JELD-WEN further contends that, even if JELD-WEN's breaches of the Supply Agreement could establish antitrust injury, Steves has not shown that those injuries are causally linked to the CMI Acquisition. In the antitrust context, the injury element "is often referred to as impact or fact of damage. It is the causal link between the antitrust violation and **[*669]** the damages sought by plaintiffs[,] [and] thus requires both injury-in-fact and a showing that the injury is the result of the antitrust activity." *In re New Motor Vehicles Canadian Exp. Antitrust Litig., 522 F.3d 6, 19 (1st Cir. 2008)* (internal citations and quotations omitted). To show "fact of damage" or impact, "[i]t is enough that the illegality is shown to **[**24]** be a material cause of the injury; a plaintiff need not exhaust all possible alternative sources of injury in fulfilling his burden of proving compensable injury." *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 114 n.9, 89 S. Ct. 1562, 23 L. Ed. 2d 129 (1969)* ("Zenith Radio I"). Thus, for example, proof of impact in a *Section 4* case can be shown by proof of what price the plaintiff would have paid had the merger never occurred. See *Robinson v. Tex. Auto. Dealers Ass'n, 387 F.3d 416, 422 (5th Cir. 2004)* ("[I]mpact may be shown simply by proof of purchase at a price higher than the competitive rate." (internal quotations omitted)); *In re Graphics Processing Units Antitrust Litig., 253 F.R.D. 478, 507 (N.D. Cal. 2008)* ("GPU") ("[I]n order to satisfy *Section 4* of the Clayton Act, plaintiffs must demonstrate that they paid a higher price for their graphics card or computer than they otherwise would have paid in the absence of a conspiracy.").[5] JELD-WEN argues that Steves has not met its burden because it has not shown what doorskin prices or quality would have been without the CMI Acquisition.

---

[5] As Steves notes, both Robinson and GPU discussed impact at the class certification stage, so evidence of a higher price that every class member would have had to pay would be the only way to satisfy the commonality and predominance requirements under *Rule 23*. See *Robinson, 387 F.3d at 422*; *GPU, 253 F.R.D. at 507*. Therefore, these cases do not necessarily indicate that an individual plaintiff must demonstrate a precise competitive benchmark to show impact, as causation could be shown through other individualized proof of harm.

Here too, however, JELD-WEN fails to account for certain evidence that supports Steves' theory of antitrust injury. Steves asserts that its liability expert, Carl Shapiro ("Shapiro"), did not conduct an empirical analysis of the prices that JELD-WEN would have charged absent the Acquisition because he did not need to: the Supply Agreement **[**25]** set the competitive benchmark of prevailing doorskin prices before the merger. JELD-WEN certainly disagrees that the Agreement is an accurate benchmark, but the weight of Shapiro's analysis is a question for the jury, not the Court. Moreover, evidence indicates that JELD-WEN increased doorskin prices from pre-merger levels even as key input costs at JELD-WEN's legacy plants declined.[6] Similarly, there is genuine evidence that the decrease in JELD-WEN's doorskin quality was exacerbated by the CMI Acquisition—even if JELD-WEN had begun to thin its doorskins before the merger—and that customers other than Steves suffered from quality issues. This circumstantial evidence is sufficient to create a dispute about whether the Acquisition caused anticompetitive effects that impacted Steves. See *Zenith Radio I, 395 U.S. at 114* (circumstantial evidence was sufficient to "sustain the inference" of impact). Consequently, summary judgment on Count One cannot be granted on this basis.

B. Future Lost Profits Damages Claim

JELD-WEN makes two separate arguments as to Steves' *Section 4* claim for **[*670]** future lost profits damages.[7] First, it asserts that the claim is not ripe, as Steves' future damages relate to an antitrust injury that Steves may never **[**26]** suffer. Second, JELD-WEN contends that even if those damages are based on an existing antitrust injury, Steves cannot recover them because they are unreasonably speculative. As noted, the Court reserved its decision on the second argument until Steves had presented evidence at trial, so the validity of Steves' future lost profits damages claim is not discussed in this opinion. However, because the ripeness contention calls into question the Court's jurisdiction over that claim at trial, the Court will address it here.

Article III of the Constitution limits federal courts to deciding actual "cases" and "controversies." *Doe v. Obama, 631 F.3d 157, 160 (4th Cir. 2011)*. JELD-WEN's motion pertains to two intertwined aspects of the justiciability requirement, standing and ripeness.[8] See *Miller v. Brown, 462 F.3d 312, 319 (4th Cir. 2006)* ("Analyzing ripeness is similar to determining whether a party has standing."). Although a plaintiff must satisfy three requirements to establish standing to seek particular relief, the only one relevant here is that the plaintiff must have suffered an injury in fact—"an invasion of a legally protected interest which is (a) concrete and particularized, and (b) actual or imminent, not conjectural or hypothetical." *Lujan v. Defs. of Wildlife, 504 U.S. 555, 560, 112 S. Ct. 2130, 119 L. Ed. 2d 351 (1992)* (internal citations and quotations omitted). However, "the standing doctrine **[**27]** only answers the question of who may sue, not the question of when a party may sue, which properly is addressed by the doctrine of ripeness." *Hispanic Leadership Fund, Inc. v. FEC, 897 F. Supp. 2d 407, 424 (E.D. Va. 2012)* (emphasis added) (citing *Miller, 462 F.3d at 319*).

The ripeness doctrine "prevents judicial consideration of issues until a controversy is presented in 'clean-cut and concrete form.'" *Miller, 462 F.3d at 318-19* (quoting *Rescue Army v. Mun. Ct. of L.A., 331 U.S. 549, 584, 67 S. Ct. 1409, 91 L. Ed. 1666 (1947))*. Under that inquiry, a court must "balance the fitness of the issues for judicial decision with the hardship to the parties of withholding court consideration." *Id. at 319* (internal quotations omitted). "A case is fit for judicial decision when the issues are purely legal and when the action in controversy is final and not dependent on future uncertainties." Id. In other words, "[a] claim is not ripe for adjudication if it rests upon contingent future events that may not occur as anticipated, or indeed may not occur at all.'" *Scoggins v. Lee's Crossing Homeowners Ass'n, 718 F.3d 262, 270 (4th Cir. 2013)* (alteration in original) (quoting *Texas v. United*

---

[6] This evidence can therefore show antitrust impact even without considering the cost reductions allowed by JELD-WEN's acquisition of CMI's Towanda plant because JELD-WEN still would have owned the legacy plants in the absence of the merger.

[7] Steves seeks these damages only under Count One because it concedes that JELD-WEN's September 2014 notice of termination of the Supply Agreement did not breach the contract.

[8] JELD-WEN does not assert that Steves lacks standing to seek future lost profits damages. However, the elements of Article III standing provide helpful context for JELD-WEN's ripeness argument; indeed, JELD-WEN referenced those elements when introducing the ripeness challenge in its supplemental brief.

States, 523 U.S. 296, 300, 118 S. Ct. 1257, 140 L. Ed. 2d 406 (1998)). "The hardship prong," on the other hand, "is measured by the immediacy of the threat and the burden imposed on the [plaintiff]," including "the cost to the parties of delaying judicial review." *Miller, 462 F.3d at 319* (internal quotations omitted). The plaintiff bears the burden of proving ripeness. Id.

The parties' arguments focus almost entirely on **[**28]** the first element—the fitness of **[*671]** Steves' future damages claim for judicial review. The disagreement on this issue concerns whether to characterize the injury causing the future damages as a present injury or a future injury. Steves contends that those damages stem from JELD-WEN's 2014 termination of the Supply Agreement. That injury, says Steves, is a consequence of the CMI Acquisition, which enhanced JELD-WEN's power in the interior molded doorskin market and allowed it to make long-term decisions that would limit the ability of competing door manufacturers to obtain a stable doorskin supply. As a result, whatever damages Steves incurs when the Supply Agreement terminates in September 2021 will relate to a previous anticompetitive act that impacted Steves long before 2021.

JELD-WEN, on the other hand, concedes that claims for some injuries from the CMI Acquisition may be ripe—such as, presumably, increased door prices. Nonetheless, it insists that Steves will only incur lost profits damages if it suffers another antitrust injury in 2021, when JELD-WEN stops providing Steves with doorskins and Steves cannot obtain an alternate doorskin supply. JELD-WEN asserts that even if that harm **[**29]** could be linked to the CMI Acquisition, its occurrence necessarily requires speculation about whether certain intervening events will come to pass. Specifically, the parties must fail to enter into another long-term doorskin supply agreement, JELD-WEN must refuse to supply doorskins to Steves on commercially viable terms, Steves must be unable to find any other source of doorskin supply, and Steves must go out of business or suffer a substantial loss.

This framing of the injury relies on the Supreme Court's discussion of antitrust injury and damages in *Zenith Radio Corp. v. Hazeltine Research, Inc., 401 U.S. 321, 91 S. Ct. 795, 28 L. Ed. 2d 77 (1971)* ("Zenith Radio II"). In that case, the court noted that, for purposes of the statute of limitations for *Section 4* damages claims, the general rule is that "a cause of action accrues and the statute begins to run when a defendant commits an act that injures a plaintiff's business." *Id. at 338*; see also *15 U.S.C. § 15*. In the specific context of "a continuing conspiracy to violate the antitrust laws . . . this [rule] has usually been understood to mean" that each injury suffered gives rise to a separate cause of action that is subject to its own limitations period. *Zenith Radio II, 401 U.S. at 338*; see also *Klehr v. A.O. Smith Corp., 521 U.S. 179, 189, 117 S. Ct. 1984, 138 L. Ed. 2d 373 (1997)* ("***Antitrust law*** provides that, in the case of a continuing violation, say, a price-fixing conspiracy **[**30]** that brings about a series of unlawfully high priced sales over a period of years, each overt act that is part of the violation and that injures the plaintiff . . . starts the statutory period running again . . ." (internal quotations omitted)).

In those circumstances, damages must be connected to the discrete injuries that caused them:

> [E]ach separate cause of action that so accrues entitles a plaintiff to recover not only those damages which he has suffered at the date of accrual, but also those which he will suffer in the future from the particular invasion, including what he has suffered during and will predictably suffer after trial. Thus, if a plaintiff feels the adverse impact of an antitrust conspiracy on a particular date, a cause of action immediately accrues to him to recover all damages incurred by that date and all provable damages that will flow in the future from the acts of the conspirators on that date.

Zenith Radio II, 401 U.S. at 338-39 (emphasis added) (internal citations omitted). By extension, then, "refus[ing] **[*672]** to award future profits as too speculative is equivalent to holding that no cause of action has yet accrued for any but those damages already suffered. In these instances, the cause of action **[**31]** for future damages, if they ever occur, will accrue only on the date they are suffered." *Id. at 339*. Applying this rationale here, the "particular invasion" that Steves' future lost profits damages relate to is, in JELD-WEN's view, the eventual expiration of the Supply Agreement in 2021. To the extent that such damages are linked to an antitrust injury that has already occurred, they are too speculative because so many intervening acts could change Steves' doorskin supply by that future date. Consequently, if Steves can obtain those damages at all, it can only do so when it actually loses JELD-WEN's doorskin supply and goes out of business in 2021.[9]

JELD-WEN's reading of *Zenith Radio II* misunderstands the scope of that case. Other courts have held that the "continuing violations doctrine" described in Zenith Radio II and Klehr can only be applied in "conspiracy and monopolization cases not involving mergers or acquisitions." *Z Techs. Corp. v. Lubrizol Corp., 753 F.3d 594, 599 (6th Cir. 2014)* (citing, inter alia, *Klehr, 521 U.S. at 189* (emphasizing that the case involved "a price fixing conspiracy"); *Zenith Radio II, 401 U.S. at 338-39* (discussion confined to "the context of a continuing conspiracy to violate the antitrust laws")); see also *Concord Boat Corp. v. Brunswick Corp., 207 F.3d 1039, 1052 (8th Cir. 2000)* ("Continuing violations have not been found outside the RICO or Sherman Act **[**32]** conspiracy context . . . because acts that simply reflect or implement a prior refusal to deal or acts that are merely unabated inertial consequences (of a single act) do not restart the statute of limitations." (internal quotations omitted)).

This action is predicated on a "single act," the CMI Acquisition, that—based on the disputed evidence—caused injury to Steves by allowing JELD-WEN to raise doorskin prices, decrease the quality of its doorskins with no risk of losing customers, and give notice of termination for the Supply Agreement without concern that Steves could obtain a steady doorskin supply elsewhere.[10] Those injuries appear to be the very "unabated inertial consequences (of a single act)" that do not implicate the continuing violations doctrine underlying JELD-WEN's argument. *Concord Boat, 207 F.3d at 1052*. JELD-WEN does not explain why that doctrine applies in this situation, such that Steves' future damages are necessarily separate from the injury suffered when JELD-WEN gave notice of termination for the Supply Agreement in 2014.[11] Therefore, JELD-WEN's **[*673]** claim that the Court must assess ripeness injury-by-injury is irrelevant here.[12] Steves has shown that whether it suffered antitrust injury when JELD-WEN **[**33]** provided that notice is a triable factual issue, and it is clear that a claim based on an existing injury is ripe. See *Miller, 462 F.3d at 319*.

Moreover, the only other relevant case cited by JELD-WEN, *SureShot Golf Ventures, Inc. v. Topgolf Int'l, Inc., No. CV H-17-127, 2017 U.S. Dist. LEXIS 135796, 2017 WL 3658948 (S.D. Tex. Aug. 24, 2017)*, is inapposite. There, plaintiff alleged that it suffered an antitrust injury following defendant's acquisition of a third party because defendant refused to give plaintiff assurances that it would exercise its option to renew the parties' contract for plaintiff's license to proprietary technology developed by the third party when that contract expired in five years. *2017 U.S. Dist. LEXIS 135796, [WL] at *3-4*. The court dismissed plaintiff's *Section 4* damages claim as unripe because defendant's "perceived threats of monopolistic behavior [we]re speculative and d[id] not confer standing." *2017 U.S. Dist. LEXIS 135796, [WL] at *4*. But, in reaching that conclusion, the court specifically noted that plaintiff had not pled that defendant had "denied it access to the [proprietary technology]." Id. In addition, "none of the

---

[9] To preserve the viability of this potential claim, JELD-WEN reiterates its earlier representation to the Court that—should Steves actually go out of business in 2021—JELD-WEN will not seek dismissal of a *Section 4* damages claim on the basis that the claim accrued earlier and is barred by the statute of limitations. Nor, says JELD-WEN, will it assert any time-related defense.

[10] JELD-WEN's counsel claimed at the Final Pretrial Conference that its notice of termination could not be considered an antitrust injury because the parties had so stipulated. However, JELD-WEN provided no evidence of that stipulation, and Steves' counsel indicated that the stipulation likely reflected that JELD-WEN's notice could not give rise to contractual liability—which Steves has agreed is not the case.

[11] It may well be true that Steves could suffer some other future antitrust injury from the CMI Acquisition that the parties have not identified, and that the act causing that injury could be of the type that implicates the continuing violations doctrine. However, the Court cannot resolve that hypothetical issue here.

[12] The only cases that JELD-WEN cites as purportedly establishing this principle involved challenges to rules or standards that were either completed and being enforced, and thus ripe for review, or were in "early stages of development," and thereby unripe. See *Volvo N. Am. Corp. v. Men's Int'l Prof'l Tennis Council, 857 F.2d 55, 64-65 (2d Cir. 1988)*; *Plant Oil Powered Diesel Fuel Sys., Inc. v. ExxonMobil Corp., 801 F. Supp. 2d 1163, 1183-84 (D.N.M. 2011)*. The harms that Steves suffered because of the CMI Acquisition are not as easily separable in a temporal or causal sense. As a result, it is uncertain whether the rationale of those cases would hold for Steves' injuries.

antitrust actions which [plaintiff] allege[d] ha[d] actually occurred (i.e. controlling prices, foreclosing competitors from access to technology, sending less qualified personnel for installation and **[**34]** service requests, licensing the technology only to companies outside of golf entertainment centers)." Id.

In contrast, this case has advanced well past the pleading stage, and the record demonstrates that JELD-WEN's conduct after the CMI Acquisition amounts to considerably more than just "threats of monopolistic behavior." Indeed, Steves has presented evidence creating a genuine dispute of fact as to whether it suffered antitrust injury when JELD-WEN gave notice of termination of the Supply Agreement. Accordingly, Steves might have suffered the present antitrust injury that the *SureShot Golf* plaintiff could not even plead. Steves has therefore met its burden in proving that its future damages claim is ripe for presentation to the jury.

C. Divestiture Claim

Section 16 of the Clayton Act allows private parties to obtain injunctive relief "against threatened loss or damage by a violation of the antitrust laws." *15 U.S.C. § 26*. "[I]n order to seek injunctive relief under *[Section] 16*, a private plaintiff must allege threatened loss or damage 'of the type the antitrust laws were designed to prevent and that flows from that which makes defendants' acts unlawful.'" *Cargill, Inc. v. Monfort of Colorado, Inc., 479 U.S. 104, 113, 107 S. Ct. 484, 93 L. Ed. 2d 427 (1986)* (quoting *Brunswick, 429 U.S. at 489*). The injunctive relief authorized by this statute **[**35]** may include an order requiring the acquiring company to divest the assets of the acquired firm, even when the plaintiff is a private party. See *California v. Am. Stores Co., 495 U.S. 271, 295-96, 110 S. Ct. 1853, 109 L. Ed. 2d 240 (1990)*. However, "equitable defenses such as laches . . . may protect consummated transactions from belated attacks by private parties." **[*674]** *Id. at 296*. JELD-WEN argues that Steves' divestiture claim under Count One must be dismissed because laches applies here, and because Steves has failed to show any threatened antitrust injury from the CMI Acquisition.

1. Laches

"Laches imposes on the defendant the ultimate burden of proving '(1) lack of diligence by the party against whom the defense is asserted, and (2) prejudice to the party asserting the defense.'" *White v. Daniel, 909 F.2d 99, 102 (4th Cir. 1990)* (quoting *Costello v. United States, 365 U.S. 265, 282, 81 S. Ct. 534, 5 L. Ed. 2d 551 (1961))*. The defense "generally applies to preclude relief for a plaintiff who has unreasonably 'slept' on his rights," barring "claims where a defendant is prejudiced by a plaintiff's unreasonable delay in bringing suit after the plaintiff knew of the defendant's violation." *PBM Prods., LLC v. Mead Johnson & Co., 639 F.3d 111, 121 (4th Cir. 2011)*; see also *Kloth v. Microsoft Corp., 444 F.3d 312, 325 (4th Cir. 2006)* (noting that laches involves an "equitable balancing of a plaintiff's delay with prejudice to a defendant" (internal quotations omitted)). JELD-WEN contends that the undisputed evidence establishes that Steves unreasonably **[**36]** delayed suit after it became aware that the CMI Acquisition might violate *Section 7*, and that the delay harmed JELD-WEN because it completely integrated CMI's operations into its own business following the merger.

As the Court has previously recognized, "the equitable defense of laches has been used to bar antitrust claims in other circuits." *Steves & Sons, Inc. v. JELD-WEN, Inc., 252 F. Supp. 3d 537, 545 & n.7 (E.D. Va. 2017)* (citing *Ginsburg v. InBev NV/SA, 623 F.3d 1229, 1235 (8th Cir. 2010)*; *Midwestern Mach. Co., Inc. v. Nw. Airlines, Inc., 392 F.3d 265, 277 (8th Cir. 2004)*; *Taleff v. Sw. Airlines Co., 828 F. Supp. 2d 1118, 1122-25 (N.D. Cal. 2011)*; *Garabet v. Autonomous Techs. Corp., 116 F. Supp. 2d 1159, 1172-73 (C.D. Cal. 2000))*. JELD-WEN relies on several of those cases here. But the fact that divestiture is an extreme remedy, as JELD-WEN points out, is not pertinent here. Rather, the relevant question is whether JELD-WEN has shown that there is no genuine dispute about the reasonableness of Steves' delay or the prejudice to JELD-WEN.

The evidence in the record shows that JELD-WEN has not met that burden. The application of laches is generally a fact-intensive analysis. See *White, 909 F.2d at 102* ("[W]hether laches bars an action depends upon the particular circumstances of the case."). And here, unresolved factual questions remain as to both prongs of the laches inquiry.

First, with respect to Steves' delay, it is unclear when Steves believed that the CMI Acquisition would have anticompetitive effects, given the possibility that doorskin prices and quality might have been protected **[**37]** by the Supply Agreement.[13] See *PBM Prods., 639 F.3d at 121*. Moreover, evidence suggests that Steves acted promptly once it learned of JELD-WEN's anticompetitive conduct, initiating the requisite dispute resolution procedure under that Agreement. Second, even assuming JELD-WEN's burden is **[*675]** lower in light of the length of Steves' delay, see *White, 909 F.2d at 102*, the degree of prejudice is uncertain, as the parties dispute the costliness of integrating JELD-WEN's and CMI's operations.[14] Given that these issues are unresolved, summary judgment on the basis of laches is inappropriate.

2. Threat of Antitrust Injury

Of course, to prevail on its divestiture claim, Steves still must be able to demonstrate "a significant threat of injury from an impending violation of the antitrust laws or from a contemporary violation likely to continue or recur." *Zenith Radio I, 395 U.S. at 130*; see also *Garabet, 116 F. Supp. 2d at 1170* ("*Section 16* requires a threatened loss or injury cognizable in equity . . . proximately resulting from an antitrust violation." (internal quotations omitted)). JELD-WEN asserts that Steves cannot do so because its speculative claims of future injury are belied by evidence that Steves can obtain alternative doorskin supply once its contractual relationship with JELD-WEN ends.

This argument fails **[**38]** for the same reasons as JELD-WEN's assertions regarding Steves' damages claim. JELD-WEN's contention that potential future injury could be prevented by Steves' efforts to find another doorskin supplier or manufacture doorskins itself is mistaken, because the evidence of Steves' ability to do either is disputed. Moreover, there is a genuine disagreement—supported by evidence on both sides—about whether the CMI Acquisition has already caused anticompetitive effects that are likely to continue or recur. See supra Section II.A. Just as with Steves' *Section 4* damages claim, these factual disputes preclude summary judgment on Steves' *Section 16* divestiture claim.

III. Count Four

JELD-WEN also moves for summary judgment on Count Four, arguing that it does not present a case or controversy required by Article III because the termination date of the Supply Agreement is not in dispute. A declaratory judgment under the Declaratory Judgment Act, *28 U.S.C. § 2201*, is only proper if the facts show "'a substantial controversy, between parties having adverse legal interests, of sufficient immediacy and reality to warrant the issuance of a declaratory judgment.'" *Ross v. Reed, 719 F.2d 689, 694 (4th Cir. 1983)* (quoting *Golden v. Zwickler, 394 U.S. 103, 108, 89 S. Ct. 956, 22 L. Ed. 2d 113 (1969))*. JELD-WEN contends that there is no controversy about the termination **[**39]** date of the Agreement because, notwithstanding its previous position, it now agrees that the termination date is September 10, 2021, and that it will supply Steves with doorskins until that date.

However, disputes about the credibility of JELD-WEN's current stance prevent summary judgment on Count Four. As recently as March 2015, JELD-WEN asserted that the proper termination date under the Supply Agreement was ambiguous, and reserved the right to argue that the Agreement terminated on the original December 31, 2019 date, rather than seven years after JELD-WEN gave notice of termination—that is, September 10, 2021. ECF No. 452-64

---

[13] Steves argues that its filing suit within the Clayton Act's four-year statute of limitations for damages actions is relevant to this factor. It cites a recent Supreme Court case, *Petrella v. Metro-Goldwyn-Mayer, Inc., 134 S. Ct. 1962, 188 L. Ed. 2d 979 (2014)*, as holding that laches cannot be applied when a plaintiff has filed suit within the limitations period imposed by a statute. *Id. at 1977*. Even if that holding applies to Clayton Act claims, the four-year statute of limitations applies to *Section 4* damages claims, not *Section 16* divestiture claims. See *15 U.S.C. § 15(b)*.

[14] Although JELD-WEN may be right that the consummation of the merger is sufficient prejudice to implicate laches, the cost of any divestiture order is still relevant to the Court's balancing of the equities. See *Ginsburg, 623 F.3d at 1235-36*.

(Under Seal) ¶ 13. JELD-WEN now claims that its position has changed and it believes that the later date is correct. But where a defendant seeks to moot a claim through its **[*676]** voluntary conduct, it bears the "'heavy burden'" of "'ma[king] it absolutely clear [to the court] that the allegedly wrongful behavior could not reasonably be expected to recur.'" *Friends of the Earth, Inc. v. Laidlaw Envtl. Servs. (TOC), Inc., 528 U.S. 167, 189, 120 S. Ct. 693, 145 L. Ed. 2d 610 (2000)* (quoting *United States v. Concentrated Phosphate Export Ass'n, 393 U.S. 199, 203, 89 S. Ct. 361, 21 L. Ed. 2d 344 (1968))*. JELD-WEN has done nothing to convince the Court that its apparent change of heart is genuine beyond listing the termination date as an uncontroverted fact in its motion. This minimal step is insufficient **[**40]** to satisfy JELD-WEN's substantial burden. Accordingly, JELD-WEN's motion will be denied to the extent that it seeks summary judgment on Count Four.

CONCLUSION

For the foregoing reasons, DEFENDANT JELD-WEN, INC.'S MOTION FOR PARTIAL SUMMARY JUDGMENT ON COUNTS I AND IV OF PLAINTIFF STEVES AND SONS, INC.'S COMPLAINT (ECF No. 375) was denied, except as to Steves' future lost profits damages claim under Count One, the validity of which the Court decided at trial in the context of JELD-WEN's motion for judgment as a matter of law.

It is so ORDERED.

HN1[] **Conveyances, Licenses**

An obligation to license a patent on fair, reasonable, and non-discriminatory terms is commonly abbreviated as a "FRAND" obligation.

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Misuse

Evidence > Burdens of Proof > Clear & Convincing Proof

HN2[] **Defenses, Misuse**

Patent misuse is an equitable defense to a claim for patent infringement. A holding of misuse renders the patent unenforceable until the misuse is purged; it does not, of itself, invalidate the patent. The key inquiry under the patent misuse doctrine is whether, by imposing the condition in question, the patentee has impermissibly broadened the physical or temporal scope of the patent grant and has done so in a manner that has anticompetitive effects. While patent misuse must be established by the defendant, courts are divided on whether a defendant must establish patent misuse by a preponderance or by clear and convincing evidence. Patent misuse arises from the equitable doctrine of unclean hands. As such, patent misuse should be established by clear and convincing evidence, the same standard that is necessary to establish unclean hands.

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Misuse

HN3[] **Defenses, Misuse**

The Federal Circuit has cautioned against a broad application of the patent misuse doctrine. The defense of patent misuse is not available to a presumptive infringer simply because a patentee engages in some kind of wrongful commercial conduct, even conduct that may have anticompetitive effects. Although the law should not condone wrongful commercial activity, the body of misuse law and precedent need not be enlarged into an open-ended pitfall for patent-supported commerce.

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Misuse

HN4[] **Defenses, Misuse**

The only time Congress has spoken on the judicially-created doctrine of patent misuse, it circumscribed the doctrine. *35 U.S.C.S. § 271(d)*.

Business & Corporate Compliance > ... > Ownership > Conveyances > Licenses

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Misuse

HN5[] **Conveyances, Licenses**

The standard for patent misuse articulated in Princo focuses on whether the patent holder's conduct broadens the physical or temporal scope of the patent grant and in a manner that has anticompetitive effects. While a breach of an obligation to license a patent on fair, reasonable, and non-discriminatory terms (FRAND) may be relevant to this inquiry, a breach of FRAND is not determinative of patent misuse.

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Misuse

Business & Corporate Compliance > ... > Ownership > Conveyances > Licenses

HN6[] **Inequitable Conduct, Anticompetitive Conduct**

The analysis of tying arrangements in the context of patent misuse is closely related to the analysis of tying arrangements in ***antitrust law***. However, Congress has declared certain practices not to be patent misuse even though those practices might otherwise be subject to scrutiny under ***antitrust law*** principles. *35 U.S.C.S. § 271(d)*. These practices include conditioning the license of any rights to the patent on the acquisition of a license to rights in another patent, unless the patent owner has market power for the patent on which the license or sale is conditioned. *35 U.S.C.S. § 271(d)(5)*. Therefore, patent misuse with respect to tying is a two-step inquiry. First, the defendant must demonstrate that the patent holder has market power in a clearly defined market. Second, the defendant must establish that the conduct at issue is either per se misuse, or misuse under the rule of reason.

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Patent Law > ... > Defenses > Inequitable Conduct > Burdens of Proof

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Misuse

HN7[] **Inequitable Conduct, Anticompetitive Conduct**

With respect to the second step of the two-step inquiry required to show patent misuse through a tying arrangement, the Federal Circuit has expressed skepticism that a patent-to-patent tying arrangement should be treated as per se misuse. The legislative history of *35 U.S.C.S. § 271(d)* indicates congressional skepticism about treating tying arrangements in the context of patent licensing as per se patent misuse, rather than analyzing such arrangements under the rule of reason. While grouping patents together in package licenses has anticompetitive potential, it also has potential to create substantial procompetitive efficiencies such as clearing possible blocking patents, integrating complementary technology, and avoiding litigation.

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

HN8[] **Inequitable Conduct, Anticompetitive Conduct**

To apply the rule of reason analysis in showing patent misuse through a tying arrangement, the finder of fact must decide whether the questioned practice imposes an unreasonable restraint on competition, taking into account a variety of factors, including specific information about the relevant business, its condition before and after the restraint was imposed, and the restraint's history, nature, and effect.

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Business & Corporate Compliance > ... > Ownership > Conveyances > Licenses

HN9[] **Inequitable Conduct, Anticompetitive Conduct**

A party with both an essential patent and a nonessential patent is allowed to package the two together and only offer the package for a single price.

Business & Corporate Compliance > ... > Ownership > Conveyances > Licenses

Civil Procedure > Trials > Jury Trials > Province of Court & Jury

Patent Law > ... > Defenses > Inequitable Conduct > Fact & Law Issues

HN10[] **Conveyances, Licenses**

Whether a patent holder violated its obligation to license a patent on fair, reasonable, and non-discriminatory terms (FRAND) is a question of fact.

Judges: RODNEY GILSTRAP, UNITED STATES DISTRICT JUDGE.

Opinion by: RODNEY GILSTRAP

Opinion

REDATED FINDINGS OF FACT AND CONCLUSIONS [*2] OF LAW

This is a patent infringement case brought by Plaintiff Saint Lawrence Communications LLC ("SLC") against Defendant Motorola Mobility LLC ("Motorola"). The Court seated a jury on March 3, 2017, and a trial before that jury commenced on March 20, 2017. The jury then returned a unanimous verdict finding willful infringement and no invalidity. (Dkt. No. 34.)

After the close of evidence, and while the jury was deliberating, the Court provided the Parties an opportunity to present evidence and argument in support of and in opposition to, as appropriate, any equitable defenses urged by Motorola. At that time, the Parties agreed not to present any evidence or argument orally to the Court, electing instead to submit the issues to the Court on the papers. (Dkt. No. 58, 3/24 Trial Tr. at 3:22-4:14.) Thereafter, the Court issued an Order setting forth the post-trial briefing schedule on all outstanding issues, including Motorola's equitable defenses. (Dkt. No. 72.) The Court also granted the Parties' request for additional briefing on said equitable defenses. (Dkt. No. 85.) Accordingly, Motorola's equitable defenses of patent misuse and limitation of damages based on FRAND principles are **[*3]** now fully before the Court. Pursuant to *Rule 52 of the Federal Rules of Civil Procedure*, the Court issues these Findings of Fact ("FF") and Conclusions of Law ("CL").

I. Findings of Fact

A. The Parties

[FF1] Motorola is a corporation organized under the laws of the State of Delaware and headquartered in Chicago, Illinois. (Dkt. No. 1 at ¶ 2; Case No. 2:15-cv-349, Dkt. No. 46 at ¶ 2.) It is in the business of developing, among other things, cell phones and related technology. (Dkt. No. 46, 3/20 AM Trial Tr. at 52:12-15.)

[FF2] SLC is a Texas limited liability company with its principal place of business in Plano, Texas. (Dkt. No. 1 at ¶ 1.) SLC is in the business of licensing and monetizing its patent portfolio. (Dkt. No. 46, 3/20 AM Trial Tr. at 40:13-16.)

B. Procedural History

[FF3] On March 10, 2015, SLC filed its original complaint in this case. (Dkt. No. 1.) In that complaint, SLC alleged that certain Motorola products infringed U.S. Patent Nos. 6,795,805 ("the '805 Patent"), 6,807,524 ("the '524 Patent"), 7,151,802 ("the '802 Patent"), 7,260,521 ("the '521 Patent"), and 7,191,123 ("the '123 Patent") (collectively "Patents-in-Suit" or "Asserted Patents"). (*Id.*)

[FF4] On June 25, 2015, this case was consolidated with a related case involving Saint Lawrence and ZTE Corporation et al. (Dkt. No. 7.)

[FF5] On September 1, 2015, Motorola filed its original answer in this case. (Case No. 2:15-cv-349, **[*4]** Dkt. No. 46.) In its answer, Motorola denied SLC's allegations of infringement of the Patents-in-Suit and raised a defense of patent misuse. (*Id.*) Motorola additionally pled that "SLC's claim for damages may also be limited by FRAND principles." (*Id.* at ¶ 37.)

[FF6] During discovery, Motorola identified documents and other materials supporting its patent misuse defense and its limitations on damages defense, including SLC's inconsistent royalty rates for its licensees to the Patents-in-Suit. (Dkt. No. 74-2 (Ex. A to SLC's Opp'n) at 8-12.)

