules. *Noerr/Pennington* was a substantive rule; *Hernandez* an evidentiary rule.

In so holding, *Hernandez* did not break new ground. In *Pennington*, the United States Supreme Court similarly noted that "It would still be within the province of the trial judge to admit this evidence [of efforts to influence public officials], if he [or she] deemed it probative and not unduly prejudicial, under the 'established judicial rule of evidence…"

Thus, in *Hernandez*, the Court of Appeal reversed and remanded, in part, because the trial misconstrued the *Noerr/Pennington* doctrine and failed to engage in a relevance analysis under the Cal. Evidence Code. The

Hernandez court opined: "The trial court's reliance on **[*55]** the Noerr-Pennington doctrine to exclude evidence in this negligence/strict liability case is a misapplication of the doctrine … because the trial court made no analysis of this evidence [lobby efforts to create exemptions laws banning asbestos] pursuant to Evidence Code *sections 350*,*352* or any other relevant section of the Evidence Code." At 680-681.

In their analyses here, both Plaintiffs and Defendants miss the mark. *Noerr/Pennington* is not necessarily a bar to the admissibility of the lobbying evidence Plaintiffs intend to proffer, and *Hernandez* is not a mandate that all lobbying evidence is admissible. Rather, its admissibility is dependent on an exercise of the court's discretion in applying relevance provisions of the California

Evidence Code, including weighing the probative value of the lobby evidence relative to its prejudicial value.

The Court Reserves Ruling on Vanderbilt's Motion in Limine No. 2 The parties have not argued the admissibility of Plaintiffs proffers in the context set forth here. As such, it is premature for the Court to rule. Defendants are entitled to the opportunity to respond to arguments that the evidence is admissible for the limited purposes Plaintiff claims in its brief. Defendants **[*56]** need to be more specific in its contentions that even if relevant, the admissibility of lobbying evidence violates *Cal. Evi. Code Sec. 352* in the context of Plaintiffs specific proffers. Thus, ruling is reserved on Vanderbilt's Motion in Limine No. 2 until such time as the specific positions of the parties with respect to the particular proffers are fully articulated and considered by the Court.

Pending such rulings, the parties are ordered not to make any references to lobbying efforts by J-MM during jury selection, opening statements or trial absent an offer of proof and leave of the Court. Should the Court conclude that application of relevance standards bars evidence of lobbying evidence during Plaintiffs' case-in-chief, Plaintiffs may be permitted to introduce such evidence on cross examination or in rebuttal should the Court find that Defendants open the door to its admissibility.

WHITTAKER

1.Defendant Whittaker Clark & Daniels, Inc.'s Motion in Limine to Preclude Memoranda from Heinz Eiermann and Robert Schaffner, both Deceased - GRANTED

Defendant Whittaker Clark & Daniels, Inc.'s Motion in Limine No. 1 seeks to Preclude Memoranda from Heinz Eiermann and Robert Schaffner, both Deceased. Eiermann and Schaffner **[*57]** were both employed by the FDA during March of 1976. On March 18, 1976, Eiermann, the FDA's Associate Director for Technology, authored a memo in which he criticized the talc industry's CFTA for the quality of data that it submitted, opining "it does not offer much assurance that cosmetic talcs are adequately tested."

On March 19,1976, Schaffner, the FDA's Acting Director, Bureau of Foods, apparently commented on Eiermann's memo, noting that although the "companies have done some work," the CFTA's "work has not been terribly extensive, and based on the work to date we probably could not say with certainty that the industry is adequately handling the problem." Schaffner concludes: "Therefore, Mr. Eiermann recommends and I concur that a proposed regulation be drawn up stating essentially that talc would be asbestos free when examined by using x-ray diffraction and differential thermal analysis." There is also handwriting in the margin of the Schaffner memo, which states: "Agree. Please coordinate with compliance." The handwriting appears to be initialled by Schaffner.

The Court is inclined to exclude both memos as hearsay and to deny Plaintiffs request that it be admitted pursuant to *Cal. Evid. Code Sec. 1280*'s **[*58]** public records exception to the hearsay rule. The Court is concerned that the exception itself is not satisfied in that the memo lack sufficient indicia of trustworthiness demanded by the explicit language of *Sec. 1280*.

Even if *Sec. 1280*'s requirements are met, the Court is extremely concerned that the prejudice the memo's admission would engender substantially outweighs its probative value. The assertions are damaging, but not spelled out with any specificity. In addition, the criticism is leveled at CFTA and not any member company. It appears impossible to determine Defendants' responsibility, if any, for the deficiencies detailed by Eiermann and

Schaffner. Eiermann and Schaffner are deceased. It appears that it would fundamentally unfair to admit the memoranda and that their prejudicial impact substantially outweighs it probative value and should be barred pursuant to *Cal. Evi. Code Sec. 352*.

2.Defendant Whittaker Clark & Daniels, Inc.'s Motion in Limine to Preclude Admission of, Reliance Upon and Reference to the Four Photographs Depicting Various Packaging Produced in Discovery - 402 HEARING ORDERED

Defendants' authentication, relevance and hearsay objections to the admissibility may be explored through the testimony of **[*59]** a witness to authenticate the photographs and provide information regarding their probative value. In its opposition brief, Plaintiff suggests that percipient witness and Plaintiffs supervisor, Mr. Lima, might be such a witness. The photographs are not to be referred to in *voir dire* or opening statements or in any matter absent an order of the Court.

VPN'S

1.1Defendant The Vons Companies, Inc.'s Motion in Limine No. 2 to Exclude Reference to Newspaper Writings and Media Reports About Talc Litigation [Evidence] - GRANTED IN PART AND DENIED IN PART

Defendant The Vons Companies, Inc.'s Motion in Limine No. 2 seeks to Exclude Reference to Newspaper Writings and Media Reports About Talc Litigation. Vons Companies and Safeway have settled, but the motion is relevant to all parties in this litigation. J&J had joined Vons in this motion. At oral argument, the parties are to clarify which articles are actually in question now that the retailers have settled.

Generally, the Court intends to GRANT the motion with respect to the actual introduction of the articles. Presumably, however, Plaintiffs have a witness who will describe information available in the popular press who may generally relate articles **[*60]** that describe litigation and controversies for the limited purpose of establishing what was known or knowable without going into the detailed contents of those articles that are accusatory against any particular defendant. Otherwise the actual contents of the articles are likely hearsay and should not be shared with the jury. The Court shares the concern of this Court in O'Hagan with the prejudicial impact of the articles and its conclusion that "modern day reports on similar litigation would seem to be unduly prejudicial and presumptively not admissible."

The Court will provide a more detailed analysis once the actual articles in question are identified.

Opinion

[*1026] ORDER GRANTING DEFENDANTS' MOTION TO DISMISS WITH PREJUDICE

Re: Dkt. No. 81

The National Association of Realtors ("NAR") and its local chapters operate listing services through which people can buy and sell homes. The listings can be accessed by any licensed real estate agent who pays the subscription fee. NAR has adopted a rule to prevent its subscribers from withholding available properties from the listing service—if you are marketing a property in any way, you need to include it on the local listing service so that all other agents **[**2]** can see it. If you don't, you will lose access to the listing service.

A relatively new company called Top Agent Network ("TAN") offers a competing listing service. But it only makes the service available to a small minority of agents—ones that the company has deemed "top agents." These TAN members are also subscribers to NAR's listing service. TAN wants its members to be able to list properties on its own service without also being required to list them on NAR's service. It has sued NAR, claiming that NAR's policy violates the antitrust laws.

The lawsuit is dismissed with prejudice. It may well be that NAR's policy has anticompetitive effects. But it is not anticompetitive to the extent that it prevents members of an exclusive listing service like TAN from concealing listings from NAR's subscribers while simultaneously benefitting from access to NAR's service. Indeed, it is TAN's business model that would, if it succeeded, have anticompetitive effects on the real estate market. Thus, although the policy presumably causes real estate agents to be less interested in using TAN's service and becoming TAN members, this is not the type of harm that the antitrust laws are designed to prevent. **[**3]**

I

Unless otherwise noted, the facts described in this section come from the well-pled allegations in the complaint, materials incorporated by the complaint, or materials subject to judicial notice.

A

Selling a home requires finding the right match between an available home and a willing buyer. This involves a certain amount of cooperation: sellers' agents and buyers' agents need to be able to exchange information about what their clients are looking for in a given transaction. Since the 1800s, local realtors' associations have **[*1027]** organized forums for this kind of information exchange. While the process has evolved with time and technology—from in-person meetings to online data platforms—the basic concept remains the same. Real estate agents representing home sellers publish information about homes available for sale, and agents representing home buyers search through that information to find homes that might suit their clients' needs.

Today, the vast majority of home sales occur on the local "multiple listing service" ("MLS") run under the purview of the National Association of Realtors. Founded in 1908, NAR is a trade association of licensed real estate agents that serves as a national umbrella **[**4]** organization for state and local chapters. Typically, the local chapter will run the MLS for that region. The MLS is essentially a subscription-based online database of properties listed for sale in a particular geographic region. Nearly all active licensed real estate agents in the country pay for access to the MLS in their region. They can either just pay a subscription fee or choose to join as a full-blown member—either way, they must also agree to abide by the rules and policies imposed by NAR and its local chapters. Although there are "independent" or non-NAR affiliated listing services, any given geographic market is typically dominated by the MLS.[1] And in markets where the MLS dominates, around 90% of homes in that market will be sold on the MLS. It is therefore important for real estate agents to subscribe to their local MLS—it's how they are able to share listings with all the other agents in their market. As the complaint explains it, putting a home on the MLS "generally puts a listing before the most eyeballs the fastest." The San Francisco Association of Realtors, the second defendant in this case, operates the "SFARMLS" covering the San Francisco area.

While the local affiliates **[**5]** actually operate the MLS for their area, NAR promulgates rules and policies through a "Handbook" that all local chapters are required to enforce. Those rules control everything from the process for negotiating buyers' agents' commissions to how the MLS can share data with consumer-facing websites like Zillow, Trulia, and Redfin. Local chapters can, to some extent, also add their own rules. For example, a common requirement is that owners make listed properties available for showing to any subscribing buyers' agent. The thrust of many of the rules is that they create and maintain an open marketplace: once a sellers' agent posts a listing, it becomes publicly available to all subscribing agents (and, when listings are syndicated, anyone with a web browser), and any buyers' agent has an opportunity to pursue that home for their client.

---

[1] Throughout this ruling, the term "MLS" will be used to refer to NAR-affiliated platforms, while independent platforms will be described as "alternative" or "private" listing services or just "listing services."

B

Founded in 2010, Top Agent Network is a for-profit company that describes itself as a "private, member-only community open to the top ten percent of agents by sales volume." For those members, TAN offers a competing listing service. While the MLS is available to any licensed agent willing to pay the subscription fee, TAN's model is to attract an "elite" **[**6]** membership by promising an opportunity to deal exclusively with other highly productive agents. TAN's current membership is approximately 10,000 agents (compared to 1.4 million NAR members), and those agents are **[*1028]** involved in roughly $165 billion in home sales every year.

Specifically, TAN offers its member agents two avenues for engaging in home sales. The first is simply a service closely analogous to the NAR-affiliated MLS. For home sellers who want their home marketed to a fairly large pool of buyers without opening themselves to the completely public market of the MLS and without being required to follow NAR's various rules, listing on TAN might provide a more palatable alternative. In addition to having a significantly smaller and selective membership, TAN does not syndicate its listings data to consumer websites like Redfin.

Second, for sellers and buyers who want an even more private experience, TAN offers a "matchmaking" service. Through this service, a seller's agent can inform TAN that the agent has a client looking to sell a home in a given price range, while at the same time buyers' agents let TAN know what range their clients are looking in. TAN then pairs off the seller's **[**7]** agent with a buyer's agent looking in the right range, and the two agents can negotiate a potential sale directly. That means sales can be made without ever listing the home at all.

The reason some home sellers might prefer using services like TAN's rather than listing their home on the MLS is the same as the reason many want to use the MLS: the publicity. Homeowners who prefer not to broadcast the fact that they are selling or don't wish to publicize pictures of their home might prefer to engage a seller's agent who will go about finding a buyer more quietly. Generally speaking, this can be done by circulating the listing only to other agents within the same real estate agency or brokerage, or by the agent reaching out informally to buyers' agents in their personal network. Homes sold through these more private channels are referred to as "off-MLS sales." Essentially, TAN is offering a platform for a select group of agents to conduct off-MLS sales for their clients.

But not all of the $165 billion-worth of annual sales involving TAN's member agents occur on TAN's platform. In San Francisco and beyond, TAN's members also subscribe to their local NAR affiliate. As the complaint explains, **[**8]** the vast majority of home sellers still want their homes to be listed on the MLS where it can be readily viewed by the largest possible pool of potential buyers. That makes it nearly impossible for any agent to earn a living without access to the MLS, and TAN's member agents are no exception. Indeed, the way an agent becomes a "top agent" who can qualify for TAN is through success on the MLS. TAN's members are people who have leveraged access to the information on the MLS to drive a high volume of sales. Rather than giving up that access, TAN agents continue to view and post most listings on the MLS while selectively placing some homes exclusively on TAN's platform—out of reach of the vast majority of agents.

C

According to the complaint, NAR has long been wary of agents engaging in off-MLS sales. In 2015, the trade association commissioned a consulting firm to undertake a "threat assessment." This was the inception of "The D.A.N.G.E.R. Report: Definitive Analysis of Negative Game Changers Emerging in Real Estate." The Report zeroed in on a key feature of NAR's financial structure: the organization is almost entirely reliant on subscription fees and membership dues. To stay afloat, NAR **[**9]** needs to retain as many agents as it can by making sure its services are worth the annual fees. But that's difficult to do, **[*1029]** because it turns out that the vast majority of licensed real estate agents are not terribly productive. The Report used a variety of unflattering terms to describe this mass of agents, ranging from "unproductive" to "technically unsophisticated" to "not so good." The upshot is that a disproportionately large segment of NAR's dues and fees come from agents who are not making more than a handful of sales per year, and who have difficulty coping with any new market innovations or technological developments. If those agents were prevented from making even the few sales that they currently make, they would likely drop their NAR subscriptions.

One major threat to those unproductive agents (and, in turn, to NAR) is the rise of off-MLS sales. To the "not so good" agents, off-MLS sales are a way for their competitors to unfairly hide listings from everyone on the MLS. And in fact, as more listings are kept off the MLS and placed on services like TANs, it becomes harder for less productive agents to catch the occasional opportunity to close a deal. The reason NAR is able **[**10]** to attract and retain those agents is that the MLS offers them relatively simple "one-stop shopping"—all the information they need, available in one place. And because NAR needs their subscription fees to stay afloat, the threat that off-MLS sales pose to unproductive agents is also a threat to NAR.

In 2019, NAR took decisive action to limit the ability of subscribing agents (and so, effectively, all licensed agents) to engage in private, off-MLS transactions. The organization adopted a rule called the "MLS Clear Cooperation Policy" that essentially prohibits MLS subscribers from marketing listings anywhere else unless they also post the listing to their local MLS. In full, the Policy states: "Within 24 hours of marketing a property to the public, the listing broker must submit the listing to the MLS for cooperation with other MLS participants. Public marketing includes, but is not limited to, flyers displayed in windows, yard signs, digital marketing on public facing websites, brokerages website displays (including IDX and VOW), digital communications marketing (email blasts), multi-brokerage listing sharing networks, and applications available to the general public." In other words, **[**11]** almost as soon as a home is listed for sale in any forum, it must be listed on the MLS too. If you want to benefit from the information available on the MLS, you can't withhold information from the MLS.

The Policy contains an exemption for agents discussing listings within their own firms. This means that agents employed by large brokerages are able to list properties on internal platforms, send firm-wide emails describing an available home, or discuss a property over coffee with a colleague without needing to post the listing on the MLS. These arrangements are known as "office exclusives." The complaint alleges that allowing office exclusives to continue under the Policy while forbidding other off-MLS listings unfairly benefits large brokerages, to the detriment of consumers. Any home seller who wishes to avoid a public listing on the MLS is left with no choice but to hire an agent at a brokerage. The problem is that sales within brokerages do not entail negotiations between financially independent actors. Agents from the same company—whose financial incentives are inherently linked—represent both the buyer and the seller. According to the complaint, this situation "robs consumers **[**12]** of the independent advice they expect from an agent."

The Policy is enforced through local NAR affiliates, which were required to fully implement it by May 1, 2020. In San Francisco, SFAR took a fairly strict approach to implementation and enforcement. **[*1030]** In March 2020, the local organization announced that any subscribing agent found to have violated the Policy would be subject to a $5,000 fine for the first offense and a $10,000 fine for a second offense. An agent caught violating the rule for a third time would owe a $15,000 fine and would also get kicked off the MLS. Additionally, SFAR interprets "public marketing" to include one-on-one communication about a listing between two agents. As the complaint puts it, "if an agent has coffee with another agent and mentions a property for sale," that property must be listed on the MLS within one business day. In short, MLS subscribers in the San Francisco area now face a fairly dramatic choice: cease negotiating off-MLS home sales entirely or lose access to the MLS.

For TAN, the fact that all of its members are also MLS subscribers means that every listing posted on TAN's exclusive service now must also be posted on the MLS. In San Francisco **[**13]** (and in any other area where the local NAR affiliate has interpreted the Policy to reach one-on-one conversations), the same is true even if a TAN member uses the company's matchmaking service and only discusses the home with one other agent.

TAN alleges that NAR's explicit purpose in instituting the Policy is to eliminate competition from TAN and other alternative listing services. The company points to NAR's statements in this litigation and in another case challenging the Policy that agents' use of competing listing services reduces the value of subscribing to an MLS, as well as public statements by various NAR-associated entities expressing expectations that the Policy would put TAN out of business. Moreover, TAN alleges that the Policy is achieving its aim. The company reports that over the last year, membership in its various local chapters has dropped by an average of more than 20%, and some chapters have seen membership cut nearly in half. While some of this loss is likely attributable to the overall drop in real estate sales during the Covid-19 pandemic, TAN states that in three markets that are not dominated by a NAR-affiliated MLS, membership has only declined by an average **[**14]** of about 11%. In short, TAN alleges that the Policy is stifling competition by cutting off the ability of other platforms to recruit and retain member agents, which in turn harms people who wish to sell their homes off-MLS.

II

TAN claims that the Policy constitutes a violation of the Sherman Antitrust Act's prohibition on agreements creating unreasonable restraints of trade. *15 U.S.C. § 1*. Specifically, the complaint frames the Policy as a "group boycott," meaning an agreement among competitors to cut off certain businesses from the supplies needed to compete in the market. *Northwest Wholesale Stationers, Inc. v. Pacific Stationery & Printing Co., 472 U.S. 284, 290, 105 S. Ct. 2613, 86 L. Ed. 2d 202 (1985)*. As described above, TAN alleges that the Policy constitutes an agreement among NAR member agents not to compete with each other through off-MLS marketing, thereby cutting off TAN and other private listings services from the supply of agent memberships.

A

Although the Sherman Act itself does not include a private right of action, competitors are sometimes permitted to bring suit if they can allege that the defendant's activities in violation of the antitrust laws have caused them harm. *15 U.S.C. § 15*. But not just any harm will do. In addition to alleging an actual injury to support Article III standing, the Supreme Court has also required plaintiffs like **[**15]** TAN **[*1031]** seeking to bring antitrust claims against their competitors to specifically plead "antitrust injury." The canonical rule is that an antitrust injury must be an injury that flows from the anticompetitive aspect of the defendant's activity. *Atlantic Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 334, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)*. The theory is that a company should only be able to invoke the antitrust laws to recoup its own losses when those losses result from harm done to competition in the market, "since it is inimical to the antitrust laws to award damages for losses stemming from continued competition." *Id.* (internal quotations omitted). If a company harms a competitor, the competitor must explain why the company's actions ultimately result in higher prices, lower quality, or reduced choice, and how the competitor's harms can be traced to the same aspects of the company's activity.

Atlantic Richfield involved an agreement between a large gasoline seller called ARCO and its retailers not to sell the company's gasoline for more than a maximum price, intended to out-price independent gas stations like the plaintiff USA Petroleum. The complaint alleged that the agreement had caused USA Petroleum and other independents to lose sales, while retailers selling ARCO gas saw **[**16]** an increase in sales. But the Supreme Court explained that this kind of shift in sales was not one of the reasons that such vertical maximum-price fixing arrangements are deemed illegal. The kinds of harm to competition that arise from such agreements largely have to do with the ways they restrain the retailors who are part of the agreement from competing with each other: the artificially low price might prevent such retailors from recouping their operating costs, cause them to stop engaging in non-price competition by offering perks or services consumers find valuable, and ultimately result in what is effectively a minimum-price fixing scheme as none of the retailors are willing or able to charge less than the maximum agreed price. *Id. at 335*. In short, reduction in competition among those retailors ultimately reduces consumer choice. But USA Petroleum had alleged that the agreement allowed retailors who joined the agreement to *increase* their sales and improve their viability—the opposite of the anticompetitive effects ***antitrust law*** is concerned with. As a result, although USA Petroleum's lost sales constituted a real injury, they did not count as an antitrust injury because they did not result **[**17]** from "the aspects of vertical, maximum price fixing that render it illegal." *Id. at 337*.

One helpful rule is that an injury can never be an antitrust injury if it flows from an aspect of the defendant's activity that actually benefits competition. *Pool Water Products v. Olin Corporation, 258 F.3d 1024, 1034 (9th Cir. 2001)* (citing *Rebel Oil Co. v. ARCO, 51 F.3d 1421, 1433 (9th Cir. 1995)*). The *Pool Water Products* case involved two companies that manufactured certain chemicals used to sanitize swimming pools. Among several allegedly anticompetitive activities, the Olin Corporation had purchased another chemical manufacturer that also packaged and distributed the sanitizers, thereby integrating its activities across multiple levels of the supply chain. Pool Water Products alleged that the integration allowed Olin to reduce its prices and increase its own market share as competitors were unable to match the price drop. The goal, Pool Water Products alleged, was to drive all the competition out of the market and then start charging monopoly prices. But Olin had not actually begun charging high prices, and low prices are not necessarily anticompetitive—in fact, lower prices are usually better for consumers. *Id. at 1035*. Because the plaintiff **[*1032]** had not alleged that the low prices were predatory (i.e. that Olin was charging consumers less for **[**18]** its products than it was spending to produce and distribute them), they could not allege an antitrust injury. The fact that Pool Water Products and other competitors lost market share while Olin gained market share did not mean that the level of competition in the market for pool sanitizers had been harmed; it actually showed that consumers had benefited. Thus, Pool Water Products did not have antitrust injury.

Antitrust injury is a threshold issue, meaning that if a plaintiff cannot allege an antitrust injury, the suit cannot proceed no matter how egregious the defendant's alleged antitrust violation may be. On a motion to dismiss, the normal pleading rules apply. The Court must take all allegations plausibly pled in the complaint as true and draw all inferences in favor of the plaintiff. *Bell Atlantic Corporation v. Twombly, 550 U.S. 544, 555-56, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. In short, the inquiry at this stage is whether the complaint alleges facts giving rise to a plausible inference that the plaintiff has suffered some injury that flows from the anticompetitive effects of the defendants' allegedly illegal activities.

B

The complaint lays out a reasonable argument that the Policy is so broad that its overall effect on the market for homes is anticompetitive. The Policy **[**19]** leverages NAR's control of the real estate market to coerce most agents into giving up their off-MLS activities entirely, without regard to the competitive value of those activities. The complaint alleges with particularity that there is demand among consumers—that is, home buyers and sellers—for options to engage agents who can help them buy or sell a home without going through the MLS. And the complaint plausibly alleges that the Policy, by forcing those consumers to choose between the MLS and a problematic in-house transaction at a large brokerage, reduces consumer choice and stymies competition among agents for off-MLS sales. While not as clear-cut as concerns about super-competitive pricing, these kinds of harms are also the concern of ***antitrust law***. *See* *FTC v. Indiana Federation of Dentists, 476 U.S. 447, 459, 106 S. Ct. 2009, 90 L. Ed. 2d 445 (1986)*; *Regional Multiple Listing Service of Minnesota, Inc. v. American Home Realty Network, Inc., 960 F. Supp. 2d 958, 985 (D. Minn. 2013)*). To the extent that other alternative listing services (particularly ones that allow any licensed agent to join or subscribe) might plausibly be unable to stay afloat under the Policy, it would seem to be harming competition. All of that could conceivably be enough to plead a *Sherman Act* *Section 1* claim. *But see* *The PLS.com, LLC v. The National Association of Realtors, 516 F. Supp. 3d 1047, 2021 U.S. Dist. LEXIS 21098, 2021 WL 369545, at *8 (C.D. Cal. Feb. 3, 2021)* (appeal pending) (finding that another private listing service had not alleged a plausible injury to consumers).

But even **[**20]** assuming for the purposes of this motion that the Policy constitutes an antitrust violation, TAN has failed to state antitrust injury because its alleged harm—the loss of agent members—does not flow from effects of the Policy that are harmful to competition. Moreover, taking the allegations in the complaint as true, TAN could never allege an antitrust injury from the Policy, because TAN's business model is itself anticompetitive in a way that the Policy would tend to remedy.

What TAN's complaint fails to reckon with is that listings are just information, and competitive marketplaces generally thrive on open information. Indeed, the point of the MLS is that such platforms **[*1033]** are necessary for facilitating home sales. Sellers need to be able to list their homes in a manner that allows buyers to compare listings and identify potential matches. And keeping that platform running and operational requires setting rules that ensure fair play among members. *See* *Northwest Wholesale Stationers, 472 U.S. at 296*; *Freeman v. San Diego Association of Realtors, 322 F.3d 1133, 1147 (9th Cir. 2003)* (citing *United States v. Realty Multi-List, Inc., 629 F.2d*

1351, 1368 (5th Cir. 1980)). The key procompetitive benefit of this system is that every NAR-affiliated MLS is open to any licensed real estate agent who is willing to pay the fees.

One could certainly imagine a competing listing service that was nevertheless **[**21]** equally open to all licensed agents. That NAR exercises control over the operating rules of the market for home sales in most major markets across the country is not, in and of itself, good for competition. The presence and viability of other listings services that wanted to compete by offering different rules regarding showings or commissions would likely be valuable to consumers. It thus seems likely that any competitor seeking to operate a non-exclusive listing service (that is, a service that offers subscriptions to any agent willing to pay) would have standing to bring an antitrust claim if it plausibly alleged that the Policy was causing it to lose members. In that sense, it is the breadth of the Policy—sweeping in open-network competitors as well as exclusive ones—that raises an antitrust concern.

But to the extent the Policy prevents an exclusive network like TAN from operating the way it seeks to operate, it is not harmful to competition, even assuming the truth of the complaint's well-pled allegations. TAN describes itself as an exclusive listing service for elite real estate agents—a service that intentionally screens out everyone else. The only reasonable inference to be **[**22]** drawn from that description is that when a seller's agent lists a home on TAN without listing it on the local MLS, competition for that home is decreased. Only buyers who have enlisted the services of a TAN member agent are able to view the listing and bid for it. At the same time, the allegation that all TAN agents are also NAR members means that those agents and their clients are benefitting from open access to the listings on the MLS. Sellers' agents can gather information on how to position their homes competitively against comparable properties and buyers' agents can seek listings for their clients both in the open pool and on the exclusive network. But the vast majority of agents (those who are NAR members but not TAN members) have no way of knowing what listings the TAN agents are keeping secluded from the open market.

TAN seems unwilling to recognize the reality of how its "elite" members earned their status as "top agents" in the first place. If, as alleged, every single one of them has been and still is a NAR subscriber, then each has climbed their way to the top by dint of their access to an MLS. Now, these agents want to pull the ladder up behind them. TAN's platform would **[**23]** (absent the Policy) allow these agents to use the elite status they gained as a result of NAR's open-access rules to diminish the opportunity of others who seek to achieve similar status through use of the MLS going forward. Instead of continuing to share listings with the open network of agents that supported their ascent, they would prefer to hoard choice listings among themselves. ***Antitrust law*** does not give them that right. *See Hahn v. Oregon Physicians' Service, 868 F.2d 1022, 1030-31 (9th Cir. 1988)*.

Thus, the Policy has some pro-competitive applications, even if its breadth may render it problematic overall from an antitrust **[*1034]** standpoint. Agents are free to be members of TAN (or other exclusive listing services) and to post listings on that platform, but they are not permitted to sequester listings away from the open MLS unless they are willing to forgo access to the MLS themselves. The most plausible inference is that the overall effect of the Policy, at least to the extent it applies to agents who wish to join exclusive listing services, is to increase competition. For homes listed by sellers' agents who are TAN members, the Policy ensures that buyers represented by both TAN and non-TAN agents are able to view their listings. And better information **[**24]** is available to the market, as agents are equally able to compare price and quality across all listings and use that information to create listings and negotiate sales.

The allegation that TAN is suffering a loss of membership due to the Policy comes as no surprise. But, in the language of the case law, TAN's injury flows from an aspect of the Policy that is not anti-competitive. *Pool Water Products, 258 F.3d at 1034*. The complaint itself confesses that TAN's members "generally advertise off-MLS for the purpose of avoiding the MLS," a tactic that is "render[ed] moot" by the Policy. And TAN recognizes that its members cannot simply give up their NAR memberships, because access to an MLS remains essential to being a successful player in the market for homes. In other words, TAN is losing members because agents recognize that the company's core value proposition is its offer of exclusivity. Thus, in contrast to an open-network service, TAN's injury is flowing from the aspect of the Policy that keeps listings available to a much larger audience of agents and their clients. In that context, the relatively small competitive harm represented by the loss of consumers' ability to choose TAN rather than the MLS pales in comparison **[**25]** to the procompetitive benefits of open information.

Indeed, the competitive harms alleged by TAN would largely be alleviated if the Policy merely applied to exclusive listing services. TAN complains that people wishing to sell their homes off-MLS are forced to use large brokerage firms, but that harm would be alleviated if a competing non-exclusive listing service could offer a matchmaking function akin to TAN's. TAN complains that some people wishing to sell their homes want a degree of privacy the MLS can't give them, but again, a non-exclusive listing service offering a matchmaking function would give them that. TAN complains that other rules governing the operation of and participation in the MLS are unattractive to home buyers and sellers, but a competing listing service open to all subscribers would alleviate that harm. A narrower policy would thus alleviate the competitive harms that TAN complains about, while still preventing exclusive services like TAN from harming competition in a different way.

Ultimately, when the allegations in the complaint show that the plaintiff's desired business model is harmful to competition, injury resulting from the aspect of a competitor's practice **[**26]** that interferes with that business model cannot be antitrust injury. TAN is not the first plaintiff to attempt to allege an antitrust injury by stating that a competitor's practice is preventing it from reaping the benefits of anticompetitive activity. *See* *Daniel v. American Board of Emergency Medicine, 428 F.3d 408, 438-39 (2d Cir. 2005)* ("In short, [plaintiffs'] theory of injury is not simply that ABEM-certified doctors command super-competitive remuneration; their injury is the inability to do likewise.").[2] But one of the virtues of the **[*1035]** antitrust standing analysis is that it prevents such a plaintiff from deploying ***antitrust law*** as a shield for its own anticompetitive activities. Accordingly, TAN's Sherman Act claim must be dismissed with prejudice.

C

Because TAN lacks antitrust injury, its three claims under California state laws also fail. A plaintiff bringing claims under the Cartwright Act must meet the same antitrust injury requirement as under the Sherman Act. *Kolling v. Dow Jones & Co., 137 Cal. App. 3d 709, 723-24, 187 Cal. Rptr. 797 (1982)*. And TAN has not stated a claim for intentional interference with contractual relations under California common law, because TAN does not allege that NAR induced TAN's members to breach their existing contracts—only that they chose not to renew their memberships. *See* *Ixchel Pharma, LLC v. Biogen, Inc., 9 Cal. 5th 1130, 1142, 266 Cal. Rptr. 3d 665, 470 P.3d 571 (2020)*. Finally, because TAN **[**27]** has not stated a claim for violation of any other law, its subsidiary claim for unlawful acts under the Unfair Competition Law also fails.

III

The motion to dismiss is granted, and the complaint is dismissed with prejudice.

IT IS SO ORDERED.

United States District Judge

---

[2] When asked to identify cases supporting its theory of antitrust standing, TAN flagged Judge Katzmann's partial dissent in *Daniel*. But even accepting Judge Katzmann's view of that case, it does not change the analysis here. In *Daniel*, allowing more doctors to join the contested certification program would have incrementally benefited competition insofar as it would have increased the supply of certified doctors available to consumers. *Id. at 446*. But in this case, there is no marginal benefit to competition in allowing TAN to operate, because it has designed its platform to exclude the vast majority of competing agents.

Judges: Before: GRABER, MURGUIA, and LEE, Circuit Judges.

Opinion

MEMORANDUM*

After the City of Santa Cruz refused to issue an operating permit to his surf school, David Meyberg sued the City and many of its employees. He alleged, among other **[*2]** things, that the City violated the *Sherman Antitrust Act, 15 U.S.C. § 1*, by limiting the number of surf school permits available and that a City employee violated his *First Amendment* rights by preventing him from operating his surf school in retaliation for his prior litigation. The district court dismissed his claims. We have jurisdiction under *28 U.S.C. § 1291*. **HN1**[] We review de novo a district court's grant of a motion to dismiss, *Shames v. Cal. Travel & Tourism Comm'n, 626 F.3d 1079, 1082 (9th Cir. 2010)*, and we affirm.

1. *Sherman Antitrust Act*: **HN2**[] Because Congress cannot accidentally abrogate state sovereignty, the Supreme Court in *Parker v. Brown* announced the "state action" immunity doctrine, cabining the Sherman Antitrust Act to non-state actors. *317 U.S. 341, 351-52, 63 S. Ct. 307, 87 L. Ed. 315 (1943)*. But we "recognize[] state-action immunity only when it is clear that the challenged anticompetitive conduct is undertaken pursuant to a regulatory scheme that is the State's own." *Chamber of Com. v. City of Seattle, 890 F.3d 769, 781 (9th Cir. 2018)* (internal quotation marks and citation omitted).

* This disposition is not appropriate for publication and is not precedent except as provided by *Ninth Circuit Rule 36-3*.

HN3[] The Supreme Court later extended this immunity to local government entities as long as the challenged action was "undertaken pursuant to a 'clearly articulated and affirmatively expressed' state policy to displace competition." *FTC v. Phoebe Putney Health Sys., Inc., 568 U.S. 216, 226, 133 S. Ct. 1003, 185 L. Ed. 2d 43 (2013)* (quoting *Cmty. Commc'ns Co. v. Boulder, 455 U.S. 40, 52, 102 S. Ct. 835, 70 L. Ed. 2d 810 (1982)*). And "[t]o pass the 'clear articulation' test, a state legislature need not expressly state . . . that the legislature **[*3]** intends for the delegated action to have anticompetitive effects." *Id.* (citation and internal quotation marks omitted). Rather, the clear articulation test is satisfied "if the anticompetitive effect [is] the 'foreseeable result' of what the State authorized." *Id. at 226-27* (citation omitted).

The district court held that the City lawfully limited the number of permits for surf schools on its beaches because *California Government Code section 65850* and the *California Coastal Act, Cal. Pub. Res. Code § 30001 et seq.*, evince a clear articulation of California's intent to extend its "state action" antitrust immunity to Santa Cruz's permitting ordinance. Thus, we must determine whether these state laws "confer 'express authority to take action that *foreseeably* will result in anticompetitive effects.'" *Hass v. Or. State Bar, 883 F.2d 1453, 1457 (9th Cir. 1989)* (quoting *Town of Hallie v. City of Eau Claire, 471 U.S. 34, 43-44, 105 S. Ct. 1713, 85 L. Ed. 2d 24 (1985)*).

We agree with the district court's reasoning. *California Government Code section 65850* states that any city may adopt ordinances to regulate "the use of . . . land as between industry, business, residences, open space, including agriculture, recreation, enjoyment of scenic beauty, use of natural resources, and other purposes," as well as the "size and use of . . . open spaces." *Cal. Gov't Code § 65850(a)*, *(c)(2)*. **HN4**[] And the Coastal Act affirms "basic goals . . . for the coastal zone," which include "[a]ssurn[ing] orderly, balanced utilization and conservation of **[*4]** coastal zone resources," and "[m]aximiz[ing] public access to and along the coast and mazimiz[ing] public recreational opportunities in the coastal zone consistent with sound resources conservation principles." *Cal. Pub. Res. Code § 30001.5(b)*, *(c)*. These two statutes provide clear guidance for expressly delegated zoning authority. In sum, it is foreseeable that, in pursuit of State goals embodied in the Coastal Act, the City will use its lawfully delegated zoning powers to limit business activity on public beaches.

Indeed, in *City of Columbia v. Omni Outdoor Advertising, Inc.*, South Carolina zoning laws authorized an anti-competitive city ordinance regulating the size, location, and spacing of billboards, thereby immunizing the ordinance from antitrust enforcement. *499 U.S. 365, 373, 111 S. Ct. 1344, 113 L. Ed. 2d 382 (1991)*. The Court explained that "[t]he very purpose of zoning regulation is to displace unfettered business freedom in a manner that regularly has the effect of preventing normal acts of competition[.]" *Id. at 373*. **HN5**[] Like the South Carolina statute, *section 65850(a)* authorizes the City to regulate the use of "land as between industry, business . . . open space, including . . . recreation, enjoyment of scenic beauty, use of natural resources, and other purposes." *Cal. Gov't Code § 65850(a)*. Surely, if "[t]he very **[*5]** purpose of zoning regulation is to displace unfettered business freedom," then a restriction on new entrants into the surfing school market is a foreseeable consequence of a statute authorizing restrictive zoning on a beach popular with surfing schools. *Omni, 499 U.S. at 373*.

Plaintiffs' argument that *Omni* applies only to "fixed structures" is unpersuasive. If the City may limit the number of businesses in a zone, then that power applies to all businesses, fixed or not. The contention that the City's regulation impermissibly limits competition because there are less restrictive alternatives available also fails. After all, because *section 65850* satisfies the test for state-action immunity, the City is exempt from federal ***antitrust law***.

2. *First Amendment*: We also affirm the district court's dismissal of the *First Amendment* claim because Meyberg has not plausibly pled his retaliation theory. *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*. **HN6**[] He must allege facts showing that "the protected activity was a substantial or motivating factor in the defendant's conduct." *O'Brien v. Welty, 818 F.3d 920, 932 (9th Cir. 2016)* (quoting *Pinard v. Clatskanie Sch. Dist. 6J, 467 F.3d 755, 770 (9th Cir. 2006)*).

Meyberg maintains that, because a City employee, Carol Scurich, was one of many named parties in a 2007 lawsuit in which he acted as counsel, "there is more than a 'suggestion' that SCURICH would have been aware of MEYBERG **[*6]** as the attorney who litigated a suit against her." But even if Scurich knew who he was, let alone remembered him as co-counsel in litigation roughly a decade earlier, Meyberg failed to plead facts plausibly supporting an inference that "the protected activity was a substantial or motivating factor in [Scurich's] conduct." *Id.* (citation omitted); *see* *Iqbal, 556 U.S. at 679-80*.

Finally, the district court did not abuse its discretion in denying Meyberg's request to file a Fourth Amended Complaint. *See* *Rich v. Shrader, 823 F.3d 1205, 1209 (9th Cir. 2016)*. Despite multiple opportunities, Meyberg has not been able to articulate a plausible theory of Sherman Act or *First Amendment* violation. It would be futile to allow him yet another chance.

AFFIRMED.

Rose Ml v. Mazaya United States

Superior Court of California, County of Orange

Opinion

MINUTE ORDER

EVENT ID/DOCUMENT ID: 73541949

EVENT TYPE: Demurrer to Amended Complaint

MOVING PARTY: Brennan Appel, GLOBAL HOOKAH DISTRIBUTORS, INC.

CAUSAL DOCUMENT/DATE FILED: Demurrer to Amended Complaint First Amended Complaint, 05/24/2021

EVENT ID/DOCUMENT ID: 73541950

EVENT TYPE: Motion to Strike Complaint

MOVING PARTY: Brennan Appel, GLOBAL HOOKAH DISTRIBUTORS, INC.

CAUSAL DOCUMENT/DATE FILED: Motion to Strike First Amended Complaint, 05/24/2021

Tentative Ruling posted on the Internet .

The Court **CONFIRMS** the tentative ruling as follows:

The Demurrer by Defendants Global Hookah Distributors, Inc., ("GHD") and Brennan Appel ("Appel"), collectively ("Defendants") to the First Amended Complaint ("FAC") by Plaintiff ROSE ML, Inc. ("Rose") is **SUSTAINED with 20 days leave to amend.**

Rose's FAC states one cause of action against moving Defendants for violation of *Bus. & Prof. Code §17200*, the California Unfair Competition Law ("UCL"). GHD and Appel demur to that 5th cause of action stated in the FAC on the grounds that it fails to state sufficient facts to constitute a cause of action against demurring defendants. (*CCP §430.10 (e)*). GHD and Appel also demur to the entire complaint **[*2]** on the grounds of uncertainty. (*CCP §430.10 (f)*). Rose admits that the only cause of action brought against these defendants is the 5th cause of action for violation of the UCL. (Opp. 4:3-4).

A party against whom a complaint has been filed may object by demurrer on the grounds of failure to state sufficient facts to constitute a cause of action (*C.C.P. §430.10(e)*) A demurrer challenges the defects appearing on the face of the pleading or from other matters properly subject to judicial notice. *(C.C.P. §430.30*)

Unfair competition includes "any unlawful, unfair or fraudulent business practice and unfair, deceptive, untrue or misleading advertising." (*Bus. & Prof. Code, §17200*.) A UCL claim "is not an all-purpose substitute for a tort or contract action." (*Graham v. Bank of America, N.A. (2014) 226 Cal.App.4th 594, 609*). By prohibiting "any unlawful business act or practice" the UCL borrows rules from other laws and makes violations of those rules independently actionable under the UCL. (*Id. at p. 610*). "A violation of another law is a predicate for stating a cause of action under the UCL's unlawful prong." (*Id.*) A defendant cannot be held liable for unlawful business practices where there is no violation of another law. (*Id*., citing *Scripps Clinic v. Superior Court (2003) 108 Cal.App.4th 917, 938*).

"...a plaintiff alleging an unfair business practice must show the 'defendant's conduct **[*3]** is tethered to an underlying constitutional, statutory or regulatory provision'" or threatens a "violation of an ***antitrust law*** or violates the policy or spirit of an ***antitrust law***". (*Id. at p. 613*).

The fraud prong of the UCL requires a duty to disclose (*Id. at p. 613-614*).

The facts pled in the FAC do not allege unlawful, unfair, or fraudulent conduct by GHD and Appel. The FAC does not allege that the defendants violated any other laws. The FAC does not factually plead conduct by GHD or Appel which violates an underlying constitutional, statutory or regulatory provision or which threatens a violation of an ***antitrust law*** or violates the policy or spirit of an ***antitrust law***. The FAC does not allege any agreement, oral or written contract, or any relationship between Rose and demurring Defendants, and there are no facts plead establishing GHD and Appel owed any duty of disclosure to Rose. The FAC fails to state sufficient facts to constitute a UCL claim against GHD and Appel.

Defendants' Motion to Strike portions of the FAC is **moot** in light of the court's ruling on the Demurrer.

Moving parties to give Notice.

Court orders Clerk to give notice.

LexisNexis® Headnotes

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN1[] **Motions to Dismiss, Failure to State Claim**

The same standards that apply to a defendant's motion to dismiss a claim asserted by a plaintiff also generally apply to a plaintiff's and counterclaim defendants motion to dismiss a counterclaim asserted by a defendant and counterclaim plaintiff.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN2[] **Motions to Dismiss, Failure to State Claim**

A motion to dismiss under Fed. R. Civ. P. 12(b)(6) may be granted only when there is no cognizable legal theory to support the claim or when the complaint lacks sufficient factual allegations to state a facially plausible claim for relief. In evaluating the sufficiency of a complaint's factual allegations, the court must accept as true all well-pleaded material facts alleged in the complaint and construe them in the light most favorable to the non-moving party. To be entitled to a presumption of truth, allegations in a complaint or counterclaim may not simply recite the elements of a cause of action, but must contain sufficient allegations of underlying facts to give fair notice and to enable the opposing party to defend itself effectively. The district court must draw all reasonable inferences from the factual allegations in favor of the plaintiff. The district court need not, however, credit the plaintiff's legal conclusions that are couched as factual allegations.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

Evidence > Inferences & Presumptions > Inferences

HN3[] **Complaints, Requirements for Complaint**

A complaint must contain sufficient factual allegations to plausibly suggest an entitlement to relief, such that it is not unfair to require the opposing party to be subjected to the expense of discovery and continued litigation. A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged. The plausibility standard is not akin to a probability requirement, but it asks for more than a sheer possibility that a defendant has acted unlawfully.

Business & Corporate Compliance > ... > Contracts Law > Contract Conditions & Provisions > Forum Selection Clauses

Civil Procedure > Preliminary Considerations > Venue > Forum Non Conveniens

HN4[] **Contract Conditions & Provisions, Forum Selection Clauses**

The appropriate way to enforce a forum-selection clause pointing to a state or foreign forum is through the doctrine of forum non conveniens. The doctrine of forum non conveniens rests on the principle that a court may resist imposition upon its jurisdiction when the matter may be more conveniently tried in another forum, even when jurisdiction is authorized by the letter of a general venue statute. The United States Court of Appeals for the Ninth Circuit has cautioned, however, that the doctrine of forum non conveniens is a drastic exercise of the court's inherent power because, unlike a mere transfer of venue, it results in the dismissal of a plaintiff's case. Therefore, an appellate court has treated forum non conveniens as an exceptional tool to be employed sparingly, and not a doctrine that compels plaintiffs to choose the optimal forum for their claim.

Business & Corporate Compliance > ... > Contracts Law > Contract Conditions & Provisions > Forum Selection Clauses

Civil Procedure > ... > Venue > Motions to Transfer > Choice of Forum

HN5[] **Contract Conditions & Provisions, Forum Selection Clauses**

When parties to a lawsuit have formed a contract that includes a valid forum-selection clause, federal law controls whether that clause is enforceable. In Atl. Marine Constr. Co. v. United States Dist. Court, the U.S. Supreme Court clarified the factors that a district court should consider when evaluating the enforceability of a valid forum-selection clause. When a valid forum-selection clause is present, the plaintiff's choice of forum merits no weight. Additionally, the district court should not consider arguments about the parties' private interests. A court accordingly must deem the private-interest factors including inconvenience to the parties to weigh entirely in favor of the preselected forum. A district court may only consider arguments concerning public-interest factors, which will rarely defeat a motion to dismiss.

Business & Corporate Compliance > ... > Contracts Law > Contract Conditions & Provisions > Forum Selection Clauses

Civil Procedure > Preliminary Considerations > Venue > Forum Non Conveniens

Evidence > Burdens of Proof > Allocation

HN6[] Contract Conditions & Provisions, Forum Selection Clauses

A valid forum-selection clause alters the ordinary forum non conveniens analysis. A district court must give a valid forum-selection clause controlling weight in all but the most exceptional cases. Courts should not unnecessarily disrupt the parties' settled expectations when the parties have contracted in advance to litigate disputes in a particular forum. In all but the most unusual cases, therefore, the interest of justice is served by holding parties to their bargain. Forum selection clauses are prima facie valid and are enforceable unless the party challenging enforcement shows the clause is unreasonable under the circumstances. A party asserting a claim subject to a valid forum-selection clause pointing to another forum bears the burden of showing exceptional circumstances that make dismissal inappropriate despite that clause.

Business & Corporate Compliance > ... > Contracts Law > Contract Conditions & Provisions > Forum Selection Clauses

Civil Procedure > Preliminary Considerations > Venue > Forum Non Conveniens

HN7[] Contract Conditions & Provisions, Forum Selection Clauses

In the absence of a valid forum-selection clause, the common law doctrine of forum non conveniens provides that a court may dismiss an action even when venue is proper if the defendant makes a clear showing of facts which establish such oppression and vexation of a defendant so as to be out of proportion to plaintiff's convenience, which may be shown to be slight or nonexistent. The moving party must prove: (1) that there is an adequate alternative forum, and (2) that the balance of private and public interest factors favor dismissal.

Civil Procedure > ... > Venue > Federal Venue Transfers > Convenience Transfers

Civil Procedure > Preliminary Considerations > Venue > Forum Non Conveniens

HN8[] Federal Venue Transfers, Convenience Transfers

After the codification of 28 U.S.C.S. § 1404(a), the doctrine of forum non conveniens has limited application, as explained by the Supreme Court, the common-law doctrine of forum non conveniens has continuing application in federal courts only in cases where the alternative forum is abroad, and perhaps in rare instances where a state or territorial court serves litigational convenience best. For the federal court system, Congress has codified the doctrine and has provided for transfer, rather than dismissal, when a sister federal court is the more convenient place for trial of the action.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN9[] Motions to Dismiss, Failure to State Claim

A plaintiff who makes a claim in a complaint but fails to raise the issue in response to a defendant's motion to dismiss that claim has effectively abandoned that claim.

Business & Corporate Compliance > ... > Breach > Breach of Contract Actions > Elements of Contract Claims

HN10[] Breach of Contract Actions, Elements of Contract Claims

Under Delaware law, the elements of a breach of contract claim are: (1) a contractual obligation; (2) a breach of that obligation by the defendant (or counterclaim defendant); and (3) resulting damage to the plaintiff (or counterclaim plaintiff).

Business & Corporate Compliance > ... > Breach > Breach of Contract Actions > Elements of Contract Claims

HN11[] Breach of Contract Actions, Elements of Contract Claims

To state a claim for breach of contract, plaintiff must allege the existence of a contract, its relevant terms, plaintiff's full performance and lack of breach, and defendant's breach resulting in damage to plaintiff.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > ... > US Department of Justice Actions > Criminal Actions > Intent

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN12[] Actual Monopolization, Claims

To state a claim of monopolization, a defendant must plausibly allege that: (1) Plaintiff possesses monopoly power in the relevant market; and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident. To safeguard the incentive to innovate, the possession of monopoly power will not be found unlawful unless it is accompanied by an element of anticompetitive conduct. To state a claim of attempted monopolization, a defendant must plausibly allege: (1) that plaintiff has engaged in predatory or anticompetitive conduct with (2) a specific intent to monopolize and (3) a dangerous probability of achieving monopoly power.

Antitrust & Trade Law > Clayton Act > Claims

Antitrust & Trade Law > Clayton Act > Penalties

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

Antitrust & Trade Law > Clayton Act > Remedies > Damages

HN13[] Clayton Act, Claims

For a private plaintiff to recover money damages, indeed, automatic treble damages in an antitrust action, § 4 of the Clayton Act, 15 U.S.C.S. § 15, requires a plaintiff to show causal antitrust injury, which is an injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > ... > US Department of Justice Actions > Criminal Actions > Intent

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN14[] **Actual Monopolization, Claims**

The offense of monopoly under § 2 of the Sherman Act has two elements: (1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

HN15[] **Actual Monopolization, Monopoly Power**

One of the leading treatises in the field defines monopolistic conduct as acts that: (1) are reasonably capable of creating, enlarging or prolonging monopoly power by impairing the opportunities of rivals; and (2) either (2a) do not benefit consumers at all, or (2b) are unnecessary for the particular consumer benefits claimed for them, or (2c) produce harms disproportionate to any resulting benefits.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

HN16[] **Attempts to Monopolize, Elements**

Direct evidence of intent alone, without corroborating evidence of conduct, cannot sustain a claim of attempted monopolization. Direct evidence of intent to vanquish a rival in an honest competitive struggle cannot help to establish an antitrust violation. It also must be shown that the defendant sought victory through unfair or predatory means. Evidence of conduct is thus indispensable.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Sherman Act

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN17[] **Actual Monopolization, Claims**

In reciting the basic elements of monopolization and attempted monopolization, the United States Court of Appeals for the Ninth Circuit stated that conduct that does not constitute willful acquisition or maintenance of monopoly power thus precluding establishment of the offense of monopolization cannot constitute the predatory or anticompetitive conduct required to establish the offense of attempt to monopolize. Conduct lawful for a monopolist must, a fortiori, be excluded as a basis for the attempt offense.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Labor & Employment Law > ... > Conditions & Terms > Trade Secrets & Unfair Competition > Noncompetition & Nondisclosure Agreements

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN18[] **Per Se Rule & Rule of Reason, Per Se Violations**

Ancillary non-compete agreements among participants in a vertical supply relationship, however, are not per se unlawful but instead are evaluated under a Rule of Reason. The Rule of Reason has been regarded as a standard for testing the enforceability of covenants in restraint of trade which are ancillary to a legitimate transaction. Vertical nonprice restraints are evaluated under the Rule of Reason. Holding that per se rules of illegality are appropriate only when they relate to conduct that is manifestly anticompetitive.

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN19[] **Private Actions, Sherman Act**

Disparagement of competitors is only actionable in the Ninth Circuit when the representation is: (1) clearly false, (2) clearly material, (3) clearly likely to induce reasonable reliance, (4) made to buyers without knowledge of the subject matter, (5) continued for prolonged periods, and (6) not readily susceptible of neutralization or other offset by rivals.ECF 236 at 17-18. Edwards then cites.

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN20[] **Private Actions, Sherman Act**

While the disparagement of a rival or compromising a rival's employee may be unethical and even impair the opportunities of a rival, its harmful effects on competitors are ordinarily not significant enough to warrant recognition under § 2 of the Sherman Act. The district court therefore insists on a preliminary showing of significant and more-than-temporary harmful effects on competition and not merely upon a competitor or customer before these practices can rise to the level of exclusionary conduct.

Antitrust & Trade Law > Consumer Protection > False Advertising > US Federal Trade Commission

Evidence > Inferences & Presumptions > Presumptions > Creation

HN21[] **False Advertising, US Federal Trade Commission**

A plaintiff may overcome de minimis presumption by cumulative proof that the representations were: (1) clearly false, (2) clearly material, (3) clearly likely to induce reasonable reliance, (4) made to buyers without knowledge of the subject matter, (5) continued for prolonged periods, and (6) not readily susceptible of neutralization or other offset by rivals.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN22[] **Remedies, Damages**

For the proposition that private plaintiffs can be compensated only for injuries that the antitrust laws were intended to prevent. To show antitrust injury, a plaintiff must prove that his loss flows from an anticompetitive aspect or effect of the defendant's behavior.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > Predatory Pricing

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN23[] **Attempts to Monopolize, Elements**

Antitrust laws protect competition, not competitors. Thus, an antitrust plaintiff must demonstrate not only that the defendant engaged in unfair or predatory tactics, but also that those tactics allowed the defendant to maintain or come dangerously close to obtaining monopoly status. Indeed, not even an act of pure malice by one business competitor against another will alone state an antitrust violation.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Business & Corporate Compliance > ... > Breach > Breach of Contract Actions > Elements of Contract Claims

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > Sherman Act > Defenses

HN24[] **Remedies, Damages**

A claimed breach of contract by unreasonable conduct, standing alone, should not give rise to antitrust liability. A breach of contract is not ordinarily an antitrust violation. It is not antitrust's purpose to regulate ordinary business contracts. Instead, antitrust liability will only be predicated on conduct that also happens to create a contract dispute when that conduct is anticompetitive and without a legitimate business reason.

Antitrust & Trade Law > Sherman Act > Claims

HN25[] Sherman Act, Claims

Nor is reticence to premise antitrust liability on a single instance of bad conduct aimed at a single competitor unique to antitrust claims relying on breach of contract. Isolated tortious activity alone does not constitute exclusionary conduct for purposes of a 15 U.S.C.S. § 2 violation, absent a significant and more than a temporary effect on competition, and not merely on a competitor or customer. A single incident of the defendant secretly hiring one of the plaintiff's employees and then having that employee and other enter the plaintiff's office at night and remove and destroy various files was a single event that did not amount to anticompetitive conduct.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Right to Petition Immunity

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Scope

HN26[] Noerr-Pennington Doctrine, Right to Petition Immunity

Under the Noerr-Pennington doctrine, those who petition any department of the government for redress are generally immune from statutory liability for their petitioning conduct, including the use of the channels and procedures of state and federal courts. Although Noerr-Pennington immunity extends to judicial proceedings, it does not protect persons engaging in sham litigation. The United States Court of Appeals for the Ninth Circuit has recognized three circumstances when litigation might be a sham.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Right to Petition Immunity

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Scope

HN27[] Noerr-Pennington Doctrine, Right to Petition Immunity

The sham exception requires that the antitrust plaintiff must demonstrate that the lawsuit was: (1) objectively baseless, and (2) a concealed attempt to interfere with the plaintiff's business relationships. The Supreme Court has explained these two necessary criteria for sham litigation as follows: First, the lawsuit must be objectively baseless in the sense that no reasonable litigant could realistically expect success on the merits. If an objective litigant could conclude that the suit is reasonably calculated to elicit a favorable outcome, the suit is immunized under E. R.R. Presidents Conf. v. Noerr Motor Freight, and an antitrust claim premised on the sham exception must fail. Only if challenged litigation is objectively meritless may a court examine the litigant's subjective motivation. Under this second part of our definition of sham, the court should focus on whether the baseless lawsuit conceals an attempt to interfere directly with the business relationships of a competitor through the use of the governmental process, as opposed to the outcome of that process, as an anticompetitive weapon. The existence of probable cause to institute legal proceedings precludes a finding that an antitrust defendant has engaged in a sham litigation.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

HN28[] Noerr-Pennington Doctrine, Sham Exception

The second circumstance for when litigation might be a sham is if the alleged anticompetitive behavior is the filing of a series of lawsuits. The third circumstance may arise if the alleged anticompetitive behavior consists of making intentional misrepresentations to the court.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

HN29[] **Noerr-Pennington Doctrine, Sham Exception**

A winning lawsuit is by definition a reasonable effort at petitioning for redress and therefore not a sham.

Civil Procedure > Trials > Jury Trials > Right to Jury Trial

Constitutional Law > Bill of Rights > Fundamental Rights > Trial by Jury in Civil Actions

HN30[] **Jury Trials, Right to Jury Trial**

Bifurcation enhances the parties' right to a jury trial by making the issues the jury must consider less complex.

Opinion

[*1161] OPINION AND ORDER ON PLAINTIFF'S MOTION TO DISMISS COUNTERCLAIMS

Michael H. Simon, District Judge.

Plaintiff Edwards Vacuum, LLC (Edwards) brings this lawsuit against one of its suppliers and competitors, Hoffman Instrumentation Supply, Inc., doing business as HIS Innovations Group (HIS), and five employees of HIS who previously worked for Edwards (the Individual Defendants). Edwards designs integrated vacuum pump systems, mostly for computer **[**2]** (or semiconductor) chip manufacturers. HIS supplies parts to Edwards but also recently began to compete with Edwards by designing, making, and selling its own integrated vacuum pump systems. In its Second Amended Complaint, Edwards alleges misappropriation of trade secrets, breach of contract, tortious interference with economic relations, conversion, breach of the duty of loyalty, and unjust enrichment. HIS denies liability. HIS also asserts three counterclaims, alleging breach of contract, monopolization, and attempted monopolization. Before the Court is Edwards's motion to dismiss HIS's counterclaims under *Rule 12(b)(6) of the Federal Rules of Civil Procedure* and alternative motion to dismiss under the doctrine of forum *non conveniens*. For the reasons stated below, the Court grants in part and denies in part Edwards's motions to dismiss. The Court also bifurcates HIS's antitrust counterclaims and stays any discovery that is related only to HIS's antitrust counterclaims. HIS's breach of contract counterclaim may proceed.

STANDARDS[1]

A. Motion to Dismiss for Failure to State a Claim

HN2[] A motion to dismiss under *Rule 12(b)(6)* may be granted only when there is no cognizable legal theory to support the claim or when the complaint lacks sufficient factual **[**3]** allegations to state a facially plausible claim for relief. *Shroyer v. New Cingular Wireless Servs., Inc., 622 F.3d 1035, 1041 (9th Cir. 2010)*. In evaluating the sufficiency of a complaint's factual allegations, the court must accept as true all well-pleaded material facts alleged in the complaint and construe them in the light most favorable to the non-moving party. *Wilson v. Hewlett-Packard Co., 668 F.3d 1136, 1140 (9th Cir. 2012)*; *Daniels-Hall v. Nat'l Educ. Ass'n, 629 F.3d 992, 998 (9th Cir. 2010)*. "[T]o be entitled to a presumption of truth, allegations in a complaint or counterclaim may not simply recite the elements of a cause of action, but must contain sufficient allegations of underlying facts to give fair notice and to enable the opposing party to defend itself effectively." *Starr v. Baca, 652 F.3d 1202, 1216 (9th Cir. 2011)*. The court must draw all reasonable inferences from the factual allegations in favor of the plaintiff. *Newcal Indus. v. Ikon Office Solution, 513 F.3d 1038, 1043 n.2 (9th Cir. 2008)*. The court need not, however, credit the plaintiff's legal conclusions that are couched as factual allegations. *Ashcroft v. Iqbal, 556 U.S. 662, 678-79, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*.

HN3[] A complaint must contain sufficient factual allegations to "plausibly suggest an entitlement to relief, such that it is not unfair to require the opposing party to be subjected to the expense of discovery and continued litigation." *Starr, 652 F.3d at* ***[*1162]*** *1216*. "A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the **[**4]** misconduct alleged." *Iqbal, 556 U.S. at 678* (citing *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 556, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*). "The plausibility standard is not akin to a probability requirement, but it asks for more than a sheer possibility that a defendant has acted unlawfully." *Mashiri v. Epsten Grinnell & Howell, 845 F.3d 984, 988 (9th Cir. 2017)* (quotation marks omitted).

B. Motion to Dismiss for Forum *Non Conveniens*

1. Forum *Non Conveniens* Based on a Contractual Forum-Selection Clause

HN4[] "[T]he appropriate way to enforce a forum-selection clause pointing to a state or foreign forum is through the doctrine of forum *non conveniens*." *Atl. Marine Constr. Co. v. U.S. Dist. Court for the W. Dist. of Tex., 571 U.S. 49, 60, 134 S. Ct. 568, 187 L. Ed. 2d 487 (2013)*. The doctrine of forum *non conveniens* "rests on the principle that a court may resist imposition upon its jurisdiction when the matter may be more conveniently tried in another forum, even when jurisdiction is authorized by the letter of a general venue statute." *Hamilton v. Firestone Tire & Rubber Co., 679 F.2d 143, 146 (9th Cir. 1982)* (citing *Gulf Oil Corp. v. Gilbert, 330 U.S. 501, 67 S. Ct. 839, 91 L. Ed. 1055 (1947)*). The Ninth Circuit has cautioned, however, that "[t]he doctrine of forum *non conveniens* is a drastic exercise of the court's 'inherent power' because, unlike a mere transfer of venue, it results in the dismissal of the plaintiff's case. . . . Therefore, we have treated forum *non conveniens* as 'an exceptional tool to be employed sparingly,' and

---

[1] ***HN1***[] The same standards that apply to a defendant's motion to dismiss a claim asserted by a plaintiff also generally apply to a plaintiff's (and counterclaim defendant's) motion to dismiss a counterclaim asserted by a defendant (and counterclaim plaintiff). *See* *Unigestion Holding, S.A. v. UPM Tech., Inc., 2016 U.S. Dist. LEXIS 97083, 2016 WL 4033976, at *2 (D. Or. July 26, 2016)*.

not a 'doctrine that compels plaintiffs to choose the optimal forum for their claim.'" *Carijano v. Occidental Petroleum Corp., 643 F.3d 1216, 1224 (9th Cir. 2011)* (quoting *Dole Food Co. v. Watts, 303 F.3d 1104, 1118 (9th Cir. 2002)*).

HN5[] When **[**5]** parties to a lawsuit have formed a contract that includes a valid forum-selection clause, federal law controls whether that clause is enforceable. *See Manetti-Farrow, Inc. v. Gucci Am., Inc., 858 F.2d 509, 513 (9th Cir. 1988)*. In *Atlantic Marine*, the Supreme Court clarified the factors that a district court should consider when evaluating the enforceability of a valid forum-selection clause. *571 U.S. at 63-65*. When a valid forum-selection clause is present, "the plaintiff's choice of forum merits no weight." *Id. at 63*. Additionally, the district court "should not consider arguments about the parties' private interests. . . . A court accordingly must deem the private-interest factors [including inconvenience to the parties] to weigh entirely in favor of the preselected forum." *Id. at 582*. A district court may only consider arguments concerning public-interest factors, which "will rarely defeat" a motion to dismiss. *Id.*

HN6[] The Supreme Court also explained that a valid forum-selection clause alters the ordinary forum *non conveniens* analysis. *See Atl. Marine, 571 U.S. at 63*. A court must give a valid forum-selection clause "controlling weight in all but the most exceptional cases." *Id. at 60* (citation and quotation marks omitted). Courts should not "unnecessarily disrupt the parties' settled expectations" when the parties have "contracted **[**6]** in advance to litigate disputes in a particular forum." *Id. at 66*. "In all but the most unusual cases, therefore, 'the interest of justice' is served by holding parties to their bargain." *Id.*; *see also Swenson v. T-Mobile USA, Inc., 415 F. Supp. 2d 1101, 1104 (S.D. Cal. 2006)* ("[Forum **[*1163]** selection clauses] are prima facie valid and are enforceable unless the party challenging enforcement shows the clause is unreasonable under the circumstances." (citing *R.A. Argueta v. Banco Mexicano, S.A., 87 F.3d 320, 325 (9th Cir. 1996)*)). A party asserting a claim subject to a valid forum-selection clause pointing to another forum bears the burden of showing exceptional circumstances that make dismissal inappropriate despite that clause. *See Atl. Marine, 571 U.S. at 63*.

2. Common Law Forum *Non Conveniens*

HN7[] In the absence of a valid forum-selection clause, the common law doctrine of forum *non conveniens* provides that a court may dismiss an action even when venue is proper if the defendant makes "a clear showing of facts which establish such oppression and vexation of a defendant so as to be out of proportion to plaintiff's convenience, which may be shown to be slight or nonexistent." *Dole Food Co., 303 F.3d at 1118* (citation and quotation marks omitted). The moving party must prove "(1) that there is an adequate alternative forum, and (2) that the balance of private and public interest factors favor dismissal." **[**7]** *Id.*

HN8[] After the codification of *28 U.S.C. § 1404(a)*, the doctrine of forum *non conveniens* has limited application, as explained by the Supreme Court:

> The common-law doctrine of forum *non conveniens* has continuing application in federal courts only in cases where the alternative forum is abroad, and perhaps in rare instances where a state or territorial court serves litigational convenience best. For the federal court system, Congress has codified the doctrine and has provided for transfer, rather than dismissal, when a sister federal court is the more convenient place for trial of the action.

Sinochem Int'l Co. v. Malaysia Int'l Shipping Corp., 549 U.S. 422, 430, 127 S. Ct. 1184, 167 L. Ed. 2d 15 (2007) (citations and quotation marks omitted).

BACKGROUND[2]

[2] HIS's three counterclaims are stated in HIS's Answer, Affirmative Defenses, and Counterclaims to Plaintiff's Second Amended Complaint. ECF 191. HIS did not use sequentially numbered paragraphs throughout the entirety of that document. Instead, HIS sequentially numbered first its paragraphs for its Answer (¶¶ 1-205), did not number its paragraphs for its 19 affirmative defenses, and then sequentially numbered its paragraphs for its counterclaims beginning, for a second time, with ¶ 1. In this

A. HIS's Counterclaim Alleging Breach of Contract

In its counterclaim alleging breach of contract, HIS asserts that in the spring of 2019, HIS and Edwards were in active discussions about HIS possibly becoming Edwards's exclusive supplier of key components used in Edwards's integrated vacuum pump frame systems. The parties also were discussing the potential for HIS to build subsystems for Edwards, or to assemble subsystems into complete systems. In exchange, HIS would agree not to perform similar work for any other seller or brand. By mid-May 2019, HIS had circulated **[**8]** a draft proposal for Edwards's consideration. ECF 191, ¶ 37. Shortly thereafter, Edwards's key customer[3] reached out to HIS to request that HIS develop an "agnostic" integrated vacuum pump frame system, capable of being used with vacuum pumps and other equipment made by any approved supplier and not just by Edwards. **[*1164]** Soon after receiving that invitation, HIS informed Edwards of HIS's new "opportunity" presented by this key customer. *Id.* ¶ 38.

Within a few weeks, Edwards and HIS began discussing a new topic, the possibility of Edwards acquiring HIS. *Id.* ¶ 45. HIS and Edwards formally began due diligence on June 21, 2019, and they agreed to a confidentiality and nondisclosure agreement (NDA) on that date. *Id.* ¶ 46; ECF 77-12 at 9-12 (copy of NDA). With HIS listed as the "Disclosing Party" and Edwards as the "Recipient," the parties agreed in the NDA that if HIS disclosed certain confidential information to Edwards about HIS's business, then the "Recipient [Edwards] shall use the Confidential Information solely for the Purpose" of evaluating a possible business transaction between Edwards and HIS. ECF 77-12 at 9. This confidential information included Edwards receiving "detailed information **[**9]** regarding HIS's strategic plans to develop an integrated vacuum pump frame system, including HIS's anticipated cost, margin, head count requirements, labor rates, and capital equipment spending for its new system." ECF 191, ¶ 47. The NDA also included the following choice of law provision and mandatory forum-selection clause:

> This Agreement and all matters relating hereto are governed by, and construed in accordance with, the laws of the State of Delaware, without regard to the conflict of laws [*sic*] provisions of such State. Each Party irrevocably submits to the exclusive jurisdiction of the federal or state courts of Delaware in any such suit, action or proceeding.

ECF 77-12 at 11, ¶ 11.

HIS further alleges that on July 31, 2019, Edwards delivered to HIS a "lowball offer" to purchase HIS, which HIS rejected. ECF 191, ¶ 48. Edwards then "withdrew from the acquisition process." *Id.* HIS also contends that "[p]romptly after withdrawing from the acquisition process, Edwards began a systematic effort to reduce its pricing just enough to target HIS's projected cost savings to [Edwards's primary customer]." *Id.* ¶ 49. HIS adds, on "information and belief," that Edwards began "soliciting HIS's **[**10]** suppliers and demanding price concessions to match HIS's confidentially disclosed cost targets" and that "Edwards used HIS's confidential information obtained pursuant to the NDA to make targeted representations to [Edwards's key customer] that [Edwards] could achieve cost savings in order to persuade [that customer] to defer its invitation for HIS to qualify" HIS's competitive integrated vacuum pump frame system, known as the "Liberty Frame System." *Id*; *see also id.* ¶¶ 29-31. Based on these allegations, HIS contends that Edwards breached the June 21, 2019 NDA. *Id.* ¶¶ 101-105.[4]

B. HIS's Counterclaims Alleging Monopolization and Attempted Monopolization

---

Opinion and Order, all paragraph citations to HIS's counterclaims in ECF 191 refer to the second set of HIS's sequentially numbered paragraphs.

[3] The parties know the identity of this customer and have requested that the Court not identify that customer in publicly filed documents.

[4] In HIS's counterclaims (ECF 191), HIS sometimes refers to the date of the 2019 NDA as June 21, 2019 (*see* ¶ 46) and sometimes refers to its date as June 17, 2019 (*see* ¶ 102). Based on ECF 77-12 at 9-12, which appears to be a copy of the NDA at issue, the Court assumes that the correct date is June 21, 2019.

HIS's other counterclaims allege monopolization and attempted monopolization, in violation of *§ 2 of the Sherman Act*, *15 U.S.C. § 2*. HIS identifies "integrated vacuum pump frame systems" as the relevant product market and the entire United States as the relevant geographic market. ECF 191, ¶¶ 3-5. HIS also alleges that the relevant market is highly concentrated, with two manufacturers collectively holding a 95 percent market share. *Id.* ¶ 12. HIS asserts that in the relevant market Edwards holds a 70 percent market share **[*1165]** and the second largest competitor **[**11]** (a company other than HIS) holds a 25 percent market share. *Id.* ¶ 18. HIS also contends that the relevant market has "high barriers to entry" and "inelastic demand." *Id.* ¶ 18-20.

In addition, HIS alleges that HIS's potential entry into this market threatens Edwards's monopoly power and that Edwards's unlawfully maintains its monopoly power through exclusionary conduct. As alleged in HIS's antitrust counterclaims, Edwards

> exacerbated barriers to entry and suppressed competition through a *set of anticompetitive tactics that include imposing (or attempting to impose) non-compete covenants on its suppliers, employee intimidation, "no poach" agreements, customer threats, and bad faith litigation*. Edwards has deployed a combination of these tactics against HIS, first in an effort to prevent its market entry and, failing that, to burden HIS's ability to gain sales and market *share*.

Id. ¶ 32 (emphasis added).[5]

To summarize, HIS alleges that Edwards engaged in the following anticompetitive conduct: (1) Edwards demanded (but did not receive) a non-compete agreement from HIS in exchange for nominal status as a "preferred supplier" (*id.* ¶¶ 36-44); (2) an Edwards officer incorrectly assumed that **[**12]** Edwards and HIS had entered into a mutual "no-poach" agreement regarding each company's respective employees (*id.* ¶¶ 53-69); (3) Edwards "warned" one of HIS's customers, GlobalFoundries, "not to purchase [HIS's] Liberty Frame Systems because GlobalFoundaries would risk having the systems ordered to be removed from its sub-fabs" (*id.* ¶ 33) and not to do "business with HIS, implying that doing so would risk retaliation from Edwards" (*id.* ¶ 72(c)); (4) after failing to acquire HIS, Edwards exploited HIS's confidential information in breach of the NDA, to obstruct HIS's market entry (*id.* ¶¶ 45-52); and (5) Edwards brought this lawsuit asserting meritless claims, including trade secret claims, for the purpose of retaliating against HIS and its employees for HIS's use of competitive hiring practices, raising HIS's costs, and chilling demand for HIS's competitive frame systems (*id.* ¶¶ 53-84).

DISCUSSION

A. Edwards's Motion to Dismiss for Failure to State a Claim

Under *Rule 12(b)(6)*, Edwards challenges both HIS's breach of contract counterclaim and HIS's two antitrust counterclaims, arguing that HIS has failed to state claims upon which relief can be granted. The Court first discusses HIS breach of contract **[**13]** counterclaim. The Court then discusses HIS's two antitrust counterclaims, alleging monopolization and attempted monopolization.

1. HIS's Counterclaim Alleging Breach of Contract

---

[5] In its antitrust counterclaims, HIS also alleges that Edwards "ties" the sale of its integrated vacuum pump frame systems to related products and services (e.g., pumps, abatement systems, and aftermarket services). ECF 191, ¶¶ 26-27. In HIS's response to Edwards's motion to dismiss, however, HIS does not mention tying among HIS's recitation of Edwards's allegedly anticompetitive acts. Thus, for purposes of the pending motion, the Court will only consider the alleged anticompetitive conduct that HIS explicitly discusses in its response. *Accord* *Walsh v. Nevada Dep't of Hum. Res., 471 F.3d 1033, 1037 (9th Cir. 2006)* (stating that ***HN9***[] a plaintiff who "makes a claim" in a complaint "but fails to raise the issue in response to a defendant's motion to dismiss" that claim "has effectively abandoned [that] claim").

HIS asserts that the June 21, 2019 NDA is a valid and binding contract between **[*1166]** Edwards and HIS and that Edwards breached that contract. The NDA contains a choice of law provision selecting Delaware law. ECF 77-12, ¶ 11. ***HN10***[] Under Delaware law, the elements of a breach of contract claim are: (1) a contractual obligation; (2) a breach of that obligation by the defendant (or counterclaim defendant); and (3) resulting damage to the plaintiff (or counterclaim plaintiff). *See* *Greenstar, LLC v. Heller, 814 F. Supp. 2d 444, 450 (D. Del. 2011)* (citation omitted).[6]

Edwards argues that HIS's breach of contract claim fails "because HIS never alleges any actual facts—as opposed to unsupported speculation—that Edwards breached the NDA." ECF 228 at 28. Edwards adds, "HIS pleads that 'upon information and belief, Edwards began soliciting HIS's suppliers and demanding price concessions to match HIS's confidentially disclosed cost targets" and "[u]pon information and belief, Edwards used HIS's confidential information obtained pursuant to the NDA to make targeted representations to [Edwards's **[**14]** key customer] that it could achieve cost savings in order to persuade [that customer] to defer its invitation for HIS to qualify the Liberty Frame System." *Id.* (quoting ECF 191, ¶ 49); *see also* ECF 191, ¶104 ("Upon information and belief, Edwards breached the NDA by using confidential information regarding HIS's development of the Liberty Frame System to interfere with HIS's relationship with [Edwards's key customer] and persuade [that customer] to defer its solicitation of HIS to develop and qualify the Liberty Frame System.").

Edward cites a district court decision for the proposition that "[a]lthough a plaintiff may allege a fact upon information and belief where there is reason to believe that discovery would likely find evidence for the fact, such allegations require more than a mere hunch or guess." *Cooney v. BAC Home Loans Servicing, 2012 U.S. Dist. LEXIS 205452, 2012 WL 13042680, at *5 (D.N.J. March 28, 2012)*. Edwards also relies on another district court decision for the statement that, "[a]llegations based on information and belief, however, must set forth sufficient factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Stimson Lumber Co. v. Int'l. Paper Co., 2010 U.S. Dist. LEXIS 131087, 2010 WL 5128650, at *4 (D. Mont. Oct. 18, 2010)* (simplified).

In response, HIS cites the Ninth Circuit's decision in *Soo Park v. Thompson, 851 F.3d 910 (9th Cir. 2017)*. In that case, the Ninth **[**15]** Circuit explained:

> The *Twombly* plausibility standard . . . does not prevent a plaintiff from pleading facts alleged upon information and belief where the facts are peculiarly within the possession and control of the defendant or where the belief is based on factual information that makes the inference of culpability plausible.

Id. at 928 (quoting *Arista Records, LLC v. Doe 3, 604 F.3d 110, 120 (2d Cir. 2010)*).

Soo Park involved a civil conspiracy claim under *42 U.S.C. § 1983*, in which the plaintiff (the defendant in a murder trial) alleged on information and belief that the defendant in the civil lawsuit (the District Attorney) colluded with unnamed state officers to arrange for the unavailability of a defense witness at the criminal trial. The plaintiff's allegation was supported by facts, including that, during criminal proceedings against the plaintiff, the District **[*1167]** Attorney brought unexpected felony charges against the witness, who then refused to testify, after which the District Attorney dropped the charges against that witness. *Id. at 917*. The district court granted the defendant's (the District Attorney) motion to dismiss, and the plaintiff appealed. The Ninth Circuit reversed, holding that the "complaint alleged facts that are suggestive of an agreement to engage in illegal **[**16]** conduct" and that "[w]hen the entire factual context is considered," the plaintiff's claim was plausible. *Id. at 928*.

Here, HIS alleges that shortly after HIS was approached by Edwards's key customer, asking Edwards to develop an "agnostic" integrated vacuum pump frame system, Edwards expressed interest in potentially acquiring HIS and sought disclosure from HIS of HIS's confidential business information, including costs, margins, labor rates, and

---

[6] ***HN11***[] Oregon law is not materially different. *See, e.g.,* *Slover v. Or. State Bd. of Clinical Soc. Workers, 144 Or. App. 565, 570, 927 P.2d 1098 (1996)* ("To state a claim for breach of contract, plaintiff must allege the existence of a contract, its relevant terms, plaintiff's full performance and lack of breach[,] and defendant's breach resulting in damage to plaintiff." (citation and quotation marks omitted)).

capital equipment spending, all of which HIS provided under the NDA. ECF 191, ¶¶ 45-47. On July 31, 2019, after Edwards received HIS's confidential information, Edwards gave HIS a "lowball offer of approximately one-third of the minimum sale price recommended by HIS's investment banking consultant." *Id.* ¶ 48. HIS promptly rejected Edwards's lowball offer, and Edwards then withdrew from the acquisition process. *Id.* "Promptly after withdrawing from the acquisition process, Edwards began a systematic effort to reduce its pricing just enough to target HIS's projected cost savings to [Edwards's key customer]." *Id.* ¶ 49. In August 2019, Edwards's key customer "advised HIS that it was deferring its invitation for HIS to qualify a new integrated vacuum pump **[**17]** frame system and was instead working with its existing supplier . . . to determine whether it could create a value-engineered frame system that would sufficiently reduce costs to meet [that customer's] price expectations." *Id.* ¶ 50. Edwards's key customer "did not reengage with HIS regarding the qualification of the Liberty Frame System until several months later, in or around the spring of 2020." *Id.* ¶ 51. HIS did not allege any of these facts "on information and belief."

