Opinion

[*211] MEMORANDUM & ORDER

GORTON, J.

This is a putative class action brought by Raymond MacCausland ("MacCausland" or "plaintiff") on behalf **[**2]** of taxi drivers in the Greater Boston area. Plaintiff alleges that Uber Technologies, Inc. and its wholly-owned subsidiary, Raiser, LLC ("Uber" or "defendant") competed unlawfully in the on-demand, ride-hail ground transportation market in and around Boston, Massachusetts. Plaintiff alleges that Uber competed unfairly and deceptively in violation of the common law and of the *Massachusetts Consumer Protection Act*, that Uber violated state and federal ***antitrust law*** and that Uber engaged in a civil conspiracy and aided and abetted unfair competition.

Before the Court is defendant's motion to dismiss plaintiff's antitrust claims.

I. Background

Uber entered the Boston market for private transportation services in 2011 and launched its UberX service in 2013. The company provides a digital tool for potential riders to request private vehicles-for-hire by using Uber's free "smart phone application" ("the Uber app"). Users who open the Uber app on their mobile phones are shown a map of their location or a nearby designated pick-up point and the available Uber-affiliated vehicles in that vicinity.

According to MacCausland, the City of Boston has issued approximately 1,825 taxi licenses, referred **[**3]** to as taxi medallions, subject to a strict and extensive city regulatory regime. In contrast, there are over 20,000 cars-for-hire that currently provide Uber's ride-hailing service in the Boston area.

In February, 2017, MacCausland, a Boston taxi driver, filed this complaint against Uber. At the same time, taxi medallion holders sued Uber under the same legal theories that plaintiff alleges here. That related action involves seven different groups of plaintiffs who represent over 800 plaintiff taxi companies in the Greater Boston area. Originally, seven separate complaints were filed in this district between December, 2016, and April, 2017. The Court consolidated the cases pursuant to *Fed. R. Civ. P. 42(a)(2)* in October, 2017.

In December, 2017, this session ruled on Uber's motion to dismiss the consolidated action. See *Malden Transportation, Inc. v. Uber Techs., Inc., 286 F. Supp. 3d 264 (D. Mass. 2017)*. The Court held that the so-called Malden plaintiffs stated a claim for unfair competition under the common law and *M.G.L. c. 93A* and that plaintiffs stated a claim for aiding and abetting unfair competition and civil conspiracy to commit unfair competition. The Court allowed defendants' motion to dismiss claims against two of Uber's founders for want of personal jurisdiction. It also allowed **[**4]** Uber's motion to dismiss with respect to plaintiffs' antitrust claims, tortious interference claims and failed theories of civil conspiracy. See generally id.

After the issuance of that memorandum and order, plaintiffs in the Malden cases as well as the plaintiff in this case (MacCausland) amended their complaints. MacCausland's second amended complaint mimics the amended complaints in Malden. He asserts counts of unfair and deceptive trade practices under the common law and Massachusetts Consumer Protection Act, as well as aiding and abetting and unfair competition. He has also added factual allegations **[*212]** to his complaint which bear upon his claims of violation of state and federal ***antitrust law***. In May, 2018, the parties in this case filed a stipulation of dismissal against the individual defendants.

Before the Court is Uber's motion to dismiss MacCausland's antitrust claims.

II. Legal Standard

To survive a motion to dismiss, a complaint must contain sufficient factual matter, accepted as true, to "state a claim to relief that is plausible on its face." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. In considering the merits of a motion to dismiss, the Court may look only to the facts alleged in the pleadings, documents attached **[**5]** as exhibits or incorporated by reference in the complaint and matters of which judicial notice can be taken. *Nollet v. Justices of Trial Court of Mass., 83 F.Supp.2d 204, 208 (D. Mass. 2000)*, aff'd, *248 F.3d 1127 (1st Cir. 2000)*. Furthermore, the Court must accept all factual allegations in the complaint as true and draw all reasonable inferences in the plaintiff's favor. *Langadinos v. Am. Airlines, Inc., 199 F.3d 68, 69 (1st Cir. 2000)*. If the facts in the complaint are sufficient to state a cause of action, a motion to dismiss the complaint must be denied. See *Nollet, 83 F.Supp.2d at 208*.

Although a court must accept as true all of the factual allegations contained in a complaint, that doctrine is not applicable to legal conclusions. *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*. Threadbare recitals of the legal elements which are supported by mere conclusory statements do not suffice to state a cause of action. Id. Accordingly, a complaint does not state a claim for relief where the well-pled facts fail to warrant an inference of any more than the mere possibility of misconduct. *Id. at 679*.

III. Analysis

MacCausland asserts claims for attempt to monopolize in violation of the *Sherman Antitrust Act, 15 U.S.C. § 2*, and the *Massachusetts Antitrust Act, M.G.L. c. 93 § 5*.[1]

Plaintiff alleges that Uber has attempted to drive taxi companies out of business by using its predatorily-priced UberX service. Defendant responds that plaintiff has not met the high burden of alleging **[**6]** a predatory pricing claim and has not alleged an injury to competition.

Section 2 of the Sherman Act makes it illegal to

> monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations.

15 U.S.C. § 2.

To state a monopolization claim under *§ 2*, a plaintiff must adequately allege that defendant (1) has monopoly power in the relevant market and (2) has engaged in illicit "exclusionary practices" with "the design or effect of protecting or enhancing its monopoly position." *Sterling Merch., Inc. v. Nestlé, S.A., 656 F.3d 112, 125 (1st Cir. 2011)* (quoting *Coastal Fuels of P.R., Inc. v. Caribbean Petroleum Corp., 79 F.3d 182, 195 (1st Cir. 1996)* (internal citation omitted)).

One kind of exclusionary practice is the practice of "predatory pricing". In such a scheme, a company reduces the price of its product to below cost, intending to drive competitors out of business so that it can then raise prices after it has achieved a monopoly position. See *Matsushita Elec. Industrial Co. v. Zenith Radio **[*213]** Corp., 475 U.S. 574, 584-585, n. 8, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*. To succeed on a predatory pricing claim a plaintiff must demonstrate that

> the prices complained of are below an appropriate measure of its rival's costs . . . [and that the competitor had] a dangerous probability of recouping its investment in below-cost prices.

Brooke Grp. Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 222, 224, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (U.S. 1993).

Because an economically unsound approach by a **[**7]** competitor could actually benefit consumers, plaintiffs must explain with particularity "just what the arrangements were and why they plausibly constituted antitrust violations." See *Am. Steel Erectors v. Local Union No. 7, Int'l Ass'n of Bridge, Structural, Ornamental & Reinforcing Iron Workers, 815 F.3d 43, 71 (1st Cir. 2016)* (quoting *Stop & Shop Supermarket Co. v. Blue Cross & Blue Shield of R.I., 373 F.3d 57, 65 (1st Cir. 2004))*.

MacCausland here fails to allege facts supporting a predatory pricing claim. His new allegations do not cure the deficiencies that doomed the Malden plaintiffs. See *Malden, 286 F. Supp. 3d at 279-280*.

Plaintiff does not allege that Uber's services were priced below Uber's costs. He has failed to "explain in detail" why Uber's conduct constituted an antitrust violation. See *Am. Steel, 815 F.3d at 71*. His second amended complaint alleges that Uber "deflated the UberX fares to below cost in order to drive out the taxi drivers" but such "threadbare

[1] Neither party contends that the legal standard varies for the state law claim.

recitals of a cause of action's elements, supported by mere conclusory statements, do not suffice" to survive a motion to dismiss. *Iqbal, 556 U.S. at 678* (citing *Twombly, 550 U.S. at 555*).

Basic facts such as what an average or median "ride" in the Boston area costs Uber, or costs a taxi, are absent. MacCausland attempts to bolster the factual allegations found lacking in Malden by attaching a report from the Wall Street Journal showing that, worldwide, Uber's costs exceed its revenue. Uber's global performance does not, however, constitute a relevant allegation **[**8]** as to Uber's costs in the "ride-hailing market in the City of Boston." Furthermore, although plaintiff correctly notes that "Uber is a privately-held company that [does] not disclose relevant financial and market information," that fact does not absolve plaintiff from meeting the required pleading standard.

In a similar vein, MacCausland fails to allege facts demonstrating Uber's intent to monopolize. A plaintiff alleging an attempt to monopolize must establish "specific intent" to destroy competition. *Home Placement Serv., Inc. v. Providence Journal Co., 682 F.2d 274, 281 (1st Cir. 1982)* (citing *Times-Picayune Pub. Co. v. United States, 345 U.S. 594, 626, 73 S. Ct. 872, 97 L. Ed. 1277 (1953))*. MacCausland generally asserts that Uber

> engaged in a scheme to intentionally undercut the taxi industry [and that Uber was] intent on destroying any and all competition through drastic anti-competitive pricing.

He also refers to specific statements, such as an Uber advertisement proclaiming "These fares may only last a limited time, but the more you ride, the more likely they will last." Finally, plaintiff cites a handful of unremarkable statements by Uber's former CEO made in entrepreneurial business-speak such as "I try to push the limits. Pedal to the metal." No specific facts in the second amended complaint even suggest that Uber intended to obtain a monopoly in the Boston **[**9]** ride-hailing market. Without an unlawful intent, "increasing sales and increasing market share are normal business goals," not verboten practices. *U.S. Steel Corp. v. Fortner Enterprises, **[*214]** Inc., 429 U.S. 610, 612 n.1, 97 S. Ct. 861, 51 L. Ed. 2d 80 (1977)*.

Equally important, plaintiff fails to show an injury to Boston consumers. That omission is dispositive, because antitrust plaintiffs must show that "defendants' actions caused an injury to competition, as distinguished from impact on themselves." *R.W. Int'l Corp. v. Welch Food, Inc., 13 F.3d 478, 487 (1st Cir. 1994)*. According to plaintiff's complaint, Uber's entry caused the supply in the ride-hailing market to increase and the price to diminish. Such allegations fail to demonstrate an injury to competition. See *Sullivan v. Nat'l Football League, 34 F.3d 1091, 1096 (1st Cir. 1994)*, as amended on denial of reh'g (Oct. 26, 1994) ("Anticompetitive effects, more commonly referred to as injury to competition or harm to the competitive process, are usually measured by a reduction in output and an increase in prices in the relevant market.") (internal quotation marks omitted) (citation omitted). A decrease in the value of Boston taxi medallions is superfluous.

Finally, this Court finds the analysis in *Philadelphia Taxi Ass'n, Inc. v. Uber Techs., Inc., 886 F.3d 332 (3d Cir. 2018)*, applicable and persuasive. In that case, Philadelphia taxicab drivers and taxicab companies alleged that Uber's entry into the Philadelphia taxicab market violated the Sherman Act. **[**10]** *Id. at 336*. Just as plaintiff does here, the Philadelphia plaintiffs argued that Uber's actions were

> illegal, predatory and led to a sharp drop in the value of taxicab medallions as well as a loss of profits.

Id.

The Third Circuit Court of Appeals ("Third Circuit") affirmed the district court's dismissal of plaintiffs' complaint, holding that the plaintiffs had failed 1) to state a claim for attempted monopolization and 2) to allege a legally cognizable antitrust injury. Id. The facts in the Philadelphia Taxi case are strikingly similar to those in this case and there the Third Circuit:

> 1) reasoned that Uber "bolstered competition, . . . operate[d] at a lower cost [and attracted taxi drivers] due to its cost efficiency and competitive advantage," but that such conduct does not constitute anticompetitive conduct violative of ***antitrust law***, *id. at 340-41*;

2) found that plaintiffs failed to allege specific intent to monopolize which was insufficient given that Uber's strategy could "be reasonably viewed as predominantly motivated by legitimate business aims, *id. at 341* (internal quotation marks omitted) (quoting *Times Picayune Publ'g Co. v. United States, 345 U.S. 594, 627, 73 S. Ct. 872, 97 L. Ed. 1277 (1953)*); and

3) observed that plaintiffs had failed to allege antitrust standing because "harm to [plaintiffs'] business **[**11]** does not equal harm to competition." *Id. at 344*.

MacCausland's complaint and legal theories are substantially indistinguishable from those dismissed in Philadelphia Taxi and this Court sees no reason to diverge from the well-reasoned opinion in that case.

ORDER

For the foregoing reasons, defendants' partial motion to dismiss the antitrust claims in the second amended complaint (Docket No. 64) is **ALLOWED**.

So ordered.

LexisNexis® Headnotes

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

HN1[] **Sherman Act, Claims**

The *Sherman Act* outlaws agreements that unreasonably restrain trade. *15 U.S.C.S. § 1*. Whether a restraint is reasonable typically depends on the aptly named rule of reason, which necessitates an elaborate inquiry into the restraint's effect on competition in the relevant market. But the rule of reason has limits. Some kinds of agreements are so likely to have a pernicious effect on competition that they are conclusively presumed to be unreasonable. Price fixing of a certain kind is per se unlawful.

Antitrust & Trade Law > Clayton Act > Claims

Antitrust & Trade Law > Clayton Act > Scope

HN2[] **Clayton Act, Claims**

The *Clayton Act* creates a private cause of action for violations of the antitrust laws. *15 U.S.C.S. § 15*. The claimant must prove that his opponent entered into an agreement that is per se unlawful, and that the agreement in fact caused the claimant to suffer an antitrust injury. An antitrust injury is an injury that is "of the type the antitrust laws were intended to prevent and flows from that which makes defendants' acts unlawful.

Antitrust & Trade Law > Clayton Act > Claims

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Movant Persuasion & Proof

Antitrust & Trade Law > Sherman Act > Claims

HN3[] **Clayton Act, Claims**

To prevail on antitrust claims, plaintiffs have to show that defendants entered into the agreements and that they suffered a resulting antitrust injury. The question at summary judgment is whether the plaintiffs produced sufficient evidence for a reasonable juror to reach that conclusion. Because ***antitrust law*** limits the range of permissible inferences from ambiguous evidence, the plaintiffs must point to evidence that 'tends to exclude the possibility that the alleged conspirators acted independently if they are to succeed.

Civil Procedure > Judgments > Summary Judgment > Evidentiary Considerations

HN4[] **Summary Judgment, Evidentiary Considerations**

Although courts on summary judgment view the evidence in the light most favorable to the non-movant, there is a limit to the inferences courts can draw in their favor.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Appropriateness

HN5[] Entitlement as Matter of Law, Appropriateness

Summary judgment is appropriate where evidence is so one-sided that no fair-minded jury could return a verdict for the plaintiff.

Civil Procedure > Judgments > Summary Judgment > Evidentiary Considerations

HN6[] Summary Judgment, Evidentiary Considerations

When opposing parties tell two different stories, one of which is blatantly contradicted by the record a court should not adopt that version of the facts for purposes of ruling on a motion for summary judgment.

Antitrust & Trade Law > Clayton Act > Claims

Antitrust & Trade Law > Sherman Act > Claims

HN7[] Clayton Act, Claims

Antitrust plaintiffs are required to show that the conspiracy caused them an injury for which the antitrust laws provide relief, not just that the defendant was up to no good.

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Movant Persuasion & Proof

HN8[] Burdens of Proof, Movant Persuasion & Proof

A moving party may discharge its burden on summary judgment by pointing out the absence of evidence to support the non-moving party's case.

Civil Procedure > ... > Summary Judgment > Appellate Review > Standards of Review

HN9[] Appellate Review, Standards of Review

Appellate courts review the denial of a motion for judgment as a matter of law de novo.

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > Erie Doctrine

HN10[] Federal & State Interrelationships, Erie Doctrine

Where federal courts sit in diversity, they apply the standard for judgment as a matter of law used by the courts of the state whose substantive law governs the action.

Civil Procedure > Judgments > Summary Judgment > Evidentiary Considerations

Civil Procedure > Trials > Judgment as Matter of Law > Postverdict Judgment

HN11[] **Summary Judgment, Evidentiary Considerations**

In Michigan, judgment as a matter of law may be granted only where reasonable minds could not differ as to the conclusions to be drawn from the evidence. Just like at summary judgment, courts view the evidence in the light most favorable to the non-moving party and draw all reasonable inferences in its favor.

Business & Corporate Compliance > ... > Contracts Law > Contract Conditions & Provisions > Waivers

HN12[] **Contract Conditions & Provisions, Waivers**

Michigan law requires consideration for a waiver to be effective. A waiver of a substantial [contract] right requires consideration.

Business & Corporate Compliance > ... > Contract Modifications > Contracts Law > Contract Modifications

Business & Corporate Compliance > ... > Contracts Law > Contract Conditions & Provisions > Waivers

HN13[] **Contracts, Contract Modifications**

Modification and waiver are different. Waiver occurs when one party unilaterally surrenders its right to object to a counter-party's failure to perform a contract obligation. In contrast, modification occurs when parties mutually agree to change the terms of an agreement.

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > Erie Doctrine

HN14[] **Federal & State Interrelationships, Erie Doctrine**

The Michigan Supreme Court says what the law is in Michigan. And a federal court sitting in diversity is bound by what it believes Michigan courts would do.

Contracts Law > Statute of Frauds > Requirements

HN15[] **Statute of Frauds, Requirements**

Under Michigan law, an agreement made to discharge a contractual obligation shall not be invalid because of the absence of consideration if that agreement is in writing and signed by the party against whom it is sought to enforce the change. *Mich. Comp. Laws § 566.1*.

Torts > ... > Fraud & Misrepresentation > Actual Fraud > Elements

HN16[] **Actual Fraud, Elements**

To prevail on their fraud claims, plaintiffs have to show that (1) the defendant made a material representation, (2) that was false, (3) that the defendant knew the representation was false when it was made (or made it recklessly), (4) that the defendant made the representation with the intent that the plaintiffs rely on it, (5) that the plaintiffs did in fact rely on it, and (6) that the plaintiffs were injured as a result of that reliance.

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Civil Procedure > Judgments > Relief From Judgments > Motions for New Trials

HN17[] **Standards of Review, Abuse of Discretion**

Appellate courts review the denial of a motion for a new trial for abuse of discretion. The authority to grant a new trial is confided almost entirely to the exercise of discretion on the part of the trial court. Where the district court admitted allegedly improper evidence but later issued a curative instruction, appellate courts will reverse only if (1) there is an overwhelming probability that the jury did not or could not follow the instruction and (2) a strong likelihood that the effect of the evidence was devastating to the moving party. The burden of showing this likelihood of prejudice is on the party seeking the new trial.

Civil Procedure > Judgments > Relief From Judgments > Motions for New Trials

HN18[] **Relief From Judgments, Motions for New Trials**

When alleged prejudice is cured by instructions of the court, a motion for a new trial should be denied.

Judges: BEFORE: MOORE, THAPAR, and BUSH, Circuit Judges.

Opinion by: THAPAR

Opinion

[*558] THAPAR, Circuit Judge. At least for a while, the fracking boom came to Michigan. Oil companies started drilling wells, and the going rate for mineral rights went through the roof. Eventually, however, the bubble burst. This case arises from the **[**2]** fallout.

I.

The Zaremba family held the mineral rights to a large amount of drillable land in Michigan.[1] So when the drilling boom began, **[*559]** oil-company suitors began lining up at their door. The Zarembas entered negotiations with two such companies: Encana Oil & Gas ("Encana") and Chesapeake Energy ("Chesapeake"). Eventually, the Zarembas neared a deal with Chesapeake. But that deal fell apart over a dispute about how Chesapeake and the Zarembas would allocate costs.

After the Chesapeake deal unraveled, the Zarembas signed a letter of intent with Encana. The Zarembas and Encana agreed to negotiate a binding lease agreement, and Encana paid the Zarembas $2 million in earnest money. But the letter of intent also said that if the parties did *not* go through with the agreement—for whatever reason—the Zarembas would return $1.8 million of that money to Encana.

The Zarembas and Encana never reached a binding deal. About two weeks after the parties signed the letter of intent, Encana decided to walk away. And that meant the Zarembas had to return the $1.8 million. Yet after Encana walked, an Encana employee mistakenly told the Zarembas they could *keep* the whole $2 million. So when Encana later asked **[**3]** for the $1.8 million back, the Zarembas refused. Encana promptly sued the Zarembas for breach of contract. The Zarembas counterclaimed, arguing that Encana was liable for fraud and fraudulent inducement (among other things not relevant here).

Then, a surprise. About eight months after Encana sued, explosive allegations emerged in the press: Encana and Chesapeake had purportedly colluded to suppress lease prices in Michigan. Reuters published emails in which the two companies' top executives discussed how they might find a way to avoid "bidding each other up" in Michigan. R. 39, Pg. ID 211. These revelations prompted the Zarembas to lodge a counterclaim against Encana for violations of the Sherman Antitrust Act and the Michigan Antitrust Reform Act.

After several years of litigation, the district court granted Encana summary judgment on the Zarembas' antitrust claims. But Encana's breach-of-contract claim and the Zarembas' fraud claims went to trial. The jury ultimately determined that Encana had waived its right to recoup the $1.8 million, but that the Zarembas had failed to prove their fraud counterclaims.

Both parties now appeal. The Zarembas claim the district court erred in dismissing **[**4]** their *Sherman Act* claim on summary judgment. They also claim that they were entitled to judgment as a matter of law on their fraud counterclaims, and that the district court should have granted their motion for a new trial because Encana's expert witness misled the jury. For its part, Encana claims it was entitled to judgment as a matter of law on its breach-of-contract claim, and that the district court wrongly instructed the jury on that claim.

II.

We turn first to the Zarembas' antitrust claims. ***HN1***[] The *Sherman Act* outlaws agreements that "unreasonably" restrain trade. *United States v. Joint-Traffic Ass'n, 171 U.S. 505, 559, 19 S. Ct. 25, 43 L. Ed. 259 (1898)* (interpreting *15 U.S.C. § 1*). Whether a restraint is reasonable typically depends on the aptly named "rule of reason," which necessitates an "elaborate inquiry" into the restraint's effect on competition in the relevant market. *Arizona v. Maricopa Cty. Med. Soc'y, 457 U.S. 332, 343, 102 S. Ct. 2466, 73 L. Ed. 2d 48 (1982)*. But the rule of reason has limits. Some kinds of agreements are so likely to have a "pernicious effect on competition" that they are "conclusively presumed to be unreasonable." **[*560]** *N. Pac. Ry. Co. v. United States, 356 U.S. 1, 5, 78 S. Ct. 514, 2 L. Ed. 2d 545 (1958)*. For instance, sellers of "sanitary pottery" (*i.e.*, toilets) cannot get together and decide that they will sell their wares only for a given amount. *United States v. Trenton Potteries Co., 273 U.S. 392, 394, 397-98, 47 S. Ct. 377, 71 L. Ed. 700 (1927)*. Price fixing of that kind is "per se" unlawful. *N. Pac., 356 U.S. at 5*.

HN2[] The *Clayton Act* creates a private **[**5]** cause of action for violations of the antitrust laws. *See 15 U.S.C. § 15*. The claimant must prove that his opponent entered into an agreement that is per se unlawful, and that the agreement in fact caused the claimant to suffer an "antitrust injury." *See Atl. Richfield Co. v. USA Petroleum Co.,*

[1] For convenience, this opinion refers to "the Zarembas" collectively. That moniker refers to all three of the defendant-appellees/cross-appellants: Zaremba Family Farms, the Zaremba Group, and Walter Zaremba.

495 U.S. 328, 344-45, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990). An antitrust injury is an injury that is "of the type the antitrust laws were intended to prevent and . . . flows from that which makes defendants' acts unlawful." Id. at 334 (quoting Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)).

Here, the Zarembas allege Encana engaged in two kinds of per se unlawful conduct. First, they argue that Encana and Chesapeake engaged in an unlawful "bid rigging" scheme whereby the two companies agreed not to outbid each other for the Zarembas' leases. *See* United States v. Portsmouth Paving Corp., 694 F.2d 312, 325 (4th Cir. 1982) (defining "bid rigging" as "[a]ny agreement between competitors pursuant to which contract offers are to be submitted to or withheld from a third party"); *see also* United States v. Green, 592 F.3d 1057, 1068 (9th Cir. 2010) (holding that "bid rigging" is per se illegal and citing cases from the Fifth and Tenth Circuits in agreement). Second, the Zarembas argue that Encana and Chesapeake engaged in illegal "market allocation" by dividing up the Michigan mineral-rights market, rather than competing with each other for it. *See* Palmer v. BRG of Ga., Inc., 498 U.S. 46, 49-50, 111 S. Ct. 401, 112 L. Ed. 2d 349 (1990) (per curiam) (holding that "agree[ments] to allocate **[**6]** markets" are per se unlawful). ***HN3***[] To prevail, the Zarembas have to show that Encana entered into one or both of these agreements and that they suffered a resulting "antitrust injury." Atl. Richfield, 495 U.S. at 344-45. The question at summary judgment, of course, is whether the Zarembas produced sufficient evidence for a reasonable juror to reach that conclusion. *See* Matsushita Elec. Indus. v. Zenith Radio Corp., 475 U.S. 574, 588, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986). Because "***antitrust law*** limits the range of permissible inferences from ambiguous evidence," they must point to evidence that "'tends to exclude the possibility' that the alleged conspirators acted independently" if they are to succeed. Id. (quoting Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 764, 104 S. Ct. 1464, 79 L. Ed. 2d 775 (1984)). Here, the Zarembas advance three distinct theories.

Theory One: The Poison Pill.[2] The Zarembas first argue that just as they were preparing to finalize their deal with Chesapeake, Encana and Chesapeake agreed to rig the bidding. So, they claim, Chesapeake tanked the Zaremba deal by inserting a "poison pill," forcing the Zarembas to sign with Encana instead.

In support of this theory, the Zarembas point to the following evidence. Emails between top Encana and Chesapeake executives **[*561]** show that at the same time they were negotiating with the Zarembas, the two companies were indeed interested in colluding. **[**7]** At one point, Chesapeake's CEO suggested that the companies "throw in 50/50 together" instead of "bash[ing] each other's brains out on lease buying." R. 379-13, Pg. ID 7118. Encana's CEO responded that he was "open to any ideas to reduce costs." *Id.*, Pg. ID 7115. Later, an Encana executive wrote to Encana's CEO that the company "appear[ed] to have agreed" to a "division of work" with Chesapeake. R. 379-18, Pg. ID 7130. And the companies subsequently haggled over a draft "Area of Mutual Interest" agreement. R. 379-21, Pg. ID 7140-45. That agreement contemplated a scheme whereby the companies would "agree not to compete against one another" in designated geographic areas. *Id.*, Pg. ID 7141.

Troubling stuff. But what does that evidence have to do with the Zarembas? Well, email records confirm that at the same time the companies were contemplating collusion, each was also negotiating for the Zarembas' mineral-rights leases. The Zarembas claim these negotiations eventually resulted in an agreement in principle between the Zarembas and Chesapeake. In support, they point to an email in which Chesapeake's CEO instructed an employee to "sign [the Zarembas] up I guess." R. 379-10, Pg. ID 7104. **[**8]** But then, on the day Chesapeake and the Zarembas had planned to close their deal, two high-level executives at Chesapeake and Encana had what the Zarembas believe was a crucial phone call. During that call, those executives discussed their potential non-compete agreement. And the Zarembas say that, as a result, Chesapeake agreed to tank the Chesapeake-Zaremba deal by reneging on an earlier assurance that Chesapeake would bear all the "post-production costs" from the Zaremba wells. In the end, the Zarembas claim that Chesapeake's production-costs "poison pill" forced them to walk away from the Chesapeake deal and instead sign the letter of intent with Encana, which set out "far inferior" lease terms. Second Br. 24.

---

[2] Not to be confused with the poison pill of Delaware lore. *See, e.g.,* Unitrin, Inc. v. Am. Gen. Corp., 651 A.2d 1361 (Del. 1995).

From all this, the Zarembas argue that a reasonable juror could conclude that Encana and Chesapeake struck a deal in which they agreed that Chesapeake would walk away from negotiations with the Zarembas, forcing them into Encana's arms. But, the Zarembas' evidence does not "tend[] to exclude the possibility" that Encana and Chesapeake had not yet reached an anti-competitive agreement and were continuing to try to outbid each other. Matsushita, 475 U.S. at 588 (internal quotations and citation omitted). **[**9]** First, for all their troubling emails, the evidence shows that Encana and Chesapeake did *not* agree to tank the Zaremba deal. True, one Encana executive said the companies "appeared" to have reached an agreement before Chesapeake's deal with the Zarembas fell apart. R. 379-18, Pg. ID 7130. But appearances can be deceiving. The evidence shows that after that executive sent his email, Encana and Chesapeake continued to compete vigorously for the Zaremba leases. Encana's initial offer for those leases was $2,000 per acre, but the amount contemplated in the ultimate letter of intent was $2,900 per acre—a *twenty-three million dollar increase* in the deal's total value. And that increase was brought on by competition from Chesapeake, as evidenced by a series of emails showing that the companies were "bidding each other up" even as they separately tried to work out their mutual-interest agreement. R. 362-8, Pg. ID 5338-39. Indeed, just days before the Zaremba-Chesapeake deal fell apart, Chesapeake's CEO said of the Zaremba deal: "[Encana] won't share, let's win." R. 362-51, Pg. ID 5657. And this all happened *after* Encana circulated **[*562]** its draft mutual-interest agreement to Chesapeake and the Encana **[**10]** executive said the companies appeared to have agreed on an arrangement. There is only one way to read this evidence: Encana and Chesapeake certainly talked about a mutual-interest agreement as they were negotiating with the Zarembas, but they were simultaneously engaged in a bidding war and never reached a collusive truce. This is "conduct [] consistent with permissible competition," Matsushita, 475 U.S. at 588, and therefore cannot sustain an inference of an anti-competitive agreement.

That just leaves the infamous Encana-Chesapeake phone call. As the Zarembas point out, the emails indicating that the companies were "bidding each other up" were sent a few days *before* the Zaremba-Chesapeake deal fell apart. But on the day Chesapeake purportedly tanked the deal with its poison pill, Encana and Chesapeake executives talked about their companies' potential agreement in a phone call. Accordingly, the Zarembas suggest that the executives may have finally struck their agreement that very morning. But the inference the Zarembas seek to draw is firmly rebutted by the record evidence. The Encana executive's contemporaneous notes about that call do not say anything about the Zarembas—and in fact reflect that the companies **[**11]** still had *not* reached an agreement.[3] *See* R. 379-9, Pg. ID 7102 (noting that Encana and Chesapeake's arrangement was "subject only to definitive agreement," that the draft agreement "needs work to get to where [Chesapeake] thinks we're headed," and that Chesapeake was "on the side of quality versus timing"). In addition, in a post-call email to colleagues, that same Encana executive said he "continue[d] to feel" that Chesapeake was "not really motivated to enter an [agreement]." R. 362-10, Pg. ID 5351. All this evidence says, in no uncertain terms, exactly the opposite of what the Zarembas would have a jury conclude. ***HN4***[] Although we view the evidence in the light most favorable to the Zarembas, there is a limit to the inferences we can draw in their favor. *See* Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 251-52, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986) (***HN5***[] summary judgment is appropriate where evidence is "so one-sided" that no "fair-minded jury could return a verdict for the plaintiff"). ***HN6***[] "When opposing parties tell two different stories, one of which is blatantly contradicted by the record . . . a court should not adopt that version of the facts for purposes of ruling on a motion for summary judgment." Scott v. Harris, 550 U.S. 372, 380, 127 S. Ct. 1769, 167 L. Ed. 2d 686 (2007). So it is here.

Finally, the Zarembas make no attempt to show how their poison-pill **[**12]** theory makes sense in light of the parties' later behavior. Two days after the Zarembas signed with Encana, Chesapeake notified the Zarembas that Chesapeake's offer *had not yet expired*. That same day, a Chesapeake manager wrote to Chesapeake's CEO about Encana's "unwillingness to end the competition," and expressed doubt that continuing to pursue a mutual-interest agreement with Encana was even worth it. R. 362-48, Pg. ID 5650. Chesapeake's CEO responded that the

---

[3] The Zarembas argue that a juror could draw an adverse inference from the fact that, when asked about the call under oath, the executives involved invoked their Fifth Amendment right against self-incrimination. But the Encana executive involved in the call later revoked his Fifth Amendment invocation and testified that the executives did not speak about the Zarembas and that they did not reach a deal with Chesapeake on that call.

manager should "freeze [Encana] for another 10 days or so," because it was "probably still better for us for them to believe we'll do a deal **[*563]** with them." *Id.*, Pg. ID 5649. These messages show that not only had Encana and Chesapeake failed to reach an agreement before Chesapeake purportedly tanked the Zaremba deal, but that their negotiations had been going so poorly Chesapeake was considering bowing out. Again, in light of this evidence, there is simply no way a reasonable juror could believe the Zarembas' poison-pill theory. So, if they are to succeed, it must be on a different one.

Theory Two: The Freeze Out. The Zarembas' next theory is that Chesapeake and Encana agreed to simultaneously walk away from any binding deal with **[**13]** the Zarembas after Encana and the Zarembas entered into the letter of intent. Since the evidence discussed above shows that the companies had not reached any collusive agreement *before* the Zarembas signed with Encana, the Zarembas' freeze-out theory can succeed only if they can show that the companies did so *afterward*. Here again, the evidence belies the Zarembas' position. Chesapeake emails show that it learned about Encana's decision to walk away from the Zaremba deal not from Encana—its alleged partner-in-crime—but from an anonymous participant in an online natural-gas discussion forum. And when an employee forwarded that post to Chesapeake's CEO, he reacted with surprise and said that Encana's decision made him "nervous." R. 383-4, Pg. ID 7558. He then emailed an Encana executive, asking whether Encana's sudden exit meant that it had "no more interest in joining forces down the road." R. 362-35, Pg. ID 5573. After ignoring him for a few days, the Encana executive responded, curtly, that Encana had "decided to discontinue further leasing," and would "reassess [its] position after the summer." *Id.* Yet again, this evidence does not "tend[] to exclude the possibility" that Encana and **[**14]** Chesapeake were acting independently. *Matsushita, 475 U.S. at 588* (internal quotations and citation omitted). Encana kept Chesapeake in the dark about its decision to walk away from the Zaremba deal, and it was not interested in playing nice even when Chesapeake's CEO tried to mend the fence. These emails contradict the Zarembas' freeze-out theory, and the Zarembas have failed to point to any evidence to the contrary. So this theory must fail too. *See* *Scott, 550 U.S. at 380*.

Theory Three: Ongoing Price Depression. The Zarembas' final theory is that after the companies tanked the Zaremba deal, they succeeded in decreasing the going rate for mineral-rights leases across northern Michigan. The Zarembas thus argue that they not only lost the opportunity to do a deal with Encana or Chesapeake, but also the opportunity to do so at a fair price on the open market with some other player. In support, they point to evidence suggesting that the companies reached an agreement several months after they stopped negotiating with the Zarembas. For instance, in one Encana executive's notes from a later phone call with Chesapeake, he wrote that the "principles" of Encana and Chesapeake's potential agreement were "non compete," "share data," and "save **[**15]** billions." R. 379-14, Pg. ID 7121. And in a later email, another Encana executive identified an area of land up for auction as "a [Chesapeake] area [where] we will not be bidding." R. 379-28, Pg. ID 7170.

This evidence "tends to exclude the possibility" that Encana and Chesapeake acted independently. *Matsushita, 475 U.S. at 588* (internal quotations and citation omitted). But the Zarembas cannot win under this theory: It fails to connect the companies' alleged collusion to any harm that the Zarembas suffered. A reasonable juror could credit the Zarembas' evidence that the companies eventually **[*564]** formed a collusive agreement, but the Zarembas nevertheless fail to point to evidence suggesting that they even considered leasing their rights after their last communication with Chesapeake in July 2010. They claim they did so in their briefing, but appellate briefing is not summary-judgment evidence. As the Supreme Court has held, ***HN7***[] antitrust plaintiffs are required to show "that the conspiracy caused *them* an injury for which the antitrust laws provide relief," not just that the defendant was up to no good. *Atl. Richfield, 495 U.S. at 344* (quoting *Matsushita, 475 U.S. at 584 n.7*). So, since the Zarembas have not pointed to any competent summary judgment evidence from which a reasonable **[**16]** juror could infer that they suffered an injury in the months after the companies walked away from their deal, their price-depression theory fails. *See* *Celotex Corp. v. Catrett, 477 U.S. 317, 325, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986)* (holding that ***HN8***[] moving party may discharge its burden on summary judgment by pointing out the absence of evidence to support the non-moving party's case).

III.

After Encana sued the Zarembas for breach of contract, the Zarembas counterclaimed that Encana was liable for fraud and fraudulent inducement. Both Encana's breach-of-contract claim and the Zarembas' fraud claims went to trial. At the close of proofs, both sides made motions for judgment as a matter of law, which the district court denied.

HN9[] We review the denial of a motion for judgment as a matter of law de novo. *Mich. First Credit Union v. CUMIS Ins. Soc., Inc., 641 F.3d 240, 245 (6th Cir. 2011)*. **HN10**[] Where federal courts sit in diversity, as the district court did here, they apply the standard for judgment as a matter of law used by the courts of the state whose substantive law governs the action. *Id.* **HN11**[] In Michigan, judgment as a matter of law may be granted only where "reasonable minds could not differ as to the conclusions to be drawn from the evidence." *Id.* (quoting *Ridgway v. Ford Dealer Comput. Servs., Inc., 114 F.3d 94, 97 (6th Cir. 1997)*). Just like at summary judgment, we view the evidence in the light most favorable to the non-moving party **[**17]** and draw all reasonable inferences in its favor. *Id.*

A.

Encana argues that the district court erred by denying its motion for judgment as a matter of law on its breach-of-contract claim. Specifically, Encana takes issue with the court's treatment of the Zarembas' waiver defense. At trial, the Zarembas admitted that they had failed to comply with the letter of intent's terms by refusing to return the $1.8 million. Instead, they mounted a waiver defense, relying on Encana's agent's assurance that they could keep the entire $2 million after Encana decided to walk away from the deal. Encana argues that Michigan law required the Zarembas to provide consideration for Encana's waiver. The district court held that Michigan law did not require the Zarembas to provide consideration and instructed the jury accordingly. The jury ultimately found that Encana had waived its right to recoup the earnest money.

The district court erred: **HN12**[] Michigan law requires consideration for a waiver to be effective. The Michigan Model Civil Jury Instructions explicitly state that "[a] waiver of a substantial [contract] right requires consideration." *See* M Civ. JI 142.41. And the instructions cite *Babcock v. Public Bank* ***[**18]*** , in which the Michigan Supreme Court said just that: "waiver of a substantial right . . . is a matter of contract which requires a consideration." *366 Mich. 124, **[*565]** 114 N.W.2d 159, 164 (Mich. 1962)*. The Zarembas do not contest that the right to collect $1.8 million qualifies as a "substantial right." And since the Zarembas made no attempt to prove consideration at trial, Michigan law dictates that Encana's waiver was not effective. *Id.; cf. Lee v. Macomb Cty., 288 Mich. 233, 284 N.W. 892, 893 (Mich. 1939)* ("Waiver being contractual in its nature can be no more effective as a bar than an express agreement or contract . . . .").

The Zarembas have not pointed to any intervening Michigan authority that questions *Babcock*'s validity. In fact, as Encana points out, Michigan courts continue to cite *Babcock* with some regularity. *See Brown v. Northwoods Animal Shelter, No. 299361, 2011 Mich. App. LEXIS 1912, 2011 WL 5072600, at *2 (Mich. Ct. App. Oct. 25, 2011)* (per curiam) (citing *Babcock* for the proposition that "[a] release must be supported by sufficient consideration to be considered valid"); *Jack v. Hastings Mut. Ins. Co., No. 278109, 2008 Mich. App. LEXIS 2311, 2008 WL 4958787, at *3 (Mich. Ct. App. Nov. 20, 2008)* (per curiam) (same); *Davis v. Meade Grp., No. 262190, 2006 Mich. App. LEXIS 148, 2006 WL 142527, at *1 (Mich. Ct. App. Jan. 19, 2006)* (per curiam) (same); *Karapetian v. Pontiac Osteopathic Hosp., No. 187077, 1996 Mich. App. LEXIS 1889, 1996 WL 33358118, at *1 (Mich. Ct. App. Sept. 20, 1996)* (per curiam) (same). Instead, the Zarembas point to *McCarty v. Mercury Metalcraft Co., 372 Mich. 567, 127 N.W.2d 340, 344 (Mich. 1964)*, in which the Michigan Supreme Court held that proof of consideration is not required to enforce a contract *modification*. But **HN13**[] modification and waiver are different. Waiver occurs when one party unilaterally surrenders its right to object to a **[**19]** counterparty's failure to perform a contract obligation. In contrast, modification occurs when parties mutually agree to change the terms of an agreement. This is a waiver case. So *McCarty* is inapposite.

The Zarembas next argue that "the vast majority of courts"—*i.e.*, courts in states other than Michigan—require no consideration for waiver. And indeed, *Williston on Contracts* says as much. 13 *Williston on Contracts* § 39:25 (4th ed.). But **HN14**[] the Michigan Supreme Court says what the law is in Michigan. And as a federal court sitting in diversity, "we are bound by what we believe Michigan courts would do." *J.C. Wyckoff & Assoc. v. Standard Fire Ins. Co., 936 F.2d 1474, 1485 (6th Cir. 1991)* (quoting *Diggs v. Pepsi-Cola Metro. Bottling Co., 861 F.2d 914, 927 (6th*

Cir. 1988)). The Zarembas cannot circumvent Michigan law by pointing out that Michigan has adopted a minority position.

With their consideration arguments exhausted, the Zarembas try one more avenue. **HN15**[] Under Michigan law, an agreement made to discharge a contractual obligation "shall not be invalid because of the absence of consideration" if that agreement is "in writing and signed by the party against whom it is sought to enforce the change." Mich. Comp. Laws § 566.1. So even though *Babcock* requires consideration for waiver of substantial contract rights, Michigan law *also* suggests that a waiver lacking in consideration **[**20]** may be enforceable if it is set out in a signed writing. *Id.* The Zarembas thus argue that, regardless whether they failed to prove consideration, the jury could have found that Encana's waiver was enforceable because it was in fact set out in such a writing.[4]

[*566] The Zarembas point to two such writings. First, an email chain in which Encana employees discussed the potential consequences of backing out of the Zaremba deal. Those emails noted that "[w]alking on Zaremba" could cause Encana to "lose $2MM in earnest money." R. 375-3, Pg. ID 6530. Second, a copy of a 1099-MISC tax form that Encana sent to the Zarembas after it submitted that form to the IRS, in which Encana noted that it had paid the Zarembas $2 million. But neither an *internal* Encana email nor a tax form constitutes an "*agreement* . . . in writing" between Encana and the Zarembas. Mich. Comp. Laws § 566.1 (emphasis added). Moreover, the tax form was not signed. *Id.* (an agreement discharging a contract obligation "shall not be valid or binding unless it shall be in writing *and signed* by the party against whom it is sought to enforce") (emphasis added). So neither of these documents can serve as a consideration substitute under MCL § 566.1.

In sum, the **[**21]** district court was incorrect that (1) waiver of a substantial contractual right does not require consideration under Michigan law and (2) the Zarembas' proffered writings were sufficient to satisfy § 566.1. Thus, since the Zarembas did not argue that Encana's purported waiver was in fact supported by consideration, no reasonable juror could lawfully find that they had succeeded on their waiver defense. The district court should have granted Encana's motion for judgment as a matter of law.[5]

B.

The Zarembas appeal the district court's denial of their motion for judgment as a matter of law on their fraud counterclaims.[6] The Zarembas claim that Encana made false representations that led them to sign the letter of intent and forgo the opportunity to strike a deal with Chesapeake. They argue that the evidence on this claim was so one-sided that they were entitled to judgment as a matter of law.

HN16[] To prevail on their fraud claims, the Zarembas had to show that (1) Encana made a material representation, (2) that was false, (3) that Encana knew the representation was false when it was made (or made it recklessly), (4) that Encana made the representation with the intent that the Zarembas rely on it, (5) that **[**22]** the Zarembas did in fact rely on it, and (6) that the Zarembas were injured as a result of that reliance. U.S. Fidelity & Guaranty Co. v. Black, 412 Mich. 99, 313 N.W.2d 77, 82 (Mich. 1981) (quoting Hi-Way Motor Co. v. Int'l Harvester Co., 398 Mich. 330, 247 N.W.2d 813, 816 (Mich. 1976)). The Zarembas base their fraud theory on a single email from an Encana representative informing the Zarembas that she had "confirmed with [Encana's] VP" that Encana included the "non-binding language" in the letter of intent because it had to "observe Encana's Corporate protocol

[4] The Zarembas take a curious position in interpreting § 566.1. At one point, they rely on § 566.1 to argue that consideration is *never* required for a waiver. But this argument is contrary to the provision's plain text, which indicates that an agreement discharging an obligation is not invalid absent consideration *if* there is a signed writing. Elsewhere, the Zarembas reverse course, suggesting that § 566.1 does not apply to waivers *at all*. We will assume to the Zarembas' benefit, however, that § 566.1 does apply and that absent consideration, the Zarembas could enforce Encana's waiver by pointing to a signed writing.

[5] Given that Encana was entitled to judgment as a matter of law at the close of proofs, we need not reach its claim that the district court improperly instructed the jury on the Zarembas' waiver defense.

[6] Before the case was submitted to the jury, Walter Zaremba and the Zaremba Group voluntarily dismissed their counterclaims in recognition of the fact that damages accruing from those claims accrued to Zaremba Family Farms. For continuity, this section will continue to refer to "the Zarembas."

for Board approval of the deal." R. 598-1, Pg. ID 12789. The representative then assured the Zarembas **[*567]** that she "ha[d] authority and budget to enter into the deal in good faith." *Id.* The Zarembas argue that the jury was required to view these statements as knowing or reckless misrepresentations because Encana's management had not yet issued a final approval authorizing a binding lease of the Zarembas' rights.

The Zarembas' argument hinges on the idea that the only way to understand Encana representative's reference to the "deal" was as a reference to the final acquisition. There was ample evidence, however, that the "deal" referred to was the signing of the non-binding letter of intent and the transfer of the $2 million in earnest money, which Encana's representatives did in fact have the "authority **[**23]** and budget" to carry out. At trial, the head of Encana's land-negotiations team testified that management had authorized her to offer the Zarembas up to $2 million without seeking further approval. She also testified that the Encana vice president who signed the letter of intent had the authority to agree to the letter on Encana's behalf. Moreover, the Encana representative who sent the disputed email testified that she intended "deal" to mean "letter of intent." And *the Zarembas' own representative* testified unequivocally that he "knew that the deal [Encana's representative] was referring to was [the letter of intent]." R. 606-3, Pg. ID 13031. Indeed, the letter of intent itself made clear that (1) the final purchase agreement would be a document separate from the letter of intent that would not be finalized for at least a few more weeks, and (2) a final purchase might *never* be completed. This was more than enough evidence for the jury to conclude that the Encana representative did not make a misrepresentation of fact, much less an intentional or reckless one. And so the district court correctly held that the Zarembas were not entitled to judgment as a matter of law.

IV.

The final dispute **[**24]** on appeal is over the Zarembas' motion for a new trial. At trial, Encana called an attorney with knowledge about oil-and-gas industry contracting practices as an expert witness. During his testimony, the district court repeatedly sustained the Zarembas' objections to the expert's attempts to testify as to improper legal conclusions. Afterward, the district court issued a curative instruction that the jury should "disregard any opinion" given by the expert about "what the law does or does not require." R. 625, Pg. ID 16323. The court then reminded the jurors that he, the trial judge, was "the sole judge of the law," and would be "giving [the jury] instructions about the law to be applied" during deliberations. *Id.* The Zarembas later made a motion for a new trial, arguing that the expert's testimony had tainted the jury. The district court denied that motion.

HN17[] We review the denial of a motion for a new trial for abuse of discretion. *Clarksville-Montgomery Cty. Sch. Sys. v. U.S. Gypsum Co., 925 F.2d 993, 1002-03 (6th Cir. 1991)* ("The authority to grant a new trial . . . is confided almost entirely to the exercise of discretion on the part of the trial court." (quoting in parenthetical *Allied Chem. Corp. v. Daiflon, Inc., 449 U.S. 33, 36, 101 S. Ct. 188, 66 L. Ed. 2d 193 (1980)* (per curiam))). Where the district court admitted allegedly improper evidence but later issued **[**25]** a curative instruction, we will reverse only if (1) there is an "overwhelming probability" that the jury did not or could not follow the instruction and (2) a strong likelihood that the effect of the evidence was "devastating" to the moving party. *See* *Holmes v. City of Massillon, 78 F.3d 1041, 1047 (6th Cir. 1996)* (quoting in parenthetical *Greer v. Miller, 483 U.S. 756, 766 n.8,* ***[*568]*** *107 S. Ct. 3102, 97 L. Ed. 2d 618 (1987))*. The burden of showing this likelihood of prejudice is on the party seeking the new trial. *See* *Clarksville, 925 F.2d at 1002*.

The Zarembas cannot clear this very high bar for several reasons. First, they have not established an "overwhelming probability" that the jury could not follow the district court's curative instruction. They seem to rely instead on the generalized notion that one cannot "unring the bell" once improper trial testimony has been heard by the jury. But that argument cannot itself win the day. If it could, there would be no need for the "overwhelming probability" standard—we would simply reverse every time jurors were exposed to improper testimony. That is not the law. *See* *Clarksville, 925 F.2d at 1002* (explaining that ***HN18***[] when "prejudice is cured by instructions of the court, the motion for a new trial should be denied").

Second, the Zarembas fail to show a strong likelihood that the expert's testimony was "devastating" to their case. The testimony the **[**26]** Zarembas challenge related to the appropriate measure of *damages* for the alleged fraud, *not* to the Zarembas' attempt to prove fraud *liability*. Since the verdict form showed that the jury rejected the

Zarembas' claim on liability, it is difficult to see how the challenged testimony could have had a "devastating" impact here. Therefore, the district court did not abuse its discretion in denying the Zarembas' motion for a new trial.

V.

For these reasons, we **AFFIRM** the district court's decisions to (1) grant Encana's motion for summary judgment on the Zarembas' antitrust claims, (2) deny the Zarembas' motion for judgment as a matter of law on their fraud claims, and (3) deny the Zarembas' motion for a new trial. We **REVERSE** the district court's denial of Encana's motion for judgment as a matter of law on its breach of contract claim, **VACATE** the corresponding judgment, and **REMAND** with instructions to enter judgment for Encana.

Opinion

ORDER ON *DAUBERT* MOTIONS

[Re: ECF 209, 211, 212, 217]

Before the Court are the parties' motions to exclude certain opinions of each party's experts under *Federal Rule of Evidence 702* and *Daubert v. Merrell Dow Pharmaceuticals, Inc., 509 U.S. 579, 113 S. Ct. 2786, 125 L. Ed. 2d 469 (1993)*. For the reasons stated on the record and set forth below, **[*3]** Plaintiff Arista Networks, Inc.'s ("Arista") motions are GRANTED IN PART and DENIED IN PART and Defendant Cisco Systems Inc.'s ("Cisco") motions are GRANTED IN PART and DENIED IN PART.

I. LEGAL STANDARD

Federal Rule of Evidence 702 provides that a qualified expert may testify if "(a) the expert's scientific, technical, or other specialized knowledge will help the trier of fact to understand the evidence or to determine a fact in issue; (b) the testimony is based on sufficient facts or data; (c) the testimony is the product of reliable principles and methods; and (d) the expert has reliably applied the principles and methods to the facts of the case." *Fed. R. Evid. 702*. In *Daubert v. Merrell Dow Pharmaceuticals, Inc.*, the Supreme Court held that *Rule 702* requires the district court to act as a gatekeeper to "ensure that any and all scientific testimony or evidence admitted is not only relevant, but reliable." *509 U.S. 579, 589, 113 S. Ct. 2786, 125 L. Ed. 2d 469 (1993)*. In *Kumho Tire Co., Ltd. v. Carmichael*, the Supreme Court clarified that the "basic gatekeeping obligation" articulated in *Daubert* applies not only to scientific testimony but to all expert testimony. *526 U.S. 137, 147, 119 S. Ct. 1167, 143 L. Ed. 2d 238 (1999)*. The Supreme Court also made clear that the reliability inquiry is a flexible one, and "whether *Daubert*'s specific factors are, or **[*4]** are not, reasonable measures of reliability in a particular case is a matter that the law grants the trial judge broad latitude to determine." *Id. at 153*; *see also* *Micro Chem., Inc. v. Lextron, Inc., 317 F.3d 1387, 1391 (Fed. Cir. 2003)*.

"*Daubert* and *Rule 702* are safeguards against unreliable or irrelevant opinions, not guarantees of correctness." *i4i Ltd. P'ship v. Microsoft Corp., 598 F.3d 831, 854 (Fed. Cir. 2010) aff'd*, *564 U.S. 91, 131 S. Ct. 2238, 180 L. Ed. 2d 131 (2011)*. So long as an expert's methodology is sound and his opinions satisfy the requirements of *Rule 702*, underlying factual disputes and how much weight to accord the expert's opinion are questions for the jury. *Micro Chem., 317 F.3d at 1392*; *Primiano v. Cook, 598 F.3d 558, 565 (9th Cir. 2010)*.

II. DISCUSSION

The parties have each moved to exclude opinions rendered by the other party's technical and economics experts. Cisco seeks to exclude the opinions of Dr. John R. Black, Jr. and Dr. Fiona Scott Morton. Arista, for its part, seeks to exclude the opinions of Dr. Kevin Almeroth and Dr. Dennis Carlton. The Court first addresses the parties' motions regarding their respective technical experts, Dr. Black and Dr. Almeroth.

A. Dr. John R. Black, Jr.

Cisco moves to exclude Dr. Black from offering opinions that were previously excluded in the parties' CLI case.[1] Black Mot. 1, ECF 217. Specifically, Cisco asks the Court to preclude Dr. Black's opinions regarding whether

---

[1] Cisco previously filed an action against Arista, alleging that Arista infringes Cisco's patents and copyrights in its command line interface ("CLI"). *Cisco Systems, Inc. v. Arista Networks, Inc.*, Case No. 14-cv-05344-BLF (the "CLI case"). A jury found that

Cisco's CLI is a *de facto* or informal industry **[*5]** standard as well as opinions on "corporate intent or beliefs of others." *Id.* Such opinions were precluded in the CLI case. *See* CLI *Daubert* Motions Order 2-5, Case No. 14-cv-05344-BLF, Dkt. 661. Cisco argues that Dr. Black's opinions in this case are identical to those which he offered in the CLI case and thus the Court should adopt its prior ruling in the CLI case. Black Mot. 1-2.

Arista responds that it will not offer Dr. Black's opinions as to "whether Cisco's CLI is a 'standard,' *de facto* or otherwise," "to the extent that Cisco does not open the door by presenting the opinion of its technical expert, Dr. Kevin Almeroth, that Cisco's CLI is *not* an industry standard." Black Opp'n 1, ECF 239-8 (emphasis in original). Arista also states that Dr. Black will not offer opinions regarding "corporate intent or beliefs of others." *Id.* Instead, Arista asserts that Dr. Black will "present his analysis of the evidence he reviewed 'to determine whether Cisco CLI has become common in the industry'" as the Court allowed in the CLI case. *Id.* at 1-2.

The parties agree that the Court's rulings set forth in the CLI *Daubert* Motions Order should apply in this action. **[*6]** *See* Black Mot. 1; Hearing Tr. 5:24-6:1, ECF 280. The Court does not find any reason why the Court's prior rulings in the CLI case are inapplicable here. As such, Dr. Black shall be excluded from offering opinions that were precluded in the CLI *Daubert* Motions Order. Dr. Black will not be allowed to opine whether Cisco's CLI is a *de facto* or informal industry standard. Moreover, Dr. Black will be excluded from opining on corporate intent or beliefs of others. In particular, as Cisco requests, Dr. Black may not testify that "Cisco was aware that its CLI was in widespread use by other vendors throughout the industry, acquiesced in that use, and even encouraged that use" (Black Reply 3, ECF 249-4) because that testimony directly relates to Cisco's state of mind. However, he will be permitted to opine on the common or frequent use of CLI by others in the industry based on his analysis of evidence as permitted in the CLI *Daubert* Motions Order. Based on the foregoing, the Court GRANTS Cisco's motion to exclude Dr. Black's opinions relating to whether Cisco's CLI is a *de facto* or informal industry standard as well as opinions on corporate intent or beliefs of others.

The Court addresses Arista's **[*7]** concern on whether Cisco will "open the door" by having Dr. Almeroth testify that Cisco's CLI is not an industry standard. As stated during the hearing, Dr. Almeroth will be permitted to testify whether Cisco's CLI has been promulgated as a standard by a standard setting organization. Hearing Tr. 6:12-15, 7:16-23. Dr. Almeroth, however, will not be allowed to offer opinions that Cisco's CLI is not a *de facto* or informal industry standard, and Arista may raise objections if he proceeds to do so.

B. Dr. Kevin C. Almeroth

Arista moves to exclude Dr. Almeroth's opinions that Cisco was "public and consistent" concerning its CLI intellectual property rights. Almeroth Mot. 3-5, ECF 212. Arista further seeks to preclude Dr. Almeroth's opinions that were previously excluded in the CLI case. *Id.* at 5-6. Arista's challenges are separately addressed below.

i. Dr. Almeroth's Opinions on Cisco's "Public and Consistent" Position Regarding Its Copyright

Arista contends that Dr. Almeroth, a computer scientist, submitted a Rebuttal Report that includes his opinion that "Cisco's position regarding its copyrighted CLI was public and consistent." Almeroth Mot. 2, ECF 212 (citing Ex. 12 to Nelson Decl. ("Rebuttal Report") **[*8]** ¶¶ 129-31, ECF 210-19). Under the heading "VI. Cisco's Position Regarding Its Copyrighted CLI was Public and Consistent," the Rebuttal Report states the following:

> **129**. In 2003, Cisco sued Huawei alleging theft of intellectual property alleging that Huawei copied Cisco's CLI and source code. The result of this lawsuit was a settlement requiring Huawei to change its command line interface, which was known to the industry.

Arista infringed Cisco's copyright but that the infringement was excused by the scènes à faire affirmative defense. The jury did not find patent infringement. *Id.* at Dkt. 749.

> **130**. Based on my review of the written discovery in this case, Cisco was public about its position regarding Huawei and others copying its CLI....
>
> **131**. Moreover, other switch vendors intentionally did not look at or copy Cisco's CLI in order to avoid Intellectual Property rights issues. For example, Philip Shafer was developing JUNOS CLI in the 1997 to 1998 timeframe. During his development, he intentionally did not want to look at Cisco's CLI in order to avoid infringing Cisco's rights....

Rebuttal Report ¶¶ 129-31. Arista argues that those statements are not expert testimony and that Dr. Almeroth improperly vouches for Cisco's view of disputed facts. Almeroth Mot. 3-4.

Cisco responds that paragraphs 129 to 130 of Dr. Almeroth's Rebuttal Report recite background facts **[*9]** which support Dr. Almeroth's opinions that "Cisco's CLI is not an industry standard." Almeroth Opp'n 3-4, ECF 237-3. According to Cisco, Arista seeks to strike various facts that Dr. Almeroth considers in forming his opinions. *Id.* at 4. Cisco also asserts that Arista's reference to "public and consistent" in the Rebuttal Report's section heading mischaracterizes the actual content of paragraphs 129 to 131 which addresses "background factual information." *Id.*

The Court has reviewed section "VI. Cisco's Position Regarding Its Copyrighted CLI was Public and Consistent" in Dr. Almeroth's Rebuttal Report. As a general matter, Dr. Almeroth will not be allowed to testify whether Cisco had a "public and consistent" position regarding its CLI because he does not have the expertise to opine what it means for a company to take a "public and consistent" position. Moreover, this is a factual issue about which the jury needs no expert testimony. Cisco admits that Dr. Almeroth is not an expert on whether a company's position is "public and consistent." Hearing Tr. 17:21-23; *see also* Almeroth Opp'n 3. This ruling, however, does not preclude Dr. Almeroth from offering his opinions about the market players and **[*10]** how they would have responded and reacted to Cisco's activities.

The Court turns to the three paragraphs in section VI of Dr. Almeroth's Rebuttal Report. In paragraph 129, Dr. Almeroth summarizes his view of what the 2003 lawsuit between Cisco and Huawei was about and how the lawsuit concluded. Rebuttal Report ¶ 129. This is neither the proper subject of expert testimony nor does Dr. Almeroth have expertise in characterizing lawsuits and their results. Thus, to the extent that Dr. Almeroth proffers expert opinions on the nature of the Huawei lawsuit, those opinions are inadmissible. If Cisco intends to offer the statements in paragraph 129 as a factual background, Cisco does not require an expert to introduce such statements. Allowing Dr. Almeroth to do so would amount to no more than an unfair vouching of evidence. *See United States v. Freeman, 498 F.3d 893, 903 (9th Cir. 2007)*. In paragraph 130, Dr. Almeroth opines that "Cisco was public about its position regarding Huawei and others copying its CLI" based on his review of written discovery in this case. Rebuttal Report ¶ 130. Again, Dr. Almeroth is simply vouching for fact evidence rather than providing expert opinions. An expert may not act as a mere conduit to provide an "additional summation" **[*11]** of evidence. *See id. at 903-04*. For these reasons, the Court excludes paragraphs 129 and 130 of Dr. Almeroth's report.

In paragraph 131, Dr. Almeroth opines that "other switch venders *intentionally* did not look at or copy Cisco's CLI" and that, for example, "[Philip Shafer] *intentionally* did not want to look at Cisco's CLI" when he was developing JUNOS CLI. Rebuttal Report ¶ 131 (emphasis added). Here, Dr. Almeroth opines on the subjective intent of others. Experts may not speculate about the state of mind or vouch for opinions of others as Cisco has persuasively argued regarding Dr. Black's opinions. For these reasons, Dr. Almeroth's opinion in paragraph 131 will be excluded. To be clear, Dr. Almeroth will be allowed to testify about his review of JUNOS and whether or not it copies Cisco's CLI.

The Court is unpersuaded by Cisco's arguments that paragraphs 129 to 131 should not be excluded because they are relevant to Dr. Almeroth's opinion that "Cisco's CLI is not an industry standard" (Almeroth Opp'n 3-4; Hearing Tr. 13:2-8). As stated during the hearing, the Court will not allow testimony regarding whether or not Cisco's CLI is a *de facto* or informal standard. Hearing Tr. 13:9-10. As such, to **[*12]** the extent that Dr. Almeroth relies on those paragraphs to opine that Cisco's CLI is not a *de facto* standard, those paragraphs are irrelevant and thus will not assist the jury. *See Daubert, 509 U.S. at 591* (holding that expert testimony must assist the trier of fact).

For the above reasons, Arista's motion to exclude Dr. Almeroth's opinions on whether Cisco was "public and consistent" regarding its intellectual property in CLI, including paragraphs 129 to 131 in the Rebuttal Report, is

GRANTED. To be clear, the Court will not exclude the subject matter contained in those paragraphs. In addition, as stated during the hearing, this ruling does not preclude Dr. Almeroth from offering opinions on how he views the evidence regarding Cisco's marketing campaign related to its CLI and development of products. Hearing Tr. 18:13-16.

ii. Dr. Almeroth's Opinions that Were Previously Excluded in the CLI Case

Arista seeks to exclude Dr. Almeroth's opinions that were not allowed in the CLI case. Almeroth Mot. 5. According to Arista, Dr. Almeroth's Rebuttal Report incorporates by reference the entirety of his reports in the CLI case. *Id.* Arista argues that the Court should not permit Dr. Almeroth to present previously excluded **[*13]** opinions. *Id.* Specifically, Arista challenges Dr. Almeroth's opinions that Arista copied Cisco's source code and the "look and feel" of Cisco's CLI. *Id.* at 5-6. Arista also asserts that Dr. Almeroth's opinions that speculate about Arista's state of mind and that do nothing more than vouch for Cisco's version of disputed facts should be excluded. *Id.* at 6.

Cisco agrees that the Court's prior rulings regarding Dr. Almeroth's opinions in the CLI case should apply to this action. Almeroth Opp'n 7-8. Accordingly, the Court GRANTS Arista's motion to exclude Dr. Almeroth's opinions that were previously precluded in the CLI case as set forth in the CLI *Daubert* Motions Order.

C. Dr. Dennis Carlton

Arista advances several challenges to the opinions offered by Cisco's economics expert, Dr. Carlton. Carlton Mot., ECF 211. The Court addresses each challenge below.

i. Dr. Carlton's Opinions Regarding What Conduct the *Antitrust Law* Should and Should Not Punish

Arista argues that Dr. Carlton's opinions regarding what "conduct the ***antitrust law*** should and should not punish" must be excluded. Carlton Mot. 2-4. Specifically, Arista asserts that Dr. Carlton's Report repeatedly expresses his opinions that, if Cisco were found **[*14]** liable under Arista's theory, such a finding would be inconsistent with a procompetitive antitrust policy and "wreak economic havoc." *Id.* at 2-3, 3 n.2 (citing Ex. 1 to Nelson Decl. ("Carlton Report") ¶¶ 10, 13, 56, 60-62, 64, 77, 83, 85, ECF 210-9). Those opinions should be excluded, Arista argues, because experts are prohibited from "interpreting the law for the court or from advising the court about how the law should apply to the facts of a particular case." *Id.* at 3 (citing *Mannick v. Kaiser Found. Health Plan, Inc., No. C 03-5905 PJH, 2006 U.S. Dist. LEXIS 38430, 2006 WL 1626909, at *17 (N.D. Cal. June 9, 2006)*; *Nimely v. City of New York, 414 F.3d 381, 397 (2d Cir. 2005))*.

Cisco responds that Arista mischaracterizes Dr. Carlton's opinions. Carlton Opp'n 2, ECF 233-4. In Cisco's view, Dr. Carlton has not offered prescriptive opinions about antitrust laws. *Id.* Rather, Cisco asserts, Dr. Carlton's Report explains his opinions regarding the "economic incentives that underlie intellectual property," "procompetitive benefits of information," and "procompetitive aspects of formal standard setting." *Id.* at 3-4.

After reviewing the paragraphs of Dr. Carlton's Report identified by Arista, the Court concludes that some portions of those paragraphs should be excluded. First, as a general matter, Dr. Carlton's reference **[*15]** to "wreak economic havoc" will be precluded as that phrase is inflammatory and will not aid the jury.

Second, Dr. Carlton's Report contains improper opinions that usurp the role of the court and jury. An expert's testimony may not "interpret[] the law for the court or . . . advis[e] the court about how the law should apply to the facts of a particular case." *Mannick, 2006 U.S. Dist. LEXIS 38430, 2006 WL 1626909, at *17*. Nor should the expert testify about what conduct the antitrust laws should or should not allow. *In re Delta/Airtran Baggage Fee Antitrust Litig., 245 F. Supp. 3d 1343, 1362 (N.D. Ga. 2017)*. Such opinions impermissibly "tell the jury what result to reach, and thus attempt[] to substitute the expert's judgment for the jury's." *Id.* (quoting *Nimely, 414 F.3d at 397*). For example, Dr. Carlton states in his report that a company should generally be able to "alter its policies as it sees fit" and that Dr. Scott Morton's "interpretation of intellectual property laws would create economic havoc among firms that invest to create intellectual property rights." Carlton Report ¶ 13; *see also id.* ¶¶ 60-62 (offering similar opinions). As another example, Dr. Carlton essentially opines that certain conduct should not be punished by the antitrust laws. *See*, *e.g., id.* ¶¶ 83 ("[Dr. Scott Morton's] claim has far-reaching economic implications . . . . Such a system **[*16]** would harm competition by undermining the intellectual property rights system and the economic incentives that it is designed to create."). The Court finds that paragraphs 13, 60, 61, 62 (last sentence), 77 (last sentence), and 83 of Dr. Carlton's Report run afoul of the above principles that prohibit an expert from offering opinions that usurp the role of the court and jury and inform the jury what result should be reached. *Mannick, 2006 U.S. Dist. LEXIS 38430, 2006 WL 1626909, at *17* (holding that experts should not interpret the law for the court); *In re Delta, 245 F. Supp. 3d at 1362-63* (holding that experts may not instruct the jury what result to reach). Accordingly, paragraphs 13, 60, 61, 62 (last sentence), 77 (last sentence), and 83 of Dr. Carlton's Report are excluded.

On the other hand, the Court finds that other paragraphs identified by Arista are admissible. First of all, paragraph 10 will not be excluded. In that paragraph, Dr. Carlton describes the parties' CLI litigation and ITC actions and opines that "[t]he interference with firms pursuing valid intellectual property claims and valid regulatory concerns would lead to a reduction in economic efficiency, even though infringers like Arista may benefit from such interference." Carlton Report ¶ 10. Here, Dr. Carlton describes **[*17]** the economic effects of enforcing intellectual property rights. This opinion does not rise to the level of instructing the jury on what conduct the antitrust laws should or should not punish.

Dr. Carlton will also be allowed to provide the opinions in paragraphs 56 and 85 of his report. In paragraph 56, Dr. Carlton testifies that it is "economically rational and efficient for a firm to seek to enforce its property rights." *Id.* ¶ 56. In paragraph 85, Dr. Carlton opines that companies will have less incentive to develop intellectual property if the validity of those rights would depend on the motivation for filing past intellectual property lawsuits. *Id.* ¶ 85. In those paragraphs, Dr. Carlton is not opining whether antitrust laws should prohibit specific conduct unlike his other opinions that are excluded above. Rather, he is explaining the rationality of companies to enforce intellectual property rights and the incentive considerations for protecting those rights. Those opinions are not improper.

In addition, the Court will not exclude paragraph 64 where Dr. Carlton explains the procompetitive benefits of allowing companies to disclose truthful information to customers. This opinion is **[*18]** not a prescriptive statement of the law that warrants exclusion.

Based on the above discussion, the Court GRANTS IN PART and DENIES IN PART Arista's request to exclude Dr. Carlton's opinions regarding what conduct the antitrust laws should or should not punish.

ii. Dr. Carlton's Opinions that Are Contrary to *Kodak*

Arista further moves to exclude Dr. Carlton's opinions that are in disagreement with the Supreme Court's decision in *Eastman Kodak Co. v. Image Technical Services, Inc., 504 U.S. 451, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)*. Carlton Mot. 4-7. Specifically, Arista takes issue with Dr. Carlton's opinion that "[i]n general, a firm should be able to alter its policies as it sees fit" and that "[a]bsent a legal commitment in the form of a contract, no economic basis exists for Dr. Scott Morton's opinion that another firm should rely on what it thinks its rival might do." Carlton Report ¶ 13. Arista argues that those opinions are contrary to *Kodak* and thus must be excluded as being contrary to law. Carlton Mot. 4 (citing *Cave v. Saxon Mortg. Servs., Inc., No. 11-4586, 2015 U.S. Dist. LEXIS 142198, 2015 WL 6153754, at *9 (E.D. Pa. Oct. 20, 2015)* (holding that expert opinions that are contrary to law are *per se* unreliable)). For similar reasons, Arista asserts that paragraphs 9, 12, 56, 59-61, 77 and 82-83 of Dr. Carlton's Report should be excluded. *See* Carlton Mot. 4-6.

Cisco disputes Arista's characterization **[*19]** of Dr. Carlton's opinions as being inconsistent with *Kodak.* Carlton Opp'n 2. Cisco argues that Dr. Carlton opines on the economic bases of intellectual property rights and the procompetitive aspects of a formal standard setting (as opposed to "informal" standards). *Id.* at 4-5. In Cisco's view, those opinions are consistent with *Kodak. Id.*

The Court has reviewed the paragraphs identified by Arista and excludes paragraphs 13, 60, and 61 of Dr. Carlton's Report. First, Dr. Carlton opines in paragraph 13 that "[i]n general, a firm should be able to alter its policies as it sees fit. To do otherwise would condemn a firm to forever being stuck with its initial business plan. Such a requirement would wreak economic havoc especially in rapidly changing industries . . . ." Carlton Report ¶ 13. The Court disagrees with Cisco's argument that such an opinion does not contradict *Kodak* because that case had a "very specific set of facts" that showed a policy change "that turned out to be an antitrust problem." Hearing Tr. 27:21-28:5. Dr. Carlton's broad opinion that a company should be able to freely change its policy is inconsistent with *Kodak* because Dr. Carlton's opinion does not recognize that a policy **[*20]** change can indeed violate antitrust laws as in *Kodak.* Such an opinion is not permitted. *Apple, Inc. v. Samsung Elecs. Co., No. 11-CV-01846-LHK, 2012 U.S. Dist. LEXIS 90877, 2012 WL 2571332, at *7 (N.D. Cal. June 30, 2012)* (excluding an expert's opinion that is contrary to law).

Second, in paragraphs 60 and 61, Dr. Carlton opines that as a general matter a company should be able to alter its policies as it sees fit. Carlton Report ¶ 61. He explains that imposing an implicit requirement for a company to not alter its policy would fundamentally alter the intellectual property system. *See id.* ¶ 60. Like paragraph 13, here Dr. Carlton's broad opinion that a company should be able to freely change its policy is inconsistent with *Kodak.* As mentioned, *Kodak* recognizes that a policy change can violate antitrust laws. *See* *Kodak, 504 U.S. at 458, 477-86*.[2] Thus, paragraphs 60 and 61 of Dr. Carlton's Report are excluded. *Apple, 2012 U.S. Dist. LEXIS 90877, 2012 WL 2571332, at *7* (excluding an expert's opinion that is contrary to law).

On the other hand, the Court will not exclude paragraphs 9, 12, 56, 59 and 82 as those paragraphs are not contrary to *Kodak.*[3] Regarding paragraph 9, Arista takes issue that in this paragraph Dr. Carlton opines that "[p]enalizing [enforcement of IP rights] would harm competition" without considering whether such enforcement was part **[*21]** of an "open early, closed late policy change." Carlton Mot. 6. However, this opinion is not necessarily inconsistent with *Kodak* which did not involve the particular type of "open early, closed late" scheme that is the subject of this case. For this reason, the Court finds that the opinions in paragraph 9 are not precluded by *Kodak.*

As set forth in paragraph 12, Dr. Carlton asserts that "Dr. Scott Morton's analogy regarding hold up in formal standard setting organizations is invalid for several reasons." Carlton Report ¶ 12. Here, Dr. Carlton explains why this case is different from a "hold up" based on a formal standard set by a standard setting organization. *Id.* The Court does not find that his opinions as stated in paragraph 12 are inadmissible. For instance, Dr. Carlton points out that "there is no claim that Cisco had a contractual obligation to make its CLI available for free." *Id.* This statement on its own is factually correct and does not contradict *Kodak.* However, Dr. Carlton will not be allowed to opine that an anticompetitive "open early, closed late scheme" *requires* a contractual obligation between the involved parties because *Kodak* does not preclude the possibility **[*22]** that such a scheme is unlawful in the absence of a contractual relationship. Dr. Carlton also opines that "even if a firm initially does not charge for a product, it would be an economic error to require that the firm should never charge for it." *Id.* This opinion is not contrary to law because *Kodak* does not require a firm to never change its policy. But the phrase "economic error" may mislead the jury and thus Dr. Carlton will not be allowed to use that phrase.

In paragraph 56, Dr. Carlton testifies that "it is economically rational and efficient for a firm to seek to enforce its property rights." Carlton Report ¶ 56. In paragraph 59, Dr. Carlton discusses that disputes over intellectual property rights are common and that he disagrees with "Dr. Scott Morton's claim that it is anti-competitive to sue in order to enforce even a valid intellectual property right." *Id.* ¶ 59. Here, Dr. Carlton is explaining the rationality of companies to enforce intellectual property rights and opines that intellectual property lawsuits are not anticompetitive. Those opinions are not inconsistent with *Kodak* and thus will be allowed.

---

[2] The Court does not mean to suggest that *Kodak* bans all policy shifts, but rather that Dr. Carlton's opinions are impermissibly overbroad by suggesting that there are absolutely no limits.

[3] The Court also does not find that paragraphs 77 and 83 are necessarily inconsistent with *Kodak.* The Court need not discuss those paragraphs in detail because those portions are already excluded as discussed in the previous subsection.

Dr. Carlton further opines in paragraph 82 that companies that use another's **[*23]** intellectual property can "protect themselves through contract or by relying on standards set by [a standard setting organization]" and that "Cisco made no . . . contractual commitments to Arista or other competitors for free use of its CLI." Carlton Report ¶ 82. Those statements are not contrary to law and thus the opinions in paragraph 82 will be allowed. That said, as discussed above, Dr. Carlton will not be allowed to opine that an anticompetitive "open early, closed late scheme" *requires* a contractual obligation between the involved parties because *Kodak* does not preclude the possibility that such a scheme is unlawful in the absence of a contractual relationship.

Based on the foregoing discussion, the Court GRANTS IN PART and DENIES IN PART Arista's request to exclude Dr. Carlton's opinions that are contrary to *Kodak.* To be clear, Dr. Carlton will be allowed to opine about intellectual property rights, the rights Cisco has, and why those rights are valuable to Cisco in developing its competitive position in the market.

iii. Dr. Carlton's Opinions Regarding the Competitive Effects of Cisco's Conduct

Arista challenges Dr. Carlton's testimony that "Cisco's conduct . . . did not harm **[*24]** competition but instead promoted it." Carlton Mot. 7. According to Arista, Dr. Carlton defines "Cisco's conduct" as "1) bringing a lawsuit about Arista's use of Cisco's CLI, and 2) making public and private communications with customers that Arista had a culture of copying." *Id.* (citing Carlton Report ¶¶ 52-101) (internal quotation marks omitted). In this regard, Arista argues that Dr. Carlton determines only whether Cisco's 2014 CLI lawsuit and "Cisco's communication about it" were procompetitive but fails to assess evidence concerning Cisco's "open early, closed late" policy shift. *See id.* at 8. Specifically, Arista asserts that Dr. Carlton did not review eight documents that relate to Cisco's "open early, closed late" strategy. *Id.* at 8-9. On this basis, Arista argues that Dr. Carlton fails to consider "core evidence" and thus his opinion that "Cisco's copyright suit against Arista is procompetitive" and all associated assertions should be excluded. *Id.* at 9-10.

In Cisco's view, Arista incorrectly argues that the fact that Dr. Carlton did not recall reviewing a handful of documents at the time of his deposition suggests that he did not consider relevant facts. Carlton Opp'n 9. Cisco points out that Arista lists **[*25]** eight allegedly "unreviewed" documents while Cisco has produced over 2 million documents in this case. *Id.* Cisco asserts that Dr. Carlton cannot reasonably remember each document that he reviewed and the lack of recollection on reviewing a few documents does not justify excluding his testimony. *Id.* Moreover, Cisco argues that Dr. Carlton did consider documents that have similar information contained in the allegedly unreviewed documents to reach his conclusions. *Id.*

The Court is satisfied that Dr. Carlton's opinions regarding the competitive effects of Cisco's conduct are admissible. Seven of the eight documents that Arista identifies contain Cisco's statements that describe its CLI as a "standard" or note other competitors' use of Cisco CLI. *See, e.g.*, Exs. 5, 6 to Nelson Decl., ECF 210-12, -13. Dr. Carlton testifies that he has "seen documents in which [Cisco] describes its CLI as [an] industry standard." Ex. A to Leary Decl. ("Carlton Dep.") 195:18-19, ECF 233-5; *id.* at 161:4-8. Thus, even if Dr. Carlton did not actually review the documents pointed out by Arista, he did consider similar information contain therein. Moreover, Dr. Carlton explains that he accounted for such information **[*26]** by speaking with Dr. Almeroth about the meaning of Cisco's description of its CLI as a standard. *Id.* at 161:4-13. Thus, contrary to Arista's contention, Dr. Carlton's opinions about the competitive effects of Cisco's conduct are "sufficiently tied to the facts of this case." *Daubert, 509 U.S. at 591* (quoting *United States v. Downing, 753 F.2d 1224, 1242 (3rd Cir. 1985))*. To the extent that Dr. Carlton did not consider certain documents, the Court finds that the alleged deficiencies in Dr. Carlton's opinions are better addressed through "[v]igorous cross-examination, presentation of contrary evidence, and careful instruction on the burden of proof." *Clear-View Techs., Inc. v. Rasnick, No. 13-CV-02744-BLF, 2015 U.S. Dist. LEXIS 71990, 2015 WL 3505003, at *2 (N.D. Cal. June 2, 2015)*. The Court thus DENIES Arista's motion to exclude Dr. Carlton's opinions regarding the competitive effects of Cisco's conduct.

D. Dr. Fiona Scott Morton

Cisco raises three challenges to Dr. Scott Morton's opinions relating to (1) the existence of an informal industry standard for CLI, (2) damages assessment based on her forecasting model, and (3) apportionment of damages that were discussed during her deposition. The Court addresses each challenge in turn.

i. Dr. Scott Morton's Opinions Regarding a *De Facto* or Informal Standard

Cisco seeks to preclude Dr. Scott Morton from **[*27]** testifying on the existence of a *de facto* or informal standard for CLI. Scott Morton Mot. 2, ECF 209. Cisco argues that Dr. Scott Morton lacks the expertise to identify a *de facto* or informal industry standard and that she did not use a reliable methodology to determine that Cisco's CLI is such a standard. *Id.* at 3. Arista responds that it will not seek to offer any opinion of Dr. Scott Morton that states that "Cisco's CLI is a 'standard,' *de facto* or otherwise." Scott Morton Opp'n 3, ECF 239-6. According to Arista, Dr. Scott Morton's analysis does not depend on whether Cisco's CLI is a standard. *Id.*

The Court agrees with Cisco that Dr. Scott Morton lacks the expertise to determine whether Cisco's CLI is a standard. Nor does she have the expertise to testify whether Cisco's CLI has the attributes of a standard. While Dr. Scott Morton is a highly qualified economist, she has no special training in identifying informal industry standards. Thus, the Court will preclude Dr. Scott Morton from opining on whether the CLI at issue in this case is a *de facto* or informal standard. She will also not be allowed to opine on whether the CLI has attributes of a standard. In addition, Dr. Scott Morton will **[*28]** not be permitted to use the term "hold up" which would mislead the jury. Hearing Tr. 37:1-8, 14-16; *see also id.* at 45:19-24 (Arista stating that Dr. Scott Morton does not need to use the term "hold up" in offering her opinions).

Cisco further asserts that Dr. Scott Morton's opinions regarding anticompetitive "open early, closed late" conduct should be excluded because she has no basis for those opinions once she is precluded from testifying that "Cisco's CLI is a 'standard.'" Scott Morton Reply 1, ECF 248. To the extent that Cisco argues that Dr. Scott Morton should be precluded from offering opinions regarding Cisco's purported "open early, closed late" scheme at all, the Court rejects that argument. Although Dr. Scott Morton frequently uses the term "standard" in her report, she also describes Cisco's conduct based on evidence without referring to that term. Dr. Scott Morton has the expertise to understand the market reality from the facts of this case and thus will be allowed to offer her opinions based on Cisco's marketing of CLI and the market reality. Hearing Tr. 36:2-4.

Accordingly, the Court GRANTS Cisco's motion to exclude Dr. Scott Morton's opinions regarding the existence **[*29]** of a *de facto* or informal standard for CLI as set forth above. This ruling, however, does not preclude Dr. Scott Morton from testifying on the anticompetitive effects of an "open early, closed late" scheme.

ii. Dr. Scott Morton's Opinions Regarding Damages Based on Her Forecasting Model

Cisco moves to exclude Dr. Scott Morton's testimony regarding damages based on her forecasting model. Scott Morton Mot. 6. Cisco contends that Dr. Scott Morton's forecasting approach cannot distinguish between the effects of Cisco's purported CLI policy reversal and other factors—such as the patent and ITC litigations, aggressive pricing and new switches from Cisco, and growing competition—and thus cannot isolate "damages due to Cisco's [unlawful] actions." *Id.* In other words, Cisco claims that Dr. Scott Morton's analysis fails to segregate the losses caused by the purported anticompetitive conduct from other lawful conduct. *See id.* (citing *City of Vernon v. S. Cal. Edison Co., 955 F.2d 1361, 1372 (9th Cir. 1992)*; *Farley Transp. Co. v. Santa Fe Trail Transp. Co., 786 F.2d 1342, 1352 (9th Cir. 1985))*; *see also id.* at 7-8.

Arista counters that courts have applied a relaxed standard for proving the amount of damages once the fact of damage has been shown. Scott Morton Opp'n 5 (citing *Moore v. Jas. H. Matthews & Co., 682 F.2d 830, 836 (9th Cir. 1982))*. In this regard, Arista argues that "a plaintiff need not exhaust all possible alternative **[*30]** sources of injury." *Id.* at 5 (quoting *William Inglis & Sons Baking Co. v. ITT Cont'l Baking Co., 668 F.2d 1014, 1051 (9th Cir. 1981))*; *see also id.* at 6-7. Arista further contends that Dr. Scott Morton properly considers multiple factors that affected its revenue, including "developing market factors, competition from white box installations and others, and the ITC import bans." *Id.* at 6.

In her report, Dr. Scott Morton uses a "forecasting approach" to predict Arista's revenues based on a statistical model which "assumes that, but for Cisco's conduct, Arista's revenues would have evolved in a similar fashion during the conduct period" as the revenues have evolved before the "conduct period."[4] Ex. A to Seddon Decl. ("Scott Morton Report") ¶¶ 194-95, ECF 208-5. Dr. Scott Morton then determines the difference between her forecast and Arista's actual revenues to be Arista's "lost revenues." *Id.* ¶ 235. To estimate damages, Dr. Scott Morton multiplies the lost revenues with Arista's gross margins as a "measure of profits on incremental sales." *Id.*

The above analysis conducted by Dr. Scott Morton does not utterly fail to segregate Arista's losses based on Cisco's purported anticompetitive conduct and other lawful factors. In applying her forecasting approach, Dr. Scott Morton uses data from a "benchmark period" **[*31]** (from the fourth quarter of 2008 to the fourth quarter of 2014) to predict Arista's revenues during the "conduct period" that would have occurred "but for Cisco's conduct from the first quarter [of] 2015 onwards." Scott Morton Report ¶¶ 209-10. As Arista argues, Dr. Scott Morton's analysis takes into account Cisco's aggressive pricing and sales of new switches because those factors existed during the benchmark period. *Id.* ¶¶ 60-62; *see also* Ex. B to Seddon Decl. ("Scott Morton Dep.") 363:23-9, ECF 208-7 (explaining that "much of the release [of new products] actually occurs in the [benchmark period]" and thus that factor is accounted in the model). Likewise, contrary to Cisco's contention, Dr. Scott Morton's model takes into account the increased competition from white box installations and Juniper which had increases in market share during the benchmark period. *See* Scott Morton Dep. 364:10-18 (explaining that white boxes were introduced before the conduct period and thus are accounted for in the model); Fig. 4 of Scott Morton Report (showing Juniper's trend in market share during the benchmark period).[5] For these reasons, the Court is unpersuaded by Cisco's argument that Dr. Scott **[*32]** Morton's treatment of Cisco's aggressive pricing and new switches as well as competition from other vendors renders her opinions unreliable. Whether Dr. Scott Morton's benchmark analysis properly considers the effects of those factors goes to the weight rather than the admissibility of her opinions. *Hemmings v. Tidyman's Inc., 285 F.3d 1174, 1188 (9th Cir. 2002)* ("[I]n most cases, objections to the inadequacies of a study are more appropriately considered an objection going to the weight of the evidence rather than its admissibility. Vigorous cross-examination of a study's inadequacies allows the jury to appropriately weigh the alleged defects and reduces the possibility of prejudice." (internal citation omitted)).

Cisco also argues that Dr. Scott Morton does not separate the effects of Cisco's lawful patent litigation and corresponding ITC investigations. Scott Morton Report 7. Arista admits that Dr. Scott Morton's model does not "quantifiably" separate the impact of Cisco's purported anticompetitive conduct from Cisco's ITC actions. Scott Morton Opp'n 7.

Nevertheless, Arista asserts that Dr. Scott Morton "qualitatively" assesses the impact of the ITC litigations. *See* Hearing Tr. 51:23-52:13, 54:24-55:2; Scott Morton Opp'n 7. Indeed, Dr. **[*33]** Scott Morton has reviewed evidence to consider the effect of the parties' dispute before the ITC. For example, Dr. Scott Morton analyzes the trend in Arista's new customer acquisitions before and during the "conduct period" and concludes that the slowdown of acquisitions is attributable to Cisco's change in CLI policy rather than the ITC import bans. *See id.* ¶¶ 185-86. Moreover, Dr. Scott Morton also considers that Arista was able to maintain production in face of the ITC's import ban by "[TEXT REDACTED BY THE COURT]" *Id.* ¶ 234. In her deposition, she explains that her analysis gives

---

[4] Dr. Scott Morton treats the period from the first quarter in 2015 to the last quarter in 2016 as the "conduct period" when Cisco was actively litigating the CLI case. Scott Morton Report ¶ 208. Cisco filed the CLI case on December 5, 2014 and the jury reached a jury verdict on December 14, 2016.

[5] Cisco also contends that Dr. Scott Morton fails to consider the increased market share of Huawei. Scott Morton Mot. 8. However, Huawei does not have a significant presence in the U.S. (*see* Fig. 4 of Scott Morton Report) and Huawei's increase in worldwide market share is largely irrelevant because Dr. Scott Morton estimates only loss of revenues in the U.S. as a conservative measure. *Id.* ¶ 212 (explaining that the damages calculation exclusively considers only Arista's U.S. revenues as a conservative estimate).

substantial weight to Cisco's CLI-related conduct and that her assessment is supported by Cisco's _30(b)(6)_ witness' description of the CLI as being "foundational." Scott Morton Dep. 268:2-12; 355:1-356:22; 362:21-363:3. Because Dr. Scott Morton considers evidence and conducts an analysis to support her discount of the effects of Cisco's ITC actions, the Court concludes that her opinions are based on an adequate foundation and a reliable methodology. Therefore, Dr. Scott Morton's damages opinions based on her forecasting model will not be excluded.[6]

The cases relied on by Cisco—*City of Vernon* and *Farley* ***[*34]*** —do not dictate a conclusion that Dr. Scott Morton's damages opinions are inadmissible. Those cases do not directly address the admissibility of an expert's testimony but rather speak to the issue of an antitrust plaintiff's burden of proving damages. *See* _City of Vernon, 955 F.2d at 1373_; *Farley, 786 F.2d at 1351-52*.

That said, *City of Vernon* and *Farley* raise a concern on Arista's burden to prove damages. Those cases hold that the antitrust plaintiff must proffer sufficient evidence so that a jury could reasonably estimate without speculation the amount of damages attributable to the unlawful conduct. *See* _City of Vernon, 955 F.2d at 1371-73_; *Farley, 786 F.2d at 1350-52*. In this regard, Dr. Scott Morton's opinions raise an issue due to her model's inability to quantitatively separate out the effects of Cisco's purported anticompetitive conduct and the ITC actions. But as the Ninth Circuit recognized in *City of Vernon*, a plaintiff's evidence on damages may be "filled in by testimony at trial." _955 F.2d at 1373_ (citing _Dolphin Tours, Inc. v. Pacifico Creative Serv., Inc., 773 F.2d 1506, 1513 (9th Cir. 1985))_. Here, Arista represents that it will proffer other evidence to support apportionment of damages. Hearing Tr. 63:16-17. For the instant motion, the Court is reviewing only the admissibility of Dr. Scott Morton's opinions based on her forecasting model and thus need not determine whether Arista would be able **[*35]** to ultimately satisfy its burden to prove damages without requiring speculation.

Accordingly, the Court DENIES Cisco's motion to exclude Dr. Scott Morton's opinions regarding damages based on her forecasting model. During the hearing, Cisco argued that it would be prejudiced if Arista were allowed to present a huge damages number without a basis for apportionment. Hearing Tr. 43:2-3. At this juncture, the Court is unable to determine the merits of Cisco's "prejudice" argument without knowing the entirety of Arista's apportionment evidence. Cisco will have the opportunity to raise objections during trial.

iii. Dr. Scott Morton's Opinions on Apportionment that are Purportedly Undisclosed in Her Expert Report

Cisco seeks to exclude Dr. Scott Morton's opinions on apportionment of damages that she provided during her deposition. Scott Morton Mot. 9. Specifically, Cisco challenges Dr. Scott Morton's deposition testimony that "the effects of the [CLI] copyright litigation are 'a much more impactful and important part of the effect on demand than the patent litigation.'" *Id.* (citing Scott Morton Dep. 358:12-359:25). Cisco contends that this opinion should be excluded because the opinion is not **[*36]** disclosed in Dr. Scott Morton's Report and it is based on an ad hoc evaluation that she is unqualified to perform. *Id.* at 9-10.

Arista counters that Dr. Scott Morton properly responded to the questions of Cisco's counsel at deposition regarding the confounding effects on damages such as the ITC proceedings. Scott Morton Opp'n 9. Arista further argues that Dr. Scott Morton is qualified to elaborate on the details of her damages model. *Id.* at 10.

The Court agrees with Arista. Dr. Scott Morton's deposition testimony regarding the larger effect of the CLI litigation compared to the patent litigation is not a new opinion undisclosed in her report. For example, Dr. Scott Morton considers the impact of Cisco's conduct on Arista's acquisition of new customers. Scott Morton Report ¶¶ 183-86. She analyzes the decline in new customer acquisitions during the conduct period and concludes that the slowdown

---

[6] Cisco also contends that Arista failed to take discovery of its customers on whether Arista's lost sales were due to the CLI litigation or the ITC actions. *See* Hearing Tr. 41:2-8. Arista responds that it cannot survey unidentified customers and that it is not required to survey all customers in the industry. *Id.* at 55:15-21. The Court finds that Arista's lack of discovery of its customers does not affect the reliability and admissibility of Dr. Scott Morton's opinions although conducting such discovery may have bolstered her analysis.

is attributable to Cisco's change in CLI policy and the CLI litigation rather than the ITC import bans. *See id.* ¶¶ 185-86. Thus, the Court finds that Dr. Scott Morton's response that was made during her deposition does not go beyond what she opines in her expert report. Dr. Scott Morton is not limited to the reading **[*37]** of her report. *Lewert v. Boiron, Inc., 212 F. Supp. 3d 917, 932 (C.D. Cal. 2016)*. Indeed, an expert may "supplement, elaborate upon, and explain his [or her] report in . . . oral testimony." *Id.* Dr. Scott Morton did not make an improper opinion when she elaborated her damages analysis at her deposition.

In addition, the Court is unpersuaded by Cisco's argument that Dr. Scott Morton conducted an improper ad hoc evaluation that warrants an exclusion of her damages opinion. Cisco takes issue with Dr. Scott Morton's deposition statement that patents "'pose[] a much less serious long-run threat to a customer' because 'you can design around them.'" Scott Morton Mot. 9 (citing Scott Morton Dep. 359:8-12). Here, the Court does not find that Dr. Scott Morton is testifying about designing around patents as a technical matter, which is a field that she does not have expertise. Rather, Dr. Scott Morton is opining on the economic effects of patent lawsuits while giving consideration to the possibility of circumventing patents. Whether her opinion is correct goes to "the weight of the evidence rather than its admissibility" and is subject to cross-examination. *Hemmings, 285 F.3d at 1188*.

Accordingly, Cisco's motion to exclude Dr. Scott Morton's opinions on apportionment of damages that **[*38]** she provided during her deposition is DENIED.

III. ORDER

For the foregoing reasons, Cisco and Arista's *Daubert* motions are both GRANTED IN PART and DENIED IN PART.

1. Cisco's motions to exclude expert testimony are GRANTED with respect to:

    a. Dr. Black's opinions regarding whether Cisco's CLI is a *de facto* or informal industry standard as well as opinions on corporate intent or beliefs of others as set forth in the CLI *Daubert* Motions Order.

    b. Dr. Scott Morton's opinions regarding the existence of a *de facto* or informal standard.

2. Cisco's motions to exclude expert testimony are DENIED with respect to:
    a. Dr. Scott Morton's opinions regarding damages based on her forecasting model.
    b. Dr. Scott Morton's opinions on apportionment of damages that she provided during her deposition.
3. Arista's motions to exclude expert testimony are GRANTED with respect to:
    a. Dr. Almeroth's opinions regarding whether Cisco was public and consistent concerning its intellectual property in the CLI, including paragraphs 129-131 of Dr. Almeroth's Rebuttal Report.

    b. Dr. Almeroth's opinions regarding purported source code copying, the "look and feel" of Cisco's CLI, and Arista's state of mind or vouching for the **[*39]** opinions of others as set forth in the CLI *Daubert* Motions Order.
    c. Dr. Carlton's opinions regarding what conduct the antitrust laws should and should not punish that are presented in paragraphs 13, 60, 61, 62 (last sentence), 77 (last sentence), and 83 of Dr. Carlton's Report.

    d. Dr. Carlton's opinions that are inconsistent with *Eastman Kodak Co. v. Image Technical Servs., Inc., 504 U.S. 451, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)* and presented in paragraphs 13, 60, and 61 of Dr. Carlton's Report.
4. Arista's motion to exclude Dr. Carlton's opinions is DENIED as to the remainder.

IT IS SO ORDERED.

Opinion

[*600] MEMORANDUM

PRATTER, J.

INTRODUCTION[1]

This is a straightforward case of statutory interpretation where the plain language dictates the result. After ten years of incubating, and on the eve of closing arguments of a month-long trial, the parties suggest that the outcome of the case hinges on the meaning of one word in a little-used 1922 statute partially protecting farmers from antitrust laws.

[1] Because the Court has issued many opinions already in this case, and because of the exigencies of trial, this memorandum necessarily does not set out all of the background facts of this litigation. The parties know them well. Generally, however, the Court makes reference to the Court's September 2016 opinion on a different question on the *Capper-Volstead Act*, as well as the Court's summary judgment ruling. *See* *In re Processed Egg Prods. Antitrust Litig., 206 F. Supp. 3d 1033 (E.D. Pa. 2016)*.

The Court is called upon to answer the deceptively simple question: how should one calculate the "value" of something?

In a certain sense, value is ephemeral. There are many types of value. Black's Law Dictionary lists 54 different types of value, 53 of which contain an adjective preceding it. But there is only one definition of "value" that can be used here: the amount a good can demand in exchange. The Court finds that "value" must mean the price for which it is purchased by the cooperative, and therefore concludes that, on the basis of the evidence, volume cannot serve as an adequate substitute for value. For this reason, the **[**2]** Court finds that there is insufficient evidence to grant a directed verdict at this time in favor of the defense. However, because the defendants have not rested their case, the Court also declines to grant the motion for a directed verdict to the plaintiffs. The defendants may still attempt to present evidence of the value of goods to the jury that would otherwise satisfy the statutory requirements as outlined below.

BACKGROUND

In 1922, as the effects of the *Sherman* and *Clayton Acts* were coming into greater focus, Congress passed the Capper-Volstead Act to "remove the threat of antitrust restrictions on certain kinds of collective activity." *National Broiler Marketing Ass'n v. United States, 436 U.S. 816, 824, 98 S. Ct. 2122, 56 L. Ed. 2d 728 (1978)*. The grant was not absolute. Among the limitations imposed was a requirement that "the association shall not deal in the products of nonmembers to an amount greater in value **[*601]** than such as are handled by it for members." *7 U.S.C. § 291*. In other words, the immunity only applies to agricultural cooperatives that have the majority of their products handled by members. This is the so-called "50% rule." The 50% is determined by the value of the products handled by the cooperative.

There is scant case law on the rule. Few courts have even addressed this provision, and **[**3]** none have done so with such a novel fact pattern as presented here. In most agricultural commodity businesses, volume and price paid are directly proportional—economic laws dictate that market forces command relatively similar prices for similar goods in a market. But here, the United States Egg Marketers (USEM) was expressly designed (or, if not designed, then operated) to bridge two different markets by allowing USEM to export eggs from the U.S. market to the foreign market. USEM coordinated bulk shipments to sell eggs overseas for less than the prices eggs demanded domestically, while sharing the losses *pro rata* amongst members. The plaintiffs allege that this "dumping" scheme was done to raise prices domestically so that, even though so that, even though there was (or could be) a short-term loss for all members on a specific export, the resulting buoyed egg prices would nevertheless increase domestic profits to justify the export losses.

USEM members were obligated to supply eggs for the export in accordance with their *pro rata* size, and were paid the foreign price of export.[2] Usually, not all USEM members would have enough domestic eggs to cover USEM's export commitments. When this **[**4]** happened, members could ask USEM to go into the open market to purchase eggs and would then be invoiced for the loss in the market purchase. This provision meant that *non-members* were paid a higher price by USEM than *members* were paid to export their eggs. As an example, in a given export, USEM members who had eggs could sell their eggs overseas for $0.50, but to fulfill the export requirement, USEM would go into the market and buy eggs from non-members at the going domestic rate of $1.50. USEM would then turn around and export these "$1.50 eggs" at $0.50 and bill the $1.00 loss to the members.

Thus, even when USEM would ensure that the *volume* of each egg shipment from members made up more than 50% of the total, the *price paid* for the eggs could be drastically different. This means that the precise question presented to the Court is binary. If the Court concludes that "value" means "volume," the defendants have presented sufficient evidence for their affirmative defense to go to the jury. But if the Court concludes that "value"

---

[2] Thus, for example, if a USEM member owned 10% of the total hen-laying eggs in USEM, that producer would be required to supply 10% of the eggs for the proposed export.

means "price paid for the goods" then there is insufficient evidence on the record (as currently constituted at the moment of the issuance of this memorandum) **[**5]** to support the defense.

DISCUSSION

The Court concludes that the word "value" in the statute must mean the price the buyer pays for it domestically. Such a reading is compelled by the statute.

I. Definition of Value

As in any question of statutory interpretation, the Court must start with the text of the statute. The Capper-Volstead Act requires that "the association shall not deal in the products of nonmembers to an amount greater in value than such as are handled by it for members." *7 U.S.C. § 291*. **[*602]** At the time Capper-Volstead was drafted, value, when "applied without qualification to property of any description," which is how the statute used the word, "necessarily means the price which it will command in the market." Bouvier's Law Dictionary and Concise Encyclopedia, *Value* (8th Ed. 1914); *accord* Baldwin's Century Edition of Bouvier's Law Dictionary, *Value* (1926). This common sense meaning has changed little today.[3]

The defendants argue that volume is the same as value, but that cannot be true. "Volume" is synonymous with quantity, and while quantity is often directly proportional to value, that is not necessarily true. Congress could have written the statute to encompass an "amount greater in volume," **[**6]** or an "amount greater than the fair market value." It did not. Instead, it used plain language to define value in the common sense way: the price of the good. This plain reading of the statute is buttressed by the goal of the Capper-Volstead Act. It was enacted to partially protect agricultural cooperatives from the threat of antitrust laws so the association could operate "for the mutual benefit of the members thereof." *7 U.S.C. § 291*. It would certainly be curious for the statute to allow the cooperative to discriminate *against* its members by giving dispositive preference to non-members.

However, even this plain reading, defining value as "the price which it will command in the market," begs two questions. First, how does the Court determine the price a good will command in the market? And, second, which market should the Court look to? The Court finds that the most reliable way to determine the price a good will command is by looking at the price for which it was purchased, and the market the Court must look to is the domestic market.

II. Determining the Price a Good Demands

The defendants argue that, in determining the price a good demands, the Court should look to the market price (and thus, volume). **[**7]** [4] The plaintiffs argue that the most reliable indicator for the price a good demands is the price a buyer pays for the good itself.

This debate over the interpretation of the word "value" has been addressed before by the Supreme Court. In interpreting whether a property sold in a foreclosure sale was for "reasonably equivalent value," the Court held that "the only legitimate evidence of the property's value at the time it is sold is the foreclosure-sale price itself." *BFP v. Resolution Trust Corp., 511 U.S. 531, 549, 114 S. Ct. 1757, 128 L. Ed. 2d 556 (1994)* (Scalia, J.). In dismissing the metric of assessment advocated by the defense here—the fair market price of the good—the Court noted that the

---

[3] The operative definition in Black's Law Dictionary notes that value means the "monetary worth or price of something; the amount of goods, services, or money that something commands in an exchange." Black's Law Dictionary, *Value*.

[4] If the Court uses market price as the correct way to determine the price a good commands, it necessarily follows that volume is an adequate proxy. This is because volume multiplied by price equals value, and the market price becomes a constant. Therefore, volume would be directly proportional to value.

"term 'fair market value,' though it is a well-established concept, does not appear in" the text of the statute. Id. at 537. The same is true in the Capper-Volstead Act—the statute does not mention "fair market value."

The defendants argue that, as a practical matter, "fair market value" is a reliable indication of the value of something. But "fair market value cannot—or at least **[*603]** cannot *always*—be the benchmark." Id. at 537. For example, in *BFP*, the Supreme Court found that fair market value cannot be used as a proxy for the value of a house in foreclosure because the phrase "presumes market conditions **[**8]** that, by definition, simply do not obtain in the context of a forced sale." Id. at 538. In other words, "the fact that a piece of property is legally subject to forced sale, like any other fact bearing upon the property's use or alienability, necessarily affects its worth." Id. at 548.

Given the nature of the facts here, and the fact that the USEM export scheme explicitly crossed markets in selling the eggs, the Court cannot presume "market conditions that, by definition, simply do not obtain." BFP, 511 U.S. 531 at 548, 114 S. Ct. 1757, 128 L. Ed. 2d 556.

The same is true of the USEM export program. In attempting to interpret the word value, the Court must consider the context to determine value. Although often times volume is a good—sometimes the best—proxy for value, there are often more reliable determinants for value. The fact that the member eggs were contractually obligated for export, "like any other fact bearing upon the property's use or alienability, necessarily affects its worth." *Id.*

The parties debate at great length over two cases with dueling interpretations of how to calculate value in the context of Capper-Volstead. *Compare* Bd. Of Trade of City of Chicago v. Wallace, 67 F.2d 402 (7th Cir. 1933) (determining value from price) with Ewald Bros., Inc. v. Mid-America Dairymen, Inc., 877 F.2d 1384 (8th Cir. 1989) (determining value through volume). Neither case is particularly on point. Although *Wallace* ***[**9]*** dealt with wheat prices, the case took place at the height of Congressional price regulation of such commodities. *See, e.g.,* Wickard v. Filburn, 317 U.S. 111, 63 S. Ct. 82, 87 L. Ed. 122 (1942). Thus, price in that instance not only was synonymous with volume, but the value of the commodity was controlled entirely by the federal government.

The defendants' proffered case fares no better. *Ewald* dealt with milk producers who joined together to purchase options contracts to buy milk. Ewald, 877 F.2d at 1389. Importantly, the option prices were not tied to the actual purchase of milk—they were speculative hedging mechanisms to protect against milk shortfalls. The options were purchased in advance, and when the time came to exercise the option, members could either exercise the option, at which point the milk would be purchased at the pre-determined option price, or it could allow the option to expire, and simply pay the price of the option. *Id.*

Therefore, the *Ewald* Court had no reliable indicator for price. The Court only had the prices for the option contracts, which are a poor proxy for the value of the milk. Indeed, an option contract is simply a bet about where the market is going—it has no bearing on what the actual price of the good is. Given the fact that the options were **[**10]** bought in advance to speculate on milk prices, the Eighth Circuit Court of Appeals was forced to use volume as a proxy for value.

This was reasonable for the *Ewald* Court to do. Absent information about price to determine value, volume can sometimes be a reliable indicator, especially when a court lacks more reliable information to gauge the value of the product. For example, if a court has no price with which to determine the value of widgets, perhaps finding that a group of 10 widgets is more valuable than a group of 5 widgets is a perfectly acceptable conclusion. However, if a court knows that the 10 widgets were bought for a total of $10, but the 5 widgets were bought for a total of $100, a court **[*604]** cannot simply substitute volume for value and claim that the cheaper widgets were more valuable. After all, there is a far more reliable indication for value: that the marketplace assessed the group of 5 widgets as more valuable than the group of 10. Perhaps the group of 10 widgets had defects. Perhaps the group of 5 widgets was comprised of superior quality widgets, or they were "brand name" widgets. But one thing is for certain: the market valued the 5 widgets higher because the consumers **[**11]** paid more.

Indeed, the defendants' argued at trial that the member eggs were of lower value than the market prices. The defendants argued that they were forced to export the eggs precisely because they could not find a domestic buyer and the eggs were in danger of rotting if they were not sold expeditiously. No such evidence is present regarding non-member eggs. These non-member eggs were purchased at a much higher price in the marketplace, in part because they had a willing buyer: USEM. Accepting the defendants' own arguments as true, it shows that the member eggs actually had less value than the non-member eggs.

Therefore, the Court determines that the most reliable indicator of the price a good demands is the price that the goods are actually purchased for.

III. Market to Assess Value

The Court's inquiry cannot stop there. Here, non-member eggs were purchased twice: once by USEM, and once by the export buyer. The defendants urge the Court to look to the export buyer's purchase price, but the plaintiffs urge the Court to look to USEM's purchase price. The Court must look to the relevant market, which in this case is the domestic market. Indeed, the Capper-Volstead Act requires the Court **[**12]** to look at the value of the goods *handled* by the cooperative. The goods are handled by the cooperative once they are purchased, and they are purchased domestically. The eggs are handled while they are in the domestic market, and cease to be handled by the cooperative once they are exported. The text of the statute mandates this conclusion.

Such a reading is underscored by the very aims of ***antitrust law***. ***Antitrust law*** focuses on domestic markets and the prices paid in those markets. It attempts to limit *domestic* price fixing, not international violations. Even in this case, the plaintiffs allege, and must prove, harm in the relevant domestic market. It makes little sense, when assessing an antitrust statute, to look to foreign prices to determine value. Therefore, the Court must look to the price of the goods paid by USEM in the domestic purchase of the eggs from non-members, not the price paid by foreign buyers.

Conclusion

For the foregoing reasons, the Court finds that the value of the goods handled by non-members must be calculated by the price that USEM paid to purchase the eggs domestically. The motion for a directed verdict on the affirmative defense of Capper-Volstead immunity for **[**13]** USEM is denied for both parties. An appropriate order follows.

BY THE COURT:

Torts > Business Torts > Unfair Business Practices > Elements

HN4[] **Unfair Business Practices, Elements**

Case law sanctions a sanction an Unfair Competition Law omission claim when: the plaintiff alleges that the omission was material; second, the plaintiff must plead that the defect was central to the product's function; and third, the plaintiff must allege one of four actors. The defect must relate to the central functionality of the product.

Torts > Business Torts > Unfair Business Practices > Elements

HN5[] **Unfair Business Practices, Elements**

For Unfair Competition Law omission claim purposes, the central functionality of the product is not based on subjective preferences about a product.

Torts > Business Torts > Unfair Business Practices > Elements

HN6[] **Unfair Business Practices, Elements**

The safety hazard pleading requirement is not necessary in all Unfair Competition Law omission cases, but the requirement may remain applicable in some circumstances. Where the challenged omission does not concern a central functional defect, the plaintiff may still have to plead a safety hazard to establish that the defendant had a duty to disclose.

Antitrust & Trade Law > Consumer Protection

Torts > ... > Fraud & Misrepresentation > Nondisclosure > Elements

HN7[] **Antitrust & Trade Law, Consumer Protection**

Although a claim may be stated under the Consumers Legal Remedies Act in terms constituting fraudulent omissions, to be actionable the omission must be contrary to a representation actually made by the defendant, or an omission of a fact the defendant was obliged to disclose.

Torts > Business Torts > Unfair Business Practices > Elements

HN8[] Unfair Business Practices, Elements

The Unfair Competition Law prohibits any unlawful, unfair or fraudulent business act or practice. *Cal. Bus. & Prof. Code § 17200*. Because *§ 17200* is written in the disjunctive, it establishes three varieties of unfair competition-acts or practices which are unlawful, or unfair, or fraudulent.

Torts > Business Torts > Unfair Business Practices > Elements

HN9[] Unfair Business Practices, Elements

A failure to disclose a fact one has no affirmative duty to disclose is not likely to deceive anyone within the meaning of the Unfair Competition Law (UCL). Absent a duty to disclose, the failure to do so does not support a claim under the fraudulent prong of the UCL.

Torts > Business Torts > Unfair Business Practices > Elements

HN10[] Unfair Business Practices, Elements

Unlike the other two Unfair Competition Law (UCL) prongs, the lack of a duty to disclose does not necessarily dispose of claims under the unfair prong. The UCL does not define the term unfair. In fact, the proper definition of unfair conduct against consumers is currently in flux among California courts.

Torts > Business Torts > Unfair Business Practices > Elements

HN11[] Unfair Business Practices, Elements

Unfair means conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition. Any finding of unfairness to competitors under *Cal. Bus. & Prof. Code § 17200* be tethered to some legislatively declared policy or proof of some actual or threatened impact on competition. Some courts in California have extended this definition to consumer actions, while others have applied the test from S. Bay Chevrolet v. Gen. Motors Acceptance Corp.

Torts > Business Torts > Unfair Business Practices > Elements

HN12[] Unfair Business Practices, Elements

To determine whether something is sufficiently tethered to a legislative policy for the purposes of the unfair prong of the Unfair Competition Law, California courts require a close nexus between the challenged act and the legislative policy. For an act to be unfair, it must threaten a violation of law or violate the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law.

Antitrust & Trade Law > Consumer Protection > False Advertising > State Regulation

HN13[] **False Advertising, State Regulation**

California's False Advertising Law makes it unlawful for any person to 'induce the public to enter into any obligation' based on a statement that is untrue or misleading, and which is known, or which by the exercise of reasonable care should be known, to be untrue or misleading. Whether an advertisement is misleading is determined by asking whether a reasonable consumer would likely be deceived. A failure to disclose a fact one has no affirmative duty to disclose is not likely to deceive anyone.

Summary:

SUMMARY*

California Law

The panel affirmed the district court's dismissal of plaintiff's consumer protection claims in a putative class action alleging that Mars, Inc., a chocolate manufacturer, had a duty to disclose on its labels the labor practices that may have tainted its supply chain.

Concerning plaintiff's duty to disclose claims, the panel held that California consumer protection laws did not obligate Mars, Inc. to label its goods as possibly being produced by child or slave labor. The panel further held that in the absence of any affirmative misrepresentations by the manufacturer, the manufacturer did not have a duty to disclose the labor practices in question, even though they were reprehensible, because they were not physical defects that affected the central function of the chocolate products. The panel concluded that, absent a duty to disclose, plaintiff's *Consumers Legal Remedies Act*, *Unfair Competition Law*, and *False Advertising Law* claims were foreclosed.

The panel held that plaintiff's claims failed under the **[**2]** unfair prong of the Unfair Competition Law under either the *Cel-Tech* test, *Cel-Tech Commc'ns, Inc. v. L.A. Cellular Tel. Co., 20 Cal. 4th 163, 83 Cal. Rptr. 2d 548, 973 P.2d 527, 540 (Cal. 1999)*, or the *South Bay* test, outlined in *S. Bay Chevrolet v. Gen. Motors Acceptance Corp., 72 Cal. App. 4th 861, 85 Cal. Rptr. 2d 301, 316 (Ct. App. 1999)*.

Opinion

[*859] TASHIMA, Circuit Judge:

* This summary constitutes no part of the opinion of the court. It has been prepared by court staff for the convenience of the reader.

In this action, the putative class plaintiff alleges that California consumer protection laws require certain food manufacturers to disclose, on their products' labels, that the products' supply chain may involve child or slave labor. Regrettably, despite some efforts to eradicate the practices, child labor and slave labor are modern-day scourges, **[*860]** and manufacturers **[**3]** that source materials from around the world may benefit from that illicit labor. This issue has gained public attention in recent years such that many consumers now consider in their purchasing decisions the labor practices behind household products. In fact, some manufacturers have decided to market their products as free of unsavory labor practices, and some legislatures have attempted to further educate the public about modern-day slavery.

Nonetheless, the California consumer protection laws do not obligate the defendants-appellees to label their goods as possibly being produced by child or slave labor. In the absence of any affirmative misrepresentations by the manufacturer, we hold that the manufacturers do not have a duty to disclose the labor practices in question, even though they are reprehensible, because they are not physical defects that affect the central function of the chocolate products.

One of the key issues in this case is the continued viability of *Wilson v. Hewlett-Packard Co., 668 F.3d 1136 (9th Cir. 2012)*. Defendants-appellees rely on *Wilson* to argue that plaintiff-appellant has not alleged that defendants-appellees had a duty to disclose because *Wilson* stands for the premise that plaintiffs in pure omission cases must plead **[**4]** that the undisclosed information created a safety hazard. Plaintiff-appellant acknowledges the holding in *Wilson*, but urges us to deviate from that precedent, arguing that intervening California Courts of Appeal cases render our interpretation of California law incorrect. It is true that recent state-court cases have cast doubt on the breadth of this Circuit's precedent about the duty to disclose, but the facts before us today do not compel us to reexamine that precedent in this case. This is so because, even applying the tests from the intervening California cases, Plaintiff cannot state a claim. We therefore affirm the district court's order of dismissal.

I. FACTUAL AND PROCEDURAL BACKGROUND

Plaintiff-appellant Robert Hodsdon ("Plaintiff") is a California citizen who purchased defendants-appellees' (together, "Mars") chocolate products at retail stores and viewed the labeling. Hodsdon alleges he would not have bought the chocolate or would not have paid as much for it if the manufacturer had disclosed, on the label itself, the existence of child and slave labor in its supply chain.

The Ivory Coast (or Côte d'Ivoire) is the world's largest producer of cocoa beans, the raw ingredient **[**5]** for chocolate. Like most chocolate manufacturers, Mars sources at least some cocoa beans from the Ivory Coast. Some cocoa beans from the Ivory Coast are produced using what the International Labor Organization ("ILO") calls "the worst forms of child labour." The Bureau of International Labor Affairs of the U.S. Department of Labor describes the situation in the Ivory Coast as follows:

> [C]hildren . . . are working under conditions of forced labor on Ivoirian cocoa farms . . . . Some children are sold by their parents to traffickers, some are kidnapped, and others migrate willingly but fall victim to traffickers who sell them to recruiters or farmers, where they end up in conditions of bonded labor . . . . Some children are forced to perform dangerous tasks . . . .

Mars recognizes that its supply chains may be infected by the worst forms of child labor, but does not disclose this on its product labeling. However, in compliance with the California Transparency in Supply Chains Act of 2010 ("Supply Chains Act"), Mars does disclose on its website its **[*861]** efforts to combat slavery and labor abuses in its supply chain.[1]

---

[1] The *Supply Chains Act, Cal. Civ. Code § 1714.43*, was enacted in 2010. The California Attorney General later described the requirements of the Act:

> This Act requires large retailers and manufacturers doing business in California **[**6]** to disclose on their websites their "efforts to eradicate slavery and human trafficking from [their] direct supply chain for tangible goods offered for sale." . . .

Plaintiff brought this action under California's Consumers Legal Remedies Act ("CLRA"), Unfair Competition Law ("UCL"), and False Advertising Law ("FAL"), alleging that Mars has a duty to disclose on its labels the labor practices that may taint its supply chain. Plaintiff's CLRA claim is that Mars misrepresented the source, characteristics, and standard of the chocolate products by omitting information about labor practices on its label. *See Cal. Civ. Code § 1770(a)(2)*, *(5)*, *(7)*. As to the UCL, Plaintiff claims that Mars' conduct came within the UCL's prohibition on "any unlawful, unfair or fraudulent business act or practice" by: (1) violating the "unlawful" prong based on its violation of the CLRA; (2) violating the "fraudulent" prong because it omitted information **[**7]** about the forced labor at the point of sale; and (3) violating the "unfair" prong because the omission contravened legislative policy against child and slave labor, or because Mars' "participation in a supply chain involving [slave labor] is immoral, unethical, oppressive, unscrupulous and injurious to consumers." *See* *Cal. Bus. & Prof. Code § 17200*. Finally, Plaintiff's FAL claim also is based on Mars' alleged failure to disclose its labor practices on its label. *See id.* *§ 17500*.

The district court dismissed the complaint for failure to state a claim. *Fed. R. Civ. P. 12(b)(6)*. Plaintiff has timely appealed.

II. JURISDICTION AND STANDARD OF REVIEW

The district court had jurisdiction under *28 U.S.C. § 1332(a)*. We have jurisdiction under *28 U.S.C. § 1291*, and review de novo the district court's dismissal for failure to state a claim. *See* *Hinojos v. Kohl's Corp., 718 F.3d 1098, 1103 (9th Cir. 2013)*.

III. ANALYSIS

A. Duty to Disclose

Plaintiff does not allege any affirmative misstatement and relies solely on an omission theory of consumer fraud. ***HN1***[] Omissions may be the basis of claims under California consumer protections laws, but "to be actionable the omission must be contrary to a representation actually made by the defendant, or *an omission of a fact the defendant was obliged to disclose*." *Daugherty v. Am. Honda Motor Co., 144 Cal. App. 4th 824, 51 Cal. Rptr. 3d 118, 126 (Ct. App. 2006)* (emphasis added).

Mars argues that to establish a duty **[**8]** to disclose, under the Ninth Circuit's interpretation of California law, Plaintiff must always allege that the undisclosed information "caused an unreasonable safety hazard." *Wilson, 668 F.3d at 1143*. Plaintiff urges us to rule that *Wilson* is no longer good law after more recent California Courts of Appeal opinions, and to apply the tests for duty to disclose from those cases. While the recent California cases do cast doubt on whether *Wilson*'s safety-hazard **[*862]** requirement applies in all circumstances, we have no occasion in this case to consider whether the later state-court cases have effectively overruled *Wilson*. This is true because even applying Plaintiff's proposed tests, derived from his reading of the more recent California decisions, he cannot state a claim. Specifically, Plaintiff has not sufficiently alleged that the defect in question—the existence of child labor in the supply chain—affects the central functionality of the chocolate products. Therefore, without either relying on or overruling *Wilson,* we hold that Plaintiff has not established that Mars had a duty to disclose the labor practices on its labels.

Companies subject to the Act must post disclosures on their Internet websites related to five specific areas: verification, audits, certification, internal accountability, and training.

KAMALA D. HARRIS, CAL. DEP'T OF JUSTICE, THE CALIFORNIA TRANSPARENCY IN SUPPLY CHAINS ACT: A RESOURCE GUIDE, i (2015).

The primary California cases on which Plaintiff relies are Collins v. eMachines, Inc., 202 Cal. App. 4th 249, 134 Cal. Rptr. 3d 588 (Ct. App. 2011), and Rutledge v. Hewlett-Packard Co., 238 Cal. App. 4th 1164, 190 Cal. Rptr. 3d 411 (Ct. App. 2015). Plaintiff **[**9]** has not sufficiently alleged that Mars has a duty to disclose under these cases.

In *Collins*, the plaintiffs were a putative class of consumers that purchased eMachine computers. 134 Cal. Rptr. 3d at 591. The plaintiffs complained that a floppy disk controller defect, which manifested itself during the warranty period, caused critical data corruption of the hard drive. *Id. at 591-92*. Citing the four-prong test from LiMandri v. Judkins, 52 Cal. App. 4th 326, 60 Cal. Rptr. 2d 539 (Ct. App. 1997), the plaintiffs asserted that eMachines had a duty to disclose the defect. Collins, 134 Cal. Rptr. 3d at 593. The court explained:

> ***HN2***[] A failure to disclose a fact can constitute actionable fraud or deceit in four circumstances: (1) when the defendant is the plaintiff's fiduciary; (2) when the defendant has exclusive knowledge of material facts not known or reasonably accessible to the plaintiff; (3) when the defendant actively conceals a material fact from the plaintiff; and (4) when the defendant makes partial representations that are misleading because some other material fact has not been disclosed.

Id. (citing LiMandri, 60 Cal. Rptr. 2d at 543). The plaintiffs in *Collins* argued that eMachines had a duty to disclose based on either prong (2) or (3). *Id. at 593*.

The court held that the plaintiffs had stated a CLRA claim under prong (2). *Id. at 594*. The fact of the defect was material because a "reasonable **[**10]** consumer would deem it important in determining how to act in the transaction at issue," *id. at 593* (internal quotation and alterations omitted), and "according to the complaint, eMachines knew of this defect while plaintiffs did not, and, given the nature of the defect, it was difficult to discover."[2] *Id. at 594* (alteration omitted). Further, *Collins* emphasized that the failure to disclose the defect at issue supported a CLRA claim because the defect "was central to the function of a computer as a computer." *Id. at 595*. In so holding, *Collins* distinguished *Daugherty*—on which *Wilson* is based—by noting that the defect in the case before it, unlike the defect in *Daugherty*, resulted in damage to the computers *during* the warranty period. *See id. at 595*. *Collins*, therefore, stands for the premise that ***HN3***[] a manufacturer has a duty to disclose only physical defects—not the means by which a product is produced—that relate to a product's central function and arise during the warranty period.

The second case that Plaintiff relies upon is *Rutledge*, another case involving computers. The plaintiffs there alleged that Hewlett Packard ("HP") actively concealed and did not disclose that its laptops contained defective inverters that would **[*863]** cause **[**11]** the screens to dim and darken during the warranty period. Rutledge, 190 Cal. Rptr. 3d at 418. The plaintiffs further alleged that HP made misrepresentations in its press releases, that the plaintiffs relied on these statements, and that the laptop screen is central to the function of the laptop. *See id. at 420-422*. On summary judgment, the court held that there was a triable issue about whether HP had a duty to disclose the inverter defect. *Id. at 422*.

The court's reasoning in Rutledge, however, is far from clear. First, the court did not apply the *LiMandri* factors, as *Collins* did, to determine whether defendants had an obligation to disclose. Further, the section of the opinion on the duty to disclose ultimately concludes that there is "a triable issue of fact as to the nature of HP's [affirmative] representations, and whether that *triggered* a duty to disclose the defect." *Id. at 422* (emphasis added). The opinion is thus somewhat inconclusive on whether there was a duty to disclose independent of HP's affirmative representations about its product. Finally, *Rutledge* seems to cite favorably the holding in *Collins* that manufacturers have a duty to disclose a defect when it affects the central functionality of a product. *See id. at 421*.

Rutledge, therefore, could **[**12]** be read as a case that stands for any of the following propositions: (1) there is a duty to disclose in light of affirmative representations; (2) there is a duty to disclose defects that go to the central

[2] The court also determined that plaintiffs' complaint alleged that eMachines actively concealed the defect. Collins, 134 Cal. Rptr. 3d at 594.

function of the product; or (3) there is a duty to disclose defects that go to the central function of the product and which arise during the warranty period. Plaintiff cannot state a claim under any of these interpretations.

While *Collins* and *Rutledge* are somewhat vague about the test for determining whether a defendant has a duty to disclose, ***HN4***[] they sanction a UCL omission claim when: the plaintiff alleges that the omission was material; second, the plaintiff must plead that the defect was central to the product's function; and third, the plaintiff must allege one of the four *LiMandri* factors. *See* *Collins, 134 Cal. Rptr. 3d at 593-95*. Plaintiff argues that Mars had a duty to disclose because information about labor practices is material to consumers and—relying on the second prong of *LiMandri*—because Mars had "superior knowledge" about labor issues in its supply chain. Plaintiff, however, omits a crucial element that *Collins* and *Rutledge* emphasize—that the defect must relate to the central functionality of the product. **[**13]** [3]

[*864] First, we assume without deciding that the existence of slave or child labor in a product's supply chain is material to consumers.

Second, however, Plaintiff fails to allege that the existence of slave or child labor in the supply chain affects the product's central function. In *Collins* and *Rutledge*, the plaintiffs were required to plead that the allegedly concealed *physical* defect was *central* to the product's function.[4] Here, the alleged lack of disclosure about the existence of slave labor in the supply chain is not a physical defect at all, much less one related to the chocolate's function as chocolate. Plaintiff contends that he has "no practical use" for the products tainted by slave or child labor, but ***HN5***[] the central functionality of the product is not based on subjective preferences about a product. A computer chip that corrupts the hard drive, or a laptop screen that goes dark, renders those products incapable of use by any consumer; some consumers of chocolate are not concerned about the labor practices used to manufacture the product. Thus, Plaintiff fails to establish that Mars has a duty to disclose the issues in its supply chain. **[**14]** [5]

Nonetheless, even though we apply the more recent California Courts of Appeal decisions, doing so does not deprive *Wilson* of all vitality. The recent California cases show that *Wilson*'s ***HN6***[] safety hazard pleading requirement is not necessary in *all* omission cases, but that the requirement may remain applicable in some

[3] Plaintiff also cites *Rubenstein v. Gap, Inc., 14 Cal. App. 5th 870, 222 Cal. Rptr. 3d 397 (Ct. App. 2017)*. The plaintiffs in *Rubenstein* alleged that Gap violated the consumer protection laws "based on Gap's alleged misrepresentation in using the Gap and Banana Republic brand names for [factory store] items that had never been sold in traditional Gap and Banana Republic stores and/or were of lesser quality, and also on Gap's failure to disclose these facts to consumers. *Id. at 401*. The court rejected the plaintiffs' claims, reasoning that the plaintiffs did not "allege facts showing that the sales history of factory store items is material to reasonable consumers." It further held that "any quality issues with factory store merchandise were not in Gap's exclusive knowledge." *Id. at 405*.

Additionally, after oral argument in this case, the California Court of Appeal, Fifth District, decided *Gutierrez v. CarMax Auto Superstores Cal., 19 Cal. App. 5th 1234, 228 Cal. Rptr. 3d 699 (Ct. App. 2018)*. In *Gutierrez*, the defendant car dealer did not disclose that the car that the plaintiff purchased was subject to a safety recall relating to the car's braking and lighting systems. The court held that the omitted information was material because it related to safety concerns—which would be important to the reasonable consumer. *Id. at 705*. Further, the court concluded that the car dealer had a duty to disclose the recall because "CarMax made *partial representations* about the vehicle's braking and lighting systems and those representations were likely to mislead for want of communication of the facts about the recall." *Id. at 722-23*. As *Gutierrez* is a partial misrepresentation case, it does not affect the outcome of this purely omissions-based case.

[4] Neither *Rubenstein* nor *Gutierrez* mentions the "central functionality" test, but their facts are consistent with requiring that the alleged defect be physical and important to the product's function. In *Gutierrez*, the alleged omission related to a physical defect that created a safety hazard. *228 Cal. Rptr. 3d at 723*. In *Rubenstein*, the court concluded that there were no "facts showing that the sales history of factory store items is material to reasonable consumers." *222 Cal. Rptr. 3d at 405*.

[5] The parties also dispute whether Plaintiff sufficiently pleaded that Mars had knowledge that Plaintiff did not about the existence of child or slave labor in the supply chain. Plaintiff argues that Mars need only have "superior" knowledge over the consumer to satisfy the *LiMandri* prong, whereas Mars contends that the test is "exclusive" knowledge. While we need not reach the issue here, Mars appears to have the better reading of California law.

circumstances. In other words, *Collins* and *Rutledge* are not necessarily irreconcilable with *Wilson* because, where the challenged omission does not concern a central functional defect, the plaintiff may still have to plead a safety hazard to establish that the defendant had a duty to disclose.[6] For example, even though we offer no binding opinion on the issue, *Wilson* may still apply where the defect in question does not go to the central functionality of the product, but still creates a safety hazard. For this reason, we are not convinced that the California Supreme Court would rule that a plaintiff need never plead a safety hazard. *See* *Muniz v. UPS, 738 F.3d 214, 219 (9th Cir. 2013)* ("Decisions of the six [California] district appellate courts are persuasive but do not bind each other or us. We should nevertheless follow a published intermediate state court decision regarding **[**15]** California law unless we are convinced that the California Supreme Court would reject it.") (citations omitted). *But see* *In re Watts, 298 F.3d 1077, 1084-86 (9th Cir. 2002)* (O'Scannlain, J., concurring) (questioning this Circuit's **[*865]** practice of revisiting panel decisions based on subsequent state intermediate appellate opinions, especially where state appellate courts have independent districts that do not follow one another's precedent).

Therefore, we hold that in this pure omissions case concerning no physical product defect relating to the central function of the chocolate and no safety defect, Plaintiff has not sufficiently pleaded that Mars had a duty to disclose on its labels the labor issues in its supply chain.[7] Absent a duty to disclose, Plaintiff's CLRA, UCL and FAL claims are foreclosed.

B. CLRA

Plaintiff alleges three separate violations of the CLRA, namely that Mars' failure to disclose on its labels information about slave or child labor: (1) "[m]isrepresent[ed] the source" of the products; (2) "[r]epresent[ed] that [the] goods . . . have . . . characteristics . . . which they do not have"; and (3) "[r]epresent[ed] that goods . . . are of a particular standard." *Cal. Civ. Code § 1770(a)(2)*, *(5)*, *(7)*.

Again, ***HN7***[] "although a claim may be stated under the **[**16]** CLRA in terms constituting fraudulent omissions, to be actionable the omission must be contrary to a representation actually made by the defendant, or an omission of a fact the defendant was obliged to disclose." *Daugherty, 51 Cal. Rptr. 3d at 126*. As discussed above, Mars was not obliged to disclose issues about its supply chain. Therefore, Mars did not violate the CLRA.

C. UCL

HN8[] The UCL prohibits "any unlawful, unfair or fraudulent business act or practice." *Cal. Bus. & Prof. Code § 17200*. "*Because Business & Professions Code § 17200* is written in the disjunctive, it establishes three varieties of unfair competition-acts or practices which are unlawful, or unfair, or fraudulent." *Cel-Tech Commc'ns, Inc. v. L.A. Cellular Tel. Co., 20 Cal. 4th 163, 83 Cal. Rptr. 2d 548, 973 P.2d 527, 540 (Cal. 1999)*. Plaintiff claims that Mars is liable under all three of the varieties.

1. Unlawful Prong

---

[6] For example, even though we offer no binding opinion on the issue, *Wilson* may still apply where the defect in question does not go to the central functionality of the product but still creates a safety hazard.

[7] Plaintiff has an outstanding motion to certify the following question to the California Supreme Court: "Must a pure omission-based consumer deception claim under the UCL, FAL, and CLRA involve a safety concern to be actionable?" Because Plaintiff cannot establish that Mars had a duty to disclose, even if he is not required to plead a safety hazard, the answer to Plaintiff's question is not outcome-determinative. *See* *Cal. R. of Court 8.548(a)(1)* ("The [California] Supreme Court may decide a question of California law if . . . [t]he decision could determine the outcome of a matter pending in the requesting court."). We therefore deny the motion to certify the question.

Plaintiff links his unlawful prong claim to Mars' alleged violation of the CLRA. As discussed above, Mars did not violate the CLRA; thus, it did not violate the unlawful prong of the UCL.

2. Fraudulent Prong

HN9[] "[A] failure to disclose a fact one has no affirmative duty to disclose is [not] 'likely to deceive' anyone within the meaning of the UCL." *Daugherty, 51 Cal. Rptr. 3d at 128*; *see also* *Berryman v. Merit Prop. Mgmt., Inc., 152 Cal. App. 4th 1544, 62 Cal. Rptr. 3d 177, 188 (Ct. App. 2007)* ("Absent a duty to disclose, the failure to do so does not support a claim under the fraudulent prong of the UCL."). Plaintiff does not state **[**17]** a claim under this prong.

3. Unfair Prong

HN10[] Unlike the other two UCL prongs, the lack of a duty to disclose does not necessarily dispose of claims under the unfair **[*866]** prong. "The UCL does not define the term 'unfair.' In fact, the proper definition of 'unfair' conduct against consumers 'is currently in flux' among California courts." *Davis v. HSBC Bank Nev., N.A., 691 F.3d 1152, 1169 (9th Cir. 2012)* (quoting *Lozano v. AT&T Wireless Servs., Inc., 504 F.3d 718, 735 (9th Cir. 2007))*. "Before *Cel-Tech*, courts held that 'unfair' conduct occurs when that practice 'offends an established public policy or when the practice is immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers.'" *Id.* (citing *S. Bay Chevrolet v. Gen. Motors Acceptance Corp., 72 Cal. App. 4th 861, 85 Cal. Rptr. 2d 301, 316 (Ct. App. 1999))* ("*South Bay* test"). The California Supreme Court, in *Cel-Tech*, established a different, more concrete, definition of unfair:

> ***HN11***[] "[U]nfair" means "conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition." It further required that "any finding of unfairness to competitors under *section 17200* be *tethered* to some legislatively declared policy or proof of some actual or threatened impact on competition."

Davis, 691 F.3d at 1169-70 (quoting *Cel-Tech, 973 P.2d at 543-44*) (emphasis added). The **[**18]** *Cel-Tech* test did not apply to actions by consumers, but "some courts in California have extended the *Cel-Tech* definition to consumer actions, while others have applied the [*South Bay* test]." *Id. at 1170*; *see also* *Cel-Tech, 973 P.2d at 544 n.12*. The parties here argue under both the *Cel-Tech* and *South Bay* tests.

First, under the *Cel-Tech* test, Plaintiff contends that his claims are "tethered" to the United Nations' Universal Declaration of Human Rights and the ILO's Convention 182 ("Worst Forms of Child Labour Convention")—the former forbidding slavery and the latter forbidding the worst forms of child labor. Plaintiff's theory is that these international declarations demonstrate the "legislatively declared policy" against child and slave labor. ***HN12***[] To determine whether something is sufficiently "tethered" to a legislative policy for the purposes of the unfair prong, California courts require a close nexus between the challenged act and the legislative policy. *See* *Cel-Tech, 973 P.2d at 544* (holding that for an act to be "unfair," it must "threaten[]" a violation of law or "violate[] the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law").

For example, in *Gregory v. Albertson's, Inc., 104 Cal. App. 4th 845, 128 Cal. Rptr. 2d 389 (Ct. App. 2002)*, the plaintiffs alleged that the defendants **[**19]** violated the unfair prong of the UCL when the defendant grocery store chain closed one location, but held the lease and kept the property empty to prevent a competitor from moving in. *Id. at 395*. Plaintiffs tried to tether defendants' actions to a policy against urban blight. *See id.* ("[B]y keeping off the market the chief retail store in the shopping center, the [defendants] have put in motion a process of deterioration affecting the entire shopping center that will inevitably produce the kind of blight that *Health and Safety Code section 33035* condemns . . . ."). The court rejected plaintiffs' argument that defendants' decision to hold onto *one* lease was sufficiently tethered to the policy against *community* blight in *§ 33035*. *Id. at 395-96*. Instead, the court reasoned that *§ 33035* was part of a broader *Community Redevelopment Law*, which established procedures for public participation in the redevelopment of blighted areas, but did not "call[] for a private remedy affecting a single parcel of property **[*867]** under the unfair competition law." *Id. at 395*.[8] In other words, the challenged action was too far removed from the legislative policy, as stated in the Community Redevelopment Law, to be the tether for a claim under the unfair prong. *Id.; see* ***[**20]*** *also* *Scripps Clinic v. Superior Court, 108 Cal. App. 4th 917, 134 Cal. Rptr. 2d 101, 117 (Ct. App. 2003)* (holding that plaintiffs did not state a claim under the unfair prong where defendant medical center's practice of not continuing to treat patients who sued the center did not affect plaintiffs' constitutional right to redress in court).

As the plaintiffs in *Gregory* pointed to a general policy against urban blight, so too, Plaintiff here highlights a general policy against child or slave labor. However, like in *Gregory*, there is not a close enough nexus between the policy at issue—here a policy against certain labor practices— and the challenged action—here not placing disclosures on consumer labels. Just as leaving one building empty may *eventually* lead to blight, so too not labeling chocolate bars may indirectly exacerbate slave labor in the supply chain; however, the labeling of products is too far removed from the U.N. and ILO policies to serve as the basis for a UCL claim. As such, the U.N. Convention and the Worst Forms of Child Labour Convention do not provide a tether here. Further, requiring Mars to place labels on its products could arguably impinge on the Supply Chains Act, which addresses disclosure of labor abuses, but does not require labels on the products **[**21]** themselves. Plaintiff cannot state an unfairness prong claim under the *Cel-Tech* test.

Plaintiff's claims also fail under the *South Bay* test. Mars' failure to disclose information it had no duty to disclose in the first place is not substantially injurious, immoral, or unethical. *See* *Bardin v. DaimlerChrysler Corp., 136 Cal. App. 4th 1255, 39 Cal. Rptr. 3d 634, 643-44 (Ct. App. 2006)* (holding that the use of less expensive tubular steel exhaust manifolds did not violate public policy because the defendant made no representation about the composition of the manifolds and the plaintiffs did not allege a safety concern or a violation of the warranty). Plaintiff's allegation that Mars' participation in a supply chain involving slave labor is "immoral" does not suffice here, because Plaintiff is challenging the failure to disclose. While the labor practices themselves are clearly immoral, it is doubtful that failing to disclose on the label that a product may be tainted by such labor practices is itself immoral, especially when there is no specific duty to disclose this information and the information is otherwise disclosed under the Supply Chains Act. Further, the failure to disclose is not substantially injurious because, as mentioned above, information about slave and child labor is public **[**22]** knowledge, accessible on Mars' website—pursuant to the Supply Chains Act. Therefore, under either test for the unfair prong of the UCL, Plaintiff's claims fail.

D. FAL

HN13[] "California's False Advertising Law makes it unlawful for any person to 'induce the public to enter into any obligation' based on a statement that is 'untrue or misleading, and which is known, or which by the exercise of reasonable care should be known, to be untrue or misleading.'" *Davis, 691 F.3d at 1161* (quoting *Cal. Bus. & Prof. Code § 17500*). Whether an advertisement is misleading is determined by asking whether a reasonable **[*868]** consumer would likely be deceived. *See* *id. at 1162*. Plaintiff's FAL claims fail because "a failure to disclose a fact one has no affirmative duty to disclose is [not] 'likely to deceive' anyone." *Daugherty, 51 Cal. Rptr. 3d at 128*.[9]

IV. CONCLUSION

---

[8] *Gregory* also rejected plaintiffs' tethering claim because "it would impinge on a separate state policy favoring freedom of contract by the parties to commercial real property leases." *128 Cal. Rptr. 2d at 395* (quotation marks omitted).

[9] Because we hold that Plaintiff has not pleaded a claim under the CLRA, UCL, or FAL, we need not, and do not, reach any of Mars' other arguments in support of affirmance.

For the foregoing reasons, we affirm the judgment of the district court dismissing Plaintiff Hodsdon's CLRA, UCL, and FAL claims with prejudice.

AFFIRMED.

Opinion

MEMORANDUM DECISION AND ORDER RE DEFENDANT'S MOTION TO DISMISS

(Doc. 19)

ORDER DENYING PLAINTIFF'S MOTION FOR A 60-DAY STAY OF PROCEEDINGS

(Doc. 24)

I. INTRODUCTION

Pending before the Court is Defendant's motion to dismiss Plaintiff's First Amended Complaint ("FAC") and Plaintiff's motion for a 60-day stay of proceedings so that he may attempt to retain counsel. For the reasons set forth below, the Court DENIES Plaintiff's motion for a stay of the proceedings and GRANTS Defendant's motion to dismiss.[1] For the reasons set forth below, Plaintiff's complaint is dismissed with prejudice. **[*2]**

II. FACTUAL BACKGROUND

From what can be gleaned from Plaintiff's complaint, Hunger Free America, Inc. was founded in 2010 by Plaintiff.[2] Hunger Free America, Inc. owns a registered trademark No. 5,297,297 ("'297"), and designs, develops, manufactures, and distributes T-shirts. The '297 trademark is used for apparel, goods, and services. (FAC, ¶ 13.) Plaintiff alleges that he received the trademark for t-shirts and graphics, but that it also gave him "a partial right to use the standard character." (FAC, ¶ 14.) Plaintiff alleges he has been using the standard character "Hunger Free America" since June 24, 2011. (FAC, ¶ 14.)

Defendant[3] contacted Plaintiff at some point in 2016 to notify Plaintiff that Defendant's board had just voted to use the name "Hunger Free America." (FAC, ¶ 14.) "Defendant wanted to know if Plaintiff would give them his facebook URL or if not Defendant would simply go around him to get it." (FAC, ¶ 14.) On September 26, 2017, Plaintiff mailed a certified letter of cease and desist to Defendant and its board of directors. (FAC, ¶ 14.)

Plaintiff also asserts the following:

> After checking USPTO registration[,] Plaintiff found Defendant had resuscitated their Service Mark which had been dead **[*3]** since May 10, 2016. Hunger Free America, Inc. [i]s currently registered in the State of California and the Internal Revenue Service and is in good standing. Plaintiff has conducted a national search of registries for ownership of Hunger Free America, as well as, internet search before using the standard character Hunger Free America[] which revealed no ownership prior to 2010, which allows Plaintiff common law rights and now exclusive rights through USPTO.
> (FAC, ¶ 15.)

Plaintiff alleges that Defendant's use of the standard character "Hunger Free America" in commerce is "likely to cause customer confusion or to cause mistake or to deceive [as] to the origin of the products and services offered and sold by Defendant and as to their affiliation, connection, or association with and/or endorsement or approval of Plaintiff." (FAC, ¶ 21.) Plaintiff's (former) attorney informed him "that his trademark registration blocked [Defendant]." (FAC, ¶ 14.)

The FAC purports to allege a trademark infringement claim under the Lanham Act, *15 U.S.C. § 1114*, a common law infringement claim, and a claim under California's Unfair Competition Law, *Cal. Bus. & Prof. Code §12700*. Defendant filed a motion to dismiss the FAC pursuant to *Federal Rule of Civil Procedure 12(b)(6)*.

III. LEGAL STANDARD [*4]

---

[1] Plaintiff filed a complaint against New York Coalition Against Hunger, Christopher G. Karagheuoff, and Joel Berg. Hunger Free America, Inc., was erroneously sued as "New York Coalition Against Hunger," and Christopher Karagheuoff, and Joel Berg were never served. Hunger Free America, Inc., removed the case to this court where it proceeds as the only defendant served.

[2] Plaintiff asserts the corporation was "federally" incorporated in February 2010. A California Secretary of State record shows Plaintiff's original entity, Hour of Truth Ministry, Inc., amended its corporate name to "Hunger Free America, Inc." in 2016. (*See* Doc. 19-2.) This document was attached to Plaintiff's original complaint. (Doc. 1, p. 55.)

[3] Defendant is a non-profit corporation, originally founded as New York City Coalition Against Hunger. It adopted its name, Hunger Free America, Inc. in early 2016.

A motion to dismiss pursuant to *Rule 12(b)(6)* is a challenge to the sufficiency of the allegations set forth in the complaint. Dismissal under *Rule 12(b)(6)* is proper where there is either a "lack of a cognizable legal theory" or "the absence of sufficient facts alleged under a cognizable legal theory." *Balistreri v. Pacifica Police Dep't, 901 F.2d 696, 699 (9th Cir. 1990)*. In considering a motion to dismiss for failure to state a claim, the court generally accepts as true the allegations in the complaint, construes the pleading in the light most favorable to the party opposing the motion, and resolves all doubts in the pleader's favor. *Lazy Y. Ranch LTD v. Behrens, 546 F.3d 580, 588 (9th Cir. 2008)*.

To survive a 12(b)(6) motion to dismiss, the plaintiff must allege "enough facts to state a claim to relief that is plausible on its face." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. "A claim has facial plausibility when the Plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*. "The plausibility standard is not akin to a 'probability requirement,' but it asks for more than a sheer possibility that a defendant has acted unlawfully." *Id.* (quoting *Twombly, 550 U.S. at 556*). "While a complaint attacked by a *Rule 12(b)(6)* motion to dismiss does not need detailed factual allegations, a plaintiff's obligation to provide the 'grounds' **[*5]** of his 'entitlement to relief' requires more than labels and conclusions." *Twombly, 550 U.S. at 555* (internal citations omitted). Thus, "bare assertions . . . amount[ing] to nothing more than a 'formulaic recitation of the elements'. . . are not entitled to be assumed true." *Iqbal, 556 U.S. at 681*. "[T]o be entitled to the presumption of truth, allegations in a complaint . . . must contain sufficient allegations of underlying facts to give fair notice and to enable the opposing party to defend itself effectively." *Starr v. Baca, 652 F.3d 1202, 1216 (9th Cir. 2011)*. In practice, "a complaint . . . must contain either direct or inferential allegations respecting all the material elements necessary to sustain recovery under some viable legal theory." *Twombly, 550 U.S. at 562*. To the extent that the pleadings can be cured by the allegation of additional facts, a plaintiff should be afforded leave to amend. *Cook, Perkiss and Liehe, Inc. v. N. Cal. Collection Serv., Inc., 911 F.2d 242, 247 (9th Cir. 1990)* (citations omitted).

IV. ANALYSIS

A. Plaintiff's Motion to Stay Proceedings is DENIED

Plaintiff filed a motion to stay this case for 60 days so that he may attempt to retain counsel. Plaintiff has had ample opportunity to seek representation. Plaintiff's complaint, which was originally filed in Fresno County Superior Court in December 2017, alleges he first became aware of Defendant's use of "Hunger Free **[*6]** America" in 2016. Thus, Plaintiff has known of the facts of Defendant's allegedly infringing conduct for nearly two years and, during this time, has had more than sufficient opportunity to seek the advice of and/or retain counsel. It is Plaintiff who initiated this suit, and did so more than six months ago. Plaintiff's motion for a stay of proceedings to search for counsel is DENIED.

B. Plaintiff May Not Add Hunger Free America, Inc. as a Plaintiff

Plaintiff's original complaint was filed in his individual capacity, "doing business as" Hunger Free America, Inc. (Doc. 1, p. 18.) Plaintiff has impermissibly added Hunger Free America, Inc. as a plaintiff with neither the permission of the Court nor a stipulation of the parties pursuant to *Federal Rule of Civil Procedure 15*. Plaintiff may not add a new party as a matter of right. Additionally, corporate or other artificial entities, such as Hunger Free America, Inc., require licensed attorney representation to appear in federal court. *Rowland v. Cal. Men's Colony, 506 U.S. 194, 201-02, 113 S. Ct. 716, 121 L. Ed. 2d 656 (1993)* (noting that *28 U.S.C. § 1654* does not allow corporations, partnerships, or associations to appear in federal court other than through a licensed attorney). To the extent Plaintiff seeks relief on behalf of Hunger Free America, Inc., he is prohibited from **[*7]** doing so as a non-attorney. *Id.* For these reasons, Plaintiff may not amend the complaint to add Hunger Free America, Inc. as a Plaintiff.

C. Plaintiff Fails to State A Cognizable Trademark Claim[4]

Neither Plaintiff's trademark infringement claim under the Lanham Act nor his common law trademark infringement claim is viable for the same reasons set forth in the Court's order dismissing the original complaint. After explaining the pleading requirements for both a federal trademark infringement action under the Lanham Act as well as under state law, the Court explained that any amended complaint must address the following deficiencies:

> Plaintiff must allege facts showing how there is a likelihood of confusion with Defendant's use of [its] "Hunger Free America" mark pursuant to the *Sleekcraft* factors. If Plaintiff's claim is predicated on an unregistered mark broader than that in the '297 Registration, Plaintiff must also plead a valid, protectable trademark by showing that he was the first to use the mark in the ordinary course of trade, and that his use of the mark was distinctive. [citations omitted].

(Doc. 13, 9:14-19.) Plaintiff has failed to cure the defects in his original complaint.

[*8] To state a claim for trademark infringement under either the Lanham Act or for common law trademark infringement, a plaintiff must allege that (1) he has a valid, protectable trademark right; (2) that was used by defendant; (3) in a way that is likely to cause consumer confusion and thus infringe upon the trademark right. *Levi Strauss & Co. v. Blue Bell, Inc., 778 F.2d 1352, 1354 (9th Cir. 1985)*. "The core element of trademark infringement is the likelihood of confusion, i.e., whether the similarity of the marks is likely to confuse customers about the source of the products." *Abercrombie & Fitch Co. v. Moose Creek, Inc., 486 F.3d 629, 633 (9th Cir. 2007)*. As the elements for both claims overlap, they are analyzed together. *Hokto Kinoko Co. v. Concord Farms, Inc., 810 F. Supp. 2d 1013, 1031 (C.D. Cal. 2011)*.

To show a valid, protectable trademark interest, registration of a mark is prima facie evidence of the exclusive right to use that mark on the goods and services specified in the registration. *15 U.S.C. §§ 1057(b)*; *1115(a)*; *Brookfield Communs., Inc. v. West Coast Entertainment Corp., 174 F.3d 1036, 1046 (9th Cir. 1999)*. While Plaintiff has sufficiently alleged registration of the '297 mark, which is limited to t-shirts, Plaintiff has not pled any facts showing that he actually used the mark covered by the '297 Registration or the standard character "Hunger Free America" prior to any use by *Defendant.*[5] *Sengoku Works, Ltd. v. RMC Int'l, Ltd., 96 F.3d 1217, 1219 (9th Cir. 1996)* (to acquire ownership of a trademark, "[i]t is not enough to have invented the mark first or even to have registered it first; the party claiming ownership must have been the first to actually use the mark in the sale of goods or services."). Although Plaintiff summarily alleges he has used the standard character "Hunger Free America" in commerce since 2011, he does not specify what products **[*9]** or services he has sold since 2011 bearing, or sold in conjunction with, that standard character. As noted by Defendant, Plaintiff's corporation name "Hunger Free America, Inc." was not adopted until 2016. Prior to that time, Plaintiff's corporate entity was named "Hour of Truth Ministry, Inc.," and it is not clear what goods or services were sold by that entity or what particular mark was used in conjunction with those sales. (*See* Doc. 19-2 (California Secretary of State filing).) For purposes of the Lanham Act trademark claim, Plaintiff has alleged a registered mark, but it is unclear when he sold products in conjunction with the use of that mark.

Most importantly, for purposes of both Plaintiff's infringement claims, Plaintiff has not adequately alleged a likelihood of confusion through Defendant's use of either the mark delineated in the '297 Registration or the use of the standard character "Hunger Free America." The likelihood of confusion is the pivotal element of trademark infringement, and the "issue can be . . . cast as the determination of whether 'the similarity of the marks is likely to confuse customers about the source of the products'" or services. *GoTo.com, Inc. v. Walt Disney Co. 202 F.3d 1199, 1205 (9th Cir. 2000)* (internal citation **[*10]** omitted). The Ninth Circuit recognizes an eight-factor test, set out

---

[4] Plaintiff submitted an untimely opposition brief, which is unsigned.

[5] As discussed in the Court's last order, the '297 Registration mark covers a specific design consisting of the words "Huger Free America" in green lettering with black and white outlining, below a background of farm rows and vegetables. The graphic mark is limited to t-shirts. See United States Patent and Trademark Office, Trademark Electronic Search System ("TESS"); http://tmsearch.uspto.gov/bin/showfield?f=doc&state=4808:4wwulv.2.3

in *AMF, Inc. v. Sleekcraft Boats, 599 F.2d 341 (9th Cir. 1979)*, *abrogated on other grounds by* *Mattel, Inc. v. Walking Mountain Prods., 353 F.3d 792 (9th Cir. 2003)*, to determine whether a defendant's use of a mark or name creates a likelihood of confusion. The factors are (1) the strength or distinctiveness of the mark; (2) the proximity or relatedness of the goods; (3) the similarity of the marks; (4) evidence of actual confusion; (5) marketing channels used; (6) types of goods and degrees of care likely to be exercised by the purchaser; (7) defendant's intent in selecting its mark; and (8) the likelihood of expansion into other markets. *Sleekcraft, 599 F.2d at 348*. These factors are non-exhaustive and should be applied with flexibility. *Network Automation, Inc. v. Adv. Sys. Concepts, Inc., 638 F.3d 1137, 1149 (9th Cir. 2011)*; *Dreamwerks Production, Inc. v. SKG Studio, 142 F.3d 1127, (9th Cir. 1998)* (*Sleekcraft* factors should not be rigidly weighed; they are not a score-card, a bean counter, or a checklist).

The FAC alleges broadly that Plaintiff has developed and operates one of the most "successful feeding programs for low income families and homeless people in the Central Valley," and that "Hunger Free America[]" has developed a variety of programs for the people and implements 'hope' where there has been no hope." (FAC, ¶¶ 2, 3.) Plaintiff also alleges he designs, develops, manufactures, markets and distributes t-shirts. **[*11]** (FAC, ¶ 13.) As for the '297 Registration mark, Plaintiff does not allege that Defendant utilized this mark in any manner, or that anything Plaintiff sells with this mark is similar to a mark utilized by Defendant or marketed to the same class of customers as Plaintiff. *Brookfield, 174 F.3d at 1054* (similarity of the marks is a critical question in the likelihood-of-confusion analysis). As it pertains to any use by Defendant of the standard character "Hunger Free America," the same is true. Plaintiff operates his business in California, while Defendant provides anti-hunger and anti-poverty services nationally. Plaintiff's general allegation that he manages one of the most successful feeding programs for low income people is bereft of any facts showing what services or goods Plaintiff sells or offers beside t-shirts, or how these are similar to the services and goods offered by Defendant. *Id.* (similarity of marks, relatedness of services, and use of a common marketing channel are "controlling troika in the *Sleekcraft* analysis"). There is also no indication Defendant's use of "Hunger Free America" caused Plaintiff's customers any confusion. Plaintiff has not alleged facts showing that any of the *Sleekcraft* factors **[*12]** indicate a reasonably prudent customer is likely to be confused by Defendant's use of "Hunger Free America" or the '297 Registration mark in its online content, logo, or materials.

B. Plaintiff's Third Cause of Action under California's Unfair Competition Law ("UCL")

The FAC impermissibly includes a new UCL claim without leave of court or stipulation of the parties under *Federal Rule of Civil Procedure 15*. Notwithstanding this issue, the UCL claim is not viable. California's UCL "prohibits any unfair competition, which means 'any unlawful, unfair or fraudulent business act or practice.'" *In re Pomona Valley Med. Grp., 476 F.3d 665, 674 (9th Cir. 2007)* (quoting *Cal. Bus. & Prof. Code § 17200, et seq.*). Each prong — fraudulent, unfair, and unlawful — is independently actionable. *Lozano v. AT&T Wireless Servs., Inc., 504 F.3d 718, 731 (9th Cir. 2007)*.

Under the UCL, an "unlawful" practice includes all business practices "forbidden by law." *Saunders v. Super. Ct., 27 Cal. App. 4th 832, 838, 33 Cal. Rptr. 2d 438 (1994)*. The UCL provides a cause of action for violations of any other law as an unlawful practice. *Cel-Tech Commc'ns, Inc. v. L.A. Cellular Tel. Co., 20 Cal. 4th 163, 180, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999)*. As such, a UCL claim under the unlawful prong is dependent on an underlying offense. The "unfair" prong of the UCL requires conduct that threatens "an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms **[*13]** competition." *Id. at 187*. The UCL's "fraudulent" prong requires a plaintiff "show deception to some members of the public, or harm to the public interest," *Watson Labs., Inc. v. Rhone-Poulenc Rorer, Inc. 178 F. Supp. 2d 1099, 1121 (C.D. Cal. 2001)*, or to allege "members of the public are likely to be deceived," *Schnall v. Hertz Corp., 78 Cal. App. 4th 1144, 1167, 93 Cal. Rptr. 2d 439 (2000)*.

The FAC lacks any facts showing an unlawful, unfair, or fraudulent business practice to support a UCL claim. Not only does Plaintiff fail to articulate under what prong he states his claim, there are no facts alleged supporting a violation of the UCL under any of the three prongs. There is no underlying cognizable claim of unlawful conduct as it pertains to Plaintiff's trademark infringement claims, which is required. *Cel-Tech Commc'ns, Inc., 20 Cal. 4th at 180*.

Although Plaintiff alleges his mark is "famous"[6] under the Lanham Act, and that Defendant took unspecified "unlawful actions" after Plaintiff's mark became famous to deliberately and willfully trade on Plaintiff's reputation and dilute Plaintiff's mark, these allegations are entirely conclusory and allege no facts showing what Defendant actually did or how Defendant used a mark or traded on Plaintiff's reputation or diluted any mark of Plaintiffs.

There are also no allegations of unfair or fraudulent business practices. Plaintiff alleges only that Defendant's **[*14]** conduct was "unlawful, unfair, and fraudulent" and it caused harm to Plaintiff. (FAC, ¶¶ 35-36.) These conclusory allegations are entirely insufficient under the basic pleading standards of *Federal Rule of Civil Procedure 8* to provide Defendant any notice of what conduct allegedly wronged Plaintiff. Additionally, UCL claims grounded in fraud require *heightened* specificity in pleading under *Federal Rule of Civil Procedure 9(b)*. *Kearns v. Ford Motor Co., 567 F.3d 1120, 1125 (9th Cir. 2009)*; *Cooper v. Pickett, 137 F.3d 616, 627 (9th Cir. 1997)* ("Averments of fraud must be accompanied by the who, what, when, where, and how of the misconduct charged."). The FAC allegations of a violation of the UCL are entirely lacking.

As with the original complaint, there are no viable claims alleged in the FAC. Plaintiff has been given notice of the deficiencies of his complaint, has had opportunity to cure the defects, but remains unable to marshal any facts necessary to state a cognizable claim. For all the reasons stated above, the FAC is dismissed with prejudice.

V. CONCLUSION

For the reasons set forth above, IT IS HEREBY ORDERED that:

1. Plaintiff's complaint is dismissed with prejudice; and
2. The Clerk of Court is DIRECT to close this case.

IT IS SO ORDERED.

Dated: **June 4, 2018**

/s/ Lawrence J. O'Neill

UNITED STATES CHIEF DISTRICT JUDGE

End of Document

[6] In 1995, Congress amended *Section 43 of the Trademark Act of 1946, 15 U.S.C.§1125*, to provide a remedy for the "dilution of famous marks." The FAC does not allege a viable dilution claim, which is predicated on the lessening of the capacity of a famous mark to identify and distinguish goods and services, regardless of the likelihood of confusion. A party alleging dilution is required to show, among other things, that the mark is famous — i.e., so prominent and renowned as to be a household name. *See Jada Toys, Inc. v. Mattel, Inc., 518 F.3d 628, 635 (9th Cir. 2008)*. There are no facts showing that any mark or standard character at issue in the FAC is famous.

HN1[] Section 5(a), *15 U.S.C.S. § 45(a)*, of the Federal Trade Commission Act declares unlawful unfair methods of competition in or affecting commerce, and unfair or deceptive acts or practices in or affecting commerce. *15 U.S.C.S. § 45(a)(1)*. It empowers and directs the Federal Trade Commission to prevent persons, partnerships, or corporations from using unfair methods of competition in or affecting commerce and unfair or deceptive acts or practices in or affecting commerce. *15 U.S.C.S. § 45(a)(2)*.

HN2[] *Section 5(n)*, *15 U.S.C.S. § 45(n)*, of the Federal Trade Commission Act states, as a prerequisite for an act or practice to be unfair, the act or practice [1] causes or is likely to cause substantial injury to consumers [2] which is not reasonably avoidable by consumers themselves and [3] not outweighed by countervailing benefits to consumers or to competition.

HN3[] Courts review the FTC's legal conclusions de novo but give some deference to its informed judgment that a particular commercial practice is to be condemned as "unfair." Courts review the FTC's findings of facts under the "substantial evidence" standard, which requires more than a mere scintilla of evidence but less than a preponderance.

HN4[] Section 5(a), *15 U.S.C.S. § 45(a)*, of the Federal Trade Commission Act authorizes the FTC to protect consumers by preventing persons, partnerships, or corporations from using unfair acts or practices in or affecting commerce. The Act does not define the term "unfair." The provision's history, however, elucidates the term's meaning. The FTC Act, passed in 1914, created the FTC and gave it power to prohibit unfair methods of competition. Rather than list the particular practices to which unfairness was intended to apply, Congress intentionally left development of the term "unfair" to the Commission through case-by-case litigation —though, at the time of the FTC Act's inception, the FTC's primary mission was understood to be the enforcement of ***antitrust law***. In 1938, the Act was amended to provide that the FTC had authority to prohibit unfair acts or practices. This amendment sought to clarify that the FTC's authority applied not only to competitors but, importantly, also to consumers. Hence, the FTC possesses "unfairness authority" to prohibit and prosecute unfair acts or practices harmful to consumers.

HN5[] As to the unfairness factor of consumer injury, the FTC laid out a separate three-part test defining a qualifying injury. These consumer-injury factors were codified in Section 5(n), *15 U.S.C.S. § 45(n)*, of the Federal Trade Commission Act. The FTC stated that to warrant a finding of unfairness, an injury [1] must be substantial; [2] it must not be outweighed by any countervailing benefits to consumers or competition that the practice produces; and [3] it must be an injury that consumers themselves could not reasonably have avoided.

HN6[] As to the unfairness factor of public policy, the FTC has specified that the policies relied upon should be clear and well-established—that is, declared or embodied in formal sources such as statutes, judicial decisions, or the Constitution as interpreted by the courts, rather than being ascertained from the general sense of the national values. Put another way, an act or practice's "unfairness" must be grounded in statute, judicial decisions—i.e., the common law—or the Constitution. An act or practice that causes substantial injury but lacks such grounding is not unfair within the meaning of Section 5(a), *15 U.S.C.S. § 45(a)*, of the Federal Trade Commission Act. The FTC stated that it was nixing the other unfairness factor—whether a practice is immoral, unethical, or unscrupulous—because it was "largely duplicative" of the first two. Thus, an "unfair" act or practice is one which meets the consumer-injury factors and is grounded in well-established legal policy.

HN7[] The Federal Trade Commission must find the standards of unfairness it enforces in "clear and well-established" policies that are expressed in the Constitution, statutes, or the common law.

HN8[] The FTC carries out its Section 5(a), *15 U.S.C.S. § 45(a)*, of the Federal Trade Commission Act, mission to prevent unfair acts or practices in two ways: formal rulemaking and case-by-case litigation. The FTC is authorized under *15 U.S.C.S. § 57a* to prescribe rules which define with specificity unfair acts or practices within the meaning of *Section 5(a)*. Once a rule takes effect, it becomes in essence an addendum to Section 5(a)'s phrase unfair acts or practices; the rule puts the public on notice that a particular act or practice is unfair. The FTC enforces its rules in the federal district courts. Under *15 U.S.C.S. § 45(m)(1)(A)*, the FTC may bring an action to recover a civil penalty against any person, partnership or corporation that knowingly violates a rule.

HN9[] In the litigation context, once an act or practice is adjudged to be unfair, the act or practice becomes in effect—like an FTC-promulgated rule—an addendum to *Section 5(a)*, *15 U.S.C.S. § 45(a)*, of the Federal Trade Commission Act.

HN10[] The Federal Trade Commission Act provides two forums for litigation. The FTC may choose to prosecute its claim that an act or practice is unfair before an administrate law judge (ALJ) , with appellate review before the full FTC and then in a federal court of appeals. 15 U.S.C.S. § 45(b), (c); 16 C.F.R. § 3.1 et seq. Or, under Section 13(b) of the Act, 15 U.S.C.S. § 53(b), it may prosecute its claim before a federal district judge, with appellate review also in a federal court of appeals. Assume a factual scenario in which the FTC believes a certain act or practice is unfair. It should not matter which of the two forums the FTC chooses to prosecute its claim. The result should be the same. The ALJ and the district judge use materially identical procedural rules in processing the case to judgment and both apply the same substantive law to the facts. Further, putting any venue differences aside, the same court of appeals reviews their decisions.

HN11[] Under Section 5(l), 15 U.S.C.S. § 45(l), the FTC may bring a civil-penalty action in district court should the respondent violate a final cease and desist order.

HN12[] If the FTC has obtained an injunction in district court requiring the defendant to discontinue an unfair act or practice, it may invoke the district court's civil-contempt power should the defendant disobey. Rather than filing a complaint, as in a Section 5(l), 15 U.S.C.S. § 45(l), action, the FTC simply moves the district court for an order requiring the defendant to show cause why it should not be held in contempt for engaging in conduct the injunction specifically enjoined. If the court is satisfied that the conduct is forbidden, it issues a show cause order. Then, if at the show cause hearing the FTC establishes by clear and convincing proof that the defendant engaged in the forbidden conduct and that the defendant had the ability to comply" with the injunctive provision at issue, the court may adjudicate the defendant in civil contempt and impose appropriate sanctions.

Judges: Before TJOFLAT and WILSON, Circuit Judges, and ROBRENO,* District Judge.

Opinion by: TJOFLAT

Opinion

[*1223] TJOFLAT, Circuit Judge:

This is an enforcement action brought by the Federal Trade Commission ("FTC" **[*1224]** or "Commission") against LabMD, Inc., alleging that LabMD's data-security program was inadequate and thus constituted an "unfair act or practice" under *Section 5(a) of the Federal Trade Commission Act* (the "FTC Act" or "Act"), *15 U.S.C. § 45(a)*.[1] Following a trial before an administrative law judge ("ALJ"), the Commission issued a cease and desist order directing LabMD to create and implement a variety of protective measures. LabMD petitions this Court to vacate the order, arguing that the order is unenforceable because it does not direct LabMD to cease committing an unfair act or practice within the meaning of *Section 5(a)*. We **[**3]** agree and accordingly vacate the order.[2]

I.

A.

LabMD is a now-defunct medical laboratory that previously conducted diagnostic testing for cancer.[3] It used medical specimen samples, along with relevant patient information, to provide physicians with diagnoses. Given the nature of its work, LabMD was subject to data-security regulations issued under the Health Insurance Portability and Accountability Act of 1996, known colloquially as *HIPAA*. LabMD employed a data-security program in an effort to comply with those regulations.[4]

Sometime in 2005, contrary to LabMD policy, a peer-to-peer file-sharing application called LimeWire was installed on a computer used by LabMD's billing manager.[5] LimeWire is an application commonly used for sharing and downloading music and videos over the Internet. It connects to the "Gnutella" network, which during the relevant period had two to five million people logged in at any given time. Those using LimeWire and connected to the Gnutella network can browse directories and download files that other users on the network designate for sharing. The billing manager designated the contents of the "My Documents" folder on her computer for sharing, exposing the contents to the other users. Between July 2007 and May 2008, this **[**4]** folder contained a 1,718-page file (the "1718 File") with the personal information of 9,300 consumers, including names, dates of birth, social security numbers, laboratory test codes, and, for some, health insurance company names, addresses, and policy numbers.

---

* Honorable Eduardo C. Robreno, United States District Judge for the Eastern District of Pennsylvania, sitting by designation.

1 ***HN1***[] *Section 5(a)* declares unlawful "[u]nfair methods of competition in or affecting commerce, and unfair or deceptive acts or practices in or affecting commerce." *15 U.S.C. § 45(a)(1)*. It empowers and directs the Commission "to prevent persons, partnerships, or corporations . . . from using unfair methods of competition in or affecting commerce and unfair or deceptive acts or practices in or affecting commerce." *Id. § 45(a)(2)*.

2 *See 15 U.S.C. § 45(c)*.

3 LabMD is no longer in operation but still exists as a company and continues to secure its computers and the patient data stored within them.

4 LabMD's program included "a compliance program, training, firewalls, network monitoring, password controls, access controls, antivirus, and security-related inspections."

5 The record is not clear on the point but we assume that the billing manager installed the peer-to-peer application on her workstation computer.

In February 2008, Tiversa Holding Corporation, an entity specializing in data security, used LimeWire to download the 1718 File. Tiversa began contacting LabMD months later, offering to sell its remediation services to LabMD.[6] LabMD **[*1225]** refused Tiversa's services and removed LimeWire from the billing manager's computer. Tiversa's solicitations stopped in July 2008, after LabMD instructed Tiversa to direct any further communications to LabMD's lawyer. In 2009, Tiversa arranged for the delivery of the 1718 File to the FTC.[7]

B.

In August 2013, the Commission, following an extensive investigation, issued an administrative complaint against LabMD and assigned an ALJ to the case. The complaint alleged that LabMD had committed an "unfair act or practice" prohibited by *Section 5(a)* by "engag[ing] in a number of practices that, taken together, failed to provide reasonable and appropriate security for personal information on its computer networks." Rather than allege specific acts or practices that LabMD engaged in, however, the FTC's complaint set forth a number of data-security measures that LabMD failed to perform.[8] LabMD answered the complaint, denying **[*1226]** it had engaged in the

---

[6] As described by the ALJ who initially presided over this case,

> [Tiversa's] efforts included representing to LabMD that the 1718 File had been found on a peer-to-peer network and sending LabMD a Tiversa Incident Response Services Agreement describing Tiversa's proposed fee schedule, payment terms, and services that would be provided. These contacts continued from mid-May through mid-July 2008. In these communications, Tiversa represented that Tiversa had "continued to see individuals **[**5]** [on peer-to-peer networks] searching for and downloading copies" of the 1718 File. . . .
>
> Tiversa's representations in its communications with LabMD that the 1718 File was being searched for on peer-to-peer networks, and that the 1718 File had spread across peer-to-peer networks, were not true. These assertions were the "usual sales pitch" to encourage the purchase of remediation services from Tiversa. . . .

Tiversa did, however, share a copy of the 1718 File with a Dartmouth College professor, who in February 2009 published an article about data security in the healthcare industry. Tiversa was a "research partner" for the article, meaning it searched for and provided the professor with relevant files to analyze. The professor did not share the 1718 File or its contents with anyone.

[7] Tiversa's CEO and the FTC offered testimony at a 2007 congressional hearing regarding peer-to-peer file-sharing technology. About two months after the hearing, the FTC and Tiversa began communicating. The FTC wanted Tiversa to provide it with information regarding companies' data-security practices. Tiversa, though, did not want a formal request for information—such as a Civil Investigative Demand ("CID")—to be issued directly to it because it had been in talks about its possible acquisition by a third party. Tiversa thus created an entity called "The Privacy Institute" so that a CID could be issued without directly implicating Tiversa. The FTC issued a CID to The Privacy Institute in 2009 and The Privacy Institute provided the FTC with the 1718 File.

[8] The FTC's complaint alleged that LabMD

> (a) did not develop, implement, or maintain a comprehensive information security program to protect consumers' personal information. Thus, for example, employees were allowed to send emails with such information to their personal email accounts without using readily available measures to protect the information from unauthorized disclosure;
>
> (b) did not use readily available measures to identify commonly known or reasonably foreseeable security risks and vulnerabilities on its networks. By not using measures such as penetration tests, for example, respondent could not adequately assess the extent of the risks and vulnerabilities of its networks;
>
> (c) did not use adequate measures to prevent employees from accessing personal information not needed to perform their jobs;
>
> (d) did not adequately train employees to safeguard personal information;
>
> (e) did not require employees, or other users with remote access to the networks, to use common authentication-related security measures, such as periodically changing passwords, prohibiting the use of the same password across applications and programs, or using two-factor authentication;
>
> (f) did not **[**7]** maintain and update operating systems of computers and other devices on its networks. For example, on some computers respondent used operating systems that were unsupported by the vendor, making it unlikely that the systems would be updated to address newly discovered vulnerabilities; and

conduct alleged and asserting several affirmative defenses, among them that the Commission lacked authority under Section 5 of the Act to regulate its handling **[**6]** of the personal information in its computer networks.

After answering the FTC's complaint, LabMD filed a motion to dismiss it for failure to state a case cognizable under Section 5. The motion essentially replicated the assertions in LabMD's answer. Under the FTC's Rules of Practice, the Commission, rather than the ALJ, ruled on the motion to dismiss. The Commission denied the motion, concluding that it had authority under Section 5(a) to prosecute the charge of unfairness asserted **[**8]** in its complaint. *LabMD, Inc., 2014-1 Trade Cases P 78784 (F.T.C.) (Jan. 16, 2014)*.

Following discovery, LabMD filed a motion for summary judgment, presenting arguments similar to those made in support of its motion to dismiss. As before, the motion was submitted to the Commission to decide. It denied the motion on the ground that there were genuine factual disputes relating to LabMD's liability "for engaging in unfair acts or practices in violation of Section 5(a)," necessitating an evidentiary hearing. *LabMD, Inc.*, 2014-1 Trade Cases P 78785 (F.T.C.), at *1 (May 19, 2014) (quotations omitted). An evidentiary hearing was held before the ALJ in July 2015.[9]

After considering the parties' submissions, the ALJ dismissed the FTC's complaint, concluding that the FTC failed to prove that LabMD had committed unfair acts or practices in neglecting to provide adequate security for the personal information lodged in its computer networks. Namely, the FTC failed to prove that LabMD's "alleged failure to employ reasonable data security . . . caused or is likely to cause substantial injury to consumers," as required by Section 5(n) of the Act, 15 U.S.C. § 45(n).[10] Because there was no substantial injury or likelihood thereof, there could be no unfair act or practice.

The FTC appealed the ALJ's decision, which under **[**9]** 16 C.F.R. § 3.52 brought the decision before the full Commission for review. In July 2016, reviewing the ALJ's findings of fact and conclusions of law *de novo, see id.* § 3.54, the FTC reversed the ALJ's decision.

The FTC first found that LabMD "failed to implement reasonable security measures to protect the sensitive consumer information on its computer network." Therefore, LabMD's "data security practices were unfair under Section 5." In particular, **[*1227]** LabMD failed to adequately secure its computer network, employ suitable risk-assessment tools, provide data-security training to its employees, and adequately restrict and monitor the computer practices of those using its network. Because of these deficiencies, the Commission continued, LimeWire was able to be installed on the LabMD billing manager's computer, and Tiversa was ultimately able to download the 1718 File. The Commission then held that, contrary to the ALJ's decision, the evidence showed that Section 5(n)'s "substantial injury" prong was met in two ways: the unauthorized disclosure of the 1718 File itself caused intangible privacy harm, and the mere exposure of the 1718 File on LimeWire was likely to cause substantial injury. The FTC went on to conclude that Section 5(n)'s other **[**10]** requirements were also met.[11]

Next, the Commission addressed and rejected LabMD's arguments that Section 5(a)'s "unfairness" standard—which, according to the Commission, is a reasonableness standard—is void for vagueness and that the

---

(g) did not employ readily available measures to prevent or detect unauthorized access to personal information on its computer networks. For example, respondent did not use appropriate measures to prevent employees from installing on computers applications or materials that were not needed to perform their jobs or adequately maintain or review records of activity on its networks. As a result, respondent did not detect the installation or use of an unauthorized file sharing application on its networks.

[9] Prior to the hearing, LabMD amended its answer and once again unsuccessfully moved to dismiss the FTC's complaint. Nothing in the answer or the motion is pertinent here.

[10] ***HN2***[] Section 5(n) states, as a prerequisite for an act or practice to be unfair, "[T]he act or practice [1] causes or is likely to cause substantial injury to consumers [2] which is not reasonably avoidable by consumers themselves and [3] not outweighed by countervailing benefits to consumers or to competition."

[11] *See supra* note 10.

Commission failed to provide fair notice of what data-security practices were adequate under *Section 5(a)*. The FTC then entered an order vacating the ALJ's decision and enjoining LabMD to install a data-security program that comported with the FTC's standard of reasonableness. *See generally Appendix*. The order is to terminate on either July 28, 2036, or twenty years "from the most recent date that the [FTC] files a complaint . . . in federal court alleging any violation of the order, whichever comes later." *Id.* at 6.

C.

LabMD petitioned this Court to review the FTC's decision. LabMD then moved to stay enforcement of the FTC's cease and desist order pending review, arguing that compliance with the order was unfeasible given LabMD's defunct status and *de minimis* assets. After an FTC response urging against the stay, we granted LabMD's motion. *LabMD, Inc. v. FTC, 678 F. App'x 816 (11th Cir. 2016)*.

II.

Now, LabMD argues that the Commission's cease and desist order is unenforceable because the order does not direct it to cease committing **[**11]** an unfair "act or practice" within the meaning of *Section 5(a)*.[12] ***HN3***[] We review the FTC's legal conclusions *de novo* but give "some deference to [its] informed judgment that a particular commercial practice is to be condemned as 'unfair.'" *FTC v. Ind. Fed'n of Dentists, 476 U.S. 447, 454, 106 S. Ct. 2009, 2016, 90 L. Ed. 2d 445 (1986)*. We review the FTC's findings of facts under the "substantial evidence" standard, *McWane, Inc. v. FTC, 783 F.3d 814, 824 (11th Cir. 2015)*, which requires "more than a mere scintilla" of evidence "but less than a preponderance," *Dyer v. Barnhart, 395 F.3d 1206, 1210 (11th Cir. 2005)*.

A.

HN4[] *Section 5(a) of the FTC Act* authorizes the FTC to protect consumers by "prevent[ing] persons, partnerships, or corporations . . . from using unfair . . . acts or practices in or affecting commerce." The Act does not define the term "unfair." The provision's history, however, elucidates the term's meaning.

[*1228] The FTC Act, passed in 1914, created the FTC and gave it power to prohibit "unfair methods of competition."[13] Rather than list "the particular practices to which [unfairness] was intended to apply," Congress "intentionally left development of the term 'unfair' to the Commission" through case-by-case litigation[14] —though, at the time of the FTC Act's inception, the FTC's primary mission was understood to be the enforcement of ***antitrust law***.[15] In 1938, the Act was amended to provide that the FTC had authority to prohibit "unfair **[**12]** . . . acts or practices."[16] This amendment sought to clarify that the FTC's authority applied not only to competitors but, importantly, also to consumers.[17] Hence, the FTC possesses "unfairness authority" to prohibit and prosecute unfair acts or practices harmful to consumers.

---

[12] LabMD's brief asserts several grounds for setting aside the FTC's order. The only issue we address is the enforceability of the FTC's order.

[14] *FTC v. Sperry & Hutchinson Co., 405 U.S. 233, 239-40, 92 S. Ct. 898, 903, 31 L. Ed. 2d 170 (1972)*; *Atl. Ref. Co. v. FTC, 381 U.S. 357, 367, 85 S. Ct. 1498, 1505, 14 L. Ed. 2d 443 (1965)*; *see* S. Rep. No. 63-597, at 13 (1914); H.R. Rep. No. 63-1142, at 19 (1914).

[15] *See generally* Winerman, *supra* note 13.

[16] *Id.* at 96.

[17] *FTC v. Colgate-Palmolive Co., 380 U.S. 374, 384, 85 S. Ct. 1035, 1042, 13 L. Ed. 2d 904 (1965)*; H.R. Rep. No. 75-1613, at 3 (1937).

In 1964, the FTC set forth three factors to consider in deciding whether to wield its unfairness authority. The FTC was to consider whether an act or practice (1) caused consumers, competitors, or other businesses substantial injury; (2) offended public policy as established by statute, the common law, or otherwise; and (3) was immoral, unethical, or unscrupulous.[18] The Supreme Court cited these factors with apparent approval in dicta in the 1972 case *FTC v. Sperry & Hutchinson, 405 U.S. 233, 244 n.5, 92 S. Ct. 898, 905 n.5, 31 L. Ed. 2d 170 (1972)*.

"Emboldened" by *Sperry & Hutchinson*'s dicta, "the Commission set forth to test the limits of the unfairness doctrine."[19] This effort peaked in a 1978 attempt to "use unfairness to ban all advertising directed to children on the grounds that it was 'immoral, unscrupulous, and unethical' and based on generalized public policies to protect children."[20] Congress **[**13]** and much of the public disapproved.[21] Congressional backlash included refusing to fund the FTC, thus shutting it down for several days, and passing legislation that prevented the FTC from using its unfairness authority to promulgate rules that restrict children's advertising.[22]

Following this episode, the Commission wrote a unanimous letter to two senators in 1980[23] placing gloss on the three 1964 **[*1229]** unfairness factors that were recognized in *Sperry & Hutchinson*. ***HN5***[] As to the first factor, consumer injury, the FTC laid out a separate three-part test defining a qualifying injury. These consumer-injury factors would later be codified in *Section 5(n)*. The FTC stated that to warrant a finding of unfairness, an injury "[1] must be substantial; [2] it must not be outweighed by any countervailing benefits to consumers or competition that the practice produces; and [3] it must be an injury that consumers themselves could not reasonably have avoided."

HN6[] As to the second 1964 unfairness factor, public policy, the FTC specified that the policies relied upon **[**14]** "should be clear and well-established"—that is, "declared or embodied in formal sources such as statutes, judicial decisions, or the Constitution as interpreted by the courts, rather than being ascertained from the general sense of the national values." Put another way, an act or practice's "unfairness" must be grounded in statute, judicial decisions—*i.e.*, the common law—or the Constitution. An act or practice that causes substantial injury but lacks such grounding is not unfair within *Section 5(a)*'s meaning.[24] Finally, the FTC stated that it was nixing the third 1964 unfairness factor—whether a practice is immoral, unethical, or unscrupulous—because it was "largely duplicative" of the first two. Thus, an "unfair" act or practice is one which meets the consumer-injury factors listed above and is grounded in well-established legal policy.

[22] Beales, *supra* note 19 (citing *FTC Improvements Act of 1980, Pub. L. No. 96-252, § 14, 94 Stat. 388*); *see* *15 U.S.C. § 57a(h)*.

[23] *FTC Policy Statement on Unfairness*, FTC (Dec. 17, 1980), available at https://www.ftc.gov/public-statements/1980/12/ftc-policy-statement-unfairness.

[24] *Section 5(n)* now states, with regard to public policy, "In determining whether an act or practice is unfair, the Commission may consider established public policies as evidence to be considered with all other evidence. Such public policy considerations may not serve as a primary basis for such determination." We do not take this ambiguous statement to mean that the Commission may bring suit purely on the basis of substantial consumer injury. The act or practice alleged to have caused the injury must still be unfair under a well-established legal standard, whether grounded in statute, the common law, or the Constitution.

Here, the FTC's complaint alleges that LimeWire was installed on the computer used by LabMD's billing manager. This installation was contrary to company policy.[25] The complaint then alleges that LimeWire's installation caused the 1718 File, which consisted of consumers' personal information, to be exposed. The 1718 File's exposure caused consumers injury by infringing **[**15]** upon their right of privacy. Thus, the complaint alleges that LimeWire was installed in defiance of LabMD policy and caused the alleged consumer injury. Had the complaint stopped there, a narrowly drawn and easily enforceable order might have followed, commanding LabMD to eliminate the possibility that employees could install unauthorized programs on their computers.

But the complaint continues past this single allegation of wrongdoing, adding that LimeWire's installation was not the only conduct that caused the 1718 File to be exposed. It also alleges broadly that LabMD "engaged in a number of practices that, taken together, failed to provide reasonable and appropriate security for personal information on its computer networks." The complaint then provides a litany of security measures that LabMD failed to employ, each setting out in general terms a deficiency in LabMD's data- **[*1230]** security protocol.[26] Because LabMD failed to employ these measures, the Commission's theory goes, LimeWire was able to be installed on the billing manager's computer. LabMD's policy forbidding employees from installing programs like LimeWire was insufficient.

The FTC's complaint, therefore, uses LimeWire's **[**16]** installation, and the 1718 File's exposure, as an entry point to broadly allege that LabMD's data-security operations are deficient as a whole. Aside from the installation of LimeWire on a company computer, the complaint alleges no specific unfair acts or practices engaged in by LabMD. Rather, it was LabMD's multiple, unspecified failures to act in creating and operating its data-security program that amounted to an unfair act or practice.[27] Given the breadth of these failures, the Commission attached to its complaint a proposed order which would regulate all aspects of LabMD's data-security program—sweeping prophylactic measures to collectively reduce the possibility of employees installing unauthorized programs on their computers and thus exposing consumer information. The proposed cease and desist order, which is identical in all relevant respects to the order the FTC ultimately issued, identifies no specific unfair acts or practices from which LabMD must abstain and instead requires LabMD to implement and maintain a data-security program "reasonably designed" to the Commission's satisfaction. *See generally Appendix*.

The decision on which the FTC based its final cease and desist order exhibits more of the same. The FTC found that LabMD "failed to implement reasonable security measures to protect the sensitive consumer information on its computer network" and that the failure caused substantial consumer injury. In effect, the decision held that LabMD's

---

[25] The FTC's complaint does not state that LimeWire was installed contrary to company policy. But the complaint implies as much in that it does not allege that LabMD's policy allowed the installation. Further, undisputed evidence in the record indicates that LimeWire was installed contrary to LabMD policy.

[26] *See supra* note 8.

[27] After outlining LabMD's shortcomings in data security, namely those items listed in note 8, *supra*, the FTC's complaint states in paragraph 22 that LabMD's

> failure to employ reasonable and appropriate measures to prevent **[**17]** unauthorized access to personal information, including dates of birth, SSNs, medical test codes, and health information, caused, or is likely to cause, substantial injury to consumers that is not offset by countervailing benefits to consumers or competition and is not reasonably avoidable by consumers. *This practice was, and is, an unfair act or practice*.

(Emphasis added). Oddly, paragraph 23 of the complaint states that the "*acts and practices* of [LabMD] as alleged in this complaint constitute unfair *acts or practices* in or affecting commerce in violation of *Section 5(a)*." (Emphasis added). Thus, paragraph 22 seems to conceive of all of LabMD's data-security deficiencies as culminating in a single unfair act or practice, and paragraph 23, though unspecific and perhaps boilerplate, suggests that there were multiple unfair acts or practices. Paragraph 22 better encapsulates the FTC's theory, as the complaint in preceding paragraphs lays out a number of deficiencies that, "taken together," constitute unreasonable data security. Further, the Commission's cease and desist order states, "[T]he Commission has concluded that LabMD's *data security practices were unreasonable* and *constitute an unfair act or practice* that violates *Section 5*." (Emphasis added). *See Appendix* at 1.

failure to act in various ways to protect consumer data rendered its entire data-security operation an unfair act or practice. The broad cease and desist order now at issue, according to the Commission, was therefore justified.

* * *

The first question LabMD's petition for review presents is whether LabMD's failure to implement and maintain a reasonably designed data-security program **[**18]** constituted an unfair act or practice within the ambit of *Section 5(a)*. The FTC declared that it did because such failure caused **[*1231]** substantial injury to consumers' right of privacy, and it issued a cease and desist order to avoid further injury.

HN7[] The Commission must find the standards of unfairness it enforces in "clear and well-established" policies that are expressed in the Constitution, statutes, or the common law.[28] The Commission's decision in this case does not explicitly cite the source of the standard of unfairness it used in holding that LabMD's failure to implement and maintain a reasonably designed data-security program constituted an unfair act or practice. It is apparent to us, though, that the source is the common law of negligence. According to the *Restatement (Second) of Torts § 281* (Am. Law Inst. 1965), Statement of the Elements of a Cause of Action for Negligence, [an] actor is liable for an invasion of an interest of another, if:

> (a) the interest invaded is protected against unintentional invasion, and
> (b) the conduct of the actor is negligent with respect to the other, or a class of persons within which [the other] is included, and
> (c) the actor's conduct is a legal cause of the invasion, and
>
> (d) the other has not so **[**19]** conducted himself as to disable himself from bringing an action for such invasion.

The gist of the Commission's complaint and its decision is this: The consumers' right of privacy is protected against unintentional invasion. LabMD unintentionally invaded their right, and its deficient data-security program was a legal cause. *Section 5(a)* empowers the Commission to "prevent persons, partnerships, or corporations . . . from using unfair . . . acts or practices." The law of negligence, the Commission's action implies, is a source that provides standards for determining whether an act or practice is unfair, so a person, partnership, or corporation that negligently infringes a consumer interest protected against unintentional invasion may be held accountable under *Section 5(a)*. We will assume *arguendo* that the Commission is correct and that LabMD's negligent failure to design and maintain a reasonable data-security program invaded consumers' right of privacy and thus constituted an unfair act or practice.

The second question LabMD's petition for review presents is whether the Commission's cease and desist order, founded upon LabMD's general negligent failure to act, is enforceable. We answer this question in the **[**20]** negative. We illustrate why by first laying out the FTC Act's enforcement and remedial schemes and then by demonstrating the problems that enforcing the order would pose.

III.

HN8[] The FTC carries out its *Section 5(a)* mission to prevent unfair acts or practices in two ways: formal rulemaking and case-by-case litigation.

The Commission is authorized under *15 U.S.C. § 57a* to prescribe rules "which define with specificity" unfair acts or practices within the meaning of *Section 5(a)*. Once a rule takes effect, it becomes in essence an addendum to *Section 5(a)*'s phrase "unfair . . . acts or practices"; the rule puts the public on notice that a particular act or practice is unfair. The FTC enforces its rules in the federal district courts. Under *15 U.S.C. § 45(m)(1)(A)*,[29] **[*1232]** the

---

[28] ***FTC Policy Statement on Unfairness, supra note 23***.

[29] This provision states,

Commission may bring an action to recover a civil penalty against any person, partnership or corporation that knowingly violates a rule.[30] This case does not involve the enforcement of an FTC-promulgated rule.

What is involved here is the FTC's establishment of an unfair act or practice through litigation. Because Congress thought impossible the task of legislating a comprehensive list of unfair acts or practices, it authorized the Commission to establish unfair acts or practices through case-by-case litigation. ***HN9***[] In the litigation context, once an act or practice is adjudged to be unfair, the act or practice becomes in effect—like an FTC-promulgated rule—an addendum to *Section 5(a)*.

HN10[] The FTC Act provides two forums for such litigation. The Commission may choose to prosecute its claim that an act or practice is unfair before an ALJ, with appellate review before the full Commission and then in a federal court of appeals. *See* *15 U.S.C. § 45(b)*, *(c)*; *16 C.F.R. § 3.1 et seq.* Or, under *Section 13(b)* of the Act, *15 U.S.C. § 53(b)*, it may prosecute its claim before a federal district judge, with appellate review also in a federal court of appeals.

Assume a factual scenario in which the Commission believes a certain act or practice **[**22]** is unfair. It should not matter which of the two forums the Commission chooses to prosecute its claim. The result should be the same. As we explain below, the ALJ and the district judge use materially identical procedural rules in processing the case to judgment[31] and both apply the same substantive law to the facts. Further, putting any venue differences aside, the same court of appeals reviews their decisions.

A.

We consider the Commission's first option, litigation before an ALJ. The Commission issues an administrative complaint against a party it has reason to believe is engaging in an unfair act or practice and seeks a cease and desist order. *16 C.F.R. § 3.13*. The Commission prosecutes the complaint before an ALJ whom it designates, in accordance with its Rules of Practice. *Id.* *§ 3.1 et seq.* Under these Rules, the complaint must provide, among other things, "[a] clear and concise factual statement sufficient to inform each respondent with reasonable definiteness of the type of acts or practices alleged to be in violation of the law." *Id.* *§ 3.11*. If the respondent **[*1233]** files a motion to dismiss the complaint, the motion is referred to the Commission for a ruling.[32] If **[**23]** the motion is denied, the respondent files an answer. From that point on, the proceedings before the ALJ resemble the proceedings in an action for injunctive relief in federal district court. If the ALJ finds that the respondent has been engaging in the unfair act or practice alleged and will likely continue doing so, the ALJ enters a cease and desist order enjoining the respondent from engaging in the unfair conduct.[33] If not, the ALJ dismisses the Commission's

---

> The Commission may commence a civil action to recover a civil penalty in a district court of the United States against any person, partnership, or corporation which violates any rule under this subchapter respecting unfair or deceptive acts or practices . . . with actual knowledge or knowledge fairly **[**21]** implied on the basis of objective circumstances that such act is unfair or deceptive and is prohibited by such rule. In such action, such person, partnership, or corporation shall be liable for a civil penalty of not more than $10,000 for each violation.

15 U.S.C. § 45(m)(1)(A). As explained in note 39, *infra*, the Commission has increased the penalty amount to $41,484 per violation.

[30] The Commission may also bring a suit in federal district court or a state court of competent jurisdiction to obtain relief in the form of consumer redress. *15 U.S.C. § 57b*.

[31] *See* FTC, *Operating Manual* Chapter 10.7, available at https://www.ftc.gov/sites/default/files/attachments/ftc-administrative-staff-manuals/ch10administrativelitigation.pdf (stating that "many [of the Commission's] adjudicative rules are derived from the Federal Rules of Civil Procedure"); *see also* Stephanie W. Kanwit, *Federal Trade Commission* § 8:1 (2017) (noting that the Commission "has held over the years that the [Federal Rules of Civil Procedure] can provide an analytical framework for the disposition of related issues" (quotations omitted)).

[32] The Commission may, in its discretion, refer the motion back to the ALJ for a ruling. *16 C.F.R. § 3.22*.

complaint.[34] Either way, the ALJ's decision is appealable to the FTC, *id.* *§ 3.52*, and the FTC's decision is in turn reviewable in a federal court of appeals, *15 U.S.C. § 45(c)*.

Suppose the Commission chooses the second option, litigation before a federal district judge under *Section 13(b)*. If the Commission has reason to believe a party is engaging in an unfair act or practice, it seeks an injunction by filing in district court a complaint that sets forth "well-pleaded facts . . . permit[ting] the court to infer more than the mere possibility of misconduct." *Ashcroft v. Iqbal, 556 U.S. 662, 679, 129 S. Ct. 1937, 1950, 173 L. Ed. 2d 868 (2009)* (citing *Fed. R. Civ. P. 8(a)(2)*). Although the case is tried pursuant to the Federal Rules of Civil Procedure, not the FTC Rules of Practice, it is handled essentially as it would be before the ALJ. If the district judge finds that **[**24]** the defendant has been engaging in the unfair act or practice alleged and will likely continue doing so, the judge enjoins the defendant from engaging in such conduct. Whatever the court's decision, it is reviewable in the court of appeals.

Assume the result is the same in both litigation forums. The ALJ enters a cease and desist order; the district court issues an injunction. Appellate review would reach the same result regardless of the trial forum (assuming that venue is laid in the same court of appeals).[35] Assume further that both coercive orders are affirmed by the court of appeals. The cease and desist order and the injunction address the same behavior and contain the same command: discontinue engaging in a specific unfair act or practice.

With the cease and desist order or the injunction in hand, the Commission may **[*1234]** proceed in two ways against a party who violates its terms.[36] The Commission may seek the imposition of either a civil penalty or civil-contempt sanction.[37] We explain below the procedures the Commission invokes in pursuing these respective remedies.

B.

1.

---

[33] The ALJ's decision must set out findings of fact and conclusions of law, *16 C.F.R. § 3.51(c)*, just like a district judge must do pursuant to *Federal Rule of Civil Procedure 52(a)* following a bench trial.

[34] As a whole, this administrative procedure, set out in the FTC's Rules of Practice, effectively supersedes *15 U.S.C. § 45(b)*, the FTC Act provision governing Commission proceedings.

[35] There are a couple of subtle differences in how cease and desist orders and injunctions are reviewed. First, an appellate court reviews a district court's findings of fact for clear error and those of the FTC under the "substantial evidence" standard. *McWane, Inc., 783 F.3d at 824*; *Dyer, 395 F.3d at 1210*. In practice, however, these two standards make little or no difference in terms of outcome. *See* *Dickinson v. Zurko, 527 U.S. 150, 162-63, 119 S. Ct. 1816, 1823, 144 L. Ed. 2d 143 (1999)* ("The court/agency [substantial-evidence] standard, as we have said, is somewhat less strict than the court/court [clearly erroneous] standard. But the difference is a subtle one—so fine that (apart from the present case) we have failed to uncover a single instance in which a reviewing court conceded that use of one standard rather than the other would in fact have produced a different outcome."). Further, although both the FTC's and a district court's conclusions of law are reviewed *de novo*, appellate courts give "some deference to the Commission's informed judgment that a particular commercial practice is to be condemned as 'unfair.'" *Ind. Fed'n of Dentists, 476 U.S. at 454, 106 S. Ct. at 2016*.

[36] We note that with respect to violations of final cease and desist orders, the Commission may also bring a *15 U.S.C. § 57b* action as described in note 30, *supra*.

[37] The two remedies are similar in nature. Indeed, not long after *Section 5*'s civil-penalty scheme was implemented, the Commissioner of the FTC described civil penalties as "an additional remedy to that formerly employed of invoking the inherent power of the courts to punish for contempt anyone who violated a court order directing compliance with an order of the Commission." *See* Hon. R. E. Freer, Commissioner, Federal Trade Commission, Address before the Annual Convention of the Proprietary Association (May 17, 1938).

HN11[] Under Section 5(l), 15 U.S.C. § 45(l), the Commission may bring a civil-penalty action in district court should the respondent violate **[**25]** a final cease and desist order.[38] The Commission's complaint would allege that the defendant is subject to an existing cease and desist order and has violated its terms. For each separate violation of the order—or, in the case of a continuing violation, for each day in violation—the district court may impose a penalty of up to $41,484.[39] *Id.* Section 5(l) also empowers the district court to grant an injunction if the Commission proves that the violation is likely to continue and an injunction is necessary to enforce the order.

HN12[] If the Commission has obtained an injunction in district court requiring the defendant to discontinue an unfair act or practice, it may invoke the district court's civil-contempt power should the defendant disobey. Rather than filing a complaint, as in a Section 5(l) action, the Commission simply moves the district court for an order requiring the defendant to show cause why it should not be held in contempt for engaging in conduct the injunction specifically enjoined. If the court is satisfied that the conduct is forbidden, it issues a show cause order. Then, if at the show cause hearing the Commission establishes by clear and convincing proof that the defendant engaged in the **[**26]** forbidden conduct and that the defendant "had the ability to comply" with the injunctive provision at issue, McGregor v. Chierico, 206 F.3d 1378, 1383 (11th Cir. 2000), the court may adjudicate **[*1235]** the defendant in civil contempt and impose appropriate sanctions.

2.