[FF7] SLC did not move to dismiss Motorola's patent misuse defense, nor did SLC move for summary judgment or bring any other pretrial motion on this defense.

[FF8] In the Parties' Joint Pretrial Order, Motorola contended that any claim by SLC for damages was limited by SLC's obligation to license the patents pursuant to FRAND principles. (Case No. 2:15-cv-349, Dkt. No. 413 at 5, 7.) Motorola also contended that SLC's claims were barred in whole or in part under the doctrine of patent misuse, and it identified patent misuse as a defense that it intended to assert at trial. (*Id.* at 7, 12, 13.)

[FF9] During the pretrial conference, SLC conceded that Motorola had raised, as an affirmative defense, an **[*5]** "equitable patent misuse defense" and stated that "both parties agree the question of patent misuse is an equitable defense" that the Court should decide. (Case No. 2:15-cv-349, Dkt. No. 449, 2/21 Pretrial Conference Tr. at 54:9-55:15.) The Parties then stipulated to a procedure for how they would present the evidence relating to Motorola's misuse defense. (*Id.* at 64:20-65:11.)

[FF10] A jury trial on the non-equitable issues in this case was held from March 20-March 24, 2017. (Dkt. No. 45-58.) On March 24, 2017, the jury returned a verdict finding willful infringement of claim 2 of the '805 Patent, claim 4 of the '524 Patent, claim 1 of the '802 Patent, claim 1 of the '521 Patent, and claim 102 of the '123 Patent. (Dkt. No. 34 at 2, 5.) The jury also did not find any claim invalid, and it further awarded damages in the amount of $9,177,483. (*Id.* at 3-4.)

[FF11] At the conclusion of trial, SLC and Motorola agreed that a separate bench trial was not needed to address the remaining equitable issues. Instead, the Parties agreed that, to the extent Motorola wished to raise one or more of its equitable defenses, it would do so in post-trial briefing. (Dkt. No. 58, 3/24 Trial Tr. at 3:22-4:14.)

[FF12] The Court issued an order on April 14, 2017 setting a **[*6]** timeline for post-trial briefing, including Motorola's briefing in support of its equitable defenses. (Dkt. No. 72.)

[FF13] Pursuant to that order, on April 27, 2017, Motorola filed its opening brief on its equitable defenses of patent misuse and the FRAND limitations on damages. (Dkt. No. 73.) SLC filed its response on May 11, 2017. (Dkt. No. 74.) Motorola then filed an unopposed motion for leave to file limited additional briefing on the equitable issues (Dkt. No. 83), which the Court granted (Dkt. No. 85). Motorola filed its limited additional briefing in the form of a reply on May 19, 2017. (Dkt. No. 84.) SLC filed a sur-reply on May 30, 2017, thereby concluding the parties' briefing on the equitable defenses of patent misuse and the limitation of damages due to FRAND principles. (Dkt. No. 91.)

C. The Patents-in-Suit

[FF14] The '805 Patent is entitled "Periodicity Enhancement in Decoding Wideband Signals." (PX-1.) The application for the '805 Patent was filed on October 27, 1999, and issued on September 21, 2004. (*Id.*) The inventors listed on the face of the '805 Patent are Bruno Bessette, Redwan Salami, and Roch Lefebvre. (*Id.*) At trial, SLC accused Motorola of infringing claim 2 of the '805 Patent. (Dkt. No. 34.)

[FF15] The **[*7]** '524 Patent is entitled "Perceptual Weighting Device and Method for Efficient Coding of Wideband Signals." (PX-2.) The application for the '524 Patent was filed on October 27, 1999, and issued on October 19, 2004. (*Id.*) The inventors listed on the face of the '524 Patent are Bruno Bessette, Redwan Salami, and Roch Lefebvre. (*Id.*) At trial, SLC accused Motorola of infringing claim 4 of the '524 Patent. (Dkt. No. 34.)

[FF16] The '802 Patent is entitled "High Frequency Content Recovering Method and Device for Over-Sampled Synthesized Wideband Signal." (PX-3.) The application for the '802 Patent was filed on October 27, 1999, and issued on December 19, 2006. (*Id.*) The inventors listed on the face of the '802 Patent are Bruno Bessette, Redwan Salami, and Roch Lefebvre. (*Id.*) At trial, SLC accused Motorola of infringing claim 1 of the '802 Patent. (Dkt. No. 34.)

[FF17] The '521 Patent is entitled "Method and Device for Adaptive Bandwidth Pitch Search in Coding Wideband Signals." (PX-4.) The application for the '521 Patent was filed on October 27, 1999, and issued on August 21, 2007. (*Id.*) The inventors listed on the face of the '521 Patent are Bruno Bessette, Redwan Salami, and Roch Lefebvre. (*Id.*) At trial, SLC accused Motorola of infringing claim 1 of the '521 Patent. (Dkt. No. 34.)

[FF18] The '123 Patent is entitled "Gain-Smoothing **[*8]** in Wideband Speech and Audio Signal Decoder." (PX-5.) The application for the '123 Patent was filed on November 17, 2000, and issued on March 13, 2007. (*Id.*) The inventors listed on the face of the '123 Patent are Bruno Bessette, Redwan Salami, and Roch Lefebvre. (*Id.*) At trial, SLC accused Motorola of infringing claim 102 of the '123 Patent. (Dkt. No. 34.)

D. <u>The Patents-In-Suit as Standard Essential Patents</u>

[FF19] The original owner of the Patents-in-Suit was a company called VoiceAge. (PX-1-5.)

[FF20] In 2000, VoiceAge, through a partnership with Nokia, entered a competition supervised by the European Telecommunications Standard Institute ("ETSI") and the Third Generation Partnership Project ("3GPP") for the development of a speech audio coding standard. (Dkt. No. 46, 3/20 AM Trial Tr. at 109:20-112:9.) Nine competitors entered the preselection phase of the competition. (*Id.* at 113:10-17.) Together, VoiceAge and Nokia submitted a codec, referred to either as the "Nokia candidate" or the "Nokia/VoiceAge candidate." (*Id.* at 111:14-18.) The Nokia/VoiceAge candidate codec allowed for wideband speech coding capabilities and transmission components over cellular networks and channels. (*Id.* at 110:25-111:5.)

[FF21] Five candidates **[*9]** made it to the selection phase of the competition: Nokia/VoiceAge, Motorola, Texas Instrument, Ericsson, and a consortium of four other companies. (*Id.* at 113:18-114:6.)

[FF22] The Nokia/VoiceAge codec won, and it was then incorporated into the Adaptive Multi-Rate Wideband ("AMR-WB") standard by the standard setting organizations ETSI and 3GPP. (Dkt. No. 46, 3/20 AM Tr. at 115:10-22, 117:2-16; *see also* Dkt. No. 49, 3/21 AM Tr. at 13:24-14:1.)

[FF23] As part of this process, VoiceAge agreed, under ETSI's Intellectual Rights Policy, "to grant irrevocable licenses on fair, reasonable and non-discriminatory terms and conditions." (PX-133; DX-731; DX-1112.)

[FF24] ***HN1***[] An obligation to license on fair, reasonable and non-discriminatory terms is commonly abbreviated as a "FRAND" obligation. (Dkt. No. 51, 3/21 PM Sealed Trial Tr. at 19:7-15.)

[FF25] It is undisputed that SLC assumed VoiceAge's FRAND obligations when it acquired the Patents-in-Suit. (Dkt. No. 49, 3/21 AM Trial Tr. at 78:8-11; Dkt. No. 59, 3/21 PM Trial Tr. at 57:2-10.)

[FF26] As a result of the standardization process, AMR-WB became mandatory for a smartphone to make Voice over LTE ("VoLTE") calls over an LTE network, and certain carriers **[*10]** made the standard mandatory for other types of networks, too. (Dkt. No. 52, 3/22/2017 PM Trial Tr. at 29:11-30:2 (explaining AMR-WB is necessary for VoLTE calls on Verizon and AT&T as well as international calls on Sprint); Dkt. No. 56, 3/23 Sealed Trial Tr. at 13:22-25 ([TEXT REDACTED BY THE COURT]).)

E. <u>VoiceAge's Licensing of the Patents-In-Suit and the W-CDMA Patent Pool</u>

[FF27] The W-CDMA patent pool included patents related to W-CDMA or 3G cellular communication standards, including AMR-WB. (Dkt. No. 56, 3/23 Sealed Tr. at 3:16-23; Dkt. No. 49, 3/21 AM Tr. at 31:15-21.) Licensees received a license to all the patents in the pool. (*Id.*) Sipro Lab Telecom, a company with the same corporate principals as VoiceAge, managed the WCDMA patent pool. (Dkt. No. 49, 3/21 AM Tr. at 31:22-32:5.)

[FF28] In 2012, [TEXT REDACTED BY THE COURT]. (Dkt. No. 56, 3/23 Sealed Tr. at 3:16-23.)

[FF29] Licensees to the W-CDMA patent pool at that time paid a royalty of approximately $1 per phone. (Dkt. No. 49, 3/21 AM Trial Tr. at 74:18-20.) VoiceAge received only a portion of this royalty, calculated through the pool's patent weighting system. (*Id.* at 74:21-23.) VoiceAge believed the rate the W-CDMA patent **[*11]** pool was charging in 2012 was a FRAND rate for the pool. (*Id.* at 38:21-23.)

[FF30] In 2013, VoiceAge withdrew the Asserted Patents from the W-CDMA patent pool and sold them to SLC's parent company. (*Id.* at 39:18-25; 59:6-8.)

F. <u>SLC's Licensing of the Patents-in-Suit</u>

[FF31] Motorola was offered an opportunity to take a license to the W-CDMA Patent Pool. (Dkt. No. 49, 3/21 AM Trial Tr. at 31:22-24; 41:13-20.)

[FF32] Motorola did not take a license to the W-CDMA patent pool while VoiceAge was a member of the pool, stating that it favored having bilateral negotiations with each one of the patent owners. (*Id.* at 41:21-42:11.)

[FF33] To date, Motorola still has not licensed the Patents-in-Suit. (*Id.* at 28:17-20.)

[FF34] Other mobile device manufacturers, including [TEXT REDACTED BY THE COURT] have taken licenses to the Asserted Patents. (Dkt. No. 51, 3/21 PM Sealed Trial Tr. at 21:2-15.) [TEXT REDACTED BY THE COURT]. (*Id.*)

1. [TEXT REDACTED BY THE COURT]

[FF35] [TEXT REDACTED BY THE COURT] This estimate is sometimes called [TEXT REDACTED BY THE COURT]

[FF36] The [TEXT REDACTED BY THE COURT]

[FF37] There are various factors that might explain why [TEXT REDACTED BY THE COURT] At this point, SLC would **[*12]** have had

[FF38] Even so, at the time [TEXT REDACTED BY THE COURT]

[FF39] There is also no evidence that [TEXT REDACTED BY THE COURT]

[FF40] By the time SLC [TEXT REDACTED BY THE COURT] Thus, it would have been reasonable for SLC to [TEXT REDACTED BY THE COURT].

2. [TEXT REDACTED BY THE COURT]

[FF41] [TEXT REDACTED BY THE COURT]

[FF42] During its negotiations with [TEXT REDACTED BY THE COURT]

[FF43] [TEXT REDACTED BY THE COURT]

[FF44] The ultimate agreement between the SLC [TEXT REDACTED BY THE COURT]

[FF45] [TEXT REDACTED BY THE COURT]

3. Disclosure of W-CDMA Patent Pool

[FF46] When negotiating with potential smartphone manufacturer licensees, SLC listed all current licensees in its presentation materials. (DX-556; Dkt. No. 53, 3/22 PM Trial Tr. at 131:25-133:10.)

[FF47] However, these presentation materials did not distinguish between licensees who had agreed to rates as part of the W-CDMA patent pool and licensees who had separately licensed the Asserted Patents. (*Id.*)

[FF48] Additionally, SLC did not disclose information about the W-CDMA patent pool, including how much VoiceAge had received under the W-CDMA patent pool, to potential licensees either because SLC's representative in these negotiations, **[*13]** Ms. Wagner, was not aware of such information, including how much VoiceAge had received through the W-CDMA patent pool, or because Ms. Wagner thought the W-CDMA rates generally were irrelevant to negotiations relating to only the Asserted Patents. (Dkt. No. 50, 3/21/2017 PM Trial Tr. at 56:16-57:1.)

4. The Threat of Injunction

[FF49] [TEXT REDACTED BY THE COURT]

[FF50] However, Motorola did not establish that prospective licensees who were under the threat of an injunction actually paid substantially more than companies who were not. (Dkt. No. 74 at 11-12, 17-18.)

[FF51] Motorola also did not establish that the threat of an injunction actually caused licensees to be coerced into taking a license. (*Id.* at 17-18.) hi fact. Motorola was enjoined by a court in Germany based on patents related to the Asserted Patents, yet it persisted in not taking a license to the Asserted Patents. (*Id.*)

5. Representations to Potential Licensees

[FF52] [TEXT REDACTED BY THE COURT]

[FF53] Motorola did not demonstrate that this confirmation, horn SLC to Huawei, was a deliberate misrepresentation. (*See, e.g.*, Dkt. No. 55, 3/23/2017 AM Trial Tr. at 40:22-41:2 (testimony by Defendant's expert agreeing that the royalty rate communicated **[*14]** by SLC about the Samsung License could be discerned by "look[ing] at the agreement").)

6. Effects of SLC's Licensing Conduct

[FF54] Motorola did not establish that SLC's licensing conduct, including its practice of seeking worldwide licenses, actually harmed competition.

II. CONCLUSIONS OF LAW

A. Legal Standard

[CL1]*HN2*[] Patent misuse is an equitable defense to a claim for patent infringement. *U.S. Philips Corp. v. Int'l Trade Comm'n, 424 F.3d 1179, 1184 (Fed. Cir. 2005)*; *C.R. Bard, Inc. v. M3 Sys., Inc., 157 F.3d 1340, 1372 (Fed. Cir. 1998)* ("[A] holding of misuse renders the patent unenforceable until the misuse is purged; it does not, of itself, invalidate the patent.").

[CL2] "[T]he key inquiry under the patent misuse doctrine is whether, by imposing the condition in question, the patentee has impermissibly broadened the physical or temporal scope of the patent grant and has done so in a manner that has anticompetitive effects." *Princo Corp. v. Int'l Trade Com'n, 616 F.3d 1318, 1328 (Fed. Cir. 2010)* (en banc).

[CL3] While patent misuse must be established by the defendant, *id. at 1338*, courts are divided on whether a defendant must establish patent misuse by a preponderance or by clear and convincing evidence. *Compare* *Universal Elecs., Inc. v. Universal Remote Control, Inc., No. SACV1200329AGJPRX, 2014 U.S. Dist. LEXIS 200348, 2014 WL 12587050, at *8 (C.D. Cal. Dec. 16, 2014)* (requiring "clear and convincing evidence that Plaintiff is barred from enforcing the '426 Patent against **[*15]** Defendant for patent misuse"), *with* *Ocean Tomo, LLC v. Barney, 133 F. Supp. 3d 1107, 1118 (N.D. Ill. 2015)* (applying preponderance of the evidence standard).

[CL4] Having reviewed the relevant authorities, the Court is persuaded that applying a clear and convincing standard is the better view. "[P]atent misuse arises from the equitable doctrine of unclean hands." *C.R. Bard, 157 F.3d at 1372 (Fed. Cir. 1998)*. As such, patent misuse should be established by clear and convincing evidence, the same standard that is necessary to establish unclean hands. *See* *In re Omeprazole Patent Litig., 483 F.3d 1364, 1374 (Fed. Cir. 2007)* (applying clear and convincing standard with respect to unclean hands); *see also* *Therasense, Inc. v. Becton, Dickinson & Co., 649 F.3d 1276, 1287-90 (Fed. Cir. 2011)* (concluding that inequitable conduct should be established by clear and convincing evidence because it "emerged from unclean hands"). Regardless, Motorola's patent misuse defense fails under either standard of proof.

B. Analysis

1. Patent Misuse in SLC's Alleged Breach of FRAND

[CL5] Motorola's first argument is that SLC engaged in patent misuse by violating or exceeding its FRAND obligations as to the Asserted Patents. (Dkt. No. 73 at 2.) In advancing this argument, Motorola primarily relies on three district court opinions: *Multimedia Patent Trust v. Apple Inc., No. 10-CV-2618-H, 2012 U.S. Dist. LEXIS 167479, 2012 WL 6863471, at *23 (S.D. Cal. Nov. 9, 2012)*; *Apple Inc. v. Motorola Mobility, Inc., No. 11-cv-178-bbc, 2011 U.S. Dist. LEXIS 72745, 2011 WL 7324582, at *14 (W.D. Wis. June 7, 2011)*; and *UTStarcom, Inc. v. Starent Networks, Corp., No. 07 CV 2582, 2008 U.S. Dist. LEXIS 98498, 2008 WL 5142194, at *2 (N.D. Ill. Dec. 5, 2008)*.

[CL6] In *Multimedia*, the **[*16]** district court observed, without extensive analysis, that "several courts have held that a patentee's violation of its [F]RAND obligations may *in certain circumstances* constitute patent misuse." *2012 U.S. Dist. LEXIS 167479, 2012 WL 6863471, at *23* (emphasis added). In support of this proposition, the court cited *UTStarcom* and *Apple. Id*.

[CL7] In *UTStarcom*, the district court found, without citation, that an allegation that the plaintiff "fail[ed] to offer a license to the[] patents to [defendant] on reasonable, nondiscriminatory terms" after deliberately withholding information about the patents from the relevant standards organization was sufficient to state a counterclaim for patent misuse. UTStarcom, 2008 U.S. Dist. LEXIS 98498, 2008 WL 5142194, at *2.

[CL8] In *Apple*, the district court similarly addressed the issue on a motion to dismiss, concluding that Apple's allegations sufficiently "state[d] a claim for patent misuse" based on the allegation that Motorola had refused to license its patents on FRAND terms and also "ma[d]e *false commitments* that led to the establishment of worldwide standards incorporating its own patents and eliminating competing alternative techniques . . . ." Apple, 2011 U.S. Dist. LEXIS 72745, 2011 WL 7324582, at *13-14 (emphasis added).

[CL9] Motorola also relies on Broadcom Corp. v. Qualcomm Inc., 501 F.3d 297 (3d Cir. 2007), as did the district court in *Apple*. (Dkt. No. 73 at 2-3) In ***[*17]*** *Broadcom*, the Third Circuit held that "a patent holder's *intentionally false promise* to license essential proprietary technology on [fair, reasonable and non-discriminatory terms], . . . [followed by] the patent holder's subsequent breach of that promise, is actionable anticompetitive conduct." 501 F.3d at 314 (emphasis added).

[CL10] None of these cases stand for the proposition that a breach of FRAND obligations constitutes patent misuse and Motorola has identified no case holding as such. *See* In re Innovatio IP Ventures, LLC Patent Litig., 921 F. Supp. 2d 903, 916 (N.D. Ill. 2013) ("The parties have not cited, however, and the court has not found, any cases suggesting that the existence of a [F]RAND commitment provides a *complete* defense against an infringement lawsuit. Instead, most cases merely limit a patent holder's remedy to collecting a [F]RAND royalty . . . ."); *see also* Michael G. Cowie & Joseph P. Lavelle, *Patents Covering Industry Standards: The Risks to Enforceability Due to Conduct Before Standard-Setting Organizations*, 30 AIPLA Q.J. 95, 115-116, 148 (2002) (questioning whether a breach of FRAND obligations broadens the scope of a patent grant and noting that there are "no published misuse decisions" reaching this result).

[CL11] Indeed, ***HN3***[] the Federal Circuit has cautioned against a broad application of the patent **[*18]** misuse doctrine. *See, e.g.,* Princo, 616 F.3d at 1329 ("Recognizing the narrow scope of [patent misuse], we have emphasized that the defense of patent misuse is not available to a presumptive infringer simply because a patentee engages in some kind of wrongful commercial conduct, even conduct that may have anticompetitive effects."); C.R. Bard, 157 F.3d at 1373 ("Although the law should not condone wrongful commercial activity, the body of misuse law and precedent need not be enlarged into an open-ended pitfall for patent-supported commerce.").

[CL12] Additionally, ***HN4***[] the only time Congress has spoken on the judicially created doctrine of misuse, it circumscribed the doctrine. Id. at 1329-1330 (discussing legislative history of 35 U.S.C. § 271(d)); Illinois Tool Works Inc. v. Indep. Ink, Inc., 547 U.S. 28, 42, 126 S. Ct. 1281, 164 L. Ed. 2d 26 (2006) (same).

[CL13] Accordingly, this Court applies ***HN5***[] the standard articulated in Princo[1] focusing on whether SLC's conduct "broaden[s] the physical or temporal scope of the patent grant and . . . in a manner that has anticompetitive effects." 616 F.3d at 1328. While a breach of FRAND obligations may be relevant to this inquiry, a breach of FRAND is not determinative of patent misuse. *Cf.* id. at 1329 ("While proof of an antitrust violation shows that the patentee has committed wrongful conduct having anticompetitive effects, that does not establish misuse of the **[*19]** patent in suit unless the conduct in question . . . ha[s] been held to be outside the otherwise broad scope of the patent grant.").

[CL14] Applying Princo, the Court is persuaded that SLC's conduct, in light of the facts of this case, does not constitute patent misuse.

[CL15] First, the Court is not persuaded that SLC's efforts to seek injunctions in Germany "impermissibly broadened the physical or temporal scope of the patent grant." Princo, 616 F.3d at 1328; Finjan, Inc. v. ESET, LLC, No. 17-CV-00183-CAB-BGS, 2017 U.S. Dist. LEXIS 116359, 2017 WL 3149642, at *4 (S.D. Cal. July 24, 2017)

---

[1] Motorola did not argue that SLC's alleged breach of its FRAND obligations constituted patent misuse *per se. Compare* (Dkt. No. 73 at 6), *with* (Dkt. No. 73 at 16). Therefore, the Court does not apply the *per se* standard here.

(Bencivengo, J.) ("Whatever legal action Finjan is taking in Germany, none of ESET's allegations support a conclusion Finjan is 'physically' or 'temporally' broadening the scope of the patents in suit."); *see also* [FF50-FF51, FF55].

[CL16] Motorola cites no evidence or authority that supports a contrary result. At most, Motorola argues that seeking injunctions in Germany constituted a breach of SLC's FRAND obligations because SLC was required to license its patents on FRAND terms. (Dkt. No. 73 at 13 ("Such actions violated SLC's contractual obligations to Motorola and other potential licensees, third party beneficiaries to SLC's obligation to license these SEPs under FRAND terms and conditions.").) **[*20]** However, as explained above, this supposed breach of FRAND, *but see* *Apple Inc. v. Motorola, Inc., 757 F.3d 1286, 1331 (Fed. Cir. 2014)* ("To the extent that the district court applied a *per se* rule that injunctions are unavailable for SEPs, it erred."), *overruled on other grounds by* *Williamson v. Citrix Online, LLC, 792 F.3d 1339 (Fed. Cir. 2015)*, is not determinate of patent misuse and here it is not indicative of SLC broadening the scope of its patent rights. [FF49-FF51].

[CL17] Additionally, because Motorola did not establish that SLC's efforts to seek injunctions in Germany harmed competition, [FF54], Motorola necessarily fails to show that SLC's conduct constitutes misuse. *Princo, 616 F.3d at 1334* ("Princo urges us to overrule the line of authority in this court holding that patent misuse requires a showing that the patentee's conduct had anticompetitive effects. We decline to do so."); *see also* *Brunswick Corporation v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 488, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)* (noting that ***antitrust law*** protects "competition[,] not competitors").

[CL18] Similarly, the Court is not persuaded that SLC engaged in patent misuse by negotiating different rates and terms for different licensees when presented with different circumstances. [FF35-FF45, FF54]. To hold as such would tell patent owners that their first license for a FRAND encumbered patent must also be their last, tying the hands of patent owners and future **[*21]** licensees who may not be similarly situated. *But see* *Brulotte, 379 U.S. at 33* (distinguishing between a patent owner who "exact[s] royalties as high as he can negotiate" from one who "project[s] those royalty payments beyond the life of the patent" and thus engages in patent misuse).

[CL19] Finally, Motorola argues that SLC made various misrepresentations and omissions in its negotiations with potential licensees that amount to patent misuse, such as its failure to alert potential licensees to the effective royalty rate for the Asserted Patents as part of the W-CDMA pool. (Dkt. No. 73 at 13-14.) While the Court does not agree that SLC deliberately misrepresented or omitted material information to potential licensees, [FF46-FF48, FF52-54], even if it had, this sort of conduct, while potentially wrongful, would not rise to the level of patent misuse because Motorola did not demonstrate that this conduct harmed competition. [FF54].

[CL20] Even taken together, Motorola's evidence is insufficient to demonstrate that SLC's conduct constituted misuse. Motorola's defense here must therefore fail.[2]

2. Patent Misuse by Tying

[CL21] Motorola's second argument for patent misuse is that SLC used its alleged market power to **[*22]** engage in impermissible tying by requiring some licensees to obtain a single license for SLC's U.S. and German patents. (Dkt. No. 73 at 17.)

[CL22] ***HN6***[] "[T]he analysis of tying arrangements in the context of patent misuse is closely related to the analysis of tying arrangements in ***antitrust law***." *U.S. Philips, 424 F.3d at 1185*.

[2] To the extent Motorola's arguments as to the alleged FRAND violations also depend on a showing of market power in a clearly defined market, the Court declines to address this question because Motorola failed to establish that SLC's conduct harmed competition. [FF54].

[CL23] However, "Congress has declared certain practices not to be patent misuse even though those practices might otherwise be subject to scrutiny under ***antitrust law*** principles." *Id. at 1185-86* (discussing *35 U.S.C. § 271(d)*). These practices include "condition[ing] the license of any rights to the patent . . . on the acquisition of a license to rights in another patent," *unless* the patent owner "has market power for the patent . . . on which the license or sale is conditioned." *35 U.S.C. § 271(d)(5)*.

[CL24] Therefore, patent misuse with respect to tying is a two-step inquiry. First, the defendant must demonstrate that the patent holder has market power in a clearly defined market. *U.S. Philips, 424 F.3d at 1185*. Second, the defendant must establish that the conduct at issue is either *per se* misuse, or misuse under the rule of reason. *Id.* ("[D]epending on the circumstances, tying arrangements can be viewed as *per se* patent misuse or can be analyzed under the rule of reason."). **[*23]**

[CL25] ***HN7***[] With respect to the second step of this inquiry, the Federal Circuit has expressed skepticism that a patent-to-patent tying arrangement should be treated as *per se* misuse. *See* *U.S. Philips, 424 F.3d at 1186 n.1* ("[W]e note that the legislative history [of *35 U.S.C. § 271(d)*]. . . indicates congressional skepticism about treating tying arrangements in the context of patent licensing as *per se* patent misuse, rather than analyzing such arrangements under the rule of reason."); *see also* *Illinois Tool Works, 547 U.S. at 36* ("The assumption that tying arrangements serve hardly any purpose beyond the suppression of competition, rejected in [*United States Steel Corp. v. Fortner Enterprises, Inc., 429 U.S. 610, 97 S. Ct. 861, 51 L. Ed. 2d 80 (1977)*], has not been endorsed in any opinion since." (internal quotation marks and brackets omitted)).

[CL26] In particular, the Federal Circuit has explained that "while grouping patents together in package licenses has anticompetitive potential, it also has potential to create substantial procompetitive efficiencies such as clearing possible blocking patents, integrating complementary technology, and avoiding litigation." *Princo, 616 F.3d at 1325* (internal quotation marks omitted); *see also* *U.S. Philips, 424 F.3d at 1192-1193* ("In short, package licensing has the procompetitive effect of reducing the degree of uncertainty associated with investment decisions."); *Koninklijke Philips N.V. v. Cinram Int'l, Inc., No. CIV.A. 08-0515, 2013 U.S. Dist. LEXIS 76163, 2013 WL 2301955, at *5 (S.D.N.Y. May 24, 2013)* ("Defendants cannot entirely discount **[*24]** the benefit of the pooled arrangement in savings on 'transaction costs associated with making individual patent-by-patent royalty determinations and monitoring possible infringement of patents that particular licensees chose not to license.'" (quoting *U.S. Philips, 424 F.3d at 1198*)); *Texas Instruments, Inc. v. Hyundai Elecs. Indus., Co., 49 F. Supp. 2d 893, 901 (E.D. Tex. 1999)* ("The portfolio license is widely used . . . because it is almost impossible on a patent-by-patent, country-by-country, product-by-product basis to determine whether someone is using a company's patents in a given country . . . ."); *Broad. Music, Inc. v. Columbia Broad. Sys., Inc., 441 U.S. 1, 21-23, 99 S. Ct. 1551, 60 L. Ed. 2d 1 (1979)* (discussing the "unique" benefits of package copyright licenses).

[CL27] Without declaring that patent-to-patent tying is never *per se* misuse, the Court concludes that SLC's conduct here is not *per se* patent misuse. Indeed, SLC's pursuit of worldwide licenses achieves many of the procompetitive efficiencies that the Federal Circuit identified in *U.S. Philips* and emphasized again in *Princo*.[3] For example, seeking a worldwide license helps both parties avoid the extraordinary transaction costs of litigating or licensing a global patent portfolio on a country-by-country or patent-by-patent basis. *See* *Texas Instruments, 49 F. Supp. 2d at 901* (noting the difficult of country-by-country policing of patent rights).

[CL28] Accordingly, **[*25]** ***HN8***[] the Court applies the rule of reason analysis, *i.e.* "the finder of fact must decide whether the questioned practice imposes an unreasonable restraint on competition, taking into account a variety of factors, including specific information about the relevant business, its condition before and after the restraint was imposed, and the restraint's history, nature and effect." *U.S. Philips, 424 F.3d at 1197* (citing *Virginia Panel Corp. v. MAC Panel Co., 133 F.3d 860, 869 (Fed. Cir. 1997)*).

---

[3] Although *U.S. Philips* and *Princo* did not involve identical facts, the act of seeking worldwide licenses is sufficiently analogous to seeking a package license like the one at issue in *U.S. Philips*. *424 F.3d at 1182* ("Potential licensees who sought to license patents to the technology for manufacturing CD-Rs or CD-RWs were not allowed to license those patents individually . . . .").

[CL29] With reference to the rule of reason, Motorola identifies three anticompetitive effects that supposedly flow from SLC's practice of seeking worldwide licenses for the Asserted Patents: "extracting more money from licensees than they would have paid for just licenses to the U.S. or German patents," "foreclosing development of workarounds of SLC's foreign patents," "harm[ing] other licensees' ability to compete with [TEXT REDACTED BY THE COURT]" (Dkt. No. 73 at 17-18.)

[CL30] However, Motorola did not carry its burden to show that SLC's conduct violated the rule of reason.

[CL31] First, as the Court found *supra* [FF54], Motorola did not demonstrate that SLC's practice of seeking a worldwide license for its patent portfolio had anticompetitive effects.

[CL32] Moreover, Motorola did not show that the potentially **[*26]** anticompetitive harms it identified outweighed the potential benefits of SLC's licensing practices. *U.S. Philips, 424 F.3d at 1198* (noting that the proper analysis with respect to the rule of reason and package licensing balances the anticompetitive and procompetitive aspects of the conduct at issue); *see also* *Hornsby Oil Co. v. Champion Spark Plug Co., 714 F.2d 1384, 1392 (5th Cir. 1983)* ("Proof that the [plaintiff's] activities, on balance, adversely affected competition in the appropriate product and geographic markets is essential to recovery under the rule of reason."); *Columbia Broad. Sys., Inc. v. Am. Soc. of Composers, Authors & Publishers, 620 F.2d 930, 934 (2d Cir. 1980)* ("A rule of reason analysis requires a determination of whether an agreement is on balance an unreasonable restraint of trade, that is, whether its anti-competitive effects outweigh its pro-competitive effects."). In fact, Motorola engaged in no discussion of this issue in its single page treatment of the rule of reason. (Dkt. No. 73 at 17-18.)

[CL33] Ultimately, the Court is not persuaded that SLC's decision to license its portfolio covering the AMR-WB standard on a worldwide basis constituted patent misuse *per se* or under the rule of reason.[4] *See* *U.S. Philips, 424 F.3d at 1192 n.5* (***HN9***[] criticizing "[t]he implication . . . that a party with both an essential patent and a nonessential patent is not allowed to package the two together and only offer the package **[*27]** for a single price").

C. Limitation of Damages Based on FRAND Principles

[CL34] Motorola also argues that "[i]n violation of its FRAND obligations, SLC's damages request at trial disregarded the rates paid in the W-CDMA patent pool, and instead relied on SLC's 'tinkered' with [TEXT REDACTED BY THE COURT] license and SLC's injunction-induced licenses." (Dkt. No. 73 at 19.) In doing so, Motorola essentially seeks to attack the jury's award of damages through the present briefing, which the Court limited to equitable issues.

[CL35] ***HN10***[] Whether SLC violated its FRAND obligations is a question of fact. *Apple Inc. v. Samsung Elecs. Co., 920 F. Supp. 2d 1116, 1141 (N.D. Cal. 2013)*.

[CL36] During the trial, the jury heard extensive evidence from both parties relating to whether the license SLC sought (and ultimately received) from Motorola in this particular case complied with FRAND.

[CL37] Rather than permit Motorola to attack the jury's award of damages through the guise of an equitable defense, the Court will address the jury's verdict through the traditional channels: motions pursuant to *Rules 50(b)* and *59 of the Federal Rules of Civil Procedure*.