Based on these facts (including their timing and all reasonable inferences from these facts), HIS alleges on information and belief that "Edwards began soliciting HIS's suppliers and demanding price concessions to match HIS's confidentially disclosed cost targets" and "that Edwards used HIS's confidential information obtained pursuant to the NDA to make targeted representations to [Edwards's key customer] that it [Edwards] could achieve cost savings in order to persuade [the key customer] to defer its invitation for HIS to qualify the Liberty Frame System." *Id.* ¶ 49. Also based on these facts, HIS states that it "believes" that Edwards was the "existing supplier" with whom Edwards's key customer was working "to determine **[**18]** whether [the existing supplier] could create a value-engineered frame system that would sufficiently reduce costs to meet [the key customer's] price expectations." *Id.* ¶ 50. Finally, HIS alleges, again on information and belief, "this delay in the qualification process was the direct result of Edwards's interference with HIS's relationship with [Edwards's key customer] through the misuse of [HIS's] confidential information that Edwards obtained pursuant to the NDA" and that the key customer "reengaged with HIS only after it became clear that contrary to Edwards's initial representations, Edwards was unable or unwilling to reduce costs sufficiently to satisfy [that customer's] expectations." *Id.* ¶ 51.

The key customer eventually "placed its first purchase order with HIS for a pilot system on July 15, 2020, and HIS shipped its first Liberty Frame System to [that customer] in August 2020." *Id.* ¶ 52. According to HIS, had that customer "not **[*1168]** postponed its solicitation of HIS, HIS estimates that it would have qualified the Liberty Frame System at [that customer] by approximately December 2019" and that "the delay in [the customer's] decision to purchase and ultimately qualify the Liberty **[**19]** Frame System resulted in a revenue loss between December 2019 and July 2020 of approximately $15-30 million." *Id.* ¶ 52.

The Court finds that, based on the facts alleged by HIS not on information and belief, the allegations pleaded by HIS on information and belief are not *mere* "hunches" or "guesses." Those allegations instead set forth sufficient factual content to draw the *reasonable inference* that Edwards is liable for the alleged breach of contract, and that most of facts alleged by HIS on information and belief are particularly within the possession and control of Edwards. Thus, it is appropriate to consider the allegations made by HIS on information and belief. When all of HIS's allegations are considered, HIS has stated a claim for breach of the NDA sufficient to withstand Edwards's motion to dismiss. HIS may or may not eventually have sufficient facts to create a genuine issue for the jury and may or may not eventually persuade a jury. But at this stage of the litigation, HIS may proceed with its breach of contract claim. The Court denies Edwards's *Rule 12(b)(6)* motion to dismiss HIS's counterclaim alleging breach of contract.

2. HIS's Counterclaims Alleging Monopolization and Attempted Monopolization [**20]

HN12[] To state a claim of monopolization, HIS must plausibly allege that (1) Edwards possesses "monopoly power in the relevant market"; and (2) the "willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." *Verizon Commc'ns Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 407, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)* (quoting *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*). As explained by the Supreme Court: "To safeguard the incentive to innovate, the possession of monopoly power will not be found unlawful unless it is accompanied by an element of anticompetitive conduct." *Trinko, 540 U.S. at 407*.

To state a claim of attempted monopolization, HIS must plausibly allege: "(1) that [Edwards] has engaged in predatory or anticompetitive conduct with (2) a specific intent to monopolize and (3) a dangerous probability of achieving monopoly power." *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 456, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993)*.[7]

Although Edwards denies each of these elements, Edwards's pending motion to dismiss HIS's antitrust counterclaims challenges *only* the sufficiency of HIS's pleading of the element of "anticompetitive conduct," which is required in both of HIS's two antitrust counterclaims. *See* ECF 228 at 18. As previously noted, HIS discusses five categories of alleged anticompetitive conduct by Edwards. The Court will discuss each **[**21]** in turn, but first a few comments about the concept of anticompetitive conduct may be helpful.

[*1169] "Commentators have long described defining unlawful dominant firm conduct as one of the most uncertain areas of antitrust." ABA ***Antitrust Law*** Section, *Monopolization and Dominance Handbook* 75 (2d ed. 2021) (citation and quotation marks omitted). In *United States v. United Shoe Machinery*, Judge Wyzanski condemned a shoe machinery monopolist, noting:

> The facts show that (1) defendant has, and exercises, such overwhelming strength in the shoe machinery market that it controls that market, (2) this strength excludes some potential, and limits some actual, competition, and (3) *this strength is not attributable solely to defendant's ability, economies of scale, research, natural advantages, and adaptation to inevitable economic laws*.

110 F. Supp. 295 (D. Mass 1953), *aff'd*, *347 U.S. 521, 74 S. Ct. 699, 98 L. Ed. 910 (1954)* (emphasis added).

Similarly,***HN14***[] in *Grinnell Corp.*, the Supreme Court stated:

> The offense of monopoly under *§ 2* of the Sherman Act has two elements: (1) the possession of monopoly power in the relevant market and (2) *the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen,* ***[**22]*** *or historic accident*.

384 U.S. at 570-71 (emphasis added). Indeed, this explanation of anticompetitive conduct was repeated by the Supreme Court in *Trinko* in 2004.

Finally, ***HN15***[] one of the leading treatises in the field defines "monopolistic conduct" as acts that

> (1) are reasonably capable of creating, enlarging or prolonging monopoly power by impairing the opportunities of rivals; and
> (2) either (2a) do not benefit consumers at all, or (2b) are unnecessary for the particular consumer benefits claimed for them, or (2c) produce harms disproportionate to any resulting benefits.

6C Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** ¶ 651a (Online ed. 2021). The Court now addresses HIS's five categories of anticompetitive conduct allegedly committed by Edwards.

a. Edwards's Demand for a Non-Compete Agreement

HIS alleges that the day after HIS informed Edwards that Edwards's key customer had solicited HIS to develop an "agnostic" integrated vacuum pump frame system, Edwards returned revisions to HIS's draft supplier agreement. According to HIS, Edwards's new proposal "eliminated the proposed agreement's benefit to HIS" by deleting supplier exclusivity and, instead, substituted a requirement that in exchange for "nominal **[**23]** status as a

---

[7] In addition, ***HN13***[] for a private plaintiff to recover money damages (indeed, automatic treble damages) in an antitrust action, *§ 4 of the Clayton Act, 15 U.S.C. § 15*, requires a plaintiff to show causal antitrust injury, which is an "injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful." *Brunswick Corp. v. Pueblo Bowl—O—Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*.

preferred supplier," HIS must stipulate to a "Non-Compete/Non-Solicitation" term. ECF 191, ¶ 40. HIS further alleges:

> In short, Edwards sought a covenant not to compete in the integrated vacuum pump frame systems market and forced intellectual property transfer from HIS in exchange for no material benefit to HIS save for a non-committal prospect of increased sales to Edwards. Edwards's proposal, had HIS accepted, would have directly undercut [the key customer's] effort to diversify its supply chain and realize cost savings by stimulating competition.

Id. ¶ 42. HIS also states: "Although HIS rejected the preferred supplier agreement, Edwards's demands carried a dangerous probability of inducing HIS to stay out of the market precisely because HIS depends significantly on component sales to Edwards as a result of Edwards's existing monopoly." *Id.* ¶ 43.

[*1170] In its motion to dismiss, Edwards argues that although non-compete and non-solicitation agreements might be actionable as antitrust offenses under certain circumstances, the absence of such an agreement cannot satisfy the exclusionary conduct requirement of HIS's antitrust counterclaims. As the Ninth Circuit has held:

> [***HN16***[]] D]irect evidence **[**24]** of intent alone, without corroborating evidence of conduct, cannot sustain a claim of attempted monopolization. . . . Direct evidence of intent to vanquish a rival in an honest competitive struggle cannot help to establish an antitrust violation. It also must be shown that the defendant sought victory through unfair or predatory means. Evidence of conduct is thus indispensable.

William Inglis & Sons Baking Co. v. ITT Cont'l Baking Co., 668 F.2d 1014, 1028 (9th Cir. 1981).

In response, HIS argues that Edwards's proposal of a preferred supplier agreement containing a non-compete clause, which HIS rejected, is itself an anticompetitive act that supports HIS's claim of attempted monopolization.[8] In support of its argument, HIS relies on the Fifth Circuit's decision in *United States v. American Airlines, Inc., 743 F.2d 1114 (5th Cir. 1984)*. In that case, the Fifth Circuit held that, under the specific economic conditions presented, an unaccepted offer to fix prices made by one competitor to another in a two-firm market with high barriers to entry adequately stated a claim for attempted monopolization. *Id. at 1118-19*.

In reply, Edwards makes two arguments. First, relying on *Transamerica Computer Co., v. International Business Machines Corp., 698 F.2d 1377 (9th Cir. 1983)*, Edwards argues that the Fifth Circuit's holding in *American Airlines* is inconsistent with earlier binding Ninth Circuit precedent. Second, Edwards argues that even if *American Airlines* is not **[**25]** inconsistent with Ninth Circuit law, it is factually and legally distinguishable from the pending case. The Court rejects Edwards's first argument but accepts its second.

In *Transamerica*, a company that supplied the capital needs of manufacturers of "plug-compatible" computer peripherals brought claims of monopolization and attempted monopolization against a major supplier of computer central processing units and peripherals. The plaintiff, Transamerica, challenged IBM's leasing practices, design changes, and pricing decisions. After a jury trial that lasted 120 days, including ten days of deliberation, the court found the jury was deadlocked. Under a pretrial stipulation, the district judge then became the trier of fact. Next, the district court ruled for IBM on all major issues, holding that IBM was not a monopolist, and even if it were, its leasing program, design changes, and pricing behavior did not unreasonably restrain competition. *Transamerica, 698 F.2d at 1381*. In addition, the district court held that IBM had not attempted to monopolize. *Id.*

The Ninth Circuit affirmed the district court's result but modified the district court's test for predatory pricing. ***HN17***[] In reciting the basic elements of monopolization **[**26]** and attempted monopolization, the Ninth Circuit stated:

---

[8] HIS offers this theory only in support of its claim of attempted monopolization, not actual monopolization. *See* ECF 191, ¶ 43 (referring to the creation of a "dangerous probability" of market dominance, which is an element of attempted monopolization but not actual monopolization). Indeed, it is difficult to see how an unaccepted offer could ever satisfy the causal antitrust injury requirement needed in a private antitrust claim seeking money damages because an unaccepted offer would not be the "cause" of any material result in the marketplace.

> **[*1171]** Conduct that does not constitute "willful acquisition or maintenance" of monopoly power (thus precluding establishment of the offense of monopolization) cannot constitute the "predatory or anticompetitive conduct" required to establish the offense of attempt to monopolize. *See* CalComp, 613 F.2d at 738, quoting 3 P. Areeda & D. Turner, ***Antitrust Law*** ¶ 828, at 321 (1978) ("conduct lawful for a monopolist must, a fortiori, be excluded as a basis for the attempt offense."). We will analyze IBM's conduct with this principle in mind. We will assume that IBM possessed monopoly power. If IBM's conduct proves lawful despite that assumption, then, *a fortiori*, IBM's conduct could not constitute an attempt to monopolize, thereby eliminating the need to consider this offense.

Id. at 1382. Edwards relies on the Ninth Circuit's statement in *Transamerica* that "[c]onduct that does not constitute 'willful acquisition or maintenance' of monopoly power (thus precluding establishment of the offense of monopolization) cannot constitute the 'predatory or anticompetitive conduct' required to establish the offense of attempt to monopolize." This statement, however, merely expresses the unremarkable **[**27]** proposition that conduct that is lawful (and not anticompetitive) for a monopolist cannot be considered anticompetitive for purposes of stating a claim of attempted monopolization. In *Transamerica*, however, there were no "unaccepted" offers to fix price or otherwise to restrain trade. Thus, nothing in *Transamerica*, properly understood, is inconsistent with the Fifth Circuit's decision in *American Airlines*. The Court rejects Edwards's argument on this point.

Edwards's second argument fares better. *American Airlines* is both factually and legally distinguishable from the pending dispute. This is so for three independent reasons. But first, it may be helpful for provide further background on the *American Airlines* decision.

As discussed in that case, the chief executive officer of American Airlines (Robert Crandall) offered to the chief executive officer of Braniff International Airways (Howard Putnam) a blatant—and unlawful—price-fixing agreement between two competing airlines in several two-firm city-pair markets with high barriers to entry. If Putman had accepted Crandall's offer, there is no doubt that there would have immediately been a completed *per se* unlawful antitrust violation, **[**28]** subjecting both executives to criminal liability. The United States brought a civil enforcement action, seeking injunctive relief against American Airlines and Crandall. The United States alleged that American Airlines, through this unaccepted offer, had "attempted to monopolize" numerous city-pair markets for air travel under circumstances involving high (indeed, insurmountable, at least for a time) barriers to entry, based on landing slot restrictions imposed by the Federal Aviation Administration after the PATCO strike of air traffic controllers and President Reagan's firing of the striking employees. The district court dismissed the government's complaint under Rule 12(b)(6), but the Fifth Circuit reversed.

In its ruling, the Fifth Circuit held that, among other things, the dangerous probability element of attempted monopolization was satisfied because

> if Putnam had accepted Crandall's offer, the two airlines, at the moment of acceptance, would have acquired monopoly power. At that same moment, the offense of joint monopolization would have been complete. . . .
>
> * * *
>
> Both Crandall and Putnam were the chief executive officers of their airlines; each arguably had the power to implement Crandall's **[**29]** plan. The airlines jointly **[*1172]** had a high market share in a market with high barriers to entry. American and Braniff, at the moment of Putnam's acceptance, would have monopolized the market. Under the facts alleged, it follows that Crandall's proposal was an act that was the most proximate to the commission of the completed offense that Crandall was capable of committing. Considering the alleged market share of American and Braniff, the barriers to entry by other airlines, and the authority of Crandall and Putnam, the complaint sufficiently alleged that Crandall's proposal had a dangerous probability of success.

American Airlines, 743 F.2d at 1118-19.

Here, the Court concludes that the *American Airlines* case has no application in the pending dispute for three independent reasons. First, in *American Airlines*, had American's offer to fix price been accepted by Braniff, at that moment of acceptance, there would have been the creation of joint monopoly power. That, however, is not the situation here. Had HIS accepted Edwards's proposed preferred supplier agreement containing a non-compete clause, that would not have created monopoly power at that moment of acceptance.

Second, in *American Airlines*, the act that would have created **[**30]** monopoly power (the price fix) was *per se* unlawful and thus unquestionably illegal. That, however, is not the situation here. At the time of Edwards's offer to enter into a preferred supplier agreement containing a non-compete clause, HIS and Edwards were (and remain) in a vertical supply relationship. ***HN18***[] Ancillary non-compete agreements among participants in a vertical supply relationship, however, are not *per se* unlawful but instead are evaluated under a "Rule of Reason." *See generally* *Nat'l Soc'y of Pro. Eng'rs v. United States, 435 U.S. 679, 689, 98 S. Ct. 1355, 55 L. Ed. 2d 637 (1978)* ("The Rule of Reason . . . has been regarded as a standard for testing the enforceability of covenants in restraint of trade which are ancillary to a legitimate transaction[.]"). Relatedly, vertical nonprice restraints are evaluated under the Rule of Reason. *See generally* *Cont'l T.V., Inc. v. G.T.E. Sylvania, Inc., 433 U.S. 36, 49-50, 97 S. Ct. 2549, 53 L. Ed. 2d 568 (1977)* (holding that "*per se* rules of illegality are appropriate only when they relate to conduct that is manifestly anticompetitive"). Under a Rule of Reason analysis, it is far from clear whether the proposed preferred supplier agreement containing a non-compete clause would be found to be manifestly anticompetitive.

Finally, in *American Airlines*, the government brought that civil action seeking injunctive relief. Here, HIS's attempted monopolization **[**31]** counterclaim seeks treble damages, which requires, in addition to the three basic elements of attempted monopolization, a showing of causal antitrust injury.[9] As noted earlier, it is difficult to see how an *unaccepted* offer to enter into a preferred supplier agreement with a non-compete clause can *cause* antitrust injury to HIS.[10] This further distinguishes the pending case from *American Airlines*.

b. Edwards's Assumed "No-Poach" Agreement

HIS alleges that after HIS hired several of Edwards's employees, Edwards sent a communication to HIS stating,

> I thought we mutually agreed not to hire each other's employees. Can you give me any insight into what has changed and why you're not honoring your commitment?

ECF 191, ¶ 56. HIS "promptly responded that HIS never agreed that Edwards and **[*1173]** HIS would not hire each other's employees and that the agreement suggested by [Edwards] would be illegal." Id.

In its motion to dismiss, Edwards argues that although a non-solicitation agreement might be actionable as an antitrust offense under certain circumstances, the absence of such an agreement does not satisfy the "exclusionary conduct" requirement of HIS's antitrust counterclaims. Edwards's argument **[**32]** is similar to its argument regarding its unaccepted preferred supplier agreement. For the same reasons that the Court just held that Edwards's unaccepted offer to enter into a preferred supplier agreement is not an anticompetitive act, the Court also holds that Edwards's apparently erroneous belief that Edwards and HIS had entered into an agreement not to hire (or "poach") each other's employees is not an anticompetitive act that can support HIS's claims of monopolization or attempted monopolization.

c. Edwards's "Warning" to HIS's Customer GlobalFoundries

HIS alleges that Edwards had warned one of HIS's customers, GlobalFoundries, that it should not "purchase [HIS's] Liberty Frame Systems because GlobalFoundries would risk having the systems ordered to be removed from its sub-fabs" (ECF 191, ¶ 33) and not to do "business with HIS, implying that doing so would risk retaliation from Edwards" (*id.* ¶ 72(c)). Edwards did not explicitly mention this allegation in its motion to dismiss. In its response to Edwards's motion, HIS stated:

---

[9] *See* n.7, *supra*.

[10] *See* n.8, *supra*.

> And Edwards simply ignores HIS's allegation that it intimidated GlobalFoundries—a large semiconductor chip manufacturer and mutual customer of Edwards and HIS—not **[**33]** to purchase Liberty Frame Systems. Representatives of GlobalFoundries have indicated to HIS that GlobalFoundries adopted a "wait and see" approach by reducing purchases of Liberty Frame Systems.

ECF 235 at 8; see also id. at 32.

In its reply, Edwards argued:

> HIS tries to argue that Edwards's statements to its customers regarding its lawsuit against HIS somehow rise to the level of a separate "category of exclusionary conduct," (Opp'n at 9), even though the allegations all relate to the alleged "sham" litigation section of its Counterclaims. (Countercl. ¶ 72.) Specifically, HIS alleges "three separate occasions" when an Edwards employee told a customer "not to do business with HIS." (Opp'n at 26.) HIS further alleges that Edwards informed customers that it would file a lawsuit against HIS. (Countercl. ¶ 72.) HIS cites no precedent for such commercial speech to constitute anticompetitive conduct. ***HN19***[] Disparagement of competitors is only actionable in the Ninth Circuit when the representation is "(1) clearly false, (2) clearly material, (3) clearly likely to induce reasonable reliance, (4) made to buyers without knowledge of the subject matter, (5) continued for prolonged periods, and (6) not **[**34]** readily susceptible of neutralization or other offset by rivals."

ECF 236 at 17-18. Edwards then cites *Am. Pro. Testing Serv., Inc. v. Harcourt Brace Jovanovich Legal & Pro. Publ'ns, Inc., 108 F.3d 1147 (9th Cir. 1997)*.

In that case, the Ninth Circuit explained:

> ***HN20***[] While the disparagement of a rival or compromising a rival's employee may be unethical and even impair the opportunities of a rival, its harmful effects on competitors are ordinarily not significant enough to warrant recognition under *§ 2* of the Sherman Act. We therefore insist on a preliminary showing of significant and more-than-temporary harmful effects on competition (and not merely upon a competitor or customer) before **[*1174]** these practices can rise to the level of exclusionary conduct.
>
> * * *
>
> To prove that Harcourt's false and misleading advertising constituted exclusionary conduct, the disparagement must overcome a presumption that the effect on competition of the fliers was de minimis. ***HN21***[] [A] plaintiff may overcome de minimis presumption by cumulative proof that the representations were [1] clearly false, [2] clearly material, [3] clearly likely to induce reasonable reliance, [4] made to buyers without knowledge of the subject matter, [5] continued for prolonged periods, and [6] not readily susceptible of neutralization or other offset by rivals. **[**35]** American must satisfy all six elements to overcome de minimis presumption. Otherwise, American fails to prove its claim.

Id. at 1151-52 (citations and quotation marks omitted; alterations in original). The Court agrees with Edwards and holds that HIS has failed adequately to plead more-than-temporary harmful effects on competition (and not merely upon a competitor or customer). Thus, HIS has failed to plead exclusionary conduct relating to Edwards's alleged comments to GlobalFoundries (or others).

d. Edwards's Alleged Breach of the 2019 NDA

The Court has already discussed HIS's counterclaim alleging breach of contract relating to the June 21, 2019 NDA. HIS also contends that Edwards's alleged breach of the NDA to "exploit" HIS's confidential information and to obstruct HIS's market entry is anticompetitive conduct that supports HIS's antitrust counterclaims. In its motion to dismiss, Edwards argues that HIS's breach of contract theory cannot form a basis for an antitrust claim. Edwards cites *Pool Water Products v. Olin Corp., 258 F.3d 1024 (9th Cir. 2001)*,***HN22***[] for the proposition that "private plaintiffs can be compensated only for injuries that the antitrust laws were intended to prevent. To show antitrust injury, a plaintiff must prove that his loss flows from an **[**36]** anticompetitive aspect or effect of the defendant's behavior." *Id. at 1034*.[11] In response, HIS argues that Edwards did not outcompete HIS by delivering to Edwards's key customer a value-engineered system at a superior price. Nor does HIS allege that it lost sales or was otherwise damaged in its business due to Edwards's lower prices. Rather, HIS contends that Edwards used HIS's confidential information to make representations that Edwards would reduce prices that misled Edwards's key customer into deferring business with HIS. ECF 191, ¶¶ 49-51. According to HIS, this is an entirely different class of conduct than mere aggressive price competition.

HN23[] Antitrust laws protect "*competition*, not *competitors*." *Brown Shoe Co. v. United States, 370 U.S 294, 320, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)* (emphasis added). Thus, an antitrust plaintiff must demonstrate not only that the defendant engaged in unfair or predatory tactics, but also that those tactics allowed the defendant to maintain or come dangerously close to obtaining monopoly status. *See* *Spectrum Sports, 506 U.S. at 459*. Indeed, not "even an act of pure malice by one business competitor against another" will alone state an antitrust violation. *Brooke Grp. Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 225, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993)*. HIS argues that Edwards's breach of contract satisfies this test. The Court disagrees.

HN24[] "[A] claimed breach **[**37]** of contract by unreasonable conduct, *standing alone*, **[*1175]** should not give rise to antitrust liability." *City of Vernon v. S. Cal. Edison Co., 955 F.2d 1361, 1368 (9th Cir. 1992)* (emphasis added); *see also* 2B Areeda & Hovenkamp, ***Antitrust Law***, ¶ 709d1 ("A breach of contract is not ordinarily an antitrust violation."); 3A Areeda & Hovenkamp, ***Antitrust Law***, ¶ 782m ("It is not antitrust's purpose to regulate ordinary business contracts."). Instead, antitrust liability will only be predicated "on conduct that also happens to create a contract dispute" when that conduct is "anticompetitiv[e] and without a legitimate business reason." *City of Vernon, 955 F.2d at 1368*. In *City of Vernon*, the City had a colorable—although ultimately unsuccessful[12]—antitrust claim against Edison based on Edison's alleged breach of contract because Edison's allegedly breaching conduct, intermittently refusing to transmit electricity purchased from other suppliers to the City over Edison's lines, was not "a single incident," but instead was "relatively long-term activity aimed at crushing a competitor." *Id. at 1368-69*. That is not what HIS has alleged here.

HN25[] Nor is reticence to premise antitrust liability on a single instance of bad conduct aimed at a single competitor unique to antitrust claims relying on breach of contract. *See* *Conwood Co. v. U.S. Tobacco Co., 290 F.3d 768, 783 (6th Cir. 2002)* ("Isolated **[**38]** tortious activity alone does not constitute exclusionary conduct for purposes of a *§ 2* violation, absent a significant and more than a temporary effect on competition, and not merely on a competitor or customer."); *Nobody in Particular Presents, Inc. v. Clear Channel Commc'ns, Inc., 311 F. Supp. 2d 1048, 1109 (D. Colo. 2004)* (finding that a single incident of the defendant "secretly hir[ing]" one of the plaintiff's employees and then having that employee and other "enter[] [the plaintiff's] office at night and remove[] and destroy[] various files" was a "single event" that did "not amount to anticompetitive conduct"); *cf.* *Conwood Co., 290 F.3d at 784-88* (affirming a jury's finding of a *§ 2* violation when the defendant engaged in a "pervasive practice" of damaging a single competitor's property and making misrepresentations about the competitor);. Because HIS has not alleged pervasive and long-term activity that has had more than a temporary effect on a single competitor, HIS's allegations regarding the June 21, 2019 NDA do not allege anticompetitive conduct sufficient to support a claim for monopolization or attempted monopolization.[13]

e. Edwards's Filing of this Lawsuit

---

[11] *See also* n.7, *supra* (discussing the requirement of causal antitrust injury).

[12] The Ninth Circuit ultimately granted Edison summary judgment, holding that the evidence that Edison interrupted the City's service was insufficient to "lead a rational trier of fact to find for [the City]." *Id. at 1369* (quoting *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 587, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*).

[13] As previously noted, however, HIS has sufficiently alleged a claim for breach of contract.

HIS alleges that Edwards brought this lawsuit asserting meritless claims, including trade secret claims, for the purposes of: (1) retaliating against HIS and its **[**39]** employees for HIS's use of competitive hiring practices; (2) raising HIS's costs; and (3) chilling demand for HIS's competitive frame systems. ECF 191, ¶¶ 53-84. In its motion to dismiss, Edwards argues that the *Noerr-Penningt*on doctrine immunizes this lawsuit from challenge under the antitrust laws.[14] ***HN26***[] "Under **[*1176]** the *Noerr-Pennington* doctrine, those who petition any department of the government for redress are generally immune from statutory liability for their petitioning conduct," including "the use of the channels and procedures of state and federal courts." *Sosa v. DIRECTV, Inc., 437 F.3d 923, 929-30 (9th Cir. 2006)* (citing *Cal. Motor Transp. Co. v. Trucking Unlimited, 404 U.S. 508, 510-11, 92 S. Ct. 609, 30 L. Ed. 2d 642 (1972)*). "Although *Noerr-Pennington* immunity extends to judicial proceedings, it does not protect persons engaging in sham litigation." *Int'l Longshore & Warehouse Union v. ICTSI Or., Inc., 863 F.3d 1178, 1187 (9th Cir. 2017)*. The Ninth Circuit has "recognized three circumstances when litigation might be a sham." *Freeman v. Lasky, Haas & Cohler, 410 F.3d 1180, 1184 (9th Cir. 2005)*.

HN27[] The "sham exception" that appears to be most relevant in this lawsuit, and upon which HIS relies, requires that "the antitrust plaintiff must demonstrate that the lawsuit was (1) objectively baseless, and (2) a concealed attempt to interfere with the plaintiff's business relationships."[15] *Id.* The Supreme Court has explained these two necessary criteria for sham litigation as follows:

> First, the lawsuit must **[**40]** be objectively baseless in the sense that no reasonable litigant could realistically expect success on the merits. If an objective litigant could conclude that the suit is reasonably calculated to elicit a favorable outcome, the suit is immunized under *Noerr*, and an antitrust claim premised on the sham exception must fail. Only if challenged litigation is objectively meritless may a court examine the litigant's subjective motivation. Under this second part of our definition of sham, the court should focus on whether the baseless lawsuit conceals an attempt to interfere directly with the business relationships of a competitor through the use of the governmental process—as opposed to the outcome of that process—as an anticompetitive weapon.

Pro. Real Est. Invs. v. Columbia Pictures Indus., 508 U.S. 49, 60-61, 113 S. Ct. 1920, 123 L. Ed. 2d 611 (1993) ("*PRE*") (quotation marks omitted); *see also* *Int'l Longshore, 863 F.3d at 1187-88*. "The existence of probable cause to institute legal proceedings precludes a finding that an antitrust defendant has engaged in a sham litigation." *PRE, 508 U.S. at 62*.

Edwards filed its Complaint in this lawsuit on September 29, 2020, against HIS and 13 of HIS's employees, including many who previously worked for Edwards. ECF 1. On November 16, 2020, Edwards moved for a preliminary injunction. ECF 41. In that motion, **[**41]** Edwards sought to enjoin HIS from making, selling, offering to sell, shipping, or otherwise using any product containing Edwards's asserted trade secrets. After limited discovery relating to Edwards's motion, Edwards informed HIS and the Court on February 12, 2021 that Edwards was narrowing the scope of its preliminary injunction motion to allege *only* a breach of contract claim against HIS arising from what Edwards alleged was HIS's unauthorized use of Edwards's custom-designed '541 Bellows based on "Terms and Conditions" that were not alleged in Edwards's original Complaint.

[*1177] Edwards has twice amended its Complaint, with the Second Amended Complaint being the currently operative pleading. Edwards also voluntarily dismissed eight of the Individual Defendants originally named. On May 10, 2021, after a three-day evidentiary hearing, the Court found that Edwards had shown that it was likely to prevail

---

[14] The doctrine derives its name from two cases, *E. R.R. Presidents Conf. v. Noerr Motor Freight, 365 U.S. 127, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961)*, and *United Mine Workers of Am. v. Pennington, 381 U.S. 657, 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965)*.

[15] ***HN28***[] The second circumstance for when litigation might be a sham is "if the alleged anticompetitive behavior is the filing of a series of lawsuits." *Freeman, 410 F.3d at 1184*; *cf.* *Int'l Longshore, 863 F.3d at 1187* (noting that "[t]wo sham suits cannot amount to a whole series of legal proceedings"). The third circumstance may arise "if the alleged anticompetitive behavior consists of making intentional misrepresentations to the court." *Freeman, 410 F.3d at 1184*.

on its claim that HIS breached the contractual obligations stated in the Terms and Conditions, relating to the '541 Bellows. The Court granted Edwards's motion for preliminary injunction. ECF 212.

In support of its motion to dismiss that portion of HIS's antitrust counterclaims focused on Edwards's **[**42]** filing of this lawsuit, Edwards invokes the *Noerr-Pennington* doctrine. Among other things, Edwards argues that in granting in part Edwards's motion for preliminary injunction, the Court has determined that Edwards is likely to succeed against HIS on the merits of Edwards's breach of contract claim based on the Terms and Conditions relating to the '541 Bellows. According to Edwards, this precludes HIS's assertion that Edwards's lawsuit is "objectively baseless." Edwards explains that the Supreme Court in *PRE* stated: "***HN29***[] A winning lawsuit is by definition a reasonable effort at petitioning for redress and therefore not a sham." *PRE, 508 U.S. at 60 n.5*.

In response, HIS argues that the specific claim upon which the Court granted Edwards preliminary injunctive relief was not even alleged in Edwards's original Complaint and was only added months after Edwards began this lawsuit. HIS also states that Edwards has voluntarily dismissed its claims against eight of the 13 Individual Defendants. Finally, HIS urges the Court to follow the approach used in *In re Wellbutrin SR Antitrust Litigation, 749 F. Supp. 2d 260, 266 (E.D. Pa. 2010)*. In that case, the district court declined to dismiss the plaintiffs' antitrust claim alleging "sham litigation" in a mixed-claim case, explaining that "[d]ismissing **[**43]** plaintiffs' claims at this point would ignore the reality that the [claim alleged to lack an objective basis], in and of itself, was sufficient to cause antitrust damage." *Id. at 266*.

In reply, Edwards cites *IPtronics Inc. v. Avago Techs. U.S., Inc., 2015 U.S. Dist. LEXIS 112914, 2015 WL 5029282 (N.D. Cal. Aug. 25, 2015)*, for the proposition that "a plaintiff who prevails on some claims but not others in a single lawsuit can claim the *Noerr-Pennington* immunity is the dominant view in [the Ninth C]ircuit and around the country." *2015 U.S. Dist. LEXIS 112914, [WL] at *6*. In *Avago*, however, the district court addressed multiple patent infringement claims brought against multiple defendants and concluded that

> the *PRE* analysis may be applied solely to the '456 Patent infringement claims against IPtronics, which constituted Avago's "lawsuit" against IPtronics. Based upon the unredacted information before the Court, it appears that the '595 Patent infringement claims and accused products in the ITC action were severable from the '456 Patent infringement claims and accused products. In other words, Avago could have filed a separate complaint against IPtronics and Mellanox/FCI concerning the products that infringed only the '456 Patent. Assuming as true the assertion that Avago had no reasonable basis for accusing IPtronics, that Avago chose to join its frivolous claims against IPtronics to an otherwise **[**44]** valid lawsuit against other defendants should not preclude IPtronics from invoking the Sherman Act.

Id. In addition, the district court in *Avago* noted the Ninth Circuit's decision in *Freeman*, explaining that "[b]ecause the *Noerr—Pennington* doctrine grows out of the *Petition Clause*, its reach extends only so far as necessary to steer the Sherman **[*1178]** Act clear of violating the *First Amendment*." *2015 U.S. Dist. LEXIS 112914, 2015 WL 5029282, at *6* (alteration in original) (quoting *Freeman, 410 F.3d at 1184*). The court in *Avago* denied the defendant's motion to dismiss the plaintiff's antitrust claim, concluding:

> In sum, the Court finds that IPtronics' allegations of objective baselessness are sufficiently well-pleaded to circumvent Avago's claim to *Noerr-Pennington* immunity at this stage. This is not to say that it is smooth sailing for IPtronics from this point forward, as the arguments by Avago that this Court rejected on a motion to dismiss may gain more traction on a more fully developed record. At a minimum, Avago's arguments demonstrate that there may be significant challenges to IPtronics' ability to prove objective baselessness down the road.

*Avago, 2015 U.S. Dist. LEXIS 112914, 2015 WL 5029282 at *8*.

Many of the same considerations found in *Avago* apply here. In addition, Edwards added the sole claim on which it prevailed at the preliminary injunction **[**45]** stage *months after* Edwards's filed its original Complaint. This fact provides a further ground for applying HIS's antitrust counterclaims "sham exception" argument to Edwards's originally alleged trade secret claims, notwithstanding Edwards's partially successful preliminary injunction motion on one of its later-filed breach of contract claims.

Regarding Edwards's trade secret claims, HIS alleges in its antitrust counterclaims the following:

> What Edwards has concealed from the Court (and, through its abuse of the "OAEO" designation under the Protective Order, from the semiconductor industry generally) is that most if not all of the "trade secrets" identified in its disclosure are such basic engineering techniques and common industry knowledge that no reasonable person in Edwards's position could have genuinely believed them to be trade secrets. Throughout its 135-page disclosure (ECF No. 35-1), Edwards repeatedly misrepresents that it possesses "trade secrets" that it knows are in fact not confidential or proprietary.

ECF 191, ¶ 74. Further, HIS alleges:

> Contrary to its allegations in this lawsuit, Edwards does not maintain confidentiality of the various basic engineering techniques and **[**46]** standard off-the-shelf components that it claims as "trade secrets." For example, Edwards has allowed the public access to its integrated vacuum pump frame systems during open house events without even requiring guests to sign a sign in sheet. Photographs of the SynErgis system that show the location or use of several of Edwards's alleged trade secrets are readily available to anyone with an internet connection. *See, e.g.*, https://pamplinmedia.com/but/239-news/440111-349658-edwards-putsdown-new-roots-in-silicon-forest-pwoff . As Mr. Romeo testified during the preliminary injunction hearing, not only were Edwards's employees not instructed to keep various components of the SynErgis system a secret, but they were also at times encouraged to widely share these features as part of Edwards's sales, marketing, and employee recruiting efforts.

ECF 191, ¶ 77.

To paraphrase the district court's decision in *Avago*, the Court here finds that HIS's allegations that Edwards's trade secret claims are objectively baselessness are sufficiently pleaded to circumvent Edward's claim to *Noerr—Pennington* immunity at this stage. To paraphrase *Avago* further, this is not to say that it is "smooth sailing" for **[**47]** HIS from this point forward, and the arguments by Edwards on its motion to dismiss that the Court rejects today "may gain more traction on a **[*1179]** more fully developed record." Indeed, if Edwards prevails at trial on any of its trade secret claims, or possibly even if Edwards's trade secret claims can withstand a motion for summary judgment,[16] that may well be the end of HIS's antitrust counterclaims, or at least those based on Edwards's filing of this lawsuit.

B. Edwards's Alternative Motion to Dismiss Based on Forum *Non Conveniens*

Edwards previously moved under *28 U.S.C. § 1404(a)* to transfer venue of HIS's counterclaims (and only HIS's counterclaims) to the District of Delaware. ECF 216. In support of that motion, Edwards invoked the mandatory forum selection clause contained in the contract that Edwards allegedly breached, the June 21, 2019 NDA. The Court denied Edwards's motion, concluding that Edwards had waived or forfeited its right to benefit from that forum selection clause based on Edwards's litigation conduct. ECF 233. The Court sees no reason to revisit that ruling. Accordingly, the Court will not consider the forum-selection clause now in evaluating Edwards's motion **[**48]** to dismiss based on forum *non conveniens*. The Court stands by its earlier ruling that Edwards's litigation conduct in this case results in a waiver or forfeiture of that clause.

This leaves Edwards only with the common law doctrine for forum *non conveniens*. The Court finds that Edwards has not made "a clear showing of facts which establish such oppression and vexation of a [counterclaim] defendant so as to be out of proportion to [a counterclaim] plaintiff's convenience." *See* *Dole Food, 303 F.3d at 1118*. In addition, Edwards has not shown that defending against HIS's counterclaims here presents one of the "rare instances" where "a state or territorial court serves litigational convenience best." *See* *Sinochem Int'l, 549 U.S. at*

---

16 Whether Edwards's defeating HIS's motion for summary judgment on Edwards's trade secret claims (if that were to occur) would be sufficient to show that those claims were not objectively baseless for purposes of *Noerr-Pennington* immunity is a question that may benefit from further briefing and study at the appropriate time. *See generally* *In re Relafen Antitrust Litig., 346 F. Supp. 2d 349, 362-64 (D. Mass. 2004)* (discussing issue).

430. Accordingly, the common law doctrine of forum *non conveniens* does not support Edwards's alternative motion, and that motion is denied.

C. Partial Reconsideration of Edwards's Motion to Bifurcate and Stay Discovery

Edwards previously moved to bifurcate for discovery and trial *all* counterclaims asserted by HIS. ECF 204. The Court denied Edwards's motion, concluding that the motion was premature. ECF 215. In that ruling, the Court explained: "Here, whether bifurcation would result in increased convenience and judicial **[**49]** economy or would reduce the risk of jury confusion and unfair prejudice cannot be determined at this stage of the litigation." *Id.* at 4. Since then, Edwards filed its pending motion to dismiss HIS's three counterclaims under *Rule 12(b)(6)*, among other grounds. That motion has been fully briefed, and the Court has had the benefit of counsel's oral argument on these issues. It now is appears to the Court that Edwards's motion to bifurcate for discovery and trial, at least regarding HIS's antitrust counterclaims, has merit.

As Edwards argued in its motion to bifurcate,

> Courts routinely bifurcate antitrust claims from complex legal issues such as intellectual property and unfair competition claims. *See, e.g.,* *In re Data Gen. Corp. Antitrust Litig., 529 F. Supp. 801, 804,* ***[*1180]*** *n.2 (N.D. Cal. 1981)* (rev'd on other grounds) (bifurcating antitrust claims from underlying trade secrets claim)[.] . . . ***HN30***[] Bifurcation "enhance[s] the parties' right to [a] jury trial by making the issues the jury must consider less complex." *Warner Lambert Co. v. Purepac Pharm. Co., No. Civ.A. 98-02749 (JCL), 2000 U.S. Dist. LEXIS 22559, 2000 WL 34213890, at *11 (D.N.J. Dec. 22, 2000)* (quoting *In re Innotron Diagnostics, 800 F.2d 1077, 1086 (Fed. Cir. 1986)*[.]

ECF 204 at 10. In addition, Edwards noted that in *Ecrix Corp. v. Exabyte Corp., 191 F.R.D. 611 (D. Colo. 2000)*, the district court explained:

> Bifurcation allows for (1) quicker resolution of the [intellectual property] infringement issue as there is less discovery required, and (2) judicial economy as the antitrust and unfair **[**50]** competition claims may not have to be heard if [intellectual property] infringement is proved in the first trial.

Ecrix, 191 F.R.D. at 614.

Applying these considerations here, there does not appear to be any significant benefit to be achieved from staying HIS's breach of contract counterclaim. There is, however, significant benefit to be had from staying HIS's antitrust counterclaims. Antitrust claims by their nature are more complex and expensive to litigate than litigating a discrete breach of contract claim.

Moreover, all that remains of HIS's antitrust counterclaims is HIS's contention that Edwards engaged in anticompetitive conduct by filing an objectively baseless lawsuit, or at least by filing objectively baseless trade secret claims. As previously discussed, to refute Edwards's *Noerr-Pennington* defense, HIS will need to show that Edwards's trade secret claims are a "sham," both objectively and subjectively.

Whether Edwards's trade secret claims are objectively baseless may be informed by the jury's verdict on those claims, or possibly even by the Court's ruling on a motion for summary judgment.[17] Also, discovery on the subjective prong of the issue of sham litigation will be both expensive and intrusive—and **[**51]** completely unnecessary if the objective prong is not satisfied. Edwards's defense against HIS's monopolization and attempted monopolization counterclaims will also involve lengthy, complex, and expensive litigation over the proper market definition and the assessment of market power (including barriers to entry) in that properly defined market. All of that would be wasteful if HIS cannot show that Edwards's trade secret claims were objectively baseless.

---

[17] *See* n.16, *supra*.

Accordingly, pursuant to *Rule 42(b) of the Federal Rules of Civil Procedure*, the Court bifurcates HIS's antitrust counterclaims from the rest of this litigation. The litigation will move forward, through trial if necessary, on Edwards's claims and HIS's breach of contract counterclaim. The Court will then resolve HIS's antitrust counterclaims after Edwards's claims and HIS's breach of contract counterclaim have been determined. Further, the Court stays all discovery that is related only to HIS's antitrust counterclaims. In other words, if discovery is otherwise properly related to the prosecution or defense of any of Edwards's claims or HIS's breach of contract counterclaim, that discovery may proceed, even if it also may be relevant to HIS's antitrust counterclaims. If, however, **[**52]** discovery is related only to HIS's antitrust counterclaims, it may not proceed at this time, absent stipulation of the parties or further order of the Court.

CONCLUSION

The Court GRANTS IN PART AND DENIES IN PART Edwards's Motion to **[*1181]** Dismiss HIS's Counterclaims (ECF 228) as stated in this Opinion and Order. The Court also BIFURCATES HIS's antitrust counterclaims and STAYS any discovery that is related only to HIS's antitrust counterclaims, as stated in this Opinion and Order. HIS's breach of contract counterclaim, and all appropriate discovery related to that counterclaim, may proceed.

IT IS SO ORDERED.

DATED this 23rd day of August, 2021.

/s/ Michael H. Simon

Michael H. Simon

United States District Judge

Hetronic Int'l, Inc. v. Hetronic Germany GmbH

United States Court of Appeals for the Tenth Circuit

Civil Procedure > Appeals > Standards of Review > De Novo Review

Evidence > Burdens of Proof > Allocation

Civil Procedure > ... > Jurisdiction > In Rem & Personal Jurisdiction > In Personam Actions

HN1[] **Standards of Review, De Novo Review**

The appellate court reviews de novo a district court's exercise of personal jurisdiction, and the appellate court considers each defendant separately, The plaintiff has the burden of proving that the court has jurisdiction.

Civil Procedure > ... > Jurisdiction > In Rem & Personal Jurisdiction > In Personam Actions

Evidence > Types of Evidence > Documentary Evidence > Affidavits

HN2[] **In Rem & Personal Jurisdiction, In Personam Actions**

When the district court evaluates personal jurisdiction based only on the complaint and affidavits, a prima facie showing of personal jurisdiction is sufficient.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Long Arm Jurisdiction

HN3[] **In Personam Actions, Long Arm Jurisdiction**

In assessing personal jurisdiction, a corporation's contacts with a forum may be imputed to its successor.

Business & Corporate Compliance > ... > Contracts Law > Contract Conditions & Provisions > Forum Selection Clauses

Mergers & Acquisitions Law > Liabilities & Rights of Successors > Mere Continuation

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Consent

Mergers & Acquisitions Law > Liabilities & Rights of Successors > Successor Liability Doctrine

HN4[] **Contract Conditions & Provisions, Forum Selection Clauses**

Courts that have considered whether a successor corporation is bound by its predecessor's contractual waiver of personal jurisdiction through a forum-selection clause have uniformly found that it is consistent with due process to impute a corporation's waiver of personal jurisdiction to its successor for the same reasons that imputation of jurisdictional contacts is appropriate. Under this theory of personal jurisdiction, the court asks whether the successor is a mere continuation of the predecessor.

Mergers & Acquisitions Law > Liabilities & Rights of Successors > De Facto Mergers

Torts > Vicarious Liability > Corporations > Predecessor & Successor Corporations

Mergers & Acquisitions Law > Liabilities & Rights of Successors > Mere Continuation

Mergers & Acquisitions Law > Liabilities & Rights of Successors > Successor Liability Doctrine

Mergers & Acquisitions Law > Mergers > Duties & Liabilities of Shareholders

HN5[] **Liabilities & Rights of Successors, De Facto Mergers**

Under Oklahoma law, the general rule is that where one company sells or otherwise transfers all its assets to another company, the latter is not liable for the debts and liabilities of the transferor. But Oklahoma's courts have recognized four exceptions to that general rule: (1) Where there is an agreement to assume such debts or liabilities; (2) Where the circumstances surrounding the transaction warrant a finding that there was a consolidation or merger of the corporations; or (3) that the transaction was fraudulent in fact; or (4) that the purchasing corporation was a mere continuation of the selling company. Under the mere continuation exception, the test is not whether there is a continuation of business operations, but whether there is a continuation of the corporate entity. To assess whether the corporate entity has been continued, Oklahoma courts consider (1) whether there is a common identity of directors, officers, and stockholders before and after the sale, (2) whether there was good consideration for the sale, and (3) whether the seller corporation continues to exist in fact. Concerning the third factor, the bare de jure existence of the seller corporation after the sale is insufficient alone to establish that the successor corporation is not a mere continuation of the seller company.

Civil Procedure > ... > Jurisdiction > In Rem & Personal Jurisdiction > Constitutional Limits

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Long Arm Jurisdiction

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Due Process

HN6[] **In Rem & Personal Jurisdiction, Constitutional Limits**

Under *Fed. R. Civ. P. 4(k)(2)*, which has been described as a kind of federal long-arm statute, a court may exercise personal jurisdiction over a foreign defendant if (1) the plaintiff's claims arise under federal law; (2) the defendant is not subject to the jurisdiction of any state court of general jurisdiction; and (3) the plaintiff can show that the exercise of jurisdiction comports with due process.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Consent

HN7[] **In Personam Actions, Consent**

A defendant who wants to preclude use of *Fed. R. Civ. P. 4(k)(2)* has only to name some other state in which the suit could proceed. Naming a more appropriate state would amount to a consent to personal jurisdiction there (personal jurisdiction, unlike federal subject-matter jurisdiction, is waivable). If, however, the defendant contends that he cannot be sued in the forum state and refuses to identify any other where suit is possible, then the federal court is entitled to use *Rule 4(k)(2)*.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Due Process

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Minimum Contacts

HN8[] **In Personam Actions, Due Process**

To determine whether the exercise of federal jurisdiction over defendants satisfies due process, the court must determine whether defendants had minimum contacts with the United States. Under that standard, a federal court can exercise specific personal jurisdiction over a foreign defendant only if the defendant purposely directed its activities at the forum and the plaintiff's injuries arose from the defendant's forum-related activities.

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Civil Procedure > Remedies > Injunctions > Permanent Injunctions

Civil Procedure > Appeals > Standards of Review > Clearly Erroneous Review

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN9[] **Standards of Review, Abuse of Discretion**

The appellate court reviews for abuse of discretion the district court's grant of a permanent injunction. A district court necessarily abuses its discretion if it bases its ruling on an erroneous view of the law or on a clearly erroneous assessment of the evidence. A district court's factual findings are clearly erroneous if they lack factual support in the record, or if the appellate court, after reviewing all the evidence, is left with the definite and firm conviction that a mistake has been made.

Antitrust & Trade Law > Consumer Protection > Likelihood of Confusion > False Designation of Origin

Trademark Law > ... > Registration Procedures > Federal Registration > Degree of Protection

Business & Corporate Compliance > ... > Federal Unfair Competition Law > Lanham Act > Scope

Trademark Law > ... > Federal Unfair Competition Law > Lanham Act > Jurisdiction

HN10[] **Likelihood of Confusion, False Designation of Origin**

The Lanham Act governs federal trademark and unfair competition disputes. It subjects to liability any person who shall use in commerce any colorable imitation of a registered mark, *15 U.S.C.S. § 1114(1)*, or any person who uses in commerce any word, false description, or false designation of origin that is likely to cause confusion or to deceive as to the affiliation, origin, or sponsorship of any goods, *15 U.S.C.S. § 1125(a)(1)*. Notably, the Act defines commerce broadly as all commerce which may lawfully be regulated by Congress, *15 U.S.C.S. § 1127*, and affords federal courts jurisdiction over all claims arising under it, *15 U.S.C.S. § 1121(a)*.

Business & Corporate Compliance > ... > Federal Unfair Competition Law > Lanham Act > Extraterritorial Jurisdiction

Trademark Law > ... > Federal Unfair Competition Law > Lanham Act > Jurisdiction

HN11[] **Lanham Act, Extraterritorial Jurisdiction**

The United States Supreme Court established a two-step framework for analyzing extraterritoriality issues. At step one, the court asks whether the presumption against extraterritoriality has been rebutted—that is, whether the statute gives a clear, affirmative indication that it applies extraterritorially. The Supreme Court settled this question with regard to the Lanham Act when it held that the Act's use in commerce element and broad definition of commerce clearly indicate Congress's intent that the Act should apply extraterritorially. When a court concludes at step one that the statute in question applies extraterritorially, it need not reach step two (which asks whether the case involves a domestic application of the statute. Instead, when the presumption against extraterritoriality has been rebutted, the scope of an extraterritorial statute turns on the limits Congress has (or has not) imposed on the statute's foreign application. In other words, just because a statute can apply extraterritorially doesn't mean that it always will.

Antitrust & Trade Law > Consumer Protection > False Advertising > Lanham Act

Trademark Law > ... > Federal Unfair Competition Law > Lanham Act > Jurisdiction

Business & Corporate Compliance > ... > Federal Unfair Competition Law > Lanham Act > Scope

HN12[] **False Advertising, Lanham Act**

In deciding whether the Lanham Act governs a defendant's foreign conduct, the McBee v. Delica Co. court held that the court begins by determining whether the defendant is an American citizen. That's because a separate constitutional basis for jurisdiction exists for control of activities, even foreign activities, of an American citizen. The court adopted a separate test to assess the Lanham Act's extraterritorial reach when a plaintiff seeks damages based on foreign activities of foreign defendants. In that situation, the court held that the Lanham Act applies only if the complained-of activities have a substantial effect on U.S. commerce, viewed in light of the purposes of the Lanham Act.

Antitrust & Trade Law > Consumer Protection > False Advertising > Lanham Act

Trademark Law > ... > Federal Unfair Competition Law > Lanham Act > Jurisdiction

Business & Corporate Compliance > ... > Federal Unfair Competition Law > Lanham Act > Extraterritorial Jurisdiction

Business & Corporate Compliance > ... > Federal Unfair Competition Law > Lanham Act > Scope

HN13[] **False Advertising, Lanham Act**

Besides one caveat, the Tenth Circuit adopts the McBee v. Delica Co. framework for deciding whether the Lanham Act governs a defendant's foreign conduct. The Tenth Circuit agrees with McBee that the Lanham Act will usually extend extraterritorially when the defendant is an American citizen. No one questions Congress's ability to regulate the conduct of its own citizens, even extraterritorial conduct. Indeed, Congressional power over American citizens is a matter of domestic law that raises no serious international concerns, even when the citizen is located abroad. So when the defendant is an American citizen, courts may conclude that the Lanham Act reaches that defendant's extraterritorial conduct even when the effect on U.S. commerce isn't substantial.

Antitrust & Trade Law > Consumer Protection > False Advertising > Lanham Act

Trademark Law > ... > Federal Unfair Competition Law > Lanham Act > Jurisdiction

Business & Corporate Compliance > ... > Federal Unfair Competition Law > Lanham Act > Extraterritorial Jurisdiction

Business & Corporate Compliance > ... > Federal Unfair Competition Law > Lanham Act > Scope

HN14[] **False Advertising, Lanham Act**

When a plaintiff seeks to recover under the Lanham Act against a foreign national, the Tenth Circuit also agrees with McBee v. Delica Co. that the plaintiff must show that the defendant's conduct has a substantial effect on U.S. commerce. Requiring that the defendant's conduct has a substantial effect on U.S. commerce aligns the test for

Lanham Act extraterritoriality with both the Supreme Court's antitrust jurisprudence and general principles of foreign relations law.

Business & Corporate Compliance > ... > Federal Unfair Competition Law > Lanham Act > Extraterritorial Jurisdiction

Trademark Law > ... > Federal Unfair Competition Law > Lanham Act > Jurisdiction

HN15[] **Lanham Act, Extraterritorial Jurisdiction**

If a plaintiff successfully shows that a foreign defendant's conduct has had a substantial effect on U.S. commerce, courts should also consider whether extraterritorial application of the Lanham Act would create a conflict with trademark rights established under the relevant foreign law. In conducting this analysis, courts should weigh any foreign trademark rights established by the defendant.

Business & Corporate Compliance > ... > Federal Unfair Competition Law > Lanham Act > Extraterritorial Jurisdiction

Trademark Law > ... > Federal Unfair Competition Law > Lanham Act > Jurisdiction

HN16[] **Lanham Act, Extraterritorial Jurisdiction**

In deciding whether the Lanham Act applies extraterritorially, courts should consider three factors. First, courts should determine whether the defendant is a U.S. citizen. Second, when the defendant is not a U.S. citizen, courts should assess whether the defendant's conduct had a substantial effect on U.S. commerce. Third, only if the plaintiff has satisfied the substantial-effects test, courts should consider whether extraterritorial application of the Lanham Act would create a conflict with trademark rights established under foreign law.

Securities Law > ... > Subject Matter Jurisdiction > Postoffering & Secondary Distributions > Federal Jurisdiction

Trademark Law > ... > Federal Unfair Competition Law > Lanham Act > Jurisdiction

Securities Law > ... > Scope of Provisions > Covered Transactions > Foreign Transactions

Securities Law > Postoffering & Secondary Distributions > Scope of Provisions > Statutory Application & Interpretation

HN17[] **Postoffering & Secondary Distributions, Federal Jurisdiction**

Questions about the extraterritorial reach of a federal statute go to the merits, not jurisdiction. In assessing the extraterritoriality of the Securities Exchange Act, to ask what conduct *§ 10(b)* reaches is to ask what conduct *§ 10(b)* prohibits, which is a merits question. That same rationale holds true for the Lanham Act.

Business & Corporate Compliance > ... > Federal Unfair Competition Law > Lanham Act > Extraterritorial Jurisdiction

Business & Corporate Compliance > ... > Unfair Competition > Federal Unfair Competition Law > Lanham Act

HN18[] **Lanham Act, Extraterritorial Jurisdiction**

District courts should ordinarily decide questions about the scope of the Lanham Act's extraterritorial reach as a matter of law, preferably in the litigation's early stages.

Business & Corporate Compliance > ... > Federal Unfair Competition Law > Lanham Act > Extraterritorial Jurisdiction

Governments > Legislation > Interpretation

Trademark Law > ... > Federal Unfair Competition Law > Lanham Act > Jurisdiction

HN19[] **Lanham Act, Extraterritorial Jurisdiction**

The proper extraterritorial reach of a Lanham Act injunction is a matter of statutory interpretation. The scope of an extraterritorial statute turns on the limits Congress has (or has not) imposed on the statute's foreign application. The court has always considered questions of statutory interpretation as quintessentially legal in nature. The question here is one of statutory interpretation and thus a pure matter of law. Judges, not juries, decide purely legal questions. The extraterritoriality of the Lanham Act usually presents just such a question.

Business & Corporate Compliance > ... > Federal Unfair Competition Law > Lanham Act > Extraterritorial Jurisdiction

Trademark Law > ... > Federal Unfair Competition Law > Lanham Act > Jurisdiction

HN20[] **Lanham Act, Extraterritorial Jurisdiction**

Actual factual disputes underlying the extraterritoriality question certainly can arise. For example, a defendant could dispute whether (or how much of) its allegedly infringing products entered the United States. Establishing that factual predicate could affect the court's determination of whether the defendant's conduct had a substantial effect on U.S. commerce. In those instances, the court may submit the factual dispute to the jury while reserving the ultimate legal determination for itself. The Tenth Circuit has expressed its preference for this procedure in dealing with issues that, like the Lanham Act's extraterritorial scope, usually constitute a question of law but may involve factual disputes.

Governments > Legislation > Interpretation

Trademark Law > ... > Federal Unfair Competition Law > Lanham Act > Jurisdiction

HN21[] **Legislation, Interpretation**

The scope of the Lanham Act's extraterritorial reach generally presents a legal question of statutory interpretation.

Business & Corporate Compliance > ... > Federal Unfair Competition Law > Lanham Act > Extraterritorial Jurisdiction

HN22[] **Lanham Act, Extraterritorial Jurisdiction**

In deciding whether the Lanham Act applies extraterritorially, the substantial effects test requires that there be evidence of impacts within the United States, and these impacts must be of a sufficient character and magnitude to give the United States a reasonably strong interest in the litigation. In applying this test, courts should keep in mind the Lanham Act's core purposes—protecting U.S. consumers from confusion and assuring a trademark's owner that it will reap the financial and reputational rewards associated with having a desirable name or product.

Business & Corporate Compliance > ... > Federal Unfair Competition Law > Lanham Act > Extraterritorial Jurisdiction

Trademark Law > ... > Federal Unfair Competition Law > Lanham Act > Jurisdiction

HN23[] **Lanham Act, Extraterritorial Jurisdiction**

A foreign infringer's direct U.S. sales do not factor into our analysis of whether the Lanham Act applies abroad. Applying the Lanham Act to a foreign infringer's direct U.S. sales is not an extraterritorial application of the Act: Courts have repeatedly distinguished between domestic acts of a foreign infringer and foreign acts of that foreign infringer; the extraterritoriality analysis attaches only to the latter.

Business & Corporate Compliance > ... > Federal Unfair Competition Law > Lanham Act > Extraterritorial Jurisdiction

Evidence > Burdens of Proof > Allocation

HN24[] **Lanham Act, Extraterritorial Jurisdiction**

Numerous courts have recognized that a foreign defendant can be liable for Lanham Act violations when its products find their way into the United States, even if initially sold abroad: Quite commonly, plaintiffs in these sorts of cases can meet their burden by presenting evidence that while the initial sales of infringing goods may occur in foreign countries, the goods subsequently tend to enter the United States in some way and in substantial quantities. And when a plaintiff presents evidence that American consumers have been exposed to the infringing mark, confusion and reputational harm can often be inferred.

Business & Corporate Compliance > ... > Federal Unfair Competition Law > Lanham Act > Extraterritorial Jurisdiction

Governments > Legislation > Interpretation

HN25[] **Lanham Act, Extraterritorial Jurisdiction**

Once a court determines that a statute applies extraterritorially to a defendant's conduct, that statute captures all the defendant's illicit conduct.

Business & Corporate Compliance > ... > Federal Unfair Competition Law > Lanham Act > Extraterritorial Jurisdiction

Trademark Law > ... > Federal Unfair Competition Law > Lanham Act > Jurisdiction

HN26[] **Lanham Act, Extraterritorial Jurisdiction**

In connection with deciding whether the Lanham Act applies extraterritorially, several courts have recognized that evidence of diverted sales evinces a substantial effect on U.S. commerce: The effect-on-U.S.-commerce criteria may be met even where all of the challenged transactions occurred abroad, and where injury would seem to be limited to the deception of consumers' abroad, as long as there is monetary injury in the United States to an American plaintiff. Courts have considered sales diverted from American companies in foreign countries in their analyses.

Civil Procedure > Appeals > Appellate Briefs

Civil Procedure > Appeals > Reviewability of Lower Court Decisions > Preservation for Review

Civil Procedure > Pleading & Practice > Motion Practice > Opposing Memoranda

HN27[] **Appeals, Appellate Briefs**

The appellate court generally deems arguments raised for the first time in a reply brief waived.

Business & Corporate Compliance > ... > Federal Unfair Competition Law > Lanham Act > Extraterritorial Jurisdiction

Business & Corporate Compliance > ... > Federal Unfair Competition Law > Lanham Act > Scope

HN28[] **Lanham Act, Extraterritorial Jurisdiction**

In connection with deciding whether the Lanham Act applies extraterritorially, when the defendant is a U.S. citizen with a U.S. presence, the sales divert from one U.S. company to another—either way, U.S. commerce benefits from the sales revenue flowing into the U.S. economy.

Civil Procedure > Judgments > Entry of Judgments > Compelling Specific Acts

Civil Procedure > Remedies > Injunctions

HN29[] **Entry of Judgments, Compelling Specific Acts**

Fed. R. Civ. P. 65 requires that injunctions contain reasonable detail. *Fed. R. Civ. P. 65(d)(1)(C)*. Injunctions violate *Rule 65* when the delineation of the proscribed activity lacks particularity, or when containing only an abstract conclusion of law, not an operative command capable of enforcement.

Business & Corporate Compliance > ... > Trademark Cancellation & Establishment > Commercial Use > Actual Use

Trademark Law > ... > Equitable Relief > Injunctions > Preliminary Injunctions

Business & Corporate Compliance > ... > Trademark Cancellation & Establishment > Priority > Actual Use Priority

HN30[] **Commercial Use, Actual Use**

Even the owner of a federally registered mark—who enjoys the presumption of nationwide priority—is not entitled to injunctive relief except in the area actually penetrated through use of the mark. A trademark extends to every market where the trader's goods have become known and identified by his use of the mark. But the mark, of itself, cannot travel to markets where there is no article to wear the badge and no trader to offer the article.

Civil Procedure > Appeals > Standards of Review > De Novo Review

Civil Procedure > ... > Summary Judgment > Appellate Review > Standards of Review

HN31[] **Standards of Review, De Novo Review**

District court's ruling on summary judgment is reviewed de novo.

Business & Corporate Compliance > ... > Judgments > Enforcement & Execution > Foreign Judgments

HN32[] **Business & Corporate Compliance, Foreign Judgments**

Federal courts recognize and enforce foreign judgments if they meet due-process standards. Valid judgments rendered in a foreign nation will be accorded the same degree of recognition to which sister state judgments are entitled. This due-process standard is met if there has been opportunity for a full and fair trial abroad before a court of competent jurisdiction, conducting the trial upon regular proceedings, after due citation or voluntary appearance of the defendant, and under a system of jurisprudence likely to secure an impartial administration of justice between the citizens of its own country and those of other countries, and there is nothing to show either prejudice in the court, or in the system of laws under which it is sitting, or fraud in procuring the judgment.

Civil Procedure > ... > Preclusion of Judgments > Estoppel > Collateral Estoppel

HN33[] **Estoppel, Collateral Estoppel**

Issue preclusion bars a party from relitigating an issue once it has suffered an adverse determination on the issue, even if the issue arises when the party is pursuing or defending against a different claim. In the civil context, four criteria must be met before a court may apply the doctrine of issue preclusion: (1) the issue previously decided is identical with the one presented in the action in question, (2) the prior action has been finally adjudicated on the merits, (3) the party against whom the doctrine is invoked was a party, or in privity with a party, to the prior adjudication, and (4) the party against whom the doctrine is raised had a full and fair opportunity to litigate the issue in the prior action.

Civil Procedure > ... > Preclusion of Judgments > Estoppel > Collateral Estoppel

HN34[] **Estoppel, Collateral Estoppel**

For issue preclusion purposes, the court aims to prevent repetitious litigation of what is essentially the same dispute.

Civil Procedure > Appeals > Standards of Review > Reversible Errors

HN35[] **Standards of Review, Reversible Errors**

Even if the trial court is mistaken, it will not be reversed unless its ruling results in substantial prejudice, or had a substantial effect on the outcome of the case.

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Evidence > Admissibility > Procedural Matters > Rulings on Evidence

Civil Procedure > Judgments > Relief From Judgments > Motions for New Trials

Civil Procedure > Judicial Officers > Judges > Discretionary Powers

HN36[] **Standards of Review, Abuse of Discretion**

Evidentiary rulings generally are committed to the very broad discretion of the trial judge, and they may constitute an abuse of discretion only if based on an erroneous conclusion of law, a clearly erroneous finding of fact or a manifest error in judgment. And even if the court finds an erroneous evidentiary ruling, a new trial will be ordered only if the error affected the substantial rights of the parties.

Civil Procedure > Appeals > Record on Appeal

Civil Procedure > Appeals > Standards of Review

HN37[] **Appeals, Record on Appeal**

The appellate court may affirm the district court for any reason supported by the record. A district court may exclude an economic expert if the expert's opinions lacked foundation because they were based on the self-serving statements of an interested party.

Counsel: Geren T. Steiner (Anton J. Rupert and Mack J. Morgan with him on the briefs), of Rupert, Steiner & Morgan PLLC, Oklahoma City, Oklahoma, for Defendants-Appellants.

Debbie L. Berman (Wade A. Thomson and Matthew S. Hellman with her on the brief), of Jenner & Block LLP, Chicago, Illinois, for Plaintiff-Appellee.

Judges: Before PHILLIPS, MURPHY, and McHUGH, Circuit Judges.

Opinion by: PHILLIPS

Opinion

[*1023] PHILLIPS, Circuit Judge.

Hetronic International, Inc., a U.S. company, manufactures radio remote controls—the kind used to remotely operate heavy-duty construction equipment (think cranes). Defendants, none of whom are U.S. citizens, distributed Hetronic's products, mostly in Europe. That relationship worked well for nearly a decade. But then one of Defendants' employees stumbled across an old research-and-development agreement between the parties. Embracing a creative legal interpretation of the agreement endorsed by Defendants' lawyers, Defendants concluded that they—not Hetronic—owned the rights to Hetronic's trademarks and other intellectual property.

That caused some tension in the relationship. Defendants began **[**2]** manufacturing their own products—identical to Hetronic's—and selling them under the Hetronic brand, mostly in Europe. They even kept the same product names. Hetronic terminated the parties' distribution agreements, **[*1024]** but that didn't stop Defendants from making tens of millions of dollars selling their copycat products (which they continue to sell today). Defendants attempted a brief foray into the U.S. market but backed off after Hetronic sued them.

Hetronic asserted numerous claims against Defendants, but we're here concerned almost exclusively with its trademark claims under the *Lanham Act*. A jury sitting in the Western District of Oklahoma awarded Hetronic over $100 million in damages, most of which related to Defendants' trademark infringement. Then on Hetronic's motion, the district court entered a worldwide injunction barring Defendants from selling their infringing products. Defendants have ignored the injunction.

In the district court and now on appeal, Defendants have focused on one defense in particular: Though they accept that the Lanham Act can sometimes apply extraterritorially, they insist that the Act's reach doesn't extend to their conduct, which generally involved foreign **[**3]** defendants making sales to foreign consumers. Our circuit has yet to grapple with that question. After considering the Supreme Court's lone decision on the issue and persuasive authority from our sibling circuits, we conclude that the district court properly applied the Lanham Act to Defendants' conduct. But we narrow the district court's expansive injunction. And so, exercising jurisdiction under *28 U.S.C. § 1291*, we affirm in part, reverse in part, and remand for further consideration consistent with this opinion.

BACKGROUND

I. Factual Background

Hetronic sells and services its radio remote controls in over forty-five countries around the world. Though Hetronic offers a wide range of radio remote controls, the parties' dispute centers on ten of those products: ERGO, EURO, GL, GR, HH, MINI, NOVA, Pocket, TG, and RX. Hetronic's products feature a distinctive black-and-yellow color scheme to distinguish them from those of its competitors:

Hetronic NOVA

Hetronic ERGO

Appellants' App. vol. 7 at 1615-16, 1644.

Hetronic markets and distributes its radio remote controls through a worldwide network of wholly-owned subsidiaries and distributors. In 2006, Hetronic entered distribution and licensing agreements with Hydronic Steuersysteme GmbH, **[**4]** an Austrian corporation managed by Albert Fuchs. In time, Hydronic came to distribute Hetronic's products in over twenty European countries. In 2007, Hetronic entered similar distribution and licensing agreements with a company that would eventually be purchased by Hetronic Germany **[*1025]** GmbH, a German corporation owned by Fuchs. Hetronic Germany became Hetronic's principal distributor in Germany.

The distribution and licensing agreements authorized Hydronic and Hetronic Germany to assemble and sell Hetronic's remote controls under Hetronic's brand, but they were required to purchase parts from Hetronic unless otherwise authorized in writing. Further, the two distributors agreed to act in Hetronic's best interest and to protect Hetronic's confidential information. They also agreed not to compete with Hetronic. They abided by those conditions without issue through much of 2011.

September 2011 marked the beginning of the end of Hetronic's business relationship with Hetronic Germany and Hydronic. That month, a Hetronic Germany employee happened upon an old research-and-development agreement entered between Hetronic and Hetronic Germany's predecessor. After consulting with legal counsel, Hetronic **[**5]** Germany took the position that it owned all the technology developed under that agreement (more on that later).

Based on that understanding, Hetronic Germany and Hydronic began reverse-engineering Hetronic's products. One of Hetronic Germany's former employees testified by deposition that he used Hetronic-manufactured parts to try to "recreate the model . . . so that no difference could be seen." *Id.* at 1631. Once they developed these new, copycat parts (what they referred to as "KH" parts, *id.*), Hetronic Germany and Hydronic sought out new suppliers to source them. Eventually, both Hetronic Germany and Hydronic began selling Hetronic-branded products that incorporated KH parts sourced from unauthorized third-parties.

In 2014, a whistleblower who had worked for Hetronic Germany told Hetronic what had been going on the past few years. That June, once Hetronic understood the scope of Hetronic Germany and Hydronic's activities, it terminated their licensing and distribution agreements. But both distributors continued to sell Hetronic-branded products for several months.

Around the same time, Fuchs used an Austrian company he owned, ABI Holding GmbH, to incorporate two new companies, Abitron **[**6]** Germany GmbH and Abitron Austria GmbH. Abitron Austria purchased Hydronic in August 2014; Abitron Germany purchased Hetronic Germany the following month. They soon began competing directly with Hetronic, selling the same NOVA and ERGO products with the exact same trade dress (compared below).

[*1026] 

Id. at 1644. Before this litigation ensued, they sold several hundred thousand dollars' worth of products in the United States.

II. Procedural Background

In June 2014, Hetronic sued Hetronic Germany and Hydronic in the Western District of Oklahoma, alleging breach of contract. In 2015, Hetronic filed an amended complaint that added as defendants Fuchs, ABI, Abitron Austria, and Abitron Germany. The amended complaint also added new claims under the Lanham Act and state tort law.

Two motions to dismiss soon followed, one filed by the Abitron companies and the other by ABI and Fuchs. Each motion argued that the district court lacked personal jurisdiction over the relevant Defendants. The district court denied both motions. First, the district court concluded that the forum-selection clause in Hetronic's agreements with Hetronic Germany and Hydronic extended to both Abitron Germany and Abitron Austria **[**7]** as Hetronic Germany's and Hydronic's successors-in-interest. Second, the district court denied ABI and Fuchs's motion because it concluded that they had purposefully availed themselves of a U.S. forum under *Federal Rule of Civil Procedure 4(k)(2)*.

Hetronic then filed a Second Amended Complaint, and both sides moved for summary judgment. Though the district court granted Hetronic's motion on Defendants' counterclaims, it otherwise denied the motion.

Defendants' motion argued that the court lacked subject-matter jurisdiction to resolve Hetronic's Lanham Act claims because the conduct at issue occurred overseas. Specifically, Defendants asserted that the Lanham Act applies extraterritorially only if a defendant's conduct has a substantial effect on U.S. commerce; because that was allegedly lacking here, Defendants maintained that Hetronic's claims had to be dismissed. The district court rejected that argument and denied Defendants summary judgment based on their extraterritoriality defense.

While Defendants played defense in federal district court, they sought to go on offense in the European Union. In July 2015, Abitron Germany sought a "declaration of invalidity" from the European Union Intellectual Property Office (EUIPO) **[**8]** that would nullify Hetronic's "NOVA" **[*1027]** trademark in the EU. *Id.* vol. 13 at 3106-07, 3171. The Cancellation Division—the initial EUIPO tribunal to consider the request—rejected Abitron Germany's claim. Abitron Germany appealed, but the Board of Appeal affirmed. The Board concluded that Hetronic owned all the disputed intellectual property.

Based on that ruling, Hetronic moved for summary judgment on Defendants' defense that they owned the disputed intellectual property, arguing that the doctrine of issue preclusion barred Defendants from relitigating that question. After briefing and two hearings, the district court granted Hetronic's motion, concluding that the EUIPO proceeding afforded Defendants a full and fair opportunity to adjudicate the merits of the ownership dispute.

About a week later, the eleven-day jury trial began. The jury returned a verdict for Hetronic on all counts, finding that Defendants had willfully infringed Hetronic's trademarks. The jury awarded Hetronic over $115 million in damages, $96 million of which related to Defendants' Lanham Act violations.

After the trial, Hetronic moved for a permanent injunction to prohibit Defendants from further infringing its trademarks. **[**9]** In opposing the injunction, Defendants reasserted their contention that the court lacked jurisdiction under the Lanham Act to enjoin Defendants' foreign activities. Applying the facts established at trial, the district court concluded that the Lanham Act reached Defendants' foreign conduct. The court granted Hetronic's motion and entered a permanent injunction order, enjoining Defendants' infringing activities worldwide.

This appeal followed.

DISCUSSION

Defendants raise numerous issues on appeal. First, Defendants argue that the district court erroneously exercised personal jurisdiction over four of the six defendants. Second, Defendants argue that the district court erred in concluding that the Lanham Act applied extraterritorially to reach their foreign activities. Third, Defendants argue that the district court erred when it ruled that issue preclusion barred them from asserting at trial that they owned the disputed intellectual property. Fourth, Defendants argue that the district court made several erroneous evidentiary rulings at trial. We address each argument in turn.

I. Personal Jurisdiction

Defendants have never disputed the district court's exercise of personal jurisdiction over **[**10]** Hetronic Germany and Hydronic, which derived from a forum-selection clause in the parties' distribution and licensing agreements. That clause designates Oklahoma as the forum for all disputes. But Defendants challenge the district court's exercise of personal jurisdiction over the Abitron entities, ABI, and Fuchs. Following the parties' lead, we first address the court's personal jurisdiction over Abitron Germany and Abitron Austria and then consider its jurisdiction over Fuchs and ABI.

HN1[] We review de novo a district court's exercise of personal jurisdiction, *ClearOne Commc'ns, Inc. v. Bowers, 651 F.3d 1200, 1214 (10th Cir. 2011)* (footnote and citation omitted), and we consider each defendant separately, *Newsome v. Gallacher, 722 F.3d 1257, 1265-66 (10th Cir. 2013)* (citation omitted). "The plaintiff has the burden of proving that the court has jurisdiction." *Compañía de Inversiones Mercantiles, S.A. v. Grupo Cementos de Chihuahua S.A.B. de C.V., 970 F.3d 1269, 1281 (10th Cir. 2020)* (citation omitted), *cert. denied*, *No. 20-1033, 141 S. Ct. 2793, 210 L. Ed. 2d 927, 2021 U.S. LEXIS 3218, 2021 WL 2519105 (2021)*.

HN2[] When the district court evaluates personal jurisdiction "based only on the **[*1028]** complaint and affidavits, 'a prima facie showing of personal jurisdiction' is sufficient." *Niemi v. Lasshofer, 770 F.3d 1331, 1347 (10th Cir. 2014)* (quoting *Dudnikov v. Chalk & Vermilion Fine Arts, Inc., 514 F.3d 1063, 1070 (10th Cir. 2008)*). Because the district court here assessed personal jurisdiction based only on the complaint and affidavits—and because Defendants never challenge the jurisdictional facts upon which the district court based its rulings—we consider only whether Hetronic **[**11]** made a prima facie showing of personal jurisdiction. *See id.*

A. Abitron Companies

Though Abitron Germany and Abitron Austria weren't parties to Hetronic's distribution and licensing agreements with Hetronic Germany and Hydronic, the district court nevertheless concluded that the forum-selection clauses in those agreements bound both Abitron entities. According to the district court, Abitron Austria and Abitron Germany were Hydronic's and Hetronic Germany's successors-in-interest. We agree.

HN3[] In assessing personal jurisdiction, we have acknowledged that "[a] corporation's contacts with a forum may be imputed to its successor. . . ." *Williams v. Bowman Livestock Equip. Co., 927 F.2d 1128, 1132 (10th Cir. 1991)* (citation omitted). But our Circuit has yet to address the specific issue here: whether a successor corporation is bound by its predecessor's contractual waiver of personal jurisdiction through a forum-selection clause.

HN4[] Courts that have considered this question "have uniformly found that it is consistent with due process to impute a corporation's waiver of personal jurisdiction to its successor . . . for the same reasons that imputation of jurisdictional contacts is appropriate." *Patin v. Thoroughbred Power Boats Inc., 294 F.3d 640, 654 & n.19 (5th Cir. 2002)* (collecting cases); *cf.* *Purdue Rsch. Found. v. Sanofi-Synthelabo, S.A., 338 F.3d 773, 783-84 (7th Cir. 2003)* (distinguishing between "a corporate successor," whose **[**12]** contacts may be attributed to a predecessor, and "an assignee of a contract," whose contacts generally shouldn't be attributed to the assignor). Under this theory of personal jurisdiction, we ask whether the successor is a "mere continuation" of the predecessor. *Patin, 294 F.3d at 654* ("The premise underlying the 'mere continuation' exception to the rule against successor liability is that the successor corporation is, in fact, the *same corporate entity* as the predecessor corporation, simply wearing a 'new hat.'" (citations omitted)).

To start, we must first answer the threshold question whether Abitron Austria and Abitron Germany are in fact successors-in-interest of Hydronic and Hetronic Germany, respectively. To decide that question, we look to the law of the forum state—here, Oklahoma. *See* *Williams, 927 F.2d at 1132*. HN5[] Under Oklahoma law, "[t]he general rule . . . is that where one company sells or otherwise transfers all its assets to another company, the latter is not liable for the debts and liabilities of the transferor." *Pulis v. U.S. Elec. Tool Co., 1977 OK 36, 561 P.2d 68, 69 (Okla. 1977)*; *see also* *Flores v. U.S. Repeating Arms Co., 19 F. App'x 795, 797 (10th Cir. 2001)* (unpublished) (applying Oklahoma law). But Oklahoma's courts have recognized four exceptions to that general rule:

(1) Where there is an agreement to assume such debts or liabilities[;]

> (2) Where **[**13]** the circumstances surrounding the transaction warrant a finding that there was a consolidation or merger of the corporations[;] or
> (3) that the transaction was fraudulent in fact[;] or
> (4) that the purchasing corporation was a mere continuation of the selling company.

[*1029] *Pulis, 561 P.2d at 69* (citations omitted). Only the fourth exception applies here.

Under the "mere continuation" exception, "the test is not whether there is a continuation of business operations, but whether there is a continuation of the corporate entity." *Crutchfield v. Marine Power Engine Co., 2009 OK 27, 209 P.3d 295, 301 (Okla. 2009)* (footnote omitted). To assess whether the corporate entity has been continued, Oklahoma courts consider (1) "whether there is a common identity of directors, officers, and stockholders before and after the sale," (2) "whether there was good consideration for the sale," and (3) "whether the seller corporation continues to exist in fact." *Id.* (footnote omitted). Concerning the third factor, "[t]he bare *de jure* existence of the seller corporation after the sale is insufficient alone to establish that the successor corporation is not a mere continuation of the seller company." *Id. at 301-02* (footnote omitted).

These factors weigh heavily in favor of concluding that the Abitron entities are Hydronic's and **[**14]** Hetronic Germany's successors-in-interest. The analysis is the same for both companies under the first and third factors. Starting with the first factor, Defendants don't contest that Fuchs owns all four companies. Nor do they contest the district court's finding that "the Abitron entities are using the same facilities, management, employees, customer lists, and product mark and dress as H[etronic] Germany and Hydronic." Appellants' App. vol. 1 at 122-23. Further, Hetronic Germany's former CEO became the CEO of both Abitron companies.

On the third factor, though the seller corporations continue to exist in fact, their "bare *de jure* existence" carries little weight. *Crutchfield, 209 P.3d at 301-02*. Almost all of Hydronic's and Hetronic Germany's assets were transferred to the Abitron entities, with only "a small amount being left for the purposes of satisfying debt with Hetronic International." Appellants' App. vol. 1 at 122.

The analysis on the second prong—whether there was good consideration for the sale—is less straightforward. Abitron Germany purportedly paid €3 million[1] to purchase Hetronic Germany. But no funds were exchanged when the sale closed, and ABI loaned Abitron Germany the money to complete the sale. **[**15]** As for the sale of Hydronic to Abitron Austria, the parties provide no information about the purchase's details. So we can't assess the second prong as to Abitron Austria.