The concept of specificity is crucial to both modes of enforcement. We start with civil penalties for violations of cease and desist orders. Nothing in the FTC Act addresses what content must go into a cease and desist order. The FTC Rule of Practice governing Commission complaints, however, states that a complaint must contain "[a] clear and concise factual statement sufficient to inform each respondent with reasonable definiteness of the type of acts or practices alleged to be in violation of the law." 16 C.F.R § 3.11. It follows that the remedy the complaint seeks must comport with this requirement of reasonable definiteness. Moreover, given the severity of the civil penalties a district court may impose for the violation of a cease and desist order, the order's prohibitions must be stated with clarity and precision. The United States Supreme Court emphasized this point in *FTC v. Colgate-Palmolive Co.*, stating,

> [T]his Court has . . . warned that an order's prohibitions should be clear and precise **[**27]** in order that they may be understood by those against whom they are directed, and that [t]he severity of possible penalties prescribed . . . for violations of orders which have become final underlines the necessity for fashioning orders which are, at the outset, sufficiently clear and precise to avoid raising serious questions as to their meaning and application.

380 U.S. 374, 392, 85 S. Ct. 1035, 1046, 13 L. Ed. 2d 904 (1965) (quotations and citations omitted). The imposition of penalties upon a party for violating an imprecise cease and desist order—up to $41,484 per violation or day in violation—may constitute a denial of due process.[40]

---

[38] A cease and desist order is made final pursuant to the conditions set forth in 15 U.S.C. § 45(g). Section 5(l) directs the Commission to call upon the United States Attorney General to commence a civil-penalty action against the respondent. The Commission can bring the action itself, however, in accordance with the criteria in 15 U.S.C. § 56(a).

Section 5(m)(1)(B) of the Act, 15 U.S.C. § 45(m)(1)(B), authorizes the Commission to file suit against a nonrespondent who "with actual knowledge" engages in the "act or practice" declared a violation of Section 5(a) and enjoined via a cease and desist order entered in a previous administrative adjudication. The previous adjudication, however, is afforded no collateral estoppel effect against the defendant. That is, the defendant can challenge the factual predicate for the cease and desist order and the ultimate determination that the facts found in the previous adjudication constituted an unfair act or practice. *See id.* § 45(m)(2).

[39] Sections 5(l) and 5(m)(1)(B) set the maximum penalty at $10,000, but the Commission may adjust this figure for inflation under 16 C.F.R. § 1.98. Hence the current $41,484 figure, which "appl[ies] only to penalties assessed after January 22, 2018" but "includ[es] those penalties whose associated violation predated January 22, 2018." *Id.*

Specificity is equally important in the fashioning and enforcement of an injunction consequent to an action brought in district court under *Section 13(b)*. *Federal Rule of Civil Procedure 65(d)(1)* requires that an injunctive order state the reasons for its coercive provisions, state the provisions "specifically," and describe the acts restrained or required "in reasonable detail." The Supreme Court has stated that *Rule 65(d)(1)*'s "specificity provisions . . . are no mere technical requirements. The Rule was designed to prevent uncertainty and confusion on the part of those faced with injunctive orders, and to avoid the possible founding of a contempt citation on a decree **[**28]** too vague to be understood." *Schmidt v. Lessard, 414 U.S. 473, 476, 94 S. Ct. 713, 715, 38 L. Ed. 2d 661 (1974)*. Indeed, "[t]he most fundamental postulates of our legal order forbid the imposition of a penalty for disobeying a command that defies comprehension." *Int'l Longshoremen's Ass'n, Local 1291 v. Phila. Marine Trade Ass'n, 389 U.S. 64, 76, 88 S. Ct. 201, 208, 19 L. Ed. 2d 236 (1967)*. Being held in contempt and sanctioned pursuant to an insufficiently specific injunction is therefore **[*1236]** a denial of due process. *See id.* (reversing a civil-contempt judgment founded upon an order too vague to be understood).

In sum, the prohibitions contained in cease and desist orders and injunctions must be specific. Otherwise, they may be unenforceable. Both coercive orders are also governed by the same standard of specificity, as the stakes involved for a violation are the same—severe penalties or sanctions.

C.

In the case at hand, the cease and desist order contains no prohibitions. It does not instruct LabMD to stop committing a specific act or practice. Rather, it commands LabMD to overhaul and replace its data-security program to meet an indeterminable standard of reasonableness. This command is unenforceable. Its unenforceability is made clear if we imagine what would take place if the Commission sought the order's enforcement. As we have explained, the standards a district court would apply are essentially **[**29]** the same whether it is entertaining the Commission's action for the imposition of a penalty or the Commission's motion for an order requiring the enjoined defendant to show cause why it should not be adjudicated in contempt. For ease of discussion, we posit a scenario in which the Commission obtained the coercive order it entered in this case from a district court, and now seeks to enforce the order.

The Commission moves the district court for an order requiring LabMD to show cause why it should not be held in contempt for violating the following injunctive provision:

> [T]he respondent shall . . . establish and implement, and thereafter maintain, a comprehensive information security program that is reasonably designed to protect the security, confidentiality, and integrity of personal information collected from or about consumers . . . . Such program . . . shall contain administrative, technical, and physical safeguards appropriate to respondent's size and complexity, the nature and scope of respondent's activities, and the sensitivity of the personal information collected from or about consumers . . . .[41]

See Appendix at 2. The Commission's motion alleges that LabMD's program failed to **[**30]** implement "*x*" and is therefore not "reasonably designed." The court concludes that the Commission's alleged failure is within the provision's language and orders LabMD to show cause why it should not be held in contempt.

At the show cause hearing, LabMD calls an expert who testifies that the data-security program LabMD implemented complies with the injunctive provision at issue. The expert testifies that "*x*" is not a necessary component of a reasonably designed data-security program. The Commission, in response, calls an expert who disagrees. At this

---

[40] *See BMW of N. Am., Inc. v. Gore, 517 U.S. 559, 574, & n.22, 116 S. Ct. 1589, 1598, & n.22, 134 L. Ed. 2d 809 (1996)* ("Elementary notions of fairness enshrined in our constitutional jurisprudence dictate that a person receive fair notice . . . of the conduct that will subject him to punishment . . . . [T]he basic protection against judgments without notice afforded by the *Due Process Clause* is implicated by civil penalties." (citation, quotations, and emphasis omitted)); *see also Sessions v. Dimaya, 584 U.S. __, 138 S. Ct. 1204, 1228-29, 200 L. Ed. 2d 549 (2018)* (Gorsuch, J., concurring) (suggesting that the severity of a civil penalty corresponds with the degree of fair notice of unlawful conduct that must be accorded to the defendant).

[41] Following this provision in the Commission's cease and desist order are five equally vague items which must be included in LabMD's data-security program. *See Appendix* at 2-3. These items suffer the same enforceability problems discussed below.

point, the district court undertakes to determine which of the two equally qualified experts correctly read the injunctive provision. Nothing in the provision, however, indicates which expert is correct. The provision contains no mention of "*x*" and is devoid of any meaningful standard informing the court of what constitutes a "reasonably designed" data-security program.[42] The court therefore has no choice **[*1237]** but to conclude that the Commission has not proven—and indeed cannot prove—LabMD's alleged violation by clear and convincing evidence. *See* McGregor, 206 F.3d at 1383.[43]

If the court held otherwise and ordered LabMD to implement "*x*," the court **[**31]** would have effectively modified the injunction at a show cause hearing. This would open the door to future modifications, all improperly made at show cause hearings.[44] Pretend that LabMD implemented "*x*" pursuant to the court's order, but the FTC, which is continually monitoring LabMD's compliance with the court's injunction, finds that "*x*" failed to bring the system up to the FTC's conception of reasonableness. So, the FTC again moves the district court for an order to show cause. This time, its motion alleges that LabMD failed to implement "*y*," another item the Commission thinks necessary to any reasonable data-security program. Does the court side with the Commission, modify the injunction, and order the implementation of "*y*"? Suppose "*y*" fails. Does another show cause hearing result in a third modification requiring the implementation of "*z*"?

The practical effect of repeatedly modifying the injunction at show cause hearings is that the district court is put in the position of managing LabMD's business in accordance with the Commission's wishes. It would be as if the Commission was LabMD's chief executive officer and the court was its operating officer. It is self-evident that this **[**32]** micromanaging is beyond the scope of court oversight contemplated by injunction law.

This all serves to show that an injunction identical to the FTC cease and desist order at issue would be unenforceable under a district court's contempt power. Because the standards governing the coercive enforcement of injunctions and cease and desist orders are the same, it follows that the Commission's cease and desist order is itself unenforceable.

IV.

In sum, assuming *arguendo* that LabMD's negligent failure to implement and maintain a reasonable data-security program constituted an unfair act or practice under Section 5(a), the Commission's cease and desist order is nonetheless unenforceable. It does not enjoin a specific act or practice. Instead, it mandates a complete overhaul of LabMD's data-security program and says precious little about how this is to be accomplished. Moreover, it effectually charges the district court with managing the overhaul. This is a scheme Congress could not have envisioned. We therefore grant LabMD's petition for review and vacate the Commission's order.

SO ORDERED.

[*1238] EXHIBIT

UNITED STATES OF AMERICA BEFORE THE FEDERAL TRADE COMMISSION

---

[42] Further, the order's other provisions, mentioned in note 41, *supra*, also fail to state with specificity the actions LabMD must take to bring its program into compliance with the order.

[43] *See also* FTC v. Trudeau, 579 F.3d 754, 763 (7th Cir. 2009) ("To succeed on a contempt petition, the FTC must demonstrate by clear and convincing evidence that the respondent has violated the express and unequivocal command of a court order." (quotations omitted)).

[44] The purpose of a show cause hearing is to determine whether the alleged contemner has violated the injunctive provision as it stands. If the party holding the injunction wishes to modify the provision, the party must move the district court to effect the modification. Implicit in Federal Rule of Civil Procedure 65 is the notion that before the modification can be made, the adverse party must be provided notice of the proposed modification and an opportunity to be heard.

COMMISSIONERS: Edith Ramirez, Chairwoman

Maureen [33] K. Ohlhausen**

Terrell McSweeny

In the Matter of LabMD, Inc., a corporation.

DOCKET NO. 9357

PUBLIC

FINAL ORDER

The Commission has heard this matter upon the appeal of Complaint Counsel from the Initial Decision of the Administrative Law Judge, and upon briefs and oral argument in support thereof and in opposition thereto. For the reasons stated in the accompanying opinion of the Commission, the Commission has concluded that LabMD's data security practices were unreasonable and constitute an unfair act or practice that violates *Section 5 of the Federal Trade Commission Act*. The Commission has therefore determined to vacate the Initial Decision and issue the following order:

ORDER

DEFINITIONS

For purposes of this order, the following definitions shall apply:

1. "Commerce" shall mean as defined in *Section 4 of the Federal Trade Commission Act, 15 U.S.C. § 44*.

2. Unless otherwise specified, "respondent" shall mean LabMD, Inc., and its successors and assigns.

3. "Affected Individual" shall mean any consumer whose personal information LabMD has reason to believe was, or could have been, accessible to unauthorized persons before July 28, 2016, including, but not limited to, consumers listed in the Insurance File and other documents available to a peer-to-peer file sharing network, but excluding consumers **[**34]** whom LabMD has notified, before July 28, 2016, of a data security breach.

[*1239] 4. "Insurance File" shall mean the file containing personal information about approximately 9,300 consumers, including names, dates of birth, Social Security numbers, health insurance company names and policy numbers, and medical test codes, that was available to a peer-to-peer file sharing network through a peer-to-peer file sharing application installed on a computer on respondent's computer network.

5. "Personal information" shall mean individually identifiable information from or about an individual consumer including, but not limited to: (a) first and last name; (b) telephone number; (c) a home or other physical address, including street name and name of city or town; (d) date of birth; (e) Social Security number; (1) medical record number; (g) bank routing, account, and check numbers; (h) credit or debit card information, such as account number; (i) laboratory test result, medical test code, or diagnosis, or clinical history; (j) health insurance company name and policy number; or (k) a persistent identifier, such as a customer number held in a "cookie" or processor serial number.

I.

IT IS ORDERED that the **[**35]** respondent shall, no later than the date this order becomes final and effective, establish and implement, and thereafter maintain, a comprehensive information security program that is reasonably designed to protect the security, confidentiality, and integrity of personal information collected from or about consumers by respondent or by any corporation, subsidiary, division, website, or other device or affiliate owned or controlled by respondent. Such program, the content and implementation of which must be fully documented in writing, shall contain administrative, technical, and physical safeguards appropriate to respondent's size and complexity, the nature and scope of respondent's activities, and the sensitivity of the personal information collected from or about consumers, including:

A. the designation of an employee or employees to coordinate and be accountable for the information security program;

B. the identification of material internal and external risks to the security, confidentiality, and integrity of personal information that could result in the unauthorized disclosure, misuse, loss, alteration, destruction, or other compromise of such information, and assessment of the **[**36]** sufficiency of any safeguards in place to control these risks. At a minimum, this risk assessment should include consideration of risks in each area of relevant operation, including, but not limited to: (1) employee training and management; (2) information systems, including network and software design, information processing, storage, transmission, and disposal; and (3) prevention, detection, and response to attacks, intrusions, or other systems failures;

C. the design and implementation of reasonable safeguards to control the risks identified through risk assessment, and regular testing or monitoring of the effectiveness of the safeguards' key controls, systems, and procedures;

[*1240] D. the development and use of reasonable steps to select and retain service providers capable of appropriately safeguarding personal information they receive from respondent, and requiring service providers by contract to implement and maintain appropriate safeguards; and

E. the evaluation and adjustment of respondent's information security program in light of the results of the testing and monitoring required by Subpart C, any material changes to respondent's operations or business arrangements, or any other **[**37]** circumstances that respondent knows or has reason to know may have a material impact on the effectiveness of its information security program.

II.

IT IS FURTHER ORDERED that, in connection with its compliance with Part I of this order, respondent shall obtain initial and biennial assessments and reports ("Assessments") from a qualified, objective, independent third-party professional, who uses procedures and standards generally accepted in the profession. Professionals qualified to prepare such assessments shall be: a person qualified as a Certified Information System Security Professional (CISSP) or as a Certified Information Systems Auditor (CISA); a person holding Global Information Assurance Certification (GIAC) from the SysAdmin, Audit, Network, Security (SANS) Institute; or a similarly qualified person or organization approved by the Associate Director for Enforcement, Bureau of Consumer Protection, Federal Trade Commission, Washington, D.C. 20580. The reporting period for the Assessments shall cover: (1) the first one hundred and eighty (180) days after July 28, 2016, for the initial Assessment, and (2) each two (2) year period thereafter for twenty (20) years after July 28, 2016, **[**38]** for the biennial Assessments. Each Assessment shall:

A. set forth the specific administrative, technical, and physical safeguards that respondent has implemented and maintained during the reporting period;

B. explain how such safeguards are appropriate to respondent's size and complexity, the nature and scope of respondent's activities, and the sensitivity of the personal information collected from or about consumers;

C. explain how the safeguards that have been implemented meet or exceed the protections required by Part I of this order; and

D. certify that respondent's security program is operating with sufficient effectiveness to provide reasonable assurance that the security, confidentiality, and integrity of personal information is protected, and has so operated throughout the reporting period.

Each Assessment shall be prepared and completed within sixty (60) days after the end of the reporting period to which the Assessment applies. Respondent shall provide the initial Assessment to the Associate Director for Enforcement, Bureau of Consumer Protection, Federal Trade Commission, Washington, D.C. 20580, within ten (10) days after the Assessment has been prepared. All subsequent biennial **[**39]** Assessments shall be retained by respondent until the order is terminated and provided to the Associate Director for Enforcement within ten (10) days of request. Unless otherwise directed by a representative of the Commission, the initial Assessment, and any subsequent Assessments requested, shall be sent by overnight courier (not **[*1241]** the U.S. Postal Service) to the Associate Director for Enforcement, Bureau of Consumer Protection, Federal Trade Commission, 600 Pennsylvania Avenue NW, Washington, D.C. 20580, with the subject line *In the Matter of LabMD, Inc.*, FTC Docket No. 9357. Provided, however, that in lieu of overnight courier, Assessments may be sent by first-class mail, but only if an electronic version of any such Assessment is contemporaneously sent to the Commission at Debrief@ftc.gov.

III.

IT IS FURTHER ORDERED that respondent shall provide notice to Affected Individuals and their health insurance companies within 60 days of the date this order becomes final and effective unless an appropriate notice has already been provided, as follows:

A. Respondent shall send the notice to each Affected Individual by first class mail, only after obtaining acknowledgment from the Commission **[**40]** or its staff that the form and substance of the notice satisfies the provisions of the order. The notice must be easy to understand and must include:

1. a brief description of why the notice is being sent, including the approximate time period of the unauthorized disclosure, the types of personal information that were or may have been disclosed without authorization (*e.g.*, insurance information, Social Security numbers, etc.), and the steps respondent has taken to investigate the unauthorized disclosure and protect against future unauthorized disclosures;
2. advice on how Affected Individuals can protect themselves from identity theft or related harms. Respondent may refer Affected Individuals to the Commission's identity theft website (www.ftc.gov/idtheft), advise them to contact their health care providers or insurance companies if bills don't arrive on time or contain irregularities, or to obtain a free copy of their credit report from www.annualcreditreport.com and monitor it and their accounts for suspicious activity, or take such other steps as respondent deems appropriate; and

3. methods by which Affected Individuals can contact respondent for more information, including a toll-free **[**41]** number for 90 days after notice to Affected Individuals, an email address, a website, and mailing address.

B. Respondent shall send a copy of the notice to each Affected Individual's health insurance company by first class mail.

C. If respondent does not have an Affected Individual's mailing address in its possession, it shall make reasonable efforts to find such mailing address, such as by reviewing online directories, and once found, shall provide the notice described in Subpart A, above.

[*1242] IV.

IT IS FURTHER ORDERED that respondent shall maintain and, upon request, make available to the Federal Trade Commission for inspection and copying:

A. for a period of five (5) years, a print or electronic copy of each document relating to compliance, including, but not limited to, notice letters required by Part III of this order and documents, prepared by or on behalf of respondent, that contradict, qualify, or call into question respondent's compliance with this order; and

B. for a period of three (3) years after the date of preparation of each Assessment required under Part II of this order, all materials relied upon to prepare the Assessment, whether prepared by or on behalf of respondent, including, **[**42]** but not limited to, all plans, reports, studies, reviews, audits, audit trails, policies, training materials, and assessments, and any other materials relating to respondent's compliance with Parts I and II of this order, for the compliance period covered by such Assessment.

V.

IT IS FURTHER ORDERED that respondent shall deliver a copy of this order to: (1) all current and future principals, officers, directors, and managers; (2) all current and future employees, agents, and representatives having responsibilities relating to the subject matter of this order; and (3) any business entity resulting from any change in structure set forth in Part VI. Respondent shall deliver this order to such current personnel within thirty (30) days after the date this order becomes final and effective, and to such future personnel within thirty (30) days after the person assumes such position or responsibilities. For any business entity resulting from any change in structure set forth in Part VI, delivery shall be at least ten (10) days prior to the change in structure.

VI.

IT IS FURTHER ORDERED that respondent shall notify the Commission at least thirty (30) days prior to any change in respondent that **[**43]** may affect compliance obligations arising under this order, including, but not limited to, a dissolution, assignment, sale, merger, or other action that would result in the emergence of a successor company; the creation or dissolution of a subsidiary, parent, or affiliate that engages in any acts or practices subject to this order; the proposed filing of a bankruptcy petition; or a change in either corporate name or address. Provided, however, that, with respect to any proposed change in the corporation about which respondent learns less than thirty (30) days prior to the date such action is to take place, respondent shall notify the Commission as soon as is practicable after obtaining such knowledge. Unless otherwise directed by a representative of the Commission, all notices required by this Part shall be sent by overnight courier (not the U.S. Postal Service) to the Associate Director for Enforcement, Bureau of Consumer Protection, Federal Trade Commission, 600 Pennsylvania Avenue NW, Washington, D.C. 20580, with the subject line *In the Matter of LabMD, Inc.*, FTC Docket No. 9357. Provided, however, that in lieu of overnight courier, notices may be sent by first-class mail, but only **[**44]** if an electronic version of any such notice is contemporaneously sent to the Commission at Debrief@ftc.gov.

[*1243] **VII**.

IT IS FURTHER ORDERED that respondent, within sixty (60) days after the date this order becomes final and effective, shall file with the Commission a true and accurate report, in writing, setting forth in detail the manner and form of their compliance with this order. Within ten (10) days of receipt of written notice from a representative of the Commission, they shall submit additional true and accurate written reports. Unless otherwise directed by a representative of the Commission in writing, all notices required by this Part shall be emailed to Debrief@ftc.gov or sent by overnight courier (not the U.S. Postal Service) to the Associate Director for Enforcement, Bureau of Consumer Protection, Federal Trade Commission, 600 Pennsylvania Avenue NW, Washington, D.C. 20580, with the subject line *In the Matter of LabMD, Inc.*, FTC Docket No. 9357. Provided, however, that in lieu of overnight courier, notices may be sent by first-class mail, but only if an electronic version of any such notice is contemporaneously sent to the Commission at Debrief@ftc.gov.

VIII.

This order will terminate **[**45]** on July 28, 2036, or twenty (20) years from the most recent date that the United States or the Federal Trade Commission files a complaint (with or without an accompanying consent decree) in federal court alleging any violation of the order, whichever comes later; provided, however, that the filing of such a complaint will not affect the duration of:

A. any Part in this order that terminates in less than twenty (20) years;

B. this order's application to any respondent that is not named as a defendant in such complaint; and
C. this order if such complaint is filed after the order has terminated pursuant to this Part.

Provided, further, that if such complaint is dismissed or a federal court rules that each respondent did not violate any provision of the order, and the dismissal or ruling is either not appealed or upheld on appeal, then the order will terminate according to this Part as though the complaint had never been filed, except that the order will not terminate between the date such complaint is filed and the later of the deadline for appealing such dismissal or ruling and the date such dismissal or ruling is upheld on appeal.

By the Commission.

Donald S. Clark

Antitrust & Trade Law > Clayton Act > Claims

Evidence > Burdens of Proof > Allocation

Evidence > Burdens of Proof > Preponderance of Evidence

Antitrust & Trade Law > Clayton Act > Scope

Antitrust & Trade Law > Clayton Act > Remedies > Injunctions

HN1[] **Clayton Act, Claims**

Section 7 of the Clayton Act, *15 U.S.C.S. § 18*, prohibits acquisitions, including mergers, where in any line of commerce or in any activity affecting commerce in any section of the country, the effect of such acquisition may be substantially to lessen competition. The Government has the ultimate burden of proving a *Section 7* violation by a preponderance of the evidence. Accordingly, the Government's failure of proof in any respect will mean the transaction should not be enjoined. Although certainty of harm is not necessary to prove a Section 7 violation, neither is the mere possibility of harm sufficient. Rather, to grant injunctive relief under the *Clayton Act*, the Court must conclude that the Government has introduced evidence sufficient to show that the challenged transaction is likely to lessen competition substantially. As part of satisfying that burden, Section 7 demands that a plaintiff demonstrate that the substantial lessening of competition will be sufficiently probable and imminent to warrant relief.

Antitrust & Trade Law > Clayton Act > Claims

HN2[] Clayton Act, Claims

In assessing the Government's *Section 7 of the Clayton Act*, *15 U.S.C.S. § 18* case, the court must engage in a comprehensive inquiry into the future competitive conditions in a given market, keeping in mind that the *Clayton Act* protects competition, rather than any particular competitor. Only examination of the particular market — its structure, history and probable future — can provide the appropriate setting for judging the probable anticompetitive effect of the merger. Hence, antitrust theory and speculation cannot trump facts; the Government must make its case on the basis of the record evidence relating to the market and its probable future.

Antitrust & Trade Law > Clayton Act > Claims

Evidence > Burdens of Proof > Burden Shifting

HN3[] Clayton Act, Claims

To further assist courts in the prospective inquiry under *Section 7 of the Clayton Act*, *15 U.S.C.S. § 18*, the D.C. Circuit has set forth a burden shifting framework for use in determining whether a proposed transaction violates the *Clayton Act*. Under that framework, the Government must first establish its prima facie case by: (1) identifying the relevant product and geographic market and 2) showing that the proposed merger is likely to substantially lessen competition in that market. If the Government satisfies its prima facie burden, the burden then shifts to defendants to provide sufficient evidence that the prima facie case inaccurately predicts the relevant transaction's probable effect on future competition. One way defendants may do so is to offer evidence that post-merger efficiencies will outweigh the merger's anticompetitive effects. If the defendants put forward sufficient evidence to rebut plaintiff's prima facie case, the burden of producing additional evidence of anticompetitive effect shifts to the Government, and merges with the ultimate burden of persuasion, which remains with the Government at all times.

Antitrust & Trade Law > Clayton Act > Claims

Evidence > Types of Evidence > Testimony > Expert Witnesses

HN4[] Clayton Act, Claims

It is beyond dispute that, to be probative in a particular case, expert testimony must incorporate assumptions that are "reasonable" in light of the record evidence. Hewing to that rule is especially important in *Section 7 of the Clayton Act*, *15 U.S.C.S. § 18*, cases where "only" an examination of the particular market — its structure, history and probable future — can provide the appropriate setting for judging the probable anticompetitive effect of the merger dictates that the disputes must be resolved on the basis of record evidence relating to the market and its probable future. Antitrust theory and speculation cannot trump facts. That is true no matter whether the testimony relates to a theory that is considered "mainstream" or has been deemed applicable to different factual or economic scenarios in other proceedings.

Antitrust & Trade Law > Clayton Act > Scope

HN5[] **Antitrust & Trade Law, Clayton Act**

A proposed merger may violate *Section 7 of the Clayton Act*, *15 U.S.C.S. § 18*, by enabling or encouraging post-merger coordinated interaction among firms in the relevant market that harms consumers. Such coordinated conduct need not constitute an illegal agreement under *Section 1 of the Sherman Act*, but instead can comprise instances of tacit coordination. In order to assess whether a merger will lead to an unacceptable risk of competition-stifling coordination, courts evaluate various market conditions, on the whole. In short, that analysis involves consideration of whether would-be coordinators could wield anticompetitive power by recognizing their shared economic interests and their interdependence with respect to price and output decisions.

Opinion by: RICHARD J. LEON

Opinion

[*163] **MEMORANDUM OPINION**

If there ever were an antitrust case where the parties had a dramatically different assessment of the current state of the relevant market and a fundamentally different vision of its future development, this is the one. Small wonder it had to go to trial !

[*164] On November 20, 2017, the U.S. Department of Justice's Antitrust Division brought this suit, on behalf of the United States of America ("the Government" or "the plaintiff"), to block the merger of AT&T Inc. ("AT&T") and Time Warner Inc. ("Time Warner") as a violation of *Section 7* of the Clayton Act, *15 U.S.C. § 18*. The Government claims, in essence, that permitting AT&T to acquire Time Warner is likely to substantially lessen competition in the video programming and distribution market nationwide by enabling AT&T to use Time Warner's "must have" television content to either raise its rivals' video programming costs or, by way of a "blackout," drive those same rivals' customers to **[**3]** its subsidiary, DirecTV. Thus, according to the Government, consumers nationwide will be harmed by increased prices for access to Turner networks, notwithstanding the Government's concession that this vertical merger would result in hundreds of millions of dollars in annual cost savings to AT&T's customers and notwithstanding the fact that (unlike in "horizontal" mergers) no competitor will be eliminated by the merger's proposed vertical integration.

Not surprisingly, the defendants, AT&T, Time Warner, and DirecTV, strongly disagree. Their vision couldn't be more different. The video programming and distribution market, they point out, has been, and is, in the middle of a revolution where high-speed internet access has facilitated a "veritable explosion" of new, innovative video content and advertising offerings over the past five years. Trial Tr. ("Tr.") 1397:1-4 (Montemagno (Charter)). Vertically integrated entities like Netflix, Hulu, and Amazon have achieved remarkable success in creating and providing affordable, on-demand video content directly to viewers over the internet. Meanwhile, web giants Facebook and Google have developed new ways to use data to create effective — and **[**4]** lucrative — digital advertisements tailored to the individual consumer.

As a result of these "tectonic changes" brought on by the proliferation of high-speed internet access, video programmers such as Time Warner and video distributors such as AT&T find themselves facing two stark realities: declining video subscriptions and flatlining television advertising revenues. *Id.* at 3079:18 (Bewkes (Time Warner)). Indeed, cost-conscious consumers increasingly choose to "cut" or "shave" the cord, abandoning their traditional cable- or satellite- TV packages for cheaper content alternatives available over the internet. At the same time, Facebook's and Google's dominant digital advertising platforms have surpassed television advertising in revenue. Watching vertically integrated, data-informed entities thrive as television subscriptions and advertising revenues declined, AT&T and Time Warner concluded that each had a problem that the other could solve: Time Warner could provide AT&T with the ability to experiment with and develop innovative video content and advertising offerings for AT&T's many video and wireless customers, and AT&T could afford Time Warner access to customer relationships and **[**5]** valuable data about its programming. Together, AT&T and Time Warner concluded that both companies could stop "chasing taillights" and catch up with the competition. 2/16/18 Hr'g Tr. 34:16 [Dkt # 67]. Those were the circumstances that drove AT&T, a distributor of content, and Time Warner, a content creator and programmer, to announce their historic $108 billion merger in October 2016 (the "proposed merger" or "challenged merger"). Those are the circumstances that cause them to claim today that their merger will increase not only innovation, but competition in this marketplace for years to come.

[*165] *Section 7* of the Clayton Act assigns this Court the "uncertain task" of weighing the parties' competing visions of the future of the relevant market and the challenged merger's place within it. *United States v. Baker Hughes Inc., 908 F.2d 981, 991, 285 U.S. App. D.C. 222 (D.C. Cir. 1990)*. Nothing less than a comprehensive inquiry into future competitive conditions in that market is expected. And the Government has the burden of proof to demonstrate that the merger is likely to lessen competition substantially in that uncertain future.

Since announcing the transaction in late October 2016, defendants have delayed closing on the merger agreement for about 18 months as a result of the Government's **[**6]** investigation and suit. The deal is now set to expire if not consummated on or before June 21, 2018 — a turn of events that would require AT&T to pay Time Warner a "break-up fee" of $500 million. The parties have engaged in a highly accelerated discovery schedule to prepare themselves to try this case in March and April of this year. The trial itself lasted nearly six weeks. Both sides put on a case-in-chief and the Government put on a rebuttal case as well. At the conclusion of the trial, I advised the parties I would issue a ruling, if not an opinion, no later than June 12, 2018 so that the losing side would have the agreed-upon time remaining to pursue its appellate rights *before* the merger or the $500 million break-up fee went into effect.

The following is the Court's Opinion. Initially, I provide context for this suit by reviewing the background of the video programming and distribution industry, the proposed merger, and the procedural history of this case. Thereafter, I discuss the legal standards governing a suit under *Section 7* of the Clayton Act, emphasizing in particular the considerations at play in evaluating vertical mergers. With that in place, I next analyze each of the Government's **[**7]** three theories of harm to competition, balancing, as appropriate, the conceded proconsumer benefits of the merger with the consumer harms alleged and the evidence offered to support them. Ultimately, I conclude that the Government has failed to meet its burden to establish that the proposed "transaction is likely to lessen competition substantially." *Baker Hughes, 908 F.2d at 985*.

As such, based on that conclusion, and for all the reasons set forth in greater detail in this Opinion, the Court **DENIES** the Government's request to enjoin the proposed merger.

TABLE OF CONTENTS

[*166]

BACKGROUND

I. The Video Programming and Distribution Industry[1]

The structure of the video programming and distribution industry generally resembles **[*167]** the "three-stage chain of production comprised of manufacturers, wholesalers, and retailers that typifies the distribution of many, if not **[**10]** most, physical goods in the U.S. economy." Christopher S. Yoo, *Vertical Integration and Media Regulation in the New Economy*, 19 Yale J. Reg. 171, 220 (2002). Here, that three-stage chain of production and

[1] For consistency throughout this Opinion, I will use the phrase "video programming and distribution industry" to include creation, packaging, and distribution of professionally produced video content. Of particular relevance here, the Court's definition of "video programming and distribution industry" encompasses programmers such as Turner; traditional multichannel video programming distributors ("MVPDs") such as cable and satellite companies; virtual multichannel video programming distributors ("virtual MVPDs" or "vMVPDs") such as DirecTV Now and DISH's Sling; and subscription video on demand services ("SVODs") such as Netflix, Hulu, and Amazon Prime. By contrast, I use the phrase "pay-TV" to refer only to the packaging and delivery of linear — or "live" — television content. That phrase encompasses only MVPDs and virtual MVPDs.

distribution involves "content creation, content aggregation, and content distribution." Proposed Findings of Fact of the United States ("Gov't PFOF") ¶ 8 [Dkt. # 1281.[2]

Television content begins at the manufacturing level. Although video programming is often created by studios (such as Time Warner's Warner Bros.), some networks or distributors "produce content for themselves" or, in the case of live sporting events, license the rights to broadcast the events from the various sports leagues. *See* Tr. 80:12-16 (Fenwick (Cox)). At the second level, programmers (such as Time Warner's Turner or Home Box Office ("HBO")) aggregate content into a network or network group and then license those networks to video distributors, like AT&T's DirecTV. *See, e.g., id.* at 80:4-9; Plaintiff's Exhibit ("PX") 456-4 to 10. At the third level, distributors bundle and distribute networks to their subscribers. Tr. 80:4-9 (Fenwick (Cox)).

Some subscription-based video programming services are "vertically integrated," meaning, in this context, **[**11]** that those services create or aggregate their content offerings and then distribute those offerings directly to consumers. *Id.* at 3081:18-25 (Bewkes (Time Warner)); *see* Defs.' Proposed Findings of Fact ("Defs.' PFOF") ¶ 12 [Dkt. # 120]. Examples of those services include Netflix, Hulu, and Amazon Prime. Tr. 3155:22-23 (Bewkes (Time Warner)). Traditional video programmers, such as Turner, generally lack such "soup to nuts" integration of content creation and distribution; they are instead reliant upon video distributors to deliver their content offerings to consumers. *Id.* at 3388:6-7 (Stephenson (AT&T)); *see id.* at 485:1-486:6, 612:17-20 (Martin (Turner)). Because the Government's claims center on the proposed combination of Time Warner's video programming with AT&T's video distribution, my background review focuses on those facets of the video programming and distribution industry.

A. Video Programing and Distribution

1. Programmers

Traditional programmers, such as Turner, acquire and aggregate video content. *Id.* at 80:4-16 (Fenwick (Cox)). Generally, programmers do not offer their content directly to consumers. *See, e.g., id.* at 485:1-486:6, 612:1-20 (Martin (Turner)). Instead, they **[**12]** package video content into networks — in Turner's case, networks such as TNT, TBS, and CNN — and then license the rights to display those networks to **[*168]** video distributors. PX459-18; Tr. 80:6-9 (Fenwick (Cox)). As such, Turner and its programming competitors may be thought of as content "wholesaler[s]" in that they are typically reliant upon third-party video distributors to get their offerings to consumers in the downstream market. Tr. 612:3-4, 17-20 (Martin (Turner)).

Most programmers make money in two primary ways, and Turner is no exception. *First*, programmers receive payments from distributors, known as "affiliate fees," in exchange for granting distributors the rights to display the programmers' content. *See, e.g., id.* at 604:21-23, 610:20-23. Affiliate fees are memorialized in affiliate agreements, which specify the "net effective rate" a programmer charges for a network on a per-subscriber, per-month basis. *Id.* at 987:5-17 (Breland (Turner)). Rates typically increase year-over-year, pursuant to what are called "escalator" clauses. *Id.* at 91:6-10 (Fenwick (Cox)); *id.* at 2728:19-23 (Katz). Affiliate fees have been "going up" over the past decade industrywide, due at least in part **[**13]** to rising costs of making "higher quality" content. Tr. 2562:9-2563:25 (Carlton); *cf id.* at 1495:12-16 (Sutton (HBO)) ("So the cost it takes to make shows, shows like the shows we make, has escalated significantly."). Affiliate fees vary, however, based on the size of the distributor; specifically, in order to incentivize and reward wide distribution, programmers typically provide distributors with "volume discounts" on affiliate fees, meaning that the more subscribers a distributor has, the more a programmer's net effective rates will decline. *See, e.g., id.* at 987:25-988:13 (Breland (Turner)) (explaining variance in rates between "small," "medium," and "large" MVPDs and virtual MVPDs); *id.* at 2911:21-23 (Holanda (RCN)) (describing "volume discounts" of larger distributors); PX127-2 (showing rate differentials).

---

[2] Many materials before the Court contain confidential business information or other proprietary data; such submissions were typically filed under seal with an accompanying redacted version accessible to the public. The Court has made great effort to refrain from quoting or otherwise including confidential business information in this Opinion, opting instead to refer generally to the exhibits or information filed under seal.

Second, and as any television viewer can attest, programmers sell advertising slots on their networks to advertisers. *See* Tr. 3179:23-3181:6 (Bewkes (Time Warner)). For decades, television advertising has followed the same playbook. *See id.* at 3086:9-10. During each hour of television, there are roughly eighteen minutes of advertisements. *See id.* at 609:23-610:4 (Martin (Turner)). **[**14]** Distributors sell advertisements for only two of those minutes; the programmer sells ads for the remaining sixteen minutes. *See id.* Advertising fees vary by the channel and the time of day an ad airs. *Id.* at 625:4-11. As with affiliate fees, the broader a program's audience, the more advertising revenue for Turner: as Chairman and CEO John Martin explained with regard to Turner's advertising strategy, "our goal is to have our networks in front of as many eyeballs as possible." *Id.* at 605:7-8.

The classic model of television advertising is limited in two ways. First, in deciding the placement of commercials to be seen by a wide audience, programmers generally must rely on general demographic data, such as age range, about the typical audience for a given program. *See id.* at 625:4-6. Second, and as a result, programmers have no choice but to saturate all viewers of a program with the same, undifferentiated ads — despite knowing that the selected ad will be of little interest to some number of those viewers. *See id.* at 3087:1-8 (Bewkes (Time Warner)).

In the past, Turner's total revenues have been split roughly equally between affiliate fee revenues and advertising revenues. *See id.* at **[**15]** 3088:10-12; PX456-8. For present purposes, however, the key point is this: both the affiliate fee and advertising revenue streams depend upon broad distribution of programmers' networks to consumers. *See, e.g.*, Tr. 604:17-18 (Martin (Turner)) ("I believe that distribution is **[*169]** the most important variable for success for any programmer."); *id.* at 3078:17-20 (Bewkes (Time Warner)) ("Q: What are the key drivers of the Turner business? A: Well, the Turner business, first, we need to get it on every distribution platform so that we can have subscriber fees and advertising revenues."). For that reason, Turner executives aim to "achieve wide distribution" of their networks. Post-Trial Brief of the United States ("Gov't Post-Tr. Br.") 6 [Dkt. # 126]; *see also, e.g.*, Tr. 3120:3-7 (Bewkes (Time Warner)); ("So we try everything to stay on all of our channels, Turner, HBO, everything, to keep them on there. And that's very important to us. If they're not on there, we're not only losing the subscriber fees; we're losing the advertising revenues."); *cf. id.* at 90:1-2 (Fenwick (Cox)) ("We are dealing with network groups where their goal [is] a hundred percent distribution.").

2. Distributors

Today, there **[**16]** are three categories of key players in the distribution of professionally produced video content: (1) "traditional" multichannel video programming distributors ("MVPDs"); (2) "virtual" MVPDs; and (3) subscription video on demand services ("SVODs"). *See* Tr. 485:1-487:13 (Martin (Turner)); Gov't PFOF ¶¶ 9, 14, 19.

First, there are traditional MVPDs. Those distributors include direct broadcast satellite providers, such as DISH or AT&T's DirecTV; cable television providers, such as Comcast,[3] Charter Communications ("Charter"), or Cox

[3] In 2009, Comcast announced its intent to acquire ownership of NBCUniversal ("NBCU"), a media and entertainment company that owns the NBC and Telemundo networks as well as Universal Pictures and Universal Studios. *See* Compl. ¶¶ 16-17, *United States v. Comcast Corp., 808 F. Supp. 2d 145 (D.D.C. 2011)* (No. 11-cv-106) [Dkt. # 1]. Although the Government, through the Antitrust Division, filed an action claiming that the transaction would violate *Section 7* of the Clayton Act — an action, as fortune would have it, also assigned to this Court — the Government also urged me to approve the transaction pursuant to a final judgment containing various "remedies" that it represented would "diminish[] Comcast's ability to use [NBCU's] programming to harm competition." Competitive Impact Statement 3, 7, *Comcast Corp., 808 F. Supp. 2d 145* [Dkt. # 4]. Those remedies related to procedures set forth in a related FCC order governing the transaction, including, as especially relevant here, requirements that Comcast-NBCU: 1) submit to "baseball style arbitration," at the distributor's option, in the event the parties were unable to reach a carriage agreement, 7/27/11 Hr'g Tr. 7:4-7 [Dkt. # 38], and 2) "continue to provide" video programming to the distributor "pursuant to the terms of any existing agreement until the arbitration is completed," Competitive Impact Statement Ex. A, at 24, *Comcast Corp., 808 F. Supp. 2d 145* [Dkt. # 4-1]. At a hearing to discuss the proposed final judgment, counsel for the Government asserted that, "especially in cases of vertical mergers, conduct remedies" such as the ones proposed "can be a very useful tool to address the competitive problems while preserving competition and allowing efficiencies" that "may result from the transaction." 7/27/11 Hr'g Tr. 15:16-21. Ultimately, I approved the Government's proposed final judgment with a few modifications to allow me to better monitor the implementation of the remedies imposed as part of the judgment. *See generally Comcast Corp., 808 F. Supp. 2d 145*. The transaction proceeded and today Comcast-NBCU operates as a "vertically integrated" programmer and distributor. *See* Tr. 882:14-16 (Rigdon (Comcast)).

Communications ("Cox"); "overbuilders," such as RCN; or "telcos," such as AT&T's U-verse or Verizon Fios. *See* Gov't PFOF ¶¶ 9, 43-45; Defs.' PFOF ¶ 34. All of those services offer live — or "linear" — television content as well as libraries of licensed content available for viewing on demand, typically in exchange for a monthly subscription fee. *See* Tr. 81:1-82:8 (Fenwick (Cox)); *id.* at 471:12-16, 638:16-22 (Martin (Turner)); *id.* at 1185:22-1186:1 (Warren (Turner)). Satellite distributors such as DirecTV and DISH operate nationally, whereas cable **[*170]** companies, telcos, and overbuilders distribute video content regionally; in any given local area, however, the incumbent **[**17]** cable operator is typically the dominant MVPD. *See id.* at 408:1-3 (Schlichting (DISH)). Consumers' choices of traditional MVPDs are therefore dictated by geography. *See id.* at 2187:3-23 (Shapiro); Gov't PFOF ¶¶ 43-46. Consumers often subscribe to traditional MVPDs as part of a "bundle" of various services, which may include, for example, a single price offering for cable, wireless internet, and home or mobile phone services. *See* Tr. 2784:21-25 (Rossi). Of the approximately 90 million American households that still receive television content from providers in the pay-TV industry, a substantial majority do so through traditional MVPDs. *See* Gov't PFOF ¶¶ 9, 13. That number is steadily declining, however, as consumers shift towards lower-cost virtual MVPDs or SVODs. *See* Tr. 3450:7-14 (Stephenson (AT&T)); *id.* at 3157:5-13 (Bewkes (Time Warner)).

Second, there are virtual MVPDs, which began to arrive in the marketplace in early 2015. *See id.* at 235:18-22 (Schlichting (DISH)). Like traditional MVPDs, virtual MVPDs distribute linear channels and on-demand content to subscribers for a subscription fee; unlike traditional MVPDs, virtual MVPDs offer their services over the **[**18]** internet, rather than through proprietary infrastructure such as satellite networks or cable lines. Gov't PFOF ¶¶ 14, 15. Because they offer their services over the internet, virtual MVPDs offer service nationwide, either via the web or mobile apps. *See* PX8-18. Examples of virtual MVPDs include DirecTV Now, DISH's Sling, Sony's Playstation Vue, Hulu Live, Google's YouTube TV, FuboTV, and Philo. *See id.* at 18-19; Defs.' PFOF ¶ 8. As their names suggest, some virtual MVPDs are associated with companies that operate traditional MVPDs. Each virtual MVPD competes with traditional MVPDs for subscribers and, increasingly, virtual MVPDs are gaining market share on traditional MVPDs due in part to their ease of use and lower-cost offerings. *See, e.g.*, Tr. 448:24-449:2 (Schlichting (DISH)); *id.* at 607:17-20 (Martin (Turner)); *id.* at 1829:3-12 (Merrill (AT&T)). Therefore, despite their relatively recent vintage, virtual MVPDs already have millions of subscribers. *See id.* at 2019:20-2020:18 (Bond (NBCU)).

Third, there are SVODs, a category that includes Netflix, Hulu, and Amazon Prime. SVODs generally do not offer live, linear programming such as live sporting events or live news. *See id.* at 487:1-16 (Martin **[**19]** (Turner)). Instead, they have large libraries of original and acquired content, accessible by a viewer on demand at any time. *See id.* at 486:12-17. The leading SVODs are vertically integrated and invest *billions* of dollars in creating original programming. *See id.* at 3081:13-25 (Bewkes (Time Warner)); *id.* at 3388:8-9 (Stephenson (AT&T)). By way of example, Netflix *alone* spends more on content than all of Time Warner. *See id.* at 2456:13-14 (Carlton); *see also id.* at 1053:2-7 (Breland (Turner)) (Netflix will spend "almost $8 billion" on content "[t]his year"). As with virtual MVPDs, SVODs offer low-cost subscription plans as compared to traditional MVPDs and continue to gain market share in the video programming and distribution industry. Indeed, while traditional MVPDs are losing subscribers at a steady clip, Netflix added 2 million subscribers in the last quarter alone. *See id.* at 3450:11-12 (Stephenson (AT&T)).

3. Affiliate Negotiations and "Blackouts"

As previously discussed, the schemes under which programmers extend licensing rights to MVPDs and virtual MVPDs are governed by detailed contracts known as affiliate agreements. *See* PX456-8; Tr. 80:4-9 (Fenwick (Cox)); *id.* at 485:1-486:6 **[**20]** (Martin (Turner)). Those agreements describe **[*171]** the precise rights granted by the programmer, and contain numerous terms and conditions. *See, e.g.*, PX409. Although the "rate" or payment amount is an important feature of any affiliate agreement, Tr. 90:5-10 (Fenwick (Cox)), "these deals are complicated" and "start with a hundred plus open issues," *id.* at 459:24-25. (Schlichting (DISH)); *see also id.* at 1690:23-25 (York (AT&T)) ("There's literally hundreds of items that go on kind of a priority list on what's the right deal."). Those issues can include digital rights, "windows" (*i.e.*, limitations on when certain content can be aired), "TV Everywhere" rights (*i.e.*, the rights for subscribers to access content away from home on an authorized device), volume discounts, and penetration rate requirements, among others. *See, e.g., id.* at 90:5-14, 101:19-23 (Fenwick (Cox)); Gov't PFOF ¶¶ 11, 105; PX409-14. At least in the case of Turner, affiliate agreements also include most-favored-nation ("MFN") clauses, which generally require the programmer to extend to the distributor certain types of terms given to another distributor. *See* Tr. 1024:6-14 (Breland (Turner)) (describing MFNs). Affiliate agreements **[**21]** run "between five and eight years on average." *Id.* at 87:9-11 (Fenwick (Cox)).

Because wide distribution maximizes programmers' two income streams — affiliate fees and advertising revenue — programmers like Turner bargain for terms aimed at promoting that distribution. To start, Turner seeks to license "every network" it owns. *Id.* at 606:6-8 (Martin (Turner)).[4] In addition, Turner negotiates for guarantees of particular "penetration rates" — the percentage of a given distributor's subscribers who receive a given channel. *Id.* at 1023:10-16 (Breland (Turner)).

Given the duration of the contract and the rights at issue, a single affiliate agreement can dictate the transfer of upwards of a billion dollars between programmer and distributor. *See, e.g.*, PX144-21, 48. It is thus no surprise that witnesses described affiliate agreement negotiations as "very tough" and "intense and aggressive." Tr. 1022:25-1023:2 (Breland (Turner)); *id.* at 3251:24-25 (Stankey (AT&T)); *see also* Gov't PFOF ¶ 104. Although the negotiations themselves typically last several months, closing a deal often "come[s] down to the last day and sometimes the last handful of minutes." Tr. 1093:14-16 **[**22]** (Breland (Turner)); *see also id.* at 87:14-19 (Fenwick (Cox)). Negotiations involving programmers with multiple networks, such as Turner, are particularly "time consuming." *Id.* at 87:17 (Fenwick (Cox)).

Affiliate negotiations are also idiosyncratic, varying from programmer to programmer and distributor to distributor. The Government's chief economic expert, Professor Carl Shapiro, recognized as much at trial. Noting that "bargaining is a dark art in many ways," Professor Shapiro acknowledged that negotiations may turn on myriad "unpredictable factors," including the "personalities" at the table and other "hairy stuff." *Id.* at 2213:12, 2294:18-2295:6 (Shapiro). This dynamic flows from the "multitude" of considerations that inform each negotiation. *Id.* at 1690:15 (York (AT&T)). With so many factors and priorities, and with such high stakes, it should be no surprise that terms and conditions vary across affiliate agreements. **[*172]** *See, e.g., id.* at 1681:16-17 ("[W]e do hundreds of deals, and we have hundreds of flavors of most favored nations."). In short, as Professor Shapiro explained, "the real world is messy and it's imperfect." *Id.* at 2210:22-23 (Shapiro).

Sometimes, negotiations between **[**23]** programmers and distributors reach an impasse. If a negotiation is ultimately unsuccessful, the distributor will lose the rights to display the programmer's content to its customers — a situation known in the industry as a programming "blackout," or "going dark." *See id.* at 129:4-9 (Fenwick (Cox)). Blackouts have negative consequences for programmers and distributors alike. On the programming side, a blackout causes a programmer to suffer immediate (and unrecoverable) losses of both advertising and affiliate fee revenue. *See, e.g., id.* at 1094:21-1096:18 (Breland (Turner)). On the distributor side, a blackout may lead a distributor to lose subscribers or may prevent the distributor from attracting new subscribers. *See* Gov't PFOF ¶ 119; *see also, e.g., id.* at 864:12-23 (Rigdon (Comcast)); *id.* at 1348:3-7 (Montemagno (Charter)) (discussing PX373). Because blackouts are almost always negative events for both programmers and distributors, "at the end of the day . . . [t]here's no benefit for anyone to walk away" without an affiliate agreement. Tr. 89:23-90:4 (Fenwick (Cox)). Therefore, bargains between programmers and distributors are almost always struck in order to avoid long-term blackouts. **[**24]** *See id.* at 138:13-15; *id.* at 1027:4-7 (Breland (Turner)); *id.* at 1359:14-15 (Montemagno (Charter)); *id.* at 3124:4-7 (Bewkes (Time Warner)).

That is not to say, however, that blackouts are irrelevant to the negotiating dynamic. Rather, in what can best be thought of as an elaborate and stylized Kabuki dance, the evidence shows that "almost every negotiation" involves both programmers and distributors threatening blackouts, especially when one side is seen as demanding terms that are out of line with the market. *Id.* at 1026:17-20 (Breland (Turner)); *cf. id.* at 376:22-377:11 (Schlichting (DISH)). To better understand how to assign the "right value" to a particular deal, programmers and distributors

---

[4] That said, in the case of DISH's virtual MVPD, Sling, Turner did license only its "core" networks — CNN, TBS, TNT, and Cartoon Network. *See* Tr. 236:23-24 (Schlichting (DISH)). As Time Warner CEO Jeff Bewkes testified, because 85 to 90% of Turner's revenue comes from four networks, Turner is well situated to offer skinnier bundles. *See id.* at 3126:22-3127:3 (Bewkes (Time Warner)); *see also id.* at 584:18-24 (Martin (Turner)) (same). By contrast, NBCU's revenues are spread more evenly across its more than one-dozen networks. *See id.* at 3127:6 (Bewkes (Time Warner)).

might perform "drop" or "go dark" analyses to estimate the potential impact of a blackout on the programmer's advertising or affiliate fee revenues or on the distributor's customer base. *Id.* at 1343:11-16 (Montemagno (Charter)); *see also id.* at 1348:3-10 (discussing PX373); *id.* at 862:19-863:3 (Rigdon (Comcast)); *id.* at 1029:10-1030:11 (Breland (Turner)) (discussing PX144).

Nevertheless, given the negative consequences for both sides from a blackout, "the reality" is that "virtually every" bargaining **[**25]** impasse between a programmer and distributor "is resolved after requiring either no blackout or a short-term blackout." *Id.* at 2396:1-5 (Shapiro). Indeed, in recent memory, Turner networks have been blacked out only twice, both for roughly one-month periods. *See id.* at 2357:15-23; Defs.' PFOF ¶¶ 139-143. Permanent blackouts, the evidence shows, are a vanishingly rare occurrence; the record indicates that Turner has *never* engaged in a long-term blackout with a distributor. *See* Tr. 2394:8-11 (Shapiro) (acknowledging that "in the real world there has never been a permanent blackout of the Turner networks").

B. Industry Trends

In recent years, traditional programmers, including Turner, and MVPDs, including DirecTV, have been faced with a number of interrelated industry trends that are particularly relevant to the challenged merger. I will review three of those trends in turn.

[*173] 1. Rise and Innovation of Over-the-Top, Vertically Integrated Video Content Services

Traditional programmers and distributors are experiencing increased competition from innovative, over-the-top content services, including virtual MVPDs and SVODs. *See infra* p. 24 n.5. Those web-based companies are harnessing the power of the internet **[**26]** and data to provide lower-cost, better-tailored programming content directly to consumers. The dramatic growth of the leading SVODs in particular, including Netflix, Hulu, and Amazon Prime, can be traced in part to the value conferred by vertical integration — that is, to having content creation and aggregation as well as content distribution under the same roof. *See, e.g.*, Tr. 3080:8-3085:21 (Bewkes (Time Warner)).

As relevant to the video programming and distribution market, vertical integration provides two notable advantages to content services. First, vertical integration reduces the "bargaining friction" inherent in the arm's-length affiliate negotiations that govern the exchange of rights between traditional programmers and distributors. *See, e.g., id.* at 3104:18-3107:13; *id.* at 1684:25-1685:13 (York (AT&T)). As numerous witnesses discussed, bargaining friction refers to the difficulty inherent in assigning value to and negotiating over new, innovative content rights, like "TV Everywhere," download rights, and "4K" high resolution. *See id.* at 1685:22-1686:7, 1688:6-13 (York (AT&T)); *id.* at 3104:18-25 (Bewkes (Time Warner)); *id.* at 3222:4-3223:2 (Stankey (AT&T)). AT&T executive **[**27]** Daniel York testified, for example, that DirecTV has attempted, with limited success (and considerable delay), to obtain such rights from programmers through arm's length-negotiations. *See id.* at 1685:24-1686:22 (York (AT&T)). RCN CEO Jim Holanda joined York in discussing the way in which bargaining friction hindered RCN's negotiations over TV Everywhere rights. *See id.* at 2968:25-2971:14 (Holanda (RCN)). Further, DirecTV Now's affiliate agreements require it to restrict the number of viewers who can stream or access programs simultaneously on its platform. *See id.* at 1687:10-14 (York (AT&T)). And when DirecTV floated the concept of "DirecTV mobile" — a pay-TV subscription exclusively for mobile devices — that was "dead on arrival." *Id.* at 1687:15-25. By contrast, with control over the creation and use of large amounts of original content, SVODs have driven much of the recent innovation in the video programming and distribution industry. *See id.* at 1685:7-13; *id.* at 639:1-8 (Martin (Turner)). These companies have, for example, developed download rights, allowing users to view their content anywhere without wireless access. *See id.* at 1688:16-18 (York (AT&T)).

Second, and relatedly, **[**28]** SVODs' ability to distribute their content directly to consumers over the internet gives them superior access to customer data. SVODs are able to use that customer data to inform their strategy and improve the customer's experience in a number of ways. *See id.* at 3081:21-25 (Bewkes (Time Warner)); *see also id.* at 3388:6-3389:8 (Stephenson (AT&T)). SVODs can use data about viewing habits to determine what programs are popular, and create more of that type of content. *See id.* at 2452:21-2453:3 (Carlton); *id.* at 3245:16-20 (Stankey (AT&T)). In addition, data informs marketing decisions, and allows SVODs to recommend content to users based on their revealed preferences, *i.e.*, the shows they have watched in the past. *See id.* at 3080:19-3081:12 (Bewkes (Time Warner)). Even more, data can inform scheduling choices, and enhance efforts at recapturing consumers who disconnect. *See id.* at 3245:16-20 (Stankey (AT&T)); *id.* at 3081:4-12 (Bewkes (Time Warner)). Finally, **[*174]** and as discussed in more detail below, to the extent SVODs incorporate advertising into their platforms, data allows those ads to be more targeted and thus more lucrative.

2. <u>Declining MVPD Subscriptions Resulting from an Increasingly</u> **[**29]** <u>Competitive Industry Landscape</u>

At trial, witness after witness acknowledged that MVPD subscriptions are on the decline. *See, e.g., id.* at 633:5-15 (Martin (Turner)); *id.* at 891:18-22 (Rigdon (Comcast)); 2229:21-22 (Shapiro); 3369:13-16 (Stankey (AT&T)); *id.* at 3450:15-3451:1 (Stephenson (AT&T)); *see also* PX63-36. Those declines "started faster" than many in the industry anticipated. Tr. 3369:13-16 (Stankey (AT&T)) (discussing the "inflection change" where the "decline of the traditional pay-TV bundle started faster than [AT&T] assumed"). To illustrate, in 2016 AT&T's traditional MVPDs lost 133,000 customers; last year, DirecTV *alone* lost 1.2 million subscribers. *See id.* at 3004:6-8 (Christopher (AT&T)); *id.* at 3450:7-9 (Stephenson (AT&T)).

The decline in traditional MVPD subscriptions is just one symptom of the increasingly competitive nature of the video programming and distribution industry. Indeed, several witnesses testified that competition in the industry is more intense today than ever before. *See, e.g., id.* at 1398:24-25 (Montemagno (Charter)) (video distribution business is "more competitive now than I've ever experienced in my career"); *id.* at 2134:1-3 (Sejen (Cable ONE)) ("Q: **[**30]** In your 31 years in the industry, have you ever seen it more competitive at the distribution level? A: No."); *id.* at 2950:2-6 (Holanda (RCN)) ("Q: And so in the course of this 30 years that you have been in the business, the video distribution market today is more competitive than at any point that you can recall, true? A: True."); *id.* at 3213:9 (Stankey (AT&T)) (competition in industry is "at an all-time high"); *id.* at 2476:1-9 (Carlton) ("new entrants" in market such as "Netflix" are "making the market more competitive").

More specifically, the decline of traditional MVPD subscriptions reflects the growing popularity of virtual MVPDs and SVODs. *See, e.g.*, PX153-3. On that score, two rising trends are worth noting: cord-cutting and cord-shaving. A household "cuts the cord" when it discontinues MVPD services altogether, whether traditional or virtual MVPDs. *See id.* at 605:23-606:4 (Martin (Turner)); *id.* at 2505:10-20 (Carlton). As Professor Carlton relayed, SNL Kagan estimates that roughly twenty percent of American households have cut the cord, discontinuing traditional MVPD services. *Id.* at 2505:12-20. This number, high as it is, continues to grow. *See id.* at 2466:4-10; *see also id.* ***[**31]*** at 891:18-22 (Rigdon (Comcast)); *cf. id.* at 2948:20-2949:3 (Holanda (RCN)). That said, those households have not exited the entertainment field altogether. *See id.* at 3450:2-6, 12-14 (Stephenson (AT&T)). Instead, many have gravitated to vertically integrated SVODs. *See* PX153-3; *see also* Tr. 3449:12-24, 3450:7-12 (Stephenson (AT&T)). Consumers, particularly young people, find SVODs attractive, with their improved user interfaces, premium content, and lower price points. *See, e.g.*, Tr. 639:1-8 (Martin (Turner)); *id.* at 3449:12-18 (Stankey (AT&T)). On a similar note, a household "shaves the cord" when it departs a traditional MVPD for one of the many virtual MVPDs, which, again, typically carry smaller bundles of networks at lower price points. Gov't PFOF ¶¶ 16; Defs.' PFOF ¶ 21. Many other consumers have shaved the cord, reducing, but not eliminating, their consumption of MVPD services. *See, e.g.*, Tr. 606:2-4 (Martin (Turner)). Consumers intent on shaving the cord have an increasing array of virtual MVPD services from which to choose — services that operate nationwide over the **[*175]** internet. *See id.* at 2949:15-18 (Holanda (RCN)). Consumers may choose to subscribe to a less expensive, "skinny **[**32]** bundle," *i.e.*, one with fewer networks, and then supplement that bundle with subscriptions to SVODs like Netflix and Hulu. *Cf id.* at 2984:13-20 (SEALED); *id.* at 3506:24-3507:2 (Stephenson (AT&T)).

Of course, when a household departs a traditional MVPD, whether for an SVOD or a virtual MVPD, that subscriber loss affects the traditional MVPD in the form of lost margins on subscription fees. *See, e.g.*, PX456-56; Tr. 3450:7-14 (Stephenson (AT&T)); *id.* at 2219:13-21 (Shapiro). Such losses may also affect programmers in the form of declining affiliate fee revenues as well as stagnating or declining viewership. *See, e.g., id.* at 3088:22-3089:1 (Bewkes (Time Warner)) (SVODs and other new competitors are "bleeding away our viewers"); PX153-3. Turner, for example, projects that its domestic subscription revenue growth will decrease to low single digits in each year from 2018 to 2022. *See* Tr. 647:3-11 (Martin (Turner)) (discussing Defendants' Exhibit ("DX") 781-21). Increased competition from SVODs also means that more original, high-quality programming is being produced — a trend that increases the costs of securing the talent and rights necessary to make such programming. *See id.* at 1494:15-21, **[**33]** 1495:12-16 (Sutton (HBO)) ("There was a time when very few people were making the kind of shows we make. Now, it seems that almost every week, there's an announcement of somebody else making it. . . . [A]s I've mentioned, Netflix; Hulu makes shows and so does Prime Video. . . . So the cost it takes to make shows, shows like the shows we make, has escalated significantly" because "more people are bidding for the talent involved."); PX153-6; *cf.* Tr. 633:16-18 (Martin (Turner)) ("[T]he number of professionally produced television shows in the United States has doubled in the last five years alone.").[5]

It is therefore no surprise that programmers and distributors alike have noted the competitive threat posed by SVODs. After all, as Nobel laureate Bob Dylan correctly observed: "You don't need a weatherman to know which way the wind blows." *Subterranean Homesick Blues*. At trial, numerous witnesses from defendants testified that SVODs present a broad-range of competitive challenges. *See, e.g.*, Tr. 3088:22-3089:25 (Bewkes (Time Warner)) (over-the-top companies are "bleeding away our viewers, because they're offering competitive video that has these advantages, because they know **[**34]** what to put in front of you individually, and we don't"); *id.* at 3213:3-9, 3214:8-10 (Stankey (AT&T)) ("The time-and-attention competition now from the likes of Facebook, from the likes of Google, from the likes of Netflix . . . . I started asking myself, what should the business do to respond to the changing environment that we've heard about in this courtroom, the dawn of these new services coming from the likes [of] Netflix and Google?"). Third-party witnesses from AT&T's competitor distributors also testified to the role of SVODs in the increasingly competitive industry landscape. *See id.* at **[*176]** 860:24-861:9 (Rigdon (Comcast)) ("[A]n SVOD service like in Netflix provides a wide array of entertainment choices. So people have limited time in the day. So where they're going to spend their time for entertainment in that respect Netflix competes with traditional TV providers."); *id.* at 1395:12-21 (Montemagno (Charter)) (Charter's competitors include "the Googles and the Amazons and the Netflix"); *see also* DX921-35 (DISH "face[s] significant competition" from other companies, including, among others, "Netflix, Hulu, Apple, Amazon, Alphabet . . . .").[6]

---

[5] Although the Government asserts that "consumers of Multichannel Video Distribution are largely insensitive to price changes" as reflected by their continued payment of increased subscription costs, Gov't PFOF ¶ 35, at trial there was near-uniform testimony that "consumers are up to here with subscription prices" and that "it's getting harder and harder" for distributors to pass their increased costs along, Tr. 3089:6-11 (Bewkes (Time Warner)); *id.* at 3446:1-4 (Stephenson (AT&T)). That consumers are at a "gag point" when it comes to traditional MVPD subscription costs is further illustrated by the continued *decline* in subscriptions nationally. *Id.* at 140:13-15 (Fenwick (Cox)); *id.* at 3450:7-9 (Stephenson (AT&T)).

[6] In the face of all that, the Government continues to insist that SVODs are merely "complement[s]" or "adjunct[s]" to traditional MVPDs, rather than competitors of traditional MVPDs; a few of the Government's third-party competitor witnesses testified to the same. Gov't PFOF ¶ 36. I agree with defendants that the Government's arguments (and the corresponding witness testimony) on that score defy reality, as demonstrated by the evidence adduced at trial. The evidence clearly showed that the leading SVODs — as vertically-integrated entities that produce and distribute their own award-winning content - fiercely compete *both* with programmers such as Turner and HBO *and* with traditional MVPDs and virtual MVPDs. Indeed, industry data reflects that large percentages of MVPD customers have chosen to "cut the cord" and receive content exclusively from SVODs. *See supra* pp. 22-24.

To be sure, the Government contends that, notwithstanding the increasing prevalence of SVODs, "[e]ven programmers believe MVPDs are likely to remain highly profitable in the future." Gov't PFOF ¶ 13. That proposition rests on a document from May 2016. *Id.* (citing PX78). As the Court learned at trial, however, the industry has undergone significant changes since mid-2016, diminishing the persuasiveness of that statement and others like it. To take just one example, video programming margins are declining, a fact that presents an obvious threat to future MVPD profitability. Tr. 3853:18-19 (Shapiro) ("I think it is not disputed that the video margins are going down."). And while the Court accepts that traditional MVPDs continue to have a substantial subscriber base, and indeed may currently constitute a distinct submarket, *see infra* pp. 61-66, it is inescapable that SVODs have played a large role in causing the demand for and continued purchase of traditional MVPD subscriptions to "declin[e] at a rapid pace." Tr. 3450:7-3451:1 (Stephenson (AT&T)). To ignore those industry trends — trends that are transforming how consumers view video content and blurring the lines between programming, distribution, and web-based competitors - would be to ignore the Supreme Court's direction to examine this case with an eye toward the "structure, history, and probable future" of

3. Shift Toward Targeted, **[**35]** Digital Advertising

Finally, and again as a result of the rising influence of innovative, web-based competitors, the advertising landscape has shifted away from reliance on television advertising offered by programmers to highly-targeted digital advertising. *See* Tr. 3088:3-6 (Bewkes (Time Warner)) (noting that advertisers are shifting their "ad budgets, which are finite, to the digital platforms at Google and Facebook" and "away from television advertising in general"); PX456-56 ("The advantages of digital advertising . . . have resulted in advertisers shifting more of their advertising budgets from traditional television advertising to digital advertising."). The share of U.S. spending on digital advertising exceeded spending on television advertising in 2016. *See* DX746A-2; Tr. 3092:15-19 (Bewkes (Time Warner)). Digital advertising revenue is expected to further eclipse television advertising revenue in the coming years. *See* Tr. 3092:22-3093:1 (Bewkes (Time Warner)).

Why the rush from television ads to digital ones? Simply put, digital ads are more efficient. Through their access to and use of consumer data, Google and Facebook **[*177]** are better able to discern the purchasing preferences and **[**36]** interests of individuals viewing particular online content. *See id.* at 623:2-13 (Martin (Turner)); *id.* at 3087:16-3088:2 (Bewkes (Time Warner)); *id.* at 3243:5-10 (Stankey (AT&T)). They can use that information to infer what types of ads would most interest those users. *See id.* at 3087:16-3088:2 (Bewkes (Time Warner)). And they can tailor digital advertisements to those users based on those preferences. *See id.* at 623:8-13 (Martin (Turner)). Best of all from an advertiser's perspective, Google, Facebook, and other entities engaged in digital advertising have confirmatory data that demonstrates whether particular ads were effective. *See id.* at 623:14-22.

Although traditional programmers like Turner maintain "massive inventories of advertising," they lack the type of fine-grained data necessary to generate targeted ads. *Id.* at 3392:10-13 (Stephenson (AT&T)). Under the "spray and pray" approach, programmers instead sell ads based on "broad demographic data" about the viewers of a particular program. *Id.* at 3760:20-24 (Athey). As a result, consumers regularly see ads for things that do not interest them, and advertisers pay to show ads that they know will be ineffective in motivating many **[**37]** in the audience. *See id.* at 3087:1-8 (Bewkes (Time Warner)). As Turner CEO John Martin put it, "there's been a long saying in the advertising industry where the advertiser would always say, I know I'm wasting half of my money, I just don't know which half." *Id.* at 685:20-23 (Martin (Turner)).

The shift toward digital advertising has been extremely profitable for the tech giants — Google and Facebook, in particular. Indeed, those two entities account for roughly 60% of U.S. digital advertising. *See id.* at 3746:16-22 (Athey). And they are growing at a rapid pace: Google's advertising revenue has "almost tripl[ed]" between 2012 and 2017, while Facebook's advertising revenue went from $4 to $40 billion in the same period. *Id.* at 3097:2-11 (Bewkes (Time Warner)) (discussing DXD122).

By contrast, the rise of digital advertising has been costly to Turner and other programmers that rely on television advertising as a major source of revenue. *See id.* at 3088:3-21; *cf.* PX456-25. In 2017, for example, Turner's advertising revenue *declined* by 2% relative to the previous year. *See* Defs.' PFOF ¶ 31 (citing PX456-65); Tr. 3097:14-20 (Bewkes (Time Warner)). In light of the dual-revenue-stream business **[**38]** model of programmers, witnesses testified that declines in television advertising revenue will produce a predictable result: it will place more pressure on affiliate fees, meaning that programmers will increase the fees charged for their content. *See, e.g.*, Tr. 3088:16-21 (Bewkes (Time Warner)). For that reason, Jeff Bewkes, CEO of Time Warner, explained that the explosion of digital advertising is "actually bad for" video distribution consumers, "because it means that the financial support for all this programming on all these different channels gets pushed over toward subscription prices. And that's a problem, because we think consumers are up to here with subscription prices." *Id.* at 3089:6-11.

II. The Parties and Proposed Merger

---

this fast-changing industry. *United States v. Gen. Dynamics Corp., 415 U.S. 486, 498, 94 S. Ct. 1186, 39 L. Ed. 2d 530 (1974)* (internal quotation marks omitted). I, of course, cannot do that !

A. AT&T

AT&T is a "leading provider of communications and digital entertainment services in the United States and the world." PX455-7. As a distribution company, AT&T is in what its Chairman and CEO Randall Stephenson calls "the connectivity business." Tr. 3378:23-24 (Stephenson (AT&T)). Although originally known for its "voice telephone" service, AT&T also provides wireless service, broadband service, **[*178]** and pay-TV service to consumers. *See id.* at 3377:23-25, **[**39]** 3379:12-15. AT&T, however, does not create any significant television or movie content. *See id.* at 3245:24-25 (Stankey (AT&T)).

AT&T has two traditional MVPD products: DirecTV and U-verse. Defs.' PFOF ¶ 34. DirecTV, acquired by AT&T in 2015, is a "satellite-based MVPD service that operates by transmitting programming from satellites to rooftop dishes installed at the customers' homes." *Id.*; *see* Tr. 3206:21-22, 3207:21-23 (Stankey (AT&T)); PX455-11 to 12. U-verse, by contrast, is a "telco" MVPD service that operates "[o]ver the same line that [] deliver[s] your telephone service." *Id.* at 3384:1-2 (Stephenson (AT&T)); Defs.' PFOF ¶ 34. Between DirecTV and U-verse, AT&T has approximately 25 million video distribution subscribers today, making it the largest provider of traditional MVPD services. *See* PX455-11; Tr. 3384:13-14 (Stephenson (AT&T)).

Despite that substantial traditional MVPD subscriber base, AT&T witnesses testified that they believe the company's future lies in the use of online and mobile wireless connections to access premium video. As John Stankey, the AT&T executive who will be tasked with running Time Warner should the merger proceed, explained, AT&T acquired DirecTV in **[**40]** 2015 not in an effort to double down on the satellite business — a concededly mature and indeed declining asset — but to "pick up a lot of new customers that we could work on migrating" to new, innovative products necessary to compete in the future. Tr. 3207:18-3208:2, 3209:4-7 (Stankey (AT&T)). In late 2016, AT&T launched one such product, DirecTV Now. *See, e.g., id.* at 1824:23-24 (Merrill). DirecTV Now is a virtual MVPD and, as such, carries fewer channels than DirecTV or other traditional MVPDs; is offered at a lower price-point; and is delivered over the internet. *See id.* at 1825:1-3; *id.* at 3385:5-3386:10 (Stephenson (AT&T)). Today, and in large part due to significant promotional efforts and high-level support for the product's launch, DirecTV Now has grown to more than one million subscribers. *See id.* at 3386:2-3 (Stephenson (AT&T)); *id.* at 1825:12-1826:8, 1827:18-1828:2 (Merrill (AT&T)).

AT&T Chairman and CEO Randall Stephenson testified that DirecTV Now plays to AT&T's strong suit, namely its 100-million plus wireless subscriber base. *See id.* at 3379:19-20, 3385:9-14 (Stephenson (AT&T)). With customers increasingly turning to cell phone and mobile devices to access video content, **[**41]** fully "[h]alf of the volume on [AT&T's] network is video." *Id.* at 3382:5-6. Stankey noted that AT&T welcomes this trend, as it results in users purchasing larger data plans and acquiring more devices. *See id.* at 3254:15-22 (Stankey (AT&T)). AT&T's next major initiative, fifth generation or "5G" wireless, is calculated to increase video consumption even more. *See id.* at 3383:3-14 (Stephenson (AT&T)). As Stephenson explained to the Court, "[w]hat we're all working towards is creating [$]35 and $15 bundles. And that's where the world is moving . . . *Id.* at 3506:23-25. To that end, Stephenson continued, AT&T has plans to launch a new product called AT&T Watch, through which customers will be able to receive "real skinny bundle[s]" of programming for $15 per month or, in the case of "AT&T wireless unlimited customer[s,] . . . for free." *Id.* at 3434:12-3435:4.

B. Time Warner

Time Warner, by contrast, is in the entertainment business. It has three distinct units: Warner Bros., Turner, and HBO. *See* PX459-18 (Turner), -22 (HBO), -24 (Warner Bros.). Turner operates, among other things, ten linear cable networks **[*179]** that televise scheduled video programming around the clock. *See id.* at 18; Defs.' PFOF ¶ 7.[7] **[**42]** HBO is a premium, subscription-based video service that offers movie and television shows, including a

---

[7] Those networks are TNT, TBS, CNN, CNN Español, CNN International, Cartoon Network/Adult Swim, TruTV, TCM, Boomerang, and HLN. *See* Defs.' PFOF ¶ 7.

significant amount of original content. *See* PX459-22. Unlike Turner, which collects both programming fees and advertising revenue, HBO relies solely on subscription payments to operate. *See id.* at 23; PX456-67; *compare* Tr. 604:21-23 (Martin (Turner)), *with id.* at 1450:12-17, 1493:15-17 (Sutton (HBO)). Warner Bros. operates a studio that creates movies, television programs, and other kinds of video content that are licensed both to Time Warner's other businesses and to third parties. *See* PX459-24.

The Government's claims in this case implicate Turner and HBO. Those business units are therefore discussed in more detail below.

1. Turner Networks

The Turner networks are central to the Government's primary theory of harm, and thus warrant the greatest attention here. Turner's business model is simple: distribute its content as broadly as possible in order to maximize the dual income streams of affiliate fees and advertising revenue. *See* Tr. 3078:17-20 (Bewkes (Time Warner)). Historically, Turner has relied on unaffiliated third parties to distribute its content to consumers. *See id.* at 485:1-18, 612:3-4 (Martin (Turner)). Those include traditional MVPDs, such as cable companies and satellite companies. *See id.* at 485:1-18. In recent years, Turner has distributed its content to consumers through virtual MVPDs as well. *See id.* at 485:19-486:6; Gov't Post-Tr. Br. 6.

Industry participants view Turner content as popular and valuable, primarily for Turner's broadcast rights to live sports and for CNN's live news. **[**43]** *See, e.g.*, Tr. 2112:24-2113:12 (Sejen (Cable ONE)) (agreeing that "sports programming" is "[t]he only thing that was unique" to TBS and TNT); *id.* at 245:7-23 (describing TBS and TNT's "important sports" and CNN's "news"). CNN is the second-rated news network, and a top-seven ranked network by viewership. PX8-35; Tr. 717:5-8 (Hinson (Cox)). In the sports domain, Turner has long-term contract rights to show portions of NCAA March Madness, the NBA Playoffs, and certain games of the Major League Baseball Playoffs. *See* PX8-35; Tr. 533:3-12 (Martin (Turner)); *see generally* Gov't PFOF ¶¶ 82-86, 88 (reviewing Turner's sports rights). TBS and TNT are "by far and away" the two most popular Turner networks due to their sports content. Tr. 471:17-20 (Martin (Turner)). Not surprisingly perhaps, TBS and TNT rank in the top ten most profitable cable networks. *Id.* at 471:21-24; *see also* Gov't PFOF ¶¶ 25, 27.

Reflecting that popularity, Turner enjoyed rate increases from every major MVPD in the last five years. *See* Tr. 998:20-22 (Breland (Turner)); *see also* Gov't PFOF ¶ 97. Turner executives testified that those rate hikes were due in part to a multi-year plan to "catch up" to competitors' price increases **[**44]** after years of below-market increases. Tr. 644:1-18 (Martin (Turner)). As such, Turner projects that its rate increases will slow to the low single digits from 2018 to 2022. *See id.* at 647:3-11 (discussing DX781). That slowing rate-increase trend is consistent with Turner's declining viewership numbers. *See id.* at 2458:5-8, 22-24 (Carlton); *see also* PX153-3 to -4; PX456-22. Turner networks account for only 8% of pay-TV viewership, down from 10% in 2011. *See* Tr. 2458:22-24 (Carlton) (discussing DXD109). **[*180]** When internet-based distribution is added to the mix, Turner's share shrinks to 6% of viewership for 2017. *See id.* at 2458:13-15.

The growth in digital advertising has also posed a particular challenge for Turner. Today, "advanced advertising" makes up less than 5% of Turner's ad revenue — and it shows. *Id.* at 680:4-7 (Martin (Turner)). Turner's ad revenues have flatlined. *See* PX456-65. This is because, as a "stuck in the middle wholesaler," Turner for the most part lacks customer relationships, which supply critical data concerning consumer preferences — data that can be used to tailor advertisements to the end user. *See* Tr. 641:13-25 (Martin (Turner)); *id.* at 3087:16-3088:2 (Bewkes **[**45]** (Time Warner)). Without such data, Turner cannot tailor ads to particular consumers, making its ads less valuable than those carried on Google or Facebook. *See id.* at 623:5-16 (Martin (Turner)); *cf. id.* at 3771:12-23 (Athey).

At trial, the Court learned that Turner has attempted workarounds to improve its data and sharpen its advertisements. Turner has tried, for example, to purchase data from third parties, but that data was not sufficiently granular. *See, e.g., id.* at 3100:2-4 (Bewkes (Time Warner)). Time Warner also considered buying technology companies, but concluded that the companies' data was insufficient, and came without any guarantee of long-term access. *See id.* 3102:9-3103:6. Finally, Turner has attempted to obtain rights to customer information through affiliate negotiations. *See id.* at 3100:16-22; *cf. id.* at 92:19-24 (Fenwick (Cox)). The record reflects, however, that such efforts generally have been unsuccessful due to the bargaining friction of hotly contested affiliate negotiations and the fact that distributors consider their customer data proprietary. *Id.* at 955:10-18 (SEALED); *cf. id.* at 1022:2-20 (Breland (Turner)); Defs.' PFOF ¶ 16.[8]

In an effort to break **[**46]** out of its "trapped wholesaler" role, Turner has made recent efforts to launch its own direct-to-consumer content offerings. The most notable of those offerings are Film Struck, Boomerang, and Bleacher Report Live. *See* Tr. 588:8-16, 666:10-12 (Martin (Turner)). FilmStruck, which allows viewers to access classic movies as well as independent films, has approximately 100,000 subscribers; Boomerang, which offers a library of children's content and cartoons, has around 150,000 subscribers. Defs.' PFOF ¶ 15. Those figures are of course microscopic in comparison to Netflix's 125 million subscribers and Amazon's 100 million Prime subscribers with access to video content. *See* Tr. at 3099:6-12 (Bewkes (Time Warner)); *id.* at 3389:22-25 (Stephenson (AT&T)).[9]

2. HBO

HBO has a different business model than Turner. As a premium network, HBO offers high-quality programming that is supported by subscriber fees rather than advertising. Tr. 1450:12-17 (Sutton (HBO)); *see also* PX456-67. Indeed, HBO has no advertising inventory at all. *Id.* In addition, and unlike the Turner networks, which appear in base cable or satellite **[*181]** packages, HBO is typically an "add-on." *Id.* at 3073:14-15 (Bewkes (Time Warner)); **[**47]** *see id.* at 1451:16-18 (Sutton (HBO)).[10] HBO offers popular movies and television shows, including a significant amount of original content. *See* PX459-22.

Without advertising, HBO's business model is even more reliant on broad distribution: "the more, the better," according to Time Warner CEO Jeff Bewkes. Tr. 3070:3-8 (Bewkes (Time Warner)). HBO content reaches consumers in four ways: (i) through MVPDs; (ii) through virtual MVPDs; (iii) through SVODs; and (iv) through HBO's proprietary over-the-top product, HBO Now. *Id.* at 1494:1-8, 1451:13-23 (Sutton (HBO)). In each case, the end-customer accesses HBO by way of a distributor — even for HBO Now, which is sold by digital distributors like Apple and Amazon. *See id.* at 1491:6-11. As with Turner, the fact that HBO relies on third parties to distribute its programming means that Time Warner lacks critical data about the preferences and viewing habits of HBO's subscribers. *See id.* at 3084:14-24, 3098:13-16 (Bewkes (Time Warner)).

HBO faces an array of competitors in the field of premium content creation and programming. There are premium television networks, like Showtime, Starz, and Epix, and online offerings, such as Netflix, **[**48]** Amazon Prime, and Hulu. *See id.* at 1492:20-23 (Sutton (HBO)). What's more, Disney has launched, and Apple appears poised to launch, a premium, direct-to-consumer service. *See id.* at 1492:22-24; *id.* at 1396:21-25 (Montemagno (Charter)). All of those rivals feature high-quality, premium content, and thus compete directly with HBO. *See, e.g., id.* at 1494:16-23 (Sutton (HBO)). Indeed, Netflix's programming budget alone is more than twice the size of HBO's. *Id.* at 3099:13-15 (Bewkes (Time Warner)).

In this highly competitive environment, and lacking direct relationships with its viewers, HBO "[a]bsolutely" depends on MVPD promotions to maximize its distribution. *Id.* at 1496:16-17 (Sutton (HBO)); *cf. id.* at 1528:25-1529:4 (Patel

---

[8] Turner has been able to negotiate for the rights to *limited* data from Hulu's and YouTube's virtual MVPDs. *See* Gov't PFOF ¶ 336. As relevant here, however, that data relates only to the viewing patterns of those who view Time Warner content. That is a limited picture, as such data does not allow Turner to discern what its viewers are watching on competing channels, which could help develop a fuller picture of viewer preferences. Tr. 3101:13-22 (Bewkes (Time Warner)).

[9] Turner's Lilliputian direct-to-consumer subscriber numbers, on their face, discredit the Government's assertion that "Turner is also not the 'trapped wholesaler' it claims to be." Gov't PFOF ¶ 30.

[10] The Government states that "pay-TV packages include linear TV programming, on-demand content, and typically premium channels *like HBO*." Gov't PFOF ¶ 12 (emphasis added). However, no matter how many premium channels "like HBO" may be available on such packages, HBO itself has historically had only a 30% national penetration rate. *See* Tr. 1529:16-17 (Patel (AT&T)); *id.* at 3073:22-23 (Bewke s (Time Warner)).

(AT&T)). As HBO President Simon Sutton explained, "our whole business is relying on our affiliates to promote us. If we can't do that, then our entire business model is destroyed." *Id.* at 1508:14-16 (Sutton (HBO)). For that reason, HBO seeks to structure its affiliate agreements so as to "incent" distributors to maximize HBO's distribution. *Id.* at 1456:8-10. Specifically, as distributors add HBO subscribers, "they generally pay less on the increment." *Id.* at 1455:18-19. **[**49]**

C. The Proposed Merger

On October 22, 2016, AT&T announced its plan to acquire Time Warner. Answer 18 [Dkt. # 20]. Inclusive of debt, the transaction is valued at approximately $108 billion. *Id.*

At trial, the evidence showed that defendants view the proposed merger as an essential response to the industry dynamics described above — that is, the increasing importance of web- and mobile-based content offerings; the explosion in targeted, digital advertising; and the limitations attendant with AT&T's and Time Warner's respective business models. *See generally* Defs.' PFOF ¶¶ 49-62 (discussing various proconsumer rationales for the proposed merger). The proposed merger would do so, defendants' executives asserted, **[*182]** through vertical integration of the companies' complementary assets: Time Warner's popular content and significant advertising inventory, and AT&T's consumer relationships, customer data, and large wireless business.

As a traditional programmer, Time Warner generally lacks access to valuable information about its viewers — it is, as mentioned, akin to a "stuck in the middle wholesaler." Tr. 641:13-25 (Martin (Turner)). That is because it is the video distributors — not Turner — that **[**50]** own the customer relationships and, therefore, the customer data. *See supra* pp. 20, 25-28. Although Time Warner has "massive inventories of advertising," it does not "know who the customer is. . . . They don't know who they are, they don't know what they're watching." *Id.* at 3392:10-13 (Stephenson (AT&T)). Without information about who its customers are and what their content preferences may be, Time Warner is disadvantaged vis-à-vis SVODs, such as Netflix Hulu, and Amazon Prime, and web companies, such as Facebook and Google, when it comes to its ability to cater programming or advertisements to viewers. *See supra* pp. 20, 25-28. As AT&T CEO Randall Stephenson explained, without consumer relationships and access to data, Time Warner's "large load of advertising inventory [is] being under utilized." Tr. at 3394:1-2 (Stephenson (AT&T)); *see also id.* at 3771:12-23 (Athey) (confirming that AT&T's digital, data-driven advertising prices are 60% higher than Nielsen-based ads because the former have "finer demographics that are offered for targeting").

As a video distributor, AT&T generally lacks control over the video content it offers. *See id.* at 3219:1-3 (Stankey (AT&T)) ("What we don't have is, we didn't have programming. **[**51]** We didn't have the flexibility to change the product, and that's what the guys on the other side had."). AT&T also has access to only limited advertising inventory. *Cf. id.* at 3393:1-11 (Stephenson (AT&T)); *id.* at 609:23-610:4 (Martin (Turner)). When AT&T seeks to negotiate with programmers for rights to provide or experiment with innovative content offerings, it typically encounters significant bargaining friction that renders those efforts unsuccessful. *See supra* pp. 19-20.

By acquiring Time Warner, AT&T executives testified, the company will immediately gain access to high-quality content and an extensive advertising inventory. *See* Tr. 3408:3-10 (Stephenson (AT&T)). Using its wireless network, AT&T intends to distribute Time Warner content through mobile devices. With such strong industry tailwinds in favor of mobile video consumption, this strategy will increase viewership, making Time Warner content "worth far more." *Id.* at 3393:24-25; *cf.* 891:23-25 (Rigdon (Comcast)) (confirming "increasing trend in the consumption of video over mobile devices"). At the same time, AT&T will bring to bear its consumer relationships and data to begin to tailor Time Warner's advertising and increase its value. **[**52]** *See id.* at 3394:3-18 (Stephenson (AT&T)).

As the Government concedes, that access will inure right away to the benefit of AT&T's current video distribution subscribers. In particular, the Government's own expert predicts that, due to a standard benefit of vertical integration, AT&T's DirecTV and U-verse customers will pay a total of about $350 million less per year for their video distribution services. *See infra* pp. 66-68. AT&T executives testified about the other efficiencies that would redound to the benefit of AT&T subscribers should the merger be approved. Of most relevance here, with the Time

Warner assets, and without the interference of bargaining friction, AT&T **[*183]** will be able to deliver content to its customers in more innovative ways. The merged entity could, for instance, gather and edit individual news clips from CNN throughout the day — all tailored to a given user's interests — and deliver that news to the wireless customer for viewing on his or her fifteen-minute break. *See* Tr. 3220:21-3221:9 (Stankey (AT&T)). According to AT&T executive John Stankey, that opportunity represents "a new customer at a new moment doing something that wasn't being done otherwise." *Id.* at 3221:13-14. Stankey **[**53]** testified that the absence of bargaining friction will also enable AT&T and Time Warner to pursue broader introduction of new technologies, such as "4K" high-resolution programming. *See id.* at 3222:4-22.

AT&T will also, with their customers' permission, use consumer data to develop targeted ads, thereby increasing the value of Time Warner's ad inventory. *See id.* at 3391:12-22, 3393:4-9 (Stephenson (AT&T)). AT&T witnesses testified that, in their view, the Time Warner ad inventory is of sufficient scale to warrant the development of a "programmatic advertising platform" through which AT&T can deploy its data to create a marketplace of data-informed advertising inventory for use by Time Warner and third-party programmers alike. *Id.* at 3243:14-3244:8 (Stankey (AT&T)). At the same time, new, tailored forms of mobile content delivery — like the CNN clips teased above — will create additional advertising opportunities. *See id.* at 3221:10-11. Those opportunities, Time Warner and AT&T witnesses testified, will lead to higher ad revenues that will alleviate pressure on the programming side and lower the price of video distribution to consumers. All of those steps, defendants asserted, will allow **[**54]** AT&T to imitate the highly successful, data-driven entities in the video programming and distribution and advertising markets.

In addition, ownership of Time Warner content will allow AT&T to more efficiently pursue what it sees as the future of the video programming and distribution industry: increased delivery of content via mobile devices, such as cell phones. *See id.* at 3381:24-3382:2, 3393:13-25 (Stephenson (AT&T)). AT&T's vast wireless business — a business that, if taken separately, "would be number 37 in the Fortune 500" — has over 100 million subscribers. *Id.* at 3379:20-24; *see id.* at 3208:21-23 (Stankey (AT&T)). AT&T executives testified about their vision for using those wireless connections to "transform the way we deliver video to customers, [to] make the video far more portable." *Id.* at 3208:20-22 (Stankey (AT&T)); *see id.* at 3393:13-25 (Stephenson (AT&T)). To sum it up, in the words of AT&T Chairman and CEO Randall Stephenson, defendants view the proposed merger as a "vision deal" reflecting a belief "that distribution of [Time Warner's] content to wireless will drive the value of the content up," and that "the ability to pair our data with [Time Warner's] advertising **[**55]** inventory will drive value." *Id.* at 3402:24-3403:6.

III. Procedural History

A. The Investigation

Following the announcement of the deal in October 2016, the Department of Justice's Antitrust Division conducted an investigation of the proposed merger's competitive effects. Defs.' PFOF ¶ 2. The investigation lasted more than one year. *Id.* During that investigatory phase, the Government took approximately 20 depositions and received roughly 25 *million* pages of documents. Despite the investigation's vast scale and obvious importance, defendants had scarce visibility into the process. They could not access the Government's materials during the course of the investigation. *See* 12/21/18 Hr'g Tr. 12:1-12 [Dkt. # 56]. Nor could **[*184]** they attend, let alone ask questions during, the depositions that took place during the investigation. *See id.*

B. Pretrial Proceedings

1. The Complaint

On November 20, 2017, the Government, acting through the Department of Justice, filed this lawsuit against AT&T, DirecTV, and Time Warner to enjoin the proposed merger under *Section 7* of the Clayton Act, *15 U.S.C. § 18*. *See* Compl. ¶ 48. Thirty-seven members of the Department of Justice, including Assistant Attorney General for Antitrust

Makan Delrahim, **[**56]** signed the Complaint. *Id.* at 23. In its prayer for relief, the Government asked that defendants AT&T and Time Warner "be permanently enjoined from carrying out the proposed merger and related transactions" or "carrying out any other agreement, understanding, or plan by which AT&T would acquire control over Time Warner or any of its assets; or merging." *Id. ¶ 48*.

2. Turner's Arbitration Commitment

About one week after the Government filed its Complaint, Turner sent a letter and an accompanying list of terms and conditions to approximately 1,000 video distributors. *See, e.g.*, PX490; PX491; Tr. 1181:11-16 (Warren (Turner)). In the letter, Turner represented that it was "irrevocably offering to you this agreement to engage in AAA arbitration, subject to the conditions below." PX490. "This agreement," the letter continued, "also provides you with the right to continued carriage of the Turner Networks . . . pending the arbitration in the event of a failure to agree upon renewal terms." *Id.* The agreement specifies that once arbitration is invoked by a distributor, Turner must continue to provide carriage on the same terms and conditions in effect at the expiration of its existing contract with the distributor, **[**57]** subject to the right to receive a "true-up" — make-up payments, in essence — based on the arbitrator's award. PX491-3 to -4, §§ B.1-.3. In other words, the commitment guarantees that no blackout of Turner content can occur once arbitration is invoked. *See, e.g.*, Tr. 2653:21-23 (Katz). The proposed arbitration agreement incorporates by reference the choice-of-law provisions in the underlying affiliate agreements. PX491-2, ¶ 7.

3. Pre-Discovery Timeline

Defendants filed their answer on November 28, 2017. *See generally* Answer. AT&T and Time Warner also announced that they had agreed to extend the merger agreement through April 22, 2018. *See* PX456-2. Defendants swiftly moved for a trial date and, along with the Government, for a protective order. *See* Defs.' Mot. to Set Trial Date [Dkt. # 22]; Defs.' Mot. to Enter Protective Order [Dkt. # 23]; Pl.'s Mot. to Enter Protective Order [Dkt. # 24]. On December 8, 2017, I issued a protective order governing the designation and use of confidential information. *See* Protective Order [Dkt. # 37]. On December 21, 2017, I issued a Case Management Order ("CMO") [Dkt. # 54] and Scheduling Order [Dkt. # 55], which, among other things, set the trial for March **[**58]** 19, 2018 and stated that there would be no dispositive motions. That same day, to allow for the possibility of the March 19, 2018 trial and the ruling to follow, AT&T and Time Warner extended yet again the drop-dead date of the merger from April 22, 2018 to June 21, 2018. *See* PX456-2. If the deal is not consummated by then, the merger agreement specifies that AT&T will be required to pay Time Warner a break-up fee of $500 million. *See* PX451-87. In the event of a favorable judgment, defendants agreed "not to consummate or otherwise complete the challenged acquisition until 12:01a.m. on the sixth calendar day following entry of such judgment." CMO ¶ 3.

4. Discovery

Given the stakes and the June 21, 2018 drop-dead merger deadline, the parties **[*185]** proceeded through discovery on an expedited basis. Fact discovery began in late December, and concluded in mid-February. The Government began producing third-party documents collected during the investigation to defendants before the New Year. The parties exchanged preliminary fact witness lists in early January, and final fact witness lists one month later. They spent the intervening time on a forced march of depositions. The exchange of initial expert **[**59]** reports took place in early February, with rebuttal reports due at the end of that month. Supplemental discovery closed on February 28, 2018, and expert discovery did so on March 9, 2018. The Scheduling Order set additional deadlines for pre-trial motions, *Daubert* motions, and pre-trial submission of final exhibit lists, just before the March 19 start date for trial.

I provided detailed prescriptions concerning discovery in this compressed time period. The CMO limited each side's final trial witness list to 30 fact witnesses. CMO ¶ 12. The Government and defendants each had a maximum of 15 interrogatories and seven requests for admission. *Id.* ¶ 14(d), (e). The CMO restricted each side to 150 hours of party-depositions, plus 100 hours of non-party depositions. *Id. ¶ 16*. The CMO did not preclude the taking of a deposition of someone already deposed during the investigation phase. *Id.* There were no limits on the number of requests for production. *Id.* ¶ 14(a).

The parties achieved herculean feats during that time. Beyond the 25 million pages of documents produced during the Government's investigation, an additional 7.5 million pages of documents were produced during discovery. 2/2/18 Hr'g **[**60]** Tr. 13:10-13 [Dkt. # 66]. Dozens of third parties received *Rule 45* subpoenas. *See* 1/5/18 Hr'g Tr. 7:18-21 [Dkt. # 61]. The Government noticed more than 40 depositions of defendants' witnesses. *Id.* at 9:13-15.

5. Discovery Disputes

Rather than appointing a special master to handle discovery related issues, I relied upon the seasoned counsel on both sides of this case to work together to resolve discovery disputes as they arose. Although counsel generally were successful in doing so, two notable pre-trial issues were brought to this Court for resolution. The first, which arose in mid-January, concerned the disclosure of third-party data collected in prior Government investigations and still in the Government's possession. The second flash point, which took place closer to trial, involved discovery requests in support of defendants' selective prosecution claim.

In a January 18, 2018 letter and during a status hearing held the next day, defendants raised an issue related to the production of historical video programming pricing data in Government files — data that the Government had apparently obtained via prior merger investigations. *See* 1/19/18 Hr'g Tr. 6:14-9:23 [Dkt. # 63]. To that point, the **[**61]** Government had resisted defendants' production requests, arguing that the *Antitrust Civil Process Act*, *15 U.S.C. § 1313*, required it to obtain consent from each of the third parties that originally had produced the information in question. *See id.* at 13:14-15. No third party had given consent, the Government continued; nor did those parties continue to possess some or all of the requested information due to the passage of time since those earlier investigations. *See id.* at 7:12-16, 8:17-20, 15:19-25.

Stuck in a seeming game of document "hot potato," defendants asked this Court to direct the Government to provide copies of the pricing data to the third parties that originally produced it. *Id.* at 16:11, 18:23-25. Such an order would in turn enable defendants to subpoena the information directly from the third parties. Following oral argument on the issue, I ordered the **[*186]** Government to seek consent from the relevant third parties and to produce the requested information to those third parties by a date certain, 1/22/18 Order [Dkt. # 62]. The Government complied with this Order and defendants apparently were able to obtain the pricing data at issue. 2/2/18 Hr'g Tr. 6:2-5.

The case sailed along until mid-February, **[**62]** when the parties raised an issue related to defendants' contemplated motion for discovery on their "selective enforcement" claim and their attendant inclusion of Assistant Attorney General Makan Delrahim on their trial witness list. The Court held a hearing and heard oral argument on that dispute. *See generally* 2/16/18 Hr'g Tr. [Dkt. # 67]. In that hearing, defendants made an oral motion to compel production of privilege logs relating to their selective enforcement defense. *See id.* at 22:17-23. The Government, for its part, made an oral motion to strike defendants outstanding discovery and interrogatory requests for logs listing (i) all written communications about the proposed merger between the White House and the Attorney General's Office, (ii) all written communications about the White House's views of the proposed merger between the Attorney General's Office and the Antitrust Division, and (iii) all oral communications about the proposed merger between the White House and the Antitrust Division. *See id.* at 46:8-20, 54:13-55:14. During the hearing, defendants agreed to strike Mr. Delrahim from their witness list subject to the right to call him at trial for good cause. *Id.* at 36:17-37:4. **[**63]** A few days later, after considering the parties' arguments at the hearing, I issued a Memorandum Opinion denying defendants' oral motion to compel and granting the Government's oral motion to strike. 2/20/18 Mem. Op. & Order 6 [Dkt. # 68]. As set out more thoroughly in that opinion, I concluded that defendants had failed to meet the rigorous standard for obtaining discovery on their selective enforcement defense. *See id.* at 4.

6. Evidentiary Disputes

As with most trials featuring large volumes of documentary evidence, evidentiary issues were heavily litigated in this case. Indeed, I set aside the first two days of the trial to address evidentiary issues. Not surprisingly, each side vacillated between arguing for exclusion of documents as prejudicial or irrelevant, on the one hand, or for admission of documents because such concerns are inapplicable in bench trials, on the other. While keenly aware of the principles governing evidentiary rulings in bench trials, in this case. I did not have the luxury of blanketly admitting a mass of documentary evidence and sorting through it after trial.[11] The compressed timeline and novel, complicated nature of the case instead necessitated that I make individualized **[**64]** rulings on relevance and admissibility. *Cf.* Manual for Complex Litigation § 12.5.

For this reason, I generally instructed the parties to seek admission of documents through sponsoring witnesses, in order to facilitate determinations of relevancy or to establish the foundation necessary for nonhearsay or hearsay exceptions.[12] Witnesses would be able to contextualize and explain the technical and lengthy documents at **[*187]** issue, which might otherwise be misunderstood or selectively cited in post-trial briefs. As such, I instructed the parties to introduce documents through sponsoring witnesses, recognizing that doing so would extend, somewhat, the length of the trial. In the end, the parties agreed to abide by that approach. *See, e.g.*, 3/19/18 Hr'g Tr. 6:17-22 (afternoon session) (Government agrees to "add[] some additional witness and [to] talk[] with the defendants about that with regard to sponsorship issues").[13]

C. The Trial

The trial began on March 19, 2018 and ended with closing arguments on April 30, 2018.[14] Over that period, there were 23 days of proceedings.

The Government called 20 fact witnesses and two expert witnesses in its case-in-chief. Of the fact witnesses, 11 were employees of defendants, and 9 were **[**65]** employees of third parties. The Government's chief economic expert was Professor Carl Shapiro. Professor Shapiro is a Ph.D. industrial economist who currently holds a professorship at the University of California, Berkeley. Professor Shapiro has served in various positions in the federal government, including most recently as Deputy Assistant Attorney General for Economics at the Antitrust Division in 2009 through 2011 and as a member of the President's Council of Economic Advisers in 2011 and 2012. He has testified in a number of antitrust matters, including several antitrust trials in our Circuit. The Government also called Professor John Hauser from the Massachusetts Institute of Technology to testify about a survey he designed and performed and on which the Government relies.

For their part, defendants called three expert and three fact witnesses. Chief among their experts was University of Chicago Professor Dennis Carlton, who provided rebuttal testimony to Professor Shapiro. Professor Carlton has served as an economics professor within the University of Chicago since 1976, teaching in the economics department, business school, and the law school. Like Professor Shapiro, Professor **[**66]** Carlton is a seasoned expert witness who himself has served as Deputy Assistant Attorney General for Economics at the Antitrust Division

---

[11] Nor did defendants broadly stipulate to the admission of the Government's proffered documentary evidence, as defendants seem to have done in recent antitrust cases in our Circuit. The parties also did not introduce their experts' reports into evidence; instead, they rested on the experts' trial testimony.

[12] There was not a uniform rule mandating sponsorship of documents by witnesses. I took judicial notice, for example, of certain statements made by DirecTV and AT&T before the FCC without sponsoring witnesses. *See* Tr. 3966:5-3967:22. In the same way, I was mindful that some documents, such as a slide presentation known at trial as "version 41," would not constitute hearsay, as they were introduced to establish the intent of the parties, rather than for the truth of the matter asserted.

[13] Negotiations between the parties further winnowed the evidentiary disputes. *See, e.g.*, 3/19/18 Hr'g Tr., PDF at p. 7 (morning session). The parties also heeded warnings from the Court during initial evidentiary hearings as to the likely inadmissibility of certain documents. For instance, after a warning as to the likely admissibility of newspaper clippings, defendants did not seek admission of those documents at trial. *See* 3/20/18 Hr'g Tr. 5:16-20 (afternoon session) (advising defendants that the Court "usually [does not] allow news articles [to be] introduced into evidence. I'll wait to see what you've got ... but I'm giving you fair notice here").

[14] On March 9, 2018, the parties each filed a brief, laying out their theories of the case. [Dkt. ## 75, 76, 77]. On March 13, 2018, the parties filed a Statement of Evidentiary Objections under seal. [Dkt. # 86]. The same day, the parties filed a Joint Statement on the Burden of Proof at Trial, which set forth each side's views of the legal standards and burden of proof applicable to this case. [Dkt. # 87].

from 2006 to 2008. Defendants also called Professor Michael Katz from the Haas School of Business at the University of California, Berkeley, and Professor Peter Rossi from the UCLA's Anderson School of Management. Defendants called Professor Katz to testify about the effect of arbitration and the FCC's program access rules, and called Professor Rossi to testify about survey methods and to rebut testimony concerning surveys and studies on which the Government relied. As their fact witnesses, **[*188]** defendants called Jeff Bewkes, Chairman and CEO of Time Warner, and Randall Stephenson, Chairman and CEO of AT&T, to testify regarding their decision to merge. Defendants also called John Stankey, a senior executive at AT&T responsible for planning and integration of the proposed merger. Stankey, who will be running Time Warner should the merger be allowed to occur, testified about the rationale for the merger as well as the synergies and efficiencies that would result from the merger.

The Government's rebuttal case consisted of testimony from three experts. First, **[**67]** the Government called Ronald Quintero, an accounting and financial consultant, to testify as an expert witness on defendants' claims that the challenged merger will result in a number of procompetitive synergies. Next, the Government called Professor Susan Athey, an economics of technology professor at the Stanford Graduate School of Business, to testify regarding defendants' proffered "content intelligence" synergies. Finally, the Government closed out its rebuttal presentation by recalling Professor Shapiro to defend and further explain his case-in-chief testimony in the face of defendants' various criticisms.

To say the trial was well staffed would be an understatement. Thirty-two lawyers entered appearances for the Government, and 14 did so for defendants. Evidentiary disputes were handled on a case-by-case basis as issues arose. In order to accommodate the confidentiality interests of third parties, counsel agreed to craft their questions so as not to elicit sensitive business information, and, on three occasions, I had to close the courtroom to the public following factual proffers by the Government as to the need for doing so.[15] In total, **[*189]** I admitted into evidence over 3,000 pages **[**68]** of documents, broken up into over 120 exhibits. The trial transcript itself exceeds 4,300 pages in length.

---

[15] The Court explained to the parties that it appreciated both the public's interest in open judicial proceedings, and the importance to the Government's case of third-party testimony and the need to maintain confidentiality. Consistent with these competing interests, and applicable case law, the Court advised the parties that, when seeking to close the courtroom, they would first need to make a proffer explaining the necessity of doing so. *Cf.* 28 C.F.R. § 50.9 (2017) (reciting "the vital public interest in open judicial proceedings" and stating the policy that DOJ counsel "shall not move for or consent to closure of a proceeding" unless "[n]o reasonable alternative exists for protecting the interests at stake" and "[f]ailure to close the proceedings will produce . . . [a] substantial likelihood of denial of the right . . . to a fair trial").

In order to accommodate those confidentiality interests, counsel agreed to craft their questions so as not to elicit sensitive business information. *See* Tr. 692:14-16 ("[G]overnment's counsel has got this choreographed approach here to get this information from you under oath without revealing it to the public."); *see also, e.g., id.* at 99:12-14 (SEALED). Counsel routinely asked witnesses to point to or confirm for the Court the contents of documents under seal. *See, e.g., id.* at 119:1-21, 124:18-125:13 (Fenwick (Cox)); 535:1 1-22, 662:7-20 (Martin (Turner)); *id.* at 1095:19-1096:7 (Breland (Turner)); *id.* at 3011:9-21 (Christopher (AT&T)); *id.* at 3529:18-3530:10 (Quintero). Indeed, the Government succeeded in eliciting considerable testimony from a third-party witness — this time from AT&T's competitor, Cox - by way of a single exhibit. *See, e.g., id.* at 689:18-20 (Hinson (Cox)) ("Your Honor, I'd like to mark Plaintiff's Exhibit, it's got some confidential information that Mr. Hinson can point to."); *see generally id.* at 692:25-708:14; *see also* PX523. In those instances, the Court, but not the public, had access to the referenced documents. In the same way, counsel asked witnesses to describe the contents at an appropriate level of generality. *See id.* at 259:11-13 (Schlichting (DISH)); *id.* at 1278:13-1279:21 (Bewley (Altman Vilandrie)).

Through skillful lines of inquiry and the use of exhibits and demonstratives, this approach resolved most confidentiality-based concerns. For several witnesses, the Government initially raised the possibility of going into closed session, before later declining to seek to do so. *See, e.g.*, Tr. 439:14-16 (SEALED). Other times, the Government elected to establish the factual proffer necessary to close the courtroom. To take one example of the way in which — when it chose to do so — the Government developed the need for closing the courtroom, Government counsel confirmed with NBCU's Madison Bond in open court that he felt constrained by confidentiality obligations with respect to at least six different items. *See, e.g., id.* at 1992:2-1992:8; *id.* at 1993:24-1994:6 (Bond (NBCU)).

On May 3, 2018, a mere one week after the close of evidence, the parties filed their proposed Findings of Fact and Conclusions of Law, totaling nearly 400 pages in length, as well as briefs that synthesized their arguments. On the last day of trial, I advised the parties that it would issue a ruling by June 12, 2018 in order to avoid running afoul of the defendants' merger deadline of June 21, 2018 and to provide the losing party sufficient time to preserve its appellate rights.

IV. Legal Standard

A. The *Clayton Act*

The Government seeks to enjoin the proposed merger on the basis that it violates *Section 7* of the Clayton Act, *15 U.S.C. § 18*. *See id. § 25* (authorizing United States to seek equitable relief to restrain a pending acquisition that violates *Clayton Act*). As relevant here, ***HN1***[] *Section 7* "prohibits acquisitions, including mergers, 'where in any line of commerce or in any activity affecting commerce in any section of the country, the effect of such acquisition may be substantially **[**69]** to lessen competition.'" *FTC v. H.J. Heinz Co., 246 F.3d 708, 713, 345 U.S. App. D.C. 364 (D.C. Cir. 2001)* (quoting *15 U.S.C. § 18*). The Government "has the ultimate burden of proving a *Section 7* violation by a preponderance of the evidence." *United States v. H & R Block, Inc., 833 F. Supp. 2d 36, 49 (D.D.C. 2011)* (internal quotation marks omitted); *see also* Proposed Conclusions of Law of the United States ("Gov't PCOL") ¶ 24 [Dkt. # 127]. Accordingly, the Government's "failure of proof in any respect will mean the transaction should not be enjoined." *FTC v. Arch Coal, Inc., 329 F. Supp. 2d 109, 116 (D.D.C. 2004)*.

By using "the words 'may be substantially to lessen competition'" in *Section 7*, Congress indicated "that its concern was with probabilities, not certainties." *FTC v. Whole Foods Mkt., Inc., 548 F.3d 1028, 1042, 383 U.S. App. D.C. 341 (D.C. Cir. 2008)* (emphasis omitted) (quoting *Brown Shoe Co. v. United States, 370 U.S. 294, 323, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962))*. Although certainty of harm is not necessary to prove a *Section 7* violation, neither is the "mere possibility" of harm sufficient. *Heinz, 246 F.3d at 713* (quoting S. Rep. No. 1775, at 6 (1950)); *see also Baker Hughes, 908 F.2d at 984* ("*Section 7* involves *probabilities*, not certainties or possibilities."). Rather, to grant injunctive relief under the *Clayton Act*, the Court *must* conclude that the Government has introduced evidence sufficient to show that the challenged "transaction is likely to lessen competition substantially." *Baker Hughes, 908 F.2d at 985*.[16] As part of satisfying that burden, *Section 7* **[*190]** "demand[s] that a plaintiff demonstrate that the

[16] It is undisputed that the Government has the burden of proving a *Section 7* violation. The Government's view on what measure of proof that burden requires, however, has been somewhat of a moving target. In some instances, the Government mirrors defendants' position that *Section 7* requires a showing that the challenged transaction is "likely" to harm competition; in others, the Government states that it must show a "reasonable probability" or "appreciable danger" of harm to prevail. *Compare* Compl. ¶ 44 ("The effect of the proposed merger would be likely to lessen competition substantially" in the relevant markets.), *and* Gov't PFOF 20 ("The proposed merger would likely substantially lessen competition" in the relevant markets.) (capitalization altered), *with* Gov't Post-Tr. Br. 13 (disputing that the "United States must show that harm is 'likely'"), *and* Gov't PCOL ¶ 5 & n.1 (reciting a purportedly more lenient "reasonable probability" standard). In the final analysis, each alternative formulation appears aimed at clarifying the central point that *Section 7* does not require "certain" harm, but instead permits courts to use predictive judgment to "arrest anticompetitive tendencies in their 'incipiency.'" *United States v. Penn-Olin Chem. Co., 378 U.S. 158, 171, 84 S. Ct. 1710, 12 L. Ed. 2d 775 (1964)* (quoting *United States v. Philadelphia Nat'l Bank, 374 U.S. 321, 362, 83 S. Ct. 1715, 10 L. Ed. 2d 915 (1963)* (internal quotation marks omitted)). Thus, it is not surprising that courts have used these terms interchangeably. *See, e.g., Hosp. Corp. of Am. v. FTC, 807 F.2d 1381, 1389 (7th Cir. 1986)* (noting that *Section 7* requires "an appreciable danger" of anticompetitive consequences and concluding in same paragraph that Commission had adequately demonstrated that the "challenged acquisitions are likely to foster collusive practices, harmful to consumers"); *Anthem, 236 F. Supp. 3d at 215* (citing with approval other court's use of "reasonably likely" formulation, later concluding that "[p]laintiffs have carried their burden to establish that the merger is likely to harm competition").

For present purposes, I need not further toil over discerning or articulating the daylight, if any, between "appreciable danger," "probable," "reasonably probable," and "likely" as used in the *Section 7* context. That is because even assuming that the substantial lessening of competition will be 'sufficiently probable and imminent' to warrant **[**70]** relief." *Arch Coal, 329 F. Supp. 2d at 115* (quoting *United States v. Marine Bancorporation, 418 U.S. 602, 623 n.22, 94 S. Ct. 2856, 41 L. Ed. 2d 978 (1974))*.

HN2[] In assessing the Government's *Section 7* case, the court must engage in a "'comprehensive inquiry' into the 'future competitive conditions in a given market,'" keeping in mind that "the *Clayton Act* protects 'competition,' rather than any particular competitor." *United States v. Aetna, 240 F. Supp. 3d 1, 18 (D.D.C. 2017)* (quoting *Baker Hughes, 908 F.2d at 988, 991 n.12*). "[O]nly . . . examination of the particular market — its structure, history and probable future — can provide the appropriate setting for judging the probable anticompetitive effect of the merger." *United States v. General Dynamics Corp., 415 U.S. 486, 498, 94 S. Ct. 1186, 39 L. Ed. 2d 530 (1974)* (quoting *Brown Shoe, 370 U.S. at 322 n.38*). "Hence, antitrust theory and speculation cannot trump facts"; the Government must make its case "on the basis of the record evidence relating to the market and its probable future." *Arch Coal, 329 F. Supp. 2d at 116-117*.

B. *Baker Hughes* Burden Shifting Framework

As the above discussion displays, *Section 7* vests courts with the "uncertain task" of "making a prediction about the future." *Baker Hughes, 908 F.2d at 991*; *United States v. Anthem, Inc., 236 F. Supp. 3d 171, 191 (D.D.C. 2017)*. To say the least: that is no easy assignment ! In such a setting, and in the absence of a crystal ball, "allocation of the burdens of proof assumes particular importance." *Baker Hughes, 908 F.2d at 991*. ***HN3***[] To further assist courts in this prospective inquiry, our Circuit has set forth a burden shifting framework for use in determining **[*191]** whether a proposed **[**71]** transaction violates the *Clayton Act*. *See, e.g., id. at 982-83*.

Under that framework, the Government must first establish its prima facie case by 1) identifying the relevant product and geographic market and 2) showing that the proposed merger is likely to "substantially lessen competition" in that market. *Id. at 982, 991*; *see also Arch Coal, 329 F. Supp. 2d at 117*; Gov't PCOL ¶ 24. If the Government satisfies its prima facie burden, the burden then shifts to defendants to "provide sufficient evidence that the prima facie case 'inaccurately predicts the relevant transaction's probable effect on future competition.'" *United States v. Anthem, Inc., 855 F.3d 345, 349 (D.C. Cir. 2017)* (quoting *Baker Hughes, 908 F.2d at 991*). One way defendants may do so is to offer evidence that "post-merger efficiencies will outweigh the merger's anticompetitive effects." *Heinz, 246 F.3d at 721*. If the defendants put forward sufficient evidence to rebut plaintiff's prima facie case, "the burden of producing additional evidence of anticompetitive effect shifts to the [government], and merges with the ultimate burden of persuasion, which remains with the [government] at all times." *Anthem, 855 F.3d at 350* (quoting *Baker Hughes, 908 F.2d at 983*).[17]

"reasonable probability" or "appreciable danger" formulations govern here and require more than a "mere possibility," but less than a "more likely than not" showing of harm, *but see Baker Hughes, 908 F.2d at 991* (describing "the ultimate issue" in a *Section 7* case as "whether [the proposed] transaction is *likely* to lessen competition substantially" (emphasis added)); *Anthem, 236 F. Supp. 3d at 215* ("merger is likely to harm competition"); *United States v. Aetna, Inc., 240 F. Supp. 3d 1, 9 (D.D.C. 2017)* ("the proposed merger is likely to substantially lessen competition"); *FTC v. Staples, Inc., 190 F. Supp. 3d 100, 110 (D.D.C. 2016)* ("proposed merger is likely to reduce competition"), my conclusions regarding the Government's failure of proof would remain unchanged for all of the reasons discussed below.

[17] Defendants assert that the burden-shifting framework is inapplicable to vertical merger cases, where no market-concentration-based presumption of harm attaches. As such, defendants argue that the Government has the burden to account for all of defendants' proffered efficiencies as part of making its prima facie case. I am skeptical of this position, both as a matter of law and logic. *Cf. Heinz, 246 F.3d at 720* (discussing "efficiencies defense" as a component of the defendants' case); 4A Areeda & Hovenkamp, ***Antitrust Law*** ¶ 970c. But given that the "ultimate burden" of proving a *Section 7* violation rests with the plaintiff, *H & R Block, Inc., 833 F. Supp. 2d at 49*, any debate over burden shifting "may be somewhat academic," as defense counsel conceded, 3/20/18 Hr'g Tr. 67:6-7 (morning session); *cf. Baker Hughes, 908 F.2d at 991* (deeming "the distinction between" the "burden of production" and "the ultimate burden of persuasion" as "always an elusive distinction in practice"). That is especially so here, where, as will become evident, the Court's ruling does *not* turn on the efficiencies offered by defendants in their affirmative case, but rather on its conclusion that the *Government's* evidence, as "undermined and "discredit[ed]" by defendants'

[*192] C. Antitrust Analysis of Vertical Mergers

In the typical horizontal merger case under *Section 7*, the Government's **[**72]** path to carrying its prima facie burden is clear: by putting forward statistics to show that the proposed "merger would produce a firm controlling an undue percentage share of the relevant market, and would result in a significant increase in the concentration of firms in that market," the Government triggers a "'presumption' that the merger will substantially lessen competition." *Heinz, 246 F.3d at 715* (internal quotation marks and alterations omitted) (quoting *United States v. Philadelphia Nat'l Bank, 374 U.S. 321, 363, 83 S. Ct. 1715, 10 L. Ed. 2d 915 (1963))*; *see also, e.g., Anthem, 236 F. Supp. 3d at 209*; *Aetna, 240 F. Supp. 3d at 43*; *H & R Block, Inc., 833 F. Supp. 2d at 72*.

In this case, however, the "familiar" horizontal merger playbook is of little use. *Baker Hughes, 908 F.2d at 982*. That is, of course, because the proposed transaction between AT&T and Time Warner is a vertical merger — *i.e.*, one that involves "firms that do not operate in the same market" and thus "produce[s] no immediate change in the level of concentration in any relevant market." Dept. of Justice & Fed. Trade Comm'n, Non-Horizontal Merger Guidelines § 4.0 (June 14, 1984) ("Non-Horizontal Merger Guidelines"),[18] The parties therefore agree that in this case "there is no short-cut way to establish anticompetitive effects, as there is with horizontal mergers." Joint Statement on the Burden of Proof at Trial ("Joint Statement") 3 [Dkt. # 87]; *see* 4A Areeda & Hovenkamp, **[**73]** ***Antitrust Law*** ¶ 1000a ("[T]he basic economic reason for limiting horizontal mergers is well-founded and rather generally accepted: horizontal mergers increase market concentration, and high market concentration can substantially lessen competition among rivals, particularly with respect to price. Unfortunately, there is no comparable theoretical basis for dealing with vertical mergers.").

With no presumption of harm in play, the Government concedes that, to satisfy its burden here, it must make a "fact-specific" showing that the effect of the proposed merger "is likely to be anticompetitive." Joint Statement 3-4.

---

attacks, is insufficient to "show[] a probability of substantially lessened competition," and thus that the Government has "failed to carry its ultimate burden of persuasion." *Baker Hughes, 908 F.2d at 983, 990-91*.

I will nevertheless pause to mention briefly why I am confident that defendants will achieve considerable efficiencies beyond those conceded by the Government. At trial, defendants presented the Court with documentary and testimonial evidence concerning efficiencies likely to flow from the proposed merger. The efficiencies, defendants explain, come both on the "cost" side, and on the "revenue" side. By defendants' calculations, cost synergies will total $1.5 billion and revenue synergies $1 billion on an annual basis. *See* Tr. 3234:17-3235:14 (Stankey (AT&T)). On the cost side, AT&T's John Stankey testified that the marriage of AT&T and Time Warner will lead to the elimination of redundant positions in each company, achievement of certain economies of scale, and insourcing of services that the acquired entity currently acquires from vendors. *See id.* at 3235:22-3240:1. And on the revenue side, AT&T and Time Warner expect to see the gains in innovation — particularly by way of a new programmatic advertising platform — that motivated the merger in the first place. *See id.* at 3229:20-25, 3240:2-3246:9.

Putting aside the revenue synergies, which, by their nature, are more uncertain, I have a high degree of confidence that defendants will generate most, if not all, of the predicted $1.5 billion in annual cost savings by 2021. *See id.* at 3234:13-20. AT&T derives its prediction through the same rigorous analytical process applied in each of its mergers. *See id.* at 3226:1-3229:3; *see also* DX658. Most recently, in the acquisition of DirecTV, AT&T exceeded cost synergy predictions, which now total $2 billion annually. Tr. 3229:4-8, 3369:21-3370:4 (Stankey (AT&T)). Indeed, it is uncontested that AT&T has a strong record of meeting similar cost synergy estimates in past mergers. *See id.* at 3229:2-3, 3229:9; *see also id.* at 3226:3-5. That "analogous past experience" serves to "substantiat[e]" defendants' "efficiency claims," leaving this Court with little doubt that AT&T will stay on its projected track. Dep't of Justice & Fed. Trade Comm'n, Horizontal Merger Guidelines § 10 (Aug. 19, 2010). Thus, while not necessary to my final judgment in this case, defendants have presented persuasive, probative evidence that the merger will produce even more efficiencies than those accounted for in this Opinion. As such, no further "troll[ing] the Internet" by Mr. Quintero would likely convince the Court otherwise ! Tr. 3605:25 (Quintero).

[18] Although the Guidelines are not binding on this Court, our Circuit has noted that they are "a helpful tool, in view of the many years of thoughtful analysis they represent, for analyzing proposed mergers." *Anthem, 855 F. 3d at 349* (citing *Baker Hughes, 908 F.2d at 985-86*). As the Non-Horizontal Merger Guidelines make reference to concepts contained within the Horizontal Merger Guidelines, I will cite to both as appropriate.

Such a showing is "necessarily both highly complex" and "institution specific." David T. Scheffman & Richard S. Higgins, *Vertical Mergers: Theory and Policy*, 12 Geo. Mason L. Rev. 967, 967 (2004); *see also* Gov't PCOL ¶ 25 (collecting sources for proposition that "vertical mergers are judged on a case-by-case basis" based on consideration of "case-specific evidence of a danger of future competitive harm"). Of particular relevance here, the Government states that a vertical merger may "act as a clog on competition" by giving the merged firm "control of a competitively significant supplier." **[*193]** Gov't PCOL ¶ 46 (quoting **[**74]** Brown Shoe, 370 U.S. at 324). Such a situation would occur, the Government continues, if the merged firm were to withhold a source of supply from its rivals or otherwise foreclose access to the source "on competitive terms," such as by causing its rivals to "pay[] more to procure necessary inputs," which in turn could "harm[] competition and consumers." Id. ¶¶ 46, 57-58 (emphasis omitted) (quoting Yankees Entm't & Sports Network, LLC v. Cablevision Sys. Corp., 224 F. Supp. 2d 657, 673 (S.D.N.Y. 2002); Sprint Nextel Corp. v. AT&T, Inc., 821 F. Supp. 2d 308, 330 (D.D.C. 2011)).

Further complicating the Government's challenge is the recognition among academics, courts, and antitrust enforcement authorities alike that "many vertical mergers create vertical integration efficiencies between purchasers and sellers." Michael H. Riordan & Steven C. Salop. *Evaluating Vertical Mergers: A Post-Chicago Approach*, 63 Antitrust L.J. 513, 519 (1995).[19] The proposed merger reflects that principle: the Government's chief economic expert, Professor Shapiro, predicts that the merger, if consummated, would lead to 5352 million in annual cost savings on the part of AT&T's customers. *See* Tr. 2252:19-21 (Shapiro); *infra* pp. 66-68; *see also* Gov't PFOF ¶¶ 222-223 (EDM effect is "generally accepted as a potential procompetitive benefit resulting from vertical mergers").

As the Government also notes, the **[**75]** "principal objective of antitrust policy is to maximize consumer welfare by encouraging firms to behave competitively." Gov't PCOL ¶ 4 (quoting Anthem, 855 F.3d at 366 (emphasis and internal quotation marks omitted)); *see id.* ("Section 7 proscribes mergers with the potential to harm the competitive process, and thereby result in harm to consumers, including higher prices . . . ."). As such, any proper assessment of a proposed merger, Professor Shapiro testified, must consider both the positive and negative "impact[s] on consumers" by "balancing" the proconsumer, "positive elements" of the merger against the asserted anticompetitive harms. *See* Tr. 2182:12-20, 2253:4-5 (Shapiro); *see also id.* at 2461:22-2462:5 (Carlton) ("Well, Professor Shapiro is looking at the [e]ffects on consumer prices. That seems the right thing to do. . . .[W]e want to see what's going to be the result on the end price that consumers pay."); *cf.* Gov't PFOF ¶ 223 (discussing fact that Professor Shapiro accounted for EDM effects). In view of that "somewhat different" analysis applicable to vertical mergers, Tr. 2182:16-18 (Shapiro), it is perhaps little surprise that the Department of Justice's Non-Horizontal Merger Guidelines recognize that **[**76]** vertical mergers "are less likely than horizontal mergers to create competitive problems," Non-Horizontal Merger Guidelines § 4.

Given all of the competing considerations at play, "the analysis of vertical mergers" has been described as "much more complex than the analysis of horizontal mergers." Scheffman & Higgins, *Vertical Mergers*, 12 Geo. Mason L. Rev. at 967. Things are made more difficult still by the lack of modern judicial precedent involving vertical merger challenges — a dearth of authority that is unsurprising, considering that the Antitrust Division apparently has **[*194]** not tried a vertical merger case to decision in *four* decades ! *See* Defs.' Proposed Conclusions of Law ("Defs.' PCOL") ¶ 32 [Dkt. # 120]; 2/16/18 Hr'g Tr. 13:24-14:1.

To sum up, the Court accepts that vertical mergers "are not invariably innocuous," but instead can generate competitive harm "[i]n certain circumstances." Non-Horizontal Merger Guidelines §§ 4, 4.2; Gov't PCOL ¶ 22.[20] The

---

[19] *See also* Robert H. Bork, *The Antitrust Paradox* 227 (2d ed. 1993) ("Vertical mergers may cut sales and distribution costs, facilitate the flow of information between levels of the industry ...[,] create economies of scale in management, and so on."); Ernest Gellhorn et al., ***Antitrust Law*** *and Economics* 411 (5th ed. 2004) (discussing the "[v]arious efficiency rationales" that "can motivate vertical mergers"); *cf.* National Fuel Gas Supply Corp. v. FERC, 468 F.3d 831, 840, 373 U.S. App. D.C. 351 (D.C. Cir. 2006) ("[V]ertical integration creates efficiencies for consumers.").

[20] The Court therefore declines defendants' invitation to adopt either a per se rule or a presumption that would apply to most vertical mergers. *See* Pre-Tr. Br. of Defs. 29 [Dkt. # 77]. To be sure, the standard for which defendants advocate aligns with the views of a number of authorities, including judges from this Circuit. *See, e.g.*, Robert Bork, *The Antitrust Paradox* 245 ("[I]n the

case at hand therefore turns on whether, notwithstanding the proposed merger's conceded procompetitive effects, the Government has met its burden of proof of establishing, through "case-specific evidence," that the merger of AT&T and Time Warner, at this time and in this **[**77]** remarkably dynamic industry, is likely to substantially lessen competition in the manner it predicts. Gov't PCOL ¶ 25. Unfortunately for the Government, for the following reasons, it did not meet its burden.

ANALYSIS

The challenged vertical merger here would unite Time Warner, a creator and supplier of popular video content, with AT&T, a large downstream purchaser and distributor of video content. The Government concedes that the challenged merger, like most vertical mergers, will result in significant benefits to customers of the merged company. Specifically, the Government's lead expert, Professor Carl Shapiro, estimates that the merger will cause AT&T to lower the price of DirecTV, resulting in $352 million in annual savings for DirecTV's customers. *See* Tr. 2252:19-20 (Shapiro).

Notwithstanding those conceded consumer benefits, the Government contends that the challenged merger is "likely to lessen competition substantially," *Baker Hughes, 908 F.2d at 985*, and thus should be enjoined under *Section 7*, *see* Compl. ¶ 10. The challenged merger would likely result in a substantial lessening of competition, according **[**78]** to the Government, in three "mutually reinforcing" ways. Gov't Post-Tr. Br. 7.

First and foremost, the Government argues that the challenged merger would enable Turner to charge AT&T's rival distributors — and ultimately consumers — higher prices for its content on account of its post-merger relationship with AT&T. *See, e.g.* Compl. ¶¶ 36-38; Gov't PFOF ¶¶ 226, 231-32; Gov't Post-Tr. Br. 1-2. *Second*, the Government contends that the challenged merger will substantially lessen competition by creating an increased risk that the merged firm will act, either unilaterally or in coordination with Comcast-NBCU, to thwart the rise of the lower-cost, consumer-friendly virtual MVPDs that are threatening the traditional pay-TV model. *See* Compl. ¶¶ 40-41; Gov't PFOF ¶ 278. *Finally*, the Government alleges that the merged entity could harm competition by preventing AT&T's rival distributors from using HBO as a promotional tool to attract and retain customers. *See* Compl. ¶ 39; Gov't PFOF ¶ 234.

[*195] In the remainder of this section, I will analyze each of those theories of harm to competition. Initially, I will set forth the relevant market definition, which incorporates the Government's proposed product **[**79]** and geographic markets. Next, I will discuss the conceded consumer benefits associated with the proposed merger. Mindful of those conceded benefits, and the need to balance them against the Government's allegations of consumer harm, I will then evaluate whether the Government has carried its burden to show a likelihood that the challenged merger will result in a substantial lessening of competition. For the reasons discussed in detail below, I have concluded that the answer to that question is no !

I. Market Definition

Typically, "[m]erger analysis starts with defining the relevant market" in which to assess the alleged anticompetitive harms. *FTC v. Sysco Corp., 113 F. Supp. 3d 1, 24 (D.D.C. 2015)* (citing *United States v. Marine Bancorporation, 418 U.S. 602, 618, 94 S. Ct. 2856, 41 L. Ed. 2d 978 (1974))*. The relevant market comprises two parts: a product market and a geographic market. *Anthem, 236 F. Supp. 3d at 193*. Here, the Government defines the primary relevant product market as the "Multichannel Video Distribution" market, and the relevant geographic markets as the approximately 1,200 local markets in which residents have access to video offerings from the same set of

---

absence of a most unlikely proved predatory power and purpose, antitrust should never object to the verticality of any merger."); *Comcast Cable Comms., LLC v. FCC, 717 F.3d 982, 990, 405 U.S. App. D.C. 188 (D.C. Cir. 2013)* (Kavanaugh, J., concurring) ("[A]bsent market power, vertical integration and vertical contracts are *procompetitive*.") (citing Douglas H. Ginsburg, *Vertical Restraints: De Facto Legality Under the Rule of Reason*, 60 Antitrust L.J. 67, 76 (1991)). Tempting though it may be to agree with my appellate brethren, I need not, and will not, go that far to resolve this case.

multichannel video programming distributors. Gov't PFOF ¶¶ 31, 38-41. Both of those proposed markets find support, the Government contends, in Professor Shapiro's expert analysis, *see* Tr. 2184:22-2188:4 **[**80]** (discussing hypothetical monopolist test, among other things), as well as the *Brown Shoe* "practical indicia," *see* *370 U.S. at 325* (listing "industry or public recognition of the submarket," "the product's peculiar characteristics and uses," and "distinct customers" and "distinct prices" of the product as relevant to product market determination); Gov't PFOF ¶¶ 32-36.

Horizontal merger cases often "to a great extent . . . hinge[] on" market definition because such definition affects the ultimate market concentration statistics associated with a proposed transaction. *FTC v. Staples, Inc., 970 F. Supp. 1066, 1073 (D.D.C. 1997)*. For that reason, market definition is often heavily contested in horizontal merger cases, turning on fine-grained economic analyses of "SSNIPs" and cross-elasticity of demand. *See, e.g., Anthem, 236 F. Supp. 3d at 193-198*; *FTC v. Staples, Inc., 190 F. Supp. 3d 100, 116-127 (D.D.C. 2016)*; *Sysco Corp., 113 F. Supp. 3d at 24-48*. Happily, I need not delve deeply into those concepts here. The proposed vertical merger, as discussed, does not "involve an increase in market concentration," and defendants, for all of their objections to the Government's case, have not meaningfully challenged the Government's proposed product or geographic markets. Joint Statement 3; *see* Tr. 2186:25-2187:2, 2188:2-4 (Shapiro). I will thus accept the Government's proposed product and geographic **[**81]** markets for purposes of this case, and briefly discuss the basics of those markets — as well as the role of the product market as it relates to my analysis of the Government's claims of harm — below.

Product Market. The Government's *primary* product market is the market for multichannel video distribution. Multichannel video distribution, as defined by the Government, involves the distribution of live, or "linear," video programming networks, as well as on-demand content, to subscribing consumers. Gov't PFOF ¶ 31; Trial Br. of the United States ("Gov't Pre-Tr. Br.") 22 [Dkt. # 76]. As relevant here, the sellers in that product market are: 1) MVPDs, including cable television providers, such as Comcast, Cox, and Charter; **[*196]** direct broadcast satellite providers, such as DirecTV and DISH, which operate nationally; telecommunications providers, or "telcos," such as Verizon Fios and AT&T's U-verse; and overbuilders, such as RCN; and 2) virtual MVPDs, including Sony's Playstation Vue, Hulu Live, Google's YouTube TV, DirecTV Now, and DISH's Sling. As discussed, virtual MVPDs provide the same live-TV services as do traditional MVPDs, but do so over the internet rather than by way of a dedicated **[**82]** transmission path that they control. *See* Gov't PFOF ¶ 15. Although the majority of U.S. households (approximately 90 million) currently receive linear video programming through traditional MVPDs, *id.*, and a majority are likely to continue to do so, there is no debating that the number of MVPD subscribers is "declining unequivocally" as consumers increasingly turn to virtual MVPDs and SVODs for their video content needs. Tr. 3451:22-23 (Stephenson (AT&T)); *see id.* at 3449:12-3451:1 ("DirecTV lost 1.2 million subscribers in 2017. The whole system, pay TV, cable, satellite, lost 3 million."); *see also id.* at 2948:11-24 (Holanda (RCN)); PX455-136 to -137.

As the above discussion indicates, the Government's proposed product market focuses on the downstream distribution of live-TV content to consumers—a focus that excludes both the upstream programming market and the market for SVODs such as Netflix, Hulu, and Amazon Prime. *See, e.g., id.* at 2184:22-2185:5 (Shapiro); *cf.* Gov't PCOL ¶ 38 (disputing need to "define an 'upstream' programming marker).[21] That product market definition appears to reflect the Government's (and Professor Shapiro's) projections regarding where the challenged merger's **[**83]** ultimate "net harm" to consumers — *i.e.*, the predicted increased costs to "multichannel video subscribers" — will result. *Cf.* Gov't PFOF ¶ 231. Importantly, however, accepting the Government's proposed product market does not mean that Turner's position in the upstream programming market is irrelevant to evaluating the Government's theories of harm in this case. Nor does it require this Court to ignore the rising role of SVODs in the broader multichannel video programming and distribution market. That is because the Government's proffered increased-leverage theory, not to mention its other theories of harm, incorporates those factors in at least three different ways.

---

[21] The Government also asserts that a broader market of "All Video Distribution" — which includes SVODs in addition to MVPDs and virtual MVPDs — constitutes a relevant product market. *See* Gov't PFOF ¶ 37 (citing Tr. 2184:18-2185:17) (Shapiro). For simplicity's sake, this discussion mirrors the Government's focus on the multichannel video distribution market. *Cf.* Gov't Pre-Trial Br. 22.

First, as will become clear in the ensuing discussion, examining the importance of Turner's content to distributors in the upstream programming market is a necessary (but not sufficient) step in evaluating the Government's increased-leverage theory. *Cf.* Gov't PFOF ¶¶ 69-102 (proposing findings of fact to support assertion that the "merger would enable AT&T to harm competition because MVPDs and virtual MPVDs need Turner content to compete effectively"). *Second*, the bargaining model from which the Government's measures **[**84]** of consumer harm are derived itself accounts for the increasing role of SVODs and "cord cutting" in the market, as those trends affect the amount of benefits that AT&T could expect to receive under the Government's increased-leverage theory. *See, e.g.*, Tr. 2242:2-18 (Shapiro) (discussing role of "cord cutting" in calculating the bargaining model's "diversion rate" input); *id.* at 2504:11-2506:24 (Carlton) (explaining why cord cutting "matters a lot" to bargaining model). *Third* and finally, the Government **[*197]** has argued that certain documents reflect an intent on the part of defendants to use the proposed merger to act consistently with the Government's increased-leverage theory of harm, among other theories. *See* Gov't PCOL ¶ 51 (stating, in relation to "[d]efendants' internal documents," that "[e]vidence of anticompetitive intent can also form the basis of a court's prediction of harm"). To appropriately evaluate the strength of such evidence, however, I must be able to put it in the context of other documents and statements related to the various rationales for the proposed merger including, of most relevance here, defendants' asserted desire to compete with SVODs and other technology **[**85]** companies amid "the ongoing revolution in video programming and distribution." Defs.' PFOF ¶ 6; *see also* Tr. 3079:18-3080:2 (Bewkes (Time Warner)). Therefore, although the Government is of course correct that the refrain "'we are getting killed by new competition in different markets'" is no "defense to an illegal merger," Gov't Post-Tr. Br. 21, I simply cannot evaluate the Government's theories and predictions of harm, as presented by the Government at trial, without factoring in the dramatic changes that are transforming how consumers view video content.

Geographic Markets. The Government has identified over 1,100 local multichannel video distribution markets as the relevant geographic markets. *See* Gov't PFOF ¶ 41. These local markets, which the Government calls "Local Footprint Overlap Zones," represent each local geographic area in which "residents have access to video offerings from the same set of MVPD competitors." *Id.*; *see* Tr. 2187:3-25 (Shapiro). The localized geographic markets reflect the reality that, due to limitations of the physical transmission paths maintained by many of the providers in the multichannel video distribution market, the mix of MVPDs and virtual MVPDs **[**86]** available to a consumer varies based upon where that consumer lives. *See* Gov't PFOF ¶ 40. As such, the Government contends that the asserted "effects of the proposed merger" will vary depending "on the market shares of the various MVPDs and virtual MVPDs in [a] region," and that analyzing the local markets is therefore appropriate. *Id.* The Government has not relied upon harm in any particular local market as the basis for enjoining the merger, however. Instead, the Government's expert "aggregated" all of the alleged harms in the local markets in order to derive a total measure of nationwide economic harm. Gov't PFOF 13 ("Relevant downstream geographic markets are local, but they can be aggregated for analytical convenience."); *see* Tr. 2255:1-2256:15 (Shapiro) (providing aggregate estimates of consumer harm nationwide).

II. Conceded Consumer Benefits of Proposed Merger

Vertical mergers often generate efficiencies and other procompetitive effects. *See supra* pp. 53-57 & nn. 17, 19. The proposed merger is no exception. Indeed, the Government concedes that this case implicates one "standard benefit" associated with vertical mergers: the elimination of double marginalization ("EDM"). Tr. 2438:6 (Carlton); **[**87]** Gov't PFOF ¶ 222.

As relevant here (and at the risk of oversimplifying things), double marginalization refers to the situation in which two different firms in the same industry, but at different levels in the supply chain, each apply their own markups (reflecting their own margins) in pricing their products. *See* Tr. 2251:15-25 (Shapiro). Those "stacked" margins are both incorporated into the final price that consumers have to pay for the end product. *Id.* at 2251:24. By vertically integrating two such firms into one, the merged company is able to "shrink that total margin so there's one instead of two," leading to lower prices for consumers. **[*198]** *Id.* at 2252:1-3. EDM is, therefore, procompetitive.

In the context of a Time Warner and AT&T combination, EDM will play out as follows. Prior to the merger, AT&T must pay Time Warner a certain price to display Turner content to its DirecTV customers. *Id.* at 2251:19-25. The price that AT&T pays includes Time Warner's profit margin, that is, an amount over and above the marginal cost of the programming. *Id.* After the vertical integration of AT&T and Time Warner, however, AT&T will no longer need to pay Turner's profit margin to display Turner content. **[**88]** *See id.* at 2252:1-3; *id.* at 2438:9-15 (Carlton). In effect, that means that AT&T's marginal cost of licensing Turner content will be lower, which in turn renders distribution of Turner to its DirecTV customers more profitable. *Id.* at 2438:13-15 (Carlton). With its profits increased, AT&T would have the "incentive to get more customers and in particular AT&T's price, the DirecTV price will go down to consumers." *Id.* at 2438:16-18.

According to the Government's expert, Professor Shapiro, EDM would result in AT&T lowering the price for DirecTV by a "significant" amount: $1.20 per-subscriber, per-month. *Id.* at 2252:6-7 (Shapiro). All told, those savings to AT&T's customers add up to $352 million annually. *See id.* at 2252:19-21. Those savings, moreover, would begin flowing to AT&T's customers "pretty quickly" after consummation of the merger. *Id.* at 2446:4-5 (Carlton).

All sides agree that any proper antitrust analysis of the proposed merger must account for those "positive elements of the merger in terms of DirecTV, having lower costs." *Id.* at 2182:12-13 (Shapiro); *cf.* Gov't PFOF ¶¶ 222-23. In other words, to understand whether the proposed merger will harm consumers, Professor Shapiro explained, **[**89]** it is necessary to "balance" whether the Government's asserted harms outweigh the merger's conceded consumer benefits. Tr. 2180:24, 2181:1-6 (Shapiro); *see id.* at 2182:11-21 ("So I'm going to need to trade those off. This is somewhat different than horizontal merger analysis. We're talking about vertical merger analysis here."). With that important principle in mind, I will now examine whether the Government has met its burden under *Section 7*.

III. The Government Has Failed to Meet Its Burden to Show That the Proposed Merger Is Likely to Substantially Lessen Competition by Increasing Turner's Bargaining Leverage in Affiliate Negotiations

The Government's primary theory of harm to competition focuses on the challenged merger's integration of Turner's important video content — content that includes, among other things, the networks CNN, TNT, and TBS — with AT&T's video distributors, U-verse and DirecTV.[22] Specifically, the Government contends that, should the challenged merger proceed, Turner's relationship with AT&T will enable Turner to extract greater prices from AT&T's rival distributors for its "must-have" content than it could without the merger. *See, e.g.*, Compl. ¶¶ 31-38. The Government argues **[**90]** that distributors would then pass on those price increases to their subscribers, resulting in an increase of hundreds of millions of dollars in annual consumer payments. *Id. ¶ 39*; Gov't PFOF ¶¶ 231-232.

According to the Government, it carried its burden to support its increased-leverage theory of harm to competition by offering what it refers to as "real-world objective **[*199]** evidence" — namely, statements contained within defendants' prior regulatory filings and internal business documents as well as testimony from third-party competitor witnesses. Gov't PCOL ¶ 21. To further corroborate its increased-leverage theory and predict the consumer harm that would be generated, the Government also relied on testimony and economic modeling proffered by Professor Carl Shapiro. Professor Shapiro opined that a post-merger Turner would be able to extract greater affiliate fees from distributors due to increased bargaining leverage Turner would gain on account of its relationship with AT&T. Citing the results of his economic models, Professor Shapiro predicts that such increased leverage would lead to total, annual consumer harms that outweigh the conceded $352 million in annual cost savings that the **[**91]** proposed merger would generate for AT&T's customers. *See, e.g.*, Tr. 2253:4-15 (Shapiro).

Not surprisingly, the defendants vigorously disagree with the Government's increased-leverage theory of harm. To start, defendants argue that the Government has failed to put forward any "meaningful real-world evidence" to support the premise that a post-merger Turner would benefit from increased bargaining leverage with distributors on account of its relationship with AT&T. Defs.' PFOF ¶ 81. If anything, defendants argue, analysis of real-world pricing data demonstrates that prior instances of vertical integration in this industry have not produced the increased-leverage effects that the Government predicts. *Id. ¶¶ 95-102*. Defendants also challenge Professor

---

[22] For purposes of this section, the Court at times refers to AT&T's collective distribution offerings as "DirecTV."

Shapiro's testimony, arguing that it lacks sufficient basis in the facts of this industry and reflects results based on a model riddled with improper inputs and faulty assumptions. *Id.* ¶¶ 86-94, 105, 111-13, 188, 204.

In evaluating these competing contentions, the Court unfortunately does not have the luxury of looking to judicial precedents applying the increased-leverage theory in the context of a *Section 7* challenge to a vertical merger. Indeed, the **[**92]** Government has not pointed to *any* prior trials in federal district court in which the Antitrust Division has successfully used this increased-leverage theory to block a proposed vertical merger as violative of *Section 7*. *Cf.* Tr. 2390:2-4 (Shapiro) (noting, with respect to proffered economic bargaining model, that "[w]hat's less common is to use it to evaluate a merger or a vertical merger especially"); Defs.' PCOL ¶ 32. Thus, in this matter of first impression, I must determine whether the evidence adduced at trial is sufficient to support the Government's assertion that Turner will likely gain increased bargaining leverage in affiliate negotiations on account of the proposed merger and, if so, whether any increased distributor or consumer costs stemming from the increased bargaining leverage will result in a substantial lessening of competition under *Section 7*.

Having heard and considered the evidence adduced at trial, I conclude that the Government has failed to clear the first hurdle of showing that the proposed merger is likely to increase Turner's bargaining leverage in affiliate negotiations; I thus need not consider the separate legal question of whether any effects associated with the Government's **[**93]** increased-leverage theory would result in a substantial lessening of competition for purposes of the *Clayton Act's* prohibitions.[23] Before explaining that **[*200]** conclusion, I need to briefly review the basics of affiliate negotiations and the Government's increased-leverage theory of harm. With that background established. I will examine the evidence put forward by the Government to support its argument that the challenged merger would likely increase Turner's bargaining leverage with distributors and thereby enable it to secure greater affiliate fees than it could without the merger. Ultimately, as I will explain, the Government's proof at trial falls *far* short of establishing the validity of its increased-leverage theory.

A. Background of Increased-Leverage Theory of Harm

As previously discussed, the terms under which distributors may license and display programmers' content are set through a "very tough" series of affiliate negotiations. Tr. 1023:2 (Breland (Turner)); *see supra* pp. 14-18. As with any type of bargaining, each party to an affiliate negotiation attempts to take advantage of its points of leverage, and "reaching a deal in the end can come down to a battle of the competing **[**94]** bargaining leverages." Tr. 1025:20-22 (Breland (Turner)); Gov't PFOF ¶ 154. In the event an affiliate negotiation is unsuccessful, the distributor will lose the rights to display the programmer's content to its customers. Such a situation is known in the industry as a programming "blackout," or "going dark." Tr. 129:4-9 (Fenwick (Cox)).

---

[23] On that score, defendants argue that "even taken at face value, the Government's projected price effects do not state a claim under the *Clayton Act*." Defs.' PCOL 159 (capitalization altered); *see also id.* ¶¶ 31-33. In particular, defendants point out that the miniscule per-consumer price increases of approximately 27-cents per month relied on by the Government would not prevent AT&T's rival distributors from competing in the marketplace or otherwise "impair[] their ability to discipline" AT&T's prices; indeed, they claim that competition would be promoted by the challenged merger's conceded vertical integration effect of lowering AT&T's prices to its projected consumers. *Id. ¶¶ 31-32*; *cf.* *Comcast Cable Comms., LLC v. FCC, 717 F.3d 982, 990, 405 U.S. App. D.C. 188 (D.C. Cir. 2013)* (Kavanaugh, J., concurring) ("Vertical integration and vertical contracts become potentially problematic only when a firm has market power in the relevant market.").

For the reasons given by defendants, the Court harbors serious doubts that the Government's proffered affiliate fee increases to AT&T's rivals or the resulting 27-cent per-month subscriber cost increases would, if proven, constitute a "substantial lessening of competition" for purposes of *Section 7*. *15 U.S.C. § 18*. As just noted, however, I need not rest this opinion on that legal conclusion. That is because, for all of the reasons provided in the section that follows, the Government has failed to carry its burden to put forward adequate evidence to show that there are likely to be *any* price increases (much less price increases that outweigh the conceded EDM benefits to consumers) either to AT&T's rival distributors or their subscribers under its increased-leverage theory.

Blackouts have significant, if not "catastrophic," negative consequences for programmers — in the form of lost advertising and affiliate fee revenues. *Id.* at 1128:7-12 (Breland (Turner)); Defs.' PFOF ¶¶ 76-77. Distributors, for their part, may lose subscribers. *See generally, e.g.*, Tr. 2197:4-2198:2 (Shapiro). In "almost every negotiation," therefore, programmers and distributors threaten blackouts in an attempt to gain concessions. *Id.* at 1026:17-1027:3 (Breland (Turner)); *cf. id.* at 367:1-22, 376:22-377:11 (Schlichting (DISH)). Given that blackouts are negative events for both programmers and distributors, however, deals between programmers and distributors are invariably struck in order to avoid long-term blackouts. *See id.* at 138:13-15 (Fenwick (Cox)); *id.* at 1027:4-7 (Breland (Turner)); *id.* at 1359:14-15 (Montemagno (Charter)); *id.* at 3124:4-7 (Bewkes **[**95]** (Time Warner)). Indeed, when it comes to Turner, the record shows that there has *never* been a long-term blackout of the Turner networks. *See id.* at 2357:12-14 (Shapiro) ("Q: But to be sure there's never been a long-term blackout of Turner, right? A: No **[*201]** . . . ."); Defs.' PFOF ¶ 94. That fact is by no means lost on either side.

That background brings us to the Government's increased-leverage theory. Notably, under that theory, the Government does *not* allege that a post-merger Turner would be incentivized to start *actually* engaging in long-term blackouts with distributors. That is so, as Professor Shapiro concedes, because withholding Turner content would not be "profitable" to the merged entity given the attendant losses in significant advertising and affiliate fee revenues. *See* Tr. 2293:9-17 (Shapiro). In other words, and in contrast to a prevalent theory of vertical merger antitrust harm, Turner will not "foreclose" downstream distributors from accessing Turner content. *See id.* at 2218:15-16 ("This is not a foreclosure-withholding story."); *cf.* *Brown Shoe, 370 U.S. at 323-24* (stating that "[t]he primary vice of a vertical merger or other arrangement tying a customer to a supplier is that, by foreclosing the competitors **[**96]** of either party from a segment of the market otherwise open to them, the arrangement may act as a clog on competition" (internal quotation marks omitted)).

Instead, the Government's increased-leverage theory of harm posits that Turner's bargaining position in affiliate negotiations would improve after the merger due to its relationship with AT&T. That is so, the Government argues, because Turner and its distributor counterparties would recognize that, should Turner fail to strike a deal and engage in a long-term blackout with a distributor, Turner would no longer face the mere downside of losing affiliate fees and advertising revenues. *See, e.g.*, Gov't Post-Tr. Br. 1-2. Rather, some of those losses would be offset, according to the Government, by new benefits to AT&T's video distribution companies via the following chain of events: 1) some of the rival distributor's customers would depart or fail to join the distributor due to the missing Turner content; 2) some portion of those lost customers would choose to sign up with AT&T's video distributors (which would have Turner); and 3) AT&T would profit from those gained subscribers. *See generally* Tr. 2197:15-2198:12 (Shapiro). As a result, **[**97]** the Government predicts that Turner's downside position in the event of a blackout would improve as a result of the proposed merger. That improved downside position, according to the Government, would in turn enable Turner to demand higher prices for its content in post-merger affiliate fee negotiations with distributors — price increases that would ultimately be passed on to consumers. *See* Compl. ¶ 38.

At trial, the Government relied on two primary categories of evidence to support its increased-leverage theory of harm. First, it offered so-called -real-world objective evidence" — namely, statements contained within defendants' prior regulatory filings and internal business documents as well as testimony from third-party competitor witnesses. Gov't PCOL 21. Second, the Government called an expert, Professor Carl Shapiro, to testify about its increased-leverage theory, which is based on an economic theory of bargaining known as the Nash bargaining theory, and to estimate the consumer harm associated with the increased-leverage theory. Gov't PFOF ¶ 201. For the following reasons, neither category of evidence was effective in proving the Government's increased-leverage theory. Accordingly, **[**98]** as to this theory, the Government has failed to meet its burden of proof to show that the merger is likely to result in a substantial lessening of competition.

[*202] B. The Government's So-Called "Real-World Objective Evidence" Is Insufficient to Support Its Increased-Leverage Theory of Harm

To support its increased-leverage theory of harm, the Government first points to various pieces of the so-called "real-world objective evidence" it offered at trial. Gov't PCOL 21. That evidence primarily consisted of defendants' ordinary course-of-business documents and excerpts of regulatory filings submitted by defendants in prior administrative proceedings, as well as the testimony of third-party witnesses from AT&T's rival distribution companies. Of particular importance here, the Government's so-called real-world evidence was directed at explaining and establishing two main concepts. First, the Government sought to establish the importance of Turner content to distributors and the resulting leverage Turner enjoys in affiliate fee negotiations. Second, the Government relied on this so-called "real-world objective evidence" to substantiate its prediction that Turner's leverage with distributors would **[**99]** *increase* as a result of Turner's post-merger relationship with AT&T. Neither, however, provided persuasive support for the Government's increased-leverage theory of harm. How so?

1. <u>Evidence Regarding the Popularity of Turner Content Is of Limited Probative Value in Evaluating the Contention That Turner Will Gain Increased Leverage Due to the Proposed Merger</u>

At trial, much time was spent debating the "must-have" status of Turner's programming content. According to the Government, distributors literally "'must haves'" Turner's content in order "to compete effectively" in the video distribution industry. Gov't Post-Tr. Br. 4; *see also id.* at 6 ("Distributors don't just want this specific input to compete effectively, they truly need it."); Gov't PFOF 23 (similar). Defendants countered that the term "must have" is simply a marketing phrase used to mean "popular" and, similarly, that Turner content is not actually necessary to allow distributors to operate their businesses successfully. *See* Defs.' PFOF ¶ 179.

Based on the evidence, I agree with defendants that Turner's content is not *literally* "must have" in the sense that distributors cannot effectively compete without it. The evidence showed that **[**100]** distributors have successfully operated, and continue to operate, without the Turner networks or similar programming. *Cf.* Tr. 351:5-25 (Schlichting (DISH)) (discussing fact that DISH's virtual MVPD, Sling, offers packages without broadcast stations and CBS); PX144-121 (listing "[p]ast [n]etwork [d]rops" by distributors). Indeed, Stefan Bewley, a consultant who generated a slide deck with recommendations for Charter's use in evaluating its relationships with programmers, indicated that "Charter would be better off and would save a lot of money [by] canceling Turner." Tr. 1336:10-12 (Bewley (Altman Vilandrie)). Sling President Warren Schlichting acknowledged DISH founder and chairman Charlie Ergen made similar statements to the investment community. *See, e.g., id.* at 365:17-366:1 (Schlichting (DISH)) (conceding that Ergen stated in investor call that a Turner blackout would be "slightly cash positive for us from a cash-flow perspective").

I therefore give little credit to blanket statements by third-party competitor witnesses indicating that the entire "viability of [their] video model" could depend on whether they offer Turner programming. *Id.* at 128:21 (Fenwick (Cox)); *see also id.* **[**101]** at 697:2-19 (Hinson (Cox)) (claiming that, without Turner, Cox would lack "the ability to compete" and that their customers would "go somewhere else"). Such statements were largely unaccompanied by any sort of factual analyses or, worse, contradicted **[*203]** by real-world examples from the witnesses themselves. *See, e.g., id.* at 128:22-129:20 (Fenwick (Cox)) (neither she nor others at Cox had done analysis of potential subscriber losses in Turner blackout); *id.* at 2947:1-13 (Holanda (RCN)) ("Q: And so today, you're not offering this Court any empirical data or any real-world evidence of subscriber losses if RCN didn't have Turner, right? A: No, not our company."). *Compare id.* at 242:14-15, 352:5-7 (Schlichting (DISH)) ("[I]f you don't have March Madness" games, half of which are carried by Turner, "you're not in the pay-TV business."), *and id.* at 245:14-15 ("Q: How about CNN, why is CNN must have? A: Well, imagine coming around to midterm elections without CNN, right."), *and id.* at 242:16-243:1 ("ABC, NBC, CBS, Fox and Time Warner are the five groups that you, you just, it's very hard to have a pay-TV service without them."), *with id.* at 352:1-19 (conceding that DISH's Sling does not carry CBS, which offers the other half of the March Madness games), *and id.* at 360:18-24, 388:10-389:5 (acknowledging that DISH went dark with CNN at time of 2014 midterm elections and suffered only negligible subscriber loss), *and id.* at 351:11-21 (admitting that Sling Orange package lacks all of the "broadcast stations [and] CBS").[24]

---

[24] The "must have" status of Turner content also varies based on whether the content is available for viewing through other means, such as over the internet. Former Cable ONE negotiator Randy Sejen testified, for example, that subscriber losses from a blackout of Turner's live baseball content were mitigated by the fact that "consumers were able to wire around" the blackout by "accessing mlb.com if they needed to see a particular playoff game." Tr. 2117:21-2118:20 (Sejen (CABLE ONE)). Along those same lines, Sejen testified that the online availability of March Madness basketball games could potentially "address the sort of must-have nature" of that content. *See id.* at 2121:11-16, 2123:1-5. 1 received similar evidence indicating that the availability of

Nor does those witnesses' (or, for that matter, defendants') use of the term "must have" to describe Turner content change things. Indeed, the evidence indicated that the term "must have" is a marketing phrase used by virtually every programmer to suggest that its content is popular with viewers. *See, e.g., id.* at 549:19-20 (Martin (Turner)) ("'Must have' is another way of saying, we have popular programming."); *id.* at 899:13-16 (Rigdon (Comcast)) (agreeing that "must have is just a term of art that means something is popular"); *id.* at 1092:18-24 (Breland (Turner)) ("[M]ust have means it's popular . . . . I don't in a literal sense mean that I must have this content or I can't be successful."); *id.* at 2130:23-2131:6 (Sejen (Cable ONE)) (agreeing that he would "expect to hear" all programmers pitch their **[**102]** content as "must-have" and that he would "kind of take that with a grain of salt").

That said, I do nonetheless accept the Government's contention that Turner has popular content - especially live sporting events and live news - and, as a result, enjoys bargaining leverage with distributors. *See* Gov't PFOF ¶¶ 70-102 (summarizing evidence regarding Turner's importance to distributors); *id. ¶¶ 103 -177* (summarizing evidence supporting proposition that "Turner's valuable content gives it leverage in negotiations" with distributors). Importantly, however, accepting that straightforward proposition - *i.e.*, that popular programmers such as Turner are able to demand more for their content than less popular programmers - does not prove that the challenged *merger* would harm competition pursuant to the Government's increased-leverage theory of harm. **[*204]** To prove its increased-leverage theory, in other words, it is not sufficient for the Government to put forward evidence that Turner has important content and thus bargaining leverage - that fact is true today, pre-merger. Rather, the Government's increased-leverage theory posits that Turner's pre-merger bargaining leverage would materially increase **[**103]** as a result of its post-merger relationship with AT&T and that, as a result, distributors would cede greater affiliate fees than they would absent the merger.

To support that contention at trial, the Government primarily relied on defendants' own statements and documents as well as testimony of third-party competitor witnesses, most (but not all) of whom expressed concern regarding the challenged merger's potential effects on their businesses. Neither category of evidence, however, is persuasive in proving that Turner's post-merger negotiating position would materially increase based on its ownership by AT&T.

2. Defendants' Own Statements and Documents Provide Little Support for the Contention That Turner Will Gain Increased Leverage Due to the Proposed Merger

According to the Government, defendants' own prior statements and ordinary course business documents "recognize that vertical integration poses a threat to competition" and, thus, provide convincing support for the Government's bargaining leverage claim. *See* Gov't PFOF ¶¶ 47-58. The Government points to statements made by defendants in the context of prior regulatory proceedings, and statements contained in internal documents such **[**104]** as slide decks and emails created by various individuals within the defendant companies. Neither category, however, was of any particular probative value. How so?

As a general matter, the Government is undoubtedly correct that "ordinary course-of-business documents, including those generated by the defendants," can be probative of whether a proposed merger is likely to result in competitive harm. Gov't PCOL ¶ 49. But as with any other piece of documentary evidence, assessing the probative value of defendants' own documents and statements requires an examination of the context, circumstances, and foundation of the proffered evidence. As such, with few exceptions, the Court denied the Government's requests to admit into evidence and cite in post-trial briefing a number of company documents for which there was no accompanying background or foundation testimony. *See supra* pp. 46-47 & nn. 11-13. With the benefit of foundational testimony, I have considered all of the documentary and testimonial evidence from defendants' files and witnesses upon which the Government relied at trial. Having done so, I nonetheless conclude that the proffered statements and

HBO's content through online, direct-to-consumer platforms has lowered the value of HBO programming — and thus its leverage — in the eyes of distributors. *See, e.g.*, DX709.

documents admitted are of such marginal probative **[**105]** value that they cannot bear the weight the Government seeks to place on them.[25]

[*205] *First*, the Government argues that defendants' statements "made in external filings with governmental authorities" are evidence of defendants' "understanding of the anticompetitive effects that result from this transaction." Gov't PCOL ¶ 52. The statements in particular upon which the Government relies were made, either in comments or supporting expert reports filed by AT&T or DirecTV, in the course of the following FCC proceedings: 1) the 2010 review of the Comcast-NBCU merger, *see* PX1 (DirecTV); PX441 (DirecTV); 2) the 2012 proceeding to determine, *inter alia*, whether to allow one of the FCC's program access rules to sunset, *see* PX2 (AT&T); PX442 (AT&T); PX443 (DirecTV); 3) the 2014 annual video competition proceeding, *see* PX444 (AT&T); and 4) the 2014 review of the AT&T-DirecTV merger, *see* PX467 (AT&T and DirecTV).[26] Not surprisingly, the Government contends that these prior statements show that defendants have previously recognized the validity of applying its increased-leverage theory to affiliate fee negotiations. *See, e.g.*, Gov't Post-Tr. Br. 2. But with that said: so what? Although I agree **[**106]** that a few of the proffered statements might be somewhat probative of the Government's increased-leverage theory, that limited probative value cannot, and does not, overcome the numerous insufficiencies with the Government's case discussed below.

In particular, in examining defendants' prior regulatory filing statements, I am mindful of the considerations discussed in the context of the third-party competitor testimony. *See infra* pp. 91-99. When AT&T and DirecTV made many of the proffered regulatory filings, they acted as competitors to (or customers of) distributors whose competitive positions would be affected by FCC review. For that reason **[*206]** alone, I am hesitant to assign any significant evidentiary value to those prior regulatory filings.

---

[25] Before proceeding further, the Court notes a bit of confusion in the Government's position about the role of defendants' alleged "anticompetitive intent" in assessing the likely harms associated with the challenged merger. Gov't PCOL ¶ 51. In opening arguments, counsel for the Government stated, in reference to the predictive exercised called for by Section 7, that "courts don't focus on intent. What they focus on is effects, effects in the market." Tr. 10:15-16. But the Government's post-trial brief cites cases for the proposition that "[e]vidence of anticompetitive intent can also form the basis of a court's prediction of harm," while at the same time noting that "absence of evidence demonstrating anticompetitive intent . . . suggests nothing." Gov't PCOL ¶ 51 & n.12.

The Court need not toil to reconcile those positions or parse the state of our Circuit's current case law on the issue. *Compare* ***Whole Foods Mkt., 548 F.3d at 1047*** (Tatel, J., concurring in the judgment) ("[T]he Supreme Court has clearly said that 'evidence indicating the purpose of the merging parties, where available, is an aid in predicting the probable future conduct of the parties and thus the probable effects of the merger." (emphasis and internal quotation marks omitted) (quoting *Brown Shoe, 370 U.S. at 329 n.48*)), *with* ***id. at 1057*** (Kavanaugh, J., dissenting) ("[I]ntent is not an element of a § 7 claim. . . . " (citing *A.A. Poultry Farms, Inc. v. Rose Acre Farms, Inc., 881 F.2d 1396, 1402 (7th Cir. 1989))* ("Firms need not like their competitors; they need not cheer them on to success; a desire to extinguish one's rivals is entirely consistent with, often is the motive behind, competition.")). That is because, as discussed below, here there is nothing akin to the direct, anticompetitive intent evidence of the other cases cited by the Government in its post-trial brief.

[26] Just prior to the close of evidence, when the Government moved the Court to take judicial notice of certain enumerated regulatory filings, I noted that the materials filled a notebook that is about "4 inches thick of paper." Tr. 3942:4-5. Given the complex analyses and arguments contained within the voluminous filings, I noted that the Government was "at an absolute minimum . . . going to have to isolate and identify as to each document which statement or statements" it thought were relevant to the case for purposes of clearing *Federal Rule of Evidence ("FRE") 403*. *Id.* at 3943:23-3944:3. In response, counsel for the Government stated that the "memorandum that I handed up isolates and lists the specific statements, and I'm happy to limit to those that are identified on page 3 and 4." *Id.* at 3945:11-13. In its post-trial papers, the Government nonetheless appears to argue that the *entire* expert reports appended to the prior regulatory filings are admissible under *FRE 801(d)(2)* as adoptions of defendants. *See* Gov't PCOL ¶ 54 & n.13. That is largely beside the point, however. That is because the Court declines to admit those portions of the proffered expert reports and filings not "identified on page 3 and 4" of the Government's motion under *FRE 403*. *Id.* at 3945:11-13. In my judgment, evaluating the complicated, fact-specific arguments and analyses contained with those filings and reports would essentially require a trial within a trial (recall that not even the expert reports in *this case* were offered into evidence by the parties), the result of which would produce evidence that is only marginally probative for all of the reasons discussed below.

Finally, with respect to this particular categories of statements, I particularly decline to place much stock in the statements related to the sunsetting of the FCC's ban on exclusive contracting between certain programmers and distributors. *See, e.g.*, PX2, PX442. Many of those statements relate to the issue of withholding content — something the Government's own expert concedes would *not* occur as a result of the proposed merger. *Compare* ***[**107]*** PX2-4 ("[V]ertically integrated programmers continue to have the incentive and ability to use (and indeed have used whenever and wherever they can) that control as a weapon to hinder competition to their down-stream cable affiliates *by withholding popular programming from competing MVPDs*.") (emphasis added), *with* Tr. 2218:13-17 (Shapiro) ("I'm not saying that after the merger, Turner will deny its content to the other distributors. *This is not a foreclosure-withholding story*.") (emphasis added). Generic statements about "mushroom[ing]" bargaining power of all programmers are similarly unhelpful to evaluating the Government's particular claims in this case. PX444-3 to -4.

That brings us to select statements made by DirecTV or AT&T that relate to vertically integrated programmers' ability to raise content prices and the use of the Nash bargaining model to estimate increased affiliate fees. *See, e.g.*, PX1-17, -83 ("[V]ertical integration of programming and distribution can, if left unchecked, give the integrated entity the incentive and ability to gain an unfair advantage over its rivals."); PX441-5 (noting "voluminous economic and other evidence that the proposed transaction would enable **[**108]** Comcast to raise the prices paid by its MVPD rivals for NBCU programming"); PX443-79 ("[V]ertically integrated MVPDs have an incentive to charge higher license fees for programming that is particularly effective in gaining MVPD subscribers than do non-vertically integrated MVPDs."). According to the Government, those statements show that defendants recognize the validity of applying *this* bargaining model to estimate the impact of AT&T and Time Warner's vertical integration on affiliate fee negotiations. Please !

Generic statements that vertical integration "*can*" allow the integrated entity to gain an "unfair advantage over its rivals," PX1-17 (emphasis added), do not come close to answering the question before the Court in relation to the Government's increased-leverage theory: whether the Government has carried its *Section 7* burden to show, through proof at trial, that Time Warner will gain increased bargaining leverage in affiliate negotiations on account of the proposed merger and, if so, whether that increased bargaining leverage would result in increased distributor or consumer costs that would constitute a substantial lessening of competition under *Section 7*. *Cf. In re Applications of Comcast Corp., 26 FCC Rcd. 4238* ¶ 24 (2011) (noting differences **[**109]** in FCC's "public interest" review and DOJ's burden for "block[ing] a transaction" under *Section 7*). Similarly, the arguments that the Comcast-NBCU merger would harm distributors or consumers (as well the projections of harm) were, of course, informed by the state of the market at the time of the proceeding and the particular inputs to the models presented to the FCC. *See, e.g., id.* app. B (Technical Appendix) (setting out various formulae and inputs used to model potential economic harm). Given all that, defendants' specific predictions regarding the ability of a merged Comcast-NBCU to leverage price increases by threatening to withhold the particular programming at issue is not particularly probative of whether a merged AT&T-Time Warner could do the same with its programming in **[*207]** today's more competitive marketplace. *Compare id.* ¶ 41 ("We do not determine at this time whether online video competes with MVPD services."), *with* Gov't PFOF ¶¶ 14-18 (detailing role of virtual MVPDs in "distribut[ing] linear channels and on demand content to subscribers over the internet"). Moreover, as discussed in more detail below, defendants' expert Professor Carlton concluded in an econometric analysis of content **[**110]** pricing following the Comcast-NBCU merger that, contrary to the predictions offered by competitors in the regulatory filings, the merger did *not* cause content prices to increase. *See infra* pp. 100-105.

That said, the Court agrees with the Government that the fact that defendants previously submitted expert reports or commentary sponsoring the use of the Nash bargaining model in the context of affiliate fee negotiations counts as a mark (albeit a faint one) against defendants' attempts to disavow the applicability of the Nash bargaining theory in this case. Unfortunately for the Government, however, my conclusion that the Government has failed to provide sufficient evidentiary support to show the Nash bargaining theory accurately reflects post-merger affiliate negotiations or the proffered bargaining model in this case does not turn on defendants' protestations that the theory is "preposterous," "ridiculous," or "absurd." Gov't PFOF ¶ 47 (quoting Tr. 50:18 (Defs.' Opening); *id.* at 3119:19-24 (Bewkes (Time Warner)); *id.* at 3430:1-11 (Stephenson (AT&T)). It rests instead on my evaluation of the shortcomings in the proffered third-party competitor testimony, *see infra* pp. 91-99; the testimony about the complex nature **[**111]** of these negotiations and the low likelihood of a long-term Turner blackout, *see infra* pp. 14-18, 115-117 & nn.34-36; and the fact that real-world pricing data and the experiences of individuals who have negotiated on behalf of vertically integrated entities all fail to support the Government's increased-leverage theory, *see infra* pp. 99-108. Therefore, even assigning *some* probative weight to the statements made by defendants in prior regulatory proceedings, those statements do not come close to providing a sufficient evidentiary basis to prove the viability of the Government's increased-leverage theory in this case.[27]

[*208] *Second*, to prove its increased-leverage theory, the Government relies upon random statements from defendants' "ordinary course" business documents, including employees' emails and internal slide decks. Indeed, the Government even featured many such statements (or, more accurately, snippets of such statements) in its Complaint and pre-trial filings. However, as became clear at trial, when live witnesses take the stand a trial by slide deck leaves much to be desired !

Exemplary of this problem is a series of Government exhibits containing **[**112]** emails and drafts of slide decks generated prior to a merger integration meeting in 2017. *See* PX31; PX184; PX189; PX363. The Government has emphasized statements excerpted from those slide decks, contending before, during, and after trial that they highlight AT&T's "core belief" that the merger would help it preserve the role of "[t]raditional Pay-TV" as a "cash cow business to AT&T for many years to come" by ensuring "stability through the slow, structural decline of the industry." PX363-12 to -13; *see, e.g.*, Compl. ¶ 3 ("As AT&T/DirecTV's strategic merger documents state, after the merger, disruption need not occur immediately — the merged firm 'can operate [its] pay-TV business as a 'cash cow' while slowly pivoting to new models."); Gov't Pre-Tr. Br. 2-3 (same).

At trial, however, we learned that those statements were drafted by a lower-level AT&T employee who had nothing to do with the substance of the decision to acquire Time Warner, *see* Tr. 1777:16-1778:3 (Manty (AT&T)), and in any event, were contained in a preliminary draft and were subsequently removed or changed, *see id.* at 1732:25-1733:25. To be sure, Government counsel endeavored to characterize that subsequent change as **[**113]** a

---

[27] The Government takes its regulatory filings argument one step further in its post-trial briefing, asserting, for the first time, that defendants' prior regulatory statements should result in them being *judicially estopped* from denying basic predicates of the increased-leverage theory of harm. Gov't PCOL ¶¶ 74-75. To say the least, that argument is a stretch. As the Supreme Court has explained, the "equitable doctrine" of judicial estoppel may be "invoked by a court at its discretion" to guard against a party's "improper use of judicial machinery" to gain an "unfair advantage." *New Hampshire v. Maine, 532 U.S. 742, 750-51, 121 S. Ct. 1808, 149 L. Ed. 2d 968 (2001)* (internal quotation marks omitted). To appropriately apply judicial estoppel against a party, the "party's later position must be 'clearly inconsistent' with its earlier position"; courts also consider whether the party has "succeeded in persuading a court to accept that party's earlier position" or would "derive an unfair advantage or impose an unfair detriment on the opposing party if not estopped." *Id.* (internal quotation marks omitted).

Applying those factors, I easily conclude that estoppel is not appropriate here. To start, the cited prior regulatory comments are not "clearly inconsistent" with defendants' current positions: predicting that a different vertical transaction, made at an earlier time period and in a less-competitive market, will shift bargaining outcomes is *not* inconsistent with arguing that the Government has failed to carry its burden of proof to show at trial that a different transaction, proposed in the context of an even more competitive market, is likely to similarly shift outcomes (much less substantially lessen competition). *Maine, 532 U.S. at 750*; *Jankovic v. Int'l Crisis Grp., 822 F.3d 576, 586, 422 U.S. App. D.C. 259 (D.C. Cir. 2016)* (declining to apply estoppel when party's position was not inconsistent). Although that consideration alone is fatal to the Government's estoppel argument, the Court further notes that the equities also weigh against applying estoppel here. The Government investigated the proposed merger for approximately one year before filing its suit. Disputes regarding the applicability of an increased-leverage theory as applied to the transaction have been front and center in the litigation, and were fully aired at trial. Given all that, I am hard pressed to understand how the Government would suffer an "unfair detriment" if defendants are not estopped; if anything, it would seem manifestly unfair to defendants to accept the Government's post-trial estoppel argument that much of the trial evidence can be ignored and indeed substituted with decades-old regulatory filings. Thus, even assuming that estoppel can be applied based on statements contained within *third-party* regulatory comments to prior administrative proceedings, *but see Abtew v. U.S. Dep't of Homeland Sec., 808 F.3d 895, 899-900, 420 U.S. App. D.C. 356 (D.C. Cir. 2015)* ("[T]he rule of judicial estoppel 'generally prevents *a party* from prevailing in *one phase of a case* on an argument and then relying on a contradictory argument to prevail in *another phase*.'" (emphasis added) (quoting *Maine, 532 U.S. at 749*)), the Court declines the Government's last-minute invitation to estop defendants here.

nefarious "sanitization" by lawyers; but testimony indicated that the "whole deck changed" as a result of the parlor room process and its attendant legal review. *See id.* at 1738:7-13, 1744:8-13. *Compare* PX363 (Apr. 8, 2017), *and* PX31 (Apr. 9, 2017), *with* PX189 (Apr. 18, 2017). In the final analysis, no upper-level AT&T witness testified to ever having viewed or otherwise relied on the draft statements. To say the least, their probative value was minimal.

As it turned out, much of the Government's proffered "ordinary course" evidence went the way of those draft slide deck statements. *Compare* Tr. 1713:20-23, 1714:3-6 (Gibson (AT&T)) (confirming that internal AT&T documents stated that "NBCU could become a more formidable negotiating power" and that "[c]ontent costs could increase" as a result of the expiration of the Comcast-NBCU consent decree) (internal quotation marks omitted), **[*209]** *with id.* at 1712:14, 25, 1714:1-2, 9-10 (testifying that the document in question represents a "draft understanding of some pretty complicated merger conditions" designed to "brainstorm the what-ifs" of what Comcast-NBCU "may be able to do" that the team "hadn't finished"), *and id.* at 1715:20-21, 1717:17-18 (email **[**114]** chain, PX11, contains "first very rough understanding of" Comcast-NBCU merger conditions by "individual who reported to me regarding merger conditions for the first time"). *See also id.* at 1770:25-1771:12, 1772:16-25 (Manty (AT&T)) (showing that PX184, although sent to two AT&T senior vice presidents in July 2016, was generated in 2014 by team of lower-level AT&T employees and consulting firm members). I need not recount all of the examples here. Suffice it to say that I find that the Government frequently "overemphasized the importance and relevance" of the excerpts from defendants' documents, given that many of them, the testimony revealed, contained "informal speculation" about "rationales for the merger" or were generated by individuals "who had no decision-making role or authority in relation to the merger." *H & R Block, 833 F. Supp. 2d at 77 n.30*; *cf.* Dep't of Justice & Fed. Trade Comm'n, Horizontal Merger Guidelines § 2.2.1 (Aug. 19, 2010) (-Horizontal Merger Guidelines") ("The Agencies give careful consideration to the views of individuals whose responsibilities, expertise, and experience relating to the issues in question provide particular indicia of reliability.").

In a few instances, however, the Government sought to **[**115]** draw evidentiary support from some of AT&T CEO Randall Stephenson's own statements and notes. The Government pointed, for example, to an email that Stephenson sent upon being informed by Time Warner CEO Jeff Bewkes that "Time Warner had 'taken a 10% stake in Hulu' and that Hulu was going to launch a virtual MVPD." Gov't PFOF ¶ 51 (alteration omitted) (quoting PX47). In response to Bewkes' statement that he did not think the announcement would impact AT&T's relationship with Time Warner, Stephenson stated that it was "hard to imagine how it won't impact all of our relationships," continuing that AT&T is "trying to figure out how we navigate a very new world where you folks are going around us while trying to preserve the old revenue streams and business models from us." PX47. At trial, Stephenson testified that his email indicated his concern that DirecTV Now, the new virtual MVPD AT&T was "standing . . . up" at around that same time, would get the "same access" as one of its virtual competitors, Hulu. Tr. 3475:21-22, 3477:6-7. In this Court's view, expressing concern about how a rival virtual MVPD's relationship with Time Warner could affect AT&T's nascent DirecTV Now platform does **[**116]** little to prove how AT&T would likely behave in the event of a vertical integration.

The Government also relies on notes that Stephenson drafted to himself in preparation for an AT&T Board of Directors Meeting to discuss the merger. *See* Gov't PFOF ¶ 52. In those notes, Stephenson listed the following as a discussion point: "How can you advantage your own distribution (TV, BB, Wireless) without harming TW position as a wide distributor of content to other SVOD, cable networks, and broadcast networks." DX609-8. The Government argues that this bullet point reflects "exactly the theory of the government's case: use content to advantage distribution." Tr. 3980:4-5 (Gov't Closing); *see also* Gov't PFOF ¶¶ 52-53. Not so. At trial, Stephenson testified credibly that the point of that note was to frame a discussion with his Board "that if there is a thought process that says we're going to use this content to enhance the distribution business, that means you're going to have to limit the distribution" and that "is **[*210]** counter is how you create value in one of these businesses." Tr. 3407:16-21. That testimony mirrors the contents of a letter sent by Stephenson to all AT&T officers shortly after the **[**117]** announcement of the proposed merger. In that letter, known among those in defendant companies as the "'Magna Carta'" of the merger, Stephenson writes "[t]o Time Warner employees: We will continue to distribute Time Warner content broadly across the industry. In fact, we want to extend its distribution deeper into mobile so all wireless companies become distribution points for Time Warner content." DX625-1; *see also* Tr. 3408:16-22 (Stephenson (AT&T)).

To be sure, the Government impugns Stephenson's explanation, calling it "curious" and credulity "strain[ing]" in light of the testimony given about the other notes on the same page. *See* Gov't PFOF ¶ 53; Tr. 3980:21, 3981:9 (Gov't Closing). But even should I fail to credit Stephenson's explanation about that particular pre-Board-meeting bullet point, the contents of that bullet point fail to meaningfully advance the Government's case. To start, as we learned at trial, there are a number of ways in which AT&T could "advantage [its] own distribution" through use of Time Warner content without acting in accordance with the Government's increased-leverage theory of anticompetitive harm. *See, e.g.*, Tr. 3220:21-3221:20 (re-stacking and re-editing **[**118]** personalized sets of CNN news clips for access on mobile devices); *id.* at 3222:4-22 (shooting, producing, and broadcasting live sporting events in 4K resolution); *id.* at 3223:13-3224:4 (integration of social media and multi-screen functionality with content).

In short, despite the Government's efforts to paint a contrary picture, this is not a case containing direct, probative evidence of anticompetitive intent on the part of high-level executives within the merging company. *Cf, e.g., Whole Foods Mkt., 548 F.3d at 1044-45* (Tatel, J., concurring in the judgment) (discussing "Project Goldmine," as well as other merger-related documents, in which Whole Foods CEO stated, among other things, that company to be acquired is the "only existing . . . springboard for another player to get into this space" and that "[e]liminating" the company "means eliminating this threat forever, or almost forever"). Stephenson's statements and the Government's other proffered documentary evidence instead suggest, at the very most, that AT&T (or its third-party consultants) recognized that one *possibility* of uniting content and distribution would be to withhold or otherwise limit content from other distributors in an attempt to benefit AT&T's distribution **[**119]** platforms. But evidence indicating defendants' recognition that it could be possible to act in accordance with the Government's theories of harm is a far cry from evidence that the merged company is likely to do so (much less succeed in generating anticompetitive harms as a result). *Cf.* *Baker Hughes, 908 F.2d at 984* ("*Section 7* involves *probabilities*, not certainties or possibilities."). That is especially true when the Government's documentary evidence is weighed against the considerable contrary evidence — including other evidence related to the motivation for the challenged merger — that came out at trial. *See, e.g.*, Defs.' PFOF ¶¶ 49-62 (collecting evidence regarding the proposed merger's ability to "enable the combined company to respond to the challenges posed by the current transformation of the video marketplace and, in so doing, bring better products and better value to consumers"); *see also supra* pp. 36-40. Thus, taking such documentary evidence for all it's worth, that evidence is only marginally probative of the viability of the Government's increased-leverage theory of harm.

[*211] 3. Third-Party Competitor Witness Testimony Provides Little Support for the Contention That Turner Will Gain Increased Leverage Due to the Proposed Merger **[**120]**

In further support of its bargaining leverage claim, the Government called a number of third-party witnesses from AT&T's competitor video distribution companies to the stand. Although such companies are "customers" that purchase Turner content, Tr. 18:15 (Gov't Opening), all of them are also competitors of AT&T's video distribution services. *See, e.g.*, Tr. 82:7-8 (Fenwick (Cox)); *id.* at 263:19-24 (Schlichting (DISH)). Not surprisingly, most of the third-party competitor witnesses testified that they oppose the challenged merger for a number of reasons. According to the Government, that "direct industry evidence" supports its bargaining claim by describing "how the merger would increase Time Warner's leverage over distributors." Gov't Post-Tr. Br. 8. I disagree. For the reasons discussed below, the third-party competitor witness testimony fails to provide meaningful, reliable support for the Government's increased-leverage theory.

As has been observed in the context of other merger cases, I start by noting the difficulty of determining just how much weight to give the proffered third-party competitors' concerns about the challenged merger. On the one hand, such testimony can provide the **[**121]** Court with insight into the nature of the industry and a proposed transaction's potential effects in the market. *See* Gov't PCOL ¶¶ 48-49. On the other hand — and particularly in the context of a vertical merger case where, as here, upstream customers are downstream competitors — there is a threat that such testimony reflects self-interest rather than genuine concerns about harm to competition. *Cf.* *Arch Coal, 329 F. Supp. 2d at 145* (citing 2A Areeda & Hovenkamp, ***Antitrust Law*** ¶ 538b, at 239 ("subjective' testimony by customers" is "often unreliable")); Horizontal Merger Guidelines § 2.2.2 (noting possibility that customers may voice opposition to merger "for reasons unrelated to the antitrust issues raised by that merger"); Tr. 2462:14-23

(Carlton) (noting that a "rival doesn't want to see a transaction that makes it[s] competitor more efficient," even though such a result may be "good for consumer[s]"). As in any Section 7 case, however, the central issue here is whether the Government has proffered sufficient support for the anticompetitive effects it asserts; it is not about protecting AT&T's rivals from any and all competitive pressures they would experience should the merger go through. *Cf.* Aetna, 240 F. Supp. 3d at 18 ("[T]he Clayton Act protects 'competition,' **[**122]** rather than any particular competitor.") (citing Baker Hughes, 908 F.2d at 988, 991 n.12). Caution is therefore necessary in evaluating the probative value of the proffered third-party competitor testimony. *Cf.* Ken Heyer, *Predicting the Competitive Effects of Mergers by Listening to Customers*, 74 Antitrust L.J. 87, 127 (2007) ("In evaluating the likely competitive consequences of proposed mergers, competition authorities and courts properly weigh the totality of the evidence, refusing to take the views expressed by customers at face value and insisting that customer testimony be combined with economic evidence providing objective support for those views . . . .").

For starters, I would note that *not* all third-party witnesses provided testimony supportive of the Government's predictions that Turner's post-merger bargaining leverage would increase as a result of its relationship with AT&T. For example, when Comcast lead negotiator Gregory Rigdon was asked whether he believed the merger would increase Turner's bargaining leverage, he answered in the negative, noting that he didn't "have any **[*212]** reason to believe that it will impact my negotiations with Turner or HBO." Tr. 884:5-6 (Rigdon (Comcast)). Thus, the evidence indicates that AT&T's largest video distribution **[**123]** competitor - and thus a significant source of harm in Professor Shapiro's model, *see, e.g., id.* at 2665:3-7 (Katz) - does not anticipate changing its negotiating strategy with respect to a post-merger Turner. Along those same lines, Randy Sejen, a recently-retired negotiator from Cable ONE, testified that when negotiating with a programmer, "it doesn't matter to us who owns the network." *Id.* at 2102:6-7 (Sejen (Cable ONE)). In short, the Government's third-party competitor witnesses were not consistently concerned regarding Turner's ability to demand increased affiliate fees post-merger.

It is the case, however, that other third-party competitor witnesses expressed "concern about the increased" bargaining leverage or other competitive gains on the part of Turner "that will result from the proposed transaction." Arch Coal, 329 F. Supp. 2d at 145. Their testimony, however, suffered from shortcomings that, when viewed in light of my fundamental concerns with crediting the "subjective views of customers in the market," *id.*, undermine the probative value of their evidence in supporting the Government's predictions of Turner's increased-bargaining leverage.

Much of the third-party competitor testimony I heard consisted of **[**124]** speculative concerns regarding how the witnesses thought Turner might act in negotiations after the merger. Some witnesses simply accepted key assumptions of the Government's increased-leverage theory without any supporting analysis or data. For example, testimony from the Government's lead-off witness, Cox negotiator Suzanne Fenwick, helps to illustrate both of those problems. When asked on direct examination about her views of the proposed merger, Fenwick stated that she is "very concerned" that, post-merger, Cox would be presented by Turner with "a horribly ugly deal and that when faced with that deal, we have to think about that if we do go dark, they have a benefit in picking up Cox customers" via DirecTV. Tr. 107:18-21 (Fenwick (Cox)). Fenwick continued that, as a result of that "benefit that is created in this merger that isn't there today," the negotiating "leverage changes" and that AT&T "has a different incentive now than they had before" — namely, the incentive to "pick up customers" lost by Cox in a Turner blackout. *Id.* at 107:12-14, 108:7-9, 148:1-2.

Fenwick's speculation about how Turner might act relies on certain key assumptions for which she had no factual basis. Indeed, **[**125]** the amount of customers that distributors would lose as a result of a Turner blackout (not to mention the resulting "benefit" to AT&T), is one of the central disputes in this case. Without offering any supporting analysis, Fenwick simply assumes those figures to be in line with the Government's predictions, a point highlighted by the following exchange during cross-examination:

> Q: So let's talk about that. How many customers are going to leave [Cox] even with the reduction in your price to your cable subscribers, how many?
> A: We don't know.
> Q: Have you tried to compute it?
> A: I have not.

> Q: You have no idea?
> A: We believe that it's a large number.
> Q: I know you believe that, but do you have any evidence, any information, any hard facts?
> A: I don't have a churn analysis for you, no.
> . . .
>
> **[*213]** Q: Do you think you had an obligation in giving testimony to oppose a merger of this importance that you would do some homework and run some numbers?
> A: No, we felt like our job was to point out how the leverage changes.
>
> Q: So you think you could just come in here and give your opinion that the leverage is going to change and you're going to lose all of these customers even though you have no idea how many customers **[**126]** you're going to lose and you've never done a single bit of quantitative analysis; is that true?
> A: Sure.

Id. at 141:1-142:5; *see also id.* at 147:22-148:10.

Testimony from other third-party witnesses suffered from similar problems. DISH Sling president Warren Schlichting testified that the merger would "kind of throw[] the card table up in the air" by placing Turner in a "win win" situation where they "can raise prices and make more money and make us less competitive, or they can raise, they can present onerous terms that we can't accept." *Id.* at 261:24-25, 262:8-22 (Schlichting (DISH)). That was so, according to Schlichting, because DISH would lose "a lot of subs" in the event of a Turner blackout and most of those lost subscribers "would accrue to [DirecTV's] benefit." *Id.* at 262:19-21. RCN CEO Jim Holanda testified that he feared his company would lose access to certain Time Warner programming rights, even though he had no "empirical data or any real-world evidence of subscriber losses if RCN didn't have Turner." *Id.* at 2947:10-13 (Holanda (RCN)). Just as with Fenwick's testimony, Schlichting's and Holanda's contentions about Turner's post-merger position — including the amount of subscribers **[**127]** they would lose and AT&T would gain — assume away many of the disputed issues in this case. *Cf id.* at 404:22-405:3 (Schlichting (DISH)) ("Q: You don't have any calculations about how many subs DISH would lose or Sling would lose if there were a blackout let's say today. . . . A: No.").

Some third-party competitor testimony even contradicted the testimony of the Government's lead expert, Professor Carl Shapiro. *Cf.* *Staples, 970 F. Supp. at 1085* (declining to "give . . . much weight" to party's testimony that was "contradicted by other evidence" submitted by the party). For example, Schlichting's testimony regarding Turner's increased post-merger leverage *assumes* that Turner would profit from, or at the very least would be willing to accept, a long-term blackout of DISH. *See, e.g.*, Tr. 263:10-12 (Schlichting (DISH)) (stating that Turner may be incentivized to blackout DISH because "it's always, it's more lucrative to take subs than it is to, you know, collect programming, programming fees"); *id.* at 264:6-8 ("Q: So you would expect to be more likely to go dark [with Turner] if the merger goes through? A: I would."). Tom Montemagno, a lead negotiator for Charter, testified similarly. He noted that his concern with **[**128]** the challenged merger is "mainly around what's going to happen with excessive price, pricing increases," and specifically, whether Charter will "lose access to critically important content that AT&T make take exclusive away from our customers and make it harder for [Charter] to compete." *Id.* at 1350:12-15, 1352:1-3 (Montemagno (Charter)). The assumptions reflected by that testimony — namely, that a post-merger Turner could and would go dark with DISH or Charter — run directly contrary to Professor Shapiro's testimony that a post-merger Turner would *not* be incentivized to blackout or otherwise withhold its content from distributors. *See id.* at 2293:3-4, 14-15 (Shapiro) (Turner will "continue to license Turner content" to distributors after the merger); *id.* at 2218:13-21 ("I'm not saying **[*214]** that after the merger, Turner will deny its content to the other distributors."). Indeed, when asked whether he was "aware" of Professor Shapiro's opinion that "it would not be profitable for the merged company to withhold the Turner Networks from DISH and other distributors," Schlichting admitted that he was not. *Id.* at 417:13-17, 418:15-16 (Schlichting (DISH)).

Other concerns raised by the third-party **[**129]** competitors were not particularly germane to the Government's *Section 7* allegations in this case. Charter's Montemagno, for example, noted his concerns that the merger would harm Charter's competitive position due to the bundling of the Turner networks and the ability of DirecTV to use advertising to appeal to Charter's customers. *See id.* at 1405:13-18 (Montemagno (Charter)). On cross-examination. however. Montemagno conceded that "none of those issues are a result of this merger," but instead "all exist in the marketplace today." *Id.* at 1407:12-18; *see also id.* at 1407:19-23 ("Q: And AT&T, DirecTV, if it wanted to buy ads on Turner or anybody else in order to try to lure your customers away, they could do that today, they could do that yesterday, couldn't they? A: They can buy them yes."). Holanda grounded RCN's concerns about the challenged merger in a prior experience with Comcast-NBCU and negotiations over RCN's "broadcast basic" package. *Id.* at 2920:6-23, 2921:2-6 (Holanda (RCN)). But that experience is not especially probative of the Government's increased-leverage theory, given that the Turner networks do not include major broadcast programming and, in any event, that penetration rates **[**130]** exist in the pre-merger market. *See id.* at 2955:9-12.

Finally — and perhaps unsurprisingly given that a post-merger Turner, like a pre-merger Turner, would stand to suffer large losses in affiliate fee and advertising revenues in the event of a blackout — the record is barren of any contentions by the third-party competitors that they would actually give in to any price increases demanded by Turner as a result of its purported increase in post-merger leverage. Schlichting never testified, for instance, that DISH would in fact pay more to Turner for its content as a result of the merger, noting instead that "I don't think we've quite figured out what we would do" during post-merger negotiations with Turner. *Id.* at 264:11-12 (Schlichting (DISH)). The lack of real-world evidence that Turner would likely be successful in obtaining increased fees from virtually every distributor (as Professor Shapiro's model projects) due to its relationship with AT&T is yet another strike against the Government's increased-leverage theory of competitive harm. *Cf.* Anthem, 855 F.3d at 360 (describing as "farfetched" the assumption that contractual negotiations will lead to the same outcome "in every instance," especially in light **[**131]** of the fact that contracts at issue were "customized relationship-driven contracts" (internal quotation marks and alteration omitted)).

In the final analysis, the bulk of the third-party competitor testimony proffered by the Government was speculative, based on unproven assumptions, or unsupported — or even contradicted — by the Government's own evidence. Especially in view of the fact that the third-party competitor witnesses have an incentive to oppose a merger that would allow AT&T to increase innovation while lowering costs, such testimony falls far short of persuasively "show[ing] that this merger threatens" to harm competition by allowing Turner to wield increased bargaining leverage. Gov't Post-Tr. Br. 8.

[*215] 4. Real-World Evidence Indicating That Prior Vertical Integration of Programmers and Distributors Has Not Affected Affiliate Fee Negotiations Undermines the Government's Increased-Leverage Theory of Harm

For the reasons discussed above, the Court is not convinced that the "real-world objective evidence" offered by the Government provides sufficient support for its increased-bargaining leverage claim. That conclusion is further bolstered by evidence relating to three prior instances **[**132]** of vertical integration in the video programming and distribution industry: 1) News Corp., a programmer, acquiring part of DirecTV in 2003 and then spinning it off in 2008; 2) the 2009 split of Time Warner, a programmer, from Time Warner Cable, a MVPD; and 3) the 2011 combination of Comcast, a distributor, and NBCU, a programmer. *See* Defs.' PFOF ¶ 96; Tr. 2440:4-8 (Carlton). According to defendants, the econometric analysis of their chief economic expert, Professor Dennis Carlton, and witness testimony both provide significant, real-world evidence indicating that, contrary to the Government's increased-leverage theory, those prior instances of vertical integration did not affect affiliate fee negotiations or content prices. For the following reasons, the Court agrees with defendants.

a. Professor Carlton's Econometric Analyses of Prior Vertical Transactions Found No Statistically Significant Effects on Content Pricing

When it comes to evaluating the antitrust implications of proposed mergers, both Professor Shapiro and Professor Carlton recognize that empirical analysis of prior, similar transactions can be "convincing evidence." Tr. 2526:13 (Carlton); *see id.* at 3885:25-3886:20 (Shapiro) **[**133]** (agreeing with the "general thrust" of statement that "compar[ing] the observed changes from completed mergers against premerger predictions" is the "most direct way" to gauge the "reliability of different methods of evaluating proposed mergers"); *cf.* Horizontal Merger

Guidelines § 2.1.2 ("The Agencies look for historical events, or 'natural experiments,' that are informative regarding the competitive effects of the merger. For example, the Agencies may examine the impact of recent mergers, entry, expansion, or exit in the relevant market."). In this case, however, neither the Government nor Professor Shapiro presented original analysis of any prior vertical transactions in this industry. *See* Tr. 2337:11-13 (Shapiro) ("I did not end up doing my own separate analysis" of transactions analyzed by Professor Carlton.); *id.* at 2473:22-25 (Carlton) ("Professor Shapiro did no econometric analysis of any of the data as far as I can tell."); *see also* Defs.' PFOF ¶¶ 96, 99.[28]

Defendants, by contrast, did seek to analyze the available pricing data resulting from prior instances of vertical integration. Although they initially had trouble obtaining some of the relevant pricing data from the Government or **[**134]** third-parties, *see supra* pp. 44-45, they were eventually able to obtain the data after seeking relief from this Court, *see id.*; 1/22/18 Order. Defendants' lead economic expert, Professor Dennis Carlton, then analyzed that third-party pricing data, among other proprietary and public-source data in his possession, to test whether it is "true that **[*216]** content prices are higher on a network when it's sold by someone who's vertically integrated." Tr. 2470:10-12 (Carlton). Specifically, Professor Carlton performed a "regression analysis or an econometric analysis, which is a statistical attempt to answer the question precisely." *Id.* at 2473:1-2. In running his regressions, Professor Carlton used different "statistical techniques to analyze the problem in a variety of ways." *Id.* at 2473:7-8.

All of that analysis, Professor Carlton testified, generated "completely consistent" results across all three examples he considered: "There's absolutely no statistical basis to support the government's claim that vertical integration in this industry leads to higher content prices." *Id.* at 2473:13, 2440:13-15; *see id.* at 2470:13-17, 2476:22-24. The "bulk of the results," Professor Carlton explained, "show no statistically **[**135]** significant result at all," although "many do show a *decrease*" in content prices. *Id.* at 2477:7-12 (emphasis added). Moreover, Professor Carlton noted that his results are particularly "compelling" in light of the fact that the industry, as reaffirmed by numerous witnesses at trial, is "more competitive" today than at the time of the prior transactions he analyzed. *Id.* at 2476:6-9; *see also id.* at 1398:24-25 (Montemagno (Charter)) (video distribution business is "more competitive now than I've ever experienced in my career"); *id.* at 2134:1-3 (Sejen (Cable ONE)) ("Q: In your 31 years in the industry, have you ever seen it more competitive at the distribution level? A: No."); *id.* at 2950:2-6 (Holanda (RCN)) ("Q: And so in the course of this 30 years that you have been in the business, the video distribution market today is more competitive than at any point that you can recall, true? A: True."); *id.* at 3213:9 (Stankey (AT&T)) (competition in industry is "at an all-time high"). In short, based on his analysis, Professor Carlton stated that there has been "nothing like" the price increases predicted by Professor Shapiro following prior instances of vertical integration of programmers and **[**136]** distributors. *Id.* at 2470:19-20 (Carlton).