III. CONCLUSION

[4] Because SLC's conduct is not patent misuse *per se* or under the rule of reason, the Court finds it unnecessary to address whether Motorola appropriately defined a relevant market or established that SLC has market power in such a market.

For the reasons set forth above, the Court concludes that: (1) Motorola has failed to establish that SLC committed patent misuse, either through its licensing **[*28]** practices or through its tying arrangements; and (2) Motorola can urge any arguments that the jury's verdict is not supported by the evidence through motions pursuant to *Rules 50(b)* and *59 of the Federal Rules of Civil Procedure.*

So ORDERED and SIGNED this 15th day of February, 2018.

/s/ Rodney Gilstrap

RODNEY GILSTRAP

UNITED STATES DISTRICT JUDGE

Fenner v. GM, LLC (In re Duramax Diesel Litig.)

United States District Court for the Eastern District of Michigan, Northern Division

February 20, 2018, Decided; February 20, 2018, Filed

Case No. 17-cv-11661

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Mistake

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN1[] **Heightened Pleading Requirements, Fraud Claims**

Fed. R. Civ. P. 8(a)(2) mandates that pleadings, including complaints, must contain a short and plain statement of the claim showing that the pleader is entitled to relief. *Fed. R. Civ. P. 9(b)* requires a party allege fraud or mistake to state with particularity the circumstances constituting fraud or mistake. *Rule 9(b)* also provides, however, that malice, intent, knowledge, and other conditions of a person's mind may be alleged generally.

Civil Procedure > Judicial Officers > Judges > Discretionary Powers

Evidence > Burdens of Proof > Allocation

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

Civil Procedure > Preliminary Considerations > Jurisdiction > Subject Matter Jurisdiction

HN2[] **Judges, Discretionary Powers**

Fed. R. Civ. P. 12(b)(1) provides the means by which a party may assert lack of subject-matter jurisdiction as a defense. A Rule 12(b)(1) motion for lack of subject matter jurisdiction can challenge the sufficiency of the pleading itself (facial attack) or the factual existence of subject matter jurisdiction (factual attack). A facial attack goes to the question of whether the plaintiff has alleged a basis for subject matter jurisdiction, and the court takes the allegations of the complaint as true for purposes of Rule 12(b)(1) analysis. However, a factual attack challenges the factual existence of subject matter jurisdiction. In that case, the district court has broad discretion over what evidence to consider and may look outside the pleadings to determine whether subject-matter jurisdiction exists. Regardless, the plaintiff bears the burden of proving that jurisdiction exists.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN3[] Motions to Dismiss, Failure to State Claim

A pleading fails to state a claim under *Fed. R. Civ. P. 12(b)(6)* if it does not contain allegations that support recovery under any recognizable legal theory. In considering a *Rule 12(b)(6)* motion, the court construes the pleading in the non-movant's favor and accepts the allegations of facts therein as true. The pleader need not provide detailed factual allegations to survive dismissal, but the obligation to provide the grounds of his entitlement to relief requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do. In essence, the pleading must contain sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face and the tenet that a court must accept as true all of the allegations contained in a complaint is inapplicable to legal conclusions.

Civil Procedure > ... > Justiciability > Standing > Injury in Fact

Constitutional Law > ... > Case or Controversy > Standing > Elements

Civil Procedure > Preliminary Considerations > Jurisdiction > Subject Matter Jurisdiction

Constitutional Law > The Judiciary > Jurisdiction > Subject Matter Jurisdiction

Civil Procedure > Preliminary Considerations > Justiciability > Standing

HN4[] Standing, Injury in Fact

Federal courts have a duty to confirm subject matter jurisdiction in every case pending before them. *U.S. Const. art. III, § 2*, limits federal court jurisdiction to "Cases" and "Controversies." The doctrine derived from *art. III, § 2* imposes the requirement of standing: federal jurisdiction exists only if the dispute is one which is appropriately resolved through the judicial process. For standing to exist, three elements must be satisfied: injury in fact, causation, and redressability. Injury in fact exists when the plaintiff has suffered an invasion of a legally protected interest that is both concrete and particularized and actual or imminent, not conjectural or hypothetical. Causation exists if the injury is one that fairly can be traced to the challenged action of the defendant. The redressability requirement is satisfied if the plaintiff's injury is likely to be redressed by a favorable decision. Standing can exist even if the alleged injury may be difficult to prove or measure.

Civil Procedure > ... > Justiciability > Standing > Injury in Fact

HN5[] Standing, Injury in Fact

Claims of overpayment, wherein a plaintiff paid a premium but did not receive the anticipated consideration, are cognizable injuries in fact.

Constitutional Law > ... > Case or Controversy > Standing > Elements

HN6[] Standing, Elements

Proximate causation is not a requirement of Article III standing. Indeed, the causation requirement in standing is not focused on whether the defendant caused the plaintiff's injury in the liability sense; the plaintiff need only allege injury that fairly can be traced to the challenged action of the defendant, and not injury that results from the independent action of some third party not before the court.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN7[] Complaints, Requirements for Complaint

Fed. R. Civ. P. 8(a)(2) mandates that pleadings, including complaints, must contain a short and plain statement of the claim showing that the pleader is entitled to relief. However, federal pleading rules do not countenance dismissal of a complaint for imperfect statement of the legal theory supporting the claim asserted.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN8[] Complaints, Requirements for Complaint

The undergirding purpose of Fed. R. Civ. P. 8(a) is to ensure that the complaint provides notice. If the length and unnecessary complexity of the complaint obscures the true nature of the allegations and claims, dismissal may be appropriate.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

HN9[] Heightened Pleading Requirements, Fraud Claims

The specificity required for allegations of affirmative misrepresentations is necessarily different than the specificity required for allegations of fraudulent omissions. The purpose of Fed. R. Civ. P. 9(b) is to put defendants on notice of the nature of the claim. When it comes to claims of fraud by omission or fraudulent concealment, the plaintiff faces a slightly more relaxed pleading burden; the claim can succeed without the same level of specificity required by a normal fraud claim. The reasons for the disparate burden are straightforward. Fraudulent acts occur at a specific time, fraudulent omissions occur over a period of time. Fraudulent acts can be specifically described, but omissions are, by very definition, more amorphous.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

HN10[] Heightened Pleading Requirements, Fraud Claims

Plaintiffs must allege their theory of fraudulent omissions with enough specificity to provide defendants with fair notice of the claims. At the same time, in reviewing the complaint, the difficulty of obtaining proprietary information or pinpointing the point in time when a fraudulent omission occurred will be taken into account.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

HN11[] Heightened Pleading Requirements, Fraud Claims

When asserting claims of fraud, plaintiffs are not permitted to generally assert all claims against all defendants. But, at the same time, the Federal Rules of Civil Procedure are premised on the idea that pleadings should be simple and focused on providing notice.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

Governments > Courts > Rule Application & Interpretation

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Mistake

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN12[] Heightened Pleading Requirements, Fraud Claims

Fed. R. Civ. P. 9(b) is not to be read in isolation, but is to be interpreted in conjunction with *Fed. R. Civ. P. 8*. In a complex case, involving multiple actors and spanning a significant period of time, where there has been no opportunity for discovery, the specificity requirements of *Fed. R. Civ. P. 9(b)* should be applied less stringently. It is a principle of basic fairness that a plaintiff should have an opportunity to flesh out her claim through evidence unturned in discovery. In other words, the *Rule 9(b)* requirements are not meant to be an insurmountable barrier.

Antitrust & Trade Law > Consumer Protection

Constitutional Law > Supremacy Clause > Federal Preemption

Environmental Law > Federal Versus State Law > Federal Preemption

Antitrust & Trade Law > Consumer Protection > False Advertising > State Regulation

HN13[] Antitrust & Trade Law, Consumer Protection

Pre-emption may be either expressed or implied, and is compelled whether Congress' command is explicitly stated in the statute's language or implicitly contained in its structure and purpose. In all preemption cases, and especially where Congress has legislated in a field in which the States have traditionally occupied, courts start with the assumption that the historic police powers of the States were not to be superseded by the federal act unless that was the clear and manifest purpose of Congress. Environmental regulation is a field that the states have traditionally occupied. The same is true of consumer protection and advertising regulations. Where the statute does not expressly preempt state law, preemption may be implied. The U.S. Supreme Court has recognized two types of implied pre-emption: field pre-emption, where the scheme of federal regulation is so pervasive as to make reasonable the inference that Congress left no room for the States to supplement it, and conflict pre-emption, where compliance with both federal and state regulations is a physical impossibility, or where state law stands as an obstacle to the accomplishment and execution of the full purposes and objectives of Congress.

Business & Corporate Compliance > ... > Air Quality > Emission Standards > Mobile Emissions Sources

Environmental Law > Federal Versus State Law > Federal Preemption

Environmental Law > Federal Versus State Law

HN14[] Emission Standards, Mobile Emissions Sources

Section 209 of the Clean Air Act, codified at *42 U.S.C.S. § 7543*, reads as follows: No State or any political subdivision thereof shall adopt or attempt to enforce any standard relating to the control of emissions from new motor vehicles or new motor vehicle engines subject to this part. No State shall require certification, inspection, or any other approval relating to the control of emissions from any new motor vehicle or new motor vehicle engine as condition precedent to the initial retail sale, titling (if any), or registration of such motor vehicle, motor vehicle engine, or equipment. *42 U.S.C.S. § 7543* also specifies, however, that nothing in this part shall preclude or deny to any State or political subdivision thereof the right otherwise to control, regulate, or restrict the use, operation, or movement of registered or licensed motor vehicles. *§ 7543(d)*.

Civil Procedure > Pleading & Practice > Pleadings > Complaints

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN15[] **Pleadings, Complaints**

When considering well-pleaded factual allegations, the court must assume their veracity and then determine whether they plausibly give rise to an entitlement to relief. In considering a motion to dismiss, the court must construe the complaint in a light most favorable to the plaintiff.

Civil Procedure > Pleading & Practice > Pleadings > Complaints

HN16[] **Pleadings, Complaints**

Plaintiffs, not defendants, are the masters of their complaint.

Constitutional Law > Supremacy Clause > Federal Preemption

HN17[] **Supremacy Clause, Federal Preemption**

The second kind of implied preemption—conflict preemption—comes in two varieties. First, conflict preemption exists when compliance with both federal and state requirements is physically impossible. Second, conflict preemption exists when state law would operate as an obstacle to the accomplishment and execution of the full purposes and objectives of Congress.

Administrative Law > Separation of Powers > Primary Jurisdiction

HN18[] **Separation of Powers, Primary Jurisdiction**

The doctrine of primary jurisdiction arises when a claim is properly cognizable in court but contains some issue within the special competence of an administrative agency. When the doctrine is invoked, the court proceedings are stayed so that the parties may refer the matter to the administrative agency. However, the doctrine is not subject to a ready formula for application. Relevant factors include the desirable uniformity which would obtain if initially a specialized agency passed on certain types of administrative questions and the expert and specialized knowledge of the agencies involved.

Administrative Law > Separation of Powers > Primary Jurisdiction

HN19[] **Separation of Powers, Primary Jurisdiction**

The primary jurisdiction doctrine should not be invoked if no administrative forum is available.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Claims

Evidence > Burdens of Proof > Allocation

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

HN20[] **Racketeer Influenced & Corrupt Organizations, Claims**

The *Racketeer Influenced and Corrupt Organizations Act*, *18 U.S.C.S. § 1961 et seq.*, establishes bases for both criminal and civil suits. A RICO civil suit may be brought by any person injured in his business or property by reason of a violation of *section 1962* of this chapter. *18 U.S.C.S. § 1964(c)*. *Section 1962* provides that: It shall be unlawful for any person employed by or associated with any enterprise engaged in, or the activities of which affect, interstate or foreign commerce, to conduct or participate, directly or indirectly, in the conduct of such enterprise's affairs through a pattern of racketeering activity or collection of unlawful debt. *18 U.S.C.S. § 1962(c)*. In other words, a party advancing a civil RICO claim must establish their right to sue and then further allege the following elements: (1) conduct (2) of an enterprise (3) through a pattern (4) of racketeering activity.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Claims

Civil Procedure > ... > Justiciability > Standing > Burdens of Proof

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

Civil Procedure > ... > Justiciability > Standing > Injury in Fact

HN21[] **Racketeer Influenced & Corrupt Organizations, Claims**

Plaintiffs may assert a claim under the *Racketeer Influenced and Corrupt Organizations Act*, *18 U.S.C.S. § 1961 et seq.*, only if they can identify an injury to their business or property by reason of a violation of *18 U.S.C.S. § 1962*. *18 U.S.C.S. § 1964(c)*. In so limiting the scope of RICO standing, Congress exhibited an intention to exclude personal injury—that is, an injury to a person, such as a broken bone, a cut, or a bruise or a bodily injury. Similarly, a RICO injury must be concrete, not intangible or speculative.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Claims

Civil Procedure > ... > Justiciability > Standing > Injury in Fact

HN22[] **Racketeer Influenced & Corrupt Organizations, Claims**

The In re Bridgestone/Firestone, Inc. Tires Prod. Liab. Litig. Court provides a guiding principle for determining if a cognizable injury under the *Racketeer Influenced and Corrupt Organizations Act*, *18 U.S.C.S. § 1961 et seq.*, has been asserted: an injury arises as a result of a purchase only where the diminished value of the plaintiff's property has actually been realized or when the alleged infirmity in the purchased property has otherwise tangibly manifested itself.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Claims

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

HN23[] Racketeer Influenced & Corrupt Organizations, Claims

Courts have generally held that damages theories premised on the expectation of future value or profits are too speculative and contingent to establish injury for purposes of the *Racketeer Influenced and Corrupt Organizations Act*, *18 U.S.C.S. § 1961 et seq.* However, courts have recognized expectation damages under RICO where an agreement between the parties provided for a certain performance guarantee that the defendant had no intention of keeping. And courts have similarly found that, when the financial injury occurred at the time of payment, a cognizable out of pocket loss has been sustained.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Claims

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

HN24[] Racketeer Influenced & Corrupt Organizations, Claims

The *Racketeer Influenced and Corrupt Organizations Act*, *18 U.S.C.S. § 1961 et seq.*, proximate causation analysis is closely related to (even subsumed in) the statutory standing analysis. The U.S. Supreme Court has held that a plaintiff's right to sue required a showing that the defendant's violation not only was a "but for" cause of his injury, but was the proximate cause as well. The plaintiff must show some direct relation between the injury asserted and the injurious conduct alleged. Importantly, the causation inquiry must focus on the alleged link between the "predicate acts" and the asserted injury. A purported link that is too remote, purely contingent, or indirect is insufficient to confer standing. According to the U.S. Supreme Court, the general tendency of the law, in regard to damages at least, is not to go beyond the first step. An attenuated causation theory creates difficulties in apportioning damages between plaintiffs and attributing damages to defendants. A challenge to a RICO suit based on asserted lack of proximate causation, however, is often best resolved at summary judgment, not at the pleading stage.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Claims

Torts > ... > Multiple Defendants > Concerted Action > Civil Conspiracy

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

HN25[] Racketeer Influenced & Corrupt Organizations, Claims

When a conspiracy is alleged, it is inevitable that not all of the RICO defendants will be directly involved in every action which injures the plaintiff. The mere fact that it may be possible to differentiate between the RICO defendants in terms of culpability does not necessarily prevent a finding that all defendants proximately caused the alleged injury.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Claims

Evidence > Burdens of Proof > Allocation

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

HN26[] Racketeer Influenced & Corrupt Organizations, Claims

Although civil RICO plaintiffs must establish proximate causation, they need not necessarily show that they relied on any misrepresentations. Rather, plaintiffs need only show that the defendants' wrongful conduct was a substantial and foreseeable cause of the injury and the relationship between the wrongful conduct and the injury is logical and not speculative.

Torts > ... > Elements > Causation > Proximate Cause

HN27[] **Causation, Proximate Cause**

Proximate cause is not the same thing as a sole cause. A plaintiff can adequately allege proximate causation by plausibly asserting that the defendant's actions increased the likelihood of injury.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Claims

HN28[] **Racketeer Influenced & Corrupt Organizations, Claims**

The elements of a prima facie claim under the *Racketeer Influenced and Corrupt Organizations Act*, *18 U.S.C.S. § 1961 et seq.*, are: (1) conduct (2) of an enterprise (3) through a pattern (4) of racketeering activity.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Claims

HN29[] **Racketeer Influenced & Corrupt Organizations, Claims**

In order to state a claim under the *Racketeer Influenced and Corrupt Organizations Act*, *18 U.S.C.S. § 1961 et seq.*, plaintiffs must plausibly allege the existence of an enterprise engaged in a pattern of racketeering activity. *18 U.S.C.S. § 1962(c)*. But the definition of "enterprise" for RICO purposes is exceedingly broad. The statute defines "enterprise" as any individual, partnership, corporation, association, or other legal entity, and any union or group of individuals associated in fact although not a legal entity. *18 U.S.C.S. § 1961(4)*. On its face, the definition appears to include both legitimate and illegitimate enterprises within its scope; it no more excludes criminal enterprises than it does legitimate ones. A RICO association-in-fact must have at least three structural features: a purpose, relationships among those associated with the enterprise, and longevity sufficient to permit these associates to pursue the enterprise's purpose.

Antitrust & Trade Law > ... > Racketeer Influenced & Corrupt Organizations > Claims > Fraud

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

HN30[] **Claims, Fraud**

Simply conspiring to commit a fraud is not enough to trigger the *Racketeer Influenced and Corrupt Organizations Act*, *18 U.S.C.S. § 1961 et seq.*, if the parties are not organized in a fashion that would enable them to function as a racketeering organization for other purposes. The most probative question in determining whether a RICO enterprise exists is whether the enterprise has the ability to exist apart from the pattern of wrongdoing. To state it differently, the enterprise is not the pattern of racketeering activity; it is an entity separate and apart from the pattern of activity in which it engages. The Sixth Circuit has identified two important principles for determining whether an association with a corporation constitutes a RICO enterprise: 1) individual defendants are always distinct from corporate enterprises because they are legally distinct entities, even when those individuals own the corporations or act only on their behalf; and 2) corporate defendants are distinct from RICO enterprises when they are functionally separate, as when they perform different roles within the enterprise or use their separate legal incorporation to facilitate racketeering activity.

Antitrust & Trade Law > ... > Racketeer Influenced & Corrupt Organizations > Claims > Fraud

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

HN31[] **Claims, Fraud**

A RICO enterprise does not exist where one company unknowingly aided another company in a fraudulent endeavor. But when both companies are aware of and contribute to the fraud, they cannot argue that they have a routine commercial relationship.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Claims

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

HN32[] **Racketeer Influenced & Corrupt Organizations, Claims**

Pursuant to *18 U.S.C.S. § 1961(5)*, a pattern of racketeering activity requires at least two acts of racketeering activity, one of which occurred after the effective date of this chapter and the last of which occurred within ten years (excluding any period of imprisonment) after the commission of a prior act of racketeering activity.

Antitrust & Trade Law > ... > Racketeer Influenced & Corrupt Organizations > Claims > Fraud

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

HN33[] **Claims, Fraud**

To state a RICO claim based on mail or wire fraud, plaintiffs must allege the following three elements: (1) devising or intending to devise a scheme to defraud (or to perform specified fraudulent acts); (2) involving a use of the mails; and (3) for the purpose of executing the scheme or attempting to do so. The plaintiffs must allege that defendants possessed the specific intent to deceive or defraud. The scheme to defraud must involve misrepresentations or omissions reasonably calculated to deceive persons of ordinary prudence and comprehension. The plaintiffs need not show actual reliance, but the plaintiffs must demonstrate that the misrepresentations or omissions were "material." Specific intent to defraud or deceive exists if the defendant by material misrepresentations intends the victim to accept a substantial risk that otherwise would not have been taken.

Criminal Law & Procedure > ... > Fraud Against the Government > Mail Fraud > Elements

Criminal Law & Procedure > Criminal Offenses > Fraud > Wire Fraud

HN34[] **Mail Fraud, Elements**

Importantly, a defendant may commit mail fraud even if he personally has not used the mails. A mail fraud conviction requires only a showing that the defendant acted with knowledge that use of the mails would follow in the ordinary course of business, or that a reasonable person would have foreseen use of the mails. In other words, there is no requirement that the defendant have actually intended that the mails (or wire) be used. And, further, the mailings may be innocent or even legally necessary. The use of the mails need only be closely related to the scheme and reasonably foreseeable as a result of the defendant's actions.

Antitrust & Trade Law > ... > Racketeer Influenced & Corrupt Organizations > Claims > Fraud

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

HN35[] **Claims, Fraud**

When pleading predicate acts of mail or wire fraud, in order to satisfy the heightened pleading requirements of *Fed. R. Civ. P. 9(b)*, a plaintiff must (1) specify the statements that the plaintiff contends were fraudulent, (2) identify the speaker, (3) state where and when the statements were made, and (4) explain why the statements were fraudulent.

Antitrust & Trade Law > ... > Racketeer Influenced & Corrupt Organizations > Claims > Fraud

Criminal Law & Procedure > Criminal Offenses > Fraud

HN36[] **Claims, Fraud**

Because, to the district court's knowledge, the United States Court of Appeals for the Sixth Circuit has never articulated a duty to disclose requirement, the court declines to manufacture that requirement. In the context of RICO, the more recent and better reasoned cases from other circuits do not require a duty to disclose in order for fraudulent omissions to constitute a scheme to defraud. And, importantly, a false or fraudulent representation, within the meaning of *18 U.S.C.S. § 2314*, may be made by statements of half truths or the concealment of material facts, as well as by affirmative statements or acts.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Claims

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

HN37[] **Racketeer Influenced & Corrupt Organizations, Claims**

In order to "participate, directly or indirectly, in the conduct of such enterprise's affairs," one must have some part in directing those affairs. Of course, the word "participate" makes clear that RICO liability is not limited to those with primary responsibility for the enterprise's affairs, just as the phrase "directly or indirectly" makes clear that RICO liability is not limited to those with a formal position in the enterprise, but some part in directing the enterprise's affairs is required. Liability under *18 U.S.C.S. § 1962(c)* depends on showing that the defendants conducted or participated in the conduct of the "enterprise's affairs," not just their own affairs. Although Reves v. Ernst & Young does not explain what it means to have some part in directing the enterprise's affairs, subsequent decisions have persuasively explained that it can be accomplished either by making decisions on behalf of the enterprise or by knowingly carrying them out.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Constitutional Law > The Judiciary > Case or Controversy > Standing

Civil Procedure > ... > Class Actions > Class Members > Named Members

HN38[] **Class Actions, Certification of Classes**

Threshold individual standing is a prerequisite for all actions, including class actions. A potential class representative must demonstrate individual standing vis-as-vis the defendant; he cannot acquire such standing merely by virtue of bringing a class action. The growing consensus, however, is that class certification issues are logically antecedent to Article III concerns, at least when the named plaintiffs possess Article III standing. In other words, where class certification is the source of the potential standing problems, class certification should precede the standing inquiry.

Opinion

[*1045] ORDER DENYING MOTIONS TO DISMISS AND DENYING MOTIONS FOR LEAVE TO FILE [3] SURREPLIES AS MOOT**

On May 25, 2017, the original Plaintiffs (including the first-named Plaintiff Andrei Fenner) filed a complaint against Defendant General Motors LLC ("GM"), Robert Bosch GmbH, and Robert Bosch LLC ("Bosch" and, collectively, the "Defendants"). ECF No. 1. The suit was assigned to United States District Judge George Caram Steeh. On July 25, 2017, Judge Steeh issued a stipulated proposed order which consolidated the *Fenner* class action with another class action (*Carrie Mizell* et al. v. *General Motors LLC*, et al., Case No. 17-11984) also pending before him at the time. ECF No. 16. Pursuant to that stipulated proposed order, the "caption for the Consolidated Action" was designated as **[*1046]** "IN RE DURAMAX DIESEL LITIGATION." *Id.* at 3. Also pursuant to that stipulated order, the Plaintiffs filed a consolidated amended complaint on August 4, 2017. ECF No. 18. On August 30, 2017, the consolidated case was reassigned because it is a companion case to *Counts* et al. *v. General Motors*, Case No. 1-16-cv-12541, which is currently in discovery. ECF No. 33.

At the deadline for responsive pleadings, Defendants filed two motions to dismiss the consolidated amended complaint. ECF Nos. 44, 45.[1] Defendants **[**4]** advance many arguments, including that the Plaintiffs lack standing to sue, that Plaintiffs have failed to state a claim for affirmative misrepresentation, that any fraudulent concealment or omission claims should be dismissed or stayed, and that Plaintiffs have failed to state a *Racketeering Influenced and Corrupt Organizations Act* (RICO) claim, *18 U.S.C. § 1961 et seq.* For the following reasons, the motions to dismiss will be denied.

I.

All well-pleaded factual allegations are assumed to be true at the pleading stage. The consolidated amended complaint names thirteen Plaintiffs residing in ten states.[2] Each Plaintiff bought a Silverado or Sierra 2500 or 3500 diesel vehicle with a model year between 2011 and 2016. Con. Am. Compl. at 1, ECF No. 18. Some Plaintiffs bought new vehicles and others bought used vehicles, but each purchased their vehicle from an authorized GM dealer. *See, e.g., id.* at 14. The vehicles which Plaintiffs identify all contain a "Duramax" diesel engine. *Id.* at 1. Plaintiffs' allegations center on the emissions reduction technology associated with that engine.

A.

According to Plaintiffs, GM represented the Duramax engine as providing both low emissions and high performance. *Id.*[3] Plaintiffs (in unsourced quotations) **[**5]** contend that GM boasted that the Duramax engine constituted a "'remarkable reduction of diesel emissions'" compared to the engine previously used in its Silverado and Sierra vehicles. *Id.* Those representations were false. Plaintiffs allege that

> scientifically valid emissions testing has revealed that the Silverado and Sierra 2500 and 3500 models emit levels of NOx many times higher than (i) their gasoline counterparts, (ii) what a reasonable consumer would expect, (iii) what GM had advertised, (iv) the Environmental Protection Agency's maximum standards, and (v) the levels set for the vehicles to obtain a certificate of compliance that allows them to be sold in the United States.

Id.[4]

In other words, the Duramax engine does not actually combine high power and low **[*1047]** emissions as GM suggested: "[T]he vehicles' promised power, fuel economy, and efficiency is obtained only by turning off or turning

---

[1] Prior to filing, GM and Bosch requested leave to submit briefs of 80 (and 60, respectively) pages in support of their motions to dismiss. ECF Nos. 35, 39. In response, the Court directed the Defendants to submit an outline of their anticipated briefs and suggested that judicial efficiency might be served by waiting to advance state-specific challenges to Plaintiffs' claims in a motion filed pursuant to *Federal Rule of Civil Procedure 12(c)*. ECF No. 36. Defendants were amenable to the latter suggestion and, accordingly, the Court granted the parties leave to submit briefs of 50 pages (and reply briefs of 15 pages). ECF No. 42.

[2] Those states are Arizona, Arkansas, California, Louisiana, Michigan, Nevada, New Jersey, New Mexico, Oregon, and Texas.

[3] This purported achievement would be particularly noteworthy because diesel engines "have an inherent trade-off between power, fuel efficiency, and emissions: the greater the power and fuel efficiency, the dirtier and more harmful the emissions." *Id.* at 46.

[4] In the consolidated amended complaint, Plaintiffs summarize, in detail, the testing they conducted on a 2013 Silverado 2500. *Id.* at 70-92.

down emissions controls when the software in these vehicles senses they are not in an emissions testing environment." *Id.* at 1-2.

The Duramax engine allegedly achieves this feat by employing "defeat devices." *Id.* at 2. As Plaintiffs define that term, "[a] defeat device means an auxiliary emissions control device that **[**6]** reduces the effectiveness of the emission control system under conditions which may reasonably be expected to be encountered in normal vehicle operation and use." *Id.* The Duramax engine allegedly contains three such devices. Defeat Device No. 1 "reduces or derates the emissions system when temperatures are above the emissions certification test range (86°F)." *Id.* at 3. Similarly, Defeat Device No. 2 "operates to reduce emissions control when temperatures are below the emissions certification low temperature range (68°F)." *Id.* The impact of these alleged devices is significant:

> Testing reveals that at temperatures below 68°F (the lower limit of the certification test temperature), stop and go emissions are 2.1 times the emissions standard at 428 mg/mile (the standard is 200 mg/mile). At temperatures above 86°F, stop and go emissions are an average of 2.4 times the standard with some emissions as high as 5.8 times the standard.

Id.

The third defeat device "reduces the level of emissions controls after 200-500 seconds of steady speed operation in all temperature windows, causing emissions to increase on average of a factor of 4.5." *Id.* Plaintiffs estimate that "due to just the temperature-triggered **[**7]** defeat devices, the vehicles operate at 65-70% of their miles driven with emissions that are 2.1 to 5.8 times the standard." *Id.*[5]

Plaintiffs provide a technical explanation for how GM was able to leverage these devices to "obtain and market higher power and fuel efficiency from its engines while still passing the cold-start emissions certification tests." *Id.* at 4. Essentially, GM placed the "Selective Analytic Reduction (SCR) in front of the Diesel Particulate Filter (DPF)."[6] *Id.* In doing so, GM increased the engine's power production and fuel efficiency. However, placing the SCR in front of the DPF also dramatically increased potential emissions, thus requiring the engine to "employ Active Regeneration (burning off collected soot at a high temperature) and other power- and efficiency-sapping exhaust **[*1048]** treatment measures." *Id.* Thus, the power and fuel-efficiency gains were lost because of the increased need for emissions reduction technology. GM's solution, according to the Plaintiffs, was the three defeat devices identified above.

B.

1.

Plaintiffs allege that, in developing this solution, "GM did not act alone." *Id.* at 10. Rather, Robert Bosch GmbH and Robert Bosch LLC "were active and **[**8]** knowing participants in the scheme to evade U.S. emissions requirements" and to develop, manufacture, and test the "electronic diesel control (EDC) that allowed GM to implement the defeat device." *Id.* The EDC in question, Bosch's EDC17, "is a good enabler for manufacturers to

---

5 Plaintiffs analogize these alleged devices to those which Volkswagen has recently pleaded guilty to including in their diesel vehicles and which other vehicle manufacturers have been accused of utilizing. *See id.* at 2.

6 The SCR converts oxides of nitrogen (a harmful pollutant produced by diesel engines) into nitrogen gas and water "by means of a reduction reaction." *Id.* at 50. The DPF traps and stores particulate matter (soot). *Id.* at 51. The DPF is "cleaned through a process known as regeneration." *Id.* "Passive regeneration" is a "continuously occurring process" which occurs whenever "the exhaust gas temperature is high enough to burn the particulate matter trapped by the filter." *Id.* "Active regeneration occurs only when the engine senses that the DPF needs to be cleaned as the DPF is approaching maximum capacity and generating too much exhaust backpressure." *Id.* In that scenario, "fuel is injected into the exhaust stream via the HCI to increase the exhaust gas temperature so that the particulate matter can be burned off at carbon's non-catalytic oxidation temperature." *Id.* Because fuel is being used for a purpose other than propulsion, "[a]ctive regeneration dramatically reduces fuel economy." *Id.*

employ 'defeat devices' as it enables the software to detect conditions when emissions controls can be derated—*i.e.*, conditions outside of the emissions test cycle." *Id.* Importantly, "[a]lmost all of the vehicles found or alleged to have been manipulating emissions in the United States (Mercedes, FCA, Volkswagen, Audi, Porsche, Chevy Cruze) use a Bosch EDC17 device." *Id.*

According to a Bosch press release quoted by Plaintiffs, the EDC17 device controls "'the precise timing and quantity of injection, exhaust gas recirculation, and manifold pressure regulation.'" *Id.* at 93. The device also "'offers a large number of options such as the control of particulate filters or systems for reducing nitrogen oxides.'" *Id.* EDC17 is "run on complex, highly proprietary engine management software over which Bosch exerts near-total control." *Id.* at 94. Because the software "is typically locked to prevent customers, like GM, from making significant **[**9]** changes on their own," vehicle manufacturers must work closely with Bosch to implement EDC17 in a vehicle. *Id.*

According to Plaintiffs, "Bosch participated not just in the development of the defeat device, but also in the scheme to prevent U.S. regulators from uncovering the device's true functionality." *Id.* at 39. Additionally, "Bosch GmbH and Bosch LLC marketed 'clean diesel' in the United States and lobbied U.S. regulators to approve 'clean diesel,' another highly unusual activity for a mere supplier." *Id.* In short, Plaintiffs believe that "Bosch was a knowing and active participant in a massive, decade-long conspiracy with Volkswagen, Audi, Mercedes, GM, and others to defraud U.S. consumers, regulators, and diesel car purchasers or lessees." *Id.* at 40.

2.

In their complaint, Plaintiffs repeatedly reference allegedly similar conduct by other automobile manufacturers. Plaintiffs explain that, in recent years, "almost all of the major automobile manufacturers rushed to develop 'clean diesel' and promoted new diesel vehicles as environmentally friendly and clean." *Id.* at 5. Due in part to that marketing, a significant market for "clean diesel" vehicles developed: "[O]ver a million diesel vehicles were purchased **[**10]** between 2007 and 2016 in the United States and over ten million in Europe." *Id.* at 6. A number of those diesel vehicle manufacturers, however, have now been accused of installing "defeat devices" in their diesel vehicles. *Id.* For example, Volkswagen has pleaded guilty to criminal charges (and has settled civil class action claims) arising out of allegations that it purposefully evaded emission standards. *Id.* Fiat Chrysler Automobiles has also been accused of similar conduct. On January 12, 2017, the EPA "issued a Notice of Violation to FCA because it had cheated on its emissions certificates with respect to its Dodge Ram and Jeep Grand Cherokee vehicles, and on May 23, 2017, the United States filed a civil suit in the Eastern **[*1049]** District of Michigan alleging violations of the *Clean Air Act*." *Id.* at 6-7.