But even if we concluded that the second factor cuts against finding that the Abitron companies are successors-in-interest (and it isn't clear that it does), Oklahoma courts weigh all three factors in deciding this issue. *See* *Pulis, 561 P.2d at 71-72*. At least two of those three factors weigh against Defendants. Considering the three factors collectively, particularly the common identity of directors, officers, and stockholders before and after the sale, we hold that the Abitron companies constitute a "mere continuation" of Hydronic and Hetronic Germany and are therefore successors-in-interest under Oklahoma law. *See* *Crutchfield, 209 P.3d at 301*. And because the Abitron entities are mere continuations of Hetronic Germany and Hydronic, the district court rightly concluded that the forum-selection clause in the parties' licensing agreements bound both Abitron Germany and Abitron Austria.[2] *See* *Patin, 294 F.3d at 654*. Consequently, the district **[*1030]** court properly exercised personal jurisdiction over both companies.

B. Fuchs and [16] ABI**

The district court ruled that it could exercise personal jurisdiction over Fuchs and ABI under *Federal Rule of Civil Procedure 4(k)(2)*. *Rule 4(k)(2)* states that

---

[1] €3 million refers to 3 million euros. Though the exchange rate varies, 3 million euros currently equates to about $3.54 million. *See Foreign Exchange Rates H.10*, Board of Governors of the Federal Reserve System, https://www.federalreserve.gov/releases/h10/current/ (last visited July 29, 2021).

[2] Defendants appear to argue that the forum-selection clauses don't bind them because Hetronic sued them only *after* terminating the licensing agreements. Our circuit hasn't addressed that issue, but the Supreme Court "presume[s] as a matter of contract interpretation that . . . parties d[o] not intend a pivotal dispute resolution provision to terminate for all purposes upon the expiration of [an] agreement." *Litton Fin. Printing Div., a Div. of Litton Bus. Sys., Inc. v. N.L.R.B., 501 U.S. 190, 208, 111 S. Ct. 2215, 115 L. Ed. 2d 177 (1991)*. Though *Litton* related to arbitration clauses in the collective-bargaining context, our sibling circuits that have considered this question agree that dispute-resolution clauses generally may be enforced even after an agreement is terminated. *Silverpop Sys., Inc. v. Leading Mkt. Techs., Inc., 641 F. App'x 849, 857 (11th Cir. 2016)* (unpublished) ("While contractual obligations may expire upon the termination of a contract, provisions that are structural (e.g., relating to remedies *and the resolution of disputes*) may survive that termination." (emphasis added) (citations omitted)); *U.S. Smoke & Fire Curtain, LLC v. Bradley Lomas Electrolok, Ltd., 612 F. App'x 671, 672-73 (4th Cir. 2015)* (unpublished) ("Generally, dispute-resolution provisions, such as forum-selection clauses, are enforceable beyond the expiration of the contract if they are otherwise applicable to the disputed issue and the parties have not agreed otherwise." (citations omitted)).

> For a claim that arises under federal law, serving a summons or filing a waiver of service establishes personal jurisdiction over a defendant if:
> (A) the defendant is not subject to jurisdiction in any state's courts of general jurisdiction; and
>
> (B) exercising jurisdiction is consistent with the United States Constitution and laws.

Fed. R. Civ. P. 4(k)(2).***HN6***[] Under this rule, which has been described as a kind of federal long-arm statute, a court may exercise personal jurisdiction over a foreign defendant if (1) the "plaintiff's claims arise under federal law"; (2) "the defendant is not subject to the jurisdiction of any state court of general jurisdiction"; and (3) "the plaintiff can show that the exercise of jurisdiction comports with due process." *CGC Holding Co. v. Hutchens, 974 F.3d 1201, 1208 (10th Cir. 2020)* (citing *Grupo Cementos, 970 F.3d at 1281 n.1*).

Defendants don't dispute that Hetronic's claims arise under federal law; their arguments focus on the second and third elements. On the second element, Defendants indirectly argue that the district court failed to properly consider whether they were subject to the jurisdiction of other states' courts besides Oklahoma. *See* Appellants' Opening Br. **[**17]** at 53 (faulting the district court because it "actually considered contacts with other forums (Nevada, Massachusetts) that might have been proper forums, but made no determination as to same" (citation omitted)). Defendants imply that the district court was required to conduct a sua sponte analysis of all fifty states—or at least Nevada and Massachusetts—to assess whether *Rule 4(k)(2)*'s requirements had been satisfied.

It's true that *subsection A of Rule 4(k)(2)* could be read to require a plaintiff to conduct a state-by-state assessment showing that the defendant isn't subject to any state's courts of general jurisdiction. But we recently joined the majority of circuits that have rejected that reading of the rule: "Every other circuit court [besides the First and Fourth Circuits] to consider the issue has placed the initial burden on the defendant to identify a state in which the lawsuit could proceed." *Grupo Cementos, 970 F.3d at 1283* (citations omitted). We adopted the Seventh Circuit's reasoning on this point:

> **[*1031]** Now one might read *Rule 4(k)(2)* . . . [as] requiring 51 constitutional decisions: The court must first determine that the United States has power and then ensure that none of the 50 states does so . . . . Constitutional analysis for each of **[**18]** the 50 states is eminently avoidable by allocating burdens sensibly. ***HN7***[] A defendant who wants to preclude use of *Rule 4(k)(2)* has only to name some other state in which the suit could proceed. Naming a more appropriate state would amount to a consent to personal jurisdiction there (personal jurisdiction, unlike federal subject-matter jurisdiction, is waivable). If, however, the defendant contends that he cannot be sued in the forum state and refuses to identify any other where suit is possible, then the federal court is entitled to use *Rule 4(k)(2)*.

Id. at 1283-84 (quoting *ISI Int'l, Inc. v. Borden Ladner Gervais LLP, 256 F.3d 548, 552 (7th Cir. 2001)*).

Defendants never argued in the district court that some other state's courts could exercise personal jurisdiction over them. So they have forfeited any challenge along those lines. *Grupo Cementos, 970 F.3d at 1282*. Even on appeal, they never argue that Nevada or Massachusetts could exercise personal jurisdiction over them. Rather, they merely allege that the district court erred by not considering those states in assessing *Rule 4(k)(2)*'s applicability. But as our caselaw makes clear, the district court wasn't required to consider all 50 states (or even two states that a defendant merely alludes to). By failing to point to some other state that could exercise personal jurisdiction over them, Defendants **[**19]** conceded that Hetronic satisfied the second element to establish personal jurisdiction under *Rule 4(k)(2)*.

Finally, Hetronic has satisfied the third element by demonstrating that the exercise of jurisdiction comports with due process. ***HN8***[] "To determine whether the exercise of federal jurisdiction over [Defendants] satisfies due process, we must determine whether [Defendants] had minimum contacts with the United States." *CGC Holding Co., 974 F.3d at 1209*. Under that standard, a federal court can exercise specific personal jurisdiction over a foreign defendant "only if the defendant purposely directed [its] activities at the forum and the plaintiff's injuries arose from the defendant's forum-related activities." *Id.* (citing [Dudnikov, 514 F.3d at 1071]). The relevant forum here is not an individual state, but the United States as a whole.[3]

Both Fuchs and ABI have sufficient minimum contacts that demonstrate they purposefully directed their activities at the forum (the United States), and Hetronic's injuries arose in part from those forum-related activities. As for Fuchs, Hetronic alleged the following:

> **[*1032]** • Fuchs traveled to the United States to try to obtain certifications from the U.S. Federal Communications Commission, which he needed for the Abitron entities **[**20]** to sell radio products in the United States.
> • Fuchs also engaged a Massachusetts company to obtain the FCC certifications.
> • Fuchs traveled to Las Vegas, Nevada, to meet with Hetronic's former President, Torsten Rempe, to seek advice about competing with Hetronic, along with sending over twenty separate e-mail communications to Rempe.

These contacts suffice to show Fuchs directed his activities at the United States and directly relate to the injuries Hetronic complained of (i.e., trademark violations). *See* *CGC Holding Co., 974 F.3d at 1209* (holding that a Canadian defendant had sufficient minimum contacts with the United States even though she operated her RICO conspiracy mostly from Toronto because she worked extensively with a U.S. partner and "prepar[ed] loan commitment letters directed at U.S. borrowers").

The same goes for ABI. The district court detailed the following contacts ABI had with the United States:

> • ABI filed a trademark application for the Abitron entities in the United States to protect the competing remote-control products it intended to sell.
>
> • ABI entered a project agreement with a U.S.-based company (AZCS) owned by Rempe. Under the agreement, ABI received consulting services from AZCS, including **[**21]** market research, so that ABI could directly compete with Hetronic in the United States.

Based on these findings, ABI can't seriously contest that it purposefully directed its activities at the United States. Nor can it dispute that Hetronic's injuries arose in part from these activities. On these facts, ABI should have expected that it could be haled into court in the United States. *See id.*

In sum, we conclude that the district court properly exercised personal jurisdiction over all Defendants. The forum-selection clauses in Hydronic's and Hetronic Germany's licensing agreements bound both Abitron companies as successors in interest. And Hetronic has shown that the court rightly exercised personal jurisdiction over both Fuchs and ABI under *Rule 4(k)(2)*. We thus consider the merits of the parties' dispute.

II. Permanent Injunction

Defendants attack the permanent injunction prohibiting their worldwide sales of look-alike remote controls on primarily three grounds. They argue (1) that the district court erroneously concluded that the Lanham Act applied extraterritorially here; (2) that the injunction lacks the specificity required by *Rule 65 of the Federal Rules of Civil*

---

[3] Ordinarily, we would also consider whether the exercise of jurisdiction was reasonable. *CGC Holding Co., 974 F.3d at 1209* ("Even when a defendant has purposely established minimum contacts with a forum state, minimum requirements inherent in the concept of fair play and substantial justice may defeat the reasonableness of jurisdiction." (internal quotation marks and citations omitted)). That entails weighing five factors: (1) "the burden on the defendant," (2) "the forum state's interest in resolving the dispute," (3) "the plaintiff's interest in receiving convenient and effective relief," (4) "the interstate judicial system's interest in obtaining the most efficient resolution of controversies," and (5) "the shared interest of the several states in furthering fundamental substantive social policies." *Id. at 1210* (citation omitted). But to defeat jurisdiction on this ground, "[a] defendant must present a 'compelling' case that these factors render jurisdiction unreasonable." *Id.* (*quoting* *Grupo Cementos, 970 F.3d at 1289*). Defendants ignore these reasonableness factors entirely, so we needn't consider them.

Procedure; (3) and that the injunction sweeps too broad. Though we agree that **[**22]** the district court's worldwide injunction reaches too far, we otherwise reject Defendants' challenges and uphold the injunction.

HN9[] We review for abuse of discretion the district court's grant of a permanent injunction. *Husky Ventures, Inc. v. B55 Invs., Ltd., 911 F.3d 1000, 1011 (10th Cir. 2018)* (citation omitted). "A district court 'necessarily abuses its discretion if it bases its ruling on an erroneous view of the law or on a clearly erroneous assessment of the evidence.'" *Id.* (brackets omitted) (quoting *Zurich N. Am. v. Matrix Serv., Inc., 426 F.3d 1281, 1289 (10th Cir. 2005)*). A district court's factual findings are clearly erroneous if they lack "factual **[*1033]** support in the record, or if we, after reviewing all the evidence, are left with the definite and firm conviction that a mistake has been made." *Id.* (brackets and citation omitted).

We begin by considering whether the district court correctly concluded that the Lanham Act reaches all of Defendants' allegedly infringing conduct here, after which we assess the injunction's specificity and scope.

A. Extraterritorial Reach of the Lanham Act

HN10[] The Lanham Act governs federal trademark and unfair competition disputes. It subjects to liability "[a]ny person who shall . . . use in commerce any . . . colorable imitation of a registered mark," *15 U.S.C. § 1114(1)* (*Section 32*), or "[a]ny person who . . . uses in commerce **[**23]** any" word, false description, or false designation of origin that "is likely to cause confusion . . . or to deceive as to the affiliation," origin, or sponsorship of any goods, *id. § 1125(a)(1)* (*Section 43*). Notably, the Act defines commerce broadly as "all commerce which may lawfully be regulated by Congress," *id. § 1127*, and affords federal courts jurisdiction over all claims arising under it, *id. § 1121(a)*. Though most of the damages the jury awarded to Hetronic flowed from Defendants' Lanham Act violations, Defendants argue as a threshold matter that the Act doesn't apply extraterritorially to their foreign conduct. We disagree.

The Supreme Court has in recent years considered (or reconsidered) the extraterritoriality of several federal statutes, some of them multiple times: the Alien Tort Statute, *Nestlè USA, Inc. v. Doe, 141 S. Ct. 1931, 1936-37, 210 L. Ed. 2d 207 (2021)*, and *Kiobel v. Royal Dutch Petro. Co., 569 U.S. 108, 115-17, 133 S. Ct. 1659, 185 L. Ed. 2d 671 (2013)*; the Patent Act, *WesternGeco LLC v. ION Geophysical Corp., 138 S. Ct. 2129, 2136-38, 201 L. Ed. 2d 584 (2018)*; the Racketeer Influenced and Corrupt Organizations Act, *RJR Nabisco, Inc. v. Eur. Cmty., 579 U.S. 325, 136 S. Ct. 2090, 2099-2103, 195 L. Ed. 2d 476 (2016)*; *section 10(b) of the Securities Exchange Act of 1934*, *Morrison v. Nat'l Austl. Bank Ltd., 561 U.S. 247, 255-65, 130 S. Ct. 2869, 177 L. Ed. 2d 535 (2010)*; and both the *Foreign Trade Antitrust Improvements Act of 1982*, *F. Hoffmann-La Roche Ltd. v. Empagran S.A., 542 U.S. 155, 163-73, 124 S. Ct. 2359, 159 L. Ed. 2d 226 (2004)*, and its predecessor, the Sherman Act, *Hartford Fire Ins. Co. v. California, 509 U.S. 764, 794-99, 113 S. Ct. 2891, 125 L. Ed. 2d 612 (1993)*. But you have to go back almost three-quarters of a century since the Court last substantively considered the extraterritoriality of the Lanham Act. *Steele v. Bulova Watch Co., 344 U.S. 280, 282-85, 73 S. Ct. 252, 97 L. Ed. 319, 1953 Dec. Comm'r Pat. 424 (1952)*. Though the *Steele* Court acknowledged the general presumption against extraterritoriality, **[**24]** *see id. at 285*, it held that the Lanham Act could apply abroad at least in some circumstances, *see id. at 286* ("In the light of the broad jurisdictional grant in the Lanham Act, we deem its scope to encompass petitioner's [foreign] activities here.").[4] Still, that lone decision **[*1034]** leaves much unanswered about the extent of the Lanham Act's extraterritorial reach—particularly, as in our case, as it relates to foreign defendants. *See McBee v. Delica Co., 417 F.3d 107, 117 (1st Cir. 2005)* (noting that although "[t]he Supreme Court has long since made it clear that the Lanham Act could

[4] The Court has in passing reaffirmed the Lanham Act's extraterritorial reach in two more recent decisions. *See Morrison, 561 U.S. at 271 n.11* (citing *Steele* and noting that the Court has interpreted the Lanham Act "to have extraterritorial effect"); *EEOC v. Arabian Am. Oil Co., 499 U.S. 244, 252, 111 S. Ct. 1227, 113 L. Ed. 2d 274 (1991)* ("While recognizing that 'the legislation of Congress will not extend beyond the boundaries of the United States unless a contrary legislative intent appears,' the Court concluded that in light of the fact that the allegedly unlawful conduct had some effects within the United States, coupled with the [Lanham] Act's 'broad jurisdictional grant' and its 'sweeping reach into "all commerce which may lawfully be regulated by Congress,"' the statute was properly interpreted as applying abroad." (quoting *Steele, 344 U.S. at 285, 287*)).

sometimes be used to reach extraterritorial conduct," "it has never laid down a precise test for when such reach would be appropriate" (footnote and citations omitted)).

Though none of the Supreme Court's recent decisions concerning extraterritoriality resolve the issues we face here related to the Lanham Act, they offer some useful guidance. ***HN11***[] In *RJR*, the Court established "a two-step framework for analyzing extraterritoriality issues." *136 S. Ct. at 2101*. At step one, "we ask whether the presumption against extraterritoriality has been rebutted—that is, whether the statute gives a clear, affirmative indication that it applies extraterritorially." *Id. Steele* already answered that question in **[**25]** the affirmative. *See 344 U.S. at 285-88*; *see also Trader Joe's Co. v. Hallatt, 835 F.3d 960, 966 (9th Cir. 2016)* ("The Supreme Court settled this question with regard to the Lanham Act when it held [in *Steele*] that the Act's 'use in commerce' element and broad definition of 'commerce' clearly indicate Congress's intent that the Act should apply extraterritorially." (citing *Steele, 344 U.S. at 286*)). When a court concludes at step one that the statute in question applies extraterritorially, it needn't reach step two (which asks "whether the case involves a domestic application of the statute"). *RJR, 136 S. Ct. at 2101*. Instead, when the presumption against extraterritoriality has been rebutted, *RJR* tells us that "[t]he scope of an extraterritorial statute . . . turns on the limits Congress has (or has not) imposed on the statute's foreign application." *Id.* (footnote omitted). In other words, just because a statute *can* apply extraterritorially doesn't mean that it always will.

Since *Steele*, the courts of appeals have devised various tests to answer that question—namely, what are the limits of the Lanham Act's extraterritorial reach? Because our circuit has never confronted this issue, we have yet to speak on the matter. So we begin by adopting a framework for resolving this question. After that, we address the **[**26]** procedural objections Defendants raised regarding how the district court went about addressing this issue. Last, we apply our newly adopted framework to the dispute before us.

1. Framework for Assessing the Scope of the Lanham Act's Extraterritoriality

Each of the tests developed by the courts of appeals to explore the Lanham Act's extraterritorial reach stems from the Supreme Court's *Steele* decision. There, the defendant, an American citizen operating a watch business in Texas decided to move his business to Mexico City. *344 U.S. at 284-85*. He discovered that "Bulova" had not been registered in Mexico, so he secured the rights to the name. *Id.* Importing watch parts from Switzerland and the United States, he sold the watches in Mexico under the "Bulova" name. *Id. at 285*. Bulova Watch Co., one of the largest watch manufacturers in the world, soon began receiving complaints from customers who needed repairs of defective "Bulova" watches that often turned out to be the defendant's product. *Id.* Bulova challenged in Mexico's courts the defendant's right to use the **[*1035]** Bulova name, and the Mexico Supreme Court upheld an administrative ruling that had nullified the defendant's trademark registration. *Id.* Bulova then sought **[**27]** relief in federal court under the Lanham Act. *Id. at 281-82*.

The Court concluded that the Lanham Act encompassed the defendant's conduct, reasoning that "the United States is not debarred . . . from governing the conduct of i[t]s own citizens upon the high seas or even in foreign countries when the rights of other nations or their nationals are not infringed." *Id. at 285-86* (citation omitted). The Court explained that "Congress has the power to prevent unfair trade practices in foreign commerce by citizens of the United States, although some of the acts are done outside the territorial limits of the United States." *Id. at 286* (citation omitted). Key to the Court's decision was that the defendant's "operations *and their effects* were not confined within the territorial limits of a foreign nation"; the "spurious 'Bulovas' filtered through the Mexican border into" the United States. *Id.* (emphasis added). And the Court noted that the inferior watches could damage Bulova's reputation in both the United States and foreign markets. *Id.*

Since *Steele*, the courts of appeals that have confronted this issue have adopted one of three tests for deciding whether the Lanham Act governs a defendant's foreign conduct. The first, devised **[**28]** by the Second Circuit and known as the *Vanity Fair* test, considers three factors: (1) whether the defendant's conduct had a substantial effect on U.S. commerce; (2) whether the defendant was a United States citizen; and (3) whether there was a conflict with trademark rights established under the relevant foreign law. *Vanity Fair Mills, Inc. v. T. Eaton Co., 234 F.2d 633,* 642 (2d Cir. 1956). Though no factor is dispositive, the absence of one of the factors "might well be determinative and . . . the absence of both is certainly fatal." *Id. at 643* (footnote omitted).

Of our sibling circuits that have considered this issue, most have adopted some version of the *Vanity Fair* test. The Eleventh and Federal Circuits have adopted it wholesale. *See* *Int'l Cafe, S.A.L. v. Hard Rock Cafe Int'l, (U.S.A.), Inc., 252 F.3d 1274, 1278 (11th Cir. 2001)* (describing the three-factor analysis as the "*Bulova* test" but citing *Vanity Fair*); *Aerogroup Int'l, Inc. v. Malboro Footworks, Ltd., 152 F.3d 948, *2*, published in full-text format at *1998 U.S. App. LEXIS 7733*] (Fed. Cir. 1998) (per curiam) (unpublished). The Fourth and Fifth Circuits have also adopted the *Vanity Fair* test, but each has tweaked the first prong. Rather than asking whether the defendant's conduct had a "substantial effect" on U.S. commerce, the Fourth Circuit asks whether the conduct had a "significant effect." *Nintendo of Am., Inc. v. Aeropower Co., 34 F.3d 246, 250 (4th Cir. 1994)*. The Fifth Circuit, following the Ninth Circuit's lead (discussed below), lowered the bar further, requiring only "*some* effect" on U.S. commerce. **[**29]** *Am. Rice, Inc. v. Ark. Rice Growers Coop. Ass'n, 701 F.2d 408, 414 n.8 (5th Cir. 1983)*.

The Ninth Circuit has adopted a similar but distinct tripartite test, based on its decisions governing the extraterritorial application of ***antitrust law*** under the Sherman Act. *See* *Wells Fargo & Co. v. Wells Fargo Express Co., 556 F.2d 406, 427-28 (9th Cir. 1977)*; *Star-Kist Foods, Inc. v. P.J. Rhodes & Co., 769 F.2d 1393, 1395 (9th Cir. 1985)* ("In *Wells Fargo* we concluded that the Lanham Act's coverage of foreign activities may be analyzed under the test for extraterritorial application of the federal antitrust laws set forth in *Timberlane Lumber Co. v. Bank of America National Trust & Savings Ass'n, 549 F.2d 597 (9th Cir. 1976)* . . . ."). Under what's **[*1036]** known as the *Timberlane* test, the Lanham Act applies extraterritorially if:

> (1) the alleged violations . . . create some effect on American foreign commerce; (2) the effect [is] sufficiently great to present a cognizable injury to the plaintiffs under the Lanham Act; and (3) the interests of and links to American foreign commerce [are] sufficiently strong in relation to those of other nations to justify an assertion of extraterritorial authority.[5]

Trader Joe's Co., 835 F.3d at 969 (alterations in original) (citation and footnote omitted). Notably, the Ninth Circuit rejected other circuits' conclusions that the effect on U.S. commerce must be "substantial," reasoning that *Steele* "contains no such requirement." *Wells Fargo, 556 F.2d at 428*.

Finally, the First Circuit has rejected both the *Timberlane* and *Vanity Fair* tests. *See* *McBee, 417 F.3d at 110* ("[W]e choose not to adopt the formulations used by various other circuits." (citations omitted)). Relying heavily on the Supreme Court's caselaw governing the extraterritoriality of U.S. antitrust laws (wisely, in our view),[6] *id. at 111*, the *McBee* court adopted the following framework. ***HN12***[] The court begins by determining whether the defendant is an American citizen. *Id.* That's because "a separate constitutional basis for jurisdiction exists for control of activities, even foreign activities, of an American citizen." *Id.* In that scenario, the court reasoned that "the domestic effect of the international activities **[**31]** may be of lesser importance and a lesser showing of domestic effects may be all that is needed." *Id. at 118*.

---

[5] *Timberlane*'s third prong "considers international comity," *Trader Joe's Co., 835 F.3d at 972* (citation omitted), and further breaks down into *seven* additional factors:

> [1] the degree of conflict with foreign law or policy, [2] the nationality or allegiance of the parties **[**30]** and the locations or principal places of business of corporations, [3] the extent to which enforcement by either state can be expected to achieve compliance, [4] the relative significance of effects on the United States as compared with those elsewhere, [5] the extent to which there is explicit purpose to harm or affect American commerce, [6] the foreseeability of such effect, and [7] the relative importance to the violations charged of conduct within the United States as compared with conduct abroad.

Id. at 972-73 (brackets in original) (quoting *Star-Kist Foods, 769 F.2d at 1395*).

[6] "The Court has written in [the antitrust context], on the issue of extraterritorial application, far more recently than it has written on the Lanham Act, and thus the decisions reflect more recent evolutions in terms of legal analysis of extraterritorial activity." *McBee, 417 F.3d at 119*.

The court adopted a "separate test" to assess the Lanham Act's extraterritorial reach when a plaintiff seeks damages based on "foreign activities of foreign defendants." *Id. at 111*. In that situation, the court held that the Lanham Act applies "only if the complained-of activities have a substantial effect on [U.S.] commerce, viewed in light of the purposes of the Lanham Act." *Id.* The court noted that its substantial-effect requirement aligned with the framework the Supreme Court has established for assessing the extraterritorial scope of Sherman Act (antitrust) claims. *See id. at 119-20* (analogizing to *Hartford Fire Ins. Co., 509 U.S. at 796*).

Besides one caveat we explain below, we adopt the *McBee* framework for several reasons. ***HN13***[] First, we agree with *McBee* that the Lanham Act will usually extend extraterritorially when the defendant is an American citizen. *Id. at 118*. No one questions Congress's ability "to regulate the conduct of its own citizens, even extraterritorial conduct." *Id.* (quoting **[*1037]** *Steele, 344 U.S. at 285-86*) (internal quotation marks omitted). Indeed, "Congressional power over American citizens is a matter of domestic law that raises no serious international concerns, even **[**32]** when the citizen is located abroad." *Id.* (collecting cases); *see also Restatement (Third) of Foreign Rels. Law of the United States § 402* (1987) ("[A] state has jurisdiction to prescribe law with respect to . . . the activities . . . of its nationals *outside as well as within its territory*. . . ." (emphasis added)). Some federal statutes even govern U.S. citizens' conduct abroad regardless of whether that conduct produces domestic effects. *See, e.g.*, *18 U.S.C. § 2423(c)* ("Engaging in illicit sexual conduct in foreign places. Any United States citizen . . . who travels in foreign commerce or resides, either temporarily or permanently, in a foreign country, and engages in any illicit sexual conduct with another person shall be fined under this title or imprisoned not more than 30 years, or both."). So when the defendant is an American citizen, courts may conclude that the Lanham Act reaches that defendant's extraterritorial conduct even when the effect on U.S. commerce isn't substantial. *See McBee, 417 F.3d at 118*. Though that probably amounts to something akin to the Fifth Circuit's "some effect" test, *Am. Rice, Inc., 701 F.2d at 414 n.8*, we've no need to lay down a specific test given that our case involves only foreign defendants.

HN14[] Second, when a plaintiff seeks to recover under the Lanham Act against a foreign national, we **[**33]** also agree with *McBee* that the plaintiff must show that the defendant's conduct has a substantial effect on U.S. commerce. True, the *Steele* Court never required that the effects on U.S. commerce must be *substantial* to trigger extraterritorial application of the Lanham Act (as the Fifth and Ninth Circuits have pointed out in adopting their less-stringent "some effect" test). *See 344 U.S. at 286* (noting that the defendant's conduct "and their effects were not confined within the territorial limits of a foreign nation"); *Am. Rice, 701 F.2d at 414 n.8*; *Wells Fargo, 566 F.2d at 428*. But we nonetheless adopt the substantial-effects requirement for two reasons. First, the defendant in *Steele* was an American citizen—for the reasons just explained, it's no surprise that the *Steele* Court was unconcerned about the relatively modest effect of the defendant's conduct on U.S. commerce given Congress's uncontroversial and extensive powers to regulate the conduct of its own citizens. Second, requiring that the defendant's conduct has a substantial effect on U.S. commerce aligns the test for Lanham Act extraterritoriality with both the Supreme Court's antitrust jurisprudence and general principles of foreign relations law. *See Hartford Fire Ins., 509 U.S. at 796* ("[I]t is well established by now that the **[**34]** Sherman Act applies to foreign conduct that was meant to produce and did in fact produce some substantial effect in the United States." (collecting cases)); *Restatement (Third) of Foreign Rels. Law of the United States § 402(1)(c)* (1987) ("[A] state has jurisdiction to prescribe law with respect to . . . conduct outside its territory that has or is intended to have substantial effect within its territory. . . .").

HN15[] Finally, if a plaintiff successfully shows that a foreign defendant's conduct has had a substantial effect on U.S. commerce, courts should also consider whether extraterritorial application of the Lanham Act would create a conflict with trademark rights established under the relevant foreign law. *See Steele, 344 U.S. at 289* ("Mexico's courts have nullified the Mexican registration of 'Bulova'; there is thus no conflict which might afford petitioner a pretext that such relief would impugn foreign law."). Though the *McBee* court eschewed such an analysis, *417 F.3d at 111*, every other circuit court considers **[*1038]** potential conflicts with foreign law in assessing the Lanham Act's extraterritorial reach, *see, e.g.*, *Vanity Fair, 243 F.3d at 642*; *Trader Joe's Co., 835 F.3d at 972-73*. Accordingly, in conducting this analysis, courts should weigh any foreign trademark rights established by the defendant.

Hetronic urges us to adopt the Ninth Circuit's *Timberlane* ***[**35]*** test, noting that our Circuit has looked to that test in assessing extraterritoriality in the antitrust context. *See* *Montreal Trading Ltd. v. Amax Inc., 661 F.2d 864, 869 (10th Cir. 1981)*. But we remain persuaded that *McBee* provides the better framework for assessing Lanham Act claims for several reasons. As an initial matter, Hetronic doesn't argue that we're bound by *Montreal Trading*—nor could it. Unlike our focus here on the Lanham Act, that case considered the extraterritorial reach of the *Sherman Act*. *Id.* Further, that case involved U.S. defendants; the defendants here are all foreign. *Id. at 865-66*. As we have explained, unlike the *Timberlane* test adopted in *Montreal Trading*, the *McBee* framework accounts for the differences in a defendant's citizenship. Indeed, the *Montreal Trading* court didn't have the benefit of *McBee* or the Supreme Court's more recent decisions concerning how courts should approach extraterritoriality questions. Considering those developments, we conclude that *McBee* establishes the best test for assessing extraterritoriality under the Lanham Act.

HN16[] To recap, in deciding whether the Lanham Act applies extraterritorially, courts should consider three factors. First, courts should determine whether the defendant is a U.S. citizen. Second, when **[**36]** the defendant is *not* a U.S. citizen, courts should assess whether the defendant's conduct had a substantial effect on U.S. commerce. Third, only if the plaintiff has satisfied the substantial-effects test, courts should consider whether extraterritorial application of the Lanham Act would create a conflict with trademark rights established under foreign law.

Having adopted a framework for assessing the scope of the Lanham Act's extraterritorial reach, we next consider Defendants' arguments that the district court erred procedurally in resolving this issue.

2. The District Court Should Have Decided As a Matter of Law Whether the Lanham Act Reached Defendants' Foreign Conduct

a. Background

The district court considered the Lanham Act's extraterritoriality three times: once before trial at summary judgment, once during trial on Hetronic's relevance objection, and once after trial in considering Hetronic's preliminary-injunction motion. Most of Defendants' procedural objections flow from uncertainties about the district court's summary-judgment ruling.

In moving for partial summary judgment, Defendants argued that Hetronic's Lanham Act claims failed because the Act didn't reach Defendants' **[**37]** foreign sales (which made up nearly 97% of their total sales). It's clear that the district court rejected that argument and denied Defendants summary **[*1039]** judgment on their extraterritoriality defense: "Viewed in a light favorable to plaintiff, the record evidence raises genuine issues of material fact as to customer confusion and harm to reputation to plaintiff in the United States due to [D]efendants' alleged infringing conduct." Appellants' App. vol. 7 at 1712. What's less clear is whether the district court granted *Hetronic* summary judgment on the extraterritoriality issue. At times, the district court's order suggests that it did: "[T]he court concludes that extraterritorial application of the Lanham Act to defendants' foreign sales . . . is appropriate." *Id.* at 1716.

But on appeal, both sides agree that the court merely denied Defendants summary judgment on their extraterritoriality defense, reserving definitive resolution of the issue for another day. Appellee's Resp. Br. at 50 n.15 (conceding that the district court had not granted summary judgment on the extraterritoriality issue; "it . . . only denied defendants' summary judgment motion"); Reply Br. at 4-5. Despite some of the **[**38]** order's language suggesting otherwise, we agree that the district court didn't resolve the extraterritoriality issue at summary judgment. Indeed, the court repeatedly stated that it was viewing the evidence in a light favoring Hetronic. But summary judgment in Hetronic's favor on that issue would have been appropriate only if there were no genuine disputes of material fact when viewing the evidence in *Defendants'* favor. *See, e.g.,* *Obermeyer Hydro Accessories, Inc. v. CSI Calendering, Inc., 852 F.3d 1008, 1014 (10th Cir. 2017)* (reviewing summary-judgment evidence in a light most favorable to the nonmoving party (citation omitted)). Even more fundamentally, the district court concluded that genuine disputes of material fact existed relevant to the extraterritoriality issue. That alone precludes summary judgment. *Fed. R. Civ. P. 56(a)* ("The court shall grant summary judgment if the movant shows that there is no genuine dispute as to any material fact . . . .").

Based on the district court's order, Defendants understandably believed that they could argue the issue to the jury. So they "prepared to present at trial their evidence that there was no 'effect' on U.S. commerce, and that there was no confusion among U.S. citizens, caused by the[ir] purely foreign sales." Reply Br. at 4. But the district court **[**39]** precluded them from doing so. At trial, Hetronic called Josef Scheuerer, one of Hetronic's sales representatives, to testify about the confusion Defendants' alleged trademark infringement created among Hetronic's customers. On cross-examination, Defendants sought to establish that only non-U.S. customers were confused and that, as a result, any infringement couldn't have substantially affected U.S. commerce. Defendants' line of questioning went to "whether or not there [was] a Lanham Act claim at all." Appellants' App. vol. 13 at 3273. That is, as Defendants argued on summary judgment, if their foreign sales didn't substantially affect U.S. commerce, the Lanham Act wouldn't apply.

Hetronic objected to the questioning, asserting that the subject matter was irrelevant and unfairly prejudicial. During a sidebar between the court and counsel, Hetronic's counsel misspoke, telling the court that it had already granted summary judgment in Hetronic's favor on the extraterritoriality issue. The court apparently assumed this was so and sustained the objection:

> HETRONIC'S COUNSEL: Your Honor, . . . it seems like defendants are trying to reargue extraterritoriality, *which Your Honor granted summary* ***[**40]*** *judgment on* . . . . [T]hey're trying to back-door it through this witness and I think it's inappropriate. It's 402 and 403. Where the confusion took place is irrelevant to whether there's confusion under the Lanham Act.
> THE COURT [to Defendants' counsel]: Where are you headed with this?
>
> DEFENDANTS' COUNSEL: The most recent case that we read . . . does suggest that where the confusion occurs matters. . . . But [Hetronic's counsel is] exactly right, that is where I'm going. *It was my understanding this issue was still open*. If Your Honor has already ruled on it, we can perhaps at a break put that on the record and I'll stop this. I thought this was still open.
> * * *
> THE COURT: It's [D]efendants' position that the location of the confusion is relevant for what purpose?
>
> **[*1040]** DEFENDANTS' COUNSEL: For whether or not there is a Lanham Act claim at all.
>
> THE COURT: Well, I've -- for better or worse, *I've already crossed that bridge*. And there may be a . . . case from last week, and if so, that's really not something that I can revisit in the middle of this trial, so the objection will be sustained.

Id. at 3272-73 (emphasis added).

As noted, Hetronic now concedes that the district court never granted it **[**41]** summary judgment on the extraterritoriality issue. Yet Hetronic contends—without citing to the record—that "the trial court already had held (correctly) . . . that the [Lanham] Act could apply extraterritorially." Appellee's Resp. Br. at 50.

Hetronic is mistaken. The only time the district court addressed the extraterritoriality issue before trial was in denying Defendants' motion for summary judgment. But as Hetronic acknowledges, the court's ruling concluded that there was a genuine dispute of material fact about whether Defendants' foreign activities had caused confusion among U.S. consumers.

After the jury rendered its verdict in Hetronic's favor, Hetronic moved for a worldwide injunction barring Defendants from selling their infringing products. In granting that injunction, the district court considered the Lanham Act's extraterritoriality for the third time. This time, relying on the evidence established at trial, the district court undeniably concluded that the Lanham Act reached Defendants' foreign conduct.

b. Determining the Scope of the Lanham Act's Extraterritoriality Presents a Question of Law

With that background in mind, Defendants argue that the district court erred in two **[**42]** ways. First, Defendants insist that the district court should have resolved the extraterritoriality issue as a matter of subject-matter jurisdiction before trial. Second, because the district court didn't do so, Defendants maintain that the court erred by precluding them from arguing the issue at trial.

We agree with Defendants that the district court should have resolved the extraterritoriality issue as a matter of law before trial, but we disagree that this issue presents a question of subject-matter jurisdiction. Defendants' confusion on this point is understandable. Before 2010, every court—including the U.S. Supreme Court—considered the Lanham Act's extraterritoriality as a matter of subject-matter jurisdiction. *See, e.g., Steele, 344 U.S. at 281*; *McBee, 417 F.3d at 117* (collecting cases). ***HN17***[] But in 2010, the Supreme Court clarified in *Morrison* that questions about the extraterritorial reach of a federal statute go to the merits, not jurisdiction. *561 U.S. at 254*. In assessing the extraterritoriality of the *Securities Exchange Act*, the Court explained that "to ask what conduct *§ 10(b)* reaches is to ask what conduct *§ 10(b)* prohibits, which is a merits question." *Id.* That same rationale holds true for the Lanham Act. *Derma Pen, LLC v. 4EverYoung Ltd., 736 F. App'x 741, 748 n.4 (10th Cir. 2018)* (unpublished) (citing *Morrison* and rejecting **[**43]** appellant's suggestion that the Lanham Act's extraterritoriality was a question of subject-matter jurisdiction); *Trader Joe's Co., 835 F.3d at 968* ("We hold that the extraterritorial reach of the Lanham Act is a merits question that does not implicate federal courts' subject-matter jurisdiction . . . .").

But to hold that the extraterritorial reach of the Lanham Act presents a merits question isn't to say that the question can't be decided as a matter of law. To the **[*1041]** contrary, the *Morrison* Court decided a similar extraterritoriality issue as a matter of law under *Rule 12(b)(6)*, concluding that the petitioners "failed to state a claim on which relief [could] be granted." *561 U.S. at 273*. And in considering the Lanham Act's extraterritoriality post-*Morrison*, the Ninth Circuit recently decided the issue as a matter of law in reversing the district court's *12(b)(6)* dismissal of the plaintiff's trademark claims. *See Trader Joe's Co., 835 F.3d at 975, 977-78*.

HN18[] Consistent with how courts have previously handled this issue, we hold that district courts should ordinarily decide questions about the scope of the Lanham Act's extraterritorial reach as a matter of law, preferably in the litigation's early stages. We think this the best course for several reasons. First, as just discussed, courts have always **[**44]** decided this issue as a matter of law since the Supreme Court decided *Steele* and have continued to do so even after *Morrison* cleared up that it's not a question of subject-matter jurisdiction. *See id.*

HN19[] Second, "the proper extraterritorial reach of a Lanham Act injunction is a matter of statutory interpretation." *Derma Pen, 736 F. App'x at 748 n.4*; *see also RJR, 136 S. Ct. at 2101* ("The scope of an extraterritorial statute . . . turns on the limits Congress has (or has not) imposed on the statute's foreign application." (footnote omitted)). We have "always considered" questions of statutory interpretation as "quintessentially legal in nature." *United States v. McLinn, 896 F.3d 1152, 1156 (10th Cir. 2018)* (citation omitted); *see also Proctor & Gamble Co. v. Haugen, 222 F.3d 1262, 1271 (10th Cir. 2000)* ("The question here is one of statutory interpretation *and thus a pure matter of law* . . . ." (emphasis added)). Judges, not juries, decide purely legal questions. *See McLinn, 896 F.3d at 1156*. The extraterritoriality of the Lanham Act usually presents just such a question.[7]

Even so, Defendants at times appear to frame the issue of whether their conduct created a substantial effect on U.S. commerce as a factual dispute. But on closer examination, we see only a legal dispute. For instance, Defendants insist that they should have been able to cross-examine Joseph Scheuerer to show **[**45]** that his testimony related primarily to foreign customers. From that testimony, Defendants sought to establish that no U.S. consumers were confused, so there couldn't have been a substantial effect on U.S. commerce. The problem for Defendants is that this cross-examination testimony of Scheuerer wouldn't have created a factual dispute. Hetronic

---

[7] *Montreal Trading* isn't to the contrary. *661 F.2d at 870*. There, we noted that the trial court let the jury decide the subject-matter jurisdiction question about whether the Sherman Act applied extraterritorially to reach the defendants' conduct. *See id. at 866, 870*. But we didn't pass on the question whether the trial court should have decided that issue as a matter of law. *Id. at 870*.

presented other evidence, discussed below, detailing instances of confusion among *U.S. consumers*. Defendants never tried to argue that those examples never happened or otherwise refute that portion of Hetronic's evidence. Instead, Defendants sought to show that *most* of the confusion occurred among foreign customers, in effect arguing that even if there was some effect on U.S. commerce, it wasn't substantial. But weighing that argument—whether a defendant's conduct created a substantial effect on U.S. commerce—requires a legal determination that's left to the courts.

HN20[] Actual factual disputes underlying the extraterritoriality question certainly can arise. For example, a defendant could dispute whether (or how much of) its allegedly **[*1042]** infringing products entered the United States. Establishing that factual predicate could affect the court's determination **[**46]** of whether the defendant's conduct had a substantial effect on U.S. commerce. In those instances, the court may submit the factual dispute to the jury while reserving the ultimate legal determination for itself. We have expressed our preference for this procedure in dealing with issues that, like the Lanham Act's extraterritorial scope, usually constitute a question of law but may involve factual disputes. *Cf.* *Gonzales v. Duran, 590 F.3d 855, 862-63 (10th Cir. 2009)* (Ebel, J., concurring) ("[I]f a district court submits the question of qualified immunity to the jury because there are disputed historical facts material to resolving the immunity question, the district court should submit to the jury only the disputed factual contentions underlying the immunity question and should reserve for itself the legal question of objective reasonableness.").

HN21[] Having reaffirmed that the scope of the Lanham Act's extraterritorial reach generally presents a legal question of statutory interpretation, we now review the issue de novo. *McLinn, 896 F.3d at 1156* (citation omitted).

3. Applying the Framework

Our analysis proceeds in three steps. We begin by assessing whether any of Defendants are American citizens. None are. Thus, to prevail, Hetronic must show that Defendants' foreign **[**47]** infringing conduct had a substantial effect on U.S. commerce. The extraterritoriality issue turns solely on this question because Defendants nowhere argue the third element—that applying the Lanham Act extraterritorially would conflict with trademark rights under another country's laws (an issue we would normally consider only if a plaintiff first satisfied the substantial-effect requirement). We conclude that Defendant's foreign conduct had a substantial effect on U.S. commerce.

HN22[] "The substantial effects test requires that there be evidence of impacts within the United States, and these impacts must be of a sufficient character and magnitude to give the United States a reasonably strong interest in the litigation." *McBee, 417 F.3d at 120* (citations omitted). In applying this test, courts should keep in mind the Lanham Act's "core purposes"—protecting U.S. consumers from confusion and "assur[ing] a trademark's owner that it will reap the financial and reputational rewards associated with having a desirable name or product." *Id. at 121* (citing *Dastar Corp. v. Twentieth Century Fox Film Corp., 539 U.S. 23, 33-34, 123 S. Ct. 2041, 156 L. Ed. 2d 18 (2003)* (second citation omitted)).

To meet its burden, Hetronic points to three "great wells of effects on U.S. commerce": (1) Defendants' direct sales into the United States; (2) Defendants' **[**48]** sales of products abroad that ended up in the United States; and (3) diverted foreign sales that Hetronic would have made but for Defendants' infringing conduct. *See* Appellee's Resp. Br. at 18-19, 23-28. We address each theory in turn and conclude that Hetronic has sufficiently shown that Defendants' conduct had a substantial effect on U.S. commerce.

On appeal, the parties dispute the amount of Defendants' direct sales into the United States.[8] But we needn't resolve **[*1043]** that disagreement because, regardless, ***HN23***[] a foreign infringer's direct U.S. sales don't factor

[8] Defendants assert that only Abitron Germany sold products directly into the United States and that those sales totaled $16,670. But as Hetronic flags, that assertion contradicts Defendants' admissions both in their statement of undisputed facts in their motion for summary judgment and in an offer of proof they submitted at trial. Defendants represented in their statement of undisputed facts that their remote-control sales into the U.S. totaled €202,134.12 and "were comprised of €185,463.52 of sales

into our analysis of whether the Lanham Act applies abroad. *See* McBee, 417 F.3d at 122. Applying the Lanham Act to a foreign infringer's direct U.S. sales isn't an extraterritorial application of the Act: "Courts have repeatedly distinguished between domestic acts of a foreign infringer and foreign acts of that foreign infringer; the extraterritoriality analysis . . . attaches only to the latter." *Id.* (collecting cases). In other words, the Lanham Act would encompass Defendants' direct sales into the United States even if we concluded that the Act didn't apply extraterritorially to Defendants' infringing sales abroad. *See id.* So we turn to Hetronic's two **[**49]** other theories.

First, Hetronic argues that many of Defendants' foreign sales have ended up in the United States. ***HN24***[] Numerous courts have recognized that a foreign defendant can be liable for Lanham Act violations when its products find their way into the United States, even if initially sold abroad: "Quite commonly, plaintiffs in these sorts of cases can meet their burden by presenting evidence that while the initial sales of infringing goods may occur in foreign countries, the goods subsequently tend to enter the United States in some way and in substantial quantities." McBee, 417 F.3d at 125 (collecting cases). Defendants acknowledge that over €1.7 million of their foreign sales ended up in the United States (Abitron Germany: €1,026,482; Hetronic Germany: €592,591; Hydronic: €120,344; Abitron Austria: €10,792). And when a plaintiff presents evidence that "American consumers have been exposed to the infringing mark"—here, in the form of over €1.7 million worth of products that ended up in the hands of American consumers—"confusion and reputational harm . . . can often . . . be inferred." *Id.*

But we don't need to rest on an inference of confusion. Hetronic submitted evidence that U.S. consumers were confused **[**50]** about Hetronic's products relationship to the Abitron companies. *See* Supp. App. vol. 2 at 529-33 (former Abitron Germany employee agreeing that "there were instances where [U.S.] customers were confused about the relationship between Abitron and Hetronic"). For instance, U.S. consumers would sometimes reach out to Abitron Germany to obtain Hetronic products under the mistaken belief that Abitron manufactured and sold Hetronic products. *See id.* at 528-29. One U.S. customer emailed Abitron Germany about buying a "Nova-XL Hetronic." *Id.* at 530. An Abitron Germany employee instructed its U.S. sales representative to "inform the customer that it can obtain an Abitron part from us, not Hetronic." *Id.* at 531. And one of Hetronic's sales representatives testified that "[a]lmost every week," customers sent Abitron products to Hetronic USA for repair. *Id.* vol. 3 at 651. Even Abitron Germany's own U.S. distributor was uncertain about the relationship between the Abitron companies and Hetronic.

> Q: And when I mentioned the brand Hetronic, what's your understanding as to that brand? Is that a competitor brand of Abitron's, or is that the same thing?
>
> A: I don't really know, honestly. I know that Hetronic **[**51]** was based in Germany, and then they changed their name to Abitron. Now, I am aware that there **[*1044]** was a company in Oklahoma called Hetronic International . . . . Am I paying attention to whether it says "Germany" or "International" or whatever? Generally, no, I really wasn't. So to me it was Hetronic.

Appellants' App. vol. 13 at 3289. Hetronic's counsel also showed Abitron Germany's U.S. distributor a photograph of an Abitron NOVA and a Hetronic NOVA side by side. When asked if he could "tell which one was Hetronic and which one was Abitron" if they hadn't been labelled, the distributor responded, "I would have no idea, no." *Id.* at 3294.

On this evidence alone—that millions of euros worth of infringing products found their way into the United States and that Defendants' efforts to sell those products caused confusion among U.S. consumers—we could conclude that the effects of Defendants' foreign conduct are sufficiently substantial to give the United States a reasonably strong interest in the litigation.

Defendants offer two rebuttals. First, Defendants argue that the €1.7 million worth of products represented only 3% of Defendants' total sales and that such a small fraction can't serve as **[**52]** a "springboard to call the rest of the $90 million of purely foreign sales damages under the Lanham Act." Reply Br. at 7 (internal quotation marks omitted). But Defendants misunderstand the nature of our inquiry here. We ask only whether the effects of

---

by Hetronic Germany, and €16,670.60 of sales by Abitron Germany." Appellants' App. vol. 4 at 939. They made an identical representation in an offer of proof at trial. Given Defendants' failure in their reply brief to explain the disparity, we accept its admissions in the district court as the true totals of their direct U.S. sales.

Defendants' foreign conduct produce substantial impacts on U.S. commerce; it's irrelevant what proportion of Defendants' global sales entered the United States. Otherwise, billion-dollar-revenue companies could escape Lanham Act liability by claiming that millions of dollars of their infringing products entering the United States represented only a fraction of their sales. But the United States would certainly have a strong interest in litigation brought by an American company seeking to stem the flow of such substantial amounts of infringing products. ***HN25***[] Besides, the Supreme Court has made clear that once a court determines that a statute applies extraterritorially to a defendant's conduct, as we do here, that statute captures all the defendant's illicit conduct: "If *§ 10(b)* did apply abroad, we would not need to determine which transnational frauds it applied to; it would apply to all of them (barring some other limitation)." *RJR, 136 S. Ct. at 2101* (quoting *Morrison, 561 U.S. at 267 n.9*).

Second, **[**53]** Defendants argue that Hetronic failed to present evidence at trial of Defendants' infringing foreign sales that eventually entered the United States. But as we explained above, this was an issue that the district court should have resolved as a matter of law; it should have never reached a jury. And Defendants admitted long before trial that about €1.7 million worth of their products reached the United States. Considering that admission, we reject Defendants' contention that Hetronic needed to provide additional evidence on this point.

Next, Hetronic relies on a diversion-of-sales theory—the idea that Defendants stole sales from Hetronic abroad, which in turn affected Hetronic's cash flows in the United States. ***HN26***[] Several courts have recognized that evidence of diverted sales evinces a substantial effect on U.S. commerce: "The [effect-on-U.S.-commerce] criteria may be met even where all of the challenged transactions occurred abroad, and where 'injury would seem to be limited to the deception of consumers' abroad, as long as 'there is monetary injury in the United States' to an American plaintiff." *Love v. Associated Newspapers, Ltd., 611 F.3d 601, 613 (9th Cir. 2010)* (first quoting *Ocean Garden, Inc. v. Marktrade Co., 953 F.2d 500, 503 (9th Cir. 1991)*; and then citing *Reebok Int'l, Ltd. v. Marnatech Enters.,* ***[*1045]*** *Inc., 970 F.2d 552, 554-55 (9th Cir. 1992)*); *see also* *McBee, 417 F.3d at 126* ("Courts have considered sales diverted from **[**54]** American companies in foreign countries in their analyses." (collecting cases)).

In *McBee*, the court explained that "[e]vidence of economic harm to McBee in Japan due to confusion of Japanese consumers is less tightly tied to the interests that the Lanham Act intends to protect, since there is no United States interest in protecting *Japanese consumers*." *417 F.3d at 126*. But the court still approved of the diversion-of-sales theory because "American courts do . . . have an interest in protecting American commerce by protecting McBee from lost income" due to a foreign defendant's infringing conduct. *Id.* Under that rationale, U.S. courts have an interest in protecting Hetronic from the economic harm it suffered in the form of lost sales that it would have made if it weren't for Defendants' trademark infringement. Here, Hetronic presented evidence that Defendants' conduct cost it tens of millions of dollars in lost sales. Those lost revenues would have flowed into the U.S. economy but for Defendants' conduct infringing a U.S. trademark. Thus, this monetary injury to Hetronic also caused substantial effects on U.S. commerce. *See* *Love, 611 F.3d at 613* (citations omitted).

In response, Defendants contend that the diversion-of-sales **[**55]** theory applies only when the defendant is a U.S. citizen.[9] For that proposition, they rely heavily on *Tire Engineering & Distribution, LLC v. Shandong Linglong Rubber Co., 682 F.3d 292 (4th Cir. 2012)*. There, the Fourth Circuit rejected the plaintiff's argument, stating that "courts invoking the diversion-of-sales theory have required the defendants to be U.S. corporations that conducted operations—including at least some of the infringing activity—within the United States." *Id. at 311* (citations omitted). We find *Tire Engineering* unpersuasive for three reasons.

---

[9] In their reply brief, Defendants also challenge Hetronic's diversion-of-sales theory on two other grounds—that applying the theory "exceeds the authority of the *Commerce Clause*" and that Hetronic failed to prove its lost sales. Reply Br. at 13-21. ***HN27***[] But we generally deem arguments raised for the first time in a reply brief waived. *United States v. Leffler, 942 F.3d 1192, 1197 (10th Cir. 2019)*. Defendants offer no reason why we should depart from our usual rule, so we decline to consider these additional arguments. *Id.* ("[T]o allow an appellant to raise an argument for the first time in a reply brief would be manifestly unfair to the appellee who, under our rules, has no opportunity for a written response." (internal quotation marks and citations omitted)).

First, though both of the cases *Tire Engineering* cites involved U.S.-citizen defendants, neither court suggested—let alone *held*—that the diversion-of-sales theory is inapplicable to foreign defendants. *See* *Ocean Garden, 953 F.2d at 504*; *Am. Rice, 701 F.2d at 414-15*. Second, the *Tire Engineering* court ignored courts that have conducted a diversion-of-sales analysis involving foreign defendants. *E.g., McBee, 417 F.3d at 126*. Third, restricting the diversion-of-sales theory to U.S.-citizen defendants makes little sense; if anything, it applies with *greater* force to a foreign defendant. When diverted sales that would have otherwise flowed to a U.S. company instead inure to a foreign defendant, the loss to U.S. commerce is clear. By contrast, ***HN28***[] when the defendant is a U.S. citizen with a U.S. presence, the sales **[**56]** divert from one U.S. company to another—either way, U.S. commerce benefits from the sales revenue flowing into the U.S. economy. We thus reject Defendants' argument that plaintiffs may argue a diversion-of-sales theory only against U.S.-citizen defendants.

Viewing the evidence as a whole, Hetronic has presented more than enough **[*1046]** evidence to show that Defendants' foreign infringing conduct had a substantial effect on U.S. commerce. Besides the millions of euros worth of infringing products that made their way into the United States after initially being sold abroad, Defendants also diverted tens of millions of dollars of foreign sales from Hetronic that otherwise would have ultimately flowed into the United States. Moreover, though much of Hetronic's evidence focused on consumer confusion abroad, it also documented numerous incidents of confusion among U.S. consumers. We thus conclude that Hetronic has presented evidence of impacts within the United States of a sufficient character and magnitude as would give the United States a reasonably strong interest in the litigation. Accordingly, the Lanham Act applies extraterritorially here to reach all of Defendants' foreign infringing conduct. **[**57]**

B. Injunction's Specificity

Defendants next argue that the injunction "lacks the specificity required by *[Federal Rules of Civil Procedure] 65*." Appellants' Opening Br. at 32. We disagree.

HN29[] *Rule 65 of the Federal Rules of Civil Procedure* requires that injunctions contain "*reasonable* detail." *Fed. R. Civ. P. 65(d)(1)(C)* (emphasis added). Injunctions violate *Rule 65* "when the delineation of the proscribed activity lacks particularity, or when containing only an abstract conclusion of law, not an operative command capable of enforcement." *CF & I Steel Corp. v. United Mine Workers of Am., 507 F.2d 170, 173 (10th Cir. 1974)* (internal quotation marks and footnotes omitted).

The district court's injunction goes far beyond an abstract conclusion of law and easily satisfies *Rule 65*. The trial court enjoined Defendants from "[d]irectly or indirectly using . . . Hetronic's . . . Trade Dress, or any reproduction, counterfeit, copy or colorable imitation thereof on or in connection with any products or services." Appellants' App. vol. 10 at 2518. The injunction specifically defines trade dress: "'trade dress' refers to the total image of a product, product packaging, product label, product design, or a combination of these things," including "features such as size, shape, color or color combinations, texture, graphics, or particular sales techniques." *Id.* at 2515 n.1. Crucially, the court further states **[**58]** that the trade dress is "the black and yellow color scheme and the design of the housings" of Hetronic's products. *Id.* at 2515. This provides ample detail to meet *Rule 65*'s requirements.

C. Injunction's Scope

Despite the above, we conclude that the district court's injunction is improperly broad. Recall that the court's injunction extends not only to countries in which Hetronic currently sells its products, but to every country in the world. The Lanham Act—the statute on which the district court relied—cannot support such a broad injunction here.

Hetronic dismisses Defendants' "lengthy disquisition on trademark history and geography" as "irrelevant to this case." Appellee's Resp. Br. at 30. But Defendants' argument that trademark rights "are fundamentally geographical" is sound. Appellants' Opening Br. at 27. ***HN30***[] "[E]ven the owner of a federally registered mark—who enjoys the presumption of nationwide priority—is not entitled to injunctive relief *except in the area actually penetrated through* *use of the mark*." Emergency One, Inc. v. Am. Fire Eagle Engine Co., 332 F.3d 264, 269 (4th Cir. 2003) (emphasis added) (internal quotation marks, citation, and footnote omitted); *see also* Hanover Star Milling Co. v. Metcalf, 240 U.S. 403, 416, 36 S. Ct. 357, 60 L. Ed. 713, 1916 Dec. Comm'r Pat. 265 (1916) ("[A] trademark . . . extends to every market **[*1047]** where the trader's goods have become known and identified **[**59]** by his use of the mark. But the mark, of itself, cannot travel to markets where there is no article to wear the badge and no trader to offer the article."). Though *Emergency One* involved a trademark dispute confined within the United States, it's equally applicable here: Hetronic isn't entitled to injunctive relief in markets it hasn't actually penetrated.

In a footnote, Hetronic argues that "Defendants' geographic argument is doubly irrelevant because Hetronic obtained the marks in question by sale, not by first use; rights thus flowed *via contract* rather than particular jurisdictions' first-use laws." Appellee's Resp. Br. at 31 n.7 (emphasis altered). If anything, Hetronic's argument on this point undermines the district court's injunction. As Hetronic acknowledges, its rights against Defendants flow from contract—not necessarily from trademark violations under the Lanham Act.

Consider an example. If Defendants begin tomorrow selling their remote controls in a country in which Hetronic has no presence, Hetronic could hardly assert a trademark claim against Defendants. How could there be market confusion, the hallmark of a trademark claim, when there were no confusingly similar products **[**60]** being marketed? Hetronic seems to argue that it could assert a contract claim against Defendants because the parties' agreements limited Defendants' rights to use Hetronic's product marks (NOVA, ERGO, etc.). And Hetronic would probably be right. But that contract claim wouldn't necessarily support a trademark claim, much less injunctive relief under the Lanham Act.

Accordingly, we narrow the injunction to the countries in which Hetronic currently markets or sells its products. To the extent those countries have changed since the district court entered the injunction, we remand for the court to modify the injunction in accordance with this opinion.

II. Defendants' Ownership Defense

A. Background

Leading up to trial, Defendants repeatedly argued that Hetronic's claims failed because Defendants owned all the disputed intellectual property, including the products' trademarks and trade dress. To explain Defendants' rationale, we first provide additional background about the products' origins and Hetronic's formation.

Hetronic was initially founded in Germany in the early 1980s as Hetronic Steuersysteme GmbH. In 2000, Hetronic Steuersysteme's founder, Max Heckl, moved to the United States and **[**61]** formed Hetronic International, Inc. (the company we have called "Hetronic"), which became the headquarters for Hetronic-related companies. By this time, there were several Hetronic-related subsidiary companies, including Hetronic Malta Limited and Hetronic USA.

In July 2000, Hetronic entered a research-and-development agreement with Hetronic Steuersysteme, Hetronic Malta, and Hetronic USA to "pool their resources" and to "share the costs equally between them" as they worked to further develop, market, and sell radio remote controls. Appellants' App. vol. 7 at 1617. The R&D Agreement refers to Hetronic as the "Contractor" and refers to the other three Hetronic companies collectively as "Developer." *Id.* The R&D Agreement contains this later-disputed provision:

> Contractor acknowledges that the Developer [i.e., Hetronic Steuersysteme, Hetronic Malta Limited, and Hetronic USA] is, and shall remain, the sole owner of all that which is done, produced or developed by the Contractor, *including but not limited to the know-how, technical information, designs, product descriptions, trade marks, trade names* and of all and any data or information **[*1048]** that the Developer has supplied to the Contractor or **[**62]** which may have been developed by the Contractor in connection with the Work and of any improvements . . . made by either the Developer or the Contractor during the term of this agreement or at

> any other time if these relate to the Work, *and acknowledges Developer's exclusive right, title, and interest in and to such property*.

Id. at 1617-18 (emphasis altered).

By 2006, Hetronic Steuersysteme—Heckl's original company—had a minor role in the company's wider operations. It sold to Hetronic its "Hetronic" trademarks registered in Germany, the United States, South Korea, Japan, China, Taiwan, and the European Union. And because Hetronic Steuersysteme's business "was focused on the marketing, sales and assembly of [radio remote controls] in Germany," it changed its name to Hetronic Deutschland (which would later be purchased by Fuchs's company, Hetronic Germany). *Id.* at 1618.

In January 2008, years after the R&D Agreement was signed, Methode Electronics, Inc., a Delaware corporation, sought to acquire all the Hetronic-related companies. But during negotiations, Methode learned that Hetronic's distributor in Germany, Hetronic Deutschland, was embroiled in a tax dispute with the German government, **[**63]** so Methode declined to purchase that company.

Before completing the sale to Methode, Heckl sought to consolidate all of his companies' intellectual property in Hetronic. So Hetronic Deutschland sold to Hetronic the trademarks for the "Hetronic" name that it had registered in South America and Malta. Heckl believed that when the sale to Methode was completed, Hetronic had owned the rights to all the intellectual property held by the Hetronic-related companies, including the NOVA and ERGO trademarks and their trade dress.

In September 2008, Methode completed its purchase of the Hetronic companies. The purchase agreement included "All Intellectual Property owned by, licensed by or used by any [Hetronic-related company not including Hetronic Deutschland]." *Id.* at 1620. The agreement defined "Intellectual Property" as "[a]ll trademarks, service marks, certification marks, trade dress, logos, trade names, Internet domain names, and corporate names, . . . including all goodwill associated therewith." *Id.* at 1621.

After the sale, Heckl continued to own and manage Hetronic Deutschland. But in 2009, he considered selling the company. In response to a due-diligence inquiry from Fuchs, Hetronic Deutschland **[**64]** represented that it had no "patents, utility models or design rights . . . copyrights, trademarks, and/or respective applications." *Id.* at 1623. Yet when Hetronic Germany bought Hetronic Deutschland in 2010, the purchase agreement provided that "Seller sells and hands over to the Buyer . . . any and all intangible assets . . . including, in particular, patents, trademarks, rights relating to designs and utility models . . . that the Seller holds and can dispose of . . . ." *Id.* at 1624.

Based on that series of transactions, Hetronic Germany alleges it believed that it owned all the technology developed under the 2000 R&D Agreement as well as "legacy" technology developed before the Agreement was executed. *Id.* at 1629. Its rationale was as follows. Hetronic Germany is the successor of Hetronic Deutschland, which, when it was known as Hetronic Steuersysteme, became a party to the R&D Agreement. Under that agreement, Hetronic Steuersysteme—along with Hetronic Malta and Hetronic USA—retained ownership over "the know-how, technical information, designs, product descriptions, trade marks, [and] trade names." *Id.* at **[*1049]** 1617-18. Though Hetronic Deutschland later sold to Hetronic the trademark rights **[**65]** to the "Hetronic" name, Hetronic Germany maintained that the sale didn't include any other intellectual property. And because Methode didn't purchase Hetronic Deutschland (or any of its assets, intangible or otherwise), Hetronic Germany claimed that it owns the intellectual property that its predecessor, Hetronic Deutschland, retained under the R&D Agreement. Defendants have continued to rely on that same theory in defending against Hetronic's trademark claims.

B. The District Court Correctly Barred Defendants from Raising Their Ownership Defense

Based on their reading of the R&D Agreement, Defendants planned to assert their ownership defense at trial. But just two months before trial, the EUIPO Board of Appeal issued its decision in Hetronic's favor, and Hetronic moved for summary judgment on Defendants' ownership defense.[10] Relying on the Board of Appeal's decision in the EUIPO proceedings, Hetronic argued that preclusion principles barred Defendants from claiming any ownership interest in the relevant intellectual property. The district court granted the motion via oral ruling after a hearing, and, after *another* hearing addressing Defendants' "Motion to Clarify" (essentially a motion **[**66]** to reconsider), the court prohibited Defendants from arguing at trial that they owned any of the trademarks or trade dress. Defendants assert that the district court erred in so ruling.

HN31[] Because the district court construed Hetronic's motion as one for summary judgment, we review the district court's ruling de novo. *Savant Homes, Inc. v. Collins, 809 F.3d 1133, 1137 (10th Cir. 2016)* (citation omitted).

The issue-prelusion dispute before us is atypical in that we're considering the preclusive effect of a foreign judgment. ***HN32***[] Federal courts recognize and enforce foreign judgments if they meet due-process standards. *See Phillips USA, Inc. v. Allflex USA, Inc., 77 F.3d 354, 359 (10th Cir. 1996)* (quoting *Hilton v. Guyot, 159 U.S. 113, 202, 16 S. Ct. 139, 40 L. Ed. 95 (1895)*);[11] *Restatement (Second) of Conflict of Laws § 98 cmt. b* (1971) (explaining that valid "[j]udgments rendered in a foreign nation . . . will be accorded the same degree of recognition to which sister State judgments are entitled"). The parties agree that the judgments rendered in the EUIPO proceedings satisfy this standard, as do we.

But although we consider the preclusive effect of a foreign judgment, as a federal court examining a federal-law question, we rely on the federal law of issue preclusion. *See Murdock v. Ute Indian Tribe of Uintah and Ouray Reservation, 975 F.2d 683, 687 (10th Cir. 1992)* (footnote and citations omitted); *cf. Blonder-Tongue Lab'ys, Inc. v. Univ. of Ill. Found., 402 U.S. 313, 324 n.12, 91 S. Ct. 1434, **[*1050]** 28 L. Ed. 2d 788 (1971)* (discussing res judicata and noting that "[i]n federal-question cases, the law applied is federal law").[12] ***HN33***[] "[I]ssue preclusion bars **[**67]** a party from relitigating an issue once it has suffered an adverse determination on the issue, even if the issue arises when the party is pursuing or defending against a different claim." *Park Lake Res. Ltd. Liab. v. U.S. Dep't of Agric., 378 F.3d 1132, 1136 (10th Cir. 2004)* (citation omitted). In the civil context, four criteria must be met before a court may apply the doctrine of issue preclusion:

(1) the issue previously decided is identical with the one presented in the action in question,

(2) the prior action has been finally adjudicated on the merits,

(3) the party against whom the doctrine is invoked was a party, or in privity with a party, to the prior adjudication, and

(4) the party against whom the doctrine is raised had a full and fair opportunity to litigate the issue in the prior action.

---

[10] For reasons unimportant here, Hetronic initially moved under *Rule 50(a)*, but the district court rightly construed the motion as one for summary judgment.

[11] This due-process standard is met if "there has been opportunity for a full and fair trial abroad before a court of competent jurisdiction, conducting the trial upon regular proceedings, after due citation or voluntary appearance of the defendant, and under a system of jurisprudence likely to secure an impartial administration of justice between the citizens of its own country and those of other countries, and there is nothing to show either prejudice in the court, or in the system of laws under which it is sitting, or fraud in procuring the judgment." *Phillips USA, 77 F.3d at 359* (quoting *Hilton, 159 U.S. at 202*); *see also Soc'y of Lloyd's, 402 F.3d at 999* (quoting same *Hilton* language).

[12] At least one authority suggests that U.S. courts should apply foreign preclusion law if the foreign rules "are substantially the same as the rules of the [U.S.] court." *Restatement (Second) of Conflict of Laws § 98 cmt. f* (1971). Under that principle, it's arguable that EU preclusion law should govern this dispute. But the parties agree that federal issue-preclusion law applies, and they didn't provide any discussion of EU preclusion law. Given the lack of briefing on EU preclusion law, we follow the parties' lead and the authority we identify above in considering this issue under federal issue-preclusion law.

Id. (citation omitted). Though Hetronic argues why it has met each element, Defendants seriously contest only the first two elements. Focusing our discussion on those elements, we conclude that the district court rightly precluded Defendants from presenting their ownership defense to the jury.

Under the first element, we assess whether the issue Defendants seek to litigate "is the same as the one addressed previously by" EUIPO. *Murdock, 975 F.2d at 687*. That is, ***HN34***[] we aim "to prevent repetitious litigation **[**68]** of what is essentially the same dispute." *Restatement (Second) of Judgments § 27 cmt. c* (1982). Here, the issue—whether Defendants own the disputed intellectual property—is essentially the same one decided in the EUIPO proceedings. That becomes clear, though, only after reading *both* the Cancellation Division's decision and the Board of Appeal's decision.

Defendants are correct that the Cancellation Division didn't decide the ownership issue. Recall that Abitron Germany initiated the EUIPO proceedings, arguing that the EU should nullify Hetronic's "NOVA" trademark because Hetronic had filed for the mark in bad faith (i.e., Hetronic supposedly knew that Abitron Germany had a stronger claim to ownership of the mark). Both parties to that proceeding based much of their arguments on their respective claims to ownership of the intellectual property. But the Cancellation Division equivocated on the ownership issue: "The arguments . . . give the impression that both [Defendants] and [Hetronic] were authorized to use" the NOVA trademark. Appellants' App. vol. 13 at 3180. So that initial tribunal decided the dispute on a narrow basis. It concluded only that Hetronic didn't act in bad faith when it filed for (and obtained) the NOVA trademark **[**69]** because Hetronic had a valid basis to believe that it owned the mark, regardless of whether it actually had the superior claim to ownership. If the EUIPO proceedings had ended with the Cancellation Division, issue preclusion would not apply.

But unlike the Cancellation Division, the Board of Appeal tackled the ownership issue head-on. It framed the dispute this way: When a company transfers all of its **[*1051]** "business operation"—as the original Hetronic International did when Methode acquired it—that necessarily includes "the right to a trademark acquired by use." *Id.* at 3112. In other words, though Abitron Germany tried to argue that Methode's purchase of Hetronic International didn't include the rights to use the *non-registered* "NOVA" trademark, the Board of Appeal concluded that it was impossible to separate the rights to a company's trademarks from the operation of the business as a whole.

In reaching its decision, the Board of Appeal reasoned that "[t]he decisive question is . . . whether the Hetronic business operation remained with [Abitron Germany's] legal predecessors. That is not the case." *Id.* at 3112. Indeed, the Board of Appeal reached the opposite conclusion, holding that "[i]t **[**70]** is clear from all the[] agreements that Hetronic Deutschland, as one of the legal predecessors to [Abitron Germany], had no rights to the company name [or] the German 'Hetronic' trademarks." *Id.* at 3113. It based its ruling on its conclusion that Methode's purchase of Hetronic International "comprise[d] *all* of the intellectual property." *Id.* at 3112 (emphasis added). In short, the Board of Appeal resolved the exact issue that Defendants sought to dispute at trial: that when Methode bought Hetronic International, it obtained ownership of all the Hetronic-related intellectual property.[13] Thus, the district court rightly concluded that the EUIPO proceedings resolved the same issue that Defendants sought to dispute at trial.

Defendants' contrary arguments fail to persuade us. They argue that the Board of Appeal didn't decide the same issue because the parties' dispute before EUIPO was limited to the NOVA trademark and no others. According to Defendants, because the Board of Appeal's decision didn't mention EURO, GL, GR or any of the other product marks, its decision governs only ownership of the NOVA trademark.

But we read the Board of Appeal's decision the same way as the district court: **[**71]** "ownership of the intellectual property at issue was very much an either/or proposition. Either it all passed to [Hetronic] in 2008 or to [D]efendants

---

[13] Several months after oral argument, Hetronic filed a *Rule 28(j)* letter informing us that the General Court of the European Union had upheld the Board of Appeal's decision. In response, Defendants renewed their assertion that the General Court, like EUIPO, lacked jurisdiction to decide the ownership issue. But as we explain below, Defendants waived any argument about EUIPO lacking jurisdiction by not raising it in the district court.

in 2010." Supp. App. vol. 2 at 361. It's evident that the Board of Appeal concluded that all the intellectual property passed to Hetronic, not just the NOVA trademark. *See* Appellants' App. vol. 13 at 3112 (explaining that the relevant agreements "show that the assets transferred . . . comprise *all of the intellectual property*, including all Intellectual Property incorporated into the radio remote control products developed, manufactured, marketed or sold by [Hetronic]." (emphasis added) (internal quotation marks omitted)). Moreover, Defendants fail to explain how the ownership dispute would differ as to the other trademarks. Indeed, Abitron Germany's claim to the other intellectual property would be based on the same theories, documents, and arguments it presented vis-à-vis the NOVA mark and that the Board of Appeal rejected. *See* [Restatement (Second) of Judgments § 27 cmt. c]() (1982) (suggesting that in assessing whether the previous tribunal decided the same issue, courts should ask if "there [is] a substantial overlap between the evidence or argument to be advanced in the second **[**72]** proceeding and that advanced in the first").

[*1052] Defendants fare no better on the second element. There, we consider whether "the prior action has been finally adjudicated on the merits." [United States v. Rogers, 960 F.2d 1501, 1508 (10th Cir. 1992)]() (citation omitted). It has. After resolving the parties' dispute, EUIPO dismissed Abitron Germany's petition and ordered it to pay the costs of the proceeding.

Defendants nevertheless insist that the Board of Appeal's finding concerning ownership is mere dicta, and thus it didn't actually decide the issue. True, "[a]djudication on the merits requires that the adjudication be necessary to the judgment," so dicta wouldn't suffice. [Murdock, 975 F.2d at 687]() (citations omitted). But the Board of Appeal's ownership ruling wasn't dicta. Dictum refers to "[a] judicial comment made while delivering a judicial opinion, but one that is unnecessary to the decision in the case and therefore not precedential (although it may be considered persuasive)." *Dictum*, Black's Law Dictionary (11th ed. 2019). Here, the Board of Appeal's decision turned on its conclusions regarding who owned the intellectual property: "[Abitron Germany] bases its allegation of bad faith on supposedly earlier rights in the mark 'NOVA'. As already pointed out . . . , however, **[**73]** it has no rights to a 'NOVA' trademark acquired by use." Appellants' App. vol. 13 at 3114. Stated differently, the Board of Appeal's ruling that Hetronic owned all the intellectual property was a necessary predicate to its conclusion that Defendants' bad-faith claim failed. So the ownership ruling wasn't dicta.[14]

In brief, because Hetronic has met each of the required elements, we affirm the district court's summary-judgment ruling on Defendants' ownership defense.

III. District Court's Evidentiary Rulings at Trial

Defendants challenge three of the district court's trial rulings. First, Defendants argue that the district court erroneously sustained Hetronic's relevance objection, precluding them from arguing that the Lanham Act didn't reach their foreign-sales activity. We already dealt with that issue above: Any error by the district court was harmless because we conclude as a matter of law that the Lanham Act reaches Defendants' conduct. *See* [Bridges v. Wilson, 996 F.3d 1094, 1099 (10th Cir. 2021)]() ("***HN35***[] [E]ven if the trial court is mistaken, it will not be reversed unless its ruling results in substantial prejudice, or had a substantial effect on the outcome of the case." (alteration in original) (quotation omitted)).

---

[14] Defendants raise a number of other arguments in passing—usually devoting little more than a sentence to each—that we decline to address. First, they argue that EUIPO lacked jurisdiction to decide the ownership issue. Defendants have forfeited that argument by failing to raise it in the district court. And because Defendants failed to identify plain error as the standard of review governing this new argument (let alone contend that the argument survives that exacting standard), we decline to consider it. *See* [Grupo Cementos, 970 F.3d at 1282-83]() ("[I]n order to avoid a waiver on appeal, a party is required to identify plain error as the standard of review in their opening brief and to provide a defense of that standard's application." (citations omitted)). Second, addressing the third element, Defendants argue that issue preclusion could bind only Abitron Germany, as the other Defendants weren't parties to the EUIPO proceedings. But like their jurisdictional argument, they didn't argue the third element in the district court, nor do they make the case that their argument can survive plain-error review, so we consider that argument waived. *Id.*

Second, Defendants **[**74]** argue that the district court wrongly precluded them from using their evidence that they owned the intellectual property for purposes unrelated to the court's issue-preclusion ruling. **[*1053]** And third, Defendants contest the district court's exclusion of their damages expert. We reject both of these challenges in turn.

HN36[] "Evidentiary rulings generally are committed to the very broad discretion of the trial judge, and they may constitute an abuse of discretion only if based on an erroneous conclusion of law, a clearly erroneous finding of fact or a manifest error in judgment." *Leprino Foods Co. v. Factory Mut. Ins. Co., 653 F.3d 1121, 1131 (10th Cir. 2011)* (internal quotation marks and citation omitted). And "[e]ven if the court finds an erroneous evidentiary ruling, a new trial will be ordered only if the error 'affected the substantial rights of the parties.'" *Id.* (quoting *Webb v. ABF Freight Sys., Inc., 155 F.3d 1230, 1246 (10th Cir. 1998)*).

A. Waiver-and-Acquiescence and Good-Faith-Belief-in-Ownership Defenses

Despite the district court's issue-preclusion ruling that Defendants couldn't assert at trial that they owned the intellectual property, Defendants argue that they should have been allowed to introduce ownership evidence for a different purpose. Specifically, Defendants sought to present a waiver-and-acquiescence defense to Hetronic's **[**75]** contract claims and a good-faith-belief-in-ownership defense to combat the willful-infringement element of the trademark claims. The district court didn't abuse its discretion in handling either of these issues.

First, the district court ruled—over Hetronic's objection—that Defendants *could* assert a waiver-and-acquiescence defense. But the district court clarified that that defense "raises no issue as to whether *defendants* believed they owned the trademarks or the technology"; "[t]he question is whether *Hetronic* had the factual knowledge and subjective intent necessary to establish the acquiescence defense." Supp. App. vol. 2 at 362 (emphasis added). In other words, to present this defense and show that Hetronic acquiesced to Defendants' contractual breaches, Defendants needed to prove that Hetronic believed that Defendants owned the intellectual property—it was irrelevant whether Defendants believed that they owned it. Based on that ruling, Defendants apparently chose not to pursue the defense. That was no fault of the district court's.

Second, Defendants challenge the district court's refusal to permit them to assert a good-faith-belief-in-ownership defense, but they ignore the district **[**76]** court's rationale. The district court prohibited Defendants from raising that defense, not because of its preclusion ruling, but because Defendants had forfeited it: They had failed to raise it in their answers, at summary judgment, or in their pretrial briefing. And Defendants don't challenge the district court's conclusion that allowing them to raise that defense on the eve of trial would have significantly prejudiced Hetronic. We thus conclude that the district court rightly prevented Defendants from raising this defense.

B. Exclusion of Defendants' Damages Expert

During the trial, Defendants sought to introduce testimony from their damages expert, Alexander Demuth, that any damages the jury awarded under the Lanham Act must be reduced by Defendants' costs of goods (i.e., their expenses in producing their remote controls). The district court permitted Demuth to testify but prohibited him from opining about the costs-of-goods issue. Defendants appeal that ruling.

During discovery, Defendants "consistently claimed . . . that they could not determine their costs of goods sold because their accounting system of 'total cost **[*1054]** method' does not contain the requisite information." Supp. App. **[**77]** vol. 1 at 77 (citations omitted). Yet in his expert report, Demuth purported to calculate Defendants' costs of goods sold based on spreadsheets that Defendants had prepared "after-the-fact" "in which they . . . 'allocated' total costs for the companies into several categories—but not costs associated with particular sales." *Id.* Hetronic moved to exclude Demuth's costs-of-goods testimony, asserting that it was based on "unreliable data that defendants ginned up for Demuth after claiming for months that they had no way to estimate their costs of goods sold." *Id.* at 76.

At the *Daubert* hearing, the district court provisionally denied Hetronic's motion based on Defendants' representation that "[a]n independent person from the company will testify to the validity of the numbers." *Id.* vol. 2 at 288 ("He will not confirm these numbers are, in fact, accurate. That's up to the company to confirm, to support his expert opinion."). The district court conditioned its ruling on Defendants verifying the underlying numbers upon which Demuth would base his testimony: "I do conclude that . . . *if* the defendants do carry their burden of presenting evidence to support . . . the cost of goods sold, then **[**78]** Mr. Demuth will be permitted to testify that cost of goods sold should be deducted from any Lanham Act recovery of the defendants' profits." *Id.* at 291-92 (emphasis added).