Although the Government and Professor Shapiro sought to undermine the basis for Professor Carlton's conclusions at trial, those efforts were unavailing. Professor Shapiro, for his part, critiqued Professor Carlton for relying on faulty data and attempting to draw conclusions from prior transactions that are not comparable to the challenged merger. Focusing on Professor Carlton's reliance on SNL Kagan data, Professor Shapiro stated that such data is "pretty poor" because it relies on "public sources" and reports content costs "to all of the distributors on average." *Id.* at 3831:11-18 (Shapiro). Of course, Professor Carlton testified that he relied not only on SNL Kagan data, but also on data from third parties such as DirecTV, DISH, and Charter — all of which, when analyzed, showed no statistical pricing effects associated with the relevant prior instances of vertical integration. *Id.* at 2470:4-12 (Carlton). Taking Professor Shapiro's critiques of the SNL Kagan data on their own terms, however, those critiques miss the mark. For one thing, even Professor Shapiro acknowledged that SNL Kagan data is "commonly used" by individuals in the industry. **[**137]** *Id.* at 3889:3 (Shapiro); *see also, e.g., id.* at 1073:20-1074:4 (Breland (Turner)).[29] Moreover, it was SNL Kagan data that formed the basis of the only study of prior harm cited by the Government and Professor

---

[28] Indeed, when asked in discovery whether it had a position on whether these transactions affected content prices, the Government cited to one FCC study related to the News Corp.-DirecTV transaction and stated that, beyond that study, "the United States does not, at this time, have a position as to whether any prior vertical integration between a programmer and a distributor resulted in higher video programming fees" or "higher prices for consumers" than "would have prevailed absent the integration." DX893-28 to -29.

[29] One more witness testified to this fact in sealed testimony. Tr. 930:17-18 (SEALED).

Shapiro. *Id.* at 3889:4-9 (Shapiro) (agreeing that FCC study that he "relied on" in his expert report was "based on Kagan data"); Gov't Post-Tr. Br. 16 (citing same FCC study); DX893-28 (Gov't answer to interrogatory, citing same FCC study): *see also* Tr. 2467:21-2468:9 (Carlton). For those reasons, Professor Shapiro's **[*217]** criticisms of defendants' prior transaction data does not, in this Court's view, detract from Professor Carlton's expert opinion that defendants' evidence related to the prior transactions is "especially probative" when considering the Government's claims of harm. *Id.* at 2475:21-22 (Carlton); *see id.* at 2441:13-20 ("Ignoring that evidence is a big mistake.").

Professor Shapiro and the Government also denounced Professor Carlton's analysis on the basis that the prior vertical transactions are not sufficiently similar to the challenged merger. They pointed out, for example, that two of the prior transactions involved regional cable distributors (Comcast and Time Warner **[**138]** Cable), whereas the challenged merger involves DirecTV, which operates nationally. Regional operation means, Professor Shapiro testified, that one would "not expect[] to see evidence of post-merger price increases beyond the overall industry increases" because "most of the MVPDs . . . don't compete with Comcast," for example. *Id.* at 2338:8-13 (Shapiro); *cf. id.* at 2558:18-2559:15 (Carlton). Professor Carlton explained, however, that the regional versus national distinction is "irrelevant" when it comes to his analysis of DirecTV and DISH prices; that is so, Professor Carlton stated, because those two satellite companies compete "everywhere" the regional cable companies operate and it is the "national share" that matters to Professor Shapiro's bargaining model. *Id.* at 2474:11-17, 2560:5-11 (Carlton). To the extent the Government is now arguing that one would not expect to see *any* increased-leverage harm due to Comcast's status as a regional distributor, I simply note that the Government argued to the contrary prior to this case. *See, generally, e.g.*, Compl., *Comcast Corp., 808 F. Supp. 2d 145* (No. 11-cv-106).

Finally, the Government and Professor Shapiro note that the prior vertical transactions all were "remediated" **[**139]** by regulatory or court-ordered conditions — conditions that will not apply to the challenged merger. Tr. 3830:20 (Shapiro). Professor Carlton agrees that, in theory, his study's conclusions would be affected if the conditions associated with the prior transactions were not "sufficiently similar" to those at issue here. *Id.* at 2558:12-15 (Carlton). I will thus briefly address Turner's 2017 arbitration offer and its relation to the conditions on the Comcast-NBCU transaction.

The arbitration proceedings envisioned by Turner's offer are similar in many of "the fundamental ways" to those blessed by the FCC, DOJ, and this Court in the Comcast-NBCU merger. Defs.' PFOF ¶ 214 (citing Tr. 2680:1-9 (Katz)); *see also id.* ¶ 225. Most notably, both arbitration arrangements are "baseball-style": each party puts forward a final offer before knowing about its counterparty's offer, and the arbitrator chooses between those two. Tr. 2680:1-9 (Katz). In addition, both sets of arbitration arrangements contain "standstill provisions," which prevent the blackout of content while the arbitration is pending. *Id.* They also both set out "fair market value" as the standard, and have similar discovery procedures. **[**140]** *Id.* at 2680:1-13. As Professor Katz testified, "the objective is the same. The overall structure the same. So they are similar overall." *Id.*; *see also id.* at 2958:12-16 (Holanda (RCN)). Given all of these similarities, I conclude that Professor Carlton's econometric analysis of the pricing effects of the Comcast-NBCU combination can be afforded probative weight in predicting the potential pricing effects of the challenged merger.[30]

[*218] To sum it up, neither the Government nor Professor Shapiro has given this Court an adequate basis to decline to credit Professor Carlton's econometric analysis. And that analysis, according to Professor Carlton, definitively shows that prior instances of vertical integration in the video programming and distribution industry have had no statistically significant effect on content prices.

---

[30] The parties spent a good deal of the trial debating the finer points of Turner's November 2017 arbitration offer, made shortly after the filing of the Complaint in this case. The Government asserts that the arbitration commitment must be ignored or, at the very least, must be proven binding and effective by defendants, while defendants describe its absence from Professor Shapiro's model as a critical weakness in the model's design and the Government's prima facie case. *Compare* Gov't Post-Tr. Br. 21-22, *with* Post-Trial Br. of Defs. ("Defs.' Post-Tr. Br.") 14. For purposes of this discussion, as explained below, I have confidence that Turner's arbitration offer will have real-world effect and, thus, that it is appropriate to consider Professor Carlton's econometric analysis of the Corncast-NBCU transaction. *See infra* n.51.

b. Executives from Vertically Integrated Programmers and Distributors Testified That Vertical Integration Does Not Affect Affiliate Fee Negotiations

Professor Carlton's analysis of prior vertical integration is further reinforced, defendants contend, by the consistent testimony of Comcast-NBCU and Time Warner executives that the integration of programming **[**141]** and distribution does not affect affiliate negotiations. I agree.

Defendants first point to the testimony from Madison Bond, who has served as a lead negotiator for NBCU during the past seven years when the company has been vertically integrated with Comcast. When questioned by defense counsel about his prior negotiations on behalf of NBCU, Bond testified that he "never once took into account the interest of Comcast cable in trying to negotiate a carriage agreement." Tr. 2014:22-24 (Bond (NBCU)). Consideration of potential Comcast gains during an NBCU blackout "doesn't factor at all" into his negotiations, Bond continued, nor has anyone from Comcast "ever asked" him "to think about that." *Id.* at 2015:1, 2015:10-12. Bond's statements were similar to testimony given by Comcast's chief negotiator, Greg Rigdon, who testified that he has never suggested, or seen a Comcast document suggesting, that NBC "should go dark on one of [Comcast's] competitors because then [Comcast] might pick up some subscribers" or that NBCU should "hold out for a little bit more in affiliate fees because that will harm" Comcast's competitors. *Id.* at 882:22-24, 883:1-11 (Rigdon (Comcast)).[31]

Time Warner executives testified similarly about their time at the company when it was vertically integrated with Time Warner Cable. Recalling that period, Time Warner CEO Jeff Bewkes testified that he was not aware of any Time Warner negotiator "articulating this theory of added incentive or added ability to leverage a price increase" because Time Warner was "vertically integrated with Time Warner Cable." *Id.* at 3121:22-3122:8 (Bewkes **[*219]** (Time Warner)). Turner CEO John Martin, who served as CFO of Time Warner Cable at the time it was vertically integrated with Time Warner, testified along the same lines, as did Turner lead negotiators Coleman Breland and Richard Warren. *See id.* at 601:10-602:15 (Martin (Turner)) ("Q: Did you ever hear anyone say that Turner would have more leverage because Time Warner Cable and Turner were in the same family? A: No, I did not"); *id.* at 1129:6-12 (Breland (Turner)) ("I've been in Turner when we were a vertically integrated company and had a sister company called Time Warner Cable. And I can tell you at no time during my tenure there did anyone ask me to consider in my negotiations and how I dealt with other distributors the outcome and impact **[**143]** at Time Warner Cable . . . ."); *id.* at 1190:14-15 (Warren (Turner)) (noting, when asked about Government's increased-leverage theory, that "[w]e didn't do that when we were part of Time Warner Cable"). Martin also testified that Time Warner's content prices did not decrease following the spin-off of Time Warner Cable. *See id.* at 603:24-604:1 (Martin (Turner)).

The Government seems to believe that any "post-merger" testimony given by Time Warner executives should be "discount[ed]" as potentially biased because it was given by interested employees of a defendant company. Gov't PCOL ¶ 56. Poppycock! The testimony at issue does not involve promises or speculations about the employees' future, post-merger behavior. Rather, it is testimony about what these executives previously experienced when working within a vertically integrated company. That testimony regarding executives' prior experiences in the industry is uniform among all testifying witnesses and unrebutted by the Government; moreover, it finds

[31] In response, the Government asks this Court to ignore the import of that testimony from the Comcast and NBCU witnesses on the basis that the conditions governing the Comcast-NBCU transaction would have prevented any coordination between the programming and distribution components and thus rendered such conversations between the two pointless. *See* Gov't Post-Tr. Br. 19 n.14. Please! The Comcast and NBCU witnesses' testimony aligns with testimony from witnesses not subject to the FCC order's conditions and is also entirely consistent, as subsequently discussed, *see infra* pp. 114-117, with the goal of companywide profit maximization. *See* Tr. 601:10-602:15 (Martin (Turner)); *id.* at 1129:6-12 (Breland (Turner)); *id.* at 1190:14-15 (Warren (Turner)); *cf. id.* ***[**142]*** at 2102:6-11 (Sejen (Cable ONE)) ("I mean, it doesn't matter to us who owns the network . . . . It really doesn't matter."). For that reason, among others, *see infra* nn. 34, 36, I decline the Government's invitation to disregard the Comcast and NBCU witnesses' testimony referenced in this section.

independent support in the analysis performed by Professor Carlton. For those reasons, I decline the Government's request to discount it.

To be sure, neither Professor Carlton's econometric **[**144]** analysis nor the testimony discussed above provides "perfect evidence" of what will happen as a result of the challenged merger. Tr. 2475:15-17 (Carlton). But when weighed against the relatively weak documentary and third-party testimonial evidence proffered by the Government in support of its increased-leverage theory, the real-world evidence indicating that vertical integration has not affected content prices or affiliate negotiations further undermines the persuasiveness of the Government's proof.

C. The Government's Expert Testimony Is Also Insufficient to Support Its Increased-Leverage Theory of Harm

In addition to offering the so-called "real-world objective evidence" set out above, the Government called noted antitrust economist, Professor Carl Shapiro, to testify in support of its increased-leverage theory. Professor Shapiro first discussed the academic underpinnings of the theory, explaining that it was grounded in an economic concept known as the Nash bargaining theory. Thereafter, Professor Shapiro opined that Turner's post-merger leverage would increase pursuant to those economic principles. In order to predict the increased distributor costs and consumer harms that would **[**145]** result from Turner's increased post-merger leverage, Professor Shapiro constructed economic models. Acknowledging that proper antitrust analysis of a proposed vertical merger requires balancing the merger's proconsumer benefits with its harms, *see supra* pp. 52-54, Professor Shapiro testified that the challenged merger would result in annual consumer cost increases that would far outweigh the $350 million in annual EDM savings he conceded the merger would generate. He thus concluded, based on his economic modeling, that the merger was likely to **[*220]** cause a substantial lessening of competition by increasing consumer costs as a result of Turner's increased bargaining leverage.

At trial, defendants mounted a series of attacks on Professor Shapiro's analysis. They challenged Professor Shapiro's threshold contention that the economic theory of Nash bargaining can accurately predict the dynamics and final fee structure of complex affiliate fee negotiations. They also asserted that the theory, as applied here, rests on improper assumptions — including the notion that Turner could gain increased leverage from threatening a long-term blackout — that negate its usefulness in evaluating the real-world effects of **[**146]** the proposed merger. Finally, defendants, both through their own experts and their examinations of industry witnesses, argue that Professor Shapiro's inputs are faulty, and note further that use of the proper inputs would cause the model to predict that the merger will have a net benefit to consumers rather than a net harm. As will become clear in the section that follows, I largely agree with defendants' various critiques of Professor Shapiro's testimony.

For starters, I couldn't help but notice that the more and more questions were raised during the trial about the reliability of Professor Shapiro's theory and model, the more the Government appeared to be minimizing the importance of his analysis. *Cf.* Defs.' Post-Tr. Br. 10 (noting Government's attempt to "retreat from the model" in its closing argument). Indeed, during its closing argument, the Government touched on Professor Shapiro's model relatively briefly, arguing that it simply "confirmed what the industry witnesses had already explained." Tr. 4000:5-6 (Gov't Closing). And the Government's post-trial filings, for their part, all but ask the Court to overlook any failings of the model, arguing that "*Section 7* does not require any quantification **[**147]** of harm from a price increase" and that "it would be perverse to penalize a plaintiff that does provide a quantification of the potential price increase." Gov't PCOL ¶ 20; *see also* Gov't Post-Tr. Br. 15 ("[D]efendants' critique of Professor Shapiro's model misses the bigger picture: the model is but one part of Professor Shapiro's opinion, and his opinion is one part of the United States' evidence.").[32] Go figure!

---

[32] To the extent the Government's increased-leverage theory now leans more heavily for support on the industry witness testimony and defendants' documents, as "framed" by Professor Shapiro's analysis more generally, Gov't Post-Tr. Br. 8, that shift in emphasis fails to salvage its claim given the independent problems with that so-called "real-world objective evidence" set out in the section above. *See supra* pp. 75-109; *cf.* Defs.' Post-Tr. Br. 10 ("But adding zero to zero is hardly a sound way to prove a price increase."). In the Court's view, however, it is worth noting that the Government's retreat from Professor Shapiro's

[*221] With that, I will now turn to my own evaluation of Professor Shapiro's expert testimony. First, I will explain why the evidence is insufficient to support Professor Shapiro's conclusion that this Nash bargaining theory will accurately predict an increase of Turner's post-merger bargaining leverage in affiliate fee negotiations with distributors. Second, I will examine Professor Shapiro's economic bargaining model, concluding that the evidence is also insufficient to support the input values upon which he relied to generate his predictions of harm.

1. The Evidence Is Insufficient to Support Professor Shapiro's Conclusion That the Merger Will Increase Turner's Bargaining Leverage and, in Turn, Affiliate Fees

Relying on a particular economic bargaining **[**148]** theory, Professor Shapiro opines that, due to its post-merger relationship with AT&T, Turner's leverage in affiliate negotiations will increase due to a reduction in financial exposure in the event of a long-term blackout. Professor Shapiro in turn opines that, as such, a post-merger Turner would be able to secure greater affiliate fees from distributors.

HN4[] It is beyond dispute that, to be probative in a particular case, expert testimony must incorporate assumptions that are "reasonable" in light of the record evidence. Joint Statement 8; *cf. Brooke Grp. Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 242, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993)* ("When an expert opinion is not supported by sufficient facts to validate it in the eyes of the law, or when indisputable record facts contradict or otherwise render the opinion unreasonable, it cannot support a jury's verdict."). Hewing to that rule is especially important in *Section 7* cases, where the Supreme Court's observation that "only" an "examination of the particular market — its structure, history and probable future — can provide the appropriate setting for judging the probable anticompetitive effect of the merger" dictates that the disputes "must be resolved on the basis of record evidence relating to the market and its probable future." *General Dynamics, 415 U.S. at 498* (internal **[**149]** quotation marks omitted); *Arch Coal, 329 F. Supp. 2d at 116-117*. "Hence," to borrow a line from one of my able colleagues, "antitrust theory and speculation cannot trump facts." *Arch Coal, 329 F. Supp. 2d at 116*; *accord* Gov't PCOL ¶ 22 n.6 (quoting Steven C. Salop, *Invigorating Vertical Merger Enforcement*, *127 Yale L.J. 1962, 2018 (2018)* ("[T]he direction of the net competitive effect is a question of fact, not theory. . . ."). That is true no matter whether the testimony relates to a theory that is considered "mainstream" or has been deemed applicable to different factual or economic scenarios in other proceedings. Gov't PFOF ¶ 202; *cf.* Gov't Post-Tr. Br. 9.[33] Unfortunately for Professor Shapiro, **[*222]** the facts adduced at trial regarding the real-world operation of affiliate negotiations demonstrated that his testimony "rests on assumptions" that are "implausible and inconsistent with

---

model cannot be squared with Professor Shapiro's testimony (seemingly approved by the Government) that to perform a valid "vertical merger analysis" under the applicable "consumer welfare" standard, it is necessary to "balance" or "tradeoff" the merger's proconsumer benefits with any predicted consumer harms. *See* Tr. 2180:8-2181:8, 2182:7-21, 2253:4-5 (Shapiro). At trial, that "somewhat different" "balancing" analysis of the challenged vertical merger was enabled not by the testimony of the third-party competitors or defendants' documents and statements, but by the cost-benefit predictions Professor Shapiro generated through use of his models. *See id.* at 2182:17-18, 2252:19-2253:15. For that reason, asking the Government to provide sufficient support for the proffered bargaining model is not, as the Government seems to argue, penalizing them for failure to quantify the "specific *magnitude* of the potential harm," Gov't PCOL ¶ 16, but instead is simply part and parcel of what Professor Shapiro testified is necessary to determining *whether* the proposed vertical merger will harm consumers overall.

[33] On that score, it is notable that, although the Government states that its proffered bargaining model is "a standard model that is in economics textbooks and widely used by economists," Gov't PFOF ¶ 202, Professor Shapiro acknowledged that, with respect to the model. "[w]hat's less common is to use it to evaluate a merger or a vertical merger especially," Tr. 2390:2-3 (Shapiro).

To support Professor Shapiro's testimony regarding economic bargaining theory and his model, the Government contends that defendants' experts "endorsed" application of the model generally, but quibbled with the model's inputs. Gov't Post-Tr. Br. 2. That characterization is questionable, especially given Professor Carlton's extensive testimony about his conclusion that "the evidence provides no statistical support for the government's claim that prices will rise in this transaction" — statistical evidence that he considers more probative in analyzing the Government's increased-leverage theory than Professor's Shapiro's "quite . . . complicated economic model." Tr. 2439:19-25, 2441:25 (Carlton); *see id.* at 2439:22-2441:25. Nonetheless, it is of course the Government's burden — not defendants' — to sufficiently link its proffered expert testimony to the underlying facts in the industry. It is therefore no surprise that Professor Carlton spent most of his limited time on the stand discussing the econometric studies he performed, rather than cataloguing whether the facts adduced at trial support Professor Shapiro's testimony.

record evidence." *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 594 n.19, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*.

To start, various industry witnesses testified that the identity of a programmer's owner does not affect the negotiating dynamic. Indeed, this opinion by Professor Shapiro runs contrary to all of the real-world testimony during the trial from those who have actually negotiated on behalf of vertically integrated companies. While I need not repeat their testimony here, I would simply **[**150]** note that the witnesses consistently testified that they had *never* considered the identity of the programmer's owner in the course of affiliate fee negotiations. *See, e.g.*, Tr. 2014:22-2015:14 (Bond (NBCU)); *id.* at 882:22-24, 883:1-11 (Rigdon (Comcast)); *id.* at 3121:22-3122:8 (Bewkes (Time Warner)); *id.* at 601:10-602:15 (Martin (Turner)); *id.* at 1129:6-12 (Breland (Turner)); *id.* at 1190:14-15 (Warren (Turner)). One was left to wonder why Professor Shapiro turned a blind eye to such extensive real-world experience? When I asked Professor Shapiro about the effect of that testimony on his analysis, the following exchange ensued:

> [A]: No, I am aware of that testimony. And so I think there's a very serious tension between that testimony and the working assumption for antitrust economists that Professor Carlton and I share; that the company after the merger will be run to maximize their joint profits.

> [A]: So what I'm saying is that it will be in AT&T's interests to play this — to use this leverage in the negotiations. It will be in their interest —
> The Court: So that's an assumption that you're making?
> [A]: Yes, it is. Okay.
>
> The Court: But you don't have an independent basis of evidence for **[**151]** that?
> [A]: That is fair.
> The Court: That's an economist assumption?
> [A]: That is true. That is true.
> ...
> [A]: Look, I think if you accept that, which, from my point of view, would not be in the combined interests of the new company. They would be leaving money on the table.
> The Court: Okay.
> [A]: If you accept that, then this bargaining leverage would not come into play.

Id. at 2199:22-2200:2, 2200:22-2201:7, 2202:6-12 (Shapiro).

The Court accepts Professor Shapiro's (and the Government's) argument that, generally, "a firm with multiple divisions will act to maximize profits across them." Gov't Post-Tr. Br. 19; *see also* Tr. 2525:22-25 (Carlton). That profit-maximization premise is *not* inconsistent, however, with the witness testimony that the identity of a programmer's owner has not affected affiliate negotiations in real-world instances of vertical integration. Rather, as those witnesses indicated, vertically integrated corporations have previously determined that the best way to increase company wide profits is for the programming and distribution components to separately **[*223]** maximize their respective revenues. *See, e.g.*, Tr. 2015:16-19 (Bond (NBCU)) ("Q: And, in fact, what you were doing is trying **[**152]** to maximize the revenue of NBC as a programmer in those negotiations, correct? A: Yes, sir."); *see also id.* at 1129:17-18 (Breland (Turner)). In the case of programmers, that means pursuing deals "to be on all the platforms," rather than undertaking a "series of risks" to threaten a long-term blackout. *Id.* at 1129:17-22 (Breland (Turner)); *id.* at 3120:22 (Bewkes (Time Warner)). So understood, the consistent and, in this Court's judgment, credible, trial testimony is not in fact in "serious tension" with "economic logic" — just with Professor Shapiro's opinion that the identity of a programmer's owner influences negotiations! *Id.* at 2199:22-2200:2 (Shapiro); Gov't Post-Tr. Br. 19.

Next, Professor Shapiro's opinion that Turner's post-merger relationship with AT&T will enable Turner to more credibly threaten a distributor with a long-term blackout in order to extract greater affiliate fees was severely undermined by defendants' evidence that such a blackout would be infeasible. *See id.* at 2195:4-7 (Shapiro) ("Q: Explain to His Honor why blackouts are relevant here for this discussion today. A: Well, even though they don't happen very much, that's the key to leverage, okay?"); *see also* ***[**153]*** *id.* at 2442:13-17 (Carlton). Indeed, the evidence showed that there has never been, and is likely never going to be, an actual long-term blackout of Turner content. *See id.* at 2218:13-23, 2357:12-14 (Shapiro). Numerous witnesses explained,[34] and Professor Shapiro acknowledged, that a long-term blackout of Turner content, even post-merger, would cause Turner to lose more in affiliate fee and advertising revenues than the merged entity would gain. *Cf id.* at 2293:2-17. Given that, there is an insufficient evidentiary basis to support Professor Shapiro's contention that a post-merger Turner would, or even could, drive up prices by *threatening* distributors with long-term blackouts.[35]

[*224] It is worth emphasizing again that Professor Shapiro does *not* contend that Turner's economics are going to somehow flip after the merger — he acknowledged, for example, that Turner would lose over $100 million per month during a post-merger blackout with a large distributor. *Id.* at 2314:4-15; *see also id.* at 2293:3-15 (agreeing with defense counsel that Turner will "continue to license Turner content" to distributors because it would **[**154]** be "profitable" to do so). As a result, Professor Shapiro testified that Turner would not be incentivized to *actually* engage in a long-term blackout with a distributor:

> I should say — I think we skipped over it. I'm not saying that after the merger, Turner will deny its content to the other distributors. This is not a foreclosure-withholding story. . . . I considered whether there would be withholding. And that has been a concern in some private — prior vertical mergers. And I did not think that would happen.

Id. at 2218:13-21; *see id.* at 2443:12-15 (Carlton).

In view of that evidence on the prospects of a long-term blackout, the lynchpin of Professor Shapiro's testimony (and, accordingly the Government's increased-leverage theory) is the *assumption* that a post-merger Turner would gain increased leverage by wielding a blackout threat that will only be somewhat less incredible. That does not make sense as a matter of logic and, more importantly, that has not been supported by sufficient real-world evidence.[36]

---

[34] Witness after witness confirmed that blackouts — and the attendant loss of distribution — have "massive implications" for Turner. Tr. 1189:13-16 (Warren (Turner)); *see also, e.g., id.* at 659:22 (Martin (Turner)) ("[I]t's very bad for business to go dark."); *id.* at 1128:7-1129:4 (Breland (Turner)) ("I lose money the minute I go dark. It can be catastrophic to my business . . . ."); *id.* at 3119:22-3120:22 (Bewkes (Time Warner)) ("So if our channels, any of them, are not in some distribution offering, that's catastrophic for us. We lose a lot of money. . . . Due to the size of most of our distributors, hundreds of millions of dollars."). During Turner's one-month blackout with DISH in 2014, for example, Turner lost "[n]orth of 30 million dollars" in subscriber fees and advertising revenue. *Id.* at 1115:2 (Breland (Turner)). In order to end the blackout, Turner agreed to a temporary affiliate agreement extension that released DISH from any obligation to pay $120 million in audit monies that Turner believed it was owed. *Id.* at 1118:15-19. Turner agreed to cede those funds, Turner executive Coleman Breland testified, because Turner was "bleeding" and "losing a tremendous amount of money" during the blackout. *Id.* at 1118:23-24. Given all that, it is perhaps unsurprising that, for all of the testimony about the "very intense and aggressive" nature of affiliate negotiations, *id.* at 3251:24-25 (Stankey (AT&T)), Professor Shapiro testified that Turner has *never* experienced a long-term blackout with a distributor, *see id.* at 2357:12-14 (Shapiro).

[35] To understand why, note that Professor Shapiro's opinion incorporates the "key" recognition that each side's bargaining leverage "is based on what would happen if there were no deal." Tr. 2193:16-18 (Shapiro). Simply stated, if a party's alternative to striking a deal improves, that party is more willing and able to push harder for a better deal because it faces less downside risk if the deal implodes. Professor Shapiro gave an example of negotiations between a seller and buyer of a used car; he noted that if the seller's next-best offer improves, he will be able to extract a higher price from the original buyer. *See id.* at 2213:2-10. The bargaining concept the example demonstrates, Professor Shapiro explained, is that "you have more leverage now because you have a better offer. And you will be more . . . willing to apply that leverage. And some of them are willing to walk away, if necessary. . . . [B]etter outside offers make one party stronger in those negotiations." *Id.* at 2213:13-20. Unlike the car seller, who might be "willing to walk away" and accept his alternative offer to sell the car for a gain, however, *id.* at 2213:15-16, the evidence at trial indicated that Turner would *not be willing* to accept the "catastrophic" affiliate fee and advertising losses associated with a long-term blackout, *id.* at 1128:10 (Breland (Turner)); *see supra* pp. 14-18.

[36] The Court finds Time Warner CEO Jeff Bewkes' response to a question regarding the increased-leverage theory to be particularly persuasive: "And the way I — I think it's best the way to understand it, is if we have a risk that a thousand-pound weight might fall on us — we hope it doesn't, but if that's always there, then if you said to me, well, don't worry; it might be a 950-

[*225] 2. The Evidence Is Insufficient to Support the Inputs and Assumptions Incorporated into Professor Shapiro's Bargaining Model **[**155]**

In order to measure the increased distributor and consumer costs associated with his prediction that Turner's post-merger bargaining leverage would increase, Professor Shapiro constructed a rather complex economic bargaining model.[37] That model seeks to quantify the benefits that AT&T would gain as a result of a long-term, post-merger blackout of the Turner content on AT&T's rival distributors. According to Professor Shapiro, those benefits correspond to the increased affiliate fees that AT&T's rival distributors will pay as a result of Turner's increased post-merger bargaining leverage.

As Professor Shapiro explained at trial, his model relies on three primary inputs: 1) a figure for long-term subscriber loss, which is the total loss of subscribers a distributor would experience in the event of a long-term blackout of Turner content; 2) the diversion rate, which estimates the percentage of a distributor's lost subscribers that would sign up for AT&T's distribution services; and 3) AT&T margin data, from which Professor Shapiro calculates a measure of profits that AT&T would derive from subscribers it gains or maintains as a result of the hypothesized long-term Turner blackout. *See* **[**156]** Tr. 2217:15-24 (Shapiro). After selecting and entering values for those inputs and running his bargaining model, Professor Shapiro predicts that the challenged merger would lead to annual, net consumer harm ranging from $286.5 million to $561 million for the year 2016, with that range increasing in subsequent years. *See id.* at 2255:14-15, 3920:6-10; *id.* at 2256:16-20 (predicting $436 million in net consumer harm for the year 2017 and $571 million in net consumer harm for the year 2021). The low and high end of the

---

pound weight instead of a thousand pounds, are you going to think about it differently, feel differently? Are you going to take more risk that any of that might happen to you? Absolutely not." Tr. 3120:23-3121:7 (Bewkes (Time Warner)). Although not controlling, the Court notes that some of Turner's lead negotiators credibly testified to similar effect. *See, e.g., id.* at 1128:7-12 (Breland (Turner)) ("The concept that Turner would push" as though "going dark is good for us, I believe I've given examples today of why it's just the opposite. I lose money the minute I go dark. . . ."); *id.* at 1190:14-17 (Warren (Turner)) (answering, when asked whether could gain leverage by "threatening to blackout distributors," that "I don't think that's a realistic perspective.").

On the stand, Professor Shapiro attempted to support his increased-leverage proposition by noting that programmers and distributors "think about what'll happen if there's a blackout" when formulating their negotiating strategy. *See id.* at 2193:23-2194:13 (Shapiro). The Government does the same in its post-trial filings. *See, e.g.*, Gov't PFOF ¶¶ 124-153 (collecting evidence to support proposition that "MVPDs have estimated their likely subscriber losses to inform their negotiating strategy"). The evidence showed that distributors engage in that exercise "with varying degrees of sophistication." *Id. ¶ 124*. With respect to companies that perform "go dark" analyses of the potential consequences of a blackout, the bulk of the evidence showed that negotiators relied on those analyses to get a general sense of "the value" of a programmer's content by measuring how many customers they would lose in the event of a blackout - customer losses that, notably, are not going to change as a result of the merger. *See* Tr. 935:12-16, 936:23 (SEALED); *see id.* at 1349:15-19 (Montemagno (Charter)) (reviewed the "high points" of the Altman Vilandrie go-dark analysis "[v]ery briefly"); *id.* at 1094:21-1095:1 (Breland (Turner)) (although "you never want to go dark if you are a programmer," preparing for a go dark scenario is "just prudent math"). Contrary to Professor Shapiro and the Government's arguments, such high-level evidence does not provide support for the more specific prediction that a marginal improvement in Turner's (still unprofitable) position in a blackout would meaningfully alter Turner's bargaining leverage.

In a similar way, the Government seeks to rely on the testimony of Turner executive Coleman Breland for the proposition that "Turner bargains over price down to hundredths of a penny," Gov't PFOF ¶ 108, and that Turner "almost went dark with Time Warner Cable over a single penny increase on one channel in 2012," *id. ¶ 158*. That account of Breland's testimony is "misleading at best." Defs.' PFOF 38 n.5. For the reasons set out in Defendants' proposed findings of fact, *see id.*, Breland's testimony does not bolster Professor Shapiro's model.

[37] Technically, Professor Shapiro used two models. He first used an economic bargaining model to generate predicted affiliate fee increases to distributors; then, he plugged those distributor cost increases into a separate merger simulation model to generate his estimates for consumer cost increases. *See* Tr. 2314:17-25 (Shapiro). As defendants' arguments focus on the design of Professor Shapiro's bargaining model rather than the merger simulation model, I will refer only to the bargaining model.

ranges result from using different values — 9% and 14%, respectively — for the subscriber loss rate. *See id.* at 2239:3-7.

Of course, both 2016 and 2017 have passed with no merger. Thus, as Professor Shapiro concedes, his bargaining model does not "literally predict[] the price increases that will occur in negotiations in the real world." *Id.* at 2294:18-2295:1. Rather, Professor Shapiro testified that his model is designed to "evaluate the fundamental incentives and changes in the market created by the merger." *Id.* at 2209:11-12. For that reason, he stated that his model does not account for the existence of Turner's current affiliate agreements **[*226]** with distributors, which will "expire in time." *Id.* at 2209:13-14.

Defendants attack Professor Shapiro's bargaining model from all directions. Noting that models are "only as good as the inputs," *id.* at 2315:11, defendants argue that each of Professor Shapiro's three "very important" inputs lacks a sufficient basis in the **[**157]** trial evidence, *id.* at 2315:12. Defendants also argue that Professor Shapiro's model improperly assumes away Turner's current affiliate agreements — agreements that will serve to significantly constrain Turner's post-merger bargaining leverage for years to come.[38] I agree with defendants, for the most part, that the inputs and assumptions of Professor Shapiro's model are not sufficiently grounded in the evidence — a fact that "undermine[s]" my "confidence in the reliability and factual credibility" of his projections. *Anthem, 855 F.3d at 363*. How so?

a. The Evidence Is Insufficient to Support Professor Shapiro's Long-Term Subscriber Loss Rate

In order for AT&T to benefit from a long-term Turner blackout with a rival distributor under the increased-leverage theory, a sufficient number of customers must actually depart or decline to join the rival distributor due to its failure to offer Turner content. Professor Shapiro refers to that measure of lost customers as the "long-term subscriber loss rate." At trial, Professor Shapiro testified that his model incorporates a low-end long-term subscriber loss rate of 9%, a number representing the combined percentage of current and potential **[**158]** subscribers who would either leave or decide not to sign up with a distributor in the event of a hypothetical long-term blackout of Turner content. *See* Tr. 2239:3-5 (Shapiro). Whether viewed as a measure of Turner's "market power" in the programming market or not, *id.* at 2239:18, that measure of customer loss — deemed the "long-term subscriber loss" rate by Professor Shapiro — is critical to Professor Shapiro's bargaining model and the predicted consumer harm it generates.

Of course, there has never been a long-term blackout of Turner content; Professor Shapiro thus had no "real-world" evidence on which to base his projected subscriber loss rate. *Id.* at 2394:8-11. Instead, as a basis for his chosen 9% value, Professor Shapiro relied on three principal pieces of evidence: (1) a third-party consultant slide deck commissioned by Charter in late 2016; (2) his own analyses of long-term **[*227]** blackouts of a different programmer, Viacom, with cable distributors Suddenlink and Cable ONE; and (3) the results of an internet survey conducted by another of the Government's testifying experts, Professor John Hauser. *See id.* at 2225:17-2226:7. The evidence indicates, however, that each of Professor Shapiro's **[**159]** sources is significantly flawed. Thus,

---

[38] Correcting for those faults, defendants argue, would cause Professor Shapiro's model to predict a net *benefit* to consumers on account of the merger. Specifically, Professor Carlton testified that when one updates or accounts for those four factors — the long-term subscriber loss rate, the diversion rate, the margin data, and the presence of contracts — Professor Shapiro's model generates an average 52-cent per-month, per-consumer benefit rather than an average 27-cent per-month, per-consumer harm. *See* Tr. 2516:2-6 (Carlton); *see also id.* at 2255:9-25 (Shapiro) (testifying about the "[p]redicted Turner monthly fee increases for consumers" reflected by PDX11, slide 11).

The large effects on the predicted net harm created by minor changes to Professor Shaprio's inputs raises a separate question regarding the model's sensitivity. As Professor Carlton noted, Professor Shapiro performed no "statistical tests" to demonstrate that the "tiny percentage" increases in harm predicted by his model are "any different from zero" statistically speaking. *Id.* at 2450:16-2451:12 (Carlton). Without such statistical testing, Professor Carlton testified, the predicted harms could fall within the range of zero "just because of normal fluctuations in how we estimate models in the perimeters [sic] of the model." *Id.* The fact that Professor Shapiro's model "cannot be proven to any statistical significance" provides this Court with additional cause to reject the model's conclusions as "persuasive" evidence. *FTC v. Swedish Match, 131 F. Supp. 2d 151, 161 (D.D.C. 2000)*.

even taken together, they fail to establish the reliability of Professor Shapiro's long-term subscriber loss rate and the conclusions generated by his model.

1) Charter's Third-Party Consultant Slide Deck

According to Professor Shapiro, a slide deck, commissioned by AT&T's competitor Charter in late 2016 and authored by consultants at a San Francisco-based firm called Altman, Vilandrie & Company ("Altman Vilandrie"), was the "single best document and analysis" he found in coming up with a measure for the long-term subscriber loss rate. *Id.* at 2235:11-14. That was so, according to Professor Shapiro, because the slide deck, in contrast to the other available pieces of evidence, addressed "exactly" the question of interest to his analysis: the subscriber-loss effects of a long-term Turner blackout with a major distributor, as measured in *both* lost current customers and lost potential customers. *Id.* at 2235:19-20, 2236:20-2237:3. But although the slide deck may have analyzed the questions in which Professor Shapiro was interested (perhaps not so fortuitously, *see infra* pp. 127-128), the evidence shows that it did so via methodologies that were significantly flawed.

[160]** Before explaining further, it is necessary to review the basics of the slide deck's analysis. Altman Vilandrie director Stefan Bewley, who was responsible for supervising the project, explained that the slide deck was designed to examine "the value of content programming." *Id.* at 1271:23 (Bewley (Altman Vilandrie)). The slide deck, entitled "Content Valuation Project," contains charts predicting Charter's subscriber losses in the event of permanent blackouts with various programming networks. *See id.* at 1249:18-21; *see also* PX79. To generate those loss predictions, Altman Vilandrie used three different methods: (1) an internet survey, (2) set top box data, and (3) the so-called "hybrid" method, which made slight adjustments to the set top box analysis. *See* Tr. 2792:10-11, 2801:1-5, 2808:6-20 (Rossi); *id.* at 1271:24-1272:6 (Bewley (Altman Vilandrie)). Although Professor Shapiro praised that analysis for its apparent rigor, *see id.* at 2235:18-19 (Shapiro), he later conceded, despite professing that he usually does not accept data without "look[ing] into it more and figur[ing] out how reliable it is," *id.* at 3848:10-13, that he did not take steps to evaluate the reliability of the Altman Vilandrie data before he relied on it, *id.* at 3863:21-23 ("Q. So we can establish that all you did was read the report, right? A. I relied on the report. I didn't dig behind it."). Rather, Professor Shapiro simply incorporated the final figure included in the slide deck's table of results. *See* PX79-6.

Defendants' survey and statistics expert, Professor Peter Rossi, did however examine the methods that Altman Vilandrie used to predict the reported subscriber loss rates. And in testimony that largely went unrebutted,[39] Rossi explained his conclusion that "[a]ll three are invalid." Tr. 2792:5 (Rossi). Those conclusions, which I accept, are outlined below.

First, Altman Vilandrie relied on an internet survey. That survey, as Professor Rossi explained, combines three different **[*228]** types of internet surveys — a "conjoint," a "channel chooser," and a "Max Diff." *Id.* at 2792:13-17. In the conjoint survey, respondents view eight to ten screens and are presented with different options and pricing for bundles of video programming, broadband, and telephone services; the survey seeks to infer the respondent's willingness to trade off different service features. The channel chooser survey, **[**161]** for its part, tries to ascertain how much priority respondents give to a particular cable network. And the Max Diff survey allows the respondent to rank the different networks. Based on its internet survey's combination of those approaches, Altman Vilandrie calculated one set of subscriber loss figures for current and prospective video customers. *See* PX 79-18.

Professor Rossi testified that the internet survey method was plagued by considerable flaws, both in the way the questions were designed and in the way the answers to those questions were used to project subscriber loss. He noted, for example, that the conjoint survey's presentation of 12 networks included only one network — CNN — owned by Turner. Tr. 2794:7-9 (Rossi). Although Professor Rossi testified to the common-sense proposition that it is "impossible" to infer the value of all of the remaining Turner networks just from CNN, apparently that is what Altman Vilandrie did with the results of the conjoint survey. *See id.* at 2793:11-14, 2800:6-11. With respect to the Max Diff survey's process for ranking channels, Professor Rossi testified that such a ranking can give a sense of

[39] The Government did not recall any Altman Vilandrie witnesses on rebuttal to answer to Professor Rossi's critiques.

relative importance, but cannot measure how much **[**162]** more or less important one network is than another; of particular relevance here, moreover, the ranking methodology does not define what "important" means to a respondent, and thus says "[a]bsolutely nothing" about "whether a subscriber to Charter would leave if there was a Turner blackout." *Id.* at 2795:9-16. Finally, although Altman Vilandrie purported to combine the conjoint and Max Diff methodologies to bolster its analysis, Professor Rossi testified that such methodologies "fundamentally cannot be combined" as a matter of statistical practice. *See id.* at 2796:18-2797:4; *see id.* at 2800:16-17 ("It's literally an impossibility, and there is absolutely no way to combine these two.").[40] For those reasons, Professor Rossi's "bottom line conclusion" about the survey methodology was that it is "completely invalid." *Id.* at 2800:22-24.

Second, Altman Vilandrie utilized a set top box methodology. Set top box data, as should now be familiar, shows the amount of time a particular cable set top box is tuned to specific channels. *See id.* at 1274:16-18 (Bewley (Altman Vilandrie)); *id.* at 2801:5-12 (Rossi). As Bewley acknowledged, set top box data does not necessarily reflect actual viewership or **[**163]** correlate to a particular network's value. *See id.* at 1275:17-22 (Bewley (Altman Vilandrie)). Professor Rossi testified similarly, noting that such data, without more, "cannot possibly answer the question about the effect of removing any channel or group of channels." *Id.* at 2802:7-8 (Rossi). In addition, because set top box data is generated by Charter's current customers, it provides no information about "prospective customers for Charter." *Id.* at 2801:19-24. Notwithstanding those limitations, the Altman Vilandrie slide deck purported to derive current and prospective subscriber loss figures from the set top box data by assigning differing "churn propensity" values — that is, values **[*229]** reflecting the likelihood that a viewer will leave a distributor — to different levels of viewing concentration. *Id.* at 2802:9-2804:14; *see* PX79-18, -68.

Professor Rossi testified, however, that the churn propensity values, and their correlation with set top box data, are "not based on data of any kind" and instead reflect "purely assumed numbers." Tr. 2804:12-13 (Rossi). Although the lack of empirical support is reason enough to disregard the slide deck's analysis of the set top box data, that flaw is **[**164]** compounded by the particular values assigned in the churn propensity schedule. In particular, based on the schedule, Altman Vilandrie predicts that the loss of a network with a specified viewing concentration or greater will *always* cause a distributor's customers to leave. *Id.* at 2807:13-20; PX79-68; DX0681-73. I agree with Professor Rossi that the upper-threshold assumption, and indeed the entire set-top box methodology, lacks a sufficient basis in evidence and is unreliable. *See* Tr. 2807:13-22.

Third, and most importantly for purposes of Professor Shapiro's analysis, Altman Vilandrie implemented what it refers to as a "hybrid" methodology. Ultimately, the April 27, 2017 slide deck upon which Professor Shapiro relied indicates that the hybrid methodology produces a video subscriber loss rate of 9% for current customers and 10% for prospective customers. Tr. 2388:1-11, 3868:1-20 (Shapiro). Professor Shapiro testified that the 9% long-term subscriber loss rate that he incorporated into his model "reflect[s]" those results. *Id.* at 2237:4-8, 2388:1-11; *see* PX79-6, -18.

A key problem with the design of the hybrid methodology, as Professor Rossi testified, is that it blends two methods only **[**165]** in the sense that it alters the set top box method's lower churn propensity threshold "based to some extent on some of the survey data." Tr. 2808:14-18 (Rossi). In other words, the hybrid methodology can be thought of as "just a revision or alteration, minor alteration to the set-top box method." *Id.* at 2808:19-20. The hybrid methodology is thus plagued by the same problems as is the set top box methodology, including the fact that it "can't say anything about prospective customers." *Id.* at 2808:19-22. As a result, the hybrid methodology — and its associated 9% and 10% subscriber loss predictions for current and prospective customers — falters on the same grounds as the set top box methodology.

Moreover, evidence regarding the evolution of Altman Vilandrie's slide deck casts further doubt on the reliably of the figures associated with the hybrid methodology. Specifically, the evidence shows that a "final read out" version of the slide deck sent to Charter on April 21, 2017 reported that the hybrid method produced a 5% and 6% subscriber

[40] Although Professor Rossi explained that Altman Vilandrie relied in part on the Sawtooth Software, which incorporates some of his own innovations in survey methodology, the combination procedure took place "outside of Sawtooth Software." Tr. 2855:20-2856:6 (Rossi).

loss rate for current and prospective customers, respectively. *See id.* at 1302:4-20 (Bewley (Altman Vilandrie)); 3068:1-12 (Shapiro). Almost immediately **[**166]** after a meeting with Charter representatives a few days later, however, Altman Vilandrie, with the "permission" of Charter, altered the results of the hybrid methodology for "just" Turner and no other programmer. *Id.* at 1310:14-1311:15 (Bewley (Altman Vilandrie)). Those alterations led to the 9% and 10% current and prospective subscriber loss rates upon which Professor Shapiro's analysis relied. *See id.* at 3868:1-12 (Shapiro); *compare* DX681-23, *with* PX79-18.

That Turner-centric turn of events is enough alone to give me pause before accepting Professor Shapiro's reliance on the slide deck, notwithstanding the Government's presentation of a more benign view of the slide deck's evolution. *See, e.g.*, Tr. 1327:16-1332:4 (Bewley (Altman Vilandrie)) (testifying, among other things, that it was Altman Vilandrie that "proposed **[*230]** making an exception for Turner" based on the results of the hybrid methodology as compared to the results of other methodologies). In my view, moreover, the most troubling aspect of the testimony regarding the contested changes to the slide deck was that Professor Shapiro was entirely unaware of those changes when he "first relied on the document" to perform his analysis. **[**167]** *Id.* at 2365:8-10 (Shapiro); *see also id.* at 2366:4-7. At trial, Professor Shapiro admitted that he was not aware of the alterations made to the Altman Vilandrie slide deck until his pre-trial deposition by defendants. *Id.* at 2365:1-3. He nonetheless defended his reliance on the slide deck for the long-term subscriber loss figures, in no small part based on his insistence that although the current subscriber loss figure had been altered, the prospective subscriber loss figure "was not changed here." *Id.* at 2388:1-6; *see id.* at 2366:9-11 ("If I used the five percent instead, I would get a long-term subscriber loss rate of 8.5 percent instead of nine in my calculations."). Given that, Professor Shapiro continued, the altered current subscriber loss figure was "a lot less significant" because "it's just one of the two components that affects the long-term subscriber rate." *Id.* at 2388:11-15. Based on that assumption, Professor Shapiro testified that, even if one accepted the original 5% existing-customer subscriber loss figure, "[i]t's not as though my number would go from . . . nine to five percent if you made that change. It would go from nine to 8.5" percent. *Id.* at 2388:8-10.

But Professor **[**168]** Shapiro "made a mistake" in so testifying, a fact he was later forced to concede on rebuttal. *Id.* at 3868:17-20. When confronted on rebuttal with the two versions of the slide deck, Professor Shapiro acknowledged that the prospective subscriber loss figure *had* indeed been changed from an original value of 6% to the 10% value upon which he relied. *Id.* at 3868:1-20. He also testified, moreover, that using the original 5% existing customer subscriber loss figure and 6% prospective subscriber loss figure would yield a departure rate of about 5 or 6%, which in turn would "largely eliminate[] the net MVPD cost increase" he projects. *Id.* at 3870:22-3871:3.

For all of these reasons, I conclude that Professor Shapiro's reliance on the projected long-term subscriber loss rates contained in the Altman Vilandrie slide deck was misplaced. Given Professor Shapiro's testimony that the slide deck was the "single most important document" to him in calculating the long-term subscriber loss rate incorporated into the bargaining model, *id.* at 2360:25-2361:3, that conclusion *alone* is all but fatal to Professor Shapiro's analysis. To the extent, however, that Professor Shapiro relied upon two other categories **[**169]** of evidence, such evidence also fails to support his chosen long-term subscriber loss rate.

2) Long-Term Viacom Blackouts with Suddenlink and Cable ONE

In generating his long-term subscriber loss rate, Professor Shapiro also relied on his own analysis of the effects of long-term blackouts of Viacom programming — which includes networks such as MTV and Nickelodeon — with two MVPDs, Suddenlink and Cable ONE. In particular, Professor Shapiro opined that the Viacom blackout caused Suddenlink to lose 9.4% of its video subscribers and Cable ONE to lose 16% of its video subscribers. Gov't PFOF ¶ 208. The Court need not spill much ink addressing those figures because even a cursory review of the evidence shows that they are unreliable.

With respect to Professor Shapiro's 9.4% figure for Suddenlink, it is notable that *Suddenlink itself* represented to the public that it suffered only a 2 to 2.5% subscriber loss as a result of the blackout with Viacom. *See* Tr. 2480:21-22 (Carlton). **[*231]** Given the unusual nature of a long-term blackout, Charter, Comcast, and Wall Street power Citi also studied the event, the latter two concluding that Suddenlink's subscriber loss percentage was in the "low single digits." **[**170]** *Id.* at 2483:1-2; Defs.' PFOF ¶ 150. Altman Vilandrie's study for Charter produced similar results. *See* PX79-6. I heard from defendants' expert Professor Carlton that Professor Shapiro's estimates were inflated when compared to those other reported figures due to his failure to account for the fact that the rate of subscriber loss in the video distribution industry started to increase in 2016. *See* Tr. 2483:16-2484:2 (Carlton); *see also id.* at 2490:8-10.[41] When Professor Carlton corrected Professor Shapiro's analysis to control for that trend, he generated a 4.8% subscriber loss rate for the Suddenlink-Viacom blackout, a number much more in line with industry estimates. *See id.* at 2484:3-8.[42]

Professor Shapiro's 16% subscriber loss estimate for the Cable ONE long-term blackout of Viacom is even more unreliable. On that score, it is sufficient to note that Randy Sejen, Cable ONE's chief negotiator, testified that "[t]he losses attributable to Viacom are very, very small . . . and were not significant" *Id.* at 2123:21-2124:12 (Sejen (Cable ONE)). Specifically, Sejen noted that the Viacom blackout was "felt and absorbed" within four to six months and caused a subscriber loss of just **[**171]** 2%. *See id.* at 2130:1-4, 2123:21-24. Given Sejen's testimony that Cable ONE lost only 2% of subscribers, the Court has no reliable basis to accept Professor Shapiro's calculation of a subscriber loss figure eight times that amount — and therefore rejects it in toto.

To be sure, I heard evidence that, in relative terms, Turner programming is more valuable than Viacom programming. But that fact *alone* cannot make up for Professor Shapiro's baseline failure to establish any reliable measure of subscriber losses associated with the long-term Viacom blackouts. Having concluded that Professor Shapiro's Viacom analysis lacks an adequate basis, I will now turn to the last main piece of evidence he cited in support of his long-term subscriber loss figure.

3) Professor Hauser's Internet Survey

The last piece of evidence upon which Professor Shapiro based his long-term subscriber loss rate is an internet survey. The internet survey was conducted by another of the Government's testifying experts, Professor John Hauser, who heads the marketing department at the Massachusetts Institute of Technology. Tr. 756:9-14 (Hauser). The survey generated a long-term Turner blackout subscriber loss percentage of **[**172]** 12% and a 30-day Turner **[*232]** blackout subscriber loss percentage of a whopping 8.2%. *Id.* at 761:7, 803:24-804:3.

Although once at the forefront of the Government's presentation, *see, e.g.*, Gov't Pre-Trial Br. 29, Professor Hauser's survey now finds itself in the background, with even Professor Shapiro minimizing his reliance on it, *see* Tr. 2360:22-24 (Shapiro) ("[Hauser's] twelve percent is corroborative. If I didn't rely on that, if we decided that was unreliable, it wouldn't change my opinions."). Professor Shapiro however had good reason to unhitch his analysis from Professor Hauser's internet survey wagon: cross-examination and real-world evidence alike revealed that the survey was inherently unreliable and produced inflated results!

Before explaining that conclusion, a brief review of Professor Hauser's survey might be helpful. The survey had roughly 1,600 participants. *Id.* at 765:11 (Hauser). Those participants were drawn from an internet panel and then

---

[41] Professor Shapiro omitted from his analysis of industry trends December 2016 data that showed an even steeper decline in industry subscribership. When first questioned about the decision not to include this data in his analysis, Professor Shapiro did not recall that any data was omitted, and could not provide an explanation for that omission. *See* Tr. 3879:1-14 (Shapiro). When called back to the stand days later, Professor Shapiro recalled that he had noticed something "peculiar" about the omitted numbers. *Id.* at 3915:9. Professor Shapiro's testimony concerning the 2016 data was not the only time that he demonstrated a lack of familiarity with the materials he presented to the Court. *See infra* pp. 127-129, 139-140. To be clear, although both call into question his analysis, Professor Shapiro's lack of familiarity with the contents of his report and with his own data analysis presents a credibility problem separate from the problems with key inputs generated by outside sources like Altman Vilandrie.

[42] Pursuant to the parties' representations and agreements during an April 26, 2018 bench conference related to the Suddenlink analysis, the Court will strike the following lines of trial testimony from Professor Shapiro: Tr. 3926:12-13; Tr. 3917:5-7; Tr. 3878:9-10; Tr. 3877:20-21; Tr. 3806:10-12.

broken into four groups of approximately 400 participants each: three "test" groups and one "control" group. *See id.* at 775:10-14, 761:21-762:5 (Hauser). The test groups were presented with an online survey, in which they were presented **[**173]** with questions about their potential responses to Turner blackouts of varying lengths, including a permanent blackout, a one-month blackout, and a one-week blackout. *See id.* at 775:22-776:6. The control group was not presented with any information about a blackout. *See id.* at 776:14-18; *id.* at 2768:8-11 (Rossi).

Defendants' survey expert, Professor Rossi, testified that Professor Hauser's survey is "unreliable" for any number of reasons. *Id.* at 2768:15 (Rossi). For purposes of the analysis here, I need only discuss two.[43] First, Professor Rossi testified that the survey was drawn in a biased and misleading way, with the effect of overstating the importance of Turner content. Second, Professor Rossi testified that the survey's centerpiece, the intent-to- switch scale, was confusing and skewed. *See id.* at 2768:12-2769:8. After considering the expert testimony as well as other evidence calling into question the results of Professor Hauser's survey, I agree with Professor Rossi's conclusions.

First, Professor Rossi faulted Professor Hauser's survey as building in bias at the "priming" stage. *Id.* at 2786:17. Professor Hauser testified that many television viewers think about video programming **[**174]** in terms of specific shows or genres, not channels. *See id.* at 817:17-818:5. Professor Hauser therefore began his survey by "priming" survey respondents to connect genres of programming to specific channels through the use of network logos. *See id.* at 817:25-818:17; *see also id.* at 824:15-825:6 (sports); *id.* at 821:4-12 (special events). According to Professor Rossi, however, Professor Hauser's use of logos was problematic. In particular, Rossi noted that the internet survey "tend[ed] to visually overemphasize Turner content" relative to other content by, for example, enumerating the Turner channels in large font or inaccurately over representing the Turner networks relative to other programming. *Id.* at 2783:12, 15-17 (Rossi); *see also id.* at 2787:9-2788:25 (discussing DX915B).[44] At one point, the survey presented **[*233]** respondents in the test group with large Turner logos for six straight slides, despite not showing those slides to the control group. *See id.* at 838:23-839:3 (Hauser); *id.* at 2789:25-2790:8, 24-25 (Rossi). As Professor Rossi explained, that priming tended to bias respondents in favor of indicating an intent to switch in the event of a Turner blackout. *Id.* at 2790:16-17 (Rossi). **[**175]**

Second, Professor Rossi testified that Professor Hauser's survey asked respondents to report their answers using a scale that was confusing and, again, likely to cause respondents to overestimate their likelihood of switching distributors in the event of a Turner blackout. Professor Hauser's survey did not squarely ask respondents whether they would switch providers in the event of a Turner blackout. Instead, the internet survey presented respondents with, as it is known in the industry, a "Juster scale" by which they answered the question, "How likely are you to switch your TV provider, on a scale from 1 to 99?" DX915-152: *see* Tr. 788:12-18, 814:1-4 (Hauser). The scale included percentages - 10%, 20%, 30%, etc. - and accompanying descriptors such as "very slight possibility," "slight possibility," "some possibility," and "fair possibility." *See* Tr. 813:15-814:19 (Hauser); DX915-152. The results of the Juster scale were translated directly into a subscriber loss rate. Thus, if each respondent rated his or her likelihood of switching at a "very slight possibility," corresponding to 10% on the Juster scale, Professor Hauser's survey would spin out **[**176]** a subscriber loss rate of 10%. *See* Tr. 815:20-816:18 (Hauser).

Professor Hauser's Juster scale had two critical flaws: first, its text descriptions were "out of w[h]ack with the numbers," Tr. 2778:17-21 (Rossi), and, second, Juster scales are particularly unreliable in quantifying consumer choices of this kind, *see id.* at 2779:1-2782:19. Professor Rossi put it in plain terms:

---

[43] Professor Rossi also criticized Professor Hauser for failing: 1) to establish that his group of survey participants constituted a representative sample of the population of interest, and 2) to provide a margin of error that is, a measure of reliability—for his survey's results. *See* Tr. 2771:22-2273:21, 2775:2-6 (Rossi). Although the Court agrees that those problems are notable, it sees no need to pile on by addressing them further in light of the two significant design flaws discussed below.

[44] This is not the first time Professor Hauser's "graphic effects and presentation methods" have been called into question on this basis. *See* *Apple, Inc. v. Samsung Elecs. Co., No. 11-CV-01846-LHK, 2014 U.S. Dist. LEXIS 29721, 2014 WL 976898, at *10-*16 (N.D. Cal. Mar. 6, 2014)*.

> Now if I told you that I thought there was a very slight possibility that I would get into a car accident driving from Washington to Baltimore on the Baltimore Washington Parkway this evening, I don't think you would say that was one out of every ten times I attempted that. You might say one out of every thousand or more. So the text description is out of whack with the numbers. And that's true throughout the scale.

Id. at 2778:12-19. Professor Rossi also testified that the survey's text was bound to present skewed results because it "minimiz[ed] or neglect[ed] many aspects of switching costs" — that is, the various costs associated with switching distributors. *Id.* at 2783:13-14 (Rossi): *see also id.* at 2783:19-2786:16 (detailing different kinds of switching costs, including search costs, transactional costs, bundle-derived **[**177]** costs, and psychological costs, and concluding that Professor Hauser's survey failed to adequately account for those costs). That problem casts further doubt on the reliability of the survey. *Cf.* *H & R Block, 833 F. Supp. 2d at 66-68* (declining to rely on "customer survey[]'" results in part because survey "failed to assign" adequate "pricing" data to some of participants' response options).

More fundamentally, Professor Rossi explained, Juster scales are notoriously inaccurate when used "as an exact quantification" of the likelihood that a customer will engage in some future behavior. Tr. 2779:16-21, 2782:2-13 (Rossi). Academic literature cited by both Professors Rossi and Hauser establishes that the average correlation for predictions of this kind falls **[*234]** between .3 and .6. *See id.* at 2779:16-2780:5. Professor Hauser's scale, nonetheless, purports to assign a correlation value of 1.0, that is, a *perfect* linear association where intent predicts behavior virtually every time. *See id.* 2872:15-2781:2, 2872:1-4. And even that unsupported correlation "basically disappears" when respondents are asked to predict their behavior with respect to new products or situations — such as a permanent Turner blackout. *See id.* at 2780:15-24. **[**178]**

Given the significant questions raised about the design of Professor Hauser's survey, it should come as no surprise that the survey's results were puzzling to expert and fact witnesses alike. Gregory Rigdon, Comcast's chief negotiator, responded to Professor Hauser's one-month blackout loss estimate of 8% by noting, "[T]hat seems like a big number in one month." *Id.* at 897:2-3 (Rigdon (Comcast)). He gave the same answer when asked about the survey's long-term 12% loss estimate. *See id.* at 898:3-5 ("Q: But in terms of nay group you've ever seen dropped, have you ever seen anything approaching a 12 percent — A. That seems like a big number."). Turner CEO John Martin put things a bit more strongly, calling the survey's 8% one-month blackout subscriber loss prediction "absurd." *See id.* at 660:9-11 (Martin (Turner)). Defendants' expert Professor Carlton, for his part, said that the 8% departure rate for one month "strikes me as way too high" and is "nothing like" the Cable ONE estimate of 1.1% to 1.2% for the actual temporary Turner drop. *Id.* at 2491:4-15 (Carlton). Finally, even Professor Shapiro himself noted that Professor Hauser's one-month subscriber loss estimate of 8% "seems high." **[**179]** *Id.* at 2360:18.

Of course, if Professor Hauser's survey generated inflated one-month subscriber loss estimates as compared to real-world evidence, that fact "cast[s] doubt on what Professor Hauser is doing" with the survey design generally. *Id.* at 2491:4-15 (Carlton). It is therefore small wonder why both the Government and Professor Shapiro have deemphasized the role of the Hauser internet survey. All in all, I can't help but conclude that the internet survey's methods are unreliable and that its results fly in the face of real-world evidence regarding the effect of programming blackouts.

For all of the reasons discussed above, the evidence is not sufficient to support the 9% long-term subscriber loss figure that Professor Shapiro utilized in his model.[45] Because the Government has the burden of proof as well as

---

[45] The miniscule nature of subscriber losses resulting from the two actual instances of Turner blackouts perhaps should have alerted Professor Shapiro that something was awry with his sources. The evidence showed that there have been two short-term blackouts of Turner content with distributors: 1) a thirty-day blackout with Cable ONE in October 2013, which resulted in "fairly insignificant" subscriber losses in the range of about .6%, Tr. 2116:10-13, 2127:21-2128:2 (Sejen (Cable ONE)); and 2) a thirty-day blackout with DISH in November 2014, in which some Turner networks — including CNN, but not TBS or TNT — were blacked out, resulting in a loss of less than 1% of DISH subscribers, *see id.* at 388:10-389:5 (Schlichting (DISH)). Those subscriber loss figures simply cannot be squared with some of the figures represented in the sources upon which Professor Shapiro relied.

the responsibility to demonstrate that its proffered expert testimony has an adequate grounding in evidence, the lack of evidentiary support for Professor Shapiro's input is fatal to the model's probative value in predicting the asserted harm associated with the Government's increased-leverage theory.[46]

[*235] *b. The Evidence Is Insufficient to Support Professor Shapiro's Diversion* ***[**180]*** *Rate*

To evaluate the number of customers that AT&T stands to gain from a long-term Turner blackout with a rival distributor, it is necessary to estimate how many of that rivals' customers "will end up as DirecTV subscribers, either by moving to DirecTV or by staying at DirecTV and not going to" the rival. Tr. 2240:9-11 (Shapiro). In Professor Shapiro's model, that figure is known as the "diversion rate." *Id.* at 2240:13. The diversion rates Professor Shapiro uses differ based on geography. Specifically, Professor Shapiro calculated a diversion rate for each of the local geographic markets based on an assumption that subscribers "move to the other [distributors], in each local market, to the other distributors proportional[ly] to their marketshare." *Id.* at 2240:23-2241:1-3, 2241:15-20.

The parties' main dispute related to diversion rate pertains to "cord cutting," also referred to in this context as the "outside good." *Id.* at 3871:8-9; *see id.* at 2604:13-17 (Carlton). As is likely familiar by now, an individual "cuts the cord" by discontinuing his MVPD subscription and opting instead to receive television programming through an internet-based SVOD like Netflix or Hulu. *See supra* pp. 22-23. Professor **[**181]** Shapiro acknowledges that, as a result of cord cutting, "[d]iversion to AT&T will be reduced to some extent because some current subscribers of a rival MVPD that would leave that MVPD due to a loss of Turner content will cancel their pay-TV service altogether" rather than "switch to AT&T or another MVPD that carries Turner." Gov't PFOF ¶ 215; *see* Tr. 2241:22-2242:18 (Shapiro). To account for that effect, Professor Shapiro assigns a value to cord cutting of approximately 10%. *See* Tr. 3871:8-15 (Shapiro).

According to defendants, Professor Shapiro's 10% figure understates the rate of cord-cutting and, accordingly, results in an inflated diversion rate. *See* Defs.' PFOF 182-187; *see also* Tr. 2515:16-20 (Carlton). Defendants insist that the proper cord-cutting rate is closer to 20%. *See* Defs.' PFOF ¶ 185; *see also* Tr. 2505:10-20 (Carlton). Plugging that 20% cord-cutting rate into Professor Shapiro's model, defendants' lead expert Professor Carlton testified, would result in a predicted net consumer *benefit. See* Tr. 2515:16-20 (Carlton) (if one uses 20% cord-cutting rate in Professor Shapiro's model, then "Professor Shapiro's 27-cent price increase on average becomes [a] 6-cent benefit, decrease"). **[**182]** After evaluating the evidence and the parties' arguments on cord cutting, I conclude that there is insufficient evidence to support the 10% cord-cutting figure utilized by Professor Shapiro.

The basis for Professor Shapiro's 10% figure was the (by now discredited) Altman Vilandrie slide deck, created for Charter. *See id.* at 2372:8-10 (Shapiro) ("A: Well, you relied on Altman Vilandrie for what you called the outside good, correct? A: For that part, yes, that's correct."). What I learned about the slide deck's cord-cutting figure, however, was **[*236]** that it was derived from the results of Altman Vilandrie's "conjoint survey." *Id.* at 2821:7-15 (Rossi). Specifically, as explained by defendants' survey expert Peter Rossi, Altman Vilandrie first looked to the measure of people who answered that they would not "take any" MVPD service in the event of a blackout with Charter. *Id.* at 2821:9-14 (Rossi); *id.* at 2242:11-15 (Shapiro). Altman Vilandrie then took those estimates, Rossi testified, and "multiplied all of those coefficients by .6 without justification" — meaning, in layman's terms, that they "cam[e] up with a figure and then reduc[ed] it by 40 percent." *Id.* at 2821:14-18 (Rossi); *id.* at 3871:16-19 **[**183]**

---

[46] Because the evidence does not support use of Professor Shapiro's 9% "low end" long-term subscriber loss rate, it stands to reason that the larger 14% long-term subscriber loss rate he used to generate the high end of his predicted harm range is also unsupported. Tr. 3851:21-3852:8 (Shapiro). The same goes for the higher 12% and 16% long-term subscriber loss rates he used, rather curiously and contrary to the Altman Vilandrie slide deck upon which he claimed to rely, to generate the predicted harms for a 2017 and 2021 market configuration. *See* Tr. 2493:9-2495:18 (Carlton). Professor Shapiro's appeal to the fact that he predicted a range of harm is therefore unavailing: He is not "suffering the consequences of being conservative" in his estimates, Tr. 3852:1-2 (Shapiro), the consequences arise because even his conservative estimate lacks sufficient evidentiary support and reliability. The same can be said for the Government's post-trial submissions regarding the "conservative[]" nature of Professor Shapiro's analysis. Gov't Post-Tr. Br. 14.

(Shapiro). That reduction, in turn, produced Altman Vilandrie's cord cutting estimate of 16.8%, which Professor Shapiro used to derive his ultimate cord cutting estimate of 10%. *Id.* at 2372:19-2373:4, 3871:11-19 (Shapiro); *id.* at 2821:16-21 (Rossi); *see* PX79-38.

Although Professor Shapiro testified that he was "aware" of Altman Vilandrie's 40% reduction methodology, he could not recall whether he was aware of it at the time he relied upon Altman Vilandrie's cord-cutting figure, or just as a result of Professor Rossi's trial testimony. Tr. 3871:16-23 (Shapiro). Moreover, Professor Shapiro was unable to explain Altman Vilandrie's choice to reduce the cord-cutting figure, stating only that his "understanding is Mr. Bewley explained he did that based on evidence that reflected market conditions in Altman Vilandrie, as part of their analysis." *Id.* at 3872:4-8. The Court, however, has been unable to locate that alleged testimony in the trial record, or in the Government's post-trial filings for that matter. *Cf.* Gov't PFOF ¶¶ 214-216 (discussing Altman Vilandrie's cord-cutting figure with no reference to Bewley testimony).

If that were not enough alone to give pause before accepting Professor **[**184]** Shapiro's 10% cord-cutting estimate, defendants cast additional doubt on that figure by citing to SNL Kagan data as well as to real-world evidence regarding the prevalence of cord cutting in the industry. With respect to SNL Kagan data, Professor Carlton testified that the data shows that "[a]round 20 percent" of "total TV households" are "cord cutters." Tr. 2505:12-18 (Carlton).[47] SNL Kagan's 20% figure, defendants state, aligns with other industry evidence about the extent of cord cutting. *See* Defs.' PFOF ¶¶ 183, 185. AT&T surveys of departing customers, for example, indicate that "25 to 30 percent" of those customers report that they are "going to cord cutting." Tr. 2506:19-24 (Carlton). RCN CEO Jim Holanda testified that similar surveys by his company report that "at least half of the customers who leave RCN's video services are leaving for OTT providers" — a number that Holanda predicts is "likely to grow in the future as Millennials become more and more prominent in the marketplace." *Id.* at 2948:20-2949:3 (Holanda (RCN)). That evidence about the *increasing* presence of cord cutting in the market, in the Court's view, undercuts yet another **[*237]** aspect of Professor Shapiro's measures of **[**185]** cord cutting — namely, that they apparently "declin[e] over time" because of a particular "feature of his model." *Id.* at 2448:7-9 (Carlton).

In the final analysis, it is the Government's burden to adequately support its proffered model's harm — and, necessarily, the model's inputs — through the testimony of its expert or related evidence. The utter lack of explanation regarding Altman Vilandrie's methodology for generating the cord-cutting projection upon which Professor Shapiro relied, coupled with defendants' real-world evidence regarding the prevalence of cord cutting in the industry, leaves me with little confidence in the accuracy of Professor Shapiro's 10% cord-cutting figure. As with the long-term subscriber loss estimates, I therefore conclude that the Government has also failed to provide adequate support for Professor Shapiro's diversion rate estimate and thus the model's predicted net consumer harm.

c. The Evidence Is Insufficient to Support Professor Shapiro's Profit Margin Figure

Finally, Professor Shapiro's last input to his model is AT&T's monthly profit margins for its video customers. *See id.* at 2245:7-9, 2315:12-17 (Shapiro). To calculate those monthly video margins, **[**186]** Professor Shapiro relied on internal AT&T figures measuring new customers' "lifetime value" to AT&T, or "LTVs." *Id.* at 2344:12-16; *id.* at 2577:13-14 (Carlton). In particular, Professor Shapiro averaged AT&T's reported LTVs for a three-month period ending in June 2016. *See id.* at 2344:12-20, 3843:13-18 (Shapiro). That average generated a profit margin of

---

[47] To be sure, the Government, through the rebuttal testimony of Professor Shapiro, attempted to rebuff Professor Carlton's 20% cord-cutting rate. Professor Shapiro pointed out that, in the context of examining the consequences of a Turner blackout, it is "pretty likely" that a departing customer would "want to go somewhere else where you can get the Turner content." Tr. 3808:11-12 (Shapiro). Thus, Professor Shapiro continued, stating that "20 percent of American households don't have pay-TV service" overall is "beside the point." *Id.* at 3808:5-6, 15. Were it defendants' obligation to provide sufficient support for the departure rate in Professor Shapiro's model, rather than Professor Shapiro's, that rebuff would perhaps be persuasive. But even accepting Professor Shapiro's point about defendants' proposed rate, that point does not prove that the departure rate *he* proffered had adequate evidentiary support.

$1,324, which Professor Shapiro used in his model to estimate the monetary benefits that AT&T would gain in the event of a long-term Turner blackout. *Id.* at 3843:21-3844:4.

Defendants argue that Professor Shapiro's 2016 LTV data is "outdated and thus not a reliable input into Professor Shapiro's model." Defs.' PFOF ¶ 188. Defendants assert that Professor Shapiro instead should have used the "latest" available LTV figure from June of 2017, or $821. Tr. 2508:3 (Carlton); *id.* at 3844:9 (Shapiro). That $821 figure — disclosed by an AT&T witness and Professor Carlton after Professor Shapiro's initial expert report and the close of fact discovery, but before Professor Shapiro's rebuttal report and the start of trial — is approximately 40% lower than the 2016 margin figure used by Professor Shapiro to generate his original estimates of net **[**187]** consumer harm. *See id.* at 2448:17-2449:1 (Carlton). Defendants argue that using the $821 figure from 2017, rather than the $1,324 figure from 2016, significantly reduces the net consumer harm predicted by Professor Shapiro's model. *See id.* at 2507:20-22 ("[I]f margins go down, Professor Shapiro will predict lower increases in Turner content, even in his own model."); *id.* at 2508:17-21 (using "the more up-to-date" profit margin figures "eliminates a large fraction of all [of Professor Shapiro's predicted] harms").

At trial, each side spent much time attempting to justify, or impugn, Professor Shapiro's reliance on the 2016 versus 2017 LTV data. The Government, for its part, raised questions about the genesis and legitimacy of the late-breaking 2017 margin data; on that score, it requested, and was granted, the opportunity to depose the AT&T executive responsible for compiling and producing the data. Defendants, on the other hand, questioned Professor Shapiro extensively about his continued reliance on the 2016 LTV data in the face of deposition testimony[48] and Professor Carlton's report, both of which disclosed updated 2017 LTV figures.

[*238] While I have no reason to doubt Professor **[**188]** Shapiro's good faith in continuing to rely upon the 2016 LTV data during his direct testimony, for present purposes, the important point is this: the trial evidence indicates that Professor Shapiro's 2016 LTV figures, and thus his measure of AT&T's margins, are outdated and too high. That is true whether they are compared against the "most current finalized" June 2017 LTV figure ($821) cited by Professor Carlton, *id.* at 3844:18, 3849:14-23 (Shapiro), or instead against an average of all three of the 2017 LTVs that had been finalized at the time of trial, *id.* at 2585:13-22 (Carlton).

At trial, AT&T witness David Christopher testified about AT&T's method for generating the 2017 LTV data; he also confirmed the values of the finalized LTVs for January, April, and June 2017. *See id.* at 3001:9-17, 3011:11-17 (Christopher (AT&T)). Although the Government rightly points out that such LTV numbers can (and, in the case of the 2017 LTVs, do) fluctuate from month to month, *see id.* at 3015:10-24, the overall "downward trend is the same," *id.* at 3016:4; *see also id.* at 3003:15-3004:15 (discussing downward pressures on LTVs). The declining state of AT&T's 2017 LTVs, moreover, aligns with the testimony **[**189]** of numerous witnesses regarding the continued decrease of video margins in the distribution industry. *See, e.g., id.* at 3852:22-25 (Shapiro) ("Q: And you are aware, sir, of the testimony of pretty much every other competitor witness in this case who has testified that their video margin are going down, right? A: Yes.").

Given that evidence, it is perhaps unsurprising that even Professor Shapiro conceded during his rebuttal testimony that he "think[s] there's some validity to using the 2017 margin instead of the 2016 margins." *Id.* at 3810:10-11; *see also id.* at 3843:17-18 ("[I]t would be reasonable to use the 2017 margins if one did it in the context of the rest of my analysis."); *id.* at 3849:5-8 ("Then when I'm given more data later and now we've had the trial, I understand that more; that's why I said this time around, I could see using the 2017 data."). Professor Shapiro also confirmed that using an average of all finalized 2017 LTVs would generate a 2016 net increase in MVPD costs of $98 million per year — a number "significantly lower" than his original estimate of $235 million in MVPD costs. *See id.* at 3849:24-3851:3. Those lower MVPD costs, in turn, would decrease the predicted **[**190]** harm to consumers from the $.27

---

[48] Specifically, David Christopher testified to the June 2017 LTV figure during his deposition on February 14, 2018. *See* Tr. 3002:16-25. Although Professor Shapiro's report cites Christopher's deposition, on the stand Professor Shapiro admitted that he did not read that deposition transcript and did not in fact know David Christopher's role in the case. *See id.* at 2345:17-2346:3 (Shapiro) ("Q: If I told you that you cited to [Christopher's] deposition in your report, does that ring a bell? A: No. Q: Well, did you read his deposition? A: I did not.").

per-subscriber-per-month figure Professor Shapiro testified about to a figure of approximately $.13 per-subscriber-per-month. *See id.* at 3851:6-14.

In view of the above evidence, I agree with defendants that the 2016 margin data utilized by Professor Shapiro is outdated and inflated.[49] Whether one substitutes **[*239]** that figure for the June 2017 LTV data or an average of all of the finalized 2017 LTV data in Professor Shapiro's model, the result is a significant decrease in the predicted amount of net consumer harm. Although that decrease, standing alone, does not eliminate all of the harms generated by Professor Shapiro's model (just the bulk of them), it provides yet another reason to reject the predictions offered by Professor Shapiro at trial.

d. The Model's Failure to Account for the Real-World Effects of Turner's Long-Term Contracts Further Undermines Its Probative Value

Turner is currently party to long-term affiliate agreements with nearly all of its distributors. *See* Tr. 2316:3-18 (Shapiro); *id.* at 2444:10-23 (Carlton); *see also, e.g.*, PX211; PX410; PX422.[50] Those agreements, Professor Shapiro concedes, will "prevent **[**191]** [Turner] from raising the fees for some number of years" and thus "temporarily constrain[]" his predicted effects of the merger in the real-orld. Tr. 2209:8-9, 16 (Shapiro). In running his model and rendering his predictions, however, Professor Shapiro curiously chose to ignore Turner's current affiliate agreements. At trial, Professor Shapiro explained — and anticipated cross-examination on — that choice by noting that his model is designed to "evaluate the fundamental incentives and changes in the market created by the merger." *Id.* at 2208:21-25, 2209:4-19. In other words, Professor Shapiro's predictive **[*240]** exercise requires

---

[49] With his model's original reliance on the 2016 LTVs under attack, Professor Shapiro's rebuttal testimony doubled down on an argument relating to the value of AT&T's existing customers. The argument proceeds as follows. In addition to calculating LTVs for newly acquired video customers, AT&T assigns margin values to its existing video subscribers. Those values, known as active customer values ("ACVs"), are generally higher than LTVs because they do not account for "subscriber acquisition costs." Tr. 3854:22-3855:4 (Shapiro). Professor Shapiro's long-term subscriber loss rate includes a measure of the existing customers that AT&T will retain as a result of a long-term Turner blackout on its distribution rivals. The value of those maintained customers, Professor Shapiro opines, is likely "50 percent higher" than the margin value for new-customers. *Id.* at 2244:13-21. Professor Shapiro did not, however attempt to generate or otherwise assign a "measure of the margin on the retained subscribers." *Id.* at 2244:9-10. Instead, his model only incorporates the margin value associated with new subscribers. *Id.* at 2244:22. As a result, Professor Shapiro states that his "margin figure is definitely understated and substantially understated because I don't have the proper data on the value of the retained customers." *Id.* at 2244:14-17.

Therein lies the problem. Although opining about the importance of the value of retained customers to AT&T, Professor Shapiro undertook no analysis to incorporate that overall effect into his model. That should come as little surprise, given that this "larger point" appeared only in footnote 414 of the ninth appendix to Professor Shapiro's 300-page expert report; nonetheless, it renders his reliance on the existing-versus-new customer distinction unconvincing. *Id.* at 3809:18, 3855:5-3856:5. That footnote, Professor Shapiro testified, indicates that "the value of existing subscribers [is] between 150 and 225 percent as large as new subscribers." *Id.* at 3813:13-17. Beyond footnote 414's general observation, Professor Shapiro did not attempt to quantify the total dollar value of existing customers' margins versus new customer margins, much less incorporate a figure for existing customer margins into his model. *Id.* at 2244:22-2245:1 ("But, again, the data I have available, I'm using those gross add margins."). On rebuttal, Professor Shapiro nonetheless cited that "higher number" as "what gives me a higher end of my range" of projected harm. *Id.* at 3819:25-3820:7. That does not appear to be the case: elsewhere, Professor Shapiro testified that the "higher end" of the range derives from his use of a higher long-term subscriber loss rate of 14% (as compared to the 9% rate he chose to present to the Court during his direct testimony), rather than any alterations to other inputs, such as the margin data. *Id.* at 2259:4-8 ("I realize there are ranges here. These are based on, we're starting from the low end, 9 percent subscriber loss rate, and projecting that. So if we started with the 14 percent, we'd have higher numbers."); *see also id.* at 2239:3-7. Professor Shapiro's belated attempts to link his point regarding the increased margins for existing customers to the high-end projections he reported, or to present those increased margins as if they were quantified and incorporated into his model, are thus unavailing and further undermine the credibility of his presentation.

[50] The primary exception is Charter, which has been displaying Turner content pursuant to temporary, short-term extensions of the companies' affiliate agreement, which initially expired in 2016. *See* Tr. 1353:21-1354:3 (Montemagno (Charter)).

assessing "the longer term impact of a new market structure"; factoring in Turner's current affiliate agreements, he noted, would be counterproductive because those agreements are "temporar[y]" and will "expire in time." *Id.* at 2209:11-19, 2320:24-2321:10.

The evidence in this case, however, shows that the real-world effect of Turner's present affiliate agreements will be rather "significant" until at least 2021. *Id.* at 2316:14-18. Indeed, Professor Shapiro conceded that by simply factoring in the presence of one such affiliate agreement with a large distributor **[**192]** (which the Court will not name for confidentiality purposes), the total MVPD price increase predicted by his model decreases by "about one-third" — a decrease that "take[s] away the vast majority the net effect" on MVPD monthly costs. *See id.* at 2317:25-2318:6, 2319:10-16; *see also id.* at 2617:12-2618:13 (Carlton) (factoring in that "one contract" reduces MVPD harm projection to "roughly a 5-cent projected price increase instead of a 27-cent price increase"). Not surprisingly, Professor Carlton testified that simply by accounting for all current affiliate agreements and making no other changes to Professor Shapiro's model, the model would generate a predicted net *benefit* to consumers rather than a net harm for the years 2016 and 2017. *See id.* at 2513:1-9 (2017) (discussing DXD116); *id.* at 2515:25-2516:1 (2016) (discussing DXD116).

In other words, given Turner's existing contracts, the level of post-merger harms predicted by Professor Shapiro's existing model would not begin to phase in until at least 2021. But even Professor Shapiro concedes that 2021 is "getting out there a ways" and that "it gets harder" to predict actual harm that far down the line. *Id.* at 2258:1-2, 2316:15-2317:4-5 **[**193]** (Shapiro). That recognition reflects the testimony of industry witnesses, many of whom testified that the landscape of the video distribution industry is continually changing and will continue to change as new entrants join the market. *See, e.g., id.* at 2456:7-11 (Carlton) ("So we have Netflix, we have Google coming in, you have Amazon Prime. These are all big firms, Apple and Facebook we know are coming in. . . ."); *id.* at 2948:20-2949:3 (Holanda (RCN)) (agreeing that migration to "OTT providers" is "likely to grow in the future as Millennials become more and more prominent in the marketplace"); *cf id.* at 3853:18-19 (Shapiro) ("I think it is not disputed that the video margins are going down.").

I am thus left with projections of harm for the years 2016, 2017, and 2021 that all concede have not and will not occur in the real world due to Turner's actual affiliate agreements. *See, e.g., id.* at 2317:6-15 (Shapiro) ("Q: So let's be clear about this when . . . you said $586,000,000 of annual price increase[s] to all of the MVPDs and a couple of virtual [MVPDs] in there, right? A: That's the number there. Q: So just to be clear, that isn't going to happen. This isn't going to happen let's **[**194]** say in the year after the merger, right? That can't happen. A: That is true."). As such, I have no choice but to agree with Professor Carlton that Professor Shapiro's model is "overestimating how quickly" the predicted harms "are going to start occurring." *Id.* at 2444:15-23 (Carlton). To the extent, moreover, that the model projects "actual effects [that] will only occur gradually" after the largest of those agreements expires in 2021, even Professor Shapiro admits that it "gets harder" to project what the industry — and thus actual, real-world harm — will look like that far down the road. *Id.* at 2209:17-19, 2316:19-2317:5 (Shapiro); *cf. id.* at 235:18-19 (Schlichting (DISH)) (Sling launched as the first virtual MVPD in February 2015). For those reasons, even putting aside the various problems with the model previously discussed, I conclude **[*241]** that the model's predictions of harm are not "'sufficiently probable and imminent' to be probative in view of the facts of this case, especially "in the context" of the ever-increasing competitiveness of this "particular industry." *Arch Coal, 329 F. Supp. 2d at 115* (quoting *Marine Bancorporation, 418 U.S. at 623 n.22*); *Aetna, 240 F. Supp. 3d at 79* (quoting *Brown Shoe, 370 U.S. at 321-22*).

* * *

After hearing Professor Shapiro's bargaining model described in open Court, I wondered **[**195]** on the record whether its complexity made it seem like a Rube Goldberg contraption. Professor Carlton agreed at the trial that that was a fair description. *See* Tr. 2447:2-7 (Carlton). But in fairness to Mr. Goldberg, at least his contraptions would normally move a pea from one side of a room to another. By contrast, the evidence at trial showed that Professor Shapiro's model lacks both "reliability and factual credibility," and thus fails to generate probative predictions of future harm associated with the Government's increased-leverage theory. *Anthem, 855 F.3d at 363*. Accordingly, neither Professor Shapiro's model, nor his testimony based on it, provides me with an adequate basis to conclude that the challenged merger will lead to *any* raised costs on the part of distributors *or* consumers — much less consumer harms that outweigh the conceded $350 million in annual cost savings to AT&T's customers.[51]

[*242] IV. The Government Has Failed to Meet Its Burden to Show That the Proposed Merger Is Likely to Substantially Lessen Competition on the Theory That AT&T Will Act to Harm Virtual MVPDS Through Its Ownership of Time [196] Warner Content**

The Government's second theory of competitive harm relates to virtual MVPDs. Virtual MVPDs, like traditional MVPDs, offer consumers linear (or "live") television programming in exchange for a subscription fee. *See supra* pp. 11-13. Unlike traditional MVPDs, however, virtual MVPDs transmit their video content over the internet. *Id.* Compared to traditional MVPDs, virtual MVPDs generally offer lower-cost programming packages to consumers; those packages, known in the industry as "skinny bundles," contain fewer networks than do the larger bundles offered by MVPDs. *Id.* Although virtual MVPDs are of recent vintage, they are quickly gaining market share in the video programming and distribution industry. *See* Tr. 448:24-449:2 (Schlichting (DISH)). Examples of virtual MVPDs

---

[51] Although they amount to "extra icing on a cake already frosted," there are even more reasons to be skeptical of the Government's increased-leverage theory of competitive harm. ***Yates v. United States, 135 S. Ct. 1074, 1093, 191 L. Ed. 2d 64 (2015)*** (Kagan, J., dissenting).

First, the Court has reason to believe that, post-merger, AT&T will honor Turner's commitment to arbitrate, counterparties will agree to the terms of that commitment, and the prospect of arbitration will influence affiliate negotiations. In short, the commitment, made by Turner shortly after the filing of this suit, will have real-world effects. For starters, the proposed arbitration agreement is similar "in many of the fundamental ways" to the arrangement blessed by the DOJ, FCC, and this Court in the Comcast-NBCU merger. Tr. 2680:1-9 (Katz); *see also* 7/27/2011 Hr'g Tr. 7:4-7, 13:6-10, *Comcast Corp., 808 F. Supp. 2d 145*. Record evidence confirmed the real-world impact of an arbitration provision of this kind, giving the Court confidence both that arbitration offer will have import to negotiations and would be accepted by Turner's counterparties. *See supra* pp. 100-105 (reviewing econometric analysis of affiliate-agreement prices after the Comcast-NBCU merger); *see also* Tr. 1388:18-22 (Montemagno (Charter)) (testifying to effects of arbitration in NBCU negotiations); *id.* at 2017:12-15 (Bond (NBCU)) (similar); *id.* at 121:14-122:9 (Fenwick (Cox)) (confirming that Cox had proposed arbitration "[j]ust like in Comcast case" as condition to this merger); *id.* at 464:17-20 (Schlichting (DISH)) (similar). Given its trial presentation, I am hard-pressed to conclude that AT&T would (much less could) retreat from the commitment in light of the apparent reputational costs of doing so — costs that would imperil future negotiations in a marketplace with repeat players. *See, e.g., id.* at 3261:23-3262:3 (Stankey (AT&T)); *cf. id.* at 2622:4-2624:1 (Carlton).

Contrary to the Government's insinuations about the reasons for the arbitration offer, moreover, the Court does not view the offer as akin to an admission by defendants that the proposed merger would lead to the anticompetitive harms that the Government posits. *Cf id.* at 39:1-5 (Gov't Opening). Instead, the Court credits John Stankey's and Randall Stephenson's testimony that the commitment was intended to "put our money where our mouth is" in showing that the proposed merger, far from being aimed at "do[ing] any of the things that the government allege[s]," is instead a "vision deal" being pursued to achieve "lower prices, improved quality, enhanced service, [and] new products." *Id.* at 3261:16-3262:3 (Stankey (AT&T)); *id* at 3402:3 (Stephenson (AT&T)); *see also id.* at 3467:18-3468:9 (Stankey (AT&T)); *id.* at 3395:23-25 (Stephenson (AT&T)); *supra* pp. 36-40.

Second, the Court observes that the Government's increased-leverage theory fails to account for another feature of the market, namely the FCC's program access rules. As defendants' expert, Professor Katz, testified, those rules are calculated to prevent precisely the kind of harm predicted by the Government: a vertically integrated entity discriminatorily increasing programming prices on its distributor-rivals. *See* Tr. 2693:14-2694:5 (Katz) ("They wanted to make sure that somehow control of the programmer wasn't used to harm competition."); *47 U.S.C. § 548(b)*, *(j)*; *47 C.F.R. § 76.1001(b)(1)(i)-(ii)*; *see* *47 U.S.C. § 548(c)(2)*. Those regulations are a proper subject of antitrust analysis, *see* *Verizon Comms Inc. v Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 411-12, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)*, and appear to be squarely on-point, at least according to the unrebutted testimony of Professor Katz. *See* Tr. 2693:19-2694:1 (Katz) ("[T]here are two broad categories. One category . . . prohibits discrimination against different distributors. And the other broad category prohibits the distributor from having undue influence on the decisions of the programmer. So, again, the idea of you don't want the distributor telling the programmer to go do things to harm other distributors."). Nevertheless, the Government all but wishes them away — and does so with little explanation or, more importantly, record evidence.

include AT&T's DirecTV Now, DISH's Sling TV, Sony's Playstation Vue, Hulu Live, Google's YouTube TV, FuboTV, and Philo. Gov't PFOF ¶ 14; Defs.' PFOF ¶ 18.

According to the Government, the challenged merger would give AT&T the "ability to harm competition by slowing the growth of emerging, innovative online distributors" — that is, virtual MVPDs. Gov't PFOF 104. AT&T could do so, the Government asserts, either acting on its **[**197]** own (under the "unilateral theory") or in coordination with Comcast-NBCU (under the "coordination theory"). *See* Gov't PCOL ¶ 63.[52] Defendants counter that the evidence does not support the Government's virtual MVPD theories. Far from showing that AT&T is trying to marginalize virtual MVPDs, defendants claim that the trial demonstrated that AT&T is embracing those providers — even launching and supporting a successful virtual MVPD, DirecTV **[*243]** Now. With respect to the supposed incentive to coordinate with Comcast, defendants argue that the Government's theory ignores critical differences between the positions of AT&T and those of Comcast vis-à-vis virtual MVPDs as well as key limitations on the companies' abilities to coordinate successfully. For the following reasons, I agree with the defendants that the Government has failed to show a likelihood that the merger would substantially lessen competition by empowering the merged company to act, either unilaterally or in coordination with Comcast-NBCU, to harm virtual MVPDs.

Unilateral Theory. The Government first claims that AT&T has an incentive to harm innovative virtual MVPDs and could act unilaterally on that incentive by foreclosing **[**198]** or restricting virtual MVPDs' access to "must-have" Turner content. *See* Gov't Post-Tr. Br. 11. That is a curious claim, to say the least, in light of Professor Shapiro's testimony that, in his view, "standing alone, acting unilaterally, the — AT&T *will* still want to license the Turner content to virtual MVPDs." Tr. 2260:19-21 (Shapiro) (emphasis added); *see id.* at 2291:8-11 ("Q: Now with respect to coordination, you've made no claim that AT&T post merger would have a unilateral incentive to withhold Turner content from virtual MVPDs, correct? A: Correct."); *id.* at 2293:9-13 ("Q: And you're not contending and you've rendered no opinion that they will withhold Turner content from MVPD[s], correct? A: That's correct. Q: Or as we said unilaterally from virtual MVPDs, correct? A: Also correct."). That is so, according to Professor Shapiro, because as with traditional MVPDs, it would be "profitable" for the merged entity to continue to license Time Warner content to virtual MVPDs. *Id.* at 2293:14-17.

If citing Professor Shapiro's testimony weren't enough to dispel the Government's unilateral virtual MVPD theory, defendants put forward additional evidence that AT&T would have incentive to ***[**199]*** *license* Time Warner content to virtual MVPDs after the merger. For starters, given Turner's imperative of broad distribution, *see supra* pp. 10-11, Turner executives testified that it is important for Turner's content to be included on virtual MVPDs as they continue to grow in relevance. With consumers choosing to cut or shave the cord, Turner has "embrac[ed] virtual MVPDs," Turner CEO John Martin testified, "because, again, we need to be distributed to as full distribution as possible." *Id.* at 607:13-16 (Martin (Turner)); *see also id.* at 3157:22-3158:7 (Bewkes (Time Warner)) (explaining that virtual MVPDs are a favorable trend because they are "another place where we could put our networks in front of consumers"); *id.* at 1064:25-1065:3 (Breland (Turner)) ("Q. . . . [W]hat was your strategy with respect to negotiating with the new entrant virtual MVPDs? A. I want to be on every platform that comes."); *cf. id.* at 3126:8-16 (Bewkes (Time Warner)) (stating that the Government's coordination theory "makes no sense" because "[w]e want to be on all the virtual MVPDs").

The entire premise of the proposed merger - allowing AT&T to go mobile with video content - provides yet another reason to reject the Government's **[**200]** unilateral merger theory. *See id.* at 3393:24-25 (describing plans to deploy Time Warner video content over AT&T's wireless network in order to make that content "worth far more"); *see also* PX456-3 (discussing merger strategy and AT&T "strategy of ensuring that its content is available to

---

[52] It will come as no surprise that a basic premise of the virtual claims — as for the Government's increased-leverage theory — is the literal "must have" nature of Turner programming. For all the reasons stated earlier in this opinion, the Court is skeptical that, in the Government's words, virtual MVPDs are "dependent on programmers" like Turner. Gov't PFOF ¶ 17. For instance, Sling, the most successful virtual MVPD, offers a package without broadcast stations and does not offer CBS at all. *See* Tr. 351:12-25 (Schlichting (DISH)). As Sling President Warren Schlichting explained, the whole point of virtual MVPDs like Sling, in fact, is to carry *fewer* channels. *See id.* at 236:2-6 ("Q. Do you carry all the same channels as other pay-TV services? A. Certainly not all of them. One of the places that we tried to innovate is to carry fewer channels, many fewer channels.").

consumers on a wide range of distribution platforms"). AT&T's largest business is its wireless business, where it has more than 100 million subscribers. *Id.* at 3208:19-24 (Stankey (AT&T)); *id.* at 3379:19-20 (Stephenson (AT&T)). On its **[*244]** own, if separated from the rest of the corporation, AT&T's wireless business would be "number 37 on the Fortune 500" - approximately the size of Proctor & Gamble. *Id.* at 3379:20-3380:1 (Stephenson (AT&T)).

Within its wireless business, AT&T Chairman and CEO Randall Stephenson explained, "getting video delivered onto the mobile device" is one of AT&T's "big focus areas." *Id.* at 3381:24-25; *see id.* at 3208:20-22 (testifying about AT&T's goal of "transform[ing] the way we deliver video to customers, [to] make the video far more portable"). Increased video consumption is lucrative for AT&T because viewers consume more data on the wireless network. This leads AT&T customers **[**201]** to "buy up" on data plans, get more devices, or connect more devices to the network — all "good for [AT&T's] business." *Id.* at 3254:19-22 (Stankey (AT&T)). Indeed, "over half of all of the traffic on [AT&T's] network today is video, delivering video." *Id.* at 3382:4-5 (Stephenson (AT&T)).

Industry trend-lines point toward increased video consumption in the future — and AT&T aims to ride these tailwinds. *See id.* at 3505:21-3507:2. Right now, AT&T is working to develop fifth-generation wireless, which will drive video consumption even more. *Id.* at 3382:7-3383:5. And AT&T views mobile consumption of video, including through virtual MVPDs, as a critical part of its post-merger future. *See id.* at 3506:23-25 ("What we're all working towards is creating [$]35 and $15 bundles. And that's where the world is moving."). Notably, the benefits associated with AT&T customers accessing virtual MVPD content continue to accrue even when they use DirecTV Now's competitors like Sling and YouTube TV. *See id.* at 3432:16-20 ("With AT&T, we're in a unique position. We like over-the-top. Over-the-top generally means, in this day and age, wireless. People are using their wireless devices to watch video, whether **[**202]** it's our video or not, we're somewhat ambivalent."). All of this gives the combined entity even more reason to distribute Time Warner content as broadly as possible in order to encourage the proliferation of virtual MVPDs. As Randall Stephenson put it, the proposed merger is a "vision deal" reflecting a belief "that distribution of [Time Warner] content to wireless will drive the value of the content up" and that "the ability to pair our data with [Time Warner's] advertising inventory" for digital ads delivered over the internet "will drive value." *Id.* at 3402:24-3403:6.

Against that evidence, the Government cites a handful of AT&T documents and statements related to virtual MVPDs — documents the Government says show AT&T has the incentive to slow the rise of virtual MVPDs. *See, e.g.*, PX42; PX228; PX40; PX47; PX48. For multiple reasons, however, I do not consider the fact that AT&T executives may have previously expressed displeasure with Turner's relationships with its competitor virtual MVPDs to be probative of AT&T's post-merger economic incentive to license Turner content to virtual MVPDs. First, these statements shed no light on the post-merger incentive AT&T would have to maximize **[**203]** distribution of Turner content. As the reader now knows, wide distribution is the *sine qua non* of the programming industry, driving both subscription and advertising revenue. Indeed, because of these "[gains] from trade" associated with licensing Turner content as broadly as possible, Professor Shapiro himself refused to countenance the Government's unilateral virtual MVPD theory. Tr. 2293:12-17. Second, these statements do not explain why AT&T would discard the profits associated with increased video consumption by its 100 million-plus wireless subscribers accessing virtual MVPD offerings. In short, the Government's **[*245]** evidence on its unilateral withholding theory is fatally anemic.[53]

---

[53] To the extent the Government seeks to recycle these statements for purposes of its coordination theory, this evidence is unpersuasive on that count, too. The combined entity would stand to gain much from wide distribution of Time Warner content to virtual MVPDs, and stand to lose much by refusing to do so. The Government's remaining fact evidence similarly fails to establish any incentive to act, unilaterally or coordination, to stifle virtual MVPDs. To the extent the Government seeks to recycle the slide deck, PX184, PX543, or Schlichting's testimony for its virtual claims, that evidence remains of limited probative value for the reasons stated above. *See supra* pp. 86-88 (PX184, PX543); *see supra* pp. 75-78 (Schlichting testimony). Nor does additional speculation of third parties, *see* Gov't PFOF ¶¶ 291-292, or testimony as to the "importan[ce]" of Turner content to virtual MVPDs, *see id.* ¶¶ 293-294 — even if presented for the first time in this section — move the needle. Altogether, the best the Government could marshal was a statement from AT&T's John Stankey that "we kind of expected [Sling] might be concerned about" AT&T attacking their skinny bundle. *See* Tr. 3256:3-15. Such evidence, on its own or in combination, simply

Second, from the other direction, the Government advances an alternative unilateral claim: that AT&T would have the ability to break the "skinny bundle" models of virtual MVPDs by forcing those distributors to take *too many* Turner networks. Citing the testimony of Sling's President, Warren Schlichting, the Government argues that a post-merger requirement that Sling "take eight Turner networks instead of four would 'break [Sling's] model'" and, indeed, would have a snowball effect with **[**204]** other programmers. Gov't PFOF ¶ 288 (quoting Tr. 265:17-266:8, 268:9-23 (Schlichting (DISH)).

That argument, however, ignores that Turner has less of an imperative to risk a deal with Sling (or other virtual MVPDs) by insisting on carriage of all of its networks. That is so, the evidence indicates, because Turner has a highly "concentrated portfolio of networks," Tr. 558:1 (Martin (Turner)), with 85 to 90% of Turner's revenues deriving from only four networks, *see* Defs.' PCOL ¶ 51 n.39; *accord* Gov't PFOF ¶ 75. That fact, as Time Warner CEO Jeff Bewkes noted — means Turner is "better placed" to succeed in the skinny bundle model. Tr. 3126:22. The Government's skinny bundle point also overlooks the fact that Turner — like other programmers — already fights tooth and nail to get all of its networks into all of the packages of every distributor. *See id.* at 433:18-21 (Schlichting (DISH)); *id.* at 606:5-11 (Martin (Turner)). Simply put, the Government has not produced sufficient evidence to show that the challenged merger is likely to make a meaningful difference to that dynamic.[54] For all of the above reasons, I conclude that the Government has **[*246]** failed to meet its burden on its claims arising **[**205]** from AT&T's asserted potential to unilaterally harm virtual MVPDs through its post-merger control of Turner content.

Coordination Theory. The Government posits that the challenged merger would also create a likelihood that AT&T would coordinate with Comcast-NBCU to harm virtual MVPDs. In contrast to the unilateral withholding claim just discussed, the Government did at least attempt to provide some expert support for this coordination claim. *See id.* at 2261:14-20 (Shapiro). Unfortunately for the Government, however, neither that expert testimony nor its other evidence is even close to sufficient to support its coordination claim. How so?

HN5[] A proposed merger may violate *Section 7* by "enabling or encouraging post-merger coordinated interaction among firms in the relevant market that harms [consumers]." Gov't PCOL ¶ 67 (quoting *FTC v. OSF Healthcare Sys., 852 F. Supp. 2d 1069, 1086 (N.D. Ill. 2012))*. Such coordinated conduct need not constitute an illegal agreement under *Section 1 of the Sherman Act*, but instead can comprise instances of tacit coordination. *Cf. Heinz, 246 F.3d at 715* (coordinated effects can occur "either by overt collusion or implicit understanding"). In order to assess whether a merger will lead to an unacceptable risk of competition-stifling coordination, courts evaluate various **[**206]** "market conditions, on the whole." *H & R Block, 833 F. Supp. 2d at 77* (citation omitted). In short, that analysis involves consideration of whether would-be coordinators could wield anticompetitive power "by recognizing their shared economic interests and their interdependence with respect to price and output decisions." *Brooke Grp., 509 U.S. at 227*. Not so here !

As it does for its other claims, the Government relies on a key assumption when pressing its theory of coordinated effects. Here, the Government assumes that, "[a]s the only two vertically integrated traditional MVPDs, Comcast and AT&T would share an incentive to slow the entry and growth of virtual MVPDs." Gov't PFOF ¶ 299. To act on that incentive, the Government further asserts, the companies could "'mutually forbear'" from licensing their programming content "'without any communication between them.'" *Id.* (quoting Tr. 2265:5-2265:6 (Shapiro)). Not

---

cannot countermand the prime directive of programming — broad distribution — not to mention AT&T's independent incentive to grow video consumption on its wireless network, *see supra* pp. 153-155.

[54] In support of the notion that virtual MVPDs need Turner networks (again, in the most literal sense), the Government points to a statement by John Martin, Turner's Chairman and CEO, that Sling would be "shit without Turner." Gov't PFOF ¶ 156 (quoting PX4). This statement does not accomplish the work that the Government thinks it does. For starters, as discussed above, the very "skinny bundle" concept embraces fewer networks — even fewer popular ones — with the knowledge that some consumers will welcome the trade of fewer networks for a lower subscription fee. And second, it should come as no surprise that — even in colorful language — executives would be avid boosters for their companies' products. In the final analysis, the Government's repeated use of this John Martin quote, *see* Tr. 12:3-7 (Gov't Opening), 17-18 (Gov't Closing), calls to the mind one Court's admonition "rummage[ing] through business records" for "tidbits that will sound impressive (or aggressive)" undermines efforts to ensure "accuracy of decisions." *A.A. Poultry Farms, Inc., 881 F.2d at 1402*.

only is that theory overly speculative, it ignores key differences between AT&T and Comcast that undermine the Government's argument.

First, the Government has failed to put forward sufficient evidence to show more than a theoretical "possibility" of coordination. *Cf.* Baker Hughes, 908 F.2d at 984 ("Section 7 involves *probabilities*, not certainties or possibilities."). Indeed, **[**207]** the Court need look no further than the testimony of Professor Shapiro in that regard. When questioned at trial about the Government's coordinated effects theory, Professor Shapiro conceded that he had no "way of accessing [sic] the probability" of coordination and thus had not attempted to "quantif[y] any risk whatsoever" that the predicted coordination "could occur." *See* Tr. 2291:25-2292:13 (Shapiro).[55] Accordingly, **[*247]** Professor Shapiro confirmed that he was "not in a position to say" that coordination is "more likely to happen than not," and indeed was not even prepared to say that there's a "one percent chance that coordination will happen" as a result of the challenged merger. *Id.* at 2292:6-13. Given that testimony, and the lack of "a detailed theory" with respect to coordination, I can sympathize with Professor Carlton's reaction: "I'm not quite sure what I'm supposed to rebut on [t]his." *Id.* at 2454:1-10 (Carlton).

Second, the Government's argument regarding the incentive of AT&T and Comcast to coordinate to harm virtual MVPDs ignores that both stand to lose large amounts of affiliate fee and advertising revenues by withholding their content from virtual **[**208]** MVPDs. *See supra* pp. 10-11; Tr. 3126:8-16 (Bewkes (Time Warner)) (stating that the Government's coordination theory "makes no sense" because "[w]e want to be on all the virtual MVPDs"); *id.* at 2020:5-18 (Bond (NBCU)) ("Q: Why have you decided to license your networks to each of those virtual MVPDs? A: Well, simply we're interested in getting the most amount of distribution that we can get, and they represent an important new pathway of distribution. As I said, they now have well over three million subscribers in total. . . . [I]f we were not on those platforms we would have, you know, three million less subs, fewer subs."). Unsurprisingly, NBCU has licensed its content to each virtual MVPD. *See id.* at 2019:15-2020:2 (Bond (NBCU)). The Government has not explained why either company would be willing to forgo those affiliate fees and advertising revenues from virtual MVPDs. Nor has the Government proffered any expert analysis, for example, of how those economics could, or would, change assuming a coordinated blackout of both Turner and NBCU.

Third, and critically, the Government's argument also ignores key differences between the two companies — differences that AT&T executives believe give AT&T a competitive **[**209]** advantage over Comcast moving forward in this new era of rising virtual MVPD prevalence. AT&T's John Stankey, who will be responsible for running Time Warner should the challenged merger proceed, emphatically (and credibly) stated at trial that he could not "even imagine" aligning with Comcast given the companies' history of dealings, adding, "I'm not going to cooperate with somebody I don't like." *Id.* at 3255:2-3256:2 (Stankey (AT&T)). AT&T CEO Randall Stephenson testified similarly, responding to a question about the Government's coordination theory as follows: You probably have to

---

[55] The Government insists that it need not introduce quantitative evidence in support of the coordinated effects theory. *See* Gov't PCOL ¶ 71. The suggestion, of course, is that the Court should steer clear of imposing a requirement that the Government make a numbers-based showing on coordinated effects. Let me be clear. The Government here has failed to carry its burden on the coordination theory not because there is some *per se* requirement of quantitative analysis. Rather, the Government has failed to carry its burden because it has not put forward persuasive evidence — in any form — that AT&T and Comcast have the incentive or, given market constraints, the ability to coordinate in the manner predicted.

There is one more point. The cases cited by the Government *do* involve quantitative showings. In each one, the Court made or adopted a threshold quantitative assessment as to market concentration. *See* H & R Block, 833 F. Supp. 2d at 71-72 (applying Herfindahl-Hirschmann Index to determine market concentration); OSF Healthcare, 852 F. Supp. 2d at 1078-80 (same); *see also* Hosp. Corp., 807 F.2d at 1384 (accepting "FTC's figures" as to "highly concentrated market"). That determination, in turn, triggered the "'ordinary presumption of collusion' that attaches to a merger in a highly concentrated market." H & R Block, 833 F. Supp. 2d at 77 (quoting Heinz, 246 F.3d at 725). And with that presumption in place, the burden shifted to defendants to rebut the case by "produc[ing] evidence of 'structural market barriers to collusion' specific to [the relevant] industry that would defeat" the presumption. *Id.* (quoting Heinz, 246 F.3d at 725). Thus, the Government's insinuation that past coordinated-effects challenges were tried without resort to quantitative analysis is simply misleading. In short, the Government cannot evade its burden of proof on the "ultimate issue [of] whether the challenged acquisition is likely to facilitate collusion," Hosp. Corp., 807 F.2d at 1384; Gov't PCOL ¶ 71, by simply stating that it "does not need to quantify the potential harm," Gov't PCOL ¶ 71.

live in this industry every day like I do **[*248]** to appreciate what a stretch that is. We compete with Comcast in the marketplace. The individual that runs communication company, he wakes up every day trying to think, how do I win in the marketplace against Comcast?" *Id.* at 3431:25-3432:5 (Stephenson (AT&T)).

The most obvious "advantage" AT&T has over Comcast when it comes to virtual MVPDs is that, unlike Comcast, and as discussed at length above, AT&T has a vast wireless business with over 100 million customers. *Id.* at 3432:2-7; *id.* at 3208:19-24 (Stankey (AT&T)); *see also id.* at 3432:17-22 (Stephenson (AT&T)) **[**210]** ("Over-the-top generally means, in this day and age, wireless. People are using their wireless devices to watch video, whether it's our video or not, we're somewhat ambivalent. We'd rather it be our video; but either way, it serves our interests for people to watch video over our wireless network."); *see also supra* pp. 153-155. The reasons to encourage, not quash, virtual MVPDs unilaterally become even more compelling in the context of a coordination claim with Comcast — a competitor that is much more beholden to legacy cable infrastructure and the traditional MVPD business model. *See id.* at 3432:2-12 (Stephenson (AT&T)); *cf. id.* at 3255:18-22 (Stankey (AT&T)) ("We don't want to cooperate with Comcast to play their game. We want to figure out how we use our mobile devices and our mobile network to change the game . . . ."); *id.* at 3208:19-24 ("[O]ne of the clear objectives [for AT&T in acquiring DirecTV] was to start to transform the way we deliver video to customers [to] make the video far more portable, start to emphasize the fact that we could use our 100 million wireless subscribers to be able to do things differently, which is dramatically different than Comcast.").

The Government does not dispute **[**211]** that AT&T's wireless business confers strong incentives to maximize distribution to virtual MVPDs. Nor can it be questioned that AT&T's strong positioning in the world of mobile content distribution gives it a powerful disincentive to work with Comcast to stifle those mobile providers of video. AT&T has plainly positioned itself to ride industry tailwinds in support of mobile consumption of video. As John Stankey explained, AT&T acquired DirecTV in 2015 not in order to double down on the satellite business, a concededly mature and declining asset, but to "pick up a lot of new customers that we could work on migrating" to new products. *Id.* at 3207:18-20 (Stankey (AT&T)); *see also id.* at 3207:21-3208:2. Indeed, as soon as the merger closed, AT&T began renegotiating DirecTV's contracts to allow for a mobile, direct-to-consumer option, DirecTV Now. AT&T knew that it was "in a foot race to basically start to change the product to be able to catch the next wave, whatever that next wave was going to be. And we didn't expect that we were going to continue to see traditional pay-TV subscribers" increasing. *Id.* at 3209:12-16. Nowhere does the Government explain why AT&T would deploy valuable **[**212]** Time Warner content to prop up a rival's business model, while harming its own. Go figure !

This fundamental problem of incentives and profitability buries the Government's claim. It is beyond dispute that neither the proffered concentration in the MVPD market (which, by the way, will be the same post-merger), *see* Gov't PFOF ¶ 306, nor the importance of Turner and NBCU content, *see id.* ¶ 307, nor some transparency in "key information," *see id.* ¶¶ 308-310, nor any other of the Government's evidence on the coordination theory (alone or in combination), can establish a "risk of coordination" unless the parties have an incentive or interest to collude in the first place.

[*249] Even assuming, contrary to the evidence, that AT&T would want to coordinate with Comcast under the Government's theory, the staggered, lengthy industry contracts would make that coordination strategy extremely risky. *See id.* at 643:20-644:2 (Martin (Turner)) (testifying that "because of the length of these contracts, because they're typically years in length," a strategy set "in 2013" would "begin to show up in '15, '16 and '17"); *id.* at 87:9-11 (Fenwick (Cox)) (testifying that affiliate agreements run "between five and **[**213]** eight years on average"). Under the Government's coordination theory, one party — AT&T or Comcast — would have to "jump first," giving up valuable programming rights on the hope that the other, in some years' time, would elect to do the same. Indeed, this barrier to coordination is so great as to put to rest the notion not only that AT&T and Comcast would have the *incentive* to coordinate, but that the post-merger marketplace would afford them the *ability* to do so. Whether by way of tacit coordination or an illegal agreement, putting such blind faith in one's chief competitor strikes this Court as exceedingly implausible ! Indeed, the decision to "not to renew [a] license or not to license to a new virtual MVPD and wait and see if the other did it," as Professor Shapiro proposes, would *enhance* the other party's position in its next round of negotiations with the virtual MVPD at issue. Tr. 2264:14-2265:13 (Shapiro). As Charter's Tom

Montemagno explained, if a distributor goes dark with one network group, that distributor is in "a vulnerable spot, and I feel like I sort of have to do the deal" when another network group threatens a blackout. *Id.* at 1404:13-15. The result would be forgone **[**214]** revenue for a period of years, with AT&T's chief competitor gaining outsized profits in the next round of negotiations. The Government puts forward no persuasive reason why AT&T and Comcast would engage in such conduct.

The fundamental difference in incentives between AT&T and Comcast vis-à-vis virtual MVPM, the barrier to coordination in the form of long-term contracts, coupled with the fact that the Government has provided no evidence to show how the benefits of a coordinated blackout would outweigh the companies' resulting losses of affiliate fee and advertising revenues, leave me completely unable to accept the Government's coordinated effects theory.[56]

V. The Government Has Failed to Meet Its Burden to Show That the Proposed Merger Is Likely to Substantially Lessen Competition on the Theory That AT&T Will Restrict Distributors' Use of HBO as a Promotional Tool

The Government's final theory centers on HBO. On this score, the Government alleges that the combined entity will have **[*250]** the "incentive and ability" to prevent rival distributors from using HBO as a promotional tool to attract and retain customers. *See* Gov't Post-Tr. Br. 9-10; Compl. ¶ 39.[57] Under this theory, the combined **[**215]** entity

---

[56] In support of its coordination theory, the Government points to past communication between Dan York of AT&T and counterparts at other distributors in the Los Angeles market concerning the Sportsnet LA network. *See* Gov't PFOF ¶¶ 311-312; Tr. 2081:9-2081:16 (York (AT&T)); PX462. These instances are only weakly probative of future coordination, involving, as they do, a different market, distinctive factual setting, and different distributors. In all respects, this evidence cannot overcome AT&T's strong disincentives to coordinate with Comcast detailed in this section. *Cf. H & R Block, 833 F. Supp. 2d at 77-78* (detailing "highly persuasive historical act of cooperation" between the same two parties at the center of post-merger coordination allegations). The same goes for inquiries by York concerning Verizon Fios packages or evidence regarding John Harran's conversations with his counterpart and "good friend" at NBCU. *See* Defs.' PFOF ¶ 291; Gov't PFOF ¶ 313.

[57] In its proposed conclusions of law, the Government describes its theory that the merged entity might "restrict the use of HBO as a competitive tool." Gov't PCOL ¶ 61; *see also* Tr. 3993:7-10 (Gov't Closing) ("It means that if this merger goes forward, then the combined firm could limit the use of HBO as a competitive tool, if that competition threatens to impact AT&T."). Under this theory, HBO is a "competitive tool" insofar as it is used by distributors for discounts, promotions, marketing, and ad campaigns. *See* Gov't PCOL ¶ 61 (predicting that AT&T will have an incentive "to restrict the use of HBO as a competitive tool, and *thereby impair the competitive process and deny consumers the benefits of discounted HBO and other promotions*" (emphasis added)); *see also* Gov't PFOF ¶ 234 ("Overall, HBO is a highly valuable brand, which currently engages in significant promotional activities with MVPDs, both AT&T and its rivals."). This is consistent with the way in which Professor Shapiro viewed the theory. *See* Tr. 2290:25-2291:3 (Shapiro) ("Q. The only theory of harm that you considered relating to HBO is this issue that perhaps some promotional, some promotion of HBO might be curtailed, right? A. That's fair."). It is also consistent with the way in which the Government's Complaint and Pre-Trial Brief characterized the theory. *See* Compl. ¶ 39 ("MVPDs ... today use HBO as a tool to entice new customers and to dissuade unhappy customers from leaving and switching to a rival MVPD.... After the merger, however, the merged firm would have the incentive and ability, through contractual restrictions, to impede rival MVPDs from using HBO to compete against AT&T/DirecTV."); Gov't Pre-Trial Br. 39 ("HBO could limit approvals for the use of HBO in marketing and promotions by DirecTV's rivals in a number of ways, including forms of subtle or targeted obstruction.").

The Government's proposed findings of fact, like its closing argument, appear to advance a considerably broader theory on the ways in which HBO could limit the terms of its distribution post-merger. Such a theory would go well beyond restricting promotion-related terms. *See* Gov't PFOF ¶ 267 (listing ways in which HBO could restrict distributors' offerings of HBO to customers); Tr. 3975:11-19 (Gov't Closing) (same). Most troubling is the Government's suggestion, based solely on the testimony of Martin Hinson of Cox, that the combined entity could "withhold[] HBO entirely." Gov't PFOF ¶ 267 (citing Tr. 703:25-704:18 (Hinson (Cox)). Professor Shapiro himself disavowed this very theory of withholding HBO content: "Q. You don't claim that post-merger HBO will be withheld from any MVPD, correct? A. Correct." Tr. 2290:15-18 (Shapiro). Professor Shapiro similarly disavowed any claim that HBO's price would increase on account of the merger. *See id.* at 2290:21-23.

For the reasons discussed in this Part, the Government has failed to prove that the merged entity has an incentive to restrict rival distributors' use of HBO for promotions. To the extent that the Government suggests that AT&T will withhold HBO content would "foreclos[e] competitors of the purchasing firm in the merger from access to a potential source of supply, *or from access on competitive terms*." Gov't PCOL ¶ 61 (quoting *Yankees Entm't & Sports Network, 224 F. Supp. 2d at 673*). The basic idea, the Government tells us, is that rival distributors' use of HBO in promotions will tend to draw potential customers to those MVPDs and away from AT&T, thereby giving AT&T reason to withhold or restrict its consent to use HBO in marketing, discounts, and bundles. *See* Gov't PFOF ¶ 234. At the risk of stating the obvious, this is a gossamer thin claim.

The Government has failed to meet its burden of proof on this theory for two independent reasons. *First*, the Government has failed to show that the merged **[*251]** entity would have *any* incentive to foreclose rivals' access to HBO-based promotions. This is because the Government's promotion-withholding theory conflicts with HBO's business model, which remains "heavily dependent" on promotion by distributors. Tr. 3074:5-6 (Bewkes (Time Warner)). HBO does not run ads, leaving subscription fees as its overwhelming **[**216]** source of revenue. *See id.* at 3070:3-5; PX456-67. This makes HBO a volume-based business, in which more subscribers means more revenue. *See* Tr. 3070:3-8, 3072:7-9 (Bewkes (Time Warner)). And because HBO continues to rely on distributors to reach the end-user, witnesses testified that HBO needs MVPD promotions in order to achieve this volume. *See, e.g., id.* at 3128:16-3129:8; *id.* at 1496:10-17 (Sutton (HBO)); *see also id.* at 1508:14-16 ("[O]ur whole business is relying on our affiliates to promote us. If we can't do that, then our entire business model is destroyed."); *cf id.* at 1528:25-1529:4 (Patel (AT&T)). The Government simply fails to explain why AT&T would jeopardize — much less jettison — the promotional model on which HBO "absolutely" depends.[58] *Id.* at 1496:16-17 (Sutton (HBO)).

Second, the Government fails to establish that HBO promotions are so valuable that withholding or restricting them will drive customers to AT&T.[59] Put differently, the Government has failed to show that the marketplace substitutes for HBO are "inferior, inadequate, or more costly." Gov't PCOL ¶ 62 (internal quotation marks omitted). Third-party distributor witnesses testified that, for example, **[**217]** their companies had reduced the use of HBO in promotions, *see* Tr. 950:22-951:7 (SEALED); *id.* at 2135:17-22, 2135:24-2136:1 (Sejen (Cable ONE)). An executive from RCN said that his employer used HBO for promotions only because of the "economic incentives" offered by HBO to do so. *See id.* at 2971:16-23 (Holanda (RCN)); *cf. id.* at 2136:15-19 (Sejen (Cable ONE)). A Comcast executive confirmed that Netflix is a "substitute" for HBO that Comcast has incorporated into its set top box and includes in marketing. *See id.* 886:8-22 (Rigdon (Comcast)). This is all consistent with other evidence adduced at trial, which showed that distributors' choice of which premium content provider to use for promotions may vary based on a number of factors. *See id.* at 1526:17-25 (Patel (AT&T)).[60] Indeed, the evidence at trial further **[*252]**

---

altogether, will delay access to HBO content, will increase penetration rate requirements, or will engage in any other potentially anticompetitive conduct that falls outside the proffered promotion-withholding scheme, the Court holds that, in light of the sparse supporting evidence and Professor Shapiro's disavowal of those theories, the Government has failed to meet its burden of proof that such conduct would likely result from the proposed merger.

[58] As an add-on, HBO is low-hanging fruit for customers looking to shave monthly cable bills. *Cf.* Tr. 2137:3-6 (Sejen (Cable ONE)). This results in high "churn," making HBO that much more reliant on promotions to maintain subscriptions. *See id.* at 2316:10-12; *id.* at 2972:20-24 (Holanda (RCN)). In these promotions, HBO depends on distributors because "the distributor . . . owns the relationship with the customer." *Id.* at 1528:22-1529:4 (Patel (AT&T)).

[59] The Court is aware that, in the most technical sense, HBO has the "ability" to withhold certain promotions by way of its contract-based approval process, under which HBO must bless distributors' use of HBO trademarks and talent for us in promotions. This fact alone, however, does not establish that AT&T would be able to "impair the competitive process." Gov't PCOL ¶ 61. For its theory, the Government must also show that HBO has an incentive to act anticompetitively and that only "inferior, inadequate, or more costly" substitutes for HBO promotions exist in the marketplace, *id. ¶ 62* (citation omitted). The Government has failed to make these showings.

[60] After a trial replete with evidence on evolving, hyper-competitive marketplace conditions, the notion that Netflix is an adequate substitute for HBO should come as no surprise. "There was a time." HBO President Simon Sutton explained, "when very few people were making the kinds of shows we make [at HBO]. Now, it seems like almost every week, there's an announcement of somebody else making it." Tr. 1494:13-21. Netflix now has a programming budget that more than doubles HBO's, *id.* at 3099:13-15 (Bewkes (Time Warner)), and Netflix and HBO openly compete "in many different ways," including for "the talent to make the same shows," *id.* at 1493:18-1494:3 (Sutton (HBO)). And when measured by number of subscribers, both Netflix and Amazon

showed that MVPDs are hardly limited to premium content providers like HBO, Showtime, and Netflix in their choice of promotional tools; to the contrary, distributors have been known to bundle services with gift cards, price discounts, higher broadband speeds, additional telephone lines, video on demand films, devices such as iPads, and free installations or equipment. *Id.* at 717:15-25 **[**218]** (Hinson (Cox)); *id.* at 2972:1-6 (Holanda (RCN)); *id.* at 1497:5-10 (Sutton (HBO)).

Although this promotion-withholding theory made only a very brief appearance at trial, the Government asserts that this theory of harm constitutes an independent basis for blocking the merger. Gov't PCOL ¶¶ 61-62; Gov't Pre-Trial Br. 40.[61] But in support of this theory, the Government has brought to bear little evidence indeed. As with its primary, increased-leverage claim of harm, the Antitrust Division decided to spill most of its ink developing undisputed facts — HBO is popular, *see* Gov't PFOF ¶¶ 28, 235-242, valuable, *see id.* ¶¶ 28, 235, 243-252, and an effective promotional tool for MVPDs, *see id.* ¶¶ 253-258. The Government also relays the undisputed fact that HBO, as a matter of contract, retains significant control over the way in which its "trademarks or . . . talent" are used in those promotions. Tr. 1458:10-13 (Sutton (HBO)); *see* Gov't PFOF ¶¶ 269-270 (discussing approval process for use of HBO in promotions). It did not, however, come to Court with economic evidence of any kind, *see* Tr. 2291:4-7 (Shapiro), and proffered only bare conjecture about how there may be "like a thumb on the **[**219]** scale" in favor of the Government's promotion-withholding stratagem, *id.* at 2267:8-21; *see also id.* at 2267:3-7. As such, the Government's evidence is too thin a reed for this Court to find that AT&T has, in that well-worn turn-of-phrase, either the "incentive" or the "ability" to withhold HBO promotional rights in order to "lessen competition substantially." Gov't PCOL ¶ 61. For these reasons, it is small wonder that Professor Shapiro himself refused to endorse the theory, testifying that, in his view as an economist, such a ploy "[o]n its own . . . would not have such a big impact, that it would substantially lessen competition." Tr. 2275:24-2276:13 (Shapiro).

For these two, independent reasons, the Government has failed to provide sufficient evidence to support its final theory in this case. Accordingly, I reject outright the assertion that the combined entity would likely restrict HBO as a promotional tool in order to harm AT&T's distribution **[*253]** rivals and thereby lessen competition in the marketplace.

CONCLUSION

The parties have waged an epic battle, under extremely restricted deadlines, to litigate and try this historic vertical merger case. Each side's evidence and theories **[**220]** have been subjected to cross-examination and the rigors of the Rules of Evidence and Civil Procedure. It has been a herculean task for all the parties and the Court.[62] Each side has had its proverbial day in Court. The Court has now spoken and the defendants have won. But, the process is not quite over yet !

---

are "eclipsing HBO." DX709-3. Indeed, one of the Government's experts, in an improper communication sent to Government attorneys during the course of his testimony in violation of the Court's witnesses rule, forwarded a YouTube video describing Netflix as one of the "top-ten ... monopolists you've never heard of." *See* Tr. 3602:17-3603:7, 3604:7-25 (Quintero). Put simply, HBO is in the fight of its life !

[61] The Government appears to suggest that incentive to engage in anticompetitive conduct — without any demonstration as to the probability of acting on that incentive — is sufficient reason to block a proposed merger. *See* Gov't PCOL ¶ 61 ("In this action, the effect of the merger may be to lessen competition substantially by incentivizing the merged firm to restrict the use of HBO as a competitive tool, and thereby impair the competitive process and deny consumers the benefits of discounted HBO and other promotions."). This proposition seems impossible to square with the legal standards governing *Section 7* actions, which require a probability of anticompetitive effects. *See supra* pp. 50-52 & n.16. Because the Government has failed to establish that the merged entity will have any incentive to withhold HBO promotional rights, the Court need not answer the question whether the existence of such an incentive, without more, would be sufficient to show that the proposed merger would substantially lessen competition for purposes of *Section 7*.

[62] *See, e.g.*, WDH & RSC at W.R. 6326.

There is a grave and understandable fear on the part of the defendants that the Government will now seek to do *indirectly* what it couldn't accomplish directly by seeking a stay of this Court's order pending an appeal to our Circuit Court.

The consequences of receiving such a stay would cause irreparable harm to the defendants in general and AT&T in specific. First, it would effectively prevent the consummation of the merger by the June 21, 2018 break-up date for the deal. Second, it would cause AT&T to have to pay the $500 million break-up fee it will owe to Time Warner if the deal is not consummated by that date. Those two consequences, of course, would occur regardless of whether this Court's decision were later upheld following appellate review. In this Court's judgment, a stay pending appeal would be a manifestly unjust outcome in this case.

The Government has had this **[**221]** merger on hold now since October of 2016 when it launched its investigation. In that 18-plus month period, the companies have twice extended the break-up date to accommodate the Government's litigation of this case. During that same period, the video programming and distribution industry has continued to evolve at a breakneck pace. The cost to the defendants and the Government to investigate, litigate, and try this case has undoubtedly been staggering — easily in the tens of millions of dollars.

If the Government were to ask me to stay this Court's ruling, I would, under the law, have to weigh whether the Government has a strong likelihood of success on the merits and would suffer irreparable harm should the stay be denied, among other things. Well, suffice it to say — as my 170-plus page opinion makes clear — I do not believe that the Government has a likelihood of success on the merits of an appeal. And in my judgment, given that our Circuit Court has never hesitated to unwind an unblocked merger if the law and facts warrant doing so, there would be no irreparable harm to the Government — only to the defendants — if my ruling were stayed. As such, I could not, and would not, grant **[**222]** such a stay in the first instance.

That of course is not to suggest in any way that the Government should not consider seeking appellate review of the merits of this Court's decision. That is, by any standard, fair game. But the temptation by some to view this decision as being something more than a resolution of this specific case should be resisted by one and all !

The Government here has taken its best shot to block the merger based on the law and facts, and within the time allowed. The defendants did their best to oppose it. The Court has spoken. To use a stay to accomplish *indirectly* what could not be done directly — especially when it would cause certain irreparable harm to the defendants — simply would be unjust. I hope and trust that the Government will have the good judgment, wisdom, and courage to **[*254]** avoid such a manifest injustice. To do otherwise, I fear, would undermine the faith in our system of justice of not only the defendants, but their millions of shareholders and the business community at large.

* * *

Thus, for all of the foregoing reasons, the Government's request to enjoin the proposed merger is **DENIED**.

/s/ Richard J. Leon

RICHARD J. LEON

United States District Judge

[EDITOR'S NOTE: The following court-provided text does not appear at this cite in F. Supp. 3d.]

[*none] **ORDER [**223]**

Upon consideration of the applicable law, the evidence presented at trial, the parties' arguments, and the entire record before the Court, and for all of the reasons given in the accompanying Memorandum Opinion, the Court concludes that the Government has failed to carry its burden to show that the merger of defendants AT&T and Time

Warner, as reflected in the October 22, 2016 merger agreement, is likely to "substantially . . . lessen competition" in violation of *Section 7* of the Clayton Act, *15 U.S.C. § 18*.

It is therefore **ORDERED** that the Government's request to enjoin the proposed merger between defendants AT&T and Time Warner is **DENIED**; it is further

ORDERED that the pending post-trial motions for leave to file amici curiae briefs, *see* Dkt. ## 129, 135, 144; motion to intervene, *see* Dkt. # 142; and motions for admission pro hac vice, *see* Dkt. ## 133; 134, are **DENIED**.

SO ORDERED.

Morton v. Stephenson

United States District Court for the Central District of California

June 13, 2018, Decided; June 13, 2018, Filed

Case No. 8:17-cv-02198-JLS-DFM

Reporter

2018 U.S. Dist. LEXIS 238261 *

Randall Aaron Morton v. Randall Stephenson et al.

Core Terms

antitrust, mergers, allegations, mail, Clayton Act, appears, summons

Counsel: **[*1]** Randall Aaron Morton, Plaintiff, Pro se, Laguna Niguel, CA USA.

For Randall Stephenson, At&T, Jeff Bewkes, Time Warner, Defendants: Michael John Finnegan, LEAD ATTORNEY, Pillsbury Winthrop Shaw Pittman LLP, Los Angeles, CA USA; Ashley Brooke Eickhof, Jeffrey S Oliver, Joseph A Ostoyich, Baker Botts LLP, Washington, DC USA.

For The Walt Disney Company, Defendant: Justin P Raphael, Munger Tolles and Olson LLP, San Francisco, CA USA; Stuart N Senator, Bradley S Phillips, Munger Tolles and Olson LLP, Los Angeles, CA USA.

Judges: HONORABLE JOSEPHINE L. STATON, UNITED STATES DISTRICT JUDGE.

Opinion by: JOSEPHINE L. STATON

Opinion

CIVIL MINUTES — GENERAL

PROCEEDINGS: (IN CHAMBERS) ORDER (1) GRANTING DEFENDANTS' MOTIONS TO DISMISS (Docs. 18, 22); AND (2) DENYING AS MOOT PLAINTIFF'S MOTION FOR SUMMARY JUDGMENT (Doc. 46)

Before the Court are two Motions to Dismiss, one filed by Defendant The Walt Disney Company (Disney Mot., Doc. 18) and one filed by Defendants AT&T Inc., Jeff Bewkes, Randall Stephenson, and Time Warner Inc. (AT&T Mot., Doc. 22). Plaintiff Randall Morton filed an untimely opposition. (Opp., Doc. 33.) Defendants replied. (Disney Reply, Doc. 38; AT&T Reply, Doc. 40.) The Court finds these matters appropriate for **[*2]** decision without oral argument. *Fed. R. Civ. P. 78(b)*; C.D. Cal. R. 7-15. Accordingly, the hearings set for June 15, 2018, at 2:30 p.m., are VACATED. For the following reasons, the Court GRANTS Defendants' Motions.

A. BACKGROUND

Morton brings suit against Defendants Randall Stephenson, AT&T, Jeff Bewkes, Time Warner Corporation, Robert Iger, Walt Disney, Rupert Murdoch, and 21st Century Fox pursuant to the Sherman Antitrust Act, the Clayton Act, the California Cartwright Act, and *18 U.S.C. section 1343* (criminal wire fraud). (FAC at 1, Doc. 15.) He seeks to enjoin the mergers of AT&T with Time Warner and of Disney with Fox. (*Id.* at 10.)

Morton's First Amended Complaint is anything but the "short and plain statement" required by *Rule 8 of the Federal Rules of Civil Procedure*. He alleges that Defendants "knowingly and willfully are working in concert with a cabal of highlyplaced, highly-remunerated attorney/lobbyist ENABLERS . . . to crush up-and-coming competitors by consolidating the entire communications, telecom and entertainment industries under singular roofs in violation of longstanding, pre-U.C.C. laws of the United States brought forward and amended within the U.C.C. that continue to recognize the danger to competition inherent in the corporatocracy powers." (*Id.* at 3.) Morton "contends and **[*3]** alleges that the chairmen of all four defendant organizations are highranking members of the Council on Foreign Relations (CFR) or at least frequent guest speakers, and are therefore cleared in advance to ignore or bypass federal and state law when it suits the monopolist agenda." (*Id.* at 4.) The merger attempts by AT&T and Disney violates the Clayton Act because they "would give the combined behemoths firm control over massive video, wireless and internet distribution networks as well as the content-producing studios Warner Bros. and Fox that, by merging or being acquired, would no longer compete with the already monolithic owners, let alone any other competitor." (*Id.* at 6.) He writes that "both merger-acquisitions appearing on the world stage in this day and age portend creation of massive monopolies in terms of the mergers and the potential for crushing all competition thereafter, even in perpetuity . . . the simultaneity of these mergers and the enablers involved would indicate that these defendants and their enablers are working in concert with each other and with all the principals who enabled the takeover of Universal NBC." (*Id.* at 9-10)

Morton asserts that he has standing "as a consumer of communication **[*4]** and entertainment systems controlled, owned, and shaped by Defendant AT&T bureaucrats who currently take full advantage of the Plaintiff and his family with exorbitant cost structures and derivative, limited product appeal." (*Id.* ¶ 9.) He "will seek to prove in Discovery that AT&T's Chinese business partners and affiliates currently are staging a Great Withdrawal of investment in America, yet may well emerge at some future date as the owners of Warner Brothers Studio." (*Id.* ¶ 12.) Morton "has identified an opportunity to build a consortium that has the financial wherewithal to acquire either of the defendant studios Warner and Fox without the antitrust issues. (*Id.* at 1.)

Morton filed an application for a Temporary Restraining Order on January 2, 2018. (Ex Parte App., Doc. 10.) The Court denied the request due to Morton's failure to demonstrate a likelihood of success on the merits or irreparable injury in his Complaint or Application. (Order Denying TRO at 2, Doc. 14.) Defendants The Walt Disney Company, AT&T, Jeff Bewkes, Randall Stephenson, and Time Warner Inc. filed Motions to Dismiss the FAC that were set for hearing on April 13, 2018. Plaintiff filed an opposition on April 3, 2018, ten **[*5]** days before the hearing and eleven days late pursuant to Local Rule 7-9, which requires that opposition paperwork be filed no later than twenty-one days before the hearing. (*See* Order Continuing Hearings, Doc. 37.) The Court continued the hearings to allow Defendants to reply.

B. LEGAL STANDARD

1. 12(b)(5)

"Before a federal court may exercise personal jurisdiction over a defendant, the procedural requirement of service of summons must be satisfied." *Omni Capital Int'l, Ltd. v. Rudolf Wolff & Co., Ltd., 484 U.S. 97, 104, 108 S. Ct. 404, 98 L. Ed. 2d 415 (1987)*. Under *Federal Rule of Civil Procedure 12(b)(5)*, a party may move to dismiss for insufficient service of process. *Fed. R. Civ. P. 12(b)(5)*. "Once service is challenged, plaintiffs bear the burden of establishing that service was valid." *Brockmeyer v. May, 383 F.3d 798, 801 (9th Cir. 2004)*.

2. 12(b)(6)

When evaluating a *Rule 12(b)(6)* motion, the Court must accept as true all allegations of material facts that are in the complaint and must construe all inferences in the light most favorable to the non-moving party. *Moyo v. Gomez, 32 F.3d 1382, 1384 (9th Cir. 1994)*. If a complaint fails to state a claim as a matter of law, that is, if "it appears certain that [the plaintiff] can prove no set of facts in support of his claim which would entitle him to relief," the complaint is dismissed. *Id.*

C. DISCUSSION

Defendants argue that the FAC fails to state a claim under *Rule 12(b)(6)* and does not comply with *Rule 8*'s requirement that a complaint include a short **[*6]** and plain statement of a claim. (Disney Mot. at 4-8, AT&T Mot at 7-12.) Further, Defendants Stephenson, Bewkes, AT&T, and Time Warner argue that service upon them was defective. (AT&T Mot. at 4-6.)

As a preliminary matter, the Court notes that it would be justified in granting relief due to the untimeliness of Morton's opposition alone. Local Rule 7-12 provides, "The failure to file any required document . . . may be deemed consent to the granting or denial of the motion . . . ." C.D. Cal. R. 7-12. The Court will, however, exercise its discretion to consider the papers on their merits.

A. Improper Service

According to Defendants Stephenson, Bewkes, AT&T, and Time Warner, Plaintiff's purported service on them was defective in both content and method. (AT&T Mot. at 4-12.) Proper service is a threshold for the Court to exercise personal jurisdiction over a defendant. *See, e.g. Omni Capital, 484 U.S. at 104*. According to *Federal Rule of Civil Procedure 4*, a summons must "state the time within which the defendant must appear and defend," "notify the defendant that a failure to appear and defend will result in a default judgment against the defendant," "be signed by the clerk," and "bear the court's seal." *Fed. R. Civ. P. 4(a)(1)(C)-(G)*. Service upon an individual within the United States must be in accordance **[*7]** with "state law for serving a summons" either in "the state where the district court is located or where service is made." *Fed. R. Civ. P. 4(e)(1)*. The same applies for serving a corporation. *Fed. R. Civ. P. 4(h)(1)(A)*. "[N]either actual notice nor simply naming the defendant in the complaint will provide personal jurisdiction without 'substantial compliance with *Rule 4*.'" *Benny v. Pipes, 799 F.2d 489, 492 (9th Cir. 1986)*, *amended*, *807 F.2d 1514 (9th Cir. 1987)* (quoting *Jackson v. Hayakawa, 682 F.2d. 1344, 1347 (9th Cir. 1982))*.

Having reviewed the proof of service, the Court agrees that it is defective. First, the certificate lists that the federal complaint, civil cover sheet, and Morton's declaration were served, but the service list does not include the summons. (Doc. 16 at 2, 3.) Second, the Court concludes that the method of service does not comply with *Rule 4*. Morton attempted service by mail on Defendant Stephenson at a Texas address and on Defendant Bewkes at a Connecticut address. (*Id.* at 3.). California requires that service by mail on an out-of-state defendant must be first-class with postage prepaid and requiring a return receipt. *Cal. Civ. Proc. Code § 415.40*. Texas requires mail service to be effected by "registered or certified mail, return receipt requested." *Tex. R. Civ. P. 106(a)(2)*. Connecticut does not allow for mail service upon defendants. *See Conn. Gen. Stat. Ann. § 52-57*. The certificate of service does not state that any return receipt was **[*8]** requested, nor that the service was attempted through registered or certified mail. Accordingly, the content of the attempted service did not comply with *Rule 4*.

Moreover, AT&T and Time Warner assert that Daniel Petrocelli of O'Melveny & Myers, upon whom service was attempted, is not a "designated . . . agent for service or process," "president, chief executive officer, or other head of the corporation, a vice president, a secretary or assistant secretary, a treasurer or assistant treasurer, a controller or chief financial officer, a general manager, or a person authorized by the corporation to receive service of process" for either corporation. *Cal. Civ. Proc. Code § 416.10(a)-(b)*. Rather, they assert that Petrocelli is outside counsel for both corporations in a separate matter. (AT&T Mot. at 11.) Morton, who bears the burden to establish proper service, does not contest this assertion. *Brockmeyer, 383 F.3d at 801*. Because Petrocelli is not a proper recipient of service on behalf of Defendants AT&T and Time Warner, the Court concludes that service as to these Defendants was defective.

The Court therefore concludes that service on Defendants Bewkes, Stephenson, AT&T, and Time Warner was defective. These deficiencies suffice to require dismissal of the **[*9]** FAC as to them.

B. Failure to State a Claim

Even had service been effective on Defendants, however, the Court concludes that the FAC fails to state a claim. The FAC asserts that the case arises out of the Sherman Antitrust Act, the Clayton Act, the California Cartwright Act, and "possible criminal violations under *18 U.S.C. section 1343*," for wire fraud. (FAC at 1.) The Court will take each claim in turn.[1]

1. Sherman Antitrust Act and Clayton Act

Defendants argue that Morton lacks standing to pursue an antitrust claim under the Sherman Antitrust Act or Clayton Act. (Disney Mot. at 6; AT&T Mot. at 13.) They further argue that even if Morton had demonstrated standing, he fails to allege facts to support his claims. (Disney Mot. at 6-7; AT&T Mot. at 13-15.) The Court agrees.

"To establish a section 1 violation under the Sherman Act, a plaintiff must demonstrate three elements: (1) an agreement, conspiracy, or combination among two or more persons or distinct business entities; (2) which is intended to harm or unreasonably restrain competition; and (3) which actually causes injury to competition, beyond the impact on the claimant, within a field of commerce in which the claimant is engaged (i.e., 'antitrust injury')." *McGlinchy v. Shell Chemical Co., 845 F.2d 802, 811 (9th Cir. 1988)*. In the Ninth **[*10]** Circuit, "an act is deemed anticompetitive under the Sherman Act only when it harms both allocative efficiency and raises the prices of goods above competitive levels or diminishes their quality." *Rebel Oil Co. v. Atl. Richfield Co., 51 F.3d 1421, 1433 (9th Cir. 1995)*. The Clayton Act authorizes a private plaintiff to obtain injunctive relief "against such violations only on a showing of 'threatened loss or damage'" which "must be of a sort personal to the plaintiff." *United States v. Borden Co., 347 U.S. 514, 518, 74 S. Ct. 703, 98 L. Ed. 903 (1954)*.

A review of the FAC indicates that Morton does not allege an antitrust injury. He alleges that the merger would "give said new owners unlimited power across the United States' communication, telecom, and entertainment market space." (FAC at 6.) He alleges that the mergers might have "cultural implications important to American consumers such as the Plaintiff." (*Id.* ¶ 6.) Defendant AT&T "currently take[s] full advantage of the Plaintiff and his family with exorbitant cost structures and derivative, limited product appeal." (*Id.* ¶ 9.) There is no allegation that prices will increase if the companies merge, nor any facts to show a diminution in quality. Morton also fails to show how any threatened loss or damage is personal to him. Without an allegation of antitrust injury, Morton lacks standing.

[*11] Moreover, although Morton speculates about the impact and potential changes in studio content and ownership, he does not allege facts to show that the mergers are "intended to harm or unreasonably restrain competition." The Court "cannot infer a conspiracy based on speculation." *Name.Space, Inc. v. Internet Corp. for Assigned Names & Numbers, 795 F.3d 1124, 1131 (9th Cir. 2015)*. Morton's opposition is likewise filled with speculation, including speculation about a new cybercurrency, but fails to state any facts to support his claim. (Opp. at 3-4.) Accordingly, Morton has not alleged sufficient facts to support his federal antitrust claims.

---

[1] The Court notes that Morton references a number of other code sections in his opposition, including the Celler-Kefauver Act and the Hart-Scott-Rodino Act. (Opp. at 1.) These causes of action are not mentioned in the FAC. The Court will consider only those causes of action brought in the FAC, as an Opposition is not the appropriate vehicle for asserting new claims or facts. See, e.g., *Lepp v. Gonzales, No. C-05-0566 VRW, 2005 U.S. Dist. LEXIS 41525, 2005 WL 1867723, at *2 (N.D. Cal. Aug. 2, 2005)*.

2. California Cartwright Act

The Ninth Circuit has held that "the analysis under California's ***antitrust law*** mirrors the analysis under federal law because the Cartwright Act, *Cal. Bus. & Prof. Code § 16700 et seq.*, was modeled after the Sherman Act." *Cnty. of Tuolumne v. Sonora Cmty. Hosp., 236 F.3d 1148, 1160 (9th Cir. 2001)*. Accordingly, the Court's conclusion that the FAC's factual allegations do not state a federal antitrust violation applies equally to the state antitrust claim.

Defendants also argue that the Cartwright Act does not reach mergers or acquisitions. (Disney Mot. at 7, AT&T Mot. at 16.) As a matter of law, California courts have explained that the Cartwright Act cannot be used to challenge mergers and acquisitions. *State of California ex rel. Van de Kamp v. Texaco, Inc., 46 Cal. 3d 1147, 1167, 252 Cal. Rptr. 221, 762 P.2d 385 (1988)*, *superseded by statute on other grounds as recognized by* *United Farm Workers of Am., AFL-CIO v. Dutra Farms, 83 Cal. App. 4th 1146, 1163, 100 Cal. Rptr. 2d 251, 263 (2000)*; *see also* *Asahi Kasei Pharma Corp. v. CoTherix, Inc., 204 Cal. App. 4th 1, 9, 138 Cal. Rptr. 3d 620 (2012)*. Accordingly, this claim is dismissed with prejudice.

3. *18 U.S.C. § 1343*

Morton's final claim is for violation of the federal wire fraud statute, **[*12]** *18 U.S.C. section 1343*. As a matter of law, this claim fails because there is no private right of action for violation of this criminal statute. *See, e.g.,* *Pineda v. Mortg. Elec. Registration Sys., Inc., No. EDCV 13-2089-JLS, 2014 U.S. Dist. LEXIS 11828, 2014 WL 346997, at *2 (C.D. Cal. Jan. 29, 2014)* (no private right of action for mail fraud under *18 U.S.C. section 1341*); *Kraft v. Old Castle Precast Inc., No. LA CV 15-00701-VBF, 2015 U.S. Dist. LEXIS 103440, 2015 WL 4693220, at *2 (C.D. Cal. Aug. 5, 2015)*. Accordingly, the Court dismisses this claim with prejudice.

C. Improper Joinder

Federal Rule of Civil Procedure 20(a)(2) provides that defendants may be joined in one action if: "(A) any right to relief is asserted against them jointly, severally, or in the alternative with respect to or arising out of the same transaction, occurrence, or series of occurrences; and (B) any question of law or fact common to all defendants will arise in the action." Defendants do not assert improper joinder, but the Court may sua sponte "on just terms, add or drop a party" or "sever any claim against a party." *Fed. R. Civ. P. 21*.

It appears to the Court that Morton's allegations against AT&T (related to its merger with Time Warner) are improperly joined with his allegations against Disney (related to its potential merger with 21st Century Fox). Morton does not allege that joint or several liability applies, nor does he allege that the mergers are part of the **[*13]** same transaction, occurrence, or series of transactions. He further presents no factual allegations to show that Disney and AT&T have a conspiracy or are acting jointly. *See, e.g., Bravado Int'l Grp. Merch. Servs. v. Cha*, No. CV 09-*9066 PSG (CWX), 2010 U.S. Dist. LEXIS 80361, 2010 WL 2650432, at *4 (C.D. Cal. June 30, 2010)*. Accordingly, the Court concludes that, even were the other identified deficiencies of the FAC remedied, these defendants were improperly joined.

D. Remaining Defendants

Although Robert Iger, Rupert Murdoch, and 21st Century Fox, who are named as Defendants, did not join in either Motion, they have not entered an appearance in this case, and it appears that Morton did not serve any of these Defendants with a summons. (*See* Proof of Service, Doc. 16.) Therefore, the Court cannot exercise personal jurisdiction over Iger, Murdoch, and 21st Century Fox. *See* *Fed. R. Civ. P. 4(a)*; *Omni Capital, 484 U.S. at 104*. Even if Morton's service were effective, however, the other Defendants have sought to dismiss Morton's entire case based on the sufficiency of the First Amended Complaint. (*See* Disney Mem. at 1; AT&T Mem. at 1.) Therefore, Morton's failure to state a claim as a matter of law is equally effective to dismiss Plaintiff's claims against Iger, Murdoch, and 21st Century Fox.

D. CONCLUSION

For the foregoing reasons, **[*14]** the FAC is DISMISSED as to all Defendants. Morton may amend his FAC within **twenty-one (21) days** of this Order, as to his federal antitrust claims only. Any Second Amended Complaint must comply with the requirements of *Rule 8 of the Federal Rules of Civil Procedure*. Morton may not add Defendants without leave of court. *See Fed. R. Civ. P. 21*. Failure to timely file a Second Amended Complaint in conformity with this Order may result in the dismissal of this action. *See Pagtalunan v. Galaza, 291 F.3d 639, 642-43 (9th Cir. 2002)*, *cert. denied*, *538 U.S. 909 (2003)* (court may dismiss action for failure to follow court order); *Simon v. Value Behaviorial Health, Inc., 208 F.3d 1073, 1084 (9th Cir. 2000)*, *amended*, *234 F.3d 428 (9th Cir. 2000)*, *cert. denied*, *531 U.S. 1104 (2001)*, *overruled on other grounds, Odom v. Microsoft Corp., 486 F.3d 541 (9th Cir. 2007)*, *cert. denied*, *552 U.S. 985 (2007)* (affirming dismissal without leave to amend where plaintiff failed to correct deficiencies in complaint, where court had afforded plaintiff opportunities to do so, and where court had given plaintiff notice of the substantive problems with his claims); *Plumeau v. School District #40, Cnty. of Yamhill, 130 F.3d 432, 439 (9th Cir. 1997)* (denial of leave to amend appropriate where further amendment would be futile). Any Second Amended Complaint must be served on Defendants in conformity with *Rule 4*. Any Second Amended Complaint must reflect the Court's finding as to the improper joinder of parties.

Further, Morton's Motion for Summary Judgment is DENIED AS MOOT, and the hearing set for July **[*15]** 6, 2018, at 2:30 p.m., is VACATED. (Doc. 26.)

Judges: JOHN A. HOUSTON, United States District Judge.

Opinion by: JOHN A. HOUSTON

Opinion

ORDER DENYING DEFENDANT'S MOTION TO DISMISS

INTRODUCTION

Presently before the Court is Defendant Rexall Sundown, Inc.'s ("Defendant" or "Rexall") Motion to Dismiss Plaintiff Sandra Seegert's ("Plaintiff") First Amended Complaint ("FAC") pursuant to *Federal Rules of Civil Procedure 8*, *9(b)*, *12(b)(1)*, and *12(b)(6)*. [Doc. No. 34]. In addition, Defendant requests the Court take judicial notice of several exhibits attached in support of its Motion to Dismiss. [Doc. No. 34-2]. The motion has been fully briefed. After careful consideration of the pleadings, and for the reasons set forth below, Defendant's Motion to Dismiss is **DENIED**.

BACKGROUND

Plaintiff brings this class action complaint on behalf of herself, and all others similarly situated, alleging that Defendant violated **[*2]** two California statutes: (1) California's Unfair Competition Law ("UCL"), *Cal. Bus. & Prof. Code § 17200*; and (2) California's Consumers Legal Remedies Act ("CLRA"), *Cal. Civ. Code § 1750*. See Doc. No. 31.

I. Factual History

Defendant distributes and sells a line of "joint health" supplements marketed by the product name "Osteo Bi-Flex." Doc. No. 31, ¶ 2. Defendant offers four different types of Osteo Bi-Flex products: (1) Osteo Bi-Flex One Per Day, (2) Osteo Bi-Flex Triple Strength, (3) Osteo Bi-Flex Triple Strength MSM formula, and (4) Osteo Bi-Flex Triple Strength with Vitamin D. Id. at ¶ 15. Plaintiff alleges that on February 20, 2017 she purchased Defendant's Osteo Bi-Flex Triple Strength product while shopping at a Walgreens store in San Diego, California. Id. at ¶ 11. Plaintiff further alleges that she purchased Defendant's product believing it would provide the joint health benefits that it advertised, including relief from joint pain and increased joint mobility. Id. at ¶ 12. Defendant advertises and markets its four Osteo Bi-Flex products as having the ability to provide meaningful joint health benefits.[1] Id. at ¶ 3. Plaintiff asserts that these claims constitute false and misleading advertising because the Osteo Bi-Flex products **[*3]** are "incapable of supporting or benefitting the health of human joints." Id. at ¶ 5. In support, Plaintiff cites to numerous clinical trials and studies which demonstrate that the main ingredients in Osteo Bi-Flex are ineffective and unable to produce "joint health benefits." Id. at ¶ 34.

II. Procedural History

Plaintiff filed her initial complaint on June 19, 2017. [Doc. No. 1]. On August 14, 2017, Defendant filed a motion to dismiss and motion to strike Plaintiff's complaint. [Doc. Nos. 17, 18]. On December 1, 2017, this Court granted Defendant's motion to dismiss and motion to strike, dismissing Plaintiff's claims without prejudice. [Doc. No. 30]. On December 29, 2017, Plaintiff filed a FAC, to which Defendant filed this pending Motion to Dismiss. [Doc. Nos. 31, 34]. The Court has received an opposition from Plaintiff and a reply from Defendant. [Doc. Nos. 35, 37].

LEGAL STANDARD

I. *Federal Rule of Civil Procedure 12(b)(1)*

Under *Rule 12(b)(1) of the Federal Rules of Civil Procedure*, a defendant may seek to dismiss a complaint for lack of jurisdiction over the subject matter. The federal court is one of limited jurisdiction. See *Gould v. Mutual Life Ins. Co., 790 F.2d 769, 774 (9th Cir. 1986)*. As such, it cannot reach the merits of any dispute until it confirms its own subject matter jurisdiction. See *Steel Co. v. Citizens for a Better Environ., 523 U.S. 83, 95, 118 S. Ct. 1003, 140 L. Ed. 2d 210 (1998)*. When considering a *Rule 12(b)(1)* **[*4]** motion to dismiss, the district court is free to hear evidence regarding jurisdiction and to rule on that issue prior to trial, resolving factual disputes where necessary. See *Augustine v. United States, 704 F.2d 1074, 1077 (9th Cir. 1983)*.

---

[1] Plaintiff asserts that on the label of each of the Osteo Bi-Flex products Defendant "prominently and in all caps" displays the words "Joint Health," "Glucosamine," and "Joint Shield" as well as the phrase: "Shows Improved Joint Comfort within 7 days!" Doc. No. 31, ¶ 3. In addition, Plaintiff alleges that Defendant reinforces their overall joint health benefit message by representing that Osteo Bi-Flex can help with: (1) "range of motion," (2) "strengthen joints", (3) "support flexibility," (4) "support mobility," (5) "supports joint comfort," (6) "defend your joints," and (7) "helps strengthen joints while helping to maintain joint cartilage essential for comfortable joint movement." Id. at ¶ 25. Finally, Plaintiff alleges that Defendant labels the Osteo Bi-Flex products as the "#1 Pharmacist Recommended Brand," which "adds credibility" and "provides consumers with a 'reason to believe'" the representations made by Defendant. Id. at ¶ 26.

a. Standing

A necessary element of Article III's "case" or "controversy" requirement is that a litigant must have "'standing' to challenge the action sought to be adjudicated in the lawsuit." *Valley Forge College v. Americans United for Separation of Church and State, Inc., 454 U.S. 464, 471, 102 S. Ct. 752, 70 L. Ed. 2d 700 (1982)*; *LSO, Ltd. v. Stroh, 205 F.3d 1146, 1152 (9th Cir. 2000)*. Standing under Article III pertains to the Court's subject matter jurisdiction and therefore is "properly raised in a motion to dismiss under *Federal Rule of Civil Procedure 12(b)(1)*." *White v. Lee, 227 F.3d 1214, 1242 (9th Cir. 2000)*. "For purposes of ruling on a motion to dismiss for want of standing, both the trial and reviewing courts must accept as true all material allegations of the complaint and must construe the complaint in favor of the complaining party." *Maya v. Centex Corp., 658 F.3d 1060, 1068 (9th Cir. 2011)* (quoting *Warth v. Seldin, 422 U.S. 490, 501, 95 S.Ct. 2197, 45 L.Ed.2d 343 (1975))*.

The "irreducible constitutional minimum" of Article III standing has three elements. *LSO, 205 F.3d at 1152* (internal quotations omitted). First, plaintiff must have suffered "an injury in fact—an invasion of a legally protected interest which is (a) concrete and particularized, and (b) actual and imminent, not conjectural or hypothetical." *Lujan v. Defenders of Wildlife, 504 U.S. 555, 560, 112 S. Ct. 2130, 119 L. Ed. 2d 351 (1992)* (internal citations and quotations omitted). Second, plaintiff must show a causal connection between the injury and **[*5]** the conduct complained of; *i.e.*, "the injury has to be fairly . . . trace[able] to the challenged action of the defendant, and not . . . th[e] result [of] the independent action of some third party not before the court." Id. (quoting *Simon v. Eastern Ky. Welfare Rights Organization, 426 U.S. 26, 41-42, 96 S. Ct. 1917, 48 L. Ed. 2d 450 (1976))* (alterations in original). Third, it must be "likely," and not merely "speculative," that the plaintiff's injury will be redressed by a favorable decision. *Id. at 561*. "The party invoking federal jurisdiction bears the burden of establishing these elements." *Lujan, 504 U.S. at 561* (internal citations omitted).

II. *Federal Rule of Civil Procedure 12(b)(6)*

Under *Rule 12(b)(6) of the Federal Rules of Civil Procedure*, a party may move to dismiss for failure to state a claim for relief. Dismissal is warranted under *Rule 12(b)(6)* where the complaint lacks a cognizable legal theory or fails to allege sufficient facts to support a cognizable legal theory. *Li v. Kerry, 710 F.3d 995, 999 (9th Cir. 2013)*. Under *Rule 8(a)(2) of the Federal Rules of Civil Procedure*, the plaintiff is required to set forth a "short and plain statement of the claim showing that the pleader is entitled to relief," and "give the defendant fair notice of what the...claim is and the grounds upon which it rests." *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)* (internal citations omitted).

"To survive a motion to dismiss, a complaint must contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (citing *Twombly, 550 U.S. at 570*). A claim **[*6]** is facially plausible when the factual allegations permit "the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Iqbal, 556 U.S. at 678*. In other words, "the non-conclusory 'factual content,' and reasonable inferences from that content, must be plausibly suggestive of a claim entitling the plaintiff to relief." *Moss v. U.S. Secret Service, 572 F.3d 962, 969 (9th Cir. 2009)* (citing *Iqbal, 556 U.S. at 678*). "Determining whether a complaint states a plausible claim for relief will . . . be a context-specific task that requires the reviewing court to draw on its judicial experience and common sense." *Iqbal, 556 U.S. at 679*.

In reviewing a motion to dismiss under *Rule 12(b)(6)*, the reviewing court must assume the truth of all factual allegations and construe them in the light most favorable to the nonmoving party. *Cahill v. Liberty Mut. Ins. Co., 80 F.3d 336, 337-38 (9th Cir. 1996)*. However, legal conclusions need not be taken as true merely because they are cast in the form of factual allegations. *Ileto v. Glock Inc., 349 F.3d 1191, 1200 (9th Cir. 2003)*. "Nor does a complaint suffice if it tenders 'naked assertion[s]' devoid of 'further factual enhancement.'" *Iqbal, 556 U.S. at 678* (citing *Twombly, 550 U.S. at 557*).

III. *Federal Rule of Civil Procedure 9(b)*

Rule 9(b) of the Federal Rules of Civil Procedure, requires that "[i]n alleging fraud or mistake, a party must state with particularity the circumstances constituting fraud or mistake." Under Ninth Circuit case law, *Rule 9(b)* imposes two distinct requirements on complaints alleging fraud. **[*7]** First, the basic notice requirements of *Rule 9(b)* require complaints pleading fraud to "state precisely the time, place, and nature of the misleading statements, misrepresentations, and specific acts of fraud." *Kaplan v. Rose, 49 F.3d 1363, 1370 (9th Cir. 1994)*; see also *Vess v. Ciba-Geigy Corp., U.S.A., 317 F.3d 1097, 1106 (9th Cir. 2003)* (citation omitted) (stating that a plaintiff must set forth the "who, what, when, where and how" of the alleged misconduct). Second, *Rule 9(b)* requires that the complaint "set forth an explanation as to why the statement or omission complained of was false or misleading." *Yourish v. California Amplifier, 191 F.3d 983, 993 (9th Cir. 1999)* (citation and quotation omitted).

IV. Judicial Notice

Defendant filed a request for judicial notice in support of its Motion to Dismiss. [Doc. No. 34-2]. This Court may take judicial notice of an adjudicative fact "not subject to reasonable dispute because it can be . . . accurately and readily determined from sources whose accuracy cannot be reasonably questioned." See *Fed. R. Evid. 201*; *Grason Elec. Co. v. Sacramento Mun. Util. Dist., 571 F. Supp. 1504, 1521 (E.D. Cal. 1983)*. The documents Defendant submits for judicial notice include packaging and labeling for the four Osteo Bi-Flex products [Exhibits 1-4] and an order from the Hon. Michael M. Anello affirming a tentative ruling. [Exhibit 5]. See Doc. No. 34-2. Because the request of judicial notice is capable of accurate and ready determination from sources whose **[*8]** accuracy cannot be reasonably questioned and the parties do not dispute the authenticity of the documents, Defendant's request for judicial notice is **GRANTED**.

DISCUSSION

Defendant makes several arguments in support of its Motion to Dismiss. First, Defendant argues that because Plaintiff only purchased Osteo Bi-Flex Triple Strength, she lacks standing to assert claims for the remaining Osteo Bi-Flex products. See Doc. No. 34-1, pg. 17-19. Next, Defendant argues that Plaintiff's complaint should be dismissed in its entirety because she has not plausibly alleged that the representations made by Defendant concerning its Osteo Bi-Flex products are false. Id. at 20-26. Finally, Defendant contends that Plaintiff failed to remedy any of the *Rule 9(b)* deficiencies discussed by this Court in dismissing her original complaint. Id. at pg. 26-27. The arguments will be addressed in turn below.

I. Standing for unpurchased Osteo Bi-Flex products

Defendant argues that Plaintiff lacks standing to pursue claims as to the products she did not purchase. See Doc. No. 34-1, pg. 17-19. Defendant contends that Plaintiff read and relied solely on the packaging, and claims thereon, of the Osteo Bi-Flex Triple Strength product in making **[*9]** her purchase decision, and because Plaintiff did not purchase—or even rely upon—the three remaining Osteo Bi-Flex products, she lacks standing to pursue claims as to those products. In opposition, Plaintiff argues that the Ninth Circuit has adopted a "class certification" approach where any dissimilarities between the class representative and passive class members is addressed at the class certification stage rather than a motion to dismiss. See Doc. No. 35, pg. 12 (citing *Melendres v. Arpaio, 784 F.3d 1254 (9th Cir. 2015)*). Plaintiff argues that this "class certification" approach has been applied to UCL and CLRA claims by numerous district courts throughout the Ninth Circuit. Id. In dismissing Plaintiff's initial complaint, this Court held that Plaintiff lacked standing to assert claims for the non-purchased products because she "failed to show how she was injured by products she did not come across or purchase." Doc. No. 30. However, upon reconsideration of Ninth Circuit case law, and in light of Plaintiff's new allegations regarding the similarities between the Osteo Bi-Flex products, the Court finds it appropriate to change course.

In Melendres,[2] the Ninth Circuit Court of Appeals held that "once the named plaintiff demonstrates **[*10]** her individual standing to bring a claim, the standing inquiry is concluded, and the court proceeds to consider whether the *Rule 23(a)* prerequisites for class certification have been met." *Melendres, 784 F.3d at 1262* (quoting 1 William B. Rubenstein, Newberg on Class Actions § 2:6 (5th ed.)). In Kirola v. City & Cty. of San Francisco, the Ninth Circuit applied Melendres to an American with Disabilities ("ADA") claim holding that the plaintiff had standing to challenge the disability access of facilities she never physically visited. *860 F.3d 1164, 1176 (9th Cir. 2017)*. Defendant argues that these holdings are irrelevant because they do not involve consumer class actions, and cites to numerous UCL and CLRA cases wherein standing was denied to plaintiffs concerning products they did not actually purchase or advertisements they did not rely upon.[3]

The Court need not determine *Melendres*' applicability here because, as clearly demonstrated by Defendant's cited authority, the majority of Ninth Circuit courts already allow plaintiffs to assert claims for unnamed class **[*11]** members "based on products he or she did not purchase ***so long as the products and alleged misrepresentations are substantially similar***." *Miller v. Ghirardelli Chocolate Co., 912 F. Supp. 2d 861, 870-72 (N.D. Cal. 2012)* (emphasis added); see also *Wilson v. Frito-Lay N. Am., Inc., 961 F. Supp. 2d 1134, 1141 (N.D. Cal. 2013)* ("Plaintiffs have failed to allege substantial similarity among the Purchased Products and the Non—Purchased Products."); *Route v. Mead Johnson Nutrition Co., 2013 U.S. Dist. LEXIS 35069, 2013 WL 658251, at *3 n.4* (acknowledging the plaintiff might have standing with respect to unpurchased products "[i]f all four products (1) contained the same controverted ingredient in the same amount, (2) were subject to the same advertisement campaign and same representations, and (3) the only differences between the products were not germane to Plaintiff's claims. . . ."). Accordingly, Plaintiff will have standing to pursue claims for the unpurchased Osteo Bi-Flex products so long as they are alleged to be substantially similar.

Here, Plaintiff has added detail in her FAC about the similarities of the Osteo Bi-Flex products and their packaging. Plaintiff alleges that all Osteo Bi-Flex products contain the same main ingredient—glucosamine hydrochloride—in the same amount per serving. Doc. No. 31, ¶¶ 16-17. Plaintiff further alleges that the front packaging of all Osteo Bi-Flex products is materially identical "and communicates **[*12]** the very same advertising message." Id. at ¶¶ 22, 24. In analyzing the front packaging of all four Osteo Bi-Flex products, the Court notes only minimal differences, including different "sub-names" located under "Osteo Bi-Flex Joint Health" and the color of the packaging. See Doc. No. 34 - 2, Exs. 1-4. Additionally, Plaintiff contends that the same "overall joint health benefits message" is used throughout Defendant's Osteo Bi-Flex products, including affirmations that the products assist with "range of motion," "support flexibility," and "support joint comfort." Doc. No. 31, ¶ 25, Ex. A. The Court finds that Plaintiff has sufficiently alleged substantial similarities between the Osteo Bi-Flex products, and thus has standing to pursue claims for the products she did not purchase. While a different result may be obtained in a motion for class certification, Defendant's motion to dismiss on such a basis must be **DENIED**.

II. UCL and CLRA Claims

---

[2] Melendres involved a civil rights class action dealing with racial profiling, and specifically discussed whether plaintiffs had standing to assert claims against defendants for a particular type of police stop, even though they were pulled over under a different stop regime than other class members.

[3] *Route v. Mead Johnson Nutrition Co., No. CV 12-7350-GW JEMX, 2013 U.S. Dist. LEXIS 35069, 2013 WL 658251, at *1 (C.D. Cal. Feb. 21, 2013)*; *Wilson v. Frito-Lay N. Am., Inc., 961 F. Supp. 2d 1134, 1141-42 (N.D. Cal. 2013)*; *Miller v. Ghirardelli Chocolate Co., 912 F. Supp. 2d 861, 870-72 (N.D. Cal. 2012)*; *Granfield v. Nvidia Corp., No. 11-cv-05403, 2012 U.S. Dist. LEXIS 98678, 2012 WL 2847575, at *6 (N.D. Cal. July 11, 2012)*; *Hairston v. S. Beach Beverage Co., Inc., No. 12-cv-1429, 2012 U.S. Dist. LEXIS 74279, 2012 WL 1893818, at *5 n.5 (C.D. Cal. May 18, 2012)*; *Mlejnecky v. Olympus Imaging Am. Inc., No. 10-cv-2630, 2011 U.S. Dist. LEXIS 42333, 2011 WL 1497096, at *4-5 (E.D. Cal. Apr. 19, 2011)*; *Carrea v. Dreyer's Grand Ice Cream, Inc., No. 10-cv-1044, 2011 U.S. Dist. LEXIS 6371, 2011 WL 159380, at *3 (N.D. Cal. Jan. 10, 2011)*; *Johns v. Bayer Corp., No. 09-cv-1935, 2010 U.S. Dist. LEXIS 10926, 2010 WL 476688, at *5 (S.D. Cal. Feb. 9, 2010)*

"The UCL prohibits, and provides civil remedies for, unfair competition, which it defines as 'any unlawful, unfair or fraudulent business act or practice and unfair, deceptive, untrue or misleading advertising.'" *Kwikset Corp. v. Superior Court, 51 Cal.4th 310, 320, 120 Cal.Rptr.3d 741, 246 P.3d 877 (2011)* (quoting *Cal. Bus. & Prof. Code § 17200*). This section establishes **[*13]** three separate and distinct theories of liability. *Rubio v. Capital One Bank, 613 F.3d 1195, 1203 (9th Cir. 2010)* ("A business act or practice may violate the UCL if it is either 'unlawful,' 'unfair,' or 'fraudulent.'"). To state a claim under the "fraudulent" prong, a plaintiff must allege "members of the public are likely to be deceived" by the defendant's business practices. *Schnall v. Hertz Corp., 78 Cal.App.4th 1144, 1167, 93 Cal.Rptr.2d 439 (2000)*. The "unlawful" prong "borrows" violations of other laws and makes them independently actionable under the UCL. *Cel—Tech Commc'ns, Inc. v. Los Angeles Cellular Telephone Co., 20 Cal.4th 163, 180, 83 Cal.Rptr.2d 548, 973 P.2d 527 (1999)*. An "unfair" business practice is one that "threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws, or otherwise significantly threatens or harms competition." *Id. at 187, 83 Cal.Rptr.2d 548, 973 P.2d 527*.

In addition, Plaintiff asserts a claim for a violation of the CLRA. She alleges Defendant violated the CLRA by engaging in the following practices proscribed by *California Civil Code § 1770(a)*:

> (5) Representing that goods . . . have . . . approval, characteristics . . . uses [and] benefits . . . which [they do] not have . . . [;]
> (7) Representing that goods are of a particular standard, quality or grade . . . if they are of another[;]
> (9) Advertising goods . . . with intent not to sell them as advertised[; and]
>
> (16) Representing that [goods] have been supplied in accordance with **[*14]** a previous representation when [they have] not.

Doc. No. 31, ¶ 128.

The gravamen of Plaintiff's FAC concerns the alleged false and deceptive advertising of Defendant's Osteo Bi-Flex Products. See generally Doc. No. 31. To sufficiently plead a claim for false or misleading advertising claims under the UCL and CLRA, Plaintiff must plausibly allege that Defendant's advertising and marketing are false or misleading in the eyes of a "reasonable consumer." *Williams v. Gerber Prods. Co., 552 F.3d 934, 938 (9th Cir.2008)* (citing *Freeman v. Time, Inc., 68 F.3d 285, 289 (9th Cir.1995)*. Under the reasonable consumer standard, Plaintiff must "show that 'members of the public are likely to be deceived.'" *Freeman, 68 F.3d at 289* (quoting *Bank of West v. Superior Court, 2 Cal.4th 1254, 1267, 10 Cal. Rptr. 2d 538, 833 P.2d 545 (1992))*. "[N]aked assertion[s]" that Defendant's representations are misleading are "nothing more than a legal conclusion", which the Court can ignore. *Otto v. Abbott Labs., Inc., No. CV 12-1411-SVW (DTB), 2013 U.S. Dist. LEXIS 53287, 2013 WL 12132064, at *2 (C.D. Cal. Mar. 15, 2013)*. As such, in order to survive a motion to dismiss, Plaintiff must demonstrate that it is plausible that Defendant's representations were either false or likely to mislead a reasonable consumer.

In granting Defendant's previous motion to dismiss, the Court noted several deficiencies which necessitated dismissal. See Doc. No. 30, pg. 7. The Court found that Plaintiff did not adequately describe the Osteo Bi-Flex labels, **[*15]** nor did she allege how her cited studies were relevant to show the active ingredients in Defendant's products cannot deliver the promised results. Id. Ultimately, the Court determined that Plaintiff failed to plausibly allege that Defendant's advertisement of Osteo Bi-Flex are false or misleading. Id. In her FAC, Plaintiff cites to additional scientific studies, articles, and clinical trials which tested the effects of Osteo Bi-Flex's two main ingredients—glucosamine and chondroitin. See Doc. No. 31 ¶¶ 31-100. Plaintiff alleges that there is substantial scientific evidence to suggest that glucosamine and chondroitin—alone or in combination—do not support or promote joint health as Defendant claims. Id. Defendant contends that Plaintiff's FAC is similarly deficient to her initial complaint. See Doc. No. 34-1, pg. 20. Specifically, Defendant argues that Plaintiff's studies remain irrelevant because the studies only tested whether glucosamine and chondroitin successfully treated osteoarthritis, and they do not directly address the representations made on Osteo Bi-Flex packaging. See Doc. No. 34-1, pg. 20-26. Furthermore, Defendant contends that Plaintiff is unable to plausibly allege **[*16]** that Osteo Bi-Flex does not provide its advertised benefits without a study utilizing all of the active ingredients in its unique formula. Id. at pg. 23-26.

First, the Court disagrees with Defendant's assertion that osteoarthritis related studies are irrelevant for purposes of establishing plausibility in this case. In fact, Defendant cites to several osteoarthritis related studies on the Osteo Bi-

Flex packaging in an effort to support and corroborate the efficacy of Osteo Bi-Flex. See Doc. No. 31, ¶ 32. If Defendant can utilize studies involving osteoarthritis subjects to promote and substantiate its product, then certainly Plaintiff can use those same types of studies to plausibly allege the contrary. Moreover, according to the FAC, the findings in the published osteoarthritis studies cited by Plaintiff do not exclusively apply to osteoarthritis sufferers, but instead are equally applicable to those individuals who have yet to be diagnosed. See Doc. No. 31, ¶¶ 31, 32. Secondly, the Court is not persuaded by the Eckler, Padilla, McCrary, or Murray decisions cited by Defendant. See Doc. No. 34-1, pg. 24-25.[4] These courts held that studies and clinical trials are unable to establish facial **[*17]** plausibility that a product is ineffective when the study does not include ***all*** of the active ingredients from the contested product. Id. (emphasis added). This Court is of the mind, however, that compelling such a showing would heighten the plausibility standard beyond what *Twombly* and *Iqbal* require. *Ashcroft v. Iqbal, 556 U.S. 662, 663, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* ("A claim has facial plausibility when the pleaded factual content allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged."). If a product's primary ingredients provide no benefits related to joint health, as Plaintiff's studies allegedly show, certainly then a reasonable inference can be drawn that such a product does not provide the joint health benefits it represents. See *Vasic v. Patent Health, LLC., No. 13CV849 AJB MDD, 2014 U.S. Dist. LEXIS 33181, 2014 WL 940323, at *4 (S.D. Cal. Mar. 10, 2014)*. Because the studies cited by Plaintiff examine products with similar active ingredients as Osteo Bi-Flex, the Court finds Plaintiff's claims facially plausible. Whether the remaining ingredients in Osteo Bi-Flex distinguish it from the proffered studies is a factual inquiry, not ripe for review in a motion to dismiss. Thus, the Court finds Plaintiff has plausibly alleged that Defendant's representations of Osteo Bi-Flex **[*18]** are false or misleading, and Defendant's Motion to Dismiss on 12(b)(6) grounds is **DENIED**.

III. *Rule 9(b)*

In its final argument for dismissal, Defendant contends that Plaintiff fails to plead her claims with the sufficient particularity as required by *Rule 9(b)*. See Doc. No. 34-1, pgs. 26-27. Defendant further argues that the *Rule 9(b)* deficiencies noted in this Court's previous order were not rectified in the FAC. Id. at pg. 26. The Court disagrees. As noted above, "[a]verments of fraud must be accompanied by 'the who, what, when, where, and how' of the misconduct charged." *Vess v. Ciba-Geigy Corp., U.S.A., 317 F.3d 1097, 1106 (9th Cir. 2003)* (quoting *Cooper v. Pickett, 137 F.3d 616, 627 (9th Cir.1997))*. Here, Plaintiff alleges that she relied upon the representations made on the Osteo Bi-Flex product label, specifically those regarding "joint health" when she purchased the Osteo Bi-Flex Triple Strength product from a San Diego Walgreens. Doc. No. 31, ¶ 12. Plaintiff further alleges that Osteo Bi-Flex "cannot provide the promised benefits" and had she "known the truth . . . she would not have purchased Defendant's Osteo Bi-Flex Triple Strength product." Id. Plaintiff's claims are clear: The representations made on Osteo Bi-Flex's packaging and advertising **[*19]** is false and misleading because Osteo Bi-Flex is unable to provide any joint health benefits. This level of specificity is sufficient to provide Defendant with adequate notice of the particular conduct so that it may properly "defend against the charge and not just deny that they have done anything wrong." Bly—*Magee v. California, 236 F.3d 1014, 1019 (9th Cir.2001)* (internal citations and quotations omitted). Accordingly, Defendant's Motion to Dismiss for failure to plead with sufficient particularity as required by *Rule 9(b)* is **DENIED**.

CONCLUSION AND ORDER

Based on the foregoing, **IT IS HEREBY ORDERED** that Defendant's Request for Judicial Notice [Doc. No. 34-2] is **GRANTED** and Defendant's Motion to Dismiss Plaintiff's FAC [Doc. No. 34] is **DENIED**.

Evidence > Judicial Notice > Legislative Facts > Laws of Foreign States

HN1[] **Legislative Facts, Laws of Foreign States**

A federal court should accord respectful consideration to a foreign government's submission, but is not bound to accord conclusive effect to the foreign government's statements. Instead, *Fed. R. Civ. P. 44.1* instructs that, in determining foreign law, the court may consider any relevant material or source whether or not submitted by a party. As the court's determination must be treated as a ruling on a question of law, *Fed. R. Civ. P. 44.1*, the court may engage in its own research and consider any relevant material thus found.

Civil Procedure > Appeals > Standards of Review > De Novo Review

Evidence > Judicial Notice > Legislative Facts > Laws of Foreign States

HN2[] **Standards of Review, De Novo Review**

Fed. R. Civ. P. 44.1, adopted in 1966, fundamentally changed the mode of determining foreign law in federal courts. The rule specifies that a court's determination of foreign law must be treated as a ruling on a question of law, rather than as a finding of fact. Correspondingly, in ascertaining foreign law, courts are not limited to materials submitted by the parties; instead, they may consider any relevant material or source, whether or not admissible under the Federal Rules of Evidence. Appellate review, as is true of domestic law determinations, is de novo. *Rule 44.1* frees courts to reexamine and amplify material presented by counsel in partisan fashion or in insufficient detail. The obvious purpose of the changes *Rule 44.1* ordered was to make the process of determining alien law identical with the method of ascertaining domestic law to the extent that it is possible to do so.

Evidence > Judicial Notice > Legislative Facts > Laws of Foreign States

International Law > Dispute Resolution > Comity Doctrine

HN3[] **Legislative Facts, Laws of Foreign States**

Federal courts deciding questions of foreign law under *Fed. R. Civ. P. 44.1* are sometimes provided with the views of the relevant foreign government. *Rule 44.1* does not address the weight a federal court determining foreign law should give to the views presented by a foreign government. Nor does any other rule or statute. In the spirit of international comity, a federal court should carefully consider a foreign state's views about the meaning of its own laws. But the appropriate weight in each case will depend upon the circumstances; a federal court is neither bound to adopt a foreign government's characterization nor required to ignore other relevant materials. When a foreign government makes conflicting statements, or offers an account in the context of litigation, there may be cause for caution in evaluating the government's submission. Given the world's many and diverse legal systems, and the range of circumstances in which a foreign government's views may be presented, no single formula or rule will fit all cases in which a foreign government describes its own law. Relevant considerations include the statement's clarity, thoroughness, and support; its context and purpose; the transparency of the foreign legal system; the role and authority of the entity or official offering the statement; and the statement's consistency with the foreign government's past positions.

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > Erie Doctrine

HN4[] **Federal & State Interrelationships, Erie Doctrine**

If relevant state law is established by a decision of the State's highest court, that decision is binding on the federal courts. But views of the State's attorney general, while attracting respectful consideration, do not garner controlling weight.

Lawyers' Edition Display

Decision

[225]** Federal court determining foreign law under *Federal Rules of Civil Procedure Rule 44.1* (1) should accord respectful consideration to foreign government's submission; but (2) is not bound to accord conclusive effect to foreign government's statements.

Summary

Overview: ISSUE: Whether a federal court determining foreign law under *Fed. R. Civ. P. 44.1* was required to treat as conclusive a submission from the foreign government describing its own law. HOLDINGS: [1]-A federal court should accord respectful consideration to a foreign government's submission, but was not bound to accord conclusive effect to the foreign government's statements. Instead, *Rule 44.1* instructed that, in determining foreign law, the court could consider any relevant material **[**226]** or source whether or not submitted by a party; [2]-The court of appeals erred in deeming the foreign government's submission binding, so long as facially reasonable, because that unyielding rule was inconsistent with *Rule 44.1* and with the Supreme Court's treatment of analogous submissions from States of the United States. The court of appeals did not address other evidence.

Outcome: Judgment vacated and case remanded. Unanimous decision.

Syllabus

[227]** **[*1867]** Petitioners, U. S.-based purchasers of vitamin C (U. S. purchasers), filed a class-action suit, alleging that four Chinese corporations that manufacture and export the nutrient (Chinese sellers), including the two respondents here, had agreed to fix the price and quantity of vitamin C exported to the United States, in violation of *§1 of the Sherman Act*. The Chinese sellers moved to dismiss the complaint on the ground that Chinese law required them to fix the price and quantity of vitamin C exports, thus shielding them from liability under U. S. ***antitrust law***. The Ministry of Commerce of the People's Republic of China (Ministry) filed an *amicus* brief in support of the motion, explaining that it is the administrative authority authorized to regulate foreign trade, and stating that the alleged conspiracy in restraint of trade was actually a pricing regime mandated by the Chinese Government. The U. S. purchasers countered that the Ministry had identified no law or regulation ordering the Chinese sellers' price agreement, highlighted a publication announcing that the Chinese sellers had **[***2]** agreed to control the quantity and rate of exports without government intervention, and presented supporting expert testimony.

[228]** The District Court denied the Chinese sellers' motion in relevant part, concluding that it did not regard the Ministry's statements as "conclusive," particularly in light of the U. S. purchasers' evidence. When the Chinese sellers subsequently moved for summary judgment, the Ministry submitted **[*1868]** another statement, reiterating its stance, and the U. S. purchasers pointed to China's statement to the World Trade Organization that it ended its export administration of vitamin C in 2002. The court denied this motion as well. The case was then tried to a jury, which returned a verdict for the U. S. purchasers.

The Second Circuit reversed, holding that the District Court erred by denying the Chinese sellers' motion to dismiss the complaint. When a foreign government whose law is in contention submits an official statement on the meaning and interpretation of its domestic law, the court concluded, federal courts are "bound to defer" to the foreign government's construction of its own law, whenever that construction is "reasonable." Inspecting only the Ministry's brief **[***3]** and the sources cited therein, the court found the Ministry's account of Chinese law "reasonable."

Held:

A federal court determining foreign law under *Federal Rule of Civil Procedure 44.1* should accord respectful consideration to a foreign government's submission, but the court is not bound to accord conclusive effect to the foreign government's statements.

Rule 44.1 fundamentally changed the mode of determining foreign law in federal courts. Before adoption of the rule in 1966, a foreign nation's laws had to be "proved as facts." Talbot v. Seeman, 5 U.S. 1, 1 Cranch 1, 38, 2 L. Ed. 15. Rule 44.1, in contrast, specifies that a court's determination of foreign law "must be treated as a ruling on a question of law." And in ascertaining foreign law, courts are not limited to materials submitted by the parties, but "may consider any relevant material or source." Appellate review, as is true of domestic law determinations, is *de novo*. The purpose of these changes was to align, to the extent possible, the process for determining alien law and the process for determining domestic law.

Neither Rule 44.1 nor any other rule or statute addresses the weight a federal court determining foreign law should give to the views presented by a foreign government. In the spirit of "international comity," Société Nationale Industrielle Aérospatiale v. United States Dist. Court for Southern Dist. of Iowa, 482 U. S. 522, 543, 107 S. Ct. 2542, 96 L. Ed. 2d 461, a federal **[***4]** court should carefully consider a foreign state's views about the meaning of its own laws. The appropriate weight in each case, however, will depend upon the circumstances; a federal court is neither bound to adopt the foreign government's characterization nor required to ignore other relevant materials. No single formula or rule will fit all cases, but relevant considerations include the statement's clarity, thoroughness, and support; its context and purpose; the transparency of the foreign legal system; the role and authority of the entity or official offering the statement; and the statement's consistency with the foreign government's past positions.

Judged in this light, the Second Circuit's unyielding rule is inconsistent with Rule 44.1 and, tellingly, with this Court's treatment of analo- **[**229]** gous submissions from States of the United States. If the relevant state law is established by a decision of "the State's highest court," that decision is "binding on the federal courts," Wainwright v. Goode, 464 U. S. 78, 84, 104 S. Ct. 378, 78 L. Ed. 2d 187, but views of the State's attorney general, while attracting "respectful consideration," do not garner controlling weight, Arizonans for Official English v. Arizona, 520 U. S. 43, 76-77, n. 30, 117 S. Ct. 1055, 137 L. Ed. 2d 170. Furthermore, because the Second Circuit riveted its attention on the Ministry's submission, **[***5]** it did not address evidence submitted by the U. S. purchasers. The court also **[*1869]** misperceived the pre-Rule 44.1 decision of United States v. Pink, 315 U. S. 203, 62 S. Ct. 552, 86 L. Ed. 796. Under the particular circumstances of that case, this Court found conclusive a declaration from the government of the Russian Socialist Federal Soviet Republic on the extraterritorial effect of a decree nationalizing assets: The declaration was *obtained by the United States* through official "diplomatic channels," id., at 218, 62 S. Ct. 552, 86 L. Ed. 796; there was no indication that the declaration was inconsistent with the Russian Government's past statements; and the declaration was consistent with expert evidence in point.

The Second Circuit expressed concern about reciprocity, but the United States has not historically argued that foreign courts are *bound* to accept its characterizations or precluded from considering other relevant sources. International practice is also inconsistent with the Second Circuit's rigid rule. Pp. ___ - ___, 201 L. Ed. 2d, at 232-236.

837 F. 3d 175, vacated and remanded.

Counsel: Michael J. Gottlieb argued the cause for petitioners.

Brian H. Fletcher argued the cause for petitioner as amicus curiae, by special leave of court.

Carter G. Phillips argued the cause for respondents.

Judges: Ginsburg, J., delivered the opinion for a unanimous Court.

Opinion by: GINSBURG

Opinion

Justice **Ginsburg** delivered the opinion of the Court.

When foreign law is relevant to a case instituted in a federal court, and the foreign government whose law is in contention submits an official **[***6]** statement on the meaning and interpretation of its domestic law, may the federal court look beyond that official statement? The Court of Appeals for the Second Circuit answered generally "no," ruling that federal courts are "bound to defer" to a foreign government's construction of its own law, whenever that construction is "reasonable." *In re Vitamin C Antitrust Litigation, 837 F. 3d 175, 189 (2016)*.

We hold otherwise. ***HN1***[] ***LEdHN[1]***[] [1] A federal court should accord respectful consideration to a foreign government's submission, but is not bound to accord conclusive effect to the foreign government's statements. Instead, *Federal Rule of Civil Procedure 44.1* instructs that, in determining foreign law, "the court may consider any relevant material or source . . . whether or not submitted by a party." As "[t]he court's determination must be treated as a ruling on a question of law," *Fed. Rule Civ. Proc. 44.1*, the court "may engage in **[*1870]** its own research and consider any relevant material thus found," Advisory Committee's 1966 Note on *Fed. Rule Civ. Proc. 44.1*, 28 U. S. C. App., p. 892 (hereinafter Advisory Committee's Note). Because the Second Circuit ordered dismissal of this case on the ground that the foreign government's statements could **[**230]** not be gainsaid, we vacate that court's judgment and remand the case for further consideration.

I

Petitioners, U. **[***7]** S.-based purchasers of vitamin C (hereinafter U. S. purchasers), filed a class-action suit against four Chinese corporations that manufacture and export the nutrient (hereinafter Chinese sellers). The U. S. purchasers alleged that the Chinese sellers, two of whom are respondents here, had agreed to fix the price and quantity of vitamin C exported to the United States from China, in violation of *§1 of the Sherman Act, 15 U. S. C. §1*. More particularly, the U. S. purchasers stated that the Chinese sellers had formed a cartel "facilitated by the efforts of their trade association," the Chamber of Commerce of Medicines and Health Products Importers and Exporters (Chamber). Complaint in No. 1:05-CV-453, Docket No. 1, ¶43. The Judicial Panel on Multidistrict Litigation consolidated the instant case and related suits for pretrial proceedings in the United States District Court for the Eastern District of New York.

The Chinese sellers moved to dismiss the U. S. purchasers' complaint on the ground that Chinese law required them to fix the price and quantity of vitamin C exports. Therefore, the Chinese sellers urged, they are shielded from liability under U. S. ***antitrust law*** by the act of state doctrine, the **[***8]** foreign sovereign compulsion doctrine, and principles of international comity. The Ministry of Commerce of the People's Republic of China (Ministry) filed a brief as *amicus curiae* in support of the Chinese sellers' motion. The Ministry's brief stated that the Ministry is "the highest administrative authority in China authorized to regulate foreign trade," App. to Pet. for Cert. 190a; that the Chamber is "an entity under the Ministry's direct and active supervision" and is authorized to regulate vitamin C exports, *id.,* at 196a; and that the conspiracy in restraint of trade alleged by the U. S. purchasers was in fact "a regulatory pricing regime mandated by the government of China," *id.,* at 197a. [1]

---

[1] The Ministry told the District Court: For much of the 20th century, China allowed only state-owned entities to export products. App. to Pet. for Cert. 198a. When China started to allow private enterprises to obtain export licenses, the Ministry established the Chamber to regulate exports under the Ministry's authority and direction. *Ibid.*

In 1997, the Ministry authorized the establishment of the Chamber's Vitamin C Subcommittee. *Id.,* at 202a. That year, the Ministry promulgated a regulation authorizing and requiring the subcommittee to limit the production of vitamin C for export and to set export prices. *Id.,* at 202a-204a. Under the regulation delineating this "Export Licensing System," the Ministry issued export licenses only to manufacturers whose export volume and price complied with the output quota and price coordinated by the Vitamin C Subcommittee. *Id.,* at 204a.

In 2002, the Ministry replaced the Export Licensing System with a "Verification and Chop System." *Id.,* at 208a. As set forth in a 2002 Ministry Notice, the Chamber itself—instead of the Ministry—would inspect each export contract and certify its compliance with the coordinated quotas and price by affixing a special seal, known as a "chop." *Id.,* at 208a-209a. China's Customs would allow export only if the exporter presented its contract bearing the Chamber's "chop." *Id.,* at 209a. According to the Ministry, it

[*1871] In response, the U. S. purchasers disputed that Chinese law required the Chinese sellers to engage in price **[**231]** fixing. Among other things, the U. S. purchasers noted that the Ministry had not identified any written law or regulation expressly ordering the Chinese sellers' price agreement. [2] They also highlighted a Chamber announcement that the manufacturers "were able to reach a self-regulated agreement . . . whereby they would voluntarily control the quantity and pace of exports . . . without any government intervention." **[***9]** App. 109. In addition, the U. S. purchasers presented expert testimony that the Chinese Government's authorization of a Vitamin C Subcommittee within the Chamber did not necessarily mean that the subcommittee's price fixing was mandated by law.

The District Court denied the Chinese sellers' motion to dismiss the complaint in relevant part. *In re Vitamin C Antitrust Litigation, 584 F. Supp. 2d 546, 559 (EDNY 2008)*. That court acknowledged that the Ministry's *amicus* brief was "entitled to substantial deference." *Id., at 557*. The court, however, did not regard the Ministry's statements as "conclusive," emphasizing particularly that the U. S. purchasers had submitted evidence suggesting that the price fixing was voluntary. *Ibid.* The record, the District Court determined, was "too ambiguous to foreclose further inquiry into the voluntariness of [the Chinese sellers'] actions." *Id., at 559*.

After further discovery, focused on whether Chinese law compelled the Chinese sellers to enter into a price-fixing agreement, the Chinese sellers moved for summary judgment. See *In re Vitamin C Antitrust Litigation, 810 F. Supp. 2d 522, 525-526 (EDNY 2011)*. The Ministry submitted an additional statement, reiterating that "the Ministry specifically charged the Chamber . . . with the authority and responsibility . . . for regulating, through consultation, the price of vitamin **[***10]** C manufactured for export." App. 133. The Chinese sellers tendered expert testimony in accord with the Ministry's account, which stressed that the Ministry's "interpretation of its own regulations and policies carries decisive weight under Chinese law." *Id.,* at 142. The U. S. purchasers, in response, cited further materials supporting their opposing view, including China's statement to the World Trade Organization (WTO) that it "gave up export administration of . . . vitamin C" in 2002. *810 F. Supp. 2d, at 532* (internal quotation marks omitted). Denying the Chinese sellers' motion for summary judgment, the District Court held that Chinese law did not require the sellers to fix the price or quantity of vitamin C exports. *Id., at 525*.

The case was then tried to a jury, which returned a verdict for the U. S. purchasers. The jury found that the Chinese sellers had agreed to fix the prices and quantities of vitamin C exports, see App. to Pet. for Cert. 276a-279a, and further found that the Chinese sellers were not "actually compelled" by China to enter into **[**232]** those agreements, *id.,* at 278a. In accord with the jury's verdict, the District Court entered judgment for the U. S. purchasers, awarding some $147 million in treble damages and enjoining **[***11]** the Chinese sellers **[*1872]** from further violations of the *Sherman Act*.

The Court of Appeals for the Second Circuit reversed, holding that the District Court erred in denying the Chinese sellers' motion to dismiss the complaint. *In re Vitamin C Antitrust Litigation, 837 F. 3d 175, 178, 195-196 (2016)*. The Court of Appeals determined that the propriety of dismissal hinged on whether the Chinese sellers could adhere to both Chinese law and U. S. ***antitrust law***. See *id., at 186*. That question, in turn, depended on "the amount of deference" owed to the Ministry's characterization of Chinese law. *Ibid*. Cognizant of "competing authority" on this question, *ibid.,* the Court of Appeals settled on a highly deferential rule: "[W]hen a foreign

---

was implicit in this arrangement that vitamin C exporters would remain under an obligation to fix prices and volumes. *Id.,* at 208a.

The effect of China's regime on the Chinese sellers' liability under the *Sherman Act*, we note, is not an issue before the Court today.

[2] The complaint, the U. S. purchasers emphasized, was directed only at conduct occurring after December 2001. As they understood the Ministry's 2002 Notice, see *supra,* at 3, n. 1, vitamin C exporters could have lawfully opted out of price fixing. Beyond that, the Vitamin C Subcommittee had replaced its 1997 Charter with a new 2002 Charter, App. 182-197, which eliminated the 1997 Charter's requirement that subcommittee members "[s]trictly execute" the "coordinated price" set by the Chamber, compare *id.*, at 85, with *id.,* at 185, and granted members an express "[r]igh[t]" to "freely resign from the Subcommittee," *id.,* at 186.

government, acting through counsel or otherwise, directly participates in U. S. court proceedings by providing a [statement] regarding the construction and effect of [the foreign government's] laws and regulations, which is reasonable under the circumstances presented, a U. S. court is bound to defer to those statements," *id., at 189*. The appeals court "note[d] that[,] if the Chinese Government had not appeared in this litigation, the [D]istrict [C]ourt's careful and thorough treatment of the evidence before it in analyzing what Chinese law required at both **[***12]** the motion to dismiss and summary judgment stages would have been entirely appropriate." *Id., at 191, n. 10*.

Applying its highly deferential rule, the Court of Appeals concluded that the Ministry's account of Chinese law was "reasonable." In so concluding, the Court of Appeals inspected only the Ministry's brief and sources cited therein. *Id., at 189-190*. Because it thought that "a U. S. court [must] not embark on a challenge to a foreign government's official representation," *id., at 189*, the Court of Appeals disregarded the submissions made by the U. S. purchasers casting doubt on the Ministry's account of Chinese law, *id., at 189-190*. Based solely on the Ministry's statements, the Court of Appeals held that "Chinese law required [the Chinese sellers] to engage in activities in China that constituted antitrust violations here in the United States." *Ibid.*

We granted certiorari to resolve a Circuit conflict over this question: Is a federal court determining foreign law under *Rule 44.1* required to treat as conclusive a submission from the foreign government describing its own law? *583 U. S. ___, 138 S. Ct. 734, 199 L. Ed. 2d 601 (2018)*. [3]

II

At common law, the content of foreign **[**233]** law relevant to a dispute was treated "as a question of fact." Miller, Federal *Rule 44.1* and the "Fact" Approach to Determining Foreign Law: **[***13]** Death Knell for a Die-Hard Doctrine, 65 Mich. L. Rev. 613, 617-619 (1967) (Miller). In 1801, this Court endorsed the common-law rule, instructing that "the laws of a foreign nation" must be "proved as facts." *Talbot v. Seeman, 5 U.S. 1, 1 Cranch 1, 38, 2 L. Ed. 15 (1801)*; **[*1873]** see, *e.g., Church v. Hubbart, 6 U.S. 187, 2 Cranch 187, 236, 2 L. Ed. 249 (1804)* ("Foreign laws are well understood to be facts."). Ranking questions of foreign law as questions of fact, however, "had a number of undesirable practical consequences." 9A C. Wright & A. Miller, Federal Practice and Procedure §2441, p. 324 (3d ed. 2008) (Wright & Miller). Foreign law "had to be raised in the pleadings" and proved "in accordance with the rules of evidence." *Ibid.* Appellate review was deferential and limited to the record made in the trial court. *Ibid.*; see also Miller 623.