C.

Unlike gasoline engines, diesel engines "compress a mist of liquid fuel and air to very high temperatures and pressures, which causes the diesel to spontaneously combust." *Id.* at 46. When compared to gasoline engines, diesel engines produce greater amounts of "oxides of nitrogen (NOx), which includes a variety of nitrogen and oxygen chemical compounds that only form at high temperatures." *Id. See also id.* at 47. According **[**11]** to Plaintiffs,

> NOx pollution contributes to nitrogen dioxide, particulate matter in the air, and reacts with sunlight in the atmosphere to form ozone. Exposure to these pollutants has been linked with serious health dangers, including asthma attacks and other respiratory illnesses serious enough to send people to the hospital. Ozone and particulate matter exposure have been associated with premature death due to respiratory-related or cardiovascular-related effects. Children, the elderly, and people with pre-existing respiratory illness are at acute risk of health effects from these pollutants. As a ground level pollutant, NO2, a common byproduct of NOx reduction systems using an oxidation catalyst, is highly toxic in comparison to nitric oxide (NO). If overall NOx levels are not sufficiently controlled, then concentrations of NO2 levels at ground level can be quite high, where they have adverse acute health effects.

Id.

Plaintiffs further allege that the EPA believes that NOx contributes to increases in the amount of acid rain, water quality deterioration, toxic chemicals, smog, nitric acid vapor, and global warming. *Id.* at 113-114.

D.

In the consolidated amended complaint, Plaintiffs repeatedly reference **[**12]** the pollution standards promulgated by the EPA and other entities. They allege that GM and Bosch conspired to conceal the defeat devices in the Duramax engine from the EPA and allege that, because of the defeat devices, the vehicles in question do not comply with emission pollution standards, despite being certified as conforming to those requirements. *See, e.g., id.* at 97-99. But Plaintiffs also allege that "[t]his case is not based on these laws but on deception aimed at consumers." *Id.* at 5. Plaintiffs contend that "a vehicle's pollution footprint is a factor in a reasonable consumer's decision to purchase a vehicle" and that GM's actions demonstrate their understanding of that fact. As Plaintiffs explain, GM crafted a marketing campaign, "intended to reach the eyes of consumers, [which] promoted the Duramax engine as delivering 'low emissions' or having 'reduced NOx emissions.' GM was acutely aware of this due to the public perception that diesels are 'dirty.'" *Id.* at 60.

In the consolidated amended complaint, Plaintiffs quote, summarize, or reproduce approximately ten pages of GM advertising, press releases, and publications related to the emissions production and fuel economy of its diesel engines. *See id.* at 61-70. **[**13]** These advertisements and publications repeatedly emphasize that the Duramax engine "'run[s] clean,'" delivers "'low emissions,'" and is "'friendlier to the environment.'" Notably, not one of the advertisements or publications which Plaintiffs reproduce in this section of the consolidated amended complaint references EPA standards or represents that the vehicle in question has been certified by the EPA.

Plaintiffs allege that the disparity between the way the Duramax engine was characterized as operating and the way in which its emissions reductions systems **[*1050]** were actually configured has resulted in financial harm to them and other consumers. *See id.* at 116 ("As a result of GM's unfair, deceptive, and/or fraudulent business practices, and its failure to disclose that under normal operating conditions the Polluting Vehicles are not "clean" diesels, emit more pollutants than do gasoline-powered vehicles, and emit more pollutants than permitted under federal and state laws, owners and/or lessees of the Polluting Vehicles have suffered losses.").

First, Plaintiffs allege that they "paid a premium of nearly $9,000 [because] GM charged more for its Duramax engine than a comparable gas car." *Id.* at 115. Because the **[**14]** Duramax engine did not reduce emissions to the level a reasonable consumer would have expected, Plaintiffs allege that they overpaid for the vehicle at the time of purchase. *Id.* at 117. Plaintiffs also identify other damages they have suffered:

> Had Plaintiffs and Class members known of the higher emissions at the time they purchased or leased their Polluting Vehicles, they would not have purchased or leased those vehicles, or would have paid substantially less for the vehicles than they did. Moreover, when and if GM recalls the Polluting Vehicles and degrades the GM Clean Diesel engine performance and fuel efficiency in order to make the Polluting Vehicles compliant with EPA standards, Plaintiffs and Class members will be required to spend additional sums on fuel and will not obtain the performance characteristics of their vehicles when purchased. Moreover, Polluting Vehicles will necessarily be worth less in the marketplace because of their decrease in performance and efficiency and increased wear on their cars' engines.

Id. at 117.

E.

The consolidated amended complaint includes fifty-four counts. The first count alleges that the Defendants violated the RICO statute. The remaining fifty-three counts are **[**15]** state law claims predicated on the fraudulent concealment and consumer protection laws of forty-three different states. Thirty-three of the state law claims originate from states where no named Plaintiff resides.

II.

Defendants have moved for dismissal pursuant to *Federal Rules of Civil Procedure 8(a)*, *9(b)*, *12(b)(1)* and *12(b)(6)*. ***HN1***[] *Rule 8(a)(2)* mandates that pleadings, including complaints, must contain "a short and plain statement of the claim showing that the pleader is entitled to relief." *Id.* *Rule 9(b)* requires a party allege fraud or mistake to "state with particularity the circumstances constituting fraud or mistake." *Id.* *Rule 9(b)* also provides, however, that "[m]alice, intent, knowledge, and other conditions of a person's mind may be alleged generally." *Id.*

HN2[] *Rule 12(b)(1)* provides the means by which a party may assert lack of subject-matter jurisdiction as a defense. "A *Rule 12(b)(1)* motion for lack of subject matter jurisdiction can challenge the sufficiency of the pleading itself (facial attack) or the factual existence of subject matter jurisdiction (factual attack)." *Cartwright v. Garner, 751 F.3d 752, 759 (6th Cir. 2014)* (citing *United States v. Ritchie, 15 F.3d 592, 598 (6th Cir.1994))*. "A facial attack goes to the question of whether the plaintiff has alleged a basis for subject matter jurisdiction, and the court takes the allegations of the complaint as true for purposes of *Rule 12(b)(1)* analysis." *Id.* However, **[**16]** a "factual attack challenges the factual existence of subject matter jurisdiction." *Id.* In that case, "the district court has broad discretion over what evidence to consider and may look outside the pleadings to determine whether subject-matter jurisdiction **[*1051]** exists." *Adkisson v. Jacobs Eng'g Grp., Inc., 790 F.3d 641, 647 (6th Cir. 2015)*. Regardless, "the plaintiff bears the burden of proving that jurisdiction exists." *DLX, Inc. v. Kentucky, 381 F.3d 511, 516 (6th Cir. 2004)*.

HN3[] A pleading fails to state a claim under *Rule 12(b)(6)* if it does not contain allegations that support recovery under any recognizable legal theory. *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*. In considering a *Rule 12(b)(6)* motion, the Court construes the pleading in the non-movant's favor and accepts the allegations of facts therein as true. *See* *Lambert v. Hartman, 517 F.3d 433, 439 (6th Cir. 2008)*. The pleader need not provide "detailed factual allegations" to survive dismissal, but the "obligation to provide the 'grounds' of his 'entitle[ment] to relief' requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do." *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. In essence, the pleading "must contain sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face" and "the tenet that a court must accept as true all of the allegations contained in a complaint is inapplicable to legal conclusions." *Iqbal, 556 U.S. at 678-79* (quotations **[**17]** and citation omitted).

III.

In the present motions to dismiss, Defendants argue that Plaintiffs lack standing to bring suit, that the consolidated amended complaint is impermissibly vague, that all of Plaintiffs' claims are preempted, that any surviving claims should be stayed, and that Plaintiffs have failed to state a cognizable RICO claim. Those arguments will be addressed in roughly that order. Before proceeding further, the Court must confirm its jurisdiction. After analyzing jurisdictional issues, the next question is whether the complaint is sufficiently clear and specific to comply with federal pleading requirements. The cognizability of Plaintiffs' claims involving the alleged misrepresentation, concealment, or omission of material facts is inextricably intertwined with the question of whether those claims are preempted and the related question of whether this suit should be stayed in favor of an EPA investigation. Accordingly, those questions will be considered together. Next, Defendants' arguments for dismissal of the RICO claim will be considered. Finally, the dispute over whether Plaintiffs lack standing to assert claims premised on the laws of states where no named Plaintiff **[**18]** resides will be addressed.

Both GM and Bosch have filed separate motions to dismiss. While the two motions travel similar ground (and refer to and rely upon each other), they also contain distinct arguments. An effort will be made to specifically identify which Defendant's arguments are being addressed and the impact of each conclusion on each Defendant.

However, one of the disputes is whether the complaint is adequately specific in its allegations about which Defendant took what action. For that reason, some generalization will be inevitable.

A.

HN4[] Federal courts have a duty to confirm subject matter jurisdiction in every case pending before them. *Valinski v. Detroit Edison, 197 F. App'x 403, 405 (6th Cir. 2006)*. *Article III, § 2 of the U.S. Constitution* limits federal court jurisdiction to "Cases" and "Controversies." The doctrine derived from *Art. III, § 2* imposes the requirement of standing: federal jurisdiction exists only if the dispute is one "which [is] appropriately resolved through the judicial process." *Whitmore v. Arkansas, 495 U.S. 149, 155, 110 S. Ct. 1717, 109* ***[*1052]*** *L. Ed. 2d 135 (1990)*. For standing to exist, three elements must be satisfied: injury in fact, causation, and redressability. *Lujan v. Defs. of Wildlife, 504 U.S. 555, 560-61, 112 S. Ct. 2130, 119 L. Ed. 2d 351(1992)*. Injury in fact exists when the plaintiff has suffered "an invasion of a legally protected interest" that is both "concrete and particularized" and "actual or imminent," not "conjectural or **[**19]** hypothetical." *Id. at 560* (citations omitted). Causation exists if the injury is one "that fairly can be traced to the challenged action of the defendant." *Simon v. E. Kentucky Welfare Rights Org., 426 U.S. 26, 41, 96 S. Ct. 1917, 48 L. Ed. 2d 450 (1976)*. The redressability requirement is satisfied if the plaintiff's injury is "likely to be redressed by a favorable decision." *Id. at 38*. Standing can exist even if the alleged injury "may be difficult to prove or measure." *Spokeo, Inc. v. Robins, 136 S. Ct. 1540, 1549, 194 L. Ed. 2d 635 (2016)*.

Bosch argues that the Plaintiffs lack Article III standing because they have not identified an injury in fact which is traceable to the actions of Bosch. GM has not briefed the question of Article III standing, but has incorporated by reference Bosch's brief on the issue. *See* GM Mot. Dismiss at 16-17 n.18, ECF No. 45.[7] Bosch identifies "two types of injuries (1) alleged overpayment for their vehicles . . . and (2) potential future injuries arising from potential diminished performance." Bosh Mot. Dismiss at 11. As regards the overpayment theory, Bosch argues that the injury cannot be fairly traced to Bosch's actions because Bosch did not advertise the vehicles to consumers, did not establish the price for the vehicles, and was not a party to any vehicle-purchase contracts. As regards the potential for diminished future performance, **[**20]** Bosch argues that this theory is unduly hypothetical and speculative.

1.

Plaintiffs' overpayment theory suffices to provide standing to sue GM, which manufactured the vehicles and authorized their sale. Accepting Plaintiffs' allegations as true, they paid a premium for a "clean diesel" vehicle which actually polluted at levels dramatically higher than a reasonable consumer would expect. In other words, they paid for a product which did not operate in the way they believed it did. ***HN5***[] Claims of overpayment, wherein a plaintiff paid a premium but did not receive the anticipated consideration, are cognizable injuries in fact. *See* *Wuliger v. Manufacturers Life Ins. Co., 567 F.3d 787, 794 (6th Cir. 2009)*. *See also* *Danvers Motor Co. v. Ford Motor Co., 432 F.3d 286, 293 (3d Cir. 2005)* ("Monetary harm is a classic form of injury-infact."). That injury is traceable to GM's actions: GM developed the Duramax engine (including the alleged defeat devices), marketed its diesel vehicles as environmentally friendly, and set the MSRP for its diesel vehicles. There is, accordingly, a "'traceable connection between the plaintiff's injury and the complained-of conduct of the defendant.'" *Id. at 796* **[*1053]** (quoting *Steel Co. v. Citizens for a Better Env't, 523 U.S. 83, 103, 118 S. Ct. 1003, 140 L. Ed. 2d 210 (1998))*. And financial damages are, of course, fully redressable by a favorable decision. Plaintiffs have standing to sue GM.

---

[7] This decision is puzzling because Bosch appears to admit in their briefing that Plaintiffs' "overpayment" theory is sufficient to establish standing to sue GM. Bosch focuses its argument on the assertion that any such overpayment is not attributable to Bosch's actions. *See* Bosch. Mot. Dismiss at 12, ECF No. 44 ("But Plaintiffs do not have standing to sue Bosch LLC - rather than GM - unless their injury "fairly can be traced" to the actions of Bosch LLC. . . . Any overpayment based on artificially inflated market price cannot fairly be traced to the actions of Bosch LLC, which is not alleged to have advertised directly to consumers or have had any control over the price of the Subject Vehicles."). Nevertheless, because the Court has an independent obligation to confirm its own jurisdiction, Plaintiffs' standing to sue GM will be briefly addressed.

Bosch's connection to the alleged **[**21]** overpayment, however, is more attenuated. Bosch did not manufacture the Duramax engine, advertise vehicles containing that engine, or establish the MSRP. Accordingly, Bosch argues that any overpayment by Plaintiffs is attributable solely to GM's actions. That assertion mischaracterizes the allegations in the consolidated amended complaint. Plaintiffs allege that

> Bosch participated not just in the development of the defeat device, but also in the scheme to prevent U.S. regulators from uncovering the device's true functionality. Moreover, Bosch's participation was not limited to engineering the defeat device (in a collaboration described as unusually close). Rather, Bosch GmbH and Bosch LLC marketed "clean diesel" in the United States and lobbied U.S. regulators to approve "clean diesel," another highly unusual activity for a mere supplier.

Con. Am. Compl. at 39.

In other words, "Bosch GmbH and Bosch LLC have enabled over 1.3 million vehicles to be on the road in the United States polluting at levels that exceed emissions standards and which use software that manipulate emissions controls in a manner not expected by a reasonable consumer." *Id.* at 40.

Bosch admits that it supplied components to the **[**22]** diesel vehicles in question, but argues that it did not market those vehicles or enter into any contractual relationships with any of the Plaintiffs. As stated, however, that is not entirely true. Plaintiffs allege that Bosch "marketed 'clean diesel' in the United States." *Id.* at 39. While the exact nature of that marketing is unclear, it is plausible that Bosch's efforts contributed to the market demand for "clean diesel" vehicles, generally, in the United States. *See id.* at 5-6. The premiums which Plaintiffs paid for vehicles with Duramax engines were a natural consequence of that market demand. Similarly, Plaintiffs allege that Bosch enabled GM to deceive consumers and thus contributed to the overpayment. Plaintiffs emphasize the close relationship between GM and Bosch, including the joint efforts to calibrate EDC17 for the Duramax engine. The allegations in the consolidated amended complaint, if true, clearly establish that Bosch developed the vehicle component which has caused Plaintiffs' injury, that Bosch was aware of the deception that component would inevitably contribute to, and that Bosch was aware that consumers would pay a premium for vehicle capabilities that the component would not deliver. **[**23]** In other words, Plaintiffs overpaid for their vehicles *because* Bosch worked closely with GM to install working defeat devices in the Duramax vehicles.

There can be no dispute that, compared to GM, Bosch has a more indirect relationship with United States consumers. But ***HN6***[] "[p]roximate causation is not a requirement of Article III standing." *Lexmark Int'l, Inc. v. Static Control Components, Inc., 572 U.S. 118, 134 S. Ct. 1377, 1391 n.6, 188 L. Ed. 2d 392 (2014)*. Indeed, "the causation requirement in standing is not focused on whether the defendant 'caused' the plaintiff's injury in the liability sense; the plaintiff need only allege 'injury that fairly can be traced to the challenged action of the defendant, and not injury that results from the independent action of some third party not before the court.'" *Wuliger, 567 F.3d at 796* (quoting *Simon v. E. Ky. Welfare Rights Org., 426 U.S. 26, 41-42, 96 S. Ct. 1917, 48 L. Ed. 2d 450 (1976))*. Bosch may ultimately **[*1054]** prevail in its argument that it should not be held liable for Plaintiffs' overpayment, but Plaintiffs' allegation that Bosch was intimately involved in the creation of the component which caused the overpayment suffices to establish Article III standing.

None of the (noncontrolling) cases which Bosch cites in support of its argument compel a different result because each is legally or factually distinguishable. Bosch cites *In re Schering Plough Corp. Intron/Temodar Consumer **[**24]** Class Action* for the proposition that overpayment damages provide standing only if traceable to the actions of the defendant. *678 F.3d 235, 245 (3d Cir. 2012)*. In holding that the plaintiffs had not identified a causal relationship between the alleged misconduct (unlawful marketing practices) and the alleged injury (payment for ineffective drugs), the Third Circuit noted that the plaintiffs did not actually allege that they "ever paid for a Temodar or Intron-A prescription." *Id. at 247*. The plaintiffs did allege that they paid for Rebetol, but the Third Circuit explained that "[i]t is pure conjecture to conclude that because Schering's misconduct caused other doctors to write prescriptions for ineffective off-label uses for other products, Local 331 ended up paying for two prescriptions for Rebetol due to the same kind of misconduct." *Id. at 248*. Here, the causal connection is much clearer: Bosch worked with GM to develop the vehicle component which was the source of the overpayment by Plaintiffs. *In re Toyota Motor Corp. Unintended Acceleration Mktg., Sales Practices, & Prod. Liab. Litig.* is similarly inapplicable. *826 F. Supp. 2d 1180, 1191 (C.D. Cal. 2011)* (dismissing claims against North American divisions of Toyota Motor

Corporation because the complaint did not allege **[**25]** that the American advertisements were aired in other countries and thus did not identify a link between the defendants responsible for U.S. marketing and "the buying decisions of Toyota customers worldwide"). Bosch's involvement in the creation of a vehicle component which has caused financial harm to Plaintiffs has been clearly alleged.[8] Between that involvement and Bosch's alleged marketing for "clean diesel," Plaintiffs have adequately alleged that their overpayment can be fairly traced to Bosch.

2.

Plaintiffs' allegations of overpayment are sufficient to enable them to advance their state law consumer protection and fraudulent concealment claims. Plaintiffs' other alleged damages (essentially that, if the existence of a defeat device is proven, the value of their vehicles will decrease) need not be considered for standing purposes. Defendants separately challenge Plaintiffs' standing to bring a RICO claim. That argument is based upon a statutory standing requirement, not Article III standards, and thus will be considered below.

B.

Defendants next challenge the form of the consolidated amended complaint. GM argues, first, that the entire complaint should be dismissed because it does **[**26]** not contain a "short and plain statement of the claim showing that the pleader is entitled to relief," as required by *Federal Rule of Civil Procedure 8(a)*. **[*1055]** Second, GM (joined by Bosch) argues that all of Plaintiffs' state law claims which sound in fraud do not meet *Federal Rule of Civil Procedure 9(b)* specificity standards. Third, Bosch argues that Plaintiffs have engaged in impermissible group pleading. Each argument will be addressed in turn.

1.

HN7[] *Rule 8(a)(2)* mandates that pleadings, including complaints, must contain "a short and plain statement of the claim showing that the pleader is entitled to relief." *Id.* However, federal pleading rules "do not countenance dismissal of a complaint for imperfect statement of the legal theory supporting the claim asserted." *Johnson v. City of Shelby, Miss., 135 S. Ct. 346, 346, 190 L. Ed. 2d 309 (2014)*. The consolidated amended complaint spans 229 pages and contains 900 pages of exhibits. Defendants are correct that this complaint is lengthy, but this is not one of the extraordinarily rare scenarios where a complaint should be dismissed because of its length. Defendants fault the consolidated amended complaint for including "scores of paragraphs [related] to alleged misconduct involving Volkswagen, Audi, Porsche, Mercedes, and Fiat Chrysler." GM Mot. Dismiss at 12. These allegations are of limited relevance, **[**27]** but do provide context for Plaintiffs' remaining allegations. ***HN8***[] The undergirding purpose of *Rule 8(a)* is to ensure that the complaint provides notice. If the length and unnecessary complexity of the complaint obscures the true nature of the allegations and claims, dismissal may be appropriate. This is not such a case.

2.

Defendants also argue that Plaintiffs have failed to meet the heightened pleading standards of *Rule 9(b)* with respect to their allegations of fraud. The adequacy of Plaintiffs' fraud allegations are best resolved in conjunction with the analysis of whether Plaintiffs have stated a claim. However, one general point will be taken up separately.

---

[8] Bosch also argues that Plaintiffs' overpayment theory should be interpreted as essentially a "benefit-of-the-bargain" argument and suggests that such a theory is insufficient to establish standing because Bosch was not a party to any vehicle-purchase contracts with consumers. But a consumer can establish a concrete injury by alleging that he or she "received a product that failed to work for its intended purpose or was worth objectively less than what one could reasonably expect," regardless of whether the purchase was made pursuant to a contract. *Koronthaly v. L'Oreal USA, Inc., 374 F. App'x 257, 259 (3d Cir. 2010)*.

HN9[] The specificity required for allegations of affirmative misrepresentations is necessarily different than the specificity required for allegations of fraudulent omissions.[9] The purpose of *Rule 9(b)* is to put defendants on notice of the nature of the claim. *See* *Williams v. Duke Energy Int'l, Inc., 681 F.3d 788, 803 (6th Cir. 2012)* ("[I]t is a principle of basic fairness that a plaintiff should have an opportunity to flesh out her claim through evidence unturned in discovery. *Rule 9(b)* does not require omniscience; rather the Rule requires that the circumstances of the fraud be pled with enough specificity to put defendants on notice as to **[**28]** the nature of the claim." (internal citations omitted)). "When it comes to claims of fraud by omission or fraudulent concealment, the plaintiff faces a slightly more relaxed pleading burden; the claim 'can succeed without the same level of specificity required by a normal fraud claim.'" *Beck v. FCA US LLC, 273 F. Supp. 3d 735, 2017 WL 3448016, at *9 (E.D. Mich. 2017)* (quoting *Baggett v. Hewlett-Packard Co., 582 F.Supp.2d 1261, 1267 (C.D. Cal. 2007))*. The reasons for the disparate burden are straightforward. Fraudulent acts occur at a specific time, fraudulent omissions occur over a period of time. Fraudulent acts can be specifically described, but omissions are, by very definition, more amorphous.

As this Court explained in *Counts*, the Sixth Circuit has rejected the argument that it has the authority to "relax" the **[*1056]** *Rule 9(b)* particularity requirement. *See* *Counts v. General Motors, LLC, 237 F. Supp. 3d 572 (E.D. Mich. 2017)* (citing *United States v. Walgreen Co., 846 F.3d 879, 880-81 (6th Cir. 2017))*. That said, the Sixth Circuit has recognized that "'particular' allegations of fraud may demand different things in different contexts." *Walgreen, 846 F.3d at 881*. *HN10*[] Plaintiffs must allege their theory of fraudulent omissions with enough specificity to provide Defendants with fair notice of the claims. At the same time, in reviewing the consolidated amended complaint, "the difficulty of obtaining proprietary . . . information or pinpointing the point **[**29]** in time when a fraudulent omission occurred will be taken into account." *Counts, 237 F. Supp. 3d at 595*.

3.

Bosch further argues that the Plaintiffs have engaged in impermissible group pleading. This argument is primarily focused on Plaintiffs' RICO claim. As discussed below, Plaintiffs have adequately alleged the prima facie elements of a RICO claim with sufficient specificity to put Defendants on notice of their alleged involvement in the enterprise. Bosch further objects to Plaintiffs' decision to define "Bosch" as including both Bosch LLC and Bosch Gmbh. Bosch contends that Plaintiffs' failure to distinguish between these two entities precludes Bosch from understanding exactly what its constituent entities are accused of.

HN11[] When asserting claims of fraud, plaintiffs are not permitted to "generally assert all claims against all defendants." *State Farm Mut. Auto. Ins. Co. v. Universal Health Grp., Inc., No. 14-CV- 10266, 2014 U.S. Dist. LEXIS 151213, 2014 WL 5427170, at *3 (E.D. Mich. Oct. 24, 2014)* (citing *Hoover v. Langston Equipment Assoc., Inc., 958 F.2d 742, 745 (6th Cir. 1992))*. But, at the same time, the Federal Rules of Civil Procedure are premised on the idea that pleadings should be simple and focused on providing notice. *See* *Llewellyn-Jones v. Metro Prop. Grp., LLC, 22 F. Supp. 3d 760, 780 (E.D. Mich. 2014)*. As discussed above, allegations of fraudulent concealment will inevitably be less specific than allegations of affirmative misrepresentation. **[**30]**

Plaintiffs allege that "[b]oth Bosch GmbH and Bosch LLC . . . operate under the umbrella of the Bosch Group." Con. Am. Compl. at 41. Members of both Bosch GmbH and Bosch LLC were involved in the alleged conspiracy here. Plaintiffs indicate that the "acts of individuals described in this Complaint have been associated with Bosch GmbH and Bosch LLC whenever possible." *Id.* But Plaintiffs further contend that those employees "often hold themselves out as working for 'Bosch.'" *Id.* at 42. In other words, identifying "which Bosch defendant" was involved in which particular actions cannot always be "ascertained with certainty." *Id.* Plaintiffs believe that discovery will alleviate this confusion. *Id.*

Given Plaintiffs' allegation that Bosch employees and constituent entities often blur the legal boundaries between Bosch subsidiaries, the allegations against the Bosch Defendants are sufficiently specific. Plaintiffs are proceeding

[9] Plaintiffs have expressly disclaimed any claims premised on affirmative misrepresentation (discussed below).

primarily on a theory of fraudulent omissions, and Bosch's alleged role within that fraudulent scheme is clear. ***HN12***[] "*Rule 9(b)* is not to be read in isolation, but is to be interpreted in conjunction with *Federal Rule of Civil Procedure 8*." *U.S. ex rel. Bledsoe v. Cmty. Health Sys., Inc., 501 F.3d 493, 503 (6th Cir. 2007)*. "In a complex case, involving multiple actors and spanning a significant period of **[**31]** time, where there has been no opportunity for discovery, 'the specificity requirements of *Rule 9(b)* [should] be applied less stringently. . . . It is a principle of basic fairness that a plaintiff should have an opportunity to flesh out her claim **[*1057]** through evidence unturned in discovery.'" *State Farm Mut. Auto. Ins. Co. v. Pointe Physical Therapy, LLC, 107 F. Supp. 3d 772, 788 (E.D. Mich. 2015)* (quoting *JAC Holding Enterprises, Inc. v. Atrium Capital Partners, LLC, 997 F.Supp.2d 710, 727 (E.D. Mich. 2014))*. This is one such case.

In other words, the *Rule 9(b)* requirements are not meant to be an insurmountable barrier. Although the precise identity of the subsidiary and/or employee which may have taken certain actions is unclear, that level of detail is unnecessary to put the Bosch Defendants on notice of the claims made against them. The consolidated amended complaint will not be dismissed without prejudice for engaging in group pleading.

IV.

Defendants seek dismissal of the state law claims. First, they argue that Plaintiffs have failed to state claims for affirmative misrepresentation. Second, Defendants argue that Plaintiffs' fraudulent omission claims should be dismissed or stayed. Specifically, Defendants assert that Plaintiffs' concealment or omission claims are preempted, have not been plausibly pled, and should be stayed under the primary jurisdiction doctrine. In response, Plaintiffs deny that they are **[**32]** advancing any fraud claims premised on affirmative misrepresentations. *See* Pl. Resp. GM Mot. Dismiss at 9-10 ("But Plaintiffs do not sue for common law fraud under state law for affirmative misrepresentations."). Rather, "Plaintiffs sue for omissions of material fact, fraudulent concealment, violation of state law consumer protection statutes, and violation of RICO." *Id.* at 10. Plaintiffs further challenge the assertion that the state consumer protection laws on which it relies incorporate only claims of "common law fraud": "The consumer protection statutes bar not only fraud but also deceptive, unfair, and unlawful conduct." *Id.* For similar reasons, Plaintiffs contend that GM's argument that Plaintiffs have failed to plead reliance on affirmative misrepresentations is irrelevant.

Plaintiffs acknowledge that the consolidated amended complaint includes an extended discussion of various advertisements and press releases which GM issued regarding vehicles equipped with the Duramax engine. Those allegations, Plaintiffs explain, are not meant to buttress affirmative misrepresentation claims. They are meant "to show that Defendants' omissions were material for purposes of claims under consumer protection **[**33]** statutes and RICO." *Id.* at 11. To repeat: "The relevance of those promises is GM's acknowledgement that low emissions are material . . . to a reasonable consumer." *Id.* at 12.

Given Plaintiffs' decision to disavow any affirmative misrepresentation claims, the remaining issues are whether Plaintiffs' state law claims are preempted by the *Clean Air Act* (CAA), whether Plaintiffs have plausibly pleaded fraudulent omission claims, and whether any plausibly pleaded fraudulent omission claims should be stayed pursuant to the primary jurisdiction doctrine. Each question will be addressed in turn.

A.

HN13[] "Pre-emption may be either expressed or implied, and 'is compelled whether Congress' command is explicitly stated in the statute's language or implicitly contained in its structure and purpose.'" *Gade v. Nat'l Solid Wastes Mgmt. Ass'n, 505 U.S. 88, 98, 112 S. Ct. 2374, 120 L. Ed. 2d 73 (1992)* (quoting *Jones v. Rath Packing Co., 430 U.S. 519, 525, 97 S. Ct. 1305, 51 L. Ed. 2d 604 (1977))*. In all preemption cases, and especially where "Congress has 'legislated . . . in a field in which the States have traditionally occupied,' . . . [courts] 'start with the assumption that the historic police powers of the **[*1058]** States were not to be superseded by the Federal Act unless that was the clear and manifest purpose of Congress.'" *Medtronic, Inc. v. Lohr, 518 U.S. 470, 485, 116 S. Ct.*

2240, 135 L. Ed. 2d 700 (1996) (quoting Rice v. Santa Fe Elevator Corp., 331 U.S. 218, 230, 67 S. Ct. 1146, 91 L. Ed. 1447 (1947)). "Environmental regulation is a field that the states have traditionally **[**34]** occupied." Merrick v. Diageo Americas Supply, Inc., 805 F.3d 685, 694 (6th Cir. 2015). The same is true of consumer protection and advertising regulations. *See* In re Ford Fusion & C-Max Fuel Econ. Litig., No. 13-MD-2450 KMK, 2015 U.S. Dist. LEXIS 155383, 2015 WL 7018369, at *28 (S.D.N.Y. Nov. 12, 2015); Gilles v. Ford Motor Co., 24 F. Supp. 3d 1039, 1047 (D. Colo. 2014). Where the statute does not expressly preempt state law, preemption may be implied. The Supreme Court has recognized

> two types of implied pre-emption: field pre-emption, where the scheme of federal regulation is so pervasive as to make reasonable the inference that Congress left no room for the States to supplement it, and conflict pre-emption, where compliance with both federal and state regulations is a physical impossibility, or where state law stands as an obstacle to the accomplishment and execution of the full purposes and objectives of Congress.

Gade, 112 S.Ct. at 2383 (internal citations omitted).

Defendants' preemption arguments arise out of Section 209 of the CAA. **HN14**[] That section, codified at 42 U.S.C. § 7543, reads as follows:

> No State or any political subdivision thereof shall adopt or attempt to enforce any standard relating to the control of emissions from new motor vehicles or new motor vehicle engines subject to this part. No State shall require certification, inspection, or any other approval relating to the control of emissions from any new motor vehicle or new motor vehicle engine as condition **[**35]** precedent to the initial retail sale, titling (if any), or registration of such motor vehicle, motor vehicle engine, or equipment.

Id. at § 7543(a).

Section 7543 also specifies, however, that "[n]othing in this part shall preclude or deny to any State or political subdivision thereof the right otherwise to control, regulate, or restrict the use, operation, or movement of registered or licensed motor vehicles." *Id.* at § 7543(d).

1.

The initial question is whether Plaintiffs' suit (and the state law claims it is premised upon) represents an attempt to establish a "standard" relating to the control of emissions or involves "certification, inspection, or any other approval relating to the control of emissions." The Supreme Court has interpreted "standard" in § 7543(a) to mean "requirements such as numerical emission levels with which vehicles or engines must comply . . . or emission-control technology with which they must be equipped." Engine Mfrs. Ass'n v. S. Coast Air Quality Mgmt. Dist., 541 U.S. 246, 253, 124 S. Ct. 1756, 158 L. Ed. 2d 529 (2004). Plaintiffs are, of course, private citizens suing on their own behalf, not state governmental entities. But there is some authority to support the proposition that § 7543(a)'s language can reach even private causes of action for damages. *See* Cipollone v. Liggett Grp., Inc., 505 U.S. 504, 521, 112 S. Ct. 2608, 120 L. Ed. 2d 407 (1992) (finding that the federal cigarette statute, which forbade states **[**36]** from imposing additional "requirements" or "prohibitions" governing cigarette advertising, had broad preemptive effect and applied to both "positive enactments and common law" actions for damages) (internal citations omitted). *See also* Jackson v. Gen. Motors Corp., 770 F. Supp. 2d 570, 575 **[*1059]** (S.D.N.Y. 2011) ("The operative phrase in § 209(a) is 'adopt or attempt to enforce.' As a result, if state common law tort actions are examples of 'enforcement,' then such actions (assuming that they are 'related to' the control of emissions) are clearly preempted by § 209(a)."). Indeed, as the *Cipollone* Court recognized, "common-law damages actions . . . are premised on the existence of a legal duty, and it is difficult to say that such actions do not impose 'requirements or prohibitions.'" 505 U.S. at 522.