But by the time of trial, Defendants had failed to introduce any testimony or evidence confirming the accuracy of the underlying numbers upon which Demuth based his expert report. So, in an oral ruling near the end of the trial, the district court prohibited Demuth from testifying about the costs-of-goods issue: "We don't have the witness that I was told [at the *Daubert* hearing] I would have . . . , but more importantly, we don't have . . . the independently admissible evidence that I was told that we would have, and which I conclude is required under *Section 35* of the Lanham Act." Appellants' App. vol. 13 at 3334-35.

Complicating matters, the district court's brief oral ruling doesn't clearly establish the legal basis for its decision. The parties advance competing—and equally erroneous—theories. Defendants argue that the district court excluded Demuth's testimony under *Rule 602* because he lacked "*personal knowledge* of the cost information about which he testified." Appellants' Opening Br. at 49. But Defendants misconstrue the court's point about **[**79]** *Rule 602*. The court merely pointed out that Demuth himself couldn't testify about the accuracy of the underlying numbers because he hadn't verified them. Appellants' App. vol. 13 at 3334 ("[Demuth] is not a *Rule 602* percipient witness *as to the reliability of the numbers* supplied by [the Abitron entities' CEO]." (emphasis added)).

For its part, Hetronic contends that the district court excluded Demuth's testimony "under *Daubert*." Appellee's Resp. Br. at 54. But that's equally incorrect. The district court recognized that Demuth's testimony sufficed under *Rules 702* and *703* but explained that more was required under the Lanham Act:

> It's very likely that the basis that Mr. Demuth has offered for testifying about cost of goods sold is sufficient for use by an expert under *Rule 703* for purposes of expert testimony under *Rule 702*. . . .
>
> But it's one thing for a source of information to be sufficient for use by an expert under *Rule 703* for purposes of *Rule 702* expert [testimony]; in my view, it is quite another thing for the jury to have testimony and evidence that passes muster *under the substantive demands of Section 35 of the Lanham Act*.

[*1055] Appellants' App. vol. 13 at 3334 (emphasis added). Thus, the district court appears to have concluded that Defendants failed **[**80]** to "prove all elements of cost or deduction claimed," as required by the Lanham Act. *15 U.S.C. § 1117(a)*.

HN37[] Though the district court's precise rationale is unclear, "we may affirm the district court for any reason supported by the record." *Spring Creek Expl. & Prod. Co., LLC v. Hess Bakken Inv., II, LLC, 887 F.3d 1003, 1032-33 (10th Cir. 2018)* (citation omitted). We have previously recognized that a district court may exclude an economic expert if the expert's "opinions lacked foundation because they were based on the self-serving statements of an interested party." *Champagne Metals v. Ken-Mac Metals, Inc., 458 F.3d 1073, 1080 n.4 (10th Cir. 2006)* (brackets and internal quotation marks omitted). That's what happened here. It was the underlying data supplied to Demuth—not Demuth's testimony itself—that was problematic. After consistently asserting that they kept no costs-of-goods records, Defendants suddenly produced just the financial records they needed to offset any potential damages award. The district court was rightly skeptical of those fortuitous documents. And even though the district court concluded that Demuth had used reliable methods to form his opinion, his testimony wouldn't be worth much if it was based on unreliable, manufactured numbers. Defendants had ample time and opportunity to authenticate the disputed numbers (as they promised they would), but they never did. On these **[**81]** facts, the district court didn't abuse its discretion in excluding Demuth's costs-of-goods testimony.

CONCLUSION

For the forgoing reasons, we affirm in part, reverse in part, and remand to the district court to modify its injunction in accordance with our opinion.[15]

[15] We also grant Defendants' unopposed motion to file five documents under seal. Each of the documents was marked as confidential under the district court's protective order, and we are satisfied that the parties have demonstrated "a real and substantial interest that justifies depriving the public of access to the records." *JetAway Aviation, LLC v. Bd. of Cnty. Comm'rs, 754 F.3d 824, 826 (10th Cir. 2014)* (citation and internal quotation marks omitted).

LexisNexis® Headnotes

Evidence > Admissibility > Expert Witnesses > Helpfulness

HN1[] **Expert Witnesses, Helpfulness**

District courts have a gatekeeping role to ensure that expert testimony admitted into evidence is both reliable and relevant, and to exclude junk science. Under Fed. R. Evid. 702, an expert witness may provide opinion testimony if: (1) the expert's specialized knowledge will help the trier of fact; (2) the testimony is based upon sufficient facts or data; (3) the testimony is the product of reliable principles and methods; and (4) the witness has applied the principles and methods reliably to the facts of the case.

Evidence > Burdens of Proof > Allocation

Evidence > Admissibility > Expert Witnesses > Daubert Standard

Evidence > Admissibility > Scientific Evidence > Standards for Admissibility

Evidence > Admissibility > Expert Witnesses > Helpfulness

HN2[] **Burdens of Proof, Allocation**

Under Daubert and its progeny, the admissibility of expert testimony turns on whether expert testimony proffered in the case is sufficiently tied to the facts of the case that it will aid the jury in resolving a factual dispute. The district court's inquiry is flexible and based on the particular circumstances of the case--it must assure that the expert testimony both rests on a reliable foundation and is relevant to the task at hand. Expert opinion testimony is relevant if the knowledge underlying it has a valid connection to the pertinent inquiry. And it is reliable if the knowledge underlying it has a reliable basis in the knowledge and experience of the relevant discipline. Ultimately, while the proponent of expert testimony bears the burden of demonstrating its admissibility, the Daubert inquiry should be applied with a liberal thrust favoring admission. Refer to Fed. R. Evid. 702, Advisory Committee Notes.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

HN3[] **Per Se Rule Tests, Manifestly Anticompetitive Effects**

Actavis held: In sum, a reverse payment, where large and unjustified, can bring with it the risk of significant anticompetitive effects; one who makes such a payment may be unable to explain and to justify it; such a firm or individual may well possess market power derived from the patent.

Evidence > Admissibility > Expert Witnesses

HN4[] **Admissibility, Expert Witnesses**

Therasense held that no professional should reasonably rely on rigged and biased sources of information for any materially important fact to his or her opinion. The order elaborated: Given the obvious bias of clients, however, any litigation-driven test must be subjected to heightened scrutiny such that it would be reasonable for a truly independent professional in the field of endeavor to base an important decision on it. The more central the "fact" issue is in the overall opinion and overall trial and the more controverted the "fact" is in the context of the case, the more due diligence an expert should exercise before merely taking a partisan's word.

Civil Procedure > Attorneys

HN5[] **Civil Procedure, Attorneys**

Counsel must remember and honor their duty of candor, including in the description of the caselaw.

Antitrust & Trade Law > Regulated Practices > Private Actions > Remedies

HN6[] **Private Actions, Remedies**

Illinois Brick rejected attempts to carve out exceptions to the Hanover Shoe rule for particular types of markets.

Antitrust & Trade Law > Regulated Practices > Private Actions > Remedies

HN7[] **Private Actions, Remedies**

Illinois Brick suggests the antitrust laws are much more concerned with fully divesting antitrust violators of the benefit of their violation than with any potential windfall to plaintiffs.

Antitrust & Trade Law > Regulated Practices > Private Actions > Remedies

HN8[] **Private Actions, Remedies**

Hanover Shoe and Illinois Brick make clear that courts and juries will not be forced down the rabbit hole of hypothetical issues antitrust violators may raise to minimize their liability.

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

HN9[] **Inequitable Conduct, Anticompetitive Conduct**

it is normally not necessary to litigate patent validity to answer the antitrust question. An unexplained large reverse payment itself would normally suggest that the patentee has serious doubts about the patent's survival.

Torts > Wrongful Death & Survival Actions > Survival Actions

HN10[] **Wrongful Death & Survival Actions, Survival Actions**

An unexplained large reverse payment itself would normally suggest that the patentee has serious doubts about the patent's survival.

Civil Procedure > Settlements > Settlement Agreements > Validity of Agreements

HN11[] **Settlement Agreements, Validity of Agreements**

Reverse-payment settlement agreements should be analyzed holistically (in the context of ***antitrust law***).

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Evidence > ... > Testimony > Expert Witnesses > Qualifications

Patent Law > Jurisdiction & Review > Standards of Review > Abuse of Discretion

HN12[] **Standards of Review, Abuse of Discretion**

In Sundance, the Court of Appeals for the Federal Circuit held: It is an abuse of discretion to permit a witness to testify as an expert on the issues of noninfringement or invalidity unless that witness is qualified as an expert in the pertinent art. Indeed, where an issue calls for consideration of evidence from the perspective of one of ordinary skill in the art, it is contradictory to Fed. R. Evid. 702 to allow a witness to testify on the issue who is not qualified as a technical expert in that art.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN13[] **Per Se Rule Tests, Manifestly Anticompetitive Effects**

Actavis held that reverse-payment settlements can sometimes violate antitrust laws. Actavis stated that the likelihood of a reverse payment bringing about anticompetitive effects depends upon its size, its scale in relation to the payor's anticipated future litigation costs, its independence from other services for which it might represent payment, and the lack of any other convincing justification. The existence and degree of any anticompetitive consequence may also vary as among industries. These complexities lead the Court to conclude that the plaintiff must prove its case as in other rule-of-reason cases.

Evidence > Admissibility > Expert Witnesses

HN14[] **Admissibility, Expert Witnesses**

It is common, indeed required, under Fed. R. Civ. P. 26(a)(2), for an expert to summarize the facts and data considered in their report.

Civil Procedure > ... > Equity > Maxims > Own Wrongs Principle

HN15[] **Maxims, Own Wrongs Principle**

The most elementary conceptions of justice and public policy require that the wrongdoer shall bear the risk of the uncertainty which his own wrong has created.

Judges: WILLIAM ALSUP, UNITED STATES DISTRICT JUDGE.

Opinion by: WILLIAM ALSUP

Opinion

ORDER RE *DAUBERT* MOTIONS TO EXCLUDE TESTIMONY INTRODUCTION

In this antitrust action, defendant brand and generic manufacturers of a type-2 diabetes drug allegedly engaged in a reverse-payment scheme and agreed not to compete with each other by delaying the introduction of a generic version of the drug for several years. The parties seek to winnow the battle of the experts at trial with ten *Daubert* motions to exclude testimony.

STATEMENT

The order denying summary judgment describes the facts of this action in detail (Dkt. No. 537). For the purposes of this order, in 2009, pharmaceutical company Depomed, Inc. sued Lupin Pharmaceuticals, Inc. in its various corporate forms for infringing Depomed's patents on Glumetza — an extended-release version of metformin hydrochloride, a drug that helps control blood sugar levels for individuals suffering from type 2 diabetes. Lupin entered Depomed's crosshairs because it had filed an Abbreviated New Drug Application (ANDA) with the FDA, seeking to manufacture and market generic versions of Glumetza. The parties litigated **[*12]** before the Honorable Phyllis J. Hamilton of our district for over a year before a claim construction order prompted the parties to settle in February 2012.

As our plaintiffs allege, this settlement hid an underlying conspiracy from Judge Hamilton — a *quid pro quo* where Lupin would delay market entry of its generic for four years (until February 1, 2016) and, in return, Depomed guaranteed it would not launch an authorized generic to compete with Lupin for one year (atop an FDA-granted 180-day period of market exclusivity) and would also protect Lupin from *other* generic competition. *First*, if any other manufacturer succeeded in marketing a generic Glumetza before February 2016, Lupin could market immediately. *Second*, Depomed covenanted not to license any other generic Glumetza manufacturers until at least 180 days following Lupin's market entry.

The agreement resulted in a windfall for defendants. Depomed had already sold its marketing rights in Glumetza to defendant Santarus, Inc., but then sold its royalty rights to PDL Biopharma in October 2013 (Dkt. No. 464-1). The juiced Glumetza portfolio aided Santarus' sale to defendant Salix Pharmaceuticals for $2.6 billion in November 2013, and **[*13]** Salix's sale to defendant Valeant Pharmaceuticals for $14.5 billion in April 2015. Then, in summer of 2015, Valeant hiked the price of Glumetza on the order of 800%. The wholesale acquisition cost of a 500 mg pill spiked form $5.72 in May to $51.48 by the end of July. At the same time, the cost of a 1000 mg pill rose from $12.37 to $113.36. When Lupin joined the market in February, the supposed-affordable generic did so at around $45 for each 500 mg tablet.

Both direct and indirect purchasers started suing in August 2019. The cases were consolidated before the undersigned, the indirect purchasers eventually exited the case, and a direct-purchaser class was certified in August 2020. An order dated May 6, 2021, denied all motions for summary judgment but left off ruling on the parties' ten *Daubert* motions to exclude expert testimony. The paperwork involved in this massive motion practice has taken the court many hours to sort out, and oral argument would be of no assistance in this endeavor. The Court is satisfied that the best way to proceed is to rule based on the papers themselves. This order makes those rulings now.

ANALYSIS

HN1[] District courts have a gatekeeping role to ensure that expert **[*14]** testimony admitted into evidence is both reliable and relevant, and to exclude "junk science." *Messick v. Novartis Pharms. Corp., 747 F.3d 1193, 1197 (9th Cir. 2014)*. Under *Rule 702 of the Federal Rules of Evidence*, an expert witness may provide opinion testimony if: (1) the expert's specialized knowledge will help the trier of fact; (2) the testimony is based upon sufficient facts or data; (3) the testimony is the product of reliable principles and methods; and (4) the witness has applied the principles and methods reliably to the facts of the case.

HN2[] Under *Daubert v. Merrell Dow Pharmaceuticals, Inc.* and its progeny, the admissibility of expert testimony turns on "whether expert testimony proffered in the case is sufficiently tied to the facts of the case that it will aid the jury in resolving a factual dispute." *509 U.S. 579, 591, 113 S. Ct. 2786, 125 L. Ed. 2d 469 (1993)*. The district court's inquiry is flexible and based on the particular circumstances of the case — it "must assure that the expert testimony 'both rests on a reliable foundation and is relevant to the task at hand.'" *Primiano v. Cook*, 598 F.3d 558, 564 (9th Cir. 2010) (quoting *Daubert, 509 U.S. at 597*). "Expert opinion testimony is relevant if the knowledge underlying it has a valid connection to the pertinent inquiry. And it is reliable if the knowledge underlying it has a reliable basis in the knowledge and experience of the relevant discipline." *Id.* at 565. Ultimately, **[*15]** while the proponent of expert testimony bears the burden of demonstrating its admissibility, the *Daubert* inquiry should be applied with a liberal thrust favoring admission. *Messick, 747 F.3d at 1196* (quoting *Daubert, 509 U.S. at 588*); *Lust v. Merrell Dow Pharms., Inc., 89 F.3d 594, 598 (9th Cir. 1996)*; *Fed. R. Evid. 702* Advisory Comm. Notes.

1. PLAINTIFFS' MOTION TO EXCLUDE TESTIMONY OF DEFENDANTS' EXPERT DR. JENA.

First up is plaintiffs' *Daubert* motion regarding Dr. Anupam B. Jena (Dkt. Nos. 435, 473, 486). Dr. Jena, M.D., Ph.D. is a University of Chicago educated economist and physician currently teaching at Harvard Medical School and practicing at Massachusetts General Hospital. In his report, Dr. Jena opines: that Drs. Starr and Leffler take flawed approaches to assessing market power as well as the market definition and that the brand defendants did not possess monopoly or market power over pricing for Glumetza; that there is strong evidence of clinical substitutability between Glumetza and other metformin medications; and that there is strong evidence of economic substitutability as well (Jena Rep. ¶¶ 1-3; 11, Dkt. No. 440-16).

Dr. Jena's market power analysis makes two inquiries. First, he critiques the opinions of defendants' experts and argues that Glumetza's 2015 list-price increases is not evidence of market **[*16]** power, that the (actual or projected) decline in Glumetza's price in light of the entry of generics into the market does not imply market power, and the fact that Glumetza's price exceeded short-run marginal cost also does not imply market power (*id.* at ¶¶ 44-64). Second, Dr. Jena addresses indirect evidence of market power, which requires him to define Glumetza's market structure. Dr. Jena analyzes the clinical and economic substitutability of Glumetza and concludes that the relevant market is not just Glumetza and its generics, but also includes extended-release metformin products, such as brand and generic versions of Glucophage XR and Fortamet, and immediate-release metformin products, such as brand and generic versions of Glucophage (*id.* at ¶¶ 130-32).

In their *Daubert* motion, plaintiffs primarily argue that, as "a matter of law . . . in a generic-suppression case such as this, the generic price is the competitive price," and that Dr. Jena's "denial that the generic price is the relevant competitive price is fatal to his market-power analysis" (Br. 4, 6). To reach this conclusion, plaintiffs rely on *In re Aggrenox Antitrust Litigation*, which limited the scope of discovery in a **[*17]** reverse-payment case, holding that "the only relevant market in this litigation is [] the market of Aggrenox and its generic equivalents." *199 F. Supp. 3d 662, 663 (D. Conn. 2016)*. *Aggrenox* reasoned that, while a reverse payment is not dispositive of antitrust liability, a resulting imposition of supracompetitive prices is direct (and conclusive) evidence of market power as a matter of law, which obviates any need for an inquiry into a market definition. Accordingly, charging a supracompetitive price for a patented drug demonstrates at least a degree of market power, so the substitutability of the patented drug with another drug on the market could only limit damages and would have no bearing on liability. *Id. at 664-66, 668-69* (citing *FTC v. Actavis, Inc., 570 U.S. 136, 133 S. Ct. 2223, 186 L. Ed. 2d 343 (2013)*; *FTC v. Indiana Fed'n of Dentists, 476 U.S. 447, 106 S. Ct. 2009, 90 L. Ed. 2d 445 (1986)*).

Plaintiffs' argument in their *Daubert* motion is cut from the same cloth as those denied in the May 2021 summary judgment order: "Though the Supreme Court approved of direct proof of market power in *Indiana Federation*, there remains a broad gap between affirmance of a direct factual finding of market power versus plaintiffs' request here to take that question from the jury" (Summary Judgment Order 13). As the summary judgment order stated, no appellate opinions have adopted *Aggrenox's* reasoning, and *Indiana* ***[*18]*** *Federation* did, in fact, roughly define the market. The *Aggrenox* court recognized the opinion's novel approach and certified it for interlocutory appeal, saying that "district courts have struggled to fill the gaps that *Actavis* left open," and implying that its "effort to provide some of the missing structure" may not be the final word. *Aggrenox, 199 F. Supp. 3d at 669-70*.

As another court has noted, *Aggrenox* proposed a seductively simple standard. *See In re Loestrin 24 Fe Antitrust Litig., 2017 U.S. Dist. LEXIS 38558, 2017 WL 1491911, at *5 (D.R.I. Mar. 15, 2017)* (Judge Patricia A. Sullivan). *Aggrenox* itself recognized the Supreme Court's missive in *Actavis* that "trial courts can structure antitrust litigation so as to avoid, on the one hand, the use of antitrust theories too abbreviated to permit proper analysis, and, on the other, consideration of every possible fact or theory irrespective of the minimal light it may shed." *Aggrenox, 199 F. Supp. 3d at 664* (citing *Actavis, 570 U.S. at 159-60*). Given the present posture of this action — much farther along than *Aggrenox* — and the conclusion at summary judgment that left the finding of direct proof of market power in the hands of the jury, this order will not now withhold from that jury relevant expert testimony on this critical issue. To do otherwise would unduly abbreviate the market power analysis.

Plaintiffs also briefly argue that **[*19]** Dr. Jena fails to tether his market power analysis to potential anticompetitive effects by neglecting to discuss the reverse-payment scheme (Br. 4-5). ***HN3***[] *Actavis* held: "In sum, a reverse payment, where large and unjustified, can bring with it the risk of significant anticompetitive effects; one who makes such a payment may be unable to explain and to justify it; such a firm or individual may well possess market power derived from the patent." *Actavis, 570 U.S. at 158*. In light of the summary judgment order, even if his report only tangentially references the reverse payment, Dr. Jena's testimony does not run counter to *Actavis* and is relevant to the inquiries of this action, such as the clinical and economic sustainability of Glumetza. He may leave specific analysis of the reverse payment to other experts without risking exclusion. Plaintiffs' other arguments to exclude Dr. Jena's testimony presuppose, pursuant to *Aggrenox*, that that the competitive price is the generic price, and fail for the reasons previously stated.

Because the summary judgment order foreclosed plaintiffs' theory that, in a generic-suppression case, the generic price is necessarily the competitive price, plaintiffs' motion to exclude Dr. **[*20]** Jena's testimony is **DENIED**.

2. PLAINTIFFS' MOTION TO EXCLUDE TESTIMONY OF DEFENDANTS' EXPERTS PROFESSOR HOPFENBERG AND PROFESSOR ADELMAN.

Plaintiffs next move to exclude testimony of Professor Harold B. Hopfenberg — a professor of chemical and biomolecular engineering who performs an infringement analysis of the patents at issue in the *Lupin* litigation — and Professor Martin Adelman — a law professor who opines on the likely outcome of the *Lupin* litigation and relies on various aspects of Professor Hopfenberg's opinions (Dkt. Nos. 434, 478, 483).

Professor Hopfenberg received his bachelor's, master's and Ph.D. degrees in chemical engineering from MIT, and he is the Camille Dreyfus Professor Emeritus of Chemical and Biomolecular Engineering at the North Carolina State University. Professor Hopfenberg's research has concerned controlled drug delivery systems as well as swellable polymers and their interactions with small molecules. He has testified in a couple dozen patent litigation matters, including four cases involving the patents-in-suit on behalf of Depomed (Hopfenberg Rep. ¶¶ 1-3, 7, 12, Dkt. No. 440-7).

Depomed previously retained Professor Hopfenberg as an expert for the litigation **[*21]** predicating the instant dispute, *Depomed, Inc. v. Lupin Pharms.*, No. C 09-05587 PJH (N.D. Cal. filed Nov. 25, 2009) (Judge Phyllis Hamilton). In his expert report in that case, Professor Hopfenberg opined that Lupin's tablets infringed Depomed's patents. In the instant action, Professor Hopfenberg opines:

> each element of claim 1 of the '475 patent and each element of claim 1 of the '280 patent as construed by Judge Phyllis J. Hamilton in the Lupin litigation, was present in the 500 mg and 1000 mg Lupin tablets. It is also my opinion that each claim element of claim 1 of the '962 patent, as construed by Judge Hamilton, was present in the 1000 mg Lupin tablets"

(Hopfenberg Rep. ¶¶ 16-17, 38). Professor Hopfenberg also states, "it is my opinion that the asserted claims of the Depomed patents are valid even in light of the prior art cited by Dr. Park," Lupin's expert in the litigation (*id.* ¶ 39).

To reach these conclusions here, Professor Hopfenberg compares the patent claims to Lupin's tablets using data from a variety of sources from both the patent owner Depomed and the alleged infringer Lupin. Sources from Lupin include: Lupin's ANDA, tests Lupin submitted to the FDA, development data, and testimony from Lupin's technical **[*22]** expert, Professor Kinam Park — which includes both deposition testimony from this action and a draft expert report from the patent litigation (*id.* at ¶¶ 64, 66, 68, 71-72, 89). Professor Hopfenberg uses a similar collection of data from Depomed, including: reports from other technical experts Depomed retained for the *Lupin* litigation (Leslie Z. Benet, Linda A. Felton, and Eden Tesfu), tests conducted by Depomed technicians, and his own expert analysis at the time (*id.* at ¶¶ 80, 82, 96, 98, 114).

Turning to defendants' patent-law expert, Professor Adelman received his bachelor's degree, master's degree in physics, and law degree from the University of Michigan at Ann Arbor, and clerked for the Honorable Theodore Levin. In 1973, Professor Adelman became a Professor of Law at Wayne State University Law School, and currently serves as the Co- Director of the Dean Dinwoodey Center for Intellectual Property Studies at George Washington University Law School, among other titles (Adelman Rep. ¶ 2-5, 7, Dkt. No. 440-10).

Defendants asked Professor Adelman to opine on the likelihood Depomed would have prevailed on the merits in the *Lupin* litigation absent settlement (*id.* at ¶ 1). He concludes: **[*23]**

> [I]f the parties had not settled, the likelihood that Depomed would have prevailed as to the '475 and/or '280 patents was 80%; and the likelihood that Depomed would have prevailed as to the '962 patent was 60%. I do not think it was likely that any decision by the district court in favor of Depomed would have been reversed on appeal. I further conclude that a reasonable executive at a company such as Depomed who was advised by litigation counsel would have also expected that Depomed would likely have prevailed in the Lupin litigation on any subsequent appeal

(*id.* at ¶ 143). To reach these opinions, Professor Adelman (similar to Attorney Lentz, discussed below) reviews Judge Hamilton's claim construction order and how it would have impacted Depomed's claims. Professor Adelman subsequently compares Depomed's infringement case with Lupin's noninfringement arguments, using analysis from Professor Hopfenberg (*id.* at ¶¶ 56-58, 69-120). Professor Adelman then addresses Lupin's invalidity case by reviewing previous cases where invalidity challenges against the Depomed patents failed, again using on Professor Hopfenberg's technical evaluation. Lastly, to support his ultimate opinions, Professor Adelman reviews contemporary **[*24]** written analysis by Lupin's counsel on the patent litigation as well as retrospective testimony from the same counsel from their despositions in this action (*id.* at ¶¶ 123-42).

Plaintiffs cite the undersigned's order in *Therasense, Inc. v. Becton, Dickinson and Co.* to argue that Professor Hopfenberg's testimony — and, by proxy, Professor Adelman's testimony — should be excluded because they typify "the attempted spoon-feeding of client-prepared and lawyer-orchestrated 'facts' to a hired expert who then 'relies' on the information to express an opinion." *2008 U.S. Dist. LEXIS 124780, 2008 WL 2323856, at *1 (N.D. Cal. May 22, 2008)*. ***HN4***[] *Therasense* held that "no professional should reasonably rely on . . . rigged and biased source[s] of information for any materially important fact to his or her opinion." *2008 U.S. Dist. LEXIS 124780, [WL] at *2*. The order elaborated:

> Given the obvious bias of clients, however, any litigation-driven test must be subjected to heightened scrutiny such that it would be reasonable for a truly independent professional in the field of endeavor to base an important decision on it. The more central the "fact" issue is in the overall opinion and overall trial and the more controverted the "fact" is in the context of the case, the more due diligence an expert should exercise before **[*25]** merely taking a partisan's word

Ibid. Defendants contend that the same issues present themselves here because "Dr. Hopfenberg took test results that had previously been prepared by employees of defendant Depomed and/or experts retained by Depomed's counsel in the *Lupin* litigation and relied on them as the basis for his infringement opinions in this case" (Br. 14).

While the principles in *Therasense* hold true, Professor Hopfenberg's role as Depomed's expert in the underlying *Lupin* litigation does not, by itself, raise any red flags. Just as there may be wisdom in plaintiffs' decision to forgo retaining an expert in molecular biology and having their patent-law expert Attorney Lentz opine using only the technical-expert opinions generated contemporaneously for the *Lupin* litigation, there may also be wisdom in defendants' decision to retain Professor Hopfenberg in this action to again opine on technical infringement and invalidity issues in the *Lupin* litigation due to his familiarity with the underlying technology, which in turn supports Professor Adelman's evaluation of the patent litigation.

To that end, Professor Hopfenberg does not necessarily regurgitate facts orchestrated by counsel **[*26]** and prepared by his current clients — Lupin and Depomed (now Assertio) — for *this* antitrust action. Rather, he reviews data from when his clients were *adverse* in the *Lupin* patent litigation. Plaintiffs argue Professor Hopfenberg improperly relies upon testing performed by Depomed's experts and employees (Br. 14-15). For example, plaintiffs find it problematic that Professor Hopfenberg cited tests performed by Depomed technicians in his analysis of the claim term "releases substantially all of said drug" from the '475 patent (Br. 8). If this was the sole source of data on the issue, it might indeed be problematic. But Professor Hopfenberg begins his analysis by reviewing Judge Hamilton's claim construction, after which he: reviews data Lupin submitted to the FDA as part of its ANDA, examines Lupin laboratory notebooks, and, only then, does he assess tests undertaken by Depomed technicians at the direction of counsel (Hofenberg Rep. ¶¶ 86-93). By critically evaluating a variety of sources to arrive at his conclusion (including data from opposing sides in that litigation), Professor Hopfenberg avoids the nuisance of made-for-litigation facts condemned by *Therasense*. His general methodology is thus **[*27]** not *per se* unsound and may be admitted.

To the extent an *aspect* of Professor Hopfenberg's analysis solely (or unreasonably) relies on data from one test or source in the *Lupin* litigation, plaintiffs will have the opportunity to cross-examine Professor Hopfenberg. While *Therasense* mandated a higher level of scrutiny for partisan facts it did not hold that an expert can never rely on testing he or she was not involved with — that would contravene *Rule of Evidence 703*. For example, it should "be reasonable for a truly independent professional in the field of endeavor to base an important decision on" data Lupin submitted to the FDA as part of its ANDA (*see, e.g.*, Hofenberg Rep. ¶¶ 68, 87, 89). If, however, for any particular point, Professor Hopfenberg relies on testing from Depomed's experts and employees with less rigorous protocols, plaintiffs may probe Professor Hopfenberg's diligence in incorporating that data in order to determine whether one could rely on the test after the fact.

Because this order permits Professor Hofenberg to testify, Professor Adelman's opinions, which rely in part on Professor Hopfenberg's report, will also be permitted. Plaintiffs argue: "The problem is then compounded by Professor **[*28]** Adelman's reliance on Professor Hopfenberg's opinion in forming his legal opinions on infringement. By filtering questionable test results through two layers of experts, defendants seek to evade any scrutiny" (Br. 15). While not dispositive on the matter, this order notes that plaintiffs undermine their *Daubert* arguments here by proffering a patent-law expert (Attorney Lentz) who performs substantially the same analysis using substantially the same methodology as Professor Adelman. Just as Attorney Lentz found the (draft) technical expert report by Professor Park persuasive and distinguishes the arguments made by Deopmed's technical experts, Professor Adelman can find persuasive analysis from Professor Hopfenberg and Depomed's other technical experts from the *Lupin* litigation. Plaintiffs will be able to cross-examine Professor Hopfenberg similar to how defendants will be able to cross-examine Professor Park, who is on the parties' joint witness list. Plaintiffs cannot use an argument regarding filtered opinions as both a sword and a shield.

In sum, plaintiffs' motion to exclude testimony of Professor Hopfenberg and Professor Adelman is **DENIED**.

3. PLAINTIFFS' MOTION TO EXCLUDE TESTIMONY [*29] OF LUPIN'S EXPERT PROFESSOR PHILIPSON.

This order continues next to plaintiffs' motion to exclude the testimony of Lupin's health-economics expert Professor Tomas J. Philipson (Dkt. Nos. 436, 480, 483). For reasons similar to those underpinning the August 2020 order granting class certification, his opinions run counter to Supreme Court precedent and mistake the cognizable harm here.

Plaintiffs do not question Professor Philipson's credentials. Professor Philipson currently serves as the Daniel Levin Professor of Public Policy Studies at the Irving B. Harris Graduate School of Public Policy Studies at the University of Chicago, where he also has affiliations with the university's department of economics and law school (Philipson Rep. ¶¶ 1-6, Dkt. No. 440-13).

Professor Philipson asserts three primary opinions:

> • Based on their contractual relationships with Lupin, the Wholesalers were not harmed by, and likely benefitted from, the prices charged by Lupin at entry and thereafter.
>
> • Lupin's contractual obligation to the Wholesalers insulated the Wholesalers from any adverse effects of Lupin's prices.
>
> • Implicit credit markets in the Wholesalers' contracts with Lupin served as an additional **[*30]** source to benefits to Wholesalers from high prices

(*id.* at ¶ 11). His twelve-page expert report reviews the contracts between Lupin and the wholesalers and specifically concludes that "without regard to their downstream sales" the wholesalers benefitted from Lupin "entering at the price at which it entered, compared to having entered at a lower price" (*id.* at ¶ 26).

Plaintiffs argue they claim overcharge damages in this dispute and that Professor Philipson bases his opinions on theories rejected by *Hanover Shoe* and *Illinois Brick*. This order pauses to restate that, in those cases, the Supreme Court rejected the antitrust defense that a defendant's illegal overcharge does not injure a direct purchaser when that overcharge was "passed on" to the direct purchaser's customers. *Hanover Shoe, Inc. v. United Shoe Machinery Corp., 392 U.S. 481, 488-89, 88 S. Ct. 2224, 20 L. Ed. 2d 1231 (1968)*; *Illinois Brick Co. v. Illinois, 431 U.S. 720, 728-29, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*. Lupin responds (italics added):

> Dr. Philipson opines that Purchasers cannot meet the threshold question of harm *in order to arrive at an overcharge calculation*, based on the operation of the distribution agreements in place between Lupin and the Distributors, which governed the Distributors purchases of generic Glumetza from Lupin.

(Opp. 5). In other words, Lupin says the wholesalers cannot show harm from an overcharge **[*31]** because the contractual agreements between the wholesalers and Lupin insulate the wholesalers from the economic effects of higher generic prices.

It's déjà vu all over again. Lupin has asserted variations of this argument throughout this litigation. Magistrate Judge Illman rejected Lupin's request for discovery of the wholesalers' downstream data since 2011 as contrary to *Hanover Shoe* and *Illinois Brick* in a June 2020 order (Dkt. No. 305 at 26-30). That order noted the argument that a direct purchaser "otherwise benefitted" from an overcharge "amounts to little more than a subtle variation of the pass-on defense" (*id.* at 30, cleaned up, citing *Meijer, Inc. v. Abbott Labs., 251 F.R.D. 431, 435 (N.D. Cal. 2008)* (Judge Claudia Wilken)). In their opposition to class certification, defendants similarly argued that plaintiffs' expert Dr. Leitzinger did not account for the fact that "wholesalers can *benefit* as a result of generic delay, and the vast majority of claims in this case are held by class members that likely befitted from such a delay" (Dkt. No. 263 at 18). The class certification order again rejected this theory, stating that "defendants' argument incorrectly focuses on the wholesaler's later realized profit margin instead of the actual injury **[*32]** here, the *overcharge*. . . . '[An] antitrust injury occurs the moment the purchaser incurs an overcharge, whether or not that injury is later offset'" (Class Certification Order 17, Dkt. No. 347, quoting *In re Nexium Antitrust Lit., 777 F.3d 9, 27 (1st Cir. 2015)*).

Lupin here argues at right angles in an attempt to sidestep these issues, insisting that Professor Philipson opines "without regard to the Wholesalers' downstream activities" (which he repeats five times in his report, almost every other page) and that the distribution agreements governed the purchase of generic Glumetza (Opp. 5). Indeed, Professor Philipson filed an errata adding the phrase "for a given quantity of drugs acquired" five times in order to "neutralize any downstream effects" (Br. 9). But the overcharge precipitated by the delayed entry logically presupposes the distribution agreements, and what do the distribution agreements in this context accomplish other than providing offsets for that overcharge? Lupin argues that Professor Philipson's opinions do not run afoul of *Hanover Shoes* and *Illinois Brick* because he limits his opinions to the upstream arrangements. But those upstream arrangements focused on the downstream revenues, such as guaranteeing a chargeback from **[*33]** Lupin of the difference between the wholesale acquisition cost and the price Lupin had negotiated with the retailer and the wholesalers' contractual right to return any amount of product to Lupin for a full refund (Philipson Rep. ¶ 11.2). Professor Philipson's opinion that the wholesalers likely benefitted from the agreement still focuses on the wholesaler's later-realized profit margin (as contemplated by the distribution agreements) instead of the actual injury — the overcharge. His arguments are just another rhetorical rearticulation of the "otherwise benefitted defense" rejected by Magistrate Judge Illston and the class certification order.

In sum, Lupin's hand-waving does not persuade. To the extent stated above, plaintiffs' motion to exclude Professor Philipson's testimony is **GRANTED**.

4. PLAINTIFFS' MOTION TO EXCLUDE TESTIMONY OF DEFENDANTS' EXPERT PROFESSOR TUCKER.

Plaintiffs next move to exclude two discrete opinions of defendants' expert Professor Catherine Tucker (Dkt. Nos. 438, 476, 483).

Plaintiffs do not generally contest Professor Tucker's qualifications. She received her Ph.D. in economics from Stanford University and is currently the Sloan Distinguished Professor of Management **[*34]** Science at MIT Sloan School of Management, as well as an editor for several journals (Tucker Rep. ¶¶ 1-4, Dkt. No. 440-11). Plaintiffs take issue with two aspects of her analysis: her opinion that the marketing commitments in the Lupin agreement were procompetitive; and her opinion regarding Sun's probability of success in *Depomed, Inc. v. Sun Pharma Global FCE*, No. C 11-03553 JAP (D.N.J. filed June 20, 2011) (Judge Joel A. Pisano) — another patent infringement case Depomed filed against another would-be generic manufacturer of Glumetza that included all the patents at issue in *Lupin* (Br. 1).

First, Professor Tucker opines that the marketing commitments in the Lupin agreement were procompetitive. She reaches this conclusion through an analysis of how the marketing commitments addressed four ways that patients could fail to embrace Glumetza (described in an early internal analysis (Tucker Rep. ¶¶ 120-32). Plaintiffs argue for exclusion of this testimony on the basis that "a defendant may not claim procompetitive justification for the settlement as a whole," and instead, as part of the rule-of-reason analysis, must demonstrate the no-AG *provision* had procompetitive effects (Br. 2-3). **[*35]** Plaintiffs adjust this point in their reply brief, arguing that, at minimum, a nexus must exist between the procompetitive benefit and the reverse payment (Reply Br. 3).

Plaintiffs base this argument on a narrow interpretation of *Actavis* and *In re Impax Labs., Inc.*, 2019 FTC LEXIS 25, 2019 WL 1552939, at *31 (F.T.C. Mar. 28, 2019). Here's the relevant excerpt from *Actavis*:

> That [reverse] payment may reflect compensation for other services that the generic has promised to perform — such as distributing the patented item or helping to develop a market for that item. . . . An antitrust defendant may show in the antitrust proceeding that legitimate justifications are present, thereby explaining the presence of the challenged term and showing the lawfulness of that term under the rule of reason.

Actavis, 570 U.S. at 156 (cleaned up).

This order agrees with defendants that the Supreme Court's language, in context, contemplated a broader review of the agreement than solely the no-AG term in isolation. Regarding the nexus argument in plaintiffs' reply, plaintiffs' expert Professor McGuire *also* acknowledges a connection between the reverse payment and the marketing provisions when he states that "the commitment to a minimum level of promotion expenditures is also a form of pay from the Brand Defendants" (McGuire **[*36]** Rep. ¶ 101 n. 168, Dkt. No. 440-19). If both the no-AG provision and the marketing provisions in the agreement constitute forms of payment to Lupin, then a nexus between the no-AG provision and reverse payment would include (or at least be affected by) the marketing provisions with their alleged procompetitive effects.

Impax, an FTC opinion, crafted a narrow view of *Actavis* when it held: "[A]n antitrust defendant cannot salvage an anticompetitive reverse payment merely by pointing to unrelated terms in the same settlement agreement," and that "the defendant has the burden to explain and justify the payment itself, not the settlement as a whole." 2019 FTC LEXIS 25, 2019 WL 1552939, at *32. But even *Impax* does not necessarily forbid Professor Tucker's testimony. If, as plaintiffs' expert Professor McGuire states, the marketing provisions represent another form of payment, then the provisions are not, per *Impax*, unrelated terms in the same settlement agreement that should not be included in the antitrust analysis. Regardless, this order will not withhold this testimony from the jury based on *Impax* alone. How the jury will be instructed on this point will be determined later.

Plaintiffs' equivocations undermine their critique of **[*37]** the post-*Actavis* caselaw defendants cite in support of Professor Tucker's position. *See* *In re Solodyn (Minocycline Hydrochloride) Antitrust Litig., 2018 U.S. Dist. LEXIS 18979, 2018 WL 734655 (D. Mass. Feb. 6, 2018)*; *In re Loestrin 24 Fe Antitrust Litig., 433 F. Supp. 3d 274 (D.R.I. 2019)*; *In re Wellbutrin XL Antitrust Litig., 133 F. Supp. 3d 734 (E.D. Pa. 2015)*. For example, plaintiffs either misread or misrepresent when they assert that "[t]he entire rule-of-reason analysis in *Wellbutrin* . . . was reversed on appeal in an opinion in which the Third Circuit correctly focused on the need to justify the no-AG agreement, not the settlement as a whole" (Reply Br. 5-6). Rather, as this order reads the opinion, the Court of Appeals for the Third Circuit simply disagreed with an argument from the appellee/defendant that echoed the district court's dictum that the challenged settlements might be beyond the reach of antirust law. But the district court explicitly *did not assert that dictum as its holding*, and instead analyzed the settlement using the rule of reason. *See* *In re Wellbutrin XL Antitrust Litig. Indirect Purchaser Class, 868 F.3d 132, 161 (3d Cir. 2017)*. In fact, the Court of Appeals for the Third Circuit explicitly affirmed the district court on still other grounds: "Having concluded that the Appellants lack antitrust standing, we do not need to consider the District Court's application of the rule of reason." *Id. at 170 n. 64*. ***HN5***[] Counsel must remember and honor their duty of candor, including in the description of the caselaw.

Plaintiffs' other argument that **[*38]** Professor Tucker fails to consider the brand defendants' preexisting marketing commitments goes to the weight, not relevancy, of her argument. Preexisting marketing commitments and their impact on the marketing clauses in the Lupin agreement may be fodder for cross-examination. In sum, this order permits Professor Tucker to opine on whether the marketing commitments in the Lupin agreement were procompetitive.

Second, plaintiffs seek to exclude Professor Tucker's opinion that the plaintiffs' experts but-for world fails to reflect the actual state of information in the *Sun* litigation (Tucker Rep. ¶¶ 88-91, Fig. 8). To that end, Professor Tucker performs a sensitivity analysis of the models that Drs. McGuire and Leffler use to predict an alternative settlement date. Plaintiffs argue that Professor Tucker is not a patent litigator and that she does not articulate a reasonable basis in fact for choosing the variables she selected, and that, without that basis, the obvious changes in the model are meaningless and should be excluded (Br. 7-10; Reply Br. 10-11).

This order finds Professor Tucker's methodology clear enough. As part of her but-for analysis she noted that Attorney Lentz's report **[*39]** relies, in part, on materials that would be unavailable in February 2012, when the parties signed the Lupin agreement. Next, she cites a pertinent third-party study that found that patent owners succeeded at trial in Paragraph IV litigation over 60% of the time in 2016 and 2017. She then substitutes Attorney Lentz's 82.5% probability of Sun winning on all patent claims with probabilities of 50, 60, and 70% to probe how it would impact the ultimate alternative settlement date in Professor McGuire's modelling. It does not take a patent expert to construct this sensitivity analysis, and the Paragraph IV study provides a reasonable basis for Professor Tucker to select a 60% baseline (and additional variables at plus/minus 10%, to account for variability and provide greater context) (*see* Reply Br. 10-11, citing *In re Comm. Fin. Servs., Inc., 350 B.R. 520, 2005 WL 6499290, at *23 (Bankr. N.D. Okla. 2005)*).

In sum, plaintiffs' motion to exclude Professor Tucker's opinions is **DENIED**.

5. Plaintiffs' Motion to Exclude Testimony of Defendants' Expert Dr. Strombom.

Next is plaintiffs' motion to exclude the testimony of Dr. Bruce Strombom (Dkt. Nos. 437, 474, 483). Dr. Strombom is a managing principal of Analysis Group, Inc., a national economics consulting firm. In relevant part, Dr. Strombom **[*40]** opines that, assuming the *Lupin* litigation ended with a finding that Lupin infringed Depomed's valid patents, the settlement agreement had procompetitive benefits, as well as that direct purchasers' overcharge damages should be reduced by rebates paid by the manufacturer to indirect purchasers (Strombom Rep. ¶¶ 1-4, 12, 15-33, Dkt. No. 440-12). Purchaser plaintiffs argue that these opinions must be excluded as contrary to *Actavis*.

Dr. Strombom opines that the procompetitive benefits of the settlement totaled $1.28 billion, and that, contrary to the damages measure put forth by Drs. Leitzinger and Leffler, plaintiffs' damages should be reduced by the rebates paid by manufacturer-defendants to indirect purchasers such as Pharmacy Benefit Managers ("PBMs"). To reach this number, Dr. Strombom's report explains that drug manufacturers have at least three ways to lower prices: "(1) lower the list price (WAC) [wholesale acquisition cost]; (2) provide lower prices to indirect purchasers [*e.g.*, PBMs] through discounts that result in chargeback payments [from the manufacturer] to direct purchasers; or (3) provide discounts and/or rebates to indirect purchasers that bypass direct purchasers or **[*41]** flow through the PBM functions" (*id.* at ¶ 57). According to Dr. Strombom, regardless of whether the manufacturer chose to use mechanism two or three to adjust the drug list price, all parties are in the same economic position (*id.* at ¶¶ 52-61, Fig. 2).

Dr. Strombom asserts that, in the case of Glumetza, the manufacturers primarily used the third mechanism and provided rebates to indirect purchasers, rather than issuing chargebacks to the wholesalers via the second mechanism. Thus, while he "understand[s] that the standard measure of damages in a direct purchaser class case is the overcharge paid by direct purchasers," here "substantial payments related to the purchase of Glumetza went between the manufacturers and indirect purchasers" (*id.* at ¶ 54). Dr. Strombom concludes that, "[a]s a result, the overcharge paid by direct purchasers does not reflect the total amount of the overcharge paid across the entire supply chain," and that, "the payments made between manufacturers and indirect purchasers should be included in any estimate of damages" (*ibid.*).

First, plaintiffs argue that Dr. Strombom's reduction of overcharge damages by the amount of rebates paid by the manufacturers to indirect **[*42]** purchasers contravenes *Hanover Shoe* and *Illinois Brick*, which, as this order restates, generally precluded the pass-on defense. *Hanover Shoe, 392 U.S. at 487-88, 494*; *Illinois Brick, 431 U.S.*

at 728-29. Defendants disagree and assert that the complexities of the pharmaceutical market warrant Dr. Strombom's calculations (Opp. 10-13).

This order holds that Dr. Strombom's inclusion of indirect-purchaser rebates in his damages calculation runs afoul of *Hanover Shoe* and *Illinois Brick*: "*Hanover Shoe* . . . rest[ed] on the judgment that the antitrust laws will be more effectively enforced by concentrating the full recovery for the overcharge in the direct purchasers rather than by allowing every plaintiff potentially affected by the overcharge to sue only for the amount it could show was absorbed by it." *Illinois Brick, 431 U.S. at 734-35*. Full recovery is concentrated in direct purchasers, but Dr. Strombom's damages calculation considers manufacturers' *indirect* rebate to the downstream *indirect* purchaser, a transaction that does not involve the wholesalers (*see* Strombom Rep. Fig. 2). Defendants recognize this issue and argue that *Illinois Brick* never intended the consequence here, nor contemplated "damages in an amount significantly greater than the overall overcharge" (Opp. 11-12). But ***HN6***[] *Illinois* ***[*43]*** *Brick* "reject[ed] . . . attempts to carve out exceptions to the Hanover Shoe rule for particular types of markets." *Illinois Brick, 431 U.S. at 744*. Moreover, as *Illinois Brick* recited:

> The concern in Hanover Shoe for the complexity that would be introduced into treble-damages suits if pass-on theories were permitted was closely related to the Court's concern for the reduction in the effectiveness of those suits if brought by indirect purchasers with a smaller stake in the outcome than that of direct purchasers suing for the full amount of the overcharge. The apportionment of the recovery throughout the distribution chain would increase the overall costs of recovery by injecting extremely complex issues into the case; at the same time such an apportionment would reduce the benefits to each plaintiff by dividing the potential recovery among a much larger group. Added to the uncertainty of how much of an overcharge could be established at trial would be the uncertainty of how that overcharge would be apportioned among the various plaintiffs. This additional uncertainty would further reduce the incentive to sue. The combination of increasing the costs and diffusing the benefits of bringing a treble-damages action could **[*44]** seriously impair this important weapon of antitrust enforcement.

Id. at 745. Dr. Strombom's consideration of the overcharge across the entire supply chain contravenes the express concerns of *Hanover Shoe* and *Illinois Brick*. This order on *Daubert* motions declines to transgress the explicit bounds of *Hanover Shoe* and *Illinois Brick*. As another court has similarly noted: ***HN7***[] "*Illinois Brick* suggests . . . the antitrust laws are much more concerned with fully divesting antitrust violators of the benefit of their violation than with any potential windfall to plaintiffs." *In re Skelaxin (Metaxalone) Antitrust Litig., 2014 U.S. Dist. LEXIS 66707, 2014 WL 2002887, at *6 (E.D. Tenn. May 15, 2014)* (Judge Curtis L. Collier).

The class certification order previously addressed the arguments defendants now proffer in support of Dr. Strombom's opinions. Defendants argued then, "Dr. Leitzinger's damages model 'does not reflect the many discounts and subsequent payments that must be account for to calculate the ultimate *net* price'" (Class Certification Order 17, citation omitted). The class certification order rejected that argument because the injury in question occurred when the manufacturer sold the drug to the wholesaler at the anticompetitive price (*ibid.*). The rebates that Dr. Strombom contemplates here are not directed to the injured **[*45]** party in the antitrust analysis. "***HN8***[] *Hanover Shoe* and *Illinois Brick* make clear that courts and juries will not be forced down the rabbit hole of hypothetical issues antitrust violators may raise to minimize their liability." *Skelaxin, 2014 U.S. Dist. LEXIS 66707, 2014 WL 2002887, at *5*. The cases defendants cite in their opposition either recite broad, inapposite, conclusions of law, or involve indirect, not just direct, purchaser claims, and thus do not persuade (*See* Opp. 12-13). Dr. Strombom shall not testify that an overcharge damages calculation should be reduced or otherwise be affected by the amount of indirect-purchaser rebates.

Second, plaintiffs argue that *Actavis* precludes Dr. Strombom's opinion that the settlement agreement had procompetitive effects because it assumes that the patents would have been found valid and infringed. *Actavis* recognized that the validity (or invalidity) of the asserted patents need not always be analyzed in a rule-of-reason analysis for a reverse-payment agreement. *570 U.S. at 157, 159*. Besides, Dr. Strombom explicitly conditions his opinion on "assuming that, as [d]efendants contend, the relevant patents asserted against Lupin were valid and infringed," and thus lets defendants' other experts opine on the merits of the patent **[*46]** litigation (Strombom Rep.

¶ 12). *Actavis* does not preclude Dr. Strombom from cabining off the patent issues and opining on the other aspects of the rule-of-reason analysis. Indeed, Justice Breyer's opinion in *Actavis* anticipated just that sort of review: "That is because ***HN9***[] ***HN10***[] it is normally not necessary to litigate patent validity to answer the antitrust question . . . . An unexplained large reverse payment itself would normally suggest that the patentee has serious doubts about the patent's survival." *570 U.S. at 157*.

Third, plaintiffs say Dr. Strombom's opinion that the settlement agreement had procompetitive effects should be excluded because *Actavis* required him to justify the no-AG provision in isolation, without regard to the rest of the agreement. This order addresses and rejects this argument in its review of the motion to exclude Professor Tucker's testimony. *Actavis* held that ***HN11***[] reverse-payment settlement agreements should be analyzed holistically and is not as narrow as plaintiffs argue. *Id. at 156, 159*; *see also* *In re Lidoderm Antitrust Litigation, 2018 U.S. Dist. LEXIS 227750, 2018 WL 7814761 at *2 (N.D. Cal. Feb. 7, 2018)* (Judge William H. Orrick). Accordingly, plaintiffs' argument fails.

In sum, the motion to exclude Dr. Strombom's testimony is, to the extent stated above, **GRANTED IN PART** and **DENIED IN PART**.

6. PLAINTIFF [*47] HUMANA'S MOTION TO EXCLUDE TESTIMONY FROM DEFENDANTS' EXPERT DR. STROMBOM.

Plaintiff Humana separately moves to exclude testimony of Dr. Strombom embodied in a separate report that primarily critiques plaintiffs' damages expert, Professor Rena Conti (Dkt. Nos. 441, 475, 482). As an initial matter, as this order notes in its analysis of defendants' motion to exclude testimony of Professor Conti and Dr. Leitzinger, a February 2021 order denied Humana leave to file an amended complaint, which renders several of Dr. Strombom's opinions here moot (Dkt. No. 460). As relevant, then, Humana takes issue with two portions of Dr. Strombom's report.

First, Dr. Strombom opines that Dr. Conti's methodology fails to consider "that generic prices might have increased with brand WAC increases" (Strombom Reb. Rep. ¶ 21, Dkt. No. 440-18). To correct for this alleged deficiency, Dr. Strombom explains that he calculates the "but-for generic prices using the contemporaneous brand price rather than the brand price prior to assumed but-for generic entry, thus assuming that generic prices would have increased when the brand price increased" (*id.* at ¶ 60). To implement this adjustment, Dr. Strombom assumes that **[*48]** the but-for price of brand Glumetza would have increased by 109% in 2015, and he bases this number on two datapoints: Fortamet's price increase in 2014 (also 109%), as well as drug pricing data cited by Professor McGuire that show, for example, that Valeant increased the price of 200 drugs by more than 100% annually (*id.* at ¶¶ 60-61 (citing McGuire Rep. ¶ 182)).

Humana argues the comparison falls short because the information Dr. Strombom relies upon did not involve price increases when a new generic entered the market after the end of the exclusivity period. Humana also argues that the comparison to the Fortamet price increases is unreliable because those price increases are the subject of "allegations of industry-wide price fixing" (Br. 6, citing *Humana v. Actavis Elizabeth, LLC., et al.*, No. C 19-04862 CMR (E.D. Pa. filed Dec. 15, 2020) (Judge Cynthia M. Rufe)). Humana's argument regarding its recently-filed action goes to the weight of Dr. Strombom's evidence, not its admissibility — the district court in that action has not even considered a motion to dismiss, let alone adjudicated the merits of the claims. Regarding the price increases for comparable drugs, Dr. Strombom has built **[*49]** his analysis on seemingly relevant and reliable foundation, and Humana's critiques again go to the weight of the evidence, not its admissibility.

Second, Dr. Strombom seeks to undermine three assumed but-for scenarios which Dr. Conti uses as bases for her damages calculations. For example, counsel instructed Dr. Conti to assume a "Lupin generic, as well as an authorized generic, would have entered the market in or around December 2012. A third generic would have entered the market before February 2016, and a fourth generic in or around May 2017." Dr. Conti then calculates Humana's damages under each of the assumed but-for scenarios using a "yardstick methodology" which aims to estimate a but-for price through consideration of a comparable market.

Dr. Strombom impeaches Dr. Conti's calculations not by attacking Dr. Conti's methodology or application, but by questioning the assumptions directly (italics added):

> Dr. Conti provides no explanation of what would have needed to occur in the but-for world in order for Lupin to enter as early as December 2012. Perhaps this scenario corresponds to an implicit assumption that Lupin would have continued to litigate the patent (rather than settle), **[*50]** would have won the patent litigation, and would have received final FDA approval by December 2012. . . . However, there is *strong evidence* in this case indicating that Lupin believed there was a substantial likelihood that it would have lost the patent litigation. . . . Similarly, *it is unlikely that Lupin would have entered at risk* given the potential financial liability if they subsequently lost the patent litigation

(Strombom Reb. Rep. ¶ 66). This order notes, for what it's worth, that Dr. Strombom also relies on similar counsel-dictated assumptions in his report (Strombom Reb. Rep. ¶ 71). More to the point, as Humana argues, Dr. Strombom is an economist, not a molecular biologist or patent litigator, and the support he cites (his own previous declaration) does not provide a reliable basis for his testimony (Dkt. No. 262-21 at ¶¶ 36-41). Dr. Strombom has insufficient experience or training to opine on the weaknesses (or strengths) of Lupin's patent case.

This same issue reoccurs several times in Dr. Strombom's report. In their opposition, defendants defend Dr. Strombom's opinions, saying that, for example, "the undisputed record evidence showed that Lupin would not have continued **[*51]** to litigate the case to verdict or launched at risk because it believed, based on the advice of its qualified outside patent counsel, that it was going to lose" (Opp. 6). The question of who would have won the underlying patent litigation but-for the settlement is vigorously disputed, and Dr. Strombom is not qualified to opine directly on those issues. Dr. Strombom's patent analysis will not aid the jury, and he shall not testify regarding the merits of Lupin's patent case, which includes testimony from paragraphs 16, 66, and 68 of his report.

In sum, to the extent stated, the motion is **GRANTED IN PART** and **DENIED IN PART**.

7. Defendants' Motion to Exclude Testimony of Plaintiffs' Expert Attorney Lentz.

Turning to defendants' *Daubert* motions, this order next considers the motion to exclude the testimony of Attorney Edward T. Lentz, who, similar to Professor Adelman for defendants, opined on Depomed's pharmaceutical patent litigation against Lupin and Sun (Dkt. Nos. 442, 470, 489).

Attorney Lentz has a B.A. and an M.A. in biology from Fordham University and Indiana State University, respectively, and earned his J.D. from Villanova University. At GlaxoSmithKline ("GSK"), Attorney Lentz held **[*52]** the position of Senior Vice President and General Counsel-U.S., SmithKline Beecham Corporation. At GSK, Attorney Lentz managed the entire corporate-patent lifecycle, handling everything from patent prosecution to advising on litigation. Attorney Lentz left GSK to work at Morgan Lewis & Bockius and later started his own private practice. He has served as adjunct faculty at Albany Law School and on multiple executive committees for trade associations in the biopharma and intellectual property areas (Lentz Rep. ¶¶ 17-30, Dkt. No. 445-5). He has also recently testified in other reverse-payment cases. *See* In re Loestrin 24 Fe Antitrust Litig., 433 F. Supp. 3d 274 (D.R.I. 2019) (Judge William E Smith).

Plaintiffs requested Attorney Lentz to testify regarding the likely outcome in both the *Lupin* and *Sun* litigation — as previously noted, *Sun* is another patent infringement case Depomed filed against another would-be generic manufacturer of Glumetza that included all the patents at issue in Lupin. Plaintiffs also asked Attorney Lentz to opine on the litigation costs avoided by Depomed and Lupin by settling the *Lupin* litigation and the likely timeline to complete the *Lupin* and *Sun* actions absent settlement (Lentz Rep. ¶ 31).

First, in his expert report, Attorney Lentz **[*53]** opines that, at the time of the *Lupin* settlement, a reasonable patent attorney would have advised his or her client that Depomed would be unable to meet its burden of proving infringement, either literally or under the doctrine of equivalents, for U.S. Patent Nos. 6,340,475 ("the '475 patent"), 6,635,280 ("the '280 patent"), and 6,488,962 ("the '962 patent"). More specifically, Attorney Lentz states that it was "very likely" that the district court would find in Lupin's favor on noninfringement, but that, regardless of the district court's decision, the Court of Appeals for the Federal Circuit would have ruled in favor of Lupin in the event of an appeal. He then parses this analysis and assigns a numerical value to the probability that Lupin would prevail on the merits: estimating Lupin to have a 60 to 65% chance of success for the '475 and '280 patents, and a 70 to 75% chance of success for the '962 patent. Attorney Lentz further opines that the likelihood of prevailing on the '962 patent would jump to 85 to 90% if Lupin prevailed on the '475 and '280 patents (*id.* at ¶¶ 32-38). He opines that Lupin and Depomed avoided approximately $3-3.5 million and $2.9 million, respectively in litigation costs by settling, and that, if the parties had not settled, the outcome of the trial could have been known as early as November or December 2012, **[*54]** but that a reasonable patent attorney would have expected a decision by February 2013. Attorney Lentz expects that a Federal Circuit decision, if needed, would have arrived on or before March 2014 (*id.* at ¶¶ 43-45).

Second, Attorney Lentz opines on *Depomed v. Sun*, again concluding Depomed would have been unable to prove infringement, either literally or under the doctrine of equivalents, for the '475, '280, and '962 patents, as well as U.S. Patent Nos. 7,736,667 ("the '667 patent") and 7,780,987 ("the '987 patent"). He states that the Court of Appeals for the Federal Circuit would have vindicated Sun regardless of the outcome in the district court and assigns Sun an 80 to 85% probability of winning. As for a predicted timeline, Attorney Lentz opines that the parties could have known the outcome by January 2014 and, if the Federal Circuit got involved, he expects their opinion to have arrived on or before February 2015 (*id.* at ¶¶ 39-45).

To reach these conclusions, Attorney Lentz performs a multi-part analysis. He first summarizes the *Lupin* and *Sun* disputes, as well as *Depomed, Inc. v. Ivax Corp.*, an earlier case from 2006 involving the '475 and '280 patent where the Honorable Charles R. Breyer of our district granted Depomed summary judgment of patent infringement. *532 F. Supp. 2d 1170 (N.D. Cal. 2007)*. Turning to *Lupin*, Attorney **[*55]** Lentz reviews Judge Hamilton's claim construction order, then uses those constructions in an analysis that reviews the testimony from the parties' various technical experts — including Professor Hopfenberg for Depomed and Professor Kinman Park for Lupin. In other words, Attorney Lentz seeks to simulate the litigation as it would have happened had the parties not decided to settle. After he performs this analysis for all three patents at issue in *Lupin*, Attorney Lentz considers, based on the relevant legal standards, the possible outcomes from appeal, and applies numerical values to the probability that Lupin would prevail as to the various patent claims. From there, Attorney Lentz projects the timeline of the *Lupin* litigation using data regarding similar cases from our district, the District of New Jersey, the District of Delaware, and the Court of Appeals for the Federal Circuit (*See* Lentz Rep. App. I). Lastly, using these dates, Attorney Lentz calculates the litigation costs the parties avoided by settling. After he completes his evaluation of the *Lupin* case, Attorney Lentz repeats this analysis for the *Sun* litigation. Defendants move to exclude Attorney Lentz's testimony on several **[*56]** grounds.

First, defendants argue Attorney Lentz' opinion on whether Lupin's generic infringes the patents should be excluded. ***HN12***[] In *Sundance, Inc. v. DeMonte Fabricating, Inc.*, the Court of Appeals for the Federal Circuit held:

> [I]t is an abuse of discretion to permit a witness to testify as an expert on the issues of noninfringement or invalidity unless that witness is qualified as an expert in the pertinent art. . . . Indeed, where an issue calls for consideration of evidence from the perspective of one of ordinary skill in the art, it is contradictory to *Rule 702* to allow a witness to testify on the issue who is not qualified as a technical expert in that art.

550 F.3d 1356, 1363 (Fed. Cir. 2008). Relying on *Sundance*, defendants argue that Attorney Lentz is not a person of ordinary skill in the art for the patents at issue in *Lupin* and *Sun*. Attorney Lentz, in fact, defines a person of ordinary skill in the art in his report:

> [A] person of ordinary skill in the art would have formal education of at least a bachelor's degree in the fields of chemistry, chemical engineering, pharmaceutical science and/or material science with a focus on polymer science, combined with substantial experience in development of controlled release drug **[*57]** dosage forms (even more desirably controlled release oral dosage forms). Alternatively, if the person had obtained a Ph.D. in any of the relevant fields, the required amount of industry experience would decline to about two years

(Lentz Rep. ¶ 101). Plaintiffs do not contest that Attorney Lentz fails to qualify as a person of ordinary skill under this definition. Rather, they argue that Attorney Lentz is not opining on technical issues at all and that he offers "his opinion as to how an experienced pharmaceutical patent attorney at the time of the Lupin settlement would have evaluated the patent litigation" at issue (Opp. 3).

Sundance does not warrant exclusion here. The patent claims at issue in *Lupin* required consideration of evidence from the perspective of a person of reasonable skill in the art, and Depomed and Lupin's respective experts (including Drs. Park and Hopfenberg) provide that testimony in the underlying patent litigation. Attorney Lentz's report parses the testimony of those experts regarding noninfringement and validity in order to evaluate the legal merit of the *Lupin* and *Sun* parties' respective cases and predict the outcome of the disputes if they had not settled. **[*58]** Attorney Lentz reviews this expert analysis through the lens of the *Lupin* and *Sun* courts' respective claim construction orders, *legal* interpretations of the scope of the patents in question. Attorney Lentz is thus not performing a technical analysis of the "factual predicates" that *Sundance* found inadmissible, he performs exactly the type of *legal* review a party would expect from a seasoned patent litigator. *See* *Sundance, 550 F.3d at 1361-62*. Patent litigation requires technical evaluation, but it remains a legal process, one on which Attorney Lentz is qualified to opine. Attorney Lentz offers the same analysis now that he has offered GSK and his other clients throughout his career. To the extent Attorney Lentz analyzes a *particular* factual predicate for validity or infringement without the foundation of a pertinent technical analysis from a person of ordinary skill in the art, it would be fodder for cross-examination, ripe for counsel's objection and possibly for an admonition to the jury that he is unqualified to address issues only a technical expert can address. With these reasonable limits in place, Attorney Lentz's testimony will not confuse the jury or otherwise cause any "mischief." *See ibid.* It will ultimately **[*59]** be up to the jury to weigh how much credibility should be awarded to Attorney Lentz's opinion.

Defendants also argue that it is improper for Attorney Lentz to "adopt" Professor Park's unsigned report from *Lupin* (Br. 12-13). In other words, defendants contend that plaintiffs needed to engage an expert here qualified to testify on the technical issues relating to Lupin's alleged patent infringement, such as their re-retained expert Dr. Hopfenberg, rather than leaving Attorney Lentz to review the reports from the *Lupin* litigation sans technical assistance. As previously stated, this philosophical dispute between the parties on the correct methodology for a patent-law expert does not merit exclusion. This order finds no inherent fault with a patent-law analysis that primarily relies on contemporary technical expert analysis of the parties from the underlying patent litigation that excludes further *post hoc* input. Indeed, that methodology may have advantages over other approaches because it may more accurately take the particularities and developments of the actual litigation into account. On the other hand, should Attorney Lentz get stuck on a technical point, he does not have a person **[*60]** of ordinary skill in the art to back him up. Nevertheless, these arguments do not expose Attorney Lentz's opinions as unreliable.

In the same vein, defendants also claim that Attorney Lentz exclusively relies on Professor Park's report for many opinions, rendering them inadmissible. The examples provided do not bear out this thesis. For example, defendants contend that Attorney Lentz relies solely on Professor Park for the opinion about the degree of swelling of the Lupin generic (Br. 14). Looking at Paragraph 159 of his report as highlighted by defendants, Attorney Lentz explains that Professor Park's report cited images showing the swelling of the Lupin products, and then explains that "Dr. Park also cited data from the Tesfu swelling study report in support of his opinion." As Attorney Lentz explains earlier in Paragraph 149 of his report, Professor Hopfenberg had also relied on the Tesfu swelling study in his report. Defendants' assertion that Attorney Lentz exclusively adopts Professor Park's perspective is thus not quite accurate, as it appears Attorney Lentz found Professor Park's opinion persuasive in this instance because Professor Park not only had photographic evidence but **[*61]** also support from the data underlying the opposing technical expert's opinions. To the extent Attorney Lentz does not give Professor Hopfenberg's expert report in *Lupin* a fair shake, defendants will have the opportunity to critique that shortfall during cross-examination.

Defendants next seek to exclude Attorney Lentz's opinions on the likelihood that Lupin or Sun would prevail in their respective patent litigation because they are not based on a discernable methodology and because they ignore key facts and data, such as: contemporary documentation by Lupin's attorneys regarding their less-than-favorable outlook on the case; depositions of Lupin's outside counsel and others taken for this case; and other data points such as litigation involving the patents at issue in other fora (Br. 14-19). Plaintiffs argue that predicting the outcome to litigation is exactly what lawyers do and cite to an opinion permitting these predictions, *In re Namenda Direct Purchaser Antitrust Litigation, 331 F. Supp. 3d 152, 186-89 (S.D.N.Y. 2018)* (Judge Thomas P. McMahon).

Attorney Lentz does not appear to cherry pick his data. He addresses the *Ivax* litigation where Judge Breyer found in Depomed's favor on summary judgment. And Attorney Lentz also considers other data that cuts against his conclusion, **[*62]** including the July 2011 email from Lupin's outside counsel William Rakoczy where he stated "the likelihood of success is significantly less than 50%" — although this order recognizes that Attorney Lentz does not examine that specific email in body of his report (Lentz Rep. App. B at 9). Moreover, it will be up to the jury to determine how much weight (if any) to give to this email and defendants' *post hoc* testimony on the likely outcome *Lupin* litigation absent settlement. Taking all this into account, and recognizing he performs a sufficiently rigorous analysis of the *Lupin* and *Sun* litigation, this order finds Attorney Lentz's opinions rests on a reliable foundation that is not contrary to the record and that will prove helpful to a jury. *See* *In re Online DVD-Rental Antitrust Litig., 779 F.3d 914, 923-24 (9th Cir. 2015)*. Defendants will have free reign on cross-examination to introduce any evidence they believe undermines Attorney Lentz's opinions (within time limits).

Defendants also argue Attorney Lentz's numerical predictions should be excluded. In their opposition, plaintiffs point to *Namenda* and its rejection of a similar *Daubert* challenge to a patent attorney's numerical predictions. As defendants note, however, the expert report in *Namenda* contained a **[*63]** more extensive analysis of the statistical likelihood of success in order to calculate his predictions. *See* Expert Report of George W. Johnston, Esq. ¶¶ 74-109, *Namenda*, No. C 15-07488 CM, Dkt. No. 696-9 (S.D.N.Y. Apr. 29, 2019). While the report in *Namenda* provided a more thorough analysis, it does not set the threshold for the admissibility of a numerical prediction. Attorney Lentz, as discussed, performed a considered analysis, and did not only evaluate information that supports his opinion. Relying on his experience, Attorney Lentz translates his analysis into numerical predictions, something patent litigators consistently do for clients. This order will permit Attorney Lentz to opine on his numerical predictions and allow the jury to evaluate whether his or Professor Adelman's numbers are more persuasive.

Lastly, defendants' arguments to exclude Attorney Lentz's "narrative testimony" fail for the same reasons described in the analysis of the motion to exclude Professor Leffler, discussed below. In sum, defendants' motion to exclude Attorney Lentz's testimony is **DENIED**.

8. DEFENDANTS' MOTION TO EXCLUDE TESTIMONY OF PLAINTIFFS' EXPERT PROFESSOR MCGUIRE.

Next up is defendants' motion **[*64]** to exclude the testimony of Professor Thomas G. McGuire (Dkt. Nos. 444, 477, 488). Professor McGuire is an economist who currently serves as a professor of health economics in the Department of Health Care Policy at Harvard Medical School. He also served as an editor for the Journal of Health Economics for ten years and has served as an expert in several reverse-payment cases (McGuire Rep. ¶¶ 7-10, Dkt. No. 445-8).

In his report Professor McGuire opines on: whether the Lupin agreement contained an reverse payment and whether its anticompetitive effects outweigh any procompetitive justifications; the competitive circumstances if the parties to the Lupin agreement had not settled; and the Valeant price increases (*id.* ¶¶ 3-4). Defendants argue that both Professor McGuire's alternative settlement theory and his opinion that the settlement was anticompetitive are inadmissible.

First, defendants take issue with Professor McGuire's alternative settlement theory, where he uses a bargaining model to opine that, if the brand defendants and Lupin behaved competitively and had not included a reverse payment in their agreement, the date of generic entry would have been between January and April 2014 **[*65]** (*id.* at ¶¶ 143-165, Tbl. 3). Professor McGuire's bargaining model assumes a split of gains that matched the actual settlement agreement (97.3% of the gains to the brand defendants), which defendants argue runs contrary to the academic literature (Br. 8-9). Professor McGuire's report contains several supporting citations sufficient to show a reliable foundation for his assumption (McGuire Rep. ¶ 161). Defendants' citation to one contrary article does not render Professor McGuire's opinion deficient. Defendants also primarily argue that Professor McGuire relies on inadmissible opinions from plaintiffs' patent-law expert, Attorney Lentz. Specifically, defendants focus on Attorney

Lentz's opinions on Lupin's prospects of success in the patent litigation (Br. 10-13). This order addresses (and rejects) those arguments in its analysis of defendants' motion to exclude Attorney Lentz's testimony.

Defendants contend that, due to his reliance on Attorney Lentz's report, Professor McGuire's testimony contradicts the undisputed evidence, but then try to preempt any counterargument that Professor McGuire may testify on but-for scenarios: "In constructing the but-for world, everything except the alleged **[*66]** misconduct must be held constant. That means, of course, keeping constant the actual parties and their actual beliefs and expectations" (Br. 12). Defendants thus conclude: "Permitting Dr. McGuire to opine on the parties' expectations based on the unsupported extrapolation of Lupin's odds of success in the patent litigation, while ignoring the actual evidence of Lupin's actual subjective expectations, would mislead the jury" (*id.* at 13). But defendants here go too far, as the summary judgment order made clear:

> "The most elementary conceptions of justice and public policy require that the wrongdoer shall bear the risk of the uncertainty which his own wrong has created" . . . [O]ur actors have no reason to contemplate action they might have taken in the but-for world *which never came to pass*

(Summary Judgment Order 22, citing *Bigelow v. RKO Radio Pictures, 327 U.S. 251, 265, 66 S. Ct. 574, 90 L. Ed. 652 (1946)*). That the numbers input into Professor McGuire's model did not, to defendants' eyes, align with contrary evidence will be grounds for cross-examination but not exclusion. The ultimate resolution of the patent litigation on the merits never happened, and defendants have not demonstrated that Professor McGuire's but-for analysis has not provided a reasoned deviation **[*67]** from the record, or that his alleged failure to input some contrary datapoints renders Professor McGuire's model unreliable (*id.* at 26). The same reasoning applies and forecloses on defendants' later argument to exclude Dr. McGuire's opinion that the settlement agreement was anticompetitive to the extent it addressed Lupin's intentions or expectations (Br. 20-21).

Defendants' last argument regarding Professor McGuire's alternate settlement model concerns the shift of the estimated Sun generic entry date from May 1, 2015 (in Professor McGuire's class-certification report) to April 1, 2014 (in his instant expert report). Defendants say that this revised datapoint, when input into Professor McGuire's model, shifts the estimated Lupin generic entry six months, which may profoundly impact damages given the timeline for price increase in the actual world (Br. 15-17). Plaintiffs argue that Attorney Lentz's report provides the data that prompt the revised date for Sun's likely generic entry, and that the datapoint shifts the date of the Lupin/brand defendants' settlement up by only two months (Opp. 19 n. 78). In their reply, Defendants conflate the shift in the estimated Sun settlement date **[*68]** with the resulting shift in the model's proposed entry for Lupin's generic, which muddles their argument (Reply Br. 7-8). This order finds that the shift in a datapoint in between class certification and final expert reports, apparently made in light of new data from other experts, does not render Professor McGuire's opinion here unreliable.

Second, similar to their argument regarding Professor Leffler, defendants argue that Professor McGuire's opinion that the settlement agreement is anticompetitive should be excluded as contrary to law. Professor McGuire, in relevant part, opines that the no-AG clause and cash payment constituted an anticompetitive reverse payment with an estimated worth of $28.6 million, that the value of the reverse payment induced a delay in Lupin's introduction of a generic Glumetza product, and that jumps in Santarus and Depomed's stock prices upon the announcement of the settlement signaled that the agreement stimulated unanticipated profit flows that validate the conclusion that the agreement was anticompetitive (McGuire Rep. ¶ 5).

To reach his conclusion that the reverse payment was anticompetitive, Professor McGuire describes and considers the "*Actavis* inference": **[*69]**

> The logic of the inference goes like this. The litigation (competitive) route yields an expected profit to the brand, recognizing that the patent may or may not be found by the court to be valid and infringed. This is the expected profit associated with following through with litigation. Litigation requires the brand to pay its litigation costs. If the reverse payment exceeds any avoided litigation costs, we can infer that the brand must be getting higher profits from the settlement than it would with litigation (because if the brand expected higher profits with litigation, it would litigate). The only way for the brand's profits to be greater through a reverse payment settlement than through continued litigation is if the length of the monopoly retained by the brand under a

> reverse payment settlement is greater than the length of the monopoly it could expect to retain by continuing to litigate through trial and appeals

(*id.* at ¶ 79). Professor McGuire here explains his understanding of the economic logic of *Actavis*. Defendants argue Professor McGuire's inference misrepresents *Actavis* because it states that a large reverse payment *necessarily* indicates an anticompetitive effect (Br. **[*70]** 19).

HN13[] *Actavis* held that reverse-payment settlements can *sometimes* violate antitrust laws. *Actavis, 570 U.S. at 141*. Here, again, the language from *Actavis*:

> [T]he likelihood of a reverse payment bringing about anticompetitive effects depends upon its size, its scale in relation to the payor's anticipated future litigation costs, its independence from other services for which it might represent payment, and the lack of any other convincing justification. The existence and degree of any anticompetitive consequence may also vary as among industries. These complexities lead us to conclude that the [plaintiff] must prove its case as in other rule-of-reason cases

Id. at 159. Professor McGuire cites this exact portion of *Actavis* in his report, and plaintiffs argue that he makes no statement that a reverse payment is *per se* anticompetitive, pointing to several qualifying statements in his report, such as (italics added):

> In other words, when the reverse payment exceeds the expected future litigation costs of the brand, *and in the absence of any other explanation for the payment*, the brand's exclusivity period obtained under the agreement must exceed the expected entry date with litigation, and is therefore anticompetitive. **[*71]**

(McGuire Rep. ¶ 80). Professor McGuire also provides an analysis of procompetitive benefits to the agreement, although he unsurprisingly finds none (McGuire Rep. ¶¶ 139-42).

All that being said, Professor McGuire cannot insert mere cosmetic qualifiers to show he comports with *Actavis* — his actual analysis must also align. Professor McGuire opines that the "*Actavis* Inference is an if-then condition, or equivalently, a *sufficient* condition to conclude that the agreement was a pay-for-delay and anticompetitive" (*Id.* at ¶ 80 n. 154). This order finds statements like this run afoul of the Supreme Court's opinion. *Cf. In re Intuniv Antitrust Litig., 2020 U.S. Dist. LEXIS 187578, 2020 WL 5995326, at *20-21 (D. Mass. Oct. 10, 2020)* (Judge Allison D. Burroughs). Accordingly, Professor McGuire shall not testify that a large reverse payment *necessarily* means that the agreement was a pay-for-delay and anticompetitive.

Defendants next attack Professor McGuire's stock-price analysis. Professor McGuire conducts a stock price analysis and opines that "the Depomed and Santarus stock price jumps imply that unanticipated profit flows were created because of the payment in the Lupin Agreement (at the expense of purchasers) and that the payment in the Agreement was anticompetitive" (McGuire Rep. ¶ 136, Fig. 6). Defendants **[*72]** say that the stock-price analysis is not reliable and should be excluded.

On reliability, defendants argue that the alleged increase in Depomed's stock price was not statistically significant (which Professor McGuire acknowledges in his report) and that the increase in Santarus' stock price was too short-lived to be evidence of increased revenues (Br. 22). These criticisms do not go to reliability or the robustness of Professor McGuire's methodology, they address the weight the analysis should be given by a jury. This order also finds that analysis not too disconnected from the issues in the case to be excluded on a *Daubert* motion. As *defendants* state in their reply brief, *Actavis* "makes clear that all facts and circumstances . . . must be considered in the [rule-of-reason] analysis" (Reply Br. 10). Professor McGuire also does not use his stock analysis as a substitute for the rule-of-reason investigation, he includes it as further evidence supporting his analysis (McGuire Rep. ¶ 136). Defendants point to caselaw where the Court of Appeals for the First Circuit affirmed the exclusion of Professor McGuire's stock price study — but admit that the Professor McGuire offered that study for **[*73]** a completely different purpose than he offered it here (Br. 23, citing *In re Nexium (Esomeprazole) Antitrust Litig., 842 F.3d 34, 52 (1st Cir. 2016)*). That argument accordingly fails to persuade.

Third, and finally, defendants argue that Professor McGuire cannot provide a factual or legal narrative. This order addresses this argument (made in several of defendants' *Daubert* motions) in its discussion of the motion to exclude Dr. Leffler's testimony, below. In short, this argument is not appropriate for a *Daubert* motion.

In sum, to the extent stated, defendants' motion to exclude Professor McGuire's opinions is **GRANTED IN PART** and **DENIED IN PART**.

9. DEFENDANTS' MOTION TO EXCLUDE TESTIMONY OF PLAINTIFFS' EXPERT DR. LEFFLER.

Next is defendants' motion to exclude the expert opinion testimony of Professor Keith Leffler (Dkt. Nos. 443, 469, 487). Professor Leffler has a Ph.D. in economics from UCLA and is an emeritus associate professor of economics at the University of Washington (Leffler Rep. ¶¶ 1-3, Dkt. No. 445-3). Professor Leffler opines on the following: whether the brand defendants exercised market power; the economic effects of the brand defendants' reverse payments; the value of the no-AG provision to Lupin and its cost to brand defendants; whether it would **[*74]** have been economically rational for defendants to agree to an alternate settlement with an earlier entry date absent the no-AG reverse payment; and the amount of overcharge damages suffered by the retailer plaintiffs (Leffler Rep. ¶ 10).