HN2[🡅] ***LEdHN[2]***[🡅] [2] *Federal Rule of Civil Procedure 44.1*, adopted in 1966, fundamentally changed the mode of determining foreign law in federal courts. The Rule specifies that a court's determination of foreign law "must be treated as a ruling on a question of law," rather than as a finding of fact. [4] Correspondingly, in ascertaining foreign law, courts are not limited to materials submitted by the parties; instead, they "may consider any relevant material or source . . ., whether or not . . . admissible under the Federal Rules of Evidence." *Ibid.* Appellate review, as is true **[***14]** of domestic law determinations, is *de novo*. Advisory Committee's Note, at 892. *Rule 44.1* frees courts "to reexamine and amplify material . . . presented by counsel in partisan fashion or in insufficient detail." *Ibid.* The "obvious" purpose of the changes *Rule 44.1* ordered was "to make the process of determining alien law identical

McNab, 331 F. 3d 1228, 1239-1242 (CA11 2003)* (noting Honduran Government's shift in position on the question of Honduran law and determining that the original position stated the proper interpretation); *McKesson HBOC, Inc. v. Islamic Republic of Iran, 271 F. 3d 1101, 1108-1109, 348 U.S. App. D.C. 160 (CADC 2001)*, vacated in part on other grounds, ***320 F. 3d 280 (CADC 2003)*** (declining to adopt the view of Iranian law advanced by Iranian Government because it was not supported by the affidavits submitted by Iran's experts).

[4] *Federal Rule of Criminal Procedure 26.1* establishes "substantially the same" rule for criminal cases. Advisory Committee's 1966 Note on *Fed. Rule Crim. Proc. 26.1*, 18 U. S. C. App., p. 709.

with the method of ascertaining domestic law to the extent that it is possible to do so." Wright & Miller §2444, at 338-342.

HN3[] ***LEdHN[3]***[] [3] Federal courts deciding questions of foreign law under *Rule 44.1* are sometimes provided with the views of the relevant foreign government, as they were in this case through the *amicus* brief of the Ministry. See *supra,* at 2-3. As the Court of Appeals correctly observed, *Rule 44.1* does not address the weight a federal court determining foreign law should give to the views presented by the foreign government. See *837 F. 3d, at 187*. Nor does any other rule or statute. In the spirit of "international comity," *Société Nationale Industrielle Aérospatiale v. United States Dist. Court for Southern Dist. of Iowa, 482 U. S. 522, 543, 107 S. Ct. 2542, 96 L. Ed. 2d 461, and n. 27 (1987)*, a federal court should carefully consider a foreign state's views about the meaning of its own laws. See *United States v. McNab, 331 F. 3d 1228, 1241 (CA11 2003)*; cf. *Bodum USA, Inc. v. La Cafetière, Inc., 621 F. 3d 624, 638-639 (CA7 2010)* (Wood, J., concurring). But the appropriate weight in each case will depend upon the circumstances; a federal court is neither bound to adopt the foreign government's characterization nor required to ignore **[***15]** other relevant materials. **[**234]** When a foreign government makes conflicting statements, see *supra,* at 5, or, as here, offers an account in the context of litigation, there may be cause for caution in evaluating the foreign government's submission.

Given the world's many and diverse legal systems, and the range of circumstances in which a foreign government's views may be presented, no single formula or rule will fit all cases in which a foreign government describes its own law. Relevant considerations include the statement's clarity, thoroughness, and support; its context and purpose; the transparency of the foreign legal system; the role and authority of the entity or official offering the statement; and the statement's consistency **[*1874]** with the foreign government's past positions.

Judged in this light, the Court of Appeals erred in deeming the Ministry's submission binding, so long as facially reasonable. That unyielding rule is inconsistent with *Rule 44.1* (determination of an issue of foreign law "must be treated as a ruling on a question of law"; court may consider "any relevant material or source") and, tellingly, with this Court's treatment of analogous submissions from States of the United States. ***HN4***[] ***LEdHN[4]***[] [4] If the relevant **[***16]** state law is established by a decision of "the State's highest court," that decision is "binding on the federal courts." *Wainwright v. Goode, 464 U. S. 78, 84, 104 S. Ct. 378, 78 L. Ed. 2d 187 (1983)* (*per curiam*); see *Mullaney v. Wilbur, 421 U. S. 684, 691, 95 S. Ct. 1881, 44 L. Ed. 2d 508 (1975)*. But views of the State's attorney general, while attracting "respectful consideration," do not garner controlling weight. *Arizonans for Official English v. Arizona, 520 U. S. 43, 76-77, n. 30, 117 S. Ct. 1055, 137 L. Ed. 2d 170 (1997)*; see, *e.g., Virginia v. American Booksellers Ass'n, 484 U.S. 383, 393-396, 108 S. Ct. 636, 98 L. Ed. 2d 782 (1988)*. Furthermore, because the Court of Appeals riveted its attention on the Ministry's submission, it did not address other evidence, including, for example, China's statement to the WTO that China had "g[i]ve[n] up export administration . . . of vitamin C" at the end of 2001. *810 F. Supp. 2d, at 532* (internal quotation marks omitted). [5]

The Court of Appeals also misperceived this Court's decision in *United States v. Pink, 315 U. S. 203, 62 S. Ct. 552, 86 L. Ed. 796 (1942)*. See *837 F. 3d, at 186-187, 189*. *Pink*, properly comprehended, is not compelling authority for the attribution of controlling weight to the Ministry's brief. We note, first, that *Pink* was a pre-*Rule 44.1* decision. Second, *Pink* arose in unusual circumstances. *Pink* was an action brought by the United States to recover assets of the U. S. branch of a Russian insurance company that had been nationalized in 1918, after the Russian revolution. *315 U. S., at 210-211, 62 S. Ct. 552, 86 L. Ed. 796*. In 1933, the Soviet Government assigned the nationalized assets located in this country to the United States. *Id., at 211-212, 62 S. Ct. 552, 86 L. Ed. 796*. The disposition of the case **[***17]** turned on the extraterritorial effect of **[**235]** the nationalization decree—specifically, whether the decree reached assets of the Russian insurance company located in the United States, or was instead limited to property in Russia. *Id., at 213-215, 217, 62 S. Ct. 552, 86 L. Ed. 796*. To support the position that the decree reached all of the company's assets, the United States obtained an "official declaration of the Commissariat for

---

[5] The Court of Appeals additionally mischaracterized the Ministry's brief as a "sworn evidentiary proffer." *837 F. 3d, at 189*. In so describing the Ministry's submission, the Court of Appeals overlooked that a court's resolution of an issue of foreign law "must be treated as a ruling on a question of law." *Fed. Rule Civ. Proc. 44.1*. The Ministry's brief, while a probative source for resolving the legal question at hand, was not an attestation to facts.

Justice" of the Russian Socialist Federal Soviet Republic. *Id., at 218, 62 S. Ct. 552, 86 L. Ed. 796*. The declaration certified that the nationalization decree reached "the funds and property of former insurance companies . . . irrespective of whether [they were] situated within the territorial limits of [Russia] or abroad." *Id., at 220, 62 S. Ct. 552, 86 L. Ed. 796* (internal quotation marks omitted). This Court determined that "the evidence supported [a] finding" that "the Commissariat for Justice ha[d] power to interpret existing Russian law." *Ibid*. "That being true," the Court concluded, the "official declaration [wa]s conclusive so far as the intended **[*1875]** extraterritorial effect of the Russian decree [wa]s concerned." *Ibid.*

This Court's treatment of the Commissariat's submission as conclusive rested on a document *obtained by the United States*, through official "diplomatic channels." *Id., at 218, 62 S. Ct. 552, 86 L. Ed. 796*. There **[***18]** was no indication that the declaration was inconsistent with the Soviet Union's past statements. Indeed, the Court emphasized that the declaration was consistent with expert evidence in point. See *ibid.* That the Commissariat's declaration was deemed "conclusive" in the circumstances *Pink* presented scarcely suggests that all submissions by a foreign government are entitled to the same weight.

The Court of Appeals also reasoned that a foreign government's characterization of its own laws should be afforded "the same respect and treatment that we would expect our government to receive in comparable matters." *837 F. 3d, at 189*. The concern for reciprocity is sound, but it does not warrant the Court of Appeals' judgment. Indeed, the United States, historically, has not argued that foreign courts are *bound* to accept its characterizations or precluded from considering other relevant sources. [6]

The understanding that a government's expressed view of its own law is ordinarily entitled to substantial but not conclusive weight is also consistent with two international treaties that establish formal mechanisms by which one government may obtain from another **[***19]** an official statement characterizing its laws. Those treaties specify that "[t]he information given in the reply shall not bind the judicial authority from which the request emanated." European Convention on Information on Foreign Law, Art. 8, June 7, 1968, 720 U. N. T. S. 154; see Inter-American Convention on Proof of and Information on Foreign Law, Art. 6, May 8, 1979, O. A. S. T. S. 1439 U. N. T. S. 111 (similar). **[**236]** Although the United States is not a party to those treaties, they reflect an international practice inconsistent with the Court of Appeals' "binding, if reasonable" resolution.

***

Because the Court of Appeals concluded that the District Court was bound to defer to the Ministry's brief, the court did not consider the shortcomings the District Court identified in the Ministry's position or other aspects of "the [D]istrict [C]ourt's careful and thorough treatment of the evidence before it." *837 F. 3d, at 191, n. 10*. The correct interpretation of Chinese law is not before this Court, and we take no position on it. But the materials identified by the District Court were at least relevant to the weight the Ministry's submissions should receive and to the question whether Chinese law required the Chinese **[***20]** sellers' conduct. We therefore vacate the judgment of the Court of Appeals and remand the case for renewed consideration consistent with this opinion.

It is so ordered.

Opinion

ORDER GRANTING DEFENDANT OCWEN LOAN SERVICING, LLC'S MOTION TO DISMISS

[Doc. No. 14]

Plaintiff Bijan Nikoopour ("Plaintiff") filed a First Amended Complaint against Ocwen Loan Servicing, LLC ("Ocwen") and Western Progressive, LLC (collectively "Defendants") in the United States District Court for the Southern District of California alleging: (1) breach of contract; and (2) violations of California's Unfair Competition Law ("UCL"). *See* Doc. No. 13 (hereinafter "FAC"). Ocwen moves to dismiss Plaintiff's FAC for failure to state a claim pursuant to *Federal Rule of Civil Procedure 12(b)(6)*. *See* Doc. No. 14-1. Plaintiff filed an opposition to Ocwen's motion, to which Ocwen replied. *See* Doc. Nos. 16, 19. The Court found the matter suitable for determination on the papers and without oral argument **[*2]** pursuant to *Civil Local Rule 7.1(d)(1)*. *See* Doc. No. 20. For the reasons set forth below, the Court **GRANTS** Ocwen's motion to dismiss.

BACKGROUND[1]

On or about August 31, 2006, Plaintiff obtained a loan in the amount of eight hundred eighty-one thousand two hundred and fifty dollars ($881,250.00) to purchase the property located at 13668 Landfair Road, San Diego, California, 92130. FAC ¶ 22. Plaintiff obtained the loan through Mortgageit, Inc. as the lender of the Note. *Id.* The Note was secured by a Deed of Trust. *Id.*, Exh. A. On or about November 2013, the servicing rights of the Note were transferred to Ocwen. *Id.* ¶ 23.

Due to financial hardships, Plaintiff fell behind on his mortgage payments. *Id.* ¶ 24. Plaintiff inquired with Ocwen about "foreclosure prevention alternatives." *Id.* ¶ 25. Ocwen sent Plaintiff a loan modification application, and on or about December 10, 2014, Plaintiff returned "the completed loan modification application" to Ocwen via mail. *Id.* However, from December 2014 to "approximately July 2015, Plaintiff was given the run around by OCWEN." *Id.* ¶ 26. As such, Plaintiff filed a complaint against Ocwen in state court. *Id.* ¶ 28. Plaintiff dismissed this action without prejudice **[*3]** on or about October 31, 2016. *Id.* ¶ 37.

On or about July 28, 2015, Plaintiff filed for Chapter 13 bankruptcy. *Id.* ¶ 30. Plaintiff alleges that "on or about August or October 2015" or "October-November 2015," Ocwen approved Plaintiff for a step rate loan modification while in bankruptcy. *Id.* ¶¶ 31, 40; *see also id.*, Exh. B. However, Plaintiff alleges that Ocwen representatives provided Plaintiff with four different addresses where Plaintiff could send his payment. *Id.* ¶ 34. As such, "Plaintiff did not know where to send the loan modification payment to." *Id.* When Plaintiff "followed up" with Ocwen in November and December 2015 to inquire about where to send his payments, Ocwen indicated that since it had not received payment by November 1, 2015, "the loan modification was no longer on the table." *Id.* ¶ 35. Plaintiff dismissed the bankruptcy on November 3, 2015. *Id.*

On or about July 2016, Plaintiff claims Ocwen approved him for a second loan modification. *Id.* ¶ 36. Plaintiff was dissatisfied, however, because the "new loan modification was nearly double the interest rate of the initial loan modification approval[.]" *Id.* Plaintiff requested Ocwen "honor" the terms of the first loan modification, **[*4]** but Ocwen "refused." *Id.* Plaintiff believes that Ocwen intends to foreclose upon the property. *Id.* ¶ 38. Based upon these allegations, Plaintiff commenced the instant action against Defendants on August 29, 2017, alleging breach of contract and violations of California's UCL. *See* FAC.

LEGAL STANDARD

A *Rule 12(b)(6)* motion to dismiss tests the sufficiency of the complaint. *Navarro v. Block, 250 F.3d 729, 732 (9th Cir. 2001)*. A pleading must contain "a short and plain statement of the claim showing that the pleader is entitled to relief. . . ." *Fed. R. Civ. P. 8(a)(2)*. However, plaintiffs must also plead "enough facts to state a claim to relief that is plausible on its face." *Fed. R. Civ. P. 12(b)(6)*; *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. The plausibility standard thus demands more than a formulaic recitation of the elements of a cause of action, or naked assertions devoid of further factual enhancement. *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*. Instead, the complaint "must contain allegations of underlying facts sufficient to give fair notice and to enable the opposing party to defend itself effectively." *Starr v. Baca, 652 F.3d 1202, 1216 (9th Cir. 2011)*.

In reviewing a motion to dismiss under *Rule 12(b)(6)*, courts must assume the truth of all factual allegations and must construe them in the light most favorable to the nonmoving party. *Cahill v. Liberty Mut. Ins. Co., 80 F.3d 336, 337-38 (9th Cir. 1996)*. The court need not take legal conclusions as true merely because they are cast in the form of **[*5]** factual allegations. *Roberts v. Corrothers, 812 F.2d 1173, 1177 (9th Cir. 1987)*. Similarly, "conclusory

[1] Because this matter is before the Court on a motion to dismiss, the Court must accept as true the allegations set forth in the complaint. *See* *Hosp. Bldg. Co. v. Trs. Of Rex Hosp., 425 U.S. 738, 740, 96 S. Ct. 1848, 48 L. Ed. 2d 338 (1976)*.

allegations of law and unwarranted inferences are not sufficient to defeat a motion to dismiss." *Pareto v. FDIC, 139 F.3d 696, 699 (9th Cir. 1998)*.

In determining the propriety of a *Rule 12(b)(6)* dismissal, courts generally may not look beyond the complaint for additional facts. *United States v. Ritchie, 342 F.3d 903, 908 (9th Cir. 2003)*. "A court may, however, consider certain materials—documents attached to the complaint, documents incorporated by reference in the complaint, or matters of judicial notice—without converting the motion to dismiss into a motion for summary judgment." *Id.*; *see also Lee v. City of Los Angeles, 250 F.3d 668, 688 (9th Cir. 2001)*. "However, [courts] are not required to accept as true conclusory allegations which are contradicted by documents referred to in the complaint." *Steckman v. Hart Brewing, Inc., 143 F.3d 1293, 1295-96 (9th Cir. 1998)*. Where dismissal is appropriate, a court should grant leave to amend unless the plaintiff could not possibly cure the defects in the pleading. *Knappenberger v. City of Phoenix, 566 F.3d 936, 942 (9th Cir. 2009)*.

DISCUSSION

A. Ocwen's Request for Judicial Notice

As an initial matter, Ocwen requests the Court take judicial notice of four public records (Exhibits A-D) relating to Plaintiff's FAC, and further requests that the Court incorporate by reference Exhibit E into Plaintiff's FAC. *See* Doc. No. 14-2. Exhibit A is a Deed of Trust dated August 24, 2009, recorded in the San Diego County Recorder's **[*6]** Office. Exhibit B is a Notice of Default and Election to Sell dated June 22, 2009, recorded in the San Diego County Recorder's Office. Exhibit C is a Notice of Default and Election to Sell dated September 17, 2010, recorded in the San Diego County Recorder's Office. Exhibit D is a Notice of Default and Election to Sell dated January 5, 2015, recorded in the San Diego County Recorder's Office. Exhibit E is a Loan Modification Offer from Ocwen to Plaintiff dated August 6, 2015.

Generally, a district court's review on a *12(b)(6)* motion to dismiss is "limited to the complaint." *Lee v. City of Los Angeles, 250 F.3d 668, 688 (9th Cir. 2001) overruled on other grounds by Galbraith v. Cnty. Of Santa Clara, 307 F.3d 1119, 1125-26 (9th Cir. 2002)* (quoting *Cervantes v. City of San Diego, 5 F.3d 1273, 1274 (9th Cir. 1993))*. However, "a court may take judicial notice of matters of public record," *id. at 689* (internal quotations omitted), and of "documents whose contents are alleged in a complaint and whose authenticity no party questions, but which are not physically attached to the pleading," *Branch v. Tunnell, 14 F.3d 449, 454 (9th Cir. 1994)*, *overruled on other grounds by Galbraith, 307 F.3d at 1125-26*; *see also Fed. R. Evid. 201*.

Here, Plaintiff does not object to Ocwen's request for judicial notice. Having reviewed the five exhibits attached to Ocwen's request for judicial notice, the proffered documents have either been incorporated by reference into the FAC, or are otherwise a matter of public **[*7]** record. *See United States v. Ritchie, 342 F.3d 903, 908 (9th Cir. 2003)*; *Fed. R. Evid. 201(b)*. Accordingly, the Court **GRANTS** Ocwen's request for judicial notice.

B. Ocwen's Motion to Dismiss

In its motion, Ocwen argues that the Court should dismiss Plaintiff's FAC for the following reasons: (1) Plaintiff's breach of contract claim is premised on a contract that did not exist, and on which he failed to perform; and (2) Plaintiff's UCL claim fails because it is premised on the same conduct as Plaintiff's breach of contract claim. *See* Doc. No. 14-1 at 1. The Court addresses Ocwen's arguments in turn.

1. Breach of Contract Claim

Plaintiff alleges he entered into a loan modification agreement with Ocwen, but Ocwen breached the agreement by moving "forward with the non-judicial foreclosure sale proceedings" and failing to honor the loan modification agreement. FAC ¶ 44. The Court previously found that Plaintiff has sufficiently alleged the terms of the loan modification offer. *See* Doc. No. 12 at 7. Ocwen now argues that there are no allegations that Plaintiff ever signed and returned the loan modification offer. *See* Doc. No. 14-1 at 5. Moreover, Ocwen contends the statute of frauds bars Plaintiff's breach of contract claim. *See id.* at 6. Lastly, Ocwen claims that even if Plaintiff **[*8]** could allege the parties entered into a loan modification agreement, Plaintiff concedes he did not perform and has not alleged an excuse for his non-performance. *See id.* at 7.

To bring a cause of action for breach of contract, Plaintiff must prove: "(1) the existence of the contract; (2) plaintiff's performance or excuse for nonperformance; (3) defendant's breach; and (4) the resulting damages to the plaintiff." *Oasis West Realty, LLC v. Goldman, 51 Cal. 4th 811, 124 Cal. Rptr. 3d 256, 250 P.3d 1115, 1121 (Cal. 2011)*; *see also* Judicial Council of California Civil Jury Instruction No. 303 (describing the second essential factual element of a breach of contract claim as "[t]hat [Plaintiff] did all, or substantially all, of the significant things that the contract required [or] was excused from doing those things."). The plaintiff bears the burden of establishing each of these elements. *See* *M. v. Superior Court of Sonoma County, 25 Cal. 3d 608, 159 Cal. Rptr. 345, 350, 601 P.2d 572 (Ct. App. 2013)*.

Here, the Court finds that Plaintiff's breach of contract claim fails because even if Plaintiff's allegations are sufficient to allege the existence of a contract[2], Plaintiff concedes that he did not perform under the agreement, and fails to identify an excuse for his non-performance. With respect to performance, Plaintiff asserts that he "was willing, and able to tender the amounts to begin the loan modification," **[*9]** but was unable to because Ocwen provided Plaintiff "four (4) different addresses where payments needed to be sent to." *See* FAC ¶¶ 34, 42. Plaintiff asserts the "contradictory information not only confused Plaintiff, but made it *impossible* for him to tender payments." Doc. No. 13 at 10 (emphasis added). Thus, because Plaintiff admits that he did not perform under the agreement, the Court must determine whether Plaintiff has identified an excuse for his non-performance.

With respect to excuses for non-performance, "California law requires a plaintiff to identify excuses for non-performance with specificity in the pleadings." *Berkeley v. Wells Fargo Bank, 2015 U.S. Dist. LEXIS 141947, 2015 WL 6126815, at *6 (N.D. Cal. Oct. 19, 2015)* (citing *Careau & Co. v. Sec. Pac. Bus. Credit, Inc., 222 Cal. App. 3d 1371, 1389, 272 Cal. Rptr. 387 (Ct. App. 1990))*. In California, performance is excused when it is "prevented or delayed by the act of the creditor, or by the operation of law[.]" *Cal. Civ. Code § 1511*.

Here, Plaintiff repeatedly claims that Ocwen provided Plaintiff with "four (4) different addresses where payments needed to be sent to." FAC ¶¶ 34, 42. Plaintiff asserts that he "tried to make payments on his Note," but was unable to because "Ocwen never provided Plaintiff with the correct address of where to send his payments," and "Plaintiff did not feel comfortable sending large sums of money **[*10]** to random addresses provided by different representatives[.]" Doc. No. 16 at 8-9. Plaintiff further claims that "Plaintiff did not know where to send the loan modification payment, and Ocwen singlehandedly prevent[ed] Plaintiff from tendering payment." FAC ¶ 42. Plaintiff's allegations, however, are undermined by the loan modification proposal which has been incorporated by reference into Plaintiff's FAC, and the Court is not required to accept the truth of such allegations. *See Sprewell v. Golden State Warriors, 266 F.3d 979, 988 (9th Cir. 2001)* ("The court need not, however, accept as true allegations that contradict matters properly subject to judicial notice or by exhibit.") The loan modification proposal specifically outlines four different ways to tender payment to various addresses (i.e., overnight delivery, bank wire, money gram, or submitting payment to Western Union). *See* Doc. No. 14-7 at 3. Thus, Plaintiff had multiple options available to him. Lastly, Plaintiff does not allege that he attempted to send his payment to one of the four addresses provided, but was denied. As such, Plaintiff's allegations are insufficient to allege excuse of performance, and

[2] Plaintiff asserts that he has "made it very clear in his Complaint that he accepted the loan modification Agreement." Doc. No. 16 at 7. Plaintiff focuses on language in the loan modification proposal requiring him to contact Ocwen by phone or in writing to confirm his *intent to accept* the offer within 14 days. *See* Doc. No. 14-7 at 2. However, page six of the agreement expressly states that in order for Plaintiff to *accept* the proposal, he must: (1) *sign* the agreement; (2) fax the executed agreement to Ocwen; (3) pay the full initial payment; (4) pay the new monthly payment starting on November 1, 2015; and (5) send proof of insurance coverage. *See id.* at 6. Plaintiff, however, does not allege that he signed the agreement, faxed the executed agreement, remitted payment, or submitted proof of insurance coverage.

Plaintiff cannot state a claim for breach of contract. *See DirectTV, LLC v. E&E Enterprises Global, Inc., 2018 U.S. Dist. LEXIS 19468, 2018 WL 707964, at *2 (C.D. Cal. Feb. 5, 2018)* (dismissing first counterclaim **[*11]** for breach of contract for failure to specifically plead an excuse of performance).

Accordingly, the Court **DISMISSES** Plaintiff's claim for breach of contract.

2. UCL Claim

In his second cause of action, Plaintiff alleges that Ocwen engaged in unfair competition by refusing to "honor the terms of the Agreement by singlehandedly preventing Plaintiff[']s attempt to tender payment on the Agreement." FAC ¶ 52. Ocwen's acts were "willful, oppressive, and malicious, in that [it] engaged in acts of unfair competition with the deliberate intent to injure Plaintiff." *Id.* ¶ 53. Ocwen argues the Court should dismiss Plaintiff's UCL claim again because Plaintiff fails to allege any unfair business practice. *See* Doc. No. 14-1 at 9.[3]

California Business & Professions Code § 17200 "establishes three varieties of unfair competition—acts or practices which are unlawful, or unfair, or fraudulent." *Cel-Tech Commc'ns, Inc. v. L.A. Cellular Tel. Co., 20 Cal. 4th 163, 180, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999)* (internal quotations omitted). "Because the statute is written in the disjunctive, it is violated where a defendant's act or practice violates any of the foregoing prongs." *Davis v. HSBC Bank Nevada, N.A., 691 F.3d 1152, 1168 (9th Cir. 2012)*. An action brought under the "unlawful" prong of this statute "borrows" violations of other laws when committed pursuant to business activity. *Farmers Ins. Exchange v. Superior Court, 2 Cal. 4th 377, 383, 6 Cal. Rptr. 2d 487, 826 P.2d 730 (1992)*.

[*12] "The UCL does not define the term 'unfair.'" *Davis, 691 F.3d at 1169*. Under California law, it is well established that "a practice may be deemed unfair under the UCL even if not specifically proscribed by some other law." *Cel-Tech, 20 Cal. 4th at 180*. The California Supreme Court held that "unfair" means "conduct that threatens incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition." *Id.* Moreover, "any finding of unfairness to competitors under *section 17200* must be tethered to some legislatively declared policy or proof of some actual or threatened impact on competition." *Id.* State appellate court opinions have been divided over whether this definition of unfair should apply to UCL actions brought by consumers. Thus, some courts apply the following balancing test: "[a] business practice is unfair when it 'offends an established public policy or when the practice is immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers.'" *Herrejon v. Ocwen Loan Servicing, LLC, 980 F. Supp. 2d 1186, 1206 (E.D. Cal. 2013)* (quoting *Podolsky v. First Healthcare Corp., 50 Cal. App. 4th 632, 647, 58 Cal. Rptr. 2d 89 (Ct. App. 1996))*. "The 'unfairness' prong of the UCL 'does not give the courts a general license to review the fairness of contracts.'" *Id. at 1206-07* (quoting *Samura v. Kaiser Found. Health Plan, 17 Cal. App. 4th 1284, 22 Cal. Rptr. 2d 20, 29 n.6 (Ct. App. 1993))*.

---

[3] Ocwen also argues that Plaintiff lacks standing to sue under the UCL because Plaintiff fails to allege that he lost money or property as a result of the conduct he challenges. *See* Doc. No. 14-1 at 8-9. "To have standing to assert a *Section 17200* claim, the plaintiff must '(1) establish a loss or deprivation of money or property sufficient to qualify as injury in fact, i.e., *economic injury*, and (2) show that the economic injury was the result of, i.e., *caused by*, the unfair business practice or false advertising that is the gravamen of the claim.'" *In re Turner, 859 F.3d 1145, 1151 (9th Cir. 2017)* (quoting *Kwikset Corp. v. Superior Court, 51 Cal. 4th 310, 120 Cal. Rptr. 3d 741, 246 P.3d 877, 885 (2011))*; *see also Cal. Bus. & Prof. Code § 17204*. Here, Plaintiff claims that as a result of Ocwen's conduct, he has and continues to suffer harm including the possible loss of the subject property, loss of the opportunity to pursue foreclosure alternatives, loss of the opportunity to obtain a loan modification, back dues and interest that has accrued to date, which would not have accrued but for Ocwen's actions, and the cost and expense of the instant litigation. FAC ¶ 54. Such allegations are sufficient to allege standing. *See Segura v. Wells Fargo Bank, N.A., 2014 U.S. Dist. LEXIS 143038, No., 2014 WL 4798890, at *8 (C.D. Cal. Sept. 26, 2014)* (finding the plaintiffs have standing to pursue a UCL claim because the plaintiffs "allege an injury that affected a property interest" and "adequately allege that the practices of which they complain are related to some form of loss they may have suffered related to the property[.]").

Lastly, under the fraudulent prong, a plaintiff must "show deception to some members of the public . . . [or] allege that members of the public are likely to be deceived." *Herrejon, 980 F. Supp. 2d at 1207* (internal quotations and citations omitted). Fraudulent conduct must be pled with particularity. *See* *Kearns v. Ford Motor Co., 567 F.3d 1120, 1127 (9th Cir. 2009)* (noting that *Rule 9(b)* applies to claims in federal court under the UCL).

Here, the Court once again finds that in construing Plaintiff's allegations in the light most favorable to him, Plaintiff's allegations are insufficient to state a claim under the UCL. It appears that Plaintiff relies on the "unlawful" and "unfair" prongs of the UCL in his FAC. *See* FAC ¶ 52; Doc. No. 16 at 9 (discussing the "unlawful" and "unfair" prongs of the UCL). With respect to the "unlawful" prong, *Section 17200* "borrows" violations from other laws by making them independently actionable as unfair competitive practices. *Korea Supply Co. v. Lockheed Martin Corp., 29 Cal. 4th 1134, 1143, 131 Cal. Rptr. 2d 29, 63 P.3d 937 (2003)*. Because Plaintiff predicates his UCL claim on the same allegations and theories alleged in his breach of contract claim, and because Plaintiff fails to state a viable breach of contract claim, Plaintiff's UCL claim based upon unlawful conduct similarly fails. *See* *Hadley v. Kellogg Sales Co., 243 F. Supp. 3d 1074, 1094 (N.D. Cal. 2017)* ("If a plaintiff cannot **[*13]** state a claim under the predicate law, however, [the UCL] claim also fails.") (quoting *Stokes v. CitiMortgage, Inc., 2014 U.S. Dist. LEXIS 125655, 2014 WL 4359193, at *11 (C.D. Cal. Sept. 3, 2014))*; *see also* *Simila v. Am. Sterling Bank, 2010 U.S. Dist. LEXIS 108440, 2010 WL 3988171, at *5 (S.D. Cal. Oct. 12, 2010)* (dismissing claim for unlawful competition because all causes of action which the claim "borrows" are dismissed).

With respect to the "unfair" prong, the Court finds that Plaintiff fails to plead facts to show that Ocwen engaged in an unfair business practice under either the tethering test outlined by the California Supreme Court in *Cel-Tech* or the balancing test. Plaintiff alleges in conclusory fashion that Ocwen "refused to honor the terms of the Agreement by singlehandedly preventing Plaintiff's attempt to tender payment on the Agreement." FAC ¶ 52. Plaintiff claims that Ocwen "failed to provide an address for the payments to be tendered." *Id.* ¶ 34. Yet when Plaintiff contacted Ocwen representatives, such representatives "provided four (4) different addresses where payments needed to be sent to." *Id.* The Court is not required, however, to accept as true these contradictory allegations that are undermined by the loan modification proposal, incorporated by reference into Plaintiff's FAC. *See Sprewell, 266 F.3d at 988*. The loan modification proposal outlines four different ways to tender payment to various addresses **[*14]** (i.e., overnight delivery, bank wire, money gram, or submitting payment to Western Union). *See* Doc. No. 14-7 at 3. Thus, Plaintiff had multiple options available to him. Moreover, Plaintiff does not claim that he ever attempted to submit his payment, but was denied. Rather, Plaintiff was confused about where to send the payments; thus, he did not make any payments. As such, the Court finds that Plaintiff's allegations are insufficient to allege a claim under the "unfair" prong of the UCL.

Accordingly, the Court **DISMISSES** Plaintiff's UCL claim.

CONCLUSION

Based on the foregoing, the Court **GRANTS** Ocwen's motion and **DISMISSES** Plaintiff's FAC **with prejudice**. *See* *Zucco Partners LLC v. Digimarc Corp., 552 F.3d 981, 1007 (9th Cir. 2009)* (noting that "where the plaintiff previously has been granted leave to amend and has subsequently failed to add the requisite particularity to its claims, the district court's discretion to deny leave to amend is particularly broad") (internal citation and quotation marks omitted). The Clerk of Court is instructed to close the case and enter judgment accordingly.

IT IS SO ORDERED.

Dated: June 14, 2018

LexisNexis® Headnotes

Evidence > Admissibility > Expert Witnesses > Daubert Standard

HN1[] **Expert Witnesses, Daubert Standard**

Fed. R. Evid. 702 governs the admission of expert opinion testimony. Pursuant to that rule, before admitting expert testimony a court must consider: (1) whether the expert is competent to testify regarding the matters he intends to address; (2) whether the methodology used to reach his conclusions is sufficiently reliable; and (3) whether the testimony is relevant, in that it assists the jury to understand the evidence or determine a fact in issue. In ruling on the admissibility of expert testimony, the focus must be solely on the expert's principles and methodology, not on the conclusions that they generate. If the expert predicates his testimony on an assumption that is belied by the evidence, the expert's testimony is properly excluded. The party offering the expert's testimony has the burden to prove it is admissible by a preponderance of the evidence.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Appropriateness

HN2[] **Entitlement as Matter of Law, Appropriateness**

Summary judgment is appropriate only when the pleadings, depositions, and affidavits submitted by the parties show no genuine issue of material fact exists and that the movant is entitled to judgment as a matter of law. The court should view the evidence and any inferences that may be drawn in the light most favorable to the nonmovant. The party seeking summary judgment must first identify grounds to show the absence of a genuine issue of material fact. The burden then shifts to the nonmovant, who must go beyond the pleadings and present affirmative evidence to show that a genuine issue of material fact does exist. A mere scintilla of evidence supporting the opposing party's position will not suffice; there must be a sufficient showing that the jury could reasonably find for that party.

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade

HN3[] **Regulated Practices, Monopolies & Monopolization**

Section 1 of the Sherman Act states that every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal. *15 U.S.C.S. § 1*. *Section 2* of the Sherman Act likewise prohibits agreements to monopolize trade. *15 U.S.C.S. § 2*. And Section 5 of the Federal Trade Commission Act states that unfair methods of competition are illegal, *15 U.S.C.S. § 45(a)*, a prohibition which has long been held to encompass the violations of the Sherman Act.

Legal Ethics > Client Relations > Duties to Client > Effective Representation

HN4[] **Duties to Client, Effective Representation**

Competent representation requires the legal knowledge, skill, thoroughness and preparation reasonably necessary for the representation.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade

HN5[] **Regulated Practices, Price Fixing & Restraints of Trade**

Under the Sherman Act, *Section 1* claims and *Section 2* conspiracy to monopolize claims require the same threshold showing — the existence of an agreement to restrain trade. A written contract satisfies this requirement only if it embodies an agreement to unlawfully restrain trade.

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > Conspiracy to Monopolize

HN6[] **Monopolies & Monopolization, Conspiracy to Monopolize**

Direct evidence of a conspiracy obviates the need for evidence that excludes the possibility of independent action.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade

HN7[] **Regulated Practices, Price Fixing & Restraints of Trade**

The antitrust laws prohibit conduct that is unreasonable and anticompetitive. A restraint is unreasonable if it has an adverse impact on competition and cannot be justified as a procompetitive measure. Usually this is determined by balancing the effects under the test known as the rule of reason. The rule of reason standard hinges the ultimate legality of a restraint on whether the plaintiff has demonstrated an anticompetitive effect which is not offset by a need to achieve a procompetitive benefit or justification. Sometimes, however, conduct is so blatantly anticompetitive that courts have found it to be illegal per se.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

HN8[] **Regulated Practices, Price Fixing & Restraints of Trade**

With respect to "reverse settlements" in patent cases, the Supreme Court made clear in Actavis that avoiding even the possibility of competition, however small, is itself an antitrust violation. Rather than having to litigate the merits of any underlying patent suits or establish a theory of causation, the Supreme Court said that courts can look to the size of the payment to be able to assess its likely anticompetitive effects. Where the size of a reverse payment reflects traditional settlement considerations, such as avoided litigation costs or fair value for services, there is not the same concern that a patentee is using its monopoly profits to avoid the risk of patent invalidation or a finding of noninfringement. But where a payment is large and unjustified by these traditional settlement concerns, it is likely directed toward avoiding the risk of competition. Thus, if settlement payments are shown to be larger than what could reasonably be expected to cover such traditional settlement concerns as future litigation costs or the value of services rendered, plaintiffs will have satisfied their burden in showing that settlements violated the antitrust laws.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade

HN9[] **Regulated Practices, Price Fixing & Restraints of Trade**

Comparative valuations of services are not a necessary requirement to show that a reverse payment is large and unjustified. Helpful, certainly, but not necessary. The size of the payment is merely the Supreme Court's proxy for reaching the ultimate question: whether the agreement was entered into for the purpose of avoiding the risk of competition. If a settlement was agreed to for that purpose, it is large and unjustified.

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

Antitrust & Trade Law > Clayton Act

HN10[] **Standing, Clayton Act**

Unlike the Federal Trade Commission, which only needs to prove an antitrust violation, private plaintiffs asserting a private right of action under the Clayton Act must also establish antitrust standing. This is separate from Article III standing. Harm to the antitrust plaintiff is sufficient to satisfy the constitutional standing requirement of injury in fact, but the court must make a further determination whether the plaintiff is a proper party to bring a private antitrust action.

Antitrust & Trade Law > Regulated Practices > Private Actions > Standing

HN11[] **Private Actions, Standing**

The Eleventh Circuit employs a two-prong test for antitrust standing. First, the plaintiff must establish that it has suffered an antitrust injury. This means the plaintiff must have suffered an injury of the type that the antitrust laws were intended to prevent and that flows from that which makes the defendants' acts unlawful. The injury should reflect the anticompetitive effect of the violation. Second, the plaintiff must be an efficient enforcer of the antitrust laws.

Antitrust & Trade Law > Regulated Practices > Private Actions

HN12[] **Regulated Practices, Private Actions**

As in other areas of law, trial courts can structure antitrust litigation so as to avoid, on the one hand, the use of antitrust theories too abbreviated to permit proper analysis, and, on the other, consideration of every possible fact or theory irrespective of the minimal light it may shed on the basic question—that of the presence of significant unjustified anticompetitive consequences.

Antitrust & Trade Law > Business & Corporate Compliance > Antitrust

HN13[] **Antitrust & Trade Law**

Courts generally presume that the introduction of new, better products is a good thing for competition. The attempt to develop superior products is an essential element of lawful competition.

Antitrust & Trade Law > Sherman Act > Remedies

Antitrust & Trade Law > Clayton Act > Remedies

HN14[] **Sherman Act, Remedies**

Federal courts have extensive authority to order equitable relief in antitrust cases. The goal of an equitable antitrust suit is not to simply punish past behavior, nor is it merely to end specific illegal practices. The goal is to effectively pry open to competition a market that has been closed by defendants' illegal restraints. In other words, the goal is to prevent anticompetitive activity in the future, and the courts have a wide range of means at their disposal to do so. It is not necessary that all of the untraveled roads to that end be left open and that only the worn one be closed. Sometimes, this may even mean that otherwise legal activity may have to be enjoined. The standard against which the order must be judged is whether the relief represents a reasonable method of eliminating the consequences of the illegal conduct. Because the appropriate remedy fundamentally depends on the nature and scope of any wrongful conduct, it is premature to determine what may or may not be an appropriate remedy at this stage in the litigation, where there has not yet been a decision on liability.

Judges: THOMAS W. THRASH, JR., United States District Judge.

Opinion by: THOMAS W. THRASH, JR.

Opinion

OPINION AND ORDER

This is an antitrust action brought by the Federal Trade Commission and private antitrust actions transferred to this Court by the Judicial Panel on Multidistrict Litigation. They are before the Court on the Defendant Solvay's Motion for Summary Judgment on the FTC's Claims [FTC Doc. 620], Solvay's Motion for Summary Judgment as to the Par/Paddock Settlement [FTC Doc. 621, MDL Doc. 1551], the Defendants Actavis and Actavis Holdco's Motion for Summary Judgment [FTC Doc. 625, MDL Doc. 1556], Solvay's Motion for Summary Judgment for Lack of Antitrust Injury Against the Private Plaintiffs [MDL Doc. 1550], Solvay's Motion for Summary Judgment as to Retailer's Damages Claims on AndroGel 1.62% Purchases [MDL Doc. 1552], the Defendants Par and Paddock's Motion for Summary Judgment [MDL Doc. 1559], the Defendants Actavis, **[*16]** Inc. and Solvay's Motion to Exclude Plaintiffs' Proposed Patent Law Expert Jack C. Goldstein, Esq. [FTC Doc. 622, MDL Doc. 1553], and the Defendants Solvay, Par, and Paddock's Motion to Exclude in Part Plaintiffs' Expert James R. Bruno [FTC Doc. 630, MDL Doc. 1562].

For the reasons set forth below, Solvay's Motion for Summary Judgment on the FTC's Claims [FTC Doc. 620] is DENIED, Solvay's Motion for Summary Judgment as to the Par/Paddock Settlement [FTC Doc. 621, MDL Doc. 1551] is DENIED, Actavis and Actavis Holdco's Motion for Summary Judgment [FTC Doc. 625, MDL Doc. 1556] is DENIED, Solvay's Motion for Summary Judgment for Lack of Antitrust Injury Against the Private Plaintiffs [MDL Doc. 1550] is DENIED, Solvay's Motion for Summary Judgment as to Retailer's Damages Claims on AndroGel 1.62% Purchases [MDL Doc. 1552] is GRANTED, the Defendants Par and Paddock's Motion for Summary Judgment [MDL Doc. 1559] is DENIED, Actavis, Inc. and Solvay's Motion to Exclude Plaintiffs' Proposed Patent Law Expert Jack C. Goldstein, Esq. [FTC Doc. 622, MDL Doc. 1553] is DENIED, and Solvay, Par, and Paddock's Motion to Exclude in Part Plaintiffs' Expert James R. Bruno [FTC Doc. 630, MDL Doc. 1562] is **[*17]** GRANTED in part and DENIED in part.

I. Background

In the early nineties, Besins Healthcare, S.A. developed the pharmaceutical formulation for AndroGel, a prescription topical gel used to treat low testosterone in men. In August 1995, Besins granted Solvay Pharmaceuticals, Inc., a license to sell AndroGel in the United States.[1] Besins also agreed to manufacture AndroGel and supply it to Solvay once Solvay received FDA approval to sell the drug.

At this point, it is important to understand how new drugs enter the market in the United States. In order to sell a new drug in the United States, a pharmaceutical firm must file a New Drug Application ("NDA") with the Food and Drug Administration.[2] The NDA must contain a complete report about the drug, including safety and efficacy studies, the composition of the drug, a description of how the drug is produced, and proposed labeling.[3] The process to approve new proprietary drugs — known as "brand name" drugs — is both time consuming and costly.

Although the possibility for large profits after FDA approval is often an incentive for pharmaceutical companies to pursue the NDA process for brand name drugs, the cost associated with it may also serve as **[*18]** a significant barrier to entry by generic formulations of the same drug. These high barriers limit competition, which in turn may hurt consumers. This concern led Congress to enact the Hatch-Waxman Act in 1984.[4] The Hatch-Waxman Act enables companies that want to market and sell a generic version of a brand-name drug to avoid filing an NDA. As long as the generic and the brand-name drug are effectively the same thing, generic manufacturers can file a substantially shorter Abbreviated New Drug Application ("ANDA"). This reduces costs for generics manufacturers, which may allow them to charge much lower prices than brand name drugs, therefore benefitting consumers.

In order to prevent generic manufacturers from completely cutting into the profitability of brand name drugs, thereby reducing the incentive for brand name manufacturers to go through the cost and risk of the NDA process, federal law provides two ways for brand name pharmaceutical manufacturers to protect their investment. First, the FDA can grant brand name manufacturers periods of "exclusivity," which means that the FDA will not approve another application to sell the same drug until the exclusivity period (usually three or **[*19]** five years) ends. Second, brand name manufacturers can patent their new drug. Just like any other patent, drug patents grant brand name manufacturers a legal monopoly for a limited period of time. If there are any patents that cover the brand name drug, a generic manufacturer's ANDA must contain an additional certification. The ANDA must certify that (1) the

---

[1] Technically speaking, Unimed entered into the Agreements with Besins. Solvay, now known formally as Abbvie Products LLC, later acquired Unimed. However, in order to reduce confusion, the Court will simply use the name Solvay throughout this Opinion.

patent has not been listed with the FDA, (2) the patent has expired, (3) the patent will expire on a certain date, or (4) the patent is invalid or will not be infringed by the generic drug.[5] The last certification is known as a Paragraph IV certification. For any ANDA with a Paragraph IV certification, the applicant must also notify the patent holder of the ANDA.[6] If the patent holder decides to file an infringement suit after receiving notice of the Paragraph IV certification, the FDA is then prohibited from approving the generic for market entry for up to thirty months while the litigation proceeds.

In April 1999, Solvay filed an NDA for AndroGel. It was approved by the FDA in February 2000, and Solvay received three years of exclusivity. Solvay was also issued a patent on AndroGel, U.S. Patent No. 6,503,894 ('894 patent). Although AndroGel was not the only available **[*20]** method of testosterone replacement therapy, other methods were not as effective or as popular as AndroGel. The protection afforded Solvay by the exclusivity period and Solvay's patent helped AndroGel to quickly become the most popular form of testosterone replacement therapy. From 2000 to 2007, sales of AndroGel in the United States were over $1.8 billion. In the meantime, other pharmaceutical companies were developing generic versions of AndroGel. Once Solvay's new drug product exclusivity expired in February 2003, the FDA was authorized to approve generic versions of AndroGel. In May 2003, two companies each submitted ANDAs with Paragraph IV certifications for generic AndroGel. Actavis, Inc.[7] submitted the first ANDA, and Paddock Laboratories, Inc. submitted the second. Both companies also sent notice of their ANDAs to Solvay and Besins. In July 2003, Paddock reached an agreement with Par Pharmaceuticals. Par agreed to share any litigation costs with Paddock, and to sell Paddock's generic AndroGel. In return, Paddock agreed to share profits with Par.

Solvay responded to the ANDAs by asserting its rights under the '894 patent. In August 2003, Solvay's subsidiary, Unimed Pharmaceuticals, Inc., **[*21]** filed patent infringement actions against Watson and Paddock (the "Generics") in this Court.[8] Solvay alleged infringement based on the filing of the ANDAs.[9] Because Solvay filed infringement actions against the Generics within the forty-five day window of receiving notice, the FDA stayed approval of their ANDAs for thirty months.

For the next few years, Solvay and the Generics litigated the infringement actions. Both followed a similar schedule. From late 2003 to the middle of 2005, the parties engaged in discovery, scheduling, and other initial litigation matters. By August 2005, the parties had filed motions for claim construction. By December 2005, the Generics had filed motions for summary judgment on the validity of the '894 patent as well as claims construction briefs. All of the motions were fully briefed and ready for decision in early 2006.

While the motions were pending, Actavis and Paddock moved toward entering the market with generic AndroGel. In January 2006, the thirty month stay ended, and the FDA approved Actavis' ANDA. The FDA, however, continued to stay approval of Paddock's ANDA. The first **[*22]** firm to file an ANDA with a Paragraph IV certification receives generic exclusivity upon FDA approval, which is similar to brand-name exclusivity, but shorter. Generic exclusivity means that the FDA will not approve a subsequent ANDA for the same drug until 180 days after the earlier of (1) the date the first filer begins commercial marketing of its generic drug, or (2) the date a district court enters

[5] *See 21 U.S.C. § 355(j)(2)(A)(vii)*.

[6] *21 U.S.C. § 355(j)(2)(B)*.

[7] Originally known as Watson Pharmaceuticals, the company has since split into two separate entities now known as Actavis, Inc. and Actavis Holdco US, Inc. For the purposes of this Opinion, the Court will refer to these as just Actavis. And while the Court continues to call Solvay by its original name, it will use Actavis' new name to minimize confusion in light of the Supreme Court's opinion in *FTC v. Actavis, Inc., 570 U.S. 136, 133 S. Ct. 2223, 186 L. Ed. 2d 343 (2013)*.

[8] *See Unimed Pharm., Inc. v. Watson Pharm., Inc.*, No. 1:03-CV-2501-TWT, 2003 WL 23824320 (N.D. Ga. Aug. 21, 2003); *Unimed Pharm., Inc. v. Paddock Labs., Inc.*, No. 1:03-CV-2503-TWT, 2003 WL 23824347 (N.D. Ga. Aug. 21, 2003).

[9] *See 35 U.S.C. § 271(e)(2)(A)*(submitting an ANDA is an act of infringement if the branded drug is covered by a patent).

judgment that the patent is invalid or not infringed, whichever date is earlier.[10] Because Actavis was the first to file an ANDA for generic AndroGel, it received generic exclusivity over Paddock. In February 2006, Actavis prepared a report predicting that it would sell generic AndroGel by January 2007 and that the price would be 75 percent less than brand name AndroGel. In the same month, Par prepared a report predicting that Actavis would sell generic AndroGel as early as March 2006 and that Par and Paddock would follow in September 2006.

But before the Court decided the pending motions in the infringement actions, and before anyone entered the market with generic AndroGel, Solvay and the Generics settled the cases. Under the September 13, 2006 settlement between Solvay and Actavis, Solvay **[*23]** agreed to voluntarily dismiss the infringement action, and Actavis agreed not to market generic AndroGel until the earlier of August 31, 2015 or the date another company marketed generic AndroGel.[11] And under the September 13, 2006 settlement between Solvay and Par/Paddock, Solvay agreed to a consent judgment dismissing the infringement action, and Par/Paddock agreed not to market generic AndroGel until the earliest of August 31, 2015 (but only if Actavis did not assert its 180 day generic exclusivity period), the date another company launched generic AndroGel, or February 28, 2016.[12]

On the same day as the settlements, Solvay also entered into business promotion agreements with Actavis, Par, and Paddock. Under the agreement between Solvay and Actavis, Solvay agreed to share profits of AndroGel with Actavis, and Actavis agreed to promote AndroGel to urologists.[13] Under the agreement between Solvay and Par, Solvay agreed to share profits of AndroGel with Par, and Par agreed to promote AndroGel to primary care physicians.[14] And under the agreement between Solvay and Paddock, Solvay agreed to share profits of AndroGel with Paddock, and Paddock agreed to serve as a backup supplier of AndroGel. **[*24]** [15]

Together, these types of settlements are called "reverse payment" settlements, and they have recently become popular in pharmaceutical litigation. Reverse payment settlements are so called because they are the reverse of traditional patent infringement settlements. In a traditional settlement, the party with the claim — in this case, the brand name manufacturer — receives a payment from the defendant — in this case the generic — either equal to or less than the value of its claim.[16] But in a reverse settlement, "a party with no claim for damages (something that is usually true of a paragraph IV litigation defendant) walks away with money simply so it will stay away from the patentee's market."[17]

The reverse payment settlements prompted an investigation by the Federal Trade Commission for violations of antitrust laws. That investigation was completed in 2008. In 2009, the FTC and a number of private parties filed these antitrust actions against Solvay, Actavis, Par, and Paddock. All of the actions were filed in other federal district courts and then transferred to this Court either by change of venue or by order of the United States Judicial Panel on Multidistrict Litigation. **[*25]** On February 22, 2010, applying settled Eleventh Circuit precedent, this Court

dismissed the FTC action for failure to state a claim.[18] On appeal, the Eleventh Circuit affirmed.[19] However, the Supreme Court granted certiorari, and eventually reversed and remanded the cases in 2013.[20]

So, after five years, everything started all over.[21] The Plaintiffs are divided into three groups: the FTC, the Direct Purchaser Class Plaintiffs, and the Retailers.[22] The Direct Purchaser Class Plaintiffs and the Retailers constitute the Private Plaintiffs. All of the Plaintiffs allege that the Defendants violated federal ***antitrust law***.[23] The Defendants now move for summary judgment on various grounds.

II. Legal Standards

A. Daubert Motions

HN1[] *Federal Rule of Evidence 702* governs the admission of expert opinion testimony. Pursuant to that rule, before admitting expert testimony a court must consider: (1) whether the expert is competent to testify regarding the matters he intends to address; (2) whether the methodology used to reach his conclusions is sufficiently reliable; and (3) whether the testimony is relevant, in that it assists the jury to understand the evidence or determine a fact **[*26]** in issue.[24] In ruling on the admissibility of expert testimony, "[t]he focus must be 'solely' on the expert's 'principles and methodology, not on the conclusions that they generate.'"[25] If the expert predicates his testimony on an assumption that is belied by the evidence, the expert's testimony is properly excluded.[26] The party offering the expert's testimony has the burden to prove it is admissible by a preponderance of the evidence.[27]

B. Summary Judgment

---

[18] *In re Androgel Antitrust Litig. (No. II), 687 F. Supp. 2d 1371 (N.D. Ga. 2010)*. The Court also dismissed the Private Plaintiffs' per se claims, and later granted the Defendants' motion for summary judgment on the "sham litigation" claims of the Private Plaintiffs. *In re Androgel Antitrust Litig. (No. II), 888 F. Supp. 2d 1336 (N.D. Ga. 2012)*.

HN2[] Summary judgment is appropriate only when the pleadings, depositions, and affidavits submitted by the parties show no genuine issue of material fact exists and that the movant is entitled to judgment as a matter of law.[28] The court should view the evidence and any inferences that may be drawn in the light most favorable to the nonmovant.[29] The party seeking summary judgment must first identify grounds to show the absence of a genuine issue of material fact.[30] The burden then shifts to the nonmovant, who must go beyond the pleadings and present affirmative evidence to show that a genuine issue of material fact does exist.[31] "A mere 'scintilla' of evidence supporting the opposing party's position will not suffice; there must be a sufficient showing **[*27]** that the jury could reasonably find for that party."[32]

III. Discussion

The FTC and the Private Plaintiffs allege that the Defendants violated federal ***antitrust law*** by entering into the reverse settlement agreements. HN3[] *Section 1 of the Sherman Act* states that "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal."[33] *Section 2* of the Sherman Act likewise prohibits agreements to monopolize trade.[34] And *Section 5* of the Federal Trade Commission Act states that "unfair methods of competition" are illegal,[35] a prohibition which has long been held to encompass the violations of the Sherman Act.[36] Thus, the different claims can be analyzed together.

A. Daubert Motions

1. Jack Goldstein

Solvay and Actavis move to exclude the testimony of Jack Goldstein. The Private Plaintiffs will call Goldstein to testify at trial as to how a reasonable and competent patent attorney would have advised litigants in Solvay's or the Generics' positions at the time they settled the underlying patent litigation on (1) the likelihood of success in the litigation; (2) the likely timing of **[*28]** the litigation's resolution if the parties had not settled; and (3) each of the

We adhere to our former rulings.").

parties' likely litigation costs had they not settled.[37] The Defendants argue that Goldstein is not qualified to give these opinions, and that his methodology is unreliable. Both arguments are without merit.

The Defendants challenge Goldstein's qualifications, arguing that he does not have the requisite firsthand experience to properly assess the likely outcome, cost, or timing of the litigation. But the Defendants mistakenly argue that in order to testify about these issues, Goldstein needs to have recent, repeated, and specialized experience litigating patent cases arguing the specific legal and factual issues that were at issue in the underlying patent litigation. Goldstein does not need such specialized experience at all. "It is not necessary that the witness be recognized as a leading authority in the field in question . . . . Gaps in an expert witness's qualifications or knowledge generally go to the weight of the witness's testimony—not its admissibility."[38] Further, Goldstein is testifying as to what a reasonable and competent patent attorney would have thought at the time of the settlements. The question, **[*29]** therefore, is whether Goldstein has experience as a reasonable and competent patent attorney.[39]

There can be no doubt that the answer to that question is yes. Goldstein has had a long and distinguished career in the field of patent law. He has studied, interacted with, and litigated patent issues for fifty years.[40] After earning his law and engineering degrees, Goldstein began his legal career as a clerk for a judge on the U.S. Court of Customs and Patent Appeals, one of the predecessor courts to the Federal Circuit.[41] He then went on to work for a law firm specializing in intellectual property for almost thirty years, during which time he also taught patent and copyright law as an adjunct professor at South Texas College of Law in Houston.[42] After leaving the firm in 1997, Goldstein became president of an intellectual property holding company, during which time he enforced the company's IP rights through patent litigation multiple times.[43] Goldstein now serves as a mediator, arbitrator, counsel, and expert in intellectual property matters.[44] In addition, he serves or has served in numerous national intellectual property **[*30]** law professional groups, including as President of the American Intellectual Property Law Association.[45] The experience the Court lists here is only a fraction of that listed on Goldstein's *curriculum vitae*. Goldstein clearly "possess[es] skill or knowledge greater than the average layman,"[46] and is qualified to testify as to what a reasonable and competent attorney would have considered the likely outcome, length, and cost of pursuing the underlying litigation to a complete and final end.

The Defendants also seek to exclude Goldstein's testimony on the grounds that his methodology is unreliable. First, the Defendants argue that Goldstein had no methodology at all for his opinion that a reasonable and competent patent attorney would have advised Solvay that it had a 20% chance of winning the litigation. This is incorrect.

[46] *Waldorf v. Shuta, 142 F.3d 601, 625 (3d Cir. 1998)* (quoting *Aloe Coal Co. v. Clark Equip. Co., 816 F.2d 110, 114 (3d Cir.1987))*.

Goldstein began his analysis by using two studies available at the time of the settlement to assess what the average outcomes were in patent cases involving a generic defendant.[47] Using these studies, it is Goldstein's opinion that on average a brand manufacturer plaintiff would have about a 25-30% chance of winning a Hatch-Waxman patent infringement case. **[*31]** [48] Goldstein then examined the merits of the underlying patent litigation in this case to determine whether Solvay's position was stronger or weaker than the average Hatch-Waxman plaintiff.[49] Goldstein found that it was weaker than the average, although not by a lot. Goldstein estimated that a reasonable and competent patent attorney would have discounted Solvay's chances of success by about 10%, meaning that it would have had between a 15-20% chance of succeeding in the underlying litigation.[50] Goldstein clearly has a methodology, even if the Defendants believe it to be a weak one.

Similarly, Goldstein's opinions on the merits, cost, and timing of the litigation are reliable enough to be put to a jury. Although the Defendants argue that his views on the law are unreliable because they are incorrect, that is something on which reasonable and competent patent attorneys can disagree. Indeed, the only people who can say with true 100% certainty what the law is are the Justices of the United States Supreme Court. Further, while using survey data and the Court's statements to estimate cost and timing are not foolproof, they are reliable enough for reasonable jurors to consider. The Defendants' **[*32]** arguments basically boil down to the fact that they disagree with Goldstein's opinions, not their reliability. Such arguments are better addressed through the traditional means of "vigorous cross-examination, presentation of contrary evidence, and careful instruction on the burden of proof."[51] For these reasons, the Defendants' motion to exclude Goldstein's testimony is denied.

2. James Bruno

The Defendants also seek to exclude testimony of the Plaintiffs' expert James Bruno. In particular, the Defendants seek to exclude Bruno's opinions and testimony on the valuation of the Backup Manufacturing Agreement ("BMA") between Solvay and Par/Paddock, including whether Solvay's compensation to Par/Paddock was fair value for services or constituted a large and unjustified payment. The Court agrees, and the Plaintiffs concede, that Bruno does not offer a quantitative valuation of the BMA.[52] As such, Bruno does not and cannot offer testimony as to a specific monetary value for the BMA. To the extent that other experts assign one to the BMA based on Bruno's testimony, such testimony would be inappropriate and should be excluded.

However, the Defendants are incorrect in saying that all of Bruno's testimony **[*33]** regarding the BMA should be excluded. Although Bruno does not offer a specific monetary value to the BMA, such testimony is not necessary to show that a payment is "large and unjustified" under *Actavis*. As discussed later in this Opinion, the key inquiry in determining whether the reverse payment settlements violated the antitrust laws is whether they were entered into for the purpose of avoiding the risk of competition. Bruno's other testimony regarding the BMA, including his opinions that the BMA was out of step with industry practice and the Generics' regular business practices, is certainly relevant to answering that question.[53] Thus, while Bruno's testimony cannot support a specific, monetary valuation for the purpose of mathematically comparing the value of services, his testimony is relevant to answering what the "value" of the settlement was to the Defendants, whether its value was actually in the services provided, or in avoiding the risk of competition. On those grounds, Bruno's testimony would be helpful to the jury, and is allowed.

B. Antitrust Conspiracy

Turning now to the summary judgment motions, Actavis first moves for summary judgment on the theory that the Plaintiffs **[*34]** have failed to demonstrate that Actavis conspired to restrain trade.[54] ***HN5***[] Under the Sherman Act, *Section 1* claims and *Section 2* conspiracy to monopolize claims "require the same threshold showing — the existence of an agreement to restrain trade."[55] A written contract satisfies this requirement "only if it embodies an agreement to unlawfully restrain trade."[56]

Actavis argues that the settlement agreements do not meet this standard because "they evince no agreement or understanding by [Actavis] to 'delay its entry' in exchange for a share of Solvay's monopoly profits . . ."[57] Actavis cites a number of cases that find that the mere existence of a contract between two parties is not sufficient to establish a conspiracy between them.[58] In those cases, however, the contracts were merely *indirect* evidence of a conspiracy from which the factfinder could infer an agreement to violate the antitrust laws. Finding a conspiracy on such *Indirect* evidence raises the concern that "contractual partners would potentially be on the hook for any future conduct the other party engages in under color of the contract."[59]

But that concern is not present in cases with *direct* evidence, such as this one. ***HN6***[] "Direct evidence of a conspiracy **[*35]** 'obviates the need' for evidence that excludes the possibility of independent action."[60] In this case, the settlement agreements specifically address the conduct the Plaintiffs argue is unlawful. The parties negotiated and agreed that in exchange for dropping the patent litigation, providing some services, and delaying generic introduction until 2015, the Generics would receive compensation.[61] Whether that common objective — dropping the patent litigation in exchange for compensation — was an illegal restraint of trade is a separate question. But if it was, then the settlements are clear, direct evidence of an agreement to unlawfully restrain trade.[62] Not only is there enough evidence for a jury to find that there was an agreement, it is doubtful that a reasonable jury could find otherwise. Therefore, Actavis' motion for summary judgment on the issue of conspiracy is denied.

C. Anticompetitive Effect

[62] *Wellbutrin Summary Judgment, 133 F. Supp. 3d at 770* (finding settlement agreement to be direct evidence of conspiracy where manufacturer was involved in settlement negotiations, provided sublicenses, and waived its right to launch an authorized generic).

Having disposed of Actavis' conspiracy argument, the Court now turns to what has been the central issue in this case all along: whether the reverse settlement agreements were unlawful.[63] ***HN7***[] The antitrust laws prohibit conduct that is "unreasonable and anticompetitive." **[*36]** [64] "A restraint is unreasonable if it has an adverse impact on competition and cannot be justified as a procompetitive measure."[65] Usually this is determined by balancing the effects under the test known as the "rule of reason." "[T]he rule of reason standard hinges the ultimate legality of a restraint on whether the plaintiff has demonstrated an anticompetitive effect which is not offset by a need to achieve a procompetitive benefit or justification."[66] Sometimes, however, conduct is so blatantly anticompetitive that courts have found it to be illegal *per se*.[67]

When this case was before the Supreme Court on appeal, the FTC and the Defendants took starkly opposing views on the question of the settlements' effect on competition. The Defendants argued that the settlements were not anticompetitive because they did not delay generic entry past the life of the '894 patent. In other words, as long as the '894 patent would have independently blocked generic entry, the settlements could not possibly be anticompetitive. If anything, the settlements should be considered procompetitive by allowing entry earlier than the expiration of patented exclusivity. The FTC, by contrast, took the view that reverse payment settlements **[*37]** are by their very definition anticompetitive, and should be subject to the per se rule of illegality, because they explicitly and openly involve sharing the profits of a monopoly to buy off competitors and delay generic entry in order to restrict competition.

The Supreme Court took a middle road between these two extremes. While recognizing that a valid patent certainly would have excluded generics from the market, the Court noted that "an invalidated patent carries with it no such right. And even a valid patent confers no right to exclude products or processes that do not actually infringe."[68] Thus, the existence of a patent does not necessarily say anything about whether competition was restricted.

At the same time, the Court said abandoning the rule of reason in favor of the FTC's *per se* approach was not appropriate, because "the likelihood of a reverse payment bringing about anticompetitive effects depends upon its size, its scale in relation to the payor's anticipated future litigation costs, its independence from other services for which it might represent payment, and the lack of any other convincing justification."[69] Instead, the Court held that when it comes to scrutinizing reverse **[*38]** payment settlements, the "FTC must prove its case as in other rule-of-reason cases."

The parties disagree about what constitutes an anticompetitive harm and what the Plaintiffs must demonstrate to prove it. The Defendants argue that the relevant anticompetitive harm is an *actual* harm to consumers in the form of higher prices through the delay of generic entry into the market. Thus, the Defendants argue the Plaintiffs must show that the settlements *actually* caused a delay in the sale of generic versions of AndroGel.[70] But as the FTC

---

[63] This is also why this case is different in that there is direct evidence of an agreement to restrain trade. Unlike other cases, where it is "rare. . .that a plaintiff can establish a conspiracy by showing an explicit agreement," *Gulf States Reorganization Group, Inc. v. Nucor Corp., 822 F. Supp. 2d 1201, 1218 (N.D. Al. 2011)*, the parties here explicitly and openly agreed to the course of conduct. The real question is whether that conduct was illegal.

[64] *Texaco Inc. v. Dagher, 547 U.S. 1, 5, 126 S. Ct. 1276, 164 L. Ed. 2d 1 (2006)*.

[65] *Seagood, 924 F.2d at 1569*.

[66] *Id.* (citing *Kestenbaum v. Falstaff Brewing Corp., 575 F.2d 564, 571 (5th Cir. 1978))*.

[67] *Id. at 1567* ("Some violations of *section 1*, however, are illegal *per se* because of their pernicious effect on competition and lack of any redeeming virtue . . .") (quotations omitted).

[68] *Actavis, 570 U.S. at 147* (emphasis original).

[69] *Id. at 159*.

points out, ***HN8***[] the Supreme Court made clear in *Actavis* that avoiding even the possibility of competition, however small, is itself an antitrust violation.[71] Rather than having to litigate the merits of any underlying patent suits or establish a theory of causation, the Supreme Court said that courts can look to the "size of the payment . . . [to] be able to assess its likely anticompetitive effects . . . ."[72] Where the size of a reverse payment "reflects traditional settlement considerations, such as avoided litigation costs or fair value for services, there is not the same concern that a patentee is using its monopoly profits to avoid the risk of patent invalidation **[*39]** or a finding of noninfringement."[73] But where a payment is "large and unjustified" by these traditional settlement concerns, it is likely directed toward avoiding the risk of competition. Thus, if the settlement payments are shown to be larger than what could reasonably be expected to cover such traditional settlement concerns as future litigation costs or the value of services rendered, the Plaintiffs will have satisfied their burden in showing that the settlements violated the antitrust laws.[74]

In this case, the Defendants entered into two separate settlement agreements.[75] The first, between Solvay and Actavis, provided that Solvay would drop its patent claims against Actavis and pay Actavis 60 to 70% of AndroGel's profits in exchange for co-promoting AndroGel and delaying generic entry until 2015.[76] The second, between Solvay, Paddock, and Par, likewise had Solvay drop its patent claims and pay $12 million to Par per year in exchange for a delay in generic entry until 2015, as well as co-promotion and manufacturing help from Paddock and Par.[77] Clearly, Solvay agreed to pay the Generics significant sums of money. The only **[*40]** remaining question, therefore, is whether these payments were "large" relative to the services provided or the cost of avoided litigation.

---

[70] *See* Defs.' Mot. for Summ. J., at 5-9. *See also* Solvay's Mot. for Summ. J. as to the Par/Paddock Settlement, at 19-27 [FTC Doc. 621, MDL Doc. 1551]; and Par/Paddock's Mot. for Summ. J., at 23-24 [MDL Doc. 1559].

[71] *Actavis, 570 U.S. at 157* ("The owner of a particularly valuable patent might contend, of course, that even a small risk of invalidity justifies a large payment. But, be that as it may, the payment (if otherwise unexplained) likely seeks to prevent the risk of competition. And, as we have said, that consequence constitutes the relevant anticompetitive harm."). Candidly, it seems unlikely that many reverse payments will survive such scrutiny. Virtually all settlements are, to some extent, designed to avoid the risk of competition. *See also* *id. at 173* (Roberts, C.J. dissenting) (Under the majority's opinion, "taking away any *chance* that a patent will be *invalidated* is itself an antitrust problem . . . .") (emphasis in original).

[72] *Id. at 158*.

[73] *Id. at 156*.

[74] *See* *In re Lipitor Antitrust Litigation, 868 F.3d 231, 251-52 (3d Cir. 2017)* (articulating a similar standard at the motion to dismiss stage). Solvay argues that this amounts to a "quick look" test, which the Supreme Court expressly rejected in *Actavis, 570 U.S. at 158-59*, because all the FTC has to do is show that Solvay made a reverse payment. See Solvay Reply in Supp. of Mot. for Summ. J., at 9 [FTC Doc. 681]. But under this standard, the FTC has to prove much more than the simple fact that a reverse payment occurred; it also has to prove that the payment was "large" relative to traditional settlement concerns. *See* *In re K-Dur Antitrust Litig., No. 01CV1652SRCCLW, 2016 U.S. Dist. LEXIS 22982, 2016 WL 755623, at *12 (D.N.J. Feb. 25, 2016)* ("the burden must be on Plaintiffs to show that the settlement delayed the generic company's entry onto the market, that the brand-name company paid the generic company consideration of some kind, and that the consideration exchanged in the settlement exceeded the estimated cost of litigation and the costs of other services and products, in order to establish a prima facie case.").

[75] The two settlements actually contained multiple agreements within them. For example, the Solvay-Actavis settlement included three agreements: a Final Settlement and Release Agreement, a Patent License Agreement, and a Co-Promotion Agreement. FTC's SAMF ¶ 172 [FTC Doc. 689]. The parties do not argue that these should be considered separately, so for simplicity's sake, the Court will refer to the constituent agreements collectively, unless otherwise noted.

[76] FTC's SAMF ¶¶ 178-79, 181-82 [FTC Doc. 689]. Beginning at 60% in 2006, Actavis' share of AndroGel's profits was to increase over time to 70% by 2012. *Id.* at ¶181.

[77] *Id.* at ¶¶ 307, 308

According to the Plaintiffs, Solvay determined that it would be much better off if the Generics delayed entering the market until 2015.[78] However, Solvay also figured out that the Generics would see a loss in value of generic entry compared to continuing the litigation if entry was delayed that long.[79] This made it unlikely that the Generics would agree to such a settlement without added incentives.[80] Consequently, Solvay offered the Co-Promotion Agreements ("CPAs") and Backup Manufacturing Agreement ("BMA") in order to entice the Generics to settle their claims.

The Plaintiffs present significant evidence from the negotiation of the settlements to suggest that the services were merely an afterthought to the Defendants, the proverbial lipstick on the pig that was the delay in generic entry.[81] But even if taken at face value, the Plaintiffs' experts opine that Solvay vastly overpaid for the services it was receiving.[82] The Plaintiffs' experts also will testify that the side agreements did not make much business sense on their own.[83]

[*41] The Defendants respond in two ways. First, they argue that the FTC failed to show that the settlements *actually* delayed entry.[84] That may well be true, but that is not what the FTC needs to prove in order to show an antitrust harm. As discussed above, the FTC only needs to prove that the Defendants entered into the settlements in order to avoid the risk of a competitive market.

The Defendants' second argument focuses only on Solvay's settlement with Par and Paddock. The Defendants argue that the Plaintiffs have failed to show that the Par/Paddock settlement was "large and unjustified" because the Plaintiffs did not supply their own valuation of some of the services in those contracts. While the Plaintiffs' expert valued the CPA between Solvay and Par/Paddock, the Defendants point out that the Plaintiffs' expert never quantitatively valued the BMA, which the Defendants argue must be considered jointly with the CPA. Without their own valuation of the BMA, the Plaintiffs must rely on the defense expert's valuation of the CPA in order to show that the agreements were out of step with the value of the services provided. This, the Defendants argue, inappropriately shifts the burden onto them.

However, ***HN9***[] comparative **[*42]** valuations of services are not a *necessary* requirement to show that a reverse payment is "large and unjustified." Helpful, certainly, but not necessary. The size of the payment is merely the Supreme Court's proxy for reaching the ultimate question: whether the agreement was entered into for the purpose of avoiding the risk of competition. If a settlement was agreed to for that purpose, it is "large and unjustified."

As discussed above, the Plaintiffs have provided evidence to suggest that the BMA and CPA in the Par/Paddock settlement were merely vehicles to facilitate payment to the Generics for delaying entry. In addition to the size of the settlement — $12 million per year — the Plaintiffs' experts opine that the BMA was out of step with industry practice and the Generics' regular business practices.[85] In particular, the Plaintiffs' experts criticize the loose oversight over Paddock, the lack of any assurance that Paddock could meet Solvay's manufacturing needs, Solvay's inability under the contract to cancel if Paddock did not meet its manufacturing needs, and the fact that Paddock was unable to manufacture AndroGel for the vast majority of the agreement's term.[86] In addition, there **[*43]** is evidence that

---

[83] *Id.* at ¶¶ 232-34.

[84] Solvay's Reply in Support of its Mot. for Summ. J., at 3 [FTC Doc. 681].

[85] FTC's SAMF at ¶¶ 278-81, 290-93 [FTC Doc. 689].

the Defendants agreed to the reverse payment amount before negotiating the specifics of any services Par/Paddock were going to render.[87] A reasonable jury could infer from such evidence that the BMA and CPA were merely post-hoc justifications when the true purpose of the settlement was to avoid the risk of competition. This evidence is enough to shift the burden to the Defendants to justify the payments as being procompetitive.

Solvay's counsel suggested at oral argument that one way the Defendants plan to justify the settlements as procompetitive is to argue that the patents were valid and infringed; in other words, the settlements were procompetitive because they allowed generic entry earlier than the patent would have allowed. There are two ways to make this argument. One way would be to provide evidence that shows what Solvay *thought* at the time about the strength of its patents. The other is to argue that Solvay would have won the underlying patent litigation.

While the former is acceptable, the latter is problematic for two reasons. First, as discussed above, the actual validity of the patent is irrelevant to the question of whether the reverse payments violated **[*44]** the antitrust laws. Paying the Generics to stay out of the market for the purpose of avoiding the risk of competition is an antitrust harm, *regardless* of whether or not the patent is actually valid and infringed.[88] Put another way, even if the patent was valid and infringed, the Defendants took away the opportunity to know that for sure by settling before the end of the litigation. If they did so for the purpose of avoiding the risk that a court would find otherwise, however small a risk they considered it to be, that is an antitrust violation under *Actavis*.[89]

Second, for reasons explained more fully elsewhere in this Opinion, even if the actual validity of the patent was relevant, determining the ultimate outcome of the underlying patent litigation is both fundamentally unknowable and procedurally impossible. The underlying litigation was assigned to me. There is no one who can say how I would have ruled on the summary judgment motions, how I would have construed the claims, and whether I would have found infringement. There is no one who can say how the Federal Circuit would have ruled upon any unknowable judgment that may have been rendered. In Actavis, the Supreme Court said "it **[*45]** is normally not necessary to litigate patent validity to answer the antitrust question (unless, perhaps, to determine whether the patent litigation is a sham...)."[90] I will accept the Court's invitation to "structure [this] antitrust litigation so as to avoid, on the one hand, the use of antitrust theories too abbreviated to permit proper analysis, and, on the other, consideration of every possible fact or theory irrespective of the minimal light it may shed on the basic question—that of the presence of significant unjustified anticompetitive consequences."[91] Any evidence or argument on actual outcome would be far too speculative to aid a jury in making a reasoned decision. Thus, any arguments based on the actual validity or invalidity of the patent, or about what would have happened in the underlying patent litigation, are inappropriate and will be disallowed regarding the antitrust violation question.

In sum, the Court finds that the Plaintiffs have provided enough evidence for a reasonable jury to find that, by overvaluing these side agreements in the settlement, the Defendants were able to reach agreements that left them better off than any party would have been had the Generics won **[*46]** the patent litigation. A reasonable jury could find that the settlements were structured so as to be more beneficial to everyone involved than a competitive market; everyone, that is, except the consumer. Settling for that purpose is an antitrust harm. Of course, the

[87] *Id.* at ¶¶ 131-33, 135, 139.

[88] *Actavis, 570 U.S. at 157* ("The owner of a particularly valuable patent might contend, of course, that even a small risk of invalidity justifies a large payment. But, be that as it may, the payment (if otherwise unexplained) likely seeks to prevent the risk of competition. And, as we have said, that consequence constitutes the relevant anticompetitive harm.").

[89] *Id. at 173* (Roberts, C.J. dissenting) (Under the majority's opinion, "taking away any *chance* that a patent will be invalidated is itself an antitrust problem . . . .") (emphasis in original).

[90] *Id. at 157*.

[91] *Id. at 159-60*.

Defendants may still justify the settlements by demonstrating that the payments were for "traditional settlement considerations, such as avoided litigation costs or fair value for services,"[92] but they may not justify the payments on the grounds that the patent was valid and infringed because such an argument is irrelevant and, in any case, impossible to know without relitigating to their conclusion the underlying patent cases. I do not plan to do that. Because the Plaintiffs have shown enough to satisfy their *prima facie* burden, the Defendants' motions for summary judgment on these issues are denied.

D. Antitrust Standing

HN10[] Unlike the FTC, which only needs to prove an antitrust violation, private plaintiffs asserting a private right of action under the *Clayton Act* must also establish antitrust standing.[93] This is separate from Article III standing.[94] "Harm to the antitrust plaintiff is sufficient to satisfy the constitutional standing **[*47]** requirement of injury in fact, but the court must make a further determination whether the plaintiff is a proper party to bring a private antitrust action."[95]

HN11[] The Eleventh Circuit employs a two-prong test for antitrust standing. "First, the plaintiff must establish that it has suffered an antitrust injury."[96] This means the plaintiff must have suffered an "injury of the type that the antitrust laws were intended to prevent and that flows from that which makes the defendants' acts unlawful."[97] "The injury should reflect the anticompetitive effect . . . of the violation . . . ."[98] "Second, the plaintiff must be an 'efficient enforcer' of the antitrust laws."[99] The Defendants move for summary judgment only on the first prong.

In this case, the harm "that flows from that which makes the defendants' acts unlawful" — the avoidance of the risk of competition — is higher drug prices. The Private Plaintiffs must therefore prove that they suffered an injury in the form of higher drug prices because of the delay in generic entry caused by the reverse payment settlements. The Private Plaintiffs have offered, at various times, three alternative theories for why the Generics **[*48]** would have entered the market prior to 2015: (1) the Generics ultimately would have prevailed in the underlying patent litigation; (2) the Generics would have come to the market "at risk" during the patent litigation; and (3) the parties would have reached an alternative settlement with an earlier entry date than 2015.

1. Success on the Patent Merits and At-Risk Entry

During oral argument, the Private Plaintiffs disavowed the argument that they would have won the underlying patent litigation, leaving only the latter two theories to show causation. However, the Private Plaintiffs' at-risk theory of causation still ultimately depends on showing that the Generics would have won the underlying patent litigation. The

Wellbutrin district court stated this point clearly. "The existence of a valid and uninfringed patent would interfere with the plaintiffs' chain of causation: a valid patent independently preclude[s] competition apart from any agreement and an 'at risk' launch is unlawful absent a later finding of patent invalidity or non-infringement."[100] In other words, if the patent was valid, any at-risk launch would have been unlawful if it infringed on the patent, and the law will not allow **[*49]** the Private Plaintiffs to use illegal behavior as a link in their chain of causation.[101] At least three other courts have reached similar results.[102] In order to show that the Generics could have successfully — i.e., legally — launched at-risk, the Private Plaintiffs would therefore need to show that the patent would ultimately have been found either invalid or uninfringed in the underlying patent litigation.

This raises again the central problem raised by *Actavis*: how to determine what the outcome of the underlying patent litigation would have been in a way that is manageable. Do the parties need to accomplish what Judge Carnes called the "turducken task" of litigating "a patent case within an antitrust case about the settlement of the patent case?"[103] Alternatively, can they offer experts to testify as to what would have happened in the but-for world, neatly summarized into each party's percent chance of winning?[104] Is it even possible to do either? It is the Court's opinion that it is not. At least in relation to this particular case, arguments which depend on determining what the ultimate outcome of the underlying patent litigation would have been are simply too procedurally **[*50]** burdensome and speculative to serve as valid theories of causation under *Actavis*. Consider for a moment the particularly thorny issues that would be raised were the Court to consider such a theory at trial. Would the Private Plaintiffs be allowed to make any argument that was potentially available to the Generics, or would they be limited to the arguments the Generics had actually made up to the point the parties settled? The Defendants at various points in their papers assume the latter, but the underlying litigation never came to a final, preclusive decision. It did not even reach summary judgment. Who knows what arguments may have been raised as the litigation went forward?

Further, is the outcome of the underlying litigation a question of fact or law, and who would decide what the outcome would have been — the Court or the jury? If the latter, how could a jury determine what the outcome of a bench trial would have been? Unlike the issue of an antitrust violation, a jury cannot estimate the likelihood of the Generics' success on the patent merits by simply looking to the size of the reverse payment as a proxy.[105] Instead, a jury would have to answer that question by determining **[*51]** how the judge — in this case, me — would have found on the merits. Thus, when combined with the standard of proof in this case, this means that to survive summary judgment, the Private Plaintiffs would have to provide enough evidence to show that a reasonable jury could find it more likely than not that a judge would have found it more likely than not that the Generics did not infringe or that the '894 patent was invalid.[106] On top of that, a jury would have to determine how the judge would have decided various legal issues, including claim construction and summary judgment. If that sounds ridiculously unwieldy, that's because it is. And even if a jury could comprehend that standard, how would the inevitable appeal be handled? Would the case be split, with the antitrust issues going to the Eleventh Circuit, but the patent issues

[105] For a discussion of why the size of the reverse payment does not serve well as a proxy for what the parties thought of the merits, *see Wellbutrin Appeal, 868 F.3d at 167-69*.

[106] *Id. at 169* (using the preponderance of the evidence standard with regard to the patent merits).

going to the Federal Circuit? Clearly, actually litigating the underlying merits would be a procedural and administrative nightmare.

But let us assume for a moment that the procedural issues could somehow be worked out. At least with regard to this case, it is impossible to say what the court would have actually done in the underlying case. Any experts who testify otherwise, **[*52]** like the expert relied upon in *Wellbutrin*,[107] are coming up with probabilities out of whole cloth. Unlike the antitrust issues, where we can assume that the parties would have acted in their best economic interest, such assumptions cannot necessarily be made about courts and juries. One court is not the same as another. Much of a patent case depends on how a claim is construed, and no one can say how I would have construed the claims at issue. Nor can one simply estimate what would have happened based on other cases. Every patent case is inherently different, with numerous variable affecting the outcome. And the issue here is not what would have happened in a generic case, but what would have happened in *this* case.

By contrast, most of the cases which have considered this question and decided otherwise have differed from this case in at least one of two ways. First, at least two of those cases relied upon what this Court views was an improper causation standard, finding that the plaintiffs only needed to show that the generics *could* have won, not that they *would* have won.[108] Obviously it is much easier to provide substantive proof of what could have happened as opposed to what would have **[*53]** happened. Second, the experts offering testimony in those cases had at least some concrete outcome in the underlying litigation on which to base their opinions. For example, in the *Lidoderm* litigation, the defendants had actually gone to trial on the case, but settled before the judge issued his opinion.[109] Thus, the expert was able to rely on statements made by the judge, as well as his claim construction order.[110] And in *Wellbutrin*, where there were two underlying patent suits, the court in one of them had also entered claim construction and summary judgment orders (the plaintiffs did not argue the generic could have won the other).[111] In this case, however, the Court never entered a claim construction or summary judgment order in the underlying patent litigation in this case, let alone actually tried the issues. Any opinion that would purport to state how a particular piece of litigation would turn out without any evidence from the court in question on how it would rule can only be characterized as pure speculation. Such attenuated evidence cannot possibly serve as the basis of a reasonable decision by a jury.

Although this eliminates two of the Private Plaintiffs' theories of causation, as well as a possible procompetitive justification for the settlements, the Court feels it is justified in light of *Actavis*, the other theories available to the parties, and the desire for a logical congruency of outcome. First, as noted earlier, Justice Breyer explicitly states that:

> ***HN12***[] [a]s in other areas of law, trial courts can structure antitrust litigation so as to avoid, on the one hand, the use of antitrust theories too abbreviated to permit proper analysis, and, on the other, consideration of every

[107] *Wellbutrin Appeal, 868 F.3d at 169*.

[108] *See* *In re Solodyn (Minocycline Hydrochloride) Antitrust Litig., No. CV 14-MD-02503, 2018 U.S. Dist. LEXIS 11921, 2018 WL 563144, at *14 (D. Mass. Jan. 25, 2018)*; **[*54]** *United Food & Commercial Workers Local 1776 & Participating Employers Health & Welfare Fund v. Teikoku Pharma USA, Inc. (Lidoderm), 296 F. Supp. 3d 1142, 2017 WL 50682533, at *5 (N.D. Cal. 2017)*. The Court views this standard as inappropriate because evidence that the Generics *could* have won gets us no closer than we are now to answering the question of whether the Generics *would* have been able to enter the market in a but-for world, or if a valid patent *would* have prevented them.

[109] *Lidoderm, 74 F. Supp. 3d 1052, 1063 (N.D. Cal. 2014)*.

[110] *Lidoderm, 296 F. Supp. 3d 1142, 2017 WL 50682533, at *28-29 (N.D. Cal. 2017)*.

possible fact or theory irrespective of the minimal light it may shed on the basic question—that of the presence of significant unjustified anticompetitive consequences.[112]

Admittedly, Justice Breyer was speaking only in the context of an antitrust violation, not causation. But his concern for the ability of trial courts to manage the cases before them extends here.

Second, not all theories of causation are now out of bounds for the Private Plaintiffs. As discussed in more detail below, they still have the ability to show that the Defendants would have reached alternative, legal **[*55]** settlements that would have allowed for earlier generic entry without the reverse payments. Indeed, this theory is less attenuated than any theory based on the outcome of the underlying patent litigation because a factfinder can rely on the assumption that the parties are economic actors who would have done what was in their best financial interest.

Lastly, precluding such a basis of causation avoids potentially inconsistent outcomes. As discussed above, the FTC does not need to prove causation to win its case. The Supreme Court was clear, for better or worse, that it merely needs to prove that the Defendants entered into the settlements for the purpose of avoiding the risk, however small, of competition. Consider the incongruity, then, if the FTC should win its case on those grounds, while the Private Plaintiffs lose because the Defendants are able to show the patent would have been declared valid and infringed. How can the Defendants both have a valid patent, and commit an antitrust violation? Such an outcome makes no sense.

The Court recognizes that this solution is not the most appetizing, but it benefits from the sheer distastefulness of the other options available. To quote Churchill, **[*56]** "[i]t has been said that democracy is the worst form of Government except all those other forms that have been tried from time to time."[113] The same is true here. The Court can simply see no way of entertaining arguments that purport to say what the outcome would have been in the underlying patent litigation without relying on wholly speculative evidence or untying a Gordian knot of procedural problems. With that in mind, it is the Court's opinion that such arguments are simply unworkable, and should not be considered further in this litigation.

2. Alternative Settlement Scenario

The Private Plaintiffs' remaining causation theory is that but-for the reverse payment the Defendants would have come to an alternative, legal settlement that would have allowed for generic entry earlier than 2015. In Actavis, the Supreme Court endorsed patent litigation settlements that do not involve reverse payments.[114] The Defendants argue that this alternative settlement theory is ultimately dependent on the outcome of the patent merits because "if the '894 patent was valid and infringed, then Plaintiffs are complaining about the inability to buy an *infringing* product."[115]

This argument is unpersuasive. Unlike the at-risk theory **[*57]** of causation, the Private Plaintiffs are not arguing that they would have done something illegal. Instead, their theory is that Solvay, faced with the uncertain prospect of continuing the litigation and acting in its economic best interest, still would have granted the Generics a license to enter the market before the expiration of the patent. Without a payment, however, the Generics, if confident in their chances at trial and on appeal, would have required an earlier entry date than 2015, the entry date under the actual reverse settlement. Using leverage to negotiate an earlier settlement date is obviously legal. Further, focusing upon

[112] *Actavis, 570 U.S. at 159-60*.

[113] 444 Parl Deb HC (5th ser.) (1947) col. 207.

[114] *Actavis, 570 U.S. at 158* (Defendants "may, as in other industries, settle in other ways, for example, by allowing the generic manufacturer to enter the patentee's market prior to the patent's expiration, without the patentee paying the challenger to stay out prior to that point.").

[115] Solvay's Mot. for Summ. J., at 8 [Doc. 1566-1].

the difference between 2015 and a hypothetical earlier entry date results in the type of injury intended to be prevented by the antitrust laws as interpreted by the Supreme Court in *Actavis*. If the Private Plaintiffs can show that, but-for an illegal reverse payment intended to avoid the risk of a competitive market place, the Generics would have entered earlier, they will have shown they have suffered an antitrust injury.

Other courts have endorsed this approach. In *Wellbutrin*, the district court accepted the plausibility of an alternative settlement **[*58]** scenario, although it granted summary judgment to the defendants because the brand manufacturer had "expressly and unwaveringly refused to settle" without the allegedly anticompetitive provision of the actual settlement.[116] In *Lidoderm*, the court also found that the alternative settlement theory was cognizable, and found there to be sufficient evidence to submit the issue to a jury.[117] And in *Solodyn*, the district court also allowed the plaintiffs to proceed on an alternative settlement theory.[118]

In order to prove this theory, of course, the Private Plaintiffs must have evidence that an alternative settlement *would* have occurred in the but-for world. To do so, the Private Plaintiffs offer three expert opinions, as well as some direct evidence. The first, that of Jack Goldstein, thoroughly evaluates the merits of the underlying patent litigation, comparing it to the average patent case, and concludes that a reasonable and competent attorney would have advised Solvay and the Generics that Solvay had about a 20% chance of winning, if not less.[119]

Independently of Goldstein, the Private Plaintiffs' other two experts, Dr. Leffler and Prof. Elhauge, each reach their own conclusions on what the Defendants **[*59]** considered their chances to be.[120] Dr. Leffler looked to the terms of the actual settlement, and concluded that Solvay likely viewed its chances of winning to be at about 33%.[121] Likewise, Prof. Elhauge looked to the actual terms of the settlement agreement and determined that it would only have been economically rational for Solvay to agree to the actual settlements at issue if it believed its chances of winning were at best 48.8%.[122] This is consistent with the "Project Tulip" evidence which shows that Solvay's executives crafted the settlement with Actavis around a 50% chance of winning the patent litigation.[123]

With these expectations in mind, Dr. Leffler and Prof. Elhauge each agree that it would have been economically rational for Solvay to settle, even without a reverse payment. Using Goldstein's estimate of Solvay's chance of winning the litigation, Dr. Leffler concludes that the Defendants would have agreed to an alternative settlement that allowed for generic entry on January 1, 2008, while Prof. Elhauge concludes the Generics would have entered on May 22, 2009.[124] And using his own estimate of Solvay's belief about the strength of the patent, based upon the actual settlement, Dr. Leffler **[*60]** concludes that the Generics would have entered on October 1, 2010.[125] Under all of these scenarios, the Generics would have entered the market earlier than 2015.

[124] *Id.* at ¶¶ 15, 26.

[125] *Id.* at ¶ 14.

The Defendants argue that the Private Plaintiffs' evidence is not sufficient because they do not have actual, direct evidence that the Defendants ever negotiated a different date.[126] "Requiring such evidence, however, would be an almost impossible standard to require of Plaintiffs, given that this is a but-for scenario."[127] "Because this case is set in a but-for world, it is not surprising that no evidence shows that defendants were contemplating anything other than the actual settlement."[128] If Solvay and the Generics "were acting unlawfully to eliminate competition throughout their settlement negotiations, then it is unreasonable to expect a paper trail signifying rational, lawful business choices."[129] Any criticism the Defendants have of the experts' methodologies or conclusions are best handled through cross-examination and the production of contrary evidence.

The Defendants also mistakenly argue that Dr. Leffler's and Prof. Elhauge's models assume that a reverse payment always causes delay. Their models assume nothing of the sort. **[*61]** Rather, both experts use their experience and knowledge in the field to conclude that reverse payments cause delay, and they confirm that conclusion in their models addressing the specific settlement at issue in this case.

Indeed, such a conclusion is economically logical, especially at the causation stage, in which the Private Plaintiffs will have already proven that the purpose of the reverse payment was to avoid the risk of competition. It would make no sense for Solvay to pay the Generics tens of millions of dollars if it could get the Generics to enter on the same date without paying them all of that money. Nor would it make sense for the Generics to agree to delay entry for free if they could receive tens of millions of dollars to do the same thing. Solvay paid the Generics a lot of money for something, and if it was not for services or saved litigation costs, it is logical to conclude it was for delay.[130]

Lastly, Par/Paddock argue that even if the Private Plaintiffs prove their case as to the Actavis settlement, they cannot show causation regarding Solvay's settlement with Par/Paddock because Par/Paddock could not have entered before Actavis did.[131] But the fact that Actavis **[*62]** would have had to agree to a settlement before Par/Paddock could have does not vitiate causation, it merely adds another step. If the Private Plaintiffs can show that Solvay and Actavis would have settled earlier without a reverse payment, then they might also be able to show that Par/Paddock would have done so as well. And for all the reasons discussed above regarding the Actavis settlement, the Private Plaintiffs have produced evidence that indeed Par/Paddock and Solvay also would have settled earlier. For these reasons, the Court finds that the Private Plaintiffs have provided enough evidence for an alternative settlement theory of causation to survive summary judgment.

3. Lack of Injury Regarding AndroGel 1.62%

The final antitrust injury related argument involves AndroGel 1.62%. All of the Private Plaintiffs in this case are seeking damages regarding the original AndroGel formula, AndroGel 1%. However, one group of plaintiffs — the Retailers — is also seeking damages related to purchases of a newer formulation, AndroGel 1.62%.[132]

---

[126] Solvay's Mot. for Summ. J., at 33-34 [MDL Doc. 1566].

[127] *Solodyn, 2018 U.S. Dist. LEXIS 11921, 2018 WL 563144, at *21*.

[128] *Lidoderm, 296 F. Supp. 3d 1142, 2017 WL 5068533, at *34*.

[129] *Solodyn, 2018 U.S. Dist. LEXIS 11921, 2018 WL 563144, at *21*.

[130] Other courts have come to the same conclusion. *See, e.g., In re Niaspan Antitrust Litig., 42 F. Supp. 3d 735, 752 (E.D. Pa. 2014)* ("One can logically infer that, all else equal, with a [reverse payment], a generic would be willing to agree to a later entry date than it would otherwise agree to in order to settle a patent-infringement case.").

[131] Par/Paddock's Mot. for Summ. J., at 16-18 [MDL Doc. 1559].

[132] AndroGel 1.62% was developed in order to increase the ease of application and reduce drying time, thereby increasing patient satisfaction. *See* Solvay's Mot. for Summ. J., at 5 [MDL Doc. 1552].

AndroGel 1.62% was not introduced until 2011, five years after the challenged settlements.[133] It was developed in order to improve upon AndroGel 1%, namely **[*63]** by increasing the ease of application and reducing drying time, thereby increasing patient satisfaction.[134] When it was introduced, AndroGel 1.62% quickly became the leading testosterone replacement therapy.[135] Even after generic versions of AndroGel 1% were introduced to the market, consumers still continued to prefer AndroGel 1.62% by a wide margin despite its significantly higher price.[136]

The Retailers argue that the settlements delayed the launch of generic AndroGel 1% long enough that Solvay could "switch the market" to AndroGel 1.62%.[137] This argument can only work under one of two theories: either Solvay engaged in an anticompetitive "product hop," or AndroGel 1.62% is essentially the same product as AndroGel 1%. The Retailers are adamant that they are not pursuing a "product hop theory," so the Court need not address it.[138] As for the latter theory, there can be no doubt that AndroGel 1.62% is a different product than AndroGel 1%. AndroGel 1.62% is covered by eight different patents that do not cover AndroGel 1%.[139] This is further supported by the fact that, if the products were the same, one would expect consumers in a competitive market place to choose the less expensive of two identical **[*64]** products. But as mentioned above, even when faced with a fully competitive market after 2015 that includes AndroGel 1.62%, and branded and generic AndroGel 1%, consumers have still chosen the significantly higher priced AndroGel 1.62% over generic AndroGel 1% by a wide margin.[140]

In essence, then, the Retailers are arguing that the alleged delay in entry of one product caused them damages by forcing them to pay higher prices for a different, better product. This is the Retailer's "shifting the market" argument, meaning that the reverse settlements gave Solvay the time to "shift the market" to AndroGel 1.62%. But ***HN13***[] courts generally presume that the introduction of new, better products is a good thing for competition. "The attempt to develop superior products is . . . an essential element of lawful competition."[141] Plus, if the '894 patent was valid, the patent itself would have given Solvay the time to "shift the market" by introducing a new product. This is further proof that "shifting the market" is not, in and of itself, a problem.[142] Instead, the proper measure of injury is and must be the comparison between like-products. Given that AndroGel 1.62% and AndroGel 1% are different products, the Retailers **[*65]** cannot claim that they were injured by purchasing AndroGel 1.62% simply because that is what consumers wanted.

[139] Solvay's SMF ¶ 25 [MDL Doc. 1567-2].

[140] Solvay's Mot. for Summ. J., at 4 [MDL Doc. 1567-1].

[141] *Berkey Photo, Inc. v. Eastman Kodak Co., 603 F.2d 263, 286 (2d Cir. 1979)*.

[142] It can potentially be a problem if brand name manufacturers tweak a drug and pull the older version off the shelf just as a generic is about to enter the market. This is the "product hopping" referenced above. It is problematic because it extends a manufacturer's monopoly at the expense of consumer choice. Again, however, the Retailers were clear that they were not pursuing this kind of theory. But even if they were, such an argument would have failed because Solvay never pulled AndroGel 1% off the shelf.

Should the FTC successfully prove that the reverse payment settlements were anticompetitive and violated the antitrust laws, the FTC is seeking broad equitable relief, including preventing the Defendants from entering into any reverse payment agreements in the future, as well as compulsory generic licenses for AndroGel 1.62%.[143] The Defendants argue that these remedies are far too broad, and that they would inappropriately restrain lawful conduct.

But ***HN14***[] federal courts have extensive authority to order equitable relief in antitrust cases.[144] The goal of an equitable antitrust suit is not to simply punish past behavior, "nor is it merely to end specific illegal practices."[145] The goal is to "effectively pry open to competition a market that has been closed by defendants' illegal restraints."[146] In other words, the goal is to prevent anticompetitive activity in the future, and the courts have a wide range of means at their disposal to do so.[147] "[I]t is not necessary that all of the untraveled roads to that end be left open and that only the worn one be closed."[148] Sometimes, **[*66]** this may even mean that otherwise legal activity may have to be enjoined.[149] "The standard against which the order must be judged is whether the relief represents a reasonable method of eliminating the consequences of the illegal conduct."[150] Because the appropriate remedy fundamentally depends on the nature and scope of any wrongful conduct, it is premature to determine what may or may not be an appropriate remedy at this stage in the litigation, where there has not yet been a decision on liability.

IV. Conclusion

For the reasons stated above, Solvay's Motion for Summary Judgment on the FTC's Claims [FTC Doc. 620] is DENIED, Solvay's Motion for Summary Judgment as to the Par/Paddock Settlement [FTC Doc. 621, MDL Doc. 1551] is DENIED, Actavis and Actavis Holdco's Motion for Summary Judgment [FTC Doc. 625, MDL Doc. 1556] is DENIED, Solvay's Motion for Summary Judgment for Lack of Antitrust Injury Against the Private Plaintiffs [MDL Doc. 1550] is DENIED, Solvay's Motion for Summary Judgment as to Retailer's Damages Claims on AndroGel 1.62% Purchases [MDL Doc. 1552] is GRANTED, the Defendants Par and Paddock's Motion for Summary Judgment [MDL Doc. 1559] is DENIED, Actavis, Inc. **[*67]** and Solvay's Motion to Exclude Plaintiffs' Proposed Patent Law Expert Jack C. Goldstein, Esq. [FTC Doc. 622, MDL Doc. 1553] is DENIED, and Solvay, Par, and Paddock's Motion to Exclude in Part Plaintiffs' Expert James R. Bruno [FTC Doc. 630, MDL Doc. 1562] is GRANTED in part and DENIED in part.

SO ORDERED, this 14 day of June, 2018.p

Opinion

[*1195] [*1027] ON PETITION FOR PANEL REHEARING AND REHEARING EN BANC**

PER CURIAM.

ORDER

[1] Circuit Judge Mayer participated only in the decisionon the petition for panel rehearing.

Appellee KLA-Tencor Corporation filed a petition for panel rehearing and rehearing en banc. A response to the petition was invited by the court and filed by appellant Xitronix Corporation. The petition for rehearing and response were first referred to the panel that heard the appeal, and thereafter, to the circuit judges who are in regular active service. A poll **[**2]** was requested, taken, and failed.

Upon consideration thereof,

IT IS ORDERED THAT:

The petition for panel rehearing is denied.

The petition for rehearing en banc is denied.

The mandate of the court will issue on June 22, 2018.

June 15, 2018

Date

Dissent by: NEWMAN

Dissent

NEWMAN, *Circuit Judge*, dissenting from denial of the petition for rehearing en banc.

I write because of the importance of this decision to the judicial structure of patent adjudication, and the future of a nationally consistent United States patent law.

In this case, the complaint states that the asserted violation of patent law may support violation of ***antitrust law***—a *Walker Process* pleading based on charges of fraud or inequitable conduct in prosecution of the patent application in the Patent and Trademark Office.[1] The three-judge panel assigned to this appeal held that the Federal Circuit does not have jurisdiction, did not reach the merits, and transferred the appeal to the Fifth Circuit.[2] This jurisdictional ruling is contrary to the statute governing the Federal Circuit, and contrary to decades of precedent and experience. **[*1196]** Nonetheless, the en banc court now declines to review this panel ruling.

I write in concern for the conflicts and uncertainties created by this unprecedented change in jurisdiction of the Federal Circuit and of the regional courts of appeal. With the panel's unsupported ruling that the Supreme Court now places patent appeals within the exclusive jurisdiction of the regional circuits when the pleading alleges that the patent issue may lead to a non-patent law violation, we should consider this change en banc.

The District Court's Decision was Limited to Patent Issues[3]

---

[1] In *Walker Process Equipment, Inc. v. Food Machinery* ***[**3]*** *& Chemical Corp.*, the Supreme Court held that the use of a patent obtained through intentional fraud on the USPTO to create or preserve a monopoly may expose the patent holder to antitrust liability. *382 U.S. 172, 176-77, 86 S. Ct. 347, 15 L. Ed. 2d 247 (1965)*. This court has summarized that: "In order to prevail on a *Walker Process* claim, the antitrust-plaintiff must show two things: first, that the antitrust-defendant obtained the patent by knowing and willful fraud on the patent office and maintained and enforced the patent with knowledge of the fraudulent procurement; and second, all the other elements necessary to establish a *Sherman Act* monopolization claim." *TransWeb, LLC v. 3M Innovative Props. Co., 812 F.3d 1295, 1306 (Fed. Cir. 2016)*.

[2] *Xitronix Corp. v. KLA-Tencor Corp., 882 F.3d 1075 (Fed. Cir. 2018)* ("Transfer Order").

The district court received a complaint for "*Walker Process* antitrust claims based on KLA's alleged fraudulent procurement of a patent." *Dist. Ct. Dec., 2016 U.S. Dist. LEXIS 115535, [WL] at *1*. Xitronix alleged that the "entire prosecution" of the patent was tainted by fraud or inequitable conduct in the Patent and Trademark Office. J.A. 54 (¶111); J.A. 63 (¶145).

The panel now rules that the appealed issues of fraud and inequitable conduct in obtaining the patent do "not present a substantial issue of patent law," *Transfer Order, 882 F.3d at 1078*, and therefore that the jurisdiction of the Federal Circuit, *28 U.S.C. § 1295(a)(1)*, does not apply to this appeal. The panel states: "The underlying patent issue in this case, while important to the parties **[**4]** and necessary for resolution of the claims, does not present a substantial issue of patent law," and that "[s]omething more is required to raise a substantial issue of patent law sufficient to invoke our jurisdiction." *Transfer Order, 882 F.3d at 1078*. We are not told what that "[s]omething more" might be.

Neither party had questioned our appellate jurisdiction. The panel raised the question sua sponte, and now holds that a Supreme Court decision on state court malpractice jurisdiction, *Gunn v. Minton, 568 U.S. 251, 133 S. Ct.* ***[***1028]*** *1059, 185 L. Ed. 2d 72 (2013)*, removed Federal Circuit jurisdiction of *Walker Process* patent appeals.

If the issues of inequitable conduct or fraud in procuring the patent are no longer deemed to be a substantial issue of patent law, the court should speak en banc. Here, the district court reviewed the patent prosecution, including the references and other information relevant to examination for patentability; reviewed the applicant's arguments, the examiner's responses, and the examiner's reasoning in allowing the claims; and reviewed information from the concurrent infringement litigation. *Dist. Ct. Dec., 2016 U.S. Dist. LEXIS 115535, [WL] at *5-8*. The district court wrote a detailed opinion, concluding that fraud or inequitable conduct in patent prosecution had not been shown. *2016 U.S. Dist. LEXIS 115535, [WL] at *9*. This is the issue on appeal—the only **[**5]** issue. Xitronix argues on this appeal that the district court erred in its analysis and conclusion, and that the patent is invalid or permanently unenforceable.

The panel holds that patent validity and enforceability are not substantial questions of patent law, and therefore this case does not arise under the patent law. The panel removes the Federal Circuit from jurisdiction over appeals of *Walker Process* claims, and challenges Federal Circuit jurisdiction of all appeals where the complaint includes non-patent issues. This is a vast jurisdictional change for the regional circuits as well as the Federal Circuit.

The Federal Circuit Jurisdictional Statute

> *28 U.S.C. § 1295(a)(1)*. The United States Court of Appeals for the Federal Circuit shall have exclusive jurisdiction of an appeal from a final decision of a district court . . . in any civil action arising under **[*1197]** . . . any Act of Congress relating to patents or plant variety protection.

The Supreme Court has summarized that for the purpose of "desirable uniformity [] Congress created the Court of Appeals for the Federal Circuit as an exclusive appellate court for patent cases, observing that increased uniformity would 'strengthen the United States patent system **[**6]** in such a way as to foster technological growth and industrial innovation." *Markman v. Westview Instruments, Inc., 517 U.S. 370, 390, 116 S. Ct. 1384, 134 L. Ed. 2d 577 (1996)* (quoting H.R. Rep. No. 97-312, pp. 20-23 (1981)).

Precedent has construed the clause "civil action arising under . . . any Act of Congress relating to patents," for the creation of the Federal Circuit as a national court raised occasional questions of appellate jurisdiction, as the courts sought to implement the legislative purpose. Precedent considered specific circumstances as they arose: for example, when the district court action included issues in addition to patent issues and the patent issues were not

---

[3] *2016 U.S. Dist. LEXIS 115535, 2016 WL 7626575 (W.D. Tex. Aug. 26, 2016)* ("Dist. Ct. Dec.").

appealed; when the patent issue arose only by counterclaim; when the patent issue arose in a contract dispute; when the patent issue arose in connection with various antitrust claims; when the patent issue arose in a state court action; when the patent issue was later removed from the complaint; when the patent issue arose in a malpractice action.

Thus, we and the Supreme Court and the regional circuits have considered the boundaries of "civil action arising under . . . any Act of Congress relating to patents," across an array of diverse circumstances. Those boundaries produced helpful guidance in special **[**7]** or complex cases. However, the present case is simple, for the issue of fraud or inequitable conduct in prosecution of the patent application, the foundation of *Walker Process* jurisprudence, is cemented in its jurisdictional path to the Federal Circuit. If that path is to be changed, such change warrants en banc action.

Supreme Court and Federal Circuit Precedent are Contravened by the Panel Decision

The Supreme Court reviewed Federal Circuit jurisdiction early in our existence, in a case where the Seventh Circuit and the Federal Circuit each "adamantly disavowed jurisdiction" and insisted that the other was the correct appellate body. *Christianson v. Colt Indus. Operating Corp., 486 U.S. 800, 803, 108 S. Ct. 2166, 100 L. Ed. 2d 811 (1988)*. In *Christianson*, a former employee of Colt asserted *Clayton Act* and *Sherman Act* violations by Colt as well as tortious interference with business relationships; the employee requested damages and injunctive and equitable relief. An antitrust allegation related to patent validity. The district court decided for the former employee on both the antitrust and tortious interference claims, and Colt appealed to the Federal Circuit. We held that we did not have jurisdiction **[***1029]** because the case did not arise under the patent law, and transferred the appeal to the **[**8]** Seventh Circuit.

The Seventh Circuit stated that the Federal Circuit was "clearly wrong," and transferred the appeal back to us. The Federal Circuit then decided the appeal "in the interests of justice," while protesting that we lacked jurisdiction. *Christianson, 486 U.S. at 806-07*. The Supreme Court then stepped in, and held that the case did not arise under the patent law, and that the appeal belonged in the Seventh Circuit. The Court observed that the phrase "arising under" the patent law "mask[ed] a welter of issues regarding the interrelation of federal and state authority and the proper management of the federal judicial system." *Id. at 808 n.2* **[*1198]** (quoting *Franchise Tax Bd. of Cal. v. Constr. Laborers Vacation Tr. for S. Cal., 463 U.S. 1, 8, 103 S. Ct. 2841, 77 L. Ed. 2d 420 (1983))*.

The Court defined "arising under" patent law as requiring:

> a well-pleaded complaint [that] establishe[s] either that federal patent law create[s] the cause of action or that the plaintiff's right to relief necessarily depends on resolution of a substantial question of federal patent law, in that patent law was a necessary element of one of the well-pleaded claims.

Id. at 809. This standard has guided ensuing jurisdictional determinations.

As applied to the case at bar, it is not disputed that patent law is a "necessary element" of the antitrust claim, for without determination that a **[**9]** patent was obtained by fraud or inequitable conduct, there can be no antitrust violation. While "a claim supported by alternative theories in the complaint may not form the basis for *§ 1338(a)* jurisdiction unless patent law is essential to each of those theories," *id. at 810*, Xitronix alleged a theory of antitrust violation based solely on patent law. And, as Xitronix states, its purpose is to invalidate the patent or render it unenforceable. However, the panel rules that in *Gunn v. Minton, 568 U.S. 251, 133 S. Ct. 1059, 185 L. Ed. 2d 72 (2013)*, the Supreme Court changed Federal Circuit jurisdiction such that only the regional circuits now have jurisdiction over *Walker Process* appeals.

Gunn did not make the jurisdictional change ascribed to it. In *Gunn* the Court held that the appeal of a state law attorney malpractice case was properly in the state court, although the malpractice charge related to a patent issue. The Court observed that the patent had been invalidated ten years earlier, and described the patent aspect as "hypothetical" because whatever the attorney's malfeasance, there could be no rights in this long-dead patent. *Id. at*

261 ("No matter how the state courts resolve that hypothetical 'case within a case,' it will not change the real-world result of the prior federal **[**10]** patent litigation. Minton's patent will remain invalid.").

In this context of federal-state authority, *Gunn* discussed the requirements for federal "arising under" jurisdiction. The Court stated, "a case can 'arise under' federal law in two ways. Most directly, a case arises under federal law when federal law creates the cause of action asserted." *Id. at 257* (internal alteration omitted). Even where federal law does not create the cause of action, "federal jurisdiction over a state law claim will lie if a federal issue is: (1) necessarily raised, (2) actually disputed, (3) substantial, and (4) capable of resolution in federal court without disrupting the federal-state balance approved by Congress." *Id. at 258*.

Gunn explained that the substantiality inquiry looks "to the importance of the issue to the federal system as a whole," *id. at 260*, and that when the claim "finds its origins in state rather than federal law," it must be "capable of resolution in federal court without disrupting the federal-state balance approved by Congress." *Id. at 258*. The Court's discussion of federal-state balance shows the ill fit between *Gunn* and the panel's application of *Gunn* to remove the jurisdiction of the Federal Circuit over the issues of **[**11]** fraud and inequitable conduct in patent prosecution when an antitrust violation is asserted in the complaint.

I agree that "[w]hile not perfectly translatable to the question before us, the[] guideposts [of *Gunn*] are helpful." *Madstad **[*1199]** Eng'g, Inc. v. USPTO, 756 F.3d 1366, 1370 (Fed. Cir. 2014)*. In *Madstad*, this court considered how adjudication of the constitutional challenge to the *America Invents Act* would affect the "balance [of] matters committed to the jurisdiction of this court and those committed to the regional circuits." *Id. at 1371*. The court stated that the "balance would be upset by placing jurisdiction over interpretations of the AIA and an assessment of its constitutional validity in the hands of **[***1030]** any circuit other than this one." *Id.* The same applies here, as the panel upsets the balance established by Congress and moves to the regional circuits the issue of fraud or inequitable conduct in the PTO.

The case at bar is not a "hypothetical 'case within a case,'" as in *Gunn, 568 U.S. at 261*. The adjudication of fraud in procuring the patent in the PTO is a substantial issue of patent law. The panel states that *Gunn* requires moving the appeal to the Fifth Circuit because in the case at bar "[t]here is no dispute over the validity of claims." *Transfer Order, 882 F.3d at 1078*. This is a puzzling statement, **[**12]** for that is the dispute: Xitronix states that a finding of fraud or inequitable conduct will "result in the '260 patent claims being rendered collaterally invalid and/or unenforceable." Reh'g Resp. Br. 9. The dispute is indeed over the validity and enforceability of the patent. The Court did not obliterate this jurisdiction of the Federal Circuit in *Gunn*'s resolution of state court malpractice jurisdiction.

I turn briefly to Federal Circuit precedent, for this court has traditionally resolved antitrust aspects of *Walker Process* appeals when raised in conjunction with patent prosecution in the PTO.

The Panel Rejects Federal Circuit Precedent

In *Nobelpharma AB v. Implant Innovations, Inc.*, the en banc court considered the question of whether Federal Circuit or regional circuit law should apply to the fraudulent "procuring or enforcing" aspect of a *Walker Process* claim. *141 F.3d 1059, 1068 (Fed. Cir. 1998)*.[4] We held that: "Whether conduct in the prosecution of a patent is sufficient to strip a patentee of its immunity from the antitrust laws is one of those issues that clearly involves our exclusive jurisdiction over patent cases." *Id. at 1068*. The en banc court further explained that "we hereby change our precedent and hold that whether conduct **[**13]** in procuring or enforcing a patent is sufficient to strip a patentee of its immunity from the antitrust laws is to be decided as a question of Federal Circuit law." *Id.*

The panel's ruling contradicts this en banc holding; this alone requires en banc attention, for precedent may not be changed by a panel, *see South Corp. v. United States, 690 F.2d 1368, 1370 n.2 (Fed. Cir. 1982)* (en banc).

[4] This section of *Nobelpharma* was "considered and decided unanimously by an *in banc* court." *141 F.3d at 1068 n.5*.

In re Ciprofloxacin Hydrochloride Antitrust Litigation was a transfer to the Federal Circuit from the Second Circuit, because "the determination of fraud before the PTO necessarily involves a substantial question of patent law." 544 F.3d 1323, 1330 & n.8 (Fed. Cir. 2008), *abrogated on other grounds by* FTC v. Actavis, 570 U.S. 136, 146-47, 160, 133 S. Ct. 2223, 186 L. Ed. 2d 343 (2013). Although there were also non-patent issues in this litigation, the Second Circuit and Federal Circuit agreed that the patent issues were substantial and that the action arose under the patent law, placing jurisdiction in the Federal Circuit.

[*1200] The panel now announces that *Nobelpharma* and *Ciprofloxacin* were rendered "invalid" by *Gunn*. Transfer Order, 882 F.3d at 1079. *Gunn*, a malpractice case on the question of state-federal authority for attorney discipline, made no such dramatic holding pertaining to patent jurisdiction, even in dictum. The panel's discard of decades of precedent requires more than silent inference from unrelated situations. **[**14]**

Other rulings on our jurisdiction are in tension with the panel's decision. In *Jang v. Boston Scientific Corporation, 767 F.3d 1334, 1337 (Fed. Cir. 2014)*, an action for breach of contract, this court was clear in its rejection of the concept that *Gunn* had broadly deprived the Federal Circuit of jurisdiction: "Here, by contrast [with *Gunn*], the disputed federal patent law issues presented by Jang's well-pleaded complaint are substantial and neither entirely backward-looking nor hypothetical. In addition to infringement, the court may be called upon to determine the extent to which validity is made relevant to the resolution of the breach-of-contract claim by the language of the contract itself." *Id. at 1337*. This court deemed patent validity a "substantial" issue of patent law and explained that appeal of the breach of contract claim was properly to the Federal Circuit:

> Permitting regional circuits to adjudicate questions of patent validity, for example, could result in inconsistent judgments between a regional circuit and the Federal Circuit, resulting in serious uncertainty for parties **[***1031]** facing similar infringement charges before district courts within that regional circuit. Maintaining Federal Circuit jurisdiction over such contractual disputes to avoid such conflicting **[**15]** rulings is important to "the federal system as a whole" and not merely "to the particular parties in the immediate suit."

Id. at 1338 (quoting *Gunn, 568 U.S. at 260*).

By further example, in *Vermont v. MPHJ Technology Investments, LLC*, this court observed that the substantial question of patent law present in a challenge to a Vermont consumer protection law was not like the malpractice issue in *Gunn*, a "'backward-looking . . . legal malpractice claim' that would be unlikely to have any 'preclusive effect' on future patent litigation." *803 F.3d 635, 646 (Fed. Cir. 2015)* (quoting *Gunn, 568 U.S. at 261, 263)*. Such distinction from *Gunn* also applies to the case at hand.

The panel's ruling directly contradicts the court's prior holdings. A contradictory ruling by the panel is improper, for "[t]his court has adopted the rule that prior decisions of a panel of the court are binding precedent on subsequent panels unless and until overturned *in banc*." *Newell Cos. v. Kenney Mfg. Co., 864 F.2d 757, 765 (Fed. Cir. 1988)*. In the vast number of cases that have raised non-patent issues along with patent issues, no precedent of the Supreme Court or the Federal Circuit supports the panel's ruling on the panel's facts.

The Panel Also Misconstrues Regional Circuit Jurisdictional Rulings

The panel also cites decisions of other circuits to support transfer of this **[**16]** appeal to the Fifth Circuit. None of these cases, not their holdings nor their procedural postures nor their reasoning, supports this transfer.

In re Lipitor Antitrust Litigation, 855 F.3d 126 (3d Cir. 2017), dealt with the antitrust aspects of reverse-payments between the patent owner and generic producers of the patented drug. The panel states that the retention of jurisdiction in the Third Circuit supports removal of the instant appeal from Federal Circuit jurisdiction. **[*1201]** *Transfer Order, 882 F.3d at 1079*. The *Lipitor* litigation raised several antitrust aspects unrelated to patent law. *See 855 F.3d at 146* ("Here, plaintiffs could obtain relief on their *section 2* monopolization claims by prevailing on an alternative, non-patent-law theory . . . ."). The Third Circuit distinguished this case from the Second Circuit's transfer to the Federal Circuit, stating: "But unlike the *Lipitor* and *Effexor* appeals before us, the appeal transferred from the

Second Circuit to the Federal Circuit involved stand-alone *Walker Process* claims." *Id. at 148* (referencing *In re Ciprofloxacin*). The Third Circuit observed that "*Actavis* teaches that reverse-payment antitrust claims do not present a question of patent law" and found patent law was not "necessary for relief on every theory of liability supporting an antitrust claim." *Id. at 146* (citing **[**17]** *570 U.S. at 156-58*). The court further stated that "courts must look to the monopolist's conduct taken as a whole rather than considering each aspect in isolation." *Id. at 147* (quoting *LePage's Inc. v. 3M, 324 F.3d 141, 162 (3d Cir. 2003))*. Finding "patent-law related theories" to be but "aspects of an overall monopolistic scheme," the Third Circuit concluded that appellate jurisdiction was properly found in that court. *Id. at 147, 152*.

In contrast, here Xitronix presented no "alternative, non-patent-law theory" for its antitrust claim. *Lipitor, 855 F.3d at 146*. The only basis of Xitronix's claim was the asserted fraud or inequitable conduct in the PTO. The *Lipitor* ruling does not support divesting the Federal Circuit of jurisdiction over appeals where the potential antitrust issue necessarily turns on finding fraud or inequitable conduct in patent prosecution in the PTO.

The panel also cites a Fifth Circuit case in purported support of this jurisdictional change. In *USPPS, Ltd. v. Avery Dennison Corp., 541 F. App'x 386 (5th Cir. 2013)* the issue was breach of fiduciary duty, where a patent applicant sued its licensee and attorneys on various grounds. There was no issue of fraud or inequitable conduct in prosecution of the patent application. The appeal bounced from the Fifth Circuit to the Federal Circuit to the Supreme Court, back to the Federal Circuit, **[**18]** and then back to the Fifth Circuit, which ruled that any patent aspects were "hypothetical" because resolution of the breach of fiduciary duty question would not affect the validity or enforceability of any patent. *Id. at 389-90*. Although the panel cites this case as an example of regional circuit jurisdiction of fraud in the PTO, there was no issue of fraud in the PTO; the asserted fraud was common law **[***1032]** fraud based on contract and fiduciary relationships.

The panel further cites *MDS (Canada) Inc. v. Rad Source Technologies, Inc., 720 F.3d 833 (11th Cir. 2013)*, for the proposition that the regional circuit had jurisdiction of the appeal of a "contract claim with an underlying patent infringement issue." *Transfer Order, 882 F.3d at 1080*. In that contract dispute, the court stated that the case was for breach of a license agreement, and that the question of infringement was not substantial because the patent had expired and "resolution of this issue is unlikely to impact any future constructions of claims." *MDS, 720 F.3d at 842*. The circuit construed the contract and the licensed patents, considered the asserted breaches such as failure to pay the maintenance fees, and certified other contract issues to the Florida Supreme Court. The appeal before us is not such a complex case—the appeal turns on the issue of patent prosecution **[**19]** conduct in the PTO, for which appellate jurisdiction is in this court.

Another regional circuit case on which the panel relies is *Seed Co. Ltd. v. Westerman*, a **[*1202]** malpractice case that was appealed to the D.C. Circuit. *832 F.3d 325, 425 U.S. App. D.C. 187 (D.C. Cir. 2016)*. The asserted malpractice was the attorney's failure to successfully prosecute an application before the PTO. The panel correctly states that the D.C. Circuit had "appellate jurisdiction because the case 'involve[d] no forward looking questions about any patent's validity, but instead solely concern[ed] whether unsuccessful patent applicants can recover against their attorneys.'" *Transfer Order, 882 F.3d at 1079* (quoting *Seed, 832 F.3d at 331*). The Federal Circuit had several years earlier reviewed the patent questions in *Seed*, in an interference proceeding. As in *Gunn*, no patent rights were involved in or affected by this malpractice action. This case does not support the panel's holding that the Federal Circuit does not have jurisdiction over cases based on fraud or inequitable conduct in the PTO.

Until today, there has been stability in the jurisdictional path of *Walker Process* appeals. No precedent deprives the Federal Circuit of jurisdiction of appeals that turn on issues of fraud or inequitable conduct in patent prosecution. These **[**20]** issues are not only substantial, but because they determine patent enforceability and validity, they are fundamental.

To summarize why en banc review of this panel decision is appropriate and necessary:

1) The panel, at its own initiative, raised the question of our jurisdiction of *Walker Process* appeals. Although supplemental briefing was requested of the parties, the ramifications of this jurisdictional change were not exposed in public debate.

2) Precedent is contrary to the panel's rejection of this appeal. Neither *Gunn* nor any other precedent supports the panel's ruling that claims turning on patent invalidity and unenforceability due to fraud or inequitable conduct in patent prosecution do not "arise under" the patent law.

3) The reason for formation of the Federal Circuit as a national court was to stabilize the patent law and provide uniformity throughout the nation. Patent prosecution is a complex and specialized interaction between inventors and examiners. This ruling will require each regional circuit to review patent prosecution in the PTO, creating regional precedent and forum-shopping.

4) Appellate review of cases that arise under the patent law is our assignment and our obligation. **[**21]** The Supreme Court did not silently divest this court of the jurisdiction that was established in 1982.

If the court now wishes to remove itself from jurisdiction of cases that may involve issues in addition to patent issues, we should make this change en banc. From the court's denial of en banc rehearing, I respectfully dissent.

Judges: Nathaniel M. Gorton, United States District Judge.

Opinion by: Nathaniel M. Gorton

Opinion

[*177] MEMORANDUM [17] & ORDER**

GORTON, J.

This case involves seven consolidated actions brought by various taxi medallion holders in the Greater Boston area ("plaintiffs"). Plaintiffs allege that Uber Technologies, Inc. and its wholly-owned subsidiary, Raiser, LLC ("Uber" or "defendant") competed unlawfully in the on-demand, ride-hail ground transportation market in and around Boston, Massachusetts. More particularly, plaintiffs complain that the subject competition 1) violates the common law and the Massachusetts Consumer Protection Act, 2) violates state and federal ***antitrust law*** and 3) amounts to a civil conspiracy and the aiding and abetting of unfair competition.

Before the Court is defendant's motion to dismiss the amended antitrust claims in the Malden, Dot Ave, Max Luc and Taxi Maintenance amended complaints (Docket No. 109).

I. Background

Uber entered the Boston market for private transportation services in 2011 and launched its UberX service in 2013. The company provides a digital tool for requesting private vehicles-for-hire by users who download Uber's free "smart phone application" ("the Uber app"). Users who open the Uber app on their mobile phones are shown a map of their location or designated **[**18]** pick-up point and the available Uber-affiliated vehicles in that vicinity.

This litigation involves seven groups of plaintiffs that represent over 800 taxi companies in the Greater Boston area. The seven complaints were filed in this district between December, 2016, and April, 2017. The Court consolidated the cases pursuant to *Fed. R. Civ. P. 42(a)(2)* in October, 2017. See *Malden Transportation, Inc. v. Uber Techs., Inc., No. CV 16-12538-NMG, 2017 WL 6759425 (D. Mass. Oct. 5, 2017)*. In December, 2017, this session ruled on Uber's consolidated motion to dismiss. See *Malden Transportation, Inc. v. Uber Techs., Inc., 286 F. Supp. 3d 264 (D. Mass. 2017)* ("Malden I"). The Court held that plaintiffs had stated claims for 1) unfair competition under the common law and the Massachusetts Consumer Protection Act, *M.G.L. c. 93A, 2*) aiding and abetting unfair competition and 3) civil conspiracy to commit unfair competition. The Court allowed the defendants' motion to dismiss as to two of Uber's founders for want of personal jurisdiction and with respect to plaintiffs' antitrust, tortious interference and civil conspiracy claims. See generally id.

After the issuance of that memorandum and order, plaintiffs amended their complaints. Four of the plaintiff groups have added additional factual allegations, which bear upon the claims of violation of state and federal **[**19]** ***antitrust law***.

Before the Court is Uber's motion to dismiss those amended antitrust claims.

II. Analysis

To survive a motion to dismiss, a complaint must contain sufficient factual matter, accepted as true, to "state a claim **[*178]** to relief that is plausible on its face." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. In considering the merits of a motion to dismiss, the Court may look only to the facts alleged in the pleadings, documents attached as exhibits or incorporated by reference in the complaint and matters of which judicial notice can be taken. *Nollet v. Justices of Trial Court of Mass., 83 F.Supp.2d 204, 208 (D. Mass. 2000)*, aff'd, *248 F.3d 1127 (1st Cir. 2000)*. Furthermore, the Court must accept all factual allegations in the complaint as true and draw all reasonable inferences in the plaintiff's favor. *Langadinos v. Am. Airlines, Inc., 199 F.3d 68, 69 (1st Cir. 2000)*. If the facts in the complaint are sufficient to state a cause of action, a motion to dismiss the complaint must be denied. See *Nollet, 83 F.Supp.2d at 208*.

Although a court must accept as true all of the factual allegations contained in a complaint, that doctrine is not applicable to legal conclusions. *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*. Threadbare recitals of the legal elements which are supported by mere conclusory statements do not suffice to state a cause of action. Id. Accordingly, a complaint does not state a claim for relief where the well-pled facts fail to warrant an inference of any **[**20]** more than the mere possibility of misconduct. *Id. at 679*.

1. Attempt to monopolize under the Sherman Antitrust Act, *15 U.S.C. § 2* and the Massachusetts Antitrust Act, *M.G.L. c. 93 § 5*

Plaintiffs assert claims for attempt to monopolize in violation of the Sherman Antitrust Act and the Massachusetts Antitrust Act, *M.G.L. c. 93 § 5*.[1]

Plaintiffs argue that Uber has attempted to drive taxi companies out of business through the use of its allegedly predatorily priced UberX service. Defendants respond that plaintiff has not met the high burden of alleging a predatory pricing claim and has not alleged an injury to competition.

Section 2 of the Sherman Act makes it illegal to monopolize, or attempt to

> monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations.

15 U.S.C. § 2.

To state a monopolization claim under *§ 2*, a plaintiff must adequately allege that defendant (1) has monopoly power in the relevant market and (2) has engaged in illicit "exclusionary practices" with "the design or effect of protecting or enhancing its monopoly position." *Sterling Merch., Inc. v. Nestlé, S.A., 656 F.3d 112, 125 (1st Cir. 2011)* (quoting *Coastal Fuels of P.R., Inc. v. Caribbean Petroleum Corp., 79 F.3d 182, 195 (1st Cir. 1996)* (internal citation omitted)).

One kind of exclusionary practice is the practice of "predatory pricing". In this scheme, **[**21]** a company reduces the price of its product to below cost, hoping to drive competitors out of business and then raise prices once it has achieved a monopoly position. See *Matsushita Elec. Industrial Co. v. Zenith Radio Corp., 475 U.S. 574, 584-585, n. 8, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*. To succeed on a predatory pricing claim a plaintiff must demonstrate that

> the prices complained of are below an appropriate measure of its rival's costs . . . [and that the competitor had] a dangerous **[*179]** probability of recouping its investment in below-cost prices.

---

[1] Neither party contends that the legal standard varies for the state law claim.

Brooke Grp. Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 222, 224, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993).

Because an economically unsound approach by a competitor could actually benefit consumers, plaintiffs must explain with particularity "just what the arrangements were and why they plausibly constituted antitrust violations." See *Am. Steel Erectors v. Local Union No. 7, Int'l Ass'n of Bridge, Structural, Ornamental & Reinforcing Iron Workers, 815 F.3d 43, 71 (1st Cir. 2016)* (quoting *Stop & Shop Supermarket Co. v. Blue Cross & Blue Shield of R.I., 373 F.3d 57, 65 (1st Cir. 2004))*.

Plaintiffs fail to allege facts supporting a predatory pricing claim. The new allegations do not cure the deficiencies that doomed the Malden I plaintiffs. See *Malden I, 286 F. Supp. 3d at 279-280*.

Plaintiffs do not allege that Uber's services were priced below Uber's costs. They do not "explain in detail" why Uber's conduct constituted an antitrust violation. See *Am. Steel, 815 F.3d at 71*. The second amended complaint alleges that Uber "deflated the UberX fares to below cost in order to drive out the taxi drivers." But such "threadbare recitals of a cause of action's elements, supported **[**22]** by mere conclusory statements, do not suffice" to survive the motion to dismiss stage. *Iqbal, 556 U.S. at 678* (citing *Twombly, 550 U.S. at 555*).

Basic facts such as what an average or median "ride" in the Boston area costs Uber, or costs a taxi, are absent. Plaintiffs attempt to bolster the factual allegations found lacking in Malden by attaching a report from the Wall Street Journal showing that, worldwide, Uber's costs exceed its revenue. Uber's global performance, however, does not constitute an allegation as to Uber's costs in the "ride-hailing market in the City of Boston." Plaintiffs complain that they are unable to obtain Uber's pricing information without discovery because Uber is a private corporation that does not disclose such figures. But the difficulty of satisfying the pleading standard does not excuse plaintiffs from meeting that standard. See *Affinity LLC v. GfK Mediamark Research & Intelligence, LLC, No. 12-cv-1728-RJS, 2013 U.S. Dist. LEXIS 45921, 2013 WL 1189317, at *4 (S.D.N.Y. Mar. 25, 2013)*, aff'd, *547 F. App'x 54 (2d Cir. 2013)* (dismissing predatory pricing claim because plaintiff failed to plead defendant's actual costs in the relevant market).

In a similar vein, plaintiffs fail to allege facts demonstrating Uber's intent to monopolize. A plaintiff alleging an attempt to monopolize must establish "specific intent" **[**23]** to destroy competition. *Home Placement Serv., Inc. v. Providence Journal Co., 682 F.2d 274, 281 (1st Cir. 1982)* (citing *Times-Picayune Pub. Co. v. United States, 345 U.S. 594, 626, 73 S. Ct. 872, 97 L. Ed. 1277 (1953))*. Plaintiffs generally state that Uber's intent to monopolize "has been made clear" through the statements of its former CEO and its advertising materials. However, the amended complaints do not include satisfactory examples of such statements. Finally, plaintiffs argue that the UberX price itself demonstrates specific intent. That argument lacks merit. Without an unlawful intent, "increasing sales and increasing market share are normal business goals," not verboten practices. *U.S. Steel Corp. v. Fortner Enterprises, Inc., 429 U.S. 610, 612 n.1, 97 S. Ct. 861, 51 L. Ed. 2d 80 (1977)*. Low prices are a reasonable way to achieve those goals. No specific facts in the amended complaint demonstrate that Uber intended to obtain a monopoly in the Boston ride-hailing market.

[*180] Equally important, plaintiff fails to show an injury to Boston consumers. This omission is fatal because antitrust plaintiffs must show that "defendants' actions caused an injury to competition, as distinguished from impact on themselves." *R.W. Int'l Corp. v. Welch Food, Inc., 13 F.3d 478, 487 (1st Cir. 1994)*. According to plaintiff's complaint, Uber's entry caused the supply in the ride-hailing market to increase and the price to diminish. Those allegations fail to demonstrate an injury to competition. See *Sullivan v. Nat'l Football League, 34 F.3d 1091, 1096 (1st Cir. 1994)*, as amended on denial of reh'g (Oct. 26, 1994) ("Anticompetitive **[**24]** effects, more commonly referred to as injury to competition or harm to the competitive process, are usually measured by a reduction in output and an increase in prices in the relevant market.") (internal quotation marks omitted) (citation omitted). A decrease in the value of Boston taxi medallions is immaterial. Plaintiffs' allegation that Uber discriminates against the poor and disabled is similarly irrelevant. The Sherman Act prohibits "attempt[s] to monopolize", not unlawful discrimination. *15 U.S.C. § 2*. See also *Brooke Grp. Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 225, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993)* (reiterating that the Sherman Act does not "purport to afford remedies for all torts committed by or against persons engaged in interstate commerce") (quoting *Hunt v. Crumboch 325 U.S. 821, 826, 65 S. Ct. 1545, 89 L. Ed. 1954 (1945))*.

Finally, this Court finds the analysis in *Philadelphia Taxi Ass'n, Inc. v. Uber Techs., Inc., 886 F.3d 332 (3d Cir. 2018)*, applicable and persuasive. In that case, Philadelphia taxicab drivers and taxicab companies alleged that Uber's entry into the Philadelphia taxicab market violated the Sherman Act. *Id. at 336*. Just as plaintiffs do here, the Philadelphia plaintiffs argued that Uber's actions were

> illegal, predatory and led to a sharp drop in the value of taxicab medallions as well as a loss of profits.

Id.

The Third Circuit Court of Appeals ("Third Circuit") affirmed the district court's dismissal of plaintiffs' **[**25]** complaint, holding that the plaintiffs had failed 1) to state a claim for attempted monopolization or 2) to allege a legally cognizable antitrust injury. Id. The Third Circuit reasoned that Uber "bolstered competition", "operate[d] at a lower cost" and attracted taxi drivers "due to its cost efficiency and competitive advantage", but that such conduct does not constitute anticompetitive conduct violative of ***antitrust law***. *Id. at 340-41*. The same can be said here. Moreover, the Circuit found that plaintiffs failed to allege specific intent to monopolize which was significant given that Uber's strategy could "be reasonably viewed as predominantly motivated by legitimate business aims." *Id. at 341* (internal quotation marks omitted) (quoting *Times Picayune Publ'g Co. v. United States, 345 U.S. 594, 627, 73 S. Ct. 872, 97 L. Ed. 1277 (1953))*. The amended complaints here suffer from the same deficiency.

Finally, the Third Circuit observed that plaintiffs had failed to allege antitrust standing because "harm to [plaintiffs'] business does not equal harm to competition." *Id. at 344*. The same applies to the present case. Plaintiffs' amended complaints and legal theories are substantially indistinguishable from those dismissed in Philadelphia Taxi and this Court sees no reason to diverge from the well-reasoned opinion in that **[**26]** case.

ORDER

For the foregoing reasons, defendants' partial motion to dismiss the antitrust **[*181]** claims in the Malden, Dot Ave, Max Luc and Taxi Maintenance amended complaint (Docket No. 109) is **ALLOWED**.

So ordered.

Opinion

ORDER GRANTING IN PART AND DENYING IN PART DEFENDANTS' MOTION TO DISMISS PLAINTIFFS' SECOND AMENDED COMPLAINT

[Doc. No. 30]

Plaintiffs Aya Healthcare Services, Inc. and Aya Healthcare, Inc. (collectively, "Plaintiffs" or "Aya") filed a Second Amended Complaint ("SAC") against Defendants AMN Healthcare, Inc., AMN Service, Inc., AMN Services, LLC, MEDEFIS, Inc., and Shiftwise, Inc. (collectively, "Defendants" or "AMN") alleging three federal antitrust claims: a *per se* claim under *Section 1* of the *Sherman Act* (*15 U.S.C. § 1*); a quick-look and/or rule of reason claim **[*2]** under *Section 1* of the Sherman Act; a claim for attempted monopolization under *Section 2* of the Sherman Act (*15 U.S.C. § 2*); and three California state law claims. *See* SAC. Defendants now move to dismiss Plaintiffs' SAC pursuant to *Federal Rule of Civil Procedure 12(b)(6)*. *See* Doc. No. 30. Plaintiffs filed an opposition to Defendants' motion, to which Defendants replied. *See* Doc. Nos. 31, 32. The Court found the matter suitable for determination on the papers and without oral argument pursuant to *Civil Local Rule 7.1(d)(1)*. *See* Doc. No. 33. For the reasons set forth below, the Court **GRANTS IN PART** and **DENIES IN PART** Defendants' motion to dismiss.

BACKGROUND[1]

Plaintiff Aya Healthcare Services, Inc. is a corporation formed under the laws of Delaware that maintains its headquarters in San Diego, California. SAC ¶ 16. Plaintiff Aya Healthcare, Inc. is a corporation formed under the laws of Delaware that maintains its headquarters in San Diego, California. *Id.* "Plaintiffs are affiliated companies that operate under common control and ownership." *Id.*

Defendant AMN Healthcare Services, Inc. is a corporation formed under the laws of Delaware that maintains its headquarters in San Diego, California. *Id.* ¶ 17. Defendant AMN Healthcare, Inc. is a Nevada corporation that maintains **[*3]** its headquarters in San Diego, California. *Id.* ¶ 18. Defendant AMN Services, LLC is a limited liability company formed under state law that maintains its headquarters in San Diego, California. *Id.* ¶ 19. Defendant MEDEFIS, Inc. is a corporation formed under state law that maintains its headquarters in Omaha, Nebraska. *Id.* ¶ 20. Defendants Shiftwise, Inc. is a corporation formed under state law that maintains its headquarters in Portland, Oregon. *Id.* ¶ 21. Defendant AMN Healthcare Services, Inc. owns and controls Defendant AMN Healthcare, Inc. and the various affiliated companies also sued in this action. *See id.* ¶ 22.

Plaintiffs are two affiliated companies that "sell medical-traveler services to hospitals."[2] *Id.* ¶ 30. Defendants also offer these services and are the dominant providers of such services in the country. *See id.* ¶ 3. Defendants' "pool of travelers is by far the largest and most varied in the country." *Id.* ¶ 35. Moreover, Defendants operate "two software platforms that [their] customers can use to procure travelers from other providers." *Id.* Defendants further operate "the largest subcontractor network in the country, employing virtually all other providers in the United **[*4]** States as [their] subcontractors." *Id.* ¶ 35.

"Travelers are licensed nurses and medical technicians who travel from place to place in order to perform temporary assignments at understaffed hospitals." *Id.* ¶ 31. Hospitals do not directly hire medical travelers, but utilize the services of personnel agencies like Plaintiffs and Defendants. *See id.* These personnel agencies are thus responsible for recruiting qualified medical travelers and coordinating their temporary assignment to hospitals. *See id.*

Generally, Plaintiffs allege that Defendants utilize "a series of mutually reinforcing contractual restraints, including restraints that are unlawful *per se*, to orchestrate the following outcome: (1) Defendants alone will keep control of the only 'pool' of travelers that is sufficiently large and varied to meet the requirements of many or most hospital networks and large hospitals[;]" and "(2) the other rival providers, including Plaintiffs, have been prevented or greatly hindered by Defendants' restraints from developing their own traveler pools and deploying them in order to compete for the large hospitals' business and to compete in general in the medical-traveler markets." *Id.* ¶ 4. Additionally, **[*5]** by using these practices, Defendants have "specifically intended to acquire monopoly power in the medical-traveler markets. On present trends, there exists a dangerous probability that it will succeed in the effort unless there is an antitrust intervention." *Id.* ¶ 330. The Court summarizes the various restraints below.

A. No-Poaching Restraints

Plaintiffs allege that Defendants oblige "all of [their] subcontractor providers and software-platform providers . . . to accept unilateral no-poaching agreements[.]" *Id.* ¶ 123. These no-poaching agreements "forbid the rival providers *in*

[1] Because this matter is before the Court on a motion to dismiss, the Court must accept as true the allegations set forth in the SAC. *See* *Hosp. Bldg. Co. v. Trs. of Rex Hosp., 425 U.S. 738, 740, 96 S. Ct. 1848, 48 L. Ed. 2d 338 (1976)*.

[2] "Hospitals" hereinafter refers to both hospitals and other healthcare facilities.

perpetuity to initiate job offers or otherwise solicit any of AMN's designated 'employees,' no matter how or where employed, and even when not currently on assignment for AMN." *Id.* (emphasis in original). Each rival provider "accepts AMN's No-Poaching Restraint as an obligatory condition precedent to receiving spillover assignments or access to one of AMN's software platforms." *Id.* at 125. Defendants have "prevailed on nearly all other providers in the United States to accept and observe [their] unilateral No-Poaching Restraints." *Id.* ¶ 124. Plaintiffs allege that even if a rival provider agrees one time to act as AMN's **[*6]** subcontractor, and then that rival sends a single traveler to a remote hospital for one assignment, the "rival thereafter remains expressly forbidden to initiate at any time in the future an employment discussion for any purpose with any of AMN's 8000 travelers or 2500 recruiters and other professionals." *Id.* ¶ 132. Defendants, on the other hand, are not subject to a reciprocal restraint. *See id.* As a result, Plaintiffs contend Defendants have "successfully organized a unilateral employers' cartel in the medical-traveler markets." *Id.* ¶ 124.

In order to obtain spillover work, Plaintiffs agreed to "more than twenty of AMN's subcontractor agreements, each of which includes its No-Poaching Restraints." *Id.* ¶ 129. Plaintiffs adhered to these restraints from 2010 to May 2015, when they decided to no longer honor them. *See id.* During this five-year period, Plaintiffs "lost opportunities and profits[.]" *Id.* ¶ 263. Plaintiffs assert they continue to suffer harm after ceasing to adhere to Defendants' no-poaching restraints. For example, "[o]ther providers continually solicit Aya's recruits, but not AMN's recruiters." *Id.* ¶ 276. Thus, Defendants' no-poaching restraints place Plaintiffs at a competitive **[*7]** disadvantage because they must "offer inducements to their best employees to avoid losing them to rivals," while Defendants are "insulated from this competition[.]" Doc. No. 31 at 9.

B. No-Hire Restraints

Plaintiffs also allege that Defendants proposed multiple no-hire agreements to them from 2014 to 2016 in exchange for spillover assignments, but Plaintiffs "rejected each proposal." *Id.* ¶ 146. Plaintiffs "believe[] that other direct competitors of AMN have felt constrained to accept its proposed no-hire agreements, and that AMN proposes, monitors and enforces these agreements." *Id.* ¶ 157. In fact, Plaintiffs are aware of facts which confirm that at least one other provider of travelers, Host Healthcare, Inc. ("Host") agreed to a unilateral no-hire agreement. *Id.* ¶¶ 158-59; 171. By enforcing the no-poaching and no-hire restraints, Defendants have "established and operated a non-reciprocal employers' cartel in the medical-traveler markets." *Id.* ¶ 297.

C. Employee Restraints & Sham Litigation

Moreover, Plaintiffs claim that in order to reinforce their no-poaching restraints, Defendants require "all of [their] travelers, recruiters and other employees to accept broadly worded non-solicitation **[*8]** covenants and trade-secret covenants as conditions of their employment at AMN[.]" *Id.* ¶ 172. The alleged employee restraints provide that the names and contact information of Defendants' employees are "classified as AMN's trade secrets, and the designation applies to AMN's present employees as well as all other travelers enrolled on its rosters, including those who have no current assignment from AMN." *Id.* ¶ 173. The employee restraints also include "broad non-solicitation covenants, which forbid any former employee of AMN to solicit any of its designated 'employees' for one year or eighteen months[.]" *Id.*

Plaintiffs allege that if a recruiter working for Defendants accepts employment from a rival provider, and contacts any of the travelers they designate as their trade secrets, Defendants threaten to initiate, and on four occasions have initiated, "objectively baseless claims against both the recruiter and [their] rival[.]" *Id.* ¶ 182. In October 2015, Defendants sued Plaintiffs, and two of Defendants' former recruiters who came to work for Plaintiffs, in California state court. *Id.* ¶ 193. The Superior Court determined in April 2017 that Defendants' claims in the state court action **[*9]** were both "objectively baseless" and "subjectively baseless[.]" *Id.* ¶ 205.

D. Software Platform Restraints and Exclusive Dealings Contracts

Plaintiffs further allege that Defendants use two other kinds of contractual restraints: (1) restrictive covenants in their software-platform agreements and vendor-provider agreements; and (2) mandatory exclusive-dealing contracts with large hospitals. *Id.* ¶ 226. As a result of Defendants' "exclusive-dealing contracts and software-platform sales, AMN has foreclosed competition for 50% of all sales of medical-traveler services in several of the largest, most lucrative regional submarkets, including the Greater Los Angeles Metropolitan Area; the San Francisco Bay Area; the Greater Washington, D.C. Metropolitan Area; [and] the Greater Baltimore Metropolitan Area[.]" *Id.* ¶ 229. Additionally, Defendants have used these practices to substantially foreclose competition in the following regional submarkets: Hawaii (87% market foreclosure); Nebraska (83%); Maine (83%); Vermont (80%); Arkansas (73%); Montana (67%); Nevada (64%); and New Hampshire (61%). *Id.* ¶ 230. "These restrictive conditions exist principally to protect AMN from competitive pressures," yet **[*10]** the conditions "prevent rival sellers from offering innovative or more competitive terms of service and from providing more responsive service[.]" *Id.* ¶ 227.

E. Summary of Plaintiffs' Allegations

In sum, Plaintiffs assert that the "cumulative effect of AMN's no-poaching restraints and Employee Restraints is pernicious and exclusionary for AMN's rivals: the rivals cannot solicit any of AMN's employees, and AMN's recruiters, who are best placed to solicit these employees, dare not leave AMN to work for any rival." *Id.* ¶ 219. "There is therefore a chronic, worsening shortage of available travelers and only one conspicuously large pool of them—AMN's pool." *Id.* ¶ 221. Defendants have utilized "unlawful trade restraints and baseless litigation to prevent and discourage [their] rivals from seeking to make hires from this pool. [Their] purpose is to remain the only provider that can offer such as pool." *Id.*

PROCEDURAL HISTORY

Plaintiffs commenced the instant action on February 2, 2017. *See* Doc. No. 1. Defendants previously moved to dismiss Plaintiffs' First Amended Complaint ("FAC"). *See* Doc. No. 15. The Court held a hearing on Defendants' motion on July 14, 2017 and entertained the oral arguments **[*11]** of counsel. *See* Doc. No. 20. The Court took the matter under submission for further review and consideration, and issued an order granting in part Defendants' motion to dismiss Plaintiffs' FAC. *See* Doc. No. 22. Specifically, the Court found that Plaintiffs failed to sufficiently allege antitrust standing, a requisite element of their Sherman Act claims. *See id.* at 8. The Court deferred ruling on Plaintiffs' state law claims until Plaintiffs could sufficiently allege a federal claim. *See id.*[3]

On January 8, 2018, Plaintiffs filed their SAC asserting six causes of action for: (1) *per se* violations of *Section 1* of the Sherman Act; (2) quick-look/rule of reason violations of *Section 1* of the Sherman Act; (3) attempted monopolization in violation of *Section 2* of the Sherman Act; (4) violations of the *California Cartwright Act*; (5) Tortious Interference with Prospective Economic Relations; and (6) violations of California's *Unfair Competition Law* ("UCL"). *See* SAC. On February 5, 2018, Defendants filed the instant motion, seeking to dismiss Plaintiffs' SAC with prejudice. *See* Doc. No. 30.

LEGAL STANDARD

A *Rule 12(b)(6)* motion to dismiss tests the sufficiency of the complaint. *Navarro v. Block, 250 F.3d 729, 732 (9th Cir. 2001)*. A pleading must contain "a short and plain statement of the claim **[*12]** showing that the pleader is entitled to relief. . . ." *Fed. R. Civ. P. 8(a)(2)*. However, plaintiffs must also plead "enough facts to state a claim to relief that is plausible on its face." *Fed. R. Civ. P. 12(b)(6)*; *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct.*

---

[3] Because the Court determined that Plaintiffs failed to sufficiently allege antitrust standing in their FAC, the Court did not address the merits of Plaintiffs' claims. The parties now wish to incorporate by reference arguments made in their respective briefs regarding Plaintiffs' FAC. As such, the Court cites to such documents where relevant.

1955, 167 L. Ed. 2d 929 (2007). The plausibility standard thus demands more than a formulaic recitation of the elements of a cause of action, or naked assertions devoid of further factual enhancement. Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009). Instead, the complaint "must contain allegations of underlying facts sufficient to give fair notice and to enable the opposing party to defend itself effectively." Starr v. Baca, 652 F.3d 1202, 1216 (9th Cir. 2011).

In reviewing a motion to dismiss under Rule 12(b)(6), courts must assume the truth of all factual allegations and must construe them in the light most favorable to the nonmoving party. Cahill v. Liberty Mut. Ins. Co., 80 F.3d 336, 337-38 (9th Cir. 1996). The court need not take legal conclusions as true merely because they are cast in the form of factual allegations. Roberts v. Corrothers, 812 F.2d 1173, 1177 (9th Cir. 1987). Similarly, "conclusory allegations of law and unwarranted inferences are not sufficient to defeat a motion to dismiss." Pareto v. FDIC, 139 F.3d 696, 699 (9th Cir. 1998).

In determining the propriety of a Rule 12(b)(6) dismissal, courts generally may not look beyond the complaint for additional facts. United States v. Ritchie, 342 F.3d 903, 908 (9th Cir. 2003). "A court may, however, consider certain materials—documents attached to the complaint, documents incorporated by reference in the complaint, or matters of judicial **[*13]** notice—without converting the motion to dismiss into a motion for summary judgment." *Id.; see also* Lee v. City of Los Angeles, 250 F.3d 668, 688 (9th Cir. 2001). Where dismissal is appropriate, a court should grant leave to amend unless the plaintiff could not possibly cure the defects in the pleading. Knappenberger v. City of Phoenix, 566 F.3d 936, 942 (9th Cir. 2009).

Discussion

Defendants move to dismiss Plaintiffs' SAC in its entirety, arguing that Plaintiffs fail to allege facts showing that they suffered antitrust injury, and that Plaintiffs fail to sufficiently plead each of their six causes of action. *See* Doc. No. 30-1. The Court addresses Defendants' arguments in turn.

A. Antitrust Injury

As a threshold matter, Defendants argue that Plaintiffs have again failed to allege antitrust injury. *See* Doc. No. 30-1 at 3. The Court previously found Plaintiffs' allegations regarding antirust injury insufficient. *See* Doc. No. 22. Plaintiffs assert that they have cured these deficiencies in their SAC by alleging two types of harm: (1) exclusionary harm; and (2) retaliatory harm. *See* SAC ¶ 262.

"Private suits to enforce the Sherman Act are authorized by Section 4 of the Clayton Act, 15 U.S.C. § 15(a), which provides that 'any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws may sue **[*14]** therefor . . . .'" Knevelbaard Dairies v. Kraft Foods, Inc., 232 F.3d 979, 987 (9th Cir. 2000). The Supreme Court has interpreted "any person" to mean any person who has suffered an "*antitrust* injury, which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful." Atl. Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 334, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990) (quoting Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977) (emphasis in original)). "An injury caused by an antitrust violation will not count as an antitrust injury 'unless it is attributable to an anti-competitive aspect of the practice under scrutiny.'" Int'l Longshore and Warehouse Union v. ICTSI Or., Inc., 863 F.3d 1178, 1186 (9th Cir. 2017) (quoting Atl. Richfield Co., 495 U.S. at 334). "If the injury flows from aspects of the defendant's conduct that are beneficial or neutral to competition, there is no antitrust injury, even if the defendant's conduct is illegal per se." Rebel Oil Co., Inc. v. Atl. Richfield Co., 51 F.3d 1421, 1433 (9th Cir. 1995).

In determining whether a plaintiff has antitrust standing, the Ninth Circuit has outlined various factors for courts to consider: (1) whether the plaintiff's injury is of "the type the antitrust laws were intended to forestall;" (2) the directness of the injury; (3) the speculative nature of the harm; (4) the risk of duplicative recovery; and (5) the complexity of apportioning damages. Knevelbaard Dairies, 232 F.3d at 987. "A showing of the first factor—antitrust injury—is 'necessary, but not always sufficient, to establishing standing under [section] 4 [of **[*15]** the Clayton Act].'" Tawfilis v. Allergan, Inc., 157 F. Supp. 3d 853, 862 (C.D. Cal. 2015) (citing Am. Ad Mgmt. Inc. v. Gen. Tel. Co. of Cal., 190 F.3d 1051, 1055 (9th Cir. 1999) (internal quotation marks and citation omitted)). The Ninth Circuit also requires "that the injured party be a participant in the same market as the alleged malefactors." Bhan v. NME Hosps., Inc., 772 F.2d 1467, 1470 (9th Cir. 1985). "In other words, the party alleging the injury must be either a consumer of the alleged violator's goods or services or a competitor of the alleged violator in the restrained market." Glen Holly Entm't, Inc. v. Tektronix, Inc., 352 F.3d 367, 372 (9th Cir. 2003) (citation omitted).

1. Exclusionary Harm

Plaintiffs first contend that Defendants utilize various anticompetitive practices to impede their rivals, including Plaintiffs.[4] Defendants argue that Plaintiffs fail to allege antitrust standing because Plaintiffs' allegations are conclusory and speculative, Plaintiffs stand to gain from the challenged practices, and Plaintiffs' injury does not flow from any anticompetitive aspect of conduct prohibited under the laws. *See* Doc. No. 30-1 at 5-10.

Here, contrary to Defendants' contention that Plaintiffs' allegations are "conclusory" and "speculative," the Court finds that Plaintiffs have alleged with the requisite specificity facts sufficient to support antitrust injury. Doc. No. 30-1 at 5; *cf.* Twombly, 550 U.S. at 555 (noting a plaintiff cannot merely rely on "labels and conclusions."). For **[*16]** example, Plaintiffs allege that from 2010 to May 2015, Defendants' "restraints appreciably compromised and hindered Aya's efforts to form a large, varied pool of travelers that could compete for large contracts and compete generally in the medical-traveler markets." *Id.* ¶ 263. As a result, Plaintiffs "lost opportunities and profits" during this five-year period of time. *Id.* Plaintiffs also claim they continue to suffer harm after ceasing to adhere to Defendants' no-poaching restraints because "[o]ther providers continually solicit Aya's recruits, but not AMN's recruiters." *Id.* ¶ 276. Thus, Defendants' no-poaching restraints place Plaintiffs at a competitive disadvantage because they must "offer inducements to their best employees to avoid losing them to rivals," while Defendants are "insulated from this competition[.]" Doc. No. 31 at 9.[5]

Moreover, Plaintiffs allege that Defendants enforce employee restraints and conduct sham litigation in order to: (1) disrupt rivals' operations and subject them to unreasonable litigation costs; (2) cast a chilling effect on employees and rival providers in the affected markets; and (3) force rivals to assent to unlawful demands. *See id.* ¶ 208. Plaintiffs **[*17]** claim that through Defendants' "exclusive-dealing contracts and softwareplatform sales, AMN has foreclosed competition for 50% of all sales of medical-traveler services in several of the largest, most lucrative regional submarkets[.]" *Id.* ¶ 229. These conditions "prevent rival sellers from offering innovative or more competitive terms of service and from providing more responsive service[.]" *Id.* ¶ 227. As such, Plaintiffs' allegations are sufficiently detailed.

Further, Defendants' argument that Plaintiffs stand to gain from the challenged practices is unavailing. *See* Doc. No. 30-1 at 6-7. The Ninth Circuit has indicated that "[t]here can be no antitrust injury if the plaintiff stands to gain from the alleged unlawful conduct." Am. Ad Mgmt., Inc., 190 F.3d at 1056. However, Plaintiffs expressly allege that Defendants' no-poaching restraints prevent rivals, including Plaintiffs, from offering traveler pools that can meet the requirements of large customers and compete against Defendants' pool. *See* SAC ¶¶ 126-28, 145. Moreover, Defendants enforce their employee restraints and conduct sham litigation not to improve their services, but to

[4] Defendants do not address Plaintiffs' cumulative exclusionary effect argument, but rather address each of the challenged practices in isolation.

[5] Defendants assert that Plaintiffs cannot show injury-in-fact, as Plaintiffs have alleged no facts to show that they suffered any loss prior to May 2015, and, after that date, Plaintiffs refused to abide by the restrictions. Doc. No. 30-1 at 3 n.4. The Court disagrees. Plaintiffs specifically allege that they lost opportunities and profits from 2010 to May 2015, and continue to suffer harm because other providers solicit Plaintiffs' recruiters, while Defendants are immune from such solicitations. *See* SAC ¶¶ 263, 276. As such, the Court finds that Plaintiffs' allegations relating to the no-poaching restraints are sufficient to show injury-in-fact.

"disrupt" their "rivals' operations and undermine their ability to recruit qualified **[*18]** travelers." *Id.* ¶ 213. Defendants charge major hospital networks and large hospitals "prices that are significantly and durably higher than competitive prices, yet [their] customers largely do not turn to other providers because they believe that they require access to [their] pool of medical travelers, software platforms, and subcontractor network." *Id.* ¶ 97. As such, the Court is "satisfied that [Plaintiffs] stand to suffer, not gain," from Defendants' conduct. *Am. Ad. Mgmt., Inc., 190 F.3d at 1056*.

Finally, Defendants contend that Plaintiffs' alleged injury does not flow from an anticompetitive aspect of conduct prohibited by the antitrust laws. *See* Doc. No. 30-1 at 6. However, Plaintiffs claim that the various trade restraints "have prevented or hindered other providers from developing their own competitive pools of medical-travelers." SAC ¶ 260. As a result, "AMN calls the shots, the large hospitals must submit to its pricing and other terms, its employees become its captive, and numerous smaller rivals are deprived of the opportunity to cobble together better prices, alternative terms and alternative service arrangements for the same pool of qualified travelers." *Id.* "AMN has used a medley of trade restraints in **[*19]** ways that have harmed competition and reinforced its market power." *Id.* ¶ 261. "[T]he central purpose of the antitrust laws, state and federal, is to preserve competition. It is competition . . . that these statutes recognize as vital to the public interest." *Knevelbaard Dairies, 232 F.3d at 988*. Because Plaintiffs allege that Defendants' restraints and practices "prevent competition," Plaintiffs have sufficiently demonstrated that their injury is of the type that the antitrust laws were intended to prevent. Doc. No. 31 at 2.

In sum, Plaintiffs have sufficiently alleged that as a consequence of the alleged restraints, Plaintiffs and other rival suppliers have been prevented from developing their own traveler pools, and are thus unable to compete for business in the medical-traveler markets. *See* Areeda ¶ 348a[6] ("[A] rival clearly has standing to challenge the conduct of rival(s) that . . . tends to exclude rivals from the market, thus leading to reduced output and higher prices."); *Am. Ad. Mgmt., Inc., 190 F.3d at 1057* ("[C]onsumers and competitors are most likely to suffer antitrust injury"). Accordingly, viewing these allegations in the light most favorable to Plaintiffs, the Court finds that Plaintiffs have satisfied the antitrust standing requirement on **[*20]** the basis of exclusionary harm. *See Cascade Health Sols. v. PeaceHealth, 515 F.3d 883, 894 (9th Cir. 2008)* (concluding that a rival suffers antitrust injury when a defendant's "[a]nticompetitive conduct . . . tends to impair the opportunities of rivals and either does not further competition on the merits or does so in an unnecessarily restrictive way."); *Catch Curve, Inc. v. Venali, Inc., 519 F. Supp. 2d 1028, 1035-36 (C.D. Cal. 2007)* (finding competitor sufficiently pleaded antitrust injury where the defendant's conduct "rendered competitors less competitive" and had a "dangerous probability of stifling innovation in the market.") (internal quotation marks and alterations omitted).

2. Retaliatory Harm

Plaintiffs also assert that they have suffered retaliatory harm. Specifically, Defendants have prevailed on "virtually all rival providers" to accept their no-poaching restraints in exchange for spillover work. Doc. No. 31 at 13. Plaintiffs claim that they have "broken ranks with this *de facto* employers' cartel." *Id.* As a result, Defendants subjected Plaintiffs to "costly retaliatory measures to make an example[.]" *Id.* Defendants assert Plaintiffs' amended allegations are insufficient to sufficiently allege retaliatory harm. *See* Doc. No. **[*21]** 32 at 5.

Plaintiffs rely primarily on a decision from the Seventh Circuit, wherein the court stated that "[l]osses inflicted by a cartel in retaliation for an attempt by one member to compete with the others are certainly compensable under the antitrust laws, for otherwise an effective deterrent to successful cartelization would be eliminated." *Hammes v. AAMCO Transmissions, Inc., 33 F.3d 774, 783 (7th Cir. 1994)*; *see also* *Big Bear Lodging Ass'n v. Snow Summit, Inc., 182 F.3d 1096, 1102 (9th Cir. 1999)* (noting that retaliation by a cartel member against one member attempting to compete is compensable). The Seventh Circuit later clarified that *Hammes* "holds that antitrust damages may result if a cartel inflicts damage on *one of its own members* in retaliation for that member's attempt to undercut the

---

[6] Citations to "Areeda" refer to PHILLIP E. AREEDA & HERBERT HOVENKAMP, AN ANALYSIS OF ANTITRUST PRINCIPLES AND THEIR APPLICATION (4th ed. 2013).

cartel's prices and therefore lower consumer prices." *James Cape & Sons Co. v. PCC Constr. Co., 453 F.3d 396, 401 (7th Cir. 2006)* (emphasis added). The Seventh Circuit went on to note that in the case at bar, the heart of the plaintiff's claim "is that it was never a member of the cartel in the first place;" thus, "[t]he *Hammes* case is . . . inapplicable here." *Id.*

Here, Plaintiffs allege in their SAC that they previously were a member of Defendants' alleged employers' cartel until they decided to compete on the merits with Defendants—a point that Plaintiffs had not sufficiently clarified in the FAC. *See* SAC **[*22]** ¶¶ 263-73. Plaintiffs explain that after they ceased adhering to the no-poaching restraints, Defendants "subjected Aya to various kinds of retaliatory conduct" including: (1) terminating all subcontractor agreements with Plaintiffs; (2) interfering with Plaintiffs' dealings with existing and prospective customers; and (3) litigations "objectively baseless claims" against Plaintiffs and four of Plaintiffs' employees. *Id.* ¶ 281. Accordingly, in light of Plaintiffs' allegations that they were a member of Defendants' alleged cartel, and because retaliation by a cartel member against a member's attempt to compete is compensable, the Court finds that Plaintiffs have also sufficiently alleged antitrust injury on the basis of retaliatory harm. *See* *Big Bear Lodging Ass'n, 182 F.3d at 1102*.[7]

B. Sherman Act *Section 1* and Cartwright Act Claims

Plaintiffs assert two claims pursuant to *Section 1* of the Sherman Act: a *per se* claim (first cause of action) and a quick-look/rule of reason claim (second cause of action). *See* SAC. Plaintiffs further assert a Cartwright Act claim pursuant to *California Business & Professions Code §§ 16720 et seq.* based on the same conduct that allegedly violates *Section 1* of the Sherman Act (fourth cause of action).[8] *See id.*

Section 1 of the Sherman Act prohibits "[e]very contract, combination in the **[*23]** form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations. . . ." *15 U.S.C. § 1*; *see also* *Leegin Creative Leather Prods., Inc. v. PSKS, Inc., 551 U.S. 877, 885, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007)* (noting that *§ 1* of the Sherman Act outlaws unreasonable restraints of trade). To establish liability under *§ 1*, a plaintiff must show: "(1) there was an agreement, conspiracy, or combination between two or more entities; (2) the agreement was an unreasonable restraint of trade . . .; and (3) the restraint affected interstate commerce." *Am. Ad Mgmt. Inc. v. GTE Corp., 92 F.3d 781, 788 (9th Cir. 1996)*. Defendants focus exclusively on the second element—whether Plaintiffs have sufficiently alleged an unreasonable restraint of trade.

"To sufficiently plead an unreasonable restraint, a plaintiff must include allegations showing that the restraint will fail under one of three rules of analysis: the rule of reason, per se, or quick look." *United States v. eBay, Inc., 968 F. Supp. 2d 1030, 1037 (N.D. Cal. 2013)*. First, the rule of reason is the default level of analysis, requiring courts to examine "a variety of factors, including specific information about the relevant business, its condition before and after the restraint was imposed, and the restraint's history, nature, and effect." *State Oil Co. v. Khan, 522 U.S. 3, 10, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997)*. "The rule of reason requires the factfinder to decide whether under all the **[*24]** circumstances of the case the agreement imposes an unreasonable restraint on competition." *Los Angeles Mem'l Coliseum Comm'n v. Nat'l Football League, 726 F.2d 1381, 1387 (9th Cir. 1984)* (citing *Arizona v. Maricopa County Medical Society, 457 U.S. 332, 343, 102 S. Ct. 2466, 73 L. Ed. 2d 48 (1982))*. The purpose of the analysis is to "distinguish[] between restraints with anticompetitive effect that are harmful to the consumer and restraints stimulating competition that are in the consumer's best interest." *Leegin Creative Leather Prods., Inc., 551 U.S. at 886*.

[7] In light of the Court's conclusion that Plaintiffs have sufficiently alleged antitrust injury, the Court need not address Plaintiffs' third theory of antitrust injury mentioned in Plaintiffs' opposition to the instant motion. *See* Doc. No. 31 at 14.

[8] "[T]he analysis under California's ***antitrust law*** mirrors the analysis under federal law because the Cartwright Act was modeled after the Sherman Act." *Cnty. of Tuolumne v. Sonora Cmty. Hosp., 236 F.3d 1148, 1160 (9th Cir. 2001)*. "Thus, if Plaintiffs plead a valid Sherman Act claim, they likewise plead a valid Cartwright Act claim." *In re High-Tech Emp. Antitrust Litig., 856 F. Supp. 2d 1103, 1114 (N.D. Cal. 2012)*.

Second, in limited circumstances, however, such a detailed inquiry under the rule of reason analysis is unnecessary, where the restraint at issue is "so plainly anticompetitive that no elaborate study of the industry is needed to establish their illegality." *Texaco, Inc. v. Dagher, 547 U.S. 1, 5, 8, 126 S. Ct. 1276, 164 L. Ed. 2d 1 (2006)* (quoting *National Soc. of Professional Engineers v. United States, 435 U.S. 679, 692, 98 S. Ct. 1355, 55 L. Ed. 2d 637 (1978))*. A restraint will only be considered *per se* unreasonable if it "always or almost always tend[s] to restrict competition and decrease output" and lacks redeeming value. *Leegin Creative Leather Prods., Inc., 551 U.S. at 886* (internal quotations omitted). Such restraints are illegal *per se*, and once established, do not require any industry analysis otherwise required under the rule of reason.

Third, "[f]alling between the rule of reason and per se condemnation, the 'quick look' analysis is an abbreviated form of the rule of reason that may be used when 'an observer with even a rudimentary understanding of economics could conclude that the arrangements in question could **[*25]** have an anticompetitive effect on customers and markets." *eBay, 968 F. Supp. 2d at 1037* (citing *Cal. Dental Ass'n v. Fed. Trade Comm'n, 526 U.S. 756, 770, 119 S. Ct. 1604, 143 L. Ed. 2d 935 (1999))*.

Defendants argue that the Court should dismiss Plaintiffs' claims arising under *Section 1* of the Sherman Act because Plaintiffs' allegations are insufficient to state a claim under all three rules of analysis. *See* Doc. No. 30-1 at 10, 17. The Court addresses Plaintiffs' *per se* claims before turning to Plaintiffs' quick-look and/or rule of reason claims.

1. ***Per Se* Claims**

Plaintiffs allege that Defendants' conduct constitutes two separate *per se* violations of *Section 1 of the Sherman Act*. SAC ¶¶ 295-97. First, Plaintiffs claim that Defendants' no-poaching restraints are unlawful *per se. See id.* ¶ 295. Second, Plaintiffs contend that Defendants have prevailed on at least one rival to accept a unilateral no-hire agreement, which is also unlawful *per se. See id.* ¶ 296. "By enforcing these restraints, AMN has established and operated a non-reciprocal employers' cartel in the medical-traveler markets." *Id.* ¶ 297. Defendants argue that the no-poaching restraints and alleged employers' cartel do not fall within the *per se* category; thus, Plaintiffs' first cause of action should be dismissed with prejudice. *See* Doc. No. 30-1 at 10.

A. No-Poaching Restraints

Plaintiffs **[*26]** allege that Defendants require their subcontractor providers and software-platform providers "to accept unilateral no-poaching agreements[.]" SAC ¶ 123. The no-poaching restraints "forbid the rival providers *in perpetuity* to initiate job offers or otherwise solicit any of AMN's designated 'employees,' no matter how or where employed, and even when not currently on assignment for AMN." *Id.* (emphasis in original). "Although these restraints appear in contracts that memorialize legitimate business collaborations, they are not 'ancillary' to the collaborations in question." Doc. No. 31 at 17.

Defendants assert that the alleged no-poaching restrictions must be analyzed under the rule of reason standard for three reasons. *See* Doc. No. 30-1 at 11. First, the no-poaching restraints are part of vertical agreements. *See id.* Second, "the rule of reason is the standard for testing restrictive covenants ancillary to a legitimate transaction." *Id.* Third, "[c]ourts do not apply the *per se* standard in cases where the economic impact of the practice is not immediately obvious." *Id.* at 15. The Court proceeds by: (i) analyzing the character of the subcontractor agreements; and (ii) analyzing the character of the **[*27]** no-poaching restraints.

i. Characterizing the Subcontractor Agreements

Defendants argue that the subcontractor agreements are "collaboration agreements" which are which are part of "essentially vertical arrangements[.]" *Id.* at 15, 11. In their SAC, Plaintiffs argue that the subcontractor agreements are properly characterized as joint ventures.[9] *See* SAC ¶¶ 136-145. As the parties acknowledge, the characterization of the agreements in question impacts which rule of analysis applies.

"[T]he Supreme Court has distinguished between agreements made up and down a supply chain, such as between a manufacturer and a retailer ('vertical agreements'), and agreements made among competitors ('horizontal agreements')." *In re Musical Instruments & Equip. Antitrust Litig., 798 F.3d 1186, 1191 (9th Cir. 2015)*. A horizontal agreement or restraint is "[a]n agreement among competitors on the way in which they will compete with one another." *Nat'l Collegiate Athletic Ass'n v. Bd. Of Regents of the Univ. of Okla., 468 U.S. 85, 99, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (1984)* (hereinafter "*NCAA*"); *see also Bus. Elecs. Corp. v. Sharp Elecs. Corp., 485 U.S. 717, 730, 108 S. Ct. 1515, 99 L. Ed. 2d 808 (1988)* ("Restraints imposed by agreement between competitors have traditionally been denominated as horizontal restraints"). Unlike horizontal agreements among competitors, "vertical agreements between actual or would-be suppliers and customers are everywhere." Areeda ¶ 1437a. "[B]y definition vertically related firms exist in **[*28]** a buyer-seller relationship, and agreements are essential to buying and selling." Areeda ¶ 1902d. A third category, referred to as a joint venture, is "a form of organization in which two or more firms agree to cooperate in producing some input that they would otherwise have produced individually, acquired on the market, or perhaps done without." Areeda ¶ 2100(a). Importantly, "*Section 1* prohibits agreements that unreasonably restrain trade, no matter the configuration they take or the labels we give them." *In re Musical Instruments, 798 F.3d at 1192*.

Here, taking Plaintiffs' allegations as true, the Court finds that the subcontractor agreements entered into by Defendants and various rival providers can plausibly be characterized as joint ventures. Notably, Plaintiffs allege that "AMN prevails on its subcontractors (rival providers) to accept its trade restraints because many depend upon it for 'spillover' assignments (assignments that AMN refers to another provider when its own travelers are otherwise engaged)[.]" SAC ¶ 119. Unlike agreements made up and down a supply chain between buyers and sellers, Defendants use their no-poaching restraints in their "contracts with virtually all other providers, thereby compromising their ability **[*29]** to compete freely to hire qualified travelers and sell medical-traveler services to hospitals." *Id.* ¶ 143. Further, "in a purely vertical contract the parties to the agreement are not competitors." Areeda ¶ 1902d. Plaintiffs explain that in order to remain in business, "[m]any of the rival providers depend on AMN's spillover assignments and/or software platform assignments and could not survive without them." SAC ¶ 144 n.8.

Accordingly, the Court finds that Plaintiffs have sufficiently alleged that the agreements in question can plausibly be characterized as joint ventures. Therefore, dismissal on the basis that the subcontractor agreements are vertical agreements is improper.

ii. Joint Venture Analysis

Defendants contend that courts "have always evaluated restraints related to collaborations, joint ventures or transactions under the rule of reason." Doc. No. 30-1 at 13. Plaintiffs, in opposition, claim that legitimate joint venture agreements sometimes include naked[10] restraints of trade—i.e., restraints within legitimate joint venture agreements that (1) foreclose some form of direct competition between the parties, but (2) are not reasonably ancillary to their lawful joint-venture. Doc. **[*30]** No. 31 at 17. As explained in Plaintiffs' opposition to Defendants' previous motion to dismiss, "a naked restraint, even though included in a legitimate joint-venture agreement, can be

---

[9] In opposition to the instant motion, Plaintiffs indicate that they have "always acknowledged that the agreements between AMN and its subcontractors/rival providers can be characterized as vertical arrangements[.]" Doc. No. 31 at 19. However, Plaintiffs explain in their SAC that a joint venture "is any agreement, *vertical* or horizontal, by which two independent businesses collaborate on a commercial venture in order to develop or furnish products and/or services." SAC ¶ 136 n.7 (emphasis added). As such, the Court does not read Plaintiffs' statement as an admission that Plaintiffs believe the agreements in question are in fact, vertical agreements. *See also* Doc. No. 17 at 2 ("AMN and rival providers participate in legitimate joint-ventures[.]").

[10] "Naked" restraints have "no purpose except stifling of competition." *White Motor v. United States, 372 U.S. 253, 263, 83 S. Ct. 696, 9 L. Ed. 2d 738 (1963)*.

condemned as a *per se* violation of Section 1." Doc. No. 17 at 7; *see also* In re ATM Fee Antitrust Litig., 554 F. Supp. 2d 1003, 1012 (N.D. Cal. 2008) (citing NCAA, 468 U.S. at 113-15).

"***Antitrust law*** doesn't frown on all joint ventures among competitors—far from it. If a joint venture benefits consumers and doesn't violate any applicable per se rules, it will often be perfectly legal." Freeman v. San Diego Ass'n of Realtors, 322 F.3d 1133, 1157 (9th Cir. 2003). "When a plaintiff challenges the joint venture itself, the venture must be judged under the rule of reason standard." In re ATM Fee Antitrust Litig., 554 F. Supp. 2d at 1012 (citing Dagher, 547 U.S. at 6 n.1). However, "[w]hen a plaintiff challenges a provision or practice of the venture as anticompetitive, then per se review may be appropriate depending on the circumstances." *Id.*

Specifically, when a plaintiff challenges a particular restraint of a joint venture that is not economically integrated (i.e., where individual firms function as an economic unit or single entity),[11] the analytical framework is as follows: first, courts consider whether the challenged restraint is a core activity or function of the joint venture (if yes, rule of reason applies); second, if not, courts consider whether the restraint **[*31]** is of a type that is potentially subject to *per se* treatment (if not, rule of reason applies); third, if the restraint is of a type potentially subject to *per se* treatment, courts consider whether the restraint is necessary or reasonably ancillary to achieving a procompetitive objective of the joint venture (if yes, rule of reason applies; if not, *per se* rule applies). *See* id. at 1012-1016; *see also* Med. Ctr. at Elizabeth Place, LLC v. Premier Health Partners, No. 12-CV-26, 2017 U.S. Dist. LEXIS 126499, 2017 WL 3433131, at *14 (S.D. Ohio Aug. 9, 2017) (diagraming analytical framework for joint venture analysis). "Thus, the Supreme Court permits plaintiffs to disaggregate particular conduct from the venture as a whole, and submit that conduct to individual scrutiny." In re ATM Fee Antitrust Litig., 554 F. Supp. 2d at 1012; *see also* Areeda ¶ 2100(f) (explaining the disaggregation of joint venture provisions).

Here, Plaintiffs challenge the no-poaching provisions of the subcontractor agreements—not the joint ventures themselves. In fact, Plaintiffs refer to the joint ventures as "legitimate business collaborations." Doc. No. 31 at 17. As such, Plaintiffs seek to disaggregate specific conduct from the ventures as a whole, and submit that conduct to scrutiny by the Court. Contrary to Defendants' contention, "[t]he Court cannot therefore hold that because the [no-poaching restraints were] established through **[*32]** a joint venture, ergo rule of reason applies." In re ATM Fee Antitrust Litig., 554 F. Supp. 2d at 1012. "Rather, the Court must go further, and inquire into the nature of the venture and the role of the restraint." *Id.*

a. Core Function of Joint Ventures

The Supreme Court has indicated that the *per se* standard is not appropriate if a plaintiff challenges "the core activity of the joint venture itself[.]" Dagher, 547 U.S. at 7. In *Dagher*, the plaintiffs challenged two oil companies' agreement to set a unified price for their gasoline, a practice identified as the venture's core activity. *See* id. at 6-7. Thus, the Supreme Court applied the rule of reason analysis. *See id.*

Here, though not specifically addressed by either party, Plaintiffs do not challenge the core function of the joint ventures. As noted above, Plaintiffs concede that the various agreements are "legitimate" and ensure that the staffing needs of hospitals are met. Doc. No. 31 at 17. Plaintiffs instead challenge the no-poaching restraints, included in these legitimate agreements, as "unlawful restraints of competition between rival employers[.]" *Id.* As such, the Court proceeds to analyze the character of the no-poaching restraints.

b. Characterizing the No-Poaching Restraints

Plaintiffs allege that the no-poaching **[*33]** restraints are horizontal restraints of trade because they permanently eliminate one kind of direct rivalry between competitors. *See* Doc. No. 31 at 19.

Horizontal market allocation agreements typically constitute a *per se* violation of Section 1. *See* United States v. Topco Assocs., 405 U.S. 596, 608, 92 S. Ct. 1126, 31 L. Ed. 2d 515 (1972); United States v. Brown, 936 F.2d 1042, 1044-45 (9th Cir. 2001) ("A market allocation agreement between two companies at the same market level is a classic per se antitrust violation."). "An agreement among employers that they will not compete against each other

[11] The parties do not argue that Defendants and their rivals function as a unit or single entity.

for the services of a particular employee or prospective employee is, in fact, a service division agreement, analogous to a product division agreement." Areeda ¶ 2013b. "Such arrangements must be distinguished from noncompetition agreements that prevent an employee from seeking employment from a rival for a given period after the employee's present employment relationship is terminated. These arrangements are purely vertical, for they involve a single employer's agreement with one or more employees." *Id.*

Here, the Court finds that Plaintiffs' allegations concerning the no-poaching restraints are sufficient to allege that the restraints are of a type that are subject to *per se* treatment. *See* Med. Ctr. at Elizabeth Place, LLC, 2017 U.S. Dist. LEXIS 126499, 2017 WL 3433131, at *14. For example, Plaintiffs allege that Defendants collaborate **[*34]** with smaller, rival providers of medical travelers to deliver their services, which are governed by the subcontractor agreements. SAC ¶ 123. Although the subcontractor agreements are "legitimate," Plaintiffs claim that the non-poaching restraints are not reasonably ancillary to the agreements in which they appear. *Id.* ¶ 133. The no-poaching restraints "permanently prevent nearly all of AMN's direct competitors in the United States from soliciting any of its numerous employees for any purpose." *Id.* ¶ 134. These restraints are non-reciprocal; thus, Defendants are immune from these indefinite restraints. *See id.* Plaintiffs explain that Defendants' no-poaching restraints result in an agreement among rivals about how they will compete for employees.

Accordingly, in disaggregating the no-poaching restraints from the joint ventures, the Court finds that Plaintiffs' allegations, taken as true, are sufficient to allege a type of restraint subject to *per se* treatment. *See* eBay, 968 F. Supp. 2d at 1039. Thus, dismissal on this basis is inappropriate.

c. Whether the No-Poaching Restraints are Reasonably Ancillary to a Procompetitive Business Purpose

Defendants contend the no-poaching restraints are ancillary to legitimate **[*35]** business transactions, and thus must be analyzed under the rule of reason standard. *See* Doc. No. 30-1 at 11. In opposition, Plaintiffs assert that the restraints, "as worded and enforced, vastly exceed any possible scope or purpose of the collaborations in question and exist to prevent AMN's rivals from ever approaching anyone in its pool, even after the collaborations in question have ended." Doc. No. 31 at 19. Moreover, in their SAC, Plaintiffs provide the following hypothetical of Defendants' no-poaching restraints:

> Suppose a rival provider agrees one time to act as AMN's subcontractor. To do so, it must sign one of AMN's standard subcontractor agreements, which invariably include AMN's unilateral No-Poaching Restraint. Suppose AMN gives this rival only one assignment, say in 2010, and the rival performs it by sending a single traveler to a remote hospital in the Kansas prairie. Shortly afterwards, AMN terminates the agreement, or perhaps the rival does so. The rival thereafter remains expressly forbidden to initiate at any time in the future an employment discussion for any purpose with any of AMN's 8000 travelers or 2500 recruiters and other professionals, who are scattered across **[*36]** the United States. AMN, in contrast, labors under no reciprocal restraint.

SAC ¶ 132.

The Court's determination that Plaintiffs have sufficiently alleged that the nopoaching restraints, considered in isolation, are of a type subject to *per se* treatment "does not in and of itself indicate that per se treatment is imminent." eBay, 968 F. Supp. 2d at 1039. In order to make a rule determination, the Court must determine whether no poaching restraints are ancillary to a procompetitive business purpose. *See id.* (citing Broad. Music, Inc. v. Columbia Broad. Sys., Inc., 441 U.S. 1, 19-22, 99 S. Ct. 1551, 60 L. Ed. 2d 1 (1979)); *see also* Areeda ¶ 2013a (explaining that if agreements among employers not to compete for employees "are 'naked' and not immunized, they are illegal per se. . . ."). "[A] challenged restraint must have a reasonable procompetitive justification, related to the efficiency-enhancing purposes of the joint venture[.]" *Major League Baseball Props., Inc. v. Salvino, Inc., 542 F.3d 290, 339 (2d Cir. 2008)* (Sotomayor, J., concurring in the judgment). "If none exists, the challenged restraint must be evaluated on its own and may be per se illegal even if the remainder of the joint venture is entirely lawful." *Id.*

Additionally, "[t]o be ancillary, and hence exempt from the per se rule, an agreement eliminating competition must be subordinate and collateral to a separate, legitimate transaction," **[*37]** i.e., the restraint "serves to make the main transaction more effective in accomplishing its purpose." *Rothery Storage & Van Co. v. Atlas Van Lines, Inc., 792 F.2d 210, 224, 253 U.S. App. D.C. 142 (D.C. Cir. 1986)*. "If [the restraint] is so broad that part of the restraint suppresses competition without creating efficiency, the restraint is, to that extent, not ancillary." *Id.* As the Third Circuit has indicated,

> [t]he quintessential example of an ancillary restraint is a restrictive agreement that is an integral part of a joint venture. An agreement by two competing manufacturers to price a product identically, for instance, would be ancillary if manufacture of the product were a collaborative effort between the two firms and the pricing agreement could reasonably be viewed as a necessary condition of the joint venture, which increased output.

In re Ins. Brokerage Antitrust Litig., 618 F.3d 300, 345 (3d Cir. 2010); *see also* *Freeman, 322 F.3d at 1151*. The doctrine of ancillary restraints "seeks to distinguish between those restraints that are intended to promote the efficiencies of a joint venture and those that are simply unrelated." *Salvino, Inc., 542 F.3d at 338-39*.[12]

Moreover, the Court is mindful that the joint guidelines announced by the Department of Justice, Antitrust Division and the Federal Trade Commission in October 2016, make clear that an agreement made between **[*38]** rival employers not to solicit one another's employees will be prosecuted as a criminal violation of *Section 1* if it "is separate from or not reasonably necessary to a larger legitimate collaboration between the employers." *Joint Guidelines of the Department of Justice, Antitrust Division and the Federal Trade Commission* (October 2016).

Plaintiffs urge the Court to follow the district court's ruling in *eBay*. There, the government alleged that eBay and Intuit entered into a no-solicitation/no-hire agreement with each other. *See* *968 F. Supp. 2d at 1038*. The alleged agreement arose out of conversations between eBay executives and Scott Cook, founder of Intuit, who also served on eBay's board. *See* *id. at 1033-34*. The court found that the government had sufficiently alleged a horizontal market allocation agreement. *Id. at 1039*. The defendants argued that the agreement, though horizontal, was ancillary to a legitimate procompetitive business purpose (i.e., Mr. Cook's service on eBay's board), and therefore not amenable to *per se* treatment. *Id.* The government argued the agreement constituted a naked restraint of trade. *Id.* The court noted that just because the government labeled the agreement as "naked" did not make it so; but by the same token, **[*39]** the defendants' claim that the agreement is ancillary similarly does not make it so. *Id.* The court declined to determine at the pleading stage whether to apply the *per se* or rule of reason analysis. The court stated, "[t]hough the parties supply substantial legal argument to support their respective positions, they do so without the benefit of discovery, and thus without sufficient factual evidence to support their contentions." *Id. at 1039-40*. Thus, taking the plaintiff's allegations as true, the court could not determine as a matter of law that *per se* treatment would be inappropriate. *Id.*

Here, the Court finds the district court's reasoning in *eBay* to be persuasive. Defendants assert that the alleged agreement in *eBay* did not involve "any form or joint venture, sub-contract or collaboration." Doc. No. 32 at 7. While the alleged agreement did not involve a joint venture, the defendants in *eBay* did claim that the challenged restraint was ancillary to procompetitive business purposes. *See* *968 F. Supp. 2d at 1039*. Further, a plaintiff challenging a provision or practice of a joint venture can disaggregate such conduct and challenge it in isolation. *See* *In re ATM Litig., 554 F. Supp. 2d at 1012*. In doing so, courts "must consider the reasonably anticipated impact **[*40]** of the particular agreement under scrutiny—measured, of course, against the environment created by the joint venture. If the reasonably intended impact of an agreement is to reduce market output, then that agreement is naked notwithstanding its association with other productive joint activity." Areeda ¶ 1908b.

---

[12] The Court notes that Defendants assert that Plaintiffs have "no response to *NCAA* . . ., where the Supreme Court applied the rule of reason, even though the challenged provision restrained the ability of the members to compete on both price and output and was not 'necessary' to market the product." Doc. No. 32 at 7. As explained by the court in *In re ATM Fee Antitrust Litig.*, however, "the Ninth Circuit has since limited the reach of the *NCAA* decision" in *Freeman*. *554 F. Supp. 2d at 1015*. The Ninth Circuit has imposed "an additional burden on defendants, who must now prove not only that their venture requires horizontal restraints, but also that the particular restraint challenged is ancillary to the venture's legitimate aspects." *Id.; see also* *Freeman, 322 F.3d at 1157*. For the reasons discussed below, the Court is unable to determine at this stage of the proceedings whether the challenged restraints are ancillary to the venture's legitimate aspects.

Defendants further argue that Plaintiffs essentially admit "that this **type** of restraint would be ancillary (and judged by the rule of reason) if it were only narrower in scope and duration." Doc. No. 30-1 at 13 (emphasis in original). Defendants are unable "to find **even a single case** holding that a non-solicitation covenant included in a subcontract or joint venture arrangement (of any scope of duration) is *per se* unlawful." *Id.* (emphasis in original). However, courts have addressed the scope of restraints within the context of a larger agreement. In *Hanger v. Berkley Group, Inc.*, the district court distinguished *In re High-Tech Emp. Antitrust Litig., 856 F. Supp. 2d 1103 (N.D. Cal. 2012)*, and *eBay*. *No. 13-CV-113, 2015 U.S. Dist. LEXIS 68751, 2015 WL 3439255, at *7 (W.D. Va. May 28, 2015)*. The *Hanger* court noted that the challenged restraint at issue is "one piece of a global settlement agreement" ("GSA"), and "[i]t is clear from the terms of the GSA and the context in which it arose that [the challenged restraint] exists to keep the parties **[*41]** from becoming embroiled in future lawsuits[.]" *Id.* The court examined the language of the challenged restraint, which unlike *In re High-Tech Emp. Antitrust Litig*. and *eBay*, "did not contain a blanket, no cold calling or no solicitation agreement." *Id.* Instead, the language reflected an agreement to "honor each other's non-competition, non-solicitation and confidentiality agreements of which they have actual knowledge that are contained in written agreements that have not been held unenforceable by a court of competent jurisdiction as to the particular employee." *Id.* The court made a point to note that "because the restrictive covenants in the Berkley Group employment contracts *are narrowly drawn* in terms of substantive *scope, time and geography*, the alleged restraint posed by the GSA is correspondingly narrow." *Id.* (emphasis added).

Unlike *Hanger*, Plaintiffs allege that the no-poaching restraints last in perpetuity, thereby surviving termination of the joint venture agreements. SAC ¶ 123. The restraints bar rivals forever from soliciting any of Defendants' employees—including recruiters, corporate employees, and medical travelers, despite the fact that the purpose of these subcontractor **[*42]** agreements is for rival providers to send their medical travelers to Defendants' customers. *See id.* ¶¶ 124-28. Lastly, Plaintiffs allege that the no-poaching restraints apply to all of Defendants' "designated 'employees,' no matter how or where employed, and *even when not currently on assignment for AMN*[,]" while Defendants are not bound by the same restraint. *Id.* ¶ 123 (emphasis added).

In disaggregating the alleged no-poaching restraints here, the Court is unable to determine with certainty whether the restraints are ancillary to procompetitive business purposes, or "so broad that part of the restraint suppresses competition without creating efficiency." *Rothery Storage & Van Co., 792 F.2d at 224*; *see also Blackburn v. Sweeney, 53 F.3d 825, 828-29 (7th Cir. 1995)* (noting that the defendants' argument that the advertising agreement is "a legitimate covenant not to compete, ancillary to the dissolution of the partnership, is further undermined by the Agreement's infinite duration. . . . There is no time limit attached to the advertising restrictions. . . . The restriction on advertising is thus naked, not ancillary, and per se illegal to boot."); *United States v. Addyston Pipe & Steel Co., 85 F. 271, 282 (6th Cir. 1898)*, modified and aff'd, *175 U.S. 211, 20 S. Ct. 96, 44 L. Ed. 136 (1899)* ("[I]f the restraint exceeds the necessity presented by the main purpose of the contract, it is void . . . ."). **[*43]** As a result, the Court is unable to determine at this stage in the litigation "the level of analysis to apply." *eBay, 968 F. Supp. 2d at 1040*. "The court must instead make that determination based on factual evidence relating to the agreement's formation and character." *Id.* The parties do not have the benefit of discovery or factual evidence to support their contentions. The decision about which rule to apply "is more appropriate on a motion for summary judgment." *In re High-Tech Emp. Antitrust Litig., 856 F. Supp. 2d at 1122*; *see also* Areeda ¶ 305e ("Often, however, the decision about which rule is to be employed will await facts that are developed *only in discovery*.") (emphasis added).

Accordingly, taking Plaintiffs' allegations as true, the Court finds that Plaintiffs have sufficiently pleaded the existence of a restraint on trade of a type that is subject to *per se* treatment. *See eBay, 968 F. Supp. 2d at 1040*. Thus, the Court is unable to determine as a matter of law that *per se* treatment will be inappropriate with respect to the no-poaching restraints in the context of the joint ventures. *See id.*

B. No-Hire Agreement & Employers' Cartel

Plaintiffs further allege that Defendants' unilateral no-hire agreement with Host is unlawful *per se* under *Section 1* of the Sherman Act. *See* SAC ¶ 296. Plaintiffs **[*44]** believe "Host acquiesced in AMN's demand because it required spillover work from AMN in order to develop its business and remain commercially viable." *Id.* ¶ 166. Plaintiffs claim that Defendants also "proposed various no-hire agreements to Aya at different times from 2014 to 2016, but Aya rejected each proposal." *Id.* ¶ 146. Plaintiffs allege that in order to "retaliate" against them for refusing the no-hire offers and breaching the no-poaching restraints, Defendants filed "objectively baseless claims" against Plaintiffs in state court, terminated their subcontractor agreements with Aya, and temporarily withdrew Plaintiffs' access to "certain accounts on one of [Defendants'] software platforms." *Id.* ¶ 155. Defendants then offered to "drop" their lawsuit against Plaintiffs "if in exchange Aya would agree to . . . enforce . . . an agreement not to hire specified employees for a five-year term." *Id.* ¶ 156. Plaintiffs believe that Defendants have proposed "and possibly concluded no-hire agreements with other providers." *Id.* By enforcing their no-poaching restraints and no-hire agreement, Defendants have "established and operated a non-reciprocal employers' cartel in the medical-traveler **[*45]** markets." *Id.* ¶¶ 297.

Defendants assert that Plaintiffs fail to "identify what the unidentified members of the 'cartel' agreed to and when and how they came to such an agreement, which types of employees supposedly were involved, or any other factual information." Doc. No. 30-1 at 16. A close reading of the SAC reveals that Plaintiffs are not relying on the formation of an employers' cartel as the basis for their *per se* claims. Rather, Plaintiffs assert that the no-poaching restraints and no-hire agreement are each independently unlawful *per se* under *Section 1*. *See* SAC ¶¶ 296-97. Thus, Plaintiffs' failure to identify the members of this alleged cartel is irrelevant to the inquiry at bar.[13] The questions before the Court are similar to those raised in the previous section—whether the alleged no-hire agreement is the type of restraint potentially subject to *per se* treatment, and whether the no-hire agreement is plausibly necessary or ancillary to achieving a procompetitive business purpose. *See In re ATM Fee Antitrust Litig., 554 F. Supp. 2d at 1014*. Aside from summarily stating Plaintiffs' allegations describe "just a two-party subcontract agreement between AMN and Host Healthcare," Defendants do not address either question. Doc. No. 30-1 at 16.

Here, similar to no-poaching restraints, the Court finds that Plaintiffs' allegations concerning the no-hire agreement with Host, and proposed no-hire agreements with Plaintiffs, are sufficient to allege that the restraints are of a type that are subject to *per se* treatment. *See eBay, 968 F. Supp. 2d at 1039* (finding that the government's allegations regarding eBay's no-solicitation/no-hire agreement are sufficient to state a horizontal market allocation agreement); *see also* Areeda ¶ 2013b ("An agreement among employers that they will not compete against each other for the services of a particular employee or prospective employee is, in fact, a service division agreement, analogous to a product division agreement."). Moreover, Plaintiffs assert that Defendants' "no-hire agreements are not reasonably ancillary to any collaboration to which they might refer. Rather, they are naked restraints of trade that are unlawful *per se* under *Section 1*." *Id.* ¶ 147. However, just because Plaintiffs label the restraints as "naked" does "not make it so." *eBay, 968 F. Supp. 2d 1030 at 1039*. For the reasons set forth in the previous section, the Court is unable to determine with certainty, whether the no-hire restraints are ancillary to procompetitive **[*47]** business purposes in the context of the joint ventures. *See Rothery Storage & Van Co., 792 F.2d at 224*.

Accordingly, taking Plaintiffs' allegations as true, the Court finds that Plaintiffs have sufficiently pleaded the existence of a restraint on trade of a type that is subject to *per se* treatment. Thus, the Court is unable to determine as a matter of law that *per se* treatment will be inappropriate with respect to the no-hire restraints. *See eBay, 968 F. Supp. 2d at 1040*.

2. <u>Quick-Look/Rule of Reason Claim</u>

In the alternative, Plaintiffs assert that "[i]f for any reason AMN's No-Poaching Restraints" and no-hire restraints "are not unlawful *per se* under *Section 1*, they nevertheless unreasonably restrain trade and violate *Section 1* under the quick-look standard and/or the rule-of-reason standard." SAC ¶¶ 316, 317. Additionally, *all* of Defendants'

---

[13] The Court notes that in the FAC, Plaintiffs specifically alleged that the "employers' cartel constitutes an ongoing, *per* ***[*46]*** *se* violation of *Section 1*[.]" FAC ¶ 239. This allegation differs from the SAC, wherein Plaintiffs claim that by enforcing the no-poaching restraints and no-hire agreement, Defendants have "established and operated a non-reciprocal employers' cartel in the medical-traveler markets." SAC ¶ 297. Plaintiffs do not allege in the SAC, unlike in the FAC, that the alleged employers' cartel in and of itself constitutes a *per se* violation of *Section 1*.

agreements, including the software platform agreements, employee restraints, and exclusive dealing agreements, "unreasonably restrain trade in the medicaltraveler markets. Cumulatively, they have permitted AMN to perpetuate and enlarge its market power, which it has exercised by charging supracompetitive prices and imposing onerous trade restraints on all market participants in the medical-traveler markets." *Id.* ¶ 318. Defendants **[*48]** assert any quick-look claim fails for the same reasons Plaintiffs' *per se* claim fails. *See* Doc. No. 30-1 at 17 n.20. Defendants further contend that a rule-ofreason claim fails because Plaintiffs fail to properly define the relevant markets and plead facts showing harm to competition. *See id.* at 18-19.

As noted above, courts use the quick-look analysis when "an observer with even a rudimentary understanding of economics could conclude that the arrangements in question could have an anticompetitive effect on customers and markets." *Cal Dental Ass'n, 526 U.S. at 770*. Moreover, "[w]here a practice has obvious anticompetitive effects . . . there is no need to prove that the defendant possesses market power. Rather, the court is justified in proceeding directly to the question of whether the procompetitive justifications advanced for the restraints outweigh the anticompetitive effects under a 'quick look' rule of reason." *Law v. Nat'l Collegiate Athletic Ass'n, 134 F.3d 1010, 1020 (10th Cir. 1998)*.