Accordingly, if Plaintiffs' state law claims represent veiled attempts to establish a "standard relating to the control of emissions," they are expressly preempted. But Plaintiffs' suit is not a disguised attempt to impose a standard on GM by mandating maximum "numerical emission levels" for its diesel vehicles or requiring certain emission-control technology. Rather than imposing requirements regarding the type of emissions technology which GM must include in its vehicles, Plaintiffs' suit seeks **[**37]** compensation for GM's fraudulent *concealment* of the actual operation of the emissions technology in its diesel vehicles from consumers.

GM further argues that Plaintiffs' suit represents an attempt to require "disclosure" of "information regarding AECDs—a technology for the 'control of emissions'—before a car can be sold." GM Mot. Dismiss at 25. According to GM, the suit is thus preempted because this disclosure requirement constitutes a "straightforward effort to 'require certification, inspection, or any other approval relating to the control of emissions . . . as a condition precedent to the initial retail sale' of a new motor vehicle." *Id.* (quoting *§ 7543(a)*). Defendants have provided no authority for the proposition that private claims alleging violations of consumer protection laws are equivalent to a "certification, inspection, or . . . other approval" requirement. Such an interpretation would be incompatible with the plain meaning of the section. The ability to certify, inspect, or approve presupposes that the acting party has some authority to prevent the sale of a car if the vehicle fails to pass the certification test. Consumers cannot prevent a manufacturer from selling a particular **[**38]** vehicle, and so it appears impossible that consumers could impose *any* "condition precedent to the initial retail sale" of a vehicle.[10] *§ 7543(a)*.

2.

GM nevertheless argues that the suit is preempted because Plaintiffs' claims "relate **[*1060]** to" the enforcement of EPA emission standards. GM's rationale can be summarized as follows. First, "Plaintiffs' non-disclosure claims rest exclusively on the presence of an 'illegal' 'defeat device.'" GM Mot. Dismiss at 19. Second, the alleged purpose of that "defeat device" is "to defeat EPA certification testing and evade federal emissions standards." *Id.* at 20. Third, "[a]ll of Plaintiffs' claims thus depend on and are based 'solely on' a showing that GM employed a 'defeat device' as defined by the EPA." *Id.* For that reason, all of Plaintiffs' claims are expressly preempted. *Id.*

This line of reasoning can be sustained only by selectively characterizing Plaintiffs' allegations and claims. But notwithstanding Defendants' understandable desire to reframe Plaintiffs' allegations in a light favorable to their preferred defenses, the Court cannot do the same. ***HN15***[] When considering "well-pleaded factual allegations," the Court must "assume their veracity and then determine **[**39]** whether they plausibly give rise to an entitlement to relief." *Iqbal, 556 U.S. at 679*. In considering a motion to dismiss, the Court must "construe the complaint in a light most favorable" to the plaintiff. *Lambert, 517 F.3d at 439*.

GM customers could conceivably attempt to bring suit against GM and Bosch for noncompliance with EPA emission standards. And there can be no doubt that such a suit would be preempted. *See Engine Mfrs. Ass'n, 541 U.S. at*

---

[10] In further support of the contention that GM has publically disclosed the existence of AECDs which are present in the subject vehicles, GM points to a publically available document which purports to show that GM provided "AECD Descriptions" to the EPA. *See* GM Reply Br. at 5 & Ex. 5, ECF No. 57. Information from outside the pleadings cannot be considered at the pleading stage, with several limited exceptions. *Tackett v. M & G Polymers, USA, L.L.C., 561 F.3d 478, 487 (6th Cir. 2009)*. To the extent the identified document is a public record, courts may typically only take judicial notice of such records to recognize "the fact of the documents' existence, and not for the truth of the matters asserted therein." *Passa v. City of Columbus, 123 F. App'x 694, 697 (6th Cir. 2005)*. And even if this exhibit was considered now, it would not change the Court's analysis. The document suggests that AECD descriptions were provided to the EPA, but does not include those descriptions. In other words, the document does not appear to provide any evidence that the AECDs were themselves publically disclosed. Plaintiffs' claims are focused on allegedly inadequate disclosures to the *public*; confidential disclosures to the EPA are irrelevant.

The relevance of the document purportedly submitted to the EPA is the primary subject of the parties' motions for leave to file surreplies. *See* ECF No. 58, 60. Because the document cannot be considered for the purpose it was submitted and would not change the Court's analysis even if reviewed, those motions will be denied as moot.

255.[11] But construing *this* complaint in a light most favorable to Plaintiffs, Plaintiffs claims can be interpreted differently. A careful parsing of Defendants' syllogism reveals several mistaken premises.

i.

First, Defendants emphasize that Plaintiffs' claims "rest exclusively on the presence of an 'illegal' 'defeat device.'" GM Mot. Dismiss at 19. By that assertion, Defendants mean that the complaint "alleges only one type of defeat device, *i.e.* one whose purpose is to defeat EPA certification testing and evade federal emissions standards." *Id.* at 20. Thus, Defendants believe Plaintiffs' claims will require proof that the Duramax engine includes a "'defeat device' *as defined by the EPA*." *Id.* (emphasis added). That is not the definition given by Plaintiffs in the consolidated amended complaint. According **[**40]** to Plaintiffs, "[a] defeat device means an auxiliary emissions control device that reduces the effectiveness of the emission control system under conditions which may reasonably be expected to be encountered in normal vehicle operation and use." Con. Am. Compl. at 2.[12]

It is undoubtedly true that the consolidated amended complaint includes references to EPA standards, emissions testing, and Plaintiffs' belief that the vehicles at issue violate EPA regulations. *See, e.g., id.* at 2, 3, 6. But Plaintiffs can prevail on **[*1061]** their claims without proving the existence of a "defeat device" as that term is defined by the EPA. Plaintiffs' fraudulent concealment and consumer protection claims are premised on the following assertions:

> A reasonable consumer would not expect their Silverado or Sierra vehicle to spew unmitigated NOx in this fashion while driving in the city or on the highway, nor would a reasonable consumer expect that fuel economy was achieved in part by turning off or derating the emission systems, nor would a reasonable consumer expect that if the emissions were as promised the advertised fuel economy and performance could not be achieved. . . . GM never disclosed to consumers that the Polluting Vehicles **[**41]** may be "clean" diesels in very limited circumstances but are "dirty" diesels under most driving conditions. GM never disclosed to consumers that it programs its emissions systems to work only under certain conditions. GM never disclosed that it prioritizes engine power and profits over the environment. GM never disclosed that the Polluting Vehicles' emissions materially exceed the emissions from gasoline-powered vehicles, that the emissions exceed what a reasonable consumer would expect from a "low emissions" vehicle, and that the emissions materially exceed applicable emissions limits in real-world driving conditions.

Id. at 8, 9-10.

None of these allegations, with the exception of the very last phrase,[13] will require proof that the Duramax engine contains a "defeat device" which violates EPA standards. To the contrary, Plaintiffs' fraudulent concealment and

---

[11] There are a number of potential theories which Plaintiffs could have conceivably advanced and which would have been squarely preempted. For example, if Plaintiffs were seeking damages based solely on Defendants' alleged violations of the CAA, their suit would be preempted. Likewise, if Plaintiffs' claims were "predicated on deceit against the EPA during new-vehicle certification," their claims would be preempted. *In re Volkswagen "Clean Diesel" Mktg., Sales Practices, & Prod. Liab. Litig., 264 F. Supp. 3d 1040, 1054 (N.D. Cal. 2017)*.

[12] The consolidated amended complaint also discusses the EPA's definition of a defeat device, but that definition is alleged in connection with allegations regarding the EPA's conclusion that Volkswagen's diesel vehicles violated the CAA. *Id.* at 6. In their briefing, Defendants repeatedly contend that allegations regarding the conduct of other diesel vehicle manufacturers is irrelevant, and so Defendants cannot reasonably point to these allegations when arguing that Plaintiffs' claims should be preempted.

[13] And even this allegation is focused on consumer expectations about compliance, not the compliance itself. *See In re Volkswagen "Clean Diesel" Litigation, 94 Va. Cir. 189, 2016 WL 5347198 at *6 (Va.Cir.Ct. 2016)* ("[A]lthough emissions compliance or lack thereof may be further proof of deceit, it is the deceit about compliance, rather than the need to enforce compliance, that is the gravamen of Plaintiffs' claims."). Admittedly, proving this allegation appears to require proof that EPA

consumer protection claims are focused on whether Defendants fraudulently concealed information regarding the operation of the Duramax engine's emissions technology which would have been material to a reasonable consumer. Thus, Plaintiffs will be required to prove that the Duramax engine contains a component which "derates" emissions reduction **[**42]** technology and thus increases emissions to a level that a reasonable consumer would not anticipate and would consider material to his or her purchase decision. But Plaintiffs will not be required to prove that the engine component which is the source of the harm meets the EPA's definition of an illegal defeat device.[14]

ii.

Second, Defendants assert that Plaintiffs are asking the Court to "declare the EPA's existing compliance determination invalid—and *any* such effort is an affront to the EPA's exclusive jurisdiction." GM Mot. Dismiss at 22 (emphasis in **[*1062]** original). Just like Plaintiffs can prevail without demonstrating the existence of a "defeat device" that is illegal under EPA regulations, Plaintiffs can prevail without showing that the subject vehicles violate EPA regulations. The gravamen of their state law claims is that they purchased a vehicle which polluted at levels far greater than a reasonable consumer would expect. In other words, the vehicle operated differently than they expected. And, importantly, Plaintiffs allege that this disparity results from a nondisclosed vehicle component which is inherently deceptive: its alleged purpose is to surreptitiously **[**43]** permit dramatically higher emissions under certain conditions.

On their face, these allegations do not require proof of noncompliance with EPA regulations. In fact, it is conceivably possible that Defendants could simultaneously comply with EPA regulations while still concealing material information from consumers. Defendants' arguments to the contrary are premised on the assumption that consumers only care about compliance with emission standards, not the total level of emissions by a certain vehicle or the different levels of pollution emitted by competing vehicles. But that assumption cannot be true: the significant market for environmentally friendly vehicles—which are designed to emit pollution far below the regulatory maximums—directly contradicts that assertion. As noted above, the advertisements and press releases which GM issued regarding the Duramax engine and subject vehicles repeatedly emphasized the engine's low emissions, but never expressly referenced EPA regulations. In other words, GM's own conduct reveals an understanding that consumers believe emission levels are material to their purchasing decisions separate and apart from the regulatory maximum emission standards. **[**44]** Thus, the allegation that the subject vehicles do not comply with EPA regulations is consistent with Plaintiffs' theory of harm, but proof of noncompliance is not required.[15]

If Plaintiffs' claims were predicated on proving noncompliance with EPA regulations or with demonstrating that Defendants had defrauded the EPA, they would be preempted. *See* *Jackson, 770 F. Supp. 2d at 572* (finding state tort claims advanced by government employees to be preempted because the plaintiffs had abandoned all claims except those expressly based on proving violation of the CAA). Plaintiffs expressly deny that they assert those claims. *See* Con. Am. Compl. at 5; Pl. Resp. GM Mot. Dismiss at 17. ***HN16***[] Plaintiffs, not Defendants, are the masters of their complaint. *See* *Caterpillar Inc. v. Williams, 482 U.S. 386, 392, 107 S. Ct. 2425, 96 L. Ed. 2d 318 (1987)*.

---

regulations have been violated. To the extent that it is true, a claim premised on solely that allegation would likely be preempted. But Plaintiffs advance numerous other theories of consumer harm which are not preempted.

14 Notwithstanding this fact, Plaintiffs (and the Court) frequently use the term "defeat device" as a short hand for the manner in which EDC17 allegedly uses several features to bypass or derate emissions reduction technologies in certain circumstances. That term has entered the common parlance, and so the fact that the EPA has also provided a legal definition for the term "defeat device" does not mean that every use of the term "defeat device" necessarily involves a reference to that regulatory definition.

15 In other words, proof that Defendants concealed material information from the EPA will almost certainly provide the factual predicate to sustain Plaintiffs' state law claims, but the inverse is not necessarily true.

iii.

Defendants rely upon a number of cases to support their express preemption argument, but each are distinguishable. For example, Defendants cite a several cases where state governmental entities brought claims against vehicle manufacturers alleging unlawful levels of emissions. *See* *In re Office of Attorney Gen. of State of New York, 269 A.D.2d 1, 11, 709 N.Y.S.2d 1 (2000)* (finding the New York attorney general's suit to be preempted by the CAA because "the Attorney General [was] attempting to enforce [federal emission] standards"); *In re Volkswagen "Clean Diesel" Mktg., Sales Practices, & Prod. Liab. Litig., 264 F. Supp. 3d 1040, 1052 (N.D. Cal. 2017)* **[**45]** (finding Wyoming's suit to be preempted because Wyoming was attempting to enforce a state regulation which **[*1063]** prohibited "installing a defeat device in a vehicle prior to registration"). Such suits involved transparent attempts by state governmental entities to establish supplementary emission regulations or enforce existing regulations. Here, Plaintiffs are suing for consumer fraud premised on the allegation that Defendants did not disclose certain aspects of how the subject vehicles operated. The allegations involve the level of emissions, but do not require proof that federal emission regulations were violated.

Defendants also cite *Jackson v. General Motors Corp., 770 F. Supp. 2d 570*. *Jackson* involved government employees bringing suit alleging common law tort claims. Thus, *Jackson* did not involve an attempt by a state to create and enforce emission standards. But the *Jackson* plaintiffs were alleging "direct violations of EPA standards as a predicate for claims of personal injuries" *Felix v. Volkswagen Grp. of Am., Inc., No. A-0585-16T3, 2017 N.J. Super. Unpub. LEXIS 1776, 2017 WL 3013080, at *5 (N.J. Super. Ct. App. Div. July 17, 2017)* (distinguishing *Jackson*). *See also* *Jackson, 770 F. Supp. 2d at 577* ("Plaintiffs' negligence claims regarding Defendants' compliance with CAA emissions standards" are "squarely" preempted).

In other words, Defendants rely upon cases **[**46]** where the claims depended upon direct proof of noncompliance with federal emission regulations. Plaintiffs, on the other hand, are bringing consumer protection and fraudulent concealment claims which do not require direct proof of noncompliance. None of the courts which have considered such claims have concluded that they are preempted. *See* *Felix v. Volkswagen Grp. of Am., Inc., No. A-0585-16T3, 2017 N.J. Super. Unpub. LEXIS 1776, 2017 WL 3013080, at *6 (N.J. Super. Ct. App. Div. July 17, 2017)* ("[T]he gravamen of plaintiffs' complaint centers on VW's alleged deceitful, fraudulent practices, and its alleged breach of a duty not to mislead consumers."); *Counts v. Gen. Motors, LLC, 237 F. Supp. 3d 572, 592 (E.D. Mich. 2017)* (holding that "a suit by private consumers who allege that a vehicle manufacturer misrepresented the functionality and effectiveness of certain technology" is not preempted by the CAA); *In re Volkswagen "Clean Diesel" Litigation, 94 Va. Cir. 189, 2016 WL 5347198 at *6 (Va.Cir.Ct. 2016)* ("Because Plaintiffs' fraud and VCPA claims are based on alleged misrepresentations that do not rely on or seek to enforce any emissions standards, and because they will not interfere with any significant CAA regulatory objective," they are not preempted.). *See also* *In re Caterpillar, Inc., C13 & C15 Engine Prod. Liab. Litig., No. 1:14-CV-3722 JBS-JS, 2015 U.S. Dist. LEXIS 98784, 2015 WL 4591236, at *11 (D.N.J. July 29, 2015)* ("Plaintiffs' claims which seek enforcement of express and implied warranties **[**47]** for defects in the Engines' emissions systems, as well as those based on consumer fraud and negligent design, are hardly comparable to efforts by state and local governments to adopt or enforce emissions standards or to require additional certifications or inspections prior to sale.").

3.

Because Plaintiffs' claims are not expressly preempted, the next question is whether they are implicitly preempted. As explained above, there are two types of implied preemption. The first, field preemption, occurs where federal regulations are so expansive that Congress has left no room for supplemental state regulation. Defendants do not advance a field preemption argument. And because the CAA includes a "savings clause" wherein Congress expressly confirms that states retain the ability to regulate "the use, operation, or movement" of motor vehicles, that decision was reasonable. *§ 7543(d)*. *See also* *Geier v. Am. Honda Motor Co., 529 U.S. 861, 868, 120 S. Ct. 1913, 146 L. Ed. 2d 914 (2000)*.

HN17[] **[*1064]** The second kind of implied preemption—conflict preemption—comes in two varieties. First, conflict preemption exists when compliance with both federal and state requirements is physically impossible. *Gade, 505 U.S. at 98*. GM does not advance that argument. Second, conflict preemption exists when state law would operate as an obstacle **[**48]** to "the accomplishment and execution of the full purposes and objectives of Congress." *Id.* (internal citations omitted). GM argues that Plaintiffs' claims represent an obstacle to Congress's purpose and objectives in enacting the CAA.

Specifically, GM argues that "[t]o the extent that Plaintiffs' claims are based on GM's failure to publically disclose (or only partially disclose) specific aspects of its AECDs, these claims are preempted" because "the EPA has already decided what should and should not be disclosed to the public with respect to emissions controls" and thus "the EPA has decided that [this information] may remain confidential." GM Mot. Dismiss at 24-27.

The question raised by GM's argument is whether Congress intended the CAA (or EPA) to regulate the scope of vehicle manufacturer's disclosure obligations to consumers. GM has provided no legal authority to support the proposition that the CAA and/or the EPA is responsible for determining the extent to which vehicle manufacturers must disclose information about the emissions produced by their cars to consumers. The EPA is tasked with *environmental* protection, not *consumer* protection. Defendants have not provided "any basis **[**49]** to conclude, that a significant federal regulatory goal of the CAA is consumer protection from false advertising claims regarding emissions compliance, vehicle efficiency, or implementation of new emissions technology." *In re Volkswagen "Clean Diesel" Litigation, 94 Va. Cir. 189, 2016 WL 5347198 at *6*. *See also* *In re Caterpillar, Inc., C13 & C15 Engine Prod. Liab. Litig., No. 1:14-CV-3722 JBS-JS, 2015 U.S. Dist. LEXIS 98784, 2015 WL 4591236, at *11, *14 (D.N.J. July 29, 2015)* (finding that consumer fraud and negligent design claims were not implicitly preempted by the CAA because the claims were not premised on proof that the engines were noncompliant with EPA standards).

It is undoubtedly true, as Defendants argue, that the EPA requires vehicle manufacturers to provide extensive disclosures *to the EPA* so that it may determine emissions compliance. And the EPA has further concluded that some of those disclosures will not be made public record by the agency. *See, e.g.*, EPA Class Determination 1-13, ECF No. 45, Ex. 2. Defendants reference a document produced by the EPA which explains that the EPA will not produce information under the *Freedom of Information Act* if the requested information involves confidential trade secrets. *Id.* at 2. GM appears to argue that because the EPA does not have a legal duty to disclose certain information **[**50]** to the public, GM does not have a duty to disclose that information to the public. Simply put, the EPA's duty to disclose information to the public is entirely untethered from GM's duty to disclose information to the public. The idea that the EPA's interpretation of its obligations under the *Freedom of Information Act* has any bearing on Defendants' obligations to disclose material information to consumers simply has no merit.[16] There is no risk that Plaintiffs' claims will interfere or undermine the purposes and objectives of Congress in passing **[*1065]** the CAA, and so Plaintiffs' claims are not implicitly preempted.

B.

Defendants argue that, even if Plaintiffs' claims are not preempted, "Plaintiffs have not plausibly pled that there is *any* kind of 'defeat device' other than the kind used to defeat EPA regulations that would be material to a reasonable consumers." GM Mot. Dismiss at 28 (emphasis in original). In other words, "[w]hile it might plausibly be material to a reasonable consumer that [the level of emissions allegedly revealed by Plaintiffs' testing] does not comply with EPA regulations, it is *not* plausible that a reasonable consumer would care about those numbers outside the context **[**51]** of EPA regulations." *Id.*

This is an argument for a jury. In essence, GM is arguing that consumers care only about compliance with EPA regulations, as opposed to the true level of emissions. That assertion might be true for some consumers, but it

---

[16] GM's argument regarding implied preemption might have merit if "Plaintiffs' claims could be construed as alleging that AEDC disclosures to the government should have been made public," but as explained above Plaintiffs' claims are premised on Defendants' nondisclosures to consumers, not the EPA. GM. Mot. Dismiss at 27.

cannot possibly be generally accepted as true as a matter of law. Plaintiffs allege that there is a significant consumer demand for environmentally friendly vehicles. *See* Con. Am. Compl. at 5. And that fact is common knowledge. Many of these vehicles, like the Toyota Prius, emit pollution far below the regulatory maximums. If consumers only cared about regulatory compliance and not the quantitative level of emissions, then vehicle manufacturers would focus their advertising on regulatory compliance, not environmental friendliness. But as already noted twice, Plaintiffs have summarized or reproduced over ten pages of GM advertisements and press releases where the company repeatedly touts the low emissions and environmentally friendly nature of the Duramax engine, but never expressly states that the engine complies with emission regulations. That fact goes without saying: all consumers naturally expect their vehicles to be compliant. Consumers **[**52]** who purposefully buy a "green" vehicle, then, must be (at least partially) basing their purchase decision on the technology in the vehicle which reduces emissions far *below* that maximum level. Plaintiffs allege that the subject vehicles operate with significant portions of its emissions reduction technology inactive for 65 to 70% of the miles driven. *Id.* at 3. It is very plausible that a consumer who bought a vehicle because it purportedly contained advanced emissions reduction technology would consider that fact to be material. *Id.* at 3.[17]

C.

Finally, Defendants argue that this case should be stayed pursuant to the primary jurisdiction doctrine in favor of an EPA investigation. ***HN18***[] "The doctrine of primary jurisdiction arises when a claim is properly cognizable in court but contains some issue within the special competence of an administrative agency." *United States v. Haun, 124 F.3d 745, 749 (6th Cir. 1997)*. When the doctrine is invoked, the court proceedings are stayed so that the parties may refer the matter to the administrative agency. *Id.* However, the doctrine is not subject to a "ready formula" for application. *Id.* Relevant factors include **[*1066]** "'the desirable uniformity which would obtain if initially a specialized agency passed on certain types of administrative **[**53]** questions'" and "'the expert and specialized knowledge of the agencies involved.'" *In re Long Distance Telecommunications Litig., 831 F.2d 627, 630 (6th Cir. 1987)* (quoting *United States v. Western Pacific Railroad Co., 352 U.S. 59, 63-65, 77 S.Ct. 161, 164, 1 L. Ed. 2d 126, 135 Ct. Cl. 997 (1956))*.

Neither factor supports a stay here. The Court has already explained why Plaintiffs' claims are not premised on proof that the Duramax engine involves an "illegal" defeat device or is noncompliant with EPA regulations. Accordingly, the factual questions raised by Plaintiffs' suit are only tangentially within the EPA's specialty. *See In re Ford Fusion & C-Max Fuel Econ. Litig., No. 13-MD-2450 KMK, 2015 U.S. Dist. LEXIS 155383, 2015 WL 7018369, at *30 (S.D.N.Y. Nov. 12, 2015)* ("While Defendant is correct that Plaintiffs' claims relate to the accuracy of EPA-estimated fuel economy (and perhaps suggest deficiencies in the current estimation formula), the question of whether the advertisements related to such information were misleading is a question conventionally left to the courts to answer."). Because the EPA has no regulatory responsibility regarding Defendants' disclosures to consumers, there is no risk of regulatory inconsistency. The EPA undoubtedly possesses specialized expertise regarding emissions testing and the operation of defeat devices. But, as this Court explained in *Counts*, "federal courts must frequently adjudicate disputes involving complicated technical claims, **[**54]** particularly in the field of products liability. Simply put, mere technical complexity is not a 'compelling and legitimate' reason for a federal court to decline jurisdiction." *237 F. Supp. 3d at 593* (internal citations omitted).

Additionally, ***HN19***[] the primary jurisdiction doctrine should not be invoked if "no administrative forum is available." *Haun, 124 F.3d at 750*. The EPA has no authority to redress consumer grievances regarding the operation of emissions technology in vehicles it certifies, and thus Plaintiffs have no administrative forum for their

[17] Bosch also argues that the state law claims brought against it should be dismissed because they are preempted. In so arguing, Bosch also attempts to argue that all of Plaintiffs' claims against them are expressly premised on Bosch's alleged efforts to evade United States emission requirements. But Plaintiffs are not advancing state law claims of that nature. To the extent Bosch argues that Plaintiffs have not stated any state law claims against them because they have not plausibly pleaded a connection between Bosch's conduct and the fraudulent concealment, that argument is best left for the (presumptive) motions by Defendants for judgment on the pleadings.

claims. Similarly, the EPA has no authority to remedy Plaintiffs' alleged financial damages. *See id.* (noting that the "exclusive means" by which the government could "collect a monetary penalty" against the defendants was through a civil action in the district court). *See also* *Counts, 237 F. Supp. 3d at 593*. The primary jurisdiction doctrine is inapplicable here.

V.

Defendants also seek dismissal of Plaintiffs' RICO claim, which is contained in the first count in the consolidated amended complaint. In Plaintiffs' words,

> For many years now, the RICO Defendants have aggressively sought to increase the sales of Polluting Vehicles in an effort to bolster revenue, augment profits, and increase GM's share of the diesel **[**55]** truck market. Finding it impossible to achieve their goals lawfully, however, the RICO Defendants resorted instead to orchestrating a fraudulent scheme and conspiracy. In particular, the RICO Defendants, along with other entities and individuals, created and/or participated in the affairs of an illegal enterprise ("Clean Diesel Fraud Enterprise") whose direct purpose was to deceive the regulators and the public into believing the Polluting Vehicles were "clean" and "environmentally friendly."

Con. Am. Compl. at 128-29.

HN20[] The *Racketeer Influenced and Corrupt Organizations Act* establishes bases for both criminal and civil suits. A RICO civil suit may be brought by "[a]ny person injured in his business or property by reason of a violation of *section 1962* of this chapter." *18 U.S.C. § 1964(c)*. *Section 1962* **[*1067]** provides that: "It shall be unlawful for any person employed by or associated with any enterprise engaged in, or the activities of which affect, interstate or foreign commerce, to conduct or participate, directly or indirectly, in the conduct of such enterprise's affairs through a pattern of racketeering activity or collection of unlawful debt." *Id.* at *§ 1962(c)*. In other words, a party advancing a civil RICO claim must establish their right **[**56]** to sue and then further allege the following elements: "'(1) conduct (2) of an enterprise (3) through a pattern (4) of racketeering activity.'" *Heinrich v. Waiting Angels Adoption Servs., Inc., 668 F.3d 393, 404 (6th Cir. 2012)* (quoting *Sedima, S.P.R.L. v. Imrex Co., 473 U.S. 479, 496, 105 S. Ct. 3275, 87 L. Ed. 2d 346 (1985))*.

Defendants argue both that Plaintiffs have not established their standing to bring a civil RICO suit and also that Plaintiffs have not adequately alleged the prima facie elements of a RICO claim. GM additionally argues that the RICO claim is an improper attempt to enforce the provisions of the *Clean Air Act* ("CAA"), violations of which may be prosecuted exclusively pursuant the CAA.

A.

HN21[] Plaintiffs may assert a RICO claim only if they can identify an injury to their "business or property by reason of a violation of *section 1962*." *18 U.S.C. § 1964(c)*. In so limiting the scope of RICO standing, Congress exhibited an intention to exclude "personal injury—that is, an injury 'to a person, such as a broken bone, a cut, or a bruise' or a 'bodily injury.'" *Jackson v. Sedgwick Claims Mgmt. Servs., Inc., 731 F.3d 556, 564 (6th Cir. 2013)* (quoting *Black's Law Dictionary* 857 (9th ed. 2009)). Similarly, a RICO injury must be concrete, not intangible or speculative. *See* *Saro v. Brown, 11 F. App'x 387, 389 (6th Cir. 2001)*. *See also Fleischhauer v. Feltner, 879 F.2d 1290, 1299 (6th Cir. 1989)* (explaining that RICO plaintiffs must identify a "reasonable and principled basis of recovery" which is "not based upon mere speculation and surmise"); *Short v. Janssen Pharm., Inc., No. 1:14-CV-1025, 2015 U.S. Dist. LEXIS 61123, 2015 WL 2201713, at *3 (W.D. Mich. May 11, 2015)* **[**57]** ("Short must, at a minimum, show some direct, pecuniary injury to his own pocket that is unrelated to the claimed personal injury.").

In *Reiter v. Sonotone Corp.*, the Supreme Court interpreted *§ 4 of the Clayton Act*, which authorizes "[a]ny person who shall be injured in his business or property" by reason of an ***antitrust law*** violation to bring suit. *442 U.S. 330, 337, 99 S. Ct. 2326, 60 L. Ed. 2d 931 (1979)*. The Supreme Court held that "where petitioner alleges a wrongful deprivation of her money because the price of the hearing aid she bought was artificially inflated by reason of respondents' anticompetitive conduct, she has alleged an injury in her 'property' under *§ 4*." *Id. at 342*. That holding did not involve the RICO statute, but the Sixth Circuit has held that "*Reiter*'s common-sense observation about *§4* applies with equal logical force to *§ 1964(c)*." *Jackson, 731 F.3d at 564*.[18]

1.

Plaintiffs' alleged injury appears to be analogous: the price of the vehicles they bought was "artificially inflated by reason of [Defendants' fraudulent scheme]." *Reiter,* ***[*1068]*** *442 U.S. at 342*. Defendants argue, however, that "this supposed 'injury' is purely speculative" and that other Courts have refused to recognize RICO injuries involving similar "overpayment" theories. GM Mot. Dismiss at 35.

Defendants argue that *In* ***[**58]*** *re Bridgestone/Firestone, Inc. Tires Prod. Liab. Litig.* supports their interpretation of the RICO injury requirement. *155 F. Supp. 2d 1069, 1089 (S.D. Ind.)*, *rev'd on other grounds* *In re Bridgestone/Firestone, Inc., 288 F.3d 1012 (7th Cir. 2002)*. In *Bridgestone*, the plaintiffs asserted a RICO claim against Bridgestone/Firestone Inc. arising out of an alleged defect in a particular brand of radial tires that caused "the Tires to have 'an unreasonably dangerous propensity to suffer complete or substantial tread separation.'" *Id. at 1077* (quoting Complaint, ¶ 4). The plaintiffs alleged they sustained RICO injuries because they would be forced to "bear the financial loss associated with the cost of the replacing the Tires," their vehicles were less valuable because the safety risks of the tires was now known, and because consumers would have paid less for the Tires if the safety risks were known. *Id. at 1089* (internal citations omitted). Importantly, the alleged injury was *not* that the plaintiffs had been forced to replace their tires, nor that the Plaintiffs had experienced actual tire failure, nor even that any plaintiff had "incurred an actual monetary loss as a result of . . . selling or attempting to sell" the tires. *Id. at 1090*.

The district court concluded that these alleged injuries were speculative and contingent **[**59]** on future events:

> Plaintiffs' assertion of financial loss is grounded in the possibility of future events that may cause them to suffer the loss associated with the products they claim are defective or diminished in value: the tires that they have unilaterally replaced or may replace in the future may suffer tread separation; they may receive on trade-in or resale of their Explorers (or other vehicles equipped with the Tires) less than they would have received absent the alleged defects.

Id. at 1091.

In other words, "[t]he actual failure of the Tires . . . is a contingency upon which Plaintiffs' economic damages are dependent." *Id. at 1092*. ***HN22***[] The *Bridgestone* Court provided a guiding principle for determining if a cognizable RICO injury has been asserted: an injury arises "as a result of a purchase only where the diminished value of the plaintiff's property has *actually been realized* or when the alleged infirmity in the purchased property has otherwise tangibly manifested itself." *Id. at 1094* (emphasis added).

In re: Gen. Motors LLC Ignition Switch Litig. is also instructive. *No. 14-MC-2543 (JMF), 2016 U.S. Dist. LEXIS 92499, 2016 WL 3920353, at *16 (S.D.N.Y. July 15, 2016)*. That multidistrict litigation involved allegations that GM had manufactured vehicles with a defective ignition switch. *2016 U.S. Dist. LEXIS 92499, [WL] at *1*. The plaintiffs advanced **[**60]** a RICO claim. The district court described their theory of injury as a "benefitof- the-bargain" defect theory and summarized it as follows: "Plaintiffs who purchased defective cars were injured when they purchased for x dollars a New GM car that contained a latent defect; had they known about the defect, they would have paid fewer than x dollars for the car (or not bought the car at all), because a car with a safety defect is worth less than a car without a safety defect." *2016 U.S. Dist. LEXIS 92499, [WL] at *7*. The district court held that such a theory was

---

[18] The *Clayton Act* included a civil-action provision which permitted private parties to sue for injuries arising out of ***antitrust law*** violations. The Supreme Court has "repeatedly observed . . . that Congress modeled *§ 1964(c)* on the civil-action provision of the federal ***antitrust law***." *Holmes v. Sec. Inv'r Prot. Corp., 503 U.S. 258, 267, 112 S. Ct. 1311, 117 L. Ed. 2d 532 (1992)*.

insufficient to create RICO standing: "'loss of value' or 'benefit of the bargain' damages 'are generally unavailable in RICO suits' and 'plainly' unavailable where (similar to the case here) a RICO claim 'sound[s] in fraud in the inducement.'" *2016 U.S. Dist. LEXIS 92499, [WL] at *16* **[*1069]** (quoting *McLaughlin v. Am. Tobacco Co., 522 F.3d 215, 228-29 (2d Cir. 2008))*.