Defendants argue that Professor Leffler fails to apply the correct legal standard for evaluating the anticompetitive effects of the settlement agreement (Br. 2, 11-14). As this order explains in its analysis of the motion to exclude Professor McGuire's report, *Actavis* held that reverse-payment settlements can *sometimes* violate antitrust laws. *Actavis, 570 U.S. at 141*. Throughout his report, Professor Leffler improperly states that a large reverse payment is *necessarily* an anticompetitive effect. For example, Professor Leffler states (italics added): "The presence of a large payment above the brand's avoided litigation cost, whether in cash or some other form, *indicates* a 'payment for delay'" (Leffler Rep. ¶ 73). He repeats this again a several paragraphs later: "Consequently, a significant payment from the patent holder to the challenger, like that here, moves the settlement entry date to a later, more anticompetitive, and more inefficient date" (*id.* at ¶ 83).

In response, **[*75]** plaintiffs argue Professor Leffler's statement in paragraph 73 is vindicated by context, and that the whole paragraph addresses delay of *expected* generic entry (Br. 14-15). This order finds this over-fastidious justification insufficient. Plaintiffs also contend that Professor Leffler's testimony does not contain the conditional "if-then" statement excluded in *Intuniv, 2020 U.S. Dist. LEXIS 187578, 2020 WL 5995326, at *21*. If Professor Leffler's opinions are not explicit "if-then statements," then they are close enough to make no difference and would confuse the jury. Accordingly, Professor Leffler shall not testify that a large reverse payment *necessarily* means that the agreement was a payment for delay and anticompetitive.

Defendants next move to exclude Professor Leffler's opinions to the extent they rely on the opinions of another of plaintiffs' experts, Attorney Lentz. This order addresses (and rejects) those in its analysis of defendant's motion to exclude Attorney Lentz's testimony.

Defendants finally request to exclude any testimony from Professor Leffler regarding plaintiffs' "preferred view" of the factual narrative, arguing that he cannot be a "human highlighter" (Br. 3). ***HN14***[] It is common, indeed required, under *Rule 26(a)(2)*, for an expert to summarize **[*76]** the facts and data considered in their report. Professor Leffler's testimony at trial must remain tethered to the expert opinions he provides, but he must be allowed to discuss facts apropos to those opinions. This order finds Defendants' concerns here improper for a *Daubert* motion and best raised as an objection at trial (should one be necessary).

In sum, to the extent stated, defendants' motion is **GRANTED IN PART** and **DENIED IN PART**.

10. DEFENDANTS' MOTION TO EXCLUDE TESTIMONY OF PLAINTIFFS' EXPERTS PROFESSOR CONTI AND DR. LEITZINGER

The final remaining *Daubert* is defendants' motion to exclude the testimony of both Dr. Jeffrey Leitzinger and Professor Rena Conti, damages experts for Humana and direct-purchaser plaintiffs, respectively (Dkt Nos. 446, 471, 477, 485). A February 2021 order denied Humana leave to file a second amended complaint, thereby extinguishing its indirect-purchaser claims and mooting defendants' primary argument here to exclude Professor Conti's calculation of indirect-purchaser damages (Dkt. No. 460). In their reply brief, defendants reiterate their secondary argument that Professor Conti and Dr. Leitzinger's testimony should be excluded because their but-for assumptions **[*77]** are incorrect and misleading (Reply Br. 2-6).

Humana's expert Professor Conti is associate professor of markets, public policy and law at the Questrom School of Business at Boston University, as well as an academic affiliate of Greylock Mckinnon Associates (Conti Rep. ¶ 6, Dkt. No. 447-1). In her report, Professor Conti opines that: if the delay in generic entry of Glumetza by defendants occurred, then it resulted in injury in the form of antitrust overcharges to Humana; and that the aggregate amount of overcharges damages may be calculated using standard economic methods and, depending on the but-for assumptions provided by counsel, direct purchase damages range from $5.24 to $5.32 million (*id.* at ¶ 2). Direct-purchaser plaintiffs' expert Dr. Leitzinger is the founding and managing director of the economic research and consulting firm Econ One Research (Leitzinger Rep. ¶ 1, Dkt. No. 447-9). In his report, Dr. Leitzinger opined, in relevant part, that under a series of alternative entry scenarios, aggregate overcharges range from $1.9 to $2.0 billion (*id.* at ¶ 9e).

Defendants do not contest Professor Conti's methodology in constructing an economic model to assess damages. Rather, defendants **[*78]** take issue with three but-for scenarios for generic entry dates counsel provided to Professor Conti to set the parameters of her calculation. For example, in scenario one: "A Lupin generic, as well as an authorized generic, would have entered the market in or around December 2012. A third generic would have entered the market before February 2016, and a fourth generic in or around May 2017" (Conti Rep. ¶ 48). Defendants say these but-for assumptions are imagined and contradicted by facts in the record, and that Professor Conti "did not consider possible later but-for entry dates" (Reply Br. 3).

But Professor Conti does not opine on when generic entry will occur, she leaves that up to the jury: "My damages methodology is flexible and can be adjusted to accommodate whatever factual findings the jury makes on the number of generic entrants, the time of entry, and whatever inputs are deemed to be relevant" (Conti Rep. ¶ 49). The parties' dispute over whether Lupin would lose the underlying patent litigation, and whether Sun and Watson could have launched their generic products as early as February 2016 will be put to the jury, and those dates can then be input into Professor Conti's model **[*79]** — a model whose methodology and rigor defendants do not otherwise contest. ***HN15***[] "The most elementary conceptions of justice and public policy require that the wrongdoer shall bear the risk of the uncertainty which his own wrong has created." *Bigelow, 327 U.S. at 265*. As the May 2021 order denying summary judgment explained, "[o]ur jury will craft the but-for world, in which defendants acted rationally and lawfully, based on measured deviation from the record" (Summary Judgment Order 22). Defendants' arguments are proper for cross-examination, and do not merit exclusion of Professor Conti's opinions.

The same reasoning applies and requires rejection of defendants' argument to exclude Dr. Leitzinger's opinions. As the summary judgment order made clear, Lupin's generic entry date was not set in stone, and fact issues abound (*id.* at 23-25). In sum, defendants' motion is **Denied**.

CONCLUSION

For the reasons stated above, the parties' *Daubert* motions are **Granted in Part** and **Denied in Part**. This does not foreclose individual objections to specific testimony at trial.

IT IS SO ORDERED.

Dated: August 25, 2021

LexisNexis® Headnotes

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN1[] **Motions to Dismiss, Failure to State Claim**

An N.C. Gen. Stat. § 1A-1, N.C. R. Civ. P. 12(b)(6), motion tests the legal sufficiency of the complaint. The motion should be granted only when (1) the complaint on its face reveals that no law supports the plaintiff's claim; (2) the complaint on its face reveals the absence of facts sufficient to make a good claim; or (3) the complaint discloses some fact that necessarily defeats the plaintiff's claim.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN2[] **Motions to Dismiss, Failure to State Claim**

In deciding an N.C. Gen. Stat. § 1A-1, N.C. R. Civ. P. 12(b)(6), motion, the court must treat the well-pleaded allegations of the complaint as true and view the facts and permissible inferences in the light most favorable to the nonmoving party. Exhibits to the complaint are deemed to be part of it and may also be considered, but the court need not accept as true any conclusions of law or unwarranted deductions of fact.

Business & Corporate Compliance > ... > Contract Formation > Offers > Definite Terms

Business & Corporate Compliance > ... > Contract Formation > Acceptance > Meeting of Minds

HN3[] Offers, Definite Terms

Definiteness is an aspect of contract formation. It is essential to the formation of any contract that there be mutual assent of the parties to the terms of the agreement so as to establish a meeting of the minds. The terms must be definite and certain or capable of being made so. When an agreement is so vague and indefinite that it is not possible to collect from it the full intent of the parties, then there was no true meeting of the minds, and the agreement is void.

Business & Corporate Compliance > ... > Contracts Law > Breach > Material Breach

HN4[] Breach, Material Breach

Because contracts are consensual arrangements, it is up to the parties to define their material rights and obligations. When they haven't, neither the court nor the jury can make an agreement for them. Incomplete and incomprehensible agreements also pose a practical problem: a court cannot enforce a contract unless it can determine what it is.

Contracts Law > Contract Interpretation > Intent

HN5[] Contract Interpretation, Intent

The law does not favor the destruction of contracts on account of uncertainty. If the parties' intent can be ascertained, the court should, if possible, so construe the contract as to carry into effect that intent.

Business & Corporate Compliance > ... > Contract Formation > Offers > Definite Terms

HN6[] Offers, Definite Terms

Courts must take language as it is and people as they are. All agreements have some degree of indefiniteness and some degree of uncertainty. Indefiniteness is fatal only when the court cannot reasonably ascertain what was intended from the language used, construed with reference to the circumstances surrounding the making of the contract.

Insurance Law > Claim, Contract & Practice Issues > Policy Interpretation > Entire Contract

HN7[] Policy Interpretation, Entire Contract

Contract terms are not construed in isolation but as a whole.

Contracts Law > Contract Interpretation > Ambiguities & Contra Proferentem

HN8[] Contract Interpretation, Ambiguities & Contra Proferentem

The aim of contract construction is for every provision to be given effect. When contract language is susceptible of two meanings, one of which will destroy it or render it invalid, the former will be adopted so as to uphold the contract.

Business & Corporate Compliance > ... > Contract Formation > Offers > Definite Terms

Contracts Law > Contract Interpretation > Parol Evidence

HN9[] **Offers, Definite Terms**

It is rare to hold a contract void for vagueness at the pleading stage. This is because extrinsic evidence, such as preliminary negotiations and surrounding circumstances, may explain and clarify the contract's terms.

Business & Corporate Compliance > ... > Contract Formation > Offers > Definite Terms

HN10[] **Offers, Definite Terms**

Courts routinely refuse to enforce mere letters of intent, statements of good faith, and other preliminary arrangements that leave material terms open to future negotiations.

Business & Corporate Compliance > ... > Contract Conditions & Provisions > Contracts Law > Contract Conditions & Provisions

Contracts Law > Contract Interpretation > Good Faith & Fair Dealing

HN11[] **Contracts, Contract Conditions & Provisions**

Contracts sometimes include express promises to negotiate additional terms in good faith. These promises may be enforceable, and depending on the circumstances, allegations that one party refused to negotiate might support a claim for breach of contract.

Contracts Law > Contract Interpretation > Intent

HN12[] **Contract Interpretation, Intent**

The court must construe the contract as written, leaving out imagined terms that the parties could have included but did not.

Business & Corporate Compliance > ... > Contract Formation > Acceptance > Meeting of Minds

HN13[] **Contract Formation, Meeting of Minds**

No duty to negotiate arises from a mere agreement to agree.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Torts > Business Torts > Unfair Business Practices > Elements

HN14[] Trade Practices & Unfair Competition, State Regulation

To state a claim under N.C. Gen. Stat. § 75-1.1, a plaintiff must allege that (1) defendant committed an unfair or deceptive act or practice, (2) the action in question was in or affecting commerce, and (3) the act proximately caused injury to the plaintiff. The determination as to whether an act is unfair or deceptive is a question of law for the court.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > State Regulation

Antitrust & Trade Law > Clayton Act > Scope

HN15[] Scope, Monopolization Offenses

A monopoly on the buyer side of a market is known as a monopsony. In a monopsony, the buyers have market power to decrease market demand for a product and thereby lower prices. Actual and attempted monopsonies are prohibited both by state and federal antitrust laws. N.C. Gen. Stat. § 75-2.1; 15 U.S.C.S. § 2.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN16[] Actual Monopolization, Monopoly Power

When a plaintiff alleges monopolistic misconduct as the basis for overlapping antitrust and N.C. Gen. Stat. § 75-1.1 claims, the failure of the antitrust claim also defeats liability under § 75-1.1.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

HN17[] Actual Monopolization, Monopoly Power

North Carolina courts have rejected arguments that exploitation of market power, even if not monopolistic, amounts to an inequitable assertion of power or position under N.C. Gen. Stat. § 75-1.1 based on the principle that, in the absence of conspiracy or monopoly, one may deal with whom he pleases.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

HN18[] Attempts to Monopolize, Elements

To be clear, it is possible to plead and prove an inequitable assertion of position or power that is not based on an abuse of market or monopoly power. Plenty of cases have upheld N.C. Gen. Stat. § 75-1.1 liability when the circumstances involve fraud, wrongful retention of property, and abuse of overmatched consumers by well-heeled institutions.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Business & Corporate Compliance > ... > Breach > Contracts Law > Breach

HN19[] **Trade Practices & Unfair Competition, State Regulation**

North Carolina appellate courts have stressed that a mere breach of contract, even if intentional, is not sufficiently unfair or deceptive to sustain an action under N.C. Gen. Stat. § 75-1.1. Something more is needed. There must be egregious or aggravating circumstances coupled with the breach.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Business & Corporate Compliance > ... > Breach > Contracts Law > Breach

HN20[] **Trade Practices & Unfair Competition, State Regulation**

As a general proposition, unfairness or deception either in the formation of the contract or in the circumstances of its breach may establish the existence of substantial aggravating circumstances under N.C. Gen. Stat. § 75-1.1. But it is far more difficult to allege and prove egregious circumstances after the formation of the contract because disputes concerning the circumstances of the breach are often bound up with one party's exercise of perceived rights and remedies under the contract. These claims are best resolved by simply determining whether the parties properly fulfilled their contractual duties.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Business & Corporate Compliance > ... > Breach > Contracts Law > Breach

HN21[] **Trade Practices & Unfair Competition, State Regulation**

Only where the circumstances of the breach exhibit clear deception are they sufficiently egregious to impose N.C. Gen. Stat. § 75-1.1 liability. This might include, for example, the concealment of a breach combined with acts to deter further investigation. A simple failure to disclose a breach, on the other hand, is not enough.

Counsel: Brooks, Pierce, McLendon, Humphrey & Leonard, L.L.P., by Reid L. Phillips, Charles E. Coble, Eric M. David, Amanda S. Hawkins, and Shepard D. O'Connell, for Plaintiff Maxwell Foods, LLC.[1] **[**1]** .

Robinson, Bradshaw & Hinson, P.A., by Robert E. Harrington, Ethan R. White, and Mark A. Hiller, for Defendant Smithfield Foods, Inc.

Judges: Adam M. Conrad, Special Superior Court Judge.

Opinion by: Adam M. Conrad

Opinion

[1] After this motion was fully briefed, Ms. O'Connell moved for leave to withdraw as counsel for Maxwell, which the Court granted. (ECF No. 32.)

ORDER AND OPINION ON DEFENDANT'S PARTIAL MOTION TO DISMISS

[*1] For over 25 years, Maxwell Foods, LLC has supplied swine to Smithfield Foods, Inc. under an output contract. Once one of the country's largest swine suppliers, Maxwell recently began cutting its production and will soon be out of the hog business entirely. Maxwell blames Smithfield for its demise. The nub of the complaint is that Smithfield—the dominant player in the hog market—has used its market position to depress prices, rendering the output contract unprofitable for Maxwell. Although aware of Maxwell's tenuous financial position, Smithfield supposedly slashed its purchases, refused to renegotiate swine prices, and reneged on its promise to give Maxwell the same pricing and related economic benefits given to other suppliers. Believing these steps were **[**2]** designed to force it out of business, Maxwell has sued Smithfield for sundry breaches of the output contract and for unfair and deceptive trade practices.

[*2] Smithfield has moved to dismiss most of the pending claims. For the following reasons, the Court **GRANTS in part** and **DENIES in part** the motion.

Conrad, Judge.

I.

BACKGROUND

[*3] The Court does not make findings of fact on a motion to dismiss. The following background assumes that the amended complaint's allegations are true.

[*4] Smithfield is the largest pork producer in the world, processing over six billion pounds annually. On the East Coast alone, it owns and operates three plants—one in Virginia and two in North Carolina—that together process over 55,000 hogs per day. (*See* Am. Compl. ¶¶ 10-12, ECF No. 7.) Smithfield sources hogs from hundreds of its own farms and from many independent suppliers, including Maxwell. (*See* Am. Compl. ¶¶ 7, 8, 14, 15.)

[*5] The production sales agreement ("PSA") between Smithfield and Maxwell dates back to the mid-1990s and is still in effect. (Am. Compl. ¶¶ 7, 8, 16, 28; *see also* Am. Compl. Ex. 1 ["PSA"].)[2] It is an output contract. Subject to adjustments and conditions that are not relevant for present purposes, Smithfield **[**3]** must buy all "Market Swine"—up to 155,000 per month—produced by Maxwell in Virginia and the Carolinas. (*See* Am. Compl. ¶¶ 16, 21-23; PSA ¶¶ 1(e), 3(a).)

[*6] Pricing figured heavily in the parties' negotiations over the PSA and is the seed of their current dispute. The parties agreed to a per-pound purchase price equal to "Market Value" plus or minus various premiums, discounts, and credits. (PSA ¶¶ 1(f), 5(b).) Market Value is tied to the average daily price quoted for hogs sold on the Iowa-Southern Minnesota spot market. (PSA ¶ 1(b).) Readers may wonder why the agreement looks to a market in the Midwest for hog sales in the Southeast. At the time of the PSA, spot market transactions (also called negotiated sales) were prevalent in the hog trade. (*See* Am. Compl. ¶ 38.) Maxwell and Smithfield chose the Iowa-Southern Minnesota spot market "to establish a relatively stable national market price" as the basis for calculating Market Value. (PSA ¶ 1(b).) Recognizing that the marketplace might change, they agreed to "designate a substitute basis" if the Iowa-Southern Minnesota market ever ceased to be viable, backed by a "right to submit the matter to arbitration" should they fail to reach **[**4]** an agreement. (PSA ¶ 1(b).)

[*7] Maxwell also demanded assurances that Smithfield would not treat it less favorably than Smithfield's other major suppliers. (*See* Am. Compl. ¶¶ 18, 19.) Just one day after inking the PSA, the parties signed a letter agreement with additional terms, including a "most-favored-nation" clause. (Am. Compl. ¶ 28; *see also* Am. Compl. Ex. 2 ["Letter Agrmt."].) Smithfield represented that the PSA gave Maxwell "the same economic incentives (including any Grade and Yield Matrix) as given all of Smithfield Foods' other major swine suppliers" and further

[2] Maxwell Foods, LLC, the plaintiff here, is the successor-in-interest to Maxwell Foods, Inc., the party to the PSA. (*See* Am. Compl. ¶¶ 1, 2, 16; PSA, Preamble.)

agreed to offer Maxwell "the benefit of future changes in economic benefits given said major swine suppliers" during the PSA's term. A handwritten annotation states that Smithfield's "[m]ajor swine suppliers include Carroll's Foods, Inc., Murphy Family Farms, Inc., and Prestage Farms, Inc." (Letter Agrmt. ¶ 1; *see also* Am. Compl. ¶¶ 17, 30, 32.)

[*8] Nearly twenty-seven years have elapsed since the PSA was signed. In that time, the national hog market has seen immense change. There are fewer hog farms, due in part to industry consolidation. There are also fewer negotiated sales, falling from sixty percent of all hog sales **[**5]** in 1994 to twelve percent in 2004 to less than two percent in 2021. (*See* Am. Compl. ¶¶ 37, 39-41.) Thinly traded spot markets are, as alleged, "easily manipulated" by pork processors. (Am. Compl. ¶ 46.) This has changed the way the industry does business. As the number of negotiated sales has dwindled, the number of marketing agreements between processors and suppliers has swelled. Those looking for a reliable base price for their marketing agreements now favor index pricing and wholesale (or "cut out") pricing over spot market prices. (*See* Am. Compl. ¶ 47.)

[*9] Smithfield was "a leader" in the "effort" to consolidate the hog market. (Am. Compl. ¶ 37.) It expanded its own hog-farming operations and acquired two of its major suppliers, Carroll's and Murphy. (*See* Am. Compl. ¶¶ 42-45.) These acquisitions, according to Maxwell, have made Smithfield the "dominant pork processor in the Southeast"—so dominant that it "controls the market for hog processors in the Southeast" and wields "monopoly buyer power." (Am. Compl. ¶¶ 50, 87, 88.) Likewise, vertical integration allows Smithfield to control much of its pork production from top to bottom, beginning with breeding and ending with processing **[**6]** and packing. (*See* Am. Compl. ¶ 14.)

[*10] Smithfield's success is Maxwell's sorrow. Indeed, Maxwell believes that Smithfield has used its market power to manipulate the Iowa-Southern Minnesota spot market and depress swine prices. (*See* Am. Compl. ¶¶ 46, 88.) By 2017, volume at the Iowa-Southern Minnesota market dropped to the point that it ceased to be viable. (*See* Am. Compl. ¶ 52.) As a direct consequence, the PSA "no longer yields pricing that allows Maxwell to operate at a profit." (Am. Compl. ¶ 48.) Maxwell has repeatedly proposed a substitute basis for determining Market Value in the PSA, but Smithfield has rejected its proposals and refused to negotiate. (*See* Am. Compl. ¶¶ 59-67.)

[*11] That is not how Smithfield has dealt with its other major suppliers. At some point (the amended complaint does not say when), Maxwell learned that Smithfield had given other major suppliers (the amended complaint does not say which) better terms, such as index or cut out pricing. (*See* Am. Compl. ¶¶ 68, 81-83.) Maxwell further alleges that Smithfield stopped sharing production and sales information with its major suppliers in 2016—information that might have revealed its discriminatory pricing practices. (**[**7]** *See* Am. Compl. ¶ 55.) Confronted by Maxwell, Smithfield did not deny the charge that it had given other suppliers better terms. (*See* Am. Compl. ¶¶ 84, 85; Am. Compl. Ex. 3.)

[*12] The relationship between Maxwell and Smithfield deteriorated just as the COVID-19 pandemic began to unfold. In April 2020, without invoking the PSA's force majeure provisions, Smithfield halved its purchases from Maxwell. (*See* Am. Compl. ¶¶ 70-72.) Maxwell alleges that Smithfield could have continued buying the entire output but chose to maximize purchases from its own affiliates instead. (*See* Am. Compl. ¶¶ 75, 79.) Because Smithfield is the only processor "with the capacity to handle Maxwell's production," Maxwell faced a backup of hogs, had to reduce its output, and has since begun winding down its business entirely. (Am. Compl. ¶¶ 50, 72-78, 86.)

[*13] This suit followed. The original complaint included claims for breach of the most-favored-nation clause and breach of the output requirement. It also claimed that Smithfield breached a duty to renegotiate the PSA's pricing formula once the Iowa-Southern Minnesota spot market was no longer viable. After Smithfield unsuccessfully tried to remove the case to federal court, **[**8]** Maxwell amended its complaint to add a claim for unfair or deceptive trade practices under *N.C.G.S. § 75-1.1* based partly on allegations that Smithfield "abused its monopoly buyer power" in an effort "to target Maxwell unfairly and to force Maxwell out of the hog business." (Am. Compl. ¶ 88.) Smithfield cited the new claim as grounds to designate this action as a mandatory complex business case, which Maxwell opposed. The designation was upheld, though, "[b]ecause there exists a material issue of ***antitrust law*** that must be resolved to litigate Maxwell's claim arising under *section 75-1.1*." *Maxwell Foods, LLC v. Smithfield Foods, Inc., 2021 NCBC LEXIS 39, at *6, 2021 NCBC Order 11 (N.C. Super. Ct. Apr. 13, 2021)* (Bledsoe, C.J.) (located at ECF No. 20).

[*14] Now, Smithfield has moved to dismiss three of the four pending claims under *Rule 12(b)(6) of the North Carolina Rules of Civil Procedure*. (ECF No. 21.) The motion has been fully briefed, and the Court held a hearing on 21 May 2021. This matter is ripe for resolution.

II.

LEGAL STANDARD

[*15] ***HN1***[] A *Rule 12(b)(6)* motion "tests the legal sufficiency of the complaint." *Isenhour v. Hutto, 350 N.C. 601, 604, 517 S.E.2d 121 (1999)* (citation and quotation marks omitted). The motion should be granted only when "(1) the complaint on its face reveals that no law supports the plaintiff's claim; (2) the complaint on its face reveals the absence of facts sufficient to make a good claim; or (3) the complaint discloses some fact that necessarily **[**9]** defeats the plaintiff's claim." *Corwin v. Brit. Am. Tobacco PLC, 371 N.C. 605, 615, 821 S.E.2d 729 (2018)* (citation and quotation marks omitted).

[*16] ***HN2***[] In deciding the motion, the Court must treat the well-pleaded allegations of the complaint as true and view the facts and permissible inferences in the light most favorable to the nonmoving party. *Sykes v. Health Network Sols., Inc. (Sykes), 372 N.C. 326, 332, 828 S.E.2d 467 (2019)*; *CommScope Credit Union v. Butler & Burke, LLP, 369 N.C. 48, 51, 790 S.E.2d 657 (2016)*. Exhibits to the complaint are deemed to be part of it and may also be considered, *see* *Krawiec v. Manly, 370 N.C. 602, 606, 811 S.E.2d 542 (2018)*, but the Court need not accept as true any "conclusions of law or unwarranted deductions of fact," *Wray v. City of Greensboro, 370 N.C. 41, 46, 802 S.E.2d 894 (2017)* (citation and quotation marks omitted).

III.

ANALYSIS

[*17] Smithfield challenges the claims for breach of the most-favored-nation clause, breach of the duty to negotiate, and violation of *section 75-1.1*. The Court will address each claim in turn.

A. Most-Favored-Nation Clause

[*18] Maxwell alleges that Smithfield breached the most-favored-nation clause by giving other major swine suppliers better terms, including a more favorable pricing formula. (*See* Am. Compl. ¶¶ 94-102.) Smithfield argues that this clause is unenforceable because it is hopelessly vague and indefinite. (*See* Br. in Supp. 6-13, ECF No. 22.)

[*19] ***HN3***[] Definiteness is an aspect of contract formation. "It is essential to the formation of any contract that there be mutual assent of the parties to the terms **[**10]** of the agreement so as to establish a meeting of the minds." *Creech v. Melnik, 347 N.C. 520, 527, 495 S.E.2d 907 (1998)* (citation and quotation marks omitted). The terms "must be definite and certain or capable of being made so." *Horton v. Humble Oil & Refin. Co., 255 N.C. 675, 679, 122 S.E.2d 716 (1961)* (citations and quotation marks omitted). "When an agreement is 'so vague and indefinite that it is not possible to collect from it the full intent of the parties,' then there was no true meeting of the minds, and the agreement 'is void.'" *Epic Chophouse, LLC v. Morasso, 2020 NCBC LEXIS 101, at *7-8 (N.C. Super. Ct. Sept. 8, 2020)* (quoting *Holder v. Home Mortg. Co., 214 N.C. 128, 133, 198 S.E. 589 (1938)*).

[*20] There are good reasons for this rule. ***HN4***[] Because contracts are consensual arrangements, it is up to the parties to define their material rights and obligations. When they haven't, "neither the court nor the jury can make an agreement for" them. *Holder, 214 N.C. at 133* (citation and quotation marks omitted). Incomplete and incomprehensible agreements also pose a practical problem: "a court cannot enforce a contract unless it can determine what it is." *F. Indus., Inc. v. Cox, 45 N.C. App. 595, 599, 263 S.E.2d 791 (1980)* (cleaned up); *see also* *Boyce v. McMahan, 285 N.C. 730, 734, 208 S.E.2d 692 (1974)*.

[*21] ***HN5***[] But "[t]he law does not favor the destruction of contracts on account of uncertainty." *Chew v. Leonard, 228 N.C. 181, 185, 44 S.E.2d 869 (1947)*. If the parties' intent "can be ascertained," the Court should, "if possible, so construe the contract as to carry into effect" that intent. *Id.* (citations and quotation marks omitted). Parties presumably intend that their agreements **[**11]** will be effective. Demanding perfect clarity would frustrate that intent, make it harder to draft contracts, and render contractual relationships less certain rather than more. ***HN6***[] Courts "must take language as it is and people as they are. All agreements have some degree of indefiniteness and some degree of uncertainty." *Carolina Helicopter Corp. v. Cutter Realty Co., 263 N.C. 139, 146, 139 S.E.2d 362 (1964)* (citation and quotation marks omitted). Indefiniteness is fatal only when the court cannot reasonably ascertain what was intended "from the language used, construed with reference to the circumstances surrounding the making of the contract." *Welsh v. N. Telecom, Inc., 85 N.C. App. 281, 290, 354 S.E.2d 746 (1987)*.[3]

[*22] The most-favored-nation clause is hardly so vague as to defy understanding. Smithfield assured Maxwell that the PSA gave it "the same economic incentives" as given all "other major swine suppliers" and promised to offer Maxwell "the benefit of future changes in economic benefits given said major swine suppliers during the term of this contract." (Letter Agrmt. ¶ 1.) The undeniable intent was to ensure that Smithfield would treat Maxwell just as well as similarly situated suppliers. Clauses like this one are both common and commonly enforced. *See State ex rel. Utils. Comm'n v. Eddleman, 320 N.C. 344, 376, 358 S.E.2d 339 (1987)* (observing that the "clear intent" of a most-favored-nation clause was **[**12]** to "to equalize the net monetary benefits" for the contracting party and another similarly situated party).[4]

[*23] Smithfield frets that the phrase "economic benefits" is boundless and could include any term in the PSA—pricing, of course, but also length of term, limits on assignability, and even choice of law. Without a definition in the PSA, Smithfield contends, the parties and the Court are left "to guess" at what is and isn't an economic benefit. (Br. in Supp. 8.)

[*24] The uncertainty, if any, is not insoluble. The words "economic" and "benefit" are neither technical nor obscure. They might be broad, but it would be a mistake to equate breadth with ambiguity, much less indefiniteness. ***HN7***[] Besides, contract terms are not construed in isolation but "as a whole." *State v. Philip Morris USA Inc., 359 N.C. 763, 773, 618 S.E.2d 219 (2005)*. The surrounding text obviates much of the guesswork by pointing to the "economic incentives" given to "other major suppliers"—three are named—as benchmarks for comparison and by specifying the PSA's "Grade and Yield Matrix" as one of those incentives, (Letter Agrmt. ¶ 1). *See Welsh, 85 N.C. App. at 291* (construing "company benefits" with reference to company policies and retirement plan); *La Tortilleria, Inc. v. Nuestro Queso, LLC, 2014 U.S. Dist. LEXIS 43344, at *8 (M.D.N.C. Mar. 31, 2014)* (construing "equivalent pricing" and "comparable quality" **[**13]** by using "a clear benchmark for comparison" in contract), *R. & R. adopted*, *2014 U.S. Dist. LEXIS 94315 (July 11, 2014)*.

[*25] Smithfield objects that "economic incentives" and "economic benefits" cannot be the same because contracting parties ordinarily intend different words to have different meanings. (*See* Br. in Supp. 8 (citing *Hunter v.*

---

[3] Although both parties appear to agree that the PSA is governed by the Uniform Commercial Code, neither discussed it in any depth. The Code is arguably more tolerant of vagueness than the common law. *See, e.g.*, *N.C.G.S. § 25-2-204(3)* ("Even though one or more terms are left open a contract for sale does not fail for indefiniteness if the parties have intended to make a contract and there is a reasonably certain basis for giving an appropriate remedy."); *id. § 25-2-202(a)* (stating that contract terms "may be explained or supplemented by course of performance, course of dealing, or usage of trade"); *Carolina Builders Corp. v. Howard-Veasey Homes, Inc., 72 N.C. App. 224, 228, 324 S.E.2d 626 (1985)*.

[4] *See also, e.g., DeLoach v. Lorillard Tobacco Co., 391 F.3d 551, 555 (4th Cir. 2004)* (construing clause in settlement agreement that provided that defendants' obligations "would be 'no less favorable' to them 'than those terms agreed to'" in any later settlement plaintiffs might reach with another co-defendant); *Albertini v. Warner Music Grp. Corp., 2008 U.S. Dist. LEXIS 103878, at *2, *7 (S.D.N.Y. Dec. 23, 2008)* (concluding that most-favored-nation clause was "neither ambiguous nor reasonably subject to more than one interpretation" when it provided that employee would "be treated no less favorably than" another), *aff'd*, ***351 Fed. Appx. 547 (2d Cir. 2009)***; *Eveleth Taconite Co. v. Minn. Power & Light Co., 301 Minn. 20, 27, 221 N.W.2d 157 (1974)* ("In our judgment, there is little doubt that the parties intended that the most-favored-nations clause would protect plaintiff from being placed in a noncompetitive position by provisions in its contracts with defendant . . . which were less advantageous than provisions its competitors might be granted by defendant at a later time during the agreed-upon span of plaintiff's contracts."); *Hyatt v. Al Jazeera Am. Holdings II, LLC, 2016 Del. Ch. LEXIS 57, at *29 n.54 (Del. Ch. Mar. 31, 2016)* ("Generally speaking, 'MFN provisions' are undertakings that the contracting party will be treated at least as well as other [parties] similarly situated.").

Town of Mocksville, 897 F.3d 538, 552 (4th Cir. 2018)).) Here, though, the context suggests that the terms are interchangeable. And in any event, canons of construction are tools, not absolutes. Smithfield uncouples incentives and benefits as a means to destroy the most-favored-nation clause, not to construe it. ***HN8***[] Yet the aim of contract construction is for "every provision . . . to be given effect." *Singleton v. Haywood Elec. Membership Corp., 357 N.C. 623, 629, 588 S.E.2d 871 (2003)*. When contract language "is susceptible of two meanings, one of which will destroy it or render it invalid, the former will be adopted so as to uphold the contract." *Torrey v. Cannon, 171 N.C. 519, 521, 88 S.E. 768 (1916)* (citation and quotation marks omitted); *accord* *Slocumb v. Raleigh, Charlotte & S. R.R. Co., 165 N.C. 338, 341, 81 S.E. 335 (1914)*.

[*26] ***HN9***[] Regardless, it is rare to hold a contract void for vagueness at the pleading stage. This is because extrinsic evidence, such as "preliminary negotiations and surrounding circumstances," may "explain and clarify the contract's terms." *Thomco Realty, Inc. v. Helms, 107 N.C. App. 224, 227-28, 418 S.E.2d 834 (1992)*. Maxwell has alleged that "economic benefits" were "understood and intended by the parties" to include "the pricing **[**14]** of hogs, the market or index that served as the base price for hogs, the Market Value, the Average Terminal Price, and the Grade and Yield Matrix."[5] (Am. Compl. ¶ 33.) These allegations must be taken as true, and Maxwell is entitled to discovery and a chance to prove its preferred interpretation. *See* *Boyce, 285 N.C. at 734* ("In the usual case, the question whether an agreement is complete or partial is left to inference or further proof."); *Epic Chophouse, 2020 NCBC LEXIS 101, at *8* ("Usually, whether there was a meeting of the minds is a question of fact.").

[*27] The Court has considered Smithfield's remaining arguments and finds them equally unpersuasive. The phrase "benefit of future changes" is no less definite than "economic benefits" for essentially the same reasons. Indeed, courts often describe the purpose of most-favored-nation clauses using similar language. *See, e.g.,* *Cent. States, Se. & Sw. Areas Pension Fund v. Reebie Storage & Moving Co., 815 F. Supp. 1131, 1135 (N.D. Ill. 1993)* (describing clause to mean that "if I give somebody else a better deal at any point during the life of our contract, I promise to give you the benefit of that better deal too"); *Claassen v. City of Newton, 353 P.3d 469, 2015 Kan. App. Unpub. LEXIS 528, at *3 (Kan. Ct. App. June 26, 2015)* ("Basically, a most favored nations provision requires Party A to modify its contract with Party B to include more beneficial terms Party A agrees to in later contracts with other parties.").

[*28] Last, **[**15]** with minimal explanation, Smithfield calls the most-favored-nation clause an unenforceable agreement to agree. (*See* Br. in Supp. 7.) ***HN10***[] Courts routinely refuse to enforce mere letters of intent, statements of good faith, and other preliminary arrangements that leave material terms open to future negotiations. *See, e.g.,* *Boyce, 285 N.C. at 734*. This clause is none of those. Smithfield is not subject to terms it cannot anticipate or to an indefinite obligation to agree to something in the future. Rather, it has a fixed and final obligation to offer Maxwell the economic benefits given to other major suppliers. Nothing about that is left to future agreement.

[*29] The Court therefore denies Smithfield's motion to dismiss Maxwell's claim for breach of the most-favored-nation clause.

B. Duty to Negotiate

[*30] According to Maxwell, the parties were required to negotiate in good faith to establish a new basis for determining Market Value once the Iowa-Southern Minnesota spot market ceased to be viable. Maxwell claims that Smithfield breached the PSA by refusing to negotiate. (*See* Am. Compl. ¶¶ 104-10.) Smithfield argues that it did not breach any duty to negotiate because none exists. (*See* Br. in Supp. 13-18.)

[*31] ***HN11***[] Contracts sometimes **[**16]** include express promises to negotiate additional terms in good faith. These promises may be enforceable, and depending on the circumstances, allegations that one party refused to negotiate might support a claim for breach of contract. *See* *Recurrent Energy Dev. Holdings, LLC v. SunEnergy1,*

---

[5] To Smithfield's dismay, Maxwell goes on to say that the contemplated economic benefits also include "any other economic benefits." (Am. Compl. ¶ 33.) This sort of circularity won't do at trial, but a little lenity is allowed in the pleadings.

LLC, 2017 NCBC LEXIS 18, at *43-47 (N.C. Super. Ct. Mar. 7, 2017) (addressing express agreement to "use best efforts to negotiate [the anticipated transaction] in good faith"); New Friendship Used Clothing Collection, LLC v. Katz, 2017 NCBC LEXIS 72, at *40-44 (N.C. Super. Ct. Aug. 18, 2017) (addressing express agreement "to negotiate in good faith the terms of the acquisition that remained open").

[*32] Not so here. The PSA requires the parties to "designate" a new basis for determining Market Value. It then allows either party to compel arbitration for that purpose beginning sixty days after the Iowa-Southern Minnesota spot market ceases to be viable. (*See* PSA ¶ 1(b).) Missing is any promise to negotiate the new basis in good faith.

[*33] Maxwell argues that the duty to negotiate is implied because the PSA requires designation of a new basis for Market Value by mutual agreement and no mutual agreement is possible absent negotiations. This is unpersuasive for two reasons. First, the parties expressly agreed to *arbitrate* their disagreements, not to *negotiate* them. ***HN12***[] The Court must construe the PSA as written, leaving out "imagined terms" **[**17]** that the parties could have included but did not. *Morrell v. Hardin Creek, Inc., 371 N.C. 672, 686, 821 S.E.2d 360 (2018)*. Second, Maxwell conceded at the hearing that the bare promise to designate a new basis—unlike the agreement to arbitrate—is itself a nonbinding agreement to agree. ***HN13***[] No duty to negotiate arises from a mere agreement to agree. *See* *Insight Health Corp. v. Marquis Diagnostic Imaging of N.C., LLC, 2016 NCBC LEXIS 77, at *6-19 (N.C. Super. Ct. Oct. 7, 2016)*; *Comput. Design & Integration, LLC v. Brown, 2018 NCBC LEXIS 216, at *61-65 (N.C. Super. Ct. Dec. 10, 2018)*; *Remi Holdings, LLC v. IX WR 3023 HSBC Way L.P., 2016 NCBC LEXIS 110, at *16-19 (N.C. Super. Ct. Dec. 12, 2016)*.

[*34] Furthermore, the only case that has recognized an implied duty to negotiate had "unique facts." *RREF BB Acquisitions, LLC v. MAS Props., L.L.C., 2015 NCBC LEXIS 61, at *57 (N.C. Super. Ct. June 9, 2015)*. There, the Court "did not imply a duty to negotiate in good faith based on the terms" of the agreement at issue but concluded that there was a question of fact as to "whether the parties had entered into an agreement to continue negotiating in good faith" based on their conduct. *Insight Health, 2016 NCBC LEXIS 77, at *8-10* (discussing *RREF*'s unique facts and narrow holding). Nothing of the sort is alleged here. Maxwell points only to the terms of the PSA, not to any conduct by the parties. Indeed, Maxwell alleges that Smithfield rebuffed all overtures—the opposite of an implied agreement to negotiate.

[*35] In short, the PSA does not impose a duty to negotiate in good faith to establish a substitute basis for determining Market Value. The Court therefore grants Smithfield's motion to dismiss the claim for breach of the duty to negotiate.

C. Section 75-1.1 **[**18]**

[*36] The last claim at issue is for violation of *N.C.G.S. § 75-1.1*. ***HN14***[] To state a claim, a plaintiff must allege that "(1) defendant committed an unfair or deceptive act or practice, (2) the action in question was in or affecting commerce, and (3) the act proximately caused injury to the plaintiff." *Dalton v. Camp, 353 N.C. 647, 656, 548 S.E.2d 704 (2001)*. "The determination as to whether an act is unfair or deceptive is a question of law for the court." *Id.*

[*37] Maxwell asserts two theories: one that it calls a "'direct' or 'pure' unfairness claim" based on Smithfield's alleged abuse of market power, (Opp'n 22, ECF No. 26; *see also* Am. Compl. ¶ 127), and another based on Smithfield's alleged breaches of the PSA, (*see* Am. Compl. ¶ 128). Smithfield argues that neither is unfair or deceptive within the meaning of the statute. (*See* Br. in Supp. 18-29.)

1. Unfair Use of Market Power

[*38] The premise of Maxwell's first theory is that Smithfield abused its "position in the market" to "creat[e] the conditions that made the hog business economically unsustainable for Maxwell." (Am. Compl. ¶ 126.) Thanks to "aggressive vertical integration" and "industry consolidation," Smithfield is the "dominant processor in the Southeast" and "substantially controls the market." (Am. Compl. ¶¶ **[**19]** 14, 37, 39, 44, 46, 50, 87, 88, 90, 93, 124, 127.) Possessing "monopoly buyer power," Smithfield has "manipulate[d] the Iowa-Southern Minnesota spot market" and "exert[ed] undue influence over the entire negotiated market." (Am. Compl. ¶¶ 46, 88, 125.) These actions drove down prices, putting severe "economic pressure" on Maxwell. (Am. Compl. ¶¶ 48, 51, 53, 88, 90, 124, 127.) Smithfield then used its leverage to force Maxwell out of business while giving better pricing to other suppliers, including its affiliates. (*See* Am. Compl. ¶¶ 46, 50, 51, 69, 80, 88, 90.)

[*39] Although Maxwell tries to deny it, there's no serious question that these are allegations of antitrust misconduct. ***HN15***[] A monopoly on the buyer side of a market—which is what Maxwell alleges—is known as a monopsony. In a monopsony, "the buyers have market power to decrease market demand for a product and thereby lower prices." *Buccaneer Energy (USA) Inc. v. Gunnison Energy Corp., 846 F.3d 1297, 1315 (10th Cir. 2017)* (quoting *Campfield v. State Farm Mut. Auto. Ins. Co., 532 F.3d 1111, 1118 (10th Cir. 2008)*).[6] Actual and attempted monopsonies are prohibited both by state and federal antitrust laws. *See* N.C.G.S. § 75-2.1; 15 U.S.C. § 2.

[*40] It's also clear that Maxwell has not alleged all that is needed to state a valid monopsony claim. Without rebuttal, Smithfield showed that the amended complaint lacks essential elements, including **[**20]** the "possession of monopoly power in the relevant market" and the "willful acquisition or maintenance" of that power. *Sykes v. Health Network Sols., Inc., 2017 NCBC LEXIS 73, at *60 (N.C. Super. Ct. Aug. 18, 2017)* (quoting *Oksanen v. Page Mem'l Hosp., 945 F.2d 696, 710 (4th Cir. 1991)*), *aff'd by an equally divided court*, *372 N.C. 326, 828 S.E.2d 467 (2019)*.

[*41] The upshot is that Maxwell's *section 75-1.1* claim is based on antitrust allegations that fall short of an antitrust violation. According to Smithfield, that ends the matter, and the claim must be dismissed.

[*42] ***HN16***[] The Court agrees. When a plaintiff alleges monopolistic misconduct as the basis for overlapping antitrust and *section 75-1.1* claims, "the failure of the antitrust claim also defeats liability under *section 75-1.1*." *SiteLink Software, LLC v. Red Nova Labs, Inc., 2016 NCBC LEXIS 45, at *32 (N.C. Super. Ct. June 14, 2016)*; *see also, e.g.*, *Sykes, 372 N.C. at 333* (affirming dismissal of *section 75-1.1* claim premised on "the same conduct that is the subject of" deficient antitrust claims); *Sykes v. Blue Cross & Blue Shield of N.C., 2018 NCBC LEXIS 28, at *31 (N.C. Super. Ct. Apr. 5, 2018)* (dismissing *section 75-1.1* claim based on deficient antitrust allegations), *aff'd*, *372 N.C. 318, 828 S.E.2d 489 (2019)*; *Drs. Making Housecalls-Internal Med., P.A. v. Onsite Care, PLLC, 2019 NCBC LEXIS 6, at *20 (N.C. Super. Ct. Jan. 16, 2019)* (same); *R. J. Reynolds Tobacco Co. v. Philip Morris Inc., 199 F. Supp. 2d 362, 396 (M.D.N.C. 2002)* (same), *aff'd per curiam*, *67 F. App'x 810 (4th Cir. 2003)*.

[*43] It makes no difference that Maxwell chose not to pair its *section 75-1.1* claim with a matching antitrust claim. What matters is the claim's substance, not its label. Chief Judge Bledsoe made this clear when he overruled Maxwell's opposition to designation of this case to the Business Court. Maxwell argued at that time that it had not raised an issue of ***antitrust law*** because it had not asserted a claim under the antitrust **[**21]** statutes. Chief Judge Bledsoe disagreed, concluding that Maxwell "otherwise invoked state or federal ***antitrust law*** by alleging that Smithfield's monopolistic misconduct serves as the basis for its claim under *section 75-1.1*." *Maxwell Foods, 2021 NCBC LEXIS 39, at *5-6, 2021 NCBC Order 11* (citations and quotation marks omitted). As he put it, even without an independent antitrust claim, "there exists a material issue of ***antitrust law*** that *must be resolved* to litigate Maxwell's claim arising under *section 75-1.1*." *Id.* at *6 (emphasis added).

[*44] That issue can now be resolved on the pleadings. It is uncontested that Maxwell's allegations of monopolistic misconduct, even if taken as true, do not show a violation of the antitrust laws. Neither do they support liability under *section 75-1.1*.

---

[6] Monopoly claims usually involve allegations that a seller acquired market power so as to restrict output and raise prices. "[A] monopsony is to the buy side of the market what a monopoly is to the sell side and is sometimes colloquially called a 'buyer's monopoly.'" *Weyerhaeuser Co. v. Ross-Simmons Hardwood Lumber Co., 549 U.S. 312, 320, 127 S. Ct. 1069, 166 L. Ed. 2d 911 (2007)* (citation and quotation marks omitted); *see also* *Sykes, 372 N.C. at 330 n.2* (describing a monopsony as "a market situation in which one buyer controls the market" (citation and quotation marks omitted)).

[*45] Maxwell maintains that Smithfield's exploitation of market power, even if not monopolistic, amounts to "an inequitable assertion of its power or position" under *section 75-1.1*. (Opp'n 20 (quoting *Krebs v. Charlotte Sch. of L., 2017 U.S. Dist. LEXIS 143060, at *28 (W.D.N.C. Sept. 5, 2017)*).) ***HN17***[] But North Carolina courts have rejected similar arguments based on the principle that, "[i]n the absence of conspiracy or monopoly, one may deal with whom he pleases." *Telephone Services, Inc. v. General Tel. Co. of South, 92 N.C. App. 90, 93, 373 S.E.2d 440 (1988)* (quoting *United Artists Records, Inc. v. E. Tape Corp., 19 N.C. App. 207, 214, 198 S.E.2d 452 (1973)*), *review denied*, *324 N.C. 251, 377 S.E.2d 763 (1989)*.

[*46] In *Telephone Services*, a telecommunications common carrier removed a contractor from its list of providers for installation and **[**22]** repair services. This effectively eliminated the contractor from the market. *See id. at 91*. Seeking relief under *section 75-1.1*, the contractor alleged that the carrier had "monopoly status" and had "unfairly us[ed] its position of power" to force the contractor out of the market. *Id. at 93*. The Court of Appeals concluded that the allegations of monopoly power were inadequate and that, absent a monopoly, the carrier's exclusion of the contractor was not an unfair assertion of power. *See id. at 93-94*.

[*47] This Court followed suit in *Thompson Installations, Inc. v. Stock Building Supply, LLC, 2012 NCBC LEXIS 12 (N.C. Super. Ct. Feb. 21, 2012)*. That case involved an installation and supply contract. Although the contract was nonexclusive, the defendant instructed the plaintiff not to perform installations for its competitors and threatened to terminate the contract if the plaintiff refused. The plaintiff sued for breach of contract and unfair trade practices, alleging anticompetitive coercion but "no monopoly or attempted monopoly by Defendant." *Id.* at *12. Relying on *Telephone Services*, this Court concluded that the defendant's actions were not unfair within the meaning of *section 75-1.1* "regardless of [its] potentially anti-competitive intent." *Id.* at *14.

[*48] ***HN18***[] To be clear, it is possible to plead and prove an inequitable assertion of position or power that **[**23]** is not based on an abuse of market or monopoly power. Plenty of cases have upheld *section 75-1.1* liability when the circumstances involve fraud, wrongful retention of property, and abuse of overmatched consumers by well-heeled institutions. *See, e.g., Nash Hosps., Inc. v. State Farm Mut. Auto. Ins. Co., 254 N.C. App. 726, 738, 803 S.E.2d 256 (2017)* (involving insurer's conduct that "effectively deprived [the plaintiff] of the funds to which [it] was entitled by law"); *Faucette v. 6303 Carmel Road, LLC, 242 N.C. App. 267, 276, 775 S.E.2d 316 (2015)* ("Defendants abused their positions of power to withhold payment of the money [plaintiff] legally was owed, solely to pressure [plaintiff] to resolve several unrelated disputes . . . .").[7]

[*49] This is not such a case. Maxwell accuses Smithfield of crafting a scheme to put it out of business, but the alleged scheme depends on the existence and misuse of monopoly power, not fraud or conversion of property. And these parties are large, sophisticated companies dealing at arms' length.

[*50] Maxwell also suggests that Smithfield had all the power in the parties' relationship, making its conduct unfair. Again, though, the alleged source of Smithfield's power in its relationship with Maxwell is its monopoly power and control of the market. Without the monopoly allegations, Smithfield's actions are not unfair within the meaning of **[**24]** *section 75-1.1*. See *Thompson, 2012 NCBC LEXIS 12, at *14*. Maxwell has not cited any decision in which a court has upheld a *section 75-1.1* claim based on an alleged imbalance of power between two sophisticated companies in an arms'-length contractual relationship even when the "economic fate" of one is tied to the other. *Sara Lee Corp. v. Quality Mfg., Inc., 61 F. App'x 836, 839-40 (4th Cir. 2003)* (concluding that party did not act unfairly or deceptively by imposing "onerous and one-sided" agreement on supplier, threatening to terminate exclusive relationship, and ending relationship in favor of performing supplier's duties in-house).

[7] *See also, e.g., Moose v. Allegacy Fed. Credit Union, 2021 NCBC LEXIS 47, at *11-13 (N.C. Super. Ct. May 5, 2021)* (involving a consumer adhesion contract); *Hamm v. Blue Cross & Blue Shield of N.C., 2010 NCBC LEXIS 17, at *31 (N.C. Super. Ct. Aug. 27, 2010)* ("Conduct by an insurance company that manifests an inequitable assertion of power or position also constitutes an unfair trade practice." (citation and quotation marks omitted)); *Gray v. North Carolina Ins. Underwriting Ass'n, 352 N.C. 61, 68-73, 529 S.E.2d 676 (2000)* (involving insurance carrier conduct).

[*51] In sum, Maxwell has not adequately alleged monopolistic misconduct by Smithfield. Nor has it alleged any other basis to support its "direct" unfairness theory.

2. Breach of Contract and Aggravating Circumstances

[*52] As a second theory, Maxwell claims that Smithfield violated *section 75-1.1* by breaching the PSA. Well-settled law holds otherwise.

[*53] ***HN19***[] Our appellate courts have stressed that "a mere breach of contract, even if intentional, is not sufficiently unfair or deceptive to sustain an action under *N.C.G.S. § 75-1.1*." *Branch Banking & Tr. Co. v. Thompson, 107 N.C. App. 53, 62, 418 S.E.2d 694 (1992)*; *see also, e.g., SciGrip, Inc. v. Osae, 373 N.C. 409, 427, 838 S.E.2d 334 (2020)*; *Broussard v. Meineke Discount Muffler Shops, Inc., 155 F.3d 331, 347 (4th Cir. 1988)*. Something more is needed. There must be "*egregious* or *aggravating* circumstances" coupled with the breach. *Dalton, 353 N.C. at 657* (citations and quotation marks omitted); *see also SciGrip, 373 N.C. at 426-27*; *Bumpers v. Cmty. Bank of N. Va., 367 N.C. 81, 88, 747 S.E.2d 220 (2013)*.

[*54] ***HN20***[] "As a general proposition, unfairness **[**25]** or 'deception either in the formation of the contract or in the circumstances of its breach' may establish the existence of substantial aggravating circumstances" under *section 75-1.1*. *SciGrip, 373 N.C. at 426* (quoting *Bartolomeo v. S.B. Thomas, Inc., 889 F.2d 530, 535 (4th Cir. 1989)*). But "[i]t is far more difficult to allege and prove egregious circumstances *after* the formation of the contract" because "disputes concerning the circumstances of the breach are often bound up with one party's exercise of perceived rights and remedies under the contract." *Post v. Avita Drugs, LLC, 2017 NCBC LEXIS 95, at *10-11 (N.C. Super. Ct. Oct. 11, 2017)*. These claims are "best resolved by simply determining whether the parties properly fulfilled their contractual duties." *Heron Bay Acquisition, LLC v. United Metal Finishing, Inc., 245 N.C. App. 378, 383, 781 S.E.2d 889 (2016)* (citation and quotation marks omitted).

[*55] ***HN21***[] "Only where the circumstances of the breach exhibit clear deception are they sufficiently egregious to impose *section 75-1.1* liability." *Post, 2017 NCBC LEXIS 95, at *11*. This might include, for example, "the concealment of a breach combined with acts to deter further investigation." *Id.* at *12 (citation and quotation marks omitted). A simple failure to disclose a breach, on the other hand, is not enough. *See Heron Bay, 245 N.C. App. at 383 n.1*; *see also Post, 2017 NCBC LEXIS 95, at *11* ("A party's threats to terminate, efforts to encourage another to continue contractual performance while planning to breach, and refusal to otherwise meet contractual obligations do not rise to the level **[**26]** of aggravating circumstances." (citations and quotation marks omitted)).

[*56] Maxwell's allegations do not stack up. Its claim for breach of the duty to negotiate has been dismissed. And it has not pointed to deception or other egregious circumstances related to the alleged breach of the output provision. (*See generally* Opp'n 26-28.)

[*57] As for the most-favored-nation clause, Maxwell argues that "Smithfield had a duty to inform Maxwell of other economic benefits" given to major swine suppliers and that Smithfield hid that information to conceal its breach. (Opp'n 27.) It's not clear what Maxwell means by a duty to inform because the PSA does not expressly impose any duty on Smithfield to disclose information to Maxwell about other suppliers. In any event, whether Smithfield had an express or implied duty to inform Maxwell and whether it complied with such a duty are simply contract questions, turning on the scope of each side's rights and obligations under the PSA.

[*58] More broadly, Maxwell has not alleged that Smithfield concealed its breach or took steps to deter investigation. What the amended complaint alleges is that Smithfield voluntarily began sharing production and sales information with **[**27]** its suppliers, including Maxwell, in 1994 and then stopped some twenty years later. (*See* Am. Compl. ¶¶ 54, 55.) At no point does the amended complaint allege that Smithfield provided false or misleading information, that it took affirmative steps to conceal or destroy information, or that Maxwell was prevented from making inquiries to police compliance with the most-favored-nation clause. Likewise, Smithfield "has not denied" that it gave other suppliers better terms, even when confronted by Maxwell. (Am. Compl. ¶ 85.) At most, these allegations show that Smithfield failed to disclose its breach, which is not sufficiently deceptive or egregious to support liability under *section 75-1.1*. *See* *Heron Bay, 245 N.C. App. at 383 n.1*; *see also* *United Roasters, Inc. v. Colgate-Palmolive Co., 649 F.2d 985, 992 (4th Cir. 1981)* (holding that no "unfairness inhered in the circumstances of the breach within the meaning of the statute simply because the breach was intentional and not promptly disclosed").

[*59] Maxwell offers little else. It contends that Smithfield "intentionally deprived Maxwell of the benefit of the" most-favored-nation clause. (Opp'n 27.) Even assuming that Smithfield acted with ill will and with knowledge of how severe the harm would be to Maxwell, that's just another way of saying that Smithfield intentionally **[**28]** breached the PSA. *See, e.g.,* *Haddock v. Volunteers of Am., Inc., 2021 NCBC LEXIS 70, at *28-29 (N.C. Super. Ct. Aug. 25, 2021)*; *Kerry Bodenhamer Farms, LLC v. Nature's Pearl Corp., 2017 NCBC LEXIS 27, at *21-23 (N.C. Super. Ct. Mar. 27, 2017)*; *Flanders/Precisionaire Corp. v. Bank of N.Y. Mellon Tr. Co., Nat'l Ass'n, 2015 NCBC LEXIS 36, at *38 (N.C. Super. Ct. Apr. 7, 2015)*; *see also* *CF Indus., Inc. v. Transcon. Gas Pipe Line Corp., 448 F. Supp. 475, 485 (W.D.N.C. 1978)* ("It can hardly be doubted that most, if not all, . . . buyers who refuse delivery in a falling market do so intentionally, yet these ordinary commercial breaches are wholly foreign to the purposes of *§ 75-1.1*.").

[*60] This is not "the unusual case in which the circumstances of the breach itself are egregious and deceptive." *Post, 2017 NCBC LEXIS 95, at *13*. The PSA's "terms—and not *section 75-1.1*—define the parties' rights and obligations, as well as the remedies for the alleged breaches." *Id.* at *16.

* * *

[*61] Neither of Maxwell's theories states a claim for relief under *section 75-1.1*. The Court therefore grants Smithfield's motion to dismiss the claim.

IV.

CONCLUSION

[*62] For all these reasons, the Court **GRANTS in part** and **DENIES in part** Smithfield's partial motion to dismiss and **ORDERS** as follows:

> a. The Court **GRANTS** the motion to dismiss Maxwell's second claim for breach of the duty to negotiate. The claim is dismissed with prejudice.
>
> b. The Court **GRANTS** the motion to dismiss Maxwell's fourth claim for violation of *N.C.G.S. § 75-1.1*. In its discretion, the Court dismisses the claim without prejudice.
>
> c. In all other respects, the Court **DENIES** the motion.

SO ORDERED, this the 26th day of August, 2021.

LexisNexis® Headnotes

Civil Procedure > ... > Removal > Postremoval Remands > Jurisdictional Defects

Civil Procedure > ... > Removal > Elements for Removal > Removability

HN1[] **Postremoval Remands, Jurisdictional Defects**

A suit may be removed from state court to federal court only if the federal court would have had subject matter jurisdiction over the case. 28 U.S.C.S. § 1441(a). Only state-court actions that originally could have been filed in federal court may be removed to federal court by the defendant. If it appears at any time before final judgment that the federal court lacks subject matter jurisdiction, the federal court must remand the action to state court. 28 U.S.C.S. § 1447(c).

Civil Procedure > ... > Removal > Postremoval Remands > Jurisdictional Defects

Evidence > Burdens of Proof > Allocation

Civil Procedure > ... > Removal > Elements for Removal > Removability

HN2[] **Postremoval Remands, Jurisdictional Defects**

The party seeking removal bears the burden of establishing federal jurisdiction. The removal statute is strictly construed, and any doubt about the right of removal requires resolution in favor of remand.

Civil Procedure > ... > Removal > Specific Cases Removed > Diversity of Citizenship

Civil Procedure > ... > Subject Matter Jurisdiction > Federal Questions > Well Pleaded Complaint Rule

Civil Procedure > ... > Removal > Specific Cases Removed > Federal Questions

Civil Procedure > ... > Removal > Elements for Removal > Removability

HN3[] **Specific Cases Removed, Diversity of Citizenship**

Absent diversity of citizenship, federal-question jurisdiction is required. Under 28 U.S.C.S. § 1331, federal courts have original jurisdiction over civil actions arising under the Constitution, laws, or treaties of the United States. Federal question jurisdiction is determined (and must exist) as of the time the complaint is filed and removal is effected. Removal pursuant to § 1331 is governed by the well-pleaded complaint rule, which provides that federal question jurisdiction exists only when a federal question is presented on the face of plaintiff's properly pleaded complaint.

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > Federal Questions

HN4[] **Subject Matter Jurisdiction, Federal Questions**

Generally, a complaint that asserts only state law claims does not arise under federal law.

Civil Procedure > ... > Subject Matter Jurisdiction > Federal Questions > Substantial Questions

HN5[] **Federal Questions, Substantial Questions**

Federal question jurisdiction will lie over state law claims only in certain cases where those state law claims implicate significant federal issues. Under Grable, a federal court may exercise jurisdiction over a state law claim only if (1) the action necessarily raises a federal issue that is (2) disputed and (3) substantial, and if (4) the court may entertain the case without disturbing the congressionally approved balance of federal and state judicial responsibilities. The party seeking to establish jurisdiction must justify a need for the experience, solicitude, and hope of uniformity that a federal forum offers on federal issues.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN6[] **Trade Practices & Unfair Competition, State Regulation**

The Unfair Competition Law, (UCL) prohibits any unlawful, unfair, or fraudulent business act or practice. Cal. Bus. & Prof. Code § 17200. The statutory language referring to any unlawful, unfair, or fraudulent practice makes clear that a practice may be deemed unfair even if not specifically proscribed by some other law.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN7[] **Sherman Act, Claims**

Indeed, a plaintiff may state an Unfair Competition Law (UCL) unfair prong claim by alleging that the defendant's conduct: (1) threatens an incipient violation of an ***antitrust law***; (2) violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law; or (3) otherwise significantly threatens or harms competition. Under this test, conduct could violate the UCL's unfair prong without constituting a violation of an ***antitrust law***. Thus, a violation of federal law is not necessary to state a UCL unfair prong claim. A violation of the unfair prong of the UCL does not necessarily require establishing a violation of the Sherman Act.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > State Regulation

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization

HN8[] **Actual Monopolization, Claims**

However, where a plaintiff's Unfair Competition Law (UCL) unfair prong claim relies on a defendant's alleged abuse of its monopoly position, that claim requires establishing a violation of federal ***antitrust law***. The plaintiff must establish a violation of federal ***antitrust law*** because no California statute deals expressly with monopolization or attempted monopolization. Indeed, California's antitrust statute, the Cartwright Act, contains no provision parallel to the Sherman Act's prohibition against monopolization, and the Cartwright Act applies only to a combination involving two or more persons, not to unilateral conduct. Thus, UCL unfair prong claims that rely on a defendant's unilateral abuse of its monopoly position require establishing a violation of federal ***antitrust law***.

Antitrust & Trade Law > Sherman Act

Civil Procedure > ... > Removal > Specific Cases Removed > Federal Questions

HN9[] **Antitrust & Trade Law, Sherman Act**

The substantiality inquiry under Grable looks to the importance of the issue to the federal system as a whole. The United States Supreme Court and the Ninth Circuit have emphasized the importance of the Sherman Act to the federal system The United States Supreme Court has emphasized the importance of the Sherman Act's procompetition policy and has stated that the federal interest in enforcing the national policy in favor of competition is both familiar and substantial. Similarly, the Ninth Circuit has held that the federal interest embodied in the Sherman Act is well-recognized and substantial.

Civil Procedure > ... > Removal > Specific Cases Removed > Federal Questions

HN10[] **Specific Cases Removed, Federal Questions**

The United States Supreme Court and the Ninth Circuit have stated that a federal issue is substantial where a ruling on the issue is both dispositive of the case and would be controlling in numerous other cases.

Antitrust & Trade Law > Procedural Matters > Jurisdiction > Exclusive Jurisdiction

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > Exclusive Jurisdiction

HN11[] **Jurisdiction, Exclusive Jurisdiction**

Under federal law, federal antitrust claims are within the exclusive jurisdiction of the federal courts. Thus, Congress has determined that federal courts should decide federal antitrust claims.

Civil Procedure > ... > Removal > Specific Cases Removed > Federal Questions

HN12[] **Specific Cases Removed, Federal Questions**

Federal question jurisdiction lies over state claims when four Grable criteria are met.

Civil Procedure > ... > Removal > Specific Cases Removed > Federal Questions

Civil Procedure > ... > Removal > Elements for Removal > Removability

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > Supplemental Jurisdiction

HN13[] **Specific Cases Removed, Federal Questions**

If only one of several state claims satisfies the requirements for removal on federal-question grounds, then any other purely state claims in the same complaint may also be determined by the federal court under its supplemental jurisdiction.

Opinion

ORDER DENYING MOTION TO REMAND

Re: Dkt. No. 17

On February 22, 2021, Plaintiff Shari Rosenman ("Plaintiff"), individually and on behalf of all others similarly situated, sued Defendant Facebook, Inc. ("Facebook"), in the California Superior Court for the County of San Mateo for violations of California's Unfair Competition Law, *Cal. Bus. & Prof. Code §§ 17200, et seq.*, and unjust enrichment. ECF No. 1 Exh. B. On March 25, 2021, Facebook removed the instant case to federal court based on federal question jurisdiction. *See* ECF No. 1. Before the Court is Plaintiff's motion to remand the instant case to the

California Superior Court for the County of San Mateo. ECF No. 17. Having considered the submissions of the parties, the relevant law, and the record in this **[*2]** case, the Court DENIES Plaintiff's motion to remand.

I. BACKGROUND

A. Factual Background

Plaintiff alleges that Facebook "is by far the biggest social network in the United States." ECF No. 1 Exh. B ("Compl.") ¶ 1. According to Plaintiff, "Ninety-Nine percent of adults in the U.S. that use social media use Facebook." *Id.* ¶ 17. Plaintiff alleges that "Facebook itself boasted in 2011 that 'Facebook is now 95% of all social media.'" *Id.* ¶ 15.

Plaintiff alleges that "Facebook's popularity gives it wide latitude to set the terms for how its users' private information is collected, used, and protected and the privacy protections afforded to its users." *Id.* ¶ 19. Plaintiff alleges that, as a result, "[c]onsumers effectively face a singular choice: either to use Facebook and submit to the quality and stipulations of Facebook's product or forgo all use of the only social network used by most of their friends, family, and acquaintances." *Id.* ¶ 17.

According to Plaintiff, Facebook initially distinguished itself from other social networks on the basis of its privacy practices. *Id.* ¶ 20. Facebook allegedly "tried to backslide on its privacy commitments, but it faced discipline from competitors that **[*3]** it still had not cornered." *Id.* ¶ 21. However, once Facebook overtook its rivals, Facebook allegedly "leveraged its popularity to successfully degrade privacy to levels unsustainable in the earlier market when Facebook and its competition were subject to consumer privacy demands." *Id.* ¶ 20.

Plaintiff alleges that, "[w]ith nearly every privacy policy update, Facebook steadily increased the richness of the user data it allowed itself to collect and retain and expanded what it could do with the data." *Id.* ¶ 28. For example, "by 2011, Facebook's privacy policy allowed enhanced third-party tracking, permitting Facebook to collect data when users visited a site with Facebook features." *Id.* In addition, "[b]y 2012, Facebook had abandoned a previous pledge to anonymize user data received by Facebook's advertising partners and customers within 180 days." *Id.* ¶ 29. Furthermore, "[b]y 2015, Facebook had abandoned its previous promise to collect payment account numbers only with user consent." *Id.* ¶ 30.

Plaintiff alleges that "users exchange their time, attention, and personal data for access to Facebook's services." *Id.* ¶ 38. Plaintiff alleges that, rather than raising prices, Facebook harmed consumers **[*4]** "by charging them the use of ever-increasing amounts of their personal data to use its platform." *Id.* ¶ 39. According to Plaintiff, "Facebook's conduct has caused consumers to suffer and to continue to suffer substantial economic injury through the degradation of their privacy." *Id.* ¶ 40.

B. Procedural History

On December 14, 2020, Plaintiff sued Facebook in the California Superior Court for the County of San Mateo for violation of California's Unfair Competition Law ("UCL"), *Cal. Bus. & Prof. Code §§ 17200, et seq.*, and unjust enrichment. *See Rosenman v. Facebook*, Case No. 21-CV-00336-LHK, ECF No. 1 Exh. B. Plaintiff's class was defined as "[a]ll persons or entities who maintained a Facebook profile at any time within four years of the date of the filing of this action." *Id.* ¶ 47.

On January 13, 2021, Facebook removed Plaintiff's case to this Court. *See Rosenman v. Facebook*, Case No. 21-CV-00336-LHK, ECF No. 1. Facebook asserted that this Court had jurisdiction based on the *Class Action Fairness Act* and federal question jurisdiction. *Id.*

On February 9, 2021, this Court granted Facebook's motion to relate *Rosenman v. Facebook* to *Klein v. Facebook. See Klein v. Facebook*, Case No. 20-CV-8570-LHK, ECF No. 47. On February 11, 2021, Plaintiff voluntarily **[*5]** dismissed her case without prejudice. *See Rosenman v. Facebook*, Case No. 21-CV-00336-LHK, ECF No. 17.

On February 22, 2021, Plaintiff filed the instant case against Facebook in the California Superior Court for the County of San Mateo for violations of the UCL and unjust enrichment. ECF No. 1 Exh. B. Plaintiff seeks to represent a class of "[a]ll California citizens who, while citizens of the State of California, maintained a Facebook profile at any time within four years of the date of the filing of this action." *Id.* ¶ 50.

On March 25, 2021, Facebook removed the instant case to federal court based on federal question jurisdiction. *See* ECF No. 1. On April 9, 2021, the Court granted Facebook's motion to relate the instant case to *Klein v. Facebook. See Klein v. Facebook*, Case No. 20-CV-8570-LHK, ECF No. 47.

On April 26, 2021, Plaintiff filed the instant motion to remand. ECF No. 17 ("Mot.). On May 26, 2021, Facebook filed an opposition. ECF No. 20 ("Opp'n"). On June 25, 2021, Plaintiff filed a reply. ECF No. 21 ("Reply").

II. LEGAL STANDARD

HN1[] A suit may be removed from state court to federal court only if the federal court would have had subject matter jurisdiction over the case. *28 U.S.C. § 1441(a)*; *see* *Caterpillar Inc. v. Williams, 482 U.S. 386, 392, 107 S. Ct. 2425, 96 L. Ed. 2d 318 (1987)* ("Only **[*6]** state-court actions that originally could have been filed in federal court may be removed to federal court by the defendant."). If it appears at any time before final judgment that the federal court lacks subject matter jurisdiction, the federal court must remand the action to state court. *28 U.S.C. § 1447(c)*.

HN2[] The party seeking removal bears the burden of establishing federal jurisdiction. *Provincial Gov't of Marinduque v. Placer Dome, Inc., 582 F.3d 1083, 1087 (9th Cir. 2009)*. "The removal statute is strictly construed, and any doubt about the right of removal requires resolution in favor of remand." *Moore-Thomas v. Alaska Airlines, Inc., 553 F.3d 1241, 1244 (9th Cir. 2009)* (citing *Gaus v. Miles, Inc., 980 F.2d 564, 566 (9th Cir. 1992)*).

III. DISCUSSION

HN3[] "Absent diversity of citizenship, federal-question jurisdiction is required." *Caterpillar, 482 U.S. at 392*. Under *28 U.S.C. § 1331*, federal courts have original jurisdiction over civil actions "arising under the Constitution, laws, or treaties of the United States." Federal question jurisdiction "is determined (and must exist) as of the time the complaint is filed and removal is effected." *Strotek Corp. v. Air Transp. Ass'n of Am., 300 F.3d 1129, 1131 (9th Cir. 2002)*. Removal pursuant to *Section 1331* is governed by the "well-pleaded complaint rule," which provides that federal question jurisdiction exists only when "a federal question is presented on the face of plaintiff's properly pleaded complaint." *Caterpillar, 482 U.S. at 392*.

In the instant case, Plaintiff's complaint alleges two state law claims: violations of California's **[*7]** Unfair Competition Law ("UCL") and unjust enrichment. *See* ECF No. 1 Exh. ***HN4***[] B. Generally, a complaint that asserts only state law claims does not arise under federal law. *Taylor, 481 U.S. at 63, 107 S. Ct. 1542, 95 L. Ed. 2d 55*.

HN5[] Federal question jurisdiction will lie over state law claims like Plaintiff's only "in certain cases" where those state law claims "implicate significant federal issues." *Grable & Sons Metal Prods., Inc. v. Darue Eng'g & Mfg., 545 U.S. 308, 312, 125 S. Ct. 2363, 162 L. Ed. 2d 257 (2005)*. Under *Grable*, a federal court may exercise jurisdiction over a state law claim only if (1) the action necessarily raises a federal issue that is (2) disputed and (3) substantial, and if (4) the court may entertain the case without disturbing the congressionally approved balance of federal and state judicial responsibilities. *Id. at 314*. The party seeking to establish jurisdiction must justify a need for "the experience, solicitude, and hope of uniformity that a federal forum offers on federal issues." *Id. at 312*.

Facebook contends that the instant case meets all four criteria set forth in *Grable*. Opp'n at 5-14. Specifically, Facebook asserts that Plaintiff's claim under the unfair prong of the UCL "necessarily turns on a disputed and substantial question of federal ***antitrust law***—whether Facebook unlawfully obtained and maintained an illegal monopoly." *Id.* at 6. Facebook **[*8]** thus contends that this Court has federal question jurisdiction over Plaintiff's claim under the unfair prong of the UCL and should exercise supplemental jurisdiction over Plaintiff's claim under the fraudulent prong of the UCL and for unjust enrichment. *Id.* at 6 n.4. The Court addresses in turn each of the *Grable* criteria.

A. Plaintiff's UCL unfair prong claim necessarily raises a federal issue.

First, Plaintiff's UCL unfair prong claim necessarily raises a federal issue. As Facebook acknowledges, Opp'n at 7, it is possible to state a UCL unfair prong claim without raising a federal issue. ***HN6***[] The UCL prohibits "any unlawful, unfair, or fraudulent business act or practice." *Cal. Bus. & Prof. Code § 17200*. "[T]he statutory language referring to 'any unlawful, unfair, *or* fraudulent' practice . . . makes clear that a practice may be deemed unfair even if not specifically proscribed by some other law." *Cel-Tech Comm'ns, Inc. v. L.A. Cellular Telephone Co., 20 Cal. 4th 163, 180, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999)* (emphasis in original).

HN7[] Indeed, a plaintiff may state a UCL unfair prong claim by alleging that the defendant's conduct: (1) "threatens an incipient violation of an ***antitrust law***"; (2) "violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law"; or (3) "otherwise **[*9]** significantly threatens or harms competition." *Cel-Tech Comm'ns, 20 Cal. 4th at 187*. Under this test, conduct could violate the UCL's unfair prong without constituting a violation of an ***antitrust law***. *See id.* (stating that "unfair" means "conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition"); *see also* *Chavez v. Whirlpool Corp., 93 Cal. App. 4th 363, 375, 113 Cal. Rptr. 2d 175 (2001)* ("We do not hold that in all circumstances an 'unfair' business act or practice must violate an ***antitrust law*** to be actionable under the unfair competition law."). Thus, as Facebook acknowledges, a violation of federal law is not necessary to state a UCL unfair prong claim. *See PeopleBrowsr, Inc. v. Twitter*, No. C-12-6120 EMC, 2013 U.S. Dist. LEXIS 31786, 2013 WL 843032, at *5 (N.D. Cal. Mar. 6, 2013) (concluding that "a violation of the unfair prong of the UCL does not necessarily require establishing a violation of the Sherman Act").

HN8[] However, where a plaintiff's UCL unfair prong claim relies on a defendant's alleged abuse of its monopoly position, that claim requires establishing a violation of federal ***antitrust law***. *In re Nat'l Football Leagues Sunday Ticket Antitrust Litig., No. 15-CV-09996-BRO, 2016 U.S. Dist. LEXIS 41639, 2016 WL 1192642, at *5 (C.D. Cal. Mar. 28, 2016)* (denying motion to remand where "Plaintiff's UCL cause of action relies on Defendants' alleged 'abuse of its monopoly position' **[*10]** and charging 'supra-competitive prices'"). The plaintiff must establish a violation of federal ***antitrust law*** because "[n]o California statute deals expressly with monopolization or attempted monopolization." *Dimidowich v. Bell & Howell, 803 F.2d 1473, 1478 (9th Cir. 1986)*, *modified on denial of reh'g*, *810 F.2d 1517 (9th Cir. 1987)*. Indeed, California's antitrust statute, the Cartwright Act, "contains no provision parallel to the Sherman Act's prohibition against monopolization, and the Cartwright Act applies only to a 'combination' involving 'two or more persons', not to *unilateral* conduct." *Flagship Theatres of Palm Desert, LLC v. Century Theatres, Inc., 198 Cal. App. 4th 1366, 1386, 131 Cal. Rptr. 3d 519 (2011)* (citations omitted). Thus, UCL unfair prong claims that rely on a defendant's unilateral abuse of its monopoly position require establishing a violation of federal ***antitrust law***.

For example, in *National Football Leagues Sunday Ticket Antitrust Litigation*, a plaintiff alleged a UCL unfair prong claim based on allegations that "Defendants abuse their monopoly position, leaving Plaintiff . . . with no available market alternatives" and that Defendants "maliciously and oppressively abuse[d] that position by imposing unreasonably high prices." *2016 U.S. Dist. LEXIS 41639, 2016 WL 1192642 at *4*. The Central District of California court concluded that the plaintiff's UCL unfair prong claim necessarily raised an issue of federal law because **[*11]** "Defendants' monopolistic conduct, as alleged by Plaintiff in his Complaint, is only actionable under *Section 2* of the

Sherman Act, particularly where '[n]o California statute deals expressly with monopolization.'" *Id.* (quoting *Dimidowich, 803 F.2d at 1478*).

In the instant case, Plaintiff's UCL unfair prong claim similarly alleges that Facebook abused its monopoly position to force consumers to accept worse privacy settings. Compl. ¶¶ 1, 20, 23. Indeed, in the first section of Plaintiff's substantive allegations, which is entitled "Facebook's Popularity," Plaintiff alleges that: (1) "Facebook is by far the biggest social network in the United States"; (2) "Facebook itself boasted in 2011 that 'Facebook is now 95% of all social media,'"; and (3) "Facebook is the reigning platform, not only in the lives of Americans, but in the lives of 2.2 billion people worldwide." *Id.* ¶¶ 14-17.

Plaintiff alleges that Facebook's popularity allowed Facebook to force consumers to accept worse privacy settings. *Id.* ¶¶ 1, 20, 23. Specifically, Plaintiff alleges that, in the early days of social media, when Facebook had competition, Facebook was "subject to consumer privacy demands." *Id.* ¶ 20; *see also id.* ¶ 34 (alleging that, when Facebook **[*12]** was competing with Google+, Facebook could not degrade its privacy practices further). Facebook allegedly "tried to backslide on its privacy commitments, but it faced discipline from competitors that it still had not cornered." *Id.* ¶ 21.

Plaintiff alleges that, once Facebook overtook its rivals, Facebook allegedly "leveraged its popularity to successfully degrade privacy to levels unsustainable in the earlier market when Facebook and its competition were subject to consumer privacy demands." *Id.* ¶ 20. According to Plaintiff, "Facebook's popularity gives it wide latitude to set the terms for how its users' private information is collected, used, and protected and the privacy protections afforded to its users." *Id.* ¶ 19. Plaintiff alleges that, as a result, "[c]onsumers effectively face a singular choice: either to use Facebook and submit to the quality and stipulations of Facebook's product or forgo all use of the only social network used by most of their friends, family, and acquaintances." *Id.* ¶ 17; *see also id.* ¶ 23 (alleging that Facebook's tracking of users "is just one of many ways in which Facebook rolled back privacy protections once it sensed that users couldn't take their business **[*13]** elsewhere").

In addition, Plaintiff alleges that Facebook charged consumers supra-competitive prices in the form of increased personal data. Plaintiff alleges that, although Facebook is free, "users exchange their time, attention, and personal data for access to Facebook's services." *Id.* ¶ 38. Plaintiff alleges that, rather than raising prices, Facebook harmed consumers "by charging them the use of ever-increasing amounts of their personal data to use its platform." *Id.* ¶ 39.