Under the "rule of reason" analysis, the factfinder "must analyze the anticompetitive effects along with any pro-competitive effects to determine whether the practice is unreasonable on balance." *Bhan, 929 F.2d at 1413*. This analysis employs shifting burdens of proof. First, a plaintiff "must show that the activity is the type that restrains **[*49]** trade and that the restraint is likely to be of significant magnitude. Ordinarily, a plaintiff to do this must delineate a relevant market and show that the defendant plays enough of a role in that market to impair competition significantly." *Id.* (internal citations omitted). Second, if the plaintiff makes the above showing, the burden shifts to the defendant to justify the restraint by showing that the restraint furthers a legitimate commercial purpose. *See id.* Third, the plaintiff "must then try to show that any legitimate objectives can be achieved in a substantially less restrictive manner." *Id.* "Finally, the court must weigh the harms and benefits to determine if the behavior is unreasonable on balance." *Id.*

Here, Defendants' arguments rest on the assumption that the Court should apply a rule of reason analysis. However, as discussed in the previous section, the Court need not decide which standard applies at this time. "Indeed, that decision is more appropriate on a motion for summary judgment." *In re High-Tech Emp. Antitrust Litig., 856 F. Supp. 2d at 1122*. Plaintiffs have sufficiently pleaded the existence of restraints on trade of types that are subject to *per se* treatment. As such, Plaintiffs have also sufficiently pleaded "the existence **[*50]** of the type of restraint that may fall under the ambit of the quick look" and rule-of-reason standards. *eBay, 968 F. Supp. 2d at 1040*. "[T]he Court need not engage in a market analysis until the Court decides whether to apply a *per se* or rule of reason analysis." *In re High-Tech Emp. Antitrust Litig., 856 F. Supp. 2d at 1122*. Because the Court cannot "at this early stage make a determination as to which rule will apply," the Court cannot find as a matter of law that the quick-look and/or rule of reason standards will not apply to the challenged restraints in this case. *eBay, 968 F. Supp. 2d at 1040*.

3. Summary

In sum, taking Plaintiffs' allegations as true, which the Court must do at this stage of the proceedings, the Court finds that Plaintiffs have sufficiently pleaded the existence of restraints on trade of types that are subject to *per se* treatment. *See id.* The Court, however, "cannot determine with certainty the nature of the restraint[s], and by extension, the level of analysis to apply." *Id.* Accordingly, the Court **DENIES** Defendants' motion to dismiss Plaintiffs' first, second, and fourth causes of action.

C. Sherman Act *Section 2* Claim

In their third cause of action, Plaintiffs assert an attempted monopolization claim under *Section 2* of the Sherman Act. Plaintiffs allege that through Defendants' anticompetitive **[*51]** practices, Defendants "intended to acquire monopoly power in the medical-traveler markets." SAC ¶ 330.

"To establish a Sherman Act *§ 2*[14] violation for attempted monopolization, a private plaintiff seeking damages must demonstrate four elements: (1) specific intent to control prices or destroy competition; (2) predatory or anticompetitive conduct directed at accomplishing that purpose; (3) a dangerous probability of achieving 'monopoly power'; and (4) causal antitrust injury." *Rebel Oil Co., 51 F.3d at 1432-33* (citing *McGlinchy v. Shell Chem. Co., 845 F.2d 802, 811 (9th Cir. 1988))*.

Defendants argue the Court should dismiss Plaintiffs' *Section 2* claim for three reasons: (1) Plaintiffs fail to plead well-defined relevant markets; (2) Plaintiffs fail to allege exclusionary conduct; and (3) Plaintiffs fail to plead facts showing a dangerous probability that Defendants will succeed in becoming a monopoly. *See* Doc. No. 30-1 at 21-23. Because the Court has already concluded that Plaintiffs have sufficiently alleged exclusionary conduct with respect to antitrust standing, the Court proceeds to address Defendants' remaining arguments regarding the relevant markets and probability of success in becoming a monopoly.

1. Well-Defined Relevant Markets

Plaintiffs assert that they have properly pled the markets, **[*52]** explaining why there is no "reasonably interchangeable substitute" for medical-traveler services and "why these services are sold in both a national market and various regional submarkets." Doc. No. 31 at 21. Defendants argue that Plaintiffs fail to sufficiently define the relevant service and geographic markets. *See* Doc. No. 30-1 at 18. The Court addresses the relevant markets in turn.

A. Service Market

With respect to the service market, Defendants contend that "medical-traveler services" is "vague on its face" and ambiguous. Doc. No. 30-1 at 18. "[C]ircumstantial evidence of market power requires that the plaintiff, at the threshold, define the relevant market." *Rebel Oil Co., 51 F.3d at 1434*. "[A] 'market' is the group of sellers or producers who have the 'actual or potential ability to deprive each other of significant levels of business.'" *Id.* (quoting *Thurman Indus., Inc. v. Pay 'N Pak Stores, Inc., 875 F.2d 1369, 1374 (9th Cir. 1989))*. "The goods and services that sellers or producers offer provide the best indicia of who competes in the same market. Thus, a product market is typically defined to include the pool of goods or services that qualify as economic substitutes because they enjoy reasonable interchangeability and use of cross-elasticity of demand." *Thurman Indus., Inc., 875 F.2d at 1374*. "Market definition is crucial. **[*53]** Without a definition of the relevant market, it is impossible to determine market share." *Rebel Oil Co., 51 F.3d at 1434*.

Here, the Court finds that Plaintiffs have sufficiently defined the relevant service market as "[t]he provision of travelers." SAC ¶ 53. For example, Plaintiffs expressly allege that "[t]ravelers are licensed nurses and medical technicians who travel from place to place in order to perform temporary assignments at understaffed hospitals." *Id.* ¶ 31. The travelers work for staffing companies, such as AMN and Aya, "which make all necessary arrangements for them, and which charge fees to the hospitals for their services." *Id.* The "medical-traveler services constitute a relevant service market: when hospitals require these services, there is no other service that they can use instead, since by definition they use the services of travelers only when their staffing needs cannot be met by their own employees or locally available temporary employees." *Id.* ¶ 51. "There is no other service, nor any other kind of employee that can fulfill the hospitals' requirement for travelers under such circumstances." *Id.*

[14] *Section 2* of the Sherman Act provides, "[e]very person who shall monopolize, or attempt to monopolize, or combine or conspire with any person or persons, to monopolize ... trade shall be guilty" of an antitrust violation. *15 U.S.C. § 2*.

Further, unlike *Queen City Pizza, Inc. v. Domino's Pizza, Inc.*, a case relied upon by Defendants, **[*54]** where the Third Circuit determined that "the dough, tomato sauce, and paper cups . . . used by Domino's stores are interchangeable with dough, sauce and cups available from other suppliers and used by other pizza companies"(*124 F.3d 430, 438 (3d Cir. 1997)*), Plaintiffs assert that there is "no cross-elasticity of demand for medical-traveler services and any other service" (SAC ¶ 52). "If a hypothetical monopolist were to make all sales of medical-traveler services, it could raise its prices by a statistically significant amount for a non-transitory period without losing so many sales as to make the price-increase unprofitable[.]" SAC ¶ 52. "Hospitals would find themselves largely constrained to submit to the monopolist's price increase and to continue employing travelers at the higher prices for want of any suitable alternative." *Id.* Such allegations are sufficient at this stage of the proceedings.

Defendants also claim there is "ambiguity throughout the SAC as to whether the purported service market for medical services provided by the 'medical travelers' includes services provided by those who recruit 'medical travelers.'" Doc. No. 30-1 at 18. The Court disagrees. While Plaintiffs explain that providers of travelers **[*55]** "employ professional recruiters" whose work "is indispensable to medical-traveler providers[,]" Plaintiffs clearly articulate that the relevant service market consists of the sale of medical-traveler services to understaffed hospitals. SAC ¶¶ 49, 51-53.

Accordingly, because the relevant market includes the groups of sellers "who have actual or potential ability to deprive each other of significant levels of business[,]" and in viewing the allegations in the light most favorable to Plaintiffs, the Court finds that Plaintiffs have sufficiently defined the relevant service market. *Thurman Indus., Inc., 875 F.2d at 1374*; *see also* *Image Technical Servs., Inc. v. Eastman Kodak Co., 125 F.3d 1195, 1203 (9th Cir. 1997)* ("Ultimately what constitutes a relevant market is a factual determination for the jury.").

B. Geographic Markets

Regarding the relevant geographic markets, Defendants assert Plaintiffs' submarket allegations are vague and insufficient to support a claim. *See* Doc. No. 30-1 at 19. "In defining the relevant market, a court must look at the 'full range of selling opportunities reasonably open to [competitors], namely all the product and geographic sales they may readily compete for.'" *Stewart v. Gogo, Inc., No. 12-cv-5164 EMC, 2013 U.S. Dist. LEXIS 51895, 2013 WL 1501484, at *4 (N.D. Cal. Apr. 10, 2013)* (quoting *Omega Envtl., Inc. v. Gilbarco, Inc., 127 F.3d 1157, 1162 (9th Cir. 1997))*. The Supreme Court **[*56]** has indicated that "within this broad market, well-defined submarkets may exist which, in themselves, constitute product markets for antitrust purposes." *Brown Shoe Co. v. United States, 370 U.S. 294, 325, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)*. "The boundaries of such a submarket may be determined by examining such practical indicia as industry or public recognition of the submarket as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors." *Id.*[15]

Here, Plaintiffs allege that the "provision of travelers is a service that is provided in a nationwide market across the United States and in various regional submarkets." SAC ¶ 58. Defendants take issue with only the alleged regional submarkets. Plaintiffs explain that some providers, including AMN and Aya, dispatch travelers to perform assignments at hospitals across the country. *Id.* ¶ 59. Additionally, there are "various submarkets (or smaller markets) for medical-traveler services[.]" *Id.* ¶ 60. Contrary to Defendants' argument that Plaintiffs' allegations are "conclusory" or "not sufficiently definite" (Doc. No. 30-1 at 19), Plaintiffs assert that each submarket "has distinctive **[*57]** regulatory requirements imposed by state, county and/or municipal authorities" (SAC ¶ 60(1)). "Many travelers are qualified to render services only in certain regions" and "the pool of available travelers largely varies from region to region." SAC ¶ 60(2). Moreover, in each regional submarket, "hospitals pay distinct prices for

[15] "Although *Brown Shoe* involved the challenge of a merger under *Section 7* of the Clayton Act, courts have recognized that its submarket analysis is equally applicable to claims brought under the Sherman Act." *In re Live Concert Antitrust Litig., 863 F. Supp. 2d 966, 984-85 (C.D. Cal. 2012)* (citing *Thurman Indus., Inc., 875 F.2d at 1375 n.1*).

traveler services, have distinct staffing requirements, and must address unique seasonal and fluctuating circumstances." *Id.* ¶ 60(3). Further, "[i]t is within the different regional submarkets that providers compete with one another to furnish travelers to hospitals." *Id.* ¶ 64. The Court finds that Plaintiffs have sufficiently alleged how the provision of services can vary in the numerous submarkets due to state, county and/or municipal regulatory requirements, individual preferences, distinct prices, and the unique circumstances of hospitals across the country. *See* *DocMagic, Inc. v. Ellie Mae, Inc., 745 F. Supp. 2d 1119, 1135 (N.D. Cal. 2010)* (noting that "there is no contradiction between the existence of a national . . . market and the simultaneous existence of local . . . markets that compete only at the regional level.").

Accordingly, the Court finds that taking Plaintiffs' allegations as true, Plaintiffs have sufficiently defined **[*58]** the relevant geographic markets: a national market for the provision of travelers, as well as various regional submarkets for the provision of these services. *See* *Newcal Indus., Inc. v. Ikon Office Solution, 513 F.3d 1038, 1051 (9th Cir. 2008)* (finding that the plaintiff's complaint "sufficiently alleges that IKON customers constitute a submarket according to all of those practical indicia" outlined by the Supreme Court in *Brown Shoe*).

2. Dangerous Probability of Success

Plaintiffs claim "there exists a dangerous probability that [Defendants] will succeed in the effort unless there is an antitrust intervention." SAC ¶ 330.

"To establish a dangerous probability of success, plaintiffs must . . . (1) [ ] define the relevant market and (2) [ ] demonstrate that substantial barriers to entry protect that market." *United States v. Microsoft Corp., 253 F.3d 34, 81, 346 U.S. App. D.C. 330 (D.C. Cir. 2001)*; *see also* *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 455-56, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993)* (indicating that a court's evaluation of an attempted monopolization claim must include a definition of the relevant market and the defendant's market share). "The determination whether a dangerous probability of success exists is a particularly fact-intensive inquiry." *Microsoft Corp., 253 F.3d at 80*. The Sherman Act does not specify which activities constitute an attempted monopolization; thus, "the court 'must examine the facts of each case, mindful that the determination of **[*59]** what constitutes an attempt, as Justice Holmes explained, 'is a question of proximity and degree.'" *Id.* (quoting *United States v. Am. Airlines, Inc., 743 F.2d 1114, 1118 (5th Cir.1984)*; *Swift & Co. v. United States, 196 U.S. 375, 402, 25 S. Ct. 276, 49 L. Ed. 518 (1905))*.

Plaintiffs allege Defendants are "the dominant provider of the relevant service (the provision of travelers)." SAC ¶ 331. Defendants make or control "at least 37% of all sales" nationally, and in some regional submarkets, Defendants make or control "at least 50% of all sales." *Id.* ¶¶ 67-68. Defendants contend that Plaintiffs allegations concerning market power and barriers to entry are insufficient to state a claim for attempted monopolization. *See* Doc. No. 30-1 at 23. The Court addresses Defendants' arguments in turn.

A. Market Power

Defendants first argue that Plaintiffs' market power allegations "are obviously padded" and insufficient. *Id.* The Ninth Circuit has indicated that "[m]arket power may be demonstrated through either of two types of proof." *Rebel Oil Co., 51 F.3d at 1434*. The first type of proof is "direct evidence of the injurious exercise of market power." *Id.* "The more common type of proof is circumstantial evidence pertaining to the structure of the market." *Id.* "To demonstrate market power circumstantially, a plaintiff must: (1) define the relevant market, (2) show that the defendant **[*60]** owns a dominant share of that market, and (3) show that there are significant barriers to entry and show that existing competitors lack the capacity to increase their output . . . ." *Id.* "Measurement of market share is necessary to determine whether the defendant possesses sufficient leverage to influence marketwide output." *Id. at 1437*. "Market power need not be pled with specificity, and whether a defendant actually possesses market power is a factual question." *DocMagic, 745 F. Supp. 2d at 1136* (citing *Newcal, 513 F.3d at 1045, 1051)*. The Ninth Circuit has held that in an attempt-to-monopolize claim, a "market share of 44 percent is sufficient as a matter of law to support a finding of market power, if entry barriers are high and competitors are unable to expand their output[.]"

Rebel Oil Co., 51 F.3d at 1438. The Ninth Circuit, however, cautioned that "[c]ourts should be 'wary of the numbers game of market percentage' when considering attempt-to-monopolize claims." Id. n.10 (quoting Dimmitt Agri Indus., Inc. v. CPC Int'l Inc., 679 F.2d 516, 533 n.18 (5th Cir. 1982)).

Here, Plaintiffs plead circumstantial evidence that Defendants already "wield[] monopoly power in six regional submarkets and ha[ve] come dangerously close in several others." Doc. No. 31 at 25. Specifically, Plaintiffs allege Defendants are the "dominant provider of medical-traveler services" in the **[*61]** country. SAC ¶ 66. Nationally, Defendants make or control "at least 37% of all sales." *Id.* ¶ 67. In the following regional submarkets, Defendants make or control at least 50% of all sales: (1) the Greater Los Angeles Metropolitan Area; (2) the San Francisco Bay Area; (3) the Greater Washington, D.C. Metropolitan Area; (4) the Greater Baltimore Metropolitan Area; (5) the Greater Richmond Metropolitan Area; and (6) the Greater Norfolk Metropolitan Area. *Id.* ¶ 68. Moreover, in other regional submarkets, Defendants make or control "a commanding percentage of overall sales: Hawaii (87% market foreclosure); Nebraska (83%); Maine (83%); Vermont (80%); Arkansas (73%); Montana (67%); Nevada (64%); and New Hampshire (61%)." *Id.* ¶ 69.

Defendants contend that the market share percentages are based on Plaintiffs' internal market analysis—not third-party industry data—and that the percentages are "padded" to account for sales that Defendants control. *See* Doc. No. 30-1 at 23. Defendants do not point to, nor is the Court aware of, any binding authority requiring a plaintiff to present third-party industry data at this stage of the litigation in asserting an attempt-to-monopolize claim. Moreover, Plaintiffs **[*62]** expressly state that they have "adjusted each stated market share downward by 5%" to "compensate for possible error." SAC ¶ 79. Plaintiffs indicate that their internal market analysis is what they can "provide at present without the benefit of discovery." *Id.* ¶ 82. As such, the Court finds that Plaintiffs have provided sufficient factual allegations describing Defendants' position to plausibly conclude that Defendants have "sufficient leverage to influence marketwide output." Rebel Oil Co., 51 F.3d at 1437.

B. Entry Barriers

Defendants next argue that Plaintiffs fail "to show that there are any legally significant barriers to entry or expansion by competing firms." Doc. No. 30-1 at 23. Entry barriers are "additional long-run costs that were not incurred by incumbent firms but must be incurred by new entrants," or "factors in the market that deter entry while permitting incumbent firms to earn monopoly returns." L.A. Land Co. v. Brunswick Corp., 6 F.3d 1422, 1427-28 (9th Cir.1993). "A mere showing of substantial or even dominant market share alone" is insufficient if the plaintiff has not shown that rivals cannot enter the market and that existing competitors could not expand in response to higher prices. Rebel Oil Co., 51 F.3d at 1439; *see also* Spectrum Sports, 506 U.S. at 456 ("In order to determine whether there is a dangerous probability **[*63]** of monopolization, courts have found it necessary to consider . . . the defendant's ability to lessen or destroy competition in that market."). "The main sources of entry barriers are: (1) legal license requirements; (2) control of an essential or superior resource; (3) entrenched buyer preferences for established brands; (4) capital market evaluations imposing higher capital costs on new entrants; and, in some situations, (5) economies of scale." Rebel Oil Co., 51 F.3d at 1439. In assessing entry barriers, courts focus on the ability not to constrain those already in the market, but "those who would enter but are prevented from doing so." *Id.* (quoting United States v. Syufy Enter., 903 F.2d 659, 672 n.21 (9th Cir. 1990)).

Here, the Court finds Plaintiffs' allegations regarding barriers to entry are sufficient at this stage of the litigation. Plaintiffs assert that Defendants protect their position in the affected markets by utilizing numerous barriers to entry and expansion. *See* SAC ¶ 106. Specifically, Plaintiffs allege the following market barriers: (1) the nursing shortage; (2) Defendants' trade restraints and alleged anticompetitive conduct; (3) brand recognition; (4) regulatory and administrative expertise; and (5) capital requirements. *See id.* at ¶¶ 106-115.

With respect to **[*64]** the alleged trade restraints, Defendants note that rival providers, like Plaintiffs, can and do expand their capacity by subcontracting with other providers, and that Plaintiffs' business is experiencing growth. *See* Doc. No. 30-1 at 24. Thus, Defendants assert the trade restraints do not constitute a barrier to entry. Defendants' argument, however, is misplaced as Plaintiffs allege that due to Defendants' trade restraints, "potential entrants and existing rivals cannot develop their own *comparable* pools to compete against AMN." SAC ¶ 110 (emphasis added). Additionally, as noted previously, Plaintiffs and other rivals "have been prevented or greatly hindered . . . from developing their own traveler pools and deploying them in order to compete for the large hospitals' business and to compete in general in the medical-traveler markets." *Id.* ¶ 4.

Regarding brand recognition, Defendants assert that "it is well-established that reputation is not an entry barrier." Doc. No. 30-1 at 24. The case relied upon by Defendants pre-dates the Ninth Circuit's decision in *Rebel Oil Co.*, which makes clear that "entrenched buyer preferences for established brands" is a market barrier. *51 F.3d at 1439*. Additionally, at **[*65]** the hearing on Defendants' motion to dismiss Plaintiffs' FAC, Plaintiff's counsel explained to the Court that Defendants have "a highly recognized brand[.]" Doc. No. 21 at 24. "In order to enter this market, you [the sellers of traveler services] have to develop a sufficiently trusted brand so that hospitals [the buyers] will hire your medical travelers[.]" *Id.*

Further, Plaintiffs sufficiently allege that providers of medical-traveler services require a certain level of expertise in order to perform their operations (SAC ¶ 113), and that the provision of medical-traveler services "requires substantial capital funding" so that providers can "continually pay [their] travelers for their work months before being paid by hospital customers for services rendered" (*Id.* at ¶ 114). Plaintiffs also assert that the nursing shortage constitutes a market barrier. *See id.* ¶ 107-108. Plaintiffs recognize that the nursing shortage is the result of: (1) accredited nursing schools being unable to accommodate all qualified applicants; and (2) many qualified nurses retiring. *Id.* ¶ 107. However, Plaintiffs indicate that the nursing shortage affects both potential entrants and existing competitors. *See id.* ***[*66]*** Therefore, the Court finds that Plaintiffs have plausibly alleged that there are "factors in the market that deter entry while permitting incumbent firms to earn monopoly returns." *L.A. Land Co., 6 F.3d at 1427-28*.

3. Summary

In sum, the Court finds that Plaintiffs have sufficiently defined the relevant service market and geographic markets, and that Plaintiffs have sufficiently alleged a dangerous probability that Defendants will succeed in becoming a monopoly. Accordingly, the Court **DENIES** Defendants' motion to dismiss Plaintiffs' third cause of action.

D. Tortious Interference with Prospective Economic Relations Claim

In their fifth cause of action, Plaintiffs contend that Defendants, through use of their various trade restraints, "deliberately and effectually interfered with Aya's prospective relationships with recruiters, travelers, hospitals and vendor-managers." SAC ¶ 349. As a consequence, Defendants "successfully interfered with [Aya's] prospective commercial relationships, which Aya seeks to establish and requires in order to remain a viable competitor in the affected markets." *Id.* ¶ 351. Defendants argue dismissal of Plaintiffs' tortious interference claim is appropriate because the relationships Plaintiffs **[*67]** allege Defendants interfered with are "undefined, conclusory and speculative in nature." Doc. No. 15-1 at 23.[16]

The California Supreme Court set forth the standard for determining whether a plaintiff has stated a claim for tortious interference with prospective business relations in *Buckaloo v. Johnson, 14 Cal. 3d 815, 122 Cal. Rptr. 745, 537 P.2d 865 (Cal. 1975)*. The elements for such a claim are: "(1) an economic relationship between the plaintiff and some third party, with the probability of future economic benefit to the plaintiff; (2) the defendant's knowledge of the relationship; (3) intentional acts on the part of the defendant designed to disrupt the relationship; (4) actual disruption of the relationship; and (5) economic harm to the plaintiff proximately caused by the acts of the

---

[16] Defendants also argue that dismissal is appropriate because Plaintiffs' claim is predicated on antitrust violations, which Plaintiffs have "failed to plead sufficiently." *Id.* However, for the reasons set forth above, the Court disagrees and finds Defendants' argument unpersuasive.

defendant." *Korea Supply Co. v. Lockheed Martin Corp., 29 Cal. 4th 1134, 1153, 131 Cal. Rptr. 2d 29, 63 P.3d 937 (2003)* (internal citations and quotation marks omitted).

Here, Plaintiffs' allegations of tortious interference are insufficient to state a claim. For example, Plaintiffs allege that Defendants have "disrupted relationships that Aya has tried to develop with various recruiters, travelers, hospitals, and vendor-managers." SAC ¶ 350. However, while Plaintiffs need not provide the actual names of such individuals and/or companies, Plaintiffs "must allege a relationship with **[*68]** 'a specific, alebit unnamed' third party." *R Power Biofuels, LLC v. Chemex LLC, No. 16-cv-716-LHK, 2016 U.S. Dist. LEXIS 156727, 2016 WL 6663002, at *16 (N.D. Cal. Nov. 11, 2016)* (quoting *Ramona Manor Convalescent Hospital v. Care Enterprises, 177 Cal. App. 3d 1120, 1133, 225 Cal. Rptr. 120 (Ct. App. 1986))*. Moreover, "it is essential that the Plaintiff allege facts showing that Defendant interfered with Plaintiff's relationship with a particular individual." *Damabeh v. 7-Eleven, Inc., No. 12-cv-1739-LHK, 2013 U.S. Dist. LEXIS 66565, 2013 WL 1915867, at *10 (N.D. Cal. May 8, 2013)*. Because Plaintiffs fail to provide any details about the relationships with specific individuals and/or companies, and because it is impossible to determine how many such relationships existed, the Court finds that Plaintiffs fail to state a claim for tortious interference with prospective economic advantage.

Accordingly, the Court **DISMISSES** Plaintiffs' fifth cause of action for tortious interference with prospective economic relations **with leave to amend**.

E. UCL Claim

Finally, Plaintiffs allege a cause of action for violations of California's UCL because through Defendants' "anticompetitive practices," Defendants have "employed conduct that is unfair, unlawful and/or deceptive." SAC ¶ 355.

California's UCL prohibits "any unlawful, unfair or fraudulent business act or practice and unfair, deceptive, untrue or misleading advertising." *Cal. Bus. & Prof. Code § 17200*. The UCL provides a separate theory of liability under **[*69]** each of the three prongs: "unlawful," "unfair," and "fraudulent."[17] *Stanwood v. Mary Kay, Inc., 941 F. Supp. 2d 1212, 1222 (C.D. Cal. 2012)* (citing *Lozano v. AT & T Wireless Servs., Inc., 504 F.3d 718, 731 (9th Cir. 2007))*.

With respect to the "unlawful" prong, for the reasons discussed above, the Court finds Plaintiffs sufficiently allege conduct that falls within the unlawful prong of the UCL. *Section 17200* "borrows" violations from other laws by making them independently actionable as unfair competitive practices. *Korea Supply Co., 29 Cal. 4th at 1143*. Because Plaintiffs allege unlawful conduct under *Section 1* and *Section 2* of the Sherman Act, Plaintiffs also adequately allege a violation of the UCL's unlawful prong.

With respect to the "unfair" prong, the California Supreme Court has adopted the following test in the antitrust context: "[w]hen a plaintiff who claims to have suffered injury from a direct competitor's 'unfair' act or practice invokes *section 17200*," unfair in *section 17200* means "conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition." *Cel-Tech Commc'ns, Inc. v. L.A. Cellular Tel. Co., 20 Cal. 4th 163, 83 Cal. Rptr. 2d 548, 973 P.2d 527, 544 (Cal. 1999)*. Here, as discussed in great detail above, Plaintiffs have sufficiently alleged conduct that "threatens or harms competition." *Id.* Plaintiffs allege Defendants' trade restraints **[*70]** have an exclusionary effect on Defendants' rivals: "the rivals cannot solicit any of AMN's employees, and AMN's recruiters, who are best placed to solicit these employees, dare not leave AMN to work for any rival." SAC ¶ 219. Moreover, Defendants have utilized "unlawful trade restraints and baseless litigation

[17] The Court notes that in the SAC, Plaintiffs claim Defendants have "employed conduct that is unfair, unlawful and/or deceptive." SAC ¶ 355. The Court does not construe Plaintiffs' SAC as asserting a claim under the UCL's fraudulent prong, especially in light of the fact that Plaintiffs do not mention "fraud" or "fraudulent" conduct in support of this cause of action, nor do Plaintiffs respond to Defendants' arguments regarding the fraudulent prong of the UCL.

to prevent and discourage [their] rivals from seeking to make hires from this pool. [Their] purpose is to remain the only provider that can offer such as pool." *Id.* at ¶ 221. Thus, Plaintiffs also sufficiently allege a violation of the UCL's unfair prong.

Accordingly, the Court **DENIES** Defendants' motion to dismiss Plaintiffs' sixth cause of action.

CONCLUSION

Based on the foregoing, the Court **GRANTS IN PART** and **DENIES IN PART** Defendants' motion to dismiss Plaintiffs' SAC. The Court **DISMISSES** Plaintiffs' tortious interference with prospective economic relations claim **without prejudice**. Plaintiffs may file a third amended complaint that cures the deficiencies addressed herein with respect to the tortious interference with prospective economic relations claim on or before **June 29, 2018**.

IT IS SO ORDERED.

Opinion by: P.K. HOLMES, III

Opinion

OPINION AND ORDER

Before the Court is a motion (Doc. 84)[1] for partial summary judgment filed by Defendant Morris & Associates, Inc. ("Morris"). Morris has also filed a brief in support (Doc. 85) and a statement of facts (Doc. 86). Plaintiff John Bean Technologies Corporation ("JBT") has filed a response in opposition (Doc. 95) and responsive statement of facts (Doc. 96). Morris has filed a reply (Doc. 99). This motion requests partial summary judgment on JBT's "false marking and false advertising claims associated with Morris's advertising of its IntraGrill auger chiller as patented **[*2]** under United States Patent No. 6,308,529 ('the '529 patent')." (Doc. 84, p. 1).

Also before the Court is a separate motion (Doc. 91)[2] for partial summary judgment, a brief in support (Doc. 92) and a statement of facts (Doc. 93) filed by Morris. JBT has filed a response in opposition (Doc. 101) and responsive statement of facts (Doc. 102). Morris has filed a reply (Doc. 105), and JBT has filed a surreply (Doc. 109) with leave of Court. This motion requests partial summary judgment on JBT's "false advertising claims associated with Morris's IntraGrill auger chiller webpage." (Doc. 91, p. 1).

Also before the Court is JBT's motion (Doc. 78)[3] for reconsideration of a protective order (Doc. 77) entered by the Court. JBT has filed a brief in support (Doc. 80) and Morris has filed a response (Doc. 88).

Because JBT cannot show a genuine dispute of material fact with respect to the issue of causation and injury, the motions for partial summary judgment will be granted. Because JBT cannot show that the discovery it seeks is relevant or proportional, the motion for reconsideration will be denied.

I. Procedural Posture

This action was filed in 2015 by Cooling & Applied Technology, Inc. ("CAT").[4] CAT asserted Patent Act false marking claims pursuant **[*3]** to *35 U.S.C. § 292(b)*, Lanham Act false advertising claims pursuant to *15 U.S.C. § 1125*, and various North Carolina and Arkansas State law claims against Morris. CAT's claims involved Morris's IntraGrill auger chiller, marked as patented under the '529 patent, and Morris's COPE product, marked as patented under United States Patent No. 7,470,173 ("the '173 patent") and United States Patent No. 7,588,483 ("the '489 patent"). Morris filed a motion to dismiss the false marking claims and any associated Lanham Act and state law claims. CAT's business was acquired by JBT, and CAT assigned its claims in this lawsuit to JBT without opposition from Morris.

The Court substituted JBT for CAT and denied the motion to dismiss. (Doc. 42). In its opinion and order denying that motion to dismiss, the Court addressed the issue of causation and injury. With respect to the false marking claims related to the '529 patent, the Court explained that JBT would be required to show a competitive injury caused by Morris to succeed on its false marking claim, and noted that JBT alleged that "[u]pon information and belief . . . customers have been reluctant to purchase and, *in some instances, have declined to purchase*, CAT's chillers or certain parts of CAT's chillers as a result of Morris's false marketing." (Doc. 42, p. 9 (quoting Doc. 1, ¶ 102)).

Following entry of this **[*4]** order, the parties filed a second joint *Rule 26(f)* report. (Doc. 45). JBT proposed that the parties engage in full discovery on all claims and defenses. Morris proposed that discovery be bifurcated, and first be limited to discovery regarding intent to deceive and Morris's advice-of-counsel defense. The Court entered an interim scheduling order (Doc. 46) declining to limit discovery as Morris proposed, thereby allowing JBT to seek discovery regarding all claims and defenses. The Court also set a claim construction hearing, which was held on July 19, 2017. JBT then amended its complaint (Doc. 64), primarily adding additional factual allegations in support of its willfulness claims, and maintaining its nonspecific allegations that it had been or was likely to be injured by

[1] Related unredacted documents are filed under seal. (Docs. 87, 97, 98, and 100).

[2] Related unredacted documents are filed under seal. (Docs. 94, 103, 104, and 106).

[3] Related unredacted documents are filed under seal. (Docs. 79 and 81).

[4] Except to avoid confusion, the Court will identify CAT as JBT.

Morris's false marking and false advertising. An unredacted copy (Doc. 65) of the amended complaint was filed under seal.

Thereafter, Morris moved for a protective order (Doc. 69). Morris argued that despite ample opportunity in the course of discovery, JBT had not met its obligation to articulate or provide evidence of a single injury caused by Morris's alleged false marking and false advertising of the IntraGrill auger chiller. **[*5]** Referencing the proportionality principle in *Federal Rule of Civil Procedure 26*, Morris requested that the Court protect Morris from JBT's requests for detailed disclosure of Morris's sales and financial information related to the IntraGrill auger chiller until JBT showed evidence that it had suffered an injury. JBT's response argued that it had been injured by Morris's false marking and false advertising, but the responses to Morris's discovery requests and the evidence cited in support of that response indicated otherwise. JBT's failure to provide evidence of injury not only led the Court to determine that JBT's discovery requests were disproportionate to the needs of the lawsuit, but that summary judgment against JBT may be appropriate at the very least on claims related to the IntraGrill auger chiller marked with the '529 patent. The Court granted the motion for protective order, and further ordered Morris to file a motion for partial summary judgment.

The parties then filed the motions under consideration.

II. Standard of Review

A. Summary Judgment

"The court shall grant summary judgment if the movant shows that there is no genuine dispute as to any material fact and the movant is entitled to judgment as a matter of law." *Fed. R. Civ. P. 56(a)*. **[*6]** The moving party bears the burden of showing the absence of a genuine dispute of material fact and that it is entitled to judgment as a matter of law. *Fed. R. Civ. P. 56(c)*. It may meet this burden by citing to affidavits, pleadings, depositions, answers to interrogatories, and admissions on file. *Celotex Corp. v. Catrett, 477 U.S. 317, 324, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986)*. When the moving party has met its burden, the nonmoving party must "come forward with 'specific facts showing that there is a genuine issue for trial.'" *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 587, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)* (quoting old *Fed. R. Civ. P. 56(c)*). "The nonmoving party must do more than rely on allegations or denials in the pleadings, and the court should grant summary judgment if any essential element of the prima facie case is not supported by specific facts sufficient to raise a genuine issue for trial." *Register v. Honeywell Fed. Mfg. & Techs., LLC, 397 F.3d 1130, 1136 (8th Cir. 2005)* (citing *Celotex Corp., 477 U.S. at 324*).

In analyzing whether there is a genuine dispute of material fact, the Court draws all reasonable inferences in the nonmoving party's favor. *Matsushita Elec. Indus. Co., 475 U.S. at 587-88*. "[T]he non-moving party must be able to show sufficient probative evidence that would permit a finding in his favor on more than mere speculation, conjecture, or fantasy." *Binkley v. Entergy Operations, Inc., 602 F.3d 928, 931 (8th Cir. 2010)*. "A party may not rely solely on inadmissible hearsay in opposing a motion for summary judgment, but instead must show that admissible evidence will be available **[*7]** at trial to establish a genuine issue of material fact." *Fin. Timing Publ'ns, Inc. v. Compugraphic Corp., 893 F.2d 936, 942 (8th Cir. 1990)*. "[S]ummary judgment is appropriate when there is 'adequate time' for discovery and not solely when discovery is complete. The district court has discretion to determine when there has been adequate time for discovery . . . ." *Nat'l Bank of Commerce of El Dorado, Ark. v. Dow Chemical Co., 165 F.3d 602, 606 (8th Cir. 1999)* (citation omitted). A party who seeks additional discovery in response to a motion for summary judgment must do more than speculate that additional discovery would be useful—it must show, without conclusory statements that some evidence might possibly be found, how additional discovery would alter the evidence before the court. *Nat'l Bank of Commerce of El Dorado, Ark., 165 F.3d at 606 (8th Cir. 1999)*.

B. Controlling Substantive Federal Law

As a general matter, the Court applies Federal Circuit precedent to patent law issues, but otherwise applies the precedent of the Eighth Circuit. *Midwest Indus., Inc. v. Karavan Trailers, Inc., 175 F.3d 1356, 1359 (Fed. Cir. 1999)* (en banc in relevant part), *abrogation on other grounds recognized by Amgen Inc. v. Sandoz Inc., 877 F.3d 1315, 1325-26 (Fed. Cir. 2017)*. The Court applies Federal Circuit precedent to JBT's Patent Act false marking claims. *Panduit Corp. v. All States Plastic Mfg. Co., Inc., 744 F.2d 1564, 1573 (Fed. Cir. 1984)*, *overruled on other grounds by Richardson-Merrell, Inc. v. Koller, 472 U.S. 424, 105 S. Ct. 2757, 86 L. Ed. 2d 340 (1985)*. The Court applies Eighth Circuit precedent to JBT's Lanham Act false advertising claims. *Syngenta Seeds, Inc. v. Delta Cotton Co-op, Inc., 457 F.3d 1269, 1273 (Fed. Cir. 2006)*. The Court applies state law to those claims over which it is exercising supplemental jurisdiction under *28 U.S.C. § 1367*. *Felder v. Casey, 487 U.S. 131, 151, 108 S. Ct. 2302, 101 L. Ed. 2d 123 (1988)* ("[W]hen **[*8]** a federal court exercises diversity or pendent jurisdiction over state-law claims, 'the outcome of the litigation in the federal court should be substantially the same, so far as legal rules determine the outcome of a litigation, as it would be if tried in a State court.'" (quoting *Guar. Tr. Co. v. York, 326 U.S. 99, 109, 65 S. Ct. 1464, 89 L. Ed. 2079 (1945))*).

C. Protective Orders

"Parties may obtain discovery regarding any nonprivileged matter that is relevant to any party's claim or defense and proportional to the needs of the case." *Fed. R. Civ. P. 26(b)(1)*. For good cause, the Court may enter a protective order to protect a party from undue burden. *Fed. R. Civ. P. 26(c)(1)*.

III. Facts

JBT and Morris are manufacturers and distributors of auger chillers to poultry processors in the United States. JBT and Morris sell other poultry processing equipment, as well. For purposes of these motions, it is agreed that JBT and Morris are the only two distributors of auger chillers in the relevant market. An auger chiller is a piece of equipment in a processing line which receives chicken carcasses in the middle stages of the butchering process and cools them to prevent contamination. Auger chillers vary in the details of their design, but the general form of an auger chiller is a long, open-topped tank mostly encompassing **[*9]** an auger running the length of the tank. Cold water is run in a current from the far end of the tank to the receiving end to cool the chickens, and the auger slowly rotates on a shaft, driving the chickens against this current to the far end of the tank. Unless another opening in the auger blades, or flights, is present, the water in the tank flows through the small space between the edge of the auger blades and the interior wall of the tank. The flow of water in the center of the tank near the auger shaft is generally slowed by the auger blades, and tends to heat more quickly and cool less effectively than the flowing water at the edge of the blades. When they reach the end of the tank, the chilled chickens are then received by the next stage of the processing line.

Auger chillers are expensive, heavy-duty pieces of equipment that are manufactured to last for many years. Consequently, sales to customers—various processors around the country—are relatively few, highly competitive, and worth a substantial amount of money. Salespeople for JBT and Morris attempt to keep a close relationship with their customers and potential customers to maintain a good reputation in the market and increase **[*10]** the chance of future sales. JBT and Morris also maintain websites, publish brochures for distribution to customers, and attend trade shows in order to improve their reputations with customers and make additional sales.

Morris sells an auger chiller called IntraGrill. In an effort to increase the flow of water throughout the auger chiller tank, Morris has manufactured vertical openings in the auger blades of the IntraGrill auger chiller. These openings run from the shaft to the edge of the blade. Morris calls these openings "water passages."[5] Morris has marked the IntraGrill auger chiller with the '529 patent. Morris advertises its auger chiller as patented on its website, in brochures, on signs at trade shows, and in communication with customers and potential customers. JBT believes Morris has falsely marked its IntraGrill auger chiller as patented and is falsely advertising its IntraGrill auger chiller as patented.

JBT also sells an auger chiller, called FATCAT. FATCAT was manufactured and sold by CAT prior to CAT's purchase by JBT. In 2013, CAT began including openings for water in the blades of its own auger chillers. JBT calls these openings "flow reliefs." JBT's flow reliefs do not run from **[*11]** the shaft to the edge of the blade, but are located only near the shaft. When JBT sold FATCAT auger chillers to customers, flow reliefs could be included at no additional cost.

Morris's website advertises features of its IntraGrill auger chiller. The website represents that Morris's auger chiller is patented. The website includes a caricature of the IntraGrill auger chiller. The website also includes a caricature of an auger chiller that can be identified as the FATCAT auger chiller on account of openings that appear to be flow reliefs in the auger blades. The website also includes a statement that "In other systems, water circulates only around the shaft and through a narrow gap between the auger flights and the tank wall." JBT believes that Morris is falsely advertising IntraGrill as patented on this webpage. JBT also believes that the flow reliefs on the FATCAT caricature are disproportionately small compared to their size on an actual FATCAT, and that this is a literally false comparative advertisement. JBT also believes that the statement about water flow in "other systems" is a literally false comparative advertisement.

IV. Analysis

A. Federal Claims

1. False Marking

Morris has moved **[*12]** for partial summary judgment on JBT's false marking claims related to the IntraGrill auger chiller. Morris argues that there is no genuine dispute of material fact with respect to whether JBT suffered a competitive injury proximately caused by Morris's alleged false marking. JBT responds that summary judgment is improper because Morris's alleged false marking harmed JBT's reputation and goodwill with a major customer and because the marking enhances Morris's reputation, necessarily harming JBT by virtue of the two-player market.

The Federal Circuit has described the "competitive injury" requirement amended into the Patent Act by the America Invents Act as a statutory standing requirement for plaintiffs bringing a false marking claim. *35 U.S.C. § 292(b)*; *Sukumar v. Nautilus, Inc., 785 F.3d 1396, 1400 (Fed. Cir. 2015)*. While issues of statutory standing have been treated by courts "as effectively jurisdictional," the term "statutory standing" is misleading, as the actual issue addressed by a "statutory standing" analysis is whether a plaintiff has a cause of action under the relevant statute. *Lexmark Int'l, Inc. v. Static Control Components, Inc., 572 U.S.--, 572 U.S. 118, 134 S.Ct. 1377, 1387, n.4, 188 L. Ed. 2d 392 (2014)* (explaining in the closely-analogous context of Lanham Act false advertising claims that whether there is "prudential standing" or "statutory standing" does not implicate a **[*13]** federal court's subject matter jurisdiction). To succeed on a false marking claim against Morris, JBT must show that Morris's false marking caused a competitive injury to JBT.

A competitive injury is "a wrongful economic loss caused by a commercial rival, such as the loss of sales due to unfair competition; a disadvantage in a plaintiff's ability to compete with a defendant, caused by the defendant's

---

[5] To the extent this term, or any other term in this opinion, has a disputed meaning relevant to construction of a patent at issue, the Court does not construe that term in this opinion.

unfair competition." *Sukumar, 785 F.3d at 1400* (quoting Black's Law Dictionary (9th ed. 2009). Competitive injury is analogous to the concept of "injury to competition" found in ***antitrust law***. *Id. at 1401* (citing *Razorback Ready Mix Concrete Co. v. Weaver, 761 F.2d 484, 488 (8th Cir. 1985)*; *Midwest Underground Storage, Inc. v. Porter, 717 F.2d 493, 498 (10th Cir. 1983))*.

> If an article that is within the public domain is falsely marked, potential competitors may be dissuaded from entering the same market. False marks may also deter scientific research when an inventor sees a mark and decides to forego continued research to avoid possible infringement. False marking can also cause unnecessary investment in design around or costs incurred to analyze the validity or enforceability of a patent whose number has been marked upon a product with which a competitor would like to compete.

Forest Grp., Inc. v. Bon Tool Co., 590 F.3d 1295, 1303 (Fed. Cir. 2009) (citation omitted).

JBT argues that competitive injury is a necessary consequence of false marking in **[*14]** a two-player market because Morris's auger chillers gain value from being marked as patented, and the value of JBT's auger chillers necessarily diminishes when the value of Morris's auger chillers increases. JBT argues in the alternative that its reputation and goodwill with a customer were injured when the customer declined to purchase a JBT auger chiller with flow reliefs because Morris's auger chillers were marked as patented, but subsequently asked JBT to retrofit the auger chiller with flow reliefs.

As an initial matter, the Court rejects JBT's argument that its auger chillers are necessarily devalued if the value of Morris's auger chillers increases. This principle supports a rebuttable presumption of economic injury in false advertising cases where a two-player market necessarily makes ads comparative.[6] *See* *Time Warner Cable, Inc. v. DIRECTV, Inc., 497 F.3d 144, 162 (2d Cir. 2007)*. Whether a patent marking is comparative is not an issue in false marking cases, and the principle JBT relies on has no clear application to these claims. The Patent Act now affirmatively requires a Plaintiff to demonstrate competitive injury as part of a false marking claim. *35 U.S.C. § 292(b)*. This requirement was amended into the Patent Act against a surge in false-marking qui tam litigation **[*15]** and allows the United States to recover a per-article fine and actually-injured parties to recover compensatory damages, while eliminating litigation brought by unharmed parties. *See* *Sukumar, 785 F.3d 1396 at 1400* (reviewing legislative history of the competitive injury amendment in the America Invents Act). Allowing a plaintiff to proceed to trial with no evidence of actual competitive injury would defeat the purpose of this amendment. *Cf.* *Gravelle v. Kaba Ilco Corp., 684 Fed. App'x 974, 979-80 (Fed. Cir. 2017)* (explaining that the competitive injury causation analysis requires more than general speculation about what could occur).

The evidence JBT cites in support of this argument would establish a genuine dispute of fact with respect to whether marking Morris's auger chiller as patented increases its value, were that issue in dispute, but JBT cites no evidence to support its contention that as Morris's auger chillers increase in value relative to their value before being marked as patented, JBT's auger chillers must simultaneously decrease in value relative to their value before Morris's auger chillers were marked as patented.

For this reason, JBT leans heavily on an instance in which one customer, when purchasing a JBT auger chiller for one processing plant, declined JBT's offer **[*16]** to add flow reliefs to the auger blade, but then later requested that JBT retrofit the auger blade with those flow reliefs. JBT cites no admissible evidence, but only hearsay and speculation, to support its argument that the customer initially declined the flow reliefs because Morris's auger chiller with water passages was marked patented.[7] Even were this evidence admissible, JBT has known of this

---

[6] JBT's argument is further addressed in the Court's analysis of JBT's false advertising claims, below.

[7] Even if the evidence were admissible, it would show only that the customer was hesitant to purchase an auger chiller with new features from JBT because the customer had, in the past, been engaged in patent infringement litigation with JBT's sole competitor, Morris. That is, the evidence tends to show that Morris's past litigation actions, the customer's awareness that Morris had patents protecting some of its products, and the customer's reliance on its own legal team's advice (which might have multiple foundations other than Morris's marking) led to the customer's decision to request a JBT auger chiller with no flow reliefs in the auger blade. The inadmissible evidence does not show that the customer's decision was caused by Morris's marking of its own auger chiller as patented, and reaching that conclusion requires speculation, rather than reasonable inference.

incident since 2013, but chose not to disclose it during months of discovery despite being served with interrogatories to which that information was responsive. *Rule 37(c)(1)* precludes its use now. Furthermore, JBT made the sale in question, and later retrofitted the blades at the customer's request, at no additional charge to the customer. JBT thereafter made additional sales to that customer. JBT cites no admissible evidence to support its contention that it lost reputation or goodwill with that customer, and the evidence in the record indicates otherwise.

JBT cites no admissible evidence to support its argument that Morris's alleged false marking caused a competitive injury to JBT. JBT was not dissuaded from entering the auger chiller market. JBT was not deterred from researching improvements to auger **[*17]** chillers or making sales of auger chillers. JBT made and sold auger chillers with flow reliefs in the auger blades, and sold them for the same price whether or not there were flow reliefs. JBT did not make unnecessary investments to design around Morris's IntraGrill—rather, JBT believes its own design to be superior to Morris's design. JBT does not cite any cost incurred to analyze the validity or enforceability of the '529 patent with respect to JBT's auger chiller. Because JBT cannot show that a genuine dispute of material fact exists with respect to whether JBT suffered a competitive injury proximately caused by Morris's alleged false marking of its IntraGrill product, summary judgment for Morris is proper on all false marking claims related to the IntraGrill product.

2. False Advertising

Morris has moved for partial summary judgment on any false advertising claims for damages or injunctive relief related to advertising materials for the IntraGrill auger chiller. Morris argues that there is no genuine dispute of material fact with respect to whether JBT suffered or is likely to suffer an economic injury proximately caused by Morris's alleged false advertising. JBT responds that summary judgment **[*18]** is improper because Morris's alleged false advertising harmed JBT's reputation and goodwill with a major customer, because the advertising enhances Morris's reputation, necessarily harming JBT by virtue of the two-player market, because Morris has not rebutted the presumption of causation and injury that arises from literally false comparative advertising, and because JBT has shown a likelihood of irreparable harm if Morris is not enjoined.

"To establish a claim under the false or deceptive advertising prong of the Lanham Act, a plaintiff must prove [among other things] . . . the plaintiff has been or is likely to be injured as a result of the false statement, either by direct diversion of sales from itself to the defendant or by a loss of goodwill associated with its products." *United Indus. Corp. v. Clorox Co., 140 F.3d 1175, 1180 (8th Cir. 1998)*. To make this showing, "a plaintiff suing under *§ 1125(a)* ordinarily must show economic or reputational injury flowing directly from the deception wrought by the defendant's advertising; and . . . that occurs when deception of consumers causes them to withhold trade from the plaintiff." *Lexmark Int'l, Inc., 134 S.Ct. at 1391*. A plaintiff who makes this showing of economic injury comes within the statute's coverage. *Id. at 1387 n.4*. To obtain injunctive relief preventing **[*19]** a defendant's false advertising, even where economic injury can be presumed, a plaintiff must show it will suffer irreparable harm if an injunction does not issue. *Buetow v. A.L.S. Enters., Inc., 650 F.3d 1178, 1183 (8th Cir. 2011)*.

JBT's argument that it suffered economic or reputational injury involving a major customer as a result of Morris's purported false advertising is unsupported by admissible evidence. JBT relies on the same customer interaction cited above, and that evidence is inadmissible hearsay and excluded from consideration under *Rule 37(c)(1)*. In 2013, JBT began selling auger chillers with flow reliefs in the auger blade. While making a sale of an auger chiller to the customer in question, JBT offered to include flow reliefs in the auger blade at no additional cost. The customer declined, and JBT made a sale of an auger chiller without flow reliefs. At a later date, the customer asked JBT to retrofit the auger blade with flow reliefs, and JBT did so at no cost to the customer. Subsequently to the 2013 sale, JBT also sold that customer an auger chiller with flow reliefs in the auger blade for another of the customer's facilities.

JBT cites no evidence that any Morris advertising played a role in the customer initially declining flow reliefs, and **[*20]** its argument that this occurred is at best speculation based on inadmissible hearsay. JBT also cites no evidence to indicate that JBT suffered reputational injury with that customer. With respect to that customer, or any others, JBT has failed to cite evidence showing that the customer withheld trade from JBT as a result of Morris's alleged false advertising.

Lacking any admissible evidence of actual economic injury, JBT argues that Morris's alleged false advertising enhances Morris's reputation and, in a two-player market, necessarily devalues JBT's reputation. JBT cites to *Time Warner Cable, Inc. v. DIRECTV, Inc., 497 F.3d 144 (2d Cir. 2007)*, in support of this principle. JBT separately argues for application of the rebuttable presumption of injury and causation that arises when there is proof of a willfully deceptive, literally false comparative advertisement. *See* *Buetow, 650 F.3d at 1183* ("[W]hen a competitor's advertisement, particularly a comparative ad, is proved to be literally false, the court may presume that consumers were misled and grant an irreparably injured competitor injunctive relief without requiring consumer surveys or other evidence of the ad's impact on the buying public.").

The first of these two arguments is merely one prong in the presumption argument. **[*21]** The "two-player market" principle addressed in *Time Warner* is that, in a two-player market, falsely advertising one's own product as better than any alternative product is necessarily understood as comparative to the other competitor's product, even if no direct reference is made to the competitor. *See* *Time Warner Cable, Inc., 497 F.3d at 162* ("As the District Court found, TWC *is* 'cable' in the areas where it is the franchisee. Thus, even though Shatner does not identify TWC by name, consumers in markets covered by the preliminary injunction would undoubtedly understand his derogatory statement, 'settling for cable would be illogical,' as referring to TWC." (citation omitted)). Establishing advertising as comparative does not demonstrate economic injury, but is only one step in showing that a party is entitled to a rebuttable presumption of economic injury. *Buetow, 650 F.3d at 1183*.

Rebuttable presumptions serve only "to control the result where there is an entire lack of competent evidence." *Del Vecchio v. Bowers, 296 U.S. 280, 286, 56 S. Ct. 190, 80 L. Ed. 229 (1935)*; *see also* *St. Louis Shipbuilding Co. v. Dir. of Office Workers' Comp. Programs, U.S. Dep't of Labor, 551 F.2d 1119, 1124 (8th Cir. 1977)* ("The presumption serves only to control the result where there is a total lack of competent evidence."). With respect to "statutory standing" issues such as the Lanham Act's competitive injury element, when sufficient proof has been offered to **[*22]** rebut a presumption that a claim is within the coverage of a statute, "it falls out of the case." *St. Louis Shipbuilding Co., 551 F.2d at 1124*; *accord* *St. Mary's Honor Ctr. v. Hicks, 509 U.S. 502, 507, 113 S. Ct. 2742, 125 L. Ed. 2d 407 (1993)* ("Our cases make clear that at that point the shifted burden of production became irrelevant: 'If the defendant carries this burden of production, the presumption raised by the prima facie case is rebutted,' . . . and 'drops from the case.'" (quoting *Tex. Dep't of Cmty. Affairs v. Burdine, 450 U.S. 248, 255, n.10, 101 S. Ct. 1089, 67 L. Ed. 2d 207 (1981))* (internal citation omitted)). Thereafter, the analysis on summary judgment returns to whether each party has cited to admissible evidence to carry its burden on summary judgment. *Cf.* *Del Vecchio, 296 U.S. at 286-87* (explaining that once the presumption is rebutted, if only one party submits evidence relevant to a dispute of fact, the case must be decided upon that evidence, and only if both parties thereafter submit evidence must that evidence be weighed). A presumption of causation may be rebutted by evidence that establishes a different cause. *See, e.g.,* *In re Am. Milling Co., Ltd., 409 F.3d 1005, 1018 (8th Cir. 2005)* (presumption of negligence can be rebutted by "evidence sufficient to establish some cause other than negligence"); *White v. McDonnell Douglas Corp., 985 F.2d 434, 435 (8th Cir. 1993)* (presumption of employment discrimination can be rebutted by production of evidence that cause of employer's action was "a legitimate, nondiscriminatory reason").

JBT argues that it is entitled **[*23]** to a presumption of economic injury and causation with respect to Morris's statements on its website and elsewhere that its auger chiller is patented, Morris's inclusion on its website of a caricature of JBT's auger chiller that JBT argues misrepresents the size of the flow reliefs cut into JBT auger chiller blades, and Morris's inclusion on its website of a description of water flow in JBT's auger chiller as limited to "around the shaft and through a narrow gap between the auger flights and the tank wall." (Doc. 103-1, p. 4). If the Court assumes without deciding that JBT is entitled to such a presumption for each of these issues, summary judgment on these claims is still proper. Morris cites to evidence in the record rebutting the presumption of causation or injury, and in the absence of the presumption, JBT cites to no evidence establishing a genuine dispute of material fact with respect to causation or injury.

With respect to Morris's statements that its auger chiller is patented, there is evidence in the record that whether processing equipment is advertised as patented does not play a significant role in equipment sales. Multiple deponents familiar with selling auger chillers **[*24]** testified that whether equipment is advertised as patented is all but meaningless to customers seeking to purchase. *See, e.g.*, Deposition of Nate Harrison,[8] (Doc. 87-6, pp. 242:18-243:8 (aware of no lost auger chiller sales due to Morris's marking)); Deposition of Luke Miller (Doc. 87-7, pp. 51:10-23 (customers never inquired about patents); 99:9-100:3 (customers generally unconcerned about patents); 100:1-3 (customers did not keep track of what equipment was patented)); Deposition of Brett Mentzer (Doc. 97-4, p. 141:10-25 (patent not needed or referenced to make sales)); Deposition of William Morris, III (Doc. 97-5, pp. 34:2-35:16 (patents not high on list of things important to customers)).

With respect to Morris's website, there is evidence that customers do not make equipment purchases based on websites. *See, e.g.*, Deposition of Nate Harrison (Doc. 87-6, pp. 102:6-103:4 (website and other advertising unimportant for generating sales, and focus was instead loyalty, relationship, quality, and price)); Deposition of Luke Miller (Doc. 87-7, p. 52:9-14 (customers weren't directed to and never mentioned websites)); Deposition of Brian Kovanda (Doc. 87-8, p. 75:4-9 (customers never mentioned **[*25]** Morris website)).

There is also evidence that JBT's reputation was not hurt and goodwill was not lost as a result of Morris's activity, and further that any decline in reputation and goodwill relevant to this case happened because CAT was sold to JBT. *See, e.g.*, Deposition of Nate Harrison (Doc. 87-6, 104:13-109:4 (noticed customer hesitation after sale of CAT to JBT on account of latter's reputation, but managed to keep sales steady)). There is also evidence that JBT's sales remained strong despite Morris's activity. *See, e.g.*, Deposition of Luke Miller (Doc. 87-7, p. 89:7-13 (2016 and 2017 were good sales years)). In the first paragraph of its statement of facts, Morris cites to evidence that JBT has not lost any sales caused by Morris's alleged false advertising. (Doc. 87, p. 1). JBT's response denies this statement without evidence "because [JBT] has not engaged in any third-party discovery." (Doc. 98-1, p. 1). In the third paragraph of its statement of facts, Morris cites to evidence that JBT has not suffered any quantifiable economic injury caused by Morris's alleged false advertising. (Doc. 87, p. 2). JBT's response denies this statement, making conclusions of injury based on **[*26]** inadmissible evidence and citing only evidence that might give rise to the rebuttable presumption in the first place. (Doc. 98-1, p. 2).

All of the cited admissible evidence is sufficient to rebut any presumption that JBT suffered an economic injury proximately caused by Morris's alleged false advertising. What is more, the same evidence also rebuts any presumption of likelihood of irreparable harm that might justify injunctive relief, and JBT cites no evidence that customers are likely to withhold sales or that its reputation or goodwill are likely to be damaged by Morris's alleged false advertising.

Because JBT has had adequate time for discovery,[9] JBT's failure to come forward with admissible evidence of lost sales, reputation, or goodwill, or the likelihood of such injury, is fatal. *Celotex Corp., 477 U.S. at 322-23* ("In our view, the plain language of *Rule 56(c)* mandates the entry of summary judgment, after adequate time for discovery and upon motion, against a party who fails to make a showing sufficient to establish the existence of an element essential to that party's case, and on which that party will bear the burden of proof at trial."); *Fed. R. Civ. P. 56(c)(1)*, *(e)(2)*; W.D. Ark. R. 56.1(c). Summary judgment for Morris is proper on all false advertising **[*27]** claims related to the IntraGrill product.

B. State Law Claims

1. North Carolina Unfair and Deceptive Practices Act

---

[8] All deposition citations use the document's internal pagination.

[9] JBT's request for additional discovery is addressed later in this opinion.

Under North Carolina law, unfair methods of competition and unfair or deceptive acts are unlawful. *N.C. Gen. Stat. Ann. § 75-1.1*. Anyone harmed by these unlawful acts may bring a civil action. *N.C. Gen. Stat. Ann. § 75-16*. To prevail in such an action, the plaintiff must show that the defendant committed an unfair or deceptive act or practice, the act or practice was in or affected commerce, and the act or practice proximately caused injury to the plaintiff. *Dalton v. Camp, 353 N.C. 647, 548 S.E.2d 704, 711 (N.C. 2001)*. To demonstrate that an alleged misrepresentation is the proximate cause of an alleged injury, the plaintiff must show reliance on the alleged misrepresentation. *Bumpers v. Cmty. of N. Va, 367 N.C. 81, 747 S.E.2d 220, 226-27* (explaining at length that where the unlawful act is a misrepresentation, an injury is only proximately caused by reliance on the misrepresentation).

JBT cites no evidence whatsoever that it relied on Morris's alleged misrepresentations. Without a showing of reliance, JBT cannot show any loss was proximately caused by that reliance. Judgment for Morris is proper on all North Carolina Unfair and Deceptive Practices Act claims related to the IntraGrill product.

2. Arkansas Deceptive Trade Practices Act

The Arkansas Deceptive **[*28]** Trade Practices Act allows a private right of recovery for deceptive trade practices, but only where the claimant can prove that it "suffered an actual financial loss proximately caused by [its] reliance on the use of a practice declared unlawful under this chapter." *Ark. Code Ann. § 4-88-113(f)(2)*. JBT offers no evidence whatsoever that it relied on Morris's alleged deceptive trade practices. Without a showing of reliance, JBT cannot show any loss was proximately caused by that reliance. Judgment for Morris is proper on all Arkansas Deceptive Trade Practices Act claims related to the IntraGrill product.

3. Arkansas Common Law Unfair Competition

Under Arkansas common law, a plaintiff may recover against a defendant for the tort of unfair competition where the defendant engages in "a course of dealing which leads, or is likely to lead, consumers into believing that the goods or services of one supplier are those of another." *Gaston's White River Resort v. Rush, 701 F. Supp. 1431, 1435 (W.D. Ark. 1988)* (citing *Sw. Bell Tel. Co. v. Nationwide Indep. Directory Serv., Inc., 371 F.Supp. 900 (W.D. Ark. 1974)*; *Heuer v. Parkhill, 114 F.Supp. 665 (W.D. Ark. 1951)*; *see also* *Esskay Art Galleries v. Gibbs, 205 Ark. 1157, 172 S.W.2d 924, 926-27 (Ark. 1943)* ("Unfair competition ordinarily consists in the simulation by one person for the purpose of deceiving the public, of the name, symbols, or devices employed by a business rival, or the substitution of the goods or wares of one person for those of another, thus falsely inducing **[*29]** the purchase of his wares and thereby obtaining for himself the benefits properly belonging to his competitor." (quoting 26 RULING CASE LAW 875 (William McKinney & Burdett Rich, eds., 1920))). JBT offers no evidence that Morris's IntraGrill simulates or imitates JBT's FATCAT, nor that any customers were deceived into purchasing an IntraGrill from Morris while believing it to be a FATCAT. Judgment for Morris is proper on all Arkansas common law unfair competition claims related to the IntraGrill product.

C. Additional Discovery

JBT argues that it should be allowed additional time to complete discovery before the Court rules on whether summary judgment is proper on these claims. Additional discovery must be allowed if it is necessary to "prevent a party from being unfairly thrown out of court by a premature motion for summary judgment." *Iverson v. Johnson Gas Appliance Co., 172 F.3d 524, 530 (8th Cir. 1997)*. The Court is within its discretion to deny additional discovery when the nonmovant merely seeks to delay the inevitable or drive up the cost of litigation to force a beneficial settlement. "*Rule 56(f)* does not condone a fishing expedition . . . for documents that might confirm [a plaintiff's] 'information and belief.'" *Gardner v. Howard, 109 F.3d 427, 431 (8th Cir. 1997)*.

JBT represented in its complaint and amended **[*30]** complaint that it has suffered and is likely to suffer economic and competitive injury. JBT now cites hearsay evidence that a customer feared litigation with Morris to argue that shortly after JBT began offering flow reliefs in its auger chillers, that customer declined flow reliefs because of Morris's alleged false marking and false advertising. JBT has known of this incident since 2013, more than a year before the filing of this lawsuit, but has not followed up with the customer for an affidavit or declaration regarding the cause of that customer's decision. This incident is the extent of JBT's disclosed evidence to support its information and belief about its competitive or economic injuries. JBT states that it has not yet conducted any third-party discovery, including into this incident, even though the Court sided with JBT and allowed discovery into general matters from the outset. Finally, JBT appears not to have conducted any customer surveys at any point, indicating that it has consistently intended to rely only on a rebuttable presumption, and not on evidence of actual injury. JBT fails to show that it would be "unfair" to ask it, nearly five years after the customer declined **[*31]** flow reliefs, and two-and-a-half years after initiation of the lawsuit, to provide some admissible evidence that Morris's conduct was the proximate cause of some economic or competitive injury.

D. Reconsideration of the Protective Order

JBT's request that the Court reconsider entry of its protective order will be denied. The Court precluded additional discovery into sales and financial information relevant to the IntraGrill auger chiller because that discovery was not proportional to the needs of the case. At the time the order was entered, JBT had not yet cited to any evidence that it was proximately harmed by Morris's alleged false marking of the IntraGrill auger chiller. Prior to that point, the Court entered a scheduling order (Doc. 46) that denied Morris's request to limit discovery, and JBT had had ample opportunity and time to engage in third-party discovery to support its allegations of competitive and economic injury. It appeared then that allowing JBT access to Morris's financial information to determine the value of damages for a harm JBT could not show had occurred was more akin to a fishing expedition than discovery.

In light of the Court's analysis on the motions for partial **[*32]** summary judgment, and JBT's continued failure to provide any evidence that Morris's alleged false marking or false advertising proximately caused any harm to JBT, the Court's proportionality analysis remains unchanged. Discovery into all of Morris's sales and financial information relevant to the IntraGrill auger chiller is not proportional to the needs of the case. Additionally, because claims associated with Morris's marking and advertising of the IntraGrill auger chiller as patented under the '529 patent will be dismissed, that discovery is not only disproportionate, but is now far less relevant to the remaining claims or defenses.

V. Conclusion

IT IS THEREFORE ORDERED that Defendant Morris & Associates, Inc.'s motions for partial summary judgment (Docs. 84 and 91) are GRANTED, and Plaintiff John Bean Technologies Corporation's false marking, false advertising, and State law claims related to the '529 Patent and Morris's IntraGrill auger chiller are DISMISSED WITH PREJUDICE.

IT IS FURTHER ORDERED that Plaintiff's motion for reconsideration (Doc. 78) is DENIED.

IT IS SO ORDERED this 19th day of June, 2018.

/s/ P. K. Holmes, III

P.K. HOLMES, III

CHIEF U.S. DISTRICT JUDGE

[NYU Hosps. Ctr. v. League of Voluntary Hosps.](#)

United States District Court for the Southern District of New York

LexisNexis® Headnotes

Labor & Employment Law > Collective Bargaining & Labor Relations > Unfair Labor Practices > Union Violations

HN1[] **Unfair Labor Practices, Union Violations**

It unlawful for a labor organization to threaten, coerce, or restrain any person where an objective thereof is to force or require any employer to join an employer organization in violation of Section 8(b)(4)(ii)(A) of the National Labor Relations Act, *29 U.S.C.S. § 158(b)(4)(ii)(A)*.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN2[] **Motions to Dismiss, Failure to State Claim**

Fed. R. Civ. P. 12(B)(6) permits dismissal of a complaint for failure to state a claim upon which relief can be granted. To survive a motion to dismiss, a complaint must contain sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face. This standard is met when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged. A court should not dismiss a complaint for failure to state a claim if the factual allegations sufficiently raise a right to relief above the speculative level. However, a complaint should be dismissed if the plaintiff has not offered sufficient factual allegations that render the claim facially plausible. Furthermore, the requirement that a court accept the factual allegations in the complaint as true does not extend to legal conclusions. In adjudicating a *Rule 12(b)(6)* motion, a district court must confine its consideration to facts stated on the face of the complaint, in documents appended to the complaint or incorporated in the complaint by reference, and to matters of which judicial notice may be taken.

Antitrust & Trade Law > Sherman Act > Scope

HN3[] Antitrust & Trade Law, Sherman Act

15 U.S.C.S. § 1 of the Sherman Act prohibits any contract, combination in the form of trust or otherwise, or conspiracy, in restraint of interstate trade or commerce. It is clear from caselaw addressing the pleading standards for a *§ 1* claim to survive a motion to dismiss, that allegations in support of a *Section 1* claim must be placed in a context that raises a suggestion of a preceding agreement, not merely parallel conduct that could just as well be independent action. Regardless of whether parallel conduct is alleged, it is not enough to make allegations of an antitrust conspiracy that are consistent with an unlawful agreement; to be viable, a complaint must contain enough factual matter taken as true to suggest that an agreement to engage in anticompetitive conduct was made. In other words, the complaint must contain enough factual matter to raise a reasonable expectation that discovery will reveal evidence of illegal agreement.

Antitrust & Trade Law > Sherman Act > Scope

HN4[] Antitrust & Trade Law, Sherman Act

The restraint of interstate trade or commerce under *15 U.S.C.S. § 1* of the Sherman Act must be unreasonable either under a per se analysis or under the rule of reason. Generally there is a presumption against using the per se analysis. Per se rules of illegality are appropriate only where the agreement at issue is so manifestly anticompetitive that its pernicious effect on competition and lack of any redeeming virtue is conclusively presumed to be unreasonable and therefore illegal without elaborate inquiry as to the precise harm it has caused or the business excuse for its use. Per se unlawful conduct includes horizontal and vertical price-fixing, horizontal market division, and certain types of group boycotts.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN5[] Motions to Dismiss, Failure to State Claim

The plausibility standard under *Fed. R. Civ. P. 12(b)(6)* requires more than a sheer possibility that a defendant has acted unlawfully.

Antitrust & Trade Law > Sherman Act > Scope

HN6[] Antitrust & Trade Law, Sherman Act

Generally, there is a presumption against applying the per se rule under *15 U.S.C.S. § 1* of the Sherman Act. The decision to apply the per se rule turns on whether the practice facially appears to be one that would always or almost always tend to restrict competition and decrease output or instead one designed to increase economic efficiency and render markets more, rather than less, competitive. Per se rules are invoked when surrounding circumstances make the likelihood of anticompetitive conduct so great as to render unjustified further examination of the challenged conduct.

Antitrust & Trade Law > Sherman Act > Scope

HN7[] **Antitrust & Trade Law, Sherman Act**

It is an element of a per se case under *15 U.S.C.S. § 1* of the Sherman Act to describe the relevant market in which it may be presumed that the anticompetitive effect would occur.

Antitrust & Trade Law > Sherman Act > Scope

HN8[] **Antitrust & Trade Law, Sherman Act**

Certain practices are so obviously anticompetitive that courts consider these to be per se violations of the Sherman Act. Per se illegal conduct includes price fixing, division of markets, tying arrangements, and certain types of group boycotts. Courts have been reluctant to expand the categories of per se illegality.

Antitrust & Trade Law > Sherman Act > Scope

HN9[] **Antitrust & Trade Law, Sherman Act**

The classic group boycott is a concerted attempt by a group of competitors at one level to protect themselves from competition from non-group members who seek to compete at that level. The Supreme Court has held that precedent limits the per se rule in the boycott context to cases involving horizontal agreements among direct competitors. Indeed, the per se rule under the Sherman Act is inapplicable to vertical restraints.

Antitrust & Trade Law > Exemptions & Immunities > Labor

Labor & Employment Law > Collective Bargaining & Labor Relations > Bargaining Units

HN10[] **Exemptions & Immunities, Labor**

The act of expulsion from a wholesale cooperative does not necessarily imply anticompetitive animus and thereby raise a probability of anticompetitive effect in part because wholesale purchasing cooperatives must establish and enforce reasonable rules in order to function effectively. The same can be said of multiemployer bargaining units. Unless the cooperative possesses market power or exclusive access to an element essential to effective competition, the conclusion that expulsion is virtually always likely to have an anticompetitive effect is not warranted.

Antitrust & Trade Law > Exemptions & Immunities > Labor

Business & Corporate Compliance > ... > Collective Bargaining & Labor Relations > Unfair Labor Practices > Employer Violations

HN11[] **Exemptions & Immunities, Labor**

Almost any concerted action by employers that touches on a mandatory subject of collective bargaining, no matter how obviously offensive to the policies underlying the nation's antitrust statutes, should be immune from scrutiny so long as a collective-bargaining process is in place. The multiemployer bargaining is a well-established, important, pervasive method of collective bargaining, offering advantages to both management and labor. To subject the practice of multiemployer bargaining to ***antitrust law*** is to require antitrust courts to answer a host of important practical questions about how collective bargaining over wages, hours, and working conditions is to proceed, the very result that the implicit labor exemption seeks to avoid. And it is to place in jeopardy some of the potentially beneficial labor-related effects that multiemployer bargaining can achieve.

Business & Corporate Compliance > ... > Employee Retirement Income Security Act (ERISA) > Pensions & Benefits Law > ERISA

HN12[] Pensions & Benefits, Employee Retirement Income Security Act (ERISA)

Under Section 403(c) of Employee Retirement Income Security Act (ERISA), *29 U.S.C.S. § 1001 et seq.*, the assets of a plan shall never inure to the benefit of any employer and shall be held for the exclusive purposes of providing benefits to participants in the plan and their beneficiaries and defraying reasonable expenses of administering the plan, except that, in the case of a contribution or payment made by an employer to a multiemployer plan by a mistake of fact or law, the return of such contribution or payment to the employer within six months after the plan administrator determines that the contribution was made by such a mistake is not prohibited. *29 U.S.C.S. § 1103(c)*.

Pensions & Benefits Law > ... > Judicial Review > Standards of Review > Arbitrary & Capricious Review

HN13[] Standards of Review, Arbitrary & Capricious Review

There is a limited standard under which courts may review the administrative acts of pension fund trustees. As a general rule federal courts should refrain from interfering with the administration of a pension plan unless its trustee or administrator has acted in an arbitrary or capricious manner. The lawful, discretionary acts of a pension committee should not be disturbed, absent a showing of bad faith or arbitrariness. Moreover, this standard of review must be considered in conjunction with the permissive language of *29 U.S.C.S. § 1103(c)(2)(A)(ii)*, which neither commands nor precludes the payment of refunds, and instead, merely permits the return of contributions mistakenly made Indeed, the statute does not say that payments made under a mistake necessarily will be returned. Nonetheless, an employer is entitled to repayment if it shows that the refusal to repay was arbitrary or capricious and the equities favor restitution.

Pensions & Benefits Law > ... > Administration & Enforcement > Handling of Claims > Judicial Review

HN14[] Handling of Claims, Judicial Review

The fund administrators are in the best position to determine whether the equities of a particular case require a refund or setoff, as opposed to courts making that determination under the rubric of a purported federal common law right to restitution or setoff. Those decisions are therefore left to those vested in the first instance by Employee Retirement Income Security Act (ERISA), *29 U.S.C.S. § 1001 et seq.* with the authority and responsibility to make them.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN15[] Motions to Dismiss, Failure to State Claim

Fed. R. Civ. P. 12(b)(6) is not an appropriate vehicle by which to decide what is fundamentally a factual dispute.

Labor & Employment Law > Collective Bargaining & Labor Relations > Unfair Labor Practices > Union Violations

HN16[] **Unfair Labor Practices, Union Violations**

Section 303 of the Labor Management Relations Act, *29 U.S.C.S. § 187*, makes it unlawful for any labor organization to engage in conduct prohibited by § 8(b)(4)(ii)(A) of the National Labor Relations Act (NLRA), *29 U.S.C.S. § 158(b)(4)(ii)(A)*, which in turn makes it an unfair labor practice for a labor organization to threaten, coerce, or restrain any person where an objective thereof is to force or require any employer to join an employer organization. *§§ 187*, *158(b)(4)(ii)(A)*.

Labor & Employment Law > Collective Bargaining & Labor Relations > Unfair Labor Practices > Union Violations

HN17[] **Unfair Labor Practices, Union Violations**

Section 8(b)(4)(ii)(B) of the National Labor Relations Act, *29 U.S.C.S. § 158(b)(4)(ii)(A)* currently contains a proviso stating that nothing contained in clause (B) shall be construed to make unlawful, where not otherwise unlawful, any primary strike or primary picketing. *29 U.S.C.S. § 158(b)(4)(B)*. Despite the fact that without the proviso, § 8(b)(4)(ii)(B) could be read to cover primary activity, the National Labor Relations Board and the judiciary have construed the statute more narrowly, both before and after the proviso was added, to prohibit only secondary, rather than primary, strikes and picketing. Section 8(b)(4)(ii)(A), however, does not contain the same proviso.

Labor & Employment Law > ... > Unfair Labor Practices > Union Violations > Secondary Activities

HN18[] **Union Violations, Secondary Activities**

Section 8(b)(4) of the National Labor Relations Act, *29 U.S.C.S. § 158(b)(4)(ii)(A)* for decades has been dubbed the secondary boycott provision in scores of judicial opinions, administrative decisions, law review articles, treatises, casebooks, and law school classrooms. While § 8(b)(4) does not expressly mention primary or secondary disputes, strikes or boycotts, that section often is referred to in the Act's legislative history as one of the Act's secondary boycott sections.

Labor & Employment Law > ... > Unfair Labor Practices > Union Violations > Secondary Activities

HN19[] **Union Violations, Secondary Activities**

Courts, including in the Second Circuit, have found violations of *29 U.S.C.S. § 158(b)(4)(ii)(A)* without requiring proof of a secondary objective. Thus, primary activity has been found to be a cognizable harm. Section *§ 158(b)(4)(ii)(A)* draws no distinction between primary and secondary picketing.

Opinion

[*625] DECISION AND ORDER

VICTOR MARRERO, United States District Judge.

In its Amended Complaint (see Dkt. No. 67), NYU Hospitals Center ("NYU") brings claims for (1) unlawful agreement in restraint of trade, in violation of *Section 1* of the *Sherman Act*, *15 U.S.C. Section 1*, against all defendants (Count I); (2) violation of *Section 303* of the *Labor Management Relations Act (the "LMRA")*, *29 U.S.C. Section 187*, against the 1199SEIU United Healthcare Workers East (the "Union") (Count II); and (3) restitution for excessive fund contributions under the *Employee Retirement Income Security Act ("ERISA")*, *29 U.S.C. Section 1001 et seq.*, against the 1199SEIU National Benefit Fund for Health and Human Service Employees (the "Fund") (Count III). Defendants the League of Voluntary Hospitals and Homes of New York (the "League"), the Fund, the Union, and the Mount Sinai Hospital, Montefiore Health System, Inc., the New York and Presbyterian Hospital, and Long Island Jewish Medical Center (collectively, the "Hospital Defendants," and together with the League, the Fund, and the Union, "Defendants"), filed motions to dismiss. For the reasons discussed below, the motions are granted as to Count I of the **[**3]** Amended Complaint, and denied as to Counts II and III of the Amended Complaint.

I. FACTUAL BACKGROUND

In its Amended Complaint, NYU alleges that it was, for many years, a member of the League, which negotiated collective bargaining agreements on behalf of NYU and its competitors with the Union, which in turn represents healthcare workers in the metropolitan area. (See Am. Compl. ¶ 2.) NYU voluntarily withdrew from the League on March 28, 2016, but agreed to continue to abide by the collective bargaining agreement ("CBA") then in effect -- a 2009 CBA that was modified by a memorandum of agreement ("MOA") in July 2014, and later by a letter agreement in October 2014 -- until it terminates on September 30, 2018. (See id. ¶¶ 2, 26, 38.) Following the adoption of the MOA, the Fund, the Union, and the League requested that the actuarial firm of Milliman, Inc. ("Milliman") propose contribution rate methodologies for League member hospitals. (See id. ¶ 32.) In addition to proposing such a methodology, the final actuarial report (the "Milliman Report") also proposed a contribution rate for non-League employers that would go into effect the first full month after an employer withdraws from the **[**4]** League. (See id. II 35, 37.) NYU argues that the higher, "non-League" contribution rates it has been paying since October 2016 constitute a penalty that is the result of anticompetitive concerted action by the League, the Fund, the Union, and the Hospital Defendants. (See id. ¶ 50.)

[*626] In its second claim for relief, NYU asserts that the Union's imposition of the higher, non-League contribution rates on NYU violated *Section 303 of the LMRA*, *29 U.S.C. Section 187*, which makes ***HN1***[] it unlawful for a labor organization to threaten, coerce, or restrain any person where an objective thereof is to force or require any employer to join an employer organization in violation of *Section 8(b)(4)(ii)(A)* of the *National Labor Relations Act ("NLRA")*, *29 U.S.C. Section 158(b)(4)(ii)(A)*. (See id. ¶¶ 75, 77.)

NYU's third cause of action is for restitution of excessive fund contributions against the Fund. (See id. II 83-89.) In particular, NYU alleges that the Fund's denial of NYU's request to reject the Union's instruction to impose the higher, non-League contribution rates on NYU after its withdrawal from the League constituted a "mistake of law and/or fact" which caused harm redressable under ERISA. (See id. ¶ 85.)

A. DEFENDANTS' PRE-MOTION LETTERS TO DISMISS

By letters dated August 23, 2017, Defendants notified **[**5]** the Court of their intention to move to dismiss the complaint. (See Dkt. Nos. 38-41.) These letters respond to the original complaint, first filed on June 14, 2017 (see "Complaint," Dkt. No. 1), and superseded by the Amended Complaint filed on December 19, 2017. As outlined in more detail below, some of the arguments pressed by Defendants overlap while some are unique to each defendant.

In its August 23, 2017 letter, the League first moves to dismiss NYU's Sherman Act claim on the basis that the non-statutory labor exemption to the antitrust laws bars any such challenge. In particular, the League argues that the conduct at issue falls within the exemption from antitrust scrutiny for collective bargaining agreements between a multiemployer bargaining unit and a union where the agreement is so "intimately related" to wages, hours, and working conditions that the union's successful attempt to obtain the agreement through bona fide, arm's length bargaining in pursuit of its own labor union policies, and not at the behest of or in combination with non-labor groups, falls within the protection of the national labor policy. (See Dkt. No. 39 at 2-3.) Indeed, the League argues that NYU concedes **[**6]** that it is bound by the 2009 CBA, as amended in 2014, and that the CBA itself required the Fund, working with actuaries, to develop a contribution rate methodology to be implemented if approved by the Fund's trustees. (See id.) According to the League, these rates were in fact developed by the actuaries, approved by the trustees, and subsequently ratified by the Union and the League. (See id. at 3.) Thus, the League argues, NYU's lawsuit merely challenges the Fund's implementation of CBA terms, and so falls squarely within the non-statutory labor exemption.

Second, the League asserts that NYU fails to state a plausible antitrust claim because: (1) there is no allegation that the League or its member hospitals participated in an antitrust conspiracy -- merely that the Hospital Defendants "encouraged and acquiesced" in conduct by the Union and the Fund, and that a League executive was "aware of and copied on" correspondence between the Union and the Fund; (2) the conduct complained of was expressly contemplated by the CBA between the parties; and (3) NYU has not adequately alleged antitrust standing because there is no allegation that the asserted conduct injured competition in the allegedly **[**7]** restrained market. (See id. at 4.)

In their August 23, 2017 letter, the Hospital Defendants move to dismiss the Complaint on the bases that (1) this dispute falls squarely within the non-statutory labor **[*627]** exemption; (2) the Complaint does not adequately allege any unlawful agreement involving the Hospital Defendants because there is no allegation that the Hospital Defendants had a role in the decision made by the Fund concerning NYU's contributions after it exited the League; (3) the Complaint does not adequately allege harm to competition because NYU has failed to plead conduct that is "per se" unlawful and NYU does not adequately plead a "rule of reason" claim; and (4) the Complaint does not plausibly allege antitrust injury because NYU's alleged injuries did not result from any restraint on competition. (See Dkt. No. 38 at 3-4.)

In its August 23, 2017 letter, the Fund moves to dismiss the Complaint on two grounds. First, the Fund argues that NYU fails to state a claim against the Fund for unlawful agreement in restraint of trade because (1) NYU's allegations are merely conclusory, and (2) as an employee benefit fund affiliated with a union, which can use its assets only for the benefit of employees, **[**8]** the Fund is exempt from the antitrust laws. (See Dkt. No. 40 at 1-2.) Second, the Fund argues that NYU's claim for restitution of excessive fund contributions is not yet ripe because it depends on a contingent future event that may not happen -- namely, that the trustees of the Fund would decide not to reimburse NYU if they were presented with a determination that the contributions were made by a mistake of law or fact. (See id. at 3.)

In its August 23, 2017 letter, the Union first moves to dismiss the Complaint on the ground that NYU has failed to plausibly allege an antitrust conspiracy. In particular, the Union argues that the only allegedly conspiratorial conduct by the Union was a letter sent to the Fund, instructing it to recalculate NYU's contribution rate using the non-League methodology proposed by the Fund's actuaries, and that the Union's alleged encouragement of and acquiescence in the Fund's determination does not amount to an antitrust conspiracy. (See Dkt. No. 41 at 2-3.) Second, the Union argues that its conduct is protected by the non-statutory labor exemption. (See id. at 3-4.) Relatedly, the Union asserts that the question of whether NYU's purported withdrawal from the League was lawful **[**9]** under federal labor law is currently pending before the National Labor Relations Board ("NLRB"), and that resolution of that question could moot the relief requested by NYU here. (See id. at 2 n.1.) Third, the Union argues that NYU has failed to adequately plead that the alleged conduct harms competition. In particular, the Union argues that competition can be harmed only if total, market-wide investments decrease materially, and while NYU pleads in general terms that competition has been harmed because NYU has $25 million less to invest in new facilities, technology, and services, NYU fails to plead allegations suggesting that total investments in healthcare improvements in the market will decrease materially, or at all. (See id. at 4.)

B. NYU'S OPPOSITION

By letters dated September 22, 2017, NYU submitted the proposed Amended Complaint and responded to Defendants' motion to dismiss arguments. (See Dkt. No. 61.)

In response to the Union, NYU argues that (1) it has properly alleged an unlawful agreement (see id. at 2-3); (2) the Union's conduct is not protected by the non-statutory labor exemption[1] (see id. at 3); and (3) NYU has properly alleged harm to competition because it has alleged a per se violation of the antitrust **[**10]** laws (see id. at 4) . **[*628]** NYU also asserts that the Amended Complaint adequately pleads competitive harm. (See id.)

In response to the Hospital Defendants, NYU first argues that it has properly alleged an unlawful agreement, and that the Hospital Defendants are liable for the League's actions because they authorized the League to act as their agent. (See id. at 11-12.) Second, NYU argues that it has properly alleged harm to competition and antitrust injury because it has alleged a per se violation of the antitrust laws. (See id. at 13.)

In response to the League, NYU argues that the Defendants' conduct is not covered by the non-statutory labor exemption. (See id. at 39-40.) First, NYU argues that the challenged conduct is not "intimately related" to wages, hours, and working conditions, nor is it within the scope of traditionally mandatory subjects of collective bargaining; according to NYU, the withdrawal provision "serves no purpose other than to coerce hospital members to remain in the League and to punish those that withdraw." (See id. at 39.) Second, NYU argues that the withdrawal provision serves as a "direct restraint on a business market" by severely impacting NYU's ability to compete in the market for hospital services, by limiting **[**11]** the ability of other League members to withdraw, and by restricting NYU's ability to pursue investments. (See id.)

In response to the Fund, NYU argues that (1) it has stated an antitrust claim against the Fund because the non-statutory labor exemption does not apply to conspiracies between labor groups and non-labor groups (see id. at 47); (2) NYU's restitution claim properly alleges mistakes of fact and law by the Fund in that the withdrawal provision was never incorporated into the CBA between the parties and thus NYU should never have been treated as "[n]on-League" for purposes of the CBA now in force (see id. at 48-49); and (3) NYU's ERISA claim is ripe for review because NYU has adequately pled that the Fund considered and rejected its request for restitution. (See id. at 49.)

C. DEFENDANTS' REPLIES

---

[1] NYU disputes the Union's argument that resolution of the NLRB proceeding would moot the relief NYU is seeking in this lawsuit. (See Dkt. No. 61 at 3.)

By letter dated September 29, 2017, the League replied to NYU, arguing that the December 2014 "agreement" among the Defendants that NYU challenges was a document describing the collectively bargained health care rate calculations to which the parties had already agreed in the July 2014 MOA as modified by a collectively bargained amendment in October 2014. (See Dkt. No. 64 at 1.) The League maintains that the challenged **[**12]** benefit rate terms are protected by the non statutory labor exemption, and if NYU has a remedy, it is under labor not ***antitrust law***. (See id. at 2-3.) Finally, the League asserts that, like its original Complaint, NYU's Amended Complaint (1) fails to allege that Defendants joined an unlawful agreement, and (2) fails to allege facts sufficient to establish antitrust standing. (See id. at 3.)

By letter dated October 1, 2017, the Union responded to NYU. (See Dkt. No. 51.) First, the Union argues that the Amended Complaint, like NYU's original Complaint, fails to allege a conspiracy. In particular, the Union argues that there is no reason why the Fund would seek agreement from the League for a rule relating to the contributions due from any institution leaving or joining the League during the term of the MOA when the Fund was in fact authorized by the MOA to develop and implement such a methodology. (See id. at 2.) Moreover, the Union argues, the Amended Complaint is internally inconsistent in that, for example, the change in NYU's contribution rate cannot both be in reaction to NYU's withdrawal from the League and the result of an alleged agreement **[*629]** reached over a year before NYU's withdrawal. (See id. at 2-3.) Furthermore, **[**13]** the Union maintains that its conduct is protected by the non-statutory labor exemption. (See id. at 3.) Second, the Union argues that NYU fails to adequately allege harm to competition in the market at large. (See id.) Finally, the Union contends, NYU's claim, new in its Amended Complaint, against the Union under *Section 303 of the LMRA* fails because NYU's "displeasure" with the application of the Fund's rules regarding contribution rates does not amount to "coercion" or "restraint." (See id.)

By letter dated October 2, 2017, the Hospital Defendants responded to NYU. (See Dkt. No. 63.) First, the Hospital Defendants argue that NYU's Amended Complaint fails to plead that the Hospital Defendants entered into an unlawful agreement. (See id. at 1-2.) In particular, the Hospital Defendants maintain that neither their receipt of emails concerning the calculation of Fund contribution rates nor their alleged acquiescence in the Fund's decision to alter NYU's contribution rate is sufficient to establish unlawful agreement in violation of the Sherman Act. (See id. at 2-3.) Second, the Hospital Defendants argue that they cannot be held liable under an agency theory for the Fund's conduct because the Fund was authorized to act as agent only for **[**14]** the purpose of entering into a collective bargaining agreement, and thus any separate agreement outside the scope of the CBA between the parties would exceed the League's authority. (See id. at 3.) Third, the Hospital Defendants assert that any agreement between the Union and the League (or the Hospital Defendants) is protected by the non-statutory labor exemption. (See id.) Finally, the Hospital Defendants argue that the Amended Complaint does not adequately allege harm to competition or antitrust injury. (See id.)

By letter dated October 11, 2017, the Fund responded to NYU. (See Dkt. No. 62.) First, the Fund argues that NYU fails to state an antitrust claim against it because NYU's obligation to contribute to the Fund resulted from collective bargaining -- to which NYU was a party -- and not from any alleged conspiracy in restraint of trade. (See id. at 1-3.) Indeed, the Fund argues, NYU was made aware of the Milliman Report's contribution methodology for employers changing from League to non-League status as early as December 2014 and it did not then bring any challenge in labor arbitration. (See id. at 2-3.) Second, the Fund argues that NYU has still failed to show that its claim for restitution is ripe. (**[**15]** See id. at 3-4.) More specifically, the Fund asserts that under ERISA, the Fund's trustees have a fiduciary duty to collect and hold NYU's contributions, and there is no basis for them to conclude that any have been made pursuant to a mistake of law or fact unless and until NYU prevails in this litigation. (See id.)

D. TELEPHONE CONFERENCE

The Court held a telephone conference on December 11, 2017 during which it heard arguments from the parties and advised the parties that the Amended Complaint does not appear to state an antitrust claim sufficient to survive a motion to dismiss. (See Dkt. Minute entry for 12/11/2017.) The Court permitted the Fund and the Union to make a joint submission on the LMRA and ERISA claims raised in Counts II and III of the Amended Complaint, and permitted NYU to respond to that submission. (See id.)

E. SUPPLEMENTAL BRIEFING ON ERISA AND LMRA

By letter dated December 15, 2017 (the "December 15 Letter"), the Fund and the Union opposed NYU's ERISA and LMRA **[*630]** claims. (See Dkt. No. 65.) With respect to the ERISA claim, the Fund argues that *Section 403(c)(2)* permits, but does not require, an ERISA plan's trustees to reimburse employer contributions when those contributions are made by reason **[**16]** of a mistake of law or fact. (See id. at 1.) The Fund contends that NYU has not sufficiently alleged a mistake of law or fact because it is clear from the Amended Complaint that NYU's contributions at the non-League rates were not a mistake, but rather were "intentional and in accordance with the CBA." (See id. at 2.)

With respect to the LMRA claim, the Union argues that *Section 8(b) (4) of the NLRA* applies only to coercion or restraint directed at a "neutral/secondary employer (an employer with whom a union does not have a labor dispute) in order to coerce the neutral employer to pressure the primary employer ... to resolve the primary labor dispute." (Id. at 3.) Because the Amended Complaint does not allege that the Union is pressuring a secondary employer, the Union argues that there is no basis for a *Section 303* claim. (See id.) The Union also argues that even if there were a basis for a *Section 303* claim, there is no "coercion" or "restraint": NYU's payment of the non-League contribution rate is merely the application of the required contribution rate under the CBA to which NYU does not dispute that it is a party. (See id.)

By letter dated January 2, 2018 (the "January 2 Letter"), NYU responded to the Fund and the Union's submission on the ERISA and LMRA **[**17]** claims. (See Dkt. No. 69.) First, NYU reargues that its Amended Complaint sufficiently alleges violations of federal ***antitrust law***. (See id. at 1-6.) NYU largely reiterates its arguments from its September 22, 2017 submission (see Dkt. No. 61), and urges that discovery is necessary to reveal whether or not the Milliman Report provision at issue was properly incorporated into the CBA between the parties. (See id. at 4.)

With respect to its ERISA claim, NYU argues that it has sufficiently pled a mistake of fact and law through its allegation that the Milliman Report provision concerning the contribution rate for employers who transferred from League to non-League status was never validly made a part of the CBA between the parties. (See id. at 7.)

With respect to its LMRA claim, NYU argues that the Union is wrong to state that *Section 8(b)(4)(ii)(A)* applies only to union conduct directed at neutral, "secondary employers" with whom there is no primary dispute. (See id. at 7-8.) More specifically, NYU contends that the cases cited by the Union address an old version of the statute, and not the current *Section 8(b) (4)(ii)(A)* which has "never been interpreted as reguiring proof of a secondary objective." (See id. at 8.)

By letter dated January 8, 2018, the Fund wrote to point out **[**18]** a purported misstatement of fact set forth by NYU in its January 2 Letter. (See Dkt. No. 68.) In particular, the Fund notes that in the January 2 Letter, NYU claims that it remained a League member for the duration of the existing collective bargaining agreement, but the Amended Complaint refers to a March 28, 2016 letter whereby NYU resigned from the League "effective immediately," (See id. at 1.)

By letter dated January 9, 2018, NYU responded that the March 28, 2016 letter referenced by the Fund "had the narrow purpose of effecting NYU[]'s immediate withdrawal of future bargaining authority from the League," but that NYU remains a League member for the duration of the existing CBA. (See Dkt. No. 70 at 1.)

The Court now construes Defendants' letters described above as motions to dismiss **[*631]** the Amended Complaint pursuant to *Federal Rule of Civil Procedure 12(b) (6)* ("*Rule 12(b) (6)*").

II. ANALYSIS

A. *RULE 12(B)(6)* LEGAL STANDARD

Rule 12(b) (6) ***HN2***[] permits dismissal of a complaint for "failure to state a claim upon which relief can be granted." *Fed. R. Civ. P. 12(b)(6)*. "To survive a motion to dismiss, a complaint must contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" *Ashcroft v. Iqbal, 556 U.S. 662, 678,* 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009) (quoting Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)). This standard is met "when the plaintiff pleads factual content **[**19]** that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." Id. A court should not dismiss a complaint for failure to state a claim if the factual allegations sufficiently "raise a right to relief above the speculative level." Twombly, 550 U.S. at 555. However, a complaint should be dismissed if the plaintiff has not offered sufficient factual allegations that render the claim facially plausible. See Iqbal, 556 U.S. at 678. Furthermore, the requirement that a court accept the factual allegations in the complaint as true does not extend to legal conclusions. See id. In adjudicating a Rule 12(b)(6) motion, a district court must confine its consideration "'to facts stated on the face of the complaint, in documents appended to the complaint or incorporated in the complaint by reference, and to matters of which judicial notice may be taken.'" Leonard F. v. Israel Disc. Bank of New York, 199 F.3d 99, 107 (2d Cir. 1999) (quoting Allen v. WestPoint-Pepperell, Inc., 945 F.2d 40, 44 (2d Cir. 1991)).

B. ANTITRUST ALLEGATIONS

1. Legal Standard

HN3[] Section One of the Sherman Act prohibits any "contract, combination in the form of trust or otherwise, or conspiracy, in restraint of [interstate] trade or commerce." See 15 U.S.C. § 1. It is clear from Twombly, which addressed the pleading standards for a Section 1 claim to survive a motion to dismiss, that allegations in support **[**20]** of a Section 1 claim "must be placed in a context that raises a suggestion of a preceding agreement, not merely parallel conduct that could just as well be independent action." 550 U.S. at 557.

Regardless of whether parallel conduct is alleged, "it is not enough to make allegations of an antitrust conspiracy that are consistent with an unlawful agreement; to be viable, a complaint must contain 'enough factual matter (taken as true) to suggest that an agreement [to engage in anticompetitive conduct] was made.'" In re Elevator Antitrust Litig., 502 F.3d 47, 50 (2d Cir. 2007) (alteration in original) (quoting Twombly, 550 U.S. at 556). In other words, the complaint must contain enough factual matter "to raise a reasonable expectation that discovery will reveal evidence of illegal agreement." Twombly, 550 U.S. at 545.

HN4[] The restraint alleged must be unreasonable either under a "per se" analysis or under the "rule of reason."[2] Tops Mkts., Inc. v. Quality Mkts., Inc., 142 F.3d 90, 95-96 (2d Cir. 1998). Generally there is a presumption against using the "per se" analysis. See Business Electronics Corp. v. Sharp Electronics Corp., 485 U.S. 717, 726, 108 S. Ct. 1515, 99 L. Ed. 2d 808 (1988). Per se rules of illegality are appropriate only where the agreement at issue is so "manifestly anticompetitive" that its "pernicious **[*632]** effect on competition and lack of any redeeming virtue [is] conclusively presumed to be unreasonable and therefore illegal without elaborate inquiry as to the precise harm [it has] caused or the **[**21]** business excuse for [its] use." Continental T.V., Inc. v. GTE Sylvania Inc., 433 U.S. 36, 50-51, 97 S. Ct. 2549, 53 L. Ed. 2d 568 (1977) (internal quotation marks omitted). Examples of per se unlawful conduct include horizontal and vertical price-fixing, horizontal market division, and certain types of group boycotts. See NYNEX Corp. v. Discon, Inc., 525 U.S. 128, 133-34, 119 S. Ct. 493, 142 L. Ed. 2d 510 (1998).

2. Relevant Antitrust Allegations

In its Amended Complaint, NYU alleges an unlawful agreement in restraint of trade, in violation of Section 1 of the Sherman Act, 15 U.S.C. Section 1, against all Defendants. (See Am. Compl. 11 56-72.) NYU asserts that it voluntarily withdrew from the League on March 28, 2016, but agreed to continue to abide by the CBA then in effect (a 2009 CBA that was modified twice in 2014) until it terminates on September 30, 2018. (See id. 12.) NYU concedes that it agreed to the July 21, 2014 MOA modifying the CBA, and to the October 24, 2014 letter agreement (the "2014 Letter Agreement") between the League and the Union that modified the MOA. (See January 2 Letter at 4.) NYU also asserts that Section 6, Paragraph C of the MOA states that the "Fund administration, together with the actuaries, shall develop a practicable contribution methodology, subject to the approval of the Trustees that effectuates" the two schedules listed in the MOA that contained required contribution rates and caps **[**22]** for both League hospitals and League nursing homes. (See Am. Compl. ¶ 31.)

---

[2] A rule of reason claim is not pled in the Amended Complaint.

But NYU asserts that the exercise of "incorporating" the Milliman Report into the CBA and then imposing the non-League contribution rate on NYU did not comply with the applicable collective bargaining process and was therefore inappropriate. (See January 2 Letter at 4.) In particular, NYU alleges that while it signed the 2014 Letter Agreement, there was no mention in the 2014 Letter Agreement of incorporating the Milliman Report in its entirety into the CBA. (See id.) Nonetheless, NYU asserts, the Union and the League created a new version of the CBA that purported to incorporate the entire Milliman Report -- a version that was allegedly neither shared with NYU nor ratified in accordance with the League's rules. (See id.)

As outlined in more detail above, the League disputes the sufficiency of NYU's antitrust allegations on the basis that Fund contribution rates are a mandatory subject of collective bargaining, and therefore exempt from antitrust scrutiny under the non-statutory labor exemption. (See generally Dkt. Nos. 39 & 64.)

The Union urges dismissal of the Amended Complaint because the Union's encouragement **[**23]** of and acquiescence in the Fund's determination to change NYU's contribution rate does not amount to an antitrust conspiracy. (See generally Dkt. Nos. 41 & 51.)

Likewise, the Fund argues that NYU fails to state an antitrust claim because NYU's obligation to contribute to the Fund resulted from collective bargaining — to which NYU was a party -- and not from any alleged conspiracy in restraint of trade. (See generally Dkt. Nos. 40 & 62.)

The Hospital Defendants argue that the Amended Complaint does not adequately allege any unlawful agreement involving the Hospital Defendants because there is no allegation that they had a role in the decision made by the Fund to adjust NYU's contributions after it exited the League. (See generally Dkt. Nos. 38 & 63.)

[*633] 3. Antitrust Allegations Against the Hospital Defendants

As a threshold matter, NYU's antitrust claim against the Hospital Defendants is dismissed because the claim is not supported by specific factual averments of participation in the alleged conspiracy. As the Hospital Defendants note, NYU fails to plead non-conclusory allegations sufficient to state a claim to antitrust relief. (See Dkt. No. 38 at 3.) The Amended Complaint says nothing about **[**24]** who at the Hospital Defendants participated in the alleged agreement. Moreover, there is no allegation that the Hospital Defendants had a role in the decision made by the Fund to change NYU's contribution rate after NYU withdrew from the League. Indeed, there is no allegation as to why the Hospital Defendants' assent would even be necessary for the Union and the Fund to alter NYU's contribution rate. The decision to move NYU to the non-League contribution rate was clearly made without NYU's consent, and there is no allegation as to why the other employer hospitals were at that time differently situated to affect NYU's contribution rate.

The only allegations specifically tying the Hospital Defendants to the alleged conspiracy are that they received two separate communications from the Fund in December 2014 which made reference to the Milliman Report's proposal to adjust the contribution rate for League employers who moved to non-League status, and that the Hospital Defendants did not then raise any objection.[3] (See Am. Compl. ¶¶ 39-40.) On the basis of these facts, NYU alleges in general terms that all Defendants "reached a meeting of the minds at around that time that penalty payments **[**25]** should be imposed on withdrawing Hospital League members, although this was never made a formal part of the collective bargaining agreement." (See id. ¶ 40.)

HN5[] Iqbal's plausibility standard, however, requires more than a "sheer possibility that a defendant has acted unlawfully." See *Iqbal, 556 U.S. at 678* (citing *Twombly, 550 U.S. at 556*) . That is not present here on the face of NYU's Amended Complaint as against the Hospital Defendants. Nor are there any specific allegations regarding the Hospital Defendants that are sufficient to state an antitrust claim. See, e.g., *In re Elevator Antitrust Litig., 502 F.3d 47, 50 (2d Cir. 2007)* (affirming dismissal of antitrust claim where complaint lacked "any specification of any particular activities by any particular defendant" (internal citations omitted)); *Hinds Cty. v. Wachovia Bank N.A., 620*

[3] NYU does not allege that it raised any objection at this time either.

F. Supp. 2d 499, 518 (S.D.N.Y. 2009) ("[A]negations that particular employees participated in communications in furtherance of the alleged conspiracy cannot make the conspiracy itself more plausible, when those allegations do not contain any other specific details.").

NYU's antitrust claim against the Hospital Defendants is therefore dismissed.

4 . Antitrust Allegations Against All Defendants

NYU alleges that "[b]y imposing the higher 'Non-League' contribution-rate methodology on NYU [] for employee benefits, Defendants have entered into **[**26]** and enforced a per se unlawful contract, combination, or conspiracy to restrain interstate trade and commerce in violation of Section 1 of the Sherman Act." (Am. Compl. ¶ 57.)

HN6[] Generally, there is a presumption against applying the per se rule. See Business Electronics Corp. v. Sharp Electronics Corp., 485 U.S. 717, 726, 108 S. Ct. 1515, 99 L. Ed. 2d 808 (1988); Bogan v. Hodgkins, 166 F.3d 509, 514 (2d Cir. 1999) . "The decision to apply the per se rule turns on 'whether the practice facially appears to be **[*634]** one that would always or almost always tend to restrict competition and decrease output ... or instead one designed to 'increase economic efficiency and render markets more, rather than less, competitive.'" Northwest Wholesale Stationers, Inc. v. Pac. Stationery & Printing Co., 472 U.S. 284, 289-90, 105 S. Ct. 2613, 86 L. Ed. 2d 202 (1985) (alteration in original) (quoting Broadcast Music, Inc. v. Columbia Broad. Sys., Inc., 441 U.S. 1, 19-20, 99 S. Ct. 1551, 60 L. Ed. 2d 1 (1979)); see also National Collegiate Athletic Ass'n v. Bd. of Regents of Univ. of Oklahoma, 468 U.S. 85, 103-04, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (1984) ("Per se rules are invoked when surrounding circumstances make the likelihood of anticompetitive conduct so great as to render unjustified further examination of the challenged conduct.").

As an initial matter, NYU is wrong that "[g]iven the per se nature of the violation of Section 1 of the Sherman Act, allegations with respect to the relevant product market . . . are not required." (See Am. Compl. ¶ 61.) In fact, HN7[] "it is an element of a per se case to describe the relevant market in which we may presume the anticompetitive effect would occur." See, e.g., Bogan, 166 F.3d at 515.

NYU is, however, correct that HN8[] certain practices are "so **[**27]** obviously anticompetitive that courts consider these to be per se violations of the Sherman Act." See id. at 514. Examples of per se illegal conduct include price fixing, division of markets, tying arrangements, and certain types of group boycotts. See Northern Pac. Ry. Co. v. United States, 356 U.S. 1, 5, 78 S. Ct. 514, 2 L. Ed. 2d 545 (1958). "Courts have been reluctant to expand the categories of per se illegality." Bogan, 166 F.3d at 514.

Neither price fixing, nor division of markets, nor tying arrangements are alleged to be at issue here. Only the group boycott could potentially apply to this case.

HN9[] The "classic 'group boycott' is a concerted attempt by a group of competitors at one level to protect themselves from competition from non-group members who seek to compete at that level." See Smith v. Pro Football, Inc., 593 F.2d 1173, 1178, 193 U.S. App. D.C. 19 (D.C. Cir. 1978). The Supreme Court has held that "precedent limits the per se rule in the boycott context to cases involving horizontal agreements among direct competitors." NYNEX Corp. v. Discon, Inc., 525 U.S. 128, 135, 119 S. Ct. 493, 142 L. Ed. 2d 510 (1998). Indeed, the per se rule is "inapplicable" to vertical restraints. See id. at 136. Here, the dismissal of NYU's antitrust claim as against the Hospital Defendants (NYU's direct competitors) prohibits a finding of a group boycott that would be per se unlawful under Section 1 of the Sherman Act.

Northwest Wholesale Stationers, Inc. v. Pacific Stationery and Printing Co., 472 U.S. 284, 105 S. Ct. 2613, 86 L. Ed. 2d 202 (1985), is instructive. There, an employer was expelled from a wholesale purchasing cooperative **[**28]** without any explanation, notice, or hearing. The Supreme Court found that HN10[] the "act of expulsion from a wholesale cooperative does not necessarily imply anticompetitive animus and thereby raise a probability of anticompetitive effect" in part because "[w]holesale purchasing cooperatives must establish and enforce reasonable rules in order to function effectively." See id. at 296. The same can be said of multiemployer bargaining units. The Court in Wholesale Stationers also found that "[u]nless the cooperative possesses market power or exclusive access to an element essential to effective competition, the conclusion that expulsion is virtually always likely to have an anticompetitive effect is not warranted." Id. Here, there is no allegation that NYU possesses market power or exclusive access to an element essential to effective competition.

[*635] NYU's argument fails for an additional reason. There is no allegation that the multiemployer bargaining unit at issue here as well as the CBA that NYU admits is binding as between the parties amount to a practice that always or almost always tends to restrict competition and decrease output. To the contrary, multiemployer bargaining tends to increase economic **[**29]** efficiency and is in fact widely used in the marketplace. See *Brown v. Pro Football, Inc., 518 U.S. 231, 240, 116 S. Ct. 2116, 135 L. Ed. 2d 521 (1996)* (multiemployer bargaining "plays a significant role in a collective-bargaining process that itself constitutes an important part of the Nation's industrial relations system"); *N.L.R.B. v. Truck Drivers NLRB, 353 U.S. 87, 95, 77 S. Ct. 643, 1 L. Ed. 2d 676 (1957)* (Congress saw multiemployer bargaining as "a vital factor in the effectuation of the national policy of promoting labor peace through strengthened collective bargaining."); see also *Charles D. Bonanno Linen Service, Inc. v. N.L.R.B., 454 U.S. 404, 409 n.3, 102 S. Ct. 720, 70 L. Ed. 2d 656 (1982)* (multiemployer bargaining benefits both management and labor, by saving bargaining resources, by encouraging development of industry-wide worker benefit programs that smaller employers could not otherwise afford, and by inhibiting employer competition at the workers' expense).

Indeed, significant policy reasons support dismissal of NYU's antitrust claim here. In elaborating the bounds of the non-statutory labor exemption,[4] the Supreme Court has held that ***HN11***[] "almost any concerted action by employers that touches on a mandatory subject of collective bargaining, no matter how obviously offensive to the policies underlying the Nation's antitrust statutes, should be immune from scrutiny so long as a collective-bargaining process is in place." *Brown, 518 U.S. at 259*. The Court **[**30]** further explained the extent to which multiemployer bargaining is a "well-established, important, pervasive method of collective bargaining, offering advantages to both management and labor." *Id. at 240*. In that context, the Supreme Court explained the significant policy reasons behind its decision:

> [T]o subject the practice [of multiemployer bargaining] to ***antitrust law*** is to require antitrust courts to answer a host of important practical questions about how collective bargaining over wages, hours, and working conditions is to proceed -- the very result that the implicit labor exemption seeks to avoid. And it is to place in jeopardy some of the potentially beneficial labor-related effects that multiemployer bargaining can achieve.

Id. at 240-41; see also *Connell Constr. Co. v. Plumbers & Steamfitters Local Union No. 100, 421 U.S. 616, 622, 95 S. Ct. 1830, 44 L. Ed. 2d 418 (1975)* (federal labor law's "goals" could "never" be achieved if ordinary anticompetitive effects of collective bargaining were held to violate the antitrust laws).

For the reasons discussed above, the facts NYU alleges here do not fall into the narrow category of conduct that is per se illegal under the antitrust laws, particularly in light of the general presumption against applying the per se rule. On this basis, NYU's antitrust claim is dismissed.

C. ERISA ALLEGATIONS **[**31]**

HN12[] Under *Section 403(c) of ERISA*, "the assets of a plan shall never inure to the benefit of any employer and shall be held for the exclusive purposes of providing **[*636]** benefits to participants in the plan and their beneficiaries and defraying reasonable expenses of administering the plan," except that, in the case of 'a contribution or payment made by an employer to a multiemployer plan by a "mistake of fact or law," the return of such contribution or payment to the employer within six months after the plan administrator determines that the contribution was made by such a mistake is "not prohibit[ed]." *29 U.S.C. § 1103(c)*.

In its Amended Complaint, NYU argues that the Union's instruction to the Fund to recalculate NYU's contribution rate (to the non-League rate) was "improper and based on a mistake of law and/or fact." (See Am. Compl. ¶ 85.) NYU argues that the basis of this mistake of law or fact was that the Milliman Report provision concerning

[4] The Court need not reach the non-statutory labor exemption to dismiss NYU's antitrust claim.

employers who transferred from League to non-League status was "never validly made a part of the collective bargaining agreement." (See January 2 Letter at 7.) NYU also alleges that the "Fund denied [its request to reject the Union's instruction to recalculate NYU's contribution rate] on or **[**32]** about August 16, 2016, and recalculated the required contribution as instructed by [the Union], thereby adopting the mistake of law and/or fact." (See Am. Compl. ¶ 85.) Therefore, NYU asserts, "any subsequent request by NYU [] for a refund would have been futile." (See id.)

In its August 23, 2017 letter motion to dismiss, the Fund disputes that the claim for reimbursement from the Fund is ripe because it depends on a "contingent future event that may not happen at all -- namely, that the Trustees would decide not to reimburse NYU if they were presented with a determination that the contributions were made by a mistake of law or fact." (See Dkt. No. 40 at 3.) In its October 11, 2017 letter motion in support of the motion to dismiss, the Fund clarified that there would be "no basis for the Trustees to conclude that any of NYU' s contributions have been made pursuant to a mistake of law or fact" unless NYU prevails on its antitrust claim in this litigation. (See Dkt. No. 62 at 3.) The Fund maintains that the terms of the CBA require NYU to contribute to the Fund at the non-League contribution rate, and therefore that there has been no "mistake" of law or fact. (See December 15 Letter at **[**33]** 2.) The Fund suggests that while it does not believe that NYU's contributions at the non-League rate were made pursuant to a mistake of fact or law, if the Court were to determine that there has been such a mistake, the Fund may reconsider whether or not to refund NYU's contributions. (See Dkt. No. 40 at 3.)

The Court of Appeals for the Second Circuit has noted that ***HN13***[] there is a "limited standard" under which courts may review the administrative acts of pension fund trustees. See *Dumac Forestry Servs., Inc. v. Int'l Bhd. of Elec. Workers, 814 F.2d 79, 82 (2d Cir. 1987)*. "As a general rule federal courts should refrain from interfering with the administration of a pension plan unless its trustee or administrator has acted in an arbitrary or capricious manner." *Building Trades Emps. Ass'n v. N.Y. State Teamsters Conference Pension & Ret. Fund, 761 F.2d 115, 117 (2d Cir. 1985)*. The Court of Appeals has "consistently held that 'the lawful, discretionary acts of a pension committee should not be disturbed, absent a showing of bad faith or arbitrariness.'" *Dumac, 814 F.2d at 82* (quoting *Miles v. N.Y. State Teamsters Conference Pension & Ret. Fund Emp. Pension Benefit Plan, 698 F.2d 593, 599 (2d Cir. 1983))*.

Moreover, this "standard of review must be considered in conjunction with the permissive language of *section 1103(c)(2)(A)(ii)*," which "neither commands nor precludes the payment of refunds," **[*637]** and instead, "merely permits the return of contributions mistakenly made." *Dumac, 814 F.2d at 82* (internal quotation marks and citation omitted). Indeed, the statute does not say that payments **[**34]** made under a mistake necessarily will be returned. See *Teamsters Local 639-Emp. Health Tr. v. Cassidy Trucking, Inc., 646 F.2d 865, 868 (4th Cir. 1981)*. Nonetheless, the Court of Appeals has held that an employer is entitled to repayment "if it shows that the refusal to repay was arbitrary or capricious and 'the equities favor restitution.'" *Frank L. Ciminelli Constr. Co. v. Buffalo Laborers Supplemental Unemployment Benefit Fund, 976 F.2d 834, 835 (2d Cir. 1992)* (quoting *Dumac, 814 F.2d at 82*).[5]

The Court of Appeals has also held that:

> ***HN14***[] [T]he fund administrators are in the best position to determine whether the equities of a particular case require a refund or setoff, as opposed to courts making that determination under the rubric of a purported federal common law right to restitution or setoff. We therefore leave such decisions to those vested in the first instance by ERISA with the authority and responsibility to make them.

---

[5] It is worth noting that there is some tension between some of the Second Circuit case law on this issue. As the Court noted in *Ciminelli, Tuvia Convalescent Center, Inc. v. National Union of Hospital and Health Care Employees, 717 F.2d 726 (2d Cir. 1983)*, "broadly held that employers have no standing to sue under ERISA even if they have been directly injured and the injuries are within the class of interests that ERISA was intended to protect"; but *Dumac Forestry Services, Inc. v. International Brotherhood of Electrical Workers, 814 F.2d 79 (2d Cir. 1987)*, and Ciminelli both permitted suits by employers for the return of overpayments. See *Ciminelli, 976 F.2d at 835 n.1*.

Brown v. Health Care & Ret. Corp. of Am., 25 F.3d 90, 94 n.4 (2d Cir. 1994).

Whether or not the Fund's failure to repay NYU's contributions made at the higher, non-League contribution rate was arbitrary and capricious depends in part upon resolution of whether or not the Milliman Report provision concerning employers who transferred from League to non-League status was validly made a part of the CBA between the parties through the applicable collective bargaining arrangement. ***HN15***[] But *Rule 12(b)(6)* is not an appropriate vehicle by which to decide what is fundamentally **[**35]** a factual dispute. See *Arden Way Assocs. v. Boesky, 664 F. Supp. 855, 857 (S.D.N.Y. 1987)*. Therefore, the Fund's motion to dismiss NYU's ERISA claim is denied.

D. LMRA ALLEGATIONS

Section 303 of the LMRA ***HN16***[] makes it unlawful for any labor organization to engage in conduct prohibited by *Section 8(b)(4)(ii)(A) of the NLRA*, which in turn makes it an unfair labor practice for a labor organization to threaten, coerce, or restrain any person where an objective thereof is to force or require any employer to join an employer organization. See *29 U.S.C. §187*; *29 U.S.C. § 158 (b) (4) (ii) (A)* . In the Amended Complaint, NYU alleges that the purported "penalty instigated by [the Union] and imposed on NYU [] by the agreement of all Defendants constitutes unlawful coercion and restraint within the meaning of *§ 8 (b) (4) (ii)* ." (Am. Compl. ¶ 77.) NYU also alleges that an objective of the Union's conduct has been to "force or require NYU [] to rejoin the [] League." (See id. ¶ 81.)

In its December 15 Letter, the Union argues that *Section 8(b)(4)* applies only to "coercion or restraint directed at a neutral/secondary employer (an employer with whom a union does not have a labor dispute) in order to coerce the neutral employer to pressure the primary employer (the one with whom the union has a dispute) **[*638]** to resolve the primary labor dispute." (See December 15 Letter at 3.) Here, the Union urges, the **[**36]** Amended Complaint does not, and cannot, allege that the Union is pressuring a neutral, secondary employer, but only that the Union is pressuring NYU to resolve the dispute by allegedly forcing it to pay the non-League contribution rates. (See id.) In the alternative, the Union argues that NYU's LMRA claim must fail because NYU's payment of non-League contribution rates does not constitute coercion or restraint -- rather, it is merely the application of the required contribution rate under the terms of the CBA which even NYU admits binds the parties. (See id.)

In the January 2 Letter, NYU disputes the Union's argument that *Section 8(b) (4)* applies only to union conduct directed at neutral, "secondary employers," asserting instead that the cases cited by the Union address an old version of the NLRA and not *Section 8 (b) (4) (ii) (A)* as it currently exists. (See January 2 Letter at 7 & n.5.) Indeed, NYU asserts that the current version of *Section 8(b)(4)(ii)(A)* has "never been interpreted as requiring proof of a secondary objective." (See *id. at 8*.) With respect to coercion, NYU asserts that the non-League contribution rates are "inherently coercive," and that the Union, in a letter to NYU, threatened to work with the League and its members to continue imposing **[**37]** costs on NYU "indefinitely into the future if NYU [] didn't rejoin the League." (See id.)

NYU is correct that *Section 8(b)(4)(ii)(A)* may apply to conduct targeting primary or secondary employers. Under the Landrum-Griffin Act amendments enacted in 1959, *Section 8(b) (4)(ii)(A) of the NLRA* became *Section 8(b) (4)(ii)(B)*, and *Section 8(e)* was added. See *National Woodwork Mfrs. Ass'n v. N.L.R.B., 386 U.S. 612, 614, 87 S. Ct. 1250, 18 L. Ed. 2d 357 (1967)*. *Section 8(b)(4)(ii)(B)* ***HN17***[] currently contains a proviso stating that nothing contained in clause (B) "shall be construed to make unlawful, where not otherwise unlawful, any primary strike or primary picketing." *29 U.S.C. § 158(b)(4)(B)*. Despite the fact that without the proviso, *Section 8(b) (4)(ii)(B)* could be read to cover primary activity, "the National Labor Relations Board [] and the judiciary have construed the statute more narrowly, both before and after the proviso was added, to prohibit only secondary, rather than primary, strikes and picketing." *N.L.R.B. v. Enter. Ass'n of Steam, Local Union No. 638, 429 U.S. 507, 510, 97 S. Ct. 891, 51 L. Ed. 2d 1 (1977)*; see also *National Woodwork, 386 U.S. at 620* ("Congress meant *[Sections] 8(e)* and *8(b)(4)(ii)(B)* to prohibit only 'secondary' objectives" and this intent "clearly appears from an examination of the history of congressional action on the subject."). *Section 8(b)(4)(ii)(A)*, however, does not contain the same proviso.

But there is support in the case law for the proposition that *Section 8(b) (4) of the NLRA* in its entirety was designed to address secondary conduct. In *National Labor Relations Board v. International Rice Milling Co., 341 U.S. 665, 666 n.1, 71 S. Ct. 961, 95 L. Ed. 1277 (1951)*, for example, the Court noted that *Section 8(b)(4)* has "been referred to by Congress and the courts as the 'secondary **[**38]** boycott section[]' of the Act." See *Production Workers Union, Local 707 v. N.L.R.B., 793 F.2d 323, 324, 253 U.S. App. D.C. 252 (D.C. Cir. 1986)* ("*Section 8(b)(4)* ***HN18***[] of the National Labor Relations Act . . . for decades has been dubbed the 'secondary boycott provision' in scores of judicial opinions, administrative decisions, law review articles, treatises, casebooks, and law school classrooms."); see also *International Union of Electrical, etc. v. NLRB, 366 U.S. 667, 672, 81 S. Ct. 1285, 6 L. Ed. 2d 592 (1961)* ("While *[Section] 8(b)(4)* does not expressly mention 'primary' or 'secondary' disputes, strikes **[*639]** or boycotts, that section often is referred to in the Act's legislative history as one of the Act's 'secondary boycott sections.'" (internal quotation marks omitted)).

Nonetheless, ***HN19***[] courts, including in the Second Circuit, have found violations of *Section 8(b)(4)(ii)(A)* without requiring proof of a secondary objective. In *Local 812, International Brotherhood of Teamsters v. National Labor Relations Board, 947 F.2d 1034, 1040 (2d Cir. 1991)*, for example, the Court of Appeals held that "a labor organization violates *section 8(b) (4)(ii)(A)* whenever it engages in conduct with an object of forcing or requiring an employer or self-employed person to remain a member of a union." The Court did not address whether the conduct at issue was "primary" or "secondary" in nature, thus indicating that the distinction was immaterial to a finding of *Section 8(b)(4)(ii)(A)* liability.

Similarly, in *Frito-Lay, Inc. v. Local Union No. 137, International Brotherhood of Teamsters, 623 F.2d 1354, 1354 (9th Cir. 1980)*, the Court of Appeals for the Ninth Circuit found that "substantial evidence supported the district court's finding that the unions' **[**39]** motive in calling the strike was to force the employers into a multiemployer bargaining unit."

Thus, primary activity has been found to be a cognizable harm under *Section 8(b)(4)(ii)(A)*. See *NLRB v. Musicians Union, AFM Local 6, 960 F.2d 842, 845 (9th Cir. 1992)* (finding substantial evidence to support the NLRB's conclusion that the Union violated *Section 8(b)(4)(ii)(A)* by picketing Lewis, a self-employed musician, with the objective of forcing him to join the union) ; see also *Musicians Union, AFM Local 6, 298 N.L.R.B. 740, 741 (1990)* ("*Section 8(b)(4)(ii)(A)* draws no distinction between primary and secondary picketing."). Accordingly, NYU's claim for relief under the LMRA does not fail as a matter of law.

Alternatively, the Union argues for dismissal on the ground that NYU's LMRA claim fails because NYU's payment of the non-League contribution rates does not constitute coercion or restraint, but is instead the application of the required contribution rate under the terms of the CBA between the parties. This argument depends on resolution of the factual question of whether or not the Milliman Report provision at issue was validly made part of the CBA. Factual disputes of this nature are not appropriately decided at the motion to dismiss stage.

For the reasons mentioned above, the Union's motion to dismiss NYU's LMRA claim is denied.

III. ORDER

For the reasons **[**40]** stated above, it is hereby

ORDERED that the motions (Dkt. Nos. 38-41, 51, 62-64) filed by defendants the League of Voluntary Hospitals and Homes of New York, 1199SEIU United Healthcare Workers East, 1199SEIU National Benefit Fund for Health and Human Service Employees, the Mount Sinai Hospital, Montefiore Health System, Inc., the New York and Presbyterian Hospital, and Long Island Jewish Medical Center, to dismiss the Amended Complaint (Dkt. No. 67) of plaintiff NYU Hospitals Center, are **GRANTED** as to Count I of the Amended Complaint and **DENIED** as to Counts II and III of the Amended Complaint.

SO ORDERED.

Opinion

ORDER GRANTING MOTION FOR SUMMARY JUDGMENT

This matter comes before the Court on the Defendant's motion seeking summary judgment dismissing the Plaintiffs' libel claim on the grounds that the statement attributed to the Defendant was substantially true. The Plaintiff, SG Interests I, Ltd. ("SGI"), disputes that claim and argues that it has asserted a legally sufficient cause of action. For the reasons set forth below, the Court agrees with the Defendant and grants his request for summary judgment dismissing this action in its entirety.

BACKGROUND OF THE DISPUTE AND PROCEDURAL HISTORY OF THIS ACTION

SGI is a Texas based limited partnership that engages in oil and gas exploration in the State of Colorado. In 2005, SGI entered into a secret agreement with a competitor, Gunnison Energy Corporation ("GEC"), to jointly bid for four gas leases offered by the Bureau of Land Management ("BLM") in the Ragged Mountain Wilderness area. Under that agreement, SGI submitted bids as the nominee for both parties, and then assigned 50% of the interest in the acquired leases to GEC at actual costs. In 2009, a former insider at GEC who had signed the **[*2]** joint agreement with SGI brought a *qui tam* action (Case No. 09 CV 02471) in the federal District Court for the District of Colorado alleging that SGI and GEC had violated the False Claims Act by attesting in the bid documents that there was no collusion. In February of 2012, the United States commenced a separate lawsuit (Case No. 2012 CV 00395) against SGI and GEC charging that the parties' covert joint bidding agreement had constituted a per se violation of *section 1* of the Sherman Act. In that case, the United States asserted that it had received substantially less revenue for the sale of the subject leases than it would have if SGI and GEC had not illegally colluded with one another to rig the bids. The United States sought treble damages for that conduct under the governing statute.

In December of 2012, SGI and GEC attempted to settle both cases by agreeing to each pay $275,000 to the Government. Under that proposal, the United States and the plaintiff in the related *qui tam* action would have received $390,000 and $180,000 respectively. Senior District Court Judge Richard P. Matsch rejected the settlement, finding that it was inappropriate and did not serve the public interest:

> Combining **[*3]** these two actions in a single agreement is inappropriate and misses the point that the purposes of the statutes upon which they are based are different. The False Claims Act prohibits lying to a government agency to obtain a benefit. The Sherman Act is for the protection of free market competition. As noted above, the actual amount of recovery for the combined settlement is only $390,000.00 given that $180,000.00 is to go to Anthony Gale and his attorney. There is no basis for saying that the approval of these settlements would act as a deterrence to these defendants and others in the industry, particularly as GEC considers "joint bidding" to be common in the industry.
>
> In sum, the settlement of this civil action for nothing more than the nuisance value of this litigation is not in the public interest and any settlement of Civil Action No. 09-cv-02471-RBJ-KLM must be separate and apart from this case.
>
> It is ORDERED that the settlement agreements are not approved and the Motion for Entry of Final Judgment (Doc. 18) is denied.

See Exhibit E to Defendant's Motion to Dismiss Amended Complaint filed on May 4, 2017 ("Def. Motion to Dismiss"). The parties to the federal actions subsequently entered **[*4]** into a revised settlement agreement wherein SGI and GEC resolved the anti-trust case by each paying $275,000 to the Government and the qui tam action by separately paying $206,250 and $245,000 to the plaintiff in that case. The revised settlement agreement, which essentially doubled the amounts paid by the Defendants was approved by Judge Matsch on April 23, 2013. *See* Def. Motion to Dismiss, Exhibit F.

The Alleged Libelous Statement

On November 17, 2016, the BLM cancelled all eighteen of SGI's gas leases in the Thompson Divide area. On November 28, 2016, the Glenwood Springs Post Independent newspaper published an article entitled, "Divide lease decision likely to land in court." The article discussed the BLM's decision and SGI's vow "to take legal action based on evidence it says points to collusion between the Obama administration and environmental interests to reach a 'predetermined political decision.'" The next day, the Defendant posted the following comment on the newspaper's website:

> While SGI alleges "collusion" let us recall that it, SGI, was actually fined for colluding (with GEC) to rig bid prices and rip off American taxpayers. Yes, these two companies owned by billionaires **[*5]** thought it appropriate to pad their portfolios at the expense of you and I and every other hard-working American.

See Plaintiff's Initial Complaint at ¶ 10 and Exhibit 2. Some four months later, the Plaintiff commenced this action by filing a single claim alleging that the Defendant's comment was both false and libelous. According to the Plaintiff, SGI had only settled the federal actions as a business decision and had never been fined for its conduct. In its pleading, SGI specifically alleged not only that the Defendant's statement was false, but that people reading the comment would "think significantly less favorably about SGI than they would if they knew the true facts." *Id.* at ¶ 17.

On March 20, 2017, the Defendant filed a motion to dismiss the complaint on the grounds that the Defendant's statement was substantially true and that the Plaintiff had failed to plead actual malice. Following the filing of an amended complaint, the Defendant renewed its motion in May. That motion was fully briefed by both sides by June of that year. In November of 2017, the Court issued an order converting the Defendant's motion to dismiss the

Amended Complaint under *rule 12(b)(5)* to one for summary **[*6]** judgment pursuant to *rule 56*. As the Court made clear in its order, both parties had submitted a substantial amount of additional evidence in support of their respective positions on the dismissal motion, including multiple newspaper articles, pleadings and orders from the two federal actions, and contracts between the Plaintiffs and other entities. Because the Court is prohibited from considering materials outside the four corners of the pleading, it converted the Defendant's request to a summary judgment motion and set an expedited briefing schedule for the parties to submit additional argument and materials to the Court. Finally, the Court advised the parties that it was not necessary for them to re-submit any evidence that had already been put in the record as part of the motion to dismiss. *See* Court's Order, dated November 20, 2017.

Both parties disagreed with the Court's decision. Plaintiff argued that any decision as to summary judgment should be deferred so as to allow the parties to engage in discovery as to its claims under *Rule 56(f)*. The Defendant, in turn, asked the Court to reconsider its order entirely, insisting that the Court could take judicial notice of the reams of additional evidence **[*7]** that had been submitted as part of the motion to dismiss as records in a "related case." Alternately, the Defendant advised the Court that if it proceeded with the summary judgment, it was withdrawing that portion of its motion seeking judgment as a matter of law on the alleged lack of malice. On December 20, 2017, the Court denied both party's motions and opted to proceed under *rule 56*. As a result, the only issue before the Court is whether the amended complaint should be dismissed on the grounds that the Defendant's statement was substantially true.

Findings of Fact

Based upon the parties' filings and the accompanying evidence, the Court makes the following findings of fact:

1. The Bureau of Land Management scheduled a sale of oil and gas leases in the Ragged Mountain Wilderness area of Delta and Gunnison Counties for February 10, 2005. Prior to that date, SGI and GEC had competed against one another as bidders in other government related energy sales.

2. On February 8, 2005, two days prior to the scheduled sale, SGI and GEC executed a memorandum of understanding ("MOU") agreeing to jointly bid for certain of the upcoming oil and gas leases. *See* Def. Motion to Dismiss, Exhibit A. Under that **[*8]** agreement, SGI was tasked to serve as the ostensible nominee for both entities, and GEC agreed to refrain from bidding altogether.

3. If SGI was successful in obtaining a lease, the parties agreed that SGI would immediately assign 50% of the lease to GEC at its actual costs. If SGI was not the successful bidder, then the MOU provided that it would immediately become null and void. *Id.*

4. The existence of the MOU was not disclosed to the B.L.M. prior to the sale.

5. Ultimately, SGI (and by extension GEC) were the successful bidders on 22 separate oil and gas leases in the Ragged Mountain area over the course of several auctions.

The Filing of the *Qui Tam* Complaint

6. On or about October 20, 2009, Anthony Gale commenced an action against GEC and SGI in federal court in the District of Colorado. Mr. Gale was a former senior vice president of GEC and had been the executive who had executed the MOU on behalf of that company. *See* Def. Motion to Dismiss, Exhibit B.

7. In his complaint, Mr. Gale alleged that GEC and SGI had illegally colluded with each other in connection with certain auctions held by the BLM for oil and gas leases in the Ragged Mountain area contrary to *18 U.S.C. §1860*. *Id.*, Exhibit B at ¶ 1. **[*9]**

8. Mr. Gale also alleged that Defendant SGI had falsely certified to federal authorities that it had not engaged in bid rigging in violation of its obligations under *31 U.S.C. §3729(a)(1)(G)* ("The False Claims Act allegations"). As a result of that conduct, Mr. Gale claimed that the United States had been damaged by a loss of auction proceeds. *Id.*

The Anti-Trust Complaint

9. On February 12, 2012, the Department of Justice ("DOJ") on behalf of the United States brought a separate action in federal court in the District of Colorado seeking both legal and equitable remedies against GEC and SGI under *section 1* of the Sherman. Act, *15 U.S.C. § 1*. *See* Def. Motion to Dismiss, Exhibit C.

10. As in the *qui tam* action, the United States alleged that GEC and SGI had violated the Sherman Act by colluding in their bids on certain federal lands offered for lease by the BLM in the Ragged Mountain Area. That allegation was premised again on the MOU that was secretly executed by the companies on February 8, 2005, but limited the anti-trust claims to just four of the leases acquired by the companies in April and May of 2005. *Id.* According to the Complaint, the United States received substantially less revenue from the sale of those leases than it would **[*10]** have had SGI and GEC competed at the auctions.

11. The United States accordingly sought a decree that the MOU between SGI and GEC constituted an illegal restraint of trade in violation of *Section 1* of the Sherman Act. As authorized by that provision, the United States also sought treble damages, costs, and equitable relief "to dissipate the anticompetitive effects" of the Defendant's conduct. *Id.* at ¶¶ 25-27.

The Settlement Agreements

12. On the same day that it filed its complaint, the United States submitted a proposed stipulation that would have resolved both the anti-trust and *qui tam* actions involving GEC and SGI. As noted above, the settlement provided for a total payment of $550,000 with the United States retaining approximately $390,000 of that amount. *See* Def. Motion to Dismiss, Exhibit D. According to DOJ's press release:

> "Today's unprecedented antitrust enforcement action involving illegal bidding at Bureau of Land Management auctions, demonstrates the U.S. government's resolve to ensure there is vigorous competition for federal oil and gas rights," said Sharis A. Pozen, Acting Assistant Attorney General in charge of the Department of Justice's Antitrust Division. "At a time of budgetary **[*11]** constraint, it is crucial that the federal government receive the most competitive prices for these important leases, which ultimately benefits American taxpayers."

Plaintiff's Response, dated May 25, 2017, to Defendant's Motion to Dismiss ("Plaintiff's Response") at Exhibit 1.

13. The federal court supervising the anti-trust action, however, rejected the proposed settlement finding that it did not serve the public interest and was insufficiently punitive towards the Defendants. Def. Motion to Dismiss, Exhibit E at p.11. In a particularly scathing passage, the federal judge overseeing the litigation was highly critical of GEC's claim that it had done nothing wrong and simply settled the case for nuisance value:

> GEC filed a statement responding to the public comments in a manner that demonstrates that this defendant considers this antitrust action to be meritless and the settlement to be nothing more than a payment to be rid of this nuisance. (Doc. 16-7). The unrepentant arrogance of this defendant is so self-evident that a copy of the statement is attached as Exhibit A. It is not in the public interest to approve a final judgment that permits a defendant to leave its civil action in such **[*12]** a smirking, self-righteous attitude.

Id. Judge Matsch accordingly rejected the proposed settlement.

14. As a result, the parties re-negotiated the terms of the settlement and each defendant increased its total proposed payments by more than $200,000. The parties also agreed to treat the settlement of the *qui tam* action separately. In the end, SGI settled the federal anti-trust action for a single payment of $275,000. Judge Matsch approved that revised settlement on April 22, 2013. Def. Motion to Dismiss, Exhibit F.

15. At the time of the approval of the revised settlement, numerous publications reported that the SGI had paid a fine to the federal government in connection with the case. See e.g. Def. Motion to Dismiss, Exhibit G *(National Law Review)* and Exhibit H (Crested Butte News). A more complete listing of the different publications that used the term "fine" to describe the settlement payment made by SGI is set forth on page 4, note 6 of the Defendant's Submission of Additional Materials, dated December 8, 2017, on the converted motion for summary judgment. *See also* pp. 15-16 *infra*. Despite the widespread use of the term "fine" or "fines" by various news sources at the time of the **[*13]** settlement, the Plaintiff never brought any defamation actions against those entities.

The Gravamen of the Current Dispute

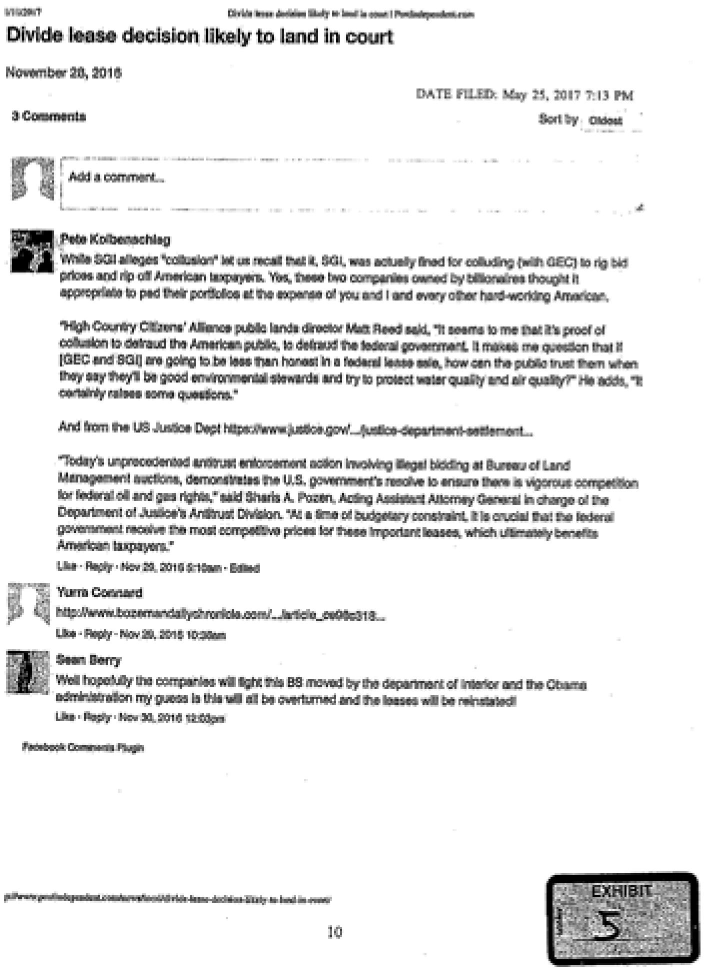
16. On November 17, 2016, the BLM cancelled all eighteen of SGI's gas leases in the Thompson Divide area. Although neither party addressed it in their briefs, it appears that those leases may have been the remaining ones that were the initial focus of the 2009 *qui tam* action.

17. On November 28, 2016, the Glenwood Springs Post Independent newspaper published an article entitled, "Divide lease decision likely to land in court." The article quoted Robbie Guinn, a vice president at SGI, who theorized that the cancellation of the leases was evidence of improper collusion between the Obama administration and unnamed environmental interests to reach a 'predetermined political decision.' *See* Plaintiff's Response, Exhibit 4.

18. Defendant appears to have taken issue with Mr. Guinn's claim, and submitted a written comment to the Post Independent article at 5:10 a.m. the following day. In that comment, the Defendant asserted that SGI had been fined in the federal antitrust action for collusion and ripping off the American taxpayers. *See* pp. 3-4 *supra*; Plaintiff's Response at **[*14]** Exhibit 5. The comment also included a quote from the public lands director of the High County Citizen's Alliance that was issued at the time of the original settlement. Finally, the comment contained a passage from and a link to the Department of Justice press release that was sent out by the government in connection with the initial settlement proposal. *See* ¶ 12 *supra*; Plaintiff's Response, Exhibit 1. Because the Court finds that the entire comment made by the Defendant is relevant in this case, it is reproduced in full on the following page.

19. Two additional comments were submitted on the original Post article just below the Defendant's statement. The first was posted by an individual named Yurra Connard and consisted of a link to an article in the Bozeman Daily Chronicle. *Id.*

20. Reflecting the polarized state of our society, the second comment was posted by an individual under the screen name Sean Berry and dismissed the points raised by the Defendant. Mr. Berry encouraged the companies to fight this "BS moved (*sic*) by the department of the interior and the Obama Administration..." and speculated that the cancellations would be overturned in court and that the leases would be **[*15]** reinstated. *Id.*



Divide lease decision likely to land in court

November 28, 2016

Pete Kolbenschlag

While SGI alleges "collusion" let us recall that it, SGI, was actually fined for colluding (with GEC) to rig bid prices and rip off American taxpayers. Yes, these two companies owned by billionaires thought it appropriate to pad their portfolios at the expense of you and I and every other hard-working American.

"High Country Citizens' Alliance public lands director Matt Reed said, "It seems to me that it's proof of collusion to defraud the American public, to defraud the federal government. It makes me question that if [GEC and SGI] are going to be less than honest in a federal lease sale, how can the public trust them when they say they'll be good environmental stewards and try to protect water quality and air quality?" He adds, "It certainly raises some questions."

And from the US Justice Dept https://www.justice.gov/.../justice-department-settlement...

"Today's unprecedented antitrust enforcement action involving illegal bidding at Bureau of Land Management auctions, demonstrates the U.S. government's resolve to ensure there is vigorous competition for federal oil and gas rights," said Sharis A. Pozen, Acting Assistant Attorney General in charge of the Department of Justice's Antitrust Division. "At a time of budgetary constraint, it is crucial that the federal government receive the most competitive prices for these important leases, which ultimately benefits American taxpayers."

Sean Berry

Well hopefully the companies will fight this BS moved by the department of interior and the Obama administration my guess is this will all be overturned and the leases will be reinstated!

EXHIBIT 5

21. Four months after the comments were published on the Post's website, the Plaintiff brought this action asserting a single claim of libel against the Defendant primarily based on the use of the word "fined" in his statement. The summary judgment motion addressing that claim has now been briefed and is ripe for a decision.

LEGAL ANALYSIS

Point I

<u>The Legal Standards for Defamation Claims Under Colorado Law</u>

The legal standards applicable to a motion for summary judgment under *C.R.C.P. 56* are well settled in this State. Summary judgment is a drastic remedy that should only be granted on a clear showing that there are no genuine issues as to any material fact, and that the moving party is entitled to judgment, as a matter of law. *Jones v. Dressel, 623 P.2d 370, 373 (Colo. 1981)*. In considering a motion for summary judgment, the nonmoving party is entitled to all favorable inferences that may reasonably be drawn from the evidence. *See Churchey v. Adolph Coors Co., 759 P.2d 1336, 1355 (Colo. 1988)*. Because the trial court may not assess the weight of the evidence or the credibility of witnesses on summary judgment, the court may not grant the motion when there is a controverted factual issue that must be resolved in a trial. *Roderick v. City of Colorado Springs, 193 Colo. 104, 563 P.2d 3 (Colo. 1977)*; *Moses v. Moses, 180 Colo. 397, 505 P.2d 1302 (Colo. 1973)*. Ultimately, a Court's function in determining a summary judgment **[*16]** motion is not to decide issues of fact, but rather to determine "whether there is an issue of fact to be tried." *Morlan v. Durland Trust Co., 127 Colo. 5, 252 P.2d 98, 100 (Colo. 1952)*.

If the moving party demonstrates its entitlement to summary judgment, however, the burden shifts to the non-moving party to establish that there is a triable issue of fact in the case. Continental Airlines, Inc. v. Kennan, 731 P.2d 708, 713 (Colo. 1987). A party opposing a request for summary judgment cannot rest on allegations or general denials in its opposition, but must set forth specific facts, by affidavit or otherwise, showing that there is a genuine issue of fact that must be resolved at trial. See C.R.C.P. 56(e); People in the Interest of J.M.A., 803 P.2d 187, 193 (Colo. 1990). Failure to meet that burden warrants the issuance of summary judgment in the moving party's favor.

Because this case involves a claim of libel, the substantive legal standards are different and more precise. A claim based upon defamation or libel under Colorado law requires, at a minimum, the publication of a false statement of a defamatory nature. Burns v. McGraw—Hill Broad. Co., 659 P.2d 1351, 1360 (Colo.1983). Whether a particular statement is, or is not, defamatory is a question of law. Gordon v. Boyles, 99 P.3d 75, 79 (Colo.App.2004) (citing Walker v. Associated Press, 160 Colo. 361, 417 P.2d 486 (1966)). Where the statement concerns a public figure or a matter of public concern, it triggers certain constitution protections. In those cases, there are competing interests between the **[*17]** protection of a party's reputation and the promotion of uninhibited, robust public debate and discourse. Smiley's Too, Inc. v. Denver Post Corp., 935 P.2d 39, 41 (Colo.App.1996) (citing New York Times Co. v. Sullivan, 376 U.S. 254, 84 S. Ct. 710, 11 L. Ed. 2d 686 (1964). In light of those competing considerations, Colorado law employs a heightened burden and requires that the plaintiff demonstrate the falsity of the underlying statement by clear and convincing evidence. Fry v. Lee, 408 P.3d 843, 848, 2013 COA 100 (Colo. App. 2013). Both of the parties here acknowledge that the litigation over the MOU between GEC and SGI was a matter of public concern. Indeed, the number of newspaper articles that were published at the time of the settlement provides ample evidence of that fact. SGI, as the plaintiff, accordingly bears the burden of showing that the defendant's statement was defamatory by clear and convincing evidence.

Substantial truth is a complete defense to a defamation claim. While the law used to require literal truth, that standard has evolved over time. Modern jurisprudence recognizes that if a statement is substantially true, not every word must be literally accurate. "[I]t is sufficient if the substance, the gist, the sting, of the matter is true." Gomba v. McLaughlin, 180 Colo. 232, 504 P.2d 337, 339 (Colo. 1972). Put another way, the statement must not only be false, but "materially false." Brokers' Choice of America, Inc. v. NBC Universal, Inc., 861 F3d 1081, 1107 (10th Cir. 2017) ("The law of defamation overlooks inaccuracies and focuses **[*18]** on substantial truth.") (citing Schwartz v. Am. Coll. of Emergency Physicians, 215 F.3d 1140, 1146 (10th Cir. 2000). To determine if a challenged statement is substantially true, the trial court must focus on how it would be interpreted by an average person. Fry v. Lee, 408 P.3d at 849. As the 10th Circuit has explained:

> Because [the protection of the plaintiff's reputation] is the particular purpose the defamation tort is aimed at, we assess the materiality of a misstatement by comparing the damage it has done to the plaintiff's public reputation to the damage the truth would have caused... To qualify as *material* the alleged misstatement must be likely to cause reasonable people to think "significantly less favorably" about the plaintiff that they would if they knew the truth; a misstatement is not actionable if the comparative harm to the plaintiff's reputation is real but only modest.

Bustos v. A & E Television Networks, 646 F.3d 762, 764-765 (10th Cir. 2011) (citations omitted). Finally, in determining whether a statement is materially false, it must be examined in context, looking at the totality of the language Brokers' Choice of America, Inc., 861 F.3d at 1108 ("As stated in Brokers' Choice II, determining whether a publication is materially false requires examination of the published statements in context, not in isolation.").

Courts at both the federal and state levels have not hesitated to grant motions to **[*19]** dismiss or motions for summary judgment in connection with defamation claims. See e.g. Fry v. Lee, 408 P.3d at 843 (motion to dismiss); Brokers' Choice of America, Inc., 861 F.3d 1081 (same); Bustos, 646 F.3d 762 (summary judgment). Indeed, because such claims may have a chilling effect on constitutionally protected speech, Colorado law encourages the resolution of such actions at an early stage. Fry v. Lee, 408 P.3d at 849. That rationale applies to cases where, as here, the defendant has argued that the underlying statement was substantially true. See Id. (holding that the trial court properly dismissed complaint on the grounds that the challenged statement was substantially true). In this case, the Defendant moved to dismiss on those very grounds. The Court converted that motion to one for summary judgment given the substantial amount of additional materials that each side submitted as part of their filings. The Court has now carefully reviewed all of that evidence, as well as the parties' legal and factual arguments. The Court ultimately finds that the Defendant's statement was substantially true and therefore not actionable as set forth below.

Point II

Defendant's Statement was Substantially True And Was Not Materially False

According to SGI, the Defendant's use of the term "fined" rendered his newspaper **[*20]** comment untrue because the company merely settled the federal actions as part of a prudent business decision. The Plaintiff also takes issue with the Defendant's assertion that SGI and GEC rigged bid prices to rip off the American taxpayers. The Plaintiff further argues that the juxtaposition of those two assertions makes the entire statement materially false. The Defendant disputes that claim, and points out that SGI paid more than $475,000 to settle the claims of collusion and false certification brought in the federal actions. The Defendant also points to Judge Matsch's decision rejecting the initial settlement offer on the grounds that it did not serve as a sufficient deterrent to the defendants' illegal conduct. Finally, the Defense notes that numerous news sources reported at the time of the settlement that SGI and GEC had been fined by the government. Based on those facts, the Defendant argues that his statement regarding the outcome of the federal actions was substantially true.

The Court agrees with the Defendant. First, the Court finds that the use of the word "fined" by the Defendant in his comment did not render that statement false. The term "fine" is commonly defined as **[*21]** "a sum imposed as punishment for an offense" or "a forfeiture or penalty paid to an injured party in a civil action." See Merriam-Webster.com (2018). In this case, SGI ultimately paid a sum to the federal government to resolve claims brought against it that alleged anti-trust violations under the Sherman Act. SGI also paid a separate sum of money to settle the related *qui tam* action brought by the former GEC insider alleging false certification. The Court does not believe that the terminology used to describe those payments — whether they are called fines, penalties, settlement payments or damages — makes any real difference. Under Colorado law, the Court must evaluate the challenged statement in the light of an ordinary reader. *Fry v. Lee, 408 P.3d at 849*. The Court is aware that SGI settled the cases by paying a specific sum without admitting liability. That is a common practice by companies for a variety of reasons. The Court just does not find that the distinction between paying a settlement and paying a fine is of a sufficient difference to the average reader to support a defamation action on those grounds.

That conclusion is further supported by the contemporaneous press accounts, industry newsletters, **[*22]** and legal commentaries from the time of the underlying federal settlements that characterized SGI's payment as a "fine." See e.g. Seth Mensing, *North Fork Gas Drillers Fined by Feds for Collusion*, Crested Butte News (Feb. 24, 2012) at 1; *Dep't of Justice Antitrust Challenge to Bid Rigging on Mineral Rights Auctioned by the Bureau of Land Mgm't*, Baker Botts, LLP (Feb. 20, 2012) ("On February 15, 2012, the Antitrust Division of the U.S. Department of Justice ("DOJ") fined two companies a combined $550,000 to settle alleged violations of the Sherman Act . . ."); J. Dubrow & S. Barnes, *DOJ Finds Antitrust Violation in Joint Bid for Oil & Gas Leases*, McDermott Will & Emery (Feb. 23, 2012)("[DOJ] recently announced a settlement requiring two companies that allegedly coordinated bids for oil and gas leases to pay a total of $550,00 in fines related to an agreement not to compete."); Tim Mutrie, *Powerful Natural Gas Companies Agree to a Larger Antitrust Fine*, Aspen Daily News (Apr. 22, 2013); *US: Gas cos agree to even steeper penalty, fine nearly doubled*, Competition Policy Int'l J. (Apr. 22, 2013); Joe Hanel, *Driller Starts Super-PAC to Support Tipton*, Durango Herald (Oct. 29, 2012) ("In **[*23]** February, SG and Gunnison Energy agreed to pay a $550,000 fine to settle an antitrust lawsuit by the Justice Department for agreeing not to compete in a 2005 auction of drilling rights in Western Colorado.").[1] The Court finds is telling that the specific distinction that

---

[1] *See also* J. Dubrow & C. Cafasso, *Natural Gas Companies Settle Antitrust Suit Stemming from Joint Bidding*, McDermott Will & Emery (April 25, 2013)("Gunnison Energy Corp. (GEC) and SG Interests I Ltd. and SG Interests VII Ltd. (collectively "SGI") will

SGI is attempting to draw in this defamation case was not even followed at the time of the original settlements. Put another way, the Court fails to see how SGI could now argue that the average reader would consider the difference between a "fine" and a "payment in settlement" to be particular meaningful when the reporters, industry insiders and legal commentators in the field disregarded that very same distinction at the time of the underlying events.

The Court would also note that the Plaintiff disregards the full context of the Defendant's statement. It was made in the comments section of a newspaper article. It was not part of any official publication, **[*24]** nor was it even subject to the same journalistic standards as the information in the article above. It was a comment by a member of the public to other members of the public on the equivalent of a chat board about a matter of newsworthy interest. To hold it to the exacting standards that the Plaintiff is proposing would not only be unwarranted, but would be chilling to protected speech. If the Defendant truly wanted to mislead the members of the public to damage Plaintiff's reputation by providing false information as SGI now claims, it seems doubtful that he would have included a comment form and a link to the press release sent out by the DOJ detailing the nature of the underlying case and the terms of the prior settlement. *See* Plaintiff's Response at Exhibit 1. Generally, parties that are trying to mislead others with false factual claims do not include a direct link to other documents containing an accurate rendition of the facts.

Finally, SGI's purported defamation claim fails the second part of the substantial truth test. Not only is the gist or sting of the defendant's comment substantially true, but to the extent that it is inaccurate in its use of the term "fine," that inaccuracy **[*25]** is immaterial. As the Tenth Circuit noted in its prior decision in *Bustos v. A & E Television Networks*, a statement is only considered material if it is "likely to cause reasonable people to think significantly less favorably about the plaintiff than they would if they knew the truth." *Id., 646 F. 3d at 764-765*. The Court has reviewed all of the information submitted by the parties in this case, including the various affidavits, the newspaper articles, and the numerous filings in the underlying federal litigations. The Court finds that the accurate facts in the federal actions are far more damaging to SGI's reputation than the vague commentary made by the Defendant in his newspaper posting.

For example, while the Court is aware that SGI still asserts that the MOU was part of a larger pro-competitive agreement executed with GEC, that claim was expressly rejected by the federal government. In its filing in support of the second proposed settlement, it concluded

> After carefully analyzing the investigatory materials and evaluating the competitive effects of the two agreements in light of all relevant circumstances, the United States concluded that Defendant MOU was a *per se* unlawful restraint of trade in violation **[*26]** of *Section 1* of the Sherman Act, *15 U.S.C. §1*. As stated in the CIS, the MOU was not ancillary to a procompetitive or efficiency-enhancing collaboration between the Defendants...
>
> Defendants had been discussing the possibility of a broad joint venture since October of 2004; however by early February 2005 those discussions had broken down. With the auction imminent, Defendants executed the MOU, which eliminated competitive bidding. Although Defendants continued to entertain the possibility of a broader, efficiency-enhancing collaboration, significantly, at the time they executed the MOU and obtained the leases, any such joint venture remained just that — a vague possibility. The fact that the Defendants ultimately

---

each pay a fine of $275,000 to the DOJ to settle allegations of agreeing not to bid against each other in violation of ***antitrust law*** for natural gas leases on government land in western Colorado."); *DOJ, Producers Up Ante in Colorado Gas Settlement*, NGI's Daily Gas Price Index (April 23, 2013) ("A proposed settlement between the U.S. Department of Justice (DOJ) and two independent producers, which allegedly rigged bidding in a government lease sale in Colorado, would nearly double the fines to be paid by the companies, compared with a previous settlement, according to documents filed recently in the United States District Court for the District of Colorado."); T. Mueller and N. Wilberforce, *Cautious about Collaboration: Antitrust Scrutiny in Oli and Gas Exploration* Wilmerhale.com (March 28, 2017) ("The settlement required the companies to pay $550,000 in fines and was the DOJ's first attempt to challenge "an anticompetitive bidding agreement for mineral rights leases."); Edward B. Schwartz, Steptoe & Johnson, *Toughened Oversight Raises Antitrust Hazards of Oil Industry Collaboration*, Oil & Gas J. (Apr. 1, 2013) ("A federal court recently rejected the settlement, noting that a higher fine amount was needed to deter future violations, particularly because such agreements as common in the industry.").

> established such a collaboration does not transform their prior agreement not to compete into a lawful ancillary restraint.

See Plaintiff's Response, Exhibit 2 at p. 16 (citations omitted). The Government was even more critical in an accompanying footnote in which it addressed GEC's claims that the parties' joint agreement to secretly bid together had not damaged the public in any way:

> GEC asserts in its comments that it "believes it can establish that as to some or all of those 4 leases there would **[*27]** not have been competitive bidding even if GEC and SGI had not bid jointly. GEC Cmts at 1. Contemporaneous GEC business documents, however, demonstrate that after the February 2005 auction, senior GEC executives congratulated each other on having successfully avoided a bidding contest with SGI.

Id., Exhibit 2 at p. 16, n. 12.

Ultimately, the investigation by the federal authorities revealed that SGI and GEC had improperly agreed to bid together, that representatives of each company physically attended the BLM auctions for appearances sake, that in accordance with the MOU, GEC never submitted any bids for the leases in question, that SGI subsequently conveyed 50% of the ownership of those leases to GEC after the auctions were over, and that the companies obtained the leases for less than market value as a result of their secret agreement. *See* Plaintiff's Response, Exhibit 2 at p. 4 (Noting, among other things, that SGI and GEC obtained one lease for $2 per acre, the minimum bid possible). SGI and GEC were sued, at least in part, based on the claim of a company insider that the companies had illegally colluded with one another and falsely certified to federal authorities that no such collusion **[*28]** had occurred. Compared to those objective facts — none of which are subject to dispute — the Defendant's use of the term "fine" in his public commentary in place of the words "settlement payment" is immaterial. The Court accordingly concludes that the Defendant's statement was both substantially true and less damaging to the Plaintiff than the actual facts established in the federal cases. His statement is therefore not actionable and summary judgment dismissing the Plaintiff's libel claim is warranted here.

Point III

Plaintiff's Request for Discovery Under *Rule 56(f)* Is Insufficient to Oppose Summary Judgment Here

In their opposition, the Plaintiff suggests that the Court defer ruling on the motion for summary judgment under *rule 56(f)*. *Rule 56* allows the Court to delay the resolution of a pending motion if the opposing party can demonstrate that it cannot obtain the facts necessary to oppose the requested relief without an opportunity to conduct discovery. Opposition to summary judgment under *rule 56(f)*, however, cannot be based on mere conclusory statements. *Bailey v. Airgas-Intermountain, Inc., 250 P.3d 746, 751 (Colo. App. 2010)*. The opposing party must specifically delineate what facts it expects to gain through discovery and how those facts may impact the pending motion. *See Garcia v. United States Air Force, 533 F.3d 1170, 1179-80 (10th Cir. 2008)* (denial of **[*29]** 56(f) request not an abuse of discretion where "the affidavit submitted by [plaintiffs'] counsel failed to identify any specific facts which would create a genuine issue of material fact, let alone identify what steps had been taken to obtain such facts and a plan for the future").

In this case, other than invoking the general language of *rule 56(f)*, the Plaintiff has failed to explain what facts are unavailable or how discovery as to those facts may change the outcome here. As noted above, the Court has concluded that the statement attributed to the Defendant is not actionable because it was substantially true and because any inaccuracy was not material. Both of those arguments were raised and argued by the Defendant in his motion papers. In opposing that request, the Plaintiff suggests that it should have an opportunity to depose Mr. Kolbenschlag to ascertain if he "can validate his claim that his statement was substantially true in light of the true facts [of the federal actions.]" *See* Plaintiff's Response to Defendant's Motion for Summary Judgment under *Rule 56* and Request to Take Discovery under *Rule 56(f)*, dated December 29, 2017 ("Plaintiff SJ Response") at p. 1.

The Court agrees with the Defendant that **[*30]** the ostensible issue raised by the Plaintiff is irrelevant to the pending motion. This is not a case where the Court is addressing actual malice or the Defendant's subjective belief on summary judgment. The Court had granted summary judgment after finding that the term "fined" may also include a settlement payment to an average reader, that the gist or sting of the Defendant's statement was true, and that any inaccuracy was immaterial in light of the actual facts. None of those determinations turn on the Defendant's subjective belief, which has no bearing on the Court's decision on those issues. This is also not a case where the Plaintiff is arguing that Mr. Kolbenschlag has any special or unique knowledge of the underlying federal litigation or its eventual outcome. He was not involved in the decision made at the time by SGI, GEC or the federal government. The Court has given the Plaintiff more than a year to assemble its opposition to the dismissal of this case and to present its best argument as to why its claim should be allowed to go forward. The fact that the Plaintiff has come up short has nothing to do with a lack of discovery and everything to do with the applicable law and **[*31]** the undisputed facts this case. Plaintiff's request to defer ruling on the Defendant's motion for summary judgment under *rule 56(f)* is therefore DENIED.

Conclusion

For the foregoing reason, the Defendant's motion for summary judgment dismissing the amended complaint is GRANTED.

LexisNexis® Headnotes

Civil Procedure > Remedies > Injunctions

Civil Procedure > ... > Justiciability > Standing > Injury in Fact

HN1[] Remedies, Injunctions

An actual controversy must be extant at all stages of review, not merely at the time the complaint is filed. To have standing to seek injunctive relief, a plaintiff must show that he is under threat of suffering injury in fact that is concrete and particularized; the threat must be actual and imminent, not conjectural or hypothetical; it must be fairly traceable to the challenged action of the defendant; and it must be likely that a favorable judicial decision will prevent or redress the injury. Past exposure to illegal conduct does not in itself show a present case or controversy regarding injunctive relief if unaccompanied by any continuing, present adverse effects, or by a sufficient likelihood that the plaintiff will again be wronged in a similar way.

Civil Procedure > Judgments > Pretrial Judgments > Judgment on Pleadings

HN2[] Pretrial Judgments, Judgment on Pleadings

When deciding *Fed. R. Civ. P. 12(c)* motions courts may rely on matters within the public record.

Civil Procedure > Remedies > Injunctions

HN3[] Remedies, Injunctions

A plaintiff is not entitled to injunctive relief to the extent other existing relief is adequate and provides substantially the same relief.

Civil Procedure > Remedies > Injunctions

HN4[] Remedies, Injunctions

Past exposure to illegal conduct does not in itself show a present case or controversy regarding injunctive relief.

Civil Procedure > Remedies > Injunctions

Evidence > Burdens of Proof > Allocation

HN5[] Remedies, Injunctions

The law is clear that public and private antitrust injunctions may coexist without regard for one another. The mere existence of a government consent order does not preclude private injunctive relief. However, the party seeking the injunction nonetheless has the burden of establishing that such cumulative relief is needed through the cognizable danger of recurrent violation standard from Borden. In re Nifedipine Antitrust Litig.

Civil Procedure > Judgments > Pretrial Judgments > Judgment on Pleadings

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN6[] **Pretrial Judgments, Judgment on Pleadings**

A complaint must allege sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face. A plausible claim must plead factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged. The plausibility standard asks for more than a sheer possibility that a defendant has acted unlawfully. A pleading that offers labels and conclusions or a formulaic recitation of the elements of a cause of action will not do. Nor does a complaint suffice if it tenders naked assertions devoid of further factual enhancement. Rather, the facts alleged must be enough to raise a right to relief above the speculative level. As a general rule, a *Fed. R. Civ. P. 12(c)* motion for judgment on the pleadings is reviewed under the same standard as a *Fed. R. Civ. P. 12(b)(6)* motion to dismiss.

Civil Procedure > Remedies

HN7[] **Civil Procedure, Remedies**

Disgorgement is an equitable remedy that provides a method of forcing a defendant to give up the amount by which he was unjustly enriched.

Antitrust & Trade Law > Clayton Act > Remedies > Damages

HN8[] **Remedies, Damages**

Only the overcharged direct purchaser, and not others in the chain of manufacture or distribution can sue for antitrust damages under *§ 4 of the Clayton Act*, *15 U.S.C.S. § 15*, which provides a private right of action for violations of *§ 1 of the Sherman Act*.

Antitrust & Trade Law > Clayton Act > Remedies > Damages

HN9[] **Remedies, Damages**

Under the *Clayton Act*, private parties can already pursue direct purchaser actions for treble damages under *§ 4 of the Clayton Act*. *15 U.S.C.S. § 15*. Permitting disgorgement under *§ 16 of the Clayton Act* would provide yet another route to defendants' allegedly ill-gotten gains, and would therefore heighten the possibility that defendants in antitrust actions could be exposed to multiple liability. While disgorgement would have the additional benefit of permitting compensation for indirect purchasers who are excluded from recovery under current law, the Supreme Court weighed this interest against the threat of duplicative recovery and determined that only direct purchasers have standing under the *Clayton Act*.

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > Pendent Claims

HN10[] **Supplemental Jurisdiction, Pendent Claims**

Federal courts possess only that power authorized by Constitution and statute. It is well established—in certain classes of cases—that, once a court has original jurisdiction over some claims in the action, it may exercise supplemental jurisdiction over additional claims that are part of the same case or controversy.

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > Pendent Claims

HN11[] **Supplemental Jurisdiction, Pendent Claims**

Congress unambiguously gave district courts discretion in *28 U.S.C.S. § 1367(c)* to dismiss supplemental state law claims when all federal claims have been dismissed.

Judges: Before LOKEN, BENTON, and ERICKSON, Circuit Judges.

Opinion by: BENTON

Opinion

[*1051] BENTON, Circuit Judge.

The plaintiffs sued Ferrellgas Partners, L.P., Ferrellgas, L.P. (collectively "Ferrellgas"), and AmeriGas Partners, L.P., alleging antitrust violations and **[**5]** seeking relief under federal and state law. The district court granted summary judgment for Defendants. Having jurisdiction under *28 U.S.C. § 1291*, this court affirms in part and remands in part.

I.

Ferrellgas[1] and AmeriGas are the nation's largest distributors of pre-filled propane exchange tanks, which come in a standard size. Before 2008, Defendants filled the tanks with 17 pounds of propane. In 2008, due to rising propane prices, Defendants reduced the amount in each tank from 17 to 15 pounds, but maintained the same price. According to the plaintiffs, this "effectively rais[ed] the price charged for propane in those tanks."

In 2009, a group of plaintiffs—indirect purchasers who bought tanks from retailers—filed a class action alleging Defendants conspired to reduce the amount of propane in the tanks while maintaining the price, in violation of *Section 1* of the Sherman Act and state antitrust and consumer protection laws. In 2010, the plaintiffs and AmeriGas settled. *See* ***In re Pre-Filled Propane Tank Mktg. & Sales Practices Litig.**, 2010 U.S. Dist. LEXIS 49527, 2010 WL 2008837 (W.D. Mo. May 19, 2010)* (granting preliminary approval of first amended settlement agreement). Also **[*1052]** in 2010, those plaintiffs again sued Ferrellgas, settling in 2012. (This court refers to those suits collectively **[**6]** as "*Propane I*.") On March 27, 2014, the Federal Trade Commission issued a complaint against Defendants—settled on January 7, 2015, by consent orders—for conspiring to artificially inflate tank prices. *See* ***In re Ferrellgas Partners, L.P.**, 2014 FTC LEXIS 206, 2014 WL 1396496 (Mar. 27, 2014)*.

On May 30, 2014, another group of indirect purchasers ("the *Ortiz* plaintiffs") brought a class action against Defendants, alleging: "Despite their settlements, Defendants continued to conspire, and rather than resuming competition, maintained their illegally agreed-upon fill levels, preserving the unlawfully inflated prices that their conspiracy had produced," and "Defendants continued to have regular communications regarding pricing, fill levels,

1 Ferrellgas does business as "Blue Rhino."

and market allocation until at least late 2010." They seek injunctive relief and disgorgement for violations of *Section 1* of the Sherman Act. They also seek damages under the antitrust laws of 23 states and the District of Columbia—all with statutes allowing indirect-purchaser suits for state-antitrust damages despite *Illinois Brick Co. v. Illinois, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*, which bars those suits for federal-antitrust damages.

The *Ortiz* class action became part of a multidistrict proceeding that included a class action with similar allegations by direct purchasers **[**7]** (who bought tanks directly from Defendants for resale). The direct-purchaser suit seeks federal-antitrust damages, which the district court dismissed as time-barred. The district court explained (1) the statute of limitations accrued on August 1, 2008, the latest "all Defendants began selling fifteen pound tanks"; and (2) new purchases of tanks after that date did not restart the statute of limitations. ***In re Pre-Filled Propane Tank Antitrust Litig.****, 2015 U.S. Dist. LEXIS 193932, 2015 WL 12791756, at *3 (W.D. Mo. July 2, 2015)*. This court—en banc—reversed, holding that "'each sale to the plaintiff[s]' in a price-fixing conspiracy 'starts the statutory period running again'" and is an "overt act, inflicting new and accumulating injury." ***In re Pre-Filled Propane Tank Antitrust Litig.****, 860 F.3d 1059, 1067-68 (8th Cir. 2017)* (en banc) ("***Propane En Banc***"), *cert. denied*, *138 S. Ct. 647, 199 L. Ed. 2d 530 (2018)*, *quoting* ***Klehr v. A.O. Smith Corp.****, 521 U.S. 179, 189, 117 S. Ct. 1984, 138 L. Ed. 2d 373 (1997)*.

Before this court issued *Propane En Banc*, the district court made several rulings in *Ortiz*. It dismissed as time-barred the indirect purchasers' state-law-damages claims. The district court ruled that, like direct purchases, new indirect purchases did not restart the statute of limitations. For the same reason, the district court dismissed the indirect purchasers' federal-disgorgement claim. But it allowed the federal-injunctive claim to proceed.

To address the statute of limitations, the *Ortiz* plaintiffs **[**8]** moved for leave to amend to add three new subclasses asserting damages: (1) a six-year statute-of-limitations subclass, for violations of Maine, Vermont, and Wisconsin law; (2) a new-purchaser subclass, for violations of Kansas ***antitrust law***; and (3) a new-purchaser subclass, for violations of the laws of "*Illinois Brick* repealer states." The new-purchaser subclasses included individuals who bought propane tanks for the first time after March 27, 2011. The *Ortiz* plaintiffs also proposed another federal-disgorgement claim.

The district court ruled that the amendments to add the disgorgement claim and the new-purchaser subclasses would be futile because the claims are time-barred. According to the district court, first-time purchases after March 27, 2011, are irrelevant **[*1053]** because the statute of limitations accrued in August 2008, and—as it previously concluded—new purchases did not restart the clock. The district court did, however, rule that the six-year statute-of-limitations subclass raised timely claims. Filed on October 16, 2015, the *Ortiz* amended complaint retains the federal-injunctive claim, in addition to asserting the six-year statute-of-limitations subclass's state-law-damages **[**9]** claim.

The district court later dismissed the federal-injunctive claim under *Fed. R. Civ. P. 12(c)*, concluding (1) the indirect purchasers lack standing, and (2) the doctrine of laches bars the claim. Meanwhile, on July 21, 2016, another group of indirect purchasers ("the *Orr* plaintiffs") not named in the *Ortiz* complaint sued Defendants. The *Orr* complaint—consolidated into the same multidistrict proceeding with *Ortiz*—includes the federal-disgorgement claim and the new-purchaser subclasses that the *Ortiz* plaintiffs tried to add to their complaint, along with a six-year statute-of-limitations subclass damages claim and a federal-injunctive claim.

Ferrellgas moved for summary judgment against the *Ortiz* plaintiffs, arguing the *Propane I* release barred the claims of the six-year statute-of-limitations subclass. The release says:

> [T]he Releasing Persons hereby fully, finally, and forever release, relinquish, and discharge the Released Persons from any and all liabilities, claims, rights, suits, and causes of action, of any kind whatsoever, that the Releasing Persons may have or may have had . . . whether known or unknown, suspected or unsuspected, threatened, asserted, or unasserted . . . that were or could have been **[**10]** sought or alleged in the Litigation related to the filling, purchase, sale or exchange of Ferrellgas's 20-pound propane gas cylinders.

The district court ruled that the release "does not contain the clear language necessary to constitute a release of future claims. Thus, the release provision only bars assertion of claims that had accrued at the time of the release." ***In re Pre-Filled Propane Tank Antitrust Litig.****, 2016 U.S. Dist. LEXIS 167724, 2016 WL 6963058, at *4 (W.D. Mo. Sept. 2, 2016)* (internal citation omitted). The plaintiffs argued that "their current claims are for post *In re Propane I* purchases of propane tanks, and that those purchases could not have accrued into claims until after the purchases were made, and thus, after the release." ***Id.***

The district disagreed, granting Ferrellgas summary judgment, again ruling that the claims accrued only once—"in August 2008"—and the limitations period did not restart upon new purchases. The district court also granted summary judgment for AmeriGas on the basis of standing. Finally, the district court dismissed the *Orr* complaint based on its rulings in *Ortiz*.

The indirect purchasers in *Ortiz* and *Orr* appeal. This court reviews the issues here de novo. ***Propane En Banc****, 860 F.3d at 1063*; ***Montin v. Moore****, 846 F.3d 289, 293 (8th Cir. 2017)*; ***Torgerson v. City of Rochester****, 643 F.3d 1031, 1042 (8th Cir. 2011)* (en banc).

II.

Alleging a Sherman Act violation, the indirect purchasers seek injunctive relief requiring **[**11]** Defendants to: (1) not allocate market share; (2) void any existing co-packing agreements, not make new co-packing agreements, and not share pricing information or information about tank-fill levels; and (3) increase the fill levels of the tanks to 17 pounds of propane. The district court ruled that the indirect purchasers lack standing to seek injunctive relief.

[*1054] ***HN1***[] "[A]n actual controversy must be extant at all stages of review, not merely at the time the complaint is filed." ***Preiser v. Newkirk****, 422 U.S. 395, 401, 95 S. Ct. 2330, 45 L. Ed. 2d 272 (1975)* (citation omitted). To have standing to seek injunctive relief,

> a plaintiff must show that he is under threat of suffering "injury in fact" that is concrete and particularized; the threat must be actual and imminent, not conjectural or hypothetical; it must be fairly traceable to the challenged action of the defendant; and it must be likely that a favorable judicial decision will prevent or redress the injury.

Summers v. Earth Island Inst.*, 555 U.S. 488, 493, 129 S. Ct. 1142, 173 L. Ed. 2d 1 (2009)*. "Past exposure to illegal conduct does not in itself show a present case or controversy regarding injunctive relief . . . if unaccompanied by any continuing, present adverse effects," *O'Shea v. Littleton, 414 U.S. 488, 495-96, 94 S. Ct. 669, 38 L. Ed. 2d 674 (1974)*, or by "a sufficient likelihood that [the plaintiff] will again be wronged in a similar way," *City of Los Angeles v. Lyons, 461 U.S. 95, 111, 103 S. Ct. 1660, 75 L. Ed. 2d 675 (1983)*.

On the first standing element, **[**12]** the indirect purchasers argue that the "continued sale of the propane tanks filled to only fifteen pounds without a corresponding decrease in price constitutes an ongoing injury in fact." ***In re Pre-Filled Propane Tank Antitrust Litig.****, 2016 U.S. Dist. LEXIS 194545, 2016 WL 6963059, at *3 (W.D. Mo. Jan. 13, 2016)*. The district court agreed: "Paying a supra-competitive price as a result of past anti-competitive behavior is a continuing effect, sufficient to establish an injury in fact." ***Id.*** But it concluded that "all three of Plaintiffs' requested injunctions fail for lack of redressability." *2016 U.S. Dist. LEXIS 194545, [WL] at *5*.

Specifically, the district court noted that the January 2015 FTC consent orders provide the same relief as sought in the first two injunction grounds. *See* ***Faibisch v. University of Minnesota****, 304 F.3d 797, 802 (8th Cir. 2002)* (***HN2***[] "When deciding *Rule 12(c)* motions . . . courts may rely on matters within the public record."); ***Brown v. Medtronic, Inc.****, 628 F.3d 451, 459-60 (8th Cir. 2010)* ("documents attached to or incorporated within a complaint are considered part of the pleadings, and courts may look at such documents 'for all purposes,' *Fed.R.Civ.P. 10(c)*, including to determine whether a plaintiff has stated a plausible claim"). ***HN3***[] A plaintiff "is not entitled to injunctive relief to the extent other existing relief is adequate" and provides "substantially the same relief." ***National Farmers' Org., Inc. v. Associated Milk Producers, Inc.****, 850 F.2d 1286, 1309 (8th Cir. 1988)*. On appeal, the indirect purchasers argue that the injunction grounds **[**13]** "exceed[] the scope of that provided for in the FTC Consent Orders."

On the first ground—a ban on allocating market share—the district court focused on how the FTC orders bar Defendants from raising, fixing, maintaining, or stabilizing prices of the tanks through any means. The FTC orders say:

> [Defendants are prohibited from] [e]ntering into, attempting to enter into, adhering to, participating in, maintaining, organizing, implementing, enforcing, inviting, offering or soliciting any combination, conspiracy, agreement, or understanding between or among [Defendants] and any Competitor to raise, fix, maintain, or stabilize prices or price levels of Propane Tanks through any means, including modifying the Fill Level contained in Propane Tanks sold by [Defendants] and/or its Competitors, or coordinating Communications to customers of [Defendants] and/or their Competitors.

[*1055] The indirect purchasers argue: "Even if competitors are enjoined from agreeing to fix prices and stop doing so, they may still agree to allocate markets, and due to the resulting lack of competition, have the ability to charge supra-competitive prices independent of a continuing agreement to do so."

The indirect purchasers, however, **[**14]** ignore the "through any means" language in the FTC orders. In the amended complaint, they allege that market-share allocation is a means of fixing prices: "AmeriGas and Blue Rhino also agreed to allocate customers and markets between themselves in furtherance of their collusion to maintain prices at supracompetitive levels." As the district court noted, "Plaintiffs do not allege the existence of a market share allocation agreement divorced from any allegations of price fixing." ***Pre-Filled Propane**, 2016 U.S. Dist. LEXIS 194545, 2016 WL 6963059, at *5*. Under the indirect purchasers' own theory, market-share allocation violates the FTC orders' ban on fixing prices. The first injunction ground does not exceed the scope of the FTC orders.

On the second ground, the indirect purchasers want Defendants to void any existing co-packing agreements, refrain from making new co-packing agreements, and refrain from sharing pricing information or information about tank fill levels. In the amended complaint, they allege that the co-packing agreements "facilitate[] the exchange of pricing information between two direct competitors" and "present[] ample opportunities for conspiratorial communications." But the FTC orders cover those issues by prohibiting Defendants from exchanging **[**15]** "Competitively Sensitive Non-Public Information." That includes "pricing, pricing strategies, Fill Level strategies, costs, revenues, margins, output, business and strategic plans, marketing, customer information and Communications with customers, advertising, promotion or research and development."

The indirect purchasers counter, asserting that both the first and second injunction grounds are necessary because "there exists some cognizable danger of recurrent violation." ***United States v. Borden Co.**, 347 U.S. 514, 520, 74 S. Ct. 703, 98 L. Ed. 903 (1954)* (citation omitted) (discussing simultaneous use of public and private antitrust injunctions). They contend that the "FTC Consent Orders are relatively weak. In essence, they merely require Defendants to promise not to break the law again." According to them, "[d]iscovery could establish, for example, that Defendants have been violating the terms of the FTC Consent Orders and the FTC either is unaware or has not been adequately enforcing the terms of the Orders—a problem which Plaintiffs would have no standing to address absent an independent suit."

In other words, the indirect purchasers believe that Defendants are engaging in "recurrent violations" of the FTC orders. They focus on how the district court explained:

> ***HN4***[] "Past exposure **[**16]** to illegal conduct does not in itself show a present case or controversy regarding injunctive relief." *O'Shea v. Littleton, 414 U.S. 488, 495, 94 S. Ct. 669, 38 L. Ed. 2d 674 (1974)*. Thus, Defendants' allegedly anti-competitive actions in 2008 are alone insufficient to establish a present injury in fact, entitling Plaintiffs to injunctive relief. However, such past exposure is sufficient if it is accompanied by "continuing, present adverse effects." *Id. at 496*. Paying a supra-competitive price as a result of past anti-competitive behavior is a continuing effect, sufficient to establish an injury in fact.
>
> . . . .

> **[*1056]** [T]he allegation that Defendants colluded to raise prices and the allegation that the prices have remained inflated are not legal conclusion but factual assertions. Accordingly, this Court appropriately accepts them as true and finds that Plaintiffs have alleged a sufficient injury in fact.

Pre—Filled Propane Tank Antitrust Litig., *2016 U.S. Dist. LEXIS 194545, 2016 WL 6963059, at *3-4*. The indirect purchasers argue that the district court's conclusion means that Defendants are recurrently violating the FTC orders, necessitating private injunctive relief.

True,***HN5***[] "the law is clear that public and private antitrust injunctions may coexist without regard for one another." ***Howard Hess Dental Labs. Inc. v. Dentsply Int'l, Inc.***, *602 F.3d 237, 249 (3d Cir. 2010)*, *citing* ***Borden***, *347 U.S. at 518* (in antitrust **[**17]** cases, public and private claims for injunctive relief are "designed to be cumulative, not mutually exclusive"). "[T]he mere existence of [a government consent order] does not preclude private injunctive relief. . . . However, the party seeking the injunction nonetheless has the burden of establishing that such cumulative relief is needed" through the "cognizable danger of recurrent violation" standard from *Borden.* ***In re Nifedipine Antitrust Litig.***, *335 F. Supp. 2d 6, 17 (D.D.C. 2004)* (internal quotation marks omitted), *citing* ***Borden***, *347 U.S. at 518*; *see also* ***Howard Hess***, *602 F.3d at 249* ("nothing in *Borden* intimates that a private litigant is relieved of its evidentiary burden of showing an entitlement to injunctive relief when the government has already obtained its own injunction.").

The indirect purchasers, however, must adequately plead that Defendants are, post-January 2015, conspiring to charge supra-competitive prices, resulting in "some cognizable danger of recurrent violation" of the FTC orders. ***HN6***[] A complaint must allege "sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" ***Ashcroft v. Iqbal***, *556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*, *quoting* ***Bell Atlantic Corp. v. Twombly***, *550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. A plausible claim must plead "factual content that allows the court to draw the reasonable inference that the defendant is **[**18]** liable for the misconduct alleged." ***Id.***, *quoting* ***Twombly***, *550 U.S. at 556*. "The plausibility standard . . . asks for more than a sheer possibility that a defendant has acted unlawfully." ***Id.***, *citing* ***Twombly***, *550 U.S. at 556*. "A pleading that offers 'labels and conclusions' or 'a formulaic recitation of the elements of a cause of action will not do.' Nor does a complaint suffice if it tenders 'naked assertion[s]' devoid of 'further factual enhancement.'" ***Id.***, *quoting* ***Twombly***, *550 U.S. at 555, 557* (citation omitted). Rather, the facts alleged "must be enough to raise a right to relief above the speculative level." ***Twombly***, *550 U.S. at 555*. "As a general rule, a *Rule 12(c)* motion for judgment on the pleadings is reviewed under the same standard as a 12(b)(6) motion to dismiss." ***Ginsburg v. InBev NV/SA***, *623 F.3d 1229, 1233 n.3 (8th Cir. 2010)*; *see also* ***Cafasso v. General Dynamics C4 Sys.***, *637 F.3d 1047, 1054 n.4 (9th Cir. 2011)* (collecting cases from the Second, Fifth, and Sixth Circuits to conclude that the *Twombly* and *Iqbal* standard applies to *Rule 12(c)* motions.).

In *Propane En Banc*, this court considered whether the direct purchasers sufficiently alleged "unlawfully high priced sales during the class period" resulting from a price-fixing conspiracy, an element in determining "whether the amended complaint adequately pleads a continuing violation sufficient to restart the statute of **[*1057]** limitations." **[**19]** ***Propane En Banc***, *860 F.3d at 1068* (internal quotation marks omitted). The direct purchasers pled (1) "Defendants' anticompetitive conduct lasted at least from July 21, 2008 through January 9, 2015," and (2) "Defendants' unlawful communications regarding pricing, fill levels, and market allocation continued until at least late 2010." ***Id.*** *at 1069-70*. This court concluded that those allegations were "naked assertion[s] devoid of further factual enhancement," *Iqbal, 556 U.S. at 678* (internal quotation marks omitted), that do not "raise a right to relief above the speculative level," *Twombly, 550 U.S. at 555*. ***Propane En Banc***, *860 F.3d at 1070*. Other allegations, however, sufficiently "list[ed] relevant individuals, acts, and conversations" in 2008 and 2010 to plead "that the conspiracy continued into the class period." ***Id.*** *at 1069-70*.

The indirect purchasers emphasize how they plead: (1) "Defendants' conspiracy is a continuing conspiracy. Both defendants have continued to maintain the reduced fill levels despite the fact that propane prices have decreased substantially from their 2008 high"; (2) "Despite their settlements [in *Propane I*], Defendants continued to conspire, and rather than resuming competition, maintained their illegally agreed-upon fill levels, preserving the unlawfully inflated prices that their conspiracy had produced"; (3) "The **[**20]** conduct of Defendants is continuing and will continue to impose antitrust injury on class members unless equitable relief is granted"; and (4) "Prices for propane exchange tanks sold by Defendants have been fixed, raised, maintained, and stabilized at artificially high, non-competitive levels throughout each State set forth below."

These allegations echo those found insufficient in *Propane En Banc*—that is—they are "naked assertion[s] devoid of further factual enhancement," *Iqbal, 556 U.S. at 678* (internal quotation marks omitted), that do not "raise a right to relief above the speculative level," *Twombly, 550 U.S. at 555*. *See* ***Propane En Banc**, 860 F.3d at 1069-70*. Yes, the *Ortiz* and *Orr* complaints contain allegations detailing events *in 2008 and through 2010* like those found sufficient in *Propane En Banc* to plead "that the conspiracy continued into the class period."

But neither those allegations nor others in the complaints "list relevant individuals, acts, and conversations, providing 'factual content' to support "the reasonable inference that the defendant is liable for the misconduct alleged," that Defendants are conspiring to charge supra-competitive prices and are engaging in "recurrent violations" of the *January 7, 2015* consent orders. ***Id.**, quoting* ***Iqbal**, 556 U.S. at 678* **[**21]** . The indirect purchasers have not even adequately pleaded that Defendants are currently charging supra-competitive prices, let alone a conspiracy. The issue here is different than that in *Propane En Banc*. But *Propane En Banc's* pleading discussion controls. The indirect purchasers inadequately plead an injury-in-fact.

The indirect purchasers' inadequate pleading of an injury-in-fact also means they lack standing to pursue the third injunction ground (not addressed in the FTC orders)—to increase the fill levels of the tanks to 17 pounds of propane. Even if they had adequately pled an injury-in-fact, as the district court noted, the parties "agree that mandating an increase in the amount of propane in the tanks without a mandate regarding price would not decrease the price per pound of propane tanks." ***Pre-Filled Propane**, 2016 U.S. Dist. LEXIS 194545, 2016 WL 6963059, at *5*. An increase in the fill level **[*1058]** does not mean that the claimed injury will be redressed.

The indirect purchasers in *Ortiz* and *Orr* lack standing to pursue their injunctive-relief claims. This court need not address the argument that the district court erred in ruling that the doctrine of laches bars those claims.

III.

The indirect purchasers seek disgorgement for violations of *Section 1* of the Sherman Act. **[**22]** ***HN7***[] Disgorgement is an equitable remedy that provides "a method of forcing a defendant to give up the amount by which he was unjustly enriched." ***FTC v. Bronson Partners, LLC**, 654 F.3d 359, 372 (2d Cir. 2011)* (citation and internal quotation marks omitted). They plead: (1) "As a direct result of their anticompetitive profits, Defendants have received profits far in excess of those that would have been received in a competitive market"; (2) "Disgorgement of these profits is necessary to divest Defendants of the fruits of their wrongful conduct"; and (3) "In the alternative, Plaintiffs request that Defendants be required to provide class members with propane equal in value to the fill reductions or the cash equivalent based on then existing wholesale prices." The district court dismissed the disgorgement claim as barred by the statute of limitations.

On appeal, the indirect purchasers contend that because disgorgement is an equitable remedy, the doctrine of laches, not the statute of limitations, governs timeliness. The district court apparently applied the statute of limitations because it considered the disgorgement claim a federal-antitrust-damages claim. But under *Illinois Brick*, ***HN8***[] only the "overcharged direct purchaser, and not others in the chain **[**23]** of manufacture or distribution" can sue for antitrust damages under *Section 4 of the Clayton Act, 15 U.S.C. § 15*, which provides a private right of action for violations of *Section 1* of the Sherman Act. ***Illinois Brick**, 431 U.S. at 729*; ***Ginsburg**, 623 F.3d at 1233* (citing *Illinois Brick* to explain: "As indirect purchasers, they may not sue for damages under the *Clayton Act*. But indirect purchasers are private parties who may sue for injunctive relief under *§ 16* of the Act.").

In *Illinois Brick*, the Supreme Court barred indirect-purchaser suits for federal antitrust damages, reasoning that those suits "would create a serious risk of multiple liability for defendants" and "the possibility of inconsistent adjudications." ***Illinois Brick**, 431 U.S. at 730*. The Court was also concerned about the "uncertainties and difficulties in analyzing price and out-put decisions 'in the real economic world' . . . and of the costs to the judicial system and the efficient enforcement of the antitrust laws of attempting to reconstruct those decisions in the courtroom." ***Id.*** *at 731-32*.

At the district court, Defendants argued that disgorgement "is a thinly-veiled attempt to circumvent the long-standing holding of *Illinois Brick*." The district court did not address this issue. But other courts have concluded that *Illinois Brick* prohibits indirect **[**24]** purchasers from seeking disgorgement:

> Although the Court's concern [in *Illinois Brick*] for the complexity of the damages proceeding is not implicated by a disgorgement action, permitting disgorgement does raise the specter of duplicative recoveries. ***HN9***[] Under the Clayton Act, private parties . . . can already pursue direct purchaser actions for treble damages under *§ 4*. *15 U.S.C. § 15*. . . . Permitting disgorgement under *§ 16* would provide yet another route to defendants' allegedly ill-gotten gains, and would therefore heighten the possibility **[*1059]** that defendants in antitrust actions could be exposed to multiple liability. While disgorgement would have the additional benefit of permitting [compensation for] indirect purchasers who are excluded from recovery under current law, the Supreme Court weighed this interest against the threat of duplicative recovery and determined that only direct purchasers have standing under the Clayton Act.

FTC v. Mylan Lab., Inc.*, 62 F. Supp. 2d 25, 41 (D.D.C. 1999)*; *see also* ***In re Digital Music Antitrust Litig.****, 812 F. Supp. 2d 390, 412 (S.D.N.Y. 2011)* ("it is beyond peradventure that indirect purchasers may not employ unjust enrichment to skirt the limitation on recovery imposed by *Illinois Brick* . . . . Moreover, there is no clearly established federal common law of restitution for **[**25]** a federal antitrust violation, and Plaintiffs do not suggest that the Court create one. Therefore, absent a basis for restitution in federal law both direct and indirect purchasers may not bring unjust enrichment claims premised solely on a violation of federal law."); ***In re Flonase Antitrust Litig.****, 692 F. Supp. 2d 524, 542 (E.D. Pa. 2010)* ("The policy of *Illinois Brick* prohibits indirect purchasers from suing the manufacturer to recover any ill-gotten gains the manufacturer has obtained by violating antitrust laws. . . . Allowing indirect purchasers to recover and recoup a benefit from the defendant under an unjust enrichment theory would circumvent the policy choice of *Illinois Brick*."); ***In re Terazosin Hydrochloride Antitrust Litig.****, 160 F. Supp. 2d 1365, 1380 (S.D. Fla. 2001)* ("*Illinois Brick* expressed concerns that indirect purchasers actions would lead to complex apportionment disputes among injured parties, undermine the efficient enforcement of antitrust laws, or expose defendants to the risk of multiple liability. The end payors' unjust enrichment claim raises identical concerns. . . . State legislatures and courts that adopted the *Illinois Brick* rule against indirect purchaser antitrust suits did not intend to allow an end run around the policies allowing only direct purchasers to recover.") (internal citations and quotation marks **[**26]** omitted).

This court agrees with those district courts. Here, the indirect purchasers are trying to use disgorgement to get profits, or "propane equal in value to the fill reductions or the cash equivalent based on then existing wholesale prices." Those requests violate the policy concerns in *Illinois Brick*. The indirect purchasers cannot pursue disgorgement, an impermissible attempt to circumvent Supreme Court precedent. *See* ***Brown v. St. Louis Police Dep't of City of St. Louis****, 691 F.2d 393, 396 (8th Cir. 1982)* ("We may . . . affirm on any ground supported by the record").

IV.

The indirect purchasers argue that this court's holding in *Propane En Banc*—that "'each sale to the plaintiff[s]' in a price-fixing conspiracy 'starts the statutory period running again'"—means that the state-law-damages claims of the new purchaser subclasses and the six-year statute-of-limitations subclass are not time-barred. *See* ***Propane En Banc****, 860 F.3d at 1068*, *quoting* ***Klehr v. A.O. Smith Corp.****, 521 U.S. 179, 189, 117 S. Ct. 1984, 138 L. Ed. 2d 373 (1997)*. This court declines to address that issue, instead remanding to the district court to consider a threshold issue: assuming timeliness, whether the state-law-damages claims should remain in federal court.

HN10[] Federal courts "possess only that power authorized by Constitution and statute." **[**27]** ***Kokkonen v. Guardian Life Ins. Co. of Am.****, 511 U.S. 375, 377, 114 S. Ct. 1673, 128 L. Ed. 2d 391 (1994)*. "[I]t is well established—in certain classes of cases—that, once a court has original jurisdiction **[*1060]** over some claims in the action, it may exercise supplemental jurisdiction over additional claims that are part of the same case or controversy." ***Exxon Mobil Corp. v. Allapattah Servs., Inc.****, 545 U.S. 546, 552, 125 S. Ct. 2611, 162 L. Ed. 2d 502 (2005)*.

But ***HN11***[] "Congress unambiguously gave district courts discretion in *28 U.S.C. § 1367(c)* to dismiss supplemental state law claims when all federal claims have been dismissed." ***Gibson v. Weber****, 431 F.3d 339, 342 (8th Cir. 2005)*. By *§ 1367(c)*:

> The district courts may decline to exercise supplemental jurisdiction over a claim under *subsection (a)* if—
> (1) the claim raises a novel or complex issue of State law,
> (2) the claim substantially predominates over the claim or claims over which the district court has original jurisdiction,
> (3) the district court has dismissed all claims over which it has original jurisdiction, or
> (4) in exceptional circumstances, there are other compelling reasons for declining jurisdiction.

Here, this court has affirmed the dismissals of this case's federal claims. And this case appears to raise "novel or complex" issues of the laws of multiple states. This court remands to the district court to analyze under *§ 1367(c)* whether it should exercise supplemental jurisdiction over the state-law claims. *See* ***Lapides v. Board of Regents of [**28] Univ. Sys. of Georgia****, 535 U.S. 613, 624, 122 S. Ct. 1640, 152 L. Ed. 2d 806 (2002)* (noting that under *§ 1367(c)(3)*, "the District Court may well find that this case, now raising only state-law issues, should . . . be remanded to the state courts for determination."). If the district court decides to exercise supplemental jurisdiction, then this court directs the district court to consider the impact of *Propane En Banc* on the timeliness of the state-law claims.

****

The judgment is affirmed in part, and the case remanded for proceedings consistent with this opinion.

Counsel: **[*1]** For Brian Salone, Plaintiff: Ashishkumar A Patel, LEAD ATTORNEY, Law Office of Ashishkumar Patel APC, Santa Ana, CA USA.

For Bank of America, N.A., national association Defendant: Mark Joseph Kenney, LEAD ATTORNEY, Severson and Werson APC, San Francisco, CA USA; John Owen Campbell, Severson and Werson APC, Irvine, CA USA.

For Rebecca Callahan, Mediator (Adr Panel): Rebecca Callahan, Callahan Law Corporation, Newport Beach, CA USA.

Judges: HONORABLE ANDRÉ BIROTTE JR., UNITED STATES DISTRICT JUDGE.

Opinion by: ANDRÉ BIROTTE JR.

Opinion

ORDER GRANTING DEFENDANT'S MOTION FOR SUMMARY JUDGMENT IN PART AND DENYING IT IN PART

On March 30, 2018, Defendant Bank of America, N.A. ("Defendant") filed a motion for summary judgment on all of Brian Salone's claims. Dkt. No. 16. Brian Salone ("Plaintiff") filed an opposition, and Defendant replied. Dkt. Nos. 21, 24. The Court heard oral arguments regarding the motion on June 15, 2018. For the following reasons, the Court **GRANTS** the motion in part and **DENIES** it in part.

I. BACKGROUND

In December 2007, Plaintiff secured a $449,100.00 loan from Defendant with a deed of trust on his property in Corona, CA. Decl. Nichole Williams, ¶ 3, Exs. 1, 2 (Dkt. No. 19). The loan was for a term of 30 **[*2]** years at a fixed rate of 6.25%. Williams Decl., Ex. 1, at p. 2. Plaintiff defaulted on the loan in early 2009 and sought a loan modification from Defendant. Decl. Brian Salone, ¶ 2 (Dkt. No. 23).

In December 2014, Plaintiff again contacted Defendant about obtaining a loan modification. Salone Decl., ¶ 3. Defendant's representatives told Plaintiff that he could not modify his loan because he was in default and encouraged him to pay his arrearages. *Id.* Plaintiff borrowed money to pay off the $21,347.47 of arrearages. *Id.* Then, in January 2016, Defendant presented Plaintiff a Trial Period Plan ("TPP"). Salone Decl., ¶ 5. The TPP specified that, if Plaintiff made three timely, monthly payments, Defendant would offer Plaintiff a permanent loan modification at the monthly rates paid during the TPP. SGI[1] 1-2. Plaintiff did make the three TPP payments, and Defendant sent Plaintiff a permanent loan modification offer (the "Offer"). SGI 3.

The Offer required Plaintiff to do two things to accept the Offer and permanently modify his loan: (1) make the first monthly payment and (2) sign the attached loan modification agreement ("Agreement") and return copies of it to Defendant by May 23, 2016. *Id.* ***[*3]*** Plaintiff timely made the initial payment on May 16, 2016. SGI 4. But, according to Defendant, it never received a signed copy of the Agreement from Plaintiff. SGI 5. Plaintiff, on the other hand, submitted a declaration stating that he sent signed copies of the Agreement to Defendant more than one week before May 23, 2016. Salone Decl., ¶¶ 10, 11.

Plaintiff then attempted to make an additional loan payment on June 1, 2016, but Defendant rejected it. Salone Decl., ¶ 11. Defendant later notified Plaintiff on June 9, 2016 that the Agreement lapsed due to Plaintiff's failure to return the signed Agreement by the due date. SGI 6. The notification stated in bold typeface, "If you believe our decision is incorrect, you have 30 calendar days from the date of this letter to contact us at 800.854.6885 and provide information to show why our determination was in error." *Id.* Plaintiff did not provide Defendant with any documentation that there was a mistake, but did contact Defendant to explain that he had sent in signed copies of the Agreement. SGI 6; Salone Decl., ¶ 13.

On December 2, 2016, Plaintiff filed a complaint in California Superior Court for the County of Riverside. *See* Complaint (Dkt. **[*4]** No. 1-1). It alleges seven causes of action: (1) intentional misrepresentation; (2) breach of contract; (3) negligence; (4) negligent misrepresentation; (5) violations of California's Unfair Competition Law ("UCL"), *Cal. Bus. & Prof. Code, §§ 17200, et seq.*; (6) breach of the implied covenant of good faith and fair dealing; and (7) promissory estoppel. *Id.* Defendant removed the case to this Court. Dkt. No. 1.

After Plaintiff filed the lawsuit, Defendant offered another loan modification in February 2017, which required Plaintiff to pay a $32,000 lump sum payment of the monthly amounts that had accrued from June 2016 through February 2017. SGI 8; Salone Decl., ¶ 19. Plaintiff rejected the offer because he could not afford the $32,000 lump sum payment. SGI 9; Salone Decl., ¶ 19. In June 2017, Defendant again offered a loan modification, this time with monthly payments of $3,758.56, a $173.24 increase from the monthly rates set forward in the Agreement. SGI 12.