McLaughlin addresses the distinction between out-of-pocket-losses (which are cognizable RICO injuries) and benefit-of-the-bargain and price impact damages theories, which are not (because both are expectation-based). That class action case centered on the allegation that the defendant tobacco companies had fraudulently marketed "light cigarettes" as healthier than "full-flavored" cigarettes. *522 F.3d at 220*. The Second Circuit explained **[**61]** that, to "establish the requisite injury under civil RICO," the plaintiffs must show that they "paid more for light cigarettes than they would have but for defendants' misrepresentations." *Id. at 227*. The plaintiffs attempted to meet that burden by providing a "loss of value" model which purported "to measure the difference between the price plaintiffs paid for light cigarettes as represented by defendants and the (presumably lower) price they would have paid (but for defendants' misrepresentation) had they known the truth." *Id. at 228*.

The Second Circuit held that this expectation-based theory was essentially based on a "benefit-of-the-bargain" rationale and that such damages are generally unavailable in RICO suits. *Id.* The court emphasized that "Defendants' misrepresentation could in no way have reduced the value of the cigarettes that plaintiffs actually purchased; they simply could have induced plaintiffs to buy Lights instead of full-flavored cigarettes." *Id. at 229*. Additionally, there was "no reasonable means of calculating" such damages. *Id.* Doing so would require the court to "conceptualize the impossible—a healthy cigarette—and then to imagine what a consumer might have paid for such a thing." *Id.* The **[**62]** plaintiffs alternatively advanced a "price impact" theory based on a "multiple regression analysis" which plaintiffs suggested showed "the amount by which defendants would have had to reduce their prices to account for the concomitant reduced demand." *Id.* The Second Circuit likewise rejected that theory, explaining that "plaintiffs have not come forward with any meaningful means of estimating how the market has changed or might change in the future in response to fluctuations in the demand for light cigarettes." *Id.* The Second Circuit did acknowledge that some plaintiffs likely suffered "out-of-pocket" damages arising out of the misrepresentations, but held that "out-of-pocket losses cannot be shown by common evidence because they constitute an inherently individual inquiry: individual smokers would have incurred different losses depending on what they would have opted to do, but for defendants' misrepresentation." *Id. at 228*.

Several Sixth Circuit cases also provide guidance. In *Hofstetter v. Fletcher*, the RICO defendants "sold millions of dollars worth of insurance policies to scores of individual clients throughout the country by means of a fraudulent promotion whereby the defendants falsely **[**63]** represented that the potential investors could completely avoid payment of any future federal income taxes." *860 F.2d 1079 (6th Cir. 1988)*. That alleged injury—the payment for the insurance policy premised on representations that were demonstrably false at time of payment—was sufficient to establish RICO standing.

In contrast, the plaintiffs in *Fleischhauer v. Feltner* brought a RICO claim arising out of the defendants' sale of "non-theatrical rights to distribution of 23 full length feature motion pictures." *879 F.2d 1290, 1292 (6th Cir. 1989)*. The defendants allegedly knew that the films in question "were not marketable either because they were unauthorized copies or because unauthorized copies were readily available." *Id. at 1294*. The defendants marketed the movie rights as providing "both income **[*1070]** and tax advantage[s]," but also "advised interested parties that there was a significant chance that the purchaser would be audited by the Internal Revenue Service." *Id. at 1293*. The defendants argued that the plaintiffs' damages should be "confined to the amount appellees paid in down payments," but the jury awarded significantly more than that amount. On appeal, the Sixth Circuit held that "plaintiffs' damages should be limited to the amounts actually invested," and not **[**64]** "expectancy or 'benefit of the bargain' damages" based on purported lost profits or expenses arising out of IRS audits. *Id. at 1300*. The Sixth Circuit reasoned that "[t]here was ample warning about risks involved, particularly tax hazards, therefore expectancy damages are not recoverable under these circumstances." *Id. See also id.* (Although in some cases expectancy damages might be appropriate, clearly they are not in this case.").

2.

To summarize, ***HN23***[] courts have generally held that damages theories premised on the expectation of future value or profits are too speculative and contingent to establish injury for purposes of RICO. However, "courts have recognized expectation damages under RICO . . . where an agreement between the parties provided for a certain performance guarantee that the defendant had no intention of keeping." *Ignition Switch Litigation, 2016 U.S. Dist. LEXIS 92499, 2016 WL 3920353 at 17* (collecting several cases). And courts have similarly found that, when the financial injury occurred *at the time of payment*, a cognizable out of pocket loss has been sustained. *See Bridgestone*, *155 F. Supp. 2d at 1094*. For example, in *Bailey v. Atl. Auto. Corp.*, the RICO plaintiff advanced a cognizable injury because the defendants sold "former short term rental vehicles to consumers without disclosing **[**65]** the vehicles' history," resulting in the plaintiff being overcharged. *992 F. Supp. 2d 560, 579 (D. Md. 2014)*. The district court distinguished cases, like *Bridgestone*, where the alleged overpayment damages were premised on the manifestation of some defect in the future: "Bailey contends that she suffered the claimed loss *at the moment of purchase* in reliance upon the false representation that she was not buying a former short-term rental vehicle." *Id. at 581* (emphasis added).

There are a number of analogous cases. *See In re Merrill Lynch Ltd. Partnerships Litig., 154 F.3d 56, 59 (2d Cir. 1998)* ("[I]nvestors allege that the partnerships were fraudulent at the outset because they could never achieve the promised objectives. . . . [T]he investors sustained recoverable out-of-pocket losses when they invested; namely, the difference between the value of the security they were promised and the one they received which could not meet those objectives."); *Ellis v. J.P. Morgan Chase & Co., 950 F. Supp. 2d 1062, 1086 (N.D. Cal. 2013)* ("Plaintiffs allege they have paid marked-up fees and thus satisfy RICO standing. A consumer who has been overcharged can claim injury to property under RICO based on a wrongful deprivation of money, which is a form of property."); *Stitt v. Citibank, N.A., 942 F. Supp. 2d 944, 954 (N.D. Cal. 2013)* (identifying a cognizable RICO injury when the plaintiffs were "overcharged" markedup fees related to mortgage loan servicing even **[**66]** if the "total fees assessed fell within market range" because the plaintiffs alleged that they "would not have paid the fees but for Defendants' deception").

In other words, a distinction must be made between damages theories where the (ascertainable and reasonably quantifiable) overpayment occurred at the time of injury and speculative damages theories which are contingent on some future event, lost profit, or unanticipated future expense. Thus, a RICO plaintiff may recover **[*1071]** for money invested on the basis of misrepresentations, but not for loss of the profits which the plaintiffs expected to receive from that investment. *See Fleischhauer, 879 F.2d at 1300*. Likewise, a RICO plaintiff may recover for overpayment when they buy a used car after being told it was new, *see Bailey, 992 F. Supp. 2d at 579*, but may not recover for overpayment simply because the tires they purchased *may* be defective, *see Bridgestone, 155 F. Supp. 2d at 1095*. A RICO plaintiff may recover money paid pursuant to insurance policies that plaintiffs chose because "the defendants falsely represented that the potential investors could completely avoid payment of any future federal income taxes," *see Hofstetter*, 860 F.2d at *14, but cannot recover for loans granted to debtors based upon misrepresentations by the debtors because the plaintiffs **[**67]** would suffer damages only if the debtors defaulted (and because the amount of damages was speculative until the creditor's bargained for remedies were exhausted), *see First Nationwide Bank v. Gelt Funding Corp., 27 F.3d 763, 768 (2d Cir. 1994)*.

Plaintiffs allege both speculative and nonspeculative damages here. Some of Plaintiffs' alleged damages are clearly speculative. For example, they allege that "when and if GM recalls the Polluting Vehicles and degrades the GM Clean Diesel engine performance and fuel efficiency in order to make the Polluting Vehicles compliant with EPA standards, Plaintiffs and Class members will be required to spend additional sums on fuel and will not obtain the performance characteristics of their vehicles when purchased." Con. Am. Compl. at 117. Likewise, Plaintiffs allege that "Polluting Vehicles will necessarily be worth less in the marketplace because of their decrease in performance and efficiency and increased wear on their cars' engines." *Id.* Those damages are contingent on future, uncertain developments. Because those injuries may never occur and are thus currently unmeasurable, they cannot give rise to RICO standing. *See Gelt Funding Corp., 27 F.3d at 768* ("[A]s a general rule, a cause of action does not accrue under RICO until the amount of damages becomes **[**68]** clear and definite.").

Plaintiffs additionally allege that "[h]ad Plaintiffs and Class members known of the higher emissions at the time they purchased or leased their Polluting Vehicles, they would not have purchased or leased those vehicles, or would have paid substantially less for the vehicles than they did." Con. Am. Compl. at 117. This alleged injury straddles the line between speculative and concrete. Consumers weigh many factors in choosing a vehicle. While emissions are undoubtedly one such factor, the assertion that the unexpectedly high emissions would have been a material factor for all the Plaintiffs is questionable. Accepting all well-pleaded allegations as true, Plaintiffs have alleged that they would not have purchased the vehicles in question had they known of the true emissions level. Fair enough. But the contention that they "would have paid substantially less" appears to be premised on some approximation of what the new market value for the vehicles would have been. Determining what that decrease in value would have been seems hopelessly speculative. *See* McLaughlin, 522 F.3d at 229 ("We are asked to conceptualize the impossible—a healthy cigarette—and then to imagine what a consumer might **[**69]** have paid for such a thing.").

However, Plaintiffs' first alleged injury clearly suffices to create RICO standing. Plaintiffs contend that they "paid a premium of nearly $9,000, as GM charged more for its Duramax engine than a comparable gas car." Con. Am. Compl. at 115. Plaintiffs thus identify a specific payment attributable directly to the vehicle component at issue which they opted to purchase **[*1072]** on the basis of fraudulent conduct. This is cognizable out-of-pocket injury: "[T]he price of the [Duramax engine-equipped vehicle which Plaintiffs] bought was artificially inflated by reason of [Defendants' fraudulent] conduct." Reiter, 442 U.S. at 342. *See also* Jackson, 731 F.3d at 564; Canyon Cty. v. Syngenta Seeds, Inc., 519 F.3d 969, 976 (9th Cir. 2008). Accepting Plaintiffs' allegations as true, the fraud (and thus overcharge) occurred *at the time the purchase was made. See* Bailey, 992 F. Supp. 2d at 579. Unlike in *Bridgestone* (where only some tires exhibited the defect), the alleged injury occurred every time a Duramax vehicle was purchased. The amount by which Plaintiffs overpaid is not contingent on a future occurrence or on the vagaries of the free market. It occurred and became determinable at the moment the Plaintiffs paid a premium for a vehicle component which did not work as had been represented. Plaintiffs experienced **[**70]** a financial property loss at that moment, which distinguishes the present case from others where the overpayment or diminution in value had not yet occurred. *Compare* Bridgestone, 155 F. Supp. 2d at 1093 & n.26; Gelt, 27 F.3d at 769, *with* Bailey, 992 F. Supp. 2d at 580-81. This is a cognizable RICO injury.

Admittedly, several cases appear to support the opposite conclusion. The *Ignition Switch Litigation* opinion does suggest that a plaintiff who purchases a defective car for more than they would have paid if they were aware of a defect does not state a RICO injury. 2016 U.S. Dist. LEXIS 92499, 2016 WL 3920353 at *7. But the district court also recognized that "courts have recognized expectation damages under RICO . . . where an agreement between the parties provided for a certain performance guarantee that the defendant had no intention of keeping." 2016 U.S. Dist. LEXIS 92499, [WL] at *17. The district court distinguished the present claim because plaintiffs had "at best" alleged an implied promise that GM-brand vehicles would have "continuing resale value." *Id.* Resale value and brand devaluation theories are clearly speculative. But, here, GM allegedly sold Duramax vehicles, for a premium, which did not perform as a reasonable consumer would expect. In other words, Defendants had no intention of delivering the emissions performance which consumers expected. **[**71]**

More importantly, the Ignition Switch Litigation opinion relies heavily upon the Second Circuit's opinion in *McLaughlin*, but appears to overlook a crucial aspect of that opinion. In *McLaughlin*, the Second Circuit was reviewing a district court decision to certify a class action advancing a RICO claim. The court explained that "[o]nly by showing that plaintiffs paid more for light cigarettes than they would have but for defendants' misrepresentation can plaintiffs establish the requisite injury under civil RICO." McLaughlin v. Am. Tobacco Co., 522 F.3d 215, 227 (2d Cir. 2008). The Second Circuit concluded that such out of pocket losses existed, but that they "cannot be shown by common evidence because they constitute an inherently individual inquiry: individual smokers would have incurred different losses depending on what they would have opted to do, but for defendants' misrepresentation." Id. at 228.[19] The plaintiffs' alternative damages theories (which the Second Circuit rejected, providing the basis for the decision in the *Ignition Switch Litigation*) were premised on market demand theories that, because of the confluence of factors involved, were too speculative to support a RICO claim. *See* id. at 226-28. Tri-State Express, Inc. v.

[19] Thus, even though the alleged RICO injury is sufficient to create standing, the nature of the alleged injury might prevent class certification.

Cummins Engine Co., 2000 U.S. Dist. LEXIS 23564, despite its factual similarities to the present case, is **[*1073]** distinguishable **[**72]** for the same reason: those plaintiffs relied upon "only the potential for harm," while the present case involves Plaintiffs who paid a premium for a vehicle component which did not provide the benefits paid for. *Id. at *18*.

To the extent the rationale in *Ignition Switch Litigation* and *Tri-State Express* cannot be squared with the conclusion that Plaintiffs have alleged a RICO injury, the Court declines to follow their reasoning. Indeed, such a reading of those two cases appears to be incompatible with the Supreme Court's conclusions in *Reiter* and the Sixth Circuit's decision in *Hofstetter*.

B.

Bosch argues that, even if Plaintiffs' alleged injury is sufficient to confer standing to bring a RICO claim against GM, they have not alleged that their injuries were proximately caused by Bosch's conduct. ***HN24***[] The RICO proximate causation analysis is closely related to (even subsumed in) the statutory standing analysis. The Supreme Court has "held that a plaintiff's right to sue . . . required a showing that the defendant's violation not only was a 'but for' cause of his injury, but was the proximate cause as well." *Holmes, 503 U.S. at 268*. The plaintiff must show "some direct relation between the injury asserted and the injurious conduct **[**73]** alleged." *Id.* Importantly, the causation inquiry must focus on the alleged link between the "predicate acts" and the asserted injury. *Heinrich v. Waiting Angels Adoption Servs., Inc., 668 F.3d 393, 405 (6th Cir. 2012)*. A purported link that is "too remote," "purely contingent," or "indirect" is insufficient to confer standing. *Holmes, 503 U.S. at 271, 274*. According to the Supreme Court, "'[t]he general tendency of the law, in regard to damages at least, is not to go beyond the first step.'" *Id.* (quoting *Associated Gen. Contractors of California, Inc. v. California State Council of Carpenters, 459 U.S. 519, 534, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983))*. An attenuated causation theory creates difficulties in apportioning damages between plaintiffs and attributing damages to defendants. *See id. at 273*. A challenge to a RICO suit based on asserted lack of proximate causation, however, is often best resolved at summary judgment, not at the pleading stage. *See Trollinger v. Tyson Foods, Inc., 370 F.3d 602, 615 (6th Cir. 2004)*.

In *Holmes*, a "Securities Investor Protection Corporation" (SIPC) brought suit against defendants who allegedly "conspired in a stock-manipulation scheme." *Id. at 261*. After the scheme was detected, stock prices plummeted and a number of broker-dealers were unable to meet their financial obligations to customers. The SIPC, accordingly, was required to advance nearly $13 million to cover the customer claims. The SIPC then brought a RICO claim against the defendants to recoup its losses. That relationship, according **[**74]** to the Supreme Court, was too attenuated to create standing: "the conspirators have allegedly injured these customers only insofar as the stock manipulation first injured the broker-dealers and left them without the wherewithal to pay customers' claims." *Id. at 271*. In other words, "[t]he broker-dealers simply cannot pay their bills, and only that intervening insolvency connects the conspirators' acts to the losses suffered by the nonpurchasing customers and general creditors." *Id.*

In *Hemi Grp., LLC v. City of New York, N.Y.*, the Supreme Court rejected another RICO claim because the plaintiff's causal theory was even more attenuated than in *Holmes.* The City of New York advanced the following causal theory:

> Hemi committed fraud by selling cigarettes to city residents and failing to submit the required customer information to the State. Without the reports **[*1074]** from Hemi, the State could not pass on the information to the City, even if it had been so inclined. Some of the customers legally obligated to pay the cigarette tax to the City failed to do so. Because the City did not receive the customer information, the City could not determine which customers had failed to pay the tax. The City thus could **[**75]** not pursue those customers for payment. The City thereby was injured in the amount of the portion of back taxes that were never collected.

559 U.S. 1, 9, 130 S. Ct. 983, 175 L. Ed. 2d 943 (2010).

The Supreme Court held that this relationship was too attenuated. The Court explained: "The City's theory thus requires that we extend RICO liability to situations where the defendant's fraud on the third party (the State) has made it easier for a *fourth* party (the taxpayer) to cause harm to the plaintiff (the City)." *Id. at 11*.[20] In holding that this proximate causation theory was insufficient, the Supreme Court relied in part upon the fact that "[t]he State certainly is better situated than the City to seek recovery from Hemi." *Id. at 12*. In other words, when there are other, "better situated plaintiffs [which] have an incentive to sue," the "RICO 'direct relationship' requirement" may not be met. *Id. at 11-12*.

Plaintiffs allege that the direct relationship between Bosch's predicate acts and their injury is "plain—Bosch developed the defeat devices that are at the core of this litigation while knowing that GM would sell Affected Vehicles without revealing the existence of those devices to consumers or anyone else and that consumers would buy them." Pl. Res. Bosch Mot. Dismiss **[**76]** at 25. Bosch argues that this theory is insufficient for several reasons.

1.

First, Bosch contends that "Plaintiffs' alleged harms here are premised upon the 'premium' GM charged for the Subject Vehicles, which GM determined alone." Bosch Mot. Dismiss at 26. Because Bosch was not involved in the pricing decisions, Plaintiffs' injury stems from "separate actions carried out by separate parties." *Hemi, 559 U.S. at 11* (emphasis omitted). All of the cases Bosch relies upon in support of this argument involve RICO claims where the injuries to Plaintiffs were at least partially attributable to the decisions of third-party entities who were *not* parties to the suit. *See* *Longmont United Hosp. v. Saint Barnabas Corp., 305 F. App'x 892, 895 (3d Cir. 2009)* (plaintiff hospital suing defendant hospital consortium for increased medicare expenses which were partially traceable to a non-party government agency's decisions regarding reimbursement amounts); *Pillsbury, Madison & Sutro v. Lerner, 31 F.3d 924, 930 (9th Cir. 1994)* (sub-leasing tenant suing owners of the building with whom it had no contract for their fraudulent scheme to increase the rent paid by the non-party sublessee). Here, the separate party which Bosch identifies is Bosch's alleged coconspirator. Bosch has provided no authority for the proposition that a RICO defendant may avoid liability simply by identifying **[**77]** a separate action by its codefendant which partially contributed to the plaintiff's injury (especially when, as here, the Plaintiffs allege that the RICO Defendants worked together to cause the **[*1075]** injury). Such an assertion is facially absurd.

Bosch does argue, correctly, that the proximate causation analysis must be conducted for each defendant in a RICO case. But, ***HN25***[] when a conspiracy is alleged, it is inevitable that not all of the RICO defendants will be directly involved in every action which injures the plaintiff.[21] The mere fact that it may be possible to differentiate between the RICO defendants in terms of culpability does not necessarily prevent a finding that all defendants proximately caused the alleged injury. *See* *Trollinger, 370 F.3d at 620* ("[P]laintiffs need not show that Tyson's conduct was the sole cause of their injury in order to establish proximate cause; they need show only that the conduct was a substantial cause.") (citing *Schwartz v. Sun Co., 276 F.3d 900, 904 (6th Cir.2002))*. This suit does not involve "derivative or passed-on harm": all entities which conceivably contributed to Plaintiffs' injuries have been joined as parties. *Id.* (citing *Mendoza v. Zirkle Fruit Co., 301 F.3d 1163 (9th Cir. 2002))*.

2.

---

[20] And Chief Justice Robert's opinion (joined by three justices) took care to reject the argument advanced by three dissenting justices that "RICO's proximate cause requirement [should] turn on foreseeability, rather than on the existence of a sufficiently 'direct relationship' between the fraud and the harm." *Id. at 12*.

[21] This is not the say, however, that Plaintiffs may advance a *§ 1962(c)* RICO claim against Bosch without identifying specific predicate acts committed by Bosch. *See* *Kerrigan v. ViSalus, Inc., 112 F. Supp. 3d 580, 605 (E.D. Mich. 2015)* (collecting cases and distinguishing between *§ 1962(d)* conspiracy claims and *§ 1962(c)* substantive claims). That subtly different analysis will be conducted below, while determining whether Plaintiffs have alleged a prima facie RICO claim. As explained in that section, Plaintiffs have adequately alleged that Bosch committed predicate acts of mail and wire fraud even though Plaintiffs have not specifically alleged that Bosch personally used the mail or wire to further the fraudulent scheme.

Bosch next argues that its alleged conduct was not a substantial factor in causing Plaintiffs' injuries. **[**78]** Specifically, Bosch contends that "Plaintiffs' alleged injury was the result of a host of factors including GM's advertising campaign; . . . the 'premiums' GM charged based on consumer demand for certain features; . . . reputation of local dealers; market forces such as competition; and promotional discounts." Bosch Mot. Dismiss at 27. Bosch further argues that Plaintiffs' injuries might be "dependent on GM's ability to provide a fix, if necessary, for the Subject Vehicles." *Id.* And, finally, Bosch opines that "to the extent Plaintiffs claim that their injury resulted from their reliance on purportedly false ads by GM, that itself breaks any causal link to the Bosch Defendants." *Id.* at 28.

That final argument is clearly inconsistent with Sixth Circuit (and Supreme Court) precedent. As the Sixth Circuit has recently held, ***HN26***[] "[a]lthough civil RICO plaintiffs must establish proximate causation, they need not necessarily show that they relied on any misrepresentations." *In re ClassicStar Mare Lease Litig., 727 F.3d 473, 487 (6th Cir. 2013)*. Rather, "Plaintiffs need only show that the defendants' wrongful conduct was 'a substantial and foreseeable cause' of the injury and the relationship between the wrongful conduct and the injury is 'logical and not speculative.'" **[**79]** *Id.* (quoting *Trollinger, 370 F.3d at 615*). *See also* *Wallace, 714 F.3d at 420* ("[T]he appropriate inquiry in this case is not whether Wallace actually relied on the allegedly inflated appraisal, but whether the fraudulent scheme furthered by that appraisal proximately caused his financial injuries.").

In *Bridge v. Phoenix Bond & Indem. Co.*, the Supreme Court addressed, in detail, the question of whether reliance is an element of a RICO cause of action. *553 U.S. 639, 647-659, 128 S. Ct. 2131, 170 L. Ed. 2d 1012 (2008)*. The Court explained: "Nothing on the face of the relevant statutory **[*1076]** provisions imposes such a requirement." *Id. at 649*. Likewise, the Court dismissed the argument that "a plaintiff who brings [a RICO claim predicated on mail fraud] must show that it relied on the defendant's misrepresentations in order to establish the requisite element of causation." *Id. at 653*. In *Bridge*, the Supreme Court repeatedly distinguished between common law fraud requirements and RICO-based mail fraud claims. The Supreme Court further explained that, even under general common law fraud principles, the law "does not say that only those who rely on the misrepresentation can suffer a legally cognizable injury." *Id. at 656*. Rather, the common law "provides only that the plaintiff's loss must be a foreseeable result of *someone's* reliance on **[**80]** the misrepresentation." *Id.* (emphasis in original). In other words, a RICO plaintiff will typically be required to show that "*someone* relied on the defendant's misrepresentations," but does not need to prove first-party reliance. *Id. at 658-59* (emphasis in original).

In *Bridge*, the RICO defendants conspired to "fraudulently obtain[] a disproportionate share of [tax] liens by violating the Single, Simultaneous Bidder Rule at" Cook County tax lien auctions. *Id. at 643*. The RICO plaintiffs alleged that this scheme "deprived them and other bidders of their fair share of liens and the attendant financial benefits." *Id. at 644*. The defendants argued that "the alleged representations," their "attestations of compliance with the Single, Simultaneous Bidder Rule," were made to the county and not the plaintiffs. *Id. at 648*. The Supreme Court held that the plaintiffs had identified a "sufficiently direct relationship between the defendant's wrongful conduct and the plaintiff's injury" because "[i]t was a foreseeable and natural consequence of petitioner's scheme to obtain more liens for themselves that no other bidders would obtain fewer liens." *Id.*

For similar reasons, Plaintiffs have plausibly alleged that Bosch's joint activities with **[**81]** GM were a substantial factor contributing to their injury. EDC17 is the means by which Plaintiffs were injured. According to Plaintiffs, Bosch "exerts near-total control" over the customization of EDC17, eliminating the possibility that GM programmed the functionality which enables use of defeat devices without Bosch's knowledge. *See* Con. Am. Compl. at 94-95. Plaintiffs thus plausibly allege that Bosch developed the vehicle component which has caused Plaintiffs' injury, that Bosch was aware of the deception that component would inevitably contribute to, and that Bosch was aware that consumers would pay a premium for vehicle capabilities that the component would not deliver.[22]

[22] Bosch's arguments conflate the distinction between (1) the requirement that Plaintiffs allege a causal link between their injury and the predicate acts and (2) the elements of mail and wire fraud. As discussed below, a party can be guilty of mail fraud even if they did not personally use the mail. The fact that GM, not Bosch, is the party who used the mail and wire to make representations to regulators and consumers is thus not determinative. *See* ***United States v. Stapleton, 293 F.3d 1111, 1117***

To repeat, Plaintiffs were financially injured when they paid a premium for a vehicle component which did not work as a reasonable consumer would have expected. GM and Bosch worked closely together to develop that component, and any injury which resulted was a "foreseeable and natural consequence" of their efforts. *Bridge, 553 U.S. at 648*. While **[*1077]** GM's pricing decisions and market forces might have contributed to the *level* of damages which Plaintiffs sustained, they were not the *source* of the injury. Put another way, if the Duramax engine **[**82]** did not include the Bosch-developed EDC17, Plaintiffs would have suffered no injury, even though all the other independent factors Bosch identifies would still exist. Thus, Bosch's development of EDC17 was the but for cause of Plaintiffs' injuries.

It was also the proximate cause. ***HN27***[] "[P]roximate cause is not . . . the same thing as a sole cause." *Cox v. Adm'r U.S. Steel & Carnegie, 17 F.3d 1386, 1399 (11th Cir.)*. A plaintiff can adequately allege proximate causation by plausibly asserting that the defendant's actions "increased the likelihood of injury." *Wallace, 724 F.3d at 422*. The causation analysis in this matter is complicated due to the confluence of potentially contributing factors to Plaintiffs' injury, but there can be no reasonable dispute that the development of EDC17 is a "fundamental part of the [injury] calculus." *Id.* The alleged connection between Bosch's development of that component and Plaintiffs' alleged overpayment is sufficiently direct, foreseeable, and logical to satisfy proximate causation requirements at the pleading stage. *See id.*

3.

Third, Bosch argues that "the difficulty of apportioning damages between Bosch LLC and GM creates the risk of double recovery." Bosch Mot. Dismiss at 28. It is true that the Supreme Court has identified the difficulties **[**83]** of apportioning treble damages among multiple dissimilarly situated plaintiffs as a factor to consider in conducting the proximate causation analysis. *See* *Holmes, 503 U.S. at 273*. This concern was focused on the disparate damages suffered by different classes of plaintiffs (some with claims that are indirectly related to and derivative of the other class's claims). In other words, the Supreme Court's expressed concern was *not* with the difficulty of allocating the relative culpability of various RICO defendants, but with determining the proportion of the recovery which should be recoverable by directly injured plaintiffs as compared to indirectly injured plaintiffs. *See also* *In re Volkswagen "Clean Diesel" Mktg., Sales Practices, & Prod. Liab. Litig., No. MDL 2672 CRB (JSC), 2017 U.S. Dist. LEXIS 179652 , 2017 WL 4890594, at *9 (N.D. Cal. Oct. 30, 2017)* ("Difficulty apportioning damages between defendants, however, is not a factor that is considered in the proximate cause analysis."); *Koch v. Royal Wine Merchants, Ltd., 907 F. Supp. 2d 1332, 1343 (S.D. Fla. 2012)*. The proximate causation requirement operates as means to avoid that difficult determination. The Plaintiffs in this suit are all similarly situated. Accordingly, there is no difficult apportionment question and, relatedly, there is no risk of Defendants being subjected to multiple claims or multiple recoveries. Plaintiffs **[**84]** have plausibly alleged that Bosch's conduct proximately caused their injury.

C.

Defendants alternatively argue that, even if Plaintiffs have standing to bring a RICO claim, they have not alleged the prima facie elements of a RICO claim. ***HN28***[] The elements of a prima facie RICO claim are: "'(1) conduct (2) of an enterprise (3) through a pattern (4) of racketeering activity.'" *Heinrich, 668 F.3d at 404* (quoting *Sedima, S.P.R.L. v. Imrex Co., 473 U.S. 479, 496, 105 S. Ct. 3275, 87 L. Ed. 2d 346 (1985))*.

1.

Defendants argue that Plaintiffs have not adequately alleged either the existence of an enterprise or the required pattern of predicate acts. Bosch additionally argues that Plaintiffs have not plausibly alleged that Bosch participated

---

(9th Cir. 2002) ("Because an essential element of these offenses is a fraudulent scheme, mail and wire fraud are treated like conspiracy in several respects.") (internal citations omitted).

in the "conduct" of **[*1078]** the alleged enterprise. The initial question is whether the Plaintiffs have adequately alleged the existence of an enterprise.

i.

HN29[] In order to state a RICO claim, the Plaintiffs must plausibly allege the existence of an enterprise engaged in a pattern of racketeering activity. *18 U.S.C. § 1962(c)*. But the definition of "enterprise" for RICO purposes is exceedingly "broad." *Boyle v. United States, 556 U.S. 938, 944, 129 S. Ct. 2237, 173 L. Ed. 2d 1265 (2009)*. The statute defines "enterprise" as "any individual, partnership, corporation, association, or other legal entity, and any union or group of individuals associated in fact although not a legal entity." *18 U.S.C. § 1961(4)*. "On **[**85]** its face, the definition appears to include both legitimate and illegitimate enterprises within its scope; it no more excludes criminal enterprises than it does legitimate ones." *United States v. Turkette, 452 U.S. 576, 580-81, 101 S. Ct. 2524, 69 L. Ed. 2d 246 (1981)*. A RICO association-infact "must have at least three structural features: a purpose, relationships among those associated with the enterprise, and longevity sufficient to permit these associates to pursue the enterprise's purpose." *Boyle, 556 U.S. at 946*.[23]

Bosch first argues that Plaintiffs have not plausibly alleged that Bosch and GM shared a "common purpose." *Turkette, 452 U.S. at 583*. In the consolidated amended complaint, Plaintiffs allege that the Defendants "created and/or participated in the affairs of an illegal enterprise ('Clean Diesel Fraud Enterprise') whose direct purpose was to deceive the regulators and the public into believing the Polluting Vehicles were 'clean' and 'environmentally friendly.'" Con. Am. Compl. at 129. Later in the consolidated amended complaint, Plaintiffs provide further specificity:

> GM, the Bosch defendants, and other entities and individuals associated for the common purpose of designing, manufacturing, distributing, testing, and selling the Polluting Vehicles through fraudulent COCs [certificates of compliance] and EOs **[**86]** [Executive Orders], false emissions tests, deceptive and misleading marketing and materials, and deriving profits and revenues from those activities. Each member of the Clean Diesel Fraud Enterprise shared in the bounty generated by the enterprise—i.e., by sharing the benefit derived from increased sales revenue generated by the scheme to defraud consumers and franchise dealers alike nationwide.

Id. at 132-133.

Bosch contends that these allegations do not specify a common purpose. First, Bosch notes that "Plaintiffs make no allegations that Bosch LLC played any role in obtaining the COCs and EOs for GM and the Subject Vehicles." Bosch Mot. Dismiss at 30. Bosch further characterizes the complaint as framing "generalized allegations concerning unspecified communications with regulators that fail to specify the who, what, when, and where of the alleged communications or any reason to believe they were truthful." *Id.* In fact, Bosch attempts to explain away all of Bosch's alleged involvement as being related only to the Volkswagen emissions scandal.

These arguments miss the point. Plaintiffs' essential theory is that Bosch and GM[24] worked together to create an engine **[*1079]** component which accommodated the use of **[**87]** defeat devices. That component and the related defeat devices caused the Duramax engine to produce emissions at a level much higher than a reasonable

---

[23] The Defendants do not attempt to argue that the relationship which Plaintiffs allege existed between them was too short to give rise to a RICO association-in-fact. And Defendants decline to make that argument for good reason: Plaintiffs allege that Defendants' enterprise spanned years.