Considering these allegations, the Court concludes that, like the claim brought by the plaintiff in *National Football Leagues Sunday Ticket Antitrust Litigation*, the UCL unfair prong claim that Plaintiff has pled relies on Facebook's alleged abuse of its monopoly position. Facebook's alleged unilateral monopolistic conduct is only actionable under *Section 2* of the Sherman Act. *See* *Dimidowich, 803 F.2d at 1478* (explaining that the Cartwright Act "does not address unilateral conduct"); *Flagship Theatres, 198 Cal. App. 4th at 1386 (2011)* (explaining that the Cartwright Act, "contains no provision parallel to the Sherman Act's prohibition against monopolization, and the Cartwright Act applies only to a 'combination' involving 'two or more persons', not to unilateral conduct."). Moreover, Plaintiff does **[*14]** not allege in her Complaint that Facebook's conduct violated California-specific constitutional, statutory, or regulatory provisions. Thus, "Plaintiff's unfair competition cause of action will require a Court to interpret and apply federal antitrust statutes, case law, and policies in order to determine whether [Facebook's] conduct constitutes unfair competition under the UCL." *Central Valley Med. Grp., Inc. v. Independent Physician Assoc. Med. Grp., 19-CV-00404-LJO-SKO, 2019 U.S. Dist. LEXIS 100265, 2019 WL 2491328, at *3 (E.D. Cal. June 14, 2019)* (denying motion to remand and concluding that UCL unfair prong claim necessarily raised a federal issue).

Accordingly, Plaintiff's UCL unfair prong claim necessarily raises a federal issue. *See* *In re Nat'l Football Leagues Sunday Ticket Antitrust Litig., 2016 U.S. Dist. LEXIS 41639, 2016 WL 1192642, at *5* (concluding that plaintiff's UCL unfair prong claim necessarily raised a federal issue where plaintiff alleged that defendant abused its monopoly position); *see also* *Central Valley Med. Grp., Inc., 2019 U.S. Dist. LEXIS 100265, 2019 WL 2491328, at *3* (concluding that plaintiff's UCL unfair prong claim necessarily raised a federal issue where "Plaintiff's sole theory of UCL unfair competition liability is that [defendant's] conduct violates policies tethered to federal antitrust laws" and "Plaintiff does not explicitly plead in its complaint, much less argue in its opposition, that [defendant's] alleged conduct violates policies tethered to California-specific constitutional, statutory, or regulatory **[*15]** provisions").[1] Therefore, the first *Grable* criteria is satisfied.

B. The federal issue is disputed.

As Plaintiff concedes, the federal issue in the instant case is disputed. As explained above, *supra* Section III(A), Plaintiff alleges that Facebook acquired popularity and then "leveraged its popularity to successfully degrade privacy to levels unsustainable in the earlier market when Facebook and its competition were subject to consumer privacy demands." Compl. ¶ 20. Facebook denies all of these claims, including that Facebook created an unlawful monopoly and abused its monopoly power to degrade its data practices and harm consumers. Opp'n at 13. Accordingly, the federal issue is disputed. *See* *Gunn v. Minton, 568 U.S. 251, 259, 133 S. Ct. 1059, 185 L. Ed. 2d 72 (2013)* (holding that the federal issue was actually disputed where the defendants denied the plaintiff's allegations on the federal issue). Thus, the second *Grable* criteria is satisfied.

C. The federal issue is substantial.

In addition, the federal issue in the instant case is substantial. ***HN9***[] "The substantiality inquiry under *Grable* looks . . . to the importance of the issue to the federal system as a whole." *Gunn, 568 U.S. at 260*. The United States Supreme Court and the Ninth Circuit have emphasized the importance **[*16]** of the Sherman Act to the federal system. The United States Supreme Court has emphasized "the importance of the [Sherman] Act's procompetition policy" and has stated that "[t]he federal interest in enforcing the national policy in favor of competition is both familiar and substantial." *Cal. Retail Liquor Dealers, Ass'n v. Midcal Aluminum, Inc., 445 U.S. 97, 110-11, 100 S. Ct. 937, 63 L. Ed. 2d 233 (1980)*. Similarly, the Ninth Circuit has held that "[t]he federal interest embodied in the Sherman Act is well-recognized and substantial." *Miller v. Hedlund, 813 F.2d 1344, 1352 (9th Cir. 1987)*; *accord Costco Wholesale Corp. v. Maleng*, 522 F.3d 874, 903 (9th Cir. 2008) (acknowledging the "federal interest in promoting competition under the Sherman Act").

Moreover, resolution of the antitrust questions presented in this case could affect other cases being brought by consumers, advertisers, and federal agencies in federal court against Facebook under the Sherman Act. *See, e.g., Klein v. Facebook*, No. 20-CV-08570-LHK, ECF Nos. 86, 87 (consumer and advertiser class actions, alleging that Facebook has offered worse data practices because Facebook does not face competition); *FTC v. Facebook*, No. 20-CV-03590-JEB (case brought by FTC against Facebook for abusing its monopoly position). ***HN10***[] The United States Supreme Court and the Ninth Circuit have stated that a federal issue is substantial where "a ruling on the issue is both dispositive **[*17]** of the case and would be controlling in numerous other cases." *City of Oakland v. BP PLC, 969 F.3d 895, 905 (9th Cir. 2020)*; *see* *Empire Healthchoice Assur. v. McVeigh, 547 U.S. 677, 700, 126 S. Ct. 2121, 165 L. Ed. 2d 131 (2006)* (stating that an issue was substantial where "its resolution was both dispositive of the case and would be controlling in numerous other cases"). Thus, the Court concludes that the federal issue presented in the instant case is substantial. *See* *In re Nat'l Football Leagues Sunday Ticket Antitrust Litig., 2016 U.S. Dist. LEXIS 41639, 2016 WL 1192642, at *5* (concluding that the federal issue presented by plaintiff's allegations that defendant had abused its monopoly position were substantial). Thus, the third *Grable* criteria is satisfied.

[1] In arguing to the contrary, Plaintiff relies on *Lippitt v. Raymond James Fin. Servs., Inc.. 340 F.3d 1033 (9th Cir. 2002)*. However, *Lippitt* is distinguishable because the Ninth Circuit concluded that "a state court need not inquire into [federal] regulations, or even refer to federal law" to adjudicate the securities claim at issue in that case. *Id. at 1045*. For the reasons explained above, the instant cases requires application of federal antitrust laws. *See* *California ex rel. Lockyer v. Dynegy, Inc., 375 F.3d 831, 841 n.7 (9th Cir. 2004)* (distinguishing *Lippitt* in case where "the reference to and necessity of relying upon federal law is unavoidable").

D. The Court may entertain the instant case without disturbing the congressionally approved balance of federal and state judicial responsibilities.

Finally, the Court may entertain the instant case without disturbing the congressionally approved balance of federal and state judicial responsibilities. ***HN11***[] Under federal law, "federal antitrust claims are within the exclusive jurisdiction of the federal courts." *Eichman v. Fotomat Corp., 759 F.2d 1434, 1437 (9th Cir. 1985)*. Thus, Congress has determined that federal courts should decide federal antitrust claims. *See* *Midcal Aluminum, 445 U.S. at 111* (stating that Congress "'exercis[ed] all the power it possessed' under the *Commerce Clause* when it approved the Sherman Act") (quotation omitted). Accordingly, this Court may entertain the instant case without **[*18]** disturbing the congressionally approved balance of federal and state judicial responsibilities, and the fourth *Grable* criteria is satisfied.

In sum, Plaintiff's UCL unfair prong claim satisfies all four criteria set forth in *Grable*. Accordingly, this Court has federal question jurisdiction over Plaintiff's claim under the unfair prong of the UCL. *See* *Grable, 545 U.S. at 312* (holding that ***HN12***[] federal question jurisdiction lies over state claims when four *Grable* criteria are met). This Court thus exercises federal question jurisdiction over Plaintiff's UCL unfair prong claim. Additionally, this Court exercises supplemental jurisdiction over Plaintiff's claims under the fraudulent prong of the UCL and for unjust enrichment because these claims, which also concern Facebook's alleged conduct in degrading its data practices, arise from "the same case or controversy" as Plaintiff's UCL unfair prong claim. *28 U.S.C. § 1367*; *see* *County of Santa Clara v. Astra USA, Inc., 401 F. Supp. 2d 1022, 1025 (N.D. Cal. 2005)* ***HN13***[] ("If only one of several state claims satisfies the requirements for removal on federal-question grounds, then any other purely state claims in the same complaint may also be determined by the federal court under its supplemental jurisdiction."). Thus, the Court DENIES Plaintiff's motion to remand.

IV. CONCLUSION [*19]

For the foregoing reasons, the Court DENIES Plaintiff's motion to remand.

IT IS SO ORDERED.

BAIS YAAKOV OF SPRING VALLEY, on behalf of itself and all others similarly situated, Plaintiff, Appellant, v. ACT, INC., Defendant, Appellee.

Prior History: **[**1]** APPEAL FROM THE UNITED STATES DISTRICT COURT FOR THE DISTRICT OF MASSACHUSETTS. Hon. Timothy S. Hillman, U.S. District Judge.

Bais Yaakov of Spring Valley v. ACT, Inc., 461 F. Supp. 3d 3, 2020 U.S. Dist. LEXIS 89550, 2020 WL 2575724 (D. Mass., May 21, 2020)
Bais Yaakov of Spring Valley v. ACT, Inc., 328 F.R.D. 6, 2018 U.S. Dist. LEXIS 182507, 2018 WL 5281746 (D. Mass., Oct. 24, 2018)

Core Terms

fax, class member, predominance, advertisements, certification, district court, permission, opt-out, class certification, recipient, putative class, notice, individualized, Regulation, unsolicited, express permission, fax number, solicited, schools, summary judgment, declaration, individual issues, rights, moot, class action, promise, cases, documents, brand, putative class member

LexisNexis® Headnotes

Antitrust & Trade Law > Consumer Protection > Telemarketing

Business & Corporate Compliance > ... > Communications Law > Federal Acts > Telephone Consumer Protection Act

HN1[] **Consumer Protection, Telemarketing**

The Telephone Consumer Protection Act of 1991 prohibits sending advertisements to fax machines, but with two principal exceptions: An advertisement may be sent to a fax machine (1) if the person to whom it is sent has given prior express invitation or permission, in writing or otherwise, *47 U.S.C.S. § 227(a)(5)*; or (2) if certain conditions are satisfied, one of which requires the inclusion of an opt-out notice on the fax, *§ 227(b)(1)(C)*.

Antitrust & Trade Law > Consumer Protection > Telemarketing

Business & Corporate Compliance > ... > Communications Law > Federal Acts > Telemarketing & Consumer Fraud & Abuse Prevention Act

Business & Corporate Compliance > ... > Communications Law > Federal Acts > Telephone Consumer Protection Act

HN2[] **Consumer Protection, Telemarketing**

The FCC defines the term advertisement for purposes of the Telephone Consumer Protection Act as any material advertising the commercial availability or quality of any property, goods, or services, *47 C.F.R. § 64.1200(f)(1)*; *47 U.S.C.S. § 227(a)(5)* (using similar language to define the term unsolicited advertisement). To classify a communication as advertising, the agency looks to the communication's primary purpose.

Administrative Law > Judicial Review > Standards of Review > Deference to Agency Statutory Interpretation

HN3[] **Standards of Review, Deference to Agency Statutory Interpretation**

When a court reviews an agency's construction of a statute the agency administers, it conducts the familiar Chevron two-step analysis: First, always, is the question whether Congress has directly spoken to the precise question at issue. If the intent of Congress is clear, that is the end of the matter; for the court, as well as the agency, must give effect to the unambiguously expressed intent of Congress. If the statute is silent or ambiguous with respect to the specific issue, the question for the court is whether the agency's answer is based on a permissible construction of the statute.

Antitrust & Trade Law > Consumer Protection > Telemarketing

Business & Corporate Compliance > ... > Communications Law > Federal Acts > Telephone Consumer Protection Act

Governments > Legislation > Interpretation

HN4[] **Consumer Protection, Telemarketing**

The Supreme Court has directed courts to apply traditional tools of statutory construction in determining Congress's intent, and it is a settled rule that courts must, if possible, construe a statute to give every word some operative effect. Moreover, in another subsection of the Telephone Consumer Protection Act, Congress placed requirements not just on unsolicited fax advertisements but on "any communication" or "any message" sent via fax, *47 U.S.C.S. § 227(d)(1)(A)*, *(B)*, demonstrating that when Congress wanted to regulate faxes broadly, it used broad language to do so. To read the statute as requiring opt-out notices on solicited advertisements would be to remove the word "unsolicited" from the provision discussing opt-out notices or to ink in new provisions discussing solicited faxes.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Superiority

HN5[] **Prerequisites for Class Action, Superiority**

Fed. R. Civ. P. 23(b)(3) states in part as follows: A class action may be maintained if the court finds that the questions of law or fact common to class members predominate over any questions affecting only individual members, and that a class action is superior to other available methods for fairly and efficiently adjudicating the controversy. In practice, litigation over these requirements often reduces itself to a contest in which the party opposing certification points to issues that it claims will need to be decided separately for many class members. In turn, the putative class representative tries to carry the burden of convincing the court either that prevailing on any of those issues is not important to obtaining the remedy sought, that the issues can be adjudicated in a manner that produces a common answer for all class members, or that, to the extent individual issues remain, they can be resolved in a manner that is both practicable and protective of the parties' rights. Unfairness is equally well pictured as an attempt to eliminate inefficiency by presuming to do away with the rights a party would customarily have to raise plausible individual challenges on those issues.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Constitutional Law > ... > Fundamental Rights > Procedural Due Process > Scope of Protection

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN6[] **Class Actions, Certification of Classes**

In deciding whether individual issues predominate over common questions, a court must not rely on mere speculation that individual issues may arise. Rather, it should consider only those issues that would likely arise if an individual class member's claims were being adjudicated on the merits. In so doing, a court considers the probable course of the litigation so as to formulate some prediction as to how specific issues will play out in order to determine whether common or individual issues predominate. Even then, the mere fact that concerns may arise and may affect different class members differently does not compel a finding that individual issues predominate over common ones. To the contrary, we have recognized that a class may be certified notwithstanding the need to adjudicate individual issues so long as the proposed adjudication will be both administratively feasible and protective of defendants' *Seventh Amendment* and due process rights.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Oral Agreements

Business & Corporate Compliance > ... > Communications Law > Federal Acts > Telephone Consumer Protection Act

HN7[] **Types of Contracts, Oral Agreements**

Under the Telephone Consumer Protection Act of 1991, express permission means permission that is clearly and unmistakably granted by actions or words, oral or written. Furthermore, FCC rules provide that in gauging whether express permission was provided, we consider the understanding of the recipient.

Torts > Procedural Matters > Settlements > Settlement Offers

HN8[] **Settlements, Settlement Offers**

An unaccepted settlement offer -- like any unaccepted contract offer -- is a legal nullity, with no operative effect.

Counsel: Aytan Y. Bellin, with whom Bellin & Associates LLC was on brief, for appellant.

Robert A. Burgoyne, with whom Perkins Coie LLP, Robert L. Leonard, and Doherty, Wallace, Pillsbury & Murphy, P.C., were on brief, for appellee.

Judges: Before Lynch, Kayatta, and Barron, Circuit Judges. BARRON, Circuit Judge, concurring.

Opinion by: KAYATTA

Opinion

[*83] KAYATTA, Circuit Judge. ACT, Inc., is a non-profit entity that develops and administers the ACT college admissions test. Bais Yaakov of Spring Valley is a small private high school to which ACT sent three one-page faxes in 2012. Bais Yaakov has since pursued ACT with a zeal that would impress even Hugo's Inspector Javert. On behalf of itself and a class of similarly situated recipients of faxes from ACT, Bais Yaakov alleges that the faxes were unsolicited advertisements sent in violation of the *Telephone Consumer Protection Act of 1991 (TCPA)*, 47 U.S.C.

§ 227(b)(1)(C). Bais Yaakov seeks injunctive relief and statutory damages in an amount ACT estimates to exceed $400,000,000. After almost eight years of litigation -- including an interlocutory appeal to this court, **[**2]** see *Bais Yaakov of Spring Valley v. ACT, Inc., 798 F.3d 46, 46 (1st Cir. 2015)* -- the district court entered judgment against Bais Yaakov. It found that class certification was unwarranted and that Bais Yaakov's individual claim was rendered moot by ACT's offer to pay the full amount of that claim ($46,500) and its promise not to send further faxes to Bais Yaakov. While we see no abuse of discretion in the denial of class certification, we vacate the judgment because Bais Yaakov's own claim for damages is not quite moot. Our reasoning follows.

I.

In 2005, Bais Yaakov filled out a High School Code Request Form, on which it provided its fax number. Students use the High School Code number to have their ACT test scores reported to their high school. On the form, Bais Yaakov checked a box indicating that it wanted to administer certain standardized tests, that it wanted to receive its students' test scores, and that it wanted to receive SAT or ACT publications.

Seven years later, ACT sent three faxes to Bais Yaakov over the course of three months. The first fax was a one-page flyer stating in large bold letters, "Don't forget to register for the ACT !" Underneath, the fax directed counseling staff to "[r]emind" students of the next ACT test date, which it featured **[**3]** prominently. It listed the registration deadlines for the test date and advised that "[s]tudents can meet the . . . deadline by registering on-line" at a specified ACT web address. In the top-left corner, the fax presented the name "ACT " above the words "advancing lives."

The second fax was identical to the first but with a different test date and corresponding registration deadlines.

The third fax contained what appears to be an image of a crowd cheering at a baseball game, with the words "Give Your Students the Home-Field Advantage" superimposed on one side and "ACT" on the other. The bottom of the image stated, "Become an ACTTest Center." Beneath **[*84]** the image was more text, which said, among other things: "By offering the ACTat your high school you provide your students with a competitive edge."; "Your school can benefit too. Your school staff will be compensated for assuming the roles of test supervisor, room supervisors, and proctors."; and "The curriculum-based ACTis accepted by all 4-year colleges and universities in the U.S." (emphasis omitted).

Bais Yaakov alleges that these three faxes are among over 28,000 unlawfully faxed advertisements ACT sent to over 7,000 schools across **[**4]** the country between 2008 and 2012.

II.

A.

HN1[] The TCPA prohibits sending advertisements to fax machines, but with two principal exceptions: An advertisement may be sent to a fax machine (1) if the person to whom it is sent has given "prior express invitation or permission, in writing or otherwise," *47 U.S.C. § 227(a)(5)*; or (2) if certain conditions are satisfied, one of which requires the inclusion of an opt-out notice on the fax, id. *§ 227(b)(1)(C)*. None of the faxes at issue in this appeal contains an opt-out notice, so any that are advertisements are unlawful if they were sent without prior express invitation or permission.

By regulation, the Federal Communications Commission (FCC) promulgated a substantial further limitation on sending advertisements by fax. In its so-called Opt-Out Regulation (also referred to as the Solicited Fax Rule), the agency decreed that even faxes sent with prior express invitation or permission must contain an opt-out notice. See Rules & Regulations Implementing the Telephone Consumer Protection Act of 1991; Junk Fax Prevention Act of 2005, *71 Fed. Reg. 25,967, 25,971-72 (May 3, 2006)* (formerly codified at *47 C.F.R. § 64.1200(a)(4)(iv)*); *Bais Yaakov of Spring Valley v. FCC, 852 F.3d 1078, 1080, 428 U.S. App. D.C. 165 (D.C. Cir. 2017)* (Kavanaugh, J.). ACT included no opt-out notice in any of its faxes, so if the Opt-Out Regulation is valid, prior express invitation **[**5]** or permission would be no defense. Instead, ACT's liability to any recipient would turn entirely on whether the fax was an advertisement.

HN2[] The FCC defines the term "advertisement" for purposes of the TCPA as "any material advertising the commercial availability or quality of any property, goods, or services." *47 C.F.R. § 64.1200(f)(1)*; see also *47 U.S.C. § 227(a)(5)* (using similar language to define the term "unsolicited advertisement"). To classify a communication as "advertising," the agency looks to the communication's "primary purpose." *In re Rules & Regulations Implementing the Telephone Consumer Protection Act of 1991, 31 FCC Rcd. 13,289, 13,291 (2016)*.

B.

Bais Yaakov proposed two alternative classes, labeled Class A and Class B. With Class A, Bais Yaakov sought to include only recipients of "unsolicited" fax "advertisements" from ACT containing no opt-out notice. With Class B, Bais Yaakov sought to take advantage of the Opt-Out Regulation by broadening the class to include recipients of any (even solicited) fax advertisements from ACT that did not contain an opt-out notice as required by the regulation.

With the parties' consent, the district court considered first whether the Opt-Out Regulation was valid. In finding the regulation to be invalid, the district **[**6]** court deemed binding a decision to that effect by the Court of Appeals for the D.C. Circuit. See *Bais Yaakov of Spring Valley v. ACT, **[*85]** Inc., 328 F.R.D. 6, 10 (D. Mass. 2018)* (citing *Bais Yaakov, 852 F.3d at 1083*).[1]

Having eliminated the Opt-Out Regulation as a tool for establishing that every fax sent by ACT necessarily violated the TCPA because ACT never included opt-out notices, the district court turned its attention to the two issues raised by the TCPA's exceptions from its prohibition on advertisements: Did the fax contain an advertisement? And, if so, was it unsolicited (i.e., sent without prior express invitation or permission)? As to these two issues, the district court took the standard *Rule 23* approach: It did not try to resolve the issues; rather, it properly tried to decide whether Bais Yaakov had shown that resolution of the issues could be accomplished on a common, class-wide basis. See *Amgen Inc. v. Conn. Ret. Plans & Tr. Funds, 568 U.S. 455, 459-60, 133 S. Ct. 1184, 185 L. Ed. 2d 308 (2013)* ("[T]he office of a *Rule 23(b)(3)* certification ruling is not to adjudicate the case; rather **[**7]** it is to select the 'metho[d]' best suited to adjudication of the controversy fairly and efficiently." (second alteration in original)).

---

[1] Following the D.C. Circuit's ruling in Bais Yaakov, the FCC eventually repealed the Opt-Out Regulation. See In re Rules & Regulations Implementing the Telephone Consumer Protection Act of 1991 Junk Fax Prevention Act of 2005 Petitions for Reconsideration &/or Declaratory Ruling & Retroactive Waiver of *47 C.F.R. § 64.1200(a)(4)(iv)* Regarding the Commission's Opt-Out Notice Requirement for Faxes Sent with the Recipient's Prior Express Permission, *35 FCC Rcd. 3079 (2020)*.

Looking first at the request to certify Class B, the district court found that the invalidity of the Opt-Out Regulation permitted a defense based on prior express permission. Assaying the record, it then concluded that the need to adjudicate such a defense would require an examination of the circumstances of each class member and its communications with ACT to determine whether that class member gave the requisite permission. And the need to engage in such an individual inquiry meant that common issues would not predominate as required in order to certify a class under *Rule 23(b)(3)*. See *In re Asacol Antitrust Litig., 907 F.3d 42, 51-52 (1st Cir. 2018)*.

With proposed Class A, Bais Yaakov sought to eliminate this diversity among class members by limiting that class to recipients of unsolicited faxes. The district court rejected this attempt, finding that such a class would constitute a "fail-safe class," i.e., a class that would bind class members only if they won. See *In re Nexium Antitrust Litig., 777 F.3d 9, 22 & n.19 (1st Cir. 2015)*. The district court then reasoned that if the class were redefined to include recipients of any faxes from ACT, it would suffer from the same defects as did Class **[**8]** B.

Having denied class certification, the district court turned to Bais Yaakov's individual claim, on which the parties had cross-moved for summary judgment. See *Bais Yaakov of Spring Valley v. ACT, Inc., 438 F. Supp. 3d 106, 108 (D. Mass. 2020)*. The district court found that genuine disputes of material fact -- namely, whether the three faxes identified by Bais Yaakov qualified as advertisements and whether Bais Yaakov gave the requisite permission -- precluded granting summary judgment for either party. *Id. at 109-10*.

Later, ACT moved to dismiss Bais Yaakov's claim as moot. According to the district court, by that point ACT had "unconditionally tendered to [Bais Yaakov] all the statutory damages that it [sought] on an individual basis." *Bais Yaakov of Spring Valley v. ACT, Inc., 461 F. Supp. 3d 3, 5 (D. Mass. 2020)*. As to injunctive relief, ACT had not sent Bais Yaakov a fax since **[*86]** 2012, and it had agreed not to send any faxes in the future in violation of the TCPA. Id. at 4-5. The district court therefore found the case moot and dismissed it. Id. at 5.

Bais Yaakov now appeals three rulings of the district court: the holding that the Opt-Out Regulation is invalid, the denial of class certification, and the dismissal of Bais Yaakov's individual claim as moot. Bais Yaakov also asks us to review the district court's denial of its motion for summary judgment, **[**9]** but "[i]t is settled beyond peradventure that we lack jurisdiction to hear appeals from the routine denial of summary judgment motions on the merits." *Morse v. Cloutier, 869 F.3d 16, 31 (1st Cir. 2017)*.

III.

We consider first the validity of the Opt-Out Regulation. The parties argue at length over whether the decision of the D.C. Circuit finding the regulation invalid binds this court. We sidestep that issue because we find the D.C. Circuit's decision -- whether binding or not -- correct, largely for the reasons cogently set forth in that opinion. See *Bais Yaakov, 852 F.3d at 1081-83*; see also *Physicians Healthsource, Inc. v. Cephalon, Inc., 954 F.3d 615, 624 n.11 (3d Cir. 2020)* (declining to decide whether Bais Yaakov was binding on other circuits because it agreed with the D.C. Circuit's reasoning); *Sandusky Wellness Ctr., LLC v. ASD Specialty Healthcare, Inc., 863 F.3d 460, 467 & n.1 (6th Cir. 2017)* (treating the D.C. Circuit's ruling as binding and separately agreeing with its reasoning); *Nack v. Walburg, 715 F.3d 680, 682 (8th Cir. 2013)* (noting that the FCC's authority to promulgate the Opt-Out Regulation was "questionable").

HN3[] When a court reviews an agency's construction of a statute the agency administers, it conducts the familiar Chevron two-step analysis:

> First, always, is the question whether Congress has directly spoken to the precise question at issue. If the intent of Congress is clear, that is the end of the matter; for the court, as well as the agency, must give effect to the unambiguously **[**10]** expressed intent of Congress. . . . [I]f the statute is silent or ambiguous with respect to the specific issue, the question for the court is whether the agency's answer is based on a permissible construction of the statute.

Chevron U.S.A. Inc. v. NRDC, 467 U.S. 837, 842-43, 104 S. Ct. 2778, 81 L. Ed. 2d 694 (1984) (footnote omitted). In Bais Yaakov, the D.C. Circuit stopped after the first step. *852 F.3d at 1082*. It held that Congress had spoken directly about whether solicited fax advertisements required opt-out notices (giving the FCC no authority to issue a regulation on the matter), because the text of the statute explicitly required opt-out notices only on unsolicited fax advertisements and said nothing about requiring such notices on solicited fax advertisements. See id.; *47 U.S.C. § 227(b)(1)(C)(iii)* (prohibiting the sending via fax of "an unsolicited advertisement, unless [among other things,] the unsolicited advertisement contains a notice meeting the requirements under" another provision of the statute).

HN4[] This reasoning makes good sense. The Supreme Court has directed courts to apply "traditional tools of statutory construction" in determining Congress's intent, *Chevron, 467 U.S. at 843 n.9*, and it is a "settled rule that [courts] must, if possible, construe a statute to give every word some operative effect," *Cooper Indus., Inc. v. Aviall Servs., Inc., 543 U.S. 157, 167, 125 S. Ct. 577, 160 L. Ed. 2d 548 (2004)*. Moreover, in another subsection **[**11]** of the TCPA, Congress placed **[*87]** requirements not just on unsolicited fax advertisements but on "any communication" or "any message" sent via fax, *47 U.S.C. § 227(d)(1)(A)*, *(B)*, demonstrating that when Congress wanted to regulate faxes broadly, it used broad language to do so. See *Barnhart v. Sigmon Coal Co., 534 U.S. 438, 452, 122 S. Ct. 941, 151 L. Ed. 2d 908 (2002)* (explaining the "general principle of statutory construction" that courts presume Congress has acted "intentionally and purposely" when it "includes particular language in one section of a statute but omits it in another section of the same Act" (quoting *Russello v. United States, 464 U.S. 16, 23, 104 S. Ct. 296, 78 L. Ed. 2d 17 (1983)*)). To read the statute as requiring opt-out notices on solicited advertisements would be to remove the word "unsolicited" from the provision discussing opt-out notices or to ink in new provisions discussing solicited faxes.

The panel dissent from the D.C. Circuit's opinion in Bais Yaakov criticized the majority for "fail[ing] to see the FCC's rationale for requiring that all fax ads include an informative opt-out notice," which the agency had justified as an interpretation of what it means for a fax to be sent with "prior express invitation or permission" and therefore "solicited." *852 F.3d at 1083-84* (Pillard, J., dissenting). But, assuming that the FCC might justifiably conclude that a fax is not solicited **[**12]** within the meaning of the TCPA if the immediately preceding fax did not include an opt-out mechanism, we do not see how the agency reasonably could have concluded that a particular fax is unsolicited unless it itself contains an opt-out notice. And, even if the presence of an opt-out notice bears on whether the subsequently received fax is solicited, the first fax received after the recipient provides express permission cannot be considered unsolicited under any plausible construction of the term. Thus, as the FCC's rule applied to every fax sent, it required an opt-out notice on at least some faxes that were indisputably solicited and cannot be sustained as an interpretation of what "solicited" means. Nor is it our role to rewrite the regulation, even if one assumes that some alternative version might suffice.

Bais Yaakov argues, however, that our precedent compels a different understanding of whether the FCC has authority to require opt-out notices on solicited fax advertisements. It attempts to analogize to *Alexander v. Treasurers of Boston University, 766 F.2d 630 (1st Cir. 1985)*, a case concerning the so-called Solomon Amendment, which denied federal financial aid to students who were required to register for the military draft but failed to do so. *Id. at 632* **[**13]** . To implement the Amendment, the Secretary of Education obviously needed to know whether each financial aid applicant was required to register for the draft and, if so, whether the applicant had in fact registered. So the Secretary simply required each applicant as a condition of receiving aid to certify either that he or she was registered or was not required to register. *Id. at 632-33*. We found that requiring applicants for aid to indicate that they were eligible for that aid, with a "minimum of fuss and inconvenience," *id. at 638*, to be within the Secretary's authority to promulgate regulations so as to do the job Congress assigned it. "[T]he Secretary is simply saying that if an individual is unwilling to tell the government that he or she fulfills the conditions for aid, the government will not dispense it." *Id. at 639*.

The analogy to Alexander is unpersuasive. There, as explained, we concluded that, where the Secretary was uncertain whether a particular aid applicant was within the category of people who might be denied aid under the statute, it could impose a burden on that individual in the **[*88]** name of determining whether he or she was in fact within that regulable category. Here, Bais Yaakov asks us to hold something very different: that an agency can regulate a particular type of fax that it knows with certainty is necessarily beyond its regulatory authority --

specifically, a first fax that is plainly a solicited one -- in order to determine whether a subsequently received fax does fall within the scope of its authority. Bais Yaakov has not explained why we can or should extend Alexander in that way. As such, the Opt-Out Regulation **[**14]** finds no haven in Alexander. See *Ragsdale v. Wolverine World Wide, Inc., 535 U.S. 81, 91-92, 122 S. Ct. 1155, 152 L. Ed. 2d 167 (2002)*.

IV.

A.

We turn our attention next to Bais Yaakov's appeal of the district court's order denying class certification. In briefing that challenge, the parties sensibly train their arguments on the requirements of ***HN5***[] *Rule 23(b)(3) of the Federal Rules of Civil Procedure*, which states in pertinent part as follows: "A class action may be maintained if . . . the court finds that the questions of law or fact common to class members predominate over any questions affecting only individual members, and that a class action is superior to other available methods for fairly and efficiently adjudicating the controversy."

In practice, litigation over these requirements often reduces itself to a contest in which the party opposing certification points to issues that it claims will need to be decided separately for many class members. In turn, the putative class representative tries to carry the burden of convincing the court either that prevailing on any of those issues is not important to obtaining the remedy sought, that the issues can be adjudicated in a manner that produces a common answer for all class members, or that, to the extent individual issues remain, they can be resolved in a manner that is both practicable **[**15]** and protective of the parties' rights. See *Asacol, 907 F.3d at 51* ("The aim of the predominance inquiry is to test whether any dissimilarity among the claims of class members can be dealt with in a manner that is not 'inefficient or unfair.'" (quoting *Amgen, Inc., 568 U.S. at 469*)). "Inefficiency can be pictured as a line of thousands of class members waiting their turn to offer testimony and evidence on individual issues." Id. "Unfairness is equally well pictured as an attempt to eliminate inefficiency by presuming to do away with the rights a party would customarily have to raise plausible individual challenges on those issues." *Id. at 51-52*.

True to form, ACT points to five issues allegedly central to the relief sought that ACT claims cannot be resolved fairly without an unmanageable need to consider the varying circumstances of individual class members. These issues are: (1) Did the school actually receive a fax from ACT ? (2) Which fax did it receive? (3) Was the fax an advertisement when viewed in the circumstances of that recipient? (4) Does that school have the capacity to sue or belong to a class? and (5) Did the recipient of the fax advertisement provide prior express permission for ACT to send the advertisement by fax?

The district court **[**16]** sidestepped the first four of these issues, training its attention on the fifth, the question of permission: Did a recipient of a faxed advertisement give ACT prior express permission to send the advertisement by fax? Under Class A, this issue must be resolved to determine **[*89]** even if someone is a class member (i.e., received an "unsolicited" fax). Under Class B, this issue must be resolved to determine whether ACT has a defense on the merits (i.e., that it received prior express permission to send the fax). *47 U.S.C. § 227(a)(5)*, *(b)(1)(C)*. In either instance, the pivotal *Rule 23* question is whether the record reasonably shows that some putative class members may have permitted ACT to send by fax what ACT faxed them and, if so, whether there is a fair and efficient method for culling those consenting recipients from the class. The district court found that ACT presented sufficient evidence that the class likely included members who invited ACT to send any materials by fax, and that to identify those members the court would have to "parse through each unique relationship" between every class member and ACT ; hence, certification of Class B was precluded for lack of predominance.

As to Class A, the district court found that **[**17]** limiting the definition of class members to those who received "unsolicited" faxes created a prohibited "fail-safe class," *Messner v. Northshore Univ. HealthSystem, 669 F.3d 802, 825 (7th Cir. 2012)*, and that, in any event, no jiggering with the class definition would eliminate the need to decide the issue of permission (or solicitation) for each putative class member. We now review that decision, reversing only if we find an abuse of discretion (including any error of law). *Asacol, 907 F.3d at 51*.

B.

HN6[] In deciding whether individual issues predominate over common questions, a court must not rely on mere speculation that individual issues may arise. See *Waste Mgmt. Holdings, Inc. v. Mowbray, 208 F.3d 288, 298 (1st Cir. 2000)*; *Bridging Cmtys. Inc. v. Top Flite Fin. Inc., 843 F.3d 1119, 1125 (6th Cir. 2016)* (concluding that the district court abused its discretion in finding that issues of consent predominated where the defendant "did not offer any information or evidence to support that theory"). Rather, it should consider only those issues that would likely arise if an individual class member's claims were being adjudicated on the merits. See *Mowbray, 208 F.3d at 298*; *Madison v. Chalmette Ref., L.L.C., 637 F.3d 551, 555 (5th Cir. 2011)*. In so doing, a court considers "the probable course of the litigation" so as to "formulate some prediction as to how specific issues will play out in order to determine whether common or individual issues predominate." *Mowbray, 208 F.3d at 298*. Even then, "the mere fact that . . . concerns may arise and may affect **[**18]** different class members differently does not compel a finding that individual issues predominate over common ones." *Id. at 296*. To the contrary, "we have recognized that a class may be certified notwithstanding the need to adjudicate individual issues so long as the proposed adjudication will be both 'administratively feasible' and 'protective of defendants' *Seventh Amendment* and due process rights.'" *Asacol, 907 F.3d at 52* (quoting *Nexium, 777 F.3d at 19*). So, here, we ask whether there is more than speculation that individual issues of permission may arise and, if so, whether Bais Yaakov has shown that those who gave ACT prior express permission to send advertisements can be culled from the class in a way that is administratively feasible and protective of ACT 's due process rights.

We start with the fact that some unknown number of the putative class members sent a form to ACT providing a fax number and requesting that ACT send them ACT "publications." Indeed, Bais Yaakov itself both sent such a request and claims to be a typical member of the classes it seeks to represent. See *Fed. R. Civ. P. 23(a)(3)*. Further, according to the declaration of an ACT official, class members routinely provided ACT with their fax **[*90]** number when inquiring about becoming a test center, requesting **[**19]** a High School Code number, seeking information about the dates the test will be administered, or asking for copies of publications. At least two of the three faxed documents to which Bais Yaakov points as advertisements are notices of the exam dates and sign-up deadlines -- i.e., just the sort of information that a school asking for ACT publications would likely expect to receive by way of the fax number it supplied when asking for the documents. The third document, in turn, concerned the opportunity to administer ACT exams. And because the typical class member (e.g., Bais Yaakov) registered interest in giving such exams, one can easily see how a request by that school to receive ACT publications would cover such a document.

Nevertheless, as Bais Yaakov points out, the TCPA requires "express permission." ***HN7***[] "Express permission" means "[p]ermission that is clearly and unmistakably granted by actions or words, oral or written." Permission, Black's Law Dictionary (11th ed. 2019); cf. id. (defining "implied permission" as "permission that is inferred from words or actions"). Furthermore, FCC rules (unchallenged by either side) provide that in gauging whether express permission was provided, **[**20]** we consider the understanding of the recipient. *In re Rules & Regulations Implementing the Telephone Consumer Protection Act of 1991, 18 FCC Rcd. 14,014, 14,129 (2003)* ("Express permission to receive a faxed ad requires that the consumer understand that by providing a fax number, he or she is agreeing to receive faxed advertisements."). So we do not reject the possibility that, notwithstanding the strong inference to be drawn from supplying a fax number while requesting a publication, any given school may not have understood its communications to invite ACT to send by fax that which it sent. There is evidence, furthermore, that Bais Yaakov itself did not understand its request for publications to convey perpetual permission for ACT to send Bais Yaakov any advertisements. After all, Bais Yaakov objected when it received the faxed publications from ACT And Bais Yaakov had no longstanding relationship with ACT that might have lent further support to the notion that it received by fax what it clearly asked to receive by fax. To the contrary, the record as described by the parties paints a picture of faxes sent to Bais Yaakov out-of-the-blue after years of no contact.

There is evidence, though, that other members of the putative class did not share Bais Yaakov's understanding concerning the express requests **[**21]** that they receive ACT publications. Indeed, ACT presented concrete examples of schools that did not share Bais Yaakov's understanding. These examples took the form of declarations from representatives of seventy-eight schools with whom ACT corresponded. The declarants confirmed that their schools provided ACT with fax numbers, and that they frequently requested and received publications from ACT by fax. When shown the three faxed ACT publications alleged by Bais Yaakov to be advertisements, they replied that the information contained in the publications was "integral to" the school's ongoing interactions with ACT , and that "ACT would have had permission from the declarant or other school personnel" to send "these types of informational communications using any available type of communication, including facsimile."

Bais Yaakov makes no argument that the concrete examples offered by ACT did not exemplify a larger subset of similar class members that could only be identified were one to parse through the circumstances of each school in the putative class. The fact that many schools expressly **[*91]** asked when giving their fax numbers to receive ACT publications likely suggests why Bais Yaakov **[**22]** makes no argument that ACT's examples constitute just "a few unusual class members, who can be picked off by the defendant." *Asacol, 907 F.3d at 57* (citing *Halliburton v. Erica P. Jong Fund, Inc., 573 U.S. 258, 276, 134 S. Ct. 2398, 189 L. Ed. 2d 339 (2014)*.

Rather, Bais Yaakov argues that ACT would have no plausible defense of consent even in the circumstances presented by the proffered examples. To support that argument, Bais Yaakov points out that the key sentence concerning permission to send the faxes employs the conditional "would have" formulation, rather than stating that ACT did in fact have permission to send the type of information contained in the faxes appended to the complaint. Certainly the syntax could have been clearer. But given the prior communication providing a fax number and asking to receive ACT publications, we think that a factfinder could reasonably read the declarations as reflecting a lack of memory about whether the faxes were received, not a doubt about whether they were invited if received. A prior paragraph in each declaration explains that the declarant has been told that ACT might have sent to the recipient the three faxes appended to Bais Yaakov's complaint. Rather than claiming a rather remarkable memory about exactly what was received years ago, each declarant simply **[**23]** points to the faxes appended to Bais Yaakov's complaint and confirms that those faxes were the type of publications the school was requesting to receive by fax, and that ACT "would have had permission" to send them. In short, a factfinder could reasonably read the declarations as conveying the point that "I do not recall if ACT sent these specific faxes, but if it did, it would have had my permission to do so."

Bais Yaakov argues that the Seventh Circuit concluded otherwise in construing a recipient's declaration that the recipient "would have given" consent. *Physicians Healthsource, Inc. v. A-S Medication Sols., LLC, 950 F.3d 959, 966 (7th Cir. 2020)* (emphasis omitted). In so holding, it appears that the Seventh Circuit read the condition implied by that statement as "if asked, I would have given consent (but I was never asked)." While it may have been reasonable in the context of that case to read the statements as indicating that the recipients never gave permission at all, here the context for at least some class members is markedly different.

Many schools were obviously trying to assist their students in taking the ACT test and, in many cases, in serving as test centers. As the schools' representatives explain, they therefore wanted information about "the nature of the **[**24]** test, how scores are used, how students can prepare for the test, test registration deadlines, and related topics." In this context, a factfinder could determine that the request for ACT "publications" was clearly understood by the school to be a request for notice of exam dates, deadlines for sign-ups, and -- in the case of test centers -- opportunities to give exams. This possibility finds reinforcement in some instances where a school, unlike Bais Yaakov, repeatedly requested information year in and year out. As best the parties' briefs reveal, Bais Yaakov was the only one of out of thousands of recipients that complained about receiving faxes from ACT Silence is not express permission. But widespread and prolonged silence of this type strongly suggests that other recipients were more like ACT 's examples than they were like Bais Yaakov.

Bais Yaakov points out (correctly) that the TCPA requires permission to send advertisements, not just faxes. To leverage **[*92]** that point, Bais Yaakov argues that the three subject faxes were advertisements. The declarations, though, deflect the thrust of this argument because they expressly refer to the specific documents appended to the complaint. In **[**25]** short, even if we assume that these documents are advertisements, ACT would not incur liability if in the context of a particular relationship a request for ACT publications was clearly understood as an invitation to fax what was faxed. See *Gorss Motels, Inc. v. Safemark Sys., LP, 931 F.3d 1094, 1100 (11th Cir. 2019)* ("Although express permission requires a 'clear[] and unmistakabl[e] communicat[ion],' it does not require that a recipient state specifically that his permission includes faxed advertisements.").

On this record, we see no abuse of discretion in the district court's finding that there were, among the thousands of yet-to-be-canvassed putative class members, schools that could be found by the factfinder to have given the requisite permission. So that left a problem: How could one identify and cull out those who did give express permission to send what was sent?

Bais Yaakov has made no argument that the court could cull from the class the consenting schools in an administratively feasible way, protective of ACT's rights. Compare *Sandusky Wellness Ctr., 863 F.3d at 469* ("Identifying solicited fax recipients through a form-by-form inquiry is sufficiently individualized to preclude class certification."), with *Smilow v. Sw. Bell Mobile Sys., Inc., 323 F.3d 32, 40 (1st Cir. 2003)* ("Common issues predominate where individual factual determinations can be accomplished **[**26]** using computer records, clerical assistance, and objective criteria -- thus rendering unnecessary an evidentiary hearing on each claim."). The district court therefore reasonably determined that individual issues of permission would predominate over common questions for both Class A and Class B. See *Asacol, 907 F.3d at 51* (explaining that review of class-certification decision for abuse of discretion involves clear-error review of "'fact-dominated' issues" (quoting *In re New Motor Vehicles Canadian Exp. Antitrust Litig., 522 F.3d 6, 17 (1st Cir. 2008)*)); *Díaz-Alarcón v. Flández-Marcel, 944 F.3d 303, 312 (1st Cir. 2019)* (explaining that a "judge's choice between competing, but rational, views cannot be clearly erroneous" (citing *Anderson v. City of Bessemer City, 470 U.S. 564, 573-74, 105 S. Ct. 1504, 84 L. Ed. 2d 518 (1985)*)).[2]

C.

Bais Yaakov has asked that, were we to affirm the district court's denial of class certification, we should direct the district court to consider revising the class definitions as Bais Yaakov now proposes. As we have explained, Bais Yaakov had, in pertinent part, defined Class B as consisting of those whom ACT sent "a facsimile advertisement" and Class A as consisting of those whom ACT sent "an unsolicited facsimile advertisement." In a footnote on the last page of Bais Yaakov's reply memorandum in support of its motion for class certification before the district court, Bais Yaakov suggested that, if necessary, the district **[**27]** court could narrow Class B to consist of those whom ACT sent "a facsimile whose content was identical or substantially similar to the content of any of the [three] facsimiles" Bais Yaakov says it received and that the district court could **[*93]** narrow Class A the same way but concerning an "unsolicited facsimile." Neither below nor on appeal has Bais Yaakov explained how these alternative definitions might cure the problems we have just discussed. Indeed, our discussion effectively assumed -- favorably to Bais Yaakov -- that each putative class member received those three documents from ACT via fax. In short, the proposed amendment would not eliminate the need to resolve individual issues of permission.

To summarize: The typical school sent ACT a form providing the school's fax number and expressly asking to be sent ACT publications. The documents ACT then sent in return to the supplied fax number appear on their face to provide just the sort of information that a school would want to receive after requesting ACT publications. These common facts raise quite a strong inference that the school sending such a form understood its request as inviting ACT to fax the documents that it faxed. After **[**28]** all, why supply the fax number and request ACT publications if not to receive the publications by fax? Bais Yaakov does have a point in arguing that its own circumstances may be found to belie any inference that it had any such understanding. The faxes it received were sent seven years later, and it promptly objected. But the evidence submitted by ACT makes clear that the circumstances of at least some other schools was to the contrary, actually reinforcing the strong inference that the forms sent to ACT were clearly

[2] We need not reach the question of whether Class A as defined initially by Bais Yaakov would nevertheless be rejected as a fail-safe class were there otherwise no predominance problem.

understood and intended to be read as invites to send by fax that which was faxed. Whether that is so in any individual case may be a close question which we need not resolve. We hold simply that it is a genuine question that may well be answered one way or the other for any given school, and beyond arguing on the merits that no school gave permission to fax the documents -- an argument we have now rejected -- Bais Yaakov offers no means by which to answer that crucial question on a common basis. Hence, the district court did not abuse its discretion in finding that the proposed classes could not be certified.

V.

We consider, finally, Bais Yaakov's appeal from the dismissal **[**29]** of its own individual claim as moot. After denying Bais Yaakov's motion to proceed as a class action, the district court turned to the merits of the case, eventually denying in pertinent part contending motions for summary judgment on the questions of whether the three faxes appended to the complaint were advertisements and whether Bais Yaakov had permitted ACT to send them by fax. ACT thereupon sent Bais Yaakov a check in the amount of $45,600, which Bais Yaakov does not dispute is the most that it can recover in this lawsuit. In a letter accompanying the check, ACT also promised to honor the check no matter the outcome of the case, and it offered to deposit the check with the district court, to be held until any appeal is completed and final judgment entered.[3] ACT also promised not to send Bais Yaakov any further faxes "that violate the TCPA," upon pain of paying "$1,500 should it send any such fax." The record also reflects that ACT has sent no faxes of any type to Bais Yaakov since 2012.

Bais Yaakov rejected the check and the accompanying promises. Unimpressed, the district court concluded that Bais Yaakov **[*94]** had received all that it could possibly receive as damages, and that it had **[**30]** no basis to obtain injunctive relief because "the allegedly wrongful behavior could not reasonably be expected to recur." *Bais Yaakov, 461 F. Supp. 3d at 4* (quoting *Am. C.L. Union of Mass. v. U.S. Conf. of Cath. Bishops, 705 F.3d 44, 55 (1st Cir. 2013)*).

In this very lawsuit, we previously considered and rejected a prior attempt by ACT to moot the litigation by tendering an offer of judgment under *Rule 68 of the Federal Rules of Civil Procedure*. See *Bais Yaakov of Spring Valley v. ACT, 798 F.3d 46 (1st Cir. 2015)*. In so doing we expressed concern about the threat to meritorious class actions posed by sanctioning efforts to cut off *Rule 23* certification by mooting the individual claims of the named plaintiff. *Id. at 48-49*. Nevertheless, we also recognized uncertainty regarding the weight attributed by the Supreme Court to such a concern. Compare *Deposit Guar. Nat'l Bank v. Roper, 445 U.S. 326, 339, 100 S. Ct. 1166, 63 L. Ed. 2d 427 (1980)* ("Requiring multiple plaintiffs to bring separate actions, which effectively could be 'picked off' by a defendant's tender of judgment before an affirmative ruling on class certification could be obtained, obviously would frustrate the objectives of class actions."), with *Genesis Healthcare Corp. v. Symczyk, 569 U.S. 66, 78, 133 S. Ct. 1523, 185 L. Ed. 2d 636 (2013)* (describing that line from Roper as dicta and explaining that Roper's holding turned on the named plaintiff "possess[ing] an ongoing, personal economic stake in the substantive controversy -- namely, to shift a portion of attorney's fees and expenses to successful class litigants"). So we ultimately based our rejection **[**31]** of the *Rule 68* pick-off gambit on a prediction that the Supreme Court would find that a rejected *Rule 68* offer provides no actual relief. See *Bais Yaakov, 798 F.3d at 52*.

HN8[] The Supreme Court has since held just that: "An unaccepted settlement offer -- like any unaccepted contract offer -- is a legal nullity, with no operative effect." *Campbell-Ewald Co. v. Gomez, 577 U.S. 153, 162, 136 S. Ct. 663, 193 L. Ed. 2d 571 (2016)* (quoting *Genesis Healthcare, 569 U.S. at 81* (Kagan, J., dissenting)). So the question before us is whether there is good reason to reach a different result when a check, rather than a *Rule 68* offer, is tendered.

[3] The letter stated, "In all events, ACT hereby commits to paying $45,600 to Bais Yaakov, by way of the payment tendered with this letter or through other means as necessary at the conclusion of this litigation." It also stated that "this tendered payment is unconditional and irrevocable."

The precedent is admittedly uncertain and sparse on this subject. After all, not many plaintiffs walk away from an offer to pay 100% of what they seek. Nevertheless, there are reasons to conclude that ACT's tender of a check and associated promises did not moot Bais Yaakov's claims. Bais Yaakov's self-interest in appealing the denial of class certification might have been reason enough depending on how well Roper stands up in light of Genesis, see *Campbell-Ewald, 577 U.S. at 165* ("While a class lacks independent status until certified, a would-be class representative with a live claim of her own must be accorded a fair opportunity to show that certification is warranted." (citation omitted)), though we have now concluded the district court did not err in denying **[**32]** class certification. In any event, as Justice Thomas pointed out, at common law unconditionally offering funds while still denying liability is not a tender that requires the end of a lawsuit. *Id. at 170-71* (Thomas, J., concurring in the judgment). Most narrowly, the transmittal of an ordinary check does not differ for present purposes from an offer to pay: The recipient has a promise, but no funds. As the ancient proverb goes, "[t]here's many a slip 'twixt the cup and lip." 4 The Greek Anthology 21 (W.R. Paton trans., 1918). Indeed, the *Rule 68* offer at least conveys the ability to obtain a **[*95]** judgment, while the check conveys only a hope that the bank account will have the promised funds. Cf. *id. at 166* (majority opinion) (reserving judgment on whether a deposit of funds with the court and entry of judgment in the amount of those funds would moot the case); *id. at 186* & n.2 (Alito, J., dissenting).[4] So, as best we can tell, Bais Yaakov's damage claim is not moot.

Finally, there is Bais Yaakov's request for injunctive relief. We find no error in the district court's finding that ACT's cessation of sending faxes to Bais Yaakov since 2012, its deletion of Bais Yaakov's fax number from ACT's database, and its admission **[**33]** that any further faxing to ACT would render ACT liable, all combine to establish that ACT 's allegedly wrongful behavior as to Bais Yaakov "could not reasonably be expected to recur." *Bais Yaakov, 461 F. Supp. 3d at 4* (quoting *Am. C.L. Union of Mass., 705 F.3d at 55*).

Bais Yaakov makes no other argument that its individual claim for injunctive relief should survive if we both affirm the denial of class certification and find no error in the district court's finding that Bais Yaakov cannot reasonably be expected to receive any more faxes from ACT after eight years of silence and the express assurances tendered.

VI.

For the foregoing reasons, we affirm the district court's denial of class certification and its dismissal of the claim for injunctive relief. We otherwise vacate the judgment and remand for further proceedings.

Concur by: BARRON

Concur

BARRON, Circuit Judge, concurring. This case raises a question like the one that we confronted in *In Re Asacol Antitrust Litig., 907 F.3d 42 (1st Cir. 2018)*: Does *Federal Rule of Civil Procedure 23*'s predominance requirement permit certification of a class whose members could prove their claim -- at least in part -- only through individual testimony? It is easy enough to see why the answer might be, "No." How will common rather than individualized issues predominate after certification if each class member's claim depends on **[**34]** testimony as individualized as, to take this case as an example, whether the class member had expressly agreed to receive a fax from the defendant before the defendant sent it?

---

[4] Compare *Chen v. Allstate Ins. Co., 819 F.3d 1136, 1144-46 (9th Cir. 2016)* (reasoning that the defendant's deposit of the full amount of plaintiff's claims in an escrow account did not moot the plaintiff's claim since the plaintiff had not "actually or constructively received" the money), with *Leyse v. Lifetime Ent. Servs., LLC, 679 F. App'x 44, 48 & n.2 (2d Cir. 2017)* (summary order) (concluding that the district court properly entered judgment on the plaintiff's individual claim where the defendant deposited the full amount recoverable by the plaintiff with the clerk of court).

This case also results in the same answer to that question that we gave in Asacol: The class certification request must be denied on predominance grounds because the defendant has made a seemingly credible promise to challenge the testimony that each class member would give if required to do so at a trial on that issue. Thus, here, as there, we reject a class certification request on predominance grounds, despite the important role that a class action would play in making meaningful relief possible for the defendant's alleged wrongs.

It is safe to assume that our "predominance" holding in this case will not go unnoticed. District Court judges in our Circuit thoughtfully expressed the concern **[*96]** in the wake of Asacol that we had construed the predominance requirement there too strictly. See, e.g., *In re Loestrin 24 FE Antitrust Litig., 410 F. Supp. 3d 352, 403-04 (D.R.I. 2019)* (Smith, C.J.); *In re Intuniv Antitrust Litig., No. 1:16-cv-12396, 2019 U.S. Dist. LEXIS 141643, 2019 WL 3947262, at *7 n.8 (D. Mass. Aug. 21, 2019)* (Burroughs, J.). Our reliance on Asacol here may increase the concern that we are mistakenly construing the predominance requirement to render *Rule 23*, at least in certain important categories of cases, incapable **[**35]** of protecting "the rights of groups of people who individually would be without effective strength to bring their opponents into court at all." *Amchem Prods., Inc. v. Windsor, 521 U.S. 591, 617, 117 S. Ct. 2231, 138 L. Ed. 2d 689 (1997)* (quotation marks omitted); see also *In re New Motor Vehicles Canadian Exp. Antitrust Litig., 522 F.3d 6, 8 (1st Cir. 2008)* ("[A]n erroneous failure to certify a class where individual claims are small may deprive plaintiffs of the only realistic mechanism to vindicate meritorious claims.").

Nonetheless, I continue to think that our decision in Asacol was right, and I am in full agreement with my colleagues that it requires that we affirm the District Court's denial of the motion to certify the class in this case. I write separately, though, to emphasize the limits on the scope of our holding in Asacol and to explain how our holding in this case accords with them.

Asacol's limits are worth highlighting because they convince me that the concern that we are unduly cutting back on *Rule 23* through our construction of the predominance requirement is misplaced, or, at least, premature. The current state of our precedent does not preclude certification in cases in which the putative class members' claims depend on an individualized means of proof just because the defendant has vowed to challenge each class member's showing at trial if the request **[**36]** for class certification is granted. Instead, as I will explain, our precedent in this area leaves open various viable means by which a putative class can satisfy the predominance requirement in such cases even if the defendant makes that promise about its litigation strategy going forward.

I.

Before Asacol, we had decided a very similar case: *In re Nexium Antitrust Litig., 777 F.3d 9 (1st Cir. 2015)*. A review of Nexium's own limitations -- and how Asacol responded to them -- helps to place our precedent in this area in its proper context.

The named plaintiffs in Nexium were suing AstraZeneca, which was the holder of several patents related to the anti-heartburn drug Nexium, as well as several of its generic pharmaceutical competitors. *Id. at 13-14*. The named plaintiffs alleged that the defendants had violated state antitrust laws by entering into agreements not to compete with three generic drug manufacturers and that, as a result, AstraZeneca had overcharged for Nexium between 2008 and 2014. Id. The named plaintiffs also sought certification of a class consisting of all persons or entities who had purchased Nexium during that six-year period (with certain limitations unnecessary to enumerate here). *Id. at 14*.

The defendants objected to the **[**37]** certification of the proposed class on the ground that expert evidence showed that it contained "some number of brand-loyal consumers who would [have] continue[d] to purchase branded Nexium even when a generic bec[ame] available." *Id. at 20*. The defendants argued that "the [brand-loyalist issue] present[ed] problems that [the] plaintiffs [could not] overcome, for [the] plaintiffs ha[d] no methodology to identify . . . **[*97]** those consumers who would have switched to a generic version." Id. (first alteration in original).

The Nexium defendants were in part mounting a "categorical challenge" to the bid for class certification on the ground that "the hypothetical nature of the inquiry into [antitrust] injury . . . turned on what was necessarily speculation about a plaintiff's . . . [individual] purchasing preference." *Asacol, 907 F.3d at 59-60* (Barron, J., concurring). Nexium rejected that aspect of the defendants' challenge, because an individual class member could prove the defendant's anticompetitive conduct caused injury under the applicable state ***antitrust law*** through "testimony . . . that, given the choice, he or she would have purchased the generic." *Nexium, 777 F.3d at 20*.

Nexium explained that "[s]uch testimony, if unrebutted, would **[**38]** be sufficient to establish injury in an individual action." Id. It further explained that, because "[t]here cannot be a more stringent burden of proof in class actions than in individual actions," "similar testimony in the form of an affidavit or declaration would be sufficient in a class action" to prove the alleged antitrust injury. Id.

The Nexium defendants did also argue that the contemplated affidavits could not save the class certification request because, under *Rule 23*'s predominance requirement, "any mechanism of [proving injury] that requires determination of the individual circumstances of class members is improper." *Id. at 21*. But, Nexium rejected this ground for denying class certification as well.

Nexium emphasized that "the Supreme Court . . . and the circuits in other cases have made clear that the need for some individualized determinations at the liability and damages stage does not defeat class certification." Id. (citing *Amgen Inc. v. Conn. Ret. Plans & Tr. Funds, 568 U.S. 455, 469, 133 S. Ct. 1184, 185 L. Ed. 2d 308 (2013)*). Moreover, the defendants had not asserted that they would -- let alone that they feasibly could -- challenge the claims of antitrust injury, class member by class member, at trial in the event of class certification, as the defendants had not at any point **[**39]** asserted that they would challenge the class members' affidavits if submitted. See *Asacol, 907 F.3d at 52*.

Thus, although Nexium affirmed certification of the class at issue there, it did not hold that a putative class could always fend off a defendant's predominance-based challenge just by offering to submit affidavits previewing how the class members would testify at trial. Nexium held only that such affidavits could allow the putative class to defend against such a challenge to certification if the affidavits were unrebutted.

It was against this backdrop that we then decided Asacol. There, we once again addressed a request to certify a class made up of individuals claiming an injury under state antitrust laws premised on the defendants' allegedly anticompetitive efforts to keep a cheaper generic off the market. *Id. at 44-45*.

The proponents of class certification in Asacol invoked Nexium to explain why affidavits from members of the putative class attesting to their willingness to buy the generic would solve any predominance problem. See *id. at 52*. But, we concluded that Nexium did not support the certification request. See *id. at 52-53*.

We explained that the Asacol defendants had done exactly what the defendants in Nexium had not. **[**40]** In addition to putting forth expert evidence showing that some class members were brand loyal (though without identifying any specific individuals who were), the Asacol defendants had "expressly stated their intention to challenge **[*98]** any affidavits that might be gathered" from class members asserting that they would have bought the generic drug had they been given the choice to do so. *Id. at 52*.

We acknowledged that "'unrebutted testimony' . . . in an affidavit could be used prior to trial to obtain summary judgment, thereby efficiently and fairly removing the issue of injury-in-fact from the case for trial." Id. (quoting *Nexium, 777 F.3d at 21*). But, we pointed out, "[t]estimony that is genuinely challenged, certainly on an element of a party's affirmative case, cannot secure a favorable summary judgment ruling disposing of the issue." *Id. at 53* (emphasis added).

We thus concluded that it was dispositive of the predominance issue that those seeking class certification in Asacol had offered no response to the defendants' assertion that they intended to challenge any affidavits that might be produced by class members denying their brand loyalty. See *id. at 52-54*. The class would not be able to "rely on unrebutted testimony in affidavits to **[**41]** prove injury-in-fact" as the case unfolded post-certification. *id. at 53*.

That being so, the contemplated affidavits could not preclude the need for mini-trials on the merits of the disputed issue concerning injury. It therefore followed that the putative class could not rely on the affidavits to surmount the defendants' predominance-based objection to class certification, given the number of plaintiffs who seemingly would have had to take the stand post-certification if the defendants pressed their *Seventh Amendment* and due process rights to the end. See id.

Asacol was no more categorical in denying certification on predominance grounds, however, than Nexium had been in granting certification in the face of a predominance challenge. Asacol did hold that the predominance requirement could not be satisfied in the face of a defendant's asserted intent to press its rights all the way through trial. But, it did so in a case in which the putative class had offered no basis for deeming that threat to be, in effect, an empty one. See *id. at 61* (Barron, J., concurring) ("[T]he plaintiffs do not argue that the defendants would be incapable of mounting effective challenges to any, let alone to most, of the plaintiffs' affidavits **[**42]** at summary judgment. Nor may we conclude that the plaintiffs would only need to rely on individualized proof of injury for a small identifiable subset of the class . . . .").

In light of this important limitation on Asacol's holding, its primary significance in my view is not to be found in the outcome in that specific case. It is to be found in the structure of the inquiry that it required a district court to undertake in every case in which it must determine whether a putative class can satisfy the predominance requirement.

Asacol makes clear that to assess predominance a district court must consider, in a realistic but rigorous manner, how a trial would proceed in the event of certification. Asacol thus requires a district court, in undertaking that assessment, to make a prediction about what would happen post-certification if the defendant were to follow through and challenge the claims of the putative class members by asking whether certification would result in, as we put it then, inefficiency (which "can be pictured as a line of thousands of class members waiting their turn to offer testimony and evidence on individual issues") or unfairness (which can be "pictured as an attempt **[**43]** to eliminate inefficiency by presuming to do away with the rights a party would customarily have to raise plausible individual challenges on those issues"). *Id. at 51-52*.

[*99] Importantly, then, Asacol leaves open the possibility that a district court's predictive assessment might not paint the concerning picture of how the post-certification litigation would unfold (even assuming no settlement) that would preclude certification of a class on predominance grounds. Accordingly, I understand Asacol to leave open the possibility that the predominance requirement might be met even in a case involving a claim in which the members of the putative class must rely on a means of proof that is individualized.

II.

We come, then, to the case at hand. Here, we once again conclude on predominance grounds that the proposed class cannot be certified. But, in doing so, we break no ground that Asacol did not already break.

As in Asacol, the claim of class members in this case depends on knowledge that is specific to each one: here, whether the class member provided advance permission to receive the kind of fax at issue. As in Asacol, the defendant in this case has vowed to contest each class member's claim on that highly **[**44]** individualized issue, thereby suggesting that each such member will have to provide individualized testimony -- one by one -- at trial on it. And, as in Asacol, the proponent of class certification here has not explained how the evidentiary realities on the ground undermine the defendant's assertion that it can force a trial on the disputed issue as to each class member.

Indeed, if anything, the defendant's promise to contest the class-member testimony at trial post-certification is even more credible here than it was in Asacol. It comes supported by affidavits of the defendant's own from class members. Yet, the proponent of certification, Bais Yaakov, has failed to identify a persuasive ground for doubting the defendant's showing that a stream of mini-trials likely awaits on the other side of certification.

True, Bais Yaakov contests the significance of the undisputed evidence that thousands of schools had asked for ACT to send them publications while supplying it with a fax number. Bais Yaakov responds that, because the recipient's prior consent to receiving a faxed advertisement is an affirmative defense that the defendant bears the burden of proving, that evidence does not suffice **[**45]** to show that issues of consent would have to be adjudicated class member by class member at trial. Bais Yaakov relies for that contention on the TCPA's requirement that the defendant show that there was express permission given in advance applicable to each advertisement that it faxed.

It is far from clear that requirement in the TCPA would spare an individualized inquiry into the nature of a class member's relationship to ACT. But, even if we assume that the TCPA makes the bar for establishing the express-permission defense as high as Bais Yaakov construes it to be, there remains the fact that ACT. has introduced affidavits from seventy-odd schools to bolster its predominance case. ACT. contends that those affidavits show that those schools did expressly consent to the receipt of such faxes when they requested publications from ACT. while supplying their fax numbers to it.

Bais Yaakov does not attempt in response to make anything of the fact that these affidavits concern only seventy-odd schools -- and thus merely "a small identifiable subset of the class's members."[5] *In* ***[*100]*** *re Asacol Antitrust Litig., 907 F.3d 42, 61 (1st Cir. 2018)* (Barron, J., concurring). For example, Bais Yaakov makes no argument that ACT "would be incapable of mounting effective **[**46]** challenges" to a non-de minimis number of class members' claims, id. (Barron, J., concurring), because speculation alone supports the notion that ACT would be able to obtain either additional affidavits beyond those that it has produced or any similar evidence that could suffice to create a genuine issue of disputed fact as to whether those class members consented to receiving the faxes, *id. at 53* ("Nor have the plaintiffs provided any basis from which we could conclude that the number of affidavits to which the defendants will be able to mount a genuine challenge is so small that it will be administratively feasible to require those challenged affiants to testify at trial."); see also *id. at 52-53* ("Nor do plaintiffs point to any basis in the record for deeming all such challenges [by the defendants] to be so implausible as to warrant a finding that we can consider the issue to be uncontested.").

In fact, Bais Yaakov's only argument with respect to the affidavits from school officials is that none shows that even those officials' own schools gave the requisite prior express permission. But, as we explain, that contention is not tenable, given what those affidavits indisputably show.

As a result, much like **[**47]** in Asacol itself, the proponent of certification here has failed to explain how the claim of each class member could be dealt with post-certification in a manner that would not be "inefficient or unfair." *Id. at 51*. Thus, because the proponent of class certification bears the burden of satisfying the predominance requirement, *In re Nexium Antitrust Litig., 777 F.3d 9, 18 (1st Cir. 2015)*, we must reject this request for class certification just as we rejected the one in Asacol.

III.

For the reasons set forth above, it is clear to me that our decision today does not extend Asacol beyond its own limits. But, I do think it is important not to lose sight of the reasons for those limits. Attending to them will ensure that neither Asacol nor this case is understood to impose a greater bar to class certification than it does.

For one thing, I understand the limited nature of Asacol's predominance holding to reflect a recognition that even in an individual action involving a claim that necessarily depends on individualized testimony, the plaintiff may be able to secure summary judgment in her favor based on an affidavit previewing that testimony. After all, a defendant in an individual action cannot defeat a motion for summary judgment predicated on an affidavit **[**48]** previewing the plaintiff's testimony merely by asserting that it will contest that testimony at trial. See *In re Asacol Antitrust Litig.,*

---

[5] ACT's records indicate that it sent more than 28,355 fax advertisements between June 30, 2008, and June 30, 2012. *Bais Yaakov of Spring Valley v. ACT, Inc., 328 F.R.D. 6, 9 (D. Mass. 2018)*.

907 F.3d 42, 53 (1st Cir. 2018). The defendant must make a showing at the summary judgment stage that suffices to put the contents of the plaintiff's affidavit in doubt. See Triangle Trading Co. v. Robroy Indus., 200 F.3d 1, 2 (1st Cir. 1999) (explaining that "[c]onclusory allegations, improbable inferences, and unsupported speculation" cannot give rise to a genuine issue of disputed fact (quoting Smith v. F.W. Morse & Co., 76 F.3d 413, 428 (1st Cir. 1996))).

For another thing, I understand the limited nature of Asacol's predominance holding to reflect a recognition that a class cannot be held to a higher standard in moving for summary judgment than the **[*101]** standard to which its members would be held in moving for summary judgment in individual actions of their own. See id. at 52; Nexium, 777 F.3d at 20 ("There cannot be a more stringent burden of proof in class actions than in individual actions."); see also Tyson Foods, Inc. v. Bouaphakeo, 577 U.S. 442, 456-57, 136 S. Ct. 1036, 194 L. Ed. 2d 124 (2016) (allowing a class to rely on representative statistical evidence because each member "likely would have had to introduce [that] study" if the members "had proceeded with 3,344 individual lawsuits"). Thus, I understand Asacol to recognize that, if an individual class member could win at summary judgment on an issue dependent on individual testimony and central to **[**49]** the claim in her own individual action, that class member also could do so on the strength of that same showing as a member of a class made up of numerous individuals.

Accordingly, I understand Asacol to be in line with our prior precedent recognizing that when a district court assessing predominance "supportably finds that an issue which, in theory, requires individualized factfinding is, in fact, highly unlikely to survive typical pretrial screening (such as a motion to strike or a motion for summary judgment), a concomitant finding that the issue neither renders the case unmanageable nor undermines the predominance of common issues generally will be in order." Waste Mgmt. Holdings, Inc. v. Mowbray, 208 F.3d 288, 298 (1st Cir. 2000) (emphasis added).[6] After all, due to the lack of any need for a "mini-trial on the issue" in that circumstance, Amgen Inc. v. Conn. Ret. Plans & Tr. Funds, 568 U.S. 455, 477, 133 S. Ct. 1184, 185 L. Ed. 2d 308 (2013), the concerning picture that Asacol paints of long lines of plaintiffs waiting to give testimony at the courthouse will fade to black.

Because of this understanding of Asacol, I do not read it to hold that a putative class may surmount a defendant's predominance-based challenge to certification only by showing that class members are entitled to invoke a presumption in their favor on the individualized aspect **[**50]** of their claim that the defendant vows to dispute at trial. Asacol did recognize that in Halliburton Co. v. Erica P. John Fund, the Supreme Court relied on the existence of such a legal presumption in rejecting a predominance-based challenge to certification, see Asacol, 907 F.3d at 53 (citing Halliburton, 573 U.S. 258, 134 S. Ct. 2398, 189 L. Ed. 2d 339 (2014)). And, in rejecting the request for class certification in Asacol, we did note that the putative class members there were not entitled to any presumption regarding their willingness to purchase a generic under the state antitrust laws that supplied their causes of action. Id.

But, a closer look at Halliburton's logic suggests that the entitlement to invoke a presumption like the one that applied there may not be a prerequisite to a putative class satisfying the predominance requirement in the face of a defendant's assertion that the putative class's underlying **[*102]** claim can be proved only through individualized testimony from each class member. Nor does Asacol, as I read it, indicate that it adopted a different understanding of Halliburton on that score.

The Supreme Court in Halliburton considered a request for certification of a class of those alleging that Halliburton Co. had violated section 10(b) of the Securities Exchange Act of 1934 **[**51]** and Securities and Exchange Commission Rule 10b-5 by making a series of material misrepresentations to try to inflate its stock price. 573 U.S.

---

[6] It is worth noting that the inquiry that I contemplate a district court undertaking here is not particularly novel, even in the class action context. As to any request to certify a class, the district court must assess whether the class definition is sufficiently "definite" so as to "allow the class members to be ascertainable." Nexium, 777 F.3d at 19. In Nexium, we concluded that the proposed class "satisfie[d] th[at] standard[] by being defined in terms of purchasers of Nexium during the class period," id., even though the determination of whether any particular individual falls within that class is an inherently individualized one that the defendants there in theory could have contested. Yet, we expressed no concern -- and no one argued -- that this feature of the inquiry on its own automatically destroyed the efficiencies that make class actions a valuable procedural device.

at 264. The Court had held in a prior case, Basic Inc. v. Levinson, 485 U.S. 224, 108 S. Ct. 978, 99 L. Ed. 2d 194 (1988), that "requiring . . . direct proof of reliance [in such an individual securities fraud action] 'would place an unnecessarily unrealistic evidentiary burden on the [investor],'" because the investor would "have to 'show a speculative state of facts, i.e., how he would have acted . . . if the misrepresentation had not been made.'" Halliburton, 573 U.S. at 267 (fourth alteration in original) (quoting Basic, 485 U.S. at 245). Basic thus had held that investors could "invok[e] a presumption that a public, material misrepresentation will distort the price of stock traded in an efficient market, and that anyone who purchases the stock at the market price may be considered to have done so in reliance on the misrepresentation." Id. at 283-84.

The putative class in Halliburton pointed to this presumption of reliance as a reason to reject the predominance-based challenge to class certification that the defendants were pressing in that case. See id. at 265-66. The notion was that the crucial issue of class member reliance on the defendants' alleged misinformation could be proved on a class-wide basis **[**52]** -- rather than class member by class member through individualized testimony at trial -- in consequence of the presumption of reliance that Basic had recognized each class member was entitled to invoke. See id. at 267-68.

In considering that contention, Halliburton did note that there were features of the presumption that arguably favored the defendants' position regarding predominance. For example, "Basic [had] emphasized that the presumption of reliance was rebuttable rather than conclusive," id. at 268, and that a defendant could defeat that presumption by making "[a]ny showing that severs the link between the alleged misrepresentation and either the price received (or paid) by the plaintiff, or [the plaintiff's] decision to trade at a fair market price," id. at 269 (first alteration in original) (quoting Basic, 485 U.S. at 248).

But, the Court ultimately held that there was no predominance-based reason to deny class certification. The defendant's "opportunity to rebut the presumption of reliance" on an "individual" basis did have, according to the Court, "the effect of 'leav[ing] individualized questions . . . in the case.'" Id. at 276 (first alteration in original) (quoting id. at 295 (Thomas, J., concurring in the judgment)). Nevertheless, the Court explained, **[**53]** that was "no reason to think that these questions w[ould] overwhelm common ones." Id. For, while the Court acknowledged that a defendant might be able to show that an individual class member "would have bought or sold the stock even had he been aware that the stock's price was tainted by fraud," id. at 269, it determined that the prospect "[t]hat the defendant might attempt to pick off the occasional class member here or there through individualized rebuttal **[*103]** does not cause individual questions to predominate." Id. at 276.

Halliburton in this respect may be understood to have determined that it would be -- to use our own way of putting the point -- "highly unlikely" that a defendant would have much luck puncturing an otherwise unrebutted case for finding investor reliance in such a securities fraud case. See Waste Mgmt. Holdings, Inc., 208 F.3d 288, 298 (1st Cir. 2000). But, if so, then there is no reason why, in principle, a court could not make a similar assessment based on the prospect of affidavits previewing class member testimony in certain types of case in which no such presumption applies.

Of course, the defendant in a case of that kind would still have the "opportunity," Halliburton, 573 U.S. at 276, to make a responsive showing that would suffice to establish at the certification stage **[**54]** that after certification were granted it would be able to create a genuine dispute of material fact as to the putative class members' claims, despite the affidavits previewing their testimony on the critical issue. But, the defendants in Halliburton had a similar opportunity in that case to cast doubt on the putative class members' claims -- supported by the presumption recognized in Basic -- to have relied on misleading investment information. And yet the Court did not think that bare possibility a reason to conclude that individualized issues would predominate, as it implicitly predicted that it would be difficult for a defendant to produce evidence that could cast doubt on the reliance of more than "the occasional class member here or there." Id.

Of course, even when the putative class points to the affidavits from class members that it could use to secure summary judgment on the disputed issue, the defendant may well find it quite easy at the certification stage to demonstrate that there is a predominance problem nonetheless. A defendant might have business records that suffice to permit it to do just that. Or, it might even have affidavits from putative class members -- as ACT **[**55]** has here -- that are representative of more than a de minimis chunk of the class and that thus would suffice to put a substantial number of the class members' own affidavits in doubt.

In other cases, though, a defendant might turn out to have a difficult time identifying evidence of that kind at the certification stage. Halliburton itself is, of course, an example of a case in which, by virtue of a strong presumption, that was so. But, even in a case involving a claim akin to the ones in Nexium or Asacol, for which no similar presumption applies, it may not be easy for the defendant to demonstrate that there is a predominance problem.

A plaintiff's representation about how it would have acted if the world had been different than it was (such as a consumer's testimony about whether she would have purchased a generic drug cheaper than the brand-named one that she had previously used) is, by its nature, not easily undermined. It is thus not clear to me how a defendant could show that it would be able to genuinely challenge such a representation post-certification if faced with the prospect of affidavits from class members attesting to something so peculiarly within their own knowledge.

[56]** True, a defendant in a case similar to Asacol could respond to the prospect of affidavits disclaiming brand loyalty by pointing to class members' health plan purchasing records. But such documents might merely highlight that a class defined by price-sensitive health plans -- indicating a lack of brand loyalty -- would still be a viable one. See *Asacol, 907 F.3d at 61* (Barron, J., concurring).

[*104] I also do not understand our precedent to this point to establish that a defendant's invocation of expert statistical evidence about the presence of uninjured class members materially changes the analysis that a district court must undertake. In Asacol, the district court did find based on expert testimony that approximately ten percent of the putative class was brand loyal and thus uninjured, *907 F.3d at 46-47*, and we then held that this evidence indicated that the inherently individualized issue of brand loyalty presented a predominance concern, given the "needle in a haystack" problem, *id. at 61* (Barron, J. concurring). But, we did not go on to suggest that such statistical evidence sufficed on its own to establish that the individual class members would not have been able to obtain summary judgment as to the issue of brand loyalty had they introduced affidavits attesting that they would have been willing to buy the cheaper generic if it had been available. Such statistical evidence would neither have established that any single class member was personally brand loyal nor even provided a basis for finding by a preponderance that any **[**57]** one of them was. See *Nexium, 777 F.3d at 20*; see also *Tyson Foods, Inc. v. Bouaphakeo, 577 U.S. 442, 458, 136 S. Ct. 1036, 194 L. Ed. 2d 124 (2016)* (explaining that the introduction of representative evidence in *Wal-Mart Stores, Inc. v. Dukes, 564 U.S. 338, 131 S. Ct. 2541, 180 L. Ed. 2d 374 (2011)*, "would have violated the Rules Enabling Act by giving plaintiffs and defendants different rights in a class proceeding than they could have asserted in an individual action"); cf. Charles Nesson, The Evidence or the Event? On Judicial Proof and the Acceptability of Verdicts, *98 Harv. L. Rev. 1357, 1378-80 (1985)* (explaining the "blue bus hypothetical," in which a plaintiff loses in his suit against the Blue Bus Company before reaching the jury because a "factfinder c[ould] only conclude from the plaintiff's evidence that there was an 80% chance that he was injured by the Blue Bus Company and a 20% chance that he was not").

IV.

I do not seek here to define with any precision the showing at the certification stage that a defendant must make in the face of an assertion by the proponent of certification that common questions will predominate. I also do not seek here to define precisely the showing that the certification proponent must make to rebut the defendant's contention that common issues will not. Nor, finally, do I mean to catalog the specific types of cases that are more or less susceptible to being challenged on predominance **[**58]** grounds.

The reviewing court's task when it comes to the predominance requirement is to make a reasoned judgment about how the litigation would proceed in the event of certification. It must make that judgment by predicting how many individual mini-trials would be required if the class were certified, which in turn entails a forecast about whether it is "highly unlikely" that the defendant will be able to stave off a post-certification motion for summary judgment. *Waste Mgmt. Holdings, Inc., 208 F.3d 288, 298 (1st Cir. 2000)*. The showing required of both the putative class and the defendant at the certification stage as to predominance thus will necessarily vary from case to case, in line with the nature of the underlying claim and the type of issue that it requires class members to prove through individualized showings. The summary judgment standard is such that I do not hazard more categorical observations.

Still, the showings must have enough substance to them to permit the court to engage meaningfully in the required predictive **[*105]** exercise. And, in determining how much substance is enough, it is important to keep in mind both that the district court's judgment on that score is entitled to deference, see *In re Asacol Antitrust Litig., 907 F.3d 42, 51 (1st Cir. 2018)* (reviewing the certification decision **[**59]** for abuse of discretion), and that a certifying court will have an opportunity to revise that determination if in reality proceeding as a class proves unworkable, *Gen. Tel. Co. of Sw. v. Falcon, 457 U.S. 147, 160, 102 S. Ct. 2364, 72 L. Ed. 2d 740 (1982)* ("Even after a certification order is entered, the judge remains free to modify it in the light of subsequent developments in the litigation.").