II. LEGAL STANDARD

A motion for summary judgment must be granted when "the pleadings, the discovery and disclosure materials on file, and any affidavits show that there is no genuine issue as to any material fact and that the movant is entitled to judgment as a matter of **[*5]** law." *Fed. R. Civ. P. 56(c)*; *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 247-48, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*. The moving party bears the initial burden of identifying the elements of the claim or defense and evidence that it believes demonstrates the absence of an issue of material fact. *Celotex Corp. v. Catrett, 477 U.S. 317, 323, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986)*. Where the nonmoving party will have the burden of proof at trial, the movant can prevail merely by pointing out that there is an absence of evidence to support the nonmoving party's case. *Id.* The nonmoving party then "must set forth specific facts showing that there is a genuine issue for trial." *Anderson, 477 U.S. at 248*.

---

[1] "SGI" refers to the Statement of Genuine Issues filed by Plaintiff. Dkt. No. 22.

"Where the record taken as a whole could not lead a rational trier of fact to find for the nonmoving party, there is no 'genuine issue for trial.'" *Matsushita Elec. Indus. Co., Ltd. v. Zenith Radio Corp., 475 U.S. 574, 587, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*. The Court must draw all reasonable inferences in the nonmoving party's favor. *In re Oracle Corp. Sec. Litig., 627 F.3d 376, 387 (9th Cir. 2010)* (citing *Anderson, 477 U.S. at 255*). Nevertheless, inferences are not drawn out of thin air, and it is the nonmoving party's obligation to produce a factual predicate from which the inference may be drawn. *Richards v. Nielsen Freight Lines, 602 F. Supp. 1224, 1244-45 (E.D. Cal. 1985)*, *aff'd*, *810 F.2d 898 (9th Cir. 1987)*. "[M]ere disagreement or the bald assertion that a genuine issue of material fact exists" does not preclude summary judgment. *Harper v. Wallingford, 877 F.2d 728, 731 (9th Cir. 1989)*.

III. DISCUSSION

Defendant moves for summary judgment on all of Plaintiff's claims. In addition, it seeks a judgment that Plaintiff cannot recover punitive damages or **[*6]** attorneys' fees.

A. Breach of Contract and Breach of the Implied Covenant of Good Faith and Fair Dealing

A claim for breach of contract requires the following elements: (1) the existence of a contract, (2) the plaintiff's performance or excuse for nonperformance, (3) the defendant's breach, and (4) resulting damages to the plaintiff. *Oasis West Realty, LLC v. Goldman, 51 Cal. 4th 811, 821, 124 Cal. Rptr. 3d 256, 250 P.3d 1115 (2011)*. Like a breach of contract claim, a claim for breach of the implied covenant of good faith and fair dealing requires a showing of contract formation and damages. *See* *Rosenfeld v. JPMorgan Chase Bank, N.A., 732 F. Supp. 2d 952, 968 (N.D. Cal. 2010)*. Defendant's argument for summary judgment on Plaintiff's breach of contract and implied covenant claims focuses on the contract formation and damages elements.

1. Acceptance of the Agreement

Defendant argues that Plaintiff failed to properly accept the Offer in the manner required by the Offer. Under California law, an offeror is not bound to the terms of an agreement unless the offeree communicates its acceptance in the manner prescribed by the offer. *Cal. Civ. Code § 1582*. The parties do not dispute that Plaintiff was required to sign and return copies of the Agreement to accept the Offer. SGI 3. Thus, Defendant is not bound by the terms of the Agreement unless Plaintiff properly signed and returned copies of **[*7]** the Agreement. According to Defendant, it never received signed copies of the Agreement, and Plaintiff provides no direct evidence of receipt.

While it is true that no direct evidence establishes that Defendant received signed copies of the Agreement, a triable issue of fact exists as to whether a presumption of receipt should apply. The mailbox rule provides that the "proper and timely mailing of a document raises a rebuttable presumption that it is received by the addressee." *Mahon v. Credit Bureau of Placer Cnty. Inc., 171 F.3d 1197, 1202 (9th Cir. 1999)*; *see also* *Cal. Evid. Code § 641* ("A letter correctly addressed and properly mailed is presumed to have been received in the ordinary course of mail."). This presumption serves as "a tool for determining, in the face of inconclusive evidence, whether or not receipt has actually been accomplished." *Schikore v. BankAmerica Supplemental Ret. Plan, 269 F.3d 956, 961 (9th Cir. 2001)*. The common law mailbox rule and its presumption of receipt exist "precisely to aid finders of fact in circumstances where direct evidence of either receipt or non-receipt is not available." *Id.* Thus, if Plaintiff shows that he properly and timely mailed copies of the Agreement, then there is a presumption Defendant received the copies, unless Defendant can present affirmative evidence of non-receipt to rebut the presumption.

To determine **[*8]** whether Plaintiff's signed Agreement was timely, the Court looks to the language of the Agreement for when the return of the documents was due. The due date stipulated in the Agreement is May 23, 2016. SGI 3. "[T]he Postal Service advises its customers that first-class mail takes one to three days for delivery."

Mendez v. Knowles, 556 F.3d 757, 765 (9th Cir. 2009). Plaintiff declared under penalty of perjury he sent the signed copies at least one week before May 23, 2016, leaving at least seven days for transit. Salone Decl., ¶¶ 10, 11. "A sworn statement is credible evidence of mailing for purposes of the mailbox rule." *Schikore, 269 F.3d at 964*. Plaintiff's declaration therefore at least creates a question as to whether Plaintiff established that he properly and timely mailed signed copies of the Agreement to Defendant.

Further, if Plaintiff can invoke the mailbox rule, Defendant must then present affirmative non-receipt evidence to rebut Plaintiff's presumption. *See id.* (holding the document will be presumed to have been received unless the other party can produce affirmative evidence of non-receipt). The Ninth Circuit has held that "the presumption of receipt is a strong one." *Jones v. United States, 226 F.2d 24, 27 (9th Cir. 1955)* (quotations omitted). Defendant claims it did not receive copies of the Agreement **[*9]** from Plaintiff by May 23, 2016 as required by the Offer. Defendant provided a declaration from Nichole Renee Williams, an Assistant Vice President of Bank of America, to corroborate its position. Williams Decl., ¶ 8. Whether this would amount to a successful rebuttal of Plaintiff's presumption of receipt is a close call. *See Jones, 226 F.2d at 27* (holding that a search of the pertinent files in an office which revealed no record of receipt was insufficient to rebut the presumption of delivery). Thus, a reasonable trier of fact could rule in Plaintiff's favor if it believes that Plaintiff properly mailed signed copies of the Agreement, and that Defendant did not make a strong enough showing to rebut the presumption of receipt.

2. Damages

Defendant also claims that Plaintiff cannot establish damages in this case. "A breach of contract is not actionable without damage." *Bramalea California, Inc. v. Reliable Interiors, Inc., 119 Cal. App. 4th 468, 473, 14 Cal. Rptr. 3d 302 (2004)*. "[T]he breaching party is only liable to place the non-breaching party in the same position as if the specific breach had not occurred[,] [o]r . . . give the non-breaching party the benefit of the bargain to the extent the specific breach deprived that party of its bargain." *Postal Instant Press, Inc. v. Sealy, 43 Cal. App. 4th 1704, 1709, 51 Cal. Rptr. 2d 365 (1996)*.

According to Defendant, when Plaintiff rejected its renewed loan **[*10]** modification offers in February 2017 and June 2017, Plaintiff refused exactly what he now requests. Motion, at pp. 13-14. Defendant further claims that, because it put Plaintiff in the same position as if the alleged breach had not occurred, there must be no damages. *Id.*

While Defendant did offer Plaintiff loan modifications that were similar to the Agreement, neither offer put him back in the *same* position as if it had provided the loan modification detailed in the Agreement. The first additional loan modification offer required Plaintiff to pay a $32,000 lump sum up front to cover prior unpaid months. He would not have had to pay such a large amount in a single payment if Defendant had implemented the Agreement. While there was not any lump sum back payment in the June 2017 offer, it increased Plaintiff's monthly rates by $173.24, and Plaintiff would not have had to make increased monthly payments had Defendant implemented the Agreement in May 2016. Williams Decl., ¶ 10, Ex. 8; Salone Decl., ¶ 20. Thus, a reasonable trier of fact could determine the Defendant's offers in February 2017 and June 2017 did not place Plaintiff in the same position as if the alleged breach had not occurred. **[*11]** [2]

Because jury questions remain regarding Plaintiff's acceptance of the Agreement and Plaintiff's damages, Defendant is not entitled to summary judgment on Plaintiff's breach of contract and breach of the implied covenant of good faith and fair dealing claims.

---

[2] Defendant also points to Plaintiff's responses to form interrogatories, in which Plaintiff stated that he had not incurred certain kinds of damages. Decl. Owen Campbell, ¶ 7, Exs. 6, 7 (Dkt. No. 18). While Plaintiff's responses might provide Defendant useful evidence at trial, they do not conclusively establish that Plaintiff suffered no damages. *See Bradley v. Allstate Ins. Co., 620 F.3d 509, 527 n.21 (5th Cir. 2010)* (noting that "interrogatory responses are not binding judicial admissions").

B. Promissory Estoppel

Defendant argues that the Court must grant summary judgment on Plaintiff's promissory estoppel claim because he cannot concurrently maintain breach of contract and promissory estoppel claims. To succeed on a claim for promissory estoppel, a plaintiff must show (1) a clear and unambiguous promise, (2) his reliance on the promise, (3) that his reliance was reasonable and foreseeable, and (4) injury due to the reliance. *Advanced Choices, Inc. v. Dep't of Health Servs., 182 Cal. App. 4th 1661, 1672, 107 Cal. Rptr. 3d 470 (2010)*. The reliance element of a promissory estoppel claim replaces the consideration requirement that exists in a typical breach of contract claim. *Douglas E. Barnhart, Inc. v. CMC Fabricators, Inc., 211 Cal. App. 4th 230, 242, 149 Cal. Rptr. 3d 440 (2012)*. Thus, "a plaintiff cannot state a claim for promissory estoppel when the promise was given in return for proper consideration. The claim instead must be pleaded as one for breach of the bargained-for contract." *Fontenot v. Wells Fargo Bank, N.A., 198 Cal. App. 4th 256, 275, 129 Cal. Rptr. 3d 467 (2011)* (holding that the plaintiff could not state a claim for promissory estoppel because the defendant's promise was given for proper consideration), **[*12]** *disapproved of on other grounds by* *Yvanova v. New Century Mortg. Corp., 62 Cal. 4th 919, 199 Cal. Rptr. 3d 66, 365 P.3d 845 (2016))*.

Summary judgment is proper on Plaintiff's promissory estoppel claim because Plaintiff undisputedly gave consideration for Defendant's alleged promise to modify his loan. The parties agree that Plaintiff made the initial monthly payment in May 2016 that was required to trigger Defendant's obligation to grant a permanent loan modification. SGI 4. Because Plaintiff provided consideration, Plaintiff's claim is for breach of contract, not promissory estoppel.

C. Intentional and Negligent Misrepresentation

In order to establish a claim for intentional misrepresentation, a plaintiff must show "(a) misrepresentation (false representation, concealment, or nondisclosure); (b) knowledge of falsity (or 'scienter'); (c) intent to defraud, i.e., to induce reliance; (d) justifiable reliance; and (e) resulting damage." *Lazar v. Superior Court, 12 Cal. 4th 631, 638, 49 Cal. Rptr. 2d 377, 909 P.2d 981 (1996)* (quotations omitted). The elements for negligent misrepresentation are the same, but "the plaintiff need not [show] the defendant made an intentionally false statement, but simply one as to which he or she lacked any reasonable ground for believing the statement to be true." *Charnay v. Cobert, 145 Cal. App. 4th 170, 184, 51 Cal. Rptr. 3d 471 (2006)*. In either case, the statement must have been false at the time it was made. **[*13]** *See* *Magpali v. Farmers Grp., Inc., 48 Cal. App. 4th 471, 481, 55 Cal. Rptr. 2d 225 (1996)*, *as modified on denial of reh'g* (Aug. 20, 1996). Nonperformance of a promise does not give rise to fraud liability unless the plaintiff proves that the defendant intended not to perform at the time it made the promise. *See id.* (affirming the trial court's grant of a nonsuit on the plaintiff's fraud claim where the evidence established nothing more than failure to keep a promise); *Tarmann v. State Farm Mut. Auto. Ins. Co., 2 Cal. App. 4th 153, 159, 2 Cal. Rptr. 2d 861 (1991)* (affirming dismissal of a negligent misrepresentation claim where the plaintiff's allegations simply "involved a promise to perform at some future time").

Here, Plaintiff presents no evidence that Defendant made a promise it knew to be false at the time it was made. In opposing Defendant's motion, Plaintiff claims that "[Defendant] intentionally breached [its] Agreement by failing to sign the Agreement, failing to inform Plaintiff [it] had not received the originally signed Agreement, and failing to accept his June 2016 payment." Opp'n, at p. 11. None of these actions involve false promises or false statements. Instead, they simply represent ways in which Defendant allegedly breached its contractual obligations. Plaintiff may have valid contract claims, but Defendant's potential contractual breach does **[*14]** not subject it to fraud liability.

D. Negligence

In addition to his misrepresentation claims, Plaintiff asserts that Defendant acted negligently throughout the loan modification process. Defendant argues that Plaintiff's negligence claim cannot survive summary judgment under the economic loss rule.

"[T]he economic loss rule prevents the law of contract and the law of tort from dissolving one into the other." *Robinson Helicopter Co. v. Dana Corp., 34 Cal. 4th 979, 988, 22 Cal. Rptr. 3d 352, 102 P.3d 268 (2004)* (quotations omitted). When a defendant's contractual breach economically injures a plaintiff, the plaintiff ordinarily must recover through a contract claim, not a tort claim. *Id.* "[A] breach of contract becomes tortious only when it also violates a duty independent of the contract arising from principles of tort law." *Erlich v. Menezes, 21 Cal. 4th 543, 551, 87 Cal. Rptr. 2d 886, 981 P.2d 978 (1999)*. Thus, negligent performance of a contract generally is not actionable through a tort claim. *See* *id. at 554* ("This is a claim for negligent breach of a contract, which is not sufficient to support tortious damages for violation of an independent tort duty.").

Plaintiff identifies no independent duty Defendant breached. He claims Defendant was required to follow through with its agreement to modify his loan, but Defendant would only owe such a duty if a contract imposed one. **[*15]** Indeed, the negligence allegations in Plaintiff's complaint describe Defendant's duties as follows: "[Defendant's] agreement to review Plaintiff for a modification, and offer of a TPP and permanent modification created a duty whereby [Defendant] was required to follow through with permanent modification especially since Plaintiff had honored his part of the Agreement."[3] Complaint, ¶ 45. Because Defendant's relevant duties arose from alleged agreements between the parties, the economic loss rule applies. Defendant is entitled to summary judgment on Plaintiff's negligence claim.

E. UCL

The UCL provides limited civil remedies for unfair competition, defined as "any unlawful, unfair or fraudulent business act or practice." *Kwikset Corp. v. Superior Court, 51 Cal. 4th 310, 320, 120 Cal. Rptr. 3d 741, 246 P.3d 877 (2011)* (citing *Cal. Bus. & Prof. § 17200*). A plaintiff can maintain a UCL claim for conduct that is (1) fraudulent, (2) unlawful, or (3) unfair. *See* *Berryman v. Merit Prop. Mgmt., Inc., 152 Cal. App. 4th 1544, 1554, 62 Cal. Rptr. 3d 177 (2007)* ("An act can be alleged to violate any or all of the three prongs of the UCL—unlawful, unfair, or fraudulent.").

1. Fraudulent

As explained above, Defendant is entitled to summary judgment on Plaintiff's misrepresentation claims. Plaintiff therefore cannot maintain a UCL claim under the fraud prong.

2. Unlawful

In proscribing unlawful business **[*16]** practices, the UCL borrows violations of other laws and makes them independently actionable. *Belton v. Comcast Cable Holdings, LLC, 151 Cal. App. 4th 1224, 1233, 60 Cal. Rptr. 3d 631 (2007)*. While the unlawful prong is broad, "the UCL is not an all-purpose substitute for a tort or contract action." *Korea Supply Co. v. Lockheed Martin Corp., 29 Cal. 4th 1134, 1150, 131 Cal. Rptr. 2d 29, 63 P.3d 937 (2003)* (quotations omitted). Thus, "a breach of contract can only form the predicate for *Section 17200* claims, provided it also constitutes conduct that is 'unlawful, or unfair, or fraudulent.'" *Catena v. Capitol Records, LLC, No. CV 12-00806 MMM (JCx), 2012 U.S. Dist. LEXIS 199411, 2012 WL 12942740, at *7 (C.D. Cal. July 11, 2012)* (quoting *Puentes v. Wells Fargo Home Mortg., Inc., 160 Cal. App. 4th 638, 645, 72 Cal. Rptr. 3d 903 (2008))*. Because

[3] In his opposition to Defendant's summary judgment motion, Plaintiff briefly mentions a duty of a loan service officer "to review Plaintiff for a modification in good faith once a review is undertaken." Opp'n, at p. 16. Plaintiff neither mentioned this duty in his Complaint nor identifies the source of the obligation.

Plaintiff's only remaining claims are for breach of contract and breach of the implied covenant of good faith and fair dealing, he cannot state a UCL claim under the unlawful prong.

3. Unfair

"The proper definition for the term 'unfair' in a consumer action is uncertain." *Puentes, 160 Cal. App. 4th at 646*. In *Cel-Tech Communications, Inc. v. Los Angeles Cellular Telephone Co.*, the Supreme Court of California defined "unfair" for purposes of the UCL as "conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition." *20 Cal. 4th 163, 187, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999)*. However, some cases have limited that definition to the context of disputes **[*17]** between competitors. *Camacho v. Auto. Club of S. California, 142 Cal. App. 4th 1394, 1402, 48 Cal. Rptr. 3d 770 (2006)*. In the consumer context, courts have offered alternative tests for assessing unfairness under the UCL. One test comes from the Federal Trade Commission, pursuant to which: "(1) the consumer injury must be substantial; (2) the injury must not be outweighed by any countervailing benefits to consumers or competition; and (3) it must be an injury that consumers themselves could not reasonably have avoided." *Id. at 1403*. Other courts have described unfair practices as conduct that "offends an established public policy or . . . is immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers." *People v. Casa Blanca Convalescent Homes, Inc., 159 Cal. App. 3d 509, 530, 206 Cal. Rptr. 164 (1984)*, *abrogated on other grounds by* *Cel-Tech, 20 Cal. 4th at 186-87 & n.12 (1999)*; *accord* *McDonald v. Coldwell Banker, 543 F.3d 498, 506 (9th Cir. 2008)*. Under any standard, a breach of contract is only actionable if it is "independently unlawful, unfair, or fraudulent." *Sybersound Records, Inc. v. UAV Corp., 517 F.3d 1137, 1152 (9th Cir. 2008)*.

Plaintiff urges the Court to adopt the last standard - that unfair business practices are those that offend an established public policy or are immoral. But even under Plaintiff's preferred definition, Plaintiff cannot establish that Defendant engaged in an unfair business practice. While Plaintiff has created an issue of fact about whether Defendant breached the Agreement, he has not asserted **[*18]** any evidence that Defendant acted intentionally. The core of this case is whether the parties agreed to a permanent home loan modification in Plaintiff's particular case. Defendant may not have followed through with its promises, but such a failure alone does not constitute an unfair business practice. *See* *Prudential Ins. Co. of Am. v. Herman, No. SACV 09-00432-JVS (ANx), 2009 U.S. Dist. LEXIS 135351, 2009 WL 10674431, at *4 (C.D. Cal. Aug. 31, 2009)* (explaining that "[f]ar from being immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers . . . a breach of contract is regarded as a morally neutral act"). Without evidence of intent or some harmful, regular business practice in which Defendant engaged, Plaintiff cannot survive summary judgment on his UCL claim.

F. Punitive Damages

To obtain punitive damages, a plaintiff must show "by clear and convincing evidence that the defendant has been guilty of oppression, fraud, or malice." *Cal. Civ. Code § 3294(a)*. Punitive damages are not available for breaches of contract. *See id.*; *Consol. Data Terminals v. Applied Digital Data Sys., Inc., 708 F.2d 385, 399 (9th Cir. 1983)* ("Punitive damages are not available under California law for mere breaches of contract, no matter how gross or willful."). Because Plaintiff's only remaining claims are for breach of contract and breach of the implied covenant of good faith and **[*19]** fair dealing, it cannot recover punitive damages as a matter of law.

G. Attorneys' Fees

Finally, Defendant's motion seeks summary judgment that Plaintiff is not entitled to attorneys' fees. A party's entitlement to attorneys' fees is generally determined after litigation concludes. The Court finds it premature to rule on Plaintiff's entitlement to attorneys' fees at this juncture in the case.

IV. CONCLUSION

For the foregoing reasons, the Court **GRANTS** Defendant's motion in part and **DENIES** it in part. The Court grants summary judgment on Plaintiff's intentional misrepresentation, negligent misrepresentation, negligence, promissory estoppel, and UCL claims. It also grants summary judgment on Plaintiff's claim for punitive damages. The Court denies Defendant's motion as it relates to Plaintiff's breach of contract and breach of the implied covenant of good faith and fair dealing claims.

IT IS SO ORDERED.

Opinion

MEMORANDUM OPINION AND ORDER

After a no-hire agreement prevented plaintiff from obtaining a position with a rival employer, plaintiff Leinani Deslandes ("Deslandes") filed suit asserting, among other things, that defendants' no-hire agreement violates the *Sherman Antitrust Act*, *15 U.S.C. § 1*. Defendants McDonald's USA, LLC and McDonald's Corporation move to dismiss. For the reasons set forth below, the **[*2]** Court grants in part and denies in part defendants' motion to dismiss [34].

I. BACKGROUND

Plaintiff's story is one of employment success: she started as an entry-level crew member paid $7.00 per hour at a McDonald's franchise and worked her way up into management. When she applied for a better-paying position with a competing McDonald's restaurant, she was foiled by a no-hire agreement which forbid the competing McDonald's restaurant to hire both current employees of other McDonald's restaurants and anyone who had worked for a competing McDonald's restaurant in the last six months. Given that most individuals in the low-skill employment market do not have the luxury of being unemployed by choice for six months, the no-hire provision effectively prevented competing McDonald's franchises (as well as the company-owned stores) from competing for experienced, low-skill employees. The following facts are from plaintiff's complaint and are taken as true.

Defendant McDonald's USA, LLC is a wholly-owned subsidiary of defendant McDonald's Corporation. Plaintiff generally refers to them collectively as "McDonald's." The ubiquitous purveyor of hamburgers serves 68,000,000 customers per day from some **[*3]** 36,000 outlets around the world. According to plaintiff's complaint, nearly two million people work for McDonald's or its franchisees.

Many McDonald's-brand restaurants are owned and operated by McDonald's Operating Companies ("McOpCos"), which are direct or indirect subsidiaries of McDonald's Corporation. McDonald's also franchises McDonald's-brand restaurants. Thus, many McDonald's-brand restaurants are independently owned and operated by franchisees. McDonald's receives revenue from the franchisees in the form of rent, royalties and fees.

McDonald's restaurants compete with one another. Franchisees are not granted exclusive rights or territories and are specifically warned that they may face competition from other franchisees, new franchisees and restaurants owned by McOpCos. Thus, restaurants owned by McOpCos compete directly with McDonald's franchisees (who, in turn, compete with each other) to sell hamburgers and fries to customers. When franchising restaurants, McDonald's enters a standard franchise agreement with its franchisees.[1] Because the agreement is standard, franchisees know the basic contents of each other's agreements. Generally, each franchise agreement lasts for twenty **[*4]** years. In addition to a franchise fee, franchisees agree to pay McDonald's a percentage of gross revenue. McDonald's has an incentive to promote revenue growth in its franchisees' restaurants and encourages competition between franchisees for food sales.

Under the standard franchise agreement, each franchisee is an independent business responsible for the operation of its particular McDonald's-brand restaurant. Under the agreement, franchisees are required to purchase supplies from approved suppliers. They can, however, seek approval of new suppliers, and they negotiate directly with the suppliers as to purchasing terms, such as price.

Franchisees, as independent business owners, are also responsible for the day-to-day operations of their respective restaurants and for, among other things, employment matters. Franchisees make their own decisions with respect to hiring, firing, wages and promotions. The standard franchise agreement specifically states that franchisees are not agents of McDonald's and that McDonald's is not a joint employer with respect to the franchisees' employees.

[1] Plaintiff alleges that McDonald's Corporation is the franchisor for franchise agreements signed before 2005 and that McDonald's USA, LLC is the franchisor for franchise agreements signed from 2005 to the present.

Although franchisees make most of their employment decisions independently, their hiring decisions are restricted **[*5]** in one respect by the standard franchise agreement. The standard agreement that was used until some point in 2017 contained a no-hire provision. Specifically, the relevant provision stated:

> *Interference With Employment Relations of Others*. During the term of this Franchise, Franchisee shall not employ or seek to employ any person who is at the time employed by McDonald's, any of its subsidiaries, or by any person who is at the time operating a McDonald's restaurant or otherwise induce, directly or indirectly, such person to leave such employment. This paragraph [] shall not be violated if such person has left the employ of any of the foregoing parties for a period in excess of six (6) months.

(Am. Compl. ¶ 87). Although McDonald's stopped including the no-hire provision in new franchise agreements at some point in 2017, the provision remains in the franchise agreements applicable to some 13,000 currently-operating McDonald's-brand restaurants. McDonald's has applied the same restraint to hiring by the McOpCos.

Franchisees ignore the no-hire provision at their peril. A breach of the no-hire provision gives McDonald's the right not to consent to a transfer of the franchise. With repeated **[*6]** breaches, McDonald's has the right to terminate the franchise. Plaintiff alleges that the provision promoted collusion among franchisees, because each knew the other had signed an agreement with the same provision. Plaintiff alleges that the no-hire provision is against each franchisee's individual interest, because it denies each franchisee opportunities to hire the best employees. Plaintiff also alleges that, so long as the other franchisees also refrain from poaching employees, the no-hire provision helps franchisees keep costs low by allowing them to pay below-market wages to their own employees.

Although franchisees are generally responsible for their own employment decisions (so far as they do not violate the no-hire agreement, anyway), many McDonald's-brand restaurants are staffed in similar ways. Many stores have managers with varying titles, such as swing manager, assistant manager and store manager. Assistant and store managers are responsible for such tasks as payroll processing, time-sheet updating, tracking supplies and orders and training entry-level employees. McDonald's requires franchisees to enroll present and future managers in training programs at McDonald's training **[*7]** centers. The cost of the training is borne by the franchisees.

A McDonald's franchise in Florida ("Bam-B") first hired plaintiff in 2009. Plaintiff started as an entry-level employee earning $7.00 per hour, and, within three months, plaintiff had earned a promotion to shift manager, with a wage bump to $10.00 per hour. By 2011, plaintiff was a Department Manager for Guest Services, earning $12.00 per hour. At that point, plaintiff began coursework to become eligible for a position as General Manager. Plaintiff's employer enrolled her in a week-long training course at McDonald's Hamburger University. The training was scheduled to take place in April 2015, but plaintiff's supervisors canceled her training when they learned plaintiff was pregnant.[2]

Fed up, plaintiff decided to put her skills to work elsewhere. Plaintiff found an opening for a position similar to hers at a nearby McDonald's restaurant. The restaurant was owned and operated by a McOpCo, which was a subsidiary of defendant McDonald's USA, LLC and which was subject to the no-hire provision. The positon at the McOpCo restaurant offered a wage of $13.75 per hour to start, with an expected bump to $14.75 after a 90-day probationary **[*8]** period. Plaintiff applied online and received a call from the store manager, who told plaintiff she would like to hire her. Plaintiff told the store manager that she worked for Bam-B. The next day, plaintiff received a call from a McDonald's corporate employee who told plaintiff the restaurant could neither interview nor hire her unless she was "released" by Bam-B to work for the McOpCo restaurant.

When plaintiff arrived at work the next day, she asked Bam-B to release her to work for the McOpCo restaurant. Bam-B said no, because plaintiff was "too valuable." Plaintiff continued to work for Bam-B for several months, but, ultimately, she took an entry-level job with Hobby Lobby for less money, $10.25 per hour. Plaintiff alleges that some of the skills she developed as a manager of a McDonald's outlet were not transferable to management positions at employers outside of the McDonald's brand, so she had to start over at the bottom elsewhere.

---

[2] Bam-B, plaintiff's former employer, is not a defendant in this action, and plaintiff has not asserted a claim for discrimination.

Based on these allegations, plaintiff asserts that defendants violated *§ 1 of the Sherman Antitrust Act*. Plaintiff alleges that defendants and their franchisees engaged in concerted activity to restrict competition among them for employees, thereby lowering **[*9]** their employment costs and limiting the employees' ability to earn higher wages. Plaintiff also asserts that the alleged conduct violates the *Illinois Antitrust Act* and the *Illinois Consumer Fraud and Deceptive Trade Practices Act*. Defendants move to dismiss.

II. STANDARD ON A MOTION TO DISMISS

The Court may dismiss a claim pursuant to *Rule 12(b)(6) of the Federal Rules of Civil Procedure* if the plaintiff fails "to state a claim upon which relief can be granted." *Fed.R.Civ.P. 12(b)(6)*. Under the notice-pleading requirements of the Federal Rules of Civil Procedure, a complaint must "give the defendant fair notice of what the . . . claim is and the grounds upon which it rests." *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)* (quoting *Conley v. Gibson, 355 U.S. 41, 47, 78 S. Ct. 99, 2 L. Ed. 2d 80 (1957))*. A complaint need not provide detailed factual allegations, but mere conclusions and a "formulaic recitation of the elements of a cause of action" will not suffice. *Twombly, 550 U.S. at 555*. To survive a motion to dismiss, a claim must be plausible. *Ashcroft v. Iqbal, 556 U.S. 662, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*. Allegations that are as consistent with lawful conduct as they are with unlawful conduct are not sufficient; rather, plaintiffs must include allegations that "nudg[e] their claims across the line from conceivable to plausible." *Twombly, 550 U.S. at 570*. In considering a motion to dismiss, the Court accepts as true the factual allegations in the complaint and draws permissible **[*10]** inferences in favor of the plaintiff. *Boucher v. Finance Syst. of Green Bay, Inc., 880 F.3d 362, 365 (7th Cir. 2018)*. Conclusory allegations "are not entitled to be assumed true," nor are legal conclusions. *Ashcroft v. Iqbal, 556 U.S. 662, 680, 681, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (noting that a "legal conclusion" was "not entitled to the assumption of truth[;]" and rejecting, as conclusory, allegations that "'petitioners 'knew of, condoned, and willfully and maliciously agreed to subject [him]' to harsh conditions of confinement"). The notice-pleading rule "does not unlock the doors of discovery for a plaintiff armed with nothing more than conclusions." *Iqbal, 556 U.S. at 678-679*.

III. DISCUSSION

A. Plaintiff's Sherman Act claim

Plaintiff seeks relief under *§ 4 of the Clayton Act*, *15 U.S.C. § 15*, which provides a private right of action for treble damages to any person "injured in his business or property by reason of anything forbidden in the antitrust laws[.]" *15 U.S.C. § 15*.

The antitrust laws protect market competition, which usually, though not always, means the goal is enhancing output and reducing price. *See* *Arizona v. Maricopa Cty. Med. Soc., 457 U.S. 332, 348, 102 S. Ct. 2466, 73 L. Ed. 2d 48 (1982)* ("The *per se* rule 'is grounded on faith in price competition as a market force'") (citations omitted); *Leegin Creative Leather Products v. PSKS, Inc., 551 U.S. 877, 895, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007)* ("the antitrust laws are designed primarily to protect interbrand competition, from which lower prices can later result"). Accordingly, a plaintiff must allege antitrust injury, **[*11]** an injury attributable to "an anti-competitive aspect of the practice under scrutiny[.]" *Atlantic Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 334, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)*. This case involves a restraint affecting competition in the supply of an input (labor) for a final product. Usually a cheaper input means a cheaper final price—something the antitrust laws traditionally prefer. Nonetheless, defendants do not dispute (nor could they) that plaintiff has alleged antitrust injury in this case, just like other suppliers do when they allege a restraint in a supply market. *Eichorn v. AT&T Corp., 248 F.3d 131, 142 (3d Cir. 2001)* (employees challenging no-hire agreement had antitrust standing to sue); *Roman v. Cessna Aircraft Co., 55 F.3d 542, 545 (10th Cir. 1995)* (employee had antitrust standing to challenge agreement between employers not to hire each other's employees); Phillip E. Areeda & Herbert Hovencamp, ***Antitrust Law****: An Analysis of Antitrust Principles and Their Application*, ¶352a (3rd and 4th Editions, 2018 Cum. Supp. 2010-2017) ("Employees may challenge antitrust violations that are premised on restraining the employment market . . .

Standing for employees thus parallels that for 'suppliers' generally[.]"); *Doe v. Arizona Hosp. and Healthcare Ass'n, Case No. CV 07-1292, 2009 U.S. Dist. LEXIS 42871, 2009 WL 1423378 at *3 (D. Ariz. March 19, 2009)* ("Price-fixing agreements among buyers, like those among sellers, are prohibited by the Sherman Act, even where the damages caused by the agreement is to sellers and not **[*12]** consumers."); *cf. Mandeville Island Farms v. American Crystal Sugar Co., 334 U.S. 219, 68 S. Ct. 996, 92 L. Ed. 1328 (1948)* (sugar beet suppliers had antitrust claim for price-fixing against sugar beet refiners). Section 1 of the Sherman Antitrust Act prohibits "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce . . . " *15 U.S.C. § 1*. This language has long been interpreted to "outlaw only *unreasonable* restraints" of trade. *State Oil Co. v. Khan, 522 U.S. 3, 10, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997)*. Some restraints are deemed so anti-competitive (and, thus, unreasonable) that they are illegal *per se*, while other restraints, which may have procompetitive effects, are judged under the rule of reason (or its subset: the quick look). As the Supreme Court has explained, restraints that are "unlawful *per se*" are those that "have such predictable and pernicious anticompetitive effect, and such limited potential for procompetitive benefit" that it is obvious they are unreasonable restraints of trade. *Khan, 522 U.S. at 10*. The *per se* rule applies to restraints "'that would always or almost always tend to restrict competition and decrease output.'" *Leegin, 551 U.S. at 886*. Accordingly, the *per se* rule is reserved for restraints with respect to which "courts have had considerable experience" such that they "can predict with confidence that [the restraint] would be invalidated **[*13]** in all or almost all instances under the rule of reason[.]" *Leegin, 551 U.S. at 886-87*. Most restraints are not *per se* unlawful but are instead analyzed under the rule of reason. *Khan, 522 U.S. at 10*. Under the rule of reason, "the finder of fact must decide whether the questioned practice imposes an unreasonable restraint on competition, taking into account a variety of factors, including specific information about the relevant business, its condition before and after the restraint was imposed, and the restraint's history, nature, and effect." *Khan, 522 U.S. at 10*. Generally, this requires a plaintiff to show the defendant has "market power—that is the ability to raise prices significantly without going out of business—without which the defendant could not cause anticompetitive effects on market pricing." *Agnew v. National Collegiate Athletic Ass'n, 683 F.3d 328, 335 (7th Cir. 2012)*. In this case, market power would be the power to suppress wages.

Courts sometimes apply a third test of reasonableness, the quick look, which is a short form of rule of reason analysis. *Illinois Corp. Travel, Inc. v. American Airlines, Inc., 806 F.2d 722, 727 (7th Cir. 1986)* ("This is the sort of short form or quick look Rule of Reason analysis endorsed in *NCAA v. Board of Regents, 468 U.S. 85, 109-10, 104 S. Ct. 2948, 82 L. Ed. 2d 70 & n. 42 (1984))*. As the Seventh Circuit has explained:

> the quick-look approach can be used when 'an observer with even a rudimentary understanding of economics could conclude that the arrangements **[*14]** in question would have an anticompetitive effect on customers and markets,' but there are nonetheless reasons to examine the potential procompetitive justifications.

Agnew, 683 F.3d at 336 (internal citation omitted) (quoting *Cal. Dental Ass'n v. FTC, 526 U.S. 756, 770, 119 S. Ct. 1604, 143 L. Ed. 2d 935 (1999))*. Under quick-look analysis, if the defendant lacks legitimate justifications for facially anticompetitive behavior then the court "condemns the practice without ado" without resort to analysis of market power. *Agnew, 683 F.3d at 336*; *Chicago Prof. Sports Ltd. Partnership v. NBA, 961 F.2d 667, 674 (7th Cir. 1992)*; *see also National Collegiate Athletic Ass'n v. Board of Regents, 468 U.S. 85, 109-10 n. 42, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (1984)* ("While the 'reasonableness' of a particular alleged restraint often depends on the market power of the parties involved, because a judgment about market power is the means by which the effects of the conduct on the market place can be assessed, market power is only one test of 'reasonableness.' And where the anticompetitive effects of conduct can be ascertained through means short of extensive market analysis, and where no countervailing competitive virtues are evident, a lengthy analysis of market power is not necessary.").

In this case, plaintiff has styled her Sherman Act claim as a restraint that is either unlawful *per se* or is unlawful under quick-look analysis. Defendant disagrees. Defendant argues that the restraint at issue in this case is most appropriately **[*15]** analyzed under the rule of reason such that plaintiff must include allegations of market power in the relevant market in order to state a claim. As defendants point out, plaintiff has not included allegations of market power in a relevant market. To decide which standard to apply, the Court must first consider the alleged restraint.

Here, plaintiff argues that she has alleged the existence of a horizontal agreement in restraint of trade. Plaintiff alleges that McDonald's franchisees signed written franchise agreements pursuant to which each agreed not to hire employees (including former employees who left within the prior six months) from other McDonald's restaurants. Specifically, the franchisees were not allowed to hire anyone who was employed (or had been employed in the prior six months) by "McDonald's, any of its subsidiaries, or by any person who is at the time operating a McDonald's restaurant[.]" (Am. Compl. ¶ 87). Plaintiff alleges that the McOpCos were similarly restricted.

Defendants argue that this is merely a vertical restraint, because it was spearheaded by the entity at the top of the chain. The Court agrees that the restraint has vertical elements, but the agreement **[*16]** is also a horizontal restraint. It restrains competition for employees among horizontal competitors: the franchisees and the McOpCos. Plaintiff has alleged that McOpCos run McDonald's-brand restaurants and, thus, compete directly with franchisees for employees. Plaintiff has also alleged that the McOpCos are subsidiaries of defendant McDonald's and that the restraint explicitly restricts franchisees from hiring employees of McDonald's subsidiaries, i.e., the franchisees' competitors. Thus, McDonald's, by including the no-hire provision in its agreement with franchisees, was protecting its own restaurants (i.e., *itself*) from horizontal competition for employees. *Cf. Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 771, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)* ("the coordinated activity of a parent and its wholly owned subsidiary must be viewed as that of a single enterprise for purposes of *§ 1 of the Sherman Act*"). The Court finds that plaintiff has alleged a horizontal restraint of trade.

Naked horizontal agreements (i.e., those among competitors) to fix prices or to divide markets are *per se* unlawful. *Leegin, 551 U.S. at 886*; *Federal Trade Comm'n v. Superior Court Trial Lawyers Assoc., 493 U.S. 411, 110 S. Ct. 768, 107 L. Ed. 2d 851 (1990)* (horizontal agreement among lawyers not to accept appointments to represent indigent criminal defendants until fees increased was a naked price restraint and *per se* unlawful); **[*17]** *Blackburn v. Sweeney, 53 F.3d 825, 827 & 828 (7th Cir. 1995)* ("reciprocal agreement [among attorneys] to limit advertising to different geographical regions was . . . an agreement to allocate markets so that the *per se* rule of illegality applies"). This includes naked agreements to set wages. *Arizona Hosp., 2009 U.S. Dist. LEXIS 42871, 2009 WL 1423378 at * 3* (plaintiff's allegations that hospital association set prices for temporary nurses stated claim for *per se* violation of the Sherman Act).

A horizontal agreement not to hire competitors' employees is, in essence, a market division. *See United States v. eBay, Inc., 968 F.Supp. 2d 1030, 1039 (N.D. Cal. 2013)* ("The court thus finds that the United States' allegations concerning agreement between eBay and Intuit [not to hire each other's employees] suffice to state a horizontal market allocation agreement."). The Department of Justice, which enforces rather than interprets the law, has warned employers that it considers naked no-hire agreements to be *per se* unlawful. (Press Release, U.S. Dep't of Justice, *Justice Department and Federal Trade Commission Release Guidance for Human Resource Professionals on How **Antitrust Law** Applies to Employee Hiring and Compensation* (Oct. 20, 2016), *available at* https://www.justice.gov/opa/pr/justice-department-and-federal-trade-commission-release-guidance-human-resource-professionals.). **[*18]** Thus, because a no-hire agreement is, in essence, an agreement to divide a market, the Court has no trouble concluding that a naked horizontal no-hire agreement would be a *per se* violation of the antitrust laws. Even a person with a rudimentary understanding of economics would understand that if, say, large law firms in Chicago got together and decided not to hire each other's associates, the market price for mid-level associates would stagnate. With no competition for their talent (aside from lower-paying in-house or government jobs), associates would have no choice but to accept the salary set by their firms or to move to another city. Thus, such a claim would be suitable for *per se* treatment.

Not all horizontal restraints are *per se* unlawful, however. Some horizontal restraints are *ancillary* to agreements that are procompetitive, usually in the sense of enhancing output (i.e., producing either a greater quantity of goods or a new good that would not otherwise exist). *Polk Bros., Inc. v. Forest City Enterprises, Inc., 776 F.2d 185, 188-89 (7th Cir. 1985)* ("A court must distinguish between 'naked' restraints, those in which the restriction on competition is unaccompanied by new production or products, and 'ancillary' restraints, those that are part of a larger endeavor **[*19]** whose success they promote."). A restraint is ancillary if it "promoted enterprise and productivity when it was adopted." *Polk Bros., 776 F.2d at 189*. When a restraint is ancillary, it is judged either under the rule of reason or given a "quick look." For example, nohire agreements that are ancillary to the sale of a business can have procompetitive effects, so they are judged under the rule of reason. *Eichorn v. AT&T Corp., 248 F.3d 131, 144 (3d Cir. 2001)*.

Similarly, where the horizontal restraint is necessary in order for the product to exist at all, a restraint will not be judged *per se* unlawful but rather will be judged under the rule of reason, including by "quick look." *Law v. National Collegiate Athletic Assoc., 134 F.3d 1010 (10th Cir. 1998)*; *see also* *Broadcast Music, Inc. v. Columbia Broadcasting Sys., Inc., 441 U.S. 1, 99 S. Ct. 1551, 60 L. Ed. 2d 1 (1979)*; *National Collegiate Athletic Ass'n. v. Board of Regents of the Univ. of Okla., 468 U.S. 85, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (1984)*. In *Law*, a group of college basketball coaches brought suit challenging the NCAA's rule limiting annual salaries for certain assistant basketball coaches to $16,000 per year. Because some restraints were necessary in order to make college sports available, the court concluded that the horizontal price restraint should be analyzed under the rule of reason, and, in particular, the "quick look." *Law, 134 F.3d at 1018 & 1020* ("We find it appropriate to adopt such a quick look rule of reason in this case.")

In this case, plaintiff has alleged a horizontal restraint that is ancillary to franchise agreements **[*20]** for McDonald's restaurants. Each time McDonald's entered a franchise agreement, it increased output of burgers and fries, which is to say the agreement was output enhancing and thus procompetitive. (That is not to say that the provision itself was output enhancing. The very fact that McDonald's has managed to continue signing franchise agreements even after it stopped including the provision in 2017 suggests that the no-hire provision was not necessary to encourage franchisees to sign.) Because the restraint alleged in plaintiff's complaint is ancillary to an agreement with a procompetitive effect, the restraint alleged in plaintiff's complaint cannot be deemed unlawful *per se*. Plaintiff's claim does not rise and fall on *per se* treatment, though. She claims in the alternative that the restraint is unlawful under quick-look analysis.

The next question, then, is whether plaintiff has plausibly alleged a restraint that might be found unlawful under quick-look analyis. The Court thinks she has. Even a person with a rudimentary understanding of economics would understand that if competitors agree not to hire each other's employees, wages for employees will stagnate. Plaintiff herself experienced **[*21]** the stagnation of her wages. A supervisor for a competing McDonald's restaurant told plaintiff she would like to hire plaintiff for a position that would be similar to plaintiff's position but that would pay $1.75-2.75 more per hour than she was earning. Unfortunately for plaintiff, the no-hire agreement prevented the McOpCo from offering plaintiff the job. When plaintiff asked her current employer to release her, plaintiff was told she was too valuable. The Court agrees that an employee working for a below-market wage would be extremely valuable to her employer.

Defendants, nonetheless, argue that their restraint has pro-competitive benefits. Specifically, defendants argue that the no-hire restriction promotes interbrand competition, by which they mean the competition between McDonald's and Burger King, rather than the intrabrand competition between the McDonald's restaurant at, say, 111 W. Jackson and the McDonald's at, say, 233 W. Jackson. It makes sense for McDonald's franchisees and the McOpCos to cooperate to promote intrabrand competition for hamburgers, because a customer who is satisfied with a hamburger she buys today at the McDonald's at 111 W. Jackson might tomorrow prefer a hamburger from **[*22]** the McDonald's at 233 W. Jackson to a hamburger from Burger King. This case, though, is not about competition for the sale of hamburgers to consumers. It is about competition for employees, and, in the market for employees, the McDonald's franchisees and McOpCos within a locale are direct, horizontal, competitors.[3] A way to promote intrabrand competition for employees would be an advertising campaign extolling the virtues of working for McDonald's. That is not what defendants are alleged to have done here. Here, they are alleged to have divided the market for employees by prohibiting restaurants from hiring each other's current or former (for the prior six months, anyway) employees. In the employment market, the various McDonald's stores are competing brands. Dividing the market does not promote intrabrand competition for employees, it stifles interbrand competition.

---

[3] Realistically, only restaurants within the same locale compete for employees. A McDonald's restaurant in Chicago does not compete for employees with a McDonald's restaurant in Florida.

Defendants argue that the no-hire restriction promotes intrabrand competition for hamburgers by encouraging franchisees to train employees for management positions. Presumably, the theory is that better service equals happier customers. The Court has no doubt, as defendants argue, that McOpCos and franchisees were concerned about training **[*23]** and then losing employees. The restraint, though, is not limited to management employees who had received expensive training at Hamburger University. The restraint applies even to entry-level employees with no management training. Nor was the restraint limited to a reasonable period of time (say six months) after the employee had received the expensive training at Hamburger University. In any case, every employer fears losing the employees it has trained. That fear does not, however, justify, say, law firms agreeing not to hire each other's associates. Employers have plenty of other means to encourage their employees to stay without resorting to unlawful market division. Those options include paying higher wages/salaries and contracting directly with each employee to set an employment term.

Though the Court has concluded that plaintiff has stated a claim for a restraint that might be unlawful under quick-look analysis, the evidence at a later stage may not support it. As defendants have pointed out, plaintiff has not attempted to plead a claim under the rule of reason. This is perhaps unsurprising. To state a claim under the rule of reason, a plaintiff must allege market power in a **[*24]** relevant market. The relevant market for employees to do the type of work alleged in this case is likely to cover a relatively-small geographic area. Most employees who hold low-skill retail or restaurant jobs are looking for a position in the geographic area in which they already live and work, not a position requiring a long commute or a move. That is not to say that people do not move for other reasons and then attempt to find a low-skill job; the point is merely that most people do not search long distances for a low-skill job with the idea of then moving closer to the job. Plaintiff, though, seeks to represent a nationwide class, and allegations of a large number of geographically-small relevant markets might cut against class certification. Nonetheless, if plaintiff decides she would like to include a claim under the rule of reason, she has leave to amend, but she must do so soon, within 28 days.

B. Plaintiff's state-law claims

Plaintiff also asserts two state-law claims. First, in Count II, plaintiff asserts a claim under the *Illinois Antitrust Act, 740 ILCS 10/1 et seq.* The Illinois Antitrust Act states, in relevant part, that it is unlawful to "[m]ake any contract . . . (a) for the purpose or with **[*25]** the effect of fixing, controlling, or maintaining the price . . . or the fee . . . paid for any service . . . received by the parties thereto[.]" *740 ILCS 10/3(1)(a)*. The Illinois Antitrust Act goes on to state that "'[s]ervice' shall not be deemed to include labor which is performed by natural persons as employees of others." *740 ILCS 10/4*.

Defendants argue that the plaintiff's claim is, thus, excluded from coverage under the Illinois Antitrust Act. The Court agrees that the plain language of the statute excludes plaintiff's claim, which alleges that the no-hire agreement artificially suppressed her wage, i.e., the price paid for her service. *See* *O'Regan v. Arbitration Forums, Inc., 121 F.3d 1060, 1066 (7th Cir. 1997)* ("[T]o the extent [plaintiff's] claims relate to an alleged market for labor services, they are specifically excluded by *§ 10/4 of the [Illinois Antitrust] Act*."). Although plaintiff suggests this is merely an exception for collective bargaining, the statute includes a separate labor exemption. *740 ILCS 10/5(1)* ("No provisions of this Act shall be construed to make illegal: (1) the activities of any labor organization or of individual members thereof which are directed solely to labor objectives which are legitimate under the laws of either the State of Illinois or the United States.").

Accordingly, **[*26]** defendants' motion to dismiss is granted as to Count II, and Count II is dismissed with prejudice.

Next, in Count III, plaintiff asserts a claim for violation of the Illinois Consumer Fraud and Deceptive Trade Practices Act. Defendants move to dismiss, and the Court agrees that plaintiff cannot move forward on this claim.

To begin with, as defendants point out, the Illinois Supreme Court has concluded that the Illinois Consumer Fraud Act aims to protect consumers from fraud, not to provide extra enforcement of the antitrust laws. *Laughlin v. Evanston Hosp., 133 Ill.2d 374, 390, 550 N.E.2d 986, 140 Ill. Dec. 861 (Ill. 1990)*. There, the Illinois Supreme Court said:

> There is no indication that the legislature intended that the Consumer Fraud Act be an additional antitrust enforcement mechanism. The language of the Act shows that its reach was to be limited to conduct that defrauds or deceives consumers or others. The title of the Act is consistent with its content.

Laughlin, 133 Ill.2d at 390. Thus, plaintiff cannot use the ICFA to bring her antitrust claim. According to plaintiff's allegations, she was injured because a no-hire agreement prohibited a potential employer from hiring her. Plaintiff was harmed in her capacity as an employee, which is to say in her capacity as a supplier of services. She was not **[*27]** defrauded as a consumer of hamburgers, and she cannot state a claim under the ICFA. *Hess v. Kanoski & Assocs., 668 F.3d 446, 454 (7th Cir. 2012)* ("[Plaintiff] has no claim under the Illinois Consumer Fraud Act . . . because [she] was an employee, not a 'consumer.'").

Count III is dismissed with prejudice.

IV. CONCLUSION

For the reasons set forth above, the Court grants in part and denies in part defendants' motion to dismiss [34].[4] The motion is denied as to Count I. The motion is granted as to Counts II and III, which are dismissed with prejudice. This case is set for status on 8/15/18 at 9:30 a.m.

SO ORDERED.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade

Antitrust & Trade Law > Sherman Act > Scope

HN1[] **Regulated Practices, Price Fixing & Restraints of Trade**

15 U.S.C.S. § 1 prohibits every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several states. In view of the common law and the law in the United States when the *Sherman Act* was passed, the phrase restraint of trade is best read to mean undue restraint. The United States Supreme Court's precedents have thus understood *§ 1* to outlaw only unreasonable restraints.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Practices Governed by Per Se Rule

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN2[] **Per Se Rule & Rule of Reason, Practices Governed by Per Se Rule**

For purposes of *15 U.S.C.S. § 1*, restraints can be unreasonable in one of two ways. A small group of restraints are unreasonable per se because they always or almost always tend to restrict competition and decrease output. Typically only horizontal restraints, restraints imposed by agreement between competitors, qualify as unreasonable per se. Restraints that are not unreasonable per se are judged under the rule of reason. The rule of reason requires courts to conduct a fact-specific assessment of market power and market structure to assess the restraint's actual effect on competition. The goal is to distinguish between restraints with anticompetitive effect that are harmful to the consumer and restraints stimulating competition that are in the consumer's best interest.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Vertical Restraints

HN3[] **Per Se Rule & Rule of Reason, Sherman Act**

For purposes of *15 U.S.C.S. § 1*, vertical restraints are restraints imposed by agreement between firms at different levels of distribution. Nearly every vertical restraint should be assessed under the rule of reason.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Evidence > Burdens of Proof > Burden Shifting

HN4[] **Per Se Rule & Rule of Reason, Sherman Act**

For purposes of *15 U.S.C.S. § 1*, to determine whether a restraint violates the rule of reason, a three-step, burden-shifting framework applies. Under this framework, the plaintiff has the initial burden to prove that the challenged restraint has a substantial anticompetitive effect that harms consumers in the relevant market. If the plaintiff carries its burden, then the burden shifts to the defendant to show a pro-competitive rationale for the restraint. If the defendant makes this showing, then the burden shifts back to the plaintiff to demonstrate that the pro-competitive efficiencies could be reasonably achieved through less anticompetitive means.

Antitrust & Trade Law > Sherman Act > Claims

Evidence > Burdens of Proof > Initial Burden of Persuasion

HN5[] **Sherman Act, Claims**

Plaintiffs under *15 U.S.C.S. § 1* can carry their initial burden of proving that the defendant's action has an anticompetitive effect by making this showing directly or indirectly. Direct evidence of anticompetitive effects would be proof of actual detrimental effects on competition, such as reduced output, increased prices, or decreased quality in the relevant market. Indirect evidence would be proof of market power plus some evidence that the challenged restraint harms competition.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN6[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

Because legal presumptions that rest on formalistic distinctions rather than actual market realities are generally disfavored in ***antitrust law***, courts usually cannot properly apply the rule of reason without an accurate definition of the relevant market. Without a definition of the market there is no way to measure the defendant's ability to lessen or destroy competition. Thus, the relevant market is defined as the area of effective competition. Typically this is the arena within which significant substitution in consumption or production occurs. But courts should combine different products or services into a single market when that combination reflects commercial realities. The definition of the relevant market must correspond to the commercial realities of the industry.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Vertical Restraints

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN7[] **Sherman Act, Claims**

For purposes of *15 U.S.C.S. § 1*, vertical restraints often pose no risk to competition unless the entity imposing them has market power, which cannot be evaluated unless the court first defines the relevant market.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN8[] **Sherman Act, Claims**

For purposes of *15 U.S.C.S. § 1*, due to indirect network effects, two-sided platforms cannot raise prices on one side without risking a feedback loop of declining demand. And the fact that two-sided platforms charge one side a price that is below or above cost reflects differences in the two sides' demand elasticity, not market power or anticompetitive pricing. Price increases on one side of the platform likewise do not suggest anticompetitive effects without some evidence that they have increased the overall cost of the platform's services. To be sure, it is not always necessary to consider both sides of a two-sided platform. A market should be treated as one sided when the impacts of indirect network effects and relative pricing in that market are minor.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Antitrust & Trade Law > Regulated Industries > Financial Institutions

HN9[] **Sherman Act, Claims**

For purposes of *15 U.S.C.S. § 1*, because they cannot make a sale unless both sides of the platform simultaneously agree to use their services, two-sided transaction platforms exhibit more pronounced indirect network effects and interconnected pricing and demand. Transaction platforms are thus better understood as supplying only one product, i.e., transactions. In the credit-card market, these transactions are jointly consumed by a cardholder, who uses the payment card to make a transaction, and a merchant, who accepts the payment card as a method of payment.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Antitrust & Trade Law > Regulated Industries > Financial Institutions

***HN10*[ ]** **Sherman Act, Claims**

For purposes of *15 U.S.C.S. § 1*, credit-card companies are best understood as supplying only one product, transactions, which is jointly consumed by a cardholder and a merchant. Merchant services and cardholder services are both inputs to this single product.

Antitrust & Trade Law > Sherman Act > Claims

***HN11*[ ]** **Sherman Act, Claims**

For purposes of *15 U.S.C.S. § 1*, evaluating both sides of a two-sided transaction platform is necessary to accurately assess competition. Only other two-sided platforms can compete with a two-sided platform for transactions.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

***HN12*[ ]** **Sherman Act, Claims**

For purposes of *15 U.S.C.S. § 1*, in two-sided transaction markets, only one market should be defined. Any other analysis would lead to mistaken inferences of the kind that could chill the very conduct the antitrust laws are designed to protect. A court must be concerned lest a rule or precedent that authorizes a search for a particular type of undesirable pricing behavior end up by discouraging legitimate price competition. Courts should avoid increasing the total cost of the antitrust system by prohibiting pro-competitive conduct the antitrust laws should encourage.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Antitrust & Trade Law > Regulated Industries > Financial Institutions

***HN13*[ ]** **Sherman Act, Claims**

For purposes of *15 U.S.C.S. § 1*, the credit-card market must be defined to include both merchants and cardholders. Focusing on merchant fees alone misses the mark because the product that credit-card companies sell is transactions, not services to merchants, and the competitive effects of a restraint on transactions cannot be judged by looking at merchants alone. Evidence of a price increase on one side of a two-sided transaction platform cannot by itself demonstrate an anticompetitive exercise of market power. To demonstrate anticompetitive effects on the two-sided credit-card market as a whole, plaintiffs must prove that a credit-card company's action increased the cost of credit-card transactions above a competitive level, reduced the number of credit-card transactions, or otherwise stifled competition in the credit-card market.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade

HN14[] **Sherman Act, Claims**

For purposes of *15 U.S.C.S. § 1*, market power is the ability to raise price profitably by restricting output. Competitive injury from price and output data will not be inferred absent some evidence that tends to prove that output was restricted or prices were above a competitive level. Where output is expanding at the same time prices are increasing, rising prices are equally consistent with growing product demand.

Antitrust & Trade Law > Sherman Act > Scope

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Vertical Restraints

HN15[] **Antitrust & Trade Law, Sherman Act**

For purposes of *15 U.S.C.S. § 1*, vertical restraints can prevent retailers from free riding and thus increase the availability of tangible or intangible services or promotional efforts that enhance competition and consumer welfare.

Antitrust & Trade Law > Regulated Practices

HN16[] **Antitrust & Trade Law, Regulated Practices**

It is the promotion of interbrand competition that is the primary purpose of the antitrust laws.

Lawyers' Edition Display

Decision

Credit card company's antisteering provisions to prevent merchants from encouraging customers to use different credit card did not violate Sherman Act in that evidence of price increase on one side of two-sided transaction platform did not demonstrate anticompetitive exercise of market power.

Summary

Overview: HOLDINGS: [1]-In determining whether the antisteering provisions of a credit-card company's contracts that restricted merchants from discouraging use of the company's cards violated *15 U.S.C.S. § 1* of the Sherman Act, the two-sided market for credit-card transactions had to be analyzed as a whole to determine whether the antisteering provisions had been shown to have anticompetitive effects; [2]-The federal government and states failed to show that the antisteering provisions had anticompetitive effects. The company's increased merchant fees reflected increases in the value of its services and the cost of its transactions, not an ability to charge above a competitive price, and it was not shown that the antisteering provisions stifled interbrand competition.

Outcome: Judgment affirmed. 5-4 decision; 1 dissent.

Restraints of Trade, Monopolies, and Unfair Trade Practices 16 > VERTICAL RESTRAINTS -- REASON > Headnote:
LEdHN3.[] 3.

For purposes of *15 U.S.C.S. § 1*, vertical restraints are restraints imposed by agreement between firms at different levels of distribution. Nearly every vertical restraint should be assessed under the rule of reason. (Thomas, J., joined by Roberts, Ch. J., and Kennedy, Alito, and Gorsuch, JJ.)

Evidence 343.5 > RESTRAINT -- BURDEN > Headnote:
LEdHN4.[] 4.

For purposes of *15 U.S.C.S. § 1*, to determine whether a restraint violates the rule of reason, a three-step, burden-shifting framework applies. Under this framework, the plaintiff has the initial burden to prove that the challenged restraint has a substantial anticompetitive effect that harms consumers in the relevant market. If the plaintiff carries its burden, then the burden shifts to the defendant to show a pro-competitive rationale for the restraint. If the defendant makes this showing, then the burden shifts back to the plaintiff to demonstrate that the pro-competitive efficiencies could be reasonably achieved through less anticompetitive means. (Thomas, J., joined by Roberts, Ch. J., and Kennedy, Alito, and Gorsuch, JJ.)

Evidence 343.5 > RESTRAINT -- CARRYING BURDEN > Headnote:
LEdHN5.[] 5.

Plaintiffs under *15 U.S.C.S. § 1* can carry their initial burden of proving that the defendant's action has an anticompetitive effect by making this showing directly or indirectly. Direct evidence of anticompetitive effects would be proof of actual detrimental effects on competition, such as reduced output, increased prices, or decreased quality in the relevant market. Indirect evidence would be proof of market power plus some evidence that the challenged restraint harms competition. (Thomas, J., joined by Roberts, Ch. J., and Kennedy, Alito, and Gorsuch, JJ.)

Restraints of Trade, Monopolies, and Unfair Trade Practices 19 > RESTRAINTS -- RELEVANT MARKET > Headnote:
LEdHN6.[] 6.

Because legal presumptions that rest on formalistic distinctions rather than actual market realities are generally disfavored in ***antitrust law***, courts usually cannot properly apply the rule of reason without an accurate definition of the relevant market. Without a definition of the market there is no way to measure the defendant's ability to lessen or destroy competition. Thus, the relevant market is defined as the area of effective competition. Typically this is the arena within which significant substitution in consumption or production occurs. But courts should combine different products or services into a single market when that combination reflects commercial realities. The definition of the relevant market must correspond to the commercial realities of the industry. (Thomas, J., joined by Roberts, Ch. J., and Kennedy, Alito, and Gorsuch, JJ.)

Restraints of Trade, Monopolies, and Unfair Trade Practices 19 > RESTRAINTS -- RELEVANT MARKET > Headnote:
LEdHN7.[] 7.

For purposes of *15 U.S.C.S. § 1*, vertical restraints often pose no risk to competition unless the entity imposing them has market power, which cannot be evaluated unless the court first defines the relevant market. (Thomas, J., joined by Roberts, Ch. J., and Kennedy, Alito, and Gorsuch, JJ.)

Restraints of Trade, Monopolies, and Unfair Trade Practices 19 > MARKET -- TWO-SIDED PLATFORM > Headnote:
LEdHN8.[] 8.

For purposes of *15 U.S.C.S. § 1*, due to indirect network effects, two-sided platforms cannot raise prices on one side without risking a feedback loop of declining demand. And the fact that two-sided platforms charge one side a price that is below or above cost reflects differences in the two sides' demand elasticity, not market power or anticompetitive pricing. Price increases on one side of the platform likewise do not suggest anticompetitive effects without some evidence that they have increased the overall cost of the platform's services. To be sure, it is not always necessary to consider both sides of a two-sided platform. A market should be treated as one sided when the impacts of indirect network effects and relative pricing in that market are minor. (Thomas, J., joined by Roberts, Ch. J., and Kennedy, Alito, and Gorsuch, JJ.)

Restraints of Trade, Monopolies, and Unfair Trade Practices 19 > MARKET -- TRANSACTION PLATFORMS > Headnote:
LEdHN9.[] 9.

For purposes of *15 U.S.C.S. § 1*, because they cannot make a sale unless both sides of the platform simultaneously agree to use their services, two-sided transaction platforms exhibit more pronounced indirect network effects and interconnected pricing and demand. Transaction platforms are thus better understood as supplying only one product, i.e., transactions. In the credit card market, these transactions are jointly consumed by a cardholder, who uses the payment card to make a transaction, and a merchant, who accepts the payment card as a method of payment. (Thomas, J., joined by Roberts, Ch. J., and Kennedy, Alito, and Gorsuch, JJ.)

Restraints of Trade, Monopolies, and Unfair Trade Practices 19 > MARKET -- CREDIT CARD COMPANIES > Headnote:
LEdHN10.[] 10.

For purposes of *15 U.S.C.S. § 1*, credit card companies are best under-stood as supplying only one product, transactions, which is jointly consumed by a cardholder and a merchant. Merchant services and cardholder services are both inputs to this single product. (Thomas, J., joined by Roberts, Ch. J., and Kennedy, Alito, and Gorsuch, JJ.)

Restraints of Trade, Monopolies, and Unfair Trade Practices 14 > TRANSACTION PLATFORMS -- BOTH SIDES > Headnote:
LEdHN11.[] 11.

For purposes of *15 U.S.C.S. § 1*, evaluating both sides of a two-sided transaction platform is necessary to accurately assess competition. Only other two-sided platforms can compete with a two-sided platform for transactions. (Thomas, J., joined by Roberts, Ch. J., and Kennedy, Alito, and Gorsuch, JJ.)

Restraints of Trade, Monopolies, and Unfair Trade Practices 19 > MARKET -- TWO-SIDED TRANSACTIONS > Headnote:
LEdHN12.[] 12.

For purposes of *15 U.S.C.S. § 1*, in two-sided transaction markets, only one market should be defined. Any other analysis would lead to mistaken inferences of the kind that could chill the very conduct the antitrust laws are designed to protect. A court must be concerned lest a rule or precedent that authorizes a search for a particular type of undesirable pricing behavior end up by discouraging legitimate price competition. Courts should avoid increasing the total cost of the antitrust system by prohibiting pro-competitive conduct the antitrust laws should encourage. (Thomas, J., joined by Roberts, Ch. J., and Kennedy, Alito, and Gorsuch, JJ.)

Evidence 343.5Restraints of Trade, Monopolies, and Unfair Trade Practices 19 > CREDIT CARD MARKET -- PROOF REQUIRED > Headnote:
LEdHN13.[] 13.

For purposes of *15 U.S.C.S. § 1*, the credit card market must be defined to include both merchants and cardholders. Focusing on merchant fees alone misses the mark because the product that credit card companies sell is transactions, not services to merchants, and the competitive effects of a restraint on transactions cannot be judged by looking at merchants alone. Evidence of a price increase on one side of a two-sided transaction platform cannot by itself demonstrate an anticompetitive exercise of market power. To demonstrate anticompetitive effects on the two-sided credit card market as a whole, plaintiffs must prove that a credit card company's action increased the cost of credit card transactions above a competitive level, reduced the number of credit card transactions, or otherwise stifled competition in the credit card market. (Thomas, J., joined by Roberts, Ch. J., and Kennedy, Alito, and Gorsuch, JJ.)

Evidence 343.5 > MARKET POWER -- INFERENCES > Headnote:
LEdHN14.[] 14.

For purposes of *15 U.S.C.S. § 1*, market power is the ability to raise price profitably by restricting output. Competitive injury from price and output data will not be inferred absent some evidence that tends to prove that output was restricted or prices were above a competitive level. Where output is expanding at the same time prices are increasing, rising prices are equally consistent with growing product demand. (Thomas, J., joined by Roberts, Ch. J., and Kennedy, Alito, and Gorsuch, JJ.)

Restraints of Trade, Monopolies, and Unfair Trade Practices 14 > RESTRAINTS -- COMPETITION > Headnote:
LEdHN15.[] 15.

For purposes of *15 U.S.C.S. § 1*, vertical restraints can prevent retailers from free riding and thus increase the availability of tangible or intangible services or promotional efforts that enhance competition and consumer welfare. (Thomas, J., joined by Roberts, Ch. J., and Kennedy, Alito, and Gorsuch, JJ.)

Restraints of Trade, Monopolies, and Unfair Trade Practices 6 > ***ANTITRUST LAW*** -- PURPOSE > Headnote:
LEdHN16.[] 16.

It is the promotion of interbrand competition that is the primary purpose of the antitrust laws. (Thomas, J., joined by Roberts, Ch. J., and Kennedy, Alito, and Gorsuch, JJ.)

Syllabus

[*2276] Respondent credit-card companies American Express Company and American Express Travel Related Services Company (collectively, Amex) operate what economists call a "two-sided platform," **[*2277]** providing services to two **[**683]** different groups (cardholders and merchants) who depend on the platform to intermediate between them. Because the interaction between the two groups is a transaction, credit-card networks are a special type of two-sided platform known as a "transaction" platform. The key feature of transaction platforms is that they cannot make a sale to one side of the platform without simultaneously making a sale to the other. Unlike traditional markets, two-sided platforms exhibit "indirect network effects," which exist where the value of the platform to one group depends on how many members of another group participate. Two-sided platforms must take these effects into account before making a change in price on either side, or they risk creating a feedback loop of declining demand. Thus, striking the optimal balance of the prices charged on each side of the platform is essential for two-sided platforms **[***2]** to maximize the value of their services and to compete with their rivals.

Visa and MasterCard--two of the major players in the credit-card market--have significant structural advantages over Amex. Amex competes with them by using a different business model, which focuses on cardholder spending rather than cardholder lending. To encourage cardholder spending, Amex provides better rewards than the other credit-card companies. Amex must continually invest in its cardholder rewards program to maintain its cardholders' loyalty. But to fund those investments, it must charge merchants higher fees than its rivals. Although this business model has stimulated competitive innovations in the credit-card market, it sometimes causes friction with merchants. To avoid higher fees, merchants sometimes attempt to dissuade cardholders from using Amex cards at the point of sale--a practice known as "steering." Amex places antisteering provisions in its contracts with merchants to combat this.

In this case, the United States and several States (collectively, plaintiffs) sued Amex, claiming that its antisteering provisions violate *§1 of the Sherman Antitrust Act*. The District Court agreed, finding that the credit-card **[***3]** market should be treated as two separate markets--one for merchants and one for cardholders--and that Amex's antisteering provisions are anticompetitive because they result in higher merchant fees. The Second Circuit reversed. It determined that the credit-card market is one market, not two. And it concluded that Amex's antisteering provisions did not violate *§1*.

Held:

Amex's antisteering provisions do not violate federal ***antitrust law***. *Pp. ___ - ___, 201 L. Ed. 2d, at 689-697*.

(a) *Section 1 of the Sherman Act* prohibits "unreasonable restraints" of trade. *State Oil Co. v. Khan, 522 U. S. 3, 10, 118 S. Ct. 275, 139 L. Ed. 2d 199*. Restraints may be unreasonable in one of two ways--unreasonable *per se* or unreasonable as judged under the "rule of reason." *Business Electronics Corp. v. Sharp Electronics Corp., 485 U. S. 717, 723, 108 S. Ct. 1515, 99 L. Ed. 2d 808*. The parties agree that Amex's antisteering provisions should be judged under the rule of reason using a three-step burden-shifting framework. They ask this Court to decide whether the plaintiffs have satisfied the first step in that framework--*i.e.*, whether they have **[**684]** proved that Amex's antisteering provisions have a substantial anticompetitive effect that harms consumers in the relevant market. *Pp. ___ - ___, 201 L. Ed. 2d, at 689-691*.

(b) Applying the rule of reason generally requires an accurate definition of the relevant market. In this case, both sides of the two-sided credit-card **[***4]** market--cardholders and merchants--must be considered. Only a company with both cardholders **[*2278]** and merchants willing to use its network could sell transactions and compete in the credit-card market. And because credit-card networks cannot make a sale unless both sides of the platform simultaneously agree to use their services, they exhibit more pronounced indirect network effects and interconnected pricing and demand. Indeed, credit-card networks are best understood as supplying only one product--the transaction--that is jointly consumed by a cardholder and a merchant. Accordingly, the two-sided market for credit-card transactions should be analyzed as a whole. *Pp. ___ - ___, 201 L. Ed. 2d, at 691-693*.

(c) The plaintiffs have not carried their burden to show anticompetitive effects. Their argument--that Amex's antisteering provisions increase merchant fees--wrongly focuses on just one side of the market. Evidence of a price increase on one side of a two-sided transaction platform cannot, by itself, demonstrate an anticompetitive exercise of market power. Instead, plaintiffs must prove that Amex's antisteering provisions increased the cost of credit-card transactions above a competitive level, reduced the number of credit-card **[***5]** transactions, or otherwise stifled competition in the two-sided credit-card market. They failed to do so. *Pp. ___ - ___, 201 L. Ed. 2d, at 693-697*.

(1) The plaintiffs offered no evidence that the price of credit-card transactions was higher than the price one would expect to find in a competitive market. Amex's increased merchant fees reflect increases in the value of its services and the cost of its transactions, not an ability to charge above a competitive price. It uses higher merchant fees to offer its cardholders a more robust rewards program, which is necessary to maintain cardholder loyalty and encourage the level of spending that makes it valuable to merchants. In addition, the evidence that does exist cuts against the plaintiffs' view that Amex's antisteering provisions are the cause of any increases in merchant fees: Visa and MasterCard's merchant fees have continued to increase, even at merchant locations where Amex is not accepted. *Pp. ___ - ___, 201 L. Ed. 2d, at 694*.

(2) The plaintiffs' evidence that Amex's merchant-fee increases between 2005 and 2010 were not entirely spent on cardholder rewards does not prove that Amex's antisteering provisions gave it the power to charge anticompetitive prices. This Court will "not infer competitive **[***6]** injury from price and output data absent some evidence that tends to prove that output was restricted or prices were above a competitive level." *Brooke Group Ltd. v. Brown & Williamson Tobacco Corp., 509 U. S. 209, 237, 113 S. Ct. 2578, 125 L. Ed. 2d 168*. There is no such evidence here. Output of credit-card transactions increased during the relevant period, and the plaintiffs did not show **[**685]** that Amex charged more than its competitors. *P. ___, 201 L. Ed. 2d, at 695*.

(3) The plaintiffs also failed to prove that Amex's antisteering provisions have stifled competition among credit-card companies. To the contrary, while they have been in place, the market experienced expanding output and improved quality. Nor have Amex's antisteering provisions ended competition between credit-card networks with respect to merchant fees. Amex's competitors have exploited its higher merchant fees to their advantage. Lastly, there is nothing inherently anticompetitive about the provisions. They actually stem negative externalities in the credit-card market and promote interbrand competition. And they do not prevent competing credit-card networks from offering lower merchant fees or promoting their broader merchant acceptance. *Pp. ___ - ___, 201 L. Ed. 2d, at 695-696*.

838 F. 3d 179, affirmed.

Counsel: Eric E. Murphy argued the cause for petitioners and state respondents.

Malcolm L. Stewart argued the cause for respondent United States in support of petitioners.

Evan R. Chesler argued the cause for respondents.

Judges: Thomas, J., delivered the opinion of the Court, in which Roberts, C. J., and Kennedy, Alito, **[***7]** and Gorsuch, JJ., joined. Breyer, J., filed a dissenting opinion, in which Ginsburg, Sotomayor, and Kagan, JJ., joined.

Opinion by: THOMAS

Opinion

[*2279] Justice **Thomas** delivered the opinion of the Court.

American Express Company and American Express Travel Related Services Company (collectively, Amex) provide credit-card **[*2280]** services to both merchants and cardholders. When a cardholder buys something from a merchant who accepts Amex credit cards, Amex processes the transaction through its network, promptly pays the merchant, and subtracts a fee. If a merchant wants to accept Amex credit cards—and attract Amex cardholders to its business—Amex requires the merchant to agree to an antisteering contractual provision. The antisteering provision prohibits merchants from discouraging customers from using their Amex card after they have already entered the store and are about to buy something, thereby avoiding Amex's fee. In this case, we must decide whether Amex's antisteering provisions violate federal ***antitrust law***. We conclude they do not.

I

A

Credit cards have become a primary way that consumers in the United States purchase goods and services. When a cardholder uses a credit card to buy something from a merchant, the **[***8]** transaction is facilitated by a credit-card network. The network provides separate but interrelated services to both cardholders and merchants. For cardholders, the network extends them credit, which allows them to make purchases without cash and to defer payment until later. Cardholders also can receive rewards based on the amount of money they spend, such as airline miles, points for travel, or cash back. For merchants, the network allows them to avoid the cost of processing transactions and offers them quick, guaranteed payment. This saves merchants the trouble and risk of extending credit to customers, and it increases the number and value of sales that they can make.

[686]** By providing these services to cardholders and merchants, credit-card companies bring these parties together, and therefore operate what economists call a "two-sided platform." As the name implies, a two-sided platform offers different products or services to two different groups who both depend on the platform to intermediate between them. See Evans & Schmalensee, Markets With Two-Sided Platforms, 1 Issues in Competition L. & Pol'y 667 (2008) (Evans & Schmalensee); Evans & Noel, Defining Antitrust Markets When Firms **[***9]** Operate Two-Sided Platforms, *2005 Colum. Bus. L. Rev. 667, 668* (Evans & Noel); Filistrucchi, Geradin, Van Damme, & Affeldt, Market Definition in Two-Sided Markets: Theory and Practice, 10 J. Competition L. & Econ. 293, 296 (2014) (Filistrucchi). For credit cards, that interaction is a transaction. Thus, credit-card networks are a special type of two-sided platform known as a "transaction" platform. See *id*., at 301, 304, 307; Evans & Noel 676-678. The key feature of transaction platforms is that they cannot make a sale to one side of the platform without simultaneously making a sale to the other. See Klein, Lerner, Murphy, & Plache, Competition in Two-Sided Markets: The Antitrust Economics of Payment Card Interchange Fees, 73 Antitrust L. J. 571, 580, 583 (2006) (Klein). For example, no credit-card transaction can occur unless both the merchant and the cardholder simultaneously agree to use the same credit-card network. See Filistrucchi 301.

Two-sided platforms differ from traditional markets in important ways. Most relevant here, two-sided platforms often exhibit what economists call "indirect network effects." Evans & Schmalensee 667. Indirect network effects exist where the value of the two-sided platform to one group of participants depends on how many members of a different **[***10]** group participate. D. Evans & R. Schmalensee, Matchmakers: The New Economics of **[*2281]** Multisided Platforms 25 (2016). In other words, the value of the services that a two-sided platform provides increases as the number of participants on both sides of the platform increases. A credit card, for example, is more valuable to cardholders when more merchants accept it, and is more valuable to merchants when more cardholders use it. See Evans & Noel 686-687; Klein 580, 584. To ensure sufficient participation, two-sided platforms must be sensitive to the prices that they charge each side. See Evans & Schmalensee 675; Evans & Noel 680; Muris, Payment Card Regulation and the (Mis)Application of the Economics of Two-Sided Markets, *2005 Colum. Bus. L. Rev. 515, 532-533* (Muris); Rochet & Tirole, Platform Competition in Two-Sided Markets, 1 J. Eur. Econ. Assn. 990, 1013 (2003). Raising the price on side A risks losing participation on that side, which decreases the value of the platform to side B. If participants on side B leave due to this loss in value, then the platform has even less value to side A—risking a feedback loop of declining demand. See Evans & Schmalensee 675; Evans & Noel 680-681. Two-sided platforms therefore must take **[***11]** these indirect network effects into account before making a **[**687]** change in price on either side. See Evans & Schmalensee 675; Evans & Noel 680-681. [1]

Sometimes indirect network effects require two-sided platforms to charge one side much more than the other. See Evans & Schmalensee 667, 675, 681, 690-691; Evans & Noel 668, 691; Klein 585; Filistrucchi 300. For two-sided platforms, "'the [relative] price structure matters, and platforms must design it so as to bring both sides on board.'" Evans & Schmalensee 669 (quoting Rochet & Tirole, Two-Sided Markets: A Progress Report, 37 RAND J. Econ. 645, 646 (2006)). The optimal price might require charging the side with more elastic demand a below-cost (or even negative) price. See Muris 519, 550; Klein 579; Evans & Schmalensee 675; Evans & Noel 681. With credit cards, for example, networks often charge cardholders a lower fee than merchants because cardholders are more price sensitive. [2] See Muris 522; Klein 573-574, 585, 595. In fact, the network might well *lose* money on the cardholder side by offering rewards such as cash back, airline miles, or gift cards. See Klein 587; Evans & Schmalensee 672. The network can do this because increasing the number **[***12]** of cardholders increases the value of accepting the card to merchants and, thus, increases the number of merchants who accept it. Muris 522; Evans & Schmalensee 692. Networks can then charge those merchants a fee for every transaction (typically a percentage of the purchase price). Striking the optimal balance of the prices charged on each side of the platform is essential for two-sided platforms to maximize the value of their services and to compete with their rivals.

[*2282] B

Amex, Visa, MasterCard, and Discover are the four dominant participants in the credit-card market. Visa, which is by far the largest, has 45% of the market as measured by transaction volume. [3] Amex and MasterCard trail with 26.4% and 23.3%, respectively, while Discover has just 5.3% of the market.

Visa and MasterCard have significant structural advantages over Amex. Visa and MasterCard began as bank cooperatives and thus almost every bank that offers credit cards is in the Visa or MasterCard network. This makes it very likely that the average consumer carries, and the average merchant accepts, Visa or MasterCard. As a result, the vast majority of Amex cardholders have a Visa or MasterCard, but only a small number of Visa **[***13]** and Master-Card cardholders have an Amex. Indeed, Visa and MasterCard account for **[**688]** more than 432 million cards in circulation in the United States, while Amex has only 53 million. And while 3.4 million merchants at 6.4 million locations accept Amex, nearly three million more locations accept Visa, MasterCard, and Discover. [4]

Amex competes with Visa and MasterCard by using a different business model. While Visa and MasterCard earn half of their revenue by collecting interest from their cardholders, Amex does not. Amex instead earns most of its revenue from merchant fees. Amex's business model thus focuses on cardholder spending rather than cardholder lending. To encourage cardholder spending, Amex provides better rewards than other networks. Due to its superior

---

[1] In a competitive market, indirect network effects also encourage companies to take increased profits from a price increase on side A and spend them on side B to ensure more robust participation on that side and to stem the impact of indirect network effects. See Evans & Schmalensee 688; Evans & Noel 670-671, 695. Indirect network effects thus limit the platform's ability to raise overall prices and impose a check on its market power. See Evans & Schmalensee 688; Evans & Noel 695.

[2] "Cardholders are more price-sensitive because many consumers have multiple payment methods, including alternative payment cards. Most merchants, by contrast, cannot accept just one major card because they are likely to lose profitable incremental sales if they do not take [all] the major payment cards. Because most consumers do not carry all of the major payment cards, refusing to accept a major card may cost the merchant substantial sales." Muris 522.

[3] All figures are accurate as of 2013.

[4] Discover entered the credit-card market several years after Amex, Visa, and MasterCard. It nonetheless managed to gain a foothold because Sears marketed Discover to its already significant base of private-label cardholders. Discover's business model shares certain features with Amex, Visa, and MasterCard. Like Amex, Discover interacts directly with its cardholders. But like Visa and MasterCard, Discover uses banks that cooperate with its network to interact with merchants.

rewards, Amex tends to attract cardholders who are wealthier and spend more money. Merchants place a higher value on these cardholders, and Amex uses this advantage to recruit merchants.

Amex's business model has significantly influenced the credit-card market. To compete for the valuable cardholders that Amex attracts, both Visa and MasterCard have introduced premium cards that, like Amex, charge merchants higher fees and offer **[***14]** cardholders better rewards. To maintain their lower merchant fees, Visa and MasterCard have created a sliding scale for their various cards—charging merchants less for low-reward cards and more for high-reward cards. This differs from Amex's strategy, which is to charge merchants the same fee no matter the rewards that its card offers. Another way that Amex has influenced the credit-card market is by making banking and card-payment services available to low-income individuals, who otherwise could not qualify for a credit card and could not afford the fees that traditional banks charge. See 2 Record 3835-3837, 4527-4529. In sum, Amex's business model has stimulated competitive innovations in the credit-card market, increasing the volume of transactions and improving the quality of the services.

Despite these improvements, Amex's business model sometimes causes friction with merchants. To maintain the loyalty of its cardholders, Amex must continually invest in its rewards program. But, to fund those investments, Amex must charge merchants higher fees than its rivals. **[*2283]** Even though Amex's investments benefit merchants by encouraging cardholders to spend more money, merchants would prefer not to pay the higher fees. **[***15]** One way that merchants try to avoid them, while still enticing Amex's cardholders to shop at their stores, is by dissuading cardholders from using Amex at the point of sale. This practice is known as "steering."

Amex has prohibited steering since the 1950s by placing antisteering provisions in its contracts with merchants. These antisteering provisions prohibit merchants from implying a preference for non-Amex cards; dissuading customers from using Amex cards; persuading customers to use other cards; imposing any special restrictions, conditions, disadvantages, **[**689]** or fees on Amex cards; or promoting other cards more than Amex. The antisteering provisions do not, however, prevent merchants from steering customers toward debit cards, checks, or cash.

C

In October 2010, the United States and several States (collectively, plaintiffs) sued Amex, claiming that its antisteering provisions violate *§1 of the Sherman Act, 26 Stat. 209*, as amended, *15 U. S. C. §1*. [5] After a 7-week trial, the District Court agreed that Amex's antisteering provisions violate *§1*. *United States v. American Express Co., 88 F. Supp. 3d 143, 151-152 (EDNY 2015)*. It found that the credit-card market should be treated as two separate markets—one for merchants and one for cardholders. See *id., at 171-175*. Evaluating the effects on the merchant side **[***16]** of the market, the District Court found that Amex's antisteering provisions are anticompetitive because they result in higher merchant fees. See *id., at 195-224*.

The Court of Appeals for the Second Circuit reversed. *United States v. American Express Co., 838 F. 3d 179, 184 (2016)*. It concluded that the credit-card market is one market, not two. *Id., at 196-200*. Evaluating the credit-card market as a whole, the Second Circuit concluded that Amex's antisteering provisions were not anticompetitive and did not violate *§1*. See *id., at 200-206*.

We granted certiorari, *583 U. S. ___, 138 S. Ct. 355, 199 L. Ed. 2d 261 (2017)*, and now affirm.

II

HN1[] ***LEdHN[1]***[] [1] *Section 1 of the Sherman Act* prohibits "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States." *15 U. S. C. §1*. This Court has long recognized that, "[i]n view of the common law and the law in this country" when the *Sherman Act* was passed, the phrase "restraint of trade" is best read to mean "undue restraint." *Standard Oil Co. of N. J. v. United*

---

[5] Plaintiffs also sued Visa and MasterCard, claiming that their anti-steering provisions violated *§1*. But Visa and MasterCard voluntarily revoked their antisteering provisions and are no longer parties to this case.

States, 221 U. S. 1, 59-60, 31 S. Ct. 502, 55 L. Ed. 619 (1911). This Court's precedents have thus understood §1 "to outlaw only *unreasonable* restraints." State Oil Co. v. Khan, 522 U. S. 3, 10, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997) (emphasis added).

HN2[] **LEdHN[2]**[] [2] Restraints can be unreasonable in one of two ways. A small group of restraints are unreasonable *per se* because they "' "always or almost always tend to restrict competition and decrease output." '" Business Electronics Corp. v. Sharp Electronics Corp., 485 U. S. 717, 723, 108 S. Ct. 1515, 99 L. Ed. 2d 808 (1988). Typically only "horizontal" restraints—restraints **[***17]** "imposed by agreement between **[*2284]** competitors"—qualify as unreasonable *per se*. Id., at 730, 108 S. Ct. 1515, 99 L. Ed. 2d 808. Restraints that are not unreasonable *per se* are judged under the "rule of reason." Id., at 723, 108 S. Ct. 1515, 99 L. Ed. 2d 808. The rule of reason requires courts to conduct a fact-specific assessment of "market power and market structure . . . to assess the [restraint]'s actual effect" on competition. Copperweld Corp. v. Independence **[**690]** Tube Corp., 467 U. S. 752, 768, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984). The goal is to "distinguis[h] between restraints with anticompetitive effect that are harmful to the consumer and restraints stimulating competition that are in the consumer's best interest." Leegin Creative Leather Products, Inc. v. PSKS, Inc., 551 U. S. 877, 886, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007).

In this case, both sides correctly acknowledge that Amex's antisteering provisions are **HN3**[] **LEdHN[3]**[] [3] vertical restraints—*i.e.,* restraints "imposed by agreement between firms at different levels of distribution." Business Electronics, supra, at 730, 108 S. Ct. 1515, 99 L. Ed. 2d 808. The parties also correctly acknowledge that, like nearly every other vertical restraint, the antisteering provisions should be assessed under the rule of reason. See Leegin, supra, at 882, 127 S. Ct. 2705, 168 L. Ed. 2d 623; State Oil, supra, at 19, 118 S. Ct. 275, 139 L. Ed. 2d 199; Business Electronics, supra, at 726, 108 S. Ct. 1515, 99 L. Ed. 2d 808; Continental T. V., Inc. v. GTE Sylvania Inc., 433 U. S. 36, 57, 97 S. Ct. 2549, 53 L. Ed. 2d 568 (1977).

HN4[] **LEdHN[4]**[] [4] To determine whether a restraint violates the rule of reason, the parties agree that a three-step, burden-shifting framework applies. Under this framework, the plaintiff has the initial burden to prove that the challenged restraint has a substantial anticompetitive effect that harms consumers **[***18]** in the relevant market. See 1 J. Kalinowski, Antitrust Laws and Trade Regulation §12.02[1] (2d ed. 2017) (Kalinowski); P. Areeda & H. Hovenkamp, Fundamentals of ***Antitrust Law*** §15.02[B] (4th ed. 2017) (Areeda & Hovenkamp); Capital Imaging Assocs., P.C. v. Mohawk Valley Medical Assocs., 996 F.2d 537, 543 (CA2 1993). If the plaintiff carries its burden, then the burden shifts to the defendant to show a procompetitive rationale for the restraint. See 1 Kalinowski §12.02[1]; Areeda & Hovenkamp §15.02[B]; Capital Imaging Assocs., supra, at 543. If the defendant makes this showing, then the burden shifts back to the plaintiff to demonstrate that the procompetitive efficiencies could be reasonably achieved through less anticompetitive means. See 1 Kalinowski §12.02[1]; Capital Imaging Assocs., supra, at 543.

Here, the parties ask us to decide whether the **HN5**[] **LEdHN[5]**[] [5] plaintiffs have carried their initial burden of proving that Amex's antisteering provisions have an anticompetitive effect. The plaintiffs can make this showing directly or indirectly. Direct evidence of anticompetitive effects would be "'proof of actual detrimental effects [on competition],'" FTC v. Indiana Federation of Dentists, 476 U. S. 447, 460, 106 S. Ct. 2009, 90 L. Ed. 2d 445 (1986), such as reduced output, increased prices, or decreased quality in the relevant market, see 1 Kalinowski §12.02[2]; Craftsmen Limousine, Inc. v. Ford Motor Co., 491 F.3d 380, 390 (CA8 2007); Virginia Atlantic Airways Ltd. v. British Airways PLC, 257 F. 3d 256, 264 (CA2 2001). Indirect evidence would be proof of market power plus some evidence that the challenged restraint harms competition. See 1 Kalinowski §12.02[2]; Tops Mkts., Inc. v. Quality Mkts., Inc., 142 F.3d 90, 97 (CA2 1998); Spanish Broadcasting System of Fla. v. Clear Channel Communications, Inc., 376 F. 3d 1065, 1073 (CA11 2004).

Here, the plaintiffs rely exclusively on direct evidence to prove that Amex's **[**691]** antisteering **[***19]** provisions have caused anticompetitive **[*2285]** effects in the credit-card market. [6] To assess this evidence, we must first

[6] Although the plaintiffs relied on indirect evidence below, they have abandoned that argument in this Court. See Brief for United States 23, n. 4 (citing Pet. for Cert. i, 18-25).

define the relevant market. Once defined, it becomes clear that the plaintiffs' evidence is insufficient to carry their burden.

A

HN6[] LEdHN[6][] [6] Because "[l]egal presumptions that rest on formalistic distinctions rather than actual market realities are generally disfavored in **antitrust law**," Eastman Kodak Co. v. Image Technical Services, Inc., 504 U. S. 451, 466-467, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992), courts usually cannot properly apply the rule of reason without an accurate definition of the relevant market. [7] "Without a definition of [the] market there is no way to measure [the defendant's] ability to lessen or destroy competition." Walker Process Equipment, Inc. v. Food Machinery & Chemical Corp., 382 U. S. 172, 177, 86 S. Ct. 347, 15 L. Ed. 2d 247 (1965); accord, 2 Kalinowski §24.01[4][a]. Thus, the relevant market is defined as "the area of effective competition." *Ibid.* Typically this is the "arena within which significant substitution in consumption or production occurs." Areeda & Hovenkamp §5.02; accord, 2 Kalinowski §24.02[1]; United States v. Grinnell Corp., 384 U. S. 563, 571, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966). But courts should "combin[e]" different products or services into "a single market" when "that combination reflects commercial realities." Id., at 572, 86 S. Ct. 1698, 16 L. Ed. 2d 778; see also Brown Shoe Co. v. United States, 370 U. S. 294, 336-337, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962) (pointing out that "the definition of the relevant market" must "'correspond to the commercial realities' of the industry").

As explained, credit-card networks **[**692]** are two-sided **[***20]** platforms. HN8[] LEdHN[8][] [8] Due to indirect network effects, two-sided platforms cannot raise prices on one side without risking a feedback loop of declining demand. See Evans & Schmalensee 674-675; Evans & Noel 680-681. And the fact that two-sided platforms charge one side a **[*2286]** price that is below or above cost reflects differences in the two sides' demand elasticity, not market power or anticompetitive pricing. See Klein 574, 595, 598, 626. Price increases on one side of the platform likewise do not suggest anticompetitive effects without some evidence that they have increased the overall cost of the platform's services. See *id.,* at 575, 594, 626. Thus, courts must include both sides of the platform—merchants and cardholders—when defining the credit-card market.

To be sure, it is not always necessary to consider both sides of a two-sided platform. A market should be treated as one sided when the impacts of indirect network effects and relative pricing in that market are minor. See Filistrucchi 321-322. Newspapers that sell advertisements, for example, arguably operate a two-sided platform because the value of an advertisement increases as more people read the newspaper. *Id*., at 297, 315; Klein 579. But in the newspaper-advertisement market, **[***21]** the indirect networks effects operate in only one direction; newspaper readers are largely indifferent to the amount of advertising that a newspaper contains. See Filistrucchi 321, 323, and n. 99; Klein 583. Because of these weak indirect network effects, the market for newspaper advertising

[7] The plaintiffs argue that we need not define the relevant market in this case because they have offered actual evidence of adverse effects on competition—namely, increased merchant fees. See Brief for United States 40-41 (citing FTC v. Indiana Federation of Dentists, 476 U. S. 447, 106 S. Ct. 2009, 90 L. Ed. 2d 445 (1986), and Catalano, Inc. v. Target Sales, Inc., 446 U. S. 643, 100 S. Ct. 1925, 64 L. Ed. 2d 580 (1980) (*per curiam*)). We disagree. The cases that the plaintiffs cite for this proposition evaluated whether horizontal restraints had an adverse effect on competition. See Indiana Federation of Dentists, supra, at 450-451, 459, 106 S. Ct. 2009, 90 L. Ed. 2d 445 (agreement between competing dentists not to share X rays with insurance companies); Catalano, supra, at 644-645, 650, 100 S. Ct. 1925, 64 L. Ed. 2d 580 (agreement among competing wholesalers not to compete on extending credit to retailers). Given that horizontal restraints involve agreements between competitors not to compete in some way, this Court concluded that it did not need to precisely define the relevant market to conclude that these agreements were anticompetitive. See Indiana Federation of Dentists, supra, at 460-461, 106 S. Ct. 2009, 90 L. Ed. 2d 445; Catalano, supra, at 648-649, 100 S. Ct. 1925, 64 L. Ed. 2d 580. But vertical restraints are different. See Arizona v. Maricopa County Medical Soc., 457 U. S. 332, 348, n. 18, 102 S. Ct. 2466, 73 L. Ed. 2d 48 (1982); Leegin Creative Leather Products, Inc. v. PSKS, Inc., 551 U. S. 877, 888, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007). HN7[] LEdHN[7][] [7] Vertical restraints often pose no risk to competition unless the entity imposing them has market power, which cannot be evaluated unless the Court first defines the relevant market. See id., at 898, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (noting that a vertical restraint "may not be a serious concern unless the relevant entity has market power"); Easterbrook, Vertical Arrangements and the Rule of Reason, 53 Antitrust L. J. 135, 160 (1984) ("[T]he possibly anticompetitive manifestations of vertical arrangements can occur only if there is market power").

behaves much like a one-sided market and should be analyzed as such. See Filistrucchi 321; *Times-Picayune Publishing Co. v. United States, 345 U. S. 594, 610, 73 S. Ct. 872, 97 L. Ed. 1277 (1953)*.

But two-sided transaction platforms, like the credit-card market, are different. These platforms facilitate a single, simultaneous transaction between participants. For credit cards, the network can sell its services only if a merchant and cardholder both simultaneously choose to use the network. Thus, whenever a credit-card network sells one transaction's worth of card-acceptance services to a merchant it also must sell one transaction's worth of card-payment services to a cardholder. It cannot sell transaction services to either cardholders or merchants individually. See Klein 583 ("Because cardholders and merchants jointly consume a single product, payment card transactions, their consumption of payment card transactions must be directly proportional"). To optimize sales, the network must find the balance **[***22]** of pricing that encourages the greatest number of matches between cardholders and merchants.

HN9[] ***LEdHN[9]***[] [9] Because they cannot make a sale unless both sides of the platform simultaneously agree to use their services, two-sided transaction platforms exhibit more pronounced indirect network effects and interconnected pricing and demand. Transaction platforms are thus better understood as "suppl[ying] only one product"—transactions. Klein 580. In the credit-card market, these transactions "are jointly consumed by a cardholder, who uses the payment card to make a transaction, and a merchant, who accepts the payment card as a method of payment." *Ibid.* Tellingly, credit cards **[**693]** determine their market share by measuring the volume of transactions they have sold. [8]

[*2287] ***HN11***[] ***LEdHN[11]***[] [11] Evaluating both sides of a two-sided transaction platform is also necessary to accurately assess competition. Only other two-sided platforms can compete with a two-sided platform for transactions. See Filistrucchi 301. A credit-card company that processed transactions for merchants, but that had no cardholders willing to use its card, could not compete with Amex. See *ibid.* Only a company that had both cardholders and merchants willing to **[***23]** use its network could sell transactions and compete in the credit-card market. Similarly, if a merchant accepts the four major credit cards, but a cardholder only uses Visa or Amex, only those two cards can compete for the particular transaction. Thus, competition cannot be accurately assessed by looking at only one side of the platform in isolation. [9]

For all these reasons, ***HN12***[] ***LEdHN[12]***[] [12] "[i]n two-sided transaction markets, only one market should be defined." *Id.*, at 302; see also Evans & Noel 671 ("[F]ocusing on one dimension of . . . competition tends to distort the competition that actually exists among [two-sided platforms]"). Any other analysis would lead to "' "mistaken inferences" '" of the kind that could "' "chill the very conduct the antitrust laws are designed to protect." '" *Brooke Group Ltd. v. Brown & Williamson Tobacco Corp., 509 U. S. 209, 226, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993)*; see also *Matsushita Elec. Industrial Co. v. Zenith Radio Corp., 475 U. S. 574, 594, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)* ("'[W]e must be concerned lest a rule or precedent that authorizes a search for a particular type of undesirable pricing behavior end up by discouraging legitimate price competition'"); *Leegin, 551 U. S., at 895, 127 S. Ct. 2705, 168 L. Ed. 2d 623* (noting that courts should avoid "increas[ing] the total cost of the antitrust system by prohibiting procompetitive conduct the antitrust laws should encourage"). Accordingly, we will analyze the two-sided market for credit-card **[***24]** transactions as a whole to determine whether the plaintiffs have shown that Amex's antisteering provisions have anticompetitive effects.

---

[8] Contrary to the dissent's assertion, *post, at ___ - ___, 201 L. Ed. 2d, at 703*, merchant services and cardholder services are not complements. See Filistrucchi 297 ("[A] two-sided market [is] different from markets for complementary products, in which both products are bought by the same buyers, who, in their buying decisions, can therefore be expected to take into account both prices"). As already explained,***HN10***[] ***LEdHN[10]***[] [10] credit-card companies are best understood as supplying only one product—transactions—which is jointly consumed by a cardholder and a merchant. See Klein 580. Merchant services and cardholder services are both inputs to this single product. See *ibid.*

[9] Nontransaction platforms, by contrast, often do compete with companies that do not operate on both sides of their platform. A newspaper that sells advertising, for example, might have to compete with a television network, even though the two do not meaningfully compete for viewers. See Filistrucchi 301.

B

The plaintiffs have not carried their burden to prove anticompetitive effects in the relevant market. The plaintiffs stake their entire case on proving that Amex's agreements increase merchant fees. We find this argument unpersuasive.

As an initial matter, the plaintiffs' argument about merchant fees wrongly **[**694]** focuses on only one side of the two-sided credit-card market. As explained, ***HN13***[] ***LEdHN[13]***[] [13] the credit-card market must be defined to include both merchants and cardholders. Focusing on merchant fees alone misses the mark because the product that credit-card companies sell is transactions, not services to merchants, and the competitive effects of a restraint on transactions cannot be judged by looking at merchants alone. Evidence of a price increase on one side of a two-sided transaction platform cannot by itself demonstrate an anticompetitive exercise of market power. To demonstrate anticompetitive effects on the two-sided credit-card market as a whole, the plaintiffs must prove that Amex's antisteering provisions increased the cost of credit-card transactions **[***25]** above a competitive level, reduced the number of credit-card transactions, or otherwise stifled competition in the credit-card market. See 1 Kalinowski §12.02[2]; **[*2288]** *Craftsman Limousine, Inc., 491 F. 3d, at 390*; *Virginia Atlantic Airways Ltd., 257 F. 3d, at 264*. They failed to do so.

1

The plaintiffs did not offer any evidence that the price of credit-card transactions was higher than the price one would expect to find in a competitive market. As the District Court found, the plaintiffs failed to offer any reliable measure of Amex's transaction price or profit margins. *88 F. Supp. 3d, at 198, 215*. And the evidence about whether Amex charges more than its competitors was ultimately inconclusive. *Id., at 199, 202, 215*.

Amex's increased merchant fees reflect increases in the value of its services and the cost of its transactions, not an ability to charge above a competitive price. Amex began raising its merchant fees in 2005 after Visa and MasterCard raised their fees in the early 2000s. *Id., at 195, 199-200*. As explained, Amex has historically charged higher merchant fees than these competitors because it delivers wealthier cardholders who spend more money. *Id., at 200-201*. Amex's higher merchant fees are based on a careful study of how much additional value its cardholders offer merchants. See *id., at 192-193*. On the other side of the market, Amex uses its higher merchant fees to offer its cardholders **[***26]** a more robust rewards program, which is necessary to maintain cardholder loyalty and encourage the level of spending that makes Amex valuable to merchants. *Id., at 160, 191-195*. That Amex allocates prices between merchants and cardholders differently from Visa and MasterCard is simply not evidence that it wields market power to achieve anticompetitive ends. See Evans & Noel 670-671; Klein 574-575, 594-595, 598, 626.

In addition, the evidence that does exist cuts against the plaintiffs' view that Amex's antisteering provisions are the cause of any increases in merchant fees. Visa and MasterCard's merchant fees have continued to increase, even at merchant locations where Amex is not accepted and, thus, Amex's antisteering provisions do not apply. See *88 F. Supp. 3d, at 222*. This suggests that the cause of increased merchant fees is not Amex's antisteering provisions, but rather increased competition for cardholders and a corresponding marketwide adjustment in the relative price charged to merchants. See Klein 575, 609.

2

The plaintiffs did offer evidence **[**695]** that Amex increased the percentage of the purchase price that it charges merchants by an average of 0.09% between 2005 and 2010 and that this increase was not entirely spent on **[***27]** cardholder rewards. See *88 F. Supp. 3d, at 195-197, 215*. The plaintiffs believe that this evidence shows that the price of Amex's transactions increased.

Even assuming the plaintiffs are correct, this evidence does not prove that Amex's antisteering provisions gave it the power to charge anticompetitive prices. ***HN14***[] ***LEdHN[14]***[] [14] "Market power is the ability to raise price profitably *by restricting output*." Areeda & Hovenkamp §5.01 (emphasis added); accord, *Kodak, 504 U. S., at 464,* *112 S. Ct. 2072, 119 L. Ed. 2d 265*; *Business Electronics, 485 U. S., at 723, 108 S. Ct. 1515, 99 L. Ed. 2d 808*. This Court will "not infer competitive injury from price and output data absent some evidence that tends to prove that output was restricted or prices were above a competitive level." *Brooke Group Ltd., 509 U. S., at 237, 113 S. Ct. 2578, 125 L. Ed. 2d 168*. There is no such evidence in this case. The output of credit-card transactions grew dramatically from 2008 to 2013, increasing 30%. See *838 F. 3d, at 206*. "Where . . . output is expanding at the same time prices are increasing, rising prices are equally consistent with growing product demand." **[*2289]** *Brooke Group Ltd., supra, at 237, 113 S. Ct. 2578, 125 L. Ed. 2d 168*. And, as previously explained, the plaintiffs did not show that Amex charged more than its competitors.

3

The plaintiffs also failed to prove that Amex's antisteering provisions have stifled competition among credit-card companies. To the contrary, while these agreements have been in place, the credit-card market experienced **[***28]** expanding output and improved quality. Amex's business model spurred Visa and MasterCard to offer new premium card categories with higher rewards. And it has increased the availability of card services, including free banking and card-payment services for low-income customers who otherwise would not be served. Indeed, between 1970 and 2001, the percentage of households with credit cards more than quadrupled, and the proportion of households in the bottom-income quintile with credit cards grew from just 2% to over 38%. See D. Evans & R. Schmalensee, Paying With Plastic: The Digital Revolution in Buying and Borrowing 88-89 (2d ed. 2005) (Paying With Plastic).

Nor have Amex's antisteering provisions ended competition between credit-card networks with respect to merchant fees. Instead, fierce competition between networks has constrained Amex's ability to raise these fees and has, at times, forced Amex to lower them. For instance, when Amex raised its merchant prices between 2005 and 2010, some merchants chose to leave its network. *88 F. Supp. 3d, at 197*. And when its remaining merchants complained, Amex stopped raising its merchant prices. *Id., at 198*. In another instance in the late 1980s and early 1990s, competition **[***29]** forced Amex to offer lower merchant fees to "everyday spend" merchants—supermarkets, gas stations, pharmacies, and the like—to persuade them to accept Amex. See *id., at 160-161, 202*.

In addition, Amex's competitors have exploited its higher merchant **[**696]** fees to their advantage. By charging lower merchant fees, Visa, MasterCard, and Discover have achieved broader merchant acceptance—approximately 3 million more locations than Amex. *Id., at 204*. This broader merchant acceptance is a major advantage for these networks and a significant challenge for Amex, since consumers prefer cards that will be accepted everywhere. *Ibid.* And to compete even further with Amex, Visa and MasterCard charge different merchant fees for different types of cards to maintain their comparatively lower merchant fees and broader acceptance. Over the long run, this competition has created a trend of declining merchant fees in the credit-card market. In fact, since the first credit card was introduced in the 1950s, merchant fees—including Amex's merchant fees—have decreased by more than half. See *id., at 202-203*; Paying With Plastic 54, 126, 152.

Lastly, there is nothing inherently anticompetitive about Amex's antisteering provisions. These agreements actually stem **[***30]** negative externalities in the credit-card market and promote interbrand competition. When merchants steer cardholders away from Amex at the point of sale, it undermines the cardholder's expectation of "welcome acceptance"—the promise of a frictionless transaction. *88 F. Supp. 3d, at 156*. A lack of welcome acceptance at one merchant makes a cardholder less likely to use Amex at all other merchants. This externality endangers the viability of the entire Amex network. And it undermines the investments that Amex has made to encourage increased cardholder spending, which discourages investments in rewards and ultimately harms both cardholders and merchants. Cf. **[*2290]** *Leegin, 551 U. S., at 890-891, 127 S. Ct. 2705, 168 L. Ed. 2d 623* (recognizing that ***HN15***[] ***LEdHN[15]***[] [15] vertical restraints can prevent retailers from free riding and thus increase the availability of "tangible or intangible services or promotional efforts" that enhance competition and consumer welfare). Perhaps most importantly, antisteering provisions do not prevent Visa, MasterCard, or Discover from competing against Amex by offering lower merchant fees or promoting their broader merchant acceptance. [10]

In sum, the plaintiffs have not satisfied the first step of the rule of reason. They have not carried their burden of **[***31]** proving that Amex's antisteering provisions have anticompetitive effects. Amex's business model has spurred robust interbrand competition and has increased the quality and quantity of credit-card transactions. And ***HN16***[] ***LEdHN[16]***[] [16] it is "[t]he promotion of interbrand competition," after all, that "is . . . 'the primary purpose of the antitrust laws.'" *Id., at 890, 127 S. Ct. 2705, 168 L. Ed. 2d 623*.

[697]** ***

Because Amex's antisteering provisions do not unreasonably restrain trade, we affirm the judgment of the Court of Appeals.

It is so ordered.

Dissent by: BREYER; GINSBURG; SOTOMAYOR; KAGAN

Dissent

Justice **Breyer**, with whom Justice **Ginsburg**, Justice **Sotomayor**, and Justice **Kagan** join, dissenting.

For more than 120 years, the American economy has prospered by charting a middle path between pure *laissez-faire* and state capitalism, governed by an ***antitrust law*** "dedicated to the principle that *markets*, not individual firms and certainly not political power, produce the optimal mixture of goods and services." 1 P. Areeda & H. Hovenkamp, ***Antitrust Law*** ¶100b, p. 4 (4th ed. 2013) (Areeda & Hovenkamp). By means of a strong ***antitrust law***, the United States has sought to avoid the danger of monopoly capitalism. Long gone, we hope, are the days when the great trusts presided unfettered **[***32]** by competition over the American economy.

This lawsuit is emblematic of the American approach. Many governments around the world have responded to concerns about the high fees that credit-card companies often charge merchants by regulating such fees directly. See GAO, Credit and Debit Cards: Federal Entities Are Taking Actions to Limit Their Interchange Fees, but Additional Revenue Collection Cost Savings May Exist 31-35 (GAO-08-558, 2008). The United States has not followed that approach. The Government instead filed this lawsuit, which seeks to restore market competition over credit-card merchant fees by eliminating a contract-ual barrier with anticompetitive effects. The majority rejects that effort. But because the challenged contractual term clearly has serious anticompetitive effects, I dissent.

I

I agree with the majority and the parties that this case is properly evaluated under the three-step "rule of reason" that governs many antitrust lawsuits. **[*2291]** *Ante, at ___ - ___, 201 L. Ed. 2d, at 690-691*. Under that approach, a court looks first at the agreement or restraint at issue to assess whether it has had, or is likely to have,

---

[10] The plaintiffs argue that *United States v. Topco Associates, Inc., 405 U. S. 596, 610, 92 S. Ct. 1126, 31 L. Ed. 2d 515 (1972)*, forbids any restraint that would restrict competition in part of the market—here, for example, merchant steering. See Brief for Petitioners and Respondents Nebraska, Tennessee, and Texas 30, 42. *Topco* does not stand for such a broad proposition. *Topco* concluded that a horizontal agreement between competitors was unreasonable *per se*, even though the agreement did not extend to every competitor in the market. See *405 U. S., at 599, 608, 92 S. Ct. 1126, 31 L. Ed. 2d 515*. A horizontal agreement between competitors is markedly different from a vertical agreement that incidentally affects one particular method of competition. See *Leegin, 551 U. S., at 888, 127 S. Ct. 2705, 168 L. Ed. 2d 623*; *Maricopa County Medical Soc., 457 U. S., at 348, n. 18, 102 S. Ct. 2466, 73 L. Ed. 2d 48*.

anticompetitive effects. *FTC v. Indiana Federation of Dentists, 476 U. S. 447, 459, 106 S. Ct. 2009, 90 L. Ed. 2d 445 (1986)*. In doing so, the court normally asks whether the restraint **[***33]** may tend to impede competition and, if so, whether those who have entered into that restraint have sufficient economic or commercial power for the agreement to make a negative difference. See *id., at 459-461, 106 S. Ct. 2009, 90 L. Ed. 2d 445.* Sometimes, but not always, a court will try to determine the appropriate market (the market that the agreement affects) and determine whether those entering into that agreement have the power to raise prices above the competitive level in that market. See *ibid.*

It is important here to understand that in cases under *§1 of the Sherman Act* (unlike in cases challenging **[**698]** a merger under *§7 of the Clayton Act , 15 U. S. C. §18*), it may well be unnecessary to undertake a sometimes complex, market power inquiry:

> "Since the purpose [in a *Sherman Act §1* case] of the inquiries into . . . market power is [simply] to determine whether an arrangement has the potential for genuine adverse effects on competition, 'proof of actual detrimental effects, such as a reduction in output,' can obviate the need for an inquiry into market power, which is but a 'surrogate for detrimental effects.'" *Indiana Federation of Dentists, supra, at 460-461, 106 S. Ct. 2009, 90 L. Ed. 2d 445* (quoting 7 P. Areeda, ***Antitrust Law*** ¶1511, p. 429 (3d ed. 1986)).

Second (as treatise writers summarize the case law), if an antitrust plaintiff meets **[***34]** the initial burden of showing that an agreement will likely have anticompetitive effects, normally the "burden shifts to the defendant to show that the restraint in fact serves a legitimate objective." 7 Areeda & Hovenkamp ¶1504b, at 415; see *California Dental Ass'n v. FTC, 526 U.S. 756, 771, 119 S. Ct. 1604, 143 L. Ed. 2d 935 (1999)*; *id., at 788, 119 S. Ct. 1604, 143 L. Ed. 2d 935* (Breyer, J., dissenting).

Third, if the defendant successfully bears this burden, the antitrust plaintiff may still carry the day by showing that it is possible to meet the legitimate objective in less restrictive ways, or, perhaps by showing that the legitimate objective does not outweigh the harm that competition will suffer, *i.e.*, that the agreement "on balance" remains unreasonable. 7 Areeda & Hovenkamp ¶1507a, at 442.

Like the Court of Appeals and the parties, the majority addresses only the first step of that three-step framework. *Ante, at ___, 201 L. Ed. 2d, at 691*.

II

A

This case concerns the credit-card business. As the majority explains, *ante, ___, 201 L. Ed. 2d, at 686*, that business involves the selling of two different but related card services. First, when a shopper uses a credit card to buy something from a participating merchant, the credit-card company pays the merchant the amount of money that the merchant's customer has charged to his card and charges the merchant a fee, **[***35]** say 5%, for that speedy-payment service. I shall refer to that kind of transaction as a merchant-related card service. Second, the credit-card company then sends a bill to the merchant's customer, the shopper who holds the card; and the shopper pays the card company the sum that merchant charged the shopper for the goods or services he or she bought. The cardholder also often pays the card company a fee, such as an annual fee for the card or an interest charge for delayed payment. I **[*2292]** shall call that kind of transaction a shopper-related card service. The credit-card company can earn revenue from the sale (directly or indirectly) of each of these services: (1) speedy payment for merchants, and (2) credit for shoppers. (I say "indirectly" to reflect the fact that card companies often create or use networks of banks as part of the process—but I have found nothing here suggesting that that fact makes a significant difference to my analysis.)

Sales of the two basic card services are related. A shopper can pay for a **[**699]** purchase with a particular credit card only if the merchant has signed up for merchant-related card services with the company that issued the credit card that the shopper wishes **[***36]** to use. A firm in the credit-card business is therefore unlikely to make money unless quite a few merchants agree to accept that firm's card and quite a few shoppers agree to carry and use it. In general, the more merchants that sign up with a particular card company, the more useful that card is likely to prove to shoppers and so the more shoppers will sign up; so too, the more shoppers that carry a particular card, the more useful that card is likely to prove to merchants (as it obviously helps them obtain the shoppers' business) and so the more merchants will sign up. Moreover, as a rough rule of thumb (and assuming constant charges), the larger the networks of paying merchants and paying shoppers that a card firm maintains, the larger the revenues that the firm will likely receive, since more payments will be processed using its cards. Thus, it is not surprising that a card company may offer shoppers incentives (say, points redeemable for merchandise or travel) for using its card or that a firm might want merchants to accept its card exclusively.

B

This case focuses upon a practice called "steering." American Express has historically charged higher merchant fees than its competitors. **[***37]** App. to Pet. for Cert. 173a-176a. Hence, fewer merchants accept American Express' cards than its competitors'. *Id.,* at 184a-187a. But, perhaps because American Express cardholders are, on average, wealthier, higher-spending, or more loyal to American Express than other cardholders, vast numbers of merchants still accept American Express cards. See *id.*, at 156a, 176a-177a, 184a-187a. Those who do, however, would (in order to avoid the higher American Express fee) often prefer that their customers use a different card to charge a purchase. Thus, the merchant has a monetary incentive to "steer" the customer towards the use of a different card. A merchant might tell the customer, for example, "American Express costs us more," or "please use Visa if you can," or "free shipping if you use Discover." See *id.,* at 100a-102a.

Steering makes a difference, because without it, the shopper does not care whether the merchant pays more to American Express than it would pay to a different card company—the shopper pays the same price either way. But if steering works, then American Express will find it more difficult to charge more than its competitors for merchant-related services, because merchants will respond by steering their customers, **[***38]** encouraging them to use other cards. Thus, American Express dislikes steering; the merchants like it; and the shoppers may benefit from it, whether because merchants will offer them incentives to use less expensive cards or in the form of lower retail prices overall. See *id.,* at 92a, 97a-104a.

In response to its competitors' efforts to convince merchants to steer shoppers to use less expensive cards, American Express **[*2293]** tried to stop, or at least to limit, steering by placing antisteering provisions in most of its contracts with merchants. It called those provisions "nondiscrimination provisions." They prohibited steering of the forms I have described above (and others as well). See *id.,* at 95a-96a, 100a-101a. After placing them in **[**700]** its agreements, American Express found it could maintain, or even raise, its higher merchant prices without losing too many transactions to other firms. *Id.,* at 195a-198a. These agreements—the "nondiscrimination provisions"—led to this lawsuit.

C

In 2010 the United States and 17 States brought this antitrust case against American Express. They claimed that the "nondiscrimination provisions" in its contracts with merchants created an unreasonable restraint of trade. (Initially Visa and MasterCard **[***39]** were also defendants, but they entered into consent judgments, dropping similar provisions from their contracts with merchants). After a 7-week bench trial, the District Court entered judgment for the Government, setting forth its findings of fact and conclusions of law in a 97-page opinion. *88 F. Supp. 3d 143 (EDNY 2015)*.

Because the majority devotes little attention to the District Court's detailed factual findings, I will summarize some of the more significant ones here. Among other things, the District Court found that beginning in 2005 and during the next five years, American Express raised the prices it charged merchants on 20 separate occasions. See *id., at 195-196*. In doing so, American Express did not take account of the possibility that large merchants would respond to the price increases by encouraging shoppers to use a different credit card because the nondiscrimination provisions prohibited any such steering. *Id., at 215*. The District Court pointed to merchants' testimony stating that, had it not been for those provisions, the large merchants would have responded to the price increases by encouraging customers to use other, less-expensive cards. *Ibid.*

The District Court also found that even though American Express raised its **[***40]** merchant prices 20 times in this 5-year period, it did not lose the business of any large merchant. *Id., at 197*. Nor did American Express increase benefits (or cut credit-card prices) to American Express cardholders in tandem with the merchant price increases. *Id., at 196*. Even had there been no direct evidence of injury to competition, American Express' ability to raise merchant prices without losing any meaningful market share, in the District Court's view, showed that American Express possessed power in the relevant market. See *id., at 195*.

The District Court also found that, in the absence of the provisions, prices to merchants would likely have been lower. *Ibid.* It wrote that in the late 1990's, Discover, one of American Express' competitors, had tried to develop a business model that involved charging lower prices to merchants than the other companies charged. *Id., at 213*. Discover then invited each "merchant to save money by shifting volume to Discover," while simultaneously offering merchants additional discounts "if they would steer customers to Discover." *Ibid.* The court determined that these efforts failed because of American Express' (and the other card companies') "nondiscrimination provisions." These provisions, **[***41]** the court found, "denied merchants the ability to express a preference for Discover or to employ any other tool by which they might steer share to Discover's lower-priced network." *Id., at 214*. Because the provisions eliminated any advantage that lower **[**701]** prices might produce, Discover **[*2294]** "abandoned its low-price business model" and raised its merchant fees to match those of its competitors. *Ibid.* This series of events, the court concluded was "emblematic of the harm done to the competitive process" by the "nondiscrimination provisions." *Ibid.*

The District Court added that it found no offsetting pro-competitive benefit to shoppers. *Id., at 225-238*. Indeed, it found no offsetting benefit of any kind. See *ibid.*

American Express appealed, and the U. S. Court of Appeals for the Second Circuit held in its favor. *838 F. 3d 179 (2016)*. The Court of Appeals did not reject any fact found by the District Court as "clearly erroneous." See *Fed. Rule Civ. Proc. 52(a)(6)*. Rather, it concluded that the District Court had erred in step 1 of its rule-of-reason analysis by failing to account for what the Second Circuit called the credit-card business's "two-sided market" (or "two-sided platform"). *838 F. 3d, at 185-186, 196-200*.

III

The majority, like the Court of Appeals, reaches only step 1 in its "rule of reason" **[***42]** analysis. *Ante, at ___, 201 L. Ed. 2d, at 690*. To repeat, that step consists of determining whether the challenged "nondiscrimination provisions" have had, or are likely to have, anticompetitive effects. See *Indiana Federation of Dentists, 476 U. S., at 459, 106 S. Ct. 2009, 90 L. Ed. 2d 445*. Do those provisions tend to impede competition? And if so, does American Express, which imposed that restraint as a condition of doing business with its merchant customers, have sufficient economic or commercial power for the provision to make a negative difference? See *id., at 460-461, 106 S. Ct. 2009, 90 L. Ed. 2d 445*.

A

Here the District Court found that the challenged provisions have had significant anticompetitive effects. In particular, it found that the provisions have limited or prevented price competition among credit-card firms for the business of merchants. *88 F. Supp. 3d, at 209*. That conclusion makes sense: In the provisions, American Express required the merchants to agree not to encourage customers to use American Express' competitors' credit cards, even cards from those competitors, such as Discover, that intended to charge the merchants lower prices. See *id., at 214*. By doing so, American Express has "disrupt[ed] the normal price-setting mechanism" in the market. *Id., at 209*. As a result of the provisions, the District Court found, American Express was able to raise merchant prices **[***43]** repeatedly without any significant loss of business, because merchants were unable to respond to such price increases by encouraging shoppers to pay with other cards. *Id., at 215*. The provisions also meant that competitors like Discover had little incentive to lower their merchant prices, because doing so did not lead to any additional market share. *Id., at 214*. The provisions thereby "suppress[ed] [American Express'] . . . competitors' incentives to offer lower prices . . . resulting in higher profit-maximizing prices across the network services market." *Id., at 209.* Consumers throughout the economy paid higher retail prices as a result, and they were denied the opportunity to accept incentives that merchants might otherwise have offered to use less-expensive cards. *Id., at 216, 220*. **[**702]** I should think that, considering step 1 alone, there is little more that need be said.

The majority, like the Court of Appeals, says that the District Court should have looked not only at the market for the card companies' merchant-related services but also at the market for the card companies' shopper-related services, and that it should **[*2295]** have combined them, treating them as a single market. *Ante, at ___ - ___, 201 L. Ed. 2d, at 693*; *838 F. 3d, at 197*. But I am not aware of any support for that **[***44]** view in ***antitrust law***. Indeed, this Court has held to the contrary.

In *Times-Picayune Publishing Co. v. United States, 345 U. S. 594, 610, 73 S. Ct. 872, 97 L. Ed. 1277 (1953)*, the Court held that an antitrust court should begin its definition of a relevant market by focusing narrowly on the good or service directly affected by a challenged restraint. The Government in that case claimed that a newspaper's advertising policy violated the *Sherman Act's* "rule of reason." See *ibid.* In support of that argument, the Government pointed out, and the District Court had held, that the newspaper dominated the market for the sales of newspapers to readers in New Orleans, where it was the sole morning daily newspaper. *Ibid.* But this Court reversed. We explained that "every newspaper is a dual trader in separate though interdependent markets; it sells the paper's news and advertising content to its readers; in effect that readership is in turn sold to the buyers of advertising space." *Ibid.* We then added:

> "This case concerns solely one of those markets. The Publishing Company stands accused not of tying sales to its readers but only to buyers of general and classified space in its papers. For this reason, dominance in the advertising market, not in readership, must be decisive in gauging the legality **[***45]** of the Company's unit plan." *Ibid.*

Here, American Express stands accused not of limiting or harming competition for shopper-related card services, but only of merchant-related card services, because the challenged contract provisions appear only in American Express' contracts with merchants. That is why the District Court was correct in considering, at step 1, simply whether the agreement had diminished competition in merchant-related services.

B

The District Court did refer to market definition, and the majority does the same. *Ante, at ___ - ___, 201 L. Ed. 2d, at 691-693*. And I recognize that properly defining a market is often a complex business. Once a court has identified the good or service directly restrained, as *Times-Picayune Publishing Co.* requires, it will sometimes add to the relevant market what economists call "substitutes": other goods or services that are reasonably substitutable for that good or service. See, *e.g., United States v. E. I. du Pont de Nemours & Co., 351 U. S. 377, 395-396, 76 S. Ct. 994, 100 L. Ed. 1264 (1956)* (explaining that cellophane market includes other, substitutable flexible wrapping materials as well). The reason that substitutes are included in the relevant market is that they restrain a firm's ability to profitably raise prices, because customers will switch to the substitutes rather **[***46]** than pay the higher prices. See 2B Areeda & Hovenkamp ¶561, at 378.

[703]** But while the market includes substitutes, it does not include what economists call complements: goods or services that are used together with the restrained product, but that cannot be substituted for that product. See *id.,* ¶565a, at 429; *Eastman Kodak Co. v. Image Technical Services, Inc., 504 U. S. 451, 463, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)*. An example of complements is gasoline and tires. A driver needs both gasoline and tires to drive, but they are not substitutes for each other, and so the sale price of tires does not check the ability of a gasoline firm (say a gasoline monopolist) to raise the price of gasoline above competitive levels. As a treatise on the subject states: "Grouping complementary goods into the same market" is "economic nonsense," and would "undermin[e] the rationale for the policy **[*2296]** against monopolization or collusion in the first place." 2B Areeda & Hovenkamp ¶565a, at 431.

Here, the relationship between merchant-related card services and shopper-related card services is primarily that of complements, not substitutes. Like gasoline and tires, both must be purchased for either to have value. Merchants upset about a price increase for merchant-related services cannot avoid that price increase by becoming **[***47]** cardholders, in the way that, say, a buyer of newspaper advertising can switch to television advertising or direct mail in response to a newspaper's advertising price increase. The two categories of services serve fundamentally different purposes. And so, also like gasoline and tires, it is difficult to see any way in which the price of shopper-related services could act as a check on the card firm's sale price of merchant-related services. If anything, a lower price of shopper-related card services is likely to cause more shoppers to use the card, and increased shopper popularity should make it *easier* for a card firm to raise prices to merchants, not *harder*, as would be the case if the services were substitutes. Thus, unless there is something unusual about this case—a possibility I discuss below, see *infra, at ___ - ___, 201 L. Ed. 2d, at 704-708*—there is no justification for treating shopper-related services and merchant-related services as if they were part of a single market, at least not at step 1 of the "rule of reason."

C

Regardless, a discussion of market definition was legally unnecessary at step 1. That is because the District Court found strong *direct* evidence of anticompetitive effects flowing from the challenged restraint. **[***48]** *88 F. Supp. 3d, at 207-224*. As I said, *supra, at ___, 201 L. Ed. 2d, at 700,* this evidence included Discover's efforts to break into the credit-card business by charging lower prices for merchant-related services, only to find that the "nondiscrimination provisions," by preventing merchants from encouraging shoppers to use Discover cards, meant that lower merchant prices did not result in any additional transactions using Discover credit cards. *88 F. Supp. 3d, at 213-214*. The direct evidence also included the fact that American Express raised its merchant prices 20 times in five years without losing any appreciable market share. *Id., at 195-198, 208-212*. It also included the testimony of numerous merchants that they would have steered shoppers away from American Express cards in response to merchant price increases (thereby checking **[**704]** the ability of American Express to raise prices) had it not been for the nondiscrimination provisions. See *id., at 221-222*. It included the factual finding that American Express "did not even account for the possibility that [large] merchants would respond to its price increases by attempting to shift share to a competitor's network" because the nondiscrimination provisions prohibited steering. *Id., at 215*. It included the District Court's ultimate finding of fact, not overturned by the Court **[***49]** of Appeals, that the challenged provisions "were integral to" American Express' "[price] increases and thereby caused merchants to pay higher prices." *Ibid.*

As I explained above, this Court has stated that "[s]ince the purpose of the inquiries into market definition and market power is to determine whether an arrangement has the potential for genuine adverse effects on competition, proof of actual detrimental effects . . . can obviate the need for" those inquiries. *Indiana Federation of Dentists, 476 U. S., at 460-461, 106 S. Ct. 2009, 90 L. Ed. 2d 445* (internal quotation marks omitted). That statement is fully applicable here. Doubts about the District Court's market-definition analysis are beside **[*2297]** the point in the face of the District Court's findings of actual anticompetitive harm.

The majority disagrees that market definition is irrelevant. See *ante, at ___ - ___, 201 L. Ed. 2d, at 691-692, and n. 7*. The majority explains that market definition is necessary because the nondiscrimination provisions are "vertical restraints" and "[v]ertical restraints often pose no risk to competition unless the entity imposing them has market power, which cannot be evaluated unless the Court first determines the relevant market." *Ante, at ___, n. 7, 201 L. Ed. 2d, at 691*. The majority thus, in a footnote, seems categorically to exempt vertical **[***50]** restraints from the ordinary "rule of reason" analysis that has applied to them since the *Sherman Act's* enactment in 1890. The majority's only support for this novel exemption is *Leegin Creative Leather Products, Inc. v. PSKS, Inc., 551 U. S. 877, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007)*. But *Leegin* held that the "rule of reason" *applied* to the vertical restraint at issue in that case. See *id., at 898-899, 127 S. Ct. 2705, 168 L. Ed. 2d 623*. It said nothing to suggest that vertical restraints are not subject to the usual "rule of reason" analysis. See also *infra, at ___, 201 L. Ed. 2d, at 711*.

One critical point that the majority's argument ignores is that proof of actual adverse effects on competition *is*, *a fortiori*, proof of market power. Without such power, the restraints could not have brought about the anticompetitive effects that the plaintiff proved. See *Indiana Federation of Dentists, supra, at 460, 106 S. Ct. 2009, 90 L. Ed. 2d 445* ("[T]he purpose of the inquiries into market definition and market power is to determine *whether an arrangement has the potential for* genuine adverse effects on competition" (emphasis added)). The District Court's findings of actual anticompetitive harm from the nondiscrimination provisions thus showed that, whatever the relevant market might be, American Express had enough power in that market to cause that harm. There is no reason to require a separate showing of market definition and market power under such circumstances. **[***51]** And so the majority's **[**705]** extensive discussion of market definition is legally unnecessary.

D

The majority's discussion of market definition is also wrong. Without raising any objection in general with the longstanding approach I describe above, *supra, at ___ - ___, 201 L. Ed. 2d, at 702-703*, the majority agrees with the Court of Appeals that the market for American Express' card services is special because it is a "two-sided transaction platform." *Ante, at ___ - ___, ___ - ___, 201 L. Ed. 2d, at 686-687, 691-693*. The majority explains that credit-card firms connect two distinct groups of customers: First, merchants who accept credit cards, and second, shoppers who use the cards. *Ante, at ___, 201 L. Ed. 2d, at 686*; accord, *838 F. 3d, at 186*. The majority adds that "no credit-card transaction can occur unless both the merchant and the cardholder simultaneously agree to use to the same credit-card network." *Ante, at ___, 201 L. Ed. 2d, at 686*. And it explains that the credit-card market involves "indirect network effects," by which it means that shoppers want a card that many merchants will accept and merchants want to accept those cards that many customers have and use. *Ibid.* From this, the majority concludes that "courts must include both sides of the platform—merchants and cardholders—when defining the credit-card market." *Ante, at ___, 201 L. Ed. 2d, at 692*; accord, **[***52]** *838 F. 3d, at 197*.

1

Missing from the majority's analysis is any explanation as to *why*, given the purposes that market definition serves in ***antitrust law***, the fact that a credit-card firm can be said to operate a "two-sided transaction platform" means that its merchant-related **[*2298]** and shopper-related services should be combined into a single market. The phrase "two-sided transaction platform" is not one of antitrust art—I can find no case from this Court using those words. The majority defines the phrase as covering a business that "offers different products or services to two different groups who both depend on the platform to intermediate between them," where the business "cannot make a sale to one side of the platform without simultaneously making a sale to the other" side of the platform. *Ante, at ___, 201 L Ed. 2d, at 686*. I take from that definition that there are four relevant features of such businesses on the majority's account: they (1) offer different products or services, (2) to different groups of customers, (3) whom the "platform" connects, (4) in simultaneous transactions. See *ibid.*

What is it about businesses with those four features that the majority thinks justifies a special market-definition approach for them? **[***53]** It cannot be the first two features—that the company sells different products to different groups of customers. Companies that sell multiple products to multiple types of customers are commonplace. A firm might mine for gold, which it refines and sells both to dentists in the form of fillings and to investors in the form of ingots. Or, a firm might drill for both oil and natural gas. Or a firm might make both ignition switches inserted into auto bodies and tires used for cars. I have already explained that, ordinarily, ***antitrust law*** will not group the two nonsubstitutable products together **[**706]** for step 1 purposes. *Supra, at ___ - ___, 201 L. Ed. 2d, at 702-703*.

Neither should it normally matter whether a company sells related, or complementary, products, *i.e.*, products which must both be purchased to have any function, such as ignition switches and tires, or cameras and film. It is well established that an antitrust court in such cases looks at the product where the attacked restraint has an anticompetitive effect. *Supra, at ___, 201 L. Ed. 2d, at 701*; see *Eastman Kodak, 504 U. S., at 463, 112 S. Ct. 2072, 119 L. Ed. 2d 265*. The court does not combine the customers for the separate, nonsubstitutable goods and see if "overall" the restraint has a negative effect. See *ibid.*; 2B Areeda & Hovenkamp ¶565a. That is because, as I have explained, **[***54]** the complementary relationship between the products is irrelevant to the purposes of market-definition. See *supra, at ___ - ___, 201 L. Ed. 2d, at 702-703*.

The majority disputes my characterization of merchant-related and shopper-related services as "complements." See *ante, at ___, n. 8, 201 L. Ed. 2d, at 70114, n. 693*. The majority relies on an academic article which devotes one sentence to the question, saying that "a two-sided market [is] different from markets for complementary products [*e.g.,* tires and gas], in which both products are bought by the same buyers, who, in their buying decisions, can therefore be expected to take into account both prices." Filistrucchi, Geradin, Van Damme, & Affeldt, Market Definition in Two-Sided Markets: Theory and Practice, 10 J. Competition L. & Econ. 293, 297 (2014) (Filistrucchi). I agree that two-sided platforms—at least as some academics define them, but see *infra, at ___ - ___, 201 L. Ed. 2d, at 708*—may be distinct from some types of complements in the respect the majority mentions (even though the services resemble complements because they must be used together for either to have value). But the distinction the majority mentions has nothing to do with the relevant question. The relevant question is whether merchant-related and shopper-related services **[***55]** are *substitutes*, one for the other, so that customers can respond to a price increase for one service by switching to the other service. As I have explained, the two types of services are not substitutes in this way. *Supra, at ___ - ___, 201 L. Ed. 2d, at 702-703*. And so the question remains, just as before: **[*2299]** What is it about the economic relationship between merchant-related and shopper-related services that would justify the majority's novel approach to market definition?

What about the last two features—that the company connects the two groups of customers to each other, in simultaneous transactions? That, too, is commonplace. Consider a farmers' market. It brings local farmers and local shoppers together, and transactions will occur only if a farmer and a shopper simultaneously agree to engage in one. Should courts abandon their ordinary step 1 inquiry if several competing farmers' markets in a city agree that only certain kinds of farmers can participate, or if a farmers' market charges a higher fee than its competitors do and prohibits participating farmers from raising their prices to cover it? Why? If farmers' markets are special, what about travel agents that connect airlines and passengers? What about internet retailers, **[***56]** who, in addition to selling their own goods, allow (for a fee) other **[**707]** goods-producers to sell over their networks? Each of those businesses seems to meet the majority's four-prong definition.

Apparently as its justification for applying a special market-definition rule to "two-sided transaction platforms," the majority explains that such platforms "often exhibit" what it calls "indirect network effects." *Ante, at ___, 201 L. Ed. 2d, at 686*. By this, the majority means that sales of merchant-related card services and (different) shopper-related card services are interconnected, in that increased merchant-buyers mean increased shopper-buyers (the more stores in the card's network, the more customers likely to use the card), and vice versa. See *ibid.* But this, too, is commonplace. Consider, again, a farmers' market. The more farmers that participate (within physical and esthetic limits), the more customers the market will likely attract, and vice versa. So too with travel agents: the more airlines whose tickets a travel agent sells, the more potential passengers will likely use that travel agent, and the more potential passengers that use the travel agent, the easier it will likely be to convince airlines to sell **[***57]** through the travel agent. And so forth. Nothing in ***antitrust law***, to my knowledge, suggests that a court, when presented with an agreement that restricts competition in any one of the markets my examples suggest, should abandon traditional market-definition approaches and include in the relevant market services that are complements, not substitutes, of the restrained good. See *supra, at ____ - ____, 201 L. Ed. 2d, at 702-703*.

2

To justify special treatment for "two-sided transaction platforms," the majority relies on the Court's decision in *United States v. Grinnell Corp., 384 U. S. 563, 571-572, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*. In *Grinnell*, the Court treated as a single market several different "central station services," including burglar alarm services and fire alarm services. *Id., at 571, 86 S. Ct. 1698, 16 L. Ed. 2d 778*. It did so even though, for *consumers*, "burglar alarm services are not interchangeable with fire alarm services." *Id., at 572, 86 S. Ct. 1698, 16 L. Ed. 2d 778*. But that is because, for *producers*, the services were indeed interchangeable: A company that offered one could easily offer the other, because they all involve "a single basic service—the protection of property through use of a central service station." *Ibid.* Thus, the "commercial realit[y]" that the *Grinnell* Court relied on, *ibid.*, was that the services being grouped were what economists call "producer substitutes." See 2B Areeda **[***58]** & Hovenkamp ¶561, at 378. And the law is clear that "two products produced interchangeably from the same production facilities are presumptively **[*2300]** in the same market," even if they are not "close substitutes for each other on the demand side." *Ibid.* That is because a firm that produces one such product can, in response to a price increase in the other, easily shift its production and thereby limit its competitor's power to impose the higher price. See *id.*, ¶561a, at 379.

Unlike the various types of central station services at issue in *Grinnell Corp.*, however, the shopper-related and merchant-related services that American Express provides are not "producer substitutes" any more than they are traditional substitutes. For producers as for consumers, the services **[**708]** are instead complements. Credit card companies must sell them together for them to be useful. As a result, the credit-card companies cannot respond to, say, merchant-related price increases by shifting production away from shopper-related services to merchant-related services. The relevant "commercial realities" in this case are thus completely different from those in *Grinnell Corp.* (The majority also cites *Brown Shoe Co. v. United States, 370 U. S. 294, 336-337, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)*, for this point, but **[***59]** the "commercial realities" considered in that case were that "shoe stores in the outskirts of cities compete effectively with stores in central downtown areas," and thus are part of the same market. *Id., at 338-339, 82 S. Ct. 1502, 8 L. Ed. 2d 510*. Here, merchant-related services do not, as I have said, compete with shopper-related services, and so *Brown Shoe Co.* does not support the majority's position.) Thus, our precedent provides no support for the majority's special approach to defining markets involving "two-sided transaction platforms."

3

What about the academic articles the majority cites? The first thing to note is that the majority defines "two-sided transaction platforms" much more broadly than the economists do. As the economists who coined the term explain, if a "two-sided market" meant simply that a firm connects two different groups of customers via a platform, then "pretty much any market would be two-sided, since buyers and sellers need to be brought together for markets to exist and gains from trade to be realized." Rochet & Tirole, Two-Sided Markets: A Progress Report, 37 RAND J. Econ. 645, 646 (2006). The defining feature of a "two-sided market," according to these economists, is that "the platform can affect the **[***60]** volume of transactions by charging more to one side of the market and reducing the price paid by the other side by an equal amount." *Id.,* at 664-665; accord, Filistrucchi 299. That requirement appears nowhere in the majority's definition. By failing to limit its definition to platforms that economists would recognize as "two sided" in the relevant respect, the majority carves out a much broader exception to the ordinary antitrust rules than the academic articles it relies on could possibly support.

Even as limited to the narrower definition that economists use, however, the academic articles the majority cites do not support the majority's flat rule that firms operating "two-sided transaction platforms" should always be treated as part of a single market for all antitrust purposes. *Ante, at ___ - ___, 201 L. Ed. 2d, at 692-693*. Rather, the academics explain that for market-definition purposes, "[i]n some cases, the fact that a business can be thought of as two-sided may be irrelevant," including because "nothing in the analysis of the practices [at issue] really hinges on the linkages between the demands of participating groups." Evans & Schmalensee, Markets With Two-Sided Platforms, 1 Issues in Competition L. & Pol'y 667, 689 **[***61]** (2008). "In other cases, the fact that a business is two-sided will prove important both by **[*2301]** identifying the real dimensions of competition and focusing on sources of constraints." *Ibid.* That flexible approach, however, is precisely the one the District Court followed in this case, by considering the effects of "[t]he **[**709]** two-sided nature of the . . . card industry" throughout its analysis. *88 F. Supp. 3d, at 155*.

Neither the majority nor the academic articles it cites offer any explanation for why the features of a "two-sided transaction platform" justify always treating it as a single antitrust market, rather than accounting for its economic features in other ways, as the District Court did. The article that the majority repeatedly quotes as saying that "'[i]n two-sided transaction markets, only one market should be defined,'" *ante, at ___ - ___, 201 L. Ed. 2d, at 693* (quoting Filistrucchi 302), justifies that conclusion only for purposes of assessing the effects of a merger. In such a case, the article explains, "[e]veryone would probably agree that a payment card company such as American Express is either in the relevant market on both sides or on neither side . . . . The analysis of a merger between two payment card platforms should **[***62]** thus consider . . . both sides of the market." *Id.,* at 301. In a merger case this makes sense, but is also meaningless, because, whether there is one market or two, a reviewing court will consider both sides, because it must examine the effects of the merger in each affected market and submarket. See *Brown Shoe Co., 370 U. S., at 325, 82 S. Ct. 1502, 8 L. Ed. 2d 510*. As for a nonmerger case, the article offers only *United States* v. *Grinnell* as a justification, see Filistrucchi 303, and as I have already explained, *supra, at ___ - ___, 201 L. Ed. 2d, at 706-707*, *Grinnell* does not support this proposition.

E

Put all of those substantial problems with the majority's reasoning aside, though. Even if the majority were right to say that market definition was relevant, and even if the majority were right to further say that the District Court should have defined the market in this case to include shopper-related services as well as merchant-related services, that *still* would not justify the majority in affirming the Court of Appeals. That is because, as the majority is forced to admit, the plaintiffs *made* the factual showing that the majority thinks is required. See *ante, at ___, 201 L. Ed. 2d, at 694*.

Recall why it is that the majority says that market definition matters: because if the relevant market includes both merchant-related services **[***63]** and card-related services, then the plaintiffs had the burden to show that as a result of the nondiscrimination provisions, "the price of credit-card transactions"—considering both fees charged to merchants and rewards paid to cardholders—"was higher than the price one would expect to find in a competitive market." *Ante, at ___, 201 L. Ed. 2d, at 694*. This mirrors the Court of Appeals' holding that the Government had to show that the "nondiscrimination provisions" had "made *all* [American Express] customers on both sides of the platform—*i.e.*, both merchants and cardholders—worse off overall." *838 F. 3d, at 205*.

The problem with this reasoning, aside from it being wrong, is that the majority admits that the plaintiffs *did* show this: they "offer[ed] evidence" that American Express "increased the percentage of the purchase price that it charges merchants . . . and that this increase was not entirely spent on cardholder rewards." *Ante, ___, 201 L. Ed. 2d, at 695* (citing *88 F. Supp. 3d,* ***[**710]*** *at 195-197, 215)*. Indeed, the plaintiffs did not merely "offer evidence" of this—they persuaded the District Court, which made an unchallenged factual finding that the merchant price increases that resulted from the nondiscrimination provisions "were not wholly offset **[*2302]** by additional rewards expenditures **[***64]** or otherwise passed through to cardholders, and *resulted in a higher net price.*" *Id., at 215* (emphasis added).

In the face of this problem, the majority retreats to saying that even net price increases do not matter after all, absent a showing of lower output, because if output is increasing, "'rising prices are equally consistent with growing product demand.'" *Ante, at ___, 201 L. Ed. 2d, at 695* (quoting *Brooke Group Ltd. v. Brown & Williamson Tobacco Corp., 509 U. S. 209, 237, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993))*. This argument, unlike the price argument, has nothing to do with the credit-card market being a "two-sided transaction platform," so if this is the basis for the majority's holding, then nearly all of the opinion is dicta. The argument is also wrong. It is true as an economic matter that a firm exercises market power by restricting output in order to raise prices. But the relevant restriction of output is as compared with a hypothetical world in which the restraint was not present and prices were lower. The fact that credit-card use in general has grown over the last decade, as the majority says, see *ante, at ___ - ___, 201 L. Ed. 2d, at 694-695*, says nothing about whether such use would have grown more or less without the nondiscrimination provisions. And because the relevant question is a comparison between reality and a hypothetical state of **[***65]** affairs, to require actual proof of reduced output is often to require the impossible—tantamount to saying that the *Sherman Act* does not apply at all.

In any event, there are features of the credit-card market that may tend to limit the usual relationship between price and output. In particular, merchants generally spread the costs of credit-card acceptance across all their customers (whatever payment method they may use), while the benefits of card use go only to the cardholders. See, *e.g., 88 F. Supp. 3d, at 216*; Brief for John M. Connor et al. as *Amici Curiae* 34-35. Thus, higher credit-card merchant fees may have only a limited effect on credit-card transaction volume, even as they disrupt the marketplace by extracting anticompetitive profits.

IV

A

For the reasons I have stated, the Second Circuit was wrong to lump together the two different services sold, *at step 1.* But I recognize that the Court of Appeals has not yet considered whether the relationship between the two services might make a difference at steps 2 and 3. That is to say, American Express might wish to argue that the nondiscrimination provisions, while anticompetitive in respect to merchant-related services, nonetheless have an adequate offsetting **[***66]** procompetitive benefit in respect to its shopper-related services. I believe that American Express should have an opportunity to ask the Court of Appeals to consider that matter.

American Express might face an uphill battle. A *Sherman Act §1* defendant can rarely, if ever, show that a pro-competitive benefit in the market **[**711]** for one product offsets an anticompetitive harm in the market for another. In *United States v. Topco Associates, Inc., 405 U. S. 596, 611, 92 S. Ct. 1126, 31 L. Ed. 2d 515 (1972)*, this Court wrote:

> "If a decision is to be made to sacrifice competition in one portion of the economy for greater competition in another portion, this . . . is a decision that must be made by Congress and not by private forces or by the courts. Private forces are too keenly aware of their own interests in making such decisions and courts are ill-equipped and ill-situated for such decisionmaking."

[*2303] American Express, pointing to vertical price-fixing cases like our decision in *Leegin*, argues that comparing competition-related pros and cons is more common than I have just suggested. See *551 U. S., at 889-892, 127 S. Ct. 2705, 168 L. Ed. 2d 623*. But *Leegin* held only that vertical price fixing is subject to the "rule of reason" instead of being *per se* unlawful; the "rule of reason" still applies to vertical agreements just as it applies to horizontal agreements. **[***67]** See *id., at 898-899, 127 S. Ct. 2705, 168 L. Ed. 2d 623*.

Moreover, the procompetitive justifications for vertical price-fixing agreements are not apparently applicable to the distinct types of restraints at issue in this case. A vertically imposed price-fixing agreement typically involves a manufacturer controlling the terms of sale for its own product. A television-set manufacturer, for example, will insist that its dealers not cut prices for the manufacturer's own televisions below a particular level. Why might a manufacturer want its dealers to refrain from price competition in the manufacturer's own products? Perhaps because, for example, the manufacturer wants to encourage the dealers to develop the market for the manufacturer's brand, thereby increasing *interbrand* competition for the same ultimate product, namely a television set. This type of reasoning does not appear to apply to American Express' nondiscrimination provisions, which seek to control the terms on which merchants accept *other brands'* cards, not merely American Express' own.

Regardless, I would not now hold that an agreement such as the one before us can never be justified by procompetitive benefits of some kind. But the Court of Appeals would properly consider procompetitive **[***68]** justifications not at step 1, but at steps 2 and 3 of the "rule of reason" inquiry. American Express would need to show just how this particular anticompetitive merchant-related agreement has procompetitive benefits in the shopper-related market. In doing so, American Express would need to overcome the District Court's factual findings that the agreement had no such effects. See *88 F. Supp. 3d, at 224-238*.

B

The majority charts a different path. Notwithstanding its purported acceptance of the three-step, burden-shifting framework I have described, *ante, at ____ - ____, 201 L. Ed. 2d, at 690-691*, the majority addresses American Express' procompetitive justifications now, at step 1 of the analysis, see *ante, at ____ - ____, 201 L. Ed. 2d, at 695-696*. And in doing so, the majority inexplicably ignores the District Court's factual findings on the subject.

[712]** The majority reasons that the challenged nondiscrimination provisions "stem negative externalities in the credit-card market and promote interbrand competition." *Ante, at ____, 201 L. Ed. 2d, at 696*. The "negative externality" the majority has in mind is this: If one merchant persuades a shopper not to use his American Express card at that merchant's store, that shopper becomes less likely to use his American Express card at other merchants' stores. *Ibid* ***[***69]*** . The majority worries that this "endangers the viability of the entire [American Express] network," *ibid.*, but if so that is simply a consequence of American Express' merchant fees being higher than a competitive market will support. "The antitrust laws were enacted for 'the protection of *competition,* not *competitors.*'" *Atlantic Richfield Co. v. USA Petroleum Co., 495 U. S. 328, 338, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)*. If American Express' merchant fees are so high that merchants successfully induce their customers to use other cards, American Express can remedy that problem by lowering those fees or by spending more on cardholder rewards so **[*2304]** that cardholders decline such requests. What it may not do is demand contractual protection from price competition.

In any event, the majority ignores the fact that the District Court, in addition to saying what I have just said, also rejected this argument on independent factual grounds. It explained that American Express "presented no expert testimony, financial analysis, or other direct evidence establishing that without its [nondiscrimination provisions] it will, in fact, be unable to adapt its business to a more competitive market." *88 F. Supp. 3d, at 231*. It further explained that the testimony that was provided on the topic "was notably inconsistent," with **[***70]** some of American Express' witnesses saying only that invalidation of the provisions "would require American Express to adapt its current business model." *Ibid.* After an extensive discussion of the record, the District Court found that "American Express possesses the flexibility and expertise necessary to adapt its business model to suit a market in which it is required to compete on both the cardholder and merchant sides of the [credit-card] platform." *Id., at 231-232*. The majority evidently rejects these factual findings, even though no one has challenged them as clearly erroneous.

Similarly, the majority refers to the nondiscrimination provisions as preventing "free riding" on American Express' "investments in rewards" for cardholders. *Ante, at ___ - ___, 201 L. Ed. 2d, at 696*; see also *ante, at ___, 201 L. Ed. 2d, at 688* (describing steering in terms suggestive of free riding). But as the District Court explained, "[p]lainly . . . investments tied to card use (such as Membership Rewards points, purchase protection, and the like) are not subject to free-riding, since the network does not incur any cost if the cardholder is successfully steered away from using his or her American Express card." *88 F. Supp. 3d, at 237*. This, I should think, is an unassailable conclusion: **[***71]** American Express pays rewards to cardholders only for transactions in which cardholders use their American Express cards, so if a steering effort succeeds, no rewards are paid. As for concerns about free riding on American Express' fixed expenses, including its investments in its brand, the District **[**713]** Court acknowledged that free-riding was in theory possible, but explained that American Express "ma[de] no effort to identify the fixed expenses to which its experts referred or to explain how they are subject to free riding." *Ibid.*; see also *id., at 238* (American Express' own data showed "that the network's ability to confer a credentialing benefit trails that of its competitors, casting doubt on whether there is in fact any particular benefit associated with accepting [American Express] that is subject to free riding"). The majority does not even acknowledge, much less reject, these factual findings, despite coming to the contrary conclusion.

Finally, the majority reasons that the nondiscrimination provisions "do not prevent Visa, MasterCard, or Discover from competing against [American Express] by offering lower merchant fees or promoting their broader merchant acceptance." *Ante, at ___, 201 L. Ed. 2d, at 696*. But again, **[***72]** the District Court's factual findings were to the contrary. As I laid out above, the District Court found that the nondiscrimination provisions *in fact did prevent* Discover from pursuing a low-merchant-fee business model, by "den[ying] merchants the ability to express a preference for Discover or to employ any other tool by which they might steer share to Discover's lower-priced network." *88 F. Supp. 3d, at 214*; see *supra, at ___, 201 L. Ed. 2d, at 700*. The majority's statements that the nondiscrimination provisions are procompetitive are directly contradicted by this and other factual findings.

***

[*2305] For the reasons I have explained, the majority's decision in this case is contrary to basic principles of ***antitrust law***, and it ignores and contradicts the District Court's detailed factual findings, which were based on an extensive trial record. I respectfully dissent.

Judges: Honorable Bruce Howe Hendricks, United States District Judge.

Opinion by: Bruce Howe Hendricks

Opinion

ORDER

Plaintiffs Pro Slab, Inc. and Bremer Construction Management, Inc. ("Plaintiffs") **[*7]** initially filed this proposed class action on November 22, 2017, alleging a claim under *§ 1* of the Sherman Antitrust Act, *15 U.S.C. §§ 1-7*, arising from Defendants' alleged price fixing in the ready-mix concrete market in coastal South Carolina and Georgia from at least January 1, 2012, through the present. On January 15, 2018, Plaintiffs filed an amended complaint alleging that Defendants, "who are the largest Ready-Mix Concrete producers in the Savannah, Georgia to Charleston, South Carolina region," violated *§ 1* of the Sherman Antitrust Act by conspiring to fix the prices of ready-mix concrete, to rig bids for certain projects, and/or to allocate certain territories and customers amongst themselves. (ECF No. 48 ¶ 1.) Plaintiffs allege that the 18 named Defendants conspired with one another to restrain trade in four distinct markets: Savannah, Georgia; Statesboro, Georgia; Hilton Head/Bluffton, South Carolina; and Charleston, South Carolina, "from at least January 1, 2010, through the present." (*Id.*) As purchasers of ready-mix concrete from Defendants, Plaintiffs allege that they paid artificially high prices as a result of the alleged conspiracy.

After Plaintiffs filed their first amended complaint, several **[*8]** Defendants filed a joint motion to dismiss pursuant to *Rule 12(b)(6) of the Federal Rules of Civil Procedure* (ECF No. 78). Specifically, Defendants Argos USA Corp., Argos North America Corp., Argos USA LLC, Argos Ready Mix LLC, Argos Ready Mix (Carolinas) Corp., Coastal Concrete Southeast II LLC, Thomas Concrete, Inc., Thomas Concrete of Georgia, Inc., Thomas Concrete of South Carolina Inc., Evans Concrete Holdings, Inc., Evans Concrete, LLC, Elite Concrete Holdings, Inc., Elite Concrete, LLC, and Elite Concrete of SC, LLC assert that the amended complaint suffers from three fundamental defects: (1) it does not identify the role allegedly played by each individual Defendant; (2) it offers no factual allegations to support the alleged duration of the purported conspiracy; and (3) it offers no factual allegations to support the inclusion of the Charleston market area.

In addition to the joint motion to dismiss, various Defendants filed separate motions to dismiss. First, Defendants Evans Concrete Holdings, Inc., and Evans Concrete LLC filed a motion to dismiss for lack of personal jurisdiction and improper venue pursuant to *Rules 12(b)(2)* and *(3) of the Federal Rules of Civil Procedure* (ECF No. 77). Next, Defendants Thomas Concrete, Inc., Thomas Concrete of Georgia, Inc., and Thomas Concrete **[*9]** of South Carolina, Inc. filed a motion to dismiss pursuant to *Rule 12(b)(6)* (ECF No. 80), asserting that Plaintiffs fail to state a plausible claim of successor liability. Also, Defendants Elite Concrete, LLC, Elite Concrete Holdings, LLC, and Elite Concrete of SC, LLC filed a motion to dismiss pursuant to *Rule 12(b)(6)* (ECF No. 81), alleging that Plaintiffs' amended complaint is barred by the statute of limitations and that Plaintiffs' allegations of fraudulent concealment are insufficient to toll the limitations period. Defendant Elite Concrete of Richmond Hill, LLC filed a motion to dismiss and to adopt the joint motion to dismiss filed at ECF No. 78 and the other Elite Defendants' motion to dismiss filed at ECF No. 81 (ECF No. 96). Finally, Defendants Lafarge North America Inc. and Lafarge Building Materials Inc., filed a separate motion to dismiss pursuant to *Rules 12(b)(1)* and *(6)* (ECF No. 98), asserting that Plaintiffs fail to state a claim against the Lafarge entities; that the claim is barred by the statute of limitations; and that Plaintiffs lack standing to assert their claim against the Lafarge entities.[1]

STANDARD OF REVIEW

Under *Federal Rule of Civil Procedure 8(a)(2)*, a pleading must contain a "short and plain statement of the claim showing that the **[*10]** pleader is entitled to relief." *Fed. R. Civ. P. 8(a)(2)*. As the Supreme Court held in *Bell Atl. Corp. v. Twombly*, the pleading standard set forth in *Rule 8* "does not require 'detailed factual allegations,' but it demands more than an unadorned, the-defendant-unlawfully-harmed-me accusation." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))*. Thus, "[a] pleading that offers 'labels and conclusions' or 'a formulaic recitation of the elements of a cause of action will not do.'" *Id.* "Nor does a complaint suffice if it tenders 'naked assertion[s]' devoid of 'further factual enhancement." *Id.* (quoting *Twombly, 550 U.S. at 557*).

A motion to dismiss pursuant to *Federal Rule of Civil Procedure 12(b)(6)* examines the legal sufficiency of the facts alleged on the face of a plaintiff's complaint. *Edwards v. City of Goldsboro, 178 F.3d 231, 243 (4th Cir. 1999)*. To survive a *Rule 12(b)(6)* motion, "[f]actual allegations must be enough to raise a right to relief above the speculative level." *Twombly, 550 U.S. at 555*. The "complaint must contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.' " *Iqbal, 556 U.S. at 678* (quoting *Twombly, 550 U.S. at 570*). A claim is facially plausible when the factual content allows the court to reasonably infer that the defendant is liable for the misconduct alleged. *Id.* When considering a motion to dismiss, the court must accept as true all of the factual allegations contained in the **[*11]** complaint. *Erickson v. Pardus, 551 U.S. 89, 94, 127 S. Ct. 2197, 167 L. Ed. 2d 1081 (2007)*.

ANALYSIS

In the joint motion to dismiss (ECF No. 78) and in the motion to dismiss filed by the Lafarge entities (ECF No. 98), all Defendants raise the critical, initial question of whether Plaintiffs' amended complaint fails to allege facts to support Defendants' individual involvement. Specifically, Defendants assert that the Court should dismiss Plaintiffs' amended complaint because it impermissibly lumps together Defendants by corporate families and ascribes liability *to groups rather than to individual entities*. In support of this argument, Defendants rely on the Fourth Circuit Court of Appeals' decision in *SD3, LLC v. Black and Decker (U.S.) Inc.*, where the court affirmed the district court's dismissal of certain corporate parents and subsidiaries because the complaint alleged no facts suggesting corporate unity. *801 F.3d 412 (4th Cir. 2015)*. In *SD3*, the court stated:

---

[1] In addition, all Defendants filed a joint motion to stay discovery pending the Court's resolution of the motions to dismiss. (*See* ECF No. 125.) Based on the Court's findings herein, the motion to stay is moot.

> A plaintiff in a *§ 1* case cannot assemble some collection of defendants and then make vague, non-specific allegations against all of them as a group. At trial, a *§ 1* plaintiff will be required to make a "factual showing that each defendant conspired in violation of the antitrust laws." *AD/SAT, Div. of Skylight, Inc. v. Associated Press, 181 F.3d 216, 234 (2d Cir. 1999)*; *cf.* *United States v. Foley, 598 F.2d 1323, 1336 (4th Cir.1979)* (examining whether a jury charge in a criminal **[*12]** antitrust case "require[d] a sufficient involvement by each defendant"). Thus, the complaint must forecast that factual showing, and if it fails to allege particular facts against a particular defendant, then the defendant must be dismissed. In other words, the complaint must "specify how these defendants [were] involved in the alleged conspiracy," without relying on "indeterminate assertions" against all "defendants." *In re Travel Agent Comm'n Antitrust Litig., 583 F.3d 896, 905 (6th Cir. 2009)*; *see also* *Total Benefits Planning Agency, Inc. v. Anthem Blue Cross & Blue Shield, 552 F.3d 430, 436 (6th Cir. 2008)*; *In re Elevator Antitrust Litig., 502 F.3d 47, 50-51 (2d Cir. 2007)*.

Id. at 422-23.

In *SD3*, the Fourth Circuit Court of Appeals determined that the plaintiff "nakedly alleges that all of the corporate subsidiaries are 'dominated by, and [are] alter ego[s] of,' these corporate parents," but that such an allegation "offers only a legal conclusion, and [the plaintiff] *has alleged no facts suggesting the kind of unity of interests that we usually require a party to plead before permitting them to advance an alter ego theory*." *Id.* (citing *C.F. Trust, Inc. v. First Flight Ltd. P'ship, 306 F.3d 126, 134 (4th Cir. 2002))* (emphasis added). The court stated: "The fact that two separate legal entities may have a corporate affiliation does not alter [the] pleading requirement to separately identify each defendant's involvement in the conspiracy." *Id. at 423* (quoting *In re Aluminum Warehousing Antitrust Litig., No. 13-md-2481 (KBF), 2015 U.S. Dist. LEXIS 26412, 2015 WL 1344429, at *2 (S.D.N.Y. March 4, 2015)*) (internal **[*13]** quotation marks omitted). Ultimately, the Fourth Circuit agreed with the district court that the complaint failed to allege facts pertaining to certain corporate parents and subsidiaries, stating that "*[a]ntitrust law doesn't recognize guilt by mere association, imputing corporate liability to any affiliate company unlucky enough to be a bystander to its sister company's alleged misdeeds*." *Id.* (emphasis added)

Here, Defendants assert that Plaintiffs' amended complaint adopts precisely this rejected approach. Defendants state: "Plaintiffs have sued 18 individual Defendants, yet nowhere in the Amended Complaint's more than 200 paragraphs is there a single allegation that identifies an alleged action taken by or on behalf of an individual entity." (ECF No. 78-1 at 11.) Instead, as Defendants point out, Plaintiffs' amended complaint groups Defendants according to their alleged corporate affiliation, for example, grouping the "LaFarge Defendants" collectively as "LaFarge" or the "Argos Defendants" collectively as "Argos." (*See* Am. Compl., ECF No. 48 ¶¶ 11-36.) As to each particular group of corporate Defendants, Plaintiffs then simply allege that the entities "are actual agents, apparent **[*14]** agents and/or alter egos of one another and operate and identify themselves as one company." (*Id.* ¶¶ 13, 19, 23, 27, 31, and 36.) In other words, as to the "LaFarge" Defendants, for example, Plaintiffs state: "Defendants LaFarge North America Inc. and LaFarge Building Materials Inc. are actual agents, apparent agents and/or alter egos of one another and operate and identify themselves as one company (herein collectively 'LaFarge')."[2] (*Id.* ¶ 13.) Defendants assert that these allegations offer only bald legal conclusions and are insufficient in light of the Fourth Circuit's decision in *SD3* and other cases where courts have dismissed antitrust claims against defendants that have been indiscriminately lumped together into corporate families.

In response, Plaintiffs assert that the amended complaint's allegations exceed the minimal requirements set forth in *Twombly*. Plaintiffs state:

> Given the detailed allegations concerning individuals acting on behalf of Defendants, FAC ¶¶ 112-153, Defendants themselves are in a better position than Plaintiffs to know the relationship between affiliated corporate entities and the conduct of these individuals. Plaintiffs do not know the specific interrelationships **[*15]** and operations of the affiliated corporate Defendants, but they do know that each was

---

[2] At times Plaintiffs also appear to refer to the Lafarge entities as "LaFarge Cement" and/or "LaFarge Concrete." (*See* ECF No. 48 ¶¶ 114 and 116.)

> registered to conduct business or had operations (or both), in South Carolina or Georgia (or both) where the conspiracy took place.
>
> In addition, Plaintiffs have pled the role of the named Defendants in far more detail than required. Defendants comprise four conspiring suppliers of Ready Mix Concrete (with some change in ownership during the conspiracy) and are made up of related corporate entities that 'are actual agents or apparent agents of one another *and operate and identify themselves as one company*": LaFarge Concrete, which was purchased by Argos Concrete ("LaFarge/Argos"); Evans Concrete ("Evans"); Elite Concrete ("Elite"); and Coastal Concrete, which was purchased by Thomas Concrete ("Coastal/Thomas"). *Id.* ¶¶ 13, 19, 23, 27, 31 and 36 (emphasis added). Plaintiffs' grouping of corporate Defendants under a single heading is not simply "shorthand;" it is how Defendants operated and identified themselves.

(ECF No. 104 at 9-10.)

According to Plaintiffs, the amended complaint identifies the individuals who engaged in specific conduct on behalf of Defendants, including (1) Greg Melton, Kim Pedrick, **[*16]** and Andy Stankwytch, acting on behalf of LaFarge and Argos, (2) Greg Melton, Troy Baird, and Trey Cook, acting on behalf of Elite, (3) Tim Coughlin and Tim Mahoney, acting on behalf of Coastal, and (4) Tommy Strickland and Bo Strickland, acting on behalf of Evans. Plaintiffs refer to paragraph 37 of the amended complaint, which states that "[t]he acts alleged to have been done by Defendants and their co-conspirators were authorized, ordered and performed by their officers, directors, agents, employees or representatives while engaged in the management, direction, control or transaction of Defendants' business affairs." (ECF No. 48 ¶ 37.) Plaintiffs further assert that the named individuals were employees of Defendants and that several of them own the named Defendants, stating: "Based on these allegations, the Court *may infer* that these individuals acted on behalf of the entities they owned." (ECF No. 104 at 11 (emphasis added).)

In reply, Defendants assert that Plaintiffs are improperly attempting to shift the burden of alleging sufficient factual allegations to them and that the cases cited by Plaintiffs are inapposite. (ECF No. 104 at 9.) After review, the Court agrees with Defendants. **[*17]** In footnote 1 of their response, Plaintiffs cite *Fields v. Norfolk & S. Ry. Co.*, where the court stated: "Defendant . . . given its superior knowledge of the relationship and business activities of north Norfolk Southern Railway Company and Norfolk Southern Corporation, should have known the party Plaintiffs intended to sue." *924 F. Supp. 2d 702, 708 (S.D. W.Va. 2012)*. However, as Defendants point out, *Fields* did not involve an alleged conspiracy and instead was a case where the plaintiffs wrongfully listed the name of Defendant Norfolk Southern Railway Company as "Norfolk and Southern Railway Company d.b.a. Norfolk and Southern Corporation." The court held that the defendant would not be prejudiced if the plaintiffs were allowed to amend the complaint to correct the name because the defendant had notice of the suit and should have known the party that the plaintiff intended to sue. The facts of *Fields* are entirely distinguishable from the instant case, where Defendants allege a fundamental pleading deficiency in Plaintiffs' amended complaint.

Likewise, the Court agrees with Defendants that Plaintiffs' reference to *In re Catfish Antitrust Litigation* is unavailing. *826 F. Supp. 1019 (N.D. Miss. 1993)*. In *Catfish*, the court stated that "in cases which implicate **[*18]** corporate or business fraud, plaintiffs cannot be expected to have knowledge of all the details which undergird the alleged fraudulent scheme. . . . Especially in the early stages of litigation where pleadings are filed before the commencement of discovery, courts are counseled to exercise caution in granting a motion to dismiss based upon *Rule 9(b)* where the facts underlying the claims are within the defendant's control." *Id. at 1029-30*. Here, as Defendants point out, *Catfish* predates the Supreme Court's decision in *Twombly*, and *Catfish* interprets the pleading standard under *Federal Rule of Civil Procedure 9(b)*, which is not at issue in this case. Ultimately, the Court agrees with Defendants that these decisions do nothing to alter the Fourth Circuit's conclusion in *SD3* that "[t]he fact that two separate legal entities may have a corporate affiliation does not alter [the] pleading requirement to separately identify *each defendant's* involvement in the conspiracy." *801 F.3d at 423* (internal quotation marks omitted) (emphasis added).

Plaintiffs assert that they *have* alleged the specific involvement of each Defendant by alleging that the affiliated corporations "operate[d] and identif[ied] themselves as one company, and by alleging that the named individuals **[*19]** and others "participated in meetings, communications and other conduct on behalf of these 'companies' in order to fix the price of ready-mix concrete and enforce their agreements." (ECF No. 104 at 13.) However, in their response Plaintiffs assert that they do not know the interrelationships of the corporate Defendants, so it would appear that any allegation that the individual entities operated as one company "is necessarily pure conjecture." (*See* ECF No. 113 at 8.) Even leaving that issue aside, however, after review of the amended complaint, the Court agrees with Defendants that Plaintiffs offer *no factual allegations* to support the naked assertion that the various corporate entities "are actual agents, apparent agents and/or alter egos of one another and operate and identify themselves as one company." As the Fourth Circuit determined in *SD3*, Plaintiffs "nakedly allege[ ] that all of the corporate subsidiaries are 'dominated by, and [are] alter ego[s] of,' these corporate parents," but such an allegation "offers only a legal conclusion, and [Plaintiffs have] *alleged no facts suggesting the kind of unity of interests that we usually require a party to plead before permitting them* ***[*20]*** *to advance an alter ego theory*." *801 F.3d at 423* (citing *C.F. Trust, Inc. v. First Flight Ltd. P'ship, 306 F.3d 126, 134 (4th Cir. 2002))* (emphasis added).

In support of their assertion that the first amended complaint contains sufficient factual allegations, Plaintiffs cite *Connor v. Honeywell Internat'l Inc., No. 2:12-1421-CWHBHH, 2012 U.S. Dist. LEXIS 181571, 2012 WL 6135193 (D.S.C. Nov. 13, 2013)*; however, *Connor* is distinguishable from this case. In *Connor*, affiliated corporate defendants sought dismissal of the plaintiff's claims under the Telephone Consumer Protection Act, *47 U.S.C. § 227*, by claiming that it was not clear which defendant or defendants were alleged to have committed which wrong. The court stated that it was "initially inclined to allow the plaintiff an opportunity to amend the complaint to clarify which conduct was attributable to which defendant." *Id. 2012 U.S. Dist. LEXIS 181571, [WL] at *1*. However, after the plaintiff represented that it was his view that the defendants were acting in concert to make the calls in question, the court found the complaint adequate. The court stated: "*The Complaint bears witness. In fact, he very precisely avers that on both calls the representative identified as being associate with "ISI/Honeywell*." *Id.* (emphasis added). Thus, the factual allegations in the plaintiffs' complaint in *Connor* supported the assertion that the defendants acted together. In **[*21]** contrast, here, Plaintiffs' amended complaint merely alleges the legal conclusion that the affiliated corporate entities were agents and/or alter egos and operated as one company, but the amended complaint contains *no factual allegations* to support that legal conclusion.

Plaintiffs also rely on *In re Cathode Ray Tube (CRT) Antitrust Litigation, 738 F. Supp. 2d 1011, (N.D. Cal. 2010)*, but again, the Court finds Plaintiffs' reliance on this case misplaced. Plaintiffs state that in *Cathode Ray Tube*, the court denied a motion to dismiss based on the plaintiffs' alleged failure to adequately plead claims against each corporate defendant, and Plaintiffs point out that the court noted that plaintiffs in antitrust actions are not required to "plead detailed, defendant-by-defendant allegations; instead plaintiffs are only required 'to make allegations that plausibly suggest that each Defendant participated in the alleged conspiracy.'" *Id. at 1019* (citing *In re TFT-LCD (Flat Panel) Antitrust Litig., 599 F. Supp. 2d 1179, 1185 (N.D. Cal. 2009))*. Here again, however, the court in *Cathode Ray Tube* also noted that the complaint contained factual allegations concerning the specific defendants' participation in the alleged conspiracy. The court stated:

> Although Plaintiffs often refer to a corporate family by a single name, they allege that employees engaged in conspiratorial meetings **[*22]** on behalf of members of their corporate families, that participants did not always know the corporate affiliation of their counterparts and did not distinguish between the entities within a corporate affiliation of their counterparts and did not distinguish between entities within a corporate family, and that participants "entered into agreements on behalf of, and reported these meetings and discussions to, their respective corporate families. As a result, the entire corporate family was represented in meetings and discussions by their agents and was a party to the agreements reached in them."

Id. The court also noted that the complaint described the relationships between the parties and alleged that the parent corporation dominated and controlled the other entities. These types of factual allegations are simply not present in this case.

Lastly, the Court agrees with Defendants that Plaintiffs' reliance on *In re Lithium Ion Batteries Antitrust Litigation is unavailing. No. 13-MD-2420-YGR, 2014 U.S. Dist. LEXIS 141358, 2014 WL 4955377 (N.D. Cal. Oct. 2, 2014)*. There, "NEC Corp. argue[d] that the complaints improperly group[ed] it with NEC Tokin under the label 'NEC' and thus obscure[d] the identity of the alleged conspirator." *Id. 2014 U.S. Dist. LEXIS 141358, [WL] at *33*. The court rejected the argument **[*23]** and noted that the plaintiffs had "directly quote[d] documents where defendants themselves allegedly referred simply to 'NEC,'" and the court found these references sufficient to "implicate both NEC Corp. and NEC Tokin." *Id.* Here, there is no allegation that the affiliated corporate entities referred to themselves in documents or through employees as a single entity. Moreover, as Defendants point out, the court in *Lithium Ion Batteries* also noted that "an allegation that individual members of a corporate group joined the alleged conspiracies through their corporate affiliation alone would be precisely the sort of legal conclusion couched as a factual allegation that *Twombly* and *Iqbal* deemed insufficient to state a claim." *Id.* at 31 (internal quotation marks and citations omitted).

Ultimately, the Court cannot overlook the Fourth Circuit's clear guidance in *SD3*. Plaintiffs' amended complaint simply lumps together members of corporate families and states that the affiliated corporate entities "are actual agents, apparent agents and/or alter egos of one another and operate and identify themselves as one company,"[3] but the amended complaint contains no factual allegations to support this legal conclusion. **[*24]** For example, the amended complaint does not allege any facts showing that the entities failed to observe proper corporate form or that they identified themselves in documents or in meetings as one company, and the amended complaint does not even allege which entity or entities employed the individuals who allegedly attended specific meetings on behalf of the lumped-together entities. As in *SD3*, Plaintiffs' first amended complaint "nakedly alleges that all of the corporate subsidiaries are 'dominated by, and [are] alter ego[s] of,' these corporate parents," but such an allegation "offers only a legal conclusion, and [Plaintiffs have] alleged no facts suggesting the kind of unity of interests that we usually require a party to plead before permitting them to advance an alter ego theory." *801 F.3d 422-23* (citing *C.F. Trust, Inc. v. First Flight Ltd. P'ship, 306 F.3d 126, 134 (4th Cir. 2002))*. As the Fourth Circuit clearly stated: "The fact that two separate legal entities may have a corporate affiliation does not alter [the] pleading requirement to separately identify each defendant's involvement in the conspiracy." *Id.* (quoting *In re Aluminum Warehousing Antitrust Litig., No. 13-md-2481 (KBF), 2015 U.S. Dist. LEXIS 26412, 2015 WL 1344429, at *2 (S.D.N.Y. March 23, 2015))* (internal quotation marks omitted). "***Antitrust law*** doesn't recognize guilt by mere association, **[*25]** imputing corporate liability to any affiliate company unlucky enough to be a bystander to its sister company's alleged misdeeds." *Id.*

For the reasons stated in this order, **the Court grants Defendants' joint motion to dismiss (ECF No. 78) and the Lafarge Defendants' motion to dismiss (ECF No. 98)**[4]; however, in the interests of fairness and justice, the Court dismisses this action as to all Defendants **without prejudice**. Stated simply, the factual allegations that Plaintiffs' complaint *does* contain are not frivolous and to the extent that Plaintiffs can file an action containing sufficient factual allegations as to *each Defendant*, the Court does not believe this dismissal should preclude them from doing so, particularly when this case is still in the early stages.[5]

AND IT IS SO ORDERED.

/s/ Bruce H. Hendricks

The Honorable Bruce Howe Hendricks

United States District Judge

---

[3] The inadequacy of Plaintiffs' grouping of Defendants is further highlighted by the fact that Plaintiffs sued both Coastal Concrete Company, Inc., and Coastal Southeast II, LLC, nakedly asserting that these two entities "operate and identify themselves as one company," when in fact the two companies have no common ownership and are not related. On March 29, 2018, Plaintiffs filed a notice voluntarily dismissing Coastal Concrete Company, Inc. from this action. (*See* ECF No. 109.)

[4] This order also has the effect of granting Defendant Elite Concrete of Richmond Hill, LLC's motion (ECF No. 96), wherein Elite Concrete of Richmond Hill, LLC joined the arguments raised in the joint Defendants' motion to dismiss (ECF No. 96), but only for the reasons set forth in this order.

[5] The Court also recognizes that Defendants have raised a number of other issues and defenses in their motions to dismiss, and the Court may face those questions again; however, because it is not clear whether Plaintiffs will re-file this action, or even against which parties Plaintiffs may re-file this action, the Court will reserve its ruling on those questions until an appropriate time.

Opinion

[*106] FINDINGS OF FACT AND CONCLUSIONS OF LAW

Bartle, J.

The Federal Trade Commission ("FTC") has sued defendants AbbVie Inc., Abbott Laboratories, and Unimed Pharmaceuticals LLC (collectively, "AbbVie"), as well as Besins Healthcare, Inc. ("Besins"), for violation of *section 5(a)* of the *Federal Trade Commission Act ("FTC Act")*, *15 U.S.C. § 45(a)*, which prohibits "[u]nfair methods of competition in or affecting commerce."

AbbVie and Besins together own U.S. Patent No. 6,503,894 ("'894 patent") for a brand-name testosterone replacement drug, AndroGel 1%. In Count I of the complaint, the FTC alleges that AbbVie and Besins maintained an illegal monopoly through the filing of sham patent infringement lawsuits against two potential competitors, Teva Pharmaceuticals USA, Inc. ("Teva") and Perrigo Company ("Perrigo"), to delay entry into the market of their generic versions of AndroGel.[1]

To prevail in this antitrust litigation, the FTC must prove that defendants possessed monopoly power in the relevant market and that defendants willfully acquired or maintained that power. See *Mylan Pharms. Inc. v. Warner Chilcott Pub. Ltd. Co., 838 F.3d 421, 433 (3d Cir. 2016)*. Here, the FTC asserts **[**3]** that defendants maintained their AndroGel monopoly through the filing of sham litigation against Teva and Perrigo. To prove its case, the FTC must establish: (1) the lawsuits filed by defendants against Teva and Perrigo were objectively baseless; (2) defendants subjectively intended to file such lawsuits; and (3) that defendants possessed monopoly power in the relevant market. See *Prof'l Real Estate Inv'rs, Inc. v. Columbia Pictures Indus., Inc., 508 U.S. 49, 60-61, 113 S. Ct. 1920, 123 L. Ed. 2d 611 (1993)* ("PRE"); *In re Wellbutrin XL Antitrust Litig., 868 F.3d 132, 148-49 (3d Cir. 2017)*.

On September 15, 2017, this court ruled that defendants' infringement lawsuits against Teva and Perrigo were objectively baseless and entered summary judgment in favor of the FTC on this issue. See *FTC v. AbbVie Inc., No. 14-5151, 2017 U.S. Dist. LEXIS 149824, 2017 WL 4098688, at *11 (E.D. Pa. Sept. 15, 2017)* (Doc. # 300). Thereafter the court held an approximately three-week nonjury trial on the issues of subjective intent and monopoly power. The court now makes the following findings of fact and conclusions of law.

I

To understand the claim presented in this action, we first set forth the regulatory scheme that governs the testing and approval of new drugs in the United **[*107]** States. That framework is governed by the *Federal Food, Drug, and Cosmetic Act ("FDCA"), 21 U.S.C. §§ 301 et seq.*, as amended by the Drug Price Competition and Patent Term Restoration Act of 1984, which is commonly known as the *Hatch-Waxman Act, 21 U.S.C. § 355* and *35 U.S.C. § 271*. See *Pub. L. No. 98-417, 98 Stat. 1585*.

A drug **[**4]** manufacturer seeking to market a new drug must obtain approval from the U.S. Food and Drug Administration ("FDA"). See *21 U.S.C. § 355(a)*. There are three pathways established by the FDCA and Hatch-Waxman: (1) a section 505(b)(1) New Drug Application ("NDA"); (2) a section 505(b)(2) NDA; and (3) a section 505(j) Abbreviated New Drug Application ("ANDA").

An NDA is a full-length application containing information on the drug's safety and efficacy, an explanation of the drug's ingredients, a description of the methods used in the manufacture and packaging of the drug, samples of the proposed labeling, and samples of the drug itself. See id. *§ 355(b)(1)*. The NDA must also contain a list of any patents covering the drug. Id.

---

[1] In count II of the complaint, the FTC alleged that the settlement between Teva and the other defendants constituted an improper restraint of trade in violation of the FTC Act. On May 6, 2015, this court granted the motion of defendants to dismiss count II of the complaint, as well as count I to the extent it was premised on the settlement agreements with Teva. As a result, Teva was dismissed as a defendant in this action and only the claim involving sham lawsuits in Count I remains.

Once the FDA has approved a new brand-name drug, an applicant with a generic version of that drug can obtain approval through the use of abbreviated procedures. See *21 U.S.C. § 355(j)*. Most commonly, the applicant will file a section 505(j) ANDA stating, among other things, that the generic has the same active ingredients and is biologically and pharmacologically equivalent to the brand-name drug. Id. *§ 355(j)(2)(A)*. The applicant may then rely on the safety and efficacy data contained in the NDA for the brand-name drug. Id.

In the alternative, the applicant with a generic drug may file a section 505(b)(2) NDA, which is a **[**5]** hybrid between an ANDA and a full NDA. A section 505(b)(2) NDA is used for generics that have slight modifications from the brand-name drug. See *21 C.F.R. § 314.54*. The applicant must submit additional data to the FDA demonstrating that any differences between the brand-name drug and the generic will not affect safety and efficacy but can otherwise avoid the other studies necessary for a full NDA application. Id.; see also *Ethypharm S.A. France v. Abbott Labs., 707 F.3d 223, 227 (3d Cir. 2013)*. Because the Hatch-Waxman Act allows the applicant to "piggy-back" on the efforts for the approval of the brand-name drug, its provisions "speed the introduction of low-cost generic drugs to market" and thereby promote drug competition. *FTC v. Actavis, Inc., 570 U.S. 136, 142, 133 S. Ct. 2223, 186 L. Ed. 2d 343 (2013)* (quoting *Caraco Pharm. Labs., Ltd. v. Novo Nordisk A/S, 566 U.S. 399, 405, 132 S. Ct. 1670, 182 L. Ed. 2d 678 (2012)* (alteration omitted)).

Once the FDA approves a generic drug, the applicant may request from the FDA a therapeutic equivalence ("TE") rating. A TE rating is a code that reflects the FDA's determination regarding whether a generic product is pharmaceutically and biologically equivalent to the reference-listed brand-name drug. Products that are determined to be therapeutically equivalent are assigned an "A" or "AB" rating. Generic products for which therapeutic equivalence cannot be determined are assigned a "B" or "BX" rating.[2] An "A" or "AB" rating is **[*108]** extremely **[**6]** desirable. Every state in the United States has generic substitution laws. See *Mylan Pharms. Inc., 838 F.3d at 428*. These laws "either permit or require pharmacists to dispense a therapeutically equivalent, lower-cost generic drug in place of a brand drug absent express direction from the prescribing physician that the prescription must be dispensed as written." Id. (internal quotation marks and citations omitted).

The Hatch-Waxman Act also provides specialized procedures for parties to resolve intellectual property disputes. In submitting an ANDA or section 505(b)(2) NDA, an applicant must certify that any patent currently in force for the referenced brand-name drug "is invalid or will not be infringed by the manufacture, use, or sale" of the proposed generic. *21 U.S.C. § 355(j)(2)(A)(vii)*. This certification is commonly referred to as a paragraph IV notice. *Actavis, 570 U.S. at 143*.

The paragraph IV notice "automatically counts as patent infringement" and thus often leads to an infringement suit by the patentee. Id. (citing *35 U.S.C. § 271(e)(2)(A)*). Upon receiving the paragraph IV notice, the patentee has 45 days to determine whether to file suit for infringement. *21 U.S.C. § 355(j)(5)(B)(iii)*. The notice often includes an offer of confidential access whereby outside counsel **[**7]** for the patentee may review the application submitted to the FDA by the generic applicant to facilitate a determination regarding infringement litigation. If the patentee files an infringement suit against a generic entity within this 45-day period, the FDA is required to withhold approval of the generic drug for 30 months from receipt of the paragraph IV notice or until the infringement action is resolved in the district court, whichever occurs first. Id.

II

AndroGel is a brand-name transdermal testosterone gel product approved by the FDA for the treatment of hypogonadism, a clinical syndrome that results from failure of a man's body to produce adequate amounts of

---

[2] "A" and "B" are the two general categories into which the FDA sorts drugs when evaluating therapeutic equivalence. Within these two categories are various subcategories depending on the type of product (i.e., oral, injectable, solution, or powder) and other factors. For our purposes we will focus on "AB," which means "actual or potential bioequivalence problems have been resolved with adequate in vivo and/or in vitro evidence supporting bioequivalence," and "BX," which is "specific drug products for which the data that have been reviewed by the Agency are insufficient to determine therapeutic equivalence." See U.S. Food & Drug Admin., Center for Drug Evaluation & Research, Approved Drug Products with Therapeutic Equivalence Evaluations, at xiii, xx (38th ed. 2018), https://www.fda.gov/Drugs/DevelopmentApprovalProcess/ucm079068.htm#_ftn4 .

testosterone. It is estimated that this condition affects 2-6% of the adult male population in the United States. Hypogonadism is a lifelong condition which causes decreases in energy and libido, erectile dysfunction, and changes in body composition including decreased bone density. Patients with hypogonadism are typically treated with testosterone replacement therapy ("TRT") whereby exogenous testosterone is administered.

The first TRTs approved by the FDA were injectables in which testosterone is dissolved in a liquid and **[**8]** then injected into a muscle of the body. Injectable testosterones were introduced in the 1950s and have been available in generic form for decades. They are administered every one to three weeks. While many patients receive injections at their doctors' office, some patients opt to self-administer injections at home or visit clinics specializing in TRT commonly known as "Low-T" centers. Because they are available in generic form, injectables generally require a five to ten dollar patient copay on most insurance plans and thus are the least expensive treatment method for hypogonadism.

Testosterone injections typically require two needles: a withdrawal needle and an **[*109]** injection needle. The withdrawal needle is typically a 20-gauge wide bore and 1-inch long needle required to withdraw the testosterone from the glass vial. After withdrawal, the patient must switch to a 21- or 22-gauge narrow bore and 1.5-inch long needle to administer the injection. This needle must then be inserted deep into a muscle, typically the buttocks or thigh, until the needle is no longer visible. Because a deep intramuscular injection is required, this treatment method may cause pain and discomfort which will vary **[**9]** from patient to patient. Injectables generally provide an initial peak in testosterone level at the time of injection followed by troughs or valleys as the injection wears off. This variation in testosterone level may cause swings in mood, libido, and energy.

TRTs may also be administered through a gel or patch which is applied to the skin and thereby absorbed into the bloodstream. This group of products is known as topical testosterone replacement therapies or transdermal testosterone replacement therapies ("TTRTs"). Androderm, the first testosterone patch, was released in the 1990s. It is applied once a day to the back, abdomen, thighs, or upper arms. The patch formulation delivers a steady level of testosterone without the peaks or valleys associated with injectables. It is relatively easy to apply, although the patch may cause skin irritation in some patients and may be visible depending on where it is applied. Testoderm, a testosterone patch worn on the scrotum, was also introduced in the 1990s.

AndroGel was launched in 2000 as the first FDA-approved testosterone gel. It is applied once a day to one or more application sites, including the upper arms, shoulders, and abdomen. AndroGel **[**10]** comes in two strengths: (1) 1%, which was the original formulation launched in June 2000; and (2) 1.62%, which was first sold in May 2011. At the time AndroGel 1% came on the market in 2000, it was available only in sachets. In 2004 it became available in a metered-dose pump. AbbVie discontinued manufacture of the AndroGel 1% pump in December 2013.

AndroGel 1% was developed through a collaboration between Unimed and various subsidiaries of Besins' parent company. At the time of its launch, AndroGel 1% was marketed and distributed by Solvay Pharmaceuticals, Inc. ("Solvay"), the parent company of Unimed. Abbott Laboratories acquired Solvay and Unimed in February 2010. At that time Solvay was renamed Abbott Products Inc. In January 2013, AbbVie assumed all of Abbott's proprietary pharmaceutical business, including AndroGel 1%.

As the first gel in the market, AndroGel achieved great commercial success and quickly became one of Solvay's "flagship" products. In 2009, AndroGel's U.S. net sales were approximately $604 million and in 2010, that number grew to $726 million. After AbbVie[3] acquired Solvay and Unimed in 2010, sales of AndroGel continued to grow, and AndroGel became one of AbbVie's **[**11]** blockbuster drugs. In 2011, U.S. net sales for AndroGel reached $874 billion and in 2012, U.S. net sales surpassed $1.15 billion. In 2013, AndroGel's U.S. net sales were approximately $1.035 billion while in 2014, net sales totaled $934 million. After entry of generic versions of AndroGel 1%, AndroGel U.S. net sales fell to $694 million in 2015. Throughout this time, AbbVie maintained a high profit margin of approximately 65% on AndroGel.

---

[3] As stated above, AbbVie acquired all of Abbott's proprietary pharmaceutical business in 2013. Hereafter we will refer to Abbott as "AbbVie."

[*110] Transdermal gels have several advantages over the other forms of TRTs. A gel is relatively easy for a patient to apply without the potential for pain or discomfort associated with an injection. It also allows the patient to maintain a steady testosterone level without peaks and troughs. As compared to the patch form of testosterone, it has a lower rate of irritation and is not visible.

Gels such as AndroGel, however, are not without some drawbacks. There is a serious but rare risk of secondary exposure associated with gels, whereby testosterone may be transferred from a patient to others, including women and children, through skin-to-skin contact. Precautions such as washing hands after application and covering the application site with a t-shirt can **[**12]** prevent such exposure. Gels may also cause skin irritation in some patients. Finally, some patients may dislike having to apply the gel daily.

After AndroGel was released in 2000, several other brand-name TTRTs were launched by competing pharmaceutical companies. Testim, a 1% gel available in a five gram tube, was approved in 2002. In 2011, two brand-name testosterone 2% gels were brought to market: (1) Fortesta, a metered-dose pump product applied to the thighs; and (2) Axiron, a solution that is dispensed from a metered-dose pump and is applied to the underarms using a silicon applicator. And in 2014 Vogelxo, another brand-name low-volume testosterone gel, was launched along with an authorized generic version of the same product.

In addition to injectables and TTRTs, several other forms of TRT have been approved by the FDA. Striant, a buccal testosterone tablet that is applied twice daily to gums, was released in 2003. Testopel, a pellet that is surgically inserted in the hip, buttocks, or thigh every three to six months, was approved in 2008. And in 2014 the FDA approved Natesto, a nasal testosterone spray that is administered three times a day.

AndroGel 1% is protected by the '894 patent. That **[**13]** patent is owned by Besins and by Unimed, which as discussed above, was a wholly-owned subsidiary of Solvay until 2010. Laboratoires Besins Iscovesco SA, a subsidiary ultimately owned by Besins' parent company and now known as Laboratoires Besins Iscovesco SAS ("LBI SAS"), licensed to Unimed certain intellectual property rights to AndroGel. In return, Unimed was obligated to pay a royalty on net sales of AndroGel. Under a separate supply agreement, LBI SAS agreed to manufacture and to sell to Unimed AndroGel products for sale and distribution by Unimed in the United States.[4]

We have previously discussed the prosecution history of the '894 patent in our September 15, 2017 Memorandum (Doc. # 300) and therefore need not restate it in detail here. See *AbbVie, 2017 U.S. Dist. LEXIS 149824, 2017 WL 4098688, at *1-4*. In summary, the initial patent application that resulted in the '894 patent claimed a pharmaceutical composition of a testosterone gel including a penetration enhancer, which according to the patent application "is an agent known to accelerate the delivery of the drug through the skin into the bloodstream." *2017 U.S. Dist. LEXIS 149824, [WL] at *1-2*. The patent application claimed all penetration enhancers including isopropyl myristate, the penetration enhancer actually used in AndroGel. *2017 U.S. Dist. LEXIS 149824, [WL] at *2*. The patent examiner **[**14]** at the U.S. Patent and Trademark Office ("PTO") rejected the claim which included **[*111]** all penetration enhancers. Id. Thereafter, Unimed and Besins submitted an amendment narrowing their claim encompassing all penetration enhancers to a claim naming only twenty-four specific penetration enhancers, including isopropyl myristate. *2017 U.S. Dist. LEXIS 149824, [WL] at *2-3*. After a series of additional amendments, Unimed and Besins further narrowed their claim to one penetration enhancer, isopropyl myristate, only. *2017 U.S. Dist. LEXIS 149824, [WL] at *3*. On this basis, the '894 patent was issued on January 7, 2003. *2017 U.S. Dist. LEXIS 149824, [WL] at *4*. It is scheduled to expire on January 6, 2020.

As is often the case with successful pharmaceutical products, generic manufacturers sought entry into the market to compete with AndroGel. In December 2008, Perrigo submitted to the FDA two ANDAs for a generic testosterone 1% gel in both pump and packet form. The ANDAs referenced AndroGel and the '894 patent. However, the Perrigo product contained isostearic acid as its penetration enhancer rather than AndroGel's isopropyl myristate claimed in the '894 patent.

---

[4] AbbVie and Besins later amended the license and supply agreements to include AndroGel 1.62%. Royalties on U.S. sales of AndroGel 1.62% are paid to LBI SAS or Besins Healthcare Luxembourg SARL ("BHL SARL").

Pursuant to the procedures established by the Hatch-Waxman Act, Perrigo in June 2009 served paragraph IV notices on both Unimed and Besins as co-owners of the '894 patent. In those notices, Perrigo **[**15]** disclosed the filing of its ANDAs for a generic 1% testosterone gel. Perrigo further asserted that its ANDAs would not infringe the '894 patent for AndroGel because the Perrigo products did not contain "about 0.1% to about 5% isopropyl myristate," the sole penetration enhancer formulation claimed in the patent. Perrigo also stated in its notices that the prosecution history of the '894 patent would estop Unimed and Besins from filing a patent infringement claim. Finally, Perrigo offered to provide to outside counsel representing Unimed and Besins confidential access to the full ANDAs.

Thereafter Unimed and Besins, along with Unimed's parent Solvay, jointly retained the law firm of Finnegan, Henderson, Farabow, Garrett and Dunner, LLP ("Finnegan, Henderson") to assess the Perrigo paragraph IV notices and the Perrigo ANDAs. Finnegan, Henderson obtained confidential access to the full ANDAs and confirmed that Perrigo's ANDAs contained isostearic acid, not isopropyl myristate. Besins also separately retained the law firm of Foley and Lardner LLP ("Foley and Lardner"). Outside counsel at Foley and Lardner did not receive confidential access to the ANDAs.

On July 17, 2009, Solvay and Unimed issued a press release **[**16]** announcing that "[a]fter careful evaluation" the companies had decided not to file a patent infringement suit against Perrigo. The press release explained that the Perrigo product "contains a different formulation than the formulation protected by the AndroGel patent." It further stated that "[t]his distinction played a role in the company's decision not to file patent infringement litigation at this time" but "the company does not waive its right to initiate patent infringement litigation at a later stage based on new or additional facts and circumstances." The ultimate decision not to file suit was made by Solvay in-house attorneys Shannon Klinger, Peter Edwards, and Dominique Dussard. Besins also determined that it was "standing down" from bringing an infringement suit but did not join in the Solvay press release or issue its own public announcement.

Sometime in 2009, the FDA became aware of cases of accidental secondary exposure of children to TTRTs due to skin-to-skin transference from patients using these products. Based on this information, the FDA required safety-related labeling changes and a Risk Evaluation and Mitigation Strategy ("REMS") for transdermal **[*112]** testosterone gel **[**17]** products currently on the market. Thereafter Auxilium Pharmaceuticals, Inc., the manufacturer of Testim, submitted a citizen petition to the FDA regarding a generic version of Testim. To facilitate the drug approval process, the FDA permits private entities to provide comments and opinions by filing citizen petitions. *21 C.F.R. § 10.30*. A petition can request that the FDA "issue, amend, or revoke a regulation or order or take or refrain from taking any other form of administrative action." Id.

In response to the Auxilium citizen petition, the FDA directed on August 26, 2009 that any application for a generic testosterone gel product containing a penetration enhancer different from the referenced brand-name drug would be required to be submitted as a section 505(b)(2) NDA rather than an ANDA. The application must also include certain additional safety studies regarding the risk of secondary exposure.

On April 9, 2010, AbbVie, now the owner of AndroGel, filed its own citizen petition with the FDA. In that petition, AbbVie noted the FDA's ruling in response to the Auxilium citizen petition regarding all generic testosterone products containing penetration enhancers different than those contained in the reference-listed brand-name **[**18]** drug. AbbVie thus sought assurance from the FDA that Perrigo would be required to resubmit its 2009 ANDAs referencing AndroGel as section 505(b)(2) NDAs. AbbVie also requested that Perrigo be directed to provide to the AndroGel patent holders a new paragraph IV notice. Finally, it asked that Perrigo be required to conduct transfer and hand-washing studies as set forth in the FDA's response to the Auxilium petition.

On October 4, 2010, the FDA granted in part and denied in part AbbVie's citizen petition. The FDA directed that any application by a generic manufacturer for a product referencing AndroGel that contained a different penetration enhancer must be submitted as a section 505(b)(2) NDA. It also agreed that the applicants would be required to submit new paragraph IV notices.

On January 13, 2011, Teva filed a section 505(b)(2) NDA for its generic version of AndroGel 1% which described a different penetration enhancer, isopropyl palmitate, than AbbVie used in its brand-name AndroGel. The application sought approval to manufacture and to distribute the product in two different sachet sizes as well as in a pump form. This application superseded an ANDA for generic testosterone that Teva had filed on December 29, 2008, prior to the FDA's ruling on the **[**19]** Auxilium citizen petition.

On March 16, 2011, Teva sent to Solvay, AbbVie, Unimed, and Besins a paragraph IV notice regarding its section 505(b)(2) NDA. Teva asserted that its product did not infringe the '894 patent because "the Teva formulation does not contain isopropyl myristate," the penetration enhancer claimed in the '894 patent. Teva laid out the prosecution history of the '894 patent and its position that, because the claims of the '894 patent were narrowed to disclose only isopropyl myristate, "the prosecution history estops the patentees from asserting infringement under the doctrine of equivalents." Teva also offered confidential access to certain information regarding its section 505(b)(2) NDA to allow the patent holders to assess whether an infringement action would have merit.

AbbVie retained outside counsel at the law firm of Munger, Tolles and Olson LLP ("Munger Tolles") to evaluate the Teva paragraph IV notice. Counsel at Munger Tolles was provided with access to the Teva section 505(b)(2) NDA and provided in-house counsel at AbbVie with its opinion. **[*113]** Besins again retained Foley and Lardner to evaluate the notice. Foley and Lardner was supplied with confidential access to the NDA and submitted its analysis to Besins.