[24] Plaintiffs allege that Bosch and GM conspired together. The additional allegation that Bosch also conspired in similar manner with Volkswagen is largely irrelevant. It is, at the very least, consistent with Plaintiffs' theory. Bosch's apparent belief that the alleged existence of a similar but separate agreement affirmatively establishes that no such agreement existed between Bosch and GM is unexplained. The Plaintiffs' well-pleaded allegations must be construed in their favor and accepted as true at this stage.

consumer would expect. That identified common purpose—the Defendants agreed to create a component together which would not operate as consumers would expect—is sufficient. Bosch has not proffered, and the Court cannot conceive of, a reason why Plaintiffs must identify specific communications with regulators in order to allege a common purpose. Such communications may have been made and, indeed, may have furthered the Defendants' common purpose, but they are a secondary aspect of the alleged common purpose.

ii.

Second, Defendants argue that any alleged relationship between them is simply a routine business relationship which is insufficient to create RICO liability. ***HN30***[] "[S]imply conspiring to commit a fraud is not enough to trigger the Act if the parties are not organized in a fashion that would enable them to function as a racketeering organization for other purposes." *VanDenBroeck v. CommonPoint Mortg. Co., 210 F.3d 696, 699 (6th Cir. 2000)*, *abrogated on other grounds in* *Bridge, 553 U.S. 639, 128 S. Ct. 2131, 170 L. Ed. 2d 1012*. The most probative question in determining whether a RICO enterprise exists is whether the enterprise has the "ability to exist apart from **[**88]** the pattern of wrongdoing." *Id.* (internal citations omitted). To state it differently, "[t]he 'enterprise' is not the 'pattern of racketeering activity'; it is an entity separate and apart from the pattern of activity in which it engages." *Turkette, 452 U.S. at 583*. The Sixth Circuit has identified two important principles for determining whether an association with a corporation constitutes a RICO enterprise:

> 1) individual defendants are always distinct from corporate enterprises because they are legally distinct entities, even when those individuals own the corporations or act only on their behalf; and 2) corporate defendants are distinct from RICO enterprises when they are functionally separate, as when they perform different roles within the enterprise or use their separate legal incorporation to facilitate racketeering activity.

In re ClassicStar Mare Lease Litig., 727 F.3d at 492.

Here, GM and Bosch are clearly different corporate entities and performed different roles within the enterprise. Their association thus satisfies the fundamental requirements of a RICO enterprise.

Defendants correctly argue that courts have overwhelming held that a "routine commercial relationship" is insufficient to form the basis for a RICO enterprise. The district court in *Gomez* ***[**89]*** *v. Guthy-Renker, LLC* has provided both an exhaustive exposition of the law and an example of the typical fact pattern which plaintiffs allege. *No. EDCV1401425JGBKKX, 2015 U.S. Dist. LEXIS 90725, 2015 WL 4270042, at *5 (C.D. Cal. July 13, 2015)*. The *Gomez* Court summarized the typical theory:

> Some provider of services ("Provider") has a business client ("Business"). Completely unbeknownst to Provider, Business is conducting its affairs fraudulently. Someone ("Injured Party") is injured by Business's fraudulent practices and **[*1080]** wishes to seek compensation from Business.

Id.

"Despite the widespread consensus among courts that such routine business relationships are insufficient to impose RICO liability, there has been very little agreement among courts as to which particular RICO requirement fails under such circumstances." *2015 U.S. Dist. LEXIS 90725, [WL] at *9*. Some courts, like the Second Circuit, require that "the common purpose of an association be fraudulent in order for it to constitute a RICO enterprise." *Id.* (citing *First Capital Asset Mgmt., Inc. v. Satinwood, Inc., 385 F.3d 159, 174 (2d Cir. 2004))*. Other courts have rejected RICO claims premised on routine services contracts "because the entities are actually pursuing their individual economic interests, rather than any shared purpose." *Id.* And still other courts have "noted the lack of organization and structure underlying a **[**90]** routine contractual relationship for the provision of services." *2015 U.S. Dist. LEXIS 90725, [WL] at *10*.

The *Gomez* court discusses other rationales that various courts have promulgated when confronted with this issue, but all can be summarized as demonstrating "a remarkable uniformity [among federal courts] that RICO liability must be predicated on a relationship more substantial than a routine contract between a service provider and its client." *2015 U.S. Dist. LEXIS 90725, [WL] at *11*. The alleged business relationship which the Defendants entered into here, however, is far from "routine." Defendants' assertion that Bosch has supplied a number of legitimate vehicle components to GM is, simply, irrelevant. Those contractual relationships are not part of the illegal enterprise which Plaintiffs allege existed.

Plaintiffs allege that Defendants participated in an enterprise with the purpose of defrauding consumers. They "associated for the common purpose of designing, manufacturing, distributing, testing, and selling the Polluting Vehicles through fraudulent COCs and EOs, false emissions tests, and deceptive and misleading marketing and materials, and deriving profits and revenues from those activities." Con. Am. Compl. at 132. The alleged course of conduct is inherently **[**91]** deceptive: Bosch and GM collaborated to create an engine which performed one way when being tested for emissions and another way when in normal use. *See also* *In re Volkswagen "Clean Diesel" Mktg., Sales Practices, & Prod. Liab. Litig., 2017 U.S. Dist. LEXIS 179652, 2017 WL 4890594, at *15* ("Bosch's intent to defraud reasonably can be inferred from the scheme itself. . . . No one to date in this multidistrict litigation has sought to justify, or explain a lawful purpose for, software that effectively turns a vehicle's emission systems on or off depending on whether the vehicle is undergoing emissions testing or being operated under normal driving conditions.").

In other words, Plaintiffs have plausibly alleged that both Bosch and GM were engaged in an enterprise with the manifest purpose of defrauding both regulators and consumers.[25] The Defendants may have engaged in other, "routine" business transactions, but that is irrelevant. The Defendants may even have considered the alleged enterprise whereby they collaborated to configure the EDC17 for the Duramax engine to be a similar business relationship. But when the essential purpose of a particular business relationship is fraud, the related conduct is "not ordinary or normal business activities." *Levine v. **[*1081]** First Am. Title Ins. Co., 682 F. Supp. 2d 442, 461 (E.D. Pa. 2010)*. That fraudulent purpose is the distinction **[**92]** between the EDC17 collaboration and Bosch's previous transactions with GM, as well as the reason that the cases which Defendants cite are inapplicable. *See* *In re Volkswagen "Clean Diesel" Mktg., Sales Practices, & Prod. Liab. Litig., 2017 U.S. Dist. LEXIS 179652, 2017 WL 4890594, at *15* (finding that a RICO enterprise existed and involving indistinguishable facts); *Mitchell Tracey v. First Am. Title Ins. Co., 935 F. Supp. 2d 826, 844 (D. Md. 2013)* ("[U]nlawful acts are not conducted in the ordinary course of business."); *Robins v. Glob. Fitness Holdings, LLC, 838 F. Supp. 2d 631, 652 (N.D. Ohio 2012)* ("The RICO claims of all Plaintiffs fail because they have failed to allege an enterprise for the common purpose of committing bank and wire fraud."). ***HN31***[] A RICO enterprise does not exist where one company unknowingly aided another company in a fraudulent endeavor. But when both companies are aware of and contribute to the fraud, they cannot argue that they have a routine commercial relationship.[26]

Bosch alternatively argues that no RICO enterprise exists because Plaintiffs do not allege that Bosch "had any financial interest in the success of the purported enterprise other than its own compensation for performing the tasks for which it was hired." Bosch Mot. Dismiss at 32. Bosch cites *Guaranteed Rate, Inc. v. Barr* for that proposition. *912 F. Supp. 2d 671, 687 (N.D. Ill. 2012)*. In *Guaranteed Rate*, the district court found that no RICO enterprise **[**93]** existed for several reasons, including because there was not "a single factual claim asserting the RICO Defendants had any interest in the outcome of the alleged scheme beyond their individual interests." *Id.* The

---

[25] The nature of the common purpose distinguishes this case from others, like *Shaw v. Nissan N. Am., Inc.*, where the alleged purpose was to continue selling vehicles that (might have) contained defects. *220 F. Supp. 3d 1046, 1054 (C.D. Cal. 2016)*. The common purpose here was to create, market, and sell a component and consequently an engine which was inherently deceptive.

[26] The fact that two distinct companies (Bosch and GM) associated together for a common purpose is important. That fact distinguishes the present case from several which Defendants cite. *See* *Ignition Switch Litig., 2016 U.S. Dist. LEXIS 92499, 2016 WL 3920353, at *12* (no enterprise because the only alleged members were GM and its agents)*;* *In re Toyota Motor Corp. Unintended Acceleration Mktg., Sales Practices, & Prod. Liab. Litig., 826 F. Supp. 2d 1180, 1185 (C.D. Cal. 2011)* (no RICO enterprise because all defendants were subsidiaries of Toyota). It is axiomatic that a company cannot form a RICO enterprise with itself. But, of course, several companies can easily form a RICO enterprise. *See* *United States v. Huber, 603 F.2d 387, 394 (2d Cir. 1979)*. *See also* *In re ClassicStar Mare Lease Litig., 727 F.3d at 493*.

court went on: "[T]here is no indication in the Amended Complaint that the RICO Defendants shared in the profits of the alleged enterprise as opposed to merely taking their own respective profits from their respective actions related to the scheme." *Id.* In *Menzies v. Seyfarth Shaw LLP*, however, the district court rejected the argument that *Guaranteed Rate* stood for the proposition that "RICO requires the enterprise members to share the profits of their illegal scheme." *197 F. Supp. 3d 1076, 1095 (N.D. Ill. 2016)*. "There is no such requirement." *Id.*

The Court agrees. And, more importantly, Bosch's argument is factually suspect. Although GM's profits from sales of Duramax-equipped vehicles might be distinct from Bosch's profits for development and implementation of EDC17 in those vehicles, all Defendants clearly profited from the alleged scheme. EDC17 enabled GM to produce diesel vehicles with an apparent blend of high power, high fuel efficiency, and low emission levels. Because that combination was attractive to consumers, **[**94]** the scheme resulted in higher demand for GM's diesel vehicles, which in turn increased GM's demand for EDC17 devices. The scheme thus plausibly resulted both in higher sales of diesel vehicles for GM and higher sales of EDC17 for Bosch.

[*1082] 2.

The next question is whether Plaintiffs have alleged that the Defendants both engaged in a pattern of racketeering activity. ***HN32***[] Pursuant to *§ 1961(5)*, a "'pattern of racketeering activity' requires at least two acts of racketeering activity, one of which occurred after the effective date of this chapter and the last of which occurred within ten years (excluding any period of imprisonment) after the commission of a prior act of racketeering activity." Defendants argue, correctly, that Plaintiffs must allege that *each* Defendant engaged in two predicate acts of racketeering activity. *See Kerrigan v. ViSalus, Inc., 112 F. Supp. 3d 580, 605 (E.D. Mich. 2015)*. *See also Crest Constr. II, Inc. v. Doe, 660 F.3d 346, 358 (8th Cir. 2011)*; *Guaranteed Rate, Inc. v. Barr, 912 F. Supp. 2d 671, 684 (N.D. Ill. 2012)*.

Here, Plaintiffs allege that Defendants engaged in multiple predicate acts of mail and wire fraud. ***HN33***[] To state a claim based on mail or wire fraud, the Plaintiffs must allege the following three elements: "(1) devising or intending to devise a scheme to defraud (or to perform specified fraudulent acts); (2) involving a use of the mails; and (3) for the purpose of executing **[**95]** the scheme or attempting to do so. *United States v. Kennedy, 714 F.3d 951, 958 (6th Cir. 2013)* (quoting *United States v. Frost, 125 F.3d 346, 354 (6th Cir.1997))*.[27] The Plaintiffs must allege that Defendants possessed the "specific intent to deceive or defraud." *Frost, 125 F.3d at 354*. The "scheme to defraud must involve 'misrepresentations or omissions reasonably calculated to deceive persons of ordinary prudence and comprehension.'" *Bender v. Southland Corp., 749 F.2d 1205, 1216 (6th Cir. 1984)* (quoting *United States v. Van Dyke, 605 F.2d 220, 225* (6ht Cir. 1979)). The Plaintiffs need not show "actual reliance," but the Plaintiffs must demonstrate that the misrepresentations or omissions were "material." *United States v. Daniel, 329 F.3d 480, 487 (6th Cir. 2003)*. Specific intent to defraud or deceive exists if "the defendant by material misrepresentations intends the victim to accept a substantial risk that otherwise would not have been taken." *Id. at 488*.

HN34[] Importantly, "[a] defendant may commit mail fraud even if he personally has not used the mails." *Frost, 125 F.3d at 354* (citing *United States v. Griffith, 17 F.3d 865, 874 (6th Cir.1994))*. "A mail fraud conviction requires only a showing that the defendant acted with knowledge that use of the mails would follow in the ordinary course of business, or that a reasonable person would have foreseen use of the mails." *Id.* In other words, there is no requirement that the defendant have actually intended that the mails (or wire) be used. *Id.* And, further, "'[t]he mailings may be innocent or even legally necessary.'" *Id.* (quoting **[**96]** *United States v. Oldfield, 859 F.2d 392, 400 (6th Cir. 1988))*. The use of the mails "'need only be closely related to the scheme and reasonably foreseeable as a result of the defendant's actions.'" *Id.* (quoting *Oldfield, 859 F.2d at 400*).

[27] The Sixth Circuit has "interpreted the mail-fraud and wire-fraud statutes as having essentially the same elements, except for the use of the mails versus the wires." *Kennedy, 714 F.3d at 958*.

HN35[] "When pleading predicate acts of mail or wire fraud, in order to satisfy the heightened pleading requirements of Rule 9(b), a plaintiff must '(1) specify the statements that the plaintiff contends were fraudulent, (2) identify the speaker, (3) state where and when the statements were made, and (4) explain why the statements were fraudulent.'" Heinrich, 668 F.3d at 404 (quoting Frank v. Dana Corp., 547 F.3d 564, 570 (6th Cir. 2008)).

[*1083] i.

GM argues, first, that Plaintiffs' allegations regarding GM's advertising campaign are insufficient to establish affirmative misrepresentations because all claims made in that campaign are nonactionable puffery. Plaintiffs contend that their "RICO claim does not require any proof of affirmative misrepresentations because the omission of material facts suffices to prove the predicate acts of mail or wire fraud." Pl. Resp. GM Mot. Dismiss at 10. That is correct. *See* Bender, 749 F.2d at 1216.

The more pertinent question, then, is whether Plaintiffs have adequately alleged fraudulent omissions. Defendants contend that Plaintiffs do not allege any fraudulent omissions "with the factual specificity mandated by Rule 9(b)." GM Mot. **[**97]** Dismiss at 40. But, as discussed earlier, allegations of omissions—as opposed to affirmative misrepresentations—will inevitably be less specific. Misrepresentations occur at a definite point in time, but omissions occur over periods of time. And, because misrepresentations involve action while omissions involve inaction, plaintiffs are less likely to uncover discrete evidence of omissions. *See* Beck, 273 F. Supp. 3d 735, 2017 WL 3448016, at *9 (collecting cases). It must be remembered that the essential purpose of Rule 9(b) is to provide the defendants with adequate notice of the allegations so that they can defend against the claims.

When considered from that perspective, Plaintiffs' allegations of fraudulent conduct are clearly sufficient to apprise Defendants of the alleged fraudulent scheme. Defendants argue that Plaintiffs have not plausibly alleged that both GM and Bosch had specific intent to defraud consumers. But, as explained above, that intent can be inferred from the nature of the alleged conduct. The way in which EDC17 interacted with the Duramax engine is inherently deceptive. The alleged purpose of the device is to provide the perception of reduced emissions while avoiding the reality of reduced emissions. Defendants cannot reasonably **[**98]** argue that the deceptive nature of EDC17 was unanticipated or unintended, and even if they do, that argument could be resolved only by a jury. Plaintiffs have plausibly alleged that the purpose of EDC17 was deception, and so Defendants' protestations that it has an innocent and lawful purpose are noncognizable at the pleading stage.

Defendants also appear to argue that Plaintiffs have not plausibly alleged or specifically identified specific uses of the mail or wire which were fraudulent. But the Sixth Circuit has clearly held that a RICO claim can exist even if the mailings were "innocent" or "legally necessary." Frost, 125 F.3d at 354 (internal citations omitted). Additionally, the Supreme Court has held that "[m]ailings occurring after receipt of the goods obtained by fraud are within the statute if they 'were designed to lull the victims into a false sense of security, postpone their ultimate complaint to the authorities, and therefore make the apprehension of the defendants less likely than if no mailings had taken place.'" United States v. Lane, 474 U.S. 438, 451-52, 106 S. Ct. 725, 88 L. Ed. 2d 814 (1986) (quoting United States v. Maze, 414 U.S. 395, 403, 94 S. Ct. 645, 38 L. Ed. 2d 603 (1974)). *See also* United States v. Daniel, 329 F.3d 480, 489 (6th Cir. 2003). In other words, Plaintiffs do not bear the burden of pleading uses of the mail or wire that were fraudulent. They need only identify uses of the mail or wire **[**99]** which furthered the fraudulent scheme. Allegations that mailings by the Defendants aided in the concealment of the fraud are sufficient.

In making the argument that Plaintiffs must specifically allege fraudulent uses of the mail and wires, Defendants conflate several legal requirements. As described above, Plaintiffs bear the burden of alleging **[*1084]** that each Defendant committed two predicate acts of racketeering activity. Plaintiffs allege that Defendants engaged in wire and mail fraud. Wire and mail fraud require a scheme to defraud through fraudulent representation or omission *and* a use of the mail or wire to further that scheme. But a defendant can commit wire or mail fraud without actually having used the wire or mail to defraud. Rather, and as explained above, a defendant can be found culpable simply by entering into the scheme to defraud if a co-defendant's use of the mail or wire was reasonably foreseeable and closely related to the scheme. Thus, Bosch's repeated argument that Plaintiffs must specifically allege that *Bosch* used the mail or wire to defraud is, simply, wrong.

Plaintiffs have adequately alleged a number of uses of the mail and wire which furthered the fraudulent scheme. **[**100]** GM submitted applications to government regulators which affirmed that the vehicles complied with emission standards. Without those mailings and electronic communications, GM would have been unable to sell the vehicles. The applications and resulting certificates also increased the likelihood that consumers would perceive the Duramax vehicles as emitting pollution at a low level. And although Bosch may not have directly used the mail or wire to further the fraudulent scheme, GM's uses of the mail and wire were inevitable and thus reasonably foreseeable. Plaintiffs have not specifically alleged the date of the applications or the specific identity of the employee who prepared them, but Plaintiffs have alleged enough detail to put Defendants on notice of the alleged predicate acts.

Additionally, Plaintiffs have identified a number of advertisements made by GM which characterized the Duramax vehicles as having low emissions and as being friendly to the environment. *See* Con. Am. Compl. at 61-70. If Plaintiffs were relying on these advertisements as the basis for its claim of fraud, then Defendants' arguments regarding puffery and duty to disclose would become relevant. However, these representations **[**101]** do not constitute the fraudulent scheme; they merely further it. The level of emissions produced by a diesel engine was a material consideration for consumers purchasing a vehicle. GM's extensive advertising which emphasized the low emissions and environmentally-friendly nature of its "clean diesel" engine underscores its understanding of that fact. Thus, regardless of whether these advertisements would be actionable on their own, they were material to the scheme. The advertisements urged consumers to buy Duramax vehicles *because* they were environmentally friendly even though the Defendants had purposefully worked together to obfuscate the true level of emissions.

Plaintiffs have specifically identified a number of communications that were "reasonably calculated to deceive persons of ordinary prudence and comprehension." *Bender, 749 F.2d at 1216*. The communications themselves may not have been demonstrably fraudulent, but they were intended to increase the likelihood that consumers would purchase Duramax vehicles because they produced emissions at a low level, when in fact the true level of emissions was much higher. The nondisclosure of the true operation of the Duramax engine was material precisely because **[**102]** GM worked so hard to convince consumers that it was a "clean diesel" engine. The fact that the uses of the mail and wire which Plaintiffs identify may have been innocent or legally required is irrelevant. *See Frost, 125 F.3d at 354*. *See also Schmuck, 489 U.S. at 712* ("[A]lthough the registration-form mailings may not have contributed directly to the duping of either the retail dealers or the customers, they were necessary **[*1085]** to the passage of title, which in turn was essential to the perpetuation of Schmuck's scheme."). Plaintiffs have identified a number of predicate acts of mail or wire fraud with sufficient specificity to avoid dismissal.[28]

ii.

Bosch alternatively argues that Plaintiffs cannot rely on alleged omissions unless they can demonstrate that Bosch had an independent duty to disclose. Some noncontrolling cases do appear to support this proposition. *See United States v. Skeddle, 940 F. Supp. 1146, 1149 (N.D. Ohio 1996)* ("Because the "scheme to defraud of property or money" counts are based on what was not said (i.e., omissions), the defendants are culpable under this branch of the mail fraud statute only if the government proves the defendants had a duty to disclose their interest in the transactions."); *Gould, Inc. v. Mitsui Min. & Smelting Co., 750 F. Supp. 838, 843 (N.D. Ohio 1990)* ("[T]here has been no attempt to delineate what facts were omitted or what **[**103]** duty defendants had to disclose information to Gould, which is necessary when one alleges a material omission."). *See also United States v. Benny, 786 F.2d 1410, 1418 (9th Cir. 1986)* ("[A] non-disclosure can only serve as a basis for a fraudulent scheme when there exists

---

[28] As the *Kerrigan* Court explained, when the RICO claim is premised on a concealment theory of fraud, the plaintiffs do not need to meet the *Rule 9(b)* heightened pleading standard when identifying the mailings. Rather, Plaintiffs need only "provide a detailed description of the fraudulent scheme and a clear explanation of each Defendant's alleged role in it." *112 F. Supp. 3d at 607*. Plaintiffs have done so here.

an independent duty that has been breached by the person so charged."); *United States v. Rabbitt, 583 F.2d 1014, 1026 (8th Cir. 1978)*.

But other courts have squarely rejected this rationale. *United States v. Colton, 231 F.3d 890, 901 (4th Cir. 2000)* ("Concealment often is accompanied by an affirmative misrepresentation or a violation of an independent statutory or fiduciary disclosure duty, but neither is "essential" for actionable fraud."); *United States v. Keplinger, 776 F.2d 678, 697 (7th Cir. 1985)* ("It requires no extended discussion of authority to demonstrate that omissions or concealment of material information can constitute . . . fraud cognizable under the mail fraud statute, without proof of a duty to disclose the information pursuant to a specific statute or regulation."); *United States v. Allen, 554 F.2d 398, 410 (10th Cir. 1977)* (same).

Neither Plaintiffs nor Defendants have identified Sixth Circuit authority which expressly addresses this question. The Sixth Circuit has, however, repeatedly confirmed that concealment of material facts can constitute a fraudulent scheme sufficient to establish RICO liability. *See, e.g., Daniel, 329 F.3d at 487*; *Dana Corp. v. Blue Cross & Blue Shield Mut. of N. Ohio, 900 F.2d 882, 885 (6th Cir. 1990)*; *Am. Eagle Credit Corp. v. Gaskins, 920 F.2d 352, 354 (6th Cir. 1990)*; *Bender, 749 F.2d at 1216*. *See also United States v. Chew, 497 F. App'x 555, 563 (6th Cir. 2012)* ("[I]n relation both to mail fraud and wire fraud, there **[**104]** is no technical or precise definition of an unlawful 'scheme to defraud.' The standard is a reflection of moral uprightness, of fundamental honesty, fair play and right dealing in the general and business life of members of society.") (internal citations omitted); *In re ClassicStar Mare Lease Litig., 823 F. Supp. 2d 599, 627 (E.D. Ky. 2011)* ("A fraudulent scheme may be demonstrated by proof that it was reasonably calculated to deceive persons of ordinary prudence and comprehension, and communications of half-truths and concealment of material facts are both actionable."). ***HN36***[] Because, to the Court's knowledge, the Sixth Circuit has never articulated a duty to disclose **[*1086]** requirement, the Court declines to manufacture that requirement. The more recent and better reasoned cases from other circuits do not require a duty to disclose in order for fraudulent omissions to constitute a scheme to defraud.

And, importantly, "[a] false or fraudulent representation, within the meaning of *18 U.S.C. § 2314*, may be made by statements of half truths or the concealment of material facts, as well as by affirmative statements or acts." *United States v. O'Boyle, 680 F.2d 34, 36 (6th Cir. 1982)*. *See also United States v. Kurlemann, 736 F.3d 439, 446 (6th Cir. 2013)*; *United States v. Allen, 554 F.2d 398, 410 (10th Cir. 1977)*. Even if the representations made during the advertising campaign are nonactionable puffery, those representations also seem fundamentally inconsistent **[**105]** with Plaintiffs' allegation that the Duramax vehicles polluted at levels several multiples more than the legal limit. Con. Am. Compl. at 3. In other words, to the extent Defendants may have had no duty to disclose the operation of the Duramax engine's emissions technology in the abstract, a duty arose when they created the appearance that it was a "clean diesel" engine. *See e.g., Muncy v. InterCloud Sys., Inc., 92 F. Supp. 3d 621, 642 (E.D. Ky. 2015)* (summarizing situations where a duty to disclose arises in the tort context).

3.

Finally, Bosch argues that Plaintiffs have not plausibly alleged that Bosch participated in the conduct of the RICO enterprise by directing the enterprise's affairs. Bosch similarly argues that Plaintiffs cannot join Bosch as a RICO Defendant by alleging that Bosch aided and abetted GM in violating the wire and mail fraud statutes. Finally, Bosch and GM both argue that Plaintiffs cannot maintain a RICO conspiracy claim if they do not allege a cognizable substantive RICO claim.

i.

In *Reves v. Ernst & Young*, the Supreme Court addressed the requirement that a RICO defendant "conduct or participate, directly or indirectly, in the conduct of such enterprise's affairs." *507 U.S. 170, 179, 113 S. Ct. 1163, 122 L. Ed. 2d 525 (1993)* (quoting*§ 1962(c)*). The Court explained:

> Once we understand the word "conduct" **[**106]** to require some degree of direction and the word "participate" to require some part in that direction, the meaning of *§ 1962(c)* comes into focus. ***HN37***[] In order to "participate, directly or indirectly, in the conduct of such enterprise's affairs," one must have some part in directing those affairs. Of course, the word "participate" makes clear that RICO liability is not limited to those with primary responsibility for the enterprise's affairs, just as the phrase "directly or indirectly" makes clear that RICO liability is not limited to those with a formal position in the enterprise, but some part in directing the enterprise's affairs is required.

Id.

"[L]iability [under *§ 1962(c)*] depends on showing that the defendants conducted or participated in the conduct of the "*enterprise's* affairs," not just their *own* affairs." *Id. at 185*. "Although *Reves* does not explain what it means to have some part in directing the enterprise's affairs, subsequent decisions from our sister circuits have persuasively explained that it can be accomplished either by making decisions on behalf of the enterprise or by knowingly carrying them out." *United States v. Fowler, 535 F.3d 408, 418 (6th Cir. 2008)*.

Bosch argues that Plaintiffs' allegations establish simply that Bosch "worked together with GM to **[**107]** design and implement software and that Bosch LLC participated in promoting clean diesel technology generally." Bosch Mot. Dismiss at 35. According **[*1087]** to Bosch, that is insufficient because "a RICO violation requires more than that a defendant had a business relationship with a putative RICO enterprise or . . . performed services for that enterprise." *Id.* (quoting *Kerrigan, 112 F. Supp 3d at 603* (internal citations omitted)).

This argument is simply a repackaging of Bosch's previous argument that no RICO enterprise has been alleged because the relationship between the Defendants was merely a routine business relationship. That argument was rejected above and carries no additional persuasive weight here. Plaintiffs allege that Bosch was an integral part of the operation of the enterprise because Bosch "locked out" EDC17 so that its customers could not make significant changes to the component. Rather, Bosch worked closely with its customers to customize EDC17. Plaintiffs' allegations characterize EDC17 as performing an inherently deceptive function. Thus, the operation of EDC17 is the apparent heart of the fraudulent enterprise and, because Bosch bears primary responsibility for programming EDC17, it "knowingly carried **[**108]** . . . out" core aspects of the alleged enterprise. *Fowler, 535 F.3d at 418*. *See also* *Ouwinga v. Benistar 419 Plan Servs., Inc., 694 F.3d 783, 793 (6th Cir. 2012)* ("*Fowler* makes clear that knowingly carrying out the orders of the enterprise satisfies the "operation or management" test."). *See also id.* ("We recognize that although this analysis applies to all Defendants, the various Defendants acted in different capacities and those differences may ultimately impact the determination of whether a particular Defendant only participated in his own affairs. But that is a matter to be fleshed out in discovery and to be resolved through motion practice or by the jury.").[29]

ii.

Thus, Plaintiffs have adequately alleged the elements of a *§ 1962(c)* substantive RICO claim against both GM and Bosch. Both Defendants argue that, to the extent Plaintiffs have not alleged a cognizable substantive RICO claim, they cannot maintain a *§ 1962(d)* RICO conspiracy claim against the Defendants. The premise of that argument has been rejected, and so the RICO conspiracy claim will not be dismissed.

---

[29] Bosch also argues that Plaintiffs cannot satisfy the predicate act requirement by alleging that Bosch "aided and abetted" GM in violating the mail and wire fraud statutes. As explained above, this argument conflates several legal requirements. Plaintiffs must allege that Bosch engaged in two predicate acts under the RICO statute. The alleged predicate acts, mail and wire fraud, can be committed without actually using the mail or wire. A charge of mail or wire fraud, then, bears a certain resemblance to conspiracy law. As explained above, Plaintiffs have plausibly alleged that Bosch committed predicate acts of mail and wire fraud. Thus, Plaintiffs' RICO theory does not rely upon "aiding or abetting" liability.

D.

Finally, GM argues that Plaintiffs' RICO claim must be dismissed because it is essentially an attempt to enforce the *Clean Air Act* via a civil suit. In support of that argument, GM cites three cases (none involving suits to enforce the CAA) **[**109]** where courts concluded that extensive regulatory schemes provided the exclusive remedies for violations of regulatory statutes and preventing the plaintiffs from invoking RICO to obtain treble damages. *See Ayres v. Gen. Motors Corp., 234 F.3d 514, 525 (11th Cir. 2000)* (dismissing a RICO claim premised on non-compliance with the notification requirement of *Section 210 of the Energy Reorganization Act* because the regulatory statute provided the exclusive remedy for violations); *Norman v. Niagara Mohawk Power Corp., 873 F.2d 634, 637 (2d Cir. 1989)* (also dismissing a RICO **[*1088]** claim premised on violation of *Section 210 of the Energy Reorganization Act* because that section provides an exclusive remedy for violations and because the RICO claim did not involve "a collateral matter that is only peripherally related to the safety concerns implicit in *section 210*"); *Gifford v. Meda, No. 09-CV-13486, 2010 U.S. Dist. LEXIS 45322, 2010 WL 1875096, at *12 (E.D. Mich. May 10, 2010)* (dismissing a RICO claim premised on "the misclassification of Plaintiffs as independent contractors for purposes of federal income and employment tax reporting" because that conduct was "unlawful only by virtue of the federal income tax laws").

This argument is largely coterminous with Defendants' argument, rejected above, that Plaintiffs' state law claims are preempted by the CAA. Plaintiffs' allegations are not dependent upon proof of violation of federal emission regulations. That said, Plaintiffs' **[**110]** allegations are confusing because they repeatedly allege that Defendants purposefully deceived government regulators about the true emission levels of the Duramax engine. Plaintiffs allege, however, that their suit is "not based on these laws but on deception aimed at consumers." Con. Am. Compl. at 5.

For largely the same reasons articulated while rejecting Defendants' argument that Plaintiffs' state law claims are preempted, Plaintiffs' RICO claim is not primarily premised on proof of violation of EPA regulations and thus is cognizable. The alleged common purpose at the heart of the RICO scheme is the deception of consumers. The alleged injury is overpayment by consumers. The identified predicate acts of mail and wire fraud involve communications to consumers. Admittedly, Plaintiffs also allege that the RICO Defendants intended to deceive regulators and made fraudulent mail and wire communications to regulators. But neither of those allegations are essential to Plaintiffs' RICO claim. Accordingly, they are best construed as "collateral matter[s]" that are "only peripherally related to the" regulatory concerns advanced by EPA regulations. *Norman, 873 F.2d at 637*. Plaintiffs' RICO claim is not an attempt to **[**111]** obtain a remedy which is exclusively within the purview of the EPA.

VI.

The final question is whether Plaintiffs should be permitted to proceed to discovery on state law claims advanced on behalf of unnamed, putative class members. Defendants argue that these claims should be dismissed because Plaintiffs do not have standing to advance claims on behalf of unnamed Plaintiffs prior to class certification. Plaintiffs argue that this analysis is best reserved until class certification because that determination will resolve the standing issue.