It is also important to keep in mind that we have never indicated that, in a case where affidavits from class members are required to show that they can prove their claim, it would be an abuse of discretion for a district court to certify a class unless the putative class has already in fact collected and introduced those affidavits into the record. See *In re Nexium Antitrust Litig., 777 F.3d 9, 20-21, 24 (1st Cir. 2015)*. Nor is there anything in our case law to indicate that a defendant must actually collect and introduce at the certification stage all of the evidence on which it would rely in the merits phase, including the evidence it would introduce in order to oppose summary judgment. Indeed, I would be concerned that requirements to that effect would conflict with the principles that undergird *Rule 23(b)(3)*, and upset the careful balance that the (b)(3) class action procedure strikes between efficiency of litigation and fidelity to a defendant's due process **[**60]** and *Seventh Amendment* rights. See *Asacol, 907 F.3d at 51-52*; see also *Fed. R. Civ. P. 23* advisory committee's note to 1966 amendment ("*Subdivision (b)(3)* encompasses those cases in which a class action would achieve economies of time, effort, and expense, and promote uniformity of decision as to persons similarly situated, without sacrificing procedural fairness or bringing about other undesirable results.").

That said, a review of the state of our precedent in this area reveals to me that there is still much to be decided when it comes to the predominance requirement, notwithstanding our important holdings to date establishing the applicable framework that must be used to decide future cases implicating it. For that reason, while I join the majority in full in affirming the District Court's denial of certification for this class, just as I joined the majority in Asacol itself, I think it important to emphasize here, as I thought it important to emphasize there, the limited nature of our holding in this case. For, I am confident that, as a consequence of this decision, our current precedent in this area continues to ensure that viable opportunities remain for securing class certification in cases involving claims that inherently depend on highly individualized **[**61]** means of proof, no matter how intently a defendant may represent at the certification stage that it wishes to contest those means at any trial that might ensue.

Opinion by: Catherine C. Eagles

Opinion

ORDER GRANTING FINAL APPROVAL OF CLASS ACTION SETTLEMENT

This matter is before the Court on motion by Plaintiff Dr. Lucia Binotti for final approval of a class action settlement with Duke University ("Duke"). A final fairness hearing at which counsel for all parties and Class Members had an opportunity to appear was held on August 25, 2019. The Court having considered the motion, all other papers filed concerning that motion, and all other pertinent documents and pleadings, and counsel and all interested parties having been **[*2]** heard at a final fairness hearing, **GRANTS** Plaintiff's motion, enters final judgment, and dismisses this action with prejudice.

FACTORS FOR CLASS CERTIFICATION

The proposed Settlement Class is defined as:

> All natural persons employed by Duke University or the University of North Carolina, Chapel Hill from October 1, 2001 through February 5, 2018, as a faculty member. Excluded from the Class are: members of the boards of directors and boards of trustees, boards of governors, senior administrators of Duke and UNC, unpaid faculty, and faculty with an academic appointment at the School of Medicine; and any and all judges and justices, and chambers' staff, assigned to hear or adjudicate any aspect of this litigation.

Doc. 58 at 4-5.

When a settlement is reached before *Rule 23* certification, a class may be certified solely for the purposes of settlement. *Covarrubias v. Capt. Charlie's Seafood, Inc., No. 2:10-CV-10-F, 2011 U.S. Dist. LEXIS 72636, 2011 WL 2690531, at *2 (E.D.N.C. July 6, 2011)*.

The parties seeking class certification must meet the four prerequisites of *Federal Rules of Civil Procedure 23(a)(1) through (4)*: numerosity, commonality, typicality, and adequacy. *Fed. R. Civ. P. 23(a)*; *Cerrato v. Durham Pub. Sch. Bd. of Educ., No. 1:16CV1431, 2017 U.S. Dist. LEXIS 216318, 2017 WL 2983301, at *2 (M.D.N.C. Mar. 17, 2017)*. The Court will certify the class for purposes of settlement.

First, the Settlement Class—which has over 15,000 members—is so numerous that joinder of all members is impracticable.

Second, commonality is satisfied because **[*3]** the common question of whether Duke and UNC entered into an unlawful agreement is "dispositive and over-shadow[s] other issues." *Lienhart v. Dryvit Sys., Inc., 255 F.3d 138, 146 (4th Cir. 2001)*. Specifically, the following major factual and legal issues are common to the Settlement Class: whether Duke and UNC entered into a no-poach agreement restraining recruitment and hiring, the agreement's scope and duration, and its effect on compensation.

Third, Dr. Binotti—who has worked as a non-medical faculty member at UNC since 1990, Doc. 1 at ¶ 9, and allegedly was paid less during the Class Period as a result of the alleged agreement—has claims that are typical of the Settlement Class. *Deiter v. Microsoft Corp., 436 F. 3d 461, 466 (4th Cir. 2006)* ("[A] class representative must be part of the class and possess the same interest and suffer the same injury as the class members."). Dr. Binotti shares with the Settlement Class Members the same alleged injuries arising from the same alleged conduct: suppression of their compensation due to the alleged no-poach agreement.

Lastly, Dr. Binotti adequately represents the class. "The adequacy inquiry . . . serves to uncover conflicts of interest between named parties and the class they seek to represent." *Amchem Prod., Inc. v. Windsor, 117 S. Ct. 2231, 2250 (1997)*. The Court has carefully evaluated whether Dr. Binotti adequately **[*4]** represents the Class, as intra-class conflicts may arise where, as here, some of the Class claims are potentially time-barred, if the settlement value of one set of claims (e.g., "timely" or "time-barred") is substantially higher than the other. *See* *In re Cmty. Bank of N. Va. Mortg. Lending Pracs. Litig., 795 F.3d 380, 389 (3d Cir. 2015)*; *In re Corrugated Container Antitrust Litig., 643 F.2d 195, 220 (5th Cir. 1981)*. However, a conflict will only defeat the adequacy requirement if it is fundamental. *Sharp Farms v. Speaks, 917 F.3d 276, 295 (4th Cir. 2019)*. A conflict is not fundamental if all class members: (1) "share common objectives and the same factual and legal positions," and (2) have the same interest in proving the defendant's liability. *Id.* (citation omitted). Here, Dr. Binotti and the Class have the same interest in proving that Duke's conduct violated antitrust laws and suppressed compensation and mobility as a result. *See* *In re Ins. Brokerage Antitrust Litig., 579 F.3d 241, 272-73 (3d Cir. 2009)* (rejecting a time-period conflict argument because the class members "shared a unified interest" in establishing liability). There is nothing to indicate that any unnamed Class Members would assert a different legal or factual position to prove Duke's liability or to measure the damages resulting from the alleged conspiracy. *See* *Sharp Farms, 917 F.3d at 295* (holding a fundamental conflict existed where, because of divergent legal theories, the settlement "would provide broader relief to [part of] **[*5]** the settlement class at the expense of [other] class members . . .."). Approximately 95% of Class Members have claims in both periods, Doc. 51 at ¶ 4, and share Dr. Binotti's interest in maximizing damages for both periods. Moreover, the adequacy of the settlement does not rest only on the value of one set of claims; each set of claims had strengths and weaknesses and after careful investigation and consideration, Dr. Binotti and her counsel concluded that that there was no basis to value the claims of one period differently than the other. Doc. 49-1 at ¶¶ 5-6. There appears to be a reasonable and rational basis to distribute the settlement funds evenly throughout the Class Period, as proposed in the Settlement Agreement. *See* *Boyd v. Coventry Health Care Inc., 299 F.R.D. 451, 461 (D. Md. 2014)* ("The proposed allocation need not meet standards of scientific precision, and given that qualified counsel endorses the proposed allocation, the allocation need only have a reasonable and rational basis.") (citation omitted); *see also* *In re Corrugated Container Antitrust Litig., 643 F.2d at 220* (suggesting circumstances in which an "even spread" across two time periods might be appropriate). Considering the percentage of Class Members with claims in both periods and the similar valuation of the claims, any intra-class **[*6]** conflict arising from the fact that the Class Period covers "timely" and "time-barred" claims is minimal and is not a fundamental conflict sufficient to defeat the adequacy requirement at this stage.

Class certification is therefore appropriate if the predominance and superiority requirements of *Rule 23(b)(3)* are satisfied. *Fed. R. Civ. P. 23(b)(3)*. First, "questions of law or fact common to class members [must] predominate over any questions affecting only individual members . . .." *Id.* Second, "a class action [must be] superior to other available methods for fairly and efficiently adjudicating the controversy." *Id.* In settlement-only certification cases, "a district court need not inquire whether the case, if tried, would present intractable management problems, see *Fed. Rule Civ. P. 23(b)(3)(D)*, for the proposal is that there be no trial." *Windsor, 117 S. Ct. at 2248*.

a. Here, predominance is met because the significant legal and factual questions pertinent to the underlying cause of action that can be answered with common proof and without individual inquiries include (1) whether Duke entered an agreement violating the ***antitrust law***; (2) whether the agreement injured Plaintiff and the Class; and (3) whether damages can be measured through a common method. *See* *In re Titanium Dioxide Antitrust Litig., 284 F.R.D. 328, 344 (D. Md. 2012)*. The same **[*7]** is true for impact and damages. Proof of injury is not individualized, it instead depends on a common theory that pay structures at Duke and UNC were systematically suppressed, thus affecting all class members.

b. Superiority is also satisfied. Class treatment of the legal issues identified in this case would be superior to other procedures for the handling of the claims. No other litigation concerning this matter and filed by any of the parties involved in the present action is currently pending. Furthermore, this Court has a substantial interest in the resolution of the issues raised in this litigation occurring in a single forum.

Based on these findings and reasons, the Court hereby certifies the Settlement Class under *Rule 23(b)(3)*.

The Court hereby appoints Dr. Binotti and her counsel as Settlement Class Representative and Settlement Class Counsel.

Appointment of Dr. Binotti as Settlement Class Representative is appropriate because she is a member of the Settlement Class, she has adequately represented the interests of the Settlement Class in the past, and there is nothing to indicate that she will be unable to represent those interests in the future.

Appointment of Lieff, Cabraser, Heimann & Bernstein, **[*8]** LLP (LCHB), Elliot Morgan and Parsonage, P.A. (EMP), and Edelstein & Payne (EP) as Settlement Class Counsel is appropriate. In evaluating the appointment of class counsel, courts must consider: (i) counsel's work in identifying or investigating claims; (ii) counsel's experience in handling the types of claims asserted; (iii) counsel's knowledge of the applicable law; and (iv) the resources that counsel will commit to representing the class. *Fed. R. Civ. P. 23(g)(1)(A)*.

Counsel's work in identifying and investigating the claims at issue in this action dates back many years. *See* Doc. 49-1 at ¶ 8, Doc. 41 at ¶ 13. LCHB and EMP successfully negotiated a settlement for the medical faculty at UNC and Duke in *Seaman v. Duke University*, No. 1:15-cv-00462 (M.D.N.C.), an action arising out of the same alleged no-poach agreement. Doc. 41 at ¶ 13; Doc. 49-1 at ¶¶ 8. Through discovery in that litigation, counsel obtained documentary evidence and elicited witness testimony revealing the alleged agreement stretched beyond the medical schools. Doc. 41 at ¶ 13.

Second, LCHB, EMP, and EP have significant experience handling class actions, including antitrust and employment class actions. Doc. 44 at ¶¶ 3-12; Doc. 43 at ¶¶ 3-7.

Third **[*9]** and relatedly, LCHB, EMP, and EP have demonstrated their knowledge of the applicable law by successfully negotiating a Settlement here and the *Seaman* settlement and by successfully defending against part of Duke's motion for judgment on the pleadings, despite the unsettled case law underlying some of its theories for proving liability. Doc. 33 at 3-4. Counsel thereafter renewed settlement discussions with Duke, recognizing the risks of litigation for both sides. Doc. 49-1 at ¶¶ 11-13.

Fourth, LCHB, EMP, and EP have devoted ample resources to litigating this action and to negotiating the Settlement. *Id.* at ¶¶ 9-13; Doc. 43 at ¶¶ 8-9; Doc. 44 at ¶¶ 13-14.

FACTORS FOR FINAL APPROVAL OF CLASS ACTION SETTLEMENT

1. Dr. Binotti's motion for final approval of the proposed Settlement is **GRANTED**.

Unless otherwise defined herein, all terms that are capitalized herein shall have the meanings ascribed to those terms in the Settlement Agreement.

The Court makes the following FINDINGS under *Federal Rule of Civil Procedure 23*:

a."It has long been clear that the law favors settlement." *United States v. Manning Coal Corp., 977 F.2d 117, 120 (4th Cir. 1992)*. This is particularly true in class actions. *Reed v. Big Water Resort, LLC, No. 2:14-cv-101583-DCN, 2016 U.S. Dist. LEXIS 187745, 2016 WL 7438449, at *5 (D.S.C. May 26, 2016)* (noting the "strong judicial policy in favor of settlements, particularly in the class action context" (citation **[*10]** omitted)); 4 William B. Rubenstein et al., *Newberg on Class Actions* § 13.44 & n.1 (5th ed. 2018) ("*Newberg*") (collecting cases).

The Court previously granted preliminary approval of the Settlement, finding that it was fair, reasonable, and adequate, and that the Court was likely to grant final approval of the Settlement pursuant to *Federal Rule of Civil Procedure 23(e)(2)*. *See* Doc. 55. Accordingly, notice to the Class was distributed on June 28, 2021, pursuant to the Court-approved notice plan. Doc. 65 ¶ 3. The Class had 30 days to object or, if eligible, to opt-out of the Settlement. There was only one objection and only 8 Class Members opted out. Supp. Decl. of Amy Fringer, Doc. 68 ¶ 4; Second Supp. Decl. of Amy Fringer, Doc. 70-4 ¶ 2. "[T]aking account all of the information learned during [the notice process], the court [now] decides whether or not to give 'final approval' to the settlement." *Newberg* § 13:1.

A class settlement may be approved if it is "fair, reasonable, and adequate." *Fed. R. Civ. P. 23(e)(2)*; *In re Jiffy Lube Sec. Litig., 927 F.2d 155, 158-59 (4th Cir. 1991)*. "In applying this standard, the Fourth Circuit has bifurcated the analysis into consideration of fairness, which focuses on whether the proposed settlement was negotiated at arm's length, and adequacy, which focuses on whether the consideration **[*11]** provided the class members is sufficient." *Beaulieu v. EQ Indus. Servs., Inc., No. 5:06-CV-00400BR, 2009 U.S. Dist. LEXIS 63574, 2009 WL 2208131, at *23 (E.D.N.C. July 22, 2009)* (citing *Jiffy Lube, 927 F.2d at 158-59*).

A four-factor test is applied to determine the fairness of a proposed settlement: "(1) the posture of the case at the time the proposed settlement was reached, (2) the extent of discovery that had been conducted, (3) the circumstances surrounding the settlement negotiations, and (4) counsel's experience in the type of case at issue." *2009 U.S. Dist. LEXIS 63574, [WL] at *24*.

All four fairness factors favor approval here, as the Court held at preliminary approval. *See* Doc. 55 at 11-12. The Settlement was reached after adversarial litigation, including Duke's Motion for Judgment on the Pleadings, which involved complex questions of law prompting the Court to grant permission for the Parties to supply supplemental briefing. Docs. 28, 32. Further, Class Counsel's work in the *Seaman* litigation set the stage for these settlement negotiations. Class Counsel also retained qualified economic experts to estimate the extent to which the alleged misconduct suppressed Class pay. Doc. 41 at ¶ 5. Counsel for both sides had sufficient information to evaluate the costs and benefits of settlement at this juncture. The parties' negotiations were adversarial and at arm's-length. The negotiations **[*12]** were facilitated through the capable work of a neutral third-party mediator, Jonathan Harkavy.

Finally, counsel for Dr. Binotti have extensive experience in antitrust and class action litigation, and their informed opinion is entitled to weight.

The Court assesses the adequacy of the Settlement through the following factors: "(1) the relative strength of the plaintiffs' case on the merits, (2) any difficulties of proof or strong defenses the plaintiffs would likely encounter if the case were to go to trial, (3) the expected duration and expense of additional litigation, (4) the solvency of the defendants and the probability of recovery on a litigated judgment, and (5) the degree of opposition to the proposed settlement." *Beaulieu, 2009 U.S. Dist. LEXIS 63574, 2009 WL 2208131, at *26* (citing *Jiffy Lube, 927 F.2d at 158*; *Horton v. Merrill Lynch, Pierce, Fenner & Smith, Inc., 855 F. Supp. 825, 828-29 (E.D.N.C. 1994)*).

As to the first and second factors, Dr. Binotti has adequately explained both the strengths and risks associated with continued litigation of her claims and trial. In particular, though Dr. Binotti had evidence of liability, Duke was prepared to introduce contrary evidence that the alleged no-poach agreement either did not exist or was not in force during the Class Period. Settlement is also favorable at this stage given the Court's decision that the claims **[*13]** for damages before 2016 are barred by the statute of limitations, Doc. 33 at 2, 4-5, and for damages after 2016, the Class would face the challenge of persuading a jury that Duke and UNC continued their alleged no-poach agreement even after Dr. Seaman filed her complaint on June 9, 2015. Dr. Binotti could have sought reconsideration of the decision or an appeal, but there is no guarantee Dr. Binotti would have prevailed. Considering these risks, the $19 million monetary recovery reflects a strong result for the Class. The proposed allocation plan is fair and reasonable as it will compensate class members on a pro rata basis according to the degree of alleged harm they suffered.

As to the third factor, the parties were fully informed about the strengths and weaknesses of the evidence. Continued litigation would involve considerable time and expense for the parties and the Court and risked the chance of no recovery for the Class. The Settlement guarantees Class Members significant monetary and injunctive relief.

The fourth factor is irrelevant because there is no indication that Duke would be unable to satisfy a judgment.

The fifth factor, the degree of opposition to the Settlement, can **[*14]** be evaluated because the Class has had an opportunity to comment in response to the notice program. Only one Class Member objected to the Settlement and the proposed request for attorney's fees and reimbursement of costs, and he did not object to the proposed allocation plan or the proposed service award for Dr. Binotti. Doc. 65 at ¶ 10; Doc. 70-4 ¶ 2; id. at p 4-5. Furthermore, only eight Class Members exercised their right to opt out of the Class. Doc. 68 at ¶ 4. In other words, over 99% of Class Members have chosen to release their claims against Duke in exchange for relief under the Settlement. The small number of exclusion requests is a strong indication of widespread support for the Settlement and that the Settlement is fair, reasonable, and adequate. *See* *In re Mills Corp. Sec. Litig., 265 F.R.D. 246, 257 (E.D. Va. 2009)* ("[A]n absence of objections and a small number of opt-outs weighs significantly in favor of the settlement's adequacy."); *Flinn v. FMC Corp., 528 F.2d 1169, 1173 (4th Cir. 1975)* ("The attitude of the members of the class, as expressed directly or by failure to object, after notice, to the settlement, is a proper consideration for the trial court . . . ."). The only objection filed did not turn on the adequacy of the settlement amount. *See* Doc. 70-4 at p 4-5.

In addition, Duke University **[*15]** provided the required notice of the proposed settlement under the provisions of the *Class Action Fairness Act, 28 U.S.C. § 1715*, to the Attorney General of the United States, the Antitrust Division of the Department of Justice, and the various attorneys-general for all states and territories. *See* Docs. 71 ¶¶ 4, 7; 71-1. This included the Attorney General of North Carolina. Doc. 71-1 at 6 (column 2). The notices attached the materials required by CAFA, including the proposed settlement agreement and plan of allocation. Doc. 71 at ¶ 5; *see* Doc. 71-1. No governmental officer made any objection to the settlement, which also tends to indicate the settlement is appropriate.

The Court therefore concludes that the Settlement and proposed Plan of Allocation are fair, reasonable, and adequate and satisfy the criteria for final approval under *Federal Rule of Civil Procedure 23*.

Notice to Class Members

The Class notice was delivered by mail and e-mail to all Class Members. *See* Docs. 65 at ¶ 3, 65-1, 65-2. The mail and e-mail notices clearly explained Class Members' rights, including the nature of the action, the Class definition, the legal issues, Class Members' rights to make an appearance with an attorney, Class Members' right to request exclusion, Class Members' right **[*16]** to object to the Settlement, and the binding effect of a Class judgment. *See* *Fed. R. Civ. P. 23(c)(2)(B)(i)-(vii)*. The Notice apprised Class Members of Class Counsel's intent to seek 25% of the common fund as attorney's fees, to request reimbursement of costs, and to request a service award for Dr. Binotti.

Notice was also given through a case-specific website that published all relevant litigation documents and settlement notices, and which received over 4,652 unique visits. *See* Doc. 65 at ¶ 4. Additionally, the Settlement Administrator established a toll-free telephone number and handled calls from over 197 Class Members concerning the Settlement. *Id.* at ¶ 8.

The Court finds that the notice program effectively apprised Class Members of their rights, was the best practicable under the circumstances, and complied with all due process requirements. *See* *Fed. R. Civ. P. 23(e)(1)(B)* (notice must be given to class "in a reasonable manner"); *Domonoske v. Bank of Am., N.A., 790 F.Supp.2d 466, 472 (W.D. Va. 2011)* ("In the context of a class action, the due process requirements of the *Fifth Amendment* require reasonable notice combined with an opportunity to be heard and withdraw from the class.") (cleaned up).

The Notice given by Duke University complied with the requirements of the Class Action Fairness Act. *See* Docs. 71; 71-1.

Designation [*17] of *Cy Pres* Recipient

"[A] *cy pres* distribution is designed to be a way for a court to put any unclaimed settlement funds to their 'next best compensation use, e.g., for the aggregate, indirect, prospective benefit of the class.'" *Klier v. Elf Atochem N. Am., Inc., 658 F.3d 468, 474 (5th Cir. 2011)* (quoting *Masters v. Wilhelmina Model Agency, Inc., 473 F.3d 423, 436 (2d Cir. 2007)*. *Cy pres* recipients must promote the objectives of the underlying statutes at issue and benefit the interests of the class members. *See Nachshin v. AOL, 663 F.3d 1034, 1040 (9th Cir. 2011)* (noting that *cy pres* distribution should be guided by the objectives of the underlying statutes, target the plaintiff class, and provide reasonable certainty that class members will benefit); *accord, Krakauer v. Dish Network, LLC, No. 1:14-CV-333, , 2020 U.S. Dist. LEXIS 199112, 2020 WL 6292991, at *7 (M.D.N.C. Oct. 27, 2020)*. Generally, courts approve *cy pres* distributions "only when more redistribution is no longer feasible." *Newberg* § 12:32.

Pursuant to the parties' Settlement, a *cy pres* distribution is only contemplated if further redistribution of unclaimed funds to Class Members would not be economically feasible. *See* Settlement, Doc. 41-1, ¶ IV(A)(8). Dr. Binotti proposes that the Court designate the American Antitrust Institute (AAI) as the *cy pres* recipient. The AAI is an independent, nonprofit organization devoted to promoting competition that protects consumers, businesses, and society. **[*18]** Its mission includes "research, education, and advocacy on the benefits of competition and the use of antitrust enforcement as a vital component of national and international competition policy." *See, Mission and History*, AM. ANTITRUST INST., https://www.antitrustinstitute.org/about-us/ (last visited August 10, 2021). Further, the AAI has a track record of advocating specifically against no-poach agreements on behalf of workers. *See, e.g.*, Randy Stutz, *AAI Issues New White Paper on the Antitrust Treatment of Labor-Market Restraints*, AM. ANTITRUST INST. (July 31, 2018), https://www.antitrustinstitute.org/work-product/2246/ .

Having reviewed the organization's purpose and considered its nexus to this case and to the advancement of Class Members' interests, the Court concludes that the AAI is an appropriate *cy pres* recipient. Should unclaimed funds remain for which further redistribution would be economically unfeasible, the Settlement Administrator is authorized to disburse those funds to the AAI, consistent with the terms of the Settlement Agreement.

For these reasons and based on the record before it, the Court **GRANTS** Plaintiff's motion for final approval of the Settlement.

IT IS SO ORDERED [*19] , this the 30th day of August, 2021.

Opinion

REPORT & RECOMMENDATION

ONA T. WANG, United States Magistrate Judge:

To the Honorable LEWIS A. KAPLAN, United States District Judge:

I. Introduction

Plaintiff/counterclaim-defendant The Sanborn Library LLC ("Sanborn") filed a complaint alleging copyright infringement and violation of the Digital Millennium Copyright Act ("DMCA") against defendants/counterclaim-plaintiffs ERIS Information Inc., Eco Log Environmental Risk Information Services, Ltd., and ERIS Information Limited Partnership (collectively, "ERIS"). ERIS subsequently filed counterclaims against Sanborn and counterclaim-defendant Environmental Data Resources, LLC (individually, "EDR," and collectively with Sanborn, "EDR-Sanborn") seeking declaratory relief **[*3]** and alleging antitrust violations of the Sherman Act and Clayton Act; false advertising under the Lanham Act; and defamation, product disparagement, trade libel, deceptive acts and practices, false advertising, and tortious interference with prospective business relations under New York law. Before the District Court is EDR-Sanborn's motion to dismiss ERIS's counterclaims pursuant to *Fed. R. Civ. P. 12(b)(6)*. For the reasons discussed below, I recommend the motion to dismiss be **GRANTED in part and DENIED in part as follows**:

- ERIS's product disparagement (Count IX), trade libel (Count XI), and tortious interference with prospective business relations (Count XII) claims should be **DISMISSED**.
- ERIS's Sherman Act and Clayton Act claims (Count IV and V) should proceed, except that any essential facilities or product bundling claims should be **DISMISSED**.
- ERIS's Lanham Act (Count VI), New York General Business Law (Counts VII and VIII), and defamation (Count X) claims should proceed with the limitations detailed below. *See infra* Section III.D.
- ERIS should be granted leave to amend its counterclaims, with its Second Amended Counterclaims due within **fourteen (14)** days of the District Court's ruling on this Report and Recommendation. **[*4]**

II. Background[1]

A. The Parties and the Relevant Market

---

[1] The facts set forth herein are drawn from ERIS's First Amended Counterclaims (the "Counterclaims") (ECF 40) and materials incorporated by reference in the Counterclaims, including the ASTM E1527 standard and EDR's sample "Certified Sanborn Map Report." Decl. of Joshua S. Wolkoff ("Wolkoff Decl.") (ECF 46), Ex. A, C. *See, e.g., Halebian v. Berv, 644 F.3d 122, 131 n.7 (2d Cir. 2011)* ("[I]t is well established that on a motion to dismiss for failure to state a claim pursuant to *Rule 12(b)(6)*, the court may also rely upon documents attached to the complaint as exhibits and documents incorporated by reference in the complaint.") (internal citations omitted). Citations to "¶" or "¶¶" are to the corresponding paragraph numbers in the Counterclaims.

Sanborn[2] purports to own "the largest and most comprehensive collection" of fire insurance maps in the world (the "Sanborn Collection," or when referring to maps in the Sanborn Collection, "Sanborn Maps"). ¶ 2 (quoting ECF 12 ¶ 2). Fire insurance maps were initially created to provide insurance underwriters with historical factual information needed to assess a property's risk of being damaged by fire. ¶ 17. They depict, *inter alia*, the "size, shape, and construction of dwellings, commercial buildings, and factories as well as fire walls, locations of windows and doors, sprinkler systems, . . . types of roofs[,] . . . the widths and names of streets, property boundaries, building uses, and house and block numbers." ¶ 17. Sanborn began creating maps in 1866 and has held a near-100% monopoly on fire insurance maps since the early twentieth century. ¶¶ 3, 18. Today, fire insurance maps are used by environmental professionals conducting site assessments to protect owners of real property from liability for environmental contamination under the *Comprehensive Environmental Response, Compensation, and Liability Act of 1980, 42 U.S.C. § 9601 et seq.* ("CERCLA"). ¶¶ 2, 4.

Under CERCLA and its implementing regulations, parties with **[*5]** interests in a commercial real estate holding may face strict liability for environmental contamination unless they undertake an "all appropriate inquiry assessment" of the property, known as a Phase I Environmental Site Assessment ("Phase 1 ESA"), that complies with standards set by the international standards-setting organization ("SSO") ASTM International, namely ASTM E1527. ¶ 4, 23, 25; *see generally* 40 C.F.R. § 312.[3] A Phase I ESA is conducted by an "environmental professional," who inquires into the past ownership and uses of the property, evaluates environmental conditions, and ultimately creates a written report that identifies existing and potential contamination liabilities ("Phase 1 ESA Report"). ¶ 25. These environmental professionals engage the services of data provision companies, such as EDR or ERIS, to provide them with "report packages" containing the necessary historical sources and data needed to assess environmental risk and create a Phase I ESA Report for a given site. ¶ 36. ERIS refers to the "products and services required for the Phase I ESA report . . . as the 'environmental risk assessment data market'" ("ERAD" or the "ERAD market"). ¶ 37.

EDR and ERIS compete, throughout **[*6]** the US, in this market to provide environmental professionals with report packages of ERAD—which include fire insurance maps—used for conducting Phase I ESAs. ¶¶ 37-38. EDR purchased rights to the more than 1.3 million Sanborn Maps in the Sanborn Collection in 1995 or 1996 and purports to be the exclusive licensee of all Sanborn Maps for commercial use. ¶¶ 26, 30, 40, 47, 49, 56.[4] EDR allegedly holds at least a 70% market share in the ERAD market. ¶¶ 3, 5, 38, 77, 123-24. ERIS entered the US market in 2013 and is the next largest competitor to EDR with a 10-15% market share. ¶¶ 78, 129. In 2011, ERIS acquired hundreds of thousands of Sanborn Maps (including a complete set of Sanborn Maps from 1867-1970) from academic publishers ProQuest and LexisNexis for use and inclusion in ERIS's ERAD report packages. ¶¶ 82-83.

As described more fully below, ERIS alleges that EDR-Sanborn has "systematically and intentionally taken steps that have prevented any real and meaningful competition in the environmental risk assessment data market" through manipulation of industry standards, failure to license standard-essential products, sham litigation, **[*7]**

---

[2] For simplicity, "Sanborn" is used to refer to The Sanborn Library LLC and its alleged predecessors, including The Sanborn Map Company. ERIS alleges, on information and belief, that EDR is a "sister company" to Sanborn "with a common parent or with a group of common members," but states that "[f]urther discovery" is needed to ascertain the "exact nature" of EDR's relationship with Sanborn. ¶ 16; *see* ¶ 88 (suggesting EDR may own or have owned Sanborn "in whole or in part"). It is also worth noting that ERIS refers to counterclaim-defendants collectively as "EDR-Sanborn" throughout the Counterclaims, though all parties refer to the entities collectively as only "EDR" in their motion to dismiss briefs. As specified above, I refer to the entities collectively as "EDR-Sanborn."

[3] ERIS alleges, on information and belief, that "every commercial property sold in this country for $1 million in value or more first undergoes a Phase I ESA before it is purchased" to protect against liability under CERCLA. ¶ 25.

[4] While ERIS alleges that there are more than 1.3 million Sanborn Maps, EDR-Sanborn inconsistently suggests that the number of Sanborn Maps ranges from 1.2 to 1.4 million in its pleadings and the documents incorporated by reference into the Counterclaims. *See* ECF 12 at ¶ 19 (1.2 million); *SANBORN® AND SANBORN MAP®*, EDR Lightbox, https://edrnet.com/prods/sanborn-maps/ (1.3 million); Derek Ezovski, *Free Sanborns - Part 1*, EDR CONNECT, https://connect.edrnet.com/s/article/Free-Sanborns-Part-1-1489082078068 (1.4 million).

disparagement, discounted bundled pricing, and exclusive dealing. ¶¶ 7, 158. ERIS alleges such conduct has "erected a substantial barrier" to market entry and "dissuaded many entities" from entering or remaining in the ERAD market. ¶¶ 5, 72, 123, 125, 127-30. EDR-Sanborn's conduct has also allegedly coerced environmental professionals into obtaining products from EDR rather than from competitors (such as ERIS), for free, or not at all. ¶¶ 60, 64, 67, 130.

B. ASTM E1527

The ASTM E1527 standard was first set in 1993, two or three years before EDR allegedly acquired rights to the Sanborn Maps, and has been continuously updated every few years since that time. ¶¶ 24-26, 40. The standard, in relevant part, requires that "[a]ll obvious uses of the property [at issue] shall be identified from the present, back to the property's first developed use, or back to 1940, whichever is earlier" and explains that "this task requires reviewing only as many of the [enumerated] standard historical sources . . . as are necessary and both reasonably ascertainable and likely to be useful." Wolkoff Decl., Ex. A (ASTM Standard § 8.3.2); ¶ 27. Additionally, "[r]elevant supporting documentation shall be included **[*8]** in the [Phase I ESA Report] or adequately referenced" and "[i]f the environmental professional has chosen to exclude certain documentation from the report, the environmental professional shall identify in the report the reasons for doing so (for example, a confidentiality agreement)." Wolkoff Decl., Ex. A (ASTM Standard § 12.2); *see* ¶¶ 27, 31.

One of the enumerated "standard historical sources" are fire insurance maps, which are defined as "maps produced for private fire insurance map companies that indicate uses of properties at specified dates and that encompass the property." Wolkoff Decl., Ex. A (ASTM Standard §§ 3.2.37; 8.3.4.2); ¶ 27. According to ERIS, "the only product that meets this definition is the EDR-acquired Sanborn Maps." ¶¶ 27, 32. While ASTM E1527 says fire insurance maps are "often available at local libraries, historical societies, private resellers, or from the map companies who produced them," Wolkoff Decl., Ex. A (ASTM Standard §§ 3.2.37; 8.3.4.2), ERIS alleges that (1) not all maps are available at all such sources and (2) even when they are available, EDR-Sanborn has taken the position that commercial use of Sanborn Maps acquired from any other sources, including **[*9]** libraries, is against copyright, and that EDR "sells the only map products that can [legally] be used to satisfy the [ASTM E1527] standard." ¶¶ 27, 30, 32.

ERIS contends that (Sanborn) fire insurance maps are *de facto* necessary to comply with the standard. As illustrated above, ASTM E1527 does not facially require environmental professionals to use or physically attach fire insurance maps in Phase I ESAs, which usually involve various sources, such as street directory searches, aerial photographs, topographical maps, property tax files, and recorded land title records, among others. ¶ 29. However, due to their "historical factual significance" and "the nature and accuracy of the factual details contained" in fire insurance maps, ERIS alleges that "[i]t is standard practice to rely on and consult fire insurance maps (*i.e.*, Sanborn maps) for the historical facts they portray when preparing Phase I ESAs" and, further, that it is "impossible" to conduct a competent and standard-compliant Phase I ESA without searching for, consulting, and physically providing copies of relevant and available (Sanborn) fire insurance maps. ¶¶ 4, 29, 33. ERIS insists that "there are no alternative sources **[*10]** for the factual information set forth in those maps" and thus "[n]o substitute products, alternative map or otherwise, exist that a purchaser can use to comply with the ASTM E1527 standard and qualify for the liability shield." ¶¶ 4, 25, 33, 39.

ERIS contends that EDR-Sanborn manipulated the ASTM E1527 to incorporate Sanborn fire insurance maps "without disclosing [to the ASTM committee] the true effect of the standard that [it] had created." ¶ 35. Specifically, according to ERIS, representatives from EDR, including former Chief Executive Officer Anthony Buonicore, were "intentionally and heavily" involved in setting ASTM E1527 and possessed "enough clout" to "institute [EDR's] preferred requirements." ¶ 27. Buonicore, who held leadership roles at the ASTM, including as committee chairman in the 1990s, allegedly "lobbied and pushed" for the adoption of Sanborn fire insurance maps as a (*de facto*) required historical source. ¶¶ 4, 26. Buonicore supposedly took such steps while knowing—but not disclosing to the relevant ASTM committee—that EDR would purchase rights to (and claim exclusive control over) all maps capable of meeting the standard. ¶¶ 26, 32, 34-35, 39. ERIS adds that EDR-Sanborn **[*11]** has continued to manipulate the ASTM standard since 1992, such as by recently proposing to revise the standard's definition of fire insurance maps to omit that they are "available at local libraries, historical societies, [and] private resellers" so as to "conceal legitimate sources of Sanborn Maps (especially those clearly in the public domain) . . . in an attempt to funnel all requests for such maps to EDR." ¶ 75. Because of its conduct, ERIS argues that EDR is obliged to at least license any valid copyrights covering the Sanborn Maps and to do so under fair, reasonable, and non-discriminatory ("FRAND") terms. ¶ 39.

C. Copyright Litigation and Statements to the Marketplace

ERIS alleges that EDR-Sanborn has repeatedly and widely stated and advertised—in EDR's report packages, on EDR's website, and in oral and email communications—that **all** Sanborn Maps are subject to valid copyright protection; that ERIS is committing copyright infringement through its report packages; and that obtaining and using Sanborn Maps for a Phase 1 ESA from ERIS or any source other than EDR-Sanborn is illegal. ¶¶ 62-72, 101; *see infra* Section III.D. ERIS alleges that such statements have been made to customers **[*12]** and potential customers for at least as long as ERIS has been in the ERAD market (*i.e.*, since at least 2013).

On March 6, 2019, Sanborn sued ERIS for copyright infringement under *17 U.S.C. § 101 et seq.* and violation of the DMCA, *17 U.S.C. § 1202* (the "Copyright Suit"), alleging, *inter alia*, that ERIS has acquired a collection of fire insurance maps "built entirely of Sanborn Library's copyrighted maps," "infringed [Sanborn's] copyrights in each of the Sanborn Maps," and replaced Sanborn's copyright management information ("CMI") with ERIS's own, false CMI on each map. (ECF 12 ¶¶ 1, 5, 26, 38, 43, 52, Prayer for Relief A). ERIS alleges EDR has "undertaken an extensive marketing campaign" since the start of the Copyright Suit, making statements regarding its claims orally, on its website, and in a market-wide email. ¶¶ 94-101.

ERIS acknowledges that it copies and distributes Sanborn Maps, but alleges that there are no "valid or enforceable copyright in most, if not all, of the maps at the center of this case" because they "are either invalid, expired, or unenforceable (if not all three)."[5] ¶ 6. For example, ERIS alleges that many Sanborn Maps are "firmly" and "objectively" in the public domain because they, *inter alia*, (a) **[*13]** "were published before 1924, and thus any copyright in the original and renewal terms would have expired," (b) "were published between 1924 and 1964 and were not effectively renewed," (c) are "updated" maps "copied from the expired-copyrighted works," or (d) were "published without an appropriate copyright notice." ¶¶ 6, 22, 47-49, 64; *see also* ¶¶ 57-60 (providing examples of Sanborn Maps allegedly in the public domain).[6] However, ERIS claims that it is difficult for outsiders to verify EDR-Sanborn's claims about its purported copyright rights because of the "sheer number" of Sanborn copyright registrations and the fact that "Copyright Office records (especially older records) are difficult to find or identify." ¶¶ 7, 54, 93. Further, EDR-Sanborn "refus[es] to ever identify" relevant copyright registrations when making accusations of infringement. ¶¶ 54, 92.[7]

Moreover, EDR-Sanborn has supposedly known "for decades" that the "vast majority" of the maps in the Sanborn Collection are not protected by valid copyrights and has "detailed documentation showing that only few of its maps continue to remain subject to copyright protection." ¶¶ 40, 52, 57, 132, 134. Specifically, ERIS asserts **[*14]** that between 1995 and 1998, around the time that EDR acquired rights to the Sanborn Maps, "EDR undertook a thorough [multi-year] analysis of each copyright registration and each Sanborn map to determine the copyright status of each map," and discovered that most of the copyrights were lapsed or invalid because Sanborn had not been "diligent in registering, updating and/or renewing its copyrights, nor was it diligent in publishing its updated

---

[5] ERIS also alleges that its conduct is consistent with the terms and conditions (or lack thereof) of ERIS's acquisition of Sanborn Maps from ProQuest and LexisNexis. ¶¶ 83-84, 87.

[6] ERIS also suggests that Sanborn Maps "do not exhibit the creativity and originality required to be copyrightable" and that the use of information in the Sanborn Maps for the "transformative" purpose of creating environmental risk assessment report packages constitutes "quintessential fair use." ¶¶ 6, 50, 73-77.

[7] EDR-Sanborn has had to make such identifications during the course of discovery. *See, e.g.*, December 3, 2019 Tr. (ECF 65) at 3-27.

works while providing still effective copyright notice of those works." ¶¶ 102, 132. EDR allegedly created a spreadsheet cataloguing "each and every expired or invalid copyright." ¶ 52.

ERIS alleges that despite knowledge that the vast majority of the alleged copyrights are invalid, non-existent, or expired, EDR-Sanborn has used its misrepresentations and the Copyright Suit (as well as other similar lawsuits) to dissuade competitors from staying or remaining in the market, drive up their costs through legal fees, and "choke" their cash flow by scaring customers away from meeting and doing business with companies other than EDR. ¶¶ 5, 7, 53, 60, 135.[8] Indeed, ERIS states that the Copyright Suit has caused it to lose business opportunities, alleging **[*15]** that an entity ERIS refers to as "Company K" refused to meet with ERIS to see a demonstration of ERIS's products and services, "citing the existence of the lawsuit as a reason." ¶¶ 128, 135.

D. Product Bundling

As explained above, EDR and ERIS both provide environmental professionals with "report packages containing [ERAD]." ¶ 109. However, these professionals also require report "writer" software in order to generate usable reports from this data. Because "ERIS does not have its own in-house writer," its "customers have to purchase the writer from a separate company at a cost of approximately $150 per package of materials." ¶ 112.

EDR, on the other hand, has in-house report writer software called "Parcel," though ERIS alleges that Parcel "is not as good as the other similar products on the market." ¶¶ 112, 114. While EDR has long sold Parcel separately for between $100-$150 per report generated from a package of materials, EDR is now including its writer software "as part of a bundle" with its package of ERAD for around $180, a price which allegedly "does not cover the cost of every item in the overall bundle." ¶¶ 107, 112-13. EDR is allegedly offering Parcel "as a free perk to capture **[*16]** additional sales," "divert customers from ERIS to EDR," and ultimately "drive ERIS from the market." ¶¶ 112, 115. ERIS states that this has caused ERIS to lose sales to EDR and that, in order to continue to compete in the ERAD market, ERIS will have to lower its prices and/or acquire an in-house writer and sell it at a loss by including it for free in a bundle with its report packages. ¶¶ 107, 113, 117.

E. Exclusivity Agreements

EDR is allegedly entering into steeply discounted, long-term exclusive contracts with environmental professionals who perform Phase I ESAs. ¶¶ 118-123. Specifically, ERIS alleges that EDR has already entered into exclusive contracts with at least seven of the ten largest consulting firms, with all ten firms constituting (*i.e.*, purchasing products equaling) 60% of the (customer) market and the "locked in" seven constituting 25% of the market. ¶¶ 118, 122. EDR has also entered into exclusive contracts with "several smaller consultants," including three former clients of ERIS. ¶ 122. ERIS alleges, on information and belief, that EDR is "actively engaged in negotiations for" additional exclusive contracts, and either already has foreclosed or is at risk of foreclosing **[*17]** over 60% of purchasing in the market through exclusive contracts. ¶¶ 123, 176.

EDR's exclusive contracts last for "several years" and are priced using either an "'all you can eat' annual flat fee"—the customer can purchase as many products as it wants during the contract term for a set price—or a "tiered pricing" model—the customer can purchase products at a flat fee, which decreases as the customer guarantees higher volumes of orders. ¶¶ 119, 121. ERIS alleges losing "several clients" and "several million dollars in lost revenue and profits" due to EDR's exclusive contracts. ¶¶ 121-22. Further, on at least one occasion, ERIS actually "attempted to bid against EDR's exclusive contract and was turned down because ERIS's best price was not even close to EDR's contract price." ¶ 121.

---

[8] At a cocktail reception weeks before the Copyright Suit was filed, the CEO of Lightbox told ERIS's President that he had "been hired [by EDR] to impede [ERIS's] progress." ¶ 106.

F. ERIS's Counterclaims

Based on the above allegedly anticompetitive and tortious conduct, on June 17, 2019, ERIS filed counterclaims against EDR-Sanborn, which were subsequently amended on August 16, 2019. ERIS asks for declaratory relief arising from the Copyright Suit in the form of a declaratory judgment that: (1) ERIS has not infringed any valid copyright in any Sanborn Maps (Count I); (2) ERIS has not **[*18]** violated the DMCA with respect to the Sanborn Maps (Count II); and (3) any valid copyrights in any Sanborn Maps are unenforceable due to copyright misuse (Count III). ERIS also alleges antitrust violations of the Sherman Act and Clayton Act (Counts IV and V) and violations of the Lanham Act for false advertising (Count VI), as well as state law claims for deceptive acts and practices (Count VII), false advertising (VIII), product disparagement (Count IX), defamation (Count X), trade libel (Counts XI), and tortious interference with prospective business relations (Count XII). EDR-Sanborn has moved to dismiss Counts IV through XII of the Counterclaims.[9]

III. Analysis

A. Legal Standard

"A motion to dismiss counterclaims under *Rule 12(b)(6)* is decided under the same standard applied to a motion to dismiss the claims of a complaint." *Dress Barn, Inc. v. Klauber Bros., Inc., No. 18-CV-8085(DLC), 2019 U.S. Dist. LEXIS 68869, 2019 WL 1949675, at *2 (S.D.N.Y. Apr. 22, 2019)*. When presented with a motion to dismiss pursuant to *Rule 12(b)(6)*, a court must accept as true all non-conclusory factual allegations in the complaint, together with the contents of documents "integral" to the complaint and any matters of which courts may take judicial notice, and draw all reasonable inferences in favor of the plaintiff. *See* *Doe v. Columbia Univ., 831 F.3d 46, 48 (2d Cir. 2016)*; *McCarthy v. Dun & Bradstreet Corp., 482 F.3d 184, 191 (2d Cir. 2007)*. However, "a pleading that offers 'labels **[*19]** and conclusions' or 'a formulaic recitation of the elements of a cause of action will not do.' Nor does a complaint suffice if it tenders 'naked assertion[s]' devoid of 'further factual enhancement.'" *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 557, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*).

To survive a *Rule 12(b)(6)* motion to dismiss, the complaint must contain "sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" *Iqbal, 556 U.S. at 678* (quoting *Twombly, 550 U.S. at 570*). A claim is facially plausible "when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Iqbal, 556 U.S. at 678*. Thus, the non-conclusory factual allegations "must be enough to raise a right to relief above the speculative level." *Twombly, 550 U.S. at 555*. If the plaintiff has not "nudged [the] claims across the line from conceivable to plausible, [the] complaint must be dismissed." *Id. at 570*.

"[T]here is no heightened pleading standard in antitrust cases." *Wacker v. JP Morgan Chase & Co., 678 F. App'x 27, 29 (2d Cir. Feb. 1, 2017)* (summary order) (quoting *Concord Assocs., L.P. v. Entm't Props. Trust, 817 F.3d 46, 52 (2d Cir. 2016)*); *Provepharm, Inc. v. Akorn, Inc., No. 17-CV-7087 (SJF) (AKT), 2019 U.S. Dist. LEXIS 98719, 2019 WL 2443185, at *8 (E.D.N.Y. June 11, 2019)* (featuring standards manipulation claim); *In re Keurig Green Mountain Single-Serve Coffee Antitrust Litig., 383 F. Supp. 3d 187, 218 (S.D.N.Y. 2019)* (featuring sham litigation claim). Though antitrust claims should be "reviewed carefully" at the pleading stage "because false condemnation

[9] The undersigned previously denied EDR-Sanborn's motion to stay discovery related to ERIS's Counterclaims pending decision on the motion to dismiss. (ECF 61) (noting, *inter alia*, that "any discovery relating to the [C]ounterclaims would also be related to ERIS's defenses, and thus not amenable to a stay"). Accordingly, fact discovery, including discovery related to the Counterclaims, has been ongoing since 2019 and is nearly complete: the deadline for the completion of (the few remaining) fact witness depositions was most recently extended to September 17, 2021, and the parties have agreed to exchange and respond to contention interrogatories during the six-week period following the close of depositions. (ECF 114 at 3; ECF 125).

of competitive conduct threatens to 'chill the very conduct the antitrust laws are designed **[*20]** to protect,'" *In re Keurig, 383 F. Supp. 3d at 218* (quoting *Verizon Commc'ns Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 414, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)*), to survive dismissal, the allegations need only satisfy *Federal Rule of Civil Procedure 8(a)*'s general requirement of a "short plain statement" of facts supporting a plausible claim, rather than *Rule 9(b)*'s stricter requirements, *Concord Assocs., 817 F.3d at 52*. Moreover, "[i]n antitrust cases in particular, the Supreme Court has stated that 'dismissals prior to giving the plaintiff ample opportunity for discovery should be granted very sparingly.'" *Todd v. Exxon Corp., 275 F.3d 191, 198 (2d Cir. 2001)* (quoting *George Haug Co. v. Rolls Royce Motor Cars Inc., 148 F.3d 136, 139 (2d Cir.1998)*).

B. Sherman Act Section 2 (Count IV)

Section 2 of the Sherman Act ("*Section 2*") makes it illegal to "monopolize, or attempt to monopolize, or combine or conspire . . . to monopolize ... trade or commerce . . . ." *15 U.S.C. § 2*. ERIS alleges that EDR violated *Section 2* though (1) monopolization, (2) attempted monopolization, and (3) monopoly leveraging. The elements on ERIS's *Section 2* theories vary, as explained below. "Nevertheless, all three offenses require predatory or anticompetitive conduct or an inappropriate use of monopoly power by the defendant." *Ortho Diagnostic Sys., Inc. v. Abbott Lab'ys, Inc., 920 F. Supp. 455, 465 (S.D.N.Y. 1996)* (Kaplan, J.)

To state a claim for monopolization, a plaintiff must demonstrate that the defendant (1) possessed monopoly power in the relevant market and (2) willfully acquired or maintained that power, *i.e.*, through anticompetitive conduct. *PepsiCo, Inc. v. Coca-Cola Co., 315 F.3d 101, 105 (2d Cir. 2002)*. To state an attempted monopolization **[*21]** claim, a plaintiff must demonstrate that the defendant (1) engaged in predatory or anticompetitive conduct with (2) the specific intent to monopolize and (3) "a dangerous probability of achieving monopoly power." *Id.* (quoting *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 456, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993)*). Finally, a monopoly leveraging claim requires a plaintiff to establish that the defendant "(1) possessed monopoly power in *one market*; (2) used that power to create a dangerous probability of monopolizing *another* [second] market; and (3) caused injury by such anticompetitive conduct." *A.I.B. Express, Inc. v. FedEx Corp., 358 F. Supp. 2d 239, 247 (S.D.N.Y. 2004)* (emphasis added) (quoting *Trinko, 540 U.S. at 414*).

In its briefing, EDR argues that ERIS has not sufficiently alleged a second relevant market for its monopoly leveraging claim or, more generally, any anticompetitive conduct to support its *Section 2* claims.[10] I address the market issue first and then analyze each category of alleged anticompetitive conduct. For the following reasons, I recommend that Count IV be dismissed only insofar as it asserts "essential facilities" or "product bundling" claims. ERIS's *Section 2* claims should otherwise be permitted to proceed.

1. Monopoly Leveraging and Market Definition

ERIS claims that EDR-Sanborn engaged in monopoly leveraging by using "Sanborn's near 100% monopoly **[*22]** over fire insurance maps to garner more than 70% of the market share nationwide in the [ERAD] market [for EDR] because that [latter] market relies heavily on fire insurance maps for approved historical data." ¶ 124. ERIS claims EDR-Sanborn has accomplished such leveraging though a multitude of anticompetitive conduct, such as

---

[10] EDR does ***not*** contest ERIS's allegations regarding definition of the ERAD market, EDR's possession (or dangerous probability of possession) of monopoly power in that market, or EDR's intent to monopolize that market. For the purposes of this motion, I assume that ERIS has sufficiently pleaded these elements, as it is well-settled that "[i]ssues not sufficiently argued in the [parties'] briefs are considered waived." *E.g. Grytsyk v. Morales, 527 F. Supp. 3d 639, 2021 WL 1105368, at *6 (S.D.N.Y. 2021)* (collecting cases and quoting *Norton v. Sam's Club, 145 F.3d 114, 117 (2d Cir. 1998)*); *Ball v. New York City Council, No. 17-CV-4828 (JMF), 2018 U.S. Dist. LEXIS 165402, 2018 WL 4625625, at *3 n.3 (S.D.N.Y. Sept. 26, 2018)* (same); *Kassman v. KPMG LLP, 416 F. Supp. 3d 252, 279 (S.D.N.Y. 2018)* (same); *see also Emigra Grp., LLC v. Fragomen, Del Rey, Bernsen & Loewy, LLP, 612 F. Supp. 2d 330, 351 (S.D.N.Y. 2009)* (Kaplan, J.) (assuming that "the so-called Service Market [was] a relevant market" where defendant did not argue otherwise).

manipulation of the ASTM E1527 standard, disparagement of competitors, bundled pricing, and sham litigation. ¶¶ 3, 158.

EDR's argument that ERIS has not sufficiently pleaded any anticompetitive conduct sufficient to maintain a *Section 2* claim will be discussed below. However, EDR separately argues that the fire insurance map market is not a cognizable product market because it does not account for viable substitute-products, and therefore, that ERIS has not met the threshold requirement of pleading *two* relevant markets to support its leveraging claim. *E.g., Ortho Diagnostic Sys. v. Abbott Labs., Inc., 822 F. Supp. 145, 154 (S.D.N.Y. 1993)* (Kaplan, J.) ("[T]he Second Circuit requires two markets for a leveraging claim."). I recommend against dismissal of ERIS's leveraging claim based on market definition because ERIS has sufficiently pleaded a relevant product market for fire insurance maps.

For purposes of the Sherman Act, a market "must be a market for **[*23]** particular products or services," and "its outer boundaries . . . are determined by the reasonable interchangeability of use or the cross-elasticity of demand between the product itself and substitutes for it." *US Airways, Inc. v. Sabre Holdings Corp., 938 F.3d 43, 64 (2d Cir. 2019)* (quoting *Brown Shoe Co. v. United States, 370 U.S. 294, 325, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)*); *Emigra, 612 F. Supp. 2d at 351-52*.[11] Thus, a relevant market for antitrust purposes "includes the product or service at issue as well as its substitutes." *US Airways, 938 F.3d at 64*. However, "'a single brand of a product or service' may 'be a relevant market under the Sherman Act' if no substitute exists for the brand's products or services." *Id.* (quoting *Eastman Kodak Co. v. Image Technical Services, Inc., 504 U.S. 451, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)*) (holding district court erred by dismissing complaint "based on its conclusion that a market which is limited to a defendant's product or service cannot be viable").

The Second Circuit has emphasized that "market definition is a deeply fact-intensive inquiry and courts therefore hesitate to grant motions to dismiss for failure to plead a relevant product market." *Chapman v. N.Y. State Div. for Youth, 546 F.3d 230, 238 (2d Cir. 2008)* (quoting *Todd, 275 F.3d at 199-200*). Courts must do so, however, "where the plaintiff fails to define its proposed relevant market with reference to the rule of reasonable interchangeability and cross-elasticity of demand, or alleges a proposed relevant market that clearly does not encompass all interchangeable substitute products even **[*24]** when all factual inferences are granted in plaintiff's favor." *Id.* (quoting *Queen City Pizza, Inc. v. Domino's Pizza, Inc., 124 F.3d 430, 436 (3d Cir. 1997)*).

Granting all inferences in ERIS's favor, I find that ERIS has sufficiently alleged a relevant fire insurance map market, dominated by EDR-Sanborn, because it is plausible that no viable substitutes exist for fire insurance maps. Significantly, ERIS alleges that Sanborn controlled nearly 100% of the fire insurance map industry since the early twentieth century, having "created nearly all, if not all" fire insurance maps, and that EDR has acquired and expanded this monopoly as the supposedly exclusive licensee of Sanborn Maps for commercial use. ¶¶ 5, 18, 47, 124. Fire insurance maps are used today to conduct ASTM E1527-compliant Phase I ESAs. While ASTM E1527 facially contemplates the use of various historical sources, including other types of maps (*i.e.*, topographic maps), and does not specifically require the use of fire insurance maps, ERIS repeatedly alleges that the historical significance, accuracy, and nature of information contained in fire insurance maps make them *de facto* necessary for satisfying the standard's requirements.[12] While discovery will ultimately expose the validity of ERIS's

---

[11] Products will be considered to be reasonably interchangeable "if consumers treat them as acceptable substitutes." *PepsiCo, 315 F.3d at 105* (citation omitted). "Cross-elasticity of demand exists if consumers would respond to a slight increase in the price of one product by switching to another product." *Todd, 275 F.3d at 201-02* (citation omitted).

[12] *See, e.g.*, ¶ 25 ("[T]he *de facto* standard for complying with ASTM E1527 . . . requires consulting and copying fire insurance maps, comprising those maps that were created by the Sanborn Map Company. No substitute products, alternative map or otherwise, exist that a purchaser can use to comply with the ASTM E1527 standard and qualify for the liability shield"); ¶ 29 ("[F]ire insurance maps are particularly relevant historical source elements of a Phase I report, given the known historical factual significance of fire insurance maps and the nature and accuracy of the factual details contained in those maps . . . It would be impossible for an environmental professional to conduct a competent Phase I ESA . . . without searching for, consulting, relying upon and providing copies of relevant fire insurance maps, if they are available for the property"); ¶ 39 ("[T]here are no alternative sources for the factual information set forth in those maps."); s*ee also* ECF 47 at 9 n.12 ("[W]hile EDR argues that the

assertions, **[*25]** EDR has alleged sufficient facts for the District Court to draw a reasonable inference that there are no viable substitutes for fire insurance maps. Accordingly, ERIS's monopoly leveraging claim should not fail for failure to plead two relevant markets.[13]

2. Anticompetitive Conduct

While ERIS asserts a panoply of allegedly anticompetitive conduct, EDR-Sanborn argues that ERIS cannot state a *Section 2* claim based on any such conduct. Below, I address the parties' arguments regarding each category of conduct.[14] Ultimately, I find that ERIS should be permitted to pursue a *Section 2* claim for sham litigation, standard manipulation, and disparagement, but not for failure to license essential facilities or product bundling.

a. Sham Litigation

ERIS argues that the Copyright Suit is a sham lawsuit used by EDR-Sanborn to harm ERIS and foreclose competition in the ERAD market. ERIS alleges that EDR-Sanborn has always known that the Copyright Suit is objectively baseless because the vast majority of Sanborn Maps are "firmly" in the public domain and lack copyright protection, as evident on the face of the maps and/or the results of an investigation conducted by EDR at the close **[*26]** of the 20th century. *See, e.g.*, ¶¶ 22, 48, 57-61, 132-36. EDR argues that the *Noerr-Pennington* doctrine precludes ERIS from alleging any antitrust claim based on the filing of the Copyright Suit. For the reasons stated below, I recommend that the District Court deny EDR's motion to dismiss as it pertains to ERIS's *Section 2* sham litigation claim.

Pursuant to the *Noerr-Pennington* doctrine, parties are "generally immune from antitrust liability for engaging in litigation, even if the litigation might have anticompetitive effects." *Nat'l Jewish Democratic Council v. Adelson, 417 F. Supp. 3d 416, 430 (S.D.N.Y. 2019)*; *see* *In re Elysium Health-Chromadex Litig., 354 F. Supp. 3d 330, 335 (S.D.N.Y. 2019)*, *as amended* (Feb. 7, 2019). However, while the *Noerr-Pennington* doctrine protects a litigant's *First Amendment* right to petition the courts, immunity will not attach where the challenged litigation is "a mere

---

ASTM Standard 'requires reviewing only as many of the standard historical sources . . . as are necessary and both reasonably ascertainable and likely to be useful,' as a practical matter, where Sanborn Maps are available, they *are* necessary, reasonably ascertainable, and likely to be useful, and thus must be consulted and included in a Phase I ESA.").

[13] While EDR also emphasizes that "fire insurance maps are in fact alleged to fall *within* the larger [ERAD] market," (ECF 51 at 7), "well-defined submarkets may exist which, in themselves, constitute product markets for antitrust purposes." *In re Inclusive Access Course Materials Antitrust Litig., No. 20-CV-6339 (DLC), 2021 U.S. Dist. LEXIS 111135, 2021 WL 2419528, at *11 (S.D.N.Y. June 14, 2021)* (quoting *Sabre, 938 F.3d at 64*).

[14] Defendants assert that instead of isolating each category of anticompetitive conduct, the District Court should sustain its Sherman Act claims because they are supported by a combined "monopoly broth" of anticompetitive conduct. (ECF 40 at 3). The "monopoly broth" concept recognizes that, in analyzing antitrust claims alleging a multitude of anticompetitive conduct, courts should "avoid 'tightly compartmentalizing the various factual components' of [each claim] and 'wiping the slate clean after scrutiny of each.'" *Valassis Commc'ns, Inc. v. News Corp., No. 17-CV-7378 (PKC), 2019 U.S. Dist. LEXIS 27770, 2019 WL 802093, at *9 (S.D.N.Y. Feb. 21, 2019)* (quoting *City of Groton v. Connecticut Light & Power Co., 662 F.2d 921, 928-29 (2d Cir. 1981)*). However, the "monopoly broth" concept has only been mentioned in two cases in this Circuit and, critically, has never been employed as a replacement for an individual review of alleged anticompetitive conduct. *See* *Groton, 662 F.2d at 928* ("[W]e must, like the [plaintiffs'] briefs, analyze the various issues individually"); *Valassis, 2019 U.S. Dist. LEXIS 27770, 2019 WL 802093 at *6* (dismissing plaintiff's antitrust claims insofar as they alleged predatory bidding and explaining that "not all actions of an alleged violator may be properly considered by a jury as ingredients in a 'monopoly broth'"). Moreover, both cases recognize that "it is unlikely that multiple independently lawful acts can come together to create" a monopoly broth, as "it is not the case that 'if there is a fraction of validity to each of [a litigant's] claims and the sum of the fractions is one or more, the plaintiffs have proved a violation of *section 1* or *section 2* of the Sherman Act.'" *Valassis, 2019 U.S. Dist. LEXIS 27770, 2019 WL 802093 at *9* (quoting *Groton, 662 F.2d at 929*). Thus, I will proceed to analyze each category of allegedly anticompetitive conduct, keeping in mind the context and possible "synergistic effect" of the conduct. *Id.*

sham to cover . . . an attempt to interfere directly with the business relationships of a competitor." Prof'l Real Estate Investors, Inc. v. Columbia Pictures Indus. ("PRE"), 508 U.S. 49, 56, 113 S. Ct. 1920, 123 L. Ed. 2d 611 (1993) (internal citation omitted).

Accordingly, "[a] single lawsuit can violate ***antitrust law*** as long as it is both an objective and subjective sham." In re DDAVP Direct Purchaser Antitrust Litig., 585 F.3d 677, 686 (2d Cir. 2009). To state a claim of sham litigation, a litigant must plausibly allege that "the lawsuit [is] objectively baseless in the sense that no reasonable litigant could realistically expect success on the merits." PRE, 508 U.S. at 60 (internal citation **[*27]** omitted). If a court finds the challenged litigation is "objectively baseless," then the court "examine[s] the litigant's subjective motivation and focus[es] on whether the baseless lawsuit conceals an attempt to interfere directly with the business relationships of a competitor." *Id.*[15] While courts in this District have observed that the sham exception should be construed narrowly and, *where possible*, decided on the pleadings "in order to avoid chilling a litigant's exercise of the right to petition," Twin City Bakery Workers & Welfare Fund v. Astra Aktiebolag, 207 F. Supp. 2d 221, 223 (S.D.N.Y. 2002), it has also recognized that the applicability of the sham exception is often regarded as a question of fact for the jury, *see* Elysium, 345 F. Supp. 3d at 336, and has repeatedly denied motions to dismiss sham litigation claims, *e.g.,* In re Keurig, 383 F. Supp. 3d at 234 (denying motion to dismiss antitrust claim challenging allegedly baseless patent litigation).[16]

The parties, focusing on the first prong, disagree whether a party must allege that an *entire* lawsuit is objectively meritless in order to escape *Noerr-Pennington* immunity. ERIS argues that liability may be premised on a **single objectively meritless** claim. Conversely, EDR-Sanborn argues that they are immune from liability if the Copyright Suit alleges a **single colorable** claim, and **[*28]** thus that the District Court must dismiss ERIS's sham litigation claim because ERIS does not allege that the Copyright Suit is objectively baseless *in toto*, and even affirmatively recognizes that the suit may concern a "small subset of potentially colorable infringement claims." (ECF 47 at 15; *see* ¶¶ 40, 132-33). While the parties each cite copious non-binding caselaw from various districts to support their arguments, (ECF 45 at 8-9; 47 at 5-7; 51 at 3), courts in this Circuit have not directly spoken to whether a sham litigation claim can be based on an underlying lawsuit featuring both sham and non-sham claims.[17]

Given the unsettled state of the law on this issue and the procedural posture of this action, I recommend that the District Court not resolve this issue at the pleading stage. In making this recommendation, I find the reasoning of *Intel Corp. v. Via Techs., Inc.* to be particularly instructive:

---

[15] This two-step test has been described as placing a "heavy thumb on the scale in favor of the [antitrust] defendant." Elysium, 345 F. Supp. 3d at 336 (quoting Hanover 3201 Realty, LLC v. Vill. Supermarkets, Inc., 806 F.3d 162, 180 (3d Cir. 2015)).

[16] *See* Louisiana Wholesale Drug Co. v. Sanofi-Aventis, No. 07-CV-7343 (HB), 2008 U.S. Dist. LEXIS 3611, 2008 WL 169362, at *5 (S.D.N.Y. Jan. 18, 2008) (denying motion to dismiss antitrust claim challenging an allegedly sham FDA Citizen-Petition where the complaint and administrative record established "triable issues of fact concerning the reasonability and viability" of the petition); ICOS Vision Sys. Corp., N.V. v. Scanner Techs. Corp., No. 05-CV-6322 (DC), 2006 U.S. Dist. LEXIS 13847, 2006 WL 838990, at *5 (S.D.N.Y. Mar. 29, 2006) ("If, as alleged, [defendant] knew that [the statute] did not apply and threatened [patent infringement] litigation for the sole purpose of harming [plaintiff], then its threats were neither objectively reasonable nor taken in good faith. This is all that need be alleged at this early stage of the litigation . . . . If, after discovery, [plaintiff] is unable to present evidence from which a reasonable jury could find that [defendant] knew that its threats of infringement litigation were baseless, the claims may be dismissed at summary judgment."); *see also* Alternative Electrodes, LLC v. Empi, Inc., 597 F. Supp. 2d 322, 331 (E.D.N.Y. 2009) ("Plaintiff alleges that the litigation was both subjectively and objectively baseless and plausibly supports this claim with the assertion that there could be no valid patent claim due to the existence of 'prior art.' At this stage of litigation, such allegations are sufficient to withstand a motion to dismiss.").

[17] However, the District of Connecticut has noted that application of the sham exception should be based on the "measure [of] merit" of the "strongest claim" rather than the "weakest aspect" of a lawsuit. Uniroyal Chem. Co. v. Syngenta Crop Prot., Inc., No. 3:02-CV 2253 (AHN), 2006 U.S. Dist. LEXIS 18853, 2006 WL 516749, at *6 (D. Conn. Mar. 1, 2006) (refusing to apply sham exception based on an allegedly unreasonable request for equitable relief because "the mere fact that a plaintiff has sought one form of relief that may be objectively unreasonable cannot vitiate the First Amendment protections afforded underlying claims that are not objectively without merit").

> The Court can imagine good arguments both ways. On the one hand, a plaintiff who adds a baseless claim to an otherwise bona fide lawsuit presumably does so for a reason, i.e., presumably to obtain an additional strategic advantage over and above those flowing from the assertion of non-sham **[*29]** counts. To immunize such bad-faith conduct because it is joined with good-faith conduct would eviscerate most of the sham litigation exception. Especially in patent litigation, an overreaching plaintiff will usually have a large portfolio of patents to press. It would be comparatively easy to find a colorable claim to join with baseless claims. On the other hand, evaluation and segregation of counts into "objectively bad" versus "objectively good" claims as well as "subjectively bad" versus "subjectively good" claims could require large amounts of work for a jury, not to mention claim-construction hearings (on patents no longer part of the case-in-chief). In a mixed-claim scenario, it would also be necessary for a jury to isolate and to trace the harms resulting solely by reason of the wrongful components of the litigation.
>
> **Given the uncertain state of the law on this issue, this order will not resolve it at the pleading stage. Rather, discovery will go forward. Discovery may reveal that the incremental effects of the supposed sham components were negligible or may show that they dominated the original complaint. Discovery may shed light on the actual factual pattern in need of a rule. [*30] While ultimately the Court may (or may not) agree with [Plaintiff's] sweeping categorical rule of immunity, it should not do so at the pleading stage**.

*No. 99-03062 (WHA), 2001 U.S. Dist. LEXIS 27157, 2001 WL 777085, at *5-6 (N.D. Cal. Mar. 20, 2001)* (denying motion to dismiss sham litigation claim). The *Intel* court's course of action seems appropriate here, where EDR-Sanborn has acknowledged that some Sanborn Maps have "lapsed into the public domain," (ECF 45 at 1), and fact discovery—which has nearly concluded—will soon shed light on the *extent* to which the allegedly infringing maps are objectively in the public domain. Accordingly, the District Court should deny EDR-Sanborn's motion to dismiss at this juncture. EDR-Sanborn may raise the issue of *Noerr-Pennington* immunity at a later point following the close of discovery, such as in a motion for summary judgment.[18]

b. Standards Manipulation

ERIS argues that EDR-Sanborn intentionally monopolized or attempted to monopolize the ERAD market by manipulating the ASTM E1527 standard. ERIS alleges that EDR, through CEO Anthony Buonicore, influenced the ASTM to set a standard that *de facto* requires fire insurance maps be consulted and copied in the preparation of Phase I ESA Reports, while knowing—but not disclosing—that EDR would later purchase **[*31]** supposedly exclusive rights to all maps capable of meeting the standard. ¶¶ 25-35.[19] I recommend that the District Court deny EDR-Sanborn's motion to dismiss as it pertains to ERIS's *Section 2* standards manipulation claim.

"Intentional misrepresentations designed to deceive a standard-setting organization can constitute an antitrust violation." *Amphastar Pharm., Inc. v. Momenta Pharm., Inc., 297 F. Supp. 3d 222, 230 (D. Mass. 2018)* (explaining that "[b]y incorporating patented technology into a standard, the patent-holder obtains market power because adoption of the standard eliminates alternatives to the patented technology"). While the Second Circuit has not addressed the elements of standard manipulation claims, in 2019, the Eastern District of New York found that a counterclaim-plaintiff made a sufficient showing of anticompetitive conduct by alleging facts from which it could be reasonably inferred that: (1) the counterclaim-defendant sought to maintain monopoly power and substantially

[18] While EDR also argues that ERIS's sham litigation allegations are undermined by the fact that ERIS did not file a motion to dismiss the Copyright Suit, (ECF 45 at 9), courts have previously emphasized that this is not "fatal to a sham litigation claim." *In re Keurig, 383 F. Supp. 3d at 232*.

[19] *See also, e.g.*, ¶ 60 ("In essence, by engineering the relevant standards to require consultation with, and the reproduction of, relevant Sanborn Maps, EDR-Sanborn has effectively required that if a customer desires the liability shield under CERCLA, only it, and it alone, can be the storehouse, source and 'curator' of maps from the Sanborn Collection—and the collection of rote historical facts set forth therein without any substitute products available on the market.").

foreclose competition in the relevant market by (2) soliciting an SSO to change its standard (3) without disclosing its intellectual property rights in the manufacturing process necessary to meet that standard and (4) but for counterclaim-defendant's conduct, the SSO would not have **[*32]** adopted the revised standard. *See Provepharm, 2019 U.S. Dist. LEXIS 98719, 2019 WL 2443185, at *10, 13*. EDR suggests, in substance, that ERIS has not made a sufficient showing regarding the third and fourth elements.

EDR-Sanborn firsts argues that ERIS has not plausibly alleged Sanborn Maps to be necessary or essential to satisfying the ASTM E1527 standard, insisting that Sanborn Maps cannot be categorized as "essential IP" because ASTM E1527 expressly "allows consultants to comply with the standard's requirements *without consulting and attaching* fire insurance maps (let alone those maps that [EDR-Sanborn] specifically holds copyrights in) to a Phase I Environmental Site Assessment." (ECF 45 at 10). However, as discussed above, ERIS repeatedly and plausibly alleges that the standard makes fire insurance maps—defined so that "the only product that meets th[e] definition is the EDR-acquired Sanborn Maps"—*de facto* essential as a matter of practice, meaning that it is practically "impossible" to satisfy the standard without using and including such maps. *See supra* Section III.B.2.a. While discovery will shine light on the validity of these allegations, ERIS has alleged sufficient facts for the District Court to draw a reasonable inference that Sanborn Maps **[*33]** are necessary to satisfying the ASTM E1527 standard.

EDR-Sanborn next argues that it had no duty to disclose not-yet-existing intellectual property rights, let alone rights not acquired until two or three years after the standard was first set. However, EDR (through Buonicore) was at some point duty-bound to disclose its impending control of the allegedly standard-essential Sanborn Maps—when the standard was set or at least before it "garnered significant market acceptance"—in light of Buonicore's membership and leadership in the ASTM and role in setting the standard. *See Provepharm, 2019 U.S. Dist. LEXIS 98719, 2019 WL 2443185, at *13* (collecting cases and quoting *Actividentity Corp. v. Intercede Grp. PLC, No. 08-CV-4577 (VRW), 2009 U.S. Dist. LEXIS 132206, 2009 WL 8674284, at * 4 (N.D. Cal. Sept. 11, 2009)* (rejecting argument that SSO member's failure to disclose must occur "prior to the issuance of a standard," and sustaining monopolization claim for failure to disclose before the standard "garnered significant market acceptance" and the market became "locked in" to the standard); ¶ 32 (alleging that Section 19.2.5 of the ASTM Policies and Procedures bars committees from "bring[ing] about the standardization of any product or service for the purpose or with the effect of . . . preventing the manufacture or sale of any product or service not conforming to a specified standard"). Moreover, **[*34]** ERIS alleges that at the time the standard was set, EDR at least "knew" that it would soon have "complete control of the only maps that could satisfy the standard," and was "simultaneously and surreptitiously working" towards the acquisition. ¶¶ 32, 34, 39-40. Thus, ERIS does not allege a hypothetical future intention or a mere desire to control the Sanborn Maps, but rather asserts something concrete, though not yet finalized. Assuming ERIS's allegations to be true, I find that it would be overly technical to allow EDR to avoid a duty to disclose merely because its control over the Sanborn Maps was consummated following the creation of the ASTM standard.[20]

Lastly, EDR-Sanborn argues that ERIS has not met its pleading burden since it has not alleged that the ASTM was considering an "alternative technology." (ECF 45 at 12). However, like the court in *Provepharm*, I am "not necessarily persuaded that this is a proper pleading standard, as opposed to an evidentiary standard." *Provepharm, 2019 U.S. Dist. LEXIS 98719, 2019 WL 2443185, at *12 n.16*. At this point in the proceedings, it is sufficient that ERIS has plausibly alleged that but for EDR's conduct and failure to disclose, the ASTM would not have adopted ASTM E1527 or would have adopted a different **[*35]** standard, particularly in light of ASTM's policies. Thus, ERIS's allegations are ultimately sufficient to survive a motion to dismiss.[21]

---

[20] *Cf. Townshend v. Rockwell Int'l Corp., No. 99-CV-0400 (SBA), 2000 U.S. Dist. LEXIS 5070, 2000 WL 433505, at *11 (N.D. Cal. Mar. 28, 2000)* (finding counterclaim-plaintiff did not sufficiently allege anticompetitive conduct before an SSO where counterclaim-defendants' patents issued after adoption of the relevant standard, counterclaim-defendants had disclosed their pending patent applications to the SSO, and counterclaim-plaintiff did not argue that the SSO could have adopted a standard that did not encompass counter-defendants' technology).

[21] EDR argues that standards manipulation claims are subject to a heightened pleading standard under *Rule 9(b)*. However, EDR's argument is based on non-binding case law that predates cases such as *Provepharm. See* ECF 45 at 10 (citing *Lotes Co.*

c. Disparagement

ERIS also alleges that EDR-Sanborn has caused ERIS competitive harm by making false and misleading statements to the effect that EDR-Sanborn owns copyrights to *all* Sanborn Maps and that it is unlawful to use *any* Sanborn Map acquired from ERIS for a Phase I ESA. I find that ERIS's Section 2 disparagement allegations are sufficient to survive a motion to dismiss.

False and misleading statements may give rise to actionable antitrust claims. *See* In re Keurig, 383 F. Supp. 3d at 240. Still, a "monopolization claim based on misleading advertising must overcome a presumption that the effect on competition of such a practice was *de minimis*." Nat'l Ass'n of Pharm. Mfrs., Inc. v. Ayerst Labs., 1988 U.S. App. LEXIS 8710, 850 F.2d 904, 916 (2d Cir. 1988) (internal citations omitted). The Second Circuit has directed courts to consider several factors in determining whether a plaintiff has overcome this presumption, including whether the representations: "were (1) clearly false, (2) clearly material, (3) clearly likely to induce reasonable reliance, (4) made to buyers without knowledge of the subject matter, (5) continued for prolonged periods, and (6) not readily susceptible of neutralization **[*36]** or other offset by rivals." Ayerst, 850 F.2d at 916 (internal citations omitted).

Challenges to these factors are better suited for decision on summary judgment, with the aid of discovery. Keurig, 383 F. Supp. 3d at 240. At the motion to dismiss stage, plausible allegations that representations were "false and misleading in certain respects," have been found to be sufficient "to go forward with the discovery process to substantiate its claim that the [representations were] clearly false, clearly material, and clearly likely to induce reasonable reliance." Ayerst, 850 F.2d at 916 (reversing dismissal and explaining that "in the present case the several factors . . . noted above cannot be adequately evaluated until the discovery process has moved forward to a greater extent than it has thus far"); Keurig, 383 F. Supp. 3d at 240-41 (denying dismissal and finding that "attacks [regarding] certain specifics" of plaintiffs' allegations "are more appropriately raised on summary judgment, after discovery"); Alternative Electrodes, 597 F. Supp. 2d at 332 (denying dismissal and finding that plaintiff was "entitled to discovery in order to substantiate its claims").[22]

Here, ERIS has plausibly alleged that EDR repeatedly made false and misleading statements, such as on its website, to (potential) customers regarding the copyright **[*37]** status of ***all*** Sanborn Maps and the impermissibility of ERIS's use of ***any*** such maps. *See* ¶¶ 94-103, 105; *infra* Section III.D (cataloguing the relevant statements). Customers cannot easily verify the truth of such statements because of the "sheer number" of Sanborn's copyright registrations and the fact that "Copyright Office records (especially older records) are difficult to find or identify." ¶¶ 7, 54, 101; *see* ¶ 134 (stating that "the fact that no [copyright] renewal was ever filed . . . is not readily publicly available"). Because Sanborn Maps are supposedly essential to the ASTM E1527 standard, EDR's statements have allegedly harmed ERIS, as well as smaller competitors in the ERAD market, and created substantial barriers to market entry. ¶¶ 128-29. Thus, construing the allegations most favorably to ERIS and drawing reasonable inferences in its favor, dismissal at this stage is unwarranted and ERIS is entitled to utilize what it has learned in discovery to substantiate its disparagement claim.

d. Essential Facilities

ERIS argues that Sanborn Maps are "essential facilities" in the ERAD market that EDR-Sanborn has failed to license in violation of Section 2. I recommend that the District Court **[*38]** dismiss ERIS's essential facilities claim.

---

v. Hon Hai Precision Indus. Co., No. 12-CV-7465 (SAS), 2013 U.S. Dist. LEXIS 69407, 2013 WL 2099227, at *5 (S.D.N.Y. May 14, 2013) (relying on Apple Inc. v. Samsung Elecs. Co., Ltd., No. 11-CV-01846, 2012 U.S. Dist. LEXIS 67102, 2012 WL 1672493 (N.D.Cal. May 14, 2012) for the proposition that "deception on the SSO theory of anti-competitive conduct is subject to the heightened pleading standards for fraud") and ChriMar Sys. v. Cisco Sys., 72 F. Supp. 3d 1012, 1019 (N.D. Cal. 2014)).

[22] *Cf.* Reed Const. Data Inc. v. McGraw-Hill Companies, Inc., 49 F. Supp. 3d 385, 421-22 (S.D.N.Y. 2014), *aff'd*, 638 F. App'x 43 (2d Cir. 2016) (granting summary judgment in favor of defendant based on presumption that disparagement had *de minimis* effect pursuant to the *Ayerst* factors).