On April 29, 2011, within 45 days after receiving the paragraph IV notice, **[**20]** AbbVie, Unimed, and Besins commenced an action in the U.S. District Court for the District of Delaware alleging the Teva's product infringed the '894 patent.[5] See Abbott Prods., Inc. v. Teva Pharm. USA, Inc., No. 11-384 (D. Del. Apr. 29, 2011). The suit against Teva triggered the Hatch-Waxman automatic stay of FDA approval of the Teva product. Consequently, the FDA could not approve Teva's generic testosterone drug for 30 months after March 16, 2011 or until September 17, 2013 unless the district court resolved the lawsuit sooner.

The intellectual property ("IP") litigation group at AbbVie had direct accountability for patent litigation. Four in-house patent attorneys in that group had final responsibility for evaluating the Teva paragraph IV notice and made the decision to file the patent infringement suit against Teva: (1) Johanna Corbin; (2) Adam Chiss; (3) Anat Hakim; and (4) Jose Rivera. All of these attorneys had extensive experience in patent law and with AbbVie. Corbin is currently vice president of the IP group and the lead IP attorney at AbbVie who has worked in that group since 2005. Chiss was divisional vice president of IP litigation and before that had served as senior counsel in **[**21]** IP litigation. Anat Hakim was divisional vice president and associate general counsel of IP litigation at AbbVie and previously had been a partner at Foley and Lardner. Finally, Rivera was a divisional vice president of the IP group and had previously worked in private practice. The general counsel of AbbVie, Laura Schumacher, also signed off on the final decision. Schumacher has been with AbbVie since 2005. No business persons at AbbVie were involved in the decision to sue. At trial, AbbVie presented evidence that the decision whether to file a complaint is always made solely by the legal department and does not require approval from management.

As for Besins, the decision to sue was made by Thomas MacAllister, its in-house counsel. MacAllister is an experienced intellectual property attorney who previously worked as a patent examiner at the U.S. Patent and Trademark Office. Besins conferred with outside counsel as well as AbbVie about the Teva product and potential litigation. Like AbbVie, Besins or its agents had confidential access to the portions of Teva's NDA that disclosed the formulation of its product prior to filing the complaint against Teva. In addition, in-house counsel **[**22]** for Besins conferred with in-house counsel for AbbVie before making the decision to initiate the lawsuit.

Around this time AbbVie also was preparing for FDA approval and launch of its low-volume formulation of AndroGel, known as AndroGel 1.62%. The FDA issued final approval of brand-name AndroGel 1.62% on April 29, 2011, and AbbVie began selling it in May 2011. The 1.62% formulation is indicated for the same condition and has the same active ingredient but less total gel. Sales of AndroGel 1.62% grew more slowly after launch in 2011 than defendants initially anticipated but by June 2012 constituted the majority of total AndroGel sales. AndroGel 1.62%

---

[5] As one witness explained at trial, most patent infringement suits are filed in either the District of Delaware or the District of New Jersey because "they tend to be slow-moving dockets."

accounted for total AndroGel sales as follows: 57% **[*114]** during the last 7 months of 2012, 67% in 2013, 76% in 2014, and 83% in 2015.

In June 2011, Teva submitted a case status report proposing a schedule for early summary judgment proceedings in the patent infringement suit in the District of Delaware. AbbVie, Unimed, and Besins filed a supplemental case status report opposing any summary judgment proceedings. On August 1, 2011, before discovery had commenced, Teva filed a motion for summary judgment. Teva asserted that based on prosecution history **[**23]** estoppel there could be no viable claim of infringement of the '894 patent. On October 25, 2011, the court set trial on the issue of prosecution history estoppel for May 21, 2012.

On August 18, 2011, AbbVie filed a citizen petition with the FDA requesting that it refrain from granting a therapeutic equivalence rating to section 505(b)(2) products referencing AndroGel, including Teva's testosterone product, or in the alternative, requesting that it assign the product a BX rating. If a BX rating was assigned, there could be no automatic substitution at the pharmacy under state law.

Meanwhile, on July 4, 2011 Perrigo re-filed with the FDA its application for approval of a generic testosterone 1% gel as a section 505(b)(2) NDA. On September 20, 2011, Perrigo sent AbbVie, Unimed, and Besins a new paragraph IV notice. As in its 2009 notice, Perrigo certified that the '894 patent was not infringed because its generic testosterone product did not contain "about 0.1% to 0.5% isopropyl myristate," the penetration enhancer claimed in the patent.

Perrigo's letter also explained that the prosecution history of the '894 patent precluded any valid infringement claim. Perrigo stated that "a lawsuit asserting the '894 patent against Perrigo would be objectively baseless and a sham, brought in bad **[**24]** faith for the improper purpose of, inter alia, delaying Perrigo's NDA approval." It further asserted that "a bad faith motive for bringing such a suit would be particularly apparent in light of representations and admissions made, inter alia, in [Solvay's] Friday, July 17, 2009 press release." Perrigo offered confidential access to certain information regarding the NDA. Again, AbbVie and Unimed retained Munger Tolles as outside counsel to analyze Perrigo's NDA. Foley and Lardner evaluated Perrigo's NDA on behalf of Besins and also issued its opinion to Besins.

On October 31, 2011, AbbVie, Unimed, and Besins filed suit in the District of New Jersey alleging that Perrigo's 1% testosterone gel infringed the '894 patent. See Abbott Prods., Inc. v. Perrigo Co., 11-6357 (D.N.J. Oct. 31, 2011). As in the Teva litigation, the filing of the complaint against Perrigo triggered an automatic 30-month stay under the Hatch-Waxman Act. Thus, absent a court ruling or settlement resolving the litigation, the stay would preclude final FDA approval of the Perrigo generic testosterone product until March 20, 2014.

The same four AbbVie in-house attorneys as had made the decision to sue Teva again made the decision **[**25]** to file the suit against Perrigo with approval from the same general counsel. They conferred with outside counsel, who had confidential access to the Perrigo section 505(b)(2) NDA. No AbbVie business person was involved in the decision to file the Perrigo action. After consultation with AbbVie and outside counsel, Besins' same in-house attorney made the decision that it would join in bringing the Perrigo litigation.

AbbVie reached out to Teva to discuss an amicable resolution of the dispute before the complaint was filed in April 2011. Perry Siatis, an in-house attorney for AbbVie, **[*115]** was the main negotiator on behalf of AbbVie.[6] At that time, Siatis was Divisional Vice President of the IP strategy group and head intellectual property attorney at AbbVie. Although that initial contact did not lead to a settlement, AbbVie again raised the subject with Teva during an in-person meeting on October 28, 2011, three days after the court in the Teva litigation had set a trial date. Although Teva at the outset pushed for an entry date as early as September 17, 2013, the final date of the 30-month Hatch-Waxman stay, AbbVie countered with an entry date of January 1, 2015. AbbVie thereafter agreed to an entry date of December 27, **[**26]** 2014, which would allow Teva to make some sales in 2014. On December 20, 2011 the

[6] Siatis had no involvement in the decision to sue either Teva or Perrigo for patent infringement.

parties reached a final settlement in the Teva litigation, in which Teva received a license to launch its product beginning December 27, 2014.[7]

While the Teva negotiations were ongoing, settlement negotiations were taking place in the Perrigo litigation. Sometime on or before November 3, 2011, Siatis approached Perrigo to initiate settlement negotiations. On December 8, 2011 the parties executed a binding term sheet, which included the dismissal of all claims and counterclaims with prejudice. In addition, AbbVie agreed to pay Perrigo $2 million dollars as reasonable litigation expenses.

During the negotiations Perrigo pushed for an earlier entry date but was unsuccessful and ultimately accepted an offer from defendants of January 1, 2015. However, the settlement contained an acceleration clause whereby Perrigo would be permitted to launch if another generic came to market. Andrew Solomon, general counsel for Perrigo, explained that the company had been monitoring the Teva litigation and thought there was "a very good probability Teva could prevail" at the trial scheduled for May 2012 and thereafter launch **[**27]** its product, so "that would provide a much earlier Perrigo license date." As a result of the Teva settlement, Perrigo's licensed entry date was moved up to December 27, 2014 under the acceleration clause.

On February 14, 2012, the FDA approved Teva's section 505(b)(2) NDA for the packet presentation of its TTRT product. During review of the application, the FDA had identified a potential safety concern with the packaging used in the pump presentation of the drug.[8] In response to this concern, Teva withdrew the pump presentation from its application. As a result, the FDA approved Teva's product in sachet form only.

After receiving FDA approval, Teva waited for the FDA Office of Generic Drugs to assign a TE rating for its product. On December 21, 2012, AbbVie filed a citizen petition supplement requesting that the FDA refrain from granting a TE rating to Teva's product or, in the alternative, grant it a BX rating.

Later, on January 31, 2013, the FDA approved Perrigo's section 505(b)(2) NDA for its generic version of AndroGel 1%. Thereafter the FDA considered a TE rating for Perrigo's generic product. During **[*116]** this period, AbbVie filed an additional citizen petition on December 11, 2013. The December 11, 2013 citizen petition supplemented the **[**28]** August 18, 2011 citizen petition and requested that the FDA issue a BX rating for Perrigo's product.

In the months before its December 27, 2014 licensed entry date approached, Perrigo took a number of steps to follow up with the FDA regarding its TE rating. Perrigo sent three letters to the FDA. It received no response other than being informed that the FDA needed more time to evaluate the therapeutic equivalence of the product.

Perrigo filed a lawsuit against the FDA in the United States District Court for the District of Columbia on March 21, 2014. See Perrigo Israel Pharm. Ltd. v. U.S. Food & Drug Admin., No. 14-475 (D.D.C. Mar. 21, 2014). Perrigo asserted that the FDA had engaged in unreasonable delay. It requested that the court enter a mandatory injunction compelling the FDA to publish a TE rating for Perrigo's NDA product as soon as possible. On April 10, 2014, the FDA filed its first response to the lawsuit. The FDA contended that "Perrigo has itself obviated the need for a prompt decision by reaching an agreement with the innovator not to market until December 2014." The FDA further represented that it expected to issue a TE rating for Perrigo's product "by July 31, 2014—some **[**29]** five months before Perrigo's planned product launch."

Prior to the deadline, on July 23, 2014, the FDA determined that Perrigo's section 505(b)(2) NDA product was therapeutically equivalent to AndroGel and issued it an AB rating.[9] That same day, however, the FDA assigned a

[7] During this time AbbVie was negotiating with Teva regarding disputes related to two other drugs, Simcor and TriCor. Agreements related to Simcor and TriCor were executed on the same day as the AndroGel settlement. However, there is no evidence that these negotiations were linked to the AndroGel settlement.

[8] Specifically, during a meeting on June 27, 2011, the FDA recommended that Teva withdraw its pump configuration with the option to resubmit it as a post-approval amendment once the issue was resolved.

[9] Perrigo voluntarily dismissed the lawsuit on July 24, 2014, one day after the FDA issued its TE rating to Perrigo.

BX rating to Teva's product. Specifically, the FDA concluded that the data submitted by Teva was "insufficient to determine TE [therapeutic equivalence] to AndroGel 1%." As a result, under all state laws the Perrigo generic testosterone product would be auto-substitutable at the pharmacy for brand-name AndroGel 1% prescriptions, but the Teva product would not.

Perrigo launched its AB-rated generic version of AndroGel 1% on December 27, 2014, its licensed entry date under the settlement agreement with defendants. Perrigo would not have entered the market without first receiving a decision from the FDA on its TE rating. Perrigo achieved its goal to obtain an AB rating for its product and would have challenged the FDA had it received only a BX rating.

Teva, in contrast, never set in motion the sale of its generic testosterone replacement product. Timothy Crew, Teva's Commercial Operations Officer from the time that Teva filed its NDA until **[**30]** late 2012, was a strong proponent of bringing the Teva product to market even absent an AB rating. Crew identified a "'brand' push through managed care" marketing strategy in which Teva would go directly to managed care organizations and pharmacy benefit managers in an attempt to negotiate preferential formulary placement for a non-AB rated product and thereby influence physicians' prescribing decisions.[10] **[*117]** Crew considered the Teva generic testosterone product his "pet project."

Teva underwent management changes in November 2012. Crew left the company, and Alan Oberman became the new Chief Executive Officer of Teva. Shortly thereafter, Maureen Cavanaugh, Vice President of Customer Operations and Marketing for Teva, recommended to Oberman that Teva not launch the BX rated product. Cavanaugh explained that Teva's generic group had no sales force and had never launched a non-AB rated retail pharmacy product. She further opined that a BX-rated product with no perceived advantage over brand-name AndroGel would capture only 10-11% of the brand-name product's sales and perhaps less than 5%.

Teva faced other obstacles to launching its BX-rated product. Teva had contracted with Cipla, **[**31]** an India-based company, to manufacture its generic testosterone replacement drug. Before it could begin the manufacturing process, Cipla required a $10 million capital expenditure from Teva, which could be paid up front or over time through a 35% royalty on sales. Cipla projected that it would require 12-24 months or more to achieve operational readiness. Pursuant to another contract, Teva was also required to pay a royalty of 5-7.5% on sales to a third company, BioSante.

As discussed above, Teva had received FDA approval for the sachet presentation of its product only. At the time that Teva withdrew the pump presentation from consideration by the FDA, pump sales made up 40-50% of AndroGel sales. Thus the failure to obtain approval for a pump product had a negative impact on the commercial viability of Teva's product.

Ultimately, on May 1, 2015, Teva transferred ownership of the 505(b)(2) NDA product and all intellectual property necessary to market the product to ANI Pharmaceuticals, Inc. ("ANI"), its development partner.

III

To prevail on its claim of illegal monopolization, the FTC must establish that defendants filed sham litigation against Teva and Perrigo as outlined by the Supreme **[**32]** Court in *PRE*. Whether litigation is a sham involves a two part test. We have already resolved the first part of the test, that is, that the lawsuits were objectively baseless in the sense that "no reasonable litigant could realistically expect success on the merits." *AbbVie Inc., 2017 U.S. Dist. LEXIS 149824, 2017 WL 4098688, at *4* (quoting *PRE, 508 U.S. at 60*). The second part of the test requires the court to decide whether defendants subjectively intended to interfere directly with a competitor's business interests by using the government process as an anticompetitive weapon. *PRE, 508 U.S. at 60-61*. Only if the lawsuits were

---

[10] A formulary is a "listing of medications for which an insurer or managed care organization provides coverage." See *Saltzman v. Indep. Blue Cross, 384 F. App'x 107, 109 n.3 (3d Cir. 2010)* (citations omitted). Formularies generally divide medications into tiers with different copays for each tier. See *id. at 109*. Typically, the first tier includes generic medications with the lowest copay, while higher tiers include brand-name drugs with higher copays. See id.

both objectively and subjectively baseless will the FTC have demonstrated that defendants engaged in sham litigation.

As stated above, we have already determined that the lawsuits against Teva and Perrigo in 2011 were objectively baseless as a matter of law in light of the undisputed facts concerning the prosecution history of the '894 patent. See *AbbVie Inc., 2017 U.S. Dist. LEXIS 149824, 2017 WL 4098688, at *1-4, *11*. We found that Unimed and Besins secured the '894 patent only by amending their patent application from an initially broad claim covering all penetration enhancers to a narrow claim covering only one penetration enhancer—isopropyl myristate at a particular concentration. See *2017 U.S. Dist. LEXIS 149824, [WL] at *6-8, *10*. Instead of isopropyl myristate, Teva used isopropyl palmitate and **[**33]** Perrigo used isostearic acid as a penetration enhancer in their generic versions of AndroGel. We concluded that "any reasonable person **[*118]** who reads the prosecution history of the '894 patent can reach no other conclusion than that the applicants have purposefully and not tangentially excluded isopropyl palmitate and isostearic acid as penetration enhancers equivalent to isopropyl myristate." *2017 U.S. Dist. LEXIS 149824, [WL] at *11*.

We emphasized that "the purpose of prosecution history estoppel is to protect the patentees' competitors from patent infringement litigation based on the doctrine of equivalents if the prosecution history demonstrates that an equivalent not specifically disclosed in the patent has been purposefully and not tangentially excluded from its scope." *2017 U.S. Dist. LEXIS 149824, [WL] at *11*. Given the patent prosecution history for the '894 patent, AbbVie and Besins did not tangentially exclude all other penetration enhancers and could not reasonably have expected success on the merits in their suits against Teva and Perrigo alleging patent infringement under the doctrine of equivalents.[11] Id. Defendants cannot have it both ways. They cannot, as they did here, purposely surrender claims to all penetration enhancers except one to obtain a patent and then claim infringement **[**34]** when a party uses a penetration enhancer that they deliberately surrendered. See *2017 U.S. Dist. LEXIS 149824, [WL] at *10-11*.

We now focus our inquiry on the subjective component of the FTC's sham litigation claim, which was one of the issues litigated in the nonjury trial held in this action. At the outset, we readily acknowledge that a plaintiff claiming that a lawsuit was a sham faces an uphill battle. The *First Amendment to the United States Constitution* prohibits Congress from making any law respecting "the right of the people . . . to petition the Government for a redress of grievances." *U.S. Const. amend. I*. It is well-established that the *First Amendment* right to petition the government includes the right to have access to the courts. *PRE, 508 U.S. at 56-57*; see also *U.S. Const. amend. I*. Under the Noerr-Pennington doctrine articulated by the Supreme Court, "[t]hose who petition [the] government for redress are generally immune from antitrust liability."[12] *PRE, 508 U.S. at 56*. Noerr-Pennington immunity, however, is not absolute. "[A]ctivity 'ostensibly directed toward influencing governmental action' does not qualify for [*First Amendment*] immunity if it 'is a mere sham to cover . . . an attempt to interfere directly with the business relationships of a competitor.'" *Id. at 51* (quoting *E. R.R. Presidents Conference v. Noerr Motor Freight, Inc., 365 U.S. 127, 144, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961)* (alterations in original)).

Later, in City of Columbia v. Omni Outdoor **[**35]** Advertising, Inc., the Supreme Court explained:

> The 'sham' exception to Noerr encompasses situations in which persons use **[*119]** the governmental process—as opposed to the outcome of the process—as an anticompetitive weapon. A classic example is the

---

[11] Defendants have moved for reconsideration of that decision. On June 27, 2018, we denied the motion in a separate order (Doc. # 438).

[12] The Noerr-Pennington doctrine originated from two separate antitrust cases, *United Mine Workers of America v. Pennington, 381 U.S. 657, 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965)* and *Eastern Railroad Presidents Conference v. Noerr Motor Freight, Inc., 365 U.S. 127, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961)*. Pennington involved efforts by several companies and a union to lobby the Secretary of Labor regarding minimum wage regulations. *381 U.S. at 660*. In Noerr, a group of railroads engaged in a publicity campaign designed to foster the adoption of certain laws and regulations harmful to the trucking industry. *365 U.S. at 129-30*. The doctrine has since been extended to persons who petition the courts, in addition to legislatures and administrative agencies. See *Ca. Motor Transp. Co. v. Trucking Unlimited, 404 U.S. 508, 509-10, 92 S. Ct. 609, 30 L. Ed. 2d 642 (1972)*.

> filing of frivolous objections to the license application of a competitor, with no expectation of achieving denial of a license but simply in order to impose expense and delay.

499 U.S. 365, 380, 111 S. Ct. 1344, 113 L. Ed. 2d 382 (1991) (emphasis omitted).

We must initially decide not only the type of proof but also the burden of proof which are required to establish subjective intent. The parties disagree regarding both. According to defendants, the FTC must show that they brought the patent infringement actions with actual knowledge that actions were baseless. The FTC, in contrast, asserts that actual knowledge or bad faith is not required under PRE. Instead, the FTC argues that the subjective baselessness inquiry concerns only "whether the baseless lawsuit conceals an attempt to interfere directly with the business relationships of a competitor." See PRE, 508 U.S. at 60-61 (internal citation and quotation marks omitted). Accordingly, the FTC urges the court to focus on the "economic viability" of the lawsuit and whether defendants **[**36]** "sue[d] primarily for the benefit of collateral injuries inflicted through the use of legal process." Id. at 65.

Unfortunately, the Supreme Court in PRE did not elaborate on this issue. In that case, the Court of Appeals had affirmed an order granting summary judgment for the plaintiff on the defendant's counterclaim alleging a sham lawsuit. Id. at 62-65. The Supreme Court agreed with the Court of Appeals that the lawsuit was not objectively baseless and thus did not reach the subjective intent question. Id. at 65-66.

In support of its position, the FTC cites Kilopass Techology, Inc. v. Sidense Corp., 738 F.3d 1302 (Fed. Cir. 2013). That case, however, involved a motion for attorneys' fees under 35 U.S.C. § 285, which provides that a court "in exceptional cases may award reasonable attorneys' fees to the prevailing party." 738 F.3d at 1304, 1312. The Federal Circuit held that "actual knowledge of baselessness is not required" and that "a defendant need only prove reckless conduct to satisfy the subjective component of the § 285 analysis." Id. at 1310. It further explained that courts may "dra[w] an inference of bad faith from circumstantial evidence thereof when a patentee pursues claims that are devoid of merit" and that "[o]bjective baselessness alone can create a sufficient inference of bad faith to establish exceptionality under § 285, unless **[**37]** the circumstances as a whole show a lack of recklessness on the patentee's part." Id. at 1311, 1314.

Since then, the Supreme Court has expressly distinguished the standard for a claim of sham litigation from that applicable to motions for attorneys' fees under § 285. See Octane Fitness, LLC v. ICON Health & Fitness, Inc., 572 U.S. 545, 134 S. Ct. 1749, 1757-58, 188 L. Ed. 2d 816 (2014). The Court reasoned that the Noerr-Pennington doctrine was created as "a narrow exception for 'sham litigation'—to avoid chilling the exercise of the First Amendment right to petition the government for the redress of grievances." Id. at 1757. It further observed that "[t]he threat of antitrust liability . . . far more significantly chills the exercise of the right to petition than does the mere shifting of attorney's fees." Id. Thus the standard for fee-shifting, which is governed by the statutory language of 35 U.S.C. § 285, is irrelevant to the subjective intent standard for sham litigation under PRE. Id.

[*120] Many of the authorities cited by the FTC are not helpful to our analysis regarding subjective intent. For example, in In re Flonase Antitrust Litigation, the defendant conceded that there was sufficient evidence for plaintiffs to survive summary judgment on subjective intent and as a result the court did not address the issue. 795 F. Supp. 2d 300, 311 (E.D. Pa. 2011). Other authorities cited by the FTC dealt with **[**38]** motions to dismiss and do not contain a fulsome analysis of the evidence required to support the subjective intent prong of PRE. See Moldex Metric, Inc. v. 3M Co., No. 14-1821, 2015 U.S. Dist. LEXIS 15008, 2015 WL 520722, at *7, *9 (D. Minn. Feb. 9, 2015); TransWeb, LLC v. 3M Innovative Props. Co., No. 10-4413, 2011 U.S. Dist. LEXIS 59095, 2011 WL 2181189, at *15 (D.N.J. June 1, 2011); Rochester Drug Coop. v. Braintree Labs., *712 F. Supp. 2d 308, 316, 319-21 (D. Del. 2010)*; In re Cardizem CD Antitrust Litig., 105 F. Supp. 2d 618, 643-44 (E.D. Mich. 2000).

After review of the decisions cited by both parties, we conclude that the subjective intent required to overcome Noerr-Pennington immunity is not merely the intent to thwart competition. It is well-established that "the essence of a patent grant is the right to exclude others from profiting by the patented invention" and thereby to interfere with a competitor's business. See Dawson Chem. Co. v. Rohm & Haas Co., 448 U.S. 176, 215, 100 S. Ct. 2601, 65 L. Ed.

2d 696 (1980). As our Court of Appeals has recognized, the Hatch-Waxman Act "incentivizes brand-name drug manufacturers to promptly file patent infringement suits by rewarding them with a stay of up to 30 months if they do so" and therefore "[w]e are not inclined to penalize a brand-name manufacturer whose litigiousness was a product of Hatch-Waxman." *In re Wellbutrin, 868 F.3d at 157-58* (internal quotation marks and citation omitted). Knowledge that the filing of a lawsuit would trigger the automatic stay is not by itself evidence of a bad-faith motive. Id.; see also *In re Terazosin Hydrochloride Antitrust Litig., 335 F. Supp. 2d 1336, 1365 (S.D. Fla. 2004)*.

As the Supreme Court noted in Omni Outdoor Advertising, a classic example of "sham" activity is the filing of **[**39]** frivolous objections to a license application with no expectation of prevailing but simply in order to impose expense and delay. See *499 U.S. at 380*. Clearly, a frivolous lawsuit under those same circumstances is also a sham. The sham exception under Noerr-Pennington, of course, is narrow so as not to infringe on a party's constitutional right to petition the government for redress of grievances. Consequently, we conclude that the FTC must prove that defendants had actual knowledge that the patent infringement suits here were baseless in order both to meet its burden under *Omni Outdoor Advertising* and *PRE* and to avoid interference with defendants' *First Amendment* rights.

The parties, as noted above, further disagree as to the burden of proof required to establish subjective intent. The FTC contends that it must simply satisfy a preponderance of the evidence standard, the general standard for civil antitrust claims. See, e.g., *LePage's, Inc. v. 3M, 324 F.3d 141, 166-69 (3d Cir. 2003)*. Defendants counter that a finding of subjective intent demands clear and convincing evidence.

The Supreme Court has not addressed this question. Nor has our Court of Appeals. The Courts of Appeals for the Ninth and Seventh Circuits in decisions that predate PRE have both **[**40]** required clear and convincing evidence that defendants prosecuted actions in bad faith to satisfy the subjective prong of a sham litigation claim. See *Handgards, Inc. v. Ethicon, Inc., 743 F.2d 1282, 1288-93 (9th Cir. 1984)*; *MCI **[*121]** Communications Corp. v. American Tel. & Tel. Co., 708 F.2d 1081, 1155 (7th Cir. 1983)*.

In support of their position that clear and convincing evidence is required, defendants point to *Walker Process Equipment, Inc. v. Food Machinery and Chemical Corp., 382 U.S. 172, 86 S. Ct. 347, 15 L. Ed. 2d 247 (1965)*. There, the Supreme Court held that an allegation that the defendant "knowingly and willfully" obtained a patent through fraudulent representations to the Patent Office would not be entitled to Noerr-Pennington immunity for a subsequent lawsuit alleging infringement of that patent. *382 U.S. at 177-78*. The Federal Circuit has since specified that clear and convincing evidence is needed to establish a Walker Process monopolization claim. See *C.R. Bard, Inc. v. M3 Sys., Inc., 157 F.3d 1340, 1364 (Fed. Cir. 1998)*. It observed that "[t]he road to the Patent Office is so tortuous and patent litigation is usually so complex," that there must be "no less than clear, convincing proof of intentional fraud involving affirmative dishonesty." Id. (internal citation omitted).

The authorities cited by the FTC to support its position that a preponderance of the evidence is sufficient are not on point. Those cases concern the standard for an award of attorneys' fees in a patent case under *35 U.S.C. § 285*, not the subjective intent **[**41]** standard for sham litigation antitrust claims. See, e.g., *Kilopass Tech., Inc., 738 F.3d at 1315-16*. As stated above, the Supreme Court has expressly distinguished sham litigation in the Noerr-Pennington context from motions brought under *§ 285*. See *Octane Fitness, LLC, 134 S. Ct. at 1757-58*.

We conclude that the FTC must prove by clear and convincing evidence the subjective intent element of a sham litigation. We do so in light of the Federal Circuit's decision in *C.R. Bard* as well as the importance of the *First Amendment* right to petition the government for a redress of grievances as explained in Noerr, Pennington, and California Motor Transport Co.

Having determined that the FTC has the burden to establish by clear and convincing evidence that defendants had actual knowledge that their infringement suits against Teva and Perrigo were baseless, we now consider the evidence presented at trial and the reasonable inferences to be drawn therefrom.

The FTC puts great emphasis on the 2009 press release by Solvay on behalf of its subsidiary Unimed, co-owner of the '894 patent, before Solvay and Unimed were acquired by AbbVie in February 2010. The press release announced the companies' decision not to sue Perrigo for infringement of the '894 patent after Perrigo filed with the FDA its ANDA for a generic version of **[**42]** AndroGel. Solvay gave as its reason that the Perrigo product "contains a different formulation than the formulation protected by the AndroGel patent." The FTC also presented evidence regarding a July 2009 email written by MacAllister, in-house counsel for Besins, stating that Besins, the co-owner of the '894 patent, was "standing down" from pursuing Perrigo for infringement.

None of the in-house AbbVie attorneys identified as the decision-makers regarding the 2011 suits against Teva and Perrigo was previously employed by Solvay or Unimed. As for Besins, it did not explain whether its decision not to pursue a patent infringement suit was based on the merits or was simply recognizing the reality that it alone could not initiate such a suit without Unimed, the co-owner of the '894 patent. See, e.g., *Int'l Nutrition Co. v. Horphag Research Ltd., 257 F.3d 1324, 1331 (Fed. Cir. 2001)*. While Solvay and its in-house **[*122]** attorneys certainly got it right in 2009, this evidence is not probative as to the subjective intent of defendants' decision-makers here some two years later in 2011.

Both parties also rely on various business planning documents to support their positions on subjective intent. The FTC, for example, points to an August 8, 2011 meeting attended by Jeffrey Stewart, then Vice President **[**43]** of U.S. Proprietary Pharmaceuticals at AbbVie, and several other AbbVie executives and in-house attorneys to discuss AndroGel. This meeting took place shortly after Teva filed its motion for summary judgment in the patent infringement case in which AbbVie had sued it. During that meeting Stewart, looking into the future, drew a chart depicting a dramatic erosion of AndroGel sales following entry of an AB-rated generic after a "lost case" eight months hence in April 2012, the month in which this court had scheduled a hearing to take place on Teva's summary judgment motion.

Thereafter, AbbVie created "AndroGel Scenarios" with various potential dates for generic entry, including: (1) November 2011, the date by which the FDA had agreed to review Teva's section 505(b)(2) NDA[13]; (2) April 2012, the date on which the summary judgment motion could be decided in the Teva matter; and (3) April 2013, an estimate of the date on which a trial on the merits may have concluded in the Teva matter. In an email on September 30, 2011, James Hynd, one of the AbbVie executives responsible for the AndroGel franchise, characterized the April 2012 entry date as "[t]he most likely scenario."

Defendants, meanwhile, point to the **[**44]** official 2012 annual plan for AbbVie's U.S. Proprietary Pharmaceuticals Division. AbbVie began work on that plan in summer of 2011 and finalized it in late fall of 2011. In that plan, AbbVie forecasted increased sales for AndroGel. It also projected an increase in total "Selling, General, and Administrative" ("SG&A") spending for AndroGel from 2011 to 2012. While the plan "assumed LOE [loss of exclusivity]" for several other products, it made no mention of any loss of exclusivity for AndroGel. Defendants also highlight the AbbVie long range plan ("LRP") that was created in 2011. The LRP is a five to ten year business plan that is updated every year through a planning process that generally begins in January and ends in May. The LRP created in 2011 uses as the loss of exclusivity date for AndroGel August 31, 2015, the licensed entry date granted to two other generic competitors, Par Pharmaceutical and Watson Pharmaceuticals, Inc.

We do not find these and other similar business documents to be persuasive or even relevant to the issue of subjective intent. Significantly, none of these corporate documents, as far as we know, was created by or influenced anyone who played a role in the decisions **[**45]** to sue Teva and Perrigo for patent infringement. Nor is there any evidence in the record as to what, if anything, the decision-makers in the legal department told the business people or vice versa about the merits or prospects of the litigation. These corporate documents are simply not probative of the state of mind of the in-house attorneys who made the decisions to sue.

[*123] As evidence of their subjective good faith, defendants also rely on the fact that they obtained favorable settlements in their lawsuits against Teva and Perrigo. Specifically, defendants point out that they initially proposed

---

[13] This is commonly known as the ***Prescription Drug User Fee Act ("PDUFA")*** date. Under that Act, the FDA collects a fee from companies applying for drug approval and, in exchange, the FDA provides a "goal date" by which it will review the application. See ***21 U.S.C. § 379h***.

to both Teva and Perrigo a market entry date of January 1, 2015, a date which extended far beyond the maximum 30-month Hatch-Waxman stays applicable to the two lawsuits. Although Teva and Perrigo countered on several occasions with earlier entry dates, defendants held firm to their initial offers in both negotiations. In the end, Teva and Perrigo secured an entry date of December 27, 2014 for their products, just days earlier than defendants' first proposals.[14] Defendants maintain that they would not have insisted on such a late entry date if they knew the infringement suits were frivolous or if **[**46]** they otherwise were motivated only to use the litigation process itself and the automatic Hatch-Waxman stay as an anti-competitive weapon. We find this argument unpersuasive.

Parties often settle litigation for a variety of reasons independent of the merits of the claims. It is true that the settlements prevented Teva and Perrigo from entering the market until after the automatic Hatch-Waxman stays would have expired. On the other hand, the settlements permitted Teva and Perrigo to enter the market years before the '894 patent was set to expire and before any other generic competitor could come to market. They also permitted Teva and Perrigo to limit their litigation costs, and Perrigo obtained $2 million from AbbVie for reasonable litigation expenses. Even frivolous lawsuits can be very costly to defend and to take to trial, especially when plaintiffs, such as the defendants here, have extensive resources.

Charles Cotesworth Pinckney's steadfast response, "not a six-pence, sir," in rejecting a request of French officials for a payment of money in the XYZ Affair, and Representative Robert Goodloe Harper's now famous toast in a similar vein, "Millions for Defense but not a Cent for Tribute," at **[**47]** a dinner in 1798 in Philadelphia, while admirable in many spheres of life, generally have no applicability in the real world when lawsuits are being settled. We find that the terms of the Teva and Perrigo settlements here do not support defendants' subjective good faith.

The FTC points to the various citizen petitions filed by AbbVie regarding the applications submitted by Teva and Perrigo for FDA approval and for TE ratings for its products. For all of these petitions, the FDA granted in part the relief requested by AbbVie. Because they were found to be at least partially meritorious, we do not consider the citizen petitions as evidence of any improper subjective intent by defendants.

The FTC further points to evidence that AbbVie attempted to accelerate the transition of patients from AndroGel 1% to AndroGel 1.62% in summer 2011. Again, there is no evidence that those who decided to bring the infringement actions against Teva and Perrigo played any role in this process.

It is, of course, the FTC which bears the burden of proof by clear and convincing evidence that defendants had the subjective intent to file sham infringement actions against Teva and Perrigo. In determining subjective **[**48]** intent, the court must zoom in on the individuals at AbbVie and Besins who made the decisions to file the infringement actions against Teva and Perrigo and discern what these individuals **[*124]** knew. The state of mind of individual decision-makers is of course imputed to the corporations for which they act. See, e.g., *In re Color Tile Inc., 475 F.3d 508, 513 (3d Cir. 2007)*.

The individuals, as noted above, who made the decision on behalf of AbbVie on whether to file the objectively baseless lawsuits against Teva and Perrigo were four experienced patent attorneys with sign-off from the general counsel of AbbVie. The record reflects that no business executives were in any way involved—not even with a perfunctory sign-off. As for Besins, the decision to sue was likewise made by in-house counsel for the company. Again no business people participated in the decisions to sue or were otherwise involved.

As the finder of fact, the court may consider both direct and circumstantial evidence when evaluating defendants' subjective intent. See *Howard Hess Dental Labs. Inc. v. Dentsply Intern., Inc., 602 F.3d 237, 257-58 (3d Cir. 2010)* (citing *Advo, Inc. v. Phila. Newspapers, Inc., 51 F.3d 1191, 1199 (3d Cir. 1995))*. We may determine what weight and credence to give this evidence and may also draw reasonable inferences therefrom. See id. In making findings of fact, the court, like jurors, should not leave common sense at **[**49]** the courthouse steps.

---

[14] As stated above, Perrigo ultimately agreed to an entry date of January 1, 2015 but this date was moved to December 27, 2014 pursuant to an acceleration clause in the contract.

Triers of fact are routinely called upon to determine a party's state of mind. *United States Postal Service Bd. of Governors v. Aikens, 460 U.S. 711, 716-17, 103 S. Ct. 1478, 75 L. Ed. 2d 403 (1983)*. As our Supreme Court has recognized:

> The law often obliges finders of fact to inquire into a person's state of mind. . . . The state of a man's mind is as much a fact as the state of his digestion. It is true that it is very difficult to prove what the state of a man's mind at a particular time is, but if it can be ascertained it is as much as fact as anything else.

Id. (internal citations and quotations omitted). We routinely instruct juries to decide a person's intent in both criminal and civil proceedings:

> Often the state of mind . . . with which a person acts at any given time cannot be proved directly, because one cannot read another person's mind and tell what he or she is thinking. However, [defendants'] state of mind can be proved indirectly from the surrounding circumstances. Thus, to determine [defendants'] state of mind . . . at a particular time, you may consider evidence about what [defendants] said, what [defendants] did and failed to do, how [defendants] acted, and all the other facts and circumstances shown by the evidence that may prove what was in [defendants'] mind **[**50]** at that time. . . .
> You may also consider the natural and probable results or consequences of any acts [defendants] knowingly did, and whether it is reasonable to conclude that [defendants] intended those results or consequences. You may find, but you are not required to find, that [defendants] knew and intended the natural and probable consequences or results of acts [defendants] knowingly did. This means that if you find that an ordinary person in [defendants'] situation would have naturally realized that certain consequences would result from [defendants'] actions, then you may find, but you are not required to find, that [defendants] did know and did intend that those consequences would result from [defendants'] actions.

Third Circuit Model Criminal Jury Instructions § 5.01. This explanation is also reflected in our Circuit's model jury instructions for civil cases where intent is **[*125]** relevant, such as those under civil rights statutes. Those model instructions state that a plaintiff "is not required to produce direct evidence of intent" and that intent "may be inferred from the existence of other facts." See, e.g., Third Circuit Model Civil Jury Instructions § 5.1.2. Because of the difficulty of **[**51]** proving a person's state of mind, intent is usually a matter of inference from evidence in the record both in civil and criminal cases. See *Herman & MacLean v. Huddleston, 459 U.S. 375, 391 n.30, 103 S. Ct. 683, 74 L. Ed. 2d 548 (1983)*; *Resolution Tr. Corp. v. Fid. & Deposit Co. of Md., 205 F.3d 615, 642-43 (3d Cir. 2000)*; *McLean v. Alexander, 599 F.2d 1190, 1198 (3d Cir. 1979)*.

None of the attorneys who was a decision-maker at AbbVie testified at the trial. While in-house counsel for Besins did testify, he did not say a word about his reasoning for bringing suit against Teva and Perrigo. Defendants invoked the attorney-client privilege as well as the attorney work product doctrine and did not assert reliance on advice of outside counsel as an affirmative defense.[15] Defendants have cited authority that we may not draw adverse inferences on subjective intent from a party's justifiable reliance on these privileges. We agree. We do not and will not draw any negative inference as to subjective intent based on defendants' decision to invoke the attorney-client privilege and the attorney work product doctrine and thereby to shroud certain information from view.[16] See *Freedom Card, Inc. v. JPMorgan Chase & Co., 432 F.3d 463, 479-80 n.25 (3d Cir. 2005)*.

---

[15] The FTC has not challenged the general proposition that attorney-client privilege or the attorney work product doctrine applies but did engage in motion practice regarding whether certain documents were in fact shielded from discovery by these privileges. It also asserted in various pretrial motions and trial briefs that defendants waived these privileges to the extent defendants asserted that the in-house counsel who made the decision to sue acted in good faith.

[16] This is not an unusual situation. It is no different from that faced by courts every day in criminal trials, in which juries are instructed to make findings about intent but not to draw a negative inference based on a defendant's failure to testify. See *United States v. Waller, 654 F.3d 430, 435-38 (3d Cir. 2011)*. We also note that juries in criminal cases may rely on circumstantial evidence to find intent beyond a reasonable doubt, a standard higher than the clear and convincing standard applicable here. See *id. at 436*.

With no direct evidence of the subjective intent of the decision-makers, we must decide whether their subjective intent to file a sham lawsuit has been proven by clear and convincing evidence from the surrounding circumstances and the natural and probable **[**52]** consequences of their knowing acts. It is unrefuted that the attorneys who decided to sue Teva and Perrigo for patent infringement were aware of the paragraph IV notices from Teva and Perrigo. In the paragraph IV notices, Teva and Perrigo declared that their products did not contain as a penetration enhancer isopropyl myristate in the particular concentration claimed in the '894 patent. Outside counsel for defendants had confidential access to the section 505(b)(2) NDAs of Teva and Perrigo, which included the penetration enhancers used by Teva and Perrigo. Both paragraph IV notices called to the attention of the decision-makers that any infringement actions by defendants would be barred by prosecution history estoppel. Perrigo went so far as to assert that any infringement suit against it would be a sham.

The decision-makers at AbbVie and Besins in 2011 knew that Teva and Perrigo used penetration enhancers for their generic products which were distinct from the one penetration enhancer claimed in **[*126]** the '894 patent. We reasonably infer that the decision-makers also were aware of the prosecution history of the '894 patent and specifically that the patent application originally claimed all penetration enhancers including those in the Teva **[**53]** and Perrigo products and that those penetration enhancers used by Teva and Perrigo were ultimately excluded from the protection of the '894 patent. The prosecution history detailed that the original claims covered all penetration enhancers but were ultimately reduced to one, isopropyl myristate. This history is outlined in our prior summary judgment decision. See *AbbVie Inc., 2017 U.S. Dist. LEXIS 149824, 2017 WL 4098688, at *4-11*. As we found there, "any reasonable person who reads the prosecution history of the '894 patent" would know that all penetration enhancers other than isopropyl myristate in particular concentrations were surrendered. *2017 U.S. Dist. LEXIS 149824, [WL] at *11*.

The reason and motivation for the lawsuits against Teva and Perrigo are also proper considerations which inform our decision on subjective intent. See *Omni Outdoor Advertising, Inc., 499 U.S. at 380*. Regardless of what the business people knew or had in mind or what any of AbbVie's specific corporate documents or business people revealed, we reasonably infer that the patent attorneys, some of whom were long-time employees, were generally aware of the extensive financial success of AndroGel. It was no secret that AndroGel was a blockbuster product for defendants. It was bringing in hundreds of millions of dollars annually as of 2011 with a very high profit margin. Sales of AndroGel **[**54]** were $604 million, $726 million, and $874 million in 2009, 2010, and 2011 respectively. The patent attorneys also clearly recognized that the entry of generic versions of AndroGel with their much lower prices would quickly and significantly erode this ideal financial picture. Their reason and motivation for the filing of these objectively baseless actions against potential competitors was to staunch, at least for a time, this looming reversal of fortune.

In sum, all of the decision-makers, we reiterate, were very experienced patent attorneys, who also knew the extensive financial benefits to defendants if generic versions of AndroGel were kept or delayed from entry into the market. It is a compelling inference that they knew the law concerning the prosecution history estoppel and related principles and understood that prosecution history estoppel barred the infringement suits against Teva and Perrigo. They decided to file these lawsuits anyway. Since these experienced patent attorneys filed objectively baseless infringement lawsuits, it is reasonable to conclude that they intended the natural and probable consequences of acts they knowingly did. This leads ineluctably to an inference **[**55]** that the subjective intent of the decision-makers was to file sham lawsuits. We find by clear and convincing evidence that these attorneys had actual knowledge that the infringement lawsuits they initiated in 2011 against Teva in the United States District Court for the District of Delaware and against Perrigo in the United States District Court for the District of New Jersey were baseless and that they acted in bad faith. The only reason for the filing of these lawsuits was to impose expense and delay on Teva and Perrigo so as to block their entry into the TTRT market with lower price generics and to delay defendants' impending loss of hundreds of millions of dollars in AndroGel sales and profits. They had no expectation of prevailing in the lawsuits. See *Omni Outdoor Advertising, Inc., 499 U.S. at 380*. All the findings concerning subject intent are by clear and convincing evidence. The actions and intent of these AbbVie and **[*127]** Besins attorneys, of course, are binding on the defendants.

Again, we recognize the importance of the constitutional right to petition the Government for redress of grievances through the filing of lawsuits. For those reasons, this court understands its responsibility to act with caution before finding that **[**56]** any lawsuit was a sham. Regrettably, this is that exceptional case compelling such a finding.

IV

The FTC alleges that defendants have violated *section 5 of the FTC Act*, which prohibits "[u]nfair methods of competition in or affecting commerce." *15 U.S.C. § 45(a)*. The prohibitions under the FTC Act include, but are not limited to, conduct that violates the *Sherman Act, 15 U.S.C. §§ 1 et seq.* See, e.g., *FTC v. Ind. Fed'n of Dentists, 476 U.S. 447, 454-55, 106 S. Ct. 2009, 90 L. Ed. 2d 445 (1986)*. Specifically, the FTC claims that defendants had monopoly power in the TTRT market throughout the United States and unlawfully sought to maintain that power through the filing of the sham lawsuits against Teva and Perrigo so as to prevent or delay the entry into the market of much less expensive generic versions of AndroGel to the detriment of the consuming public.

Thus, to prove its claim the FTC must establish not only that defendants engaged in sham litigation but also that the sham litigation was used to maintain monopoly power in the relevant market. *Broadcom Corp. v. Qualcomm Inc., 501 F.3d 297, 307 (3d Cir. 2007)*. Monopoly power is "the ability to control prices and exclude competition in a given market." Id. "[A] patent does not necessarily confer market power upon the patentee" and therefore the FTC must prove that defendants in fact possessed monopoly power. See *Ill. Tool Works Inc. v. Indep. Ink, Inc., 547 U.S. 28, 45, 126 S. Ct. 1281, 164 L. Ed. 2d 26 (2006)*. Monopoly power is assessed as of the **[**57]** time of the anticompetitive conduct. See *Town Sound & Custom Tops, Inc. v. Chrysler Motors Corp., 959 F.2d 468, 472-73, 481 (3d Cir. 1992)*.

The Supreme Court has ruled that questions of monopoly power must be resolved according the particular facts of each case and that "formalistic distinctions rather than actual market realities are generally disfavored in ***antitrust law***." *Eastman Kodak Co. v. Image Tech. Servs., Inc., 504 U.S. 451, 466-67, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)*. Monopoly power may be proven through direct evidence of supra competitive prices and restricted output. *Mylan Pharms. Inc., 838 F.3d at 434*. In the alternative, monopoly power may be proven through indirect evidence. *Id. at 435*. Here, the FTC has presented no direct evidence of monopoly power but instead relies on indirect evidence to establish this part of its claim.[17]

To support a finding of monopoly power through indirect evidence, the FTC must show that: (1) defendants had market power in the relevant market; and (2) barriers existed to entry into that market. Id. Market power is in turn defined as "the power to raise prices above competitive levels without losing so many sales that the price increase is unprofitable." *Queen City Pizza, Inc. v. Domino's Pizza, Inc., 124 F.3d 430, 445 n.2 (3d Cir. 1997)* (internal citation omitted). Market power **[*128]** can be inferred from a market share significantly greater than 55%. *Dentsply Int'l, Inc., 399 F.3d at 187* (citing *Fineman v. Armstrong World Indus., 980 F.2d 171, 201 (3d Cir. 1992)*). As our Court of Appeals has explained, the size of market share is a primary determinant of whether monopoly **[**58]** power exists. *Pa. Dental Ass'n v. Med. Serv. Ass'n of Pa., 745 F.2d 248, 260 (3d Cir. 1984)*.

We must begin by defining the relevant market. See *Dentsply Intern., 399 F.3d at 187*. The definition of the relevant market "is a question of fact as to which the plaintiff bears the burden of proof." *Mylan Pharms. Inc., 838 F.3d at 435* (quoting *Broadcom Corp., 501 F.3d at 307*). The FTC must prove both the relevant product or products that comprise the market as well as the geographical area for the market. See *Queen City Pizza, Inc., 124 F.3d at 442*. There is no dispute here that the relevant geographic market encompasses the United States.

To determine whether products are in the same market, we ask "if they are readily substitutable for one another," an inquiry that requires us to assess "the reasonable interchangeability of use between a product and its substitute." *Mylan Pharms. Inc., 838 F.3d at 435* (internal citation omitted). The term "'[i]nterchangeability' implies

---

[17] Direct evidence of monopoly power is "rare" and would require, among other things, evidence that defendants maintained abnormally high price-cost margins on AndroGel and that they restricted output. See *Mylan Pharms. Inc., 838 F.3d at 434-35 & n.53*. The FTC has not presented such evidence.

that one product is roughly equivalent to another for the use to which it is put." Id. at 436 (quoting Allen—Myland, Inc. v. IBM Corp., 33 F.3d 194, 206 (3d Cir. 1994)). It also means that "while there might be some degree of preference for . . . one [product] over the other, either would work effectively." Id. (quoting Allen-Myland, Inc., 33 F.3d at 206 (alterations in original)). We also look to cross-elasticity of demand, which is defined as "[a] relationship between two products, usually substitutes for each other, in which a price change for one product affects the **[**59]** price of the other." Id. (internal citations omitted). "Cross-elasticity of demand is a measure of the substitutability of products from the point of view of buyers. More technically, it measures the responsiveness of the demand for one product [X] to changes in the price of a different product [Y]." Id. at 437 (quoting Queen City Pizza, Inc., 124 F.3d at 438 n.6).

As the Supreme Court has recognized, "in some instances one brand of a product can constitute [the relevant] market." Eastman Kodak Co., 504 U.S. at 482. However, courts generally approve of single-product markets only "in rare circumstances." Town Sound & Custom Tops, Inc., 959 F.2d at 480; see also Mylan Pharms., Inc. v. Warner Chilcott Pub. Ltd. Co., No. 12-3824, 2015 U.S. Dist. LEXIS 50026, 2015 WL 1736957, at *8 (E.D. Pa. Apr. 16, 2015).

The FTC first proposes what is in essence a single-product market: brand-name AndroGel 1% and brand-name AndroGel 1.62% and their generic equivalents. Within this market, defendants held 100% of sales until entry of Perrigo's generic AndroGel 1% product. After that point, 85% of the AndroGel 1% market converted to generic versions of AndroGel 1% within 24 months, and 90% within 31 months.

In seeking to prove its proposed relevant market, the FTC relies on the expert testimony of Dr. Carl Shapiro, a professor at the Haas School of Business at the University of California at Berkley who previously served as a member of the President's Council of Economic Advisors. **[**60]** Dr. Shapiro performed the Hypothetical Monopolist Test ("HMT"). That test begins with a narrow set of products, called the candidate market, and asks whether a hypothetical monopolist selling those products **[*129]** could impose a small but significant non-transitory increase in price ("SSNIP"), which would be a 5% increase or more, without losing too many sales to make the price increase unprofitable. If the answer is yes, then the market is correctly defined because products outside the candidate market are not effective price constraints. If not, then the candidate market is too narrow and the relevant market includes other products.

Dr. Shapiro began with a candidate market of brand-name AndroGel and generic versions of AndroGel.[18] He explained that in this situation, the question under the HMT model is whether defendants, as the manufacturers and distributors of brand-name AndroGel, could prevent the price of AndroGel from falling more than 5% by excluding generic competition.

Using data provided by defendants, Dr. Shapiro first calculated the hypothetical monopoly price, which is the price defendants charged for AndroGel prior to generic entry. He then calculated the change in price for AndroGel **[**61]** after generic entry, using a weighted average price of brand-name and generic AndroGel.[19] Dr. Shapiro performed the test as of the time of the filing of the sham lawsuits in April 2011 and October 2011. He relied on projections of the effect of generic entry created by AbbVie, Teva, and Perrigo. Dr. Shapiro found that entry of an AB-rated generic would cause market prices for AndroGel to decline by at least 41% and that entry of a BX-rated generic would cause a decline of 11%. Based on these calculations, Dr. Shapiro concluded that a hypothetical monopolist of brand-name and generic AndroGel could profitably impose a price increase of more than 5% by excluding

---

[18] Dr. Shapiro explained that he included brand-name AndroGel 1.62% in his analysis because the delay in generic entry caused by the sham lawsuits provided defendants with additional time to convert AndroGel 1% sales to AndroGel 1.62%. Dr. Shapiro opined that excluding AndroGel 1.62% from the test market could lead to "artificial and misleading" results. This is consistent with AbbVie's own business projections, which predicted that entry of a generic 1% product would impact AndroGel 1.62% sales.

[19] Dr. Shapiro defines average weighted price as "the market price charged by the pharmaceutical companies" and opines that it "is the best way to measure the disparate impact on different customers [i.e., payors, pharmacy benefit managers, and pharmacies] because it measures 'the total payments that are involved.'"

competition. Thus, he opines that AndroGel and its generic counterparts constitute the appropriate relevant market for our analysis.

To support Dr. Shapiro's reliance on the HMT, the FTC points to our Court of Appeal's decision in *FTC v. Penn State Hershey Medical Center, 838 F.3d 327 (3d Cir. 2016)*. There, the district court applied the HMT to determine the relevant geographic market in evaluating whether a hospital merger violated the antitrust laws. *Id. at 344-45*. On appeal, the Court concluded that the district court failed properly to formulate and apply the test. Id. There is no indication that the HMT **[**62]** test is required or even applicable in a monopolization case such as this.

We find that the analysis used by our Court of Appeals in Mylan is the appropriate one here. In that case, the Court observed that "the pharmaceutical market functions in a unique way." *838 F.3d at 428*. Specifically, it stated:

> [I]n a well-functioning market, a consumer selects and pays for a product after evaluating the price and quality of the product. In the prescription drug market, by contrast, the doctor selects the drug, which creates a certain separation between the buyer and the manufacturer. Moreover, in most cases, a **[*130]** third-party, such as a health insurance company, pays for the drug. As a result, consumer buying behavior may have less of an impact on manufacturer pricing than it otherwise would in a traditional open market.

Id. (internal citations and quotation marks omitted).

Due to the vastly different costs associated with launching generic products as compared to brand-name products, generics can be priced considerably lower than brand-name products.[20] AB-rated generics are often priced at a substantial discount far exceeding 5%. This is the result of an intentional regulatory framework promulgated under the Federal **[**63]** *Food, Drug, and Cosmetic Act ("FDCA"), 21 U.S.C. §§ 301 et seq.*, and the Hatch-Waxman Act which provides incentives for innovators that develop brand-name drugs while also encouraging the introduction of low-cost generic drugs to the market. See *Actavis, Inc., 570 U.S. at 142*. Under this regulatory scheme, application of the HMT would result in a market limited to a brand-name drug and its AB-rated generic in almost every instance.[21] See *In re Remeron Direct Purchaser Antitrust Litig., 367 F. Supp. 2d 675, 682 (D.N.J. 2005)*. This approach thus "would render most brand name pharmaceutical companies as per se monopolists prior to generic entry." See *Id. at 683*.

The facts of Mylan further support our decision. There, the Court of Appeals rejected the plaintiff's contention that the market consisted of only Doryx, a specific brand-name tetracycline approved for the treatment of acne and its generic equivalent. *Mylan Pharms. Inc., 838 F.3d at 436*. It instead agreed with the district court that "the market was much broader and consisted of all oral tetracyclines prescribed to treat acne." Id. In reaching that conclusion, the Court looked to the degree of reasonable interchangeability and cross-elasticity of demand between oral tetracyclines. *Id. at 435-36*. It did not apply the HMT. See Id. We therefore reject the FTC's proposed single-product market as defined under the HMT.

In the **[**64]** alternative, the FTC proposes a product market consisting of all topical testosterone replacement therapies (as stated above, "TTRTs"). While defendants argue for a broader market including injectables, they do not disagree that TTRTs are part of that market. The TTRTs include the following products:

Patches
- Testoderm (launched in 1994)
- Androderm (launched in 1995)

Gels and Solutions

[20] Generics generally may forgo certain research and development, marketing, and other costs that a brand-name product must incur to launch. See *In re Remeron Direct Purchaser Antitrust Litig., 367 F. Supp. 2d 675, 682 (D.N.J. 2005)*.

[21] Furthermore, as Dr. Shapiro himself has recognized, the HMT may also lead to relatively narrow markets that would exclude some competing products when gross margins are high, which is the case in the pharmaceutical industry.

- AndroGel 1% (launched in 2000)
- Testim (launched in 2002)
- AndroGel 1.62% (launched in 2011)
- Axiron (launched in 2011)
- Fortesta (launched in 2011)
- Vogelxo (launched in 2014, along with an authorized generic of the same product)

Buccal Tablets

- Striant (launched in 2003)[22]

[*131] The evidence overwhelmingly demonstrates that all TTRTs, including AndroGel, are reasonably interchangeable. All TTRTs contain the same active ingredient, testosterone. All are approved by the FDA for the treatment of hypogonadism. Furthermore, all TTRTs are consistent with guidelines for the treatment of hypogonadism promulgated by the Endocrine Society, the oldest and largest professional body dedicated to the advancement of clinical care and research in the field of endocrinology.

Defendants presented evidence that some patients have **[**65]** switched between AndroGel and other TTRTs. Defendants' economic expert Dr. Pierre Cremieux presented data from OptumHealth Care Solutions, Inc. showing insurance claims for 18 million patients nationwide, which included 46,000 patients who filed a prescription for AndroGel in the five years preceding generic entry. That dataset demonstrated that 25.8% of all AndroGel patients also used another TTRT product. The OptumHealth data is commonly used in the pharmaceutical industry and has been the basis for hundreds of peer-reviewed publications.

It is true that the various TTRTs may have relative advantages and disadvantages and that an individual patient may prefer one product over another. For instance, some patients may prefer AndroGel over Testim due to Testim's "musky" scent. Certain patients may dislike Fortesta, which is applied to the front and inner thighs, as compared to AndroGel, which is applied to the upper arms, shoulders, and abdomen. However, "[i]nterchangeability is defined by rough equivalence, not perfect correspondence." *Mylan Pharm., Inc., 2015 U.S. Dist. LEXIS 50026, 2015 WL 1736957, at *10* (citing *Queen City Pizza, Inc., 124 F.3d at 436*). Even if more patients prefer AndroGel to other TTRTs, the "test for a relevant market is not commodities reasonably interchangeable by a **[**66]** particular plaintiff, but 'commodities reasonably interchangeable by consumers for the same purposes.'" *Queen City Pizza, Inc., 124 F.3d at 438* (quoting *United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 395, 76 S. Ct. 994, 100 L. Ed. 1264 (1956))*. There is no dispute that, as stated above, all TTRTs contain the same active ingredient and all are approved by the FDA as safe and effective for the treatment of hypogonadism. Accordingly, the fact that certain patients may prefer AndroGel over other TTRTs does not defeat a finding of interchangeability.

Mylan also requires an analysis of cross-elasticity of demand in determining what products are in the relevant market. *838 F.3d at 437*. The record demonstrates and no party disputes that there is cross-elasticity of demand between all TTRTs. During the relevant time period, AndroGel competed on price within the TTRT market by offering rebates to payors to obtain better formulary placement and thereby encourage doctors to prescribe AndroGel. Between 2011 and 2014, AbbVie paid $438 million in rebates to payors, an amount which represented 18.9% of gross sales for AndroGel. Despite these rebates, AndroGel lost several accounts to other TTRTs. Effective July 1, 2011, United Healthcare removed AndroGel from its formulary in favor of Testim, which resulted in a loss of approximately $80 million **[**67]** in sales for AndroGel. When Axiron and Fortesta, two low volume testosterone gels, entered the market in early 2011, rebates on TTRTs increased and AndroGel lost additional business. As of January 1, 2013, CVS Caremark removed AndroGel from its formulary in favor of Fortesta, which resulted in approximately $300 million in lost revenue. **[*132]** And in February 2013, TriCare removed AndroGel from preferred formulary status and replaced it with Fortesta. AbbVie also competed with other TTRTs by developing a copay assistance program. Under that program, AbbVie would bear a portion of a patient's copay, thereby lowering the actual out-of-pocket cost to the patient and encouraging the patient to fill his or her prescription

[22] Natesto, a testosterone nasal spray, was approved by the FDA in 2014 but was not marketed until 2015, after the time period at issue here.

for AndroGel. The other manufacturers of TTRTs also utilized such programs to increase sales. Nonetheless, as will be shown, AndroGel continued to have hundreds of millions of dollars in sales and huge profit margins and retained a high of 71.5% and never lower than in excess of 60% of the TTRT market from 2011 through 2014.

The evidence presented at trial demonstrated that the pharmaceutical companies within the TTRT market spent significant amounts of money on promotional activity **[**68]** to compete for sales. AbbVie employed a sales force of over 1,000 employees to promote its AndroGel franchise and spent significant money on maintaining that sales force. Sales representatives for AndroGel were compensated based in part on their sales compared to other TTRTs. AbbVie also invested in direct-to-consumer media advertising, including in television, print, and internet.

AbbVie itself viewed other TTRTs as competitors to AndroGel. During trial, several AbbVie employees testified that they considered Testim, Axiron, Fortesta, and other TTRTs to be AndroGel's competitors. In addition, many documents introduced into evidence demonstrate that AbbVie tracked the TTRT market and considered other TTRTs as competitors. In particular, AbbVie reported to its Board of Directors as well as to investors regarding AndroGel's sales within the TTRT market. All of this evidence supports our finding that there is cross-elasticity of demand between AndroGel and other TTRTs.

Defendants counter that the relevant market should be defined to include not only TTRTs but also all testosterone replacement therapies (as stated above, "TRTs"), that is TTRTs plus injectables.[23] We reject this position. It **[**69]** is true that injectables contain testosterone, the same active ingredient as AndroGel. It is also true that injectables, like AndroGel, are approved by the FDA as safe and effective for the treatment of hypogonadism. In addition, defendants introduced evidence of some patient switching between AndroGel and injectables.

Some patients prefer AndroGel to injectables due to a fear of needles and the associated potential for pain and discomfort. To administer the injection, a 1.5 inch-long needle must be inserted deep into a muscle, typically the buttocks or thigh, until the needle is no longer visible. Yet some prefer injectables to AndroGel because of the peak in testosterone levels that injectables initially provide. On the other hand, some patients dislike the peaks and troughs associated with injectables and thus prefer the steady dosing provided by AndroGel. However, as noted earlier, individual patient preferences will not defeat a finding of interchangeability as long as there is "rough equivalence" between the products. *Mylan Pharm., Inc., 2015 U.S. Dist. LEXIS 50026, 2015 WL 1736957, at *10*; see also *Queen City Pizza, Inc., 124 F.3d at 438*. Thus, there is reasonable interchangeability of use between AndroGel and injectables.

[*133] But even assuming reasonable interchangeability, there is little **[**70]** cross-elasticity of demand between AndroGel and injectables to include injectables in the relevant market. As noted above, "[c]ross-elasticity of demand is a measure of the substitutability of products from the point of view of buyers. More technically, it measures the responsiveness of the demand for one product [X] to changes in the price of a different product [Y]." *Mylan Pharms. Inc., 838 F.3d at 437* (quoting *Queen City Pizza, Inc., 124 F.3d at 438 n.6*).

Injectables entered the market decades before AndroGel launched in 2000 and the vast majority are generics. As a result, injectables enjoyed the most favorable formulary status with the lowest copay, typically $5-$10 per injection. During the relevant period, the wholesale acquisition cost of injectables was two to three times lower than that of AndroGel. Since launch, AbbVie has consistently raised AndroGel's wholesale acquisition cost, despite the fact that injectables were available at a fraction of the cost. James Hynd, one of the principal AbbVie executives responsible for the AndroGel franchise, confirmed that AbbVie did not price AndroGel against injectables. For example, AbbVie did not offer rebates to payors in an attempt to match the price of injectables.

Furthermore, AbbVie documents show that while **[**71]** the company tracked injectable sales, it did not consider injectables as direct competition to AndroGel. Hynd believed that injectable patients were "not our [AndroGel] patient type."[24] Similarly, Frank Jaeger, Director of Marketing for AndroGel from 2010 through 2014, testified that

---

[23] Defendants exclude oral formulations of testosterone, which are distinguishable in efficacy and potential side effects and are generally not recommended within the medical community.

AbbVie did not consider injectables as competition and that the company believed based on market research that it could not transition injectable patients to AndroGel. Instead, as stated above, Jaeger and others identified TTRTs such as Axiron, Fortesta and Testim as AndroGel's true competitors. We credit this testimony of Hynd and Jaeger.

Defendants produced an internal AbbVie document stating that a rise in the copay for AndroGel was correlated with an increase in injectables' sales. However, there is no evidence of the underlying analysis supporting the statement and thus no way to evaluate whether there was in fact a causal relationship between the two events. Moreover, this statement focuses on copays, which are patients' out-of-pocket costs, and does not account for the other levels of pricing applicable in the pharmaceutical industry, such as the amount paid by insurance companies and other payors. **[**72]** In contrast to this statement, the record demonstrates that AbbVie attributed the increase in injectables' sales to a variety of factors, including patient preference, the existence of "Low-T" Centers, and the disproportionate negative publicity testosterone gels received after reports associating TTRTs with heightened cardiovascular risk.

For similar reasons, the patient switching study introduced by Dr. Cremieux is also not evidence of cross-elasticity of demand between AndroGel and injectables. That study does not contain information regarding the reasoning behind the patients' choices. Those patients who moved between injectables and AndroGel may have done so for a variety of reasons, including side effects, personal preferences, and reports of cardiovascular risks from TTRTs, as well as price. Because **[*134]** cross-elasticity of demand focuses on the relationship between pricing for products, evidence of switching for other or unknown reasons is irrelevant to our inquiry on this issue. See *Mylan Pharms. Inc., 838 F.3d at 437*.

Accordingly, we find that all TTRTs including AndroGel had both interchangeability of use and cross-elasticity of demand during the relevant time period. In contrast, there was not the cross-elasticity **[**73]** of demand between TTRTs and injectables so as to include injectables within the relevant market.[25] We therefore define the relevant market as the market for all TTRTs, that is all transdermal testosterone replacement therapies within the United States.

We now turn to the question of whether defendants possessed monopoly power in the defined market. To support a finding of monopoly power, the FTC must prove that defendants had a dominant share in the relevant market and that there were significant barriers to entry into that market. *Broadcom Corp., 501 F.3d at 307*. Generally, as noted, a market share significantly larger than 55% is required to establish prima facie market power. See *Dentsply Int'l, Inc., 399 F.3d at 187*. Barriers to entry include "regulatory requirements, high capital costs, or technological obstacles, that prevent new competition from entering a market in response to a monopolist's supracompetitive prices." *Broadcom Corp., 501 F.3d at 307*.

In the TTRT market, AndroGel was by far the most-prescribed product and was widely-recognized as the "market leader" from before 2011 through 2014.[26] In 2011, AndroGel's annual U.S. net sales exceeded $870 million. By 2012, annual U.S. net sales for the AndroGel franchise grew to $1.152 billion. In 2013, AndroGel's U.S. net sales were **[**74]** approximately $1.035 billion. And in 2014, AndroGel U.S. net sales totaled $934 million. These sales figures are calculated after payment of millions of dollars in rebates and the loss of some accounts.

AndroGel's share of the TTRT market was 71.5% at the time that the first sham lawsuit against Teva was filed in April 2011 and 63.6% at the time that the sham lawsuit against Perrigo was filed at the end of October 2011.

---

[24] While Hynd testified that he changed his view and began to recognize injectables as competition, he did not do so until 2014, well after the sham lawsuits were filed and when entry of generic versions of AndroGel was imminent. We do not find credible his change of view.

[25] The TRT market would also include subcutaneous pellets such as Testopel, which constitute a de minimis share of the TRT market. There was no evidence presented at trial regarding cross-elasticity of demand between AndroGel and this product. Pellets, like injectables, are not part of the relevant market here.

[26] The medical experts for both sides testified that they have prescribed AndroGel for hypogonadism more than any other product.

Thereafter AndroGel's share remained above 60% until the end of 2014, when Perrigo's generic 1% testosterone product entered the market. The closest competitor, Testim, had a share of only approximately 20% of the TTRT market at the time of the filing of the first sham lawsuit, but thereafter its share dropped to approximately 12%. Axiron was launched on March 28, 2011 and had captured approximately 14% of the TTRT market by April 2014. No other TTRT product ever held 10% or more of the market during the period from April 2, 2011 through the end of 2014.

AndroGel's market share was always more than four times larger than the market share of any of its brand-name competitors, except for a short period when its market percentage was slightly smaller, but still over three **[**75]** times the market share of Testim. AbbVie was able to maintain its share of the TTRT market with a profit margin of over 65% during the relevant **[*135]** period, even with huge rebates. It was also able to increase the wholesale acquisition cost for AndroGel throughout this time period. We find based on this data that AndroGel had a dominant share of the TTRT market from April 2011 through December 2014.

The monopoly power of AndroGel is supported by the significant barriers to entry into the TTRT market. See *Mylan Pharms. Inc., 838 F.3d at 435*. First, any prospective entrant with a brand-name drug must invest large amounts of time and capital in research and development. There are then significant technical and regulatory requirements in the prescription pharmaceutical market that do not exist with respect to ordinary consumer products. Brand-name products must obtain FDA approval through the submission of an NDA. This process may be lengthy. Among other things, the prospective entrant must demonstrate the capability to manufacture, process, and package the pharmaceutical product in a manner that is adequate "to preserve its identity, strength, quality, and purity." *21 U.S.C. § 355(d)*; see also Id. *§§ 355(b)(1)*, *(c)(4)*. During the FDA approval process, third parties **[**76]** including competitors may file citizen petitions to request that the FDA "issue, amend, or revoke a regulation or order or take or refrain from taking any other form of administrative action" on the NDA, as happened here. See *21 C.F.R. § 10.30*. This may further prolong the approval process.

Once approved, the brand-name drug company generally does not attempt to market directly to patients, the ultimate users. Instead, it must convince physicians to prescribe the drug to patients. This requires a significant and knowledgeable sales force that generally meets with physicians individually. The sale and marketing of prescription drugs is highly regulated. See generally *21 U.S.C. § 331*. For example, the sales force is not permitted to claim that its company's product is better or more effective than a competitor's product, nor is it permitted to promote the drug for uses other than those contained in the drug's labeling. Id.; see also *In re Schering Plough Corp. Intron/Temodar Consumer Class Action, 678 F.3d 235, 239-40 (3d Cir. 2012)*. The company must also ensure that pharmacies will stock the drug and that third-party payors will reimburse for it. This requires a team of skilled employees who can negotiate contracts with insurance companies and other payors. If the company seeks patent protection, which is not uncommon, **[**77]** it must endure the rigorous patent approval process before the Patent and Trademark Office.

While the Hatch-Waxman Act provides streamlined procedures for the approval of generic products through the filing of an ANDA or section 505(b)(2) NDA, the FDA may ask for additional information and testing as happened here with Perrigo and Teva. The drug once approved must undergo a further process before a different group at the FDA to obtain a therapeutic equivalence ("TE") rating so that the generic drug developer may take advantage of state auto-substitution laws. Again, Teva and Perrigo both confronted this hurdle.

There can be additional obstacles for generic drug companies where, as here, a brand-name drug manufacturer holds a patent for the reference-listed drug. Generic entrants must also consider the possibility of patent infringement litigation by the owner of the referenced brand-name drug and the accompanying delay caused by the automatic thirty-month stay under the Hatch-Waxman Act before entry into the market, as occurred here.

In short, a prospective entrant to the pharmaceutical market whether with a brand-name drug or a generic drug has significant capital, technical, regulatory, **[*136]** and legal barriers to overcome **[**78]** before being able to enter the TTRT market. Again, this is a far cry from entry into a market to sell an ordinary consumer product. As demonstrated by the record, Teva and Perrigo encountered these barriers, and Teva ultimately decided not to launch its generic testosterone 1% product when it did not receive an AB rating from the FDA.

In order to counter the existence of barriers to entry, defendants reference the fact that three brand-name TTRT products entered the market between 2011 and 2014: (1) Fortesta, manufactured by Endo Pharmaceuticals (February 28, 2011); (2) Axiron, manufactured by Eli Lilly and Co. (March 28, 2011); and (3) Vogelxo, manufactured by Upsher-Smith Laboratories, Inc. (July 2014).[27] These products, however, each maintained a relatively small share of the market compared to AndroGel as discussed in more detail above. Specifically, during the relevant time period Axiron achieved a high of only approximately 14% of the TTRT market, while Fortesta and Volgelxo each held under 10% of the market. Consequently, they did not pose significant competition to defendants' monopolistic conduct.

The barriers enumerated above are sufficiently high to be a factor in our finding **[**79]** of monopoly power. See *Broadcom Corp., 501 F.3d at 307*. The purpose of the FDCA, of course, is to protect the public from products that are not safe and effective. See, e.g., *Wyeth v. Levine, 555 U.S. 555, 566-67, 574, 129 S. Ct. 1187, 173 L. Ed. 2d 51 (2009)*. The barrier to entry into a prescription drug market is rightly a stringent one to ensure that this salutary goal is achieved.[28]

In sum, we find that the FTC has proven that defendants had a dominant share of the TTRT market in the relevant period and that significant barriers existed for entry into that market. The FTC has established the actual market reality that defendants possessed monopoly power and illegally and willfully maintained that monopoly power through the filing of sham litigation. This sham litigation delayed the entry of much less expensive competitive generic products into the TTRT market to the detriment of consumers and protected the defendants against loss of hundreds of millions of dollars in sales and profits.

V

We now move to the issue of the appropriate relief. The FTC seeks equitable relief in the form of disgorgement by defendants of profits which the FTC seeks to return to consumers through the establishment of a fund for this purpose. It also seeks an injunction.

Defendants first contend that *section 13(b) of the FTC Act* does not **[**80]** permit the FTC to seek equitable monetary relief **[*137]** such as disgorgement. This section provides that the FTC "may bring suit in a district court of the United States to enjoin any such act or practice . . . [and] in proper cases the [FTC] may seek, and after proper proof, the court may issue, a permanent injunction." *15 U.S.C. § 53(b)*. Defendants assert that because *section 13(b)* simply references relief in the form of an "injunction," the court may not order disgorgement.

In support of their position, defendants cite *Kokesh v. SEC, 137 S. Ct. 1635, 198 L. Ed. 2d 86 (2017)*. Kokesh addressed the narrow question of whether the five-year statute of limitations in *28 U.S.C. § 2462* applied "to claims for disgorgement imposed as a sanction for violating a federal securities law." *137 S. Ct. at 1639*. According to defendants, Kokesh stands for the proposition that disgorgement is punitive in nature and thus not included among the equitable remedies authorized under the FTC Act. Kokesh, however, did not involve *section 13(b)* but instead dealt with federal securities law. Moreover, the Supreme Court specifically declined to address whether courts possessed authority to order disgorgement in SEC enforcement proceedings. See *id. at 1642, n.3*. We will not stretch Kokesh beyond its holding and will not read it to prevent the court from granting **[**81]** the well-established equitable relief of disgorgement.

---

[27] An authorized generic of Vogelxo was also launched at the same time as the brand-name product.

[28] Defendants cited *Barr Laboratories, Inc. v. Abbott Laboratories, 978 F.2d 98 (3d Cir. 1992)*. This case is inapposite. In that private antitrust action, plaintiff claimed attempted monopolization involving oral erythromycin products, which are prescription antibiotics. *978 F.2d at 102*. Unlike the present action, Barr did not involve a patent. Id. In Barr, there were 32 manufacturers and defendant Abbott only held a high of 51.19% of the market in one year. *Id. at 103*. During the relevant time period the number of products competing for sales increased from 111 to 176. Id. Under the circumstances, the Court held that barriers to entry remained low and ultimately concluded that no attempted monopolization existed. *Id. at 113-14*. In contrast, the evidence before the court in this pending action demonstrates that the barriers were significant to entry into the TTRT market.

The Supreme Court, in Mitchell v. Robert De Mario Jewelry, Inc., held that the provision of the *Fair Labor Standards Act*, which specifically authorized courts to restrain violations, includes the power to order reimbursement for loss of wages for unlawful discharge or discrimination. *361 U.S. 288, 296, 80 S. Ct. 332, 4 L. Ed. 2d 323 (1960)*. The Supreme Court aptly stated:

> When Congress entrusts to an equity court the enforcement of prohibitions contained in a regulatory enactment, it must be taken to have acted cognizant of the historic power of equity to provide complete relief in the light of statutory purposes. As this Court long ago recognized, "there is inherent in the Courts of Equity a jurisdiction to . . . give effect to the policy of the legislature."

Id. at 291-92 (quoting *Clark v. Smith, 38 U.S. 195, 203, 10 L. Ed. 123 (1839)*). This language in our view is equally applicable here to the FTC Act. Id.; see also *United States v. Lane Labs-USA, Inc., 427 F.3d 219, 223 (3d Cir. 2005)*.

The weight of authority, in accordance with *Mitchell*, supports the conclusion that the grant of authority in *section 13(b)* to provide injunctive relief includes the full range of equitable remedies, including the power to order a defendant to disgorge illegally obtained funds. See, e.g., *FTC v. Cephalon, Inc., 100 F. Supp. 3d 433, 437-39 (E.D. Pa. 2015)* (Goldberg, J.). Our Court of Appeals has expressed agreement **[**82]** with this position. *FTC v. Magazine Solns., LLC, 432 F. App'x 155, 158 n.2 (3d Cir. 2011)*. This is in line with other appellate precedent in this Circuit, which states that disgorgement "is an equitable remedy meant to prevent the wrongdoer from enriching himself by his wrongs." *Edmonson v. Lincoln Nat. Life Ins. Co., 725 F.3d 406, 415 & n.3 (3d Cir. 2013)* (quoting *SEC v. Huffman, 996 F.2d 800, 802 (5th Cir. 1993)*).

If the defendants' position about *section 13(b)* is correct, the monopolist will be able to retain its ill-gotten gains and simply face an injunction against future wrongdoing but even then only if the wrongdoing is continuing or is likely to continue. This interpretation would eviscerate the FTC Act. As our Court of Appeals has stated, "if the literal application of a statute will produce a result demonstrably **[*138]** at odds with the intentions of its drafters, then we are obligated to construe [the] statute[] sensibly and [to] avoid constructions which yield absurd or unjust results." *Douglass v. Convergent Outsourcing, 765 F.3d 299, 302 (3d Cir. 2014)* (internal quotation marks and citations omitted). We reject defendants' argument concerning our authority to order disgorgement under *section 13(b) of the FTC Act.*

Because disgorgement aims to prevent unjust enrichment, a "court may exercise its equitable power only over the property causally related to the wrongdoing." *Commodity Futures Trading Comm'n v. Am. Metals Exch. Corp., 991 F.2d 71, 78-79 (3d Cir. 1993)* (quoting *SEC v. First City Fin. Corp., 890 F.2d 1215, 1231, 281 U.S. App. D.C. 410 (D.C. Cir. 1989)*). Courts determine the appropriate amount of equitable monetary relief using a two-step burden shifting **[**83]** framework. First, the government must "establish[] a reasonable approximation of the profits tainted by the violation." *SEC v. Teo, 746 F.3d 90, 107 (3d Cir. 2014)*. This requires that the FTC meet a "but-for" standard of causation. *Id. at 105*. The burden of going forward then shifts to the defendant to provide "evidence that the [government's] approximation of profits was unreasonable." *Id. at 107-08*. At this point, the defendant may "point[] to intervening events" that break the chain of causation. *Id. at 105-06* (quoting *First City Fin. Corp., 890 F.2d at 1232*). Under this standard, "doubts concerning the determination of disgorgements are to be resolved against the defrauding party." *SEC v. Hughes Capital Corp., 917 F. Supp. 1080, 1085 (D.N.J. 1996)*; see also *First City Fin. Corp., 890 F.2d at 1231-32*.

To determine the appropriate amount of equitable monetary relief to be awarded here, we must make findings about what would have happened absent the sham lawsuits filed by defendants. See *First City Fin. Corp., 890 F.2d at 1231-32*. The FTC's expert, Dr. Shapiro, constructed a counterfactual world relying on contemporaneous evidence as well as his expert economic analysis. He determined that but for the lawsuits: (1) Teva would have entered the market with a BX-rated product in June 2012; (2) Perrigo would have entered with an AB-rated product in June 2013; and (3) that entry of a generic version of AndroGel 1% would have affected sales of **[**84]** AndroGel 1.62%. He calculated defendants' "incremental revenue," which is the difference between defendants' actual revenue and their counterfactual revenue from June 2012 through the present. Dr. Shapiro then deducted defendants' incremental costs associated with the excess revenue to determine defendants' financial gain attributable to the sham litigation. He determined that this financial gain was $1.35 billion as of the end of March 2018. He opined that this financial gain will continue to accrue until entry of a generic version of AndroGel 1.62%. The FTC also seeks prejudgment interest on this financial gain, compounded quarterly at interest rates promulgated by the Internal Revenue Service ("IRS"). See *26 C.F.R. § 301.6621-1*.

Defendants dispute the FTC's assumptions regarding the entry of Teva and Perrigo as well as the FTC's assumption that entry of a generic 1% would have impacted sales of AndroGel 1.62%. Defendants argue that even absent the sham litigation, Teva would not have entered the market. They concede that Perrigo may have entered the market earlier than it did absent any sham lawsuit but assert that the earliest Perrigo would have entered would have been August 2014. Defendants admit, **[**85]** as they must, that delay in entry of generic 1% would have harmed consumers.

[*139] We must decide when, if ever, Teva would have entered the market in the "but-for" world. In the real world, Teva submitted to the FDA on January 13, 2011 a section 505(b)(2) NDA for its generic version of AndroGel 1% in pump and packet forms. Shortly thereafter, defendants filed their sham lawsuit against Teva. In December 2011, Teva entered into a settlement agreement with defendants and thereby agreed to a licensed entry date of December 27, 2014. On February 14, 2012, Teva received FDA approval of its section 505(b)(2) NDA for the packet presentation of its product only. In July 2014, Teva received from the FDA a BX rating on its product due to discrepancies with the analytical work in Teva's bioequivalence study. Thereafter, Teva decided not to launch its product.

The FTC asserts that, but for the sham lawsuit filed by defendants, Teva would have entered the market with a BX-rated testosterone 1% product in June 2012. The FTC concedes that the filing of the sham lawsuit by defendants did not impact the timing of Teva's FDA approval. Thereafter, the FTC posits that Teva would have continued to move forward with preparations for its launch while waiting for its **[**86]** TE rating. The FTC estimates it would have taken 12-13 months from the time it submitted its section 505(b)(2) NDA to the FDA for Teva to achieve operational readiness.

Defendants dispute whether Teva would have entered the market at all with a BX rating. Teva's generic drug division has never launched a BX-rated retail pharmaceutical product. It has not done so because Teva's generic business model relies on auto-substitution at pharmacies. Without auto-substitution, Teva would have to hire a sales force to promote its BX-rated product. As demonstrated by internal analyses created by Teva, a BX-rated generic without a perceived advantage in the market, such as Teva's product, generally captures only 5% or less of the brand-name product's sales. For this reason, BX-rated generics are rare.

While Tim Crew, Teva's former Commercial Operations Officer, was in particular a strong proponent of a BX-rated launch, Crew left Teva in 2012. Alan Oberman, the Teva executive who replaced Crew, was not a proponent of a BX-rated launch. Maureen Cavanaugh, Vice President of Customer Operations and Marketing for Teva, testified that she, along with the rest of her team, made the recommendation to Teva management to abandon plans for the launch **[**87]** of the testosterone product. She further stated that she did so not because of defendants' infringement litigation but because of Teva's inability to commercialize the product effectively. We find her testimony to be credible.

In addition to its failure to obtain an AB rating, Teva faced other obstacles to the profitable launch of its product. In July 2011, at the suggestion of the FDA, Teva withdrew the pump presentation of its product from consideration due to packaging issues. As a result, the Teva product was approved in packet form only. The pump was preferred by patients over packets because of ease of use. Teva estimated that this setback cut its potential sales opportunity by over 50%. If it intended to continue to pursue a pump presentation for its product, Teva would need to reformulate and then resubmit its section 505(b)(2) NDA to the FDA for consideration. This would have involved significant additional time and expense, and still may have not been successful.

Teva also faced serious manufacturing issues for its testosterone 1% product. It planned to use Cipla, a contract manufacturer based in India, to manufacture its testosterone 1% gel. Cipla demanded that **[*140]** Teva provide approximately $10 million for construction **[**88]** of manufacturing facilities. Teva had the option of making payment in the form of an up-front capital expenditure or over time as a 35% royalty on sales. Teva never reached an agreement with Cipla regarding this investment. The evidence shows that Teva ultimately refused to make this investment unless the FDA issued an AB rating to its product. Cipla could not move forward with preparations for manufacturing until an agreement was reached.

After considering the evidence presented, the FTC has not established that, but for defendants' sham litigation, Teva would have launched its product in June 2012 or at any time thereafter. We find that Teva's failure to launch was due to other intervening events described above and that the sham litigation against it was not a cause. Accordingly, we will not consider any "but-for" entry date of Teva into the TTRT market when calculating defendants' illegal financial gains.

There remains the question of when Perrigo would have entered the market absent defendants' sham litigation against it. In the real world, Perrigo had a December 27, 2014 licensed entry date for its generic version of AndroGel 1% under its settlement with defendants. The FDA approved **[**89]** Perrigo's section 505(b)(2) NDA on January 31, 2013 and thereafter Perrigo waited for a TE rating for its drug. Nearly eighteen months elapsed before the FDA granted its generic TTRT an AB rating. During this time, Perrigo submitted three letters to the FDA, dated April 18, 2013, September 13, 2013, and February 18, 2014, requesting that the FDA issue an AB rating. The last letter threatened litigation if the FDA failed to act by March 19, 2014 and enclosed a draft complaint. On March 21, 2014, Perrigo filed a lawsuit against the FDA in the United States District Court for the District of Columbia alleging violation of the FDCA and the *Administrative Procedures Act* based on the FDA's allegedly unreasonable delay in assigning a TE rating to its product. See Perrigo Israel Pharm. Ltd. v. U.S. Food & Drug Admin., No. 14-475 (D.D.C. Mar. 21, 2014).

On April 10, 2014, the FDA filed a response to Perrigo's motion for a speedy hearing. The FDA asserted that "Perrigo itself has obviated the need for a prompt decision by reaching an agreement with the innovator not to market until December 2014." The FDA further stated that it would issue a TE rating for Perrigo's product by July 31, 2014, some five months before **[**90]** Perrigo's planned launch. In the end, the FDA issued an AB rating to Perrigo on July 23, 2014, and thereafter Perrigo voluntarily dismissed its lawsuit. Perrigo launched its product on December 27, 2014.

We acknowledge that there is no statutory, regulatory, or other deadline within which the FDA is mandated to issue a TE rating. The time that the FDA needs to consider a TE rating depends on the specific facts of each situation, including the reason why the application for approval of a generic drug was submitted as a section 505(b)(2) NDA rather than an ANDA.

It is apparent from the lawsuit Perrigo brought against the FDA that the FDA knew of Perrigo's December 27, 2014 licensed entry date under the settlement agreement. As a result, it had no compelling need, as it implied in its court papers, to grant the TE rating long before Perrigo's entry date. We find that the FDA, absent the sham litigation and the resultant settlement agreement, would not have delayed the issuance of an AB rating for Perrigo's generic drug for nearly eighteen months after approval of its section 505(b)(2) NDA. The FDA is presumed to act in the public interest, which includes **[*141]** the mission of benefitting consumers by approving the entry of safe and effective lower-cost **[**91]** generic drugs into the market. Every month that the FDA would have delayed in issuing a TE rating to a generic drug that was otherwise ready and able to launch would have caused significant financial harm to consumers.

Dr. Kenneth Phelps, the FTC's regulatory expert, testified that in his experience it takes no more than one month for the FDA to assign a TE rating for a section 505(b)(2) drug. The FTC's economic expert, Dr. Shapiro, estimated that, but for the sham litigation, Perrigo would have received its TE rating approximately four months from the date of FDA approval of its section 505(b)(2) NDA. He relied on the approximated four months' time lapse in the real world between Perrigo's filing of the lawsuit against the FDA and the FDA's issuance of the TE rating.

Defendants further point to citizen's petitions filed by AbbVie regarding TE ratings to assert that the FDA would not have issued a TE rating to Perrigo sooner. On August 18, 2011, AbbVie filed a citizen's petition requesting that the

FDA conduct notice-and-comment rulemaking to establish procedures for its assignment of TE ratings for drugs approved under section 505(b)(2). That petition did not relate specifically to Perrigo but rather to general procedures for TE ratings. Contrary **[**92]** to defendants' position, there is no indication that the FDA refrained from issuing TE ratings for generic drugs while this petition was pending. Later in a supplement filed on December 11, 2013, AbbVie requested that the FDA assign a BX rating to Perrigo's product. The FDA ultimately responded to this citizen petition in July 2014 at the same time it issued Perrigo's TE rating. However, a June 2013 launch would have been six months before AbbVie filed its supplemental citizen petition, and therefore we find that this supplemental citizen petition would not have delayed Perrigo's launch in the "but-for" world. Thus, the defendants' citizen petition would not have affected Perrigo's "but-for" entry date.

We find that absent the sham lawsuit, Perrigo would have received its AB rating in June 2013 and would have launched its AB-rated generic product at that time. We reject defendants' contention that Perrigo would not have launched its product until August 2014.

The parties next dispute the effect of the sham litigation on sales of AndroGel 1.62%. In his damages model, Dr. Shapiro opines that entry of a generic version of AndroGel 1% would have caused the market share of AndroGel 1.62% **[**93]** to plateau. According to Dr. Shapiro, the delay of generic 1% entrants caused by the sham litigation allowed defendants to transition more patients from brand-name AndroGel 1% to brand-name AndroGel 1.62% and thus avoid auto-substitution for generic versions of AndroGel 1%. We agree. Consequently, Dr. Shapiro properly includes a portion of defendants' profits from AndroGel 1.62% in his calculation of excess profits.

In the real world, AndroGel 1.62% accounted for total AndroGel sales as follows: 57% during the last 7 months of 2012, 67% in 2013, 76% in 2014, 83% in 2015 and 2016, and 82% in 2017. In the "but-for" world, the FTC asserts that AndroGel 1.62%'s share of total AndroGel sales would have frozen at the time that the first generic version of AndroGel 1% entered the market. We have already determined that but for the sham litigation, Perrigo would have entered the market in June 2013. It follows and we find that the share for AndroGel 1.62% would have frozen **[*142]** at approximately 67%.[29]

In response, defendants contend that AndroGel 1.62% is "superior" to AndroGel 1% and thus prescribers will chose AndroGel 1.62% regardless of the availability of a generic version of AndroGel 1%.[30] In support **[**94]** of their position, they point out that AndroGel 1.62% is not subject to auto-substitution for a generic version of AndroGel 1%. They further maintain that sales of AndroGel 1.62% have come not only from patients who previously used AndroGel 1% but also from patients who used other TRTs or who are new to treatment for hypogonadism. Defendants cite OptumHealth data showing that from the launch of AndroGel 1.62% through March 2016, only 28.1% of AndroGel 1.62% patients had filled an AndroGel 1% prescription within the 12 months preceding their first AndroGel 1.62% prescription. The other sales came from patients who were previously using other TRTs or were new to testosterone replacement therapy. Defendants therefore reason that sales of AndroGel 1.62% would not have been impacted by earlier entry of a generic version of AndroGel 1%. We disagree.

We find in favor of the FTC on this issue. The record shows that sales of AndroGel 1.62% grew more slowly after launch than defendants initially anticipated. Around the time of the filing of the sham lawsuits, defendants were concerned about the impact that entry of a generic version of AndroGel 1% would have on sales for AndroGel 1.62%. Contemporaneous **[**95]** forecasts created by AbbVie during the relevant time period predicted that entry of a generic version of AndroGel 1% would not only erode sales for brand-name AndroGel 1% but would also cause sales of brand-name AndroGel 1.62% to plateau or even decline. For example, in the fall of 2011, AbbVie forecast that sales of AndroGel 1.62% would decrease approximately 30-35% after entry of an AB-rated generic version of AndroGel 1%. In 2014, AbbVie similarly predicted that AndroGel 1.62% could lose 20-27% of its sales after entry of

---

[29] As discussed above, the FTC initially took the position that Teva would have entered the market in 2012 with a BX-rated generic version of AndroGel 1%. This would freeze AndroGel 1.62%'s share of the AndroGel market at 51%, which is what the FTC asserts the share would have been during the last seven months of 2012.

[30] AndroGel 1.62% has the same active ingredients and effects as AndroGel 1%, but simply requires half the volume of gel. It thus has a quicker drying time and therefore less risk of transference.

a generic version of AndroGel 1%. Again, in the real world, AndroGel 1.62%'s share of AndroGel sales did in fact plateau after Perrigo entered the market in December 2014, although by that time AndroGel 1.62%'s share of the total AndroGel market had reached 83%.

The filing of the sham lawsuits allowed defendants additional time to increase sales for AndroGel 1.62% without any competition from a lower priced generic version of AndroGel 1%. Although AndroGel 1% and AndroGel 1.62% are distinct products, both include the same active ingredient and are indicated for the same purpose, that is, to treat hypogonadism. The only significant difference in the record between **[**96]** the two drugs is that AndroGel 1.62% requires a smaller volume of gel. As stated above, AndroGel 1% and AndroGel 1.62% compete within the TTRT market, both with each other as well as with all other TTRTs. Under these circumstances, we find that the filing of the sham lawsuits and the resulting delay in generic entry increased defendants' profits on not only AndroGel 1% but also on AndroGel 1.62%.

[*143] The parties further dispute the end date for calculation of defendants' profits subject to disgorgement. As stated above, only profits with a causal connection to the wrongdoing are subject to disgorgement. See *Commodity Futures Trading Comm'n, 991 F.2d at 78-79*. This court has discretion to order disgorgement of profits for the time period in which the effects on the market of defendants' wrongful conduct were continuing, even after the entry of Perrigo at the end of 2014. See id. On the other hand, we must not award disgorgement of profits where the causal connection to defendants' wrongdoing has become too attenuated or remote. See *Teo, 746 F.3d at 106*; *SEC v. MacDonald, 699 F.2d 47, 53-55 (1st Cir. 1983)*.

The FTC takes the position that defendants' financial gain due to the sham lawsuits is ongoing at the rate of $6 million per month until the time in the future when a generic version of AndroGel 1.62% enters **[**97]** the market. We reject this position and instead will award disgorgement of profits through August 2017 only. By that time, Perrigo's generic version of AndroGel 1% had been on the market for 2.5 years and had achieved its maximum penetration rate of approximately 91% of brand-name AndroGel 1% sales. The effect of defendants' wrongful conduct on the TTRT market had largely subsided. We find that any award of disgorgement after that date would be speculative.

Defendants are liable for disgorgement in the amount of $448 million in profits. This amount reflects defendants' financial gain due to the sham lawsuits from June 2013 when Perrigo would have entered the TTRT market through August 2017. In addition, the FTC is entitled to prejudgment interest calculated at the interest rates set forth by the IRS for underpayments. *26 C.F.R. § 301.6621-1*; see also *Teo, 746 F.3d at 109-10*. In reaching this award, we are guided by the Supreme Court's direction that antitrust cases must be resolved according to the "particular facts disclosed by the record" rather than "formalistic distinctions." *Eastman Kodak Co., 504 U.S. at 467-68* (internal citations omitted). We also keep in mind the purpose of our equitable power to grant disgorgement, which is not to provide an award of damages **[**98]** at law but instead to deter violations of ***antitrust law*** and to prevent the unjust enrichment of defendants. See *Teo, 746 F.3d at 105-06*.

We must also decide how liability for the disgorgement award should be apportioned between defendants AbbVie and Besins. Besins contends that it is immune from equitable monetary relief for its violations of ***antitrust law*** because it never received any profits from AndroGel. Instead, royalties on U.S. sales of AndroGel were paid to its European corporate affiliate now known as Laboratoires Besins Iscovesco SAS ("LBI SAS") or to another Besins entity, Besins Healthcare Luxemborg SARL ("BHL SARL"). Here, the FTC has named Besins Healthcare, Inc. (as stated above, "Besins") as a defendant.

Besins is one of the entities that instituted the sham lawsuits against Teva and Perrigo. As co-owner of the '894 patent, the sham lawsuits could not have been filed without Besins. See *Ethicon, Inc. v. U.S. Surgical Corp., 135 F.3d 1456, 1468 (Fed. Cir. 1998)*. We have already determined that Besins, along with AbbVie, filed these objectively baseless lawsuits with actual knowledge that the suits lacked merit with no expectation of prevailing and with the intent to impose expense and delay on Teva and Perrigo and to impede at least for a time the expected loss by defendants **[**99]** of hundreds of millions of dollars in sales. As we discussed above, counsel for Besins was an experienced patent lawyer who had access to the paragraph **[*144]** IV notices, the patent prosecution history, and the analysis of outside counsel who had full access to the Teva and Perrigo section 505(b)(2) NDAs.

He nonetheless made the decision with the requisite subjective intent to join in these objectively baseless lawsuits. Under these circumstances it is appropriate to impose disgorgement on Besins for its role in filing the sham lawsuits.

It is well established that "disgorgement is an equitable obligation to return a sum equal to the amount wrongfully obtained, rather than a requirement to replevy a specific asset". *SEC v. McGee, 895 F. Supp. 2d 669, 689 (E.D. Pa. 2012)* (quoting *SEC v. Banner Fund Int'l, 211 F.3d 602, 617, 341 U.S. App. D.C. 175 (D.C. Cir. 2000))*. A wrongdoer such as Besins "may be ordered to disgorge not only the unlawful gains that accrue to the wrongdoer directly, but also the benefit that accrues to third parties whose gains can be attributed to the wrongdoer's conduct." See *SEC v. Contorinis, 743 F.3d 296, 302 (2d Cir. 2014)*. This result obtains because the purpose of equitable disgorgement is both to deprive a wrongdoer of its unjust enrichment as well as to deter others from violating the law. *Teo, 746 F.3d at 105* (citing *SEC v. Hughes Capital Corp., 124 F.3d 449, 455 (3d Cir. 1997))*.

To accept Besins' position would be tantamount to allowing Besins **[**100]** to enrich unjustly its corporate affiliate through the filing of sham lawsuits. See *Contorinis, 743 F.3d at 301-04, 307*. It would also "perpetuate rather than correct an inequity." *Banner Fund Int'l, 211 F.3d at 617*. The Besins entity named as a defendant here is the party that co-owned the '894 patent and the party that filed the sham actions. It is of no import that Besins may have chosen to direct profits from its wrongdoing to affiliated corporate entities LBI SAS and BHL SARL.

Joint and several liability for disgorgement is appropriate "when two or more individuals or entities collaborate or have close relationships in engaging in the illegal conduct." *Hughes Capital Corp., 124 F.3d at 455*. Nonetheless, a court may apportion liability among tortfeasors when it is reasonable and practical to do so, such as when the recipients of ill-gotten profits and the amount each received can be determined from the record. *Id. at 455*. Besins' European affiliates were paid royalties in the amount of 8% of the U.S. net sales of AndroGel through the end of March 2015. As of April 1, 2015, that royalty rate was reduced to 5%. We therefore will apportion liability in those percentages to Besins for the disgorgement award of $448 million plus prejudgment interest according to those percentages.

VI

In addition to disgorgement, **[**101]** the FTC seeks an injunction that in its view would prevent or deter defendants from engaging in similar misconduct in the future. Specifically, the FTC urges an injunction: (1) to prohibit the filing of any claims of patent infringement based on the '894 patent by a product that does not include about 0.1% to about 5% isopropyl myristate; (2) to prohibit defendants from filing any other sham litigation; (3) to prohibit defendants from engaging in any action that misuses government processes for anticompetitive purposes; and (4) to require defendants to certify that any patent infringement litigation or other use of governmental processes has an objectively reasonable basis.

The FTC further contends that an injunction is necessary to restore competitive market conditions. It seeks to compel defendants to license AndroGel 1.62% to one or more generic competitors. It also **[*145]** would command defendants to manufacture and deliver to these generic competitors a supply of generic AndroGel 1.62% until those competitors are independently able to manufacture the drug themselves.

Section 13(b) of the FTC Act allows the FTC to obtain injunctive relief when a defendant "is violating, or is about to violate, any provision of law enforced by **[**102]** the Federal Trade Commission." *15 U.S.C. § 53(b)*. As our Supreme Court has recognized, "[t]he purpose of an injunction is to prevent future violations." *United States v. W. T. Grant Co., 345 U.S. 629, 633, 73 S. Ct. 894, 97 L. Ed. 1303 (1953)* (citing *Swift & Co. v. United States, 276 U.S. 311, 326, 48 S. Ct. 311, 72 L. Ed. 587 (1928))*. Accordingly, the FTC must demonstrate that there is a "cognizable danger of recurrent violation." Id.; see also *Madsen v. Women's Health Ctr., Inc., 512 U.S. 753, 765 n.3, 114 S. Ct. 2516, 129 L. Ed. 2d 593 (1994)*. As the moving party, the FTC bears the burden to prove that injunctive relief is warranted. See *W. T. Grant Co., 345 U.S. at 633*.

The FTC has proven that defendants filed two sham infringement lawsuits, one against Teva in April 2011 and another against Perrigo in October 2011. Defendants were able to exclude competition illegally in the TTRT market from June 2013 until the end of December 2014 as a result of sham litigation and the settlement of sham litigation. Nonetheless, the FTC has presented no evidence that defendants are currently violating antitrust laws or about to violate antitrust laws. Generic versions of AndroGel have now been on the market for over three years. AndroGel 1%'s share of the market has shrunk since entry of Perrigo, and the '894 patent expires on January 6, 2020. The FTC has not alleged that defendants have filed any other sham lawsuits.[31] The fact that defendants filed two such lawsuits, without more, does not establish that defendants have a **[**103]** pattern or practice doing so. On this record there is no basis to conclude that defendants' misconduct is likely to reoccur.

We are also concerned that the injunction sought by the FTC is overbroad and punitive in nature. Because it would implicate defendants' *First Amendment* right to petition the government, the injunction must "burden no more speech than necessary to serve a significant government interest." *Madsen, 512 U.S. at 765*. The injunction sought by the FTC involves the defendants' ability to file patent infringement suits or otherwise to use the governmental process with respect to any patent. Given the fact that the '894 patent was the only patent at issue here and there is no evidence that defendants filed sham litigation or otherwise abused the government process with regard to other patents, the injunctive relief sought by the FTC does not meet the test set forth in *Madsen*.

We also see no basis to enter an injunction mandating defendants to license to generic competitors its intellectual property rights to AndroGel 1.62%. There is no evidence that sale of AndroGel 1.62% is currently violating, or will violate, *section 5 of the FTC Act.*

Accordingly, no injunction will be entered.

[*146] VII

Based on defendants' violation of *section 5 of the FTC Act*, the court awards equitable monetary **[**104]** relief in favor of the FTC and against the defendants in the amount of $448 million, which represents disgorgement of defendants' ill-gotten profits from June 2013, when Perrigo would have entered the TTRT market, through August 2017. The FTC is also entitled to prejudgment interest on this award, calculated at the interest rates set forth by the IRS for underpayments as discussed above. See *26 C.F.R. § 301.6621-1*. Liability will be apportioned between AbbVie and Besins according to the royalty rates agreed upon by the parties, which were 8% through March 31, 2015 and thereafter 5%.

The parties shall confer and if possible submit to the court for consideration a joint proposed form of judgment and if the parties cannot agree each party shall submit a proposed form of judgment. The court will enter a judgment after conferring with the parties.

BY THE COURT:

/s/ Harvey Bartle III, J.

[EDITOR'S NOTE: The following court-provided text does not appear at this cite in F. Supp. 3d.]

[*none] ORDER

AND NOW, this 29th day of June, 2018, the court having filed its Findings of Fact and Conclusions of Law, it is hereby ORDERED that:

---

[31] The FTC has advised the court that since the filing of the lawsuits against Teva and Perrigo in 2011, defendants have filed numerous other patent infringement suits against competitors, including seven lawsuits related to the '894 patent. The FTC has presented no evidence that these lawsuits were shams, and therefore they do not provide support for the injunctive relief sought here.

(1) the parties shall submit to the court, on or before July 13, 2018, a proposed joint form of judgment and if the parties cannot agree, each party shall submit a proposed form of judgment by that **[**105]** date; and

(2) a conference with counsel for the parties concerning the form of judgment to be entered shall take place in chambers on Tuesday, July 17, 2018 at 10:30 a.m.

BY THE COURT:

/s/ Harvey Bartle III, J.

Opinion

ORDER AND STATEMENT

On September 14, 2016, Plaintiff McGarry & McGarry, LLP, filed in the Northern District of Illinois a putative class action against Bankruptcy Management Solutions, Inc. (BMS). McGarry alleged that BMS participated in a horizontal conspiracy to fix the manner of charging fees for its bankruptcy software services in violation of *Section 1 of the Sherman Act* as well as an identical claim for violation of the *Illinois Antitrust Act, 740 ILCS 10/3*. The court granted BMS's motion to dismiss the Sherman Act count with prejudice and declined to exercise supplemental jurisdiction over the state claim, dismissing it without prejudice. **[*2]** *See McGarry & McGarry, LLP v. Bankr. Mgmt. Soultions, Inc., No. 16 CV 8914, 2017 U.S. Dist. LEXIS 93133, 2017 WL 2619143 (N.D. Ill. June 16, 2017)*. McGarry did not appeal the order. Instead, it filed in Illinois state court a single count against BMS alleging the same horizontal conspiracy to fix the manner of charging fees for its bankruptcy software services in violation of the

Illinois Antitrust Act, 740 ILCS 10/3 (count I), which BMS promptly removed to this court.[1] (*See* Dkt. 1.) BMS now moves to dismiss the count under Federal Rule of Civil Procedure 12(b)(6). (Dkt. 25.) For the reasons stated below, the motion is granted.[2]

BACKGROUND[3]

Like the previous litigation between these two parties, this case involves an alleged horizontal conspiracy among BMS, Epiq Systems, Inc., and TrusteSolutions, LLC—the three largest bankruptcy software providers in the United States—to fix the manner of charging fees for their services. When a debtor files a Chapter 7 petition in bankruptcy, an estate containing the debtor's property is created. The Executive Office of the United States Trustee (EOUST), a division of the United States Department of Justice, then appoints a specific trustee to administer the estate.

Historically, BMS, the largest bankruptcy software provider, directed a trustee who wished to use its software to deposit all of an estate's funds with a partner bank. The partner **[*3]** bank would earn money from the deposit, paying interest to the estate as well as a fee to BMS.[4] But as a result of the financial crisis of 2008, interest rates declined and, not surprisingly, so did the partner bank's ability to pay BMS. In response, BMS decided to implement a new payment structure: it would sell bankruptcy software services only in combination with bankruptcy banking services, and it would charge a set percentage of the funds in the estate's bank account for those combined services. For the new billing structure to succeed in the marketplace, however, BMS needed Epiq and TrusteSolutions to agree to sell their services in the same manner.

Sometime before 2011, BMS approached the two entities, and both agreed to implement a similar billing structure. The plan, however, would potentially violate a EOUST rule that prohibited a trustee from using estate funds to pay bank fees, so the three conspirators appealed to the EOUST to suspend the rule, which it did in April 2011. With that barrier removed, BMS, Epiq, and TrusteSolutions put their conspiracy into motion.

In May 2011, Integrated Genomics, Inc., petitioned in Chapter 7 bankruptcy in this District. Eugene Crane was appointed **[*4]** trustee of the estate. At some point, Crane entered into a contract with BMS. As one condition of the contract, Crane agreed to deposit all (or substantially all) of the estate's funds with Rabobank, BMS's partner bank at the time. (*Id.*) Crane also entered into a contract with Rabobank, authorizing it to automatically withdraw a monthly fee from the Integrated estate's account.

McGarry, a law firm located in Chicago, was an unsecured creditor of the Integrated estate. It received $12,472.55 of its allowed claim of $78,308.94. Following Crane's final account and distribution report filed in April 2014, McGarry learned that a $514.16 fee had been paid to Rabobank from the Integrated account. Rabobank paid most, if not all, of that amount to BMS. McGarry alleges that the amount of money paid to BMS was greater than the amount it would have received absent the alleged conspiracy and, without that overcharge, McGarry would have received a larger distribution from the Integrated estate.[5]

LEGAL STANDARD

---

[1] The court has jurisdiction under 28 U.S.C. § 1332. McGarry is a partnership whose members are all citizens of Illinois. BMS shows a good faith basis that the amount in controversy exceeds $75,000.

[2] The court has jurisdiction under 28 U.S.C. § 1332. Venue is proper under 28 U.S.C. § 1391(b).

[3] Unless otherwise noted, the following facts are taken from plaintiff's complaint and are presumed true for the purpose of resolving the pending motion. Active Disposal, Inc. v. City of Darien, 635 F.3d 883, 886 (7th Cir. 2011) (citation omitted).

[4] The court infers that the interest paid to an estate was less than what would be paid to a normal commercial client.

[5] The complaint includes additional allegations that are not pertinent to the disposition of the motion.

A motion to dismiss under Rule 12(b)(6) challenges a complaint for failure to state a claim on which relief may be granted. In ruling on such a motion, the court accepts as true all well-pleaded facts in the **[*5]** plaintiff's complaint and draws all reasonable inferences from those facts in the plaintiff's favor. Active Disposal, 635 F.3d at 886 (citation omitted). To survive a Rule 12(b)(6) motion, the complaint must not only provide the defendant with fair notice of a claim's basis but must also establish that the requested relief is plausible on its face. *See* Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009); Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007). The allegations in the complaint must be "enough to raise a right to relief above the speculative level." Twombly, 550 U.S. at 555. At the same time, the plaintiff need not plead legal theories; it is the facts that count. Hatmaker v. Mem'l Med. Ctr., 619 F.3d 741, 743 (7th Cir. 2010); *see also* Johnson v. City of Shelby, 574 U.S. ___, 135 S. Ct. 346, 346, 190 L. Ed. 2d 309 (2014) (per curiam) ("Federal pleading rules call for 'a short and plain statement of the claim showing the pleader is entitled to relief'; they do not countenance dismissal of a complaint for imperfect statement of the legal theory supporting the claim asserted." (citations omitted)).

ANALYSIS

In the first action, the court granted BMS's motion to dismiss because McGarry was not the appropriate party to bring a claim under federal ***antitrust law***. BMS moves to dismiss McGarry's single count of violation of the Illinois Antitrust Act (IAA) on the same grounds. To bring an antitrust suit, a plaintiff must show two things: they must have standing to bring an antitrust suit, and they **[*6]** must allege that they have sustained antitrust injury. Greater Rockford Energy & Tech. Corp. v. Shell Oil Co., 998 F.2d 391, 395 (7th Cir. 1993); Shuffle Tech Int'l, LLC v. Sci. Games Corp., No. 15 C 3702, 2015 U.S. Dist. LEXIS 138741, 2015 WL 5934834, at *9 (N.D. Ill. Oct. 12, 2015). "Illinois courts have adopted a common-law harmonization provision, meaning that they interpret their antitrust laws in harmony with federal-court decisions interpreting federal ***antitrust law***." United States ex rel. Blaum v. Triad Isotopes, Inc., 104 F. Supp. 3d 901, 929-30 (N.D. Ill. 2015); *see also* 740 Ill. Comp. Stat. Ann. 10/11 ("When the wording of [the Illinois Antitrust] Act is identical or similar to that of a federal ***antitrust law***, the courts of this State shall use the construction of the federal law by the federal courts as a guide in construing this Act."). This includes questions of standing.[6] O'Regan v. Arbitration Forums, Inc., 121 F.3d 1060, 1066 (7th Cir. 1997) ("Federal antitrust standing rules apply under the Illinois Antitrust Act.").

In the first action, BMS alleged that McGarry was prevented from bringing a federal antitrust suit by the doctrine announced in Illinois Brick Co. v. Illinois, 431 U.S. 720, 97 S.Ct. 2061, 52 L.Ed.2d 707 (1977).[7] *Illinois Brick* forbids "a customer of the purchaser who paid a cartel price to sue the cartelist, even if his seller—the direct purchaser from the cartelist—passed on to him some or even all of the cartel's elevated price." Motorola Mobility LLC v. AU Optronics Corp., 775 F.3d 816, 821 (7th Cir. 2015), *cert. denied*, *135 S. Ct. 2837, 192 L. Ed. 2d 875 (2015)*. That is, an indirect purchaser generally cannot bring an antitrust suit; rather, the claim belongs to the direct purchaser.[8]

---

[6] The language under the federal antitrust statutes regarding who is able to maintain an antitrust claim is substantially similar to that of the IAA. *Compare* 15 U.S.C. § 15 ("any person who shall be injured in his business by reason of anything forbidden in the antitrust laws . . . .) *with* 740 ILCS 10/7 ("Any person who has been injured in his business or property, or is threatened with such injury, by violation of Section 3 of this Act . . . .).

[7] BMS argues that McGarry should be collaterally estopped from arguing that it has standing to bring a state antitrust claim because the court previously found that McGarry lacked standing to bring a federal antitrust claim. In the prior case, McGarry conceded that it was not a purchaser of any kind; therefore, it had not participated in any market. 2017 U.S. Dist. LEXIS 93133, 2017 WL 2619143 at *3. The issue of whether McGarry had standing under the IAA was not decided. While Illinois courts look to federal law to guide their interpretation of the IAA, they are not bound by the decisions of federal courts. *See* Gilbert's Ethan Allen Gallery v. Ethan Allen, Inc., 162 Ill. 2d 99, 103, 642 N.E.2d 470, 472, 204 Ill. Dec. 769 (1994) (stating that federal case law "is merely a guide to use in interpreting" the IAA and that federal decisions are not binding on Illinois courts). Accordingly, McGarry is not estopped from arguing that it has standing to bring a state antitrust claim.

[8] While there are narrow exceptions to this rule, McGarry did not convince the court that it fit within them.

Because, according to McGarry, the Integrated estate was the direct purchaser, **[*7]** this court held that the estate, through its trustee, was the proper party to bring an antitrust claim.[9]

But while "the Supreme Court held [in *Illinois Brick*] that only the immediate purchaser of goods may sue under antitrust laws, Illinois now provides by statute that indirect purchasers may recover as well." *Cty. of Cook v. Philip Morris, Inc., 817 N.E.2d 1039, 1045, 353 Ill. App. 3d 55, 288 Ill. Dec. 389 (2004)*. This difference between Illinois and federal ***antitrust law*** does nothing to help McGarry, however, for it has admitted that it is not a purchaser at all. McGarry first cites to several cases allowing non-purchasers to bring antitrust suits. (Dkt. 28 at 4 (citing *Blue Shield of Virginia v. McCready, 457 U.S. 465, 102 S. Ct. 2540, 73 L. Ed. 2d 149 (1982)*; *In re Zinc Antitrust Litig., 155 F. Supp. 3d 337, 360 (S.D.N.Y. 2016)*; *In re Aluminum Warehousing Antitrust Litig., 95 F. Supp. 3d 419, 441 (S.D.N.Y. 2015)*; *Hanover 3201 Realty, LLC v. Vill. Supermarkets, Inc., 806 F.3d 162, 172 (3d Cir. 2015)*.) The reasoning underlying the cited circuit and district opinions springs from the Supreme Court's decision in *McCready*. There, the Supreme Court recognized that a party who was neither a purchaser nor competitor in the relevant market could bring an antitrust action if the injury suffered "was inextricably intertwined with the injury the conspirators sought to inflict." *McCready at 484*. "To be inextricably intertwined with the injury to competition, the plaintiff[] must have been manipulated or utilized by [d]efendant as a fulcrum, conduit or market force to injure competitors or participants in the relevant product and **[*8]** geographical market." *In re Zinc Antitrust Litig. at 360*; *In re Aluminum Warehousing Antitrust Litig. at 422* (same). As in the first action, McGarry fails to explain how its injury was inextricably intertwined with the conspiracy to fix the manner of charging fees for bankruptcy software. The plaintiffs in the cited cases, while not purchasers in the markets targeted by the conspiracies, were, however, purchasers in other markets. *See* *Loeb Indus., Inc. v. Sumitomo Corp., 306 F.3d 469, 482 (7th Cir. 2002)* (stating that *McCready* "recognizes that different injuries in distinct markets may be inflicted by a single antitrust conspiracy"). McGarry has participated in no market. Rather, it is simply a creditor of an estate that allegedly was injured by an antitrust violation. The Seventh Circuit stated more than three decades ago that "[m]erely derivative injuries sustained by employees, officers, stockholders, and creditors of an injured company do not constitute 'antitrust injury' sufficient to confer antitrust standing." *Sw. Suburban Bd. of Realtors, Inc. v. Beverly Area Planning Ass'n, 830 F.2d 1374, 1378 (7th Cir. 1987)*; *see also* *Cong. Bldg. Corp. v. Loew's, Inc., 246 F.2d 587, 590 (7th Cir. 1957)* ("The courts have uniformly denied recovery to . . . creditors . . . who claimed injury as the result of alleged antitrust violations."); *Associated Gen. Contractors v. Cal. State Council of Carpenters, 459 U.S. 519, 533-34, 103 S.Ct. 897, 74 L.Ed.2d 723 (1983)* (discussing with approval *Loeb v. Eastman Kodak Co., 183 F. 704, 709 (3d Cir. 1910)*, which held that a creditor of an injured business does not have standing to assert an antitrust claim). McGarry cites no case where a creditor **[*9]** brought a claim under the IAA or the federal antitrust laws based on an injury sustained by its debtor (nor has the court found one).

Rather, McGarry points out that a bankruptcy estate is different from a company in that the former does not exist to generate a profit. Therefore, the relationship between the Integrated Estate and McGarry "more closely resembles a principal/agent relationship, where the principal has standing to sue despite the general derivative standing rule." (Dkt. 28 at 8.) The court struggles to understand McGarry's argument and does not see how the Integrated Estate would be McGarry's agent, as it would seemingly follow that a bankruptcy estate would be the agent of each of its individual creditors. If anyone is the agent of the bankruptcy estate, it is the trustee. As the court has pointed out, because a trustee in bankruptcy owes a fiduciary duty to an estate's creditors, *Matter of Salzer, 52 F.3d 708, 712 (7th Cir. 1995)*, the trustee could "pursue the debtor's claim against the defendant on behalf of all the debtor's creditors equally, without preference for any particular creditor. That injury is much more efficiently measured on behalf of the debtor, moreover, rather than in fortuitous segments claimed by **[*10]** those creditors who happen to sue." Phillip E. Areeda *et al.*, ***ANTITRUST LAW*** § 353c (4th ed. 2014).

ORDER

---

[9] McGarry's motion to reopen the bankruptcy case and for derivative standing to assert antitrust claims was denied, in part because the trustee's refusal to reopen the estate was justified. *See* Order at 5, *In re Integrated Genomics, Inc., 11 B 19086, 2017 Bankr. LEXIS 4596 (Bankr. N.D. Ill. Nov. 21, 2017)*.

Accordingly, BMS's motion to dismiss (dkt. 25) is granted. McGarry's claim is dismissed with prejudice. This case is terminated.

Opinion by: HULL, Acting P. J.

Opinion

Plaintiff John B. Hackert, a medical doctor, sued Sutter Medical Foundation and related entities to be reimbursed for services he provided as an assistant surgeon. Sutter, however, had not authorized his services and plaintiff provided those services after he terminated his contract with Sutter and after Sutter informed him it would not pay for unauthorized services. Plaintiff alleged that state law governing managed health care, federal Medicare law, and unfair competition law (as it may apply to a breach of his prior contract with Sutter) entitled him to injunctive relief compelling Sutter to pay for the unauthorized services.

The trial court sustained defendants' demurrer without leave to amend and entered a judgment of dismissal. We reverse, but only to allow plaintiff to plead a common law cause of action for breach of his prior contract. All of his current causes of action fail to state a claim upon which relief may be granted.

We note that defendants are Sutter Medical Foundation, Sutter Medical Group, Sutter Independent Physicians, Sutter Health **[*2]** Sacramento Sierra Region, Sutter Health Plan dba Sutter Health Plus, and Sutter Health. For ease of reference, we refer to the defendants individually and collectively as Sutter.

FACTS AND PROCEEDINGS

The sufficiency of a complaint is a question of law we review do novo. We accept as true all properly pleaded allegations. (*Saunders v. Superior Court (1994) 27 Cal.App.4th 832, 837-838, 33 Cal. Rptr. 2d 438*.)

In 2011, plaintiff entered into a contract with Sutter to perform surgical assistant services. He terminated the contract in 2014, believing Sutter was underpaying claims for his services. When he ended the contract, he expressed his intention to continue to bill Sutter for services he would render on a noncontracted basis.

Sutter informed plaintiff in writing that any services he provided in the future would require Sutter's authorization. Sutter also told him it would not pay for unauthorized services that he might render in the future.

Despite these warnings, plaintiff submitted claims for unauthorized services he performed at the request of other surgeons after plaintiff had terminated his contract. Sutter denied the majority of these claims.

Plaintiff filed this action. In his second amended complaint, he sought injunctive relief ordering Sutter to pay his unauthorized **[*3]** claims pursuant to (1) *section 1300.71 of title 28 of the California Code of Regulations* (*section 1300.71*), a regulation prescribing how provider claims against health plans are to be reimbursed under state law; (2) federal Medicare regulations directing how provider claims are to be reimbursed by health plans that provide certain Medicare coverage; and (3) the state Unfair Competition Law (*Bus. & Prof. Code, § 17200 et seq.*) based on a breach of his *prior* contract. Plaintiff also sought a declaration that Sutter's refusal to pay his claims was unlawful.

The trial court sustained Sutter's demurrer without leave to amend. It held the state and federal regulations did not require Sutter to pay plaintiff for his unauthorized claims. It ruled his claim under the Unfair Competition Law was moot because he terminated his prior contract, failed to allege a fraudulent practice, and lacked standing under federal law to enforce the terms of an employer-sponsored health plan. The trial court also held plaintiff was not entitled to declaratory relief because all of his substantive claims failed as a matter of law.

Plaintiff appeals from the judgment of dismissal. He contends the trial court erred in each of its rulings. He also contends the trial court abused its discretion when it sustained the demurrer without **[*4]** granting him leave to allege a quantum meruit claim.

We disagree with each of plaintiff's contentions.

DISCUSSION

I

Section 1300.71

Plaintiff contends the trial court erred when it determined he could not state a claim for injunctive relief under *section 1300.71*. He asserts the regulation required Sutter to compensate him for nonemergency services he rendered, even though Sutter did not authorize his services, because nothing in the regulation or its related statutes *prohibits* Sutter from paying for services it did not authorize. Simply stating the argument exposes its fallacy.

The Knox-Keene Health Care Service Plan Act of 1975 (the Act) and its related regulations govern health care service plans. (*Health & Saf. Code, § 1340 et seq.*)

The Act defines a "'health care service plan'" as "[a]ny person who undertakes to arrange for the provision of health care services to subscribers or enrollees, or to pay for or to reimburse any part of the cost for those services, in return for a prepaid or periodic charge paid by or on behalf of the subscribers or enrollees." (*Health & Saf. Code, § 1345, subd. (f)(1)*.) We use the terms "health care service plan," "health plan," and "plan" interchangeably.

The Act requires health plans to reimburse claims for payment made by health care providers and to provide a **[*5]** dispute resolution mechanism to resolve challenged claims. (*Health & Saf. Code, §§ 1367, subd. (h)*, *1371*.)

The Act does not compel a health plan to pay for provider services it does not authorize except in one instance relevant here. It requires a health plan to pay providers for emergency services they render to enrollees "until the care results in stabilization of the enrollee," even if the providers are not contracted with the health plan and the health plan does not authorize the services. (*Health & Saf. Code, § 1371.4, subd. (b)*.) "As long as federal or state law requires that emergency services and care be provided without first questioning the patient's ability to pay, a health care service plan shall not require a provider to obtain authorization prior to the provision of emergency services and care necessary to stabilize the enrollee's emergency medical condition." (*Health & Saf. Code, § 1371.4, subd. (b)*.)

Section 1300.71 sets forth the amount a health plan must pay providers on their claims. *Subdivision (a)(3) of section 1300.71* reads in its entirety:

"'Reimbursement of a Claim' means:

"(A) For contracted providers with a written contract, including in-network point-of-service (POS) and preferred provider organizations (PPO): the agreed upon contract rate;

"(B) For contracted providers without a written contract and non-contracted providers, except **[*6]** those providing services described in paragraph (C) below: the payment of the reasonable and customary value for the health care services rendered based upon statistically credible information that is updated at least annually and takes into consideration: (i) the provider's training, qualifications, and length of time in practice; (ii) the nature of the services provided; (iii) the fees usually charged by the provider; (iv) prevailing provider rates charged in the general geographic area in which the services were rendered; (v) other aspects of the economics of the medical provider's practice that are relevant; and (vi) any unusual circumstances in the case; and

"(C) For non-emergency services provided by non-contracted providers to PPO and POS enrollees: the amount set forth in the enrollee's Evidence of Coverage." (*§ 1300.71, subd. (a)(3)*.

Thus, the amount a health plan must pay depends on whether the provider has a contract with the health plan and whether the provider rendered emergency services. If the provider has a contract with the health plan, the provider receives "the agreed upon contract rate." (*§ 1300.71, subd. (a)(3)(A)*.) If the provider does not have a contract with the plan, the provider receives "the reasonable and **[*7]** customary value" for the services rendered, unless the noncontracted provider renders nonemergency services. (*§ 1300.71, subd. (a)(3)(B)*.) The noncontracted provider who renders nonemergency services is entitled to "the amount set forth in the enrollee's Evidence of Coverage" established by the health plan. (*§ 1300.71, subd. (a)(3)(C)*.)

Although he did not have a contract with Sutter and did not provide emergency services, plaintiff contends the plain language of *section 1300.71, subdivision (a)(3)(B)* "mandates" he be compensated the "reasonable and customary value" of his services regardless of Sutter's decision not to authorize his work. He argues he is entitled to this amount because *section 1300.71* establishes what plans must pay noncontracted providers, and because there is nothing in *section 1300.71* or the Act and its other regulations that conditions payment on the health plan authorizing the noncontracted provider's services. He asserts it is the primary surgeon who must be authorized by Sutter, and the primary surgeon can retain plaintiff to assist on a surgery without being in violation of his or her contract with Sutter.

Each of plaintiff's assertions is incorrect. *If* *section 1300.71* applied here, its plain language would mandate plaintiff be compensated only in the amount set forth in Sutter's evidence of **[*8]** coverage, not the reasonable and customary value. That is because plaintiff rendered nonemergency services without having a contract with Sutter. (*§ 1300.71, subd. (a)(3)(C)*.)

But *section 1300.71* does not apply here, and it does not obligate Sutter to pay plaintiff anything. The Act expressly authorizes Sutter to condition payments to providers who render nonemergency services on obtaining Sutter's authorization. Under the Act, a health plan "may require prior authorization as a prerequisite for payment for necessary medical care following stabilization of an emergency medical condition." (*Health & Saf. Code, § 1371.4, subd. (c)*.) Sutter exercised its authority to condition payment on plaintiff receiving its authorization, and nothing in *section 1300.71* superseded Sutter's statutory right to do so. The regulation establishes what Sutter owes to authorized providers, contracted and noncontracted, and to noncontracted providers who render emergency services. It does not compel Sutter to reimburse an unauthorized provider of nonemergency services.

As plaintiff acknowledges, the "authorization process is ordinarily an obligation of contract, not law." Here, there is no contract that requires Sutter to pay plaintiff for his services. And the only law plaintiff cites that requires health **[*9]** plans to pay providers for unauthorized services imposes that duty when the provider renders emergency services. (*Health & Saf. Code, § 1371.4, subd. (b)*.) Plaintiff did not render emergency services.

Plaintiff's argument that Sutter is compelled to pay him because no law required Sutter to condition payment on its authorization is illogical. That the law did not require Sutter to condition payment on its authorization did not prohibit Sutter from doing so. As already stated, the Act expressly authorized Sutter to condition payment for nonemergency services on authorization.

Moreover, if the Legislature had intended to require health plans to pay for unauthorized nonemergency services, it would have expressly said so, as it did for emergency services. Its clear statement on emergency services and its silence on all other services indicate it did not intend to require plans to pay for unauthorized nonemergency services. "The expression of some things in a statute necessarily means the exclusion of other things not expressed. [Citation.]" (*Gikas v. Zolin (1993) 6 Cal.4th 841, 852, 25 Cal. Rptr. 2d 500, 863 P.2d 745*.) The issue is whether, in the absence of a contract, the Act required Sutter to pay plaintiff for his unauthorized nonemergency services. It did not.

Plaintiff's assertion that authorization **[*10]** was required only from the primary surgeon also fails. He directs us to nothing in the Act or its regulations that empowers a contracted provider to authorize on behalf of the health plan a noncontracted provider to render nonemergency services. Indeed, in his complaint, plaintiff implies Sutter surgeons understand this point, as they are not requesting his services because Sutter has not authorized them.

Finally, plaintiff cites to an unpublished federal district court opinion to support his argument that *section 1300.71* requires payment of the "reasonable and customary amount" for unauthorized, noncontracted nonemergency services. (See *Bernstein v. Health Net Life Insurance Company (S.D.Cal., Nov. 29, 2012, Civ. No. 12-cv-00717 AJB (JMA)) 2012 U.S. Dist. LEXIS 169817, 2012 WL 5989348* (*Bernstein*).) Neither published nor unpublished federal district court opinions are binding precedent on this court. (*Futrell v. Payday California, Inc. (2010) 190 Cal.App.4th 1419, 1432, fn. 6, 119 Cal. Rptr. 3d 513*.) Nor is the case persuasive. It refers to *section 1300.71* only to assert that a health plan's duty under the regulation to pay a reasonable and customary amount is owed to the out-of-network provider, not the enrollee. (*Bernstein, supra, 2012 U.S. Dist. LEXIS 169817, [WL] at p. 3*.) The opinion says nothing about *section 1300.71* obligating a health plan to pay a noncontracted provider for unauthorized nonemergency services. Sutter's request to take **[*11]** judicial notice of the docket and notice of dismissal filed in *Bernstein* is denied as moot.

Because *section 1300.71* did not obligate Sutter to pay plaintiff for his nonauthorized services, the trial court correctly sustained Sutter's demurrer to plaintiff's claim for relief under this regulation.

II

Medicare Regulations

Plaintiff contends the trial court erred when it determined he could not state a claim for injunctive relief under certain Medicare regulations. He asserts the regulations require Sutter to pay for his unauthorized services because they establish the amount Sutter must pay to noncontracted providers. As with the Act, nothing in the Medicare regulations requires Sutter to pay noncontracted providers for unauthorized services except in the case of emergency care.

The regulations at issue concern a Medicare plan known as Medicare Advantage. "Medicare has several component parts: Medicare Part A is hospital insurance, covering inpatient hospital services and post-hospital nursing facility care, and is generally paid on a flat-fee basis; Medicare Part B is medical insurance, covering the costs of physician services and outpatient care, also generally paid on a fee-for-service basis; Medicare **[*12]** Advantage (formerly known as Medicare + Choice [and also known as Part C]) is a plan offered by private companies that contract with Medicare to provide Part A and B benefits, for which Medicare pays a fixed amount per patient per month for care." (*U.S. ex rel. Osheroff v. HealthSpring, Inc. (M.D.Tenn. 2013) 938 F.Supp.2d 724, 726, fn. 2*.)

A health plan that offers a Medicare Advantage plan may provide benefits to enrollees "directly or through arrangements, or by paying for the benefits." (*42 C.F.R. § 422.100(a) (2018)*.) The plan is obligated to maintain "a network of appropriate providers that is supported by written agreements" to provide the benefits. (*42 C.F.R. § 422.112(a)(1)(i) (2018)*.) The plan "may select the providers" to provide benefits to its enrollees so long as they meet certain qualifications. (*42 U.S.C. § 1395w-22(d)(1)*.) If the network providers are unable to meet an enrollee's need for specialty care, the plan "arranges for specialty care outside of the plan provider network." (*42 C.F.R. § 422.112(a)(3) (2018)*.)

As with the Act, an exception to the rule authorizing the health plan to select or arrange for providers exists concerning emergency services. A plan offering a Medicare Advantage plan must provide coverage for emergency services "without regard to prior authorization or the emergency care provider's contractual relationship with the [plan]." **[*13]** (*42 U.S.C. § 1395w-22(d)(1)(E)*.)

Also as with the Act, a health plan offering a Medicare Advantage plan pays noncontracted providers differently based on whether they rendered emergency services. When a noncontracted provider renders emergency and urgently needed services, the plan "must make timely and reasonable payments" to the provider. (*42 C.F.R. § 422.100(b)(1)(i)*, *(ii) (2018)*.) However, when a noncontracted provider renders nonemergency services such as specialty services, the plan must pay "an amount the provider would have received under original Medicare." (*42 C.F.R. § 422.100(b)(2) (2018)*.) The noncontracting provider must accept that amount as payment in full. (*42 C.F.R. § 422.214(a)(1) (2018)*; *42 U.S.C. § 1395cc(a)(1)(O)*.)

Plaintiff essentially contends that because these statutes and regulations establish what a health plan must pay a noncontracted provider, they also require a plan to compensate a noncontracted provider who provides unauthorized nonemergency services. They do not.

Initially, we hold plaintiff cannot sue to enforce the Medicare Advantage statutes and regulations. "Like substantive federal law itself, private rights of action to enforce federal law must be created by Congress. [Citation.]" (*Alexander v. Sandoval (2001) 532 U.S. 275, 286 [121 S. Ct. 1511, 149 L.Ed.2d 517, 528]*.) No right of action exists here. Plaintiff contends *42 Code of Federal Regulations part 422.214(c)* grants him a right of action. It does **[*14]** not. The regulation simply deems a noncontracted provider that seeks reimbursement to be viewed as seeking payment in the amount the provider would have received under original Medicare. It does not provide plaintiff a private right to enforce that or any other part of the Medicare Advantage laws in a court action.

Even if plaintiff had a private right of action, his claim would fail to state a cause of action as a matter of law. Plaintiff argues the parties' obligations under *42 Code of Federal Regulations part 422.214* to pay and accept as full payment "'an amount the provider would have received under original Medicare'" must be interpreted to mean the health plan must pay noncontracted providers for unauthorized nonemergency services. Otherwise, the only alternative interpretation of the regulation's language is that the provider must collect payments from the enrollee, which is prohibited by Medicare regulations. Plaintiff reaches his interpretation—an incorrect interpretation—only by assuming the regulation requires the health plan to pay for unauthorized nonemergency services. Nothing in the regulation imposes that requirement.

The Medicare Advantage statutes and regulations do not require health plans to pay for unauthorized **[*15]** nonemergency services. Those laws obligate the plan to "select" and "maintain" a network of providers and to "arrange" for providers outside the plan's network to provide specialty services when needed. (*42 U.S.C. § 1395w-22(d)(1)*; *42 C.F.R. §§ 422.112(a)(1)*, *(3) (2018)*.) The language indicates the plan authorizes the providers both in and outside its network who will provide services to the plan's enrollees. Nothing in these laws requires a plan to pay for unauthorized services except with regard to emergency services. As with the Legislature when it adopted the Act, Congress's stated intention to restrict a health plan's contracting power in a limited circumstance indicates Congress did not intend to apply the same restriction in other circumstances. (See *Loughrin v. United States (2014) 573 U.S. ___, ___ [134 S. Ct. 2384, 2390, 189 L. Ed. 2d 411, 421]*.)

The Medicare Advantage regulations clearly define where the provision of emergency services ends and the provision of subsequent services requiring plan authorization begins. While authorization is not needed for emergency and urgently needed services, it is needed when maintenance care and post-stabilization care related to an emergency medical condition begin. For those services, the health plan must pay the noncontracting provider only when the provider requests authorization **[*16]** and the plan either grants the request, or the plan does not respond to the request within one hour, cannot be contacted, or it and the treating physician cannot agree on the enrollee's care. (*42 C.F.R. §§ 422.100(b)(1)(iii)*, *422.113(c)(1)*, *(2) (2018)*.) The health plan's financial responsibility for post-stabilization care "it has not pre-approved" ends when a plan physician assumes responsibility for the enrollee's care, the plan and the treating physician agree on the enrollee's care, or the enrollee is discharged. (*42 C.F.R. § 422.113(c)(3) (2018)*.)

These regulations indicate payment for services rendered by a noncontracted provider are contingent on the plan authorizing the service except for emergency services or where Congress or Medicare might otherwise specify. Plaintiff directs us to no statute, regulation, or judicial opinion that requires a plan to pay a noncontracted provider for unauthorized nonemergency services.

Plaintiff mistakenly relies on *St. Charles Parish Hospital Service Dist. No. 1 v. Ochsner Health Plan, Inc. (La.Ct.App. 2004) 874 So.2d 885* (*St. Charles Parish Hospital*) to assert a plan must pay a noncontracted provider for unauthorized nonemergency services. Authorization was not an issue in the case. There, a plan demanded a noncontracted provider to remit overpayments he received for outpatient services he had rendered to the plan's **[*17]** enrollees. The state appellate court ordered summary judgment in the plan's favor, holding *42 Code of Federal Regulations part 422.214* required a noncontracted provider to accept as full payment the amount it would have received under original Medicare. (*St. Charles Parish Hospital, supra, 874 So.2d at p. 889*.) Unlike here, the plan in that case was not challenging its obligation to pay the provider the amount required under the regulation. The plan did not contend it had not authorized the services, unlike the case before us. It simply sought a refund of the amounts it had overpaid the provider. The Louisiana court thus did not consider our issue. "It is axiomatic that cases are not authority for propositions not considered. [Citations.]" (*People v. Ault (2004) 33 Cal.4th 1250, 1268, fn. 10, 17 Cal. Rptr. 3d 302, 95 P.3d 523*.)

Plaintiff's other citations to federal authorities offer him no support, as they, too, did not concern a plan's alleged obligation under Medicare Advantage law to pay a noncontracted provider for unauthorized nonemergency services. (See *New York City Health & Hospitals Corp. v. WellCare of New York, Inc. (S.D.N.Y. 2011) 801 F.Supp.2d 126* [noncontracted provider of emergency services had no private right of action to sue plan for payment based on alleging the plan's failure to pay as required by statute was a breach of the Medicare Advantage contract between the plan and Medicare]; *Canandaigua Emergency Squad, Inc. v. Rochester Area HMO, Inc. (W.D.N.Y. 2011) 780 F.Supp.2d 313* [removal to federal court improper; noncontracted ambulance **[*18]** companies' suit against health plan that withheld payment for services to recoup prior overpayments did not arise under Medicare Act]; *Allina Health Services v. Sebelius (D.D.C. 2010) 756 F.Supp.2d 61* [denial of motion to enjoin Secretary of Health and Human Services from implementing a new formula for calculating certain Medicare payment adjustments for hospitals that serve a disproportionate number of low-income patients].)

Plaintiff also pleaded he is entitled to payment because his services qualified as specialty care by a noncontracted provider that a contracted Sutter surgeon requested. The allegation is irrelevant. The Medicare Advantage regulation states it is the plan that arranges for specialty care outside of its network of providers, not a plan surgeon. (*42 C.F.R. § 422.112(a)(3) (2018)*.)

Similar to the Act, the Medicare Advantage statutes and regulations, by distinguishing between unauthorized emergency services that must be paid and all other services, demonstrate the health plan is not required to pay a noncontracting provider for unauthorized nonemergency services.

III

Unfair Competition Law

Plaintiff contends the trial court erred when it concluded he could not state a claim for relief under the Unfair Competition Law (*Bus. & Prof. Code, § 17200 et seq.*) because the court sat "in law alone **[*19]** and not [in] equity." He sought equitable relief to receive payment of his noncontracted services based on Sutter's alleged breach of his *prior* contract, and he asserts the court should have exercised its equitable power under the Unfair Competition Law to restore the status quo.

Plaintiff correctly states the court sat in law alone. It did not err in doing so because it was ruling only on Sutter's demurrer, a legal issue. A court does not sit in equity when it rules on a demurrer. It cannot exercise its equitable powers under the Unfair Competition Law if plaintiff cannot allege an unfair competition claim.

A demurrer tests the sufficiency of the complaint as a matter of law, and it raises only questions of law. (*Code Civ. Proc., § 589, subd. (a)*.) "[I]n passing upon the question of the sufficiency or insufficiency of a complaint to state a cause of action, it is wholly beyond the scope of the inquiry to ascertain whether the facts stated are true or untrue. That is always the ultimate question to be determined by the evidence upon a trial of the questions of fact. Obviously, the complaint, when appropriately challenged, whether for want of sufficient facts or for an insufficient or inartificial statement of the facts, **[*20]** must stand or fall by its own force." (*Colm v. Francis (1916) 30 Cal.App. 742, 752, 159 P. 237*.) The court did not err when it did not exercise its equitable powers under the Unfair Competition Law when it sustained Sutter's demurrer.

The court also did not err when it determined plaintiff failed to state a claim under the Unfair Competition Law. That law provides a private right of action against "any unlawful, unfair or fraudulent business act or practice." (*Bus. & Prof. Code, §§ 17200*, *17203*.) It prohibits practices that are either "unlawful," "unfair," or "fraudulent." (*Progressive West Ins. Co. v. Yolo County Superior Court (2005) 135 Cal.App.4th 263, 283, 37 Cal. Rptr. 3d 434*.)

While the law's scope is broad, its remedies are limited. Private plaintiffs may seek only injunctive relief and restitution. (*Bus. & Prof. Code, § 17203*.) They "may not receive damages, much less treble damages, or attorney fees." (*Cel-Tech Communications, Inc. v. Los Angeles Cellular Telephone Co. (1999) 20 Cal.4th 163, 179, 83 Cal. Rptr. 2d 548, 973 P.2d 527* (*Cel-Tech*), italics omitted.) And, in order to obtain injunctive relief, plaintiffs must show there is a threat the wrongful activity will continue. No past events may be enjoined. (*Davis v. Farmers Ins. Exchange (2016) 245 Cal.App.4th 1302, 1326-1327, 200 Cal. Rptr. 3d 315*.)

Plaintiff rightly asserts a trial court, sitting as a court of equity when acting under the Unfair Competition Law, has the power to restore the status quo ante. (*Korea Supply Co. v. Lockheed Martin Corp. (2003) 29 Cal. 4th 1134, 1149, 131 Cal. Rptr. 2d 29, 63 P.3d 937* (*Korea Supply*).) His prayer for relief, however, does not ask the court to restore the status quo. It asks the court to enjoin Sutter to pay for his **[*21]** now out-of-network unauthorized services either "at reasonable and customary value," or to order Sutter to reinstate "and honor" the prior contract plaintiff terminated and pay for the noncontracted services according to the contractual rate.

Neither of these remedies is available under the Unfair Competition Law. Plaintiff cannot obtain injunctive relief because he terminated the contract he now seeks to enforce. There is no threat Sutter will breach that contract in the future. He also cannot obtain an order compelling Sutter to pay for his noncontracted unauthorized services because both of his alternate requests for payment go beyond restitution. They seek payment for services he did *not* render under the contract he claims Sutter breached in violation of the Unfair Competition Law. An order for restitution under the Unfair Competition Law is limited to compelling the defendant to return money or property obtained through an unfair business practice—in this case, the breach of the prior contract—to those persons from whom the property was taken, including money in which the plaintiff had a vested interest. (*Korea Supply, supra, 29 Cal.4th at pp. 1144-1145, 1149*.) Sutter did not obtain money or property from plaintiff's rendition of **[*22]** noncontracted services by breaching the prior contract.

Plaintiff's assumption—"that the court's inherent equitable powers are unrestricted in [an Unfair Competition Law action]—is fundamentally erroneous." (*Alch v. Superior Court (2004) 122 Cal.App.4th 339, 404, 19 Cal. Rptr. 3d 29*.) "A court cannot, under the equitable powers of [the Unfair Competition Law], award whatever form of monetary relief it believes might deter unfair practices." (*Korea Supply, supra, 29 Cal.4th at p. 1148*.)

Although plaintiff cannot obtain his prayed for relief, we look to determine whether he can obtain any relief under the Unfair Competition Law based on Sutter's alleged breach of the prior contract. "[T]he test of the adequacy of a complaint is whether it alleges sufficient *facts* to support a particular cause of action." (*Smith v. Wells Fargo Bank, N.A (2005) 135 Cal.App.4th 1463, 1485, 38 Cal. Rptr. 3d 653*, original italics.)

Plaintiff alleges Sutter committed unlawful, unfair, and fraudulent conduct when it breached his prior contract by underpaying approximately half of his claims for services rendered to enrollees in a Sutter health plan known as SutterSelect. "'[A] breach of contract may . . . form the predicate for [Business and Professions Code s]ection 17200 claims, provided it *also* constitutes conduct that is "unlawful, or unfair, or fraudulent."' [Citations.]" (*Puentes v. Wells Fargo Home Mortgage, Inc. (2008) 160 Cal.App.4th 638, 645, 72 Cal. Rptr. 3d 903* (*Puentes*), original italics & italics **[*23]** added.) Plaintiff, however, has not pleaded anything more than a common law breach of contract.

First, plaintiff does not adequately allege the breach was unlawful for purposes of *Business and Professions Code section 17200*. A breach of contract is not itself an unlawful act for purposes of the Unfair Competition Law. (*Puentes, supra, 160 Cal.App.4th at p. 645*.) "'Contractual duties are voluntarily undertaken by the parties to the contract, not imposed by state [or federal] law.'" (*Smith v. Wells Fargo Bank, N.A., supra, 135 Cal.App.4th at p. 1484*, quoting *Gibson v. World Savings & Loan Assn. (2002) 103 Cal.App.4th 1291, 1302, 128 Cal. Rptr. 2d 19*.) Plaintiff must look beyond the mere breach.

By defining unfair competition to include any "'unlawful . . . business act or practice,'" the Unfair Competition Law "permits violations of other laws to be treated as unfair competition that is independently actionable." (*Kasky v. Nike, Inc. (2002) 27 Cal.4th 939, 949, 119 Cal. Rptr. 2d 296, 45 P.3d 243*.) "[A] violation of another law is a predicate for stating a cause of action under the [Unfair Competition Law's] unlawful prong." (*Berryman v. Merit Property Management, Inc. (2007) 152 Cal.App.4th 1544, 1554, 62 Cal. Rptr. 3d 177*.)

Plaintiff claims Sutter's breach is actionable under *Business and Professions Code section 17200* because the breach violated *Civil Code section 3523*. That statute, one of the "maxims of jurisprudence," states: "He who takes the benefit must bear the burden." Plaintiff asserts he benefited Sutter by performing services for SutterSelect plan members. But *Civil Code section 3523* does not make Sutter's breach unlawful. That statute "does not create substantive rights. '[This] **[*24]** wholesome maxim of jurisprudence . . . can obviously have no application to any but legal wrongs or those wrongs for which the law authorizes or sanctions redress.' [Citations.]" (*County of San Luis Obispo v. Abalone Alliance (1986) 178 Cal.App.3d 848, 865, 223 Cal. Rptr. 846*.) As just stated, a breach of contract is not a legal wrong.

Second, plaintiff cannot allege the breach was fraudulent for purposes of *Business and Professions Code section 17200*. "'Fraudulent,' as used in the statute, does not refer to the common law tort of fraud but only requires a showing members of the public '"are likely to be deceived."' (*Bank of the West v. Superior Court (1992) 2 Cal.4th 1254, 1267, 10 Cal. Rptr. 2d 538, 833 P.2d 545*.)" (*Saunders v. Superior Court, supra, 27 Cal.App.4th at p. 839*.) Plaintiff cannot allege Sutter's breach of his contract is likely to deceive the public. He can allege only that he was defrauded in the breach.

Third, plaintiff has not alleged the breach was unfair for purposes of *Business and Professions Code section 17200*. A common law breach of contract in an isolated transaction, which is all plaintiff has alleged, is not an "unfair" business act under the Unfair Competition Law. "[R]eliance on general common law principles to support a cause of action for unfair competition is unavailing." (*Textron Financial Corp. v. National Union Fire Ins. Co. (2004) 118 Cal.App.4th 1061, 1072, 13 Cal. Rptr. 3d 586*, disapproved on another ground in *Zhang v. Superior Court (2013) 57 Cal.4th 364, 382, 159 Cal. Rptr. 3d 672, 304 P.3d 163*.)

Virtually any breach of contract could be considered "unfair," as the term is commonly understood. But there is no indication the Legislature intended to provide injunctive and restorative **[*25]** relief under the Unfair Competition Law for every breach of contract. Indeed, an action under the Unfair Competition Law "is not an all-purpose substitute for a tort or contract action." (*Cortez v. Purolator Air Filtration Products Co. (2000) 23 Cal.4th 163, 173, 96 Cal. Rptr. 2d 518, 999 P.2d 706*.) At a minimum, plaintiff must plead more than a breach of contract.

In cases not involving competitors or consumers, courts have found a breach of contract or a contract clause to be an "unfair" act in limited circumstances. They found unfairness sufficiently pleaded if the complaint alleged facts showing the contract was unconscionable or contained a forfeiture provision that allowed an employer to frustrate the employee's legitimate expectations and contractual rights. (*Zanze v. Snelling Services, LLC (9th Cir. 2011) 412 Fed.Appx. 994, 996-997*; *McCollum v. XCare.net, Inc. (N.D.Cal. 2002) 212 F.Supp.2d 1142, 1154*.) One court held that "'a systematic breach of certain types of contracts (e.g., breaches of standard consumer or producer contracts involved in a class action) can constitute an unfair business practice'" under the Unfair Competition Law. (*Arce v. Kaiser Foundation Health Plan, Inc. (2010) 181 Cal.App.4th 471, 489-490, 104 Cal. Rptr. 3d 545*.) But the parties have directed us to no authority, and we have found none, that declares a common law breach of contract between two parties contracting at arm's length constitutes an "unfair" business act or practice under *Business and Professions Code section 17200*.

We recognize that substantial authority defines an "unfair" act **[*26]** under *Business and Professions Code section 17200* in cases brought by competitors, and substantial, conflicting authority defines an "unfair" act in cases brought by consumers. In the case of competitors, the word "unfair" means "conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition." (*Cel-Tech, supra, 20 Cal.4th at p. 187*.) This definition obviously does not apply here.

In consumer cases, the definition of "unfair" is not settled. Some courts, including this one, determine whether a business practice is "unfair" in a consumer action by weighing """the utility of the defendant's conduct against the gravity of the harm to the alleged victim.""" (*Progressive West Ins. Co. v. Yolo County Superior Court, supra, 135 Cal.App.4th at p. 285*, quoting *Klein v. Earth Elements, Inc. (1997) 59 Cal.App.4th 965, 969-970, 69 Cal. Rptr. 2d 623*.) Other courts have modified the *Cel-Tech* definition and, applying it in consumer actions, will find the business act "unfair" if the claim is tethered to specific constitutional, statutory, or regulatory provisions. (See *Belton v. Comcast Cable Holdings, LLC (2007) 151 Cal.App.4th 1224, 1239-1240, 60 Cal. Rptr. 3d 631*; *Gregory v. Albertson's, Inc. (2002) 104 Cal.App.4th 845, 853-854, 128 Cal. Rptr. 2d 389*.) Still other courts define unfairness under the Federal Trade Commission Act: "'(1) The consumer injury must be substantial; (2) the injury must not be outweighed by any countervailing benefits **[*27]** to consumers or competition; and (3) it must be an injury that consumers themselves could not reasonably have avoided.'" (*Davis v. Ford Motor Credit Co. (2009) 179 Cal.App.4th 581, 597-598, 101 Cal. Rptr. 3d 697*; see *15 U.S.C. § 45(n)*.)

Sutter argues we should apply the modified *Cel-Tech* definition. Plaintiff does not address the issue. Neither party argues why any of these definitions should apply in a case between two noncompeting parties bargaining at arm's length in a nonconsumer context. Given the state of the pleadings, we need not address the issue here.

"An order sustaining a demurrer without leave to amend will constitute an abuse of discretion if there is any reasonable possibility that the defect can be cured by an amendment. This rule is liberally applied to permit further amendment not only where the defect is one of form but also where it is one of substance, provided the pleader did not have "'a fair prior opportunity to correct the substantive defect.'" [Citations.]

"On the other hand, there is nothing in the general rule of liberal allowance of pleading amendment which 'requires an appellate court to hold that the trial judge has abused his discretion if on appeal the plaintiffs can suggest no legal theory or state of facts which they wish to add by way of amendment.' [Citation.] **[*28]** The burden is on the plaintiffs to demonstrate that the trial court abused its discretion and to show in what manner the pleadings can be amended and how such amendments will change the legal effect of their pleadings. [Citations.]" (*Careau & Co. v. Security Pacific Business Credit, Inc. (1990) 222 Cal.App.3d 1371, 1387-1388, 272 Cal. Rptr. 387*, italics omitted.) Here, on plaintiff's third complaint, he has not made this showing.

Having reached this conclusion, we recognize a "complaint is adequate if its factual allegations are sufficient to support a cause of action on any available legal theory (whether specifically pleaded or not)." (*Smith v. Wells Fargo Bank, N.A., supra, 135 Cal.App.4th at p. 1485*.) Plaintiff's allegations support a cause of action for breach of his prior contract. While his other legal theories are now precluded, he should be granted leave to amend his complaint, if he chooses, to plead a common law cause of action for breach of contract in order to recover any damages incurred from Sutter's alleged breach of his prior contract. It should be clear by now, however, that those damages do not include payment for the unauthorized nonemergency services he rendered after he terminated the contract.

Finally, Sutter contends, and the trial court found, plaintiff lacked standing to bring this cause of action because under the Employee Retirement **[*29]** Income Security Act of 1974 (ERISA) (*29 U.S.C. § 1001 et seq.*), which governs the SutterSelect plan, a provider who is not contracted to provide services to SutterSelect enrollees "cannot bring claims for benefits on [his] own behalf. [He] must do so derivatively, relying on [his] patients' assignments of their benefits claims." (*Spinedex Physical Therapy USA Inc. v. United Healthcare of Arizona, Inc. (9th Cir. 2014) 770 F.3d 1282, 1289*.) This ERISA rule does not apply here because plaintiff is not suing to recover benefits promised to enrollees under the SutterSelect plan. He is suing on an implied-in-law provider agreement independent of Sutter's obligations to its enrollees. Such actions against ERISA welfare plans for breach of provider agreements do not fall within the scope of ERISA. (See *Marin General Hospital v. Modesto & Empire Traction Co. (9th Cir. 2009) 581 F.3d 941, 947-948* [provider's suit against plan to recover payment based on plan's oral agreement with provider not subject to ERISA]; *Blue Cross v. Anesthesia Care Associates Medical Group, Inc. (9th Cir. 1999) 187 F.3d 1045, 1054* [providers' suit for breach of provider agreement not subject to ERISA]; *John Muir Health v. Cement Masons Health & Welfare Trust Fund (N.D.Cal 2014) 69 F.Supp.3d 1010, 1015-1021* [provider's quasi-contract claim against plan for reimbursement for services rendered to enrollees is not preempted by ERISA].)

IV

Declaratory Relief

Plaintiff sought a declaration that Sutter's refusal to pay for his unauthorized services was unlawful under the laws and regulations discussed above. The court correctly sustained the demurrer **[*30]** against this claim because it arose from allegations we have concluded do not obligate Sutter to pay plaintiff as a matter of law. "A general demurrer to a declaratory relief cause of action is proper when the plaintiff does not allege facts sufficient to state the derivative claim. [Citations.]" (*Allen v. City of Sacramento (2015) 234 Cal.App.4th 41, 54, 183 Cal. Rptr. 3d 654*.)

V

Quantum Meruit

Plaintiff contends the trial court should have granted him leave to plead a cause of action in quantum meruit. His pleaded facts, however, foreclosed the court from granting him leave.

"'Quantum meruit refers to the well-established principle that "the law implies a promise to pay for services performed under circumstances disclosing that they were not gratuitously rendered." [Citation.] To recover in quantum meruit, a party need not prove the existence of a contract [citations], but it must show the circumstances were such that "the services were rendered under some understanding or expectation of *both* parties that compensation therefor was to be made."' [Citation.]" (*Miller v. Campbell, Warburton, Fitzsimmons, Smith, Mendel & Pastore (2008) 162 Cal.App.4th 1331, 1344, 76 Cal. Rptr. 3d 649*, italics added.)

Plaintiff pleaded Sutter had no understanding or expectation whatsoever of compensating him for his unauthorized services. He terminated his contract, and Sutter informed him in writing it would **[*31]** not pay for any unauthorized services.

Thus, to plead quantum meruit in an amended complaint, plaintiff would have to plead facts that directly contradict his current complaint. He cannot do this. "[A] plaintiff may not discard factual allegations of a prior complaint, or avoid them by contradictory averments, in a superseding, amended pleading." (*California Dental Assn. v. California Dental Hygienists' Assn. (1990) 222 Cal.App.3d 49, 53, fn. 1, 271 Cal. Rptr. 410*.)

The trial court thus did not err when it denied him leave to amend and allege a claim in quantum meruit.

DISPOSITION

The judgment of dismissal is reversed and the matter remanded with directions to sustain the demurrer with leave to amend solely to allow plaintiff to allege a common law cause of action for breach of his prior contract with Sutter. Each party shall bear its own costs on appeal. (*Cal. Rules of Court, rule 8.278(a)*.)

Opinion

ORDER

THIS MATTER is before the Court on several Motions to Dismiss Plaintiffs' Amended Complaint for lack of subject matter jurisdiction under *Fed. R. Civ. P. 12(b)(1)*, for failure to state a claim for which relief may be granted under *Fed. R. Civ. P. 12(b)(6)*, and for judgment on the pleadings under *Fed. R. Civ. P. 12(c)*. (Docs. Nos. 39, 45, 48, 51, 57, & 61). Upon review by the Court, for the reasons below, the Motions to Dismiss the **[*2]** Complaint (Docs. Nos. 21, 23, 26, & 30) are DENIED AS MOOT, and the Motions to Dismiss the Amended Complaint (Docs. Nos. 39, 45, 48, 51, 57, & 61) are GRANTED IN PART and DENIED IN PART.

BACKGROUND

According to the Amended Complaint,[1] Plaintiffs and Defendants are all residents of North Carolina and, in the case of parties that are corporate or government entities, have their principal places of business in North Carolina. (Doc. No. 32, pp. 2-3). Defendants Gaston County, Gaston County Board of Education ("GCBOE"), and Booker are collectively referred to as "Purchasing Defendants." Defendants Carstarphen Family Foundation and Stowe Foundation, Inc., are collectively referred to as "Selling Defendants." Defendants Roberts and Philbeck are collectively referred to as "Publishing Defendants." (Doc. No. 32, pp. 2-3).

Plaintiffs allege they entered into a series of contracts and agreements with Selling Defendants and Purchasing Defendants concerning a parcel of land in Gaston County, North Carolina. (Doc. No. 32). Plaintiffs further allege that Selling Defendants and Purchasing Defendants conspired to dishonor Plaintiffs' contracts with Defendants, causing damage to Plaintiffs' business. (Doc. **[*3]** No. 32, pp. 4-8). Plaintiffs also allege Publishing Defendants publicized or circulated emails containing false or defamatory statements about Plaintiffs. (Doc. No. 32, pp. 5-6).

The Amended Complaint asserts ten separate Counts: (1) fraud against Purchasing Defendants; (2) breach of implied covenant of good faith and fair dealing against Selling Defendants; (3) violation of the *Sherman Antitrust Act* (*15 U.S.C. § 1*) against Purchasing and Selling Defendants; (4) unjust enrichment against Selling Defendants; (5) relief in quantum meruit against Selling Defendants; (6) libel against Publishing Defendants; (7) punitive damages for willful and wanton conduct against all Defendants; (8) violations of North Carolina's unfair and deceptive trade practices statutes (*N.C. Gen. Stat. § 75-1 et seq.*) against all Defendants; (9) tortious interference with contract right against Defendant Gaston County; and (10) tortious interference with prospective economic advantage against Defendants Gaston County and GCBOE. (Doc. No. 32, pp. 8-16).

Defendants moved to dismiss Plaintiffs' original Complaint. (Docs. Nos. 21, 23, 26, & 30). Plaintiff filed an Amended Complaint superseding the original Complaint, thereby rendering the above-referenced Motions **[*4]** to Dismiss moot. Defendants again filed Motions to Dismiss for lack of subject matter jurisdiction and failure to state a claim entitled to relief pursuant to *Fed. R. Civ. P. 12(b)(1)*, *12(b)(6)*, and *12(c)*. (Docs. Nos. 39, 45, 48, 51, 57, & 61).

APPLICABLE LEGAL STANDARD

When a court considers a motion to dismiss for lack of subject matter jurisdiction under *Fed. R. Civ. P. 12(b)(1)*, the burden of proof is on the plaintiff. *Adams v. Bain, 697 F.2d 1213, 1219 (4th Cir. 1982)*. The motion shall be granted "if the material jurisdictional facts are not in dispute and the moving party is entitled to prevail as a matter of law." *Richmond, Fredericksburg & Potomac R. Co. v. United States, 945 F.2d 765, 768 (4th Cir. 1991)*. If the plaintiff merely fails to properly plead the elements of a federal claim, it is not a truly threshold jurisdictional question, and it

---

[1] The Court reads the allegations and assertions of the pleadings and supporting affidavits in the light most favorable to Plaintiff. *Combs v. Bakker, 886 F.2d 673, 676 (4th Cir. 1989)*.

is analyzed as a *Rule 12(b)(6)* question. *Arbaugh v. Y & H Corp., 546 U.S. 500, 514-15, 126 S. Ct. 1235, 163 L. Ed. 2d 1097*

(2006) (explaining that "jurisdictional" elements of federal claims must be explicitly identified as such by statute). In this event, the district court retains the discretion to extend supplemental jurisdiction over pendent state-law claims. See id.

"A motion to dismiss under *Rule 12(b)(6)* tests the sufficiency of a complaint" but "does not resolve contests surrounding the facts, the merits of a claim, or the applicability of defenses." *Republican Party of N.C. v. Martin, 980 F.2d 943, 952 (4th Cir. 1992)*; *E. Shore Mkts., Inc. v. J.D. Assocs. Ltd. P'ship, 213 F.3d 175, 180 (4th Cir. 2000)*. A complaint attacked by a *Rule 12(b)(6)* motion to dismiss will survive if it "contains 'enough **[*5]** facts to state a claim to relief that is plausible on its face.'" *Ashcroft v. Iqbal, 556 U.S. 662, 697, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))*; see also *Robinson v. Am. Honda Motor Co., Inc., 551 F.3d 218, 222 (4th Cir. 2009)*. "A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Iqbal, 556 U.S. at 678*. "Threadbare recitals of the elements of a cause of action, supported by mere conclusory statements, do not suffice." Id. The Supreme Court has also opined:

> *Federal Rule of Civil Procedure 8(a)(2)* requires only "a short and plain statement of the claim showing that the pleader is entitled to relief." Specific facts are not necessary; the statement need only "give the defendant fair notice of what the . . . claim is and the grounds upon which it rests." In addition, when ruling on a defendant's motion to dismiss, a judge must accept as true all of the factual allegations contained in the complaint.

Erickson v. Pardus, 551 U.S. 89, 93-94, 127 S. Ct. 2197, 167 L. Ed. 2d 1081 (2007) (quoting *Twombly, 550 U.S. at 555-56*) (internal citations omitted).

A motion for judgment on the pleadings applies much the same standard as a motion to dismiss under *Rule 12(b)(6)*. *Edwards v. City of Goldsboro, 178 F.3d 231, 243 (4th Cir. 1999)*. The district court considers both the complaint and the answer and accepts all allegations as true for the purpose of the motion. *Id. at 244*. The Court will not grant the motion if the complaint and the answer dispute an issue **[*6]** of material fact.

Upon the filing of an amended complaint, the original complaint is superseded, and motions to dismiss the original complaint are rendered moot. *Young v. City of Mount Ranier, 238 F.3d 567, 573 (4th Cir. 2001)*.

ANALYSIS

A. The Antitrust Claim

Purchasing and Selling Defendants argue for dismissal of the antitrust claim in Count 3 because Plaintiffs fail to allege facts in their Amended Complaint implicating interstate commerce or the restraint thereof. Plaintiffs contend an agreement amongst Defendants caused economic harm to *them*. The Court notes, however, Count 3 (the antitrust claim) contains no allegation of intention of harm to competition *generally*. (Doc. No. 32, p. 10).

Local governments are statutorily immune from antitrust claims seeking money damages brought under *Section 4 of the Clayton Act (15 U.S.C. § 15)*[2] when acting within the authority granted by the state. *15 U.S.C. §§ 34-36*. According to Plaintiffs' allegations, Gaston County and GCBOE ("Municipal Defendants") attempted to purchase land to build a new middle school. (Doc. No. 32). North Carolina law authorizes local boards of education and county governments to purchase and develop land for use as public schools. *N.C. Gen. Stat. § 115C-426*.

---

[2] While Plaintiffs' claim must meet the elements of a restraint on trade under *15 U.S.C. § 1* as described above, their cause of action as a private party is derived from *15 U.S.C. § 15*.

Assuming the facts in the Amended Complaint are true, Municipal Defendants acted within their **[*7]** statutory authority, rendering their acts immune to a federal antitrust suit.

While local governments enjoy immunity from claims for money damages, this immunity does not extend to petitions for injunctive relief as authorized by *15 U.S.C. § 26*. See *R. Ernest Cohn, D.C., D.A.B.C.O. v. Bond, 953 F.2d 154, 158 (4th Cir. 1991)*. The Amended Complaint pleas for a preliminary injunction, (Doc. No. 32, p. 10), and that portion of their antitrust claim survives a claim of immunity under *15 U.S.C. §§ 35-36*.

As to Purchasing and Selling Defendants more broadly (inclusive of Municipal Defendants), the antitrust claim as a whole is facially insufficient even assuming all facts in the Amended Complaint are true. The elements of a *Section 1* claim under the *Sherman Antitrust Act* are "(1) an agreement, conspiracy, or combination among the defendants in restraint of trade; (2) injury to the plaintiff's business and property as a direct result; (3) damages that are capable of reasonable ascertainment and are not speculative or conjectural." *Wilder Enters., Inc. v. Allied Artists Pictures Corp., 632 F.2d 1135, 1139 n.1 (4th Cir. 1980)* (citing *Admiral Theatre Corp. v. Douglas Theatre Co., 585 F.2d 877, 883-84 (8th Cir. 1978))*. While the plaintiff must be directly injured to have a cause of action, see *15 U.S.C. § 16*, it is not the injury to the plaintiff that satisfies the requirement that there be a "restraint on trade." "The antitrust laws . . . were enacted for the protection of competition *not competitors* ***[*8]*** ." *Brunswick Corp. v. Pueblo Bowl-o-Mat, Inc., 429 U.S. 477, 488, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)* (internal quotations omitted) (emphasis added).

In assessing the defendant's effect on competition, courts apply a "rule of reason" analysis to most cases, unless the restraint is "so plainly anticompetitive" as to be unreasonable per se. *Texaco, Inc. v. Dagher, 547 U.S. 1, 5, 126 S. Ct. 1276, 164 L. Ed. 2d 1 (2006)* (quoting *Nat'l Soc'y of Prof'l Eng'rs v. United States, 435 U.S. 679, 692, 98 S. Ct. 1355, 55 L. Ed. 2d 637 (1978))*. The classic example of an unreasonable per se restraint is "horizontal price-fixing" (an agreement to fix prices between two competitors in the same market). See id. When using the "rule of reason," it is not a matter of the reasonableness of the business practice or agreement, but rather a question of whether it is reasonable to identify the practice as "anticompetitive." See *Nat'l Soc'y of Prof'l Eng'rs, 435 U.S. at 688-89*.

Other district courts have made clear that government actions or agreements that merely cause lost profits or advantage for one business are not antitrust violations. See *Wellwoods Dev. Co. v. City of Aurora, 631 F. Supp. 221 (N.D. Ill. 1986)*. In Wellwoods, the city government refused to issue development permits to a real estate developer who owned land next to a municipal airport. *Id. at 222-23*. While this action created business advantages for other parties that owned already developed land, the district court held that this was not sufficiently anticompetitive to stand as an antitrust injury. *Id. at 229*. The decision was analogous to any other competitive **[*9]** business decision in which the only injury is "injury to [the plaintiff's] bottom line in the form of lost potential gains." Id.

The requirement that there be an anticompetitive effect to have an antitrust injury even extends to cases in which the plaintiff plausibly alleged a conspiracy to drive the plaintiff out of business. See *TheMLSonline.com, Inc. v. Reg'l Multiple Listing Serv. of Minn., Inc., 840 F. Supp. 2d 1174, 1182 (D. Minn. 2012)*. In that case, there was no government action, but there was an alleged agreement amongst members of a realtors' association to destroy the plaintiff's business by filing coordinated ethics complaints with the plaintiff's professional association. *Id. at 1177-78*. Even assuming that a conspiracy existed that intended to harm the plaintiff's business, the district court dismissed the antitrust claim because if failed to allege anticompetitive activity that affected prices or general market access. See *id. at 1182*; see also *Brooke Grp. Ltd. v. Brown & Williamson Tobacco Corp, 509 U.S. 209, 225, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993)* ("Even an act of pure malice by one business competitor against another does not, without more, state a claim under the federal antitrust laws . . . .").

In this case, Plaintiffs have offered no allegations to support a plausible claim of anticompetitive behavior on the part of Defendants. There is a conclusory allegation of an "unreasonable restraint on trade," **[*10]** (Doc. No. 32, pp. 7 & 10), but this is insufficient. The facts as alleged by the Amended Complaint show an agreement amongst Defendants that caused economic harm to Plaintiffs by dishonoring prior agreements to buy and sell land. (Doc. No. 32, pp. 4-8). Specifically, Plaintiffs allege Defendants formed a civil conspiracy (Doc. No. 32, p. 7) with the aim of removing Plaintiffs from a multi-party transaction and harming Plaintiffs' business reputation in the community. (Doc. No. 32, p. 6). Plaintiffs' claim for relief makes no mention of any harm or intent to harm competition. (Doc. No. 32, p. 10). Even presuming, without deciding, this alleged conspiracy constituted fraud, deception, breach of contract, or tortious interference, the allegations as a whole do not plausibly lead to a claim of an anticompetitive intent or effect on the relevant market. The allegations merely assert a harm to a *competitor*, not to *competition*. See *Brunswick, 429 U.S. at 488*. Even if Defendants did not enjoy immunity, Plaintiffs' have failed to sufficiently plead the elements of a federal antitrust violation under *Section 1 of the Sherman Act*. Thus, Plaintiffs' antitrust claim fails on its face. Count 3 of the Amended Complaint is dismissed **[*11]** without prejudice.

Notably, the Amended Complaint contains no other claim sufficient to allege a federal question. The Court, however, retains the discretion to extend supplemental jurisdiction to pendent state law claims under *28 U.S.C. § 1367* when the plaintiff's federal question claim fails on non-jurisdictional elements. *Arbaugh v. Y & H Corp., 546 U.S. 500, 514-15, 126 S. Ct. 1235, 163 L. Ed. 2d 1097 (2006)*. The Court, in its discretion, will exercise supplemental jurisdiction over the remaining state law claims in this case and resolve the pending motions to dismiss as to those claims.

B. Immunity Defenses

1. Plaintiffs' Claims against Defendant Booker

The Amended Complaint names Defendant Booker in both his individual and official capacities in Counts 1 (fraud), 7 (punitive damages), and 8 (violation of North Carolina unfair and deceptive trade practices laws). Defendant Booker contends dismissal is proper because: (1) he acted in his capacity as a government official, (2) Plaintiffs have alleged the same claims against Booker and Municipal Defendants and are therefore duplicative, and (3) Plaintiffs fail to sufficiently allege facts indicating Booker acted outside his official capacity with regard to the above-listed counts. Plaintiffs contend Defendant Booker acted outside his official **[*12]** capacity and thus can be liable as an individual for the state law claims.

Suits against government officials that assert the same claims against the government entity which the official serves are duplicative. See *Love-Lane v. Martin, 355 F.3d 766, 783 (4th Cir. 2004)*; *May v. City of Durham, 136 N.C. App. 578, 525 S.E.2d 223, 229 (N.C. Ct. App. 2000)*. Redundant claims such as this should be dismissed. *Love-Lane, 355 F.3d at 783*. Accordingly, all Counts against Defendant Booker in his official capacity as Superintendent of Gaston County Schools will be dismissed.

The Amended Complaint makes no specified allegations against Defendant Booker in his individual capacity. Defendant Booker is named in some allegations, such as those about a meeting between Booker and Plaintiffs to discuss purchasing land to build a new school. (Doc. No. 32, p. 4). These allegations describe activity that can only be plausibly classified as Defendant Booker acting in his official capacity. The purchase and development of land for public schools is a statutory authority of boards of education and local governments. See *N.C. Gen. Stat. § 115C-426*. Defendant Booker's actions, as described by the Amended Complaint, concern actions that fit this statutory mandate for boards of education and their employees. Plaintiffs have failed to state any claim against Defendant Booker in his individual capacity, **[*13]** and the motion to dismiss will be granted accordingly. The Court's dismissal of these claims against Defendant Booker is without prejudice.

2. Counts 7 and 8 as against Defendants Gaston County and GCBOE

Plaintiffs allege they are entitled to punitive damages from Defendants because Defendants acted maliciously and Defendants engaged in unfair and deceptive trade practices affecting commerce. Municipal Defendants contend punitive damages are not appropriate for lack of intentional violations of law and, as official government entities, they cannot be sued for unfair and deceptive trade practices under North Carolina law.

Punitive damages cannot be claimed against a municipality unless expressly authorized by statute. *Houpe v. City of Statesville, 128 N.C. App. 334, 497 S.E.2d 82, 93 (N.C. Ct. App. 1998)*. Similarly, North Carolina's unfair and deceptive trade practices laws, as codified in Chapter 75 of the General Statutes, do not permit actions against the state or against municipalities acting with powers granted by the state. See *Rea Constr. Co. v. City of Charlotte, 121 N.C. App. 369, 465 S.E.2d 342, 343 (N.C. Ct. App. 1996)*. According to Plaintiffs' allegations, Municipal Defendants attempted to purchase land to build a new middle school. (Doc. No. 32). North Carolina law authorizes local boards of education and county governments to purchase and develop land **[*14]** for use as public schools. *N.C. Gen. Stat. § 115C-426*. Assuming the facts in the Amended Complaint are true, Municipal Defendants acted within their statutory authority. The Amended Complaint offers no specific statutory authorization for punitive damages against a municipality under these facts. Plaintiffs' claims for punitive damages and violations of *Chapter 75 of the North Carolina General Statutes* are not permitted against Defendants Gaston County and GCBOE. Counts 7 and 8 as against these Defendants are dismissed without prejudice.

3. Governmental Immunity

Whereas Defendants Gaston County and GCBOE are immune from certain claims as a matter of federal ***antitrust law***, it is less clear whether these Defendants enjoy a more general governmental immunity to suit. Municipal corporations are immune to tort claims unless immunity has been expressly waived or a cause of action is provided by statute. See *Data General Corp. v. Cty. of Durham, 143 N.C. App. 97, 545 S.E.2d 243, 246 (N.C. Ct. App. 2001)*; see also *Battle Ridge Cos. v. N.C. Dep't of Transp., 161 N.C. App. 156, 587 S.E.2d 426, 427 (N.C. Ct. App. 2003)*. This immunity only extends to activity which is governmental, rather than proprietary, in nature. *Estate of Williams ex rel. Overton v. Pasquotank Cty. Parks & Recreation Dep't, 366 N.C. 195, 732 S.E.2d 137, 140-41 (N.C. 2012)*. A proprietary action "is one that is 'commercial or chiefly for the private advantage of the compact community.'" *Id. at 141* (quoting *Britt v. City of Wilmington, 236 N.C. 446, 73 S.E.2d 289, 293 (N.C. 1952)*. While older cases have broadly defined this as any function or service that could have been provided by private entities, **[*15]** see *Britt, 73 S.E.2d at 293-94*, courts have more recently refined the inquiry to account for the broad range of services provided for privately. See *Estate of Williams, 732 S.E.2d at 142-43*.

The North Carolina Supreme Court in Estate of Williams noted "[w]hen the legislature has not directly resolved whether a specific activity is governmental or proprietary in nature, other factors are relevant." *Id. at 142*. If the activity can only be undertaken by a governmental entity, it "is necessarily governmental in nature." Id. For activities that can be performed privately and publicly, the court articulated additional, non-dispositive factors for determining whether action should be considered governmental, which include: (1) whether the service is traditionally governmental, (2) whether the service is provided for a fee, and (3) whether the fee covers operating costs or generates a profit. *Id. at 142-43* (noting the fact-intensive nature of the governmental-proprietary distinction cautions against the exclusive use of these factors); see also *Peerless Indem. Ins. Co. v. City of Greensboro, No. 1:13CV1104, 2015 U.S. Dist. LEXIS 59630, 2015 WL 135501, at *3 (M.D.N.C. May 7, 2015)* (Memorandum Opinion and Recommendation of United States Magistrate Judge), *adopted*,*No. 1:13CV1104, 2015 U.S. Dist. LEXIS 174956, 2015 WL 449903 (M.D.N.C. June 23, 2015)*, **[*16]** *aff'd*, *628 F. App'x 202 (4th Cir. 2016)*.

Governmental immunity may be waived by the purchase of liability insurance. *N.C. Gen. Stat. § 153A-435* (applying the waiver to counties); *N.C. Gen. Stat. § 115C-42* (applying the waiver to local boards of education). These waivers only extend as far as the coverage provided by the insurance policy. *N.C. Gen. Stat. § 153A-435(b)* ("To the extent of the coverage of insurance . . . governmental immunity may not be a defense to the action. Otherwise, however, the county has all defenses available to private litigants in any action brought pursuant to this section without restriction, limitation, or other effect . . . ."); see also *Wright v. Gaston Cty., 205 N.C. App. 600, 698 S.E.2d 83, 87 (N.C. Ct. App. 2010)*. This limitation on waiver includes exclusionary clauses reserving all rights to assert sovereign immunity. *Id. at 89* (admitting that such a limitation was "circular," but still upholding the enforceability of the exclusionary clause).

Defendants Gaston County and GCBOE both assert entitlement to general governmental immunity from all of Plaintiffs' allegations. (Docs. Nos. 40 & 62). Plaintiffs assert both Defendants were engaged in proprietary action and waived their immunity by carrying liability insurance. (Docs. Nos. 41 & 63). Plaintiffs also allege Defendants' conduct was essentially *ultra vires* and not entitled to immunity. **[*17]** (Doc. No. 60, p. 6). Defendants claim their liability insurance contains an exclusionary clause similar to the clause that was held sufficient to sustain a claim of immunity in Wright v. Gaston Cty. (Doc. 38-1, p. 17).

Plaintiffs have sufficiently alleged proprietary actions by these Defendants to survive a claim of immunity at this stage. While the purchase and development of land for educational facilities is a statutory government function of municipal corporations, see *N.C. Gen. Stat. § 115C-426*, Plaintiffs have alleged dealings out of session and non-educational purposes for at least part of the land to be purchased. (Docs. Nos. 32 & 60). Plaintiffs contend the Municipal Defendants have admitted to not needing the entire parcel of land for school development intend to sell the remainder for profit. (Doc. No. 60). Defendants deny these claims, but these disputes of material fact warrant further discovery and fact-finding before a determination is made as to these Defendants' claims of governmental immunity. Defendants Gaston County and GCBOE will not be dismissed from the case on the basis of general governmental immunity at this time.

C. Plaintiffs' Other State Law Claims

The Amended Complaint alleges counts **[*18]** under North Carolina state law asserting fraud, breach of the implied covenant of good faith and fair dealing, unjust enrichment, quantum meruit, libel, punitive damages, violation of North Carolina unfair and deceptive trade practices laws, tortious interference with contract, and tortious interference with prospective economic advantage. (Doc. No. 32, pp. 8-16). The Court has given full review to the facts alleged in the Amended Complaint and the applicable law concerning the elements of each of these claims. See *N.C. Gen. Stat. § 1D-15* ("Standards for Recovery of Punitive Damages"); *N.C. Gen. Stat. § 75-1.1* (unfair and deceptive trade practices); *Walker v. Fleetwood Homes of North Carolina, Inc., 362 N.C. 63, 653 S.E.2d 393, 399 (N.C. 2007)* (unfair and deceptive trade practices); *Ragsdale v. Kennedy, 286 N.C. 130, 209 S.E.2d 494, 500 (N.C. 1977)* (fraud); *Spartan Equipment Co. v. Air Placement Equipment Co., 263 N.C. 549, 140 S.E.2d 3, 11 (N.C. 1965)* (tortious interference with prospective economic advantage); *Heron Bay Acquisition, LLC v. United Metal Finishing, Inc., 245 N.C. App. 378, 781 S.E.2d 889, 894 (N.C. Ct. App. 2016)* (unfair and deceptive trade practices and breach of the implied covenant of good faith and fair dealing); *Boyce & Isley, PLLC v. Cooper, 211 N.C. App. 469, 710 S.E.2d 309, 317 (N.C. Ct. App. 2011)* (libel); *Primerica Life Ins. Co. v. James Massengill & Sons Constr. Co., 211 N.C. App. 252, 712 S.E.2d 670, 676 (N.C. Ct. App. 2011)* (unjust enrichment); *Harty v. Underhill, 211 N.C. App. 546, 710 S.E.2d 327, 333-34 (N.C. Ct. App. 2011)* (tortious interference with contract); *Market America, Inc. v. Christman-Orth, 135 N.C. App. 143, 520 S.E.2d 570, 576 (N.C. Ct. App. 1999)* (libel); *Duffell v. Weeks, 15 N.C. App. 569, 190 S.E.2d 379, 381 (N.C. Ct. App. 1972)* (quantum meruit). Except as explained in the discussion of the antitrust claim and immunity defenses above, the Court finds Plaintiffs have plausibly alleged the elements of these remaining state law claims. As regards Counts 1, 2, 4, 5, 6, 7, 8, 9, and 10 as against all Defendants (except **[*19]** the dismissals ordered above), the Motions to Dismiss (Docs. Nos. 39, 48, 51, 57, 61) are denied without prejudice to raise the issue again at summary judgment.

D. Judgment on the Pleadings

Defendants Gaston County and Philbeck have moved in the alternative for judgment on the pleadings under *Rule 12(c)*. (Docs. Nos. 39 & 57). For the reasons stated herein, disputes as to material facts exist that preclude granting this alternative relief.

CONCLUSION

IT IS THEREFORE ORDERED the Motions to Dismiss the Complaint (Docs. Nos. 21, 23, 26, & 30) are DENIED AS MOOT. Defendant Booker's Motion to Dismiss the Amended Complaint (Doc. No. 45) is GRANTED. The remaining Motions to Dismiss the Amended Complaint (Docs. Nos. 39, 48, 51, 57, & 61) are GRANTED IN PART and

DENIED IN PART. Plaintiffs' federal antitrust claim (Count 3), claims against Defendant Booker, and Counts 7 and 8 as against Defendants Gaston County and GCBOE are DISMISSED WITHOUT PREJUDICE.

IT IS SO ORDERED.

Opinion

MEMORANDUM

Baylson, J.

As part of the class settlement for Direct Purchasers in these cases, Plaintiffs have appropriately filed a Motion for Award of Attorneys' Fees and Expenses. The Court has reviewed the supporting documents filed by Plaintiffs' counsel and the applicable legal precedents and files this Memorandum in support of the award.

As the first step in the outstanding success of Plaintiffs' counsel, this case started as a traditional price-fixing antitrust case. Counsel had located several direct purchasers of drywall, extensively used in construction and renovation work, as Plaintiffs on behalf of class of similarly situated direct purchasers. The initial Complaint in this Court was filed on December 20, 2012, and shortly thereafter a number of other Complaints were filed and the Judicial Panel on Multidistrict Litigation consolidated all of the cases in this Court. An initial pretrial conference and scheduling order set in motion the start of discovery, and the Court determined other relatively routine issues that commonly arise in complex litigation.

The course of this litigation can be succinctly summarized **[*2]** by cross-reference to the major decisions issued by the undersigned on various issues in the case, as a prelude to the award of attorneys' fees:

A. Major Opinions in Drywall

1. Use of contention statements rather than answers to interrogatories

On May 12, 2014, Defendants served interrogatories asking Plaintiffs to state "all acts and omissions that you contend each took in furtherance of the alleged conspiracy." *In re Domestic Drywall Antitrust Litig., 300 F.R.D. 228, 229 (E.D. Pa. 2014)*. Defendants then filed a motion to compel. The Court decided Defendants' request was not premature, but that "[r]ather than compel individual Plaintiffs to answer Defendants' interrogatories at this time, the Court will adopt a sequence of pretrial statements under which Plaintiffs' counsel will be required to set forth facts in their possession supporting their allegations ... Defendants must reciprocate." *Id. at 231*. The contention statements filed by Plaintiffs were detailed, thorough and reflected a great deal of high-quality work in assembling and the results of the discovery which they had conducted on a highly professional basis.

2. Thompson Research Group, LLC's motion to quash

On May 15, 2014, the Court granted in part and denied in part the motion to quash subpoena of a non-party **[*3]** analyst Thompson Research Group, LLC, which had allegedly served as a "conduit" for information regarding pricing among Defendants. *In re Domestic Drywall Antitrust Litig., 300 F.R.D. 234 (E.D. Pa. 2014)*. The Court allowed some discovery as to Thompson, but asked the parties to insure the confidentiality of Thompson Research Group's sources, limit the intrusion into Thompson's investigative files, and required Plaintiffs to pay for the costs of complying with the subpoena. Id. This third party discovery was appropriate and indeed, in retrospect, necessary because one of the theories of liability of the Plaintiffs was that the Defendants had used these third party marketing research firms as "conduits" for providing information from one Defendant to another as to their pricing plans, pricing decisions, and other normally confidential competitive strategies. Although the conduit theory is not completely novel in antitrust litigation, the results of this third party discovery proved to be very important in the Plaintiffs' building a successful dossier of evidence on liability issues as well as damages.

3. Denial of summary judgment as to all Defendants except CertainTeed

Following the direct and indirect purchaser settlements with USG and TIN, the remaining **[*4]** Defendants moved for summary judgment, with voluminous affidavits, deposition testimony and documents, asserting that there were no genuine issues of fact as to any alleged agreement to fix prices, and that the Court should conclude that the Plaintiffs had failed to gather sufficient evidence to warrant a jury trial. On February 18, 2016, the Court granted CertainTeed's motion for summary judgment, finding that "Plaintiffs' evidence as to Defendant CertainTeed is not sufficient to show that CertainTeed participated in the conspiracy," but denied summary judgment as to all other moving Defendants. *In re Domestic Drywall Antitrust Litig., 163 F. Supp. 3d 175, 230-31 (E.D. Pa. 2016)*. The Plaintiffs' responsive briefs were outstanding in all respects, with thorough responses, excellent briefs, and persuasive citations — all of which warranted the Court to deny summary judgment except as to CertainTeed, as noted above.

4. Appointment of independent expert on class issues

The Court decided not to appoint an independent expert on class action issues, but on June 16, 2017, it instead appointed a "technical advisor," Dr. Jeffrey Church of the University of Calgary, to assist the Court on limited econometric issues. (Letter, ECF 601.) Because both Plaintiffs and Defendants had **[*5]** retained highly skilled and knowledgeable expert economists on the class action issue, the Court determined to retain its own expert as to some of the economic issues in this case. Although this independent technical adviser generally sided with the Defendants' view of the economic theories, the Court concluded that the Plaintiffs' evidence warranted certification of a class of Direct Purchasers, but did not warrant a class of Indirect Purchasers.

5. Grant of Direct Purchaser Litigation Class

On August 23, 2017, the Court approved a litigation class of direct purchasers of drywall, finding that the requirements of *Rule 23(a)* and *Rule 23(b)(3)*, as interpreted by the Third Circuit, had been met. *In re: Domestic Drywall Antitrust Litig., 322 F.R.D. 188 (E.D. Pa. 2017)*.

6. Denial of Indirect Purchaser Litigation Class

On August 24, 2017, the Court denied certification of a litigation class of indirect purchasers of drywall. *In re Domestic Drywall Antitrust Litig., No. 13-MD-2437, 2017 U.S. Dist. LEXIS 135758, 2017 WL 3700999 (E.D. Pa. Aug. 24, 2017)*. The Court found that although the indirect purchaser plaintiffs had satisfied the requirements of *Rule 23(a)*, they had not met the Third Circuit's implied ascertainability requirement for *Rule 23(b)(3)* class actions, and had not shown that common issues predominated or that a class action was the superior method for adjudicating their claims, **[*6]** as was required under *Rule 23(b)(3)*.

7. Third Circuit Rulings

The Third Circuit rejected appeals under *Rule 23(f)*, filed by Defendants as to the Court's grant of a Direct Purchaser class action, and filed by Plaintiffs as to the denial of class certification of Indirect Purchasers.

Also, previously, although the undersigned had certified the denial of Defendants' motions for summary judgment for interlocutory appeal under *28 U.S.C. § 1292(b)*, the Third Circuit rejected the interlocutory appeal.

B. Determining Attorneys' Fees in Class Action Common Fund Settlements: the Percentage-of-Recovery Method

There are two methods of calculating attorneys' fees—the percentage-of-recovery method and the lodestar method. Under the percentage-of-recovery method, counsel will typically take a certain percentage of the plaintiffs' total recovery, with the understanding that the attorney is working on a contingent basis. The percentage-of-recovery method is favored in class action settlements involving a common fund, allowing the court to award attorneys' fees "in a manner that rewards counsel for success and penalizes it for failure." *In re GMC Pick-Up Truck Fuel Tank Prods. Liab. Litig., 55 F.3d 768, 821 (3d Cir. 1995)*. The theory underlying the use of the percentage-of-recovery method is that "the class would be unjustly enriched **[*7]** if it did not compensate the counsel responsible for generating the valuable fund bestowed on the class." Id. Therefore, counsel's compensation depends directly on the value created for the class.

Under the lodestar method, attorneys' fees are calculated by multiplying the hours worked by counsel by the average hourly rate. This method is often used in the context of fee-shifting statutes, or to reward counsel for undertaking socially beneficial litigation in cases where the expected recovery is small enough such that utilizing the percentage-of-recovery method would yield inadequate compensation for counsel. Id. Even though the lodestar method is not the primary method for calculating attorneys' fees in class action common fund settlements, "it is sensible for a court to use [this] second method of fee approval to cross check" the award calculated under the percentage-of-recovery method. *Id. at 820*. What is often referred to as the "lodestar cross-check" is performed by dividing the total recovery requested under the percentage-of-recovery method by counsel's lodestar value, yielding a "lodestar multiplier." Thus, a lodestar multiplier of 2 would mean that under the percentage-of-recovery method, **[*8]** counsel would receive twice the amount of compensation that they would typically request for the same number of hours expended on the litigation.

1. *Krell v. Prudential Ins. Co. of Am. (in Re Prudential Ins. Co. Am. Sales Practice Litig. Agent Actions), 148 F.3d 283 (3d Cir. 1998)*

a. Overview

In Prudential, the Third Circuit established three factors ("the Prudential factors") that courts will consider when determining whether the requested attorneys' fees are appropriate. They are:

(1) whether the entire value of benefits to the class is attributable to the efforts of class counsel;

(2) whether the percentage-of-recovery request reflects the fee that would result from private negotiations; and

(3) whether there are any particularly innovative terms in the settlement.

In re Prudential Ins. Co. Am. Sales Practice Litig. Agent Actions, 148 F.3d 283, 338-40 (3d Cir. 1998).

These factors supplement the seven *Gunter* factors, discussed *infra*, in the balancing of whether a request for attorneys' fees is reasonable under the settlement agreement. Ultimately, the Third Circuit remanded the issue of attorneys' fees upon a finding that the district court inappropriately (1) failed to separate the value of the settlement created by administrative investigation from the value created by class counsel, and (2) gave weight to the contingency fee rates typical of smaller class actions or individual actions, but found that the district **[*9]** court's consideration of "innovative terms" of settlement was appropriate. Id.

b. Procedural Posture and Factual Background

This case was before the Third Circuit as an appeal of the district court's approval of the settlement of a nationwide class action against Prudential Life Insurance Company, including the district court's creation of a bifurcated attorneys' fee award valued as high as $90 million in a nearly $2 billion settlement.

Beginning in 1994, lawsuits against Prudential Life Insurance Company alleging improper sales and marketing practices were filed across the United States. *Id. at 290*. In response to the growing number of lawsuits against Prudential, the New Jersey Insurance Commissioner assembled a task force to investigate the allegations and develop a remedial plan to compensate injured policyholders. Id. In 1996, the task force issued a remedial action plan creating two options—alternative dispute resolution or "no-fault" basic claim relief—across four types of claims. *Id. at 291*. While the task force was investigating, individual parties and classes continued to file actions against Prudential in both state and federal court. *Id. at 292*. Following the publication of the task force report, lead **[*10]** counsel in the underlying class action and Prudential entered into a settlement agreement in September of 1996. *Id. at 294*. The settlement agreement largely adopted the substance and structure of the task force remedial plan, but the district court found that the settlement made some enhancements. *Id. at 296-97*. Under the Stipulation of Settlement filed in October of 1996, lead counsel would request $90 million in attorneys' fees to be paid by Prudential. *Id. at 329*.

c. The District Court's Analysis of Lead Counsel's Attorneys' Fees Request

The district court found the remedy structure analogous to a common fund, and thus determined that the percentage-of-recovery method was to apply. Id. An expert retained by lead counsel estimated that $863.7 million of the settlement agreement's value of $1.987 billion was created by the task force plan, while the remaining $1.123 billion was created by class counsel. Id. The district court rejected the lead counsel's fee petition, instead creating a bifurcated fee award designed to provide between $45 million and $90 million to class counsel. Id. Notably, the district court recognized that the fee awards in cases where the recovery exceeded $100 million ranged between 4.1 and 17.92%; **[*11]** it also concluded that private parties would likely have negotiated a contingent fee of 10 to 15%. *Id. at 331-332*. The district court calculated that if the full $90 million in attorneys' fees were awarded, this would result in approximately 6.7% of the minimum recovery guaranteed by Prudential under the settlement agreement. *Id. at 332*. With a lodestar value of $17.7 million and expenses at just over $3 million, a $90 million fee would generate a lodestar multiplier of 5.1 at an average hourly rate at $1,148.70. Id.

d. The Third Circuit's Rejection of the District Court's Analysis and Remand on the Issue of Attorneys' Fees

In its analysis of the appropriateness of the attorneys' fees, the Third Circuit primarily took issue with the high value of attorneys' fees despite the presence of substantial government investigation. In remanding the issue of attorneys' fees back to the district court, the Third Circuit emphasized that "[i]t is not clear on the record before us that class counsel had so significant a role in the institution of the Task Force proceedings that the district court was justified in crediting counsel for all of the benefits created under the Task Force plan." *Id. at 337*.

Next, the Third Circuit focused **[*12]** on the district court's conclusion that a contingent fee of 10 to 15% would be privately negotiated in class actions of such a large size. "While such private fee arrangements might be appropriate in smaller class actions or litigation involving individual plaintiffs, we do not believe they provide much guidance in cases involving the aggregation of over 8 million plaintiffs and a potential recovery exceeding $1 billion," it noted. *Id. at 340*. The Third Circuit additionally took issue with the size of the lodestar multiplier of 5.1, stressing that the district court did not "take care to explain how the application of a multiplier is justified by the facts of a particular case." Id.

Finally, though the Court found the above issues to be problematic in the district court's fee structure, it did consider the bifurcated fee award to be "an appropriate and innovative response to the structure of the settlement." *Id. at 334*.

2. *Gunter v. Ridgewood Energy Corp., 223 F.3d 190 (3d Cir. 2000)*

a. Overview

In Gunter v. Ridgewood Energy Corp., the Third Circuit adopted a discrete seven-factor test, listed in subsection d, *infra*, that courts use in determining the reasonableness of attorneys' fees in class action common fund settlements. *Gunter v. Ridgewood Energy Corp., 223 F.3d 190, 195 n.1 (3d Cir. 2000)*. The Third Circuit also added a separate **[*13]** lodestar cross-check generating a "lodestar multiplier" that is used to gauge the difference between the class counsel's lodestar and the fee under the percentage-of-recovery method. Id. The Gunter factors are typically combined with the Prudential factors (discussed *supra*) in a court's analysis, resulting in a comprehensive ten-factor balancing test. Ultimately, the Third Circuit remanded the issue of attorneys' fees to the district court for a correct and clear articulation of its analysis in determining what amount of attorneys' fees ought to be awarded. *Id. at 192, 196*.

b. Procedural Posture and Factual Background

Gunter was before the Third Circuit on the plaintiffs' appeal of the district court's grant of attorneys' fees at only 18% of the $9.5 million settlement fund, instead of the 33 1/3% fee that the parties agreed to under the settlement agreement. *223 F.3d at 191*. The underlying class action arose from a series of failed oil and gas investments, with the class alleging that the defendants fraudulently marketed and sold about $150 million of interests in partnerships between 1986 and 1990. *Id. at 192*. The class action was brought under the *Racketeer Influenced and Corrupt Organization Act* and **[*14]** *§§ 10(b)* and *20(a) of the Securities Exchange Act of 1934*, as well as various state common law claims. Id. After discovery and pre-trial motion practice, including class certification and a round of summary judgment argument, the parties reached a settlement agreement in June of 1999. *Id. at 193*.

The terms of the settlement included a common fund of $9.5 million, which represented more than half of the total amount lost by class members to the fraudulent practices of the defendants. Id. In its submissions to the district court, class counsel requested reimbursement of $300,000 in costs as well as one third of the $9.5 million common fund (about $3.16 million). Id. Class counsel calculated the lodestar multiplier to be 1.1, and noted that none of the class members objected to the requested fee amount. *Id. at 194*.

c. The District Court's Analysis of Class Counsel's Attorneys' Fees Request

In its brief analysis of class counsel's request for one-third of the common settlement fund, the district court decided to reduce the fee to 18% of the recovery. Gunter v. Ridgewood Energy Corp., No. CIV. 95-438 (WHW), 1999 WL 33266979, at *2 (D.N.J. Nov. 16, 1999), vacated, *223 F.3d 190 (3d Cir. 2000)*. The factors considered by the district court included class counsel's submissions and statements regarding their efforts to settle the **[*15]** litigation, and the number of hours expended. *Id.* The district court ultimately held that "[t]he nature of this litigation, its resolution at this stage without the necessity of trial, the nature of the settlement, and its value, convince the court that it would place a reasonable burden on the class to award attorneys' fees of 18% of the Settlement Fund, or $1,700,000." Id. The district court denied class counsel's motion for reconsideration on the grounds that it was wary of the number of hours class counsel reported, stating "[t]he Court is of the opinion that these hours merely serve as a hindsight prop to the one-third percentage of plaintiffs' recovery sought by counsel as their fee." Gunter v. Ridgewood Energy Corp., Civ. No. 95-438 (WHW), at 2-3 (D.N.J. Dec. 29, 1999). Noting that "[c]ounsel had their opportunity to provide full information to the Court upon their original submission. They did not. And, interestingly, they did not even attempt to do so by their motion for reconsideration." Id.

d. The Third Circuit's Remand of the Issue of Attorneys' Fees Based on Inadequate Reasoning on the Part of the District Court

After analyzing the district court's award of reduced attorneys' fees, the Third Circuit ultimately **[*16]** remanded the issue back to the district court, since "if the district court's fee-award opinion is so terse, vague, or conclusory that we have no basis to review it, we must vacate the fee-award order and remand for further proceedings." *Gunter, 223 F.3d at 196*. The Third Circuit then identified seven factors that courts ought to consider when determining the appropriateness of an attorneys' fee request in common fund class action settlements:

(1) the size of the fund created and the number of persons benefitted;

(2) the presence or absence of substantial objections by members of the class to the settlement terms and/or fees requested by counsel;

(3) the skill and efficiency of the attorneys involved;

(4) the complexity and duration of the litigation;

(5) the risk of nonpayment;

(6) the amount of time devoted to the case by plaintiffs' counsel; and

(7) the awards in similar cases.

Id. at 195 n.1. It also noted that in mega-fund cases, like those valued at over one billion dollars, courts may give these factors less weight. Id. Finally, the Third Circuit suggested that after a court's has analyzed the seven factors, it should perform a lodestar "cross-check," in which it calculates the lodestar multiplier to determine whether **[*17]** the difference between counsel's lodestar and the fee request is reasonable under the circumstances of the case. Id.

In reviewing the district court's analysis of the factors, the Third Circuit found that, in the original fee award opinion as well as in the opinion denying class counsel's motion for reconsideration, the district court either failed to apply some of the seven factors it identified, or misapplied them. *Id. at 201*. The following analysis does not follow the order of the factors listed explicitly by the Third Circuit, *223 F.3d at 191 n.1*.

i. Third Circuit Review of the First Factor Analyzed by the District Court: The Complexity and Duration of the Litigation

Regarding the first factor analyzed by the district court—the complexity and duration of the litigation—the Third Circuit found, unlike the district court, that the underlying litigation was both complex (involving federal securities law and a plethora of state claims), and that its four-and-a-half year duration weighed in favor of granting class counsel's fee request. *Id. at 197*.

ii. Third Circuit Review of the Second Factor Analyzed by the District Court: The Existence of a Settlement Between the Parties

The Third Circuit then addressed the second factor that the district **[*18]** court analyzed, and found that the district court inappropriately considered the existence of a settlement to warrant a reduction in the attorneys' fee award. *Id. at 198*. The Third Circuit held that "[p]rocuring a settlement, in and of itself, is never a factor that the district court should rely upon to reduce a fee award. To utilize such a factor would penalize efficient counsel, encourage costly litigation, and potentially discourage able lawyers from taking such cases." Id.

iii. Third Circuit Review of the Third Factor Analyzed by the District Court: The Size of the Settlement and the Number of Persons Benefitted

Turning to the next factor the district court analyzed—the size of the settlement and the number of persons benefitted—the Third Circuit found that the district court provided scant analysis of whether the attorneys' fee request was appropriate in light of the litigation in similar cases. Id.

iv. Third Circuit Review of Two Factors Not Analyzed by the District Court: The Absence of Objections from Class Members, and the Risk of Non-Payment

The Third Circuit next identified two factors that the district court failed to include altogether: the absence of objections from class members **[*19]** to class counsel's request for fees, and the risk of non-payment. *Id. at 199*. On the first issue, the Third Circuit did not make any explicit finding on the significance of the lack of objection to the requested fee amount. On the second issue, the Third Circuit noted "it seems that the risk of non-payment in this case was present both because the defendants were close to insolvency, and because other classes of plaintiffs in similar cases against the defendants had lost on similar legal theories." Id.

v. Third Circuit Review of the District Court's Use of the Lodestar Cross-Check

Finally, the Third Circuit found that the district court failed to adequately apply the lodestar cross-check, noting that "the District Court neither reduced its lodestar calculations to writing, nor gave Counsel a chance to justify their hours billed or their hourly rates." Id. While in its opinion denying the motion for reconsideration the district court stated that it had considered the lodestar value in arriving at its original fee award, the Third Circuit observed that any mention or discussion of either the lodestar value or multiplier was notably absent. Id. For all of these reasons—either a lack of analysis or **[*20]** improper analysis—the Third Circuit remanded the issue of attorneys' fees back to the district court. *Id. at 192, 196*. No subsequent district court order or opinion could be found following the Third Circuit's remand.

3. *Welch & Forbes, Inc. v. Cendant Corp. (In re Cendant Corp. Prides Litig.), 243 F.3d 722 (3d Cir. 2001)*

a. Overview

This case presents an example of where a percentage-of-recovery award appeared to be reasonable on its face, but analysis under the Gunter factors and a lodestar cross-check demonstrated the award's unreasonableness. As in Gunter, the Third Circuit found the district court's analysis to be too cursory, and also determined that the district court had either failed to analyze or mis-analyzed several factors that it had outlined in Gunter. *In re Cendant Corp. Prides Litig., 243 F.3d 722, 733, 735-36 (3d Cir. 2001)*. While a percentage-of-recovery figure of 5.7% appeared reasonable given the range suggested by other cases, the Third Circuit found that such a percentage was materially undermined by a projected lodestar multiplier between 7 and 10. *Id. at 742*. After reviewing the district court's analysis, the Third Circuit vacated the award of attorneys' fees and remanded the issue to the district court. *Id. at 743*.

b. Procedural Posture and Factual Background

This case was before the Third Circuit on appeal of the district court's approval of a class settlement and award of attorneys' **[*21]** fees to lead counsel, and was ultimately remanded by the Third Circuit to the district court for proper analysis under the Gunter factors. Id. The underlying class action was filed on behalf of investors in the Cendant Corporation after it had disclosed some prior "accounting irregularities" in April of 1998. *Id. at 725*. On behalf of one of the classes of the consolidated class action (the "PRIDES class,") a law firm, Kirby, entered into a settlement agreement with Cendant in March of 1999 under which Cendant agreed to issue Rights to new PRIDES (a type of share); with 29,161,474 shares each valued at $11.71, the total approximate value of the settlement agreement was $341,500,000. Id. Under the terms of the settlement agreement, Kirby would not ask for more than 10% of the $341,500,000 stated value, plus reasonable expenses. Id.

c. The District Court's Analysis of Kirby's Attorneys' Fees Request

In June of 1999, the district court approved the settlement, granted Kirby's expenses of $2,367,493, but found that for attorneys' fees, Kirby should receive 5.7% (instead of the 10% requested) of the settlement rights, totaling 1,650,680 rights valued at $19,329,463. *Id. at 726*. The district court's lodestar analysis found **[*22]** that approximately 5,600 hours were expended, and that senior partners charge an hourly rate of $495. *In re Cendant*

Corp. Prides Litig., 51 F. Supp. 2d 537, 542 (D.N.J. 1999). Using this hourly rate, the district court calculated the lodestar multiplier to be 7. Cendant, 243 F.3d at 732. The $495 hourly rate of senior partners artificially lowered the lodestar multiplier, as inferior legal staff expended hours on the litigation. Id.

d. The Third Circuit Review of the District Court's Analysis and Remand on the Issues of Attorneys' Fees

The Third Circuit found the district court's analysis problematic for several reasons, not the least of which was the fact that "[a]s in Gunter, the District Court's fee opinion in this case was too cursory for us to 'have a sufficient basis to review for abuse of discretion.'" Id. at 733 (quoting Gunter, 223 F.3d at 196). The Third Circuit itemized a list of factors that the district court either failed to recognize or misjudged in its analysis of the adequacy of Kirby's attorneys' fee request:

> 1) the case was relatively simple in terms of proof, in that Cendant had conceded liability and no risks pertaining to liability or collection were pertinent;
>
> 2) the case was settled at a very early stage of the litigation, with an agreement being announced two months after Kirby filed for class **[*23]** certification and a proposed settlement being submitted to the District Court two months after that;
> 3) there was a minimal amount of motion practice in this case—before settlement, Kirby submitted only the Complaint and three motions, all on the same day;
>
> 4) discovery was virtually nonexistent—indeed the District Court did not mention any depositions taken or document review conducted by Kirby;
>
> 5) Kirby spent a relatively small amount of time on this case compared to the amount of time expended in most other large class actions."

Id. at 735-36. In other words, the attorneys' fee amount requested by Kirby did not actually reflect the amount of work it expended on litigating the case. Because the high value of the settlement might have arguably come from the number of class members or the values of the PRIDES shares, the law firm might receive a windfall under the requested amount. These notions supported the Third Circuit's observation that "[i]n In re GMC Trucks, we observed that 'one court has noted that the fee awards have ranged from nineteen percent to forty-five percent of the settlement fund.' . . . These varying ranges confirm that a district court may not rely on a formulaic application of **[*24]** the appropriate range in awarding fees but must consider the relevant circumstances of the particular case." Id. at 736 (quoting 55 F.3d at 822) (internal citations omitted).

The Third Circuit noted that the district court failed to compare the requested attorneys' fee to those granted in similar cases. Id. The Third Circuit provided a chart listing class action common fund settlements, their value, and the percentage-of-recovery. Id. at 737. Looking at the cases listed in the chart, the Third Circuit noted that the attorneys' fees awards ranged from 2.8% to 36% of the total common settlement fund. Id. at 738. While the 5.7% fee awarded by the district court appeared to fall within this range, the Third Circuit again emphasized the fact that the work counsel performed was not deserving of an award of that size, writing "a brief review of the facts and posture of these other cases makes clear that, when examined through the seven-factor lens of Gunter, the higher fees awarded in the other cases were far more justified than the high award in this case." Id. (italics added). Finally, the lodestar multiplier would likely fall between 7 and 10, a value the Third Circuit found inappropriately high. Id. at 742. The Third Circuit observed: "[i]n **[*25]** all the cases in which high percentages were applied to arrive at attorneys' fees, the courts explained the extensive amount of work that the attorneys had put into the case, and appropriately the lodestar multiplier in those cases never exceeded 2.99." Id. Thus, this case highlights the importance of the multiplier resulting from the lodestar cross-check, as even low percentage-of-recovery values may nevertheless leave law firms with windfall fee awards.

4. In re AT&T Corp. Sec. Litig., 455 F.3d 160 (3d Cir. 2006)

a. Overview

Where a district court granted the request for an attorneys' fee that was the product of a pre-arranged scale (not a traditional sliding scale where the percentage of recovery decreases as the settlement value increases), the Third Circuit found that because the attorneys' fee award conformed with the Gunter and Prudential factors, the district court did not abuse its discretion in granting the request. *In re AT&T Corp. Sec. Litig., 455 F.3d 160, 175 (3d Cir. 2006)*.

b. Procedural Posture and Factual Background

This case was before the Third Circuit from an appeal of three class members on the issue of attorneys' fees in a class action common fund settlement, specifically that they were excessive and did not employ a traditional sliding scale where the percentage of recovery for attorneys' **[*26]** fees decreases as the size of the settlement increases. *Id. at 163*.

Beginning in October of 2000, several plaintiffs filed federal securities fraud lawsuits under the *Securities and Exchange Act of 1934*, alleging that defendants made knowingly false statements over the course of 7 months regarding anticipated performance for the year of 2000 to artificially inflate stock price. *Id. at 162*. After two years of discovery and two weeks of trial (beginning of October of 2004), the parties entered into a tentative settlement agreement in which AT&T agreed to a $100 million common settlement fund, with attorneys' fees set at 21.25%, or $21,500,000, and costs valued at $5,465,996.79. *Id. at 163*. The district court preliminarily approved the settlement agreement, and after notice was mailed to over one million potential class members, eight objections were received pertaining to the attorneys' fees arrangements. Id.

c. The District Court's Analysis of the Request for Attorneys' Fees

In this securities case brought under the Private Securities Litigation Reform Act, the district court noted that in the Third Circuit, attorneys' fees requests are presumed reasonable unless the district court finds the fee to be clearly excessive on its face. **[*27]** *Id. at 167* (citing *Cendant, 264 F.3d at 220*). The district court found that the sliding scale arrangement between the parties, which resulted in the 21.25% attorneys' fee, was reasonable and had not been shown to be unreasonable by the challengers. Id. The district court concluded that the fee was also reasonable under the Gunter factors, specifically noting that the fee arrangements had been approved by each court-appointed lead plaintiff. Id. The district court subsequently found that a lodestar value of $16.6 million and a lodestar multiplier of 1.28 represented a "truly reasonable fee award." *Id. at 169*. The district court also approved reimbursement of costs. Id.

d. The Third Circuit's Affirmance of the District Court's Approval of Attorneys' Fees

The Third Circuit affirmed the district court's grant of attorneys' fees, finding that "[t]he district court's analysis and discussion demonstrates it considered the fee award reasonableness factors relevant to the facts of the case[.]" Id. The first Gunter factor—the size of the settlement and the number of persons benefitted—did not require any analysis, as the settlement was for $100 million and the class could potentially consist of over a million members. *Id. at 169-70*.

i. The Second Gunter ***[*28]*** *Factor: The Presence of Substantial Objections from Class Members on the Issue of Attorneys' Fees*

The Third Circuit found that with regard to the second Gunter factor, the presence of eight objections out of a potential class of one million members represented a "low level of objection," and thus the district court did not abuse its discretion by not considering these objections "substantial." *Id. at 170*.

ii. The Third and Fourth Gunter Factors: The Skill and Efficiency of Counsel and the Complexity and Duration of Litigation

The Third Circuit found that the third and fourth factors—the skill/efficiency of counsel and the complexity/duration of litigation—also weighed in favor of granting the fee award, as the litigation was long and even began trial, on complex securities law issues. Id.

iii. The Fifth Gunter Factor: The Risk of Non-Payment

There was only a slight risk of nonpayment under the fifth factor, but the Third Circuit found that the district court did not abuse its discretion in finding such a risk. *Id. at 171*.

iv. The Sixth Gunter Factor: The Amount of Time Devoted by Class Counsel

The lengthy litigation lent support to the sixth factor—the amount of time devoted by counsel, which was apparent from **[*29]** the number of pre-trial motions, the scope of discovery, and two weeks of trial. Id. Typically, a discussion of the number of hours devoted takes place under this factor, but such a figure is absent in this Third Circuit opinion.

v. The Seventh Gunter Factor: Awards in Similar Cases

With regard to the seventh factor—awards in similar cases—the district court did not abuse its discretion when it held that objectors had failed to present sufficient evidence to rebut a presumption of reasonableness (under the PSLRA). Id. Thus, under the Gunter factors and the lodestar cross-check, the Third Circuit found that the circumstances weighed toward granting the requested attorneys' fees. *Id. at 173*.

vi. The Prudential Factors: Whether the Entire Value of the Settlement is Attributable to Class Counsel, Whether the Fee Reflects What Private Parties Would Have Negotiated, and Whether the Settlement Contained Innovative Terms

Turning to the Prudential factors, the Third Circuit noted that there was no government investigation into the defendants' conduct, thus class counsel created the value of the settlement on their own. On the issue of privately negotiated contingency fees (the second *Prudential* factor), **[*30]** and in response to the appellants' contention that the percentage of recovery should not increase alongside the value of the settlement, the Third Circuit held that there is "no rule that a district court must apply a declining percentage reduction in every settlement involving a sizable fund." *Id. at 174* (citing *Rite Aid Corp. Sec. Litig., 396 F.3d 294, 303 (3d Cir. 2005))* (internal quotation marks omitted). As there were no particularly innovative terms of the settlement, the final Prudential factor was not analyzed. Thus, the district court's approval of the requested attorneys' fees was affirmed by the Third Circuit.

5. *In re Diet Drugs Prod. Liab. Litig., 582 F.3d 524 (3d Cir. 2009)*

a. Overview

In a case where $567 million in attorneys' fees were requested from a settlement valued at $6.44 billion, the Third Circuit found that the district court did not abuse its discretion in granting the requested amount. Since "the lawyers involved were primarily concerned with obtaining relief for their clients and members of the class," the district court "correctly applied the method better designed to 'reward counsel for success and penalize it for failure.'" *In re Diet Drugs Prod. Liab. Litig., 582 F.3d 524, 541 (3d Cir. 2009)* (citing *GMC, 55 F.3d at 821*).

b. Procedural Posture and Factual Background

In this case, the appellants challenged the district court's findings on three of the Gunter/Prudential factors **[*31]** in its opinion granting attorneys' fees in the amount of 6.75% of a settlement totaling $6.44 billion—a fee award of roughly $567 million. *Id. at 537*. Specifically, appellants challenged the district court's findings on the following factors:

(1) the presence or absence of substantial objections,
(2) the risk of nonpayment, and
(3) the value of benefits attributable to the efforts of other groups.

Id. at 541. Ultimately, the Third Circuit affirmed the findings of the district court, upholding the award of attorneys' fees. *Id. at 553*.

Beginning in 1997, a wave of products liability actions arose after researchers discovered a correlation between some then-commonly prescribed appetite suppressants and a heart disorder known as valvular heart disease ("VHD"). *Id. at 559*. Scientific evidence of serious coronary side effects from the drugs prompted the FDA to issue a public health alert, and prompted the pharmaceutical company responsible for the development of the drugs, Wyeth, to withdraw the drugs from the market. Id. In November of 1999, Wyeth, the plaintiffs' management committee of the class action, and counsel from state court class actions executed a nationwide settlement. *Id. at 530*. The settlement included several options for eligible **[*32]** class members, which were ultimately valued at a total of $6.44 billion. *Id. at 536*. Class counsel from 72 different firms filed a joint petition for attorneys' fees in which they requested a total of approximately $567 million. *Id. at 533*. An auditor reported that the 72 firms had performed 354,431.49 hours of work on the litigation and found a lodestar value of $101,076,658.54. Id.

c. The District Court's Analysis of the Requested Attorneys' Fees

When presented with class counsel's request for $567 million in attorneys' fees, the district court made several findings. First, the plaintiffs' management committee faced significant risk at the beginning of the litigation that their work would ultimately be unsuccessful and uncompensated. *Id. at 534*. Second, that the discovery undertaken by the plaintiffs' management committee paved the way for the class settlement and individual settlements—in other words, the plaintiffs' management committee could rightly be considered to have created the entire value of the settlement benefitting the class. Id. Thirdly and lastly, that the plaintiffs' management committee conferred great benefits on all litigants and performed well. Id. Ultimately, in April of 2008, eleven years **[*33]** after the commencement of litigation against Wyeth, the district court awarded class counsel attorneys' fees in the amount of approximately $567 million. *Id. at 536*.

When applying the percentage-of-recovery method, the district court concluded that an award equaling 6.75% of the recoveries under the settlement agreement was appropriate. *Id. at 536*. The lodestar cross-check yielded a lodestar multiplier of 2.6; while it recognized that this might have been artificially low, the district court was confident that the actual multiplier would not be excessive. Id.

d. The Third Circuit's Review and Affirmance of the District Court's Award of Attorneys' Fees

As to the first factor challenged—the presence or absence of substantial objections—the district court found it "remarkable" that there were fewer than thirty objections out of the approximately six million potential class members. *Id. at 542* (citing *In re Diet Drugs Prods. Liab. Litig., 553 F. Supp. 2d 442, 473 (E.D. Pa. 2008)* (internal quotation marks omitted). In response to appellants' argument that the district court inappropriately relied on the absence of objections to the final joint fee petition, the Third Circuit stated that "[w]hatever weight the Court gave to this factor it gave based on the dearth of objections throughout the settlement **[*34]** and fee adjudication process, instead of focusing only on the objections to the final joint fee petitions." Id. This suggests that the scope of this factor takes into account the nature and volume of objections by class members throughout the litigation process, though arguably this is a fact-intensive inquiry.

As to the second factor challenged, the risk of nonpayment, the appellants argue that the district court erred as a matter of law when it considered the risk of nonpayment only at the beginning of litigation and not throughout the course of the action, as the risk of nonpayment dissipated after a settlement was reached. *Id. at 543*. However, the Third Circuit found that the district court indeed considered the risk of nonpayment throughout the action, specifically when it considered the risk of a "'second wave' of litigation" following the execution of the settlement agreement; the district court found that "[a]t the inception, and throughout this litigation, there was a substantial risk that the efforts of [Class Counsel] would not be successful." Id. (citing *Diet Drugs, 553 F. Supp. 2d at 479*).

As to the third factor challenged, the value of benefits attributable to others, the district court found that while class counsel **[*35]** was somewhat beholden to the researchers who linked the diet drugs to the illness, as well as to the FDA for its efforts to remove the drugs from the market, these entities had not performed the investigative legal work on which class counsel could then rely. *Id. at 544*. The appellants challenged the district court's finding as to this factor, pointing as well to the efforts of Texas lawyers in state litigation. Id. The Third Circuit upheld the reasoning of the district court on this factor, and noted that even if the efforts of the Texas state claim lawyers were undervalued, this alone is not grounds to vacate a fee award. "Our task is to discern whether the Court's percentage-of-recovery analysis, when examined in its totality, supports the fee that it finally determined was appropriate," it held. *Id. at 545*. In Prudential, however, this factor was one of the overwhelming reasons (if not the primary reason) the Third Circuit vacated the fee award. However, this factor is one of degree; that is, the question is not whether there were efforts from outside groups, but rather whether class counsel relied on them to such an extent that it would not be appropriate to grant attorneys' fees based on the entire **[*36]** value of the settlement. The Third Circuit supported this notion when it stated that "the [District] Court determined that, whatever the Texas cases may have added, the recoveries arising from the MDL were due to the 'herculean efforts' of the [plaintiffs' management committee]—in developing the case against [the defendants], in negotiating an agreement that allowed [the defendants] to resolve the claims against it, and in amending the Settlement Agreement when it appeared to be in jeopardy." *Id. at 544* (citing *Diet Drugs, 553 F. Supp. 2d at 474*).

6. *In re Ins. Brokerage Antitrust Litig., 579 F.3d 241 (3d Cir. 2009)*

In this case, the Third Circuit upheld the district court's award of attorneys' fees totaling $29,950,000, where the attorneys' fees were to be paid separately from the settlement fund benefiting class members, which was valued at $100,000,000. *In re Ins. Brokerage Antitrust Litig., 579 F.3d 241, 248 (3d Cir. 2009)*. Beginning in October of 2004, various state attorneys general and state insurance departments began investigating alleged bid-rigging and steering activities of insurance brokers and insurers in the property and casualty insurance industry, in violation of ***antitrust law***; at the same time, private parties commenced class actions in federal courts throughout the country (which were consolidated in February of 2005 in the District of New Jersey). Id. One **[*37]** of the defendants, the Zurich Defendants, also subject to state-level investigations, entered into a Memorandum of Understanding ("MOU") with the class plaintiffs in October of 2005, under which the Zurich Defendants would establish a settlement fund valued at $100,000,000. *Id. at 250*. Of the settlement fund, $29,900,000 would be earmarked to fund a separate settlement award. *Id. at 252*. The Zurich Defendants agreed to pay attorneys' fees up to $29,950,000, paid separately from the settlement fund. *Id. at 253*. After preliminary approval of the settlement, class counsel requested the distribution of the $29,950,000 as follows: $3,957,000 for litigation expenses, $150,000 for incentive awards for fifteen class representatives, and $25,803,000 for fees. Id.

The district court found that while attorneys' fees are to be paid separately from the settlement fund, this case was nevertheless analogous to the typical class action common fund settlement, in which attorneys' fees were drawn from the fund under the percentage-of-recovery method. *Id. at 280*. Thus, the value of the settlement would be a combined $129,950,000. Id. The district court then proceeded to engage in an abbreviated Gunter analysis.

7. *In re Linerboard Antitrust Litig., MDL No. 1261, 2004 U.S. Dist. LEXIS 10532, 2004 WL 1221350 (E.D. Pa. June 2, 2004)*

a. Overview

In this case, the district court **[*38]** found that, after analysis of the Gunter/Prudential factors, the requested attorneys' fees of 30% of a $202,572,489 settlement was reasonable. *In re Linerboard Antitrust Litig., MDL No. 1261, 2004 U.S. Dist. LEXIS 10532, 2004 WL 1221350, at *19 (E.D. Pa. June 2, 2004)*. The district court also approved reimbursement of litigation costs in the amount of $1,391,203.36. Id. The court found that where class counsel was particularly skilled and able to litigate the case with fewer hours expended, attorneys' fees should serve to reward such efficiency, and any downward adjustment would inappropriately punish counsel for skilled lawyering. *2004 U.S. Dist. LEXIS 10532, [WL] at *16*.

b. Procedural Posture/Factual Background

This district court opinion addresses the request for attorneys' fees resulting from an antitrust action involving allegations that a number of US manufacturers of linerboard engaged in a continuing combination of conspiracy and unreasonable restraint of trade and commerce in violation of the *Sherman Act*. *Linerboard, 2004 U.S. Dist. LEXIS 10532, 2004 WL 1221350, at *1*. Seven lawsuits were instituted after an administrative complaint was filed by the FTC against defendant Stone Container Corporation was resolved by a consent decree. Id. The lawsuits were consolidated in the Eastern District of Pennsylvania by the Judicial Panel on Multidistrict Litigation. Id. The total settlement amount among all the **[*39]** defendants totaled $202,572,489, with class counsel requesting 30% of the settlement value (approximately $60 million) plus reimbursement of $1,391,203.36 in litigation costs. *2004 U.S. Dist. LEXIS 10532, [WL] at *2*.

c. The District Court's Finding that the Requested Fees are Reasonable

i. The First Gunter Factor: The Size of the Fund Created and the Number of Persons Benefitted

The district court found that this factor weighed in favor of approving the attorneys' fees request, on the ground that the size of the fund represented more than half of the claimed damages, and the class size of 80,000 was sufficiently large. *2004 U.S. Dist. LEXIS 10532, [WL] at *4-5*. The plaintiffs had retained an economic expert that estimated that during the class period, the costs of boxes and sheets were 2.7% higher than they would have been absent the alleged conspiracy, representing a total of $478 million. Id. Thus, the settlements represented about 55% of the damages. Id. Furthermore, the class size of 80,000 companies weighed in favor of granting the request. *2004 U.S. Dist. LEXIS 10532, [WL] at *5*.

ii. The Second Gunter Factor: The Presence or Absence of Substantial Objections by Members of the Class to the Fee Request

The district court found that "in this case class members are represented by counsel. Further, the **[*40]** classes in this cases [sic] include many of the largest corporations in America . . . Based on the foregoing, the Court concludes that consideration of the of the second *Gunter* factor . . . supports granting the Fee Petition." *Id.*

iii. The Third Gunter Factor: the Skill and Efficiency of Counsel

The district court found that this factor weighed in favor of granting the requested attorneys' fees, observing that "[t]hroughout every phase of the litigation petitioners managed a major discovery effort . . . In terms of document discovery alone, defendants produced more than 430 boxes of documents containing more than one (1) million pages of records." *2004 U.S. Dist. LEXIS 10532, [WL] at *10*. The district court also observed that "most [of the] informal efforts at resolution [between class and defense counsel] have proved successful and the Court's involvement has only been required on a few occasions." Id. (internal citations omitted). This suggests that under this factor, courts may consider the ability for counsel to resolve issues cooperatively and independently.

iv. The Fourth Gunter Factor: the Complexity and Duration of Litigation

The district court noted that the litigation had been going on for six years, and that there **[*41]** was a high possibility that should the case proceed to trial, it could continue for several more years. Id. The district court also noted that there was previous authority for granting a similar fee award in a case where the settlement occurred much earlier in the litigation process, such as in *In re Ikon Office Solutions Inc. Sec. Litig., 194 F.R.D. 166, 194 (E.D. Pa. 2000)*, where the court had awarded 30% of a $111 million settlement in attorneys' fees after one and a half years of litigation. *Linerboard, 2004 U.S. Dist. LEXIS 10532, 2004 WL 1221350, at *10*.

v. The Fifth Gunter Factor: the Risk of Non-Payment

The district court called attention to several important facts in this case pertaining to this factor. First, the district court noted that the FTC investigation into one of the defendants had been, according to one antitrust expert, "at the cutting edge of single firm antitrust liability." *2004 U.S. Dist. LEXIS 10532, [WL] at *11* (internal citations omitted) (internal quotation marks omitted). Because there had "never been a successfully litigated antitrust claim of a single firm attempt to conspire to raise prices or reduce out-put based solely, or even primarily, on market conduct by the defendant firm," the class faced significant risks of non-payment stemming from the uncertainty or the low success rate of this type of litigation. Id. (internal citations **[*42]** omitted) (internal quotation marks omitted).

Second, even though the district court found that the FTC had launched an investigation into one of the defendants, the district court adopted the view of the Second Circuit, which asked whether the defendants' liability was "prima facie established by the government's successful action." Id. (quoting *City of Detroit v. Grinnell Corp., 495 F.2d 448, 455 (2d Cir. 1974)*, abrogated on other grounds by *Goldberger v. Integrated Res., Inc., 209 F.3d 43 (2d Cir. 2000))*. Here, the FTC did not successfully establish, prima facie, the defendant's liability. *Linerboard, 2004 U.S. Dist. LEXIS 10532, 2004 WL 1221350, at *11*. The emphasis on this factor may also be considered to be an analysis under one of the Prudential factors, which analyzes the degree to which class counsel has relied on other entities to create the value of the settlement. In this case, the district court found that the FTC investigation had not played any significant role, and therefore class counsel could be considered to have created the entire value of the settlement. Id.

Finally, the defendants stated their intention to exploit several perceived weaknesses in the class' evidence of liability, such as the lack of direct evidence of a meeting among the defendants where the alleged conspiracy to violate antitrust laws would have taken place. This, supplemented by the fact **[*43]** that there might have been other reasons for the increase of prices, made it much more difficult for the class to establish liability at trial. *2004 U.S. Dist. LEXIS 10532, [WL] at *12*.

vi. The Sixth Gunter Factor: the Amount of Time Devoted by Counsel

Where counsel reported spending 51,268 hours on the litigation, the district court found it remarkable that "[f]ewer hours of attorney time were expended in this case than in comparable litigation. . . . This development should be rewarded when it reflects, as in this case, the efficiency of counsel in maximizing total recovery to the class by minimizing attorneys' fees expenses." *2004 U.S. Dist. LEXIS 10532, [WL] at *13*. This weighed in favor toward granting the fee request.

vii. The Seventh Gunter Factor: Awards in Similar Cases

The district court found that this factor weighed in favor of granting the requested attorneys' fees, since "[m]any of the decisions cited by the Third Circuit involved settlements similar in size to the settlement in this litigation and the courts awarded fees in those cases comparable to the 30 percent fee requested by petitioners." *2004 U.S. Dist. LEXIS 10532, [WL] at *13* (citing *Cendant, 243 F.3d at 737*). The district court also took note of a then-recent Judicial Center study finding the median attorney fee awards in federal class actions to range **[*44]** between 27 and 30%. *2004 U.S. Dist. LEXIS 10532, [WL] at *14*. The district court observed that "recent empirical data analyzing fee awards in securities cases indicates that regardless of size, fees average 32 percent of the settlement." Id. (internal citations omitted) (internal quotation marks omitted). The district court found these studies to be persuasive and that this factor weighed in favor of granting the requested fees.

viii. The Lodestar Cross-Check

At an average mixed rate of $440, the lodestar value for 51,268 hours of work would be $22,557,920. *2004 U.S. Dist. LEXIS 10532, [WL] at *16*. This would mean that under the requested 30% fee, the lodestar multiplier would be 2.66. Id. The district court found that since the Third Circuit has found the appropriate lodestar multiplier ceiling to be either 3 (*Cendant, 243 F.3d at 742*), or 4 (*Prudential, 148 F.3d at 341*), a lodestar multiplier of 2.66 was within the appropriate range. Id. Furthermore, the district court took note of empirics suggesting that "during 2001-2003, the average multiplier approved in common fund class actions was 4.35 and during the 30 year period from 1973-2003, the average multiplier approved in common fund class actions was 3.89." Id.

ix. An Exception to the Traditional "Sliding Scale" Approach

While most courts consider a sliding scale approach **[*45]** (where the percentage of recovery decreases as the settlement value increases) to be appropriate for awarding attorneys' fees, here the district court rejected that notion. The district court stated: "[o]ne might argue that a fee award of 20 percent of settlements in excess of $200 [sic] [million] is excessive given the absolute figure, approximately $60 million, that such an award produces. The Court rejects that thinking in this case because the highly favorable settlement was attributable to the petitioners' skill and it is inappropriate to penalize them for their success." *2004 U.S. Dist. LEXIS 10532, [WL] at *16*.

8. *In re Flonase Antitrust Litig., 951 F. Supp. 2d 739 (E.D. Pa. 2013)*

a. Overview

In this case, the district court granted a request for attorneys' fees in the amount of one-third of the settlement fund—$50 million of $150 million—and reimbursement of expenses in the amount of $2,069,433. *In re Flonase Antitrust Litig., 951 F. Supp. 2d 739, 746 (E.D. Pa. 2013)*. While class counsel also requested incentive awards of $85,000 and $75,000 for two of the class representatives, the district court reduced these awards to $50,000 and $40,000, respectively. *Id. at 752*.

b. Procedural Posture and Factual Background

In this opinion, the district court was presented with a request for attorneys' fees in the amount of one-third of the settlement value, reimbursement of costs, and incentive **[*46]** awards. The plaintiff class of 33 direct purchasers of Flonase, a brand-name nasal corticosteroid used to treat nasal inflammation caused by allergies, brought suit alleging that defendant SmithKline Beecham Corporation ("GSK") improperly delayed the entry of a generic version of the drug, resulting in overcharges to the class. *Id. at 741*. The complaint was filed in 2008; discovery began in late 2008 and continued through mid-2010. Id. The class was certified after a round of oral argument in November of 2010. Id. Two years later, in November of 2012, the parties reached a settlement agreement whereby GSK agreed to create a $150 million common settlement fund. *Id. at 742*. The settlement itself was preliminarily approved in January of 2013. Id. Class counsel was requesting $50 million for attorneys' fees, $2,069,433 in costs, and $85,000 and $75,000 in incentive awards to two class representatives. *Id. at 746*.

c. The District Court's Gunter/Prudential Analysis

i. The First Gunter Factor: the Size of the Fund and the Number of Beneficiaries

The district court found that the $150 million settlement, distributed *pro rata* among the 33 class members, to be "sizable." *Id. at 747*. Even though the class size is small as compared to **[*47]** other antitrust litigation, the district court observed that the "immediate and certain payment" to class members weighed in favor of approving the fee. Id.

ii. The Second Gunter Factor: the Presence of Substantial Objections by Class Members to the Requested Fees

Succinctly, the district court found that "there are no objections by any class members to this settlement. This factor strongly supports approval of the requested fee." Id.

iii. The Third Gunter Factor: The Skill and Efficiency of Counsel

The district court found that this factor weighed in favor of granting the request for attorneys' fees, stating that counsel "have extensive experience in plaintiff-side class action, with particular expertise in delayed generic entry cases. Indeed, counsel for both sides were knowledgeable, tenacious, and highly skillful. . . . [T]he $150 million settlement award represents a substantial amount and clearly demonstrates the value of class counsel's efforts." Id.

iv. The Fourth Gunter Factor: the Complexity and Duration of Litigation

With regard to this factor, the district court noted that the action "involve[d] highly complex antitrust issues, FDA bioequivalence standards for suspension nasal **[*48]** spray products, pharmaceutical manufacturing and supply issues, and pharmaceutical regulatory issues, all of which were investigated and litigated for more than four years." *Id. at 743*. Furthermore, the parties settled after performing significant trial preparation, including "litigating *Daubert* challenges, identifying hundreds of trial exhibits, and briefing over a dozen motions in limine between them." Id.

v. The Fifth Gunter Factor: the Risk of Non-Payment

The district court considered the risk of non-payment here "not negligible," as "success in this litigation was in no way guaranteed." *Id. at 747-48*. In addition, it was not enough to say that the plaintiff-class would likely have succeeded on the merits at establishing liability, as "there [was] no guarantee they would have recovered damages." *Id. at 748*. Of course, since most plaintiff-side counsel in class actions work on a contingency-basis, there was a risk of nonpayment in the event that the class was unsuccessful at trial. Id. All of these reasons supported granting the fee request.

vi. The Sixth Gunter Factor: the Time Devoted by Counsel to the Case

According to the declaration of class counsel, more than 40,000 hours was spent in total on the litigation **[*49]** in this case. Id. The district court noted that "[t]he record of this litigation also indicated that the time spent by Plaintiffs' counsel was necessary for the successful prosecution of this case, considering the complexity of the issues and the robust defense mounted by the defendants." Id. The district court found this factor to weigh in favor of granting the fee request.

vii. The Seventh Gunter Factor: Awards in Similar Cases

The district court noted that, at the time of the opinion in 2013, "in the last two-and-a-half years, courts in eight direct-purchaser antitrust actions approved one-third fees." Id. The district court looked more to the subject matter of the underlying litigation when comparing class action settlements than to the size.

viii. The First Prudential Factor: the Value of Benefits Attributable to the Efforts of Class Relative to the Efforts of Other Groups

In this case, there was no government investigation on which class counsel could rely to aid in its litigation efforts. *Id. at 748-49*. This factor weighed strongly in favor of granting the fee request.

ix. The Second Prudential Factor: the Percentage that Would Have Been Negotiated

While other district court opinions have cited **[*50]** to empirical data on the average contingency fee set between parties, the district court here chose to "not give great weight to this hypothetical exercise," thus leaving the factor neutral. *Id. at 749* (quoting *Prudential, 148 F.3d at 340*) (internal quotation marks omitted).

x. The Third Prudential Factor: Innovative Terms of Settlement

The district court also found this factor to be neutral, as the settlement agreement was fairly standard. Id.

xi. Lodestar Cross-Check

The lodestar value, based on nearly 41,000 hours and rates between $120 and $795, was calculated to be $16,750,000 at an average of $407 per hour. *Id. at 750*. The lodestar multiplier was determined to be 2.99, which the district court found to be "generally within the acceptable range." *Id. at 751*.

d. The District Court's Grant of Litigation Costs

With litigation costs reported at $2,069,433, the district court found that the expenses, which were primarily attributable to the payment of experts and document management, to be reasonable. *Id. at 750*.

e. The District Court's Grant of Incentive Awards

Interestingly, the district court adjusted the value of the incentive awards downward from what was requested. While counsel requested $85,000 and $75,000 awards for two of the class representatives, **[*51]** the district court lowered the values to $50,000 and $40,000, respectively. *Id. at 751*. The district court provided a rather cursory reason for the downward adjustment, stating "[t]hough incentive awards are appropriate in this case, the requested amounts are too large." Id. The district court went on to state that "an incentive award of $50,000 and $40,000 is within the range of payments awarded by courts within the Third Circuit in other direct purchaser antitrust litigation." *Id. at 752*.

C. Summary of Conclusions

Considering the outstanding conduct of Plaintiffs' counsel throughout this litigation, as reflected in the opinions cited above, and the Third Circuit precedents on award of attorneys' fees, the Court now turns to counsel's performance in this case and in the context of the factors in *Gunter* and the other cases cited above (not necessarily in order of importance).

1. Plaintiffs' counsel are experienced antitrust lawyers who have been working in this field of law for many years and have brought with them a sophisticated and highly professional approach to gathering persuasive evidence on the topic of price-fixing.

2. The briefs filed by Plaintiffs' counsel were consistently of high quality.

3. Plaintiffs' **[*52]** counsel were up against highly skilled defense counsel, who represented the Defendants in this case with vigor and substantive briefing to try to persuade this Court that Plaintiffs did not have a case, and should not be allowed to represent a class of direct purchasers. The Court considered the defense arguments carefully and

considerably, but generally sided with the Plaintiffs because of the outstanding work of Plaintiffs' counsel as presented in this petition for approval of fees.

4. There was no government case or investigation, on which Plaintiffs could build their own case. Few cases with no government action, or investigation, result in class settlements as large as this one.

5. The Plaintiffs' conduct in discovery, particularly the use of digital searching methods, yielded a number of incriminating documents, which together with deposition testimony and other evidence, persuaded the Court that Defendants' motions for summary judgments should be denied and that a class of direct purchasers should be certified.

6. The use of the conduit theory in pursuing third-party research/marketing firms in this industry was very innovative and important in gathering evidence.

7. The performance **[*53]** of Plaintiffs' counsel on the class action issues was imaginative, bringing forth great quantity of persuasive evidence that common issues predominated and that the Plaintiffs' case had merit.

8. These cases also attracted a number of very large homebuilders, who had filed their own Complaint in the Northern District of California, which was consolidated with these class actions. The Court believes that the Plaintiffs in those cases have benefitted greatly from the work done by the class plaintiffs who have filed this motion for attorneys' fee. The class attorneys are obviously not entitled to any compensation from the individual plaintiffs, but as a "reality check," the Court believes that the homebuilder plaintiffs have benefitted from the work of the class plaintiffs.

9. Number of persons benefitted — the Direct Purchasers of drywall constitute a very large class of both entities involved in distribution and resale of drywall such as major so-called "big box" retailers: Home Depot, Lowe's, e.g., and also Homebuilders (12 large homebuilders, as noted above, have their own litigation pending).

10. Skill and efficiency of the attorneys — although the Court has commented on this above, **[*54]** it bears repeating that the result attained is directly attributable to having highly skilled and experienced lawyers represent the class in these cases. The Court has had personal (and pleasant) experiences with many of the lawyers in this case, representing both Plaintiffs and Defendants, for many years, including during my extensive practice on antitrust litigation while in private practice, and is personally knowledgeable of the high degree of their competence.

11. Antitrust litigation is complex and challenging. This is particularly true for Plaintiffs' counsel in a case where there has been no government investigation.

12. Duration of the litigation — this case was filed in 2013 and although approximately years may seem like a long time for a case to be pending, it is not that long when compared to other antitrust cases brought as class actions.

13. Class action status — although much has been written of some abuses in the bringing of class actions, in the Court's view, the substantial results warrant a conclusion that in an antitrust price-fixing case, class actions have resulted in multi-billion dollars in damages, that have been paid out by defendants who were either convicted **[*55]** of price-fixing in criminal cases, found liable in civil cases, or as in this case, agreed to settle. Thus, as far as antitrust price-fixing cases are concerned, *Rule 23* has been not only generous to the attorneys who bring these cases, but much more so to individuals who have paid higher prices for various goods, over many decades, and would not have collected anything but for the efforts of plaintiffs' class action counsel.

14. Innovative Terms in the Settlement Agreement — the Court is not aware of any innovative terms in this settlement agreement. However, class counsel have had extensive experience in other class settlements in antitrust cases and bring that experience to this case. Also, the Court is assured that the settlement process will be moving forward, including the distribution of the settlement funds to class members, will be handled efficiently and expertly.

15. The Amount of Costs — although the expenses involved are considerable, the costs involved in securing the facts, largely through detailed electronic discovery strategies, which inherently involve consultants and expertise, and through the experts retained on both the class action and liability aspects of the case. In **[*56]** addition, the Court finds that the expenses that will be incurred in the distribution of the funds are reasonable and that class counsel will be using firms with expertise in this area and will supervise them carefully.

Although the above discussion covers most of the Gunter issues, the Court will review them for sake of completeness:

1. The size of the fund created and the number of the class are both large and reflect outstanding work by counsel.

2. There are no objections to this settlement. The only opt-outs are the homebuilders who have filed their own separate case which is still pending on pretrial matters in this Court but will be remanded to the Northern District of California after the completion of pretrial proceedings.

3. As noted above extensively, the class counsel exhibited skill and efficiency at all times.

4. This case is obviously a complex price-fixing case which had large volumes of discovery and legal briefing on many issues.

5. The risk of non-payment is unknown but quite possible that some of the Defendants who were adversely affected by the recent recession may have been at risk of filing for bankruptcy.

6. Although Plaintiffs' counsel spent many hours working on this **[*57]** case, the Court finds that the amount of time was warranted and if Plaintiffs' counsel had not worked as many hours as they did, this case may have resulted in summary judgment being granted for all Defendants, or Plaintiffs being unable to proceed to trial.

7. Awards in similar cases support the award in this case. A cross-check of the percentage awarded with the multiplier, based on total hours multiplied by hourly rates, shows the total fee requested and awarded is not excessive.

8. Under many precedents, the general rubric in this geographical area is that a 1/3 attorneys' fee is often the standard in contingent fee cases in "routine" personal injury and product liability cases, plus reimbursement to counsel for expenses.

CONCLUSION

As the above discussion shows, very few precedents have awarded this percentage amount in antitrust and securities cases. The Court finds the total hours claimed is accurate and reasonable. The lodestar $38,058,631.50 is also reasonable because the rates claimed are well within the range of rates charged by counsel in this district in complex cases. The Court finds the hours and rates to have been presented in an accurate and credible manner.

The Court follows **[*58]** Judge Brody's decision in *In re Flonase Antitrust Litig., 951 F. Supp. 2d 739 (E.D. Pa. 2013)*, which has many similar features to this case.

In considering all of the factors above, the Court has decided to award the requested one-third of the $190,059,056 Combined Settlement Fund as attorneys' fees, in the amount of $63,353,019. A significant factor in awarding the full one-third requested is the delay in payment. Class counsel have labored for approximately six years, including pre-suit investigation, without any payment.

Class counsel will also be awarded expenses in the amount of $2,925,629, and the funds in the opt-out fee and expense account of $610,236. The Court will award incentive awards to the four named Plaintiffs in the amount of $50,000 each as in line with other cases. The Court will not award accrued interest.

A cross-check with the lodestar confirms that this award of attorneys' fees is reasonable. Dividing the net amount of attorneys' fees, $63,353,019, by the lodestar, $38,058,631.50, yields a lodestar multiplier of 1.66, which is reasonable and lower than in some of the cases described above.

Applying a reasonable multiplier of the lodestar, for judicial factors such as contingency, delay and payment risk, etc., the Court finds there **[*59]** is a reasonable correlation between an award of fees of one-third of the Combined Settlement Fund plus costs.

BY THE COURT:

/s/ Michael M. Baylson

MICHAEL M. BAYLSON

United States District Court Judge

ORDER GRANTING DIRECT PURCHASER PLAINTIFFS' MOTION FOR (1) AN AWARD OF ATTORNEYS' FEES, (2) REIMBURSEMENT OF LITIGATION EXPENSES, AND (3) SERVICE AWARDS FOR THE CLASS REPRESENTATIVES

WHEREAS, the Court has granted final approval to Direct Purchaser Plaintiffs' settlements with the following: USG Corporation, United States Gypsum Company and L&W Supply Corporation (collectively, "USG"), dated February 11, 2015; TIN Inc. ("TIN"), dated February 11, 2015; Lafarge North America Inc. ("Lafarge"), dated June 16, 2016; and American Gypsum Company LLC, Eagle Materials Inc., New NGS, Inc., and PABCO Building Products, LLC dated December 29, 2017 (collectively, the "Combined Settlements");

WHEREAS, Direct Purchaser Plaintiffs filed a Motion for (1) An Award of Attorneys' Fees; (2) Reimbursement of Litigation Expenses; and (3) Service Awards for the Class Representatives (the "Motion"),

IT IS HEREBY ORDERED:

1. The Motion is GRANTED.

2. Terms used in this Order that are defined in the Motion are, unless otherwise **[*60]** defined herein, used in this Order as defined in the Motion.

3. The Court finds that the Notice provided to the four settlement classes of Co-Lead Class Counsel's request for an award of attorneys' fees, reimbursement of litigation expenses, and service awards for the Class Representatives meets the requirements of *Rule 23 of the Federal Rules of Civil Procedure* and due process, was the best notice practicable under the circumstances, and constitutes due and sufficient notice to all persons entitled thereto.

4. Direct Purchaser Plaintiffs' Counsel ("Class Counsel") are hereby awarded 33.33% of the Combined Settlement Fund, which amount currently equals $63,353.019.00.

5. Class Counsel are also hereby awarded the funds that have been or will be deposited in the Opt-Out Fee and Expense Accounts created by the Settlement Agreements, which currently equals $610,236.00.

6. Class Counsel are hereby awarded litigation expenses in the amount of $2,925,629.00 to be paid from the Combined Settlement Fund.

7. The awards of attorney fees and expenses shall be allocated among Class Counsel by Co-Lead Class Counsel, Berger & Montague, P.C., Cohen Milstein Sellers & Toll PLLC and Spector Roseman & Kodroff, P.C. in a manner that, in Co-Lead Class Counsel's **[*61]** good-faith judgment, reflects Class Counsel's contributions of time and money to the institution, prosecution and resolution of the litigation.

8. At the request and suggestion of Co-Lead Class Counsel, each of the four named plaintiffs, Sierra Drywall Systems, Inc., Janicki Drywall, Inc., New Deal Lumber & Millwork Co., and Grubb Lumber Co., Inc., is awarded a service award in the amount of $50,000.00, in addition to any distributions as part of the Combined Settlement Fund to which it may be entitled, to compensate it for the time and efforts in leading this case for the benefit of all Direct Purchaser Plaintiff Class Members.

SO ORDERED.

Dated: July 17, 2018

Judges: LAURIE J. MICHELSON, UNITED STATES DISTRICT JUDGE. Magistrate Judge R. Steven Whalen.

Opinion by: LAURIE J. MICHELSON

Opinion

OPINION AND ORDER GRANTING IN PART AND DENYING IN PART DEFENDANTS' MOTIONS TO DISMISS [24, 33]

ABG Prime Group sells beauty products on Amazon. This included LOMA hair-care essentials. But once LOMA and its founder, David Hanen, discovered LOMA's products on ABG's virtual shelves, ABG says LOMA and Hanen worked to force ABG off Amazon.com's marketplace.

According to ABG, LOMA and Hanen wished to maintain control over Amazon.com's beauty-product market. So they reached out to one of ABG's online competitors, **[*2]** All Alliance. LOMA and Hanen gave All Alliance the opportunity to be the exclusive LOMA retailer on Amazon. ABG says, in exchange, LOMA and Hanen required All Alliance to target ABG's store. To get Amazon to suspend ABG's store, All Alliance (along with LOMA and Hanen) fraudulently complained to Amazon that ABG was stealing LOMA's intellectual property. And, as intended, All Alliance's complaints, when coupled with LOMA's, led the retail giant to temporarily close ABG's store.

In turn, ABG sued LOMA, seeking a declaratory judgment that ABG did not infringe upon LOMA's trademark rights. LOMA counter-sued, alleging trademark infringement. ABG then amended its complaint to add All Alliance and claims of antitrust conspiracy, business tort, and fraud.

Now LOMA and Hanen move to dismiss ABG's antitrust conspiracy and fraud claims. For the reasons set forth below, the Court will grant, in part, and deny, in part, the motions to dismiss.

I.

LOMA and Hanen move to dismiss parts of ABG's amended complaint. So the following well-pled factual allegations from that complaint are accepted as true. *See* *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*.

Gary and Adam Greenberg along with Bryan Acrich incorporated ABG Prime to sell products on Amazon. **[*3]** (R. 13, PageID.148.) Amazon's platform permits third parties—like ABG Prime—to open the digital equivalent of a brick-and-mortar shop. (*Id.* at PageID.149.) ABG's store, hosted on Amazon.com, relies on Amazon's market share and fulfilment capabilities to generate an average of $10,000 in daily revenue. (*Id.* at PageID.149-150.) Among the products on its virtual shelves, ABG stocks LOMA hair-care essentials. (*Id.* at PageID.153.) ABG purchases LOMA shampoos, conditioners, and other hair-care products from a distributor only to turn around and resell the identical, unopened, and authentic product through its Amazon store. (*Id.* at Page.ID.153.)

In March 2017, LOMA complained to Amazon about ABG's store. According to LOMA's complaint, ABG's sale of LOMA products infringed on LOMA's trademark rights. (*Id.* at PageID.153.) Upon receiving the complaint, Amazon temporarily closed ABG's store, just as LOMA intended. (*Id.* at PageID.153, 156.) But Amazon's policy requires a complainant to complete a "test buy"—a controlled purchase of the allegedly infringing product to determine its authenticity—prior to claiming trademark infringement. (*Id.* at PageID.154.) LOMA had not completed a test buy prior **[*4]** to complaining, so LOMA withdrew the complaint and Amazon permitted ABG to reopen. (*Id.* at PageID.154.)

Once reopened, ABG continued to sell LOMA hair-care products. And in the months after LOMA withdrew its first complaint, LOMA completed two test buys. (*Id.* at PageID.154-155.) And doing so, LOMA confirmed the products' authenticity to ABG's lawyer. *Id.* Yet LOMA again complained to Amazon, but instead of asserting trademark infringement specifically, it more generally asserted that ABG was stealing its intellectual property. (*Id.* at PageID.155.) Amazon again temporarily closed ABG's store, but, this time, permanently barred ABG from selling LOMA products. *Id.*

Sometime after its second suspension, ABG came to believe that a Florida entity, All Alliance Products, was the only third-party storefront selling authentic LOMA goods on Amazon.[1] (*Id.* at PageID.151.) Because All Alliance was the only retailer, ABG suspected that All Alliance and LOMA entered into an exclusive arrangement, (R. 13, PID 152, 157), designed to remove competitors from Amazon (R. 13, PageID.157). Specifically, ABG thinks the arrangement was intended to target and remove ABG. (*Id.* at Page.ID.165.) According to ABG, All **[*5]** Alliance polices the digital marketplace for third-party retailers of LOMA products. (*Id.* at PageID.164.) Upon discovering a third-party retailer, either LOMA or All Alliance file complaints with Amazon. (*Id.* at PageID.165.) Complaining to Amazon results in the third-party retailer temporarily losing its selling privileges. (*Id.* at PageID.166.)

ABG unearthed this conspiracy after Amazon forwarded LOMA's first complaint to ABG. The complaint appeared to be written by Cimos Angelis, LOMA's lawyer. (*Id.* at PageID.153.) But somehow ABG discovered that Demosthenes

---

[1] Yet the exhibits ABG attaches to its complaint contradict this assertion. ABG includes screenshots of multiple Amazon retailers selling LOMA products. (*See* R. 13-3, 13-4.)

Prodromitis actually wrote it. (R. 13, PageID.153.) ABG learned that Prodromitis has some connection to All Alliance, (R. 13, PageID.146), and Angelis and Demosthenes Prodromitis have been friends since high school. (R. 13, PageID.152.) So ABG insists that only a conspiracy accounts for the relationship between All Alliance, Prodromitis, Angelis, LOMA, and Hanen. (R. 13, PageID.164.)

Also, ABG alleges LOMA's complaints to Amazon were fraudulent. (R. 13, PageID.165.) The first complaint said ABG's sales infringed on LOMA's trademark rights, but LOMA had yet to complete a test buy, so LOMA had no basis to make such a complaint. **[*6]** (R. 13, PageID.166.) And as LOMA's test buys confirmed ABG sold authentic LOMA products, the second complaint, claiming theft of LOMA's intellectual property, was equally fraudulent. (R. 123, PageID.156.) In ABG's view, LOMA had no factual basis to complain, knew Amazon would forward the complaints to ABG, intended ABG to stop selling LOMA products upon receiving the complaint, and knew Amazon would or could suspend ABG's entire store, resulting in revenue loss to ABG. (R. 13, PageID.156-57, 165.)

Accordingly, ABG amended its complaint to add new allegations and at least four (it is not clear) new counts. Chiefly, ABG adds two antitrust conspiracy claims—one federal and a parallel state one—along with a fraud claim. LOMA and its founder now move to dismiss those claims.

II.

A motion to dismiss allows Hanen and LOMA to test the legal sufficiency of ABG's amended complaint. *See* *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. To pass muster at this stage, ABG must plead a set of facts that state a plausible claim for legal relief. *See* *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. A plausible claim means the complaint contains enough facts for the court to infer that LOMA and Hanen are liable for the alleged misconduct. *See* *Iqbal, 556 U.S. at 678*. Finally, the procedural workings of a motion to dismiss **[*7]** require the Court to cull from the complaint any conclusory statements or rote repetition of claim elements, accept as true all well-pleaded factual content, and make all reasonable inferences in ABG's favor. *Iqbal, 556 U.S. at 678*; *see also* *NicSand, Inc. v. 3M Co., 507 F.3d 442, 449 (6th Cir. 2007)*.

III.

A.

ABG says LOMA and Hanen violated *§ 1* of the Sherman Act. (R. 13, PageID.164.) Specifically, ABG says LOMA and its founder conspired with All Alliance and Prodromitis to create an exclusive dealing arrangement on Amazon.com. (R. 13, PageID.164-66.) The conspiracy had an anti-competitive effect: "forcing out" ABG as an All Alliance competitor. (R. 13, PageID.166.) Specifically, ABG cannot sell LOMA products on Amazon. (*Id.*) So ABG claims it suffered an "antitrust injury that *Section 1* of the Sherman Act is designed to prevent." (R. 13, PageID.166.)

In response, LOMA and its founder say ABG failed to plead any of the necessary elements of an antitrust claim. (R. 24, PageID.235-241.) They also say that ABG has not pled antitrust standing because it merely alleges an injury to itself—a competitor (*Id.* at PageID.241.)

Antitrust standing requires a more searching analysis than the injury, causation, and redressability test for Article III standing.[2] *See* *NicSand, Inc. v. 3M, Co., 507 F.3d 442, 459 (6th Cir. 2007)*. **[*8]** Antitrust standing necessitates ABG plead antitrust injury. *Id.* Because ABG cannot plead antitrust injury, the Court will start—and end—there.

[2] ABG has standing in the traditional sense. *See* *Lujan v. Defenders of Wildlife, 504 U.S. 555, 560-61, 112 S. Ct. 2130, 119 L. Ed. 2d 351 (1992)*. ABG was injured when Amazon twice shuttered its store; LOMA and Hanen ostensibly caused the injury by complaining to Amazon; and ABG's plea for monetary damages would redress the lost profits flowing from the injury.

1.

Antitrust injury can fall within one of four categories. *See, e.g., Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 488-89, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)* (reasoning that antitrust injury is "of the type the antitrust laws were designed to prevent"; or an injury "that flows from that which makes the defendants' acts unlawful"; or an injury "reflect[ing] the anticompetitive effect either of the violation or of anticompetitive effects made possible by the violation"; or, finally, an injury that "the type of loss that the claimed violations . . . would be likely to cause."); *see also* Ronald W. Davis, *Standing on Shaky Ground: The Strangely Elusive Doctrine of Antitrust Injury*, 70 Antitrust L.J. 697, 747-48 (2003). The Sixth Circuit homes in on two categories: "[p]laintiffs must prove *antitrust* injury, which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes the defendants' acts unlawful." *Indeck Energy Servs. v. Consumers Energy Co., 250 F.3d 972, 975 (6th Cir. 2000)* (internal quotations omitted); *NicSand, 507 F.3d at 450-51*; *see also Cargill, Inc. v. Monfort of Colo., Inc., 479 U.S. 104 109-10, 107 S. Ct. 484, 93 L. Ed. 2d 427*; *Brunswick, 429 U.S. at 488*; *Greater Rockford Energy & Technology Corp. v. Shell Oil Co., 998 F.2d 391, 395 (7th Cir. 1993)*.

Antitrust injury requires ABG allege an injury to competition "market-wide." *See E & L Consulting, Ltd. v. Doman Indus., 472 F.3d 23, 28 n.3 (2d Cir. 2006)*; *see also NicSand, 507 F.3d at 450-51*. And within the framework of ***antitrust law***, a "market-wide" injury **[*9]** to competition is one that somehow threatens the relevant market's efficiency. *See* 1 Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** § 100 (4th ed. 2013); Herbert Hovenkamp, Economics and Federal ***Antitrust Law*** § 14.5 (1985). Normally, threats to market efficiency amount to threats to continued low prices—"the primary goal of antitrust policy." Herbert Hovenkamp, Federal Antitrust Policy § 8.1 (4th ed. 2011); *see also Atl. Richfield Co. v. USA Petrol. Co., 495 U.S. 328, 340, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)*; *Energy Conversion Devices Liquidation Trust, 833 F.3d at 689-91*. And the paradigmatic examples of threats to low prices are a predatory pricing scheme, *see Energy Conversion Devices Liquidation Trust, 833 F.3d at 689-90*, a recoupment scheme, *id. at 690-91*, or a price-fixing scheme, *see Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 767-69, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)*, any of which would suffice to show antitrust injury under *§ 1* of the Sherman Act. *See generally Energy Conversion Devices Liquidation Trust, 833 F.3d at 685-90*.

But the essence of ABG's complaint is injury to ABG. The closest thing to an antitrust injury in ABG's complaint is the alleged exclusive arrangement. Yet the exhibits ABG attaches to the amended complaint contradict any assertion that All Alliance is the exclusive LOMA retailer on Amazon. ABG attaches screenshots of numerous Amazon.com stores selling LOMA products. *See* (R.13-3; 13-4.) So there is no reason to accept as true ABG's allegation of an exclusive arrangement. *See Williams v. CitiMortgage, Inc., 498 F. App'x 532, 536 (6th Cir. 2012)* (internal quotations omitted); *Van Loo v. Cajun Operating Co., 64 F. Supp. 3d 1007, 1020 n.3 (E.D. Mich. 2014)*. Even so, other circuits hold that **[*10]** exclusive arrangements between manufacturer and distributor do not, on their own, run afoul of the Sherman Act. *See, e.g., CDC Techs., Inc. v. IDEXX Lab., Inc., 186 F.3d 74, 80 (2d Cir. 1999)*. Exclusive arrangements may even benefit competition. *See Roland Machinery Co. v. Dresser Industries, Inc., 749 F.2d 380, 395 (7th Cir. 1984)* (Posner, J.).

Instead of emphasizing threats to competition, ABG emphasizes its own losses, alleging antitrust injury due to the conspiracy's "anti-competitive effect on ABG." (R. 13, PageID.166.) ABG says it cannot sell LOMA products on Amazon, (R. 13, PageID.166), and the temporary suspensions cost it some money (R. 13, PageID.174). But an aggrieved competitor seeking shelter under the antitrust laws must do more than allege an injury to itself. *See Indeck, 250 F.3d at 976*. Indeed, ABG's allegations are blind to the central thrust of the antitrust laws: "the protection of *competition* not *competitors*." *Brunswick, 429 U.S. at 488*; *see also Cargill, 479 U.S. at 109-10*; *NicSand, 507 F.3d at 450*; *Indeck., 250 F.3d at 976*. As ABG does not plead facts sufficient to show a market-wide injury to competition, ABG's injuries are not antitrust injuries. *See Capital Imaging Assocs., P.C. v. Mohawk Valley Med. Assocs., Inc., 996 F.2d 537, 543 (2d Cir. 1993)* (emphasizing the importance of antitrust injury lest "routine disputes between business competitors . . . be elevated to the status of an antitrust action, thereby trivializing the Act because of its too ready availability.").

2.

The only remaining issue is whether ABG could amend its **[*11]** (amended) complaint to plead antitrust injury. ABG claims it "is prepared to further develop its allegations and would request leave of Court do so." (R. 31, PageID.335.) But ABG never explains how it plans to "do so," and the Court has its doubts. At oral argument, ABG insisted the antitrust injury was grounded in ABG's expulsion from Amazon.com, which, again, is an injury to a solitary competitor (in a solitary distribution channel) that does not amount to antitrust injury. ABG also defines the relevant geographic market as the global reach of Amazon.com (R. 13, PageID.149, 164), and the relevant product market as beauty products (*Id.* at PageID.145, 148, 162). So the Court doubts ABG can plausibly plead, on a good faith basis, a set of facts establishing an injury to competition on Amazon.com's beauty-products market stemming from an exclusive-dealing arrangement between LOMA and All Alliance.[3]

As amendment would be futile, the Court DISMISSES, with prejudice, ABG's antitrust conspiracy claims.

B.

That leaves ABG's fraud claim. In Michigan, fraud has six elements: a defendant must make a material misrepresentation; the misrepresentation must be false; the defendant must make the **[*12]** misrepresentation knowing it to be false; the defendant must have intended the plaintiff to act on the misrepresentation; the plaintiff must act in reasonable reliance on the misrepresentation; and as a result suffer some injury. *See* *SFS Check, LLC v. First Bank of Del., 774 F.3d 351, 358 (6th Cir. 2014)* (citing *Titan Ins. Co. v. Hyten, 491 Mich. 547, 817 N.W.2d 562, 567-68 (Mich. 2012))*.

Hanen and LOMA say ABG's complaint fails to properly plead any of the elements, especially considering the heightened particularity requirement of *Rule 9(b)*. (R. 24, PageID.243, 244-254.) Crucially, Hanen and LOMA insist ABG cannot allege a material misrepresentation because the alleged misrepresentations were all made to Amazon, a third party. (R. 24, PageID.244.) LOMA and Hanen contend the remaining pleading deficiencies all flow from that fatal flaw. (*See, e.g.*, R. 24, PageID.246 ("ABG has not pled reasonable reliance upon any of the Defendants' representations, since no representations were made to ABG by any of the defendants.").)

The Court does not agree with Hanen and LOMA. At least in the context of a business dispute involving monetary damages, ABG can maintain a fraud claim even though the alleged misrepresentation was made to a third party. *See* *Nernberg v. Pearce, 35 F.3d 247, 251 (6th Cir. 1994)* ("[A] plaintiff may maintain an action for fraud even when a misrepresentation has . . . been made **[*13]** to a third party with the intent and expectation that the misrepresentation would be repeated to induce reliance by a principle participant to a business undertaking. . . ."); *Cormack v. American Underwriters Corp., 94 Mich. App. 379, 288 N.W.2d 634, 637 (Mich. Ct. App. 1979)* ("[W]here a party makes false representations to another with the intent or knowledge that they be . . . repeated to a third party for the purpose of deceiving him, that third party can maintain a tort action against the party making the false statements"); *see also* *Restatement (Second) of Torts § 533* (1977) ("The maker of a fraudulent misrepresentation is subject to liability for pecuniary loss to another who acts in justifiable reliance upon it if the misrepresentation . . . is made to a third person and the maker intends or has reason to expect that its terms will be repeated . . . to the other, and that it will influence his conduct in the transaction . . . involved.").[4]

---

[3] On the same facts, ABG's amended complaint alleges a violation of the Michigan Antitrust Reform Act. (R. 13, PageID.167.) As Michigan's ***antitrust law*** runs parallel to the Sherman Act, ABG's failure to plead antitrust injury applies to the state claim as well. *See* *Manitou N. Am. v. McCormick Int'l, No. 324063, 2016 Mich. App. LEXIS 198, at *14-17 (Mich. Ct. App. Feb. 2, 2016)*.

[4] Though the parties do not cite it, the Court is aware that a later Michigan Court of Appeals decision appears to suggest otherwise. *See* *International Bhd. of Elec. Workers, Local Union No. 58 v. McNulty, 214 Mich. App. 437, 543 N.W.2d 25, 30 (Mich. Ct. App. 1995)* ("An allegation of fraud based on misrepresentations made to a third party does not constitute a valid fraud claim."). Read in context, however, *McNulty* involves a fraud claim lacking an allegation of reliance. *See* *McNulty, 543 N.W.2d at*

At this stage at least, ABG pleads the elements of fraud with the requisite particularity. ABG claims Hanen and LOMA filed a false complaint with Amazon regarding LOMA's intellectual property rights. (R. 13, PageID.171.) LOMA and Hanen knew the complaint was false because when they filed it they knew ABG was selling authentic LOMA products. (R. 13, PageID.171, **[*14]** 156.) LOMA and Hanen knew Amazon would relay the complaints to ABG (R. 13, PageID.153), and knew Amazon would likely suspend ABG's selling privileges (R. 13, PageID.156, 159). Plus, LOMA and Hanen intended ABG to act in reliance on the complaint by removing LOMA products from its electronic shelves, which it did. (R. 13, PageID.172.) All of the above injured ABG to the tune of lost revenue following Amazon selling suspensions, and the permanent loss of the ability to sell LOMA products. (R. 13, PageID.163, 172, 174.) So ABG's fraud claim survives a motion to dismiss.

IV.

In summary, the Court GRANTS IN PART and DENIES IN PART Hanen's and LOMA's motions to dismiss. (R. 24, 33.) Because ABG cannot plead antitrust injury, ABG's antitrust conspiracy claims fail as a matter of law. Yet ABG has stated a claim for fraud and narrated a set of facts with sufficient particularity to satisfy *Rule 9(b)*'s more robust pleading requirement.

Dated: July 19, 2018

30 ("The union has not claimed that it acted in reliance on defendants' allegedly false statements."). So whatever *McNulty* may say about fraud claims based on statements made to third-parties, the case is distinguishable from this one. ABG alleges it relied on LOMA's statements to Amazon.

Anderson News, L.L.C. v. Am. Media, Inc.

United States Court of Appeals for the Second Circuit

December 2, 2016, Argued; July 19, 2018, Decided

Docket Nos. 15-2714-cv(L), 15-2889-cv(XAP), 15-2894-cv(XAP), 15-2903-cv(XAP)

Reporter
899 F.3d 87 *; 2018 U.S. App. LEXIS 21735 **; 2018-2 Trade Cas. (CCH) P80,461; 2018 Media L. Rep. 50

ANDERSON NEWS, L.L.C., Plaintiff—Counter-Defendant—Appellant—Cross-Appellee, LLOYD T. WHITAKER, as the Assignee under an Assignment for the Benefit of Creditors for Anderson Services, L.L.C., Plaintiff—Appellant, —v.— AMERICAN MEDIA, INC., TIME INC., HEARST COMMUNICATIONS, INC., Defendants—Counter-Claimants—Appellees—Cross-Appellants, BAUER PUBLISHING CO., LP., CURTIS CIRCULATION COMPANY, DISTRIBUTION SERVICES, INC., HACHETTE FILIPACCHI MEDIA, U.S., INC., KABLE DISTRIBUTION SERVICES, INC., RODALE, INC., TIME WARNER RETAIL SALES & MARKETING, INC., Defendants—Appellees, HUDSON NEWS DISTRIBUTORS LLC, THE NEWS GROUP, LP, Defendants, —v.— CHARLES ANDERSON, JR., Counter-Defendant—Cross-Appellee.

Subsequent History: US Supreme Court certiorari denied by *Anderson News, L.L.C. v. Am. Media, Inc., 2019 U.S. LEXIS 2266 (U.S., Mar. 25, 2019)*

Prior History: Plaintiffs-appellants Anderson News, L.L.C., and Anderson Services, L.L.C., (together, "Anderson") appeal from an award of summary judgment to defendants on Anderson's allegation that, in early 2009, defendants conspired to boycott Anderson and drive it out of business, in violation of *section 1 of the Sherman Act, 15 U.S.C. § 1* **[**1]** . Anderson provided wholesaler services to the single-copy magazine industry: it was responsible for collecting single-copy magazines from publishers, delivering those magazines to retailers, accounting for the number of magazines sold, and recycling unsold magazines. In mid-January 2009, Anderson proposed charging publishers a delivery surcharge of $0.07 per magazine shipped, and called for publishers' agreement to the surcharge before February 2009 "to ensure future distribution." Defendants-appellees, a group of publishers and their distributors (which provide marketing and logistics services to the publishers), refused to pay the proposed surcharge and found wholesalers other than Anderson to deliver their magazines. Anderson sued the publishers and distributors, alleging a conspiracy in violation of antitrust laws to boycott Anderson and making various related state law claims. **[**2]** Some defendants counterclaimed, alleging that Anderson's proposed surcharge was itself the result of an unlawful conspiracy to raise prices.

The District Court granted summary judgment to defendants on Anderson's antitrust and state law claims, and to Anderson on the counterclaims. Reviewing the evidence in light of the totality of the circumstances and under the Matsushita "tends to exclude" standard, *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 588, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*, we conclude that the District Court correctly ruled that Anderson has failed to offer sufficient evidence from which a reasonable jury could infer that defendants entered into such an unlawful agreement. We further conclude that the District Court correctly ruled that defendants did not suffer an antitrust injury and therefore lacked antitrust standing to pursue the stated counterclaims.

Anderson News, L.L.C. v. Am. Media, Inc., 123 F. Supp. 3d 478, 2015 U.S. Dist. LEXIS 110363 (S.D.N.Y., Aug. 20, 2015)
Anderson News, L.L.C. v. Am. Media, Inc., 2015 U.S. Dist. LEXIS 110358 (S.D.N.Y., Aug. 20, 2015)

Disposition: AFFIRMED.

Civil Procedure > Appeals > Standards of Review > De Novo Review

Civil Procedure > ... > Summary Judgment > Appellate Review > Standards of Review

HN1[] **Standards of Review, De Novo Review**

The United States Court of Appeals for the Second Circuit reviews the district court's grants of summary judgment de novo, and will affirm only if, after construing the evidence in the light most favorable to the non-moving party and drawing all reasonable inference in its favor, there is no genuine dispute as to any material fact and the movant is entitled to judgment as a matter of law.

Antitrust & Trade Law > Sherman Act > Claims

Evidence > Burdens of Proof > Allocation

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > Sherman Act

HN2[] **Sherman Act, Claims**

Section 1 of the Sherman Act, *15 U.S.C.S. § 1*, provides: Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce is illegal. To prove a *Section 1* claim, a plaintiff must present evidence of a combination or some form of concerted action between at least two legally distinct economic entities in the form of "a conscious commitment to a common scheme designed to achieve an unlawful objective. Once it has sufficiently demonstrated the existence of an agreement, the plaintiff must then establish that the agreement's objective was an unreasonable restraint of trade either per se or under the rule of reason. Only after an agreement is established will a court consider whether the agreement constituted an unreasonable restraint of trade.

Antitrust & Trade Law > Procedural Matters

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

HN3[] Antitrust & Trade Law, Procedural Matters

In the field of ***antitrust law***, summary judgment serves a vital function—it avoids wasteful trials and prevents lengthy litigation that may have a chilling effect on pro-competitive market forces. Summary judgment is not a substitute for a trial, and so if the evidence admits of competing permissible inferences with regard to whether a plaintiff is entitled to relief, summary judgment should be denied. Although the United States Court of Appeals for the Second Circuit reviews the evidence of an alleged conspiracy in the light most favorable to the non-moving party, ***antitrust law*** limits the range of permissible inferences from ambiguous evidence. To permit an inference of conspiracy based on ambiguous evidence—that is, evidence that is equally consistent with independent conduct as with illegal conspiracy--would deter or penalize perfectly legitimate and procompetitive conduct.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

Evidence > Types of Evidence > Circumstantial Evidence

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Nonmovant Persuasion & Proof

HN4[] Conspiracy to Monopolize, Elements

To raise a genuine issue of material fact as to an antitrust conspiracy, the plaintiff must present direct or circumstantial evidence that tends to exclude the possibility that the alleged conspirators acted independently. This does not mean that the plaintiff must disprove all nonconspiratorial explanations for the defendants' conduct; rather, the evidence need be sufficient only to allow a reasonable fact finder to infer that the conspiratorial explanation is more likely than not. Thus, if the evidence is in equipoise, then summary judgment must be granted against the plaintiff: The question is not whether the plaintiff's inferences are so far-fetched that a trier of fact should not be allowed to consider them, but whether the evidence, though not far-fetched, sufficed to meet the plaintiff's burden of proof.

Civil Procedure > Trials > Jury Trials > Province of Court & Jury

Evidence > Inferences & Presumptions > Inferences

Evidence > Weight & Sufficiency

HN5[] Jury Trials, Province of Court & Jury

Weight to be assigned to competing permissible inferences remains within the province of the fact-finder at a trial. But some assessing of the evidence is necessary in order to determine rationally what inferences are reasonable and therefore permissible.

Antitrust & Trade Law > Sherman Act > Claims

Evidence > Burdens of Proof > Allocation

Evidence > Inferences & Presumptions > Inferences

HN6[] **Sherman Act, Claims**

Carefully circumscribing the range of inferences permissible in the antitrust context is especially important where the challenged conduct—moving business away from a higher cost provider—often is the very essence of competition. Thus, mistaken inferences in such cases are especially costly, because they chill the very conduct the antitrust laws are designed to protect. Under these circumstances, a plaintiff must come forward with more persuasive evidence to support its claim than would otherwise be necessary. Such evidence must tend to exclude the possibility that the defendants acted independently.

Antitrust & Trade Law > Sherman Act

HN7[] **Antitrust & Trade Law, Sherman Act**

A business entity has a right to deal, or refuse to deal, with whomever it likes, as long as it does so independently.

Antitrust & Trade Law > Sherman Act > Claims

Evidence > Burdens of Proof > Allocation

Evidence > Types of Evidence > Circumstantial Evidence

HN8[] **Sherman Act, Claims**

Absent direct evidence of conspiracy, such as an admission by one of the defendants, antitrust plaintiffs must rely on circumstantial evidence to support their conspiracy claims. One powerful form of circumstantial evidence is parallel action—proof that defendants took identical actions within a time period suggestive of prearrangement. But parallel action is not, by itself, sufficient to prove the existence of a conspiracy; such behavior could be the result of coincidence, independent responses to common stimuli, or mere interdependence unaided by an advance understanding among the parties. Accordingly, when defendants' parallel behavior forms the basis for a *Sherman Act* claim, a plaintiff must show additional circumstances—so-called "plus factors"—which, when viewed in conjunction with the parallel conduct, would permit a fact finder to infer a conspiracy. These circumstances may include traditional evidence of conspiracy: statements permitting an inference that the defendants entered into an agreement. They may also include evidence of other circumstances giving rise to a less direct inference of conspiracy, such as a common motive to conspire, evidence that shows that the parallel acts were against the apparent individual economic self-interest of the alleged conspirators, and evidence of a high level of interfirm communications.

Antitrust & Trade Law > Sherman Act > Claims

HN9[] **Sherman Act, Claims**

In the context of a *Sherman Act* claim, defendants' conduct and communications must be evaluated in context and with the overall picture in mind.

Antitrust & Trade Law > Sherman Act > Defenses

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN10[] **Sherman Act, Defenses**

A weak motive to conspire does not save defendants who have clearly, though foolishly conspired. But as a practical matter a conspiracy's objective rationality or motive is a necessary condition for inferring conspiracy from the usual array of evidence, which is usually circumstantial. Also, motive to conspire tends to be negated [1] when a defendant shows that the alleged agreement would harm the alleged conspirators; or [2] when the defendant shows a plausible and justifiable reason for its conduct that is consistent with proper business practice.

Antitrust & Trade Law > Clayton Act > Claims

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

Antitrust & Trade Law > Clayton Act > Remedies > Damages

Antitrust & Trade Law > Clayton Act > Scope

HN11[] **Clayton Act, Claims**

Section 4 of the Clayton Act, *15 U.S.C.S. § 15*, provides a treble-damages remedy to any person injured in his business or property by reason of anything forbidden in the antitrust laws. Despite the statute's broad language and broad remedial purpose, the U.S. Supreme Court has explained that Congress did not intend the antitrust laws to provide for all injuries that might conceivably be traced to an antitrust violation. The law therefore limits recovery to plaintiffs who can demonstrate that they experienced an injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. A plaintiff suffers an antitrust injury only if it is adversely affected by an anticompetitive aspect of the defendant's conduct.

Judges: Before: LIVINGSTON, CHIN, and CARNEY, Circuit Judges.

Opinion by: SUSAN L. CARNEY

Opinion

[*90] SUSAN L. CARNEY, *Circuit Judge*:

Plaintiffs-appellants Anderson News, L.L.C., and Anderson Services, L.L.C., (together, "Anderson") appeal from an award of summary judgment to defendants on Anderson's allegation that, in early 2009, defendants conspired to boycott Anderson and drive it out of business, in violation of *section 1 of the Sherman Act, 15 U.S.C. § 1*. At the time, Anderson provided wholesaler services to the single-copy magazine industry, in which magazines are published and sold individually to consumers (in contrast to sales by subscription). As a wholesaler, Anderson was responsible for collecting single-copy magazines from publishers, delivering those magazines to retailers, accounting for the number of magazines sold, and recycling unsold magazines.

In an effort to decrease the financial burden imposed on it by publishers' practice of shipping many **[**5]** more magazines than are sold, in mid-January 2009 **[*91]** Anderson announced that it would begin charging publishers a delivery surcharge of $0.07 per magazine shipped, and called for agreement to the surcharge before February 2009 "to ensure future distribution." J.A. 1450.[1] Defendants-appellees, a group of publishers and their distributors (which provide marketing and logistics services to the publishers), refused to pay the proposed surcharge and found wholesalers other than Anderson to deliver their magazines. Anderson sued the publishers and distributors, alleging a conspiracy in violation of antitrust laws to boycott Anderson and making various related state law claims. Some defendants counterclaimed, alleging that Anderson's proposed surcharge was itself the result of an unlawful conspiracy to raise prices.

The District Court granted summary judgment to defendants on Anderson's antitrust and state law claims, and to Anderson on the counterclaims. Anderson now argues that the District Court ignored or too heavily discounted much of the evidence that Anderson presented in support of its claims, and maintains that it has offered sufficient evidence from which a jury could reasonably conclude **[**6]** that defendants entered into an unlawful agreement to refuse to deal with Anderson and to drive it out of business. Reviewing the evidence in light of the totality of the circumstances and under the *Matsushita* "tends to exclude" standard, *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 588, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*, we conclude that the District Court correctly ruled that Anderson has failed to offer sufficient evidence that defendants entered into the alleged unlawful agreement to survive defendants' motions for summary judgment. We further decide that the District Court was correct in ruling that defendants did not suffer an antitrust injury and thus lacked antitrust standing to pursue the stated counterclaims. We therefore AFFIRM the District Court's judgments. 8

BACKGROUND

I. Factual background

---

[1] Citations to "J.A." refer to the parties' Deferred Joint Appendix. Citations to "C.A." refer to the parties' Deferred Confidential Joint Appendix, which has been filed under seal.

The following statement of facts is drawn from the District Court's thorough recitation, supplemented by the parties' statements of undisputed fact under Federal Rule of Civil Procedure 56.1 and primary documents such as emails and other correspondence that are contained in the record. Although significant changes have doubtless since transpired, we describe relevant facts in this industry as they stood in 2008-2009, when the events in question occurred, as reflected by the record evidence.

In the United **[**7]** States, in 2009, publishers primarily sold magazines in two ways: by subscription and by single-copy purchase at a newsstand, supermarket, or another retailer. The single-copy magazine industry, which is our focus in this case, had long operated through four distinct levels of enterprise:

First, publishers created and produced magazines. Defendants Time Inc. ("Time"), American Media, Inc. ("AMI"), Bauer Publishing Co., LP. ("Bauer"), Rodale, Inc. ("Rodale"), and Hachette Filipacchi Media, U.S., Inc. ("Hachette") published a variety of magazines ranging from familiar titles like *People* and *Star* to more obscure titles like *Yikes*! and *Twist*. As of 2008, just before the events at issue here took place, sales of defendants' magazines constituted 42% of the U.S. single-copy market.

[*92] Second, distributors provided a variety of services, including marketing and billing services, to publishers. In 2008, four major distributors operated in the United States: defendants Time/Warner Retail Sales & Marketing, Inc. ("TWR"), Curtis Circulation Company ("Curtis"), Kable Distribution Services, Inc. ("Kable"), and non-defendant Comag. TWR represented only Time; Kable represented Bauer; Curtis represented **[**8]** Rodale, AMI, and Hachette; and defendant Distribution Services, Inc. ("DSI"), a wholly owned subsidiary of AMI, provided consulting and marketing services to AMI, Bauer, Rodale, and Hachette. Together, TWR, Curtis, and Kable served as national distributors for 75% of the single-copy magazine market in 2008.

Third, wholesalers served as middlemen between publishers and retailers. Wholesalers received magazines from publishers, delivered magazines to retailers, and set up in-store displays of those magazines for retailers. Once the magazines reached their "off-sale" date (that is, they were no longer current), wholesalers retrieved and disposed of the unsold magazines. In 2008, the U.S. market was occupied by four major wholesalers: Anderson News, Source Interlink Distribution, L.L.C. ("Source"), The News Group, LP ("TNG"), and Hudson News Distributors LLC ("Hudson"). As of late 2008, these wholesalers together distributed 93% of magazines in the single-copy market, and Anderson News served as wholesaler for approximately 30% of all single-copy magazines distributed in the United States.

As an ancillary matter, many wholesalers used logistics affiliates to coordinate the wholesalers' delivery **[**9]** and disposal services. Anderson Services was Anderson News's logistics affiliate. Many wholesalers also engaged delivery services to deliver magazines to retailers. Anderson Services and TNG's logistics affiliate shared ownership of two such services: ProLogix Distribution Services (East), LLC ("ProLogix East") and ProLogix Distribution Services (West), LLC ("ProLogix West").

At the fourth distinct level, retailers sold magazines to customers. During the relevant period, key retailers in the nation included Wal-Mart Stores, Inc. ("Wal-Mart") and The Kroger Co. ("Kroger"). To reduce their logistical costs, retailers generally demanded that all of their retail outlets be serviced by a single wholesaler.

Before the early 2000s, single-copy magazines moved through each level of the industry as follows: Publishers sold magazines to wholesalers at a certain discount from the cover price. Wholesalers in turn sold magazines to retailers at a slightly lower discount, and retailers sold to consumers at the cover price. Wholesalers collected unsold magazines and refunded retailers for them. Publishers then refunded wholesalers for unsold magazines. As the District Court recognized, even with a **[**10]** buy-back guarantee, publishers had an incentive to and therefore did sell wholesalers more magazines in the first instance than are likely to be bought, to prevent retailers from experiencing a shortfall and thereby missing out on potential sales. This overselling practice imposed a burden on wholesalers, which then had to retrieve and account for the unsold magazines.

In the early 2000s, retailers implemented a new accounting and payment method called scan-based trading. In this method, retailers obtain magazines from wholesalers on a consignment basis. They then track sales precisely by using bar codes, and they do not pay wholesalers for magazines until the magazines are actually sold to consumers. This eases the wholesalers' burden of tracking the numbers of unsold magazines at retail outlets. It also, however, forces wholesalers to bear related inventory costs—the cost of magazines sitting **[*93]** on the shelves—because wholesalers must purchase magazines from publishers up front and receive no payment from retailers for those magazines until they are sold.

In January 2009, in an attempt to shift these costs further up the supply chain to publishers, and after some years of debate in the **[**11]** industry on related practices, Anderson—which enjoyed a 30% market share of the wholesaler business—decided to announce that publishers would from that time on be required to assume the inventory costs and pay a surcharge of $0.07 on each magazine that Anderson delivered to retailers on their behalf (the "Program"). Anderson had in the past tried to shift these costs to publishers, but without success: the publishers had resisted its efforts. Given these prior failures, Anderson formulated a new strategy to force publishers to accept the surcharge. This strategy had two parts: First, Anderson obtained commitments from Wal-Mart and Kroger, the two biggest single-copy magazine retailers, to refuse to accept shipments from wholesalers other than Anderson during Anderson's short-fuse negotiations with the publishers. Second, Anderson Services planned to use its ownership share in one of its logistics affiliates, ProLogix East, to pressure publishers by suspending delivery services for all publishers' magazines to retailers within ProLogix East's delivery areas until recalcitrant publishers gave in and agreed to pay the surcharge. These combined actions, Anderson reasoned, would move publishers **[**12]** by depriving them of single-copy magazine income until they and Anderson reached an accord.

Anderson launched its plan in mid-January 2009. On January 12 and 13, Charles Anderson, Jr., the owner of Anderson News and manager of Anderson Services, met privately with a number of publishers, including defendants Time, AMI, and Bauer, and outlined his proposed cost-shifting measures and the $0.07 surcharge. On January 14, Mr. Anderson publicly announced the Program in a conference call hosted by a magazine-industry publication. During the conference call, Mr. Anderson explained his reasons for implementing the Program as stemming in part from how "over the last 10 years [Anderson's] profits have eroded to nothing and into significant losses . . . so we think that the time has come to make some significant changes so that we can continue as a viable, cost effective method of distributing magazines." J.A. 919. When asked whether the publishers' acceptance of the Program would result in a "financially sound magazine distribution channel," though, Mr. Anderson was unable to provide any reassurances about his company's viability: "I can't tell you what the future holds as no one can with unemployment **[**13]** going the way it is. With the factors that we've got today, I'm just not going to predict it." *Id.* at 931. Mr. Anderson was also challenged about the timing of his Program, given the "distress[ed] situation of publishing" and the public announcement made the previous day that "advertising pages for the last quarter of the year fell by 17%, 11% for the whole year . . . ." *Id.* at 926-27. He was asked, "[I]s your request for very substantial publishing financial commitment, is this a good time for it-" *Id.* Mr. Anderson responded, "I am fully cognizant of what is going on in the industry. . . . We know how difficult it is. It's not that we want to do anything like this, is the timing good-Of course not. But now is the time that we have to do this." *Id.* Moreover, Mr. Anderson seemed to suggest that the $0.07 per copy surcharge was not a negotiable figure, noting, "[I]f we negotiated the rate then it would not be fair so the answer is we really believe that the 7 cent number is the number." *Id.* at 922. Mr. Anderson **[*94]** then confirmed that if publishers did not agree to the Program, Anderson would refuse to ship magazines for those publishers as of February 1. *Id.* at 922-23. And finally, he noted the possibility that Anderson might exit **[**14]** the business if not enough publishers signed on to his Program: "[W]hy should we continue to lose money in a business that doesn't . . . give us any return-" *Id.* at 927-28.

On the heels of the announcement, the president of Anderson News, Frank Stockard, wrote to publishers giving them a deadline of January 23 to agree to the proposed surcharge "to ensure future distribution" in February and, implicitly, thereafter. J.A. 1450. Concurrently with Anderson's announcements, by letter dated January 19, Source (a wholesaler in competition with Anderson) wrote to at least several publishers announcing that it, too, would impose a $0.07 surcharge on each magazine it distributed. These announcements followed several phone calls between Mr. Anderson and Source President James Gillis in December 2008 and January 2009.

Anderson's announcement sparked a flurry of communications between and among defendants and between defendants and non-parties, as described in detail by the District Court. *See* Anderson News, L.L.C. v. American

Media, Inc. (Anderson III), 123 F. Supp. 3d 478, 492-94, 504-08 (S.D.N.Y. 2015). Emails, telephone records, and testimony introduced by Anderson reflect that during the short period between Anderson's announcement and the February 1 deadline that it declared, defendant publishers and defendant distributors **[**15]** discussed the proposed surcharge and their planned responses in various settings: defendants discussed it internally; defendant publishers discussed it with their affiliated distributors; defendants discussed it with non-defendant wholesalers and retailers; and defendants discussed it with their direct competitors. Anderson conceded at oral argument before the District Court that "many communications between [distributors and their publisher-clients] were not simply permissible, but necessary—it was critical for Publisher Defendants to communicate with their distributors regarding their responses to the Anderson proposal, and for the Distributor Defendants to discuss the proposal with their publisher clients." *Id. at 492*.

During the short time period between Anderson's January 14 announcement and the February 1 deadline, the defendants' actions varied. When Mr. Anderson described his individual meetings with certain defendants to inform them of the Program on January 12 and 13, Mr. Anderson observed that in contrast to his meetings with Time, AMI, and Hachette, which were "open" and "there was good dialogue," Bauer's immediate reaction was "[N]o, we're not going to do it, absolutely not. And **[**16]** it was firm, it was very, very firm . . . . [I]t was not open dialogue." J.A. 172-73. On January 26, Anderson sent another letter to address "common misconceptions" regarding its Program. In that letter, Anderson asked publishers to respond by January 28, and emphasized that, although " A n d e r s o n has made proposals like this in the past," it was not "bluffing" with the current proposal now that " A n d e r s o n [had been] forced to take urgent action on its own." C.A 300. Thus, as the February 1 deadline approached, many other defendants attempted to negotiate with Anderson: Curtis CEO Robert Castardi reached out to Anderson News President Frank Stockard at least a few times, noting in an email, "I have been asking for discussions with [Anderson] for the past week; to no avail." J.A. 640, 793, 795, 801. An internal email between Stockard and Mr. Anderson noted that Castardi was **[*95]** "trying to help." *Id.* at 795. The record also suggests that Kable expressed willingness to negotiate with Anderson. *Id.* at 131, 1567. Time and TWR seemed to come closest to an agreement with Anderson: On January 27, 2009, TWR requested a deadline extension while offering to provide a two-point discount on Time magazines. That **[**17]** same day, Mr. Anderson rejected Time's proposed deal. Notably, two days after rejecting Time/TWR's request for an extension, Anderson entered into an arrangement similar to that proposed by Time with another publisher, Comag.

By February 1, Hachette and Rodale agreed to pay the proposed surcharge on certain titles for the month of February, and Curtis continued to facilitate shipments on behalf of Hachette and Rodale after the February 1 deadline. AMI continued to ship some of its monthly magazines for February on uncertain terms (although it made alternative arrangements for its other magazines). Time, Hachette, and Bauer ended up rejecting Anderson's proposed surcharge and made alternative shipping arrangements for their magazines in February: they each would ship through TNG instead of Anderson. No defendant agreed before the February 1 deadline to pay the surcharge on a long-term basis. The defendants were not alone in making this decision: Ultimately, 1,484 of 1,570 publishers, or approximately 95% of all publishers nationwide, had not agreed to Anderson's terms as of February 1, 2009.

In the face of this general reaction, immediately after February 1, Anderson implemented what **[**18]** it called its "going dark" strategy—conveying an ultimatum, in a last-ditch effort to convince the publishers to accept the surcharge. It reaffirmed that key retailers Wal-Mart and Kroger would not accept magazines from wholesalers other than Anderson in February and on Saturday, February 7, it announced by press release that on Monday, February 9, its affiliate ProLogix East would halt magazine deliveries to retailers, including deliveries for major wholesaler TNG.

In response, a TNG subsidiary brought suit in the United States District Court for the District of Delaware, seeking a temporary restraining order that would require ProLogix East to deliver TNG's magazines to retailers pending adjudication of its claims against Anderson. On February 9, 2009, the court issued the requested order. According to Mr. Anderson, the issuance of this temporary restraining order meant "game over" for Anderson News. J.A. 225. Soon after, in March 2009, Anderson ceased doing business altogether and began bankruptcy proceedings.

II. Procedural history

On March 10, 2009, Anderson News and Anderson Services filed a complaint in the United States District Court for the Southern District of New York, naming **[**19]** AMI, Bauer, Curtis, DSI, Hachette, Kable, Rodale, Time, and TWR as defendants. They alleged: first, an unlawful group boycott of Anderson in violation of the *Sherman Act*, *15 U.S.C. § 1*; second, tortious interference with business relationships and contracts; and third, civil conspiracy.[2]

Defendants successfully moved under *Rule 12(b)(6)* to dismiss the complaint. *Anderson News, L.L.C. v. American Media, Inc. (Anderson I), 732 F. Supp. 2d 389 (S.D.N.Y. 2010)*. The District Court concluded that the complaint failed to state a claim because it was "implausible that **[*96]** magazine publishers would conspire to deny retailers access to their own products" and "completely plausible" that their respective decisions to use other wholesalers were "unchoreographed behavior, a common response to a common stimulus." *Id. at 397-99*. The District Court also dismissed Anderson's state law claims, ruling that by failing adequately to plead an antitrust violation, the complaint also failed to state a claim for tortious interference and civil conspiracy. Further finding that "[t]he context of the alleged antitrust conspiracy-the Surcharge that Anderson tried to impose on the industry to Anderson's advantage and the disadvantage of everyoneelse—belies the viability of Anderson's antitrust claim," the District Court denied Anderson leave to replead. **[**20]** *Id. at 405*.

Anderson appealed, and in 2012 we vacated the District Court's dismissal and remanded for further proceedings, ruling that Anderson should have been permitted to file an amended complaint. *Anderson News, L.L.C. v. American Media, Inc. (Anderson II), 680 F.3d 162 (2d Cir. 2012)*. We decided that the allegations made in Anderson's proposed amended complaint were "sufficient to suggest that the cessation of shipments to Anderson resulted not from isolated parent-subsidiary agreements but rather from a lattice-work of horizontal and vertical agreements to boycott Anderson." *Id. at 189*. Although "presentation of a common economic offer may well lend itself to innocuous, independent, parallel responses," we explained, "it does not provide antitrust immunity to respondents who get together and agree that they will boycott the offeror." *Id. at 192*. We also rejected the District Court's conclusion that, at the motion-to-dismiss stage, the alleged conspiracy was not plausible because it would not be in the defendant publishers' self-interest. We ruled that defendants might plausibly see some benefit from such a conspiracy: the complaint's allegations made it possible that "the publishers and distributors would feel comfortable dealing with just two wholesalers," especially if, as alleged, those wholesalers **[**21]** were also members of the alleged conspiracy. *Id. at 193-94*.

On remand, in September 2012, Anderson filed an amended complaint and the parties proceeded to discovery. After two years of discovery, defendants moved for summary judgment and Anderson cross-moved for summary judgment on counterclaims filed by AMI, Hearst Communications, Inc. ("Hearst") (as successor to Hachette), and Time, in which those defendants charged Anderson with engaging in an illegal price-fixing conspiracy and unlawfully inducing retailers to boycott non-compliant publishers.

In August 2015, the District Court granted summary judgment for defendants. *Anderson III, 123 F. Supp. 3d at 512*. On what had become a robust factual record, the District Court reiterated its earlier view that Anderson's allegations were not plausible and that it was Anderson's "own ill-conceived and badly executed plan [that] led to its downfall." *Id. at 486*. The District Court observed that, despite extensive discovery, Anderson had not presented any direct evidence that defendants agreed to boycott Anderson. *Id. at 485*. Particularly on such an implausible claim, Anderson had failed to offer the "strong direct or circumstantial evidence" required to survive summary judgment, the District Court ruled. *Id. at 508* (citation **[**22]** omitted).

In conjunction with its merits decision, the District Court issued a separate opinion and order in which it granted in part defendants' motion to exclude some of the testimony offered by one of Anderson's experts, Dr. Leslie Marx. *Anderson News, L.L.C. v. American Media, Inc. (Anderson IV), No. 09 Civ. 2227, 2015 U.S. Dist. LEXIS 110358, 2015 WL 5003528* ***[*97]*** *(S.D.N.Y. Aug. 20, 2015)*. As relevant to the present appeal, the District Court excluded Dr. Marx's testimony in which she averred "that it was in each [d]efendant's independent economic self-interest to

[2] Anderson's initial complaint also included TNG and Hudson as defendants. Anderson voluntarily dismissed its claims against TNG within days of filing the complaint. Over four years later, in December 2013, it settled its claims against Hudson and voluntarily dismissed its claims against that defendant.

continue to supply Anderson News with magazines," *2015 U.S. Dist. LEXIS 110358, [WL] at *3*, because, in its view, the testimony did not contain "any actual analysis regarding [d]efendants' financial incentives to continue supplying Anderson News with magazines," *2015 U.S. Dist. LEXIS 110358, [WL] at *4*, and was based solely on Dr. Marx's interpretation of defendants' statements.

On AMI, Hearst, and Time's counterclaims, the District Court granted summary judgment to Anderson. Defendants argued that Anderson and Source's proposed surcharge was the result of an illegal price-fixing agreement between the two wholesalers that was injurious to defendants. *Anderson III, 123 F. Supp. 3d at 511*. The District Court rejected defendants' arguments, concluding that even if Anderson and Source had so conspired, AMI, Hearst, and Time lacked antitrust standing to press the complaint because they had **[**23]** "not suffered damages of the type the antitrust laws were intended to prevent." *Id. at 512* (internal quotation marks omitted).

Anderson's timely appeal followed, as did the cross-appeal filed by AMI, Hearst, and Time. 9

DISCUSSION

HN1[] We review the District Court's grants of summary judgment *de novo*, and "will affirm only if, after construing the evidence in the light most favorable to the non-moving party and drawing all reasonable inference in its favor, . . . there is no genuine dispute as to any material fact and the movant is entitled to judgment as a matter of law." *In re Publ'n Paper Antitrust Litig. (Publ'n Paper), 690 F.3d 51, 61 (2d Cir. 2012)* (internal quotation marks and citation omitted).

I. *Sherman Act* claim

HN2[] *Section 1* of the Sherman Act provides: "Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce . . . is . . . illegal." *15 U.S.C. § 1*. To prove a *Section 1* claim, a plaintiff must present evidence of "a combination or some form of concerted action between at least two legally distinct economic entities" in the form of "a conscious commitment to a common scheme designed to achieve an unlawful objective." *United States v. Apple, Inc., 791 F.3d 290, 313, 315 (2d Cir. 2015)* (internal quotation marks omitted). Once it has sufficiently demonstrated the existence of an agreement, the plaintiff must then establish **[**24]** that the agreement's objective was an "unreasonable restraint of trade either per se or under the rule of reason." *Capital Imaging Assocs., P.C. v. Mohawk Valley Med. Assocs., Inc., 996 F.2d 537, 542 (2d Cir. 1993)*. "Only after an agreement is established will a court consider whether the agreement constituted an unreasonable restraint of trade." *AD/SAT, Div. of Skylight, Inc. v. Associated Press, 181 F.3d 216, 232 (2d Cir. 1999)*.

All parties on appeal accept that the group boycott alleged (to decline to deal with Anderson and thereby reduce wholesaler competition by putting Anderson out of business) would be illegal. *See Klor's, Inc. v. Broadway-Hale Stores, Inc., 359 U.S. 207, 212, 79 S. Ct. 705, 3 L. Ed. 2d 741 (1959)*. At issue here, then, is whether Anderson has presented sufficient evidence for a jury reasonably to conclude that defendants shared a "conscious commitment" to such an agreement. *Apple, 791 F.3d at 315*; *see also Anderson II, 680 F.3d at 183* ("Circumstances must reveal 'a unity of purpose or a common design and **[*98]** understanding, or a meeting of minds in an unlawful arrangement.'" (quoting *Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 764, 104 S. Ct. 1464, 79 L. Ed. 2d 775 (1984))*). Anderson claims that defendants ceased doing business with Anderson under an agreement aimed at driving Anderson out of business and reducing competition in the wholesaler market. Defendants counter that they each ceased doing business with Anderson because they each did not want to pay the proposed "above-market" price resulting from the surcharge. Anderson must therefore make the "threshold showing" that a **[**25]** reasonable jury could find that defendants' conduct—concurrently refusing to pay the surcharge and ceasing to do business with Anderson—was the result of an agreement intended to reduce competition in the wholesaler market, rather than defendants' independent decisions. *AD/SAT, 181 F.3d at 233*.

HN3[] In the field of ***antitrust law***, "summary judgment serves a vital function"—it "avoid[s] wasteful trials and prevent[s] lengthy litigation that may have a chilling effect on pro-competitive market forces." *Publ'n Paper, 690 F.3d at 61*. "[S]ummary judgment is not a substitute for a trial," and so if "the evidence admits of competing permissible inferences with regard to whether a plaintiff is entitled to relief," summary judgment should be denied. *Id.* Although we review the evidence of an alleged conspiracy in the light most favorable to the non-moving party (here, Anderson), "***antitrust law*** limits the range of permissible inferences from ambiguous evidence." *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 588, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*. To permit an inference of conspiracy based on ambiguous evidence—that is, "evidence that is equally consistent with independent conduct as with illegal conspiracy," *Apple, 791 F.3d at 315*—would "deter or penalize perfectly legitimate" and procompetitive conduct. *Monsanto, 465 U.S. at 763*; *see also* *Matsushita, 475 U.S. at 593*.

Accordingly, ***HN4***[] to raise a genuine issue **[**26]** of material fact as to an antitrust conspiracy, the plaintiff must present direct or circumstantial evidence that "tends to exclude the possibility that the alleged conspirators acted independently." *Matsushita, 475 U.S. at 588* (internal quotation marks omitted). This "[does] not mean that the plaintiff must disprove all nonconspiratorial explanations for the defendants' conduct"; rather, the evidence need be sufficient only "to allow a reasonable fact finder to infer that the conspiratorial explanation is more likely than not." *Publ'n Paper, 690 F.3d at 63* (quoting Phillip E. Areeda & Herbert Hovenkamp, *Fundamentals of* ***Antitrust Law*** § 14.03(b), at 14-25 (4th ed. 2011) (Areeda & Hovenkamp, *Fundamentals*)). Thus, if the evidence is in equipoise, then summary judgment must be granted against the plaintiff: "The question is not . . . whether the plaintiff's inferences are so far-fetched that a trier of fact should not be allowed to consider them, but whether the evidence, though not far-fetched, sufficed to me[e]t the plaintiff's burden of proof." Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** ¶ 308, at 156-57 (4th ed. 2011) (Areeda & Hovenkamp, ***Antitrust Law***) (internal quotation marks and citation omitted).

Anderson claims that on January 15, **[**27]** 2009, the defendants entered into an illegal agreement with each other to drive Anderson out of business and to reduce competition in the wholesaler market. *See* Areeda & Hovenkamp, ***Antitrust Law***, ¶ 1409, at 64 (noting that to avoid confusion when considering the validity of an antitrust conspiracy claim, we must "ask precisely, 'Who was in agreement with **[*99]** whom and about what-'"). Defendants counter that, after attempting to negotiate the terms of the Program, evaluating how much the Program would cost, gathering industry information, and considering alternative wholesaler options, they each independently rejected the terms of Anderson's Program in favor of hiring an alternative, lower-cost wholesaler. Anderson must therefore present sufficient evidence to show that a reasonable jury could determine that defendants' rejection of Anderson's Program *more likely than not* occurred as a result of an illegal agreement among defendants, rather than due to each defendant's independent business decision to seek a lower cost alternative. If, however, we determine that "the proffered evidence is equally consistent with competition and collusion, then no fact issue of collusion is established," **[**28]** and we must rule in favor of defendants. *Id.* ¶ 308, at 170-71.

A. The alleged agreement

Before considering the evidence Anderson offers to support its allegation that defendants' conduct was the result of an unlawful agreement rather than independent action, we pause to examine the nature of the alleged agreement itself. We do so because, as we explained in *Publication Paper*, the quality of the evidence required to satisfy *Matsushita*'s "tends to exclude" standard varies with the economic "plausibility" of the alleged agreement:

> [W]here a plaintiff's theory of recovery is implausible, it takes strong direct or circumstantial evidence to satisfy *Matsushita*'s tends to exclude standard. By contrast, broader inferences are permitted, and the tends to exclude standard is more easily satisfied, when the conspiracy is economically sensible for the alleged conspirators to undertake and the challenged activities could not reasonably be perceived as procompetitive.

Publ'n Paper, 690 F.3d at 63 (internal quotation marks and citations omitted; italics added); Areeda & Hovenkamp, ***Antitrust Law***, ¶ 308, at 170-71 ("[G]iven evidence must [not] be treated precisely the same way in all cases. . . . [T]he 'range of permissible conclusions' **[**29]** that a fact finder might draw becomes larger as the alleged conspiracy becomes more economically plausible." (quoting *Matsushita, 475 U.S. at 596-97*)). Accordingly, where context reveals that the alleged agreement is one that "simply makes no economic sense," the plaintiff "must come forward with more persuasive evidence to support its claim than would otherwise be necessary." *AD/SAT, 181 F.3d at 235* (internal quotations marks and alterations omitted).

In its amended complaint, Anderson alleged that defendants entered into an "anti-competitive and collusive scheme . . . to destroy" Anderson. J.A. 66. Anderson's asserted rationale for the scheme was that defendants aimed "to avoid individualized and competitive negotiations" with Anderson over the proposed surcharge and to "increase their control over the wholesaler single-copy magazine distribution market." *Id.* With this increased control of distribution, Anderson argued, defendants could "ensure that the increasing costs of magazine distribution were covered by retailers instead of publishers." *Id.* at 78.

At first glance, this rationale appears to make "no economic sense." *AD/SAT, 181 F.3d at 235* (quoting *Matsushita, 475 U.S. at 587*). Publishers rely on wholesalers to deliver their magazines to retailers. Reducing competition in the wholesaler **[**30]** market appears to increase the market power of the remaining wholesalers, and therefore seems likely to embolden those remaining to charge higher prices to all their commercial partners— **[*100]** publishers included—and not just to retailers. On just this reasoning, in fact, the District Court has twice rejected Anderson's theory as not plausible, concluding that defendants would have nothing to gain from Anderson's demise. *See Anderson I, 732 F. Supp. 2d at 397* ("Publishers and national distributors have an economic self-interest in more wholesalers, not fewer; more wholesalers yields greater competition, which is good for suppliers."); *Anderson III, 123 F. Supp. 3d at 501* ("[The] evidence strongly suggests that Defendants wanted more, rather than fewer, wholesalers in the single-copy market, because more wholesalers meant more competition for both retailers' and publishers' business—resulting in more favorable terms for Defendants.").

Anderson's theory that defendants could benefit from Anderson's demise is not completely indefensible, however. The near-term goal of the alleged conspiracy would be relatively easy to accomplish: given the description Anderson gave of its poor financial health in the January 2009 conference call, it was likely that defendants needed **[**31]** to deprive Anderson of magazines for only a short while to secure its demise. In addition, theoretically, the longer-term goal of the alleged conspiracy—reduced competition in the wholesaler market—could have benefited defendants. We suggested as much in our decision vacating the District Court's dismissal of Anderson's claim, where we noted that publishers and distributors might benefit from reduced competition in the wholesaler market if the remaining wholesalers chose to "increase their profits by raising prices to retailers [only]," rather than by "increas[ing] charges to the publishers." *Anderson II, 680 F.3d at 194*.

But on summary judgment, evidence of key facts that would support this theory have not materialized. Notably absent is evidence supporting Anderson's allegation that wholesalers Hudson and TNG were involved in defendants' alleged conspiracy. Although we previously observed at the pleading stage that the alleged conspiracy could be plausible, we emphasized in that opinion the significance of that allegation, and Anderson has now voluntarily dismissed its claims against the wholesalers. *Id. at 193-94*.[3] Thus, the primary evidence now offered in support of Anderson's theory that reduced wholesaler competition **[**32]** would benefit defendants is an expert analysis prepared by an economist, Dr. Leslie Marx. But Dr. Marx's analysis not only fails to demonstrate how defendants would benefit, it also seems to suggest that defendants would ultimately be harmed by reduced wholesaler competition.

First, Dr. Marx's report recognizes that reduced competition in the wholesaler market would result in higher prices, but opines that wholesalers would raise prices only to retailers. She explains that the economic literature on "multi-sided markets"—markets with middlemen or "platforms," such as wholesalers in the single-copy magazine market—suggests that it is "possible that an increase in the market power of platforms leads to higher prices on one side of the market, while having a much smaller impact on prices on the other side." C.A. 1874. She further explains that

---

[3] We note further that our observation in requiring that Anderson be allowed to amend its complaint was not determinative of the conspiracy's ultimate "plausibility," because "[a]t the pleading stage . . . the complaint need not offer a plausible reason for the defendants' conspiracy but 'merely needs to allege that they did indeed conspire and give some factual allegations that would support such a claim.'" Areeda & Hovenkamp, ***Antitrust Law***, ¶ 308, at 174 n.101.

the side most likely to bear higher **[*101]** prices is the side that "always chooses to do business with only one platform," *id.* at 1874-75—here, the large retailers, which historically have had a practice of preferring an exclusive relationship with a single wholesaler. Dr. Marx also offers some evidence suggesting that retailers may have paid higher prices **[**33]** for magazines after Anderson's exit from the market, *see id.* at 1945, and states that national distributors had, in the past, "preferred to have magazines wholesaled by a single firm in a given location," *id.* at 1877-78.

In light of the multi-sided market theory presented in Dr. Marx's report, we cannot dismiss Anderson's theory of possible benefit to the publishers as "ridiculous," as the District Court concluded. *Anderson III, 123 F. Supp. 3d at 508*. But even assuming that reduced wholesaler competition would result in higher prices for retailers only, Dr. Marx offers no evidence suggesting that publishers would (or did) in fact experience net benefits as a result. Such a theory is sufficiently speculative to make the alleged conspiracy economically implausible. Whether any benefits of the alleged conspiracy would accrue to defendants under Dr. Marx's theory seems to depend entirely on the wholesalers' benevolence: even if the wholesalers remaining after Anderson's demise would demand higher prices from retailers, Dr. Marx offers no basis for concluding that they would necessarily pass along the fruits of their increased margin to publishers, or refrain from demanding more up the chain from publishers as well.

Second, Dr. Marx's report actually **[**34]** acknowledges that reducing wholesaler competition was risky for the publishers because "the remaining wholesalers . . . might eventually seek to extract more money from publishers as well as retailers." C.A. 1873-74. In fact, even Dr. Marx's assertion that the defendants could achieve some benefit by avoiding the "full cost" of Anderson's Program is explicitly qualified by the observation that the defendants might need to "make some concessions to wholesalers that remained." *Id.* at 1873. Such concessions could, of course, include the very same higher-cost terms required by Anderson's Program.

Finally, even if we credit Dr. Marx's assumption of wholesaler benevolence, her report also explains how higher prices for retailers would *harm* publishers by reducing the sales of single-copy magazines as a whole. She observes that some retailers have completely stopped selling single-copy magazines, and predicts that other retailers would likely "reallocate shelf space to other alternative products." C.A. 1964. Any such reduction in retailer sales of single-copy magazines would translate directly into reduced sales for publishers, too. In fact, while trying to convince publishers to sign on to its Program, **[**35]** Anderson itself observed that

> [r]educed competition will hurt publishers and retailers alike. When competition is eliminated without regulatory oversight all parties lose. Competition is the driving force to innovation and efficiency. Without competition, retailers and publishers risk their existing discounts and the category will lose its relevancy to retailers. Display space will be lost to competing consumer products.

Id. at 299 (Anderson's January 26, 2009 letter to publishers). We are attentive to the legal principle that the ***HN5***[] "weight [to] be assigned to competing permissible inferences remains within the province of the fact-finder at a trial." *Apex Oil Co. v. DiMauro, 822 F.2d 246, 253 (2d Cir. 1987)*. But "some assessing of the evidence is necessary in order to determine rationally what inferences are reasonable and therefore permissible." *Id.*

[*102] Dr. Marx's report thus presents evidence suggesting only that reducing competition in the wholesaler market could result in higher prices for retailers; it does not show that reducing competition would in any way benefit or has already benefited defendant publishers.

In *AD/SAT, Division of Skylight, Inc. v. Associated Press*, we encountered at summary judgment and rejected a claim that was similarly speculative. **[**36]** *181 F.3d 216, 235 (2d Cir. 1999)*. There, plaintiff AD/SAT claimed that defendants, newspapers affiliated with the Associated Press ("AP"), engaged in a group boycott against AD/SAT, an advertising broker for newspapers, to benefit a subsidiary of AP that provided the same services; the defendants desired to do so, allegedly, because the newspapers were dues-paying members of AP. *Id.* AD/SAT theorized that the newspapers would enjoy lower AP dues if the AP subsidiary succeeded in its service business. *Id.* In light of the minimal economic benefit that AP members would realize under the scenario, we reasoned that "the factual context of each defendant's decision to terminate, or attempt to terminate, its relationship with AD/SAT strongly suggests that the newspaper defendants had no rational economic motive to join the alleged conspiracies." *Id.*

Here, as in *AD/SAT*, even accepting Dr. Marx's theory as possible, the benefit (or, perhaps, harm) that might accrue to defendants from reducing competition among wholesalers strikes us as sufficiently speculative that businesses in defendants' position would have no rational economic motive to join a conspiracy to drive Anderson out of business. We are not persuaded that some **[**37]** "hope" that reduced competition in the wholesaler market might eventually work in defendants' favor "can be said to be a rational motive for joining the conspirac[y] alleged in this case." *Id. at 235*; *see, e.g.*, *Eichman v. Fotomat Corp., 880 F.2d 149, 161-62 (9th Cir. 1989)* (finding implausible a conspiracy between Fotomat and processors to drive franchisees out of business because franchisees generated sales for processors); *see also infra* section I.B.i (discussing unlikely motive to conspire). The kind of broad inferences Anderson urges upon us and that would be permitted if the conspiracy were economically sensible are not appropriate here. *See Publ'n Paper, 690 F.3d at 63*. As we have highlighted, ***HN6***[] carefully circumscribing the range of inferences permissible in the antitrust context is especially important where, as here, the challenged conduct—moving business away from a higher cost provider—"often is the very essence of competition." *Matsushita, 475 U.S. at 594*. "Thus, mistaken inferences in cases such as this one are especially costly, because they chill the very conduct the antitrust laws are designed to protect." *Id.* Under these circumstances, Anderson must "come forward with more persuasive evidence to support [its] claim than would otherwise be necessary." *Id. at 587*. Such evidence must "tend[] to exclude the **[**38]** possibility that the defendants acted independently." *AD/SAT, 181 F.3d at 233*. We turn to examining the available evidence.

B. Evidence of agreement

Given our conclusion that the alleged agreement was implausible, we consider whether the evidence presented is nonetheless sufficient to provide a basis for a reasonable jury to find it more likely than not that defendants ceased doing business with Anderson as a result of a "common scheme designed to achieve an unlawful objective." *Apple, 791 F.3d at 315*. Here, their objective would be to reduce competition in the wholesaler market by driving Anderson out of business. The evidence must tend to exclude the possibility that **[*103]** defendants acted independently and declined to pay the surcharge simply for economic reasons.

The conduct complained of here—refusing to accede to the terms of Anderson's Program on a long-term basis by February 1, 2009—is in our view equally consistent with both a conspiratorial explanation and an independent-action explanation. As we noted in *Anderson II*, ***HN7***[] a business entity "has a right to deal, or refuse to deal, with whomever it likes, as long as it does so independently." *Anderson II, 680 F.3d at 183* (quoting *Monsanto, 465 U.S. at 761*) (emphasis omitted). Anderson was not willing, as defendants point out, "to do **[**39]** business with [them] on the same terms as the plaintiff's competitors." Time & Hearst Br. 45. Anderson's proposed surcharge thus provides a legitimate and compelling explanation for each defendant to refuse to deal with Anderson. *See AD/SAT, 181 F.3d at 240* (concluding that availability of "more cost-effective" providers is a "valid business reason[]" for terminating relationship); *First Nat'l Bank of Ariz. v. Cities Serv. Co., 391 U.S. 253, 279, 88 S. Ct. 1575, 20 L. Ed. 2d 569 (1968)* ("Obviously it would not have been evidence of conspiracy if Cities refused to deal with Waldron because the price at which he proposed to sell oil was in excess of that at which oil could be obtained from others.").

Given Anderson's declared financial instability, and the tight deadline imposed by the terms of Anderson's Program, each defendant also had a legitimate business reason to constantly monitor competitors' behavior to determine Anderson's ongoing viability as part of its own independent assessment of whether to accede to the Program's terms. *See, e.g., In re Text Messaging Antitrust Litig., 782 F.3d 867, 879 (7th Cir. 2015)* ("We can, . . . without suspecting illegal collusion, expect competing firms to keep close track of each other's pricing and other market behavior and often to find it in their self-interest to imitate that behavior rather than try to undermine it . . . ."); *Michelman v. Clark-Schwebel Fiber Glass Corp., 534 F.2d 1036, 1048 (2d Cir. 1976)* ("Given **[**40]** the legitimate function of [creditworthiness] data [of customers, to protect sellers from risk exposure], it is not a violation of [Sherman Act *§] 1* to exchange such information, provided that any action taken in reliance upon it is the result of each firm's independent judgment, and not of agreement."). And the retailers' past preference for maintaining an exclusive relationship with a single wholesaler provides a legitimate reason for defendants' lobbying efforts to persuade each other and also retailers—which Anderson had already pressured to hold firm in their earlier practice—to consider dealing with an alternative wholesaler. *See* *Interborough News Co. v. Curtis Publ'g Co., 225 F.2d 289, 293 (2d Cir. 1955)* (concluding that encouraging other business to "patronize" a new wholesaler was lawful).

Anderson's failure to offer competitive terms does not, however, immunize defendants from antitrust liability, as we have earlier said. *Anderson II, 680 F.3d at 192*. If Anderson presents evidence that sufficiently tends to exclude the legitimate explanations and tends to prove that defendants entered into an agreement to reduce competition in the wholesaler market by driving Anderson out of business, defendants could still be liable for a *Sherman Act* violation. *See Apple, 791 F.3d at 313-15*; *Matsushita, 475 U.S. at 588*.

HN8[] Absent direct evidence of **[**41]** conspiracy, such as an admission by one of the defendants, antitrust plaintiffs must rely on circumstantial evidence to support their conspiracy claims. *See Apple, 791 F.3d at 315* (discussing examples of direct or "circumstantial **[*104]** facts supporting the inference that a conspiracy existed" (quoting *Mayor & City Council of Baltimore, Md. v. Citigroup, Inc., 709 F.3d 129, 136 (2d Cir. 2013))* (emphasis omitted)). One powerful form of circumstantial evidence is parallel action—proof that defendants took identical actions within a time period suggestive of prearrangement. But "[p]arallel action is not, by itself, sufficient to prove the existence of a conspiracy; such behavior could be the result of coincidence, independent responses to common stimuli, or mere interdependence unaided by an advance understanding among the parties." *Id. at 315* (internal quotation marks omitted). Accordingly, when defendants' parallel behavior forms the basis for a *Sherman Act* claim, "a plaintiff must show additional circumstances"—so-called "plus factors"—which, "when viewed in conjunction with the parallel conduct, would permit a fact8 finder to infer a conspiracy." *Publ'n Paper, 690 F.3d at 62*. These circumstances may include traditional evidence of conspiracy: statements permitting an inference that the defendants entered into an agreement. They may also **[**42]** include evidence of other circumstances giving rise to a less direct inference of conspiracy, such as "a common motive to conspire, evidence that shows that the parallel acts were against the apparent individual economic self-interest of the alleged conspirators, and evidence of a high level of interfirm communications." *Apple, 791 F.3d at 315*.

In challenging the District Court's grant of summary judgment to defendants on its claims, Anderson relies on three types of evidence that it presents as reflecting an unlawful agreement: defendants' parallel conduct, as evidenced by their allegedly simultaneous cessation of business with Anderson; certain of defendants' contemporaneous statements, which Anderson argues provides "strong evidence of a collusive scheme"; and evidence of other "plus factors" suggesting that conditions conducive to collusion existed in the single-copy magazine market. After evaluating the evidence of defendants' conduct, statements, and plus factors as a whole, we conclude that Anderson has not offered "sufficient evidence to allow a reasonable fact finder to infer that the conspiratorial explanation is more likely than not." *Publ'n Paper, 690 F.3d at 63*; *see also Apple, Inc., 791 F.3d at 315*. The evidence is thus not sufficient for Anderson **[**43]** to survive a motion for summary judgment. *See* *Publ'n Paper, 690 F.3d at 63*.

i. Ambiguous conduct and communications

We consider the first two forms of evidence together: ***HN9***[] defendants' conduct and communications must be evaluated in context and with the "overall picture" in mind. Areeda & Hovenkamp, ***Antitrust Law***, ¶ 308, at 171; *Apple, Inc., 791 F.3d at 315* ("[T]he character and effect of a conspiracy are not to be judged by dismembering it and viewing its separate parts, but only by looking at it as a whole." (quoting *Cont'l Ore Co. v. Union Carbide & Carbon Corp., 370 U.S. 690, 699, 82 S. Ct. 1404, 8 L. Ed. 2d 777 (1962))*). After evaluating the evidence against each defendant to consider the question of "who was in agreement with whom and about what" and at what point in time, the picture that emerges is too murky for us to conclude that evidence is anything other than ambiguous. *See* Areeda & Hovenkamp, ***Antitrust Law***, ¶ 1409, at 64. A jury could permissibly infer two conclusions from the evidence in this case: (1) an illegal agreement to boycott Anderson; or (2) legal, independent business decisions to reject Anderson's higher cost Program in favor of lower cost alternatives. A jury's choice between these two equally likely explanations for defendants' conduct, one legal and one illegal, **[*105]** would "amount to mere speculation."

See, e.g., Apex Oil, 822 F.2d at 258 (concluding **[**44]** as to one defendant that "inferring the existence of a conspiracy from the remaining conversations would amount to mere speculation").

Anderson's theory is that all of the defendants (publishers and distributors alike) were in agreement with each other to put Anderson out of business and create a two wholesaler system, and that they made this agreement on January 15, 2009.[4] Anderson then argues that the evidence of defendants' parallel conduct and their allegedly incriminating communications allow us to infer that the defendants entered into this agreement. We find this argument unconvincing.

First, defendants' conduct was not, in fact, parallel. At the motion to dismiss stage, we observed that Anderson's "key parallel conduct allegation was that all of the publisher and distributor defendants ceased doing business with Anderson . . . within a span of three business days . . . ." *Anderson II, 680 F.3d at 191* (emphasis and internal quotation marks omitted). But the evidence presented at summary judgment undercuts that allegation and suggests that (1) defendants' responses to Anderson's Program were not uniform, and (2) the tight timeframe for those responses—between January 12-14 and February 1—was of **[**45]** Anderson's own making, not the result of an unlawful agreement. The defendants each reacted in different ways to Anderson's Program: Many defendants (Time/TWR, Kable, AMI) undertook independent efforts to negotiate with Anderson. Some defendants (AMI, Hachette, Curtis, Rodale) even agreed to temporarily pay the surcharge required by Anderson and to distribute magazines through Anderson for the month of February. That these varying courses of action occurred undermines Anderson's assertion that defendants' "parallel" conduct supports an inference of a conspiracy to drive Anderson out of business.

Next, considering defendants' communications in the context of their nonparallel conduct, defendants' actions are at least equally consistent with legitimate, independent, and procompetitive action to reject Anderson's Program by seeking alternative wholesalers that could offer better terms, as with conspiratorial action. Because Anderson gave publishers only two weeks to consider the Program, it was reasonable (and probably prudent) for industry players to gather information about how the market would react and to plan for the possibility that negotiations with Anderson would be unsuccessful **[**46]** and Anderson would follow through on its threat to cut off distribution. In line with this reasoning, courts have rejected arguments that an antitrust claim can survive summary judgment based on evidence that defendants monitored competitors' behavior, **[*106]** *In re Text Messaging Antitrust Litig., 782 F.3d at 879*, engaged in conscious parallelism, *Apex Oil Co., 822 F.2d at 252*, attempted to persuade others to switch to an alternative wholesaler, *Interborough News Co., 225 F.2d at 293*, or communicated extensively with a distributor, *Monsanto Co., 465 U.S. at 762*.

Finally, we consider the factual context of each defendant's actions and communications during the short timeframe between Anderson's announcements of its Program from January 12 to 14, and Anderson's implementation of its "going dark" strategy, cutting off its magazine deliveries after February 1, 2009. *See AD/SAT, 181 F.3d at 234* ("[W]e require a factual showing that each defendant conspired in violation of the antitrust laws, and have not adopted a 'walking conspiracy' theory in place of such a showing."). On this record, Anderson has failed to present sufficient evidence to show that it was more likely than not that defendants agreed on January 15 to put Anderson out of business and reduce wholesaler competition. *Publ'n Paper, 690 F.3d at 63*. We discuss below samples of the evidence adduced.

---

[4] Anderson asserts that the district court erred in observing that "Anderson cannot say when the alleged conspiracy started." *See* Appellants' Br. 47-48 n.12 (quoting *Anderson News III, 123 F. Supp. at 486*) ("[T]he evidence indicates the defendants reached agreement by January 15—the day that Parker reported that 'no one will ag[r]ee' to Anderson's proposal."); *see also* Appellants' Reply Br. 46 (the "jury could conclude that the conspiracy was fully formed by January 15"). But Anderson shifts away from the January 15 date when it is convenient—for example, it argues that Time/TWR and Kable did not make their final decisions until February 1, *id.* at 38, 39, and that Bauer did not make its final decision until January 31, *id.* at 44-45. These inconsistencies highlight the fundamental ambiguity of the record before us. Since February 1 was Anderson's threatened shipment cutoff date, the fact that defendants tended to make their decisions around that date just as likely reflected a legitimate reaction to Anderson's Program as it was evidence of collusive behavior.

1) Time/TWR

Evidence in the record **[**47]** as it relates to Time/TWR can be interpreted as either supporting or refuting the inference of an illegal conspiracy. Anderson highlights third party testimony against Time/TWR, but much of that testimony is ambiguous. For example, David Rustad, the President of Qrius Concepts (which handled sales for the retailer Kroger), testified that TWR President Richard Jacobsen told him that "no publishers were going to support the 7-cent surcharge" and that "they were going to teach [Anderson] a lesson." J.A. 2087, 2089. However, Rustad's testimony also points the other way: Rustad testified as well that Jacobsen articulated legitimate business reasons for why no one would support the charge because Anderson's "demands were unrealistic . . . . [T]hey had given Anderson News previous concessions already, and . . . there[] [was] no way they could give additional concessions to Anderson News . . . ." *Id.* at 2089.

Rustad further acknowledged that everyone in the industry, including Kroger, was "trying to dig into" the question of which publishers would acquiesce to the Program "because there was a little bit of contradictory information" and Kroger was "trying to understand what [it was] going to do as well **[**48]** in the event [Anderson] went out of business." *Id.* at 2087-88. This is consistent with legitimate industry monitoring behavior and, therefore, is not evidence (much less persuasive evidence) of conspiracy. *See, e.g., In re Text Messaging Antitrust Litig., 782 F.3d at 879* ("We can . . ., without suspecting illegal collusion, expect competing firms to keep close track of each other's pricing and other market behavior . . . ."); *In re Baby Food Antitrust Litig., 166 F.3d 112, 126 (3d Cir. 1999)* ("Gathering competitors' price information can be consistent with independent competitive behavior.").

Other evidence in the record also tends to contradict Anderson's theory that Time/TWR agreed with the other defendants to boycott Anderson. For example, on January 27, 2009, TWR sent a letter to Anderson asking for "a short period of time during which we could negotiate terms on which Anderson News Company could continue to serve as wholesaler for Time Inc. publications." J.A. 1966. TWR noted that it was "so interested in attempting to reach an agreement with you that instead of proposing a standstill, we are proposing a standstill in which we are providing you with an additional two points of discount on Time Inc. weekly magazines. **[*107]** We hope that you value our relationship sufficiently to allow us a brief period of time to work **[**49]** out a mutually beneficial agreement." *Id.* That same day, Time CEO Ann Moore called Mr. Anderson's brother, Clyde Anderson, to make sure Time's request would not "fall through the cracks," and in the hopes that Clyde Anderson could "save the day." C.A. 1453. After Anderson rejected TWR's proposal, TWR sent a letter to Anderson advising that TWR would no longer ship Time publications to Anderson "[i]n view of [its] unwillingness to suspend the new fee structure . . . even for a short period of time to allow us to attempt to work out a long-term distribution agreement . . . ." J.A. 1467.

Anderson argues that TWR's failed proposal represents a mere "contingency plan in the event the agreement [to boycott] collapsed." Appellants' Reply Br. 48. But it seems at least equally likely that Time/TWR was genuinely interested in continuing its relationship with Anderson when it made this final counterproposal on January 27, 2009—twelve days after (as Anderson alleges) Time/TWR agreed with the other defendants to boycott Anderson.

2) Curtis

The evidence presented against Curtis is similarly ambiguous. For example, Source President James Gillis testified that Curtis CEO Bob Castardi told him, "If Rick **[**50]** [Jacobsen, of TWR] says right, I go right. If he says left, I go left. We're in lockstep. We're doing this together." J.A. 1359. Mr. Anderson also testified that Castardi told him, "Rich [Jacobsen, of TWR] and I are working together on this." *Id.* at 251. Castardi himself testified, however, that Curtis was compelled by economic realities—not necessarily a conspiratorial agreement—to follow Time/TWR. Given Time/TWR's significance in the single-issue magazine copy market, Castardi concluded that its decision alone not to ship to Anderson would put Anderson out of business, rendering Anderson "not . . . a viable place for [Curtis] to send [its] product." C.A. 160; *see also Joseph E. Seagram & Sons v. Hawaiian Oke and Liquors, Ltd., 416 F.2d 71, 80 (9th Cir. 1969)* ("A supplier who becomes dissatisfied with an existing distributor . . . has a legitimate interest in seeing that any new distributor to which it might turn would be viable. Manufacturers' or suppliers' decisions about the distribution of their products are not made in a vacuu[m]." (internal quotation marks omitted)).

Curtis also presented evidence that tends to exclude the possibility that it joined a conspiracy to boycott Anderson on January 15. Emails indicate that Castardi attempted to negotiate with Anderson at least a few **[**51]** times during the period from January 21 to 26, noting that "I have been asking for discussions with [Mr. Anderson] for the past week; to no avail. . . . As I said in the [Jan. 21] meeting, the vast majority of our clients have adamantly decline[d] you[r] offer without any influence from Curtis." J.A. 640; *see also id.* at 793, 795, 801. An internal email between Anderson News President Frank Stockard and Mr. Anderson noted that Castardi "[s]aid he is trying to help." *Id.* at 795. Mr. Anderson did not respond to Castardi's email. *Id.* at 292.

In addition to expressing interest in negotiating with Anderson, Curtis helped facilitate shipments for those of its client publishers, including Rodale and Hachette, that were willing to pay Anderson's $0.07 surcharge for the month of February. Curtis's willingness to facilitate some shipments to Anderson even after the cutoff date of February 1 cuts against Anderson's theory that Curtis entered an unlawful agreement with the other defendants **[*108]** on January 15 with the goal of putting Anderson out of business.

3) Kable

Anderson criticizes Kable for statements that, it contends, demonstrate Kable's involvement in a conspiracy. Such statements arise primarily out of Kable's communications that **[**52]** share information with its competitors, such as an email to Bauer Vice President Richard Parker relating that Kable's clients were "cutting of[f] Source and [Anderson]." C.A. 2854. As discussed above, this sort of information-sharing can be legitimate monitoring behavior. For example, Anderson makes much of Kable CEO Michael Duloc's reference in a January 16, 2009 email to "[t]he plan" involving "Bauer (and AMI)." *See* Appellants' Reply Br. 39; C.A. 2798. But Duloc's email is hardly a smoking gun. Duloc responded to an email asking about other publishers' plans to pay the $0.07 surcharge by explaining that "[t]he plan for Bauer (and AMI) is to[] not pay but ship. Let Anderson be the one to not deliver and then explain to retailers as opposed to publishers looking like the bad guy by not shipping." C.A. 2798. The reference to "the plan," viewed in context, seems to mean each publisher's independent plan, rather than a conspiracy among all of the defendants; it is discussed in the context of monitoring other industry players' behavior to determine how to calibrate Kable's actions. Furthermore, the "plan" as articulated here is to proceed with shipments to Anderson while ignoring the surcharge **[**53]** imposed by Anderson's Program, which is not consistent with Anderson's theory that the defendants agreed among themselves on January 15 that they would halt business with Anderson.

Internal emails at Kable also confirm that on January 14—the day before Kable is alleged to have entered an illegal agreement to boycott Anderson—Duloc specifically instructed an employee not to advise publisher-clients to reject Anderson's Program, expressing concern about a debt of $10 million owed by Anderson to Kable. Other evidence—including emails between Duloc and Anderson News President Stockard—suggests that Kable attempted to negotiate with Anderson on January 28, which is in tension with the theory that Kable had agreed to boycott Anderson on January 15. And, finally, as late as January 31, Duloc left open the possibility that it might stick with Anderson if Time changed course.

4) AMI/DSI

Anderson argues that communications between distributor DSI and its publisher-clients (AMI, Bauer, Rodale, and Hachette) constitute evidence of a conspiracy. We find these communications, too, ambiguous at best, however.

In an email to AMI CEO David Pecker, DSI President Mike Porche noted that Bauer "believes we **[**54]** should start simultaneously using our collective resources and influence to direct business towards [TNG-Wholesaler]." C.A. 1778. In the same email, Porche informed Pecker that Bauer agreed that a "strategy . . . of first offering to test reducing costs for wholesalers by eliminating a large portion of their one way freight and return processing costs"—a test that, in the end, did not happen—"makes sense." *Id.* Porche acknowledged that, if the cost-reduction plan did not work, "we have little option other than to develop our own cooperative distribution system." *Id.* This email is ambiguous at best: it demonstrates that, far from agreeing to a boycott with the goal of driving Anderson out of business, defendants had considered a plan to help make Anderson's business viable. Their concurrent consideration of how they might deal with preparing **[*109]** for the worst-case scenario of having to develop a backup wholesaler is not precluded by ***antitrust law***.

Moreover, the evidence of coordination to which Anderson points is equally consistent with lawful activities. For example, DSI prepared a "Script for Wal-Mart" and persuaded two of its publisher-clients, AMI and Bauer, to place their own phone calls **[**55]** to the retailer. C.A. 2722. Although the similarities between AMI and Bauer's phone calls with Wal-Mart could suggest that they were acting to further a conspiracy, the use of a script is as consistent with a legitimate business activity—ensuring continued access to a major retailer if they switched to a new wholesaler—as with an alleged unlawful boycott. That DSI as a distributor aided AMI and Bauer in their communications with Wal-Mart is hardly convincing evidence that these parties also entered into a separate agreement with the goal of putting Anderson out of business.

As late as January 26, DSI documented in an email between Porche and consultant Mike Roscoe how industry players still remained uncertain about whether to accept Anderson's Program. Porche observed that "Curtis and Bauer both think not shipping Anderson is a mistake" and that he himself had also "gone back and forth" on the decision. C.A. 1788. At the end of the email, Porche also observed that "nobody knows what is going to happen, what I expect to see assuming Bauer and AMI ship is that Anderson will ship some product and not ship others[,] making examples of certain publishers. That is not going to go over very **[**56]** well for the publisher not distributed . . . ." *Id.* This observation illustrates why industry monitoring was required: each defendant had to independently determine the right business decision *for it*, based on what was happening in the industry overall. *See* *In re Text Messaging Antitrust Litig., 782 F.3d at 879*.

Similarly, the "man in bauerland" exchange cited by Anderson is consistent with efforts by AMI, DSI, and Bauer to secure a new wholesaler. On January 30, 2009, Rodale Vice President Richard Alleger emailed DSI executive Jay Wysong, asking, "Our man in bauerland still solid?" C.A. 1795. Wysong responded, "He's solid alright." *Id.* The next day, Wysong told publisher-client Bauer's Vice President, Richard Parker, "This will all work out if we can keep everyone together." C.A. 2761. To be sure, these statements could suggest that DSI's publisher-clients were checking in to make sure that everyone was following through on an illegal agreement to boycott Anderson. But the statements are equally consistent with legitimate efforts to monitor Bauer's response to the Anderson Program in order to determine the likelihood that distributor DSI would need to switch to another wholesaler and secure retailers' approval for that wholesaler.

Perhaps **[**57]** most tellingly, even after the cutoff date of February 1, three of DSI's four clients (AMI, Hachette, and Rodale) ultimately continued making some shipments and paying the requested surcharge to Anderson. This fact cuts deeply against Anderson's theory that AMI/DSI agreed to boycott Anderson on January 15. Although Anderson might have been dissatisfied with a mere one-month commitment to pay the surcharge (as illustrated by its argument that "a one-time payment for the magazines Anderson already possessed is far from 'exactly what Anderson News asked,'" Appellants;' Reply Br. 43), DSI/AMI, Hachette, and Rodale's willingness to make *any* surcharge payments is powerfully at odds with their alleged conspiratorial intent of putting Anderson out of business.

[*110] 5) Hachette

The evidence against Hachette is also ambiguous. For example, in a January 20, 2009 internal email to a Hachette employee, a Hachette Vice President noted that Hachette was "in constant touch with Curtis, DSI, and other publishers. . . . [T]his will come down to who blinks first[,] publishers or ANCO." C.A. 2794. These statements are as consistent with legitimate assessment of industry conditions and monitoring of competitors **[**58]** as with an illegal antitrust conspiracy, however. Moreover, in that same email, the Hachette executive described his plan to "see when potentially each magazine's March issues may be at risk" and "estimate [] the newsstand sales at risk" based on forthcoming updates from other publishers. *Id.* This suggests that, five days after the alleged January 15, 2009 agreement date, Hachette executives were uncertain about their competitors' plans.

More importantly, as discussed above, Hachette ultimately continued making some shipments and paying the requested surcharge to Anderson even after the cutoff date of February 1. This fact severely undermines Anderson's theory that Hachette agreed to boycott Anderson on January 15.

6) Bauer

Anderson points to several "incriminating communications" from Bauer. Appellants' Reply Br. 44. Like those discussed above, the communications it cites are ambiguous at best and do not "tend[] to exclude the possibility that the alleged conspirators acted independently." *Matsushita, 475 U.S. at 588*. For example:

- After meeting with AMI and DSI on January 14, Bauer Vice President Richard Parker wrote a January 15, 2009 email to President Hubert Boehle, stating that Pecker (from AMI) was "with **[**59]** us," along with Ann Moore (from Time). C.A. 2737. "[A]s a matter of fact[,] no one will ag[r]ee," he noted. *Id.* Anderson, surprisingly, identifies this as the point when all of the defendants agreed to boycott Anderson. But the statement that Pecker and Moore are "with us" could either refer to an illegal conspiracy to boycott or an innocent observation that, based on the latest industry information, AMI and Time had also independently decided to reject the Anderson Program. In fact, that same day, Boehle also sent another internal email observing that "right now none of the major publishers seem responsive to Anderson's offensive. I hope it will stay that way, but I am skeptical . . . ." C.A. 2743. This suggests that his initial email about AMI and Time's plans reflected an observation, not a declaration of common intent.

- Boehle emailed Parker on January 25, noting that the Wal-Mart response "doesn't sound encouraging. Are the other publishers holding the line?" C.A. 2754. The import of the phrase "holding the line" is uncertain: on one hand, it could suggest conformity with an illegal agreement to boycott Anderson, but, on the other hand, it could be no more than an informal reference **[**60]** to Bauer's industry monitoring (and its related, reasonable hope that publishers would independently decide not to pay Anderson's surcharge). The context of the email provides support for the latter inference: Parker was having trouble contacting Wal-Mart and explained that Bauer "need[ed] direction from Wal-Mart for distribution **[*111]** beyond February 1, 2009." *Id.* at 2755. Bauer's monitoring of other industry players was necessary for it to determine whether and how to arrange an alternative distribution plan for Wal-Mart.
- Rodale Vice President Richard Alleger emailed Parker to note that Comag announced a tentative understanding with Source, and Parker responded, "Doesn't matter source won't be around much longer. Talk in the AM." C.A. 2758. This is consistent with legitimate activities: namely, monitoring industry movement and predicting how the volatile wholesaler situation would likely unfold to aid Bauer's own independent decision-making.

Bauer, moreover, was the only one among DSI's four clients that decided *not* to continue shipping (and, thus, not to pay the Anderson surcharge after February 1). Mr. Anderson also described Bauer's initial reaction as early as January 13 to be "very, very firm," **[**61]** noting that, in comparison to other publishers which engaged in "good dialogue" with Anderson, there was "not open dialogue" in the Anderson-Bauer meeting. J.A. 173. Bauer's actions seem, at the very least, to be equally consistent with a business strategy not to negotiate with Anderson after it made its surcharge demand as with a January 15 agreement with DSI, AMI, Hachette, and Rodale to boycott Anderson, and the fact that the others, unlike Bauer, seemed at least to consider negotiating with Anderson for ongoing deliveries after February 1 suggests that Bauer did, in fact, act alone.

7) Rodale

Rodale's communications, placed in context, are similarly ambiguous. In an internal email dated January 27 regarding "Wholesaler Updates," Rodale Vice President Richard Alleger observed that "[t]he situation remains very fluid." C.A. 2807. Although Alleger observed that "we all need 'People' magazine to lead the charge," *id.*, that statement could as easily be interpreted as an observation about People's market power as an implicit admission of collusion. Alleger's stated uncertainty about what would happen also suggests that, as late as January 27, Rodale had not reached any agreement with the **[**62]** other Defendants to boycott Anderson.

Moreover, as discussed above, Rodale ultimately instructed Curtis to pay the surcharge for February 2009 and continued making shipments to Anderson even after the cutoff date of February 1. These undisputed facts cut against Anderson's theory that Rodale agreed to boycott Anderson on January 15.

* * *

Based on the above analysis and our review of the record, we conclude that the evidence against each defendant is at best (from Anderson's perspective) in equipoise on the question of whether defendants conspired: What Anderson offers as evidence of the conspiracy could just as easily be characterized as evidence of competition. Without more, such an ambiguous record is insufficient to withstand the scrutiny required by the Supreme Court in *Matsushita*, particularly when, as here, the alleged conspiracy makes little economic sense. We then look at the record with regard to evidence of the remaining "plus factors."

ii. Inconclusive plus factors

As noted earlier, because the basis of Anderson's conspiracy claim is defendants' parallel behavior, Anderson must show evidence of plus factors such as "a common motive to conspire, evidence that shows that the parallel **[**63]** acts were against the apparent individual economic self-interest **[*112]** of the alleged conspirators, and evidence of a high level of interfirm communications." *Apple, 791 F.3d at 315* (quoting *Mayor & City Council of Baltimore, Md., 709 F.3d at 136*). Anderson's arguments regarding the import of certain other plus factors, which it claims bolster an inference of unlawful conspiracy, suffer from two weaknesses. First, as discussed above, we see a factual flaw: defendants did not in fact engage in parallel conduct. Without "parallel acts" to be reviewed "in conjunction with" the circumstantial evidence, *Apple, 791 F.3d at 315* (quoting *Apex, 822 F.2d at 253*), evidence supporting the presence of certain plus factors in the single-copy magazine industry can provide little support for a finding of unlawful conspiracy. Second, even were we to view defendants' responses to the surcharge announcement as suspect parallel conduct, the evidence supporting the presence of certain plus factors—the assertions that defendants had a common motive to conspire and that defendants' conduct in declining to pay the surcharge contravened their individual self-interest, as well as the presence of increased interfirm communications in the relevant period—is also too malleable to fairly support an inference of conspiracy.

To begin, we **[**64]** note that the defendants had an unlikely motive to conspire, given our conclusion that the alleged conspiracy is economically implausible. ***HN10***[] A weak motive to conspire does not "save defendants who have clearly, though foolishly conspired," Areeda & Hovenkamp, ***Antitrust Law***, ¶ 308, at 173-74. But "[a]s a practical matter . . . a conspiracy's 'objective rationality' or motive is a necessary condition for inferring conspiracy from the usual array of evidence, which is usually circumstantial." *Id.* at 174. Also, "[m]otive to conspire tends to be negated [1] when a defendant shows that the alleged agreement would harm the alleged conspirators; or [2] when the defendant shows a 'plausible and justifiable reason for its conduct that is consistent with proper business practice.'" *Id.* at 175-76. Here, both motive-negating factors are present. First, as discussed above, the conspiracy seems implausible because it is likely to harm the defendants by allowing wholesalers to charge higher prices, and because, even if wholesalers charged retailers higher prices instead, that would result in a reduction of magazine sales, which would further harm the defendants. Second, it made perfect business sense for the defendants to **[**65]** constantly monitor industry conditions during the short-term period given by Anderson to consider its ultimatum, before ultimately deciding to independently reject Anderson's higher-cost proposal in favor of lower-cost alternatives.

After considering whether defendants had a common motive to conspire, we look again at the evidence that Anderson offers to support its assertion that the defendants' conduct was against their individual economic self-interest. Anderson again relies on Dr. Marx's report, which the District Court excluded on this point, concluding that her opinions "merely recite what is on the face of documents produced during discovery." *Anderson VI, 2015 U.S. Dist. LEXIS 110358, 2015 WL 5003528, at *4* (internal quotation marks and alterations omitted). We agree with the District Court's decision to exclude those portions of Dr. Marx's opinion that merely interpret defendants' statements. Other portions of her report contain some relevant information, however. For example, her supplemental report provides a chart comparing the sales of *People* and *US Weekly* at Source-serviced retailers in the relevant period, and showing that *US Weekly* sales increased briefly when *People* was not available in February 2009, just after the events at issue **[**66]** here. This temporary spurt **[*113]** provides at least some support for Anderson's assertion that each individual defendant might have had something to gain—at least briefly—from being one of the few magazines shipped by Anderson in February. Accordingly, to the extent the District Court excluded this portion of her opinion, we conclude that the District Court exceeded the permissible bounds of its discretion. We therefore consider this evidence as part of our *de novo* review of the record.

Having done so, however, we think that it accomplishes little. To show that some defendants could have enjoyed short-term gains by continuing to ship through Anderson in the month of February hardly establishes that it would be in defendants' long-term interest to accede to the proposed terms and ship to Anderson. Absent evidence regarding the long-term costs or benefits of acceding to the proposed surcharge and continuing to ship to Anderson, the inferential gap between the evidence presented to the conclusion that refusing to ship was against defendants' economic interests is simply too great. Because Anderson has not offered any evidence to bridge that gap, we decide that the evidence offered in this regard **[**67]** is inconclusive.

In addition, the inference that can reasonably be drawn from the increased level of interfirm communications during the two-week period between Anderson's announcement (January 14) and the deadline to accept the terms of the Program (February 1) amounts to little. Anderson argues that the "pattern and frequency" of communication between competing publishers and distributors during this period "supports an inference of conspiracy." Appellants' Br. 39. Anderson relies again on the views of Dr. Marx, who presents a chart depicting a "nearly ten-fold increase (by duration) in inter-defendant communications" during this period. *Id.* at 40 (citing C.A. 2258). Even if we take these statistics at face value as significant, what exactly they signify eludes us. Although, unlike the District Court, we cannot dismiss these calls altogether as necessarily innocent, in this context their frequency does not weigh heavily in support of an inference of unlawful conspiracy. Even when viewed in conjunction with the evidence showing that a few defendants may have attempted to conceal some communications, that there were increased communications during a compressed period created, in effect, by Anderson **[**68]** itself, is as consistent with permissible activities, such as monitoring competitors' responses to Anderson's proposed surcharge, *see* *In re Text Messaging Antitrust Litig., 782 F.3d at 879*, and creating contingency plans in case Anderson refused to rescind its surcharge, *see* *Interborough, 225 F.2d at 293*, as it is with an unlawful conspiracy to put Anderson out of business. Furthermore, as already discussed in subsection (i) above, each defendant's internal and interfirm communications, when properly viewed in the setting of each defendant's conduct and industry conditions, equally support inferences of competition and conspiracy.

Having considered the totality of the circumstances and the evidence offered by Anderson in support of its allegations, we conclude that a factfinder could not reasonably infer that the conspiratorial explanation is more likely than not. Although some of the evidence discussed above is suggestive of an agreement, when considered in light of the fact that the benefits of alleged conspiracy are at best speculative and the mass of evidence equally compatible with independent action, the evidence does not sufficiently "tend to exclude" the possibility that defendants acted permissibly. Accordingly, we affirm the District Court's grant of summary judgment **[**69]** to **[*114]** defendants on Anderson's *Sherman Act* claims.

State law claims

Anderson also appeals the District Court's grant of summary judgment to defendants on its New York state law claims for tortious interference with business relations and with contract and civil conspiracy. Regarding the tortious interference claim, the District Court concluded that "[t]o the extent [Anderson] breached [its] contracts with retailers, the evidence indicates that it was Anderson's actions, not [d]efendants' actions, that caused Anderson to breach these contracts." *Anderson III, 123 F. Supp. 3d at 510*. As to the civil conspiracy claim, the District Court noted that New York "does not recognize an independent tort of conspiracy" and concluded that, because Anderson has not provided evidence of "an otherwise actionable tort" here—the tortious interference claim—its civil conspiracy claim failed as a matter of law. *Id. at 510-11* (quoting *Kirch v. Liberty Media Corp., 449 F.3d 388, 401 (2d Cir. 2006)*; *Alexander & Alexander of N.Y., Inc. v. Fritzen, 68 N.Y.2d 968, 969, 503 N.E.2d 102, 510 N.Y.S.2d 546 (1986))*.

Anderson argues that we should reinstate its state law claims because the District Court "rejected the tortious-interference claim based solely on its predicate antitrust holding," which Anderson argues was incorrect. Appellants' Br. 59. Because we conclude that Anderson's *Sherman Act* claim fails, and because Anderson has **[**70]** abandoned on appeal any other challenge to the substance of the District Court's grant of summary judgment on the state law claims,[5] we affirm.

Counterclaims

Defendants AMI, Hearst, and Time (collectively, "counterclaim-plaintiffs") filed counterclaims against Anderson News and Charles Anderson, Jr., alleging that Anderson engaged in an illegal price-fixing conspiracy with Source and, in support of that conspiracy, "induced" certain retailers (that is, Kroger and Wal-Mart) to "threaten[] to boycott publishers that attempted to switch to competing wholesalers." C.A. 39-40. The counterclaim-plaintiffs allege that they suffered "tens of millions of dollars" in damages from lost sales as a result of Anderson's "going dark" strategy and because of "ongoing delivery disruptions" in the aftermath of Anderson's exit; they also incurred costs to develop "alternate distribution routes" after Anderson's demise. C.A. 38-39.

The District Court granted summary judgment to Anderson on these counterclaims, concluding that they failed as a matter of law because the counterclaim plaintiffs had not suffered damages "of the type the antitrust laws were intended to prevent" and thus lacked antitrust standing. **[**71]** *Anderson III, 123 F. Supp. 3d at 512* (quoting *Gatt Commc'ns, Inc. v. PMC Assocs., L.L.C., 711 F.3d 68, 76 (2d Cir. 2013))*. We agree that counterclaim-plaintiffs lack antitrust standing.

HN11[] *Section 4* of the Clayton Act provides a treble-damages remedy to **[*115]** "[a]ny person . . . injured in his business or property by reason of anything forbidden in the antitrust laws." *15 U.S.C. § 15*. Despite the statute's broad language and broad remedial purpose, *see* *Blue Shield of Va. v. McCready, 457 U.S. 465, 472-73, 102 S. Ct. 2540, 73 L. Ed. 2d 149 (1982)*, the Supreme Court has explained that "Congress did not intend the antitrust laws to provide for all injuries that might conceivably be traced to an antitrust violation." *Associated Gen. Contractors of Cal., Inc. v. Cal. State Council of Carpenters, 459 U.S. 519, 534, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)* (internal quotation marks omitted). The law therefore limits recovery to plaintiffs who can demonstrate that they experienced an "injury of the type the antitrust laws were intended to prevent" and that "flows from that which makes defendants' acts unlawful." *Brunswick Corp. v. Pueblo Bowl-o-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*. A plaintiff suffers an antitrust injury only if it "is adversely affected by an *anticompetitive* aspect of the defendant's conduct." *Atl. Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 339, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)* (emphasis in original).

The District Court concluded that the injuries the counterclaim-plaintiffs alleged that they suffered—including "lost profits from sales that they would have made, but for Anderson's 'going dark' strategy" and "costs associated with making alternative arrangements to replace Anderson News and Source"—do **[**72]** not "'flow[] from that which

---

[5] Anderson argued before the District Court that its tortious interference with contract claim could be "predicated on a plaintiff's breach of its contract with a third-party where, as here, the defendants' actions prevented the contract from being performed." J.A. 1596 (internal citations omitted). Anderson also argued that it had grounds for a tortious interference with business relations claim in defendants' disparaging comments to retailers, which, it argues, persuaded retailers to terminate their relationships with Anderson. Anderson has abandoned these claims on appeal and we do not address them further.

makes'" Anderson's acts unlawful.[6] *Anderson III, 123 F. Supp. 3d at 511-12*. We agree. The counterclaim-plaintiffs' injuries are unrelated to the anticompetitive aspects of the two conspiracies alleged.

First, the counterclaim-plaintiffs' lost profits and withheld payments are the result of Anderson's individual conduct, not the conspiracies that Anderson is claimed to have conducted with Source. Although Anderson's conduct with Kroger and Wal-Mart, as the counterclaim-plaintiffs describe it, might reasonably be questioned, and the resulting injuries might be recoverable in some other type of action, those injuries do not arise from any sort of increase in prices or reduction in the freedom of the marketplace, and are not the type of injuries the antitrust laws were intended to prevent.

Second, the costs associated with securing an alternative wholesaler do not result from the anticompetitive aspect of either the price-fixing claim or the alleged group boycott. Selecting among competing wholesalers and ultimately switching to a lower-cost wholesaler reflects the essence of competition, 1 even if making such a switch turns out to be costly.

In an effort to avoid this straightforward conclusion, the **[**73]** counterclaim-plaintiffs argue that Anderson's "going dark" strategy was an "integral aspect" of its conspiracy to raise prices and to force the publishers to accept the surcharge, and that, therefore, the injuries suffered as a result of that strategy "flowed directly from the anticompetitive scheme put in **[*116]** place by Mr. Anderson and Anderson News." Time & Hearst Br. 71-72. The counterclaim-plaintiffs rely on *Blue Shield of Virginia v. McCready, 457 U.S. 465, 102 S. Ct. 2540, 73 L. Ed. 2d 149 (1982)*, to support this claim, but their comparison to *McCready* is unavailing. In *McCready*, a putative class alleged that Blue Shield of Virginia, an insurance company, conspired with an organization of psychiatrists to boycott clinical psychologists and reduce competition in the general psychotherapy market by refusing to reimburse subscribers for visits to psychologists. *Id. at 469-70*. The lead plaintiff visited a psychologist and was denied reimbursement by her insurer. *Id. at 475*. Although the alleged conspiracy's object was to reduce competition in the psychotherapy market and the lead plaintiff's injury did not result from reduced competition, the Supreme Court held that her injuries were still "inextricably intertwined with the injury the conspirators sought to inflict on psychologists and the psychotherapy **[**74]** market" and therefore constituted an antitrust injury, because denial of reimbursement was the very mechanism by which the boycott operated. *Id. at 484*.

Here, by contrast, Anderson's "going dark" strategy was not the mechanism by which the alleged price-fixing conspiracy operated. It was, instead, one of Anderson's many levers to force publishers to accept the surcharge. Although these actions and the attendant injuries were certainly related to the alleged conspiracy, it is not enough that the injury "be causally linked to the asserted violation." *Gatt Commc'ns, 711 F.3d at 76* (internal quotation marks omitted). Because the counterclaim-plaintiffs' injuries resulted from an action related to, but not "inextricably intertwined with," Anderson's alleged conspiracies, they have not suffered an antitrust injury. *See id. at 76-77* (holding that "mere termination" of a dealership agreement, alleged to be in furtherance of bid-rigging scheme, was not antitrust injury flowing from that which made the bid-rigging scheme unlawful).

Accordingly, we conclude that the counterclaim-plaintiffs lack antitrust standing to pursue the stated counterclaims. We therefore affirm the District Court's grant of summary judgment to Anderson in this regard.

CONCLUSION [75]**

---

[6] The counterclaim-plaintiffs correctly note that the District Court held that they lacked antitrust standing for another reason, too: it concluded that the counterclaim-plaintiffs would have suffered the same injuries even if Anderson had been acting alone. This basis for summary judgment was not, they argue, raised before the District Court by the parties and, therefore, could not permissibly serve as the basis for granting summary judgment since the counterclaim-plaintiffs had no notice of the ground and no opportunity to respond. *Fed. R. Civ. P. 56(f)*. Because we agree with the District Court that the counterclaim-plaintiffs' injuries do not flow from that which makes Anderson's alleged acts unlawful, we need not address this argument.

In sum, the evidence presented by Anderson, while perhaps consistent with an unlawful conspiracy among defendants, does not sufficiently "tend[] to exclude" other interpretations of the events that took place in the single-copy magazine industry during several hectic weeks in January 2009. When it introduced the Program, Anderson sought to significantly change the state of the market by suddenly seeking to impose a surcharge and setting an immediate deadline for publishers to take it or leave it. It is not surprising that defendants quickly rejected the proposal in favor of switching to existing wholesalers without surcharges, refusing to accept the terms of Anderson's new business model. No reasonable jury could find on this record that the defendants entered into "a conscious commitment to a common scheme designed to achieve an unlawful objective." *Apple, 791 F.3d at 315*.

For this reason and those discussed above, we **AFFIRM** the District Court's judgments.

ORDER GRANTING IN PART AND DENYING IN PART MOTION TO DISMISS COUNTERCLAIMS AND STRIKE AFFIRMATIVE DEFENSES

Re: Dkt. No. 120

INTRODUCTION

Avocent Huntsville, LLC ("Avocent") filed this patent infringement suit against ZPE Systems, Inc. ("ZPE"), and ZPE answered with counterclaims of its own. In short, ZPE contends that Avocent procured its patents by intentionally omitted material prior art from its patent applications. From this premise, it asserts counterclaims for declaratory relief of unenforceability based on Avocent's inequitable conduct and Sherman Act antitrust **[*2]** and attempted antitrust claims. It also raises counterclaims for declaratory relief of no trade secret misappropriation, no breach of contract, invalidity and non-infringement of the patents, and claims for negligent and intentional interference with prospective economic advantage, vexatious litigation and unfair competition under California's Unfair Competition Law. ZPE has plausibly pleaded all but the claims for negligent and intentional interference, which fail because it has not adequately alleged actual damage to an existing economic relationship, and vexatious litigation, which is not a cause of action. In addition, I will strike two of its affirmative defenses—inventorship and failure to join a necessary party—because they are insufficiently pleaded.

BACKGROUND

I. PROCEDURAL HISTORY

On July 28, 2017, Avocent filed suit against ZPE asserting infringement of Avocent's U.S. Patent Nos. 7,478,152 and 7,853,682 (collectively, the "Asserted Patents"). Compl. ¶¶ 18-71 (Dkt. No. 1). On October 17, 2017, it filed a first amended complaint. ("FAC")(Dkt. No. 41). On April 4, 2018, ZPE filed its Answer and Counterclaims (Dkt. No. 84), which Avocent moved to dismiss (Dkt. No. 99), and ZPE responded by filing amended counterclaims **[*3]** and affirmative defenses. Am. Answer and Counterclaims("AAC")((Dkt. No. 113). ZPE raises the following affirmative defenses: (1) patent invalidity, (2) non-infringement, (3) patent unenforceability, (4) claim construction estoppel, (5) prosecution history estoppel, (6) disclaimer, (7) no willful infringement, (8) limitation by prior art, (9) license, (10) limitation of damages, (11) no injunctive relief, (12) inventorship, and (13) failure to join necessary parties. AAC at 8-11. And it alleges counterclaims for: (1) declaratory judgment of no misappropriation of trade secrets, (2) declaratory judgment of no breach of contract, (3) declaratory judgment of invalidity of the Asserted Patents, (4) declaratory judgment of noninfringement of the Asserted Patents, (5) declaratory judgment of unenforceability of the Asserted Patents, (6) vexatious litigation, (7) monopolization in violation of *§ 2* of the Sherman Act, (8) attempted monopolization in violation of *§ 2* of the Sherman Act, (9) negligent interference with prospective economic advantage, (10) intentional interference with prospective economic advantage, and (11) unfair competition under *Cal. Business & Professions Code § 17200*.[1] AAC at 13-51.

In the first two counterclaims, ZPE mentions "Avocent's allegations **[*4]** set forth in its Alabama complaint[.]" AAC ¶¶ 10, 18. These allegations reference Avocent's complaint filed in Alabama state court on December 15, 2017, in which it asserts claims for Trade Secret Misappropriation Pursuant to the Federal Defend Trade Secrets Act and the Alabama Trade Secrets Act, Breach of Contract, Tortious Interference with Business Relations, and Civil Conspiracy. No. 47-cv-2017-902128, Dkt. No. 1 (Madison County Circuit Court). On January 22, 2018, ZPE removed that case to federal court in the Northern District of Alabama, No. 5:18-cv-113 ("the Alabama Action")(Dkt. No. 1), and moved to dismiss for lack of personal jurisdiction. No. 5:18-cv-113 (Dkt. No. 6). ZPE's motion has been fully briefed and remains pending.

II. FACTUAL BACKGROUND [2]

A. The Parties and The Products

Avocent has asserted, and ZPE repeats, that Avocent is "the largest supplier of serial console servers in the market[,]" and Avocent has represented that its market share was over 50 percent. ACC ¶¶ 143-44 (citing Wirts

---

[1] ZPE incorrectly numbered counterclaims six through 11 as four through nine; the correct numbers are indicated here.

[2] Because ZPE references Avocent's original complaint, FAC, and the complaint in the Alabama Action, some of those factual allegations are included in this background. Only factual allegations relevant to ZPE's amended counterclaims are included here. For a more thorough recitation of the background, see the Order Denying Motion for Preliminary Injunction and Denying Motions to Dismiss (Dkt. No. 82).

Decl.). In 2013, two prior Avocent employees, Arnaldo Zimmermann and Livio Ceci,[3] formed ZPE, which sells competitive information technology products, including the NodeGrid Serial ConsoleTM **[*5]** out-of-band console switches. ACC ¶¶ 28 - 33 (citing Avocent's complaints and incorporating ZPE's opposition to Avocent's motion for preliminary injunction). Avocent alleges that the NodeGrid Serial ConsoleTM competes directly with its ACS Console Switch products, which "enable IT managers to access and control computers on a network, including those connected to the network over internet connections." FAC ¶ 1.

In late 2016, Avocent began losing business to ZPE. Avocent's complaint and FAC reference ZPE's purported misappropriation of Avocent trade secrets and alleged breaches of a non-disclosure agreement. *See* ACC ¶¶ 9-23.

B. The Patents

1. Prosecution

The patent application that would issue as the '152 Patent was filed in the U.S. Patent and Trademark Office (PTO) on June 29, 2004. ACC ¶ 38. It was assigned application number 10/881,211 ("the '211 application"), and identified purported inventors Graham Holt and Marcio Saito, who assigned the application to their employer at the time, Cyclades Corporation. *Id.* ¶¶ 38-40. Avocent acquired Cyclades in March 2006. *Id.* ¶ 41. On June 26, 2006, Cyclades revoked all previous powers of attorney regarding the prosecution of the '211 application in the PTO, **[*6]** and appointed the law firm Davidson Berquist Jackson & Gowdey LLP power of attorney to prosecute the '211 application. *Id.* ¶ 42. The PTO currently lists Davidson Berquist Jackson & Gowdey LLP attorneys James Berquist, Donald Jackson and John Davidson, among others, as the attorneys responsible for the '152 Patent. *Id.* ¶ 45. In July 2006, Cyclades assigned the '211 application to Avocent's predecessor Avocent Fremont Corporation. *Id.* ¶ 47. The '211 application issued as the '152 Patent on January 23, 2009. *Id.* ¶ 48.

The patent application that would issue as the '682 Patent was filed in the PTO on August 29, 2008, and assigned application number 12/201,899 (the '899 application"). ACC ¶ 49. It identifies the same purported inventors, Holt and Saito. *Id.* ¶ 52. On behalf of Avocent, attorneys at Davidson Berquist Jackson & Gowdey LLP filed a terminal disclaimer limiting the term of the patent that would issue to that of the '152 patent given the similarities of the claims. *Id.* ¶¶ 53-54. The '899 application issued as the '682 patent on December 10, 2010. *Id.* ¶ 57.

"At least Scott Davidson, a named partner of Davidson Berquist Jackson & Gowdey LLP, was intimately involved in the prosecution of the '211 and '899 patent applications before the [PTO], including, **[*7]** for example and among other things, preparing and submitting responses to multiple office actions, preparing and submitting amendments to the then-pending claims, preparing and submitting arguments to office actions, submitting payment of fees, including the issue fees, preparing and submitting information disclosure statements, and preparing and submitting a terminal disclaimer." ACC ¶ 58.

During prosecution of the '211 patent application, the PTO issued an Office Action rejecting the pending claims in view of certain prior art, including U.S. Patent No. 6,526,442 ("Stupek"). Scott Davidson of Davidson Berquist Jackson & Gowdey LLP submitted a response representing that "[t]he key difference between Stupek and the claimed invention lies in the vital distinction between an in-band management system and an out-of-band-management system. . . . Stupek does not . . . claim to be an out-of-band management tool." ACC ¶ 122. He further represented that, "Stupek teaches managed devices, but it does not teach that they are implemented in an out-of-band network. ... ." *Id.*

2. Inequitable Conduct

---

[3] Zimmerman and Ceci have worked together for "decades, starting long before [their] work[] at Avocent." Zimmerman Decl. ¶ 3.

a. Competitors' Prior Art Products

ZPE alleges that Avocent concealed material prior art during prosecution, including its own products, **[*8]** products from Cyclades (its competitor prior to acquisition), and current competitors Xceedium Inc. and Raritan Computer (now Raritan Inc.). ACC ¶ 60. "[A]ll of these companies made and sold console management products and related software, and competed head-to-head in the market." *Id.* ¶ 61.

ZPE contends that Avocent, purported inventor Holt, and Davidson Berquist Jackson & Gowdey LLP were all involved in the prosecution of a separate, unrelated patent application filed shortly after the '211 application entitled "Remote Network Node Management System and Method"; this application issued as U.S. Patent No. 7,552,213 (the "'213 Patent"). ACC ¶ 63. This application explicitly referenced the potential for integration "with an access management gateway appliance such as Cyclades AlterPath Manager, Xceedium SSL-UAG+, Avocent DSView, Raritan CommandCenter." *Id.* (quoting '213 Patent at 4:35-39). "DSView is an Avocent management software product and is a key piece of Avocent's DS series operating system." *Id.* ¶ 70. Avocent has offered DSView for sale since at least 2001, three years prior to the filing dates of the Asserted Patents. *Id.* ¶ 71.

"The Raritan CommandCenter product was on sale and in public use since 2001," and "documentation **[*9]** describing the technical function and operation of the Raritan CommandCenter was published and publicly available for many years prior to the effective filing date of the '211 and '899 patent applications." ACC ¶¶ 102-03. The CommandCenter product is covered by U.S. Patent No. 8,176,155 (the "'155 Patent"), filed by Raritan. *Id.* ¶ 105. Avocent and Raritan were involved in an intellectual property dispute between 2001 and 2005, during the pendency of the '211 patent application. *Id.* ¶ 101.

Likewise, the Xceedium SSL-UAG+ product (formerly the Xceedium Xio UAG product) 5 was on sale and in public use, and documentation describing the technical functions and operations of the product was published and publicly available prior to the effective filing date of the Asserted Patents." ACC ¶¶ 113-16.

APE asserts that Avocent, the purported inventors, and attorneys at Davidson Berquist Jackson & Gowdey LLP "intentionally withheld all of this anticipatory, highly-material, prior art evidence ... during the entire prosecution of the Asserted Patents, which comprised more than a sex year period from June 2004 to December 2010." ACC ¶ 73.

b. Avocent's Prior Art Patents

Avocent also owns U.S. Patent No. 6,378,009, (the "'009 Patent"), which issued in 2002 and claims priority to 1998, and was **[*10]** also prosecuted by attorneys Scott Davidson, James Berquist and Donald Jackson (all current partners at Davidson Berquist Jackson & Gowdey LLP), and teaches "[a]n apparatus, method, and system for providing control, status, and security functions in a peripheral switch for connecting one or more computers to one or more user stations." ACC ¶¶ 81-83 (quoting '009 Patent, Abstract). "Avocent and its prosecution counsel, including at least Mr. Davidson, intentionally and with deceptive intent concealed the existence of the '009 Patent from the [PTO] during prosecution of the asserted patents because they knew such information would invalidate the asserted claims, and the claims never would have issued had they disclosed that information to the [PTO]." *Id.* ¶ 86.

Avocent and the same attorneys also prosecuted another patent application that was related to Avocent's DSView management system, U.S. Patent No. 6,633,905 (the "'905 Patent"), which claims priority to 1998 and issued on October 13, 2003. ACC ¶ 88. The '905 Patent includes the following description:

> KEY-VIEW II thus provides network administrators with unconditional access to any network server (Host PC) without requiring either CPU or Local Area Network (LAN) communications support from the Host **[*11]** PC or the network. . . . Using the KEY-VIEW PC multiple PCs may be controlled remotely using a single phone line, LAN node connection or Internet Address. . . . NET-911 Control Modules permit remote power control and serial access to an unlimited number of PCs or other devices, such as routers, printers, copy machines, etc.

> Unlike other remote power control products that require their own phone line, NET-911 modules can be chained together and connected to the serial port of any PC previously set up for remote access. 'Module Management Software' supplied with NET-911 modules may then be installed on this 'Management PC' and remotely activated whenever necessary to control power and serial access to up to 250 devices connected to the PC's serial port.

ACC ¶ 90 (quoting '905 Patent at 3:7-5:28). ZPE alleges that Avocent and its prosecution counsel concealed the existence of the '905 Patent from the PTO during prosecution of the Asserted Patents. *Id.* ¶ 93.

In 2000, Avocent and the same prosecuting attorneys prosecuted another patent, U.S. Patent No. 6,681,250 (the "'250 Patent"), entitled "Network Based KVM Switching System," which incorporates by reference the '905 and '009 patents. ACC ¶ 94. The '250 Patent claims priority to 2000 and issued on January 20, 2004. *Id.* **[*12]** ZPE asserts that Avocent and prosecuting attorneys intentionally concealed the existence of the '250 patent during prosecution of the Asserted Patents. ACC ¶ 98.

3. The Teachings

The background section of the patents provides,

> Data center management professionals commonly use network management tools for monitoring and restoring the operation of network nodes such as computer servers, network appliances, security appliances, storage devices, sensors, and controls. These typical network management tools permits the professional to manage and restore the operations of the network nodes remotely. Typically, these network management tools are divided in two categories: in-band management tools and out-of-band management tools. An in-band management tool relies on the data network connected to the network nodes to transport the management information. An out-of-band management tool creates an alternative path to communicate with the network nodes using alternative hard ware means such as dial up phone lines or separate networks that are used exclusively for management. The out-of-band management tool permits the supervisor to access the managed network nodes even when the network nodes lose network connectivity. **[*13]**

'682 patent at 1:24-41 (Dkt. No. 41-1); '152 patent at 1:16-33 (Dkt. No. 41-2). The summary describes the invention as "a single common aggregation point for a plurality of out-of-band interfaces, offering consolidation close to the managed devices that avoids the transport of disparate data streams across the corporate and public networks." '682 patent at 2:62-66; '152 patent at 2:54-58.

Avocent's Disclosure of Asserted Claims and Infringement Contentions identify its DSView as a "product ... that incorporates" the asserted claims of the '152 and '682 patents. ACC ¶ 66 (citing Avocent's Patent *L.R. 3-1* Disclosures). It alleges that ZPE willfully infringes, both directly and indirectly, claim 1 of the '682 patent and claims 1 and 11 of the '152 patent through the NodeGrid-brand products.

C. The Market

ZPE defines the market as "the serial console server market" with a geographical boundary as the United States. ACC ¶ 147. "Serial console servers are electronic products that enable IT managers to access and control network equipment, including remote computers and other devices." *Id.* Avocent's parent Vertiv recently acquired (in January 2018) market players Geist and Energy Labs, Inc. *Id.* ¶ 149. ZPE is a "minority player" in the market. *Id.* ¶ 147.

Avocent protects its dominant **[*14]** market share through barriers to entry, such as the high costs of developing serial console servers, existing, anticompetitive exclusivity contracts, and so-called "vendor lock-in," which is "when a product from one vendor will only work or communicate with another product from the same vendor." ACC ¶ 148.

LEGAL STANDARD

I. MOTION TO DISMISS COUNTERCLAIMS

Under *Federal Rule of Civil Procedure 12(b)(6)*, a district court must dismiss a claim if it fails to state a claim upon which relief can be granted. To survive a *Rule 12(b)(6)* motion to dismiss, the claimant must allege "enough facts to state a claim to relief that is plausible on its face." *See* *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. A claim is facially plausible when the claimant pleads facts that "allow the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *See* *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (citation omitted). There must be "more than a sheer possibility that a defendant has acted unlawfully." *Id.* While courts do not require "heightened fact pleading of specifics," a claimant must allege facts sufficient to "raise a right to relief above the speculative level." *See* *Twombly, 550 U.S. at 555, 570*.

In deciding whether a claimant has stated a claim upon which relief can be granted, the Court accepts the claimant's allegations as true and **[*15]** draws all reasonable inferences in favor of the claimant. *See* *Usher v. City of Los Angeles, 828 F.2d 556, 561 (9th Cir. 1987)*. However, the court is not required to accept as true "allegations that are merely conclusory, unwarranted deductions of fact, or unreasonable inferences." *See* *In re Gilead Scis. Sec. Litig., 536 F.3d 1049, 1055 (9th Cir. 2008)*.

If the court dismisses the claims, it "should grant leave to amend even if no request to amend the pleading was made, unless it determines that the pleading could not possibly be cured by the allegation of other facts." *See* *Lopez v. Smith, 203 F.3d 1122, 1127 (9th Cir. 2000)*. In making this determination, the court should consider factors such as "the presence or absence of undue delay, bad faith, dilatory motive, repeated failure to cure deficiencies by previous amendments, undue prejudice to the opposing party and futility of the proposed amendment." *See* *Moore v. Kayport Package Express, 885 F.2d 531, 538 (9th Cir. 1989)*.

II. MOTION TO STRIKE AFFIRMATIVE DEFENSES

Federal Rule of Civil Procedure 12(f) allows the Court to strike from a pleading an insufficient defense or any redundant, immaterial, impertinent, or scandalous matter. *FED. R. CIV. P. 12(f)*. "The function of a *12(f)* motion to strike is to avoid the expenditure of time and money that must arise from litigating spurious issues by dispensing with those issues prior to trial." *Whittlestone, Inc. v. Handi-Craft Co., 618 F.3d 970, 973 (9th Cir. 2010)* (citation and alteration omitted). Motions to strike, however, "are generally disfavored by courts because **[*16]** the motions may be used as delaying tactics and because of the strong policy favoring resolution on the merits." *Barnes v. AT & T Pension Ben. Plan-Nonbargained Program, 718 F. Supp. 2d 1167, 1170 (N.D. Cal. 2010)* (citation omitted). Such motions should only be granted if "the matter has no logical connection to the controversy at issue and may prejudice one or more of the parties to the suit." *New York City Employees' Ret. Sys. v. Berry, 667 F. Supp. 2d 1121, 1128 (N.D. Cal. 2009)*. "Where the moving party cannot adequately demonstrate such prejudice, courts frequently deny motions to strike even though the offending matter literally was within one or more of the categories set forth in *Rule 12(f)*." *Id.* (citation and quotation marks omitted). "Ultimately, whether to grant a motion to strike lies within the sound discretion of the district court." *Cruz v. Bank of New York Mellon, No. 12-00846, 2012 U.S. Dist. LEXIS 95467, 2012 WL 2838957, at *2 (N.D. Cal. July 10, 2012)* (citing *Whittlestone, 618 F.3d at 973*).

DISCUSSION

I. COUNTERCLAIMS 1 & 2: DECLARATION OF NO MISAPPROPRIATION OF TRADE SECRETS AND NO BREACH OF CONTRACT

These counterclaims explicitly attack Avocent's claims in the Alabama Action. ACC ¶¶ 10, 18. ZPE contends that Avocent infused those issues into this action by referencing ZPE's purported trade secret misappropriation and breach of nondisclosure agreement in its complaint and first amended complaint (Dkt. Nos. 1, 41), and alleges that "Avocent has not identified any valid or enforceable trade secrets[,]" "ZPE has **[*17]** not misappropriated any Avocent trade secrets[,]" "Avocent has not identified any valid or enforceable nondisclosure agreements with ZPE or any other person or entity[,]" and "ZPE has not breached or caused to be breached any Avocent nondisclosure agreement." ACC ¶¶ 9-23.

Avocent moves to dismiss these counterclaims because (1) they fail to meet the pleading standard, (2) Avocent was "effectively" first-to-file in federal court, and (3) the court should otherwise decline to exercise jurisdiction over these counterclaims given the Alabama Action. Mot. to Dismiss Am. Counterclaims at 3-5 ("MTD")(Dkt. No. 120). Just as ZPE does not elaborate on its allegations other than those stated in the preceding paragraph, Avocent does not explain why the counterclaims should be dismissed for failure to state a claim, other than to contend that the counterclaims are not truly at issue in this patent infringement action. But Avocent cannot deny that it raised these issues in this action, even if it did not affirmatively assert claims for misappropriation of trade secret and breach of contract. *See* FAC ¶¶ 1-7 (describing how former Avocent employees founded ZPE and explicitly referencing the "Avocent **[*18]** Nondisclosure Agreement" and Avocent's "confidential information" including trade secrets). And even if I agreed that adjudication of those issues was not necessary to resolve Avocent's patent infringement claims, that does not mean that ZPE has failed to state a claim. Jurisdiction over declaratory relief claims exists when there is an actual controversy, *see* *28 U.S.C. § 2201(a)*; Avocent's assertion of these claims in the Alabama Action suggests that an actual controversy exists.

As for Avocent's second argument, Avocent acknowledges that the Alabama Action was not technically the first-filed action, *see* MTD at 3 n.1 (noting that the underlying complaint in the Alabama Action was filed on December 15, 2017), but it narrows its focus on ZPE's amended counterclaims to argue that its Alabama Complaint and ZPE's subsequent removal of that complaint predate ZPE's counterclaims. *See* MTD at 4. The "first to file" rule is "a generally recognized doctrine of federal comity which permits a district court to decline jurisdiction over an action when a complaint involving the same parties and issues has already been filed in another district." *Pacesetter Sys., Inc. v. Medtronic, Inc., 678 F.2d 93, 94-95 (9th Cir. 1982)*. This action is technically the first-filed, and Avocent's narrowly focused arguments to **[*19]** the contrary are unpersuasive.

Moving on to Avocent's third argument, the Declaratory Judgment Act on its face provides for discretion: "[i]n a case of actual controversy within its jurisdiction, ... any court of the United States ... may declare the rights and other legal relations of any interested party seeking such declaration... ." *28 U.S.C. § 2201(a)*; *see also* *Wilton v. Seven Falls Co., 515 U.S. 277, 286, 115 S. Ct. 2137, 132 L. Ed. 2d 214 (1995)* ("[T]he Declaratory Judgment Act has been understood to confer on federal courts unique and substantial discretion in deciding whether to declare the rights of litigants."); *Leadsinger, Inc. v. BMG Music Publ'g, 512 F.3d 522, 533 (9th Cir. 2008)* ("Federal courts do not have a duty to grant declaratory judgment; therefore, it is within a district court's discretion to dismiss an action for declaratory judgment."). As part of Avocent's claims for willful infringement of its patents, I will be presented with evidence of its breach of contract and trade secret misappropriation claims, even though it has not affirmatively asserted those claims here.

Given these circumstances and the unavoidable fact that this is actually the first filed action, I decline to dismiss ZPE's counterclaims for declaratory relief under my discretionary authority.[4] *See* *Wilton, 515 U.S. at 289* ("We

---

[4] Avocent acknowledges that I need not consider the *Brillhart* factors under my discretionary authority to hear these declaratory relief claims, but argues that I should nonetheless allow them to guide my analysis. Mot. at 5 (citing *Brillhart v. Excess Ins. Co. of America, 316 U.S. 491, 495, 62 S. Ct. 1173, 86 L. Ed. 1620 (1942)*; Reply at 2 ("[T]his Court has discretion to consider whether to dismiss these counterclaims, D.I. 120 at 4-5, and may do so with or without applying the *Brillhart* factors[.]"). The Ninth Circuit has sanctioned consideration of the *Brillhart* factors, even when a case has been removed and there is no pending state court action. *Huth v. Hartford Ins. Co. of the Midwest, 298 F.3d 800, 803 (9th Cir. 2002)*. The *Brillhart* factors dictate that a "district court should avoid needless determination of state law issues; it should discourage litigants from filing declaratory actions as a means of forum shopping; and it should avoid duplicative litigation." *Huth, 298 F.3d at 803*.

believe it more consistent with the statute to vest district courts **[*20]** with discretion in the first instance, because facts bearing on the usefulness of the declaratory judgment remedy, and the fitness of the case for resolution, are peculiarly within their grasp."). Avocent's motion to dismiss these claims is DENIED.

II. COUNTERCLAIMS 3 & 4: NON-INFRINGEMENT AND INVALIDITY

"Declaratory relief is appropriate '(1) when the judgment will serve a useful purpose in clarifying and settling the legal relations in issue, and (2) when it will terminate and afford relief from the uncertainty, insecurity, and controversy giving rise to the proceeding.'" *Guerra v. Sutton, 783 F.2d 1371, 1376 (9th Cir. 1986)*. Avocent argues that ZPE's counterclaims for non-infringement and invalidity should be dismissed because the issues will necessarily be decided when adjudicating its affirmative claims for patent infringement. MTD at 8 (citing *Loblaw Cos. Ltd. v. Azimi, No. C-00-3591 WHO, 2001 U.S. Dist. LEXIS 26500, at *39-40 (N.D. Cal. Oct. 17, 2001)*); *see* *Loblaw, 2001 U.S. Dist. LEXIS 26500, at *40* ("Here, the declaratory relief sought is unnecessary and serves no useful purpose, as the issue upon which declaratory relief is sought will be decided in the course of litigating Loblaw's claims.").

But "[a] party seeking a declaratory judgment **[*21]** of invalidity presents a claim independent of the patentee's charge of infringement." *Cardinal Chem. Co. v. Morton Int'l, Inc., 508 U.S. 83, 96, 113 S. Ct. 1967, 124 L. Ed. 2d 1 (1993)*. In *Cardinal Chemical*, the Supreme Court rejected the Federal Circuit's practice of vacating judgments on patent validity after finding noninfringement because "[a] finding of noninfringement alone ... does not justify such a result." *Id. at 102*. Even though I will necessarily evaluate ZPE's challenges to the validity of the Asserted Patents in resolving Avocent's claims for patent infringement, ZPE's declaratory judgment claim for invalidity serves an additional useful purpose of informing the public as to the validity of the patents. *See* *id. at 100* (emphasizing "the importance to the public at large of resolving questions of patent validity"). Avocent's motion to dismiss ZPE counterclaim for invalidity is DENIED.

As for its counterclaim for noninfringement, ZPE conceded at the hearing that it serves no purpose beyond Avocent's affirmative claims for patent infringement. Judgment on those claims will necessarily address the content of ZPE's counterclaim for noninfringement. Under these circumstances, dismissal is appropriate. Avocent's motion to dismiss ZPE counterclaim for noninfringement is GRANTED.

III. COUNTERCLAIM [*22] 5: UNENFORCEABILITY BASED ON INEQUITABLE CONDUCT

A. Legal Framework

Inequitable conduct must be pleaded with particularity under *Rule 9(b)*. *Exergen Corp. v. Wal-Mart Stores, Inc., 575 F.3d 1312, 1326 (Fed. Cir. 2009)*. "The substantive elements of inequitable conduct are: (1) an individual associated with the filing and prosecution of a patent application made an affirmative misrepresentation of a material fact, failed to disclose material information, or submitted false material information; and (2) the individual did so with a specific intent to deceive the PTO." *Id. at 1327 n.3*. A party may generally plead specific intent, but the allegations must be sufficient for a court to reasonably infer that a party acted with the requisite state of mind. *Id. at*

Here, the first factor may slightly favor Avocent, since its Alabama complaint asserts claims under Alabama state law. I note, however, that ZPE disputes the choice of law, which Avocent presents as a settled issue. It may be that Alabama law does not apply after all. The second factor clearly favors ZPE—it filed counterclaims here, in the first filed action, after Avocent sued it for patent infringement. It cannot be accused of forum shopping. And, at this point, the third factor favors Avocent since its Alabama complaint asserts these affirmative claims. But ZPE underscores the pending motion to dismiss that complaint for lack of personal jurisdiction, and indicates that it plans to file a motion to transfer that action to this venue, if its motion to dismiss is denied. Given the potential that these actions may still be consolidated here, there is no guarantee of duplicative litigation. In short, the *Brillhart* factors do not add much value to the analysis.

1327. "A pleading that simply avers the substantive elements of inequitable conduct, without setting forth the particularized factual bases for the allegation, does not satisfy Rule 9(b)." Id. at 1326-27. Rather, "Rule 9(b) requires identification of the specific who, what, when, where, and how of the material misrepresentation or omission committed before the PTO." Id. at 1327.

B. Analysis

Avocent challenges ZPE's inequitable conduct counterclaim on three grounds—it takes issue with ZPE's reliance on its own invalidity charts to demonstrate the materiality of the purported prior art references **[*23]** (MTD at 9-10), it contends that ZPE has not adequately pleaded Avocent's knowledge of that materiality during prosecution of the Asserted Patents (*id.* at 10-11), and it argues that ZPE has not included sufficient allegations from which I can reasonably infer Avocent's intent to deceive (*id.* at 11-12). ZPE counters that it has sufficiently identified the who, what, when, and where of the inequitable conduct; namely, "a six-year long campaign by Mr. Davidson ... to conceal at least six categories of anticipatory prior art, including prior art Avocent patents that Mr. Davidson prosecuted, and the very existence of anticipatory prior art products, public uses and sales, of which there is no dispute that Mr. Davidson was well-aware." Opp'n at 6-7.[5]

1. Materiality

An accused infringer claiming that a patentee withheld material prior art references must plead "how an examiner would have used this information in assessing the patentability of the claims." Exergen, 575 F.3d at 1330. To answer this question, ZPE incorporates by reference its Rule 3-3 Invalidity Contentions into its Amended Counterclaims, which draw language from Avocent's Infringement Contentions, thereby linking the claims to information in the purported prior art references. Avocent challenges **[*24]** the invalidity charts as inadequate because they are conclusory and do not construe disputed claims. But it cites no cases supporting its view that claim charts detailing an element by element comparison against a prior art reference are insufficient to allege materiality. Unlike the situation in *Exergen*, the Invalidity Contentions identify the claims, the limitations in those claims, and the information in the prior art references. *Cf.* id. at 1329-30. Avocent cannot legitimately challenge ZPE's allegations on this front.

2. Knowledge of Materiality

During the hearing, Avocent made clear that its strongest argument against inequitable conduct rests under this element. Even if the prior art references are material, Avocent insists that ZPE has not adequately pleaded its knowledge of that materiality. But ZPE highlights Avocent's own disclosures that its DSView was a "product ... that incorporates" the asserted claims of the Asserted Patents (ACC ¶¶ 66, 69; *see* Avocent's November 22, 2017 Patent L.R. 3-1 Disclosure at 3-1(g) at 7-8; Avocent's January 9, 2018 Patent L.R. 3-1 Supplemental Disclosure at 3-1(g) at 8-9 (identifying DSView as practicing '152 Patent claims 1, 2, 3, 5, 6, 7, 8, 10, 11, 12, 13, 14, 15, and 16, and '682 Patent claims 1, 2, 3, 5, **[*25]** 6, and 8)), thereby establishing its materiality, and it alleges that the DSView products were on sale more than a year before the Asserted Patents were filed. *See also* ACC ¶ 76 (citing to ZPE's Rule 3-3 Invalidity Claim Charts comparing prior art references against asserted claims). Avocent points out that it identified the *current* line of DSView products in its disclosures, but "absolutely disputes that all earlier versions of DSView practiced the '152 and '682 patents." Reply at 7. But the specific contours of Avocent's disclosures and the scope of the various product versions are issues best left for resolution at a later stage.

---

[5] ZPE mentions the named inventors who "remained Avocent employees through at least the issuance of the '682 Patent on December 10, 2010[,]" ACC ¶ 59, and specifically focuses on purported inventor Graham Holt, who it alleges was aware of and concealed material prior art, *id.* ¶¶ 62, 65-66, 73-75, 79. But it does not appear to argue Holt's deceptive intent in its opposition to Avocent's motion. *See* Opp'n at 10; Reply at 4 n.4 (noting that ZPE "identifie[d] only Mr. Davidson as the alleged 'who'... .").

Even ignoring the different product lines, Avocent argues that ZPE's allegations related to DSView rely on six references, totaling 317 pages, and fail to establish that any individual knew of the materiality of any portion of the references. It cites *Exergen* for the proposition that "[a] reference may be many pages long, and its various teachings may be relevant to different applications for different reasons." *575 F.3d at 1330*. The court found that "one cannot assume that an individual, who generally knew that a reference existed, also knew of the specific material *information* contained in that **[*26]** reference." *Id.*

But, unlike in *Exergen*, ZPE provides a factual basis to infer that a specific individual, Mr. Davidson, owed a duty of disclosure in prosecuting the Asserted Patents, and knew of specific information in prior art, either because he prosecuted the purported prior art patents, participated in litigation involving purported prior art products, or cited to purported prior art in the prosecution of the '213 patent, which overlapped with the prosecution of the Asserted Patents.[6] *Compare* ACC ¶¶ 63, 65, 70-73, 100-101, 117 (alleging Mr. Davidson's knowledge of Raritan's CommandCenter product based on involvement in patent infringement suit and citation to reference during '213 Patent prosecution); *id.* ¶¶ 88-95 (alleging that Avocent's Patent Nos. '905 and '250 were prosecuted by Mr. Davidson and fully anticipate the Asserted Patents); *id.* at ¶ 117 (noting Mr. Davidson's citation to Xceedium's SSL-UAG+ product during prosecution of '213 Patent), *with* *Exergen, 575 F.3d at 1330* ("The pleading, however, provides no factual basis to infer that any specific individual, who owed a duty of disclosure in prosecuting the '685 patent, knew of the specific information in the '808 and '998 patents that is alleged to be material to the claims of the '685 patent.").

Avocent contends that ZPE's knowledge **[*27]** of materiality allegations are conclusory, but I see no need to require it to allege more than it has—materiality of the prior art, knowledge of the prior art, and, as discussed below, an intent to deceive inferred from the allegation that prosecuting attorneys included the disclosures in a simultaneously prosecuted patent application. These allegations are sufficient to support ZPE's non-conclusory inference that Avocent knew of the materiality of the prior art references. *See* *Exergen, 575 F.3d at 1330*.

3. Intent to Deceive

Avocent contends that "ZPE does not and cannot provide any factual basis from which intent to deceive can be reasonably inferred." MTD at 11. It relies on *International Test Solutions, Inc. v. Mipox International Corp., No. 16-cv-00791-RS, 2017 U.S. Dist. LEXIS 74640 (N.D. Cal. May 16, 2017)* and my decision in *ILife Technologies, Inc. v. Aliphcom, No. 14-cv-03345-WHO, 2015 U.S. Dist. LEXIS 20743 (N.D. Cal. Feb. 19, 2015)*. But its arguments fall short.

In *International Test Solutions*, the Hon. Richard Seeborg found that "[g]eneral knowledge of ITS operations is 'not sufficient to support an inference that [Broz or Adams] knew of specific material information contained in the prior art allegedly withheld.'" *2017 U.S. Dist. LEXIS 74640, at *18*. He concluded that the named inventor could be imputed with knowledge of the omitted reference, but Mipox's **[*28]** allegation that the named inventor deliberately withheld that information for commercial and financial benefit went "too far." *2017 U.S. Dist. LEXIS 74640 at *22*; *see id.* ("By Mipox's logic, any individual may reasonably be suspected of fraud on behalf of his employer. Even assuming Humphrey's actual knowledge of the ITS data sheets, Mipox pleads no factual basis to explain why these ordinary economic circumstances would plausibly induce fraud on the PTO."). But unlike the situation in *International Test Solutions*, ZPE has provided factual allegations from which I can reasonably infer that Mr.

---

[6] ZPE also alleges that Davidson responded to an Office Action rejecting claims in view of U.S. Patent No. 6,526,442 ("Stupek") representing that "[t]he key difference between Stupek and the claimed invention lies in the vital distinction between an in-band management system and an out-of-band-management system. . . . Stupek does not . . . claim to be an out-of-band management tool." Am. Counterclaims ¶ 122 (quoting October 9, 2007 Response to Office Action). ZPE argues that Davidson had a duty to disclose prior art "known to them to show managed devices that were implemented in out-of-band networks that were implemented in out-of-band networks... ." *Id.*; *see* Opp'n at 13 (arguing that a prosecuting attorney's failure to identify prior art that contradicts his assertion provides a distinct grounds for inequitable conduct under *37 C.F.R. 1.56(b)*).

Davidson, the prosecuting attorney, deliberately omitted prior art references from the applications underlying the Asserted Patents that he included in the simultaneous prosecution of the of other patents. Avocent has not provided a reason for this omission; at this stage, I must accept ZPE's plausible allegations.

In *ILife*, I denied plaintiff's motion to dismiss Aliphcom's counterclaim for inequitable conduct in part because the counterclaim provided "detailed, plausible allegations that both Lehrman [the inventor] and attorney William A. Munck knew of prior art that invalidated European patent application that were similar to **[*29]** the U.S. patents at issue, but failed to disclose it to the PTO." *ILife, 2015 U.S. Dist. LEXIS 20743, at *3*. Avocent seizes on my language that the facts of that case presented "a close question" of whether a named inventor and prosecuting attorney intended to deceive the PTO, and it aims to distinguish the facts of that case. *See* MTD at 11-12 (citing *ILife, 2015 U.S. Dist. LEXIS 20743, at *26)*. But, just as in *ILife*, ZPE alleges that a prosecuting attorney knew of material information and cited that art to the PTO in one matter but not in the applications for the Asserted Patents. *2015 U.S. Dist. LEXIS 20743, at *22*. The difference is that the prosecuting attorney in *ILife* had reason to omit the references after the European patent claims were invalidated. *See id.* Here, ZPE asks me to infer the reason why Davidson omitted material prior art in the applications underlying the Asserted Patents while including it in the application underlying the '213 Patent—because that prior art would invalidate the Asserted Patents.

"The specific intent to commit inequitable conduct may be inferred from indirect and circumstantial evidence." *Ohio Willow Wood Co. v. Alps S., LLC, 735 F.3d 1333, 1351 (Fed. Cir. 2013)*. "But, deceptive intent must be 'the single most reasonable inference drawn from the evidence.'" *Id.* ZPE alleges that Mr. Davidson was "intimately involved" in prosecuting the applications underlying the Asserted Patents, **[*30]** ACC ¶ 58, personally prosecuted Avocent's prior art patents and included references to some of the prior art in applications prosecuted at the same time. Given the closeness in time, the deceptive intent is "the single most reasonable inference" rather than the omissions resulting from mere negligence. *Cf*. *1st Media, LLC v. Elec. Arts, Inc., 694 F.3d 1367, 1374-75 (Fed. Cir. 2012)* (noting in the context of the sufficiency of the *evidence* to sustain a charge of inequitable conduct "it is not enough to argue carelessness, lack of attention, poor docketing or cross-referencing, or anything else that might be considered negligent or even grossly negligent."); *see also* *Cypress Semiconductor Corp. v. GSI Tech., Inc., No. 13-cv-02013-JST, 2014 U.S. Dist. LEXIS 31462, at *21-22 (N.D. Cal. Mar. 9, 2014)* ("GSI has provided facts showing that the prosecution attorney made misrepresentations with regard to the Ryan Reference. Based on this evidence, this Court concludes that GSI has alleged sufficient facts in its pleading from which the Court can reasonably infer that intent to deceive is the single most reasonable inference to be drawn from the evidence.").

ZPE has alleged the who (Mr. Davidson), the what (the particular claims and limitations for which the withheld references are relevant), the when (over a six-year period), the **[*31]** where (locations within the references), and the how (the materiality of those omitted prior art references through claim charts). *See* *Exergen, 575 F.3d at 1329-30* (explaining the who, what, where, why, and how of pleading inequitable conduct); *Coolsystems, Inc. v. Nice Recovery Sys. LLC, No. 16-CV-02958-PJH, 2016 U.S. Dist. LEXIS 145067, 2016 WL 6091577, at *3 (N.D. Cal. Oct. 19, 2016)*("The court finds that the 'who, what, when, where, and how' of this theory are sufficiently pled under *Exergen*. The who is 'at least' Kapur, and the when/where is during prosecution of the ⁄ª910 patent before the PTO. The 'what' is burying Elkins ⁄ª439 among the other references. The 'how' goes to the issue of materiality."). It has also plausibly pleaded the requisite scienter through the actions and omissions of Mr. Davidson. Avocent's motion to dismiss this counterclaim is DENIED.

IV. COUNTERCLAIM 6: VEXATIOUS LITIGATION

ZPE alleges that Avocent filed its initial complaint in this district in July 2017 referencing the "confidential and proprietary Avocent information and trade secrets" and "Avocent Nondisclosure Agreement," and yet, nearly five months later, chose to file a complaint against it and its co-founders in Alabama State Court asserting claims based on these allegations. ACC ¶¶ 125-133. According **[*32]** to ZPE, Avocent had "no reasonable basis" to file these claims, and "intentionally and maliciously filed a separate action for the sole purpose of straining ZPE's limited resources, in an attempt to put ZPE out of business via the expensive litigation process itself." *Id.* ¶¶ 135-38. ZPE alleges that Avocent's and its counsels' strategic decisions renders this action "exceptional" and the Alabama

Action "unreasonable and vexatious[.]" *Id.* ¶¶ 140-41 (citing *35 U.S.C. § 285* and *28 U.S.C. § 1927*). Avocent argues that these allegations do not give rise to separate claims for relief. MTD at 12. ZPE responds that "the question as to whether or not its allegation for *§ 1927* vexatious litigation is set forth in a counterclaim or in its Prayer for Relief may involve 'matters of form' rather than significance[.]" Opp'n at 15 (citing *GMA Accessories, Inc. v. Croscill, Inc., et al., No. 06 Civ. 6236 GEL, 2007 U.S. Dist. LEXIS 17589, 2007 WL 766294, *4 (S.D.N.Y. Mar. 13, 2007))*. But it "does not object to either method." *Id.*

"An assertion of an 'exceptional case' under *35 U.S.C. § 285* is not a separate cause of action, and '[t]herefore, [Plaintiffs] should not be permitted to include a separate count based on exceptional case, or the allegations underlying that nonexistent cause of action.'" *Interaxon Inc. v. Neurotek, LLC, No. 15-cv-05290-KAW, 2017 U.S. Dist. LEXIS 447, at *5 (N.D. Cal. Jan. 3, 2017)*. "Similarly, courts have found that sanctions under *28 U.S.C. § 1927* and **[*33]** *Federal Rule of Civil Procedure 11* are not separate causes of action." *Id.*; *see id.* (collecting cases). Accordingly, ZPE's counterclaim for vexatious litigation is DISMISSED. It can pursue these theories via its prayer for relief. *See* Prayer for Relief, ¶¶ D, F.

V. COUNTERCLAIMS 7 & 8: SHERMAN ANTITRUST ACT CLAIMS

ZPE alleges that "Avocent has monopoly power in, and a dominant and persistent share" of the serial console server marker in the United States. ACC ¶ 147. It further alleges that Avocent has attempted to monopolize the market by "procuring either or both the '152 and '682 patents by knowing and willful fraud and baselessly asserting them in bad faith in litigation against ZPE[.]" *Id.* ¶ 150. It contends that Avocent "promptly served subpoenas on ZPE's customers and prospective customers," which "substantially overlapped" with information it sought or could have obtained from ZPE, and were designed to "discourage ZPE's customers and prospective customers from engaging in business with ZPE." *Id.* ¶ 158.

Avocent argues that ZPE's antitrust claims are barred by the *Noerr-Pennington* doctrine, and otherwise fail to plausibly allege a claim of monopolization and attempted monopolization.

A. Whether *Noerr-Pennington* Bars the Claims

1. [*34] Legal Framework

"The *Noerr—Pennington* doctrine shields individuals from, *inter alia*, liability for engaging in litigation." *Microsoft Corp. v. Motorola, Inc., 795 F.3d 1024, 1047 (9th Cir. 2015)*. It originated in two Supreme Court cases which held that the *First Amendment's Petition Clause* prohibits imposing Sherman Act liability on those who petition the legislature or the executive, and was later expanded to preclude liability for those who petition the courts. *Id.* (citing *E. R.R. Presidents Conference v. Noerr Motor Freight, Inc., 365 U.S. 127, 136, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961)*; *United Mine Workers of Am. v. Pennington, 381 U.S. 657, 670, 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965))*; *see also* *Prof'l Real Estate Inv'rs, Inc. v. Columbia Pictures Indus., Inc., 508 U.S. 49, 51, 113 S. Ct. 1920, 123 L. Ed. 2d 611 (1993)*.