To state a *Section 2* essential facilities claim, a plaintiff must allege: "(1) control of the essential facility by a monopolist; (2) a competitor's inability practically or reasonably to duplicate the essential facility; (3) the denial of the use of the facility to a competitor; and (4) the feasibility of providing the facility." *Twin Labs., Inc. v. Weider Health & Fitness, 900 F.2d 566, 569 (2d Cir.1990)*. Thus, a successful plaintiff must assert "more than inconvenience, or even some economic loss," but rather that there are no feasible alternatives to the facility, that its denial "inflicts a severe handicap on . . . market entrants," and that the defendant-monopolist is the "only" entity with which the litigant "feasibly can do business" to access the facility. *Id.; Eatoni Ergonomics, Inc. v. Research in Motion Corp., 486 F. App'x 186, 190 (2d Cir. 2012)* (summary order). However, "the continued viability of the essential facilities doctrine has been called into question in recent years," *TrueEX, LLC v. MarkitSERV Ltd., 266 F. Supp. 3d 705, 723 & n.124 (S.D.N.Y. 2017)* (Kaplan, J.), and courts in this Circuit have not sustained a claim under the doctrine since the Supreme Court's ruling in *Verizon v. Trinko, LLP, 540 U.S. at 407-08* ("We have never recognized such a doctrine and we find no need either to recognize it or to repudiate it here.").

To the extent that a *Section 2* essential facilities claim remains viable, ERIS has at least made **[*39]** plausible allegations to satisfy the first and fourth prongs of the *Twin* standard. For the same reasons I find that ERIS has plausibly alleged Sanborn Maps to be *de facto* standard-essential, *see supra* Sections III.B.2.a & b, ERIS plausibly alleges that Sanborn Maps constitute an essential facility. *See Twin Labs., 900 F.2d at 569* (noting that essential facilities are usually "facilities that are a natural monopoly, facilities whose duplication is forbidden by law, and perhaps those that are publicly subsidized," and that "[i]n cases finding liability in other categories . . . the facility in question . . . was effectively the only one in town."). ERIS has also plausibly alleged that it would be feasible for EDR-Sanborn to provide it with access to Sanborn Maps by at least not asserting copyright over maps it allegedly knows to be in the public domain, as well as licensing any under valid copyright. While EDR-Sanborn repeatedly argues that it is not obliged to do so, it fails to make any non-conclusory arguments regarding infeasibility. *Am. Tel. & Tel. Co. v. N. Am. Indus. of New York, Inc., 772 F. Supp. 777, 785-86 (S.D.N.Y. 1991)* (refusing to dismiss essential facilities claim where defendant-monopolist "provided no evidence on [its] motion [to dismiss] that it cannot provide [the essential] services **[*40]** to" plaintiff-competitor).

Whether ERIS has sufficiently alleged its inability to duplicate Sanborn Maps, by creating or recreating non-Sanborn fire insurance maps or a standard-complaint substitute, is a closer call. While the Counterclaims state that it would be "overly laborious," "time-consuming," and "painstaking" for "**consumers**" such as "**individual environmental professionals**" to "***search for and collect***" fire insurance maps and other types of ERAD, without the assistance of data provision firms like EDR and ERIS, they do not speak to what is or is not feasible for competitors such as ERIS. ¶¶ 36, 81 (emphasis added).[23] *Cf. TrueEX, 266 F. Supp. 3d at 723* (finding plaintiffs had not shown likelihood of success on their essential facilities claim where it would take "time and money" to duplicate a facility); *RxUSA Wholesale Inc. v. Alcon Labs., 391 F. App'x 59, 61 (2d Cir. 2010)* (summary order) (finding that plaintiff's "essential facilities claim fails . . . at the very least because [plaintiff] is able to obtain pharmaceutical products from other sources, albeit at a higher price").

Even more apparent, however, is ERIS's failure to allege that it actually sought and was denied access to Sanborn Maps from EDR-Sanborn. While this element may be satisfied by something less than an "outright **[*41]** refusal to deal," *Delaware & Hudson Ry. Co. v. Consol. Rail Corp., 902 F.2d 174, 180 (2d Cir. 1990)* (finding that [i]t is sufficient if the terms of the offer to deal are unreasonable"), ERIS only alleges that EDR "appears unwilling to license its copyrights or sell the maps" to competitors without alleging facts supporting this conclusion. ¶ 39; *cf. TrueEX, 266 F. Supp. 3d at 724* ("Because reasonable access to the essential facility exist[ed]—even if not in a way that [was] conducive to [plaintiff's] existing business model—[plaintiff] cannot establish an essential facilities claim.") (quoting *MetroNet Servs. Corp. v. Qwest Corp., 383 F.3d 1124, 1132 (9th Cir. 2004)*). While ERIS may be able to sufficiently amend the Counterclaims to ameliorate these pleading deficits, ERIS currently fails to plausibly state an essential facilities *Section 2* claim.

---

[23] While ERIS states, in its opposition brief, that it has "factually allege[d] that the duplication of the Sanborn Maps would be economically infeasible," ERIS merely cites to ¶ 36 and ¶ 81 for this proposition, which are inapposite, as explained above.

e. Product Bundling

ERIS alleges that EDR is offering Parcel—EDR's in-house writer software used to generate reports from packages of ERAD—as a perk in a "product bundle" with its ERAD packages to divert customers from ERIS and ultimately squeeze ERIS out of the ERAD market. ¶¶ 112-17. However, ERIS's "bundled discount" allegations fail to state a viable *Section 2* claim.

Ortho Diagnostic Sys., Inc. v. Abbott Labs., Inc. provides the relevant framework for analyzing ERIS's bundling claim. In this Circuit, pricing is generally not considered **[*42]** to be predatory or anticompetitive unless the prices at issue are below the defendant's average variable cost. *Info. Res., Inc. v. Dun & Bradstreet Corp., 359 F. Supp. 2d 307, 307 (S.D.N.Y. 2004)*; *see* *Affinity LLC v. GfK Mediamark Rsch. & Intel., LLC, No. 12-CV-1728 (RJS), 2013 U.S. Dist. LEXIS 45921, 2013 WL 1189317, at *3 (S.D.N.Y. Mar. 25, 2013)*, *aff'd*, *547 F. App'x 54 (2d Cir. 2013)*. However, in *Ortho*, Judge Kaplan considered whether the average variable cost standard invariably applies to claims challenging package or bundled discounts:

> [In] a case in which a monopolist **(1)** faces competition on only part of a complementary group of products, **(2)** offers the products both as a package and individually, and **(3)** effectively forces its competitors to absorb the differential between the bundled and unbundled prices of the product in which the monopolist has market power [a *Section 2* plaintiff] must allege and prove either that **(a)** the monopolist has priced below its average variable cost or **(b)** the plaintiff is at least as efficient a producer of the competitive product as the defendant, but that the defendant's pricing makes it unprofitable for the plaintiff to continue to produce. **Any other rule would entail too substantial a risk that the antitrust laws would be used to protect an inefficient competitor against price competition that would afford substantial benefits to consumers**.

920 F. Supp. at 466 (emphasis added) (noting that "care must be exercised to avoid judicial **[*43]** actions that penalize or threaten to penalize beneficial price cutting in an unduly zealous effort to punish less desirable forms").[24]

As an initial matter, ERIS fails to allege that EDR "faces competition on only part of a complementary group of products" in the challenged bundle. ERIS alleges a product bundle consisting of: (1) ERAD report packages (available from both EDR and ERIS) and (2) in-house report writing software (available from EDR, but not ERIS). ¶ 112; ECF 46 at 14. Pursuant to the first part of the *Ortho* standard, ERIS must allege that EDR's bundle involves a product over which it holds monopoly power **and** a product (here, ERAD) over which it faces—but seeks to foreclose—competition with ERIS, *i.e.*, by forcing ERIS to absorb the difference between the bundled and unbundled price of the monopoly product. *See* *Ortho, 920 F. Supp. at 458, 469* (alleging defendant's pricing for a bundle of blood screening tests took advantage of defendant's monopoly in some tests to foreclose or impair competition in the sale of tests offered by both parties).[25] Alternatively stated, "*Ortho* . . . does not analyze bundled

---

[24] In *Ortho*, Judge Kaplan emphasized that pricing is an "exceptionally sensitive area" because while "price cutting can be used by a dominant firm with superior staying power to drive its competitors out of business with the intention thereafter of using its market power to restrict output, raise prices, and recoup the losses sustained in the competitive battle," it is also "a classic, and a socially desirable, form of competition" that "make[s] more goods available to more people and thus result[s] in greater overall benefits to society." *Id. at 465-66*.

[25] *See* *SmithKline Corp. v. Eli Lilly & Co., 575 F.2d 1056, 1065 (3d Cir.1978)* (in case relied upon by *Ortho*, finding that defendant-pharmaceutical company violated *Section 2* by bundling the sale of monopoly cephalosporin antibiotics (Keflin and Keflex) with the sale of its competitive cephalosporin antibiotic (Kefzol) to drive Kefzol-competitor-plaintiff out of the market); *Virgin Atl. Airways Ltd. v. British Airways PLC, 69 F. Supp. 2d 571, 578, 580 n.8 (S.D.N.Y. 1999)*, *aff'd*, *257 F.3d 256 (2d Cir. 2001)* (featuring challenge to defendant-airline's incentive agreements because "the bundling feature . . . c[ould] cause an incentivized customer who flies on routes on which [defendant] has a monopoly as well as routes on which [defendant] faces competition to fly with [defendant] on the competitive routes," but granting summary judgment for defendant because plaintiff failed to factually support its bundling theory).

pricing for a non-monopolized, non-competing product." (ECF 45 at 16). However, EDR's in-house report **[*44]** writing software is just that: EDR is not alleged to be a monopolist of report writing software nor a competitor with ERIS with respect to such software. Accordingly, ERIS has not satisfied the first part of the *Ortho* standard.

Additionally, while ERIS must plausibly allege either (a) that EDR priced below its average variable cost or (b) that ERIS is an equally efficient producer of ERAD but that EDR's pricing makes it unprofitable to compete, EDR makes no non-conclusory allegations regarding EDR's costs. ¶ 121; *see Astra Media Grp., LLC v. Clear Channel Taxi Media, LLC, 414 F. App'x 334, 336 (2d Cir.2011)* (upholding dismissal where plaintiff failed to plead defendant's actual costs).[26] Further, while ERIS alleges that EDR's bundles have caused ERIS to lose sales to EDR and created pressure to lower its prices and/or match EDR's bundle, ¶¶ 107, 113, 117, ERIS does not allege that it cannot continue to sell ERAD profitably, *see Ortho, 920 F. Supp. 470* (dismissing claim where plaintiff conceded that defendant's "package leaves [plaintiff] able to sell its products at a profit, albeit not as large a profit as previously").[27] Accordingly, ERIS has not alleged facts raising a reasonable inference that EDR's bundles represent anticompetitive price cutting.

C. Sherman Act *Section 1* and Clayton Act *Section 3* Claims (Counterclaim V)

ERIS claims EDR is violating *Section 1* of the Sherman Act and *Section 3* of the Clayton Act by entering into long-term, exclusive contracts with environmental consultants in order to "lock up" the ERAD market. ¶¶ 119-23. While EDR argues that ERIS cannot state an antitrust claim based on such contracts because ERIS has not alleged harm to competition, ERIS has made sufficient allegations to survive its low burden on a motion to dismiss.[28]

Under *Section 1* of the Sherman Act: "Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States . . . is declared to be illegal." *15 U.S.C. § 1*. Accordingly, a

---

[26] *See MiniFrame Ltd. v. Microsoft Corp., 11-CV-7419 RJS, 2013 U.S. Dist. LEXIS 49813, 2013 WL 1385704, at *6 (S.D.N.Y. Mar. 28, 2013)*, *aff'd*, *551 F. App'x 1 (2d Cir. 2013)* (dismissing pricing claim where plaintiff did not plausibly allege that defendant suffered losses on its pricing scheme); *Affinity, 2013 U.S. Dist. LEXIS 45921, 2013 WL 1189317, at *4* (same); *see also Info. Res., Inc., 359 F. Supp. 2d at 307* (noting that "[w]hen price discounts in one market are bundled with the price charged in a second market, the discounts must be applied to the price in the second market in determining whether that price is below that product's average variable cost").

[27] ERIS's reliance on *LePage's Inc. v. 3M, 324 F.3d 141 (3d Cir.2003)* to support its bundling allegations is inapposite. *Id.at 177* (Greenberg, J., dissenting) (emphasizing that plaintiff had "not satisfied the stricter tests devised by other courts considering bundled rebates," including the *Ortho* standard). The *LePage*'s standard for bundled discounts has not been adopted by other circuits and has been interpreted narrowly by the Third Circuit. *See ZF Meritor, LLC v. Eaton Corp., 696 F.3d 254, 274 n.11 (3d Cir. 2012)* (interpreting ***[*45]*** *LePage's* narrowly in light of intervening Supreme Court precedent); ***Cascade Health Sols. v. PeaceHealth, 515 F.3d 883, 897-905 (9th Cir. 2008)*** (discussing differences between the exclusionary effects approach in *LePage*'s and cost-based approaches, such as *Ortho*'s, and emphasizing that the bipartisan Antitrust Modernization Commission, created by Congress in 2002, "noted [that] the fundamental problem with the *LePage*'s standard is that it does not consider whether the bundled discounts constitute competition on the merits, but simply concludes that all bundled discounts offered by a monopolist are anticompetitive with respect to its competitors who do not manufacture an equally diverse product line" and thus "could protect a less efficient competitor at the expense of consumer welfare").

[28] To the extent ERIS also seeks to pursue a *Section 2* exclusive dealing claim (¶ 158), it should likewise be sustained. As an initial matter, because EDR-Sanborn did not address such a claim in its opening brief and only mentioned it in one footnote in its reply brief, EDR-Sanborn arguably waived any argument in favor of dismissal. *See supra* note 10. Regardless, exclusive dealing claims are subjected to the same substantial foreclosure analysis under both sections (as EDR acknowledges), and, thus, ERIS's allegations survive dismissal for the reasons set out below. *Maxon Hyundai Mazda v. Carfax, Inc., No. 13-CV-2680 (AJN), 2014 U.S. Dist. LEXIS 139480, 2014 WL 4988268, at *9 (S.D.N.Y. Sept. 29, 2014)* (finding, after sustaining plaintiff's *Section 1* Claim, that "the analysis [regarding whether defendant participated in anticompetitive conduct for purposes of *Section 2*] is essentially the same as it was for *Section 1* above. The requisite anticompetitive action alleged in the Complaint is the formation of exclusive dealing contracts that foreclose a significant share of the market."); ECF 51 at 8 n.16.

litigant bringing a *Section 1* claim must allege: "(1) a combination or some form of concerted action between at least two legally distinct economic entities that (2) unreasonably restrains trade." *Geneva Pharm. Tech. Corp. v. Barr Labs. Inc., 386 F.3d 485, 506 (2d Cir.2004)*.

Similarly, under *Section 3* of the Clayton Act, it is "unlawful . . . to . . . make a sale or contract for sale of goods . . . on the condition, agreement, or understanding that the . . . purchaser thereof shall not use or deal in the goods . . . of a competitor or competitors of the . . . seller" **[*46]** ***if*** "the effect . . . may be to substantially lessen competition or tend to create a monopoly in any line of commerce." *15 U.S.C. § 14*. Clayton Act *Section 3* claims are analyzed in essentially the same manner (besides the additional requirement of a "sale or contract for sale of goods"[29]) as Sherman Act *Section 1* claims challenging exclusivity agreements; accordingly, both EDR-Sanborn and ERIS analyze these claims together. *See* *CDC Techs., Inc. v. IDEXX Lab., Inc., 186 F.3d 74, 79 (2d Cir. 1999)*; *Comm. Data Servers, Inc. v. IBM, 262 F. Supp. 2d 50, 78 (S.D.N.Y. 2003)*. EDR-Sanborn's principal argument is that both claims should be dismissed because ERIS does not plausibly allege that the exclusive contracts at issue restrain trade.

Because of their potentially procompetitive benefits, exclusive dealing agreements are considered "presumptively legal" and the question of whether they unreasonably restrain trade is analyzed under the rule of reason. *Maxon, 2014 U.S. Dist. LEXIS 139480, 2014 WL 4988268, at *9* (quoting *CDC Techs., 186 F.3d at 80*). Under the rule of reason, plaintiffs bear an initial burden of demonstrating that the agreements have an actual adverse effect on competition. *Id.* "Thus, to survive a motion to dismiss they must plead plausible allegations that, if true, would show such an adverse effect; if Plaintiffs then provide evidence of anticompetitive effects, Defendant will later have the opportunity to show the procompetitive **[*47]** effects of the agreements." *Id.*

To meet their burden, ERIS must plausibly allege that a substantial share of the ERAD market has been foreclosed by EDR's exclusivity agreements. *Id.* at *13; ("Exclusive dealing is an unreasonable restraint of trade and a *§ 1* violation only when the agreement freezes out a significant fraction of buyers or sellers from the market."). In determining substantial market foreclosure, courts place great weight on the percentage of the market foreclosed by the agreements at issue, and foreclosure percentages below 30 to 40 percent are generally insufficient. *See* *Maxon, 2014 U.S. Dist. LEXIS 139480, 2014 WL 4988268, at *14*; *Am. Express Travel Related Servs. Co. v. Visa U.S.A., No. 04-CV-8967 (BSJ), 2005 U.S. Dist. LEXIS 42852, 2005 WL 1515399, at *3 (S.D.N.Y. June 23, 2005)*. However, courts also consider non-numeric factors, such as the duration and terminability of the agreements and whether there are significant barriers to entry into the relevant market. *Mazda v. Carfax, Inc., No. 13-CV-2680 (AJN), 2016 U.S. Dist. LEXIS 171418, 2016 WL 7231941, at *5 (S.D.N.Y. Dec. 9, 2016)*, *aff'd sub nom,* *Maxon Hyundai Mazda, et al. v. Carfax, Inc., 726 F. App'x 66 (2d Cir. 2018)*.

Here, ERIS has plausibly alleged that EDR has substantially foreclosed the ERAD market through exclusivity agreements. By generally alleging, on information and belief, that EDR has foreclosed 60% of purchasing in the market using exclusivity agreements, and specifically alleging that (a) EDR has locked *at least* seven of the ten largest potential customers in the market into exclusivity agreements, (b) these **[*48]** ten customers constitute 60% of the purchasing in the market and the "locked in" seven constitute 25% of the purchasing, and (c) EDR has also locked several smaller customers into such agreements, ERIS raises a reasonable inference that EDR has foreclosed a substantial share of the ERAD market. ¶¶ 118, 122-23. *See* *In re Keurig, 383 F. Supp. 3d at 236-37* (explaining that "[a]t the motion to dismiss stage, such specific mathematical pleading is unnecessary" and that "[t]he extent to which competitors were excluded . . . is fact-dependent and not properly disposed of on a motion to dismiss"); *see also* *E.I. DuPont de Nemours & Co. v. Kolon Indus., 637 F.3d 435, 452 n.12 (4th Cir. 2011)* ("While [counterclaim-plaintiff] did not allege a specific percentage of market foreclosure in its Counterclaim, it would be problematic to reject its Counterclaim, with its extensive factual allegations, solely on that basis at the pre-discovery, motion-to-dismiss stage, when [counterclaim-plaintiff] likely has insufficient information to calculate a precise number.").

---

[29] EDR-Sanborn has waived any argument based on this factor. *See supra* note 10.

ERIS's other allegations also support a reasonable inference of substantial foreclosure. For example, EDR's contracts are alleged to last several years. *See* Am. Express, 2005 U.S. Dist. LEXIS 42852, 2005 WL 1515399, at *3 ("[T]he shorter an agreement's term and the easier it is to terminate, the more likely that it will be **[*49]** upheld."). ERIS also alleges significant barriers to market entry, in light of the other anticompetitive conduct alleged in the complaint. These allegations are sufficient at the motion to dismiss stage. *Compare* Mazda, 2014 U.S. Dist. LEXIS 139480, 2014 WL 4988268, at *13-14 (denying motion to dismiss where plaintiff estimated more than 30% market foreclosure by allegedly long-term agreements), *with* Mazda, 2016 U.S. Dist. LEXIS 171418, 2016 WL 7231941, at *14-15 (later granting summary judgment in favor of defendant in the same case where discovery revealed less than 30% foreclosure by exclusivity agreements, most of which lasted less than three years, and plaintiff failed to provide evidence of barriers to market entry).[30]

D. Counterclaims VI-XII: Tort and Lanham Act Claims

ERIS's tort and Lanham Act claims (Counts VI through XII) center on four categories of written and oral statements about EDR-Sanborn and its products and/or ERIS and its products. Before analyzing ERIS's claims, I briefly describe each contested statement:

1. **Copyright Management Information ("CMI")**: ERIS asserts that EDR has wrongfully included CMI—consisting of Sanborn's corporate logo, a copyright date, and a legend stating that "[o]nly Environmental Data Resources (EDR) is authorized to grant rights for **[*50]** commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection"—on **each and every** Sanborn Map, even those in the public domain based on their publication date or lack of timely copyright renewal. ¶ 62. Such CMI can be publicly viewed on **all** maps in a sample "Certified Sanborn Map Report" available on EDR's website. ¶ 63; Wolkoff Decl., Ex. C. ERIS alleges that EDR-Sanborn includes this "patently false" CMI on public domain Sanborn Maps in order to "unduly restrict[] the dissemination of these uncopyrighted and uncopyrightable maps and coerc[e] environmental consultants, governments, and others to turn to EDR—and only EDR—for copies of these public domain maps." ¶ 64.

2. **Blog Post**: ERIS also alleges that the below language, appearing in a two-part blog post available on EDR's website, wrongly suggests that all Sanborn Maps[31] are protected by copyright:

> Finally, an issue that many people are not aware of is the fact **that when Sanborn Maps . . . are not procured via EDR and The Sanborn Library, it is against copyright to include them in a Phase I or similar report**. Yet we are aware of many instances **where companies are using the actual maps in**

---

[30] I reject EDR's argument that its exclusivity agreements cannot be anticompetitive because ERIS attempted to bid against at least one of EDR's exclusive contracts and lost. ¶ 121. The cases cited by EDR are inapposite: In *Balaklaw v. Lovell*, the Circuit affirmed summary judgment in favor of defendants and found no evidence of market foreclosure where an exclusivity agreement was freely terminable on six-months' notice and was entered into after an open, competitive bidding process. 14 F.3d 793, 796, 799, 801 (2d Cir. 1994). Relying on *Lovell*, Judge Sweet found, on a motion to dismiss, that exclusive contracts were not anticompetitive where, as alleged, they were not fully exclusive and were of limited duration (no more than three years), and defendant entertained bids at the conclusion of each agreement's term. Spinelli v. Nat'l Football League, 96 F. Supp. 3d 81, 117-18 (S.D.N.Y. 2015). Still, the *Spinelli* court acknowledged that a plaintiff can plausibly allege exclusivity agreements to be anticompetitive by "alleg[ing] facts showing exceptional circumstances, such as evidence of predatory practices or a unique opportunity to leverage two distinct monopolies." Id. at 118 (internal citations omitted). Here, the exclusivity agreements are not alleged to be of short duration or (invariably) subject to an open, competitive bidding process, and ERIS plausibly alleges that EDR is engaging in predatory practices harming competition in the ERAD market.

[31] The Blog Post does not directly define "Sanborn Maps" but instead seems to use the term to refer to all maps published by Sanborn. *See* Ezovski, *supra* note 4 ("As many people familiar with Environmental Data Resources know, EDR purchased the complete Sanborn Library in 1996 . . . . By doing this, EDR secured the largest, most complete collection of 1.4 million Sanborn Maps in the country (which it still is today). However, since then, many people in our industry have been trying to 'skirt around' the copyright issue of Sanborns."). The Blog Post nowhere suggests that any Sanborn Maps lack copyright protection.

> **reports [*51] illegally**. In fact, many of our clients are also dealing with the same limitations with Google Maps, Polk City Directories and other tools that can be used for research. While they can be used for reference, all of these sources are protected by copyright infringement laws and **are not allowed to be used for commercial purposes such as Phase I ESA reports. Many folks are not even aware that they are violating a copyright law when they include them, but it is true**. You would think that those who promote and market the use of "Free Sanborn Maps" would be so kind to mention this "*minor*" detail. ¶ 65 (emphases in Counterclaims) (quoting language and providing links).

3. **Oral Statements**. ERIS challenges three sub-categories of oral statements by EDR to customers and potential customers:

a. **Oral Statement 1**: "[T]he lawsuit is an 'open and shut case' and . . . when it is over, ERIS will not be able to provide 'any fire insurance maps.'" ¶¶ 101, 126, 159.

b. **Oral Statement 2**: "EDR-Sanborn is the owner of copyrights in all of the Sanborn Maps." ¶¶ 101, 105.

c. **Oral Statement 3**: **"**ERIS is acting illegally and in violation of all of EDR's copyrights" and Sanborn Maps acquired from any source other **[*52]** than EDR for use in a Phase I ESA are "illicit and unlawful." ¶¶ 70, 101, 105, 182, 203.

4. **Litigation Statements**. Lastly, ERIS also challenges written statements, made in March 2019 on EDR's website and in an industry-wide email, stating that, *inter alia*: EDR "filed a copyright infringement action against [ERIS] in order to stop its unlawful use of our Sanborn Map® collection"[32] and EDR "believe[s] that ERIS is illegally copying, selling and distributing our Sanborn Maps without our permission and that its actions constitute copyright infringement." ¶¶ 94-100.

Although it is not fully clear from the Counterclaims which particular statements form the basis of which claims, ERIS's brief clarifies that the Blog Post, Oral Statements 1 and 3, and the Litigation Statements—statements supposedly about ERIS and its products—form the basis of its Defamation (Count X), Product Disparagement (Count IX), and Trade Libel (Count XI) claims. (ECF 47 at 20-21). Alternatively, ERIS states that **all** of the above-mentioned statements form the basis of its Lanham Act (Count VI), New York General Business Law (Count VII and VIII), and tortious interference (Count XII) claims. (*Id.* at 20-21, **[*53]** 26).

1. Statements of Fact vs. Statements of Opinion

Before undertaking a claim-by-claim analysis, I will address EDR-Sanborn's general argument that the contested statements are not actionable as a matter of law because they are all properly characterized as statements of pure

---

[32] The Litigation Statements do not directly define the "Sanborn Map® collection" but seem to use the term to refer to all maps published by Sanborn and acquired by EDR. *See* ¶¶ 94-100 ("We acquired the Sanborn Map collection in 1996. The maps were carefully crafted by cartographers . . . This craftsmanship is reflected in each Sanborn Map, and we are proud to serve as the owner and custodian of this important historical resource."). Sanborn uses the term similarly in the Copyright Suit complaint (which is linked in the Litigation Statements). *See* ECF 12 ¶ 16 ("EDR's offerings include . . . the complete catalog of fire insurance maps originally published by Sanborn Library's predecessor in-interest, the Sanborn Map Company (the 'Sanborn Maps')."); ¶ 19 ("Today, digital copies of the Sanborn Maps can be purchased for commercial use exclusively through EDR, on an a-la-carte basis, through a variety of customizable report packages. In all, there are roughly 1.2 million Sanborn Maps in Sanborn Library's collection."); *see also* ¶ 5 ("ERIS has amassed a collection of nearly one million fire insurance maps which, upon information and belief, is built entirely of Sanborn Library's copyrighted maps."); Prayer for Relief A (asking for "[a] declaration that [ERIS] ha[s] directly and/or indirectly infringed [Sanborn's] copyrights in each of the Sanborn Maps).

opinion. With the exception of Oral Statement 1, I find that the contested statements are properly characterized as statements of fact or mixed opinion.[33]

"The Lanham Act does not proscribe liability for mere [or pure] opinions, nor do opinions give rise to liability under state law for defamation [or] deceptive acts and practices." *See* GeigTech E. Bay LLC v. Lutron Elecs. Co., No. 18-CV-5290 (CM), 2019 WL 1768965, at *8 (S.D.N.Y. Apr. 4, 2019) (collecting cases). However, a statement of opinion "that implies that it is based upon facts which justify the opinion but are unknown to those reading or hearing it" may be actionable as a "mixed opinion." Davis v. Boeheim, 24 N.Y.3d 262, 269-70, 998 N.Y.S.2d 131, 22 N.E.3d 999 (2014) (internal citations omitted). "Distinguishing between fact and opinion is a question of law" for courts to decide. *Id.*

In determining whether a statement constitutes an opinion or factual representation, courts must consider whether, in the view of an objective, reasonable listener or reader: (1) "the specific language in issue has a precise meaning which is readily understood," **[*54]** (2) "the statements are capable of being proven true or false," and (3) "either the full context of the communication in which the statement appears or the broader social context and surrounding circumstances are such as to signal [to] . . . readers or listeners that what is being read or heard is likely to be opinion, not fact." Id. at 270 (internal citations omitted); *accord* Mr. Chow N. Y. v. Ste. Jour Azur S.A., 759 F.2d 219, 224 (2d Cir. 1985). The "dispositive inquiry" is "whether the challenged statement can reasonably be construed to be stating or implying facts about the . . . plaintiff." Flamm v. Am. Ass'n of Univ. Women, 201 F.3d 144, 146 (2d Cir. 2000); Davis, N.Y.3d at 269-270.

EDR's alleged statement to customers that the Copyright Suit is an "open and shut case" and will lead ERIS to not being able to sell any fire insurance maps in the future ("Oral Statement 1") is puffery, or "defensive salvo in this ongoing [legal] battle." Karp v. Hill & Knowlton, Inc., 631 F. Supp. 360, 365 (S.D.N.Y. 1986). A description of a case as "open and shut" does not have a precise meaning and thus cannot be proven true or false, and statements regarding the outcome of ongoing litigation are nothing more than conjecture or speculation. *See* Live Face on Web, LLC v. Five Boro Mold Specialist Inc., No. 15-CV-4779 (LTS) (SN), 2016 U.S. Dist. LEXIS 56601, 2016 WL 1717218, at *2 (S.D.N.Y. Apr. 28, 2016) (finding "hyperbolic and imprecise" statements describing case as "frivolous" to be non-actionable opinion and noting that "[c]ourts have consistently found that statements calling into **[*55]** question the legitimacy of litigation are non-actionable statements of opinion"); Scholastic, Inc. v. Stouffer, 124 F. Supp. 2d 836, 850 (S.D.N.Y. 2000) (finding statements that legal claims were "absurd," "ridiculous" and "meritless" to be non-actionable opinion); Karp, 631 F. Supp. at 365 (finding statement interpreting Second Circuit opinion as supporting [a company's] claim to be non-actionable opinion where "whether the Second Circuit approved of [the] claims on the merits [was] still an open question"); Gotbetter v. Dow Jones & Co., 259 A.D.2d 335, 687 N.Y.S.2d 43, 44 (1999) (finding defense counsel's statement calling plaintiff's lawsuit "baseless" to be non-actionable opinion); *see also* Moya v. United Airlines, Inc., No. 18-CV-14829, 2019 U.S. Dist. LEXIS 13888, 2019 WL 351904, at *4 (D.N.J. Jan. 29, 2019) (collecting cases for the proposition that "[c]ourts generally find parties' statements regarding the probable outcome of a litigation to be non-actionable opinion").

However, the remaining challenged statements make or imply a factual representation that EDR-Sanborn holds valid copyright rights in *all* Sanborn Maps. Oral Statement 3 and the Litigation Statements also convey a factual representation that because EDR-Sanborn holds copyrights in all Sanborn Maps, ERIS's use and inclusion of Sanborn Maps in its products infringes on EDR-Sanborn's copyrights. Relevant terms such as "copyright" and "infringement" have precise meanings, and whether EDR holds and **[*56]** ERIS is infringing upon currently-valid

---

[33] At the motion to dismiss stage, courts typically evaluate each challenged statement (or set of statements) and determine whether it is actionable. "If the Court finds that some of the statements are actionable but others are not, then the Court may dismiss the claims based on the nonactionable statements and allow the claims based on the actionable statements to go forward . . . [D]iscovery w[ill] then proceed for any statements held to be actionable, but not for any statements that fail to support a claim." Biro v. Conde Nast, 883 F. Supp. 2d 441, 457 (S.D.N.Y. 2012) (granting motion to dismiss claims with respect to some statements and denying motion with respect to others); *see* Watson v. NY Doe 1, 439 F. Supp. 3d 152, 160-62 (S.D.N.Y. 2020) (same); Treppel v. Biovail Corp., No. 03-CV-3002, 2004 U.S. Dist. LEXIS 20714, 2004 WL 2339759, at *17 (S.D.N.Y. Oct. 15, 2004) (same).

copyrights is, *at least in relevant part*, susceptible to proof by way of verifiable facts, such as the date the maps were originally published and whether renewals were (timely) made; alternatively stated, that a map is within the term of copyright protection, is too old to be protected, or was not timely or properly renewed can be objectively proven true or false. *See* Perfect Pearl Co. v. Majestic Pearl & Stone, Inc., 887 F. Supp. 2d 519, 539-40 (S.D.N.Y. 2012) (finding use of "®" registration symbol on promotional materials after trademark registration had lapsed constituted an actionable, false statement).

Additionally, context cuts both ways. While a reasonable reader or listener might discount such statements as the biased opinion of a legal adversary and business competitor, they also may assume that EDR-Sanborn is "is privy to undisclosed and damning information, the details of which formed the basis for statements." GeigTech, 2019 U.S. Dist. LEXIS 59319, 2019 WL 1768965 at *8 (finding company president's statements that competitor "poached [the company's] patented designs" and engaged in "blatant infringement," published in press release announcing lawsuit, to be actionable); *cf.* Lombardo v. Dr. Seuss Enter., L.P., No. 16-CV-9974 (AKH), 2017 U.S. Dist. LEXIS 64854, 2017 WL 1378413, at *7 (S.D.N.Y. Apr. 7, 2017) (finding company's cease and desist letter stating, *inter alia*, "upon information and belief, the Infringing **[*57]** Work appears to be based on or derived from" defendant's book was not actionable because a reasonable reader "could not believe that defendant sent the letters in order to assert false statements of fact about plaintiffs" rather than to "notify the recipients of its legal opinion"). Thus, even to the extent that such statements can be classified as opinions, readers and listeners could reasonably assume such statements are based on undisclosed facts concerning, for example, EDR-Sanborn's renewal of their alleged copyrights.

2. Defamation (Count X)

As stated above, ERIS alleges defamation liability based on the Blog Post, Oral Statements 1 and 3, and the Litigation Statements. EDR argues that ERIS's defamation claim fails because (a) the Blog Post is not a statement "of and concerning" ERIS; (b) the Oral Statements are inadequately identified and (c) the Litigation Statements (and Oral Statement 3) fall under New York's "fair report" privilege. I agree with EDR's first two arguments and thus recommend that this claim be dismissed insofar as it is based on the Blog Post and the Oral Statements. Alternatively stated, ERIS should be permitted to proceed with a defamation claim based only **[*58]** on the Litigation Statements.

"Defamation is the injury to one's reputation either by written expression, which is libel, or by oral expression, which is slander." Idema v. Wagner, 120 F. Supp. 2d 361, 365 (S.D.N.Y.2000), *aff'd*, 29 Fed. Appx. 676 (2d Cir.2002). Under New York law, a defamation claim must allege: (1) a false and defamatory, factual statement "of and concerning" the plaintiff (2) that was published to a third party without authorization or privilege; (3) through fault on the part of the defendant; and (4) and either special damages or *per se* actionability. *Id.;* Kamchi v. Weissman, 125 A.D.3d 142, 1 N.Y.S.3d 169, 180 (2d Dep't 2014). Additionally, plaintiff must "identify adequately who actually made the allegedly [defamatory] statements, when they were made and to whom they were communicated." Watson, 439 F. Supp. 3d at 163 (internal citations omitted).

a. Blog Post

As an initial matter, ERIS has not sufficiently alleged that the Blog Post is a statement "of and concerning" ERIS. While "it is not necessary for the plaintiff[] to be named in the publication, [the plaintiff] must plead and prove that the statement referred to [the plaintiff] and that a person [familiar with the parties and subject] hearing or reading the statement reasonably could have interpreted it as such." Three Amigos SJL Rest., Inc. v. CBS News Inc., 28 N.Y.3d 82, 42 N.Y.S.3d 64, 65 N.E.3d 35, 37 (2016); *see* Elias v. Rolling Stone LLC, 872 F.3d 97, 105 (2d Cir. 2017). "This burden is not a light one," and whether a statement can reasonably **[*59]** be interpreted to be "of and concerning" a particular party is a question of law generally resolved at the pleading stage. Three Amigos, 65 N.E.3d at 37; *see* Elias, 872 F.3d at 105.

Additionally, under the "group libel doctrine," statements regarding a small, "specifically-defined group" may reasonably be interpreted as being "of and concerning" an individual member of such group, Three Amigos, 65 N.E.3d at 38, whereas "an impersonal reproach of an indeterminate class is not actionable," Gross v. Cantor, 270 N.Y. 93, 200 N.E. 592, 593 (1936); Diaz v. NBC Universal, Inc., 536 F. Supp. 2d 337, 343 (S.D.N.Y. 2008), *aff'd*, 337 F. App'x 94 (2d Cir. 2009) ("Under the group libel doctrine, when a reference is made to a large group of people, no individual within that group can fairly say that the statement is about him, nor can the 'group' as a whole state a claim for defamation."). New York courts apply an "intensity of suspicion" test to determine whether statements made against a group are actionable under a group libel theory, considering factors such as the size of the group, its definiteness in number and composition, its degree of organization and prominence, and the degree to which the defamatory comments focus on individual members. *See* Elias, 872 F.3d at 108; Anyanwu v. Columbia Broad. Sys., Inc., 887 F. Supp. 690, 693 (S.D.N.Y. 1995); Brady v. Ottaway Newspapers, Inc., 84 A.D.2d 226, 445 N.Y.S.2d 786, 790 (2d Dep't 1981).

Here, the Blog Post can reasonably be interpreted as being "of and concerning" everyone that uses or has used Sanborn Maps not procured from EDR for commercial purposes. **[*60]** This group seems to include data provision firms such as ERIS, who provide ERAD report packages including Sanborn Maps to environmental professionals, as well as the environmental professionals who then use these packages to create Phase I ESA Reports. While ERIS's opposition asserts (in a single sentence) that the Blog Post makes implied statements about ERIS,[34] ERIS has not pleaded any facts suggesting that a reasonable reader would understand the Blog Post to be referring to ERIS individually. Chicherchia v. Cleary, 207 A.D.2d 855, 616 N.Y.S.2d 647, 648 (2d Dep't 1994) ("[W]here extrinsic facts are relied upon to prove such reference the party alleging defamation must show that it is reasonable to conclude that the publication refers to him or her and the extrinsic facts upon which that conclusion is based were known to those who read or heard the publication."). Moreover, ERIS has not alleged any information regarding the (approximate) size or definitiveness/stability of the referenced group to enable application of the "small group libel doctrine." Elias, 872 F.3d at 108 (noting that "successful small group defamation claims typically involve groups with twenty-five or fewer members," though New York courts have allowed claims to go forward where the relevant group included **[*61]** 53 members). Thus, the District Court should reject ERIS's conclusory statement that the Blog Post makes an implied representation about ERIS.

b. Oral Statements

Next, I find that EDR cannot base defamation liability on the Oral Statements[35] because ERIS fails to plead the identity of a single individual who made such statements or to provide any details regarding when they were made or to whom they were communicated.

It is well-settled that allegations regarding defamatory statements or misrepresentations must provide some identifying information regarding the relevant statements, who made them, when they were made, and to whom they were communicated. *See, e.g.,* Evliyaoglu Tekstil A.S. v. Turko Textile LLC, No. 19-CV-10769 (LJL), 2020 U.S. Dist. LEXIS 244703, 2020 WL 7774377, at *3 (S.D.N.Y. Dec. 30, 2020) ("A long line of cases in this District holds that a defamation claim is only sufficient if it adequately identifies the purported communication, and an indication of who made the communication, when it was made, and to whom it was communicated.") (internal citations omitted).[36]

---

[34] Any argument for defamation liability based on the Blog Post may also be deemed waived or abandoned due to ERIS's failure to sufficiently address it in its opposition brief. *See supra* note 10; ECF 47 at 26.

[35] I have already found Oral Statement 1 to constitute unactionable opinion. *See supra* Section III.D.1.

[36] Under New York procedural law, a plaintiff must plead defamatory statements with greater particularity. N.Y. C.P.L.R. 3016(a) ("In an action for libel or slander, the particular words complained of shall be set forth in the complaint . . . ."). While federal courts instead subject defamation claims to the more "liberal pleading standards of Fed R. Civ. P. 8," courts in this Circuit have repeatedly emphasized that "[e]ven under the more lenient federal standard, however, the [litigant] must at least 'identify the

ERIS alleges that certain oral statements were made by "EDR and its agents and representatives" to "consumers and potential consumers," but does not provide even approximate dates of any instances that such comments were made. ¶¶ 68, **[*62]** 70, 101-103; 126; 159. Moreover, EDR provides no indication of who at EDR made the statements and to which customers and potential customers the statements were made. ERIS cannot survive a motion to dismiss based on these oral statements without providing further identifying information. *See Adyb Engineered for Life, Inc. v. Edan Admin. Servs. Ltd., No. 1:19-CV-7800 (MKV), 2021 U.S. Dist. LEXIS 59666, 2021 WL 1177532, at *25 (S.D.N.Y. Mar. 29, 2021)* (granting motion to dismiss where plaintiff "vaguely" alleged that defendant's owner sent emails to "representatives" of a company without identifying those representatives or when the emails were sent); *MCM Prod. USA, Inc. v. Botton, No. 16-CV-1616, 2016 U.S. Dist. LEXIS 127426, 2016 WL 5107044, at *6 (S.D.N.Y. Sept. 19, 2016)* (granting motion to dismiss where counterclaim-plaintiffs merely "allege[d] that an unidentified [counterclaim-defendant] employee told an unidentified customer of [counterclaim-plaintiffs] that the . . . goods sold by [counterclaim-plaintiffs] were counterfeit and defective," without providing the date, time, or location of the statement or identifying information for the employee-speaker or customer-listener); *Neal, 2014 U.S. Dist. LEXIS 113142, 2014 WL 3887760, at *3* (granting motion to dismiss and finding that "plaintiff's failure to identify the anonymous 'employee or agent of [defendant-organization]' responsible for making the statement [was] fatal to his [defamation] claim"); *Biomed Pharms., Inc. v. Oxford Health Plans (N.Y.), Inc., 775 F. Supp. 2d 730, 739 (S.D.N.Y. 2011)* (granting motion to dismiss where plaintiff alleged "only vaguely **[*63]** that [the statements] were made to unidentified patients of [plaintiff], unidentified physicians, and unidentified individuals at the [state agency]"); *Camp Summit of Summitville, Inc. v. Visinski, No. 06-CV-4994 (CM) (GAY), 2007 U.S. Dist. LEXIS 28496, 2007 WL 1152894, at *10 (S.D.N.Y. Apr. 16, 2007)* (granting motion to dismiss where counterclaim-plaintiff "neither allege[d] who at [counterclaim-defendant's organization] made the defamatory remarks, nor to whom the comments were made").[37]

c. Litigation Statements

Lastly, at this point in the proceedings, I do not find that EDR-Sanborn is immunized from defamation liability based on New York's "fair report" litigation privilege. Accordingly, ERIS's defamation claim may proceed only based on the Litigation Statements.

Under *Section 74* of New York's Civil Rights Law, absolute privilege attaches to any statement giving a substantially fair and accurate reporting of judicial proceedings. *N.Y. Civ. Rights Law § 74*. However, in *Williams v. Williams*, the New York Court of Appeals clarified that *Section 74* does not permit a person or entity to "maliciously institute a judicial proceeding alleging false and defamatory charges, and to then circulate a press release or other communication based thereon and escape liability by invoking the statute." *23 N.Y.2d 592, 246 N.E.2d 333, 337, 298 N.Y.S.2d 473 (1969)*; *Sparrow Fund Mgmt. LP v. MiMedx Grp., Inc., No. 18-CV-4921 (PGG) (KHP), 2020 U.S. Dist. LEXIS 49813, 2020 WL 1330283, at *7 (S.D.N.Y. Mar. 22, 2020)* ("[S]tatements made as part of a sham or 'maliciously instituted' action, or communications **[*64]** about such an action, are not privileged."); *Flomenhaft v. Finkelstein, 127 A.D.3d 634, 8 N.Y.S.3d 161, 165 (1st Dep't 2015)* ("[T]he privilege is capable of abuse and will not be conferred where the underlying lawsuit was a sham action brought solely to defame the defendant"). Still, courts have emphasized that *Williams* created a "narrow" exception that "does not apply in the absence of any allegation that the . . . [underlying] action was brought maliciously and solely for the purpose of later defaming the plaintiff." *Fuji Photo Film U.S.A., Inc. v. McNulty, 669 F. Supp. 2d. 405, 412 (S.D.N.Y.2009)* (internal citations omitted).

---

allegedly defamatory statements, the person who made the statements, the time when the statements were made, and the third parties to whom the statements were published.'" *Neal v. Asta Funding, Inc., 13-CV-2176 (VB), 2014 U.S. Dist. LEXIS 113142, 2014 WL 3887760, at *3 (S.D.N.Y. June 17, 2014)* (quoting *Mobile Data Shred. Inc. v. United Bank of Switzerland, 2000 U.S. Dist. LEXIS 4252, 2000 WL 351516, at *6 (S.D.N.Y. Apr. 5, 2000)*); *see Alvarado v. Mount Pleasant Cottage Sch. Dist., 404 F. Supp. 3d 763, 790 (S.D.N.Y. 2019)*.

[37] ERIS has now had the opportunity to take discovery on these statements, which are also relevant to ERIS's affirmative defense of copyright misuse that EDR-Sanborn has not moved to strike.

Here, ERIS alleges that EDR-Sanborn intentionally filed a sham lawsuit against ERIS and publicized its allegations on EDR's website and via email in order to injure ERIS and drive away customers. ¶¶ 94-102, 132-136. As discussed above, the Copyright Suit remains pending and has neither been subjected to dispositive motion practice nor been decided to be (or not be) a sham as a matter of law. *See supra* Section III.B.2.a. Thus, "[w]hether the [Copyright Suit] meet[s] [the *Williams*] standard is an open question of fact that cannot be resolved on a motion to dismiss." *Frydman v. Verschleiser, 172 F. Supp. 3d 653, 673 (S.D.N.Y. 2016)* (dismissing defamation claim pursuant to New York's fair report privilege only insofar as it was related to a dismissed state court lawsuit because the **[*65]** state court's denial of sanctions established that the suit was not a sham, but refusing to dismiss defamation claim insofar as it was related to two pending lawsuits); *see Long v. Marubeni Am. Corp., 406 F. Supp. 2d 285, 296 (S.D.N.Y. 2005)* (explaining that "[d]evelopment of a factual record, and further developments in this lawsuit, may well permit the Court to conclude that the [allegedly defamatory] e-mail was absolutely privileged [under *Section 74*], but the applicability of the privilege cannot be ascertained solely from the facts alleged in plaintiffs' complaint"). Accordingly, *at least at this stage of the case*, the fair report privilege does not immunize EDR from any defamation liability.[38]

3. Product Disparagement and Trade Libel (Counts IX and XI)

EDR-Sanborn argues that ERIS's Product Disparagement (Count IX) and Trade Libel (Count XI) claims fail for the same reasons its defamation claim fails, *as well as for the additional reason that ERIS fails to plead special damages*. I recommend that these claims (Counts IX and XI) be dismissed *in toto* for failure to plead special damages.

Under New York law, "[t]rade libel or product disparagement is an action to recover for words or conduct which tend to disparage or negatively **[*66]** reflect upon the condition, value or quality of a product or property." *Angio-Med. Corp. v. Eli Lilly & Co., 720 F. Supp. 269, 274 (S.D.N.Y.1989)*; *Bilinski v. Keith Haring Found., Inc., 96 F. Supp. 3d 35, 51 & n.15 (S.D.N.Y. 2015)*, *aff'd in part*, *632 F. App'x 637 (2d Cir. 2015)* (observing that defamation of a product, under New York law, is "described interchangeably as trade libel, injurious falsehood, and product disparagement"). To recover for such a claim, a "plaintiff must show that the defendant published a[] . . . defamatory statement directed at the quality of a business's goods *and must prove that the statements caused special damages*." *Fashion Boutique of Short Hills, Inc. v. Fendi USA, Inc., 314 F.3d 48, 59 (2d Cir. 2002)* (emphasis added).

As Judge Liman recently emphasized, "[a]n adequate pleading of special damages must clear several hurdles." *Soter Techs., LLC v. IP Video Corp., 523 F. Supp. 3d 389, 2021 WL 744511, at *13 (S.D.N.Y. 2021)*. Special damages are "limited to losses having pecuniary or economic value, and must be fully and accurately stated, with sufficient particularity to identify actual losses." *Enigma Software Grp. USA, LLC v. Bleeping Computer LLC, 194 F. Supp. 3d 263, 292 (S.D.N.Y. 2016)* (quoting *Kirby v. Wildenstein, 784 F. Supp. 1112, 1116 (S.D.N.Y. 1992)*). "[S]pecial damages must [also] be the natural and immediate consequence of the disparaging statements to be recoverable." *Kirby, 784 F. Supp. at 1116* (internal citations omitted). Further, "[w]here loss of customers constitutes the alleged special damages, the individuals 'who ceased to be customers, or who refused to purchase, must be named' and the exact damages itemized." *Fashion Boutique, 314 F.3d at 57* (quoting *Drug Research Corp. v. Curtis Publ'g Co., 7 N.Y.2d 435, 166 N.E.2d 319, 322, 199 N.Y.S.2d 33 (1960)*); *Dentsply Int'l Inc. v. Dental Brands for Less LLC, No. 15-CV-8775 (LGS), 2016 U.S. Dist. LEXIS 149139, 2016 WL 6310777, at *6 (S.D.N.Y. Oct. 27, 2016)* (explaining that "general allegations of lost sales from **[*67]** unidentified customers are insufficient" and "[r]ound figures or a general allegation of a dollar amount . . . will not suffice"). Because whether a plaintiff has suffered special damages "goes to the cause of an action itself and not merely to the recovery . . . Courts considering product disparagement claims have therefore applied this requirement strictly, granting motions to

---

[38] EDR-Sanborn also argues that ERIS's defamation, as well as all other claims made in Counts VI-XII, should be dismissed pursuant to the *Noerr-Pennington* doctrine insofar as they are based on the Litigation Statements. (ECF 45 at 31 & n. 24). However, for the reasons stated in Section III.B.2.a, any dismissal based on *Noerr-Pennington* immunity should not be granted at this point in the litigation.

dismiss . . . for failure to allege special damages with the requisite specificity." Enigma Software Grp., 194 F. Supp. 3d at 292 (quoting Computech Int'l, Inc. v. Compaq Computer Corp., 2002 U.S. Dist. LEXIS 20307, 2002 WL 31398933, at *6 (S.D.N.Y. Oct. 24, 2002)).

With respect to damages, ERIS has only alleged injury "in an amount to be determined at trial" with one example: "an inability to achieve any sales with Company K, which has refused to do business with ERIS because of this lawsuit and EDR's statements to the public about this lawsuit." ¶¶ 226, 242-43; *see* ¶ 128 (explaining that "an individual at Company K told a sales agent for ERIS that they were not interested in meeting with ERIS to see a demonstration of ERIS's products and services because of this lawsuit"). EDR has not actually named any lost customers—let alone customers lost due to product disparagement specifically, rather than the Copyright Suit—nor made any attempt to quantify its damages resulting from **[*68]** the allegedly disparaging statements. Given the stringent requirement to plead special damages, ERIS' allegations are too general to avoid dismissal.[39]

ERIS's argument that it is exempt from pleading special damages lacks merit. ERIS argues that it need not allege special damage with particularity because "the nature of ERIS's business and the widespread dissemination of disparaging statements" makes it "impossible . . . at this stage" for ERIS to identify lost customers. (ECF 47 at 30-31). However, the cases relied on by ERIS—Charles Atlas, Ltd. v. Time-Life Books, Inc., 570 F. Supp. 150 (S.D.N.Y.1983) and Romeo & Juliette Laser Hair Removal, Inc. v. Assara I LLC, No. 08-CV-442 (TPG) (FM), 2014 U.S. Dist. LEXIS 133839, 2014 WL 4723299 (S.D.N.Y. Sept. 23, 2014)—are inapposite and do not excuse ERIS's failure to quantify its damages.

In *Charles*, Judge Goettel held that the plaintiff did not need to identify lost customers because the plaintiff made sales to an amorphous customer base only through mail orders, making it "virtually impossible to identify those who did not order the plaintiff's product because . . . [i]n all likelihood, such people would simply have failed to order, thus leaving no record of their identity." Charles, 570 F. Supp. at 156; *cf.* Verizon Directories Corp. v. Yellow Book USA, Inc., 309 F. Supp. 2d 401, 408 (E.D.N.Y. 2004) (dismissing product disparagement claim for not identifying lost customers where plaintiff "ma[de] no representation that it is in the nature of its business not to have direct contact **[*69]** with its customers"). Critically, however, Judge Goettel found that "plaintiff ha[d] pleaded special damages adequately" by identifying an exact amount of lost sales and revenues, as well as an exact amount of "special advertising expenses" incurred to counteract the alleged product disparagement. Id. at 155. ERIS, on the other hand, has not attempted to quantify its lost sales or provided any other enumeration of special damages. Moreover, it appears that the only New York decision to (at least explicitly) adopt the exception to the requirement of naming lost customers established by *Charles* was reversed on appeal because "[p]laintiffs failed to plead . . . special damages with the requisite specificity." *Prince v. Fox Tel. Stas., Inc., 93 A.D.3d 614, 941 N.Y.S.2d 488, 488 (2012)*; Bilinski, 96 F. Supp. 3d at 52 (noting that *Charles* predates *Prince* and finding that "[n]one of the authorities cited by plaintiffs [including *Charles*] excuse[d] their failure to identify the amount of lost sales").

Later, in *Romeo & Juliette*, Judge Griesa held that the plaintiff was not required to allege special damages to state a claim of product disparagement arising from anonymous reviews made on websites, such as "Yelp.com," because it was "impossible at [the motion to dismiss] stage" for plaintiff to identify lost **[*70]** customers. 2014 U.S. Dist. LEXIS 133839, 2014 WL 4723299, at *6. Notably, *Romeo & Juliette* relied on *Charles*, which—as noted above—predates

---

[39] *See, e.g.,* Soter, 523 F. Supp. 3d 389, 2021 WL 744511, at *13 (finding insufficient plaintiff's conclusory allegation that "[a]s a natural and immediate consequence of [the] disparaging statements [alleged], [plaintiff] suffered monetary losses in the amount of at least $1990," because plaintiff provided "no further explanation," did not identify the lost customer other than as a "school on the west coast," and did not present facts showing that a sale was imminent or foreseeable); Enigma Software Grp., 194 F. Supp. 3d at 292 (finding "far too generalized" plaintiff's allegation that it "has and will continue to suffer significant monetary and reputational injury in amounts that will be proven at trial but that are believed to exceed $75,000"); Kirby, 784 F. Supp. at 1116, 1118 (finding plaintiff's "vague allegations" that it sustained $250,000 in damages as a result of disparaging remarks about a painting it sought to sell, without "specify[ing] the losses underlying that figure" or identifying anyone who did not bid on the painting because of the alleged disparagement, were "clearly inadequate" to plead special damages); Drug Research Corp., 166 N.E.2d at 441 (holding that plaintiff failed to plead special damages where it alleged damages of $5 million because "[s]uch round figures, with no attempt at itemization, must be deemed to be a representation of general damages").

Prince. Moreover, while the court in *Romeo & Juliette* exempted the plaintiff from itemizing damages (rather than merely from naming lost customers, as done in *Charles*), the weight of authority indicates that even where it is impossible for plaintiffs to identify lost customers, "plaintiffs must do more than estimate damages." *Bilinski, 632 F. App'x 637 at 642-42* (collecting cases). Here, ERIS has not even provided such an estimate. Lastly, whereas the nature of the *Romeo & Juliette* plaintiff's business as a laser hair-removal establishment serving limitless consumers in New York made it impossible for the plaintiff to identify customers lost due to anonymous disparaging posts on online forums, ERIS's complaint raises no such inference. Instead, ERIS's reference to "Company K" and various customer relationships with which EDR allegedly interfered, as well as ERIS's admitted familiarity and contact with the companies that make up the majority of the market's customer-base, suggest that it ***is*** possible for ERIS to identify lost customers and plead special damages. *See* ¶¶ 69, 118, 121-23, 128, 135, 243; *Bilinski, 632 F. App'x at 642* ("In light of plaintiffs' allegations **[*71]** regarding [a] lost sale to a museum with whose representative he has spoken, plaintiffs do not plausibly allege the impossibility of identification."); *Fashion Boutique of Short Hills, Inc. v. Fendi USA, Inc., 75 F. Supp. 2d 235, 240 (S.D.N.Y. 1999)*, *aff'd*, *314 F.3d 48 (2d Cir. 2002)* (finding identification possible where plaintiff maintained a customer list and could contact lost customers to determine why they stopped shopping at plaintiff's store).

4. Lanham Act (Count VI)

ERIS alleges violations of *Section 43(a)* of the Lanham Act based on all four categories of challenged statements. For the reasons set forth below, I recommend that ERIS's Lanham Act claim be dismissed with regard to the Oral Statements.

Section 43 of the Lanham Act provides, in relevant part, for civil liability if a defendant's "commercial advertising or promotion[] misrepresents the nature, characteristics, qualities, or geographic origin of his or her or another person's good, services, or commercial activities." *15 U.S.C. § 1125(a)(1)(B)*. To prove liability, "a plaintiff must establish that the challenged message is (1) either literally or impliedly false, (2) material, (3) placed in interstate commerce, and (4) the cause of actual or likely injury to the plaintiff." *Church & Dwight Co. v. SPD Swiss Precision Diagnostics, GmBH, 843 F.3d 48, 65 (2d Cir. 2016)*. In addition to the arguments regarding opinion statements and *Noerr-Pennington* immunity addressed above, *see* ***[*72]*** *supra* Section III.D.1 and note 38, EDR-Sanborn argues that ERIS's Lanham Act claim fails in two respects: (a) the Oral Statements are too indefinite to support a claim and (b) neither the Blog Post nor the CMI make false statements about EDR-Sanborn's goods, services, or commercial activities.

a. The Oral Statements

EDR-Sanborn argues that the Oral Statements cannot form the basis of *Section 43* liability because ERIS does not allege who made these statements, when they were made, or to whom they were made. I interpret this argument as positing that ERIS has not sufficiently identified these statements as "commercial advertising or promotion." I agree.

As a threshold matter, *Section 43* expressly only applies to "commercial advertising or promotion." Though not limited to representations made as part of a classic advertising campaign, commercial advertising or promotion must be "(1) commercial speech, as defined by the *First Amendment*, (2) made 'for the purpose of influencing consumers to buy defendant's goods or services,' and (3) 'disseminated sufficiently to the relevant purchasing public.'" *Globe Cotyarn Pvt. Ltd. v. Next Creations Holdings LLC, No. 18-CV-04208 (ER), 2019 U.S. Dist. LEXIS 21226, 2019 WL 498303, at *4 (S.D.N.Y. Feb. 8, 2019)* (quoting *Boule v. Hutton, 328 F.3d 84, 90-91 (2d Cir. 2003)*).

Critically, pursuant to the third prong, "businesses harmed by isolated disparaging statements do not have redress under **[*73]** the Lanham Act." *Fashion Boutique, 314 F.3d at 57* (finding "twenty-seven oral statements regarding plaintiff's products in a marketplace of thousands of customers" were not disseminated sufficiently widely to constitute commercial adverting or promotions). While the Second Circuit has not set an exact number or percentage of customers that must be exposed to the challenged statement for it to qualify as sufficiently disseminated, courts in this District have found that a plaintiff cannot rely on conclusory allegations of widespread dissemination to unidentified customers. *Globe Cotyarn Pvt. Ltd., 2019 U.S. Dist. LEXIS 21226, 2019 WL 498303, at *4* (canvassing caselaw and concluding allegations regarding messages sent to two identified customers in a marketplace of an unidentified size and "naked assertions" of messages sent to other unidentified customers did not sufficiently plead the dissemination prong); *Solmetex, LLC v. Dental Recycling of N. Am., Inc., No. 17-CV-860 (JSR), 2017 U.S. Dist. LEXIS 102451, 2017 WL 2840282, at *3 (S.D.N.Y. June 26, 2017)* (rejecting conclusory allegations of widespread dissemination made without detail and "solely upon information and belief").

ERIS's Counterclaims states, "on information and belief," that the Oral Statements were made by EDR's agents to customers and potential customers "routinely," "repeatedly," "on a frequent basis" and as part of "an extensive marketing campaign." ¶¶ 68, 71, 82, 101, **[*74]** 105. However, these bare assertions regarding a belief of widespread dissemination and existence of an oral marketing campaign, without more, are not enough to plead sufficient dissemination. *Solmetex, LLC, 2017 U.S. Dist. LEXIS 102451, 2017 WL 2840282, at *3* (explaining that while allegations solely on information on belief are appropriate "where the facts are peculiarly within the possession and control of the defendant or where the belief is based on factual information that makes the inference of culpability plausible, such allegations must be accompanied by a statement of the facts upon which the belief is founded") (internal citations omitted). Accordingly, EDR-Sanborn's motion to dismiss any Lanham Act false advertising claim based on the Oral Statements should be granted. *See* *Weight Watchers Int'l, Inc. v. Noom, Inc., 403 F. Supp. 3d 361, 376 (S.D.N.Y. 2019)* (dismissing one category of statements based on insufficient public dissemination); *In re Elysium Health-Chromadex Litig., 2018 U.S. Dist. LEXIS 168417, 2018 WL 4907590, at *9 (S.D.N.Y. Sept. 27, 2018)* (same).

b. The Blog Post and CMI

Next, I find that ERIS has plausibly alleged that the Blog Post and CMI make false statements about the Sanborn Maps supposedly owned and exclusively licensed by EDR-Sanborn. An allegation of false advertisement "may be based on at least one of two theories: [1] that the challenged advertisement is literally false, *i.e.*, false on its face, or [2] that the **[*75]** advertisement, while not literally false, is nevertheless likely to mislead or confuse consumers." *Chanel, Inc. v. RealReal, Inc., 449 F. Supp. 3d 422, 442 (S.D.N.Y. 2020)* (quoting *Tiffany (NJ) Inc. v. eBay Inc., 600 F.3d 93, 103 (2d Cir. 2010)*). Under the second "impliedly false" prong, "[t]he Court may presume that the advertisement is misleading where the defendant's misrepresentation is intentional." *Turbon Int'l, Inc. v. Hewlett-Packard Co., 769 F. Supp. 2d 262, 268 (S.D.N.Y. 2011)*. Under either prong, the misrepresentation must be "material," in that it would influence consumers' purchasing decisions. *Id.*

ERIS alleges that the Blog Post and CMI falsely represent that ***all*** Sanborn Maps are protected by copyright and can only be legally used in Phase 1 ESA Reports when obtained from EDR-Sanborn, though EDR-Sanborn knows that many Sanborn Maps are in the public domain. As already detailed above, the Blog Post categorically states, among other things, that "[w]hen Sanborn Maps . . . are not procured via EDR and The Sanborn Library, it is against copyright to include them in a Phase I or similar report," and the CMI consists of Sanborn's corporate logo, a copyright date, and a legend stating that "[o]nly Environmental Data Resources (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection." ¶¶ 62, 65. Critically, the **[*76]** CMI is allegedly included on and with ***each and every*** Sanborn Map provided by EDR, including those published before 1924 or whose copyright protection was not timely renewed; for example, in the Sample Report available on EDR's website, the CMI is physically included on all enclosed maps, including those dating back to 1890. ¶¶ 62-64. Drawing all inferences in favor of ERIS, and considering each statement in context, I find that ERIS has plausibly alleged that the Blog Post and CMI make literally false or deliberately misleading representations about Sanborn Maps, at least some of which are plausibly in the public domain. Moreover, because Sanborn Maps are used today for Phase 1 ESA Reports and are supposedly necessary for generating standard-compliant Reports, ERIS has also plausibly alleged that these misrepresentations are material in that they would influence the purchasing decisions of consumers in the ERAD market.

5. New York's General Business Law (Counts VII and VIII)

EDR-Sanborn next argues that the District Court should dismiss ERIS's New York General Business Law § 349 and § 350 (individually, "Section 349" and "Section 350," or together, "GBL") claims for failure to adequately plead consumer injury. I recommend against dismissal on this **[*77]** ground. Like ERIS's Lanham Act claims, ERIS's GBL claims may proceed except with respect to the Oral Statements. *See* Mimedx Grp., Inc. v. Osiris Therapeutics, Inc., No. 16-CV-3645 (KPF), 2017 U.S. Dist. LEXIS 114105, 2017 WL 3129799, at *14 (S.D.N.Y. July 21, 2017) (collecting cases for the proposition that GBL claims are analyzed under substantially the same standard as claims under Section 43 of the Lanham Act, including with regard to the requirement of commercial or consumer-oriented conduct); In re Elysium Health-Chromadex Litig., 2018 U.S. Dist. LEXIS 168417, 2018 WL 4907590, at *13 (holding that counterclaim-plaintiff's Section 349 claim may proceed only "on the basis of the statements above that the Court deemed sufficiently pleaded to sustain a Lanham Act claim"); ECF 45 at 32 n.25 and ECF 47 at 26 (analyzing GBL and Lanham Act claims together).

Section 349 and Section 350 are "directed at wrongs against the consuming public." Car-Freshner Corp. v. D & J Distributing and Mfg., Inc., 2014 U.S. Dist. LEXIS 109944, 2014 WL 3900564, at *4 (S.D.N.Y. Aug. 8, 2014) (quoting Oswego Laborers' Local 214 Pension Fund v. Marine Midland Bank, 85 N.Y.2d 20, 647 N.E.2d 741, 744, 623 N.Y.S.2d 529 (1995)). Section 349 prohibits "[d]eceptive acts or practices in the conduct of any business, trade or commerce or in the furnishing of any service in this state." Section 350 prohibits "[f]alse advertising in the conduct of any business, trade or commerce or in the furnishing of any service in this state."

To state a claim under Section 349, a plaintiff must allege "(1) the [challenged] act or practice was consumer-oriented; (2) the [challenged] act or practice was misleading in a material respect; and (3) the plaintiff was injured as a result." Spagnola v. Chubb Corp., 574 F.3d 64, 74 (2d Cir. 2009). "The standard **[*78]** for recovery under General Business Law § 350, while specific to false advertising, is otherwise identical to section 349." New World Sols., Inc. v. NameMedia Inc., 150 F. Supp. 3d 287, 330 (S.D.N.Y. 2015) (collecting cases). Under both sections, the standard is objective, meaning that the challenged act or practice must be likely to mislead a reasonable consumer under the circumstances. Cline v. TouchTunes Music Corp., 211 F. Supp. 3d 628, 635 (S.D.N.Y. 2016) (Kaplan, J.).

Critically, while business competitors may bring suit under these sections if there is "some harm to the public at large," in order "to successfully state a claim under Section 349 'the gravamen of the complaint must be consumer injury or harm to the public interest.'" Electra v. 59 Murray Enterprises, Inc., 987 F.3d 233, 258 (2d Cir. 2021) (quoting Securitron Magnalock Corp. v. Schnabolk, 65 F.3d 256, 264 (2d Cir. 1995)). While this requirement "has been construed liberally," New York v. Feldman, 210 F. Supp. 2d 294, 301 (S.D.N.Y. 2002), the public or consumer harm caused by the challenged conduct must be more than mere consumer confusion. Mayes v. Summit Entm't Corp., 287 F. Supp. 3d 200, 208 (E.D.N.Y. 2018).

Here, ERIS alleges that EDR's statements falsely represent that all Sanborn Maps are under copyright and must be obtained from EDR, and that any of ERIS's products containing Sanborn Maps are unlawful. EDR's statements were supposedly made to "to misinform and create confusion among . . . consumers." ¶ 203. ERIS has also alleged injury other than mere consumer confusion: harm to consumers via reduced competition in the market for environmental risk assessment data. *See* Actava TV, Inc. v. Joint Stock Co. "Channel One Russia Worldwide," 412 F. Supp. 3d 338, 353 (S.D.N.Y. 2019) (finding **[*79]** that competitor-plaintiff plausibly alleged consumer injury beyond mere confusion where defendant's conduct "caused damage to competition . . ., harming consumers via the reduced competition in the market"). ERIS's complaint is replete with allegations that EDR's misrepresentations have harmed competition by, for example, dissuading entities from entering or remaining in the market. ¶¶ 5, 7, 46, 56, 60, 64-65, 71-72, 130. Moreover, ERIS suggests that consumers are economically harmed by being misled into believing that they must pay EDR for maps in the public domain that can be lawfully copied for free. ¶¶ 27, 30, 65, 67. Thus, while EDR-Sanborn argues that the gravamen of the harm alleged by ERIS is to ERIS's own business by way of lost customers and sales to EDR, I recommend against dismissal of ERIS's GBL claims because "[a]t this stage, the facts alleged . . . are sufficient to make it plausible that [EDR-Sanborn's] conduct carries with it 'significant ramifications for the public at large.'" Actava, 412 F. Supp. 3d at 353.

6. Tortious Interference (Count XII)

Lastly, EDR-Sanborn argues that ERIS's tortious interference claim is inadequately pleaded in all respects. I recommend that this claim be dismissed for **[*80]** failure to sufficiently plead a business relationship with a third party with which EDR-Sanborn intentionally interfered.

To state a claim for tortious interference with prospective economic advance under New York Law, ERIS must allege that: (1) "it had a business relationship with a third party"; (2) EDR-Sanborn "knew of that relationship and intentionally interfered with it"; (3) EDR-Sanborn "acted solely out of malice, or used dishonest, unfair, or improper means"; and (4) EDR-Sanborn's "interference caused injury to the relationship." *Kirch v. Liberty Media Corp., 449 F.3d 388, 400 (2d Cir. 2006)* (quoting *Carvel Corp. v. Noonan, 350 F.3d 6, 17 (2d Cir. 2003)*.

As an initial matter, ERIS's claim easily satisfies the third requirement by alleging "improper means." Generally, in order to satisfy this element, "the defendant's conduct must amount to a crime or an independent tort." *Carvel Corp. v. Noonan, 3 N.Y.3d 182, 818 N.E.2d 1100, 1103, 785 N.Y.S.2d 359 (2004)* (answering certified question from Second Circuit).[40] Here, I have already found that ERIS has adequately stated claims for antitrust violations, defamation, false advertising, and deceptive practices based on some of the same conduct and statements underlying ERIS's tortious interference claim. As both parties acknowledge, if the District Court adopts my recommendations regarding those claims, the District Court must also **[*81]** find that ERIS has adequately pleaded improper conduct for purposes of its tortious interference claim. (ECF 45 at 35; ECF 47 at 34-35; ECF 51 at 15).

ERIS has not adequately alleged, however, causation or a relevant business relationship with a third party. In a few cases, courts have only required that a plaintiff allege a "reasonable expectancy" of contracting with a particular third-party, which "can result from mere negotiations." *See, e.g., Glob. Packaging Servs., LLC v. Glob. Printing & Packaging, 248 F. Supp. 3d 487, 494 (S.D.N.Y. 2017)* (quoting *Strapex Corp. v. Metaverpa N.V., 607 F. Supp. 1047, 1050 (S.D.N.Y. 1985)*). The weight of authority in this Circuit and the New York Appellate Divisions, however, indicates that a plaintiff must further allege that it "would have entered into an economic relationship [with a specific third party] but for the defendant's wrongful conduct." *See, e.g., Downtown Music Publ'g LLC v. Peloton Interactive, Inc., 436 F. Supp. 3d 754, 766 & n.6 (S.D.N.Y. 2020)* (quoting *Premium Mortg. Corp. v. Equifax, Inc., 583 F.3d 103, 107 (2d Cir. 2009)*) (rejecting argument that a "reasonable expectancy" was sufficient to state a tortious interference claim); *Shawe v. Kramer Levin Naftalis & Frankel LLP, 167 A.D.3d 481, 91 N.Y.S. 3d 369, 373 (1st Dep't 2018)* (affirming dismissal where plaintiff made conclusory allegations of a potential business relationship and did not "allege, as required, that but for defendants' conduct plaintiff would have had an economic relationship with the" third party); *Zetes v. Stephens, 108 A.D.3d 1014, 969 N.Y.S.2d 298, 304 (4th Dep't 2013)* ("[A] plaintiff is required to identify a specific customer that the plaintiff would have obtained **[*82]** 'but for' the defendant's wrongful conduct."); N.Y. Pattern Jury Instructions 3:57 (2020) (collecting cases addressing causation).[41]

---

[40] "There is at least one exception to the general rule that the defendant's conduct must be criminal or independently tortious: If the plaintiff can demonstrate that the 'defendant engage[d] in conduct for the sole purpose of inflicting intentional harm on plaintiffs,' then the wrongful means element of the test is satisfied." *Gym Door Repairs, Inc. v. Young Equip. Sales, Inc., 206 F. Supp. 3d 869, 908 (S.D.N.Y. 2016)* (quoting *Carvel, 818 N.E.2d at 1103*).

[41] Indeed, courts in this District routinely grant motions to dismiss tortious interference claims for failure to allege but for causation. *See, e.g., Chahine v. City of New York, No. 19-CV-0276 (DLC), 2020 U.S. Dist. LEXIS 89162, 2020 WL 2555228, at *4 (S.D.N.Y. May 20, 2020)*; *Nat'l Air Cargo Grp., Inc. v. Maersk Line Ltd., No. 17-CV-8659 (KPF), 2019 U.S. Dist. LEXIS 166871, 2019 WL 4735426, at *10 (S.D.N.Y. Sept. 27, 2019)*; *Arcadia Biosciences, Inc. v. Vilmorin & Cie, 356 F. Supp. 3d 379, 405 (S.D.N.Y. 2019)*; *see also J&R Multifamily Grp., Ltd. v. U.S. Bank Nat'l Ass'n as Tr. for Registered Holders of UBS-Barclays Com. Mortg. Tr. 2012-C4, Com. Mortg. Pass-Through Certificates, Series 2012-C4, No. 19-CV-1878 (PKC), 2019 U.S. Dist. LEXIS 209758, 2019 WL 6619329, at *6 (S.D.N.Y. Dec. 5, 2019)* (finding an "actual conflict" between New York and Texas substantive tortious interference law because New York law requires an allegation of but for causation whereas Texas only requires plaintiff to allege a "reasonable probability" of entering into a transaction).

Here, ERIS provides only one example of a business relationship with which EDR has interfered: ERIS's relationship with Company K. ¶¶ 128, 135, 249, 251.[42] However, ERIS has not suggested a reasonable expectation of transacting with Company K, let alone (as required) that that a transaction with Company K would have been consummated but for EDR's alleged interference. Instead, ERIS only pleads that "Company K has refused to do business with ERIS" and that "an individual at Company K told a sales agent for ERIS that they were not interested ***in meeting*** with ERIS to see a demonstration of ERIS's products and services" because of (EDR's statements regarding) this lawsuit. *Id.* (emphasis added). ERIS has not alleged that it was actively involved in negotiations with Company K or any other particular prospective customer or that an economic relationship would have been consummated between ERIS and any particular customer but for EDR's statements.

Moreover, Plaintiff alleges no facts suggesting that EDR-Sanborn knew of ERIS's business relationship **[*83]** with Company K, let alone intentionally interfered with that relationship. ERIS's vague and conclusory statement that "Counterclaim Defendants had knowledge of ERIS's business relations" is insufficient. *See, e.g., Wolff v. Rare Medium, Inc., 171 F. Supp. 2d 354, 360 (S.D.N.Y. 2001)* (dismissing tortious interference claim featuring only conclusory assertions of knowledge, noting that "even on a motion to dismiss, is not required to accept conclusory allegations—particularly allegations such as those asserted here, characterizing or attributing a state of mind of another person"); N.Y. Pattern Jury Instr. Civil 3:57 (noting that defendant is required to have knowledge of the prospective business relationship, though not specific terms thereof). Accordingly, ERIS has failed to state a claim under New York law for tortious interference with prospective business relations.

IV. Leave to Amend

In its opposition brief, ERIS requests leave to amend in the event that EDR's motion to dismiss is granted in whole or in part. District courts "ha[ve] broad discretion in determining whether to grant leave to amend," *Gurary v. Winehouse, 235 F.3d 792, 801 (2d Cir. 2000)*, and leave to amend should generally be "freely give[n] . . . when justice so requires." *Fed. R. Civ. P. 15(a)(2)*. "Where the possibility exists that [a pleading] defect can be cured" and amendment would not be **[*84]** futile, "leave to amend should normally be granted." *Isaac v. City of New York, No. 17-CV-1021 (PGG), 2018 U.S. Dist. LEXIS 41653, 2018 WL 1322196, at *8 (S.D.N.Y. Mar. 13, 2018)* (internal citations omitted); *see Hayden v. County of Nassau, 180 F.3d 42, 53 (2d Cir. 1999)* ("When a motion to dismiss is granted, the usual practice is to grant leave to amend the complaint.").

Based on the current record, I cannot conclude that leave to amend ERIS's Counterclaims would be futile.[43] Accordingly, I recommend that ERIS be granted leave to amend, and that ERIS's Second Amended Counterclaims be due within **fourteen (14)** days of District Court's ruling on this Report and Recommendation.

---

[42] ERIS cites to cases supporting its contention that it need not reveal, in its pleading, the real name of Company K. *E.g. Tatintisan v. Vorotyntsev, 2019 U.S. Dist. LEXIS 66379, 2019 WL 1746004, at *6 (S.D.N.Y. Apr. 18, 2019)* (plaintiff not required to plead name of third party where plaintiff identified a specific, existing relationship and offered to provide defendant with name); *Brill Physical Therapy, P.C. v. Leaf, 2011 N.Y. Misc. LEXIS 6967, 2011 WL 11074836, at *3 (Sup. Ct. Aug. 4, 2011)* (plaintiff not required to plead specific names of third parties); *Bilinski, 96 F. Supp. 3d at 51* (finding that *Brill* "stands at most for the proposition that a plaintiffs [sic] need not identify the name of the buyer in [its] pleading"). However, even if ERIS is excused from revealing the ***name*** of relevant third parties, ERIS is still required to identify prospective business relations with *specific* third parties. *See, e.g. Gallagher v. N.Y.C. Health & Hosps. Corp., No. 16-CV-4389 (GBD), 2017 U.S. Dist. LEXIS 155259, 2017 WL 4326042, at *5 (S.D.N.Y. Sept. 20, 2017)* (emphasizing that a plaintiff "must specify some particular, existing relationship through which [it] would have done business but for the allegedly tortuous behavior.") (internal citation omitted); *Vigoda v. DCA Prods. Plus Inc., 293 A.D.2d 265, 741 N.Y.S.2d 20, 23 (2002)* (same).

[43] Indeed, EDR-Sanborn does not argue that amendment would be futile. Instead, EDR-Sanborn states that any dismissal should be with prejudice because "ERIS has amended its counterclaims once and declined to do so a second time" during the parties' meet and confer process. (ECF 45 at 35; ECF 47 at 35).

V. Conclusion

For the foregoing reasons, I recommend that EDR-Sanborn's motion to dismiss be **GRANTED in part and DENIED in part**, as follows: (1) EDR-Sanborn's motion to dismiss should be granted with respect to ERIS's product disparagement (Count IX), trade libel (Count XI), and tortious interference with prospective business relations (Count XII) claims; (2) it should also be granted with respect to ERIS's Lanham Act (Count VI) and New York General Business Law (Counts VII and VIII) claims **insofar** as they are based on allegations regarding the Oral Statements, and with respect to ERIS's defamation (Count X) claim **insofar** as it is based on the Blog Post and Oral Statements; and (3) it should lastly **[*85]** be granted as to ERIS's Sherman Act *Section 2* (Count IV) essential facilities and bundling claims. ERIS's Lanham Act (Count VI) and New York General Business Law (Counts VII and VIII), defamation (Count X), and Sherman Act and Clayton Act (Count IV and V) claims should otherwise proceed.

VI. Objections

In accordance with *28 U.S.C. § 636(b)(1)* and *Fed. R. Civ. P. 72(b)*, the parties shall have **fourteen (14)** days (including weekends and holidays) from receipt of this Report to file written objections. *See* *Fed. R. Civ. P. 6* (allowing three (3) additional days for service by mail). A party may respond to any objections within **fourteen (14)** days after being served. Objections, and any responses to objections, shall be addressed to the Hon. Lewis A. Kaplan. Any requests for an extension of time for filing objections must be directed to Judge Kaplan.

FAILURE TO FILE OBJECTIONS WITHIN FOURTEEN (14) DAYS WILL RESULT IN A WAIVER OF OBJECTIONS AND WILL PRECLUDE APPELLATE REVIEW. *See* *Thomas v. Arn, 474 U.S. 140, 155, 106 S. Ct. 466, 88 L. Ed. 2d 435 (1985)*; *IUE AFL-CIO Pension Fund v. Herrmann, 9 F.3d 1049, 1054 (2d Cir. 1993)*; *Frank v. Johnson, 968 F.2d 298, 300 (2d Cir. 1992)*; *Wesolek v. Canadair Ltd., 838 F.2d 55, 58 (2d Cir. 1988)*; *McCarthy v. Manson, 714 F.2d 234, 237-38 (2d Cir. 1983)*.

Dated: August 30, 2021

New York, New York

Respectfully submitted,

/s/ Ona T. Wang