HN38[] "Threshold individual standing is a prerequisite for all actions, including class actions." *Fallick v. Nationwide Mut. Ins. Co., 162 F.3d 410, 423 (6th Cir. 1998)*. "A potential class representative must demonstrate individual standing vis-as-vis the defendant; he cannot acquire such standing merely by virtue of bringing a class action." *Id.* The growing consensus, however, is that "class certification issues are . . . 'logically antecedent' to Article III concerns," at least when the named plaintiffs possess Article III standing. *See Ortiz v. Fibreboard Corp., 527 U.S. 815, 831, 119 S. Ct. 2295, 144 L. Ed. 2d 715 (1999)*; *Kaatz v. Hyland's Inc., No. 16 CV 237 (VB), 2016 U.S. Dist. LEXIS 87348, 2016 WL 3676697, at *4 (S.D.N.Y. July 6, 2016)*; *Storey v. Attends Healthcare Prod., Inc., No. 15-CV-13577, 2016 U.S. Dist. LEXIS 72505, 2016 WL 3125210, at *3 (E.D. Mich. June 3, 2016)*; *In re Auto. Parts Antitrust Litig., 29 F. Supp. 3d 982, 1000 (E.D. Mich. 2014)*. In other words, "where 'class certification is the source of the potential standing problems,' class certification should precede the standing inquiry." **[*1089]** *In re*

Digital Music Antitrust Litig., 812 F. Supp. 2d 390, 406 (S.D.N.Y. 2011) (quoting *In re Grand Theft Auto Video Game Litig., No. 06 MD 1739, 2006 U.S. Dist. LEXIS 78064, 2006 WL 3039993, at *2 (S.D.N.Y. Oct. 25, 2006))*. **[**112]**

GM attempts to argue that the standing question would exist regardless of whether Plaintiffs filed their claims alone or as part of a putative class action. But GM does not explain why that is the case, and the Court cannot conceive of a reason. The named Plaintiffs have Article III standing and, if the class is certified, then those Plaintiffs will be able to advance state law claims on behalf of unnamed Plaintiffs. The question of whether the state law claims may be advanced on behalf of unnamed Plaintiffs, then, is indistinguishable from the *Federal Rule of Civil Procedure 23* analysis. *See* *Kaatz, 2016 U.S. Dist. LEXIS 87348, 2016 WL 3676697, at *4* ("That standing inquiry is more appropriately addressed at the class certification stage when courts consider the commonality and typicality prerequisites of class actions."). The claims predicated on the law of states where no named Plaintiff lives will not be dismissed for lack of standing.

VII.

Accordingly, it is **ORDERED** that Defendants' motions to dismiss, ECF No. 44, 45, are **DENIED**.

It is further **ORDERED** that Plaintiffs' motion for leave to file a surreply, ECF No. 58, is **DENIED as moot**.

It is further **ORDERED** that Defendant GM's motion to file a surresponse, ECF No. 60, is **DENIED as moot [**113]** .

United States District Judge

N. Am. Soccer League, LLC v. United States Soccer Fed'n, Inc.

United States Court of Appeals for the Second Circuit

December 15, 2017, Argued; February 23, 2018, Decided

Docket No. 17-3585

Reporter

883 F.3d 32 *; 2018 U.S. App. LEXIS 4343 **; 2018-1 Trade Cas. (CCH) P80,285; 2018 WL 1021223

NORTH AMERICAN SOCCER LEAGUE, LLC, Plaintiff-Appellant, v. UNITED STATES SOCCER FEDERATION, INC., Defendant-Appellee.

Prior History: [1]** Appeal from a November 4, 2017 order of the United States District Court for the Eastern District of New York (Brodie, J.).

North American Soccer League, LLC ("NASL") appeals from the denial of its motion for a preliminary injunction seeking a Division II designation pending the resolution of its antitrust case against the United States Soccer Foundation, Inc. ("USSF"). We evaluate NASL's motion under the heightened standard applicable to mandatory preliminary injunctions. NASL has not demonstrated a clear likelihood of success on the merits of its antitrust claim against USSF under *15 U.S.C. § 1*. Accordingly, we AFFIRM the order of the District Court denying NASL's motion for a preliminary injunction, and we REMAND the matter for further proceedings on the merits of NASL's claims.

N. Am. Soccer League, LLC v. United States Soccer Fed'n, Inc., 296 F. Supp. 3d 442, 2017 U.S. Dist. LEXIS 183202 (E.D.N.Y., Nov. 4, 2017)

Civil Procedure > Remedies > Injunctions > Mandatory Injunctions

Civil Procedure > ... > Injunctions > Grounds for Injunctions > Irreparable Harm

Civil Procedure > ... > Injunctions > Grounds for Injunctions > Likelihood of Success

HN2[] **Grounds for Injunctions, Balance of Hardships**

Courts refer to preliminary injunctions as prohibitory or mandatory. Prohibitory injunctions maintain the status quo pending resolution of the case; mandatory injunctions alter it. A party seeking a preliminary injunction must show (1) irreparable harm; (2) either a likelihood of success on the merits or both serious questions on the merits and a balance of hardships decidedly favoring the moving party; and (3) that a preliminary injunction is in the public interest. Because mandatory injunctions disrupt the status quo, a party seeking one must meet a heightened legal standard by showing a clear or substantial likelihood of success on the merits.

Civil Procedure > ... > Injunctions > Grounds for Injunctions > Likelihood of Success

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

HN3[] **Sherman Act, Claims**

Section 1 of the Sherman Act prohibits every contract, combination or conspiracy in restraint of trade or commerce. *15 U.S.C.S. § 1*. Thus, to establish a clear likelihood of success under its *§ 1* claim to obtain an injunction, a movant must show there is a contract, combination or conspiracy amongst separate economic actors pursuing separate economic interests such that the agreement deprives the marketplace of actual or potential competition.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN4[] **Sherman Act, Claims**

For an arrangement to be a conspiracy under *§ 1 of the Sherman Act*, *15 U.S.C.S. § 1*, it must embody concerted action. Concerted action exists where there is an agreement between separate economic actors pursuing separate economic interests. The fact that the co-conspirators are capable, due to their separateness, of acting in concert is not sufficient. Proof of a conspiracy is required.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

HN5[] **Sherman Act, Claims**

A plaintiff alleging a conspiracy under *§ 1 of the Sherman Act*, *15 U.S.C.S. § 1*, must offer direct or circumstantial evidence that reasonably tends to prove a conscious commitment to a common scheme designed to achieve an unlawful objective. Rarely do co-conspirators plainly state their purpose. As a result, courts often must evaluate circumstantial evidence of a conspiracy by weighing plus factors, which, when viewed in conjunction with the parallel acts, can serve to allow a fact-finder to infer a conspiracy. Courts should look for evidence that tends to exclude the possibility that the defendant was acting independently. Conduct as consistent with permissible competition as with illegal conspiracy does not, standing alone, support an inference of antitrust conspiracy.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN6[] **Sherman Act, Claims**

Courts use the Monsanto-Matsushita framework for assessing conspiracies, under *§ 1 of the Sherman Act*, *15 U.S.C.S. § 1*, including those conspiracies provable by direct evidence. A plaintiff who can proffer direct evidence of a conspiracy should have no qualms with the Monsanto-Matsushita framework because direct evidence by definition shows the requisite concerted action. Direct' evidence must evince with clarity a concert of illegal action.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN7[] **Sherman Act, Claims**

Organizational decisions do not inherently constitute *§ 1 of the Sherman Act*, *15 U.S.C.S. § 1*, concerted action. Not every action by a trade association is concerted action by the association's members. Indeed, even though a trade association by its nature involves collective action by competitors, a trade association is not by its nature a walking conspiracy. Rather, it is when a *§ 1* plaintiff establishes the existence of an illegal contract or combination that the plaintiff can proceed to demonstrate that the agreement constituted an unreasonable restraint of trade. Evidence should tend to show that association members, in their individual capacities, consciously committed themselves to a common scheme designed to achieve an unlawful objective.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

HN8[] **Scope, Monopolization Offenses**

Direct evidence of an illegal contract, combination, or conspiracy satisfies *§ 1 of the Sherman Act*, *15 U.S.C.S. § 1*, concerted-action requirement.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

HN9[] **Scope, Monopolization Offenses**

Only unreasonable restraints on competition violate *§ 1 of the Sherman Act*, *15 U.S.C.S. § 1*. Courts use one of two tests here. A restraint may be adjudged unreasonable either because it fits within a class of restraints that has been held to be per se unreasonable, or because it violates what has come to be known as the 'Rule of Reason. Regulation of league sports is a textbook example of when the rule of reason applies. An abbreviated, "quick look" version of the rule of reason applies when no elaborate industry analysis is required to demonstrate the anticompetitive character of the challenged agreement.

Antitrust & Trade Law > Exemptions & Immunities > Exempt Cartels & Joint Ventures

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

HN10[] **Exemptions & Immunities, Exempt Cartels & Joint Ventures**

There is a three-step rule-of-reason framework under *§ 1 of the Sherman Act*, *15 U.S.C.S. § 1*. First, a plaintiff bears the initial burden of demonstrating that a defendant's challenged behavior can have an adverse effect on competition in the relevant market. Second, if the plaintiff satisfies this initial burden, the burden shifts to the defendant, who must demonstrate the pro-competitive effects of the challenged restraint. Third, if the defendant provides that proof, the burden shifts back to the plaintiff to show that these legitimate competitive benefits could have been achieved through less restrictive means. Ultimately, the true test of legality is whether the restraint imposed is such as merely regulates and perhaps thereby promotes competition or whether it is such as may suppress or even destroy competition.

Antitrust & Trade Law > Exemptions & Immunities > Exempt Cartels & Joint Ventures

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN11[] **Exemptions & Immunities, Exempt Cartels & Joint Ventures**

Under the first step of the rule of reason, a plaintiff must demonstrate that the alleged restraint has an adverse effect on competition. The plaintiff can do this directly, by showing an actual adverse effect on competition as a whole in the relevant market. Or the plaintiff can make her case indirectly, by showing that the defendant has sufficient market power to cause an adverse effect on competition. Plaintiffs seeking to show adverse effect indirectly must demonstrate both the defendant's market power and other grounds for believing the challenged restraint harms competition. These other grounds might include price increases, reduced output or market quality, significantly heightened barriers to entry, or reduced consumer choice.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

HN12[] **Scope, Monopolization Offenses**

Although fraught with anticompetitive potential, standards promulgated by standard-setting organizations can be flush with significant procompetitive advantages. The history of the restraint, the evil believed to exist, the reason for adopting the particular remedy, the purpose or end sought to be attained, are all relevant facts.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

HN13[] **Scope, Monopolization Offenses**

It is permissible for courts to consider free riding and stability as two potential pro-competitive justifications in the standard-setting context. Eliminating free riders can be a pro-competitive advantage of alleged restraints on competition like vertical price agreements. The same holds true in the standard-setting context.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

HN14[] **Scope, Monopolization Offenses**

Courts can consider whether evidence of a defendant's stabilizing behavior constitutes a pro-competitive benefit of standard-setting.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

HN15[] **Scope, Monopolization Offenses**

A defendant cannot, of course, justify anticompetitive arrangements by saying an industry's "special characteristics" warrant them.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

HN16[] **Conspiracy to Monopolize, Sherman Act**

Unilateral action does not violate *§ 1 of the Sherman Act*, *15 U.S.C.S. § 1*.

Judges: Before: PARKER, WESLEY, and CHIN, Circuit Judges. **[**2]**

Opinion by: WESLEY

Opinion

[*34] WESLEY, *Circuit Judge*:

After the denial of its requested Division II designation for the 2018 season of men's professional soccer, the North American Soccer League, LLC ("NASL") filed an antitrust suit against the United States Soccer Federation, Inc. ("USSF"). NASL also moved for a preliminary injunction, seeking designation as a Division II league pending resolution of the suit. This opinion addresses that motion. We conclude NASL has not demonstrated a clear likelihood of **[*35]** success on the merits of its antitrust claim under the heightened standard applicable to mandatory preliminary injunctions. Accordingly, we affirm the judgment of the United States District Court for the Eastern District of New York, *N. Am. Soccer League, LLC v. U.S. Soccer Fed'n, Inc. ("NASL"), No. 17-CV-05495, 296 F. Supp. 3d 442, 2017 U.S. Dist. LEXIS 183202, 2017 WL 5125771 (E.D.N.Y. Nov. 4, 2017)* (Brodie, *J.*), denying NASL's motion for a preliminary injunction.

I

As the regional governing body for soccer in the United States and Canada, USSF designates leagues as Division I, II, or III according to USSF's Professional League Standards (the "Standards"). The Standards establish requirements that a league must meet to gain a divisional designation—also called a sanction—for a season of play. The more competitive **[**3]** the division, the higher the bar. For example, the 2008 Standards required that a Division I league have a minimum of ten teams distributed in at least three time zones; a Division II league have a minimum of eight teams in at least two time zones; and a Division III league have a minimum of eight teams, with no time-zone requirement.

Soccer leagues apply to USSF to receive annual designations for the upcoming season of play by submitting reports demonstrating their compliance, or plans for compliance, with the Standards. Leagues may submit requests for waivers from compliance with the Standards' requirements. The USSF Board votes on divisional designations after reviewing the recommendations of USSF's Professional League Task Force ("Task Force"). The Board is composed of fifteen directors, two of whom are chosen by the professional leagues.

The same process applies for revising the Standards; the USSF Board works in conjunction with a Professional League Standards Task Force ("Standards Task Force").[1] Unchanged from 1996 to 2008, the Standards for all divisions were revised in 2008 and 2014, and for only Division II in 2010.[2]

---

[1] Individuals with current ties to any professional league cannot be on the Task Forces and must abstain from USSF Board votes on matters relating to the professional leagues.

[2] Amendments proposed in 2015 for Division I, to which NASL objected, never were adopted.

The three most prominent men's professional soccer leagues **[**4]** have historically occupied their respective divisions in isolation. Major League Soccer, LLC ("MLS") has been the only Division I men's soccer league since MLS's start in 1995. NASL has existed since 2009 and has operated as a Division II league since 2011. The United Soccer Leagues, LLC ("USL") ordinarily has filled the Division III slot. According to NASL, it long has harbored aspirations to compete against MLS in Division I; in contrast, USL has been content as an MLS feeder league.

It often pays to be at the top, of course, and MLS has enjoyed competitive benefits as the top-tier league since its inception. Indeed, USSF, when establishing men's soccer in the United States, decided "to not sanction any other league as a [Division I] men's professional outdoor league until MLS had finished its second full season in 1997—to give it a 'runway' of sorts." Gulati Decl. ¶ 64. MLS's top-tier status has economic benefit as well. MLS and USSF have a "business relationship" through which Soccer United Market ("SUM"), a marketing company, has the rights to "bundle[d]" MLS and USSF sponsorship **[*36]** and broadcasting rights. Compl. ¶ 107; Gulati Decl. ¶ 230.[3]

Like the other leagues, NASL annually applies **[**5]** to USSF for a divisional designation. It operated as a Division II league for the 2011-2017 seasons, receiving compliance waivers for all but one season. Although NASL made a play for a Division I designation for 2016, its application was denied, and NASL operated as a Division II league (with waivers) for that season. For the 2018 season, NASL applied for a Division II designation, requesting waivers for the minimum-team and time-zone requirements. The USSF Board rejected NASL's Division II application but gave NASL additional time to file for Division III status. NASL filed suit instead.

NASL contends that USSF conspired with its membership and related entities in adopting, amending, and applying its Standards in an anticompetitive manner to preclude NASL and other leagues from competing with MLS in the Division I market. *See* *15 U.S.C. §§ 1-2*. NASL requests preliminary injunctive relief in the form of a Division II league designation and permanent relief enjoining USSF from promulgating the Standards to separate leagues into divisions.

NASL's motion for a preliminary injunction is tied to its allegations in the first count of its Complaint—that USSF violated *15 U.S.C. § 1* through a conspiracy to restrain competition. **[**6]** NASL asked the District Court for a preliminary injunction allowing it to operate as a Division II league. In a 49-page decision, the district court made detailed findings of fact and conclusions of law before concluding that NASL had not made a clear showing of entitlement to relief and denying the preliminary injunction. *NASL, No. 17-CV-05495, 2017 U.S. Dist. LEXIS 183202, 2017 WL 5125771, at *1, *21*. NASL appeals, arguing the District Court abused its discretion in applying the preliminary injunction standard and in finding that NASL had not sufficiently showed its clear likelihood of success on the merits of its *§ 1* antitrust claim.

II

HN1[] This Court reviews a district court's legal rulings *de novo* and its ultimate denial of a preliminary injunction for abuse of discretion. *McCreary Cty. v. Am. Civil Liberties Union of Ky., 545 U.S. 844, 867, 125 S. Ct. 2722, 162 L. Ed. 2d 729 (2005)*; *Almontaser v. N.Y.C. Dep't of Educ., 519 F.3d 505, 508 (2d Cir. 2008)*. "A district court abuses its discretion when it rests its decision on a clearly erroneous finding of fact or makes an error of law." *Almontaser, 519 F.3d at 508*.

A. Applicable Standard for the Preliminary Injunction

[3] Under the agreement, which was extended for an eight-year term in 2015, SUM guarantees an annual amount of marketing revenue, plus additional revenue if SUM hits monetary targets. The bundling financially benefits both USSF and MLS.

HN2[] Courts refer to preliminary injunctions as prohibitory or mandatory. Prohibitory injunctions maintain the status quo pending resolution of the case; mandatory injunctions alter it.[4] Tom Doherty Assocs., Inc. v. Saban Entm't, Inc., 60 F.3d 27, 34 **[*37]** (2d Cir. 1995) (internal citation omitted). A party seeking a preliminary injunction must show (1) **[**7]** irreparable harm; (2) either a likelihood of success on the merits or both serious questions on the merits and a balance of hardships decidedly favoring the moving party; and (3) that a preliminary injunction is in the public interest. New York ex rel. Schneiderman v. Actavis PLC, 787 F.3d 638, 650 (2d Cir. 2015). Because mandatory injunctions disrupt the status quo, a party seeking one must meet a heightened legal standard by showing "a clear or substantial likelihood of success on the merits." N.Y. Civil Liberties Union v. N.Y.C. Transit Auth., 684 F.3d 286, 294 (2d Cir. 2012) (internal quotation marks omitted). The District Court concluded that NASL was seeking a mandatory injunction and imposed the heightened standard. NASL, No. 17-CV-05495, 2017 U.S. Dist. LEXIS 183202, 2017 WL 5125771, at *7. NASL argues that using the heightened standard was error.

Because the proposed injunction's effect on the status quo drives the standard, we must ascertain the status quo—that is, "the last actual, peaceable uncontested status which preceded the pending controversy." Mastrio v. Sebelius, 768 F.3d 116, 120 (2d Cir. 2014) (per curiam) (quoting LaRouche v. Kezer, 20 F.3d 68, 74 n.7 (2d Cir. 1994)).[5] Before this litigation, USSF would regularly evaluate NASL's applications and determine NASL's divisional designation. The relationship of annual application, assessment, and sanction determination was the last uncontested status between the parties preceding the present controversy. This is how the parties **[**8]** operated, year after year.

NASL seeks to alter this near-decade-long relationship of annual sanctioning between the parties. Although NASL has never received a designation absent the annual process, it now requests a Division II designation for the duration of this litigation. NASL, looking to upend the federation-league sanctioning framework, seeks a mandatory injunction.

NASL argues that applying a heightened standard here would require applying that standard any time a party seeks an injunction to maintain "critical benefits" they have long received. Appellant's Br. 3. This case is different than the benefits-termination cases, however. In those cases, the status quo is one in which the plaintiff continues receiving previously granted benefits. *See* Holt v. Cont'l Grp., 708 F.2d 87, 90 (2d Cir. 1983) (reinstating benefits restores the status quo ante); *see also* Garcia v. Yonkers Sch. Dist., 561 F.3d 97, 99-101, 107 (2d Cir. 2009) (permitting suspended students to continue attending school). Here, USSF decides anew each year which divisional designation applies to NASL, if any. NASL's Division II sanctions never last beyond one season of play. Unlike in the benefits-termination cases, the status quo here involves a periodic sanction of limited life.

"The purpose of a preliminary **[**9]** injunction is . . . to preserve the relative positions of the parties." Univ. of Tex. v. **[*38]** Camenisch, 451 U.S. 390, 395, 101 S. Ct. 1830, 68 L. Ed. 2d 175 (1981). Conflating status with status quo, the parties center their arguments on NASL's status as a Division II league. However, the status quo is not that NASL regularly received a Division II designation, nor is it NASL's lack of a Division II designation for 2018. The status quo is the parties' pre-controversy position vis-à-vis the other.[6] Directing USSF to grant NASL a divisional

---

[4] We focus on the status quo rather than the "mandatory" and "prohibitory" terminology because "in borderline cases injunctive provisions containing essentially the same command can be phrased either in mandatory or prohibitory terms." Int'l Union, United Mine Workers of Am. v. Bagwell, 512 U.S. 821, 835, 114 S. Ct. 2552, 129 L. Ed. 2d 642 (1994) ("'Do not strike,'" would appear to be prohibitory . . . [but] 'Continue working,' would be mandatory."); Abdul Wali v. Coughlin, 754 F.2d 1015, 1025 (2d Cir. 1985), *overruled on other grounds by* O'Lone v. Estate of Shabaze, 482 U.S. 342, 107 S. Ct. 2400, 96 L. Ed. 2d 282 (1987) ("In many instances, this distinction is more semantic[] than substantive.").

[5] The "status quo" in preliminary-injunction parlance is really a "status quo ante." *See* Holt v. Cont'l Grp., Inc., 708 F.2d 87, 90 (2d Cir. 1983) (referring to reinstatement of benefits as "restoration of the *status quo ante*"); *accord* O Centro Espirita Beneficente Uniao do Vegetal v. Ashcroft, 389 F.3d 973, 1013 (10th Cir. 2004) (en banc) (per curiam) ("requir[ing] a party who has recently disturbed the status quo to reverse its actions . . . restores, rather than disturbs, the status quo ante, and is thus not an exception" to the ordinary standard for preliminary injunctions). This special "ante" formulation of the status quo in the realm of equities shuts out defendants seeking shelter under a current "status quo" precipitated by their wrongdoing.

designation for 2018 and beyond would alter that relationship.[7] NASL's request for a preliminary injunction was correctly analyzed by the District Court under the heightened standard for a mandatory injunction.[8]

B. Clear Likelihood of Success on the Merits

NASL's claim is anchored in *§ 1* of the Sherman Act.[9] ***HN3***[] *Section 1* prohibits "[e]very contract, combination . . . or conspiracy[] in restraint of trade or commerce." *15 U.S.C. § 1*; *Am. Needle, Inc. v. Nat'l Football League, 560 U.S. 183, 189, 130 S. Ct. 2201, 176 L. Ed. 2d 947 (2010)*. Thus, to establish a clear likelihood of success under its *§ 1* claim, NASL must show "there is a contract, combination . . . or conspiracy amongst separate economic actors pursuing separate economic interests such that the agreement deprives the marketplace . . . of actual or potential competition." **[**10]** *Am. Needle, 560 U.S. at 195* (internal citations and quotation marks omitted).

NASL alleges that "USSF and co-conspirators MLS, USL and SUM have entered into a continuing agreement, combination, or conspiracy in restraint of trade with the purpose, intent and effect of restraining **[*39]** horizontal competition among top-tier [and second-tier] men's professional soccer leagues . . . ." Compl. ¶ 200. NASL asserts that the arrangement "enables MLS to be the only men's top-tier professional soccer league . . . by promulgating, revising, manipulating, and selectively granting and denying waivers from anticompetitive Professional League Standards so that MLS, and only MLS, will satisfy the USSF's requirements . . . to qualify for men's top-tier Division I sanctioning." Compl. ¶ 201.

1. Contract, Combination, or Conspiracy[10]

---

[6] Some of our sister circuits have explicitly incorporated this principle into their formulations of the status quo. *See, e.g., SCFC ILC, Inc. v. Visa USA, Inc., 936 F.2d 1096, 1100 (10th Cir. 1991)*, *overruled on other grounds by O Centro Espirita, 389 F.3d at 975* ("The status quo . . . is defined by the reality of the existing status and relationships between the parties.") (emphasis omitted); *Stemple v. Bd. of Ed. of Prince George's Cty., 623 F.2d 893, 898 (4th Cir. 1980)* ("[C]ourts . . . will frame any equitable relief to preserve the last uncontested status between the parties."); *Wash. Capitols Basketball Club, Inc. v. Barry, 419 F.2d 472, 475 (9th Cir. 1969)* ("maintain[ing] the status quo between the litigants") (citing *Hamilton Watch Co. v. Benrus Watch Co., 206 F.2d 738 (2d Cir. 1953))*.

[7] The case might be different if USSF designated NASL a Division II league and revoked that designation mid-season. There, the status quo between the parties arguably would be NASL's Division II designation for that season, in which case we would evaluate NASL's challenge to USSF's revocation under the ordinary standard for a preliminary injunction.

[8] NASL contends that, as an alternative to a showing of a clear or substantial likelihood of success, it can satisfy the higher standard by showing that failure to issue the injunction would result in extreme or very serious damage. It relies on our earlier statement "that a mandatory injunction should issue 'only upon a clear showing that the moving party is entitled to the relief requested, or where extreme or very serious damage will result from a denial of preliminary relief.'" *Tom Doherty, 60 F.3d at 34* (quoting *Abdul Wali, 754 F.2d at 1025*). Irreparable harm, however, is "indistinguishable" from extreme damage. *Jacobson & Co., Inc. v. Armstrong Cork Co., 548 F.2d 438, 441 n.3 (2d Cir. 1977)*. Therefore, as we have previously noted, the extreme-damage language in our jurisprudence remains "merely a reaffirmation of the traditional reluctance to issue mandatory injunctions . . . ." *Id.*

[9] The District Court found that NASL had established irreparable harm and that the injunction would not harm the public interest. *NASL, No. 17-CV-05495, 2017 U.S. Dist. LEXIS 183202, 2017 WL 5125771, at *8-9, *21*. USSF does not focus on a failure by NASL in either area. Thus, we start and finish with the lower court's determination that NASL had not demonstrated its clear likelihood of success on the merits.

[10] Because "[t]he question whether an arrangement is a contract, combination, or conspiracy is different from and antecedent to the question whether it unreasonably restrains trade," *Am. Needle, 560 U.S. at 186*, we first examine, pursuant to NASL's allegations, whether USSF, MLS, USL, and SUM conspired within the meaning of *§ 1* of the Sherman Act. Although we ultimately assume the existence of a conspiracy, we address this antecedent question to clarify the framework the lower court must use on remand.

HN4[] For an arrangement to be a conspiracy under *§ 1*, it "must embody concerted action." *Am. Needle, 560 U.S. at 191*. Concerted action exists where there is an agreement between "separate economic actors pursuing separate economic interests." *Id. at 195* (internal quotation marks omitted). The fact that the co-conspirators are capable, due to their separateness, of acting in concert is not sufficient. Proof of a conspiracy is required. *Capital Imaging Assocs., P.C. v. Mohawk Valley Med. Assocs., Inc., 996 F.2d 537, 545 (2d Cir. 1993)*.

HN5[] A plaintiff must **[**11]** offer "direct or circumstantial evidence that reasonably tends to prove . . . a conscious commitment to a common scheme designed to achieve an unlawful objective." *Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 768, 104 S. Ct. 1464, 79 L. Ed. 2d 775 (1984)*. Rarely do co-conspirators plainly state their purpose. As a result, courts often must evaluate circumstantial evidence of a conspiracy by weighing "plus factors, which, when viewed in conjunction with the parallel acts, can serve to allow a fact-finder to infer a conspiracy." *United States v. Apple, Inc., 791 F.3d 290, 315 (2d Cir. 2015)* (citation and internal quotation marks omitted). In *Monsanto*, the Supreme Court noted that courts should look for evidence that "tends to exclude the possibility that the [defendant was] acting independently." *Monsanto, 465 U.S. at 764*. In *Matsushita*, the Supreme Court elaborated on what this meant: "[C]onduct as consistent with permissible competition as with illegal conspiracy does not, standing alone, support an inference of antitrust conspiracy." *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 588, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*.

The District Court concluded that the USSF Board's promulgation of the Standards was not direct evidence of concerted action among USSF, the leagues, and SUM. According to the court, NASL needed to show there was "an agreement to agree to vote a particular way" before the Standards could satisfy the concerted-action requirement. **[**12]** *NASL, No. 17-CV-05495, 2017 U.S. Dist. LEXIS 183202, 2017 WL 5125771, at *10* (emphasis omitted). The court then evaluated circumstantial evidence of a conspiracy. Regarding the USSF Board's votes to adopt and amend the Standards as parallel conduct, the court examined whether there were plus factors demonstrating an antitrust conspiracy. *2017 U.S. Dist. LEXIS 183202, [WL] at *11*. Although acknowledging that the SUM agreement **[*40]** poses "a conflict of interest," and describing as "troubling" USSF's admitted past intent to give MLS a head start in the industry, the District Court concluded that there was insufficient evidence of concerted action because the evidence did not tend to exclude the possibility of independent action. *2017 U.S. Dist. LEXIS 183202, [WL] at *11, *13, *15*.

NASL argues that the District Court erred in applying the *Monsanto* standard for inferring a conspiracy because the Standards are direct evidence of a conspiracy. We disagree.

The *Monsanto-Matsushita* framework works here. *See Monsanto, 465 U.S. at 764, 768*; *Matsushita, 475 U.S. at 588*. *HN6*[] Courts use this framework for assessing conspiracies, including those conspiracies provable by direct evidence. *See, e.g., Monsanto, 465 U.S. at 765* (finding substantial direct evidence of vertical price-fixing agreement). A plaintiff who can proffer direct evidence of a conspiracy should have no qualms with the *Monsanto-Matsushita* framework because direct evidence by definition **[**13]** shows the requisite concerted action. *See Cosmetic Gallery, Inc. v. Schoeneman Corp., 495 F.3d 46, 52 (3d Cir. 2015)* ("'Direct' evidence must evince with clarity a concert of illegal action.").

Moreover, *HN7*[] organizational decisions do not inherently constitute *§ 1* concerted action. NASL's argument misinterprets the meaning of concerted action in ***antitrust law***. "[Not] every action by a trade association is . . . concerted action by the association's members." *AD/SAT, Div. of Skylight, Inc. v. Associated Press, 181 F.3d 216, 234 (2d Cir. 1999)* (per curiam). Indeed, even though a "trade association by its nature involves collective action by competitors[,] . . . a trade association is not by its nature a 'walking conspiracy.'" *Consol. Metal Prods., Inc. v. Am. Petroleum Inst., 846 F.2d 284, 293-94 (5th Cir. 1988)*. Rather, it is when "a *§ 1* plaintiff establishes the existence of *an illegal* contract or combination" that the plaintiff can "proceed to demonstrate that the agreement constituted an unreasonable restraint of trade.'" *Capital Imaging, 996 F.2d at 542* (emphasis added). Evidence should "tend[] to show that association members, in their individual capacities, consciously committed themselves to a common scheme *designed to achieve an unlawful objective*." *AD/SAT, 181 F.3d at 234* (emphasis added).

In fairness to NASL, organizational decisions sometimes are § 1 concerted action. For example, when there is direct evidence of an alleged conspiracy via an association's express regulation of its **[**14]** members' market. In *Associated Press*, the government challenged as illegal a cooperative news association's by-laws that restricted membership and prohibited members from distributing news to nonmembers. Associated Press v. United States, 326 U.S. 1, 5, 65 S. Ct. 1416, 89 L. Ed. 2013 (1945). In ruling for the government, the Supreme Court endorsed the district court's conclusion that "[t]he bylaws of AP are in effect agreements between the members . . . . [They are] contracts in restraint of commerce." Id. at 11 n.6. Similarly, in *Indiana Federation of Dentists*, the Supreme Court found that a federation's policy constituted a collective refusal to deal with insurers and was an illegal agreement. FTC v. Ind. Fed'n of Dentists, 476 U.S. 447, 457-58, 106 S. Ct. 2009, 90 L. Ed. 2d 445 (2009). These cases corroborate the obvious—that **HN8**[] direct evidence of an illegal "contract, combination, or conspiracy" satisfies § 1's concerted-action requirement. *See* Allied Tube & Conduit Corp. v. Indian **[*41]** Head, Inc., 486 U.S. 492, 500, 108 S. Ct. 1931, 100 L. Ed. 2d 497 (1988) (finding agreement, in violation of § 1, to subvert standard-setting process by packing vote); *see also* United States v. Topco Assocs., Inc., 405 U.S. 596, 601-02, 92 S. Ct. 1126, 31 L. Ed. 2d 515 (1972) (by-laws allocating market territory among chain members found anticompetitive); Fashion Originators' Guild, Inc. v. FTC, 312 U.S. 457, 462-64, 61 S. Ct. 703, 85 L. Ed. 949, 32 F.T.C. 1856 (1941) (Guild's rules and policies found anticompetitive where purpose was to prevent sales and create a monopoly).

If NASL were challenging the Standards themselves—in totality—as violative of the antitrust laws, then the USSF Board's promulgation of them would **[**15]** constitute direct evidence of § 1 concerted action in that undertaking.[11] As for the clearly alleged overarching conspiracy to restrain competition in markets for top-and second-tier men's professional soccer leagues in North America, the promulgation of the Standards is circumstantial evidence of that conspiracy. The District Court properly evaluated the Standards along with other circumstantial evidence of NASL's conspiracy allegations, concluding that NASL had not sufficiently shown the presence of concerted action. *See* NASL, 17-CV-05495, 2017 U.S. Dist. LEXIS 183202, 2017 WL 5125771, at *11-15. But even assuming NASL's allegations show a conspiracy, NASL has failed to show that the agreement was an unreasonable restraint on competition under § 1.

2. Unreasonable Restraint

HN9[] Only unreasonable restraints on competition violate § 1 of the Sherman Act. Courts use one of two tests here. "[A] restraint may be adjudged unreasonable either because it fits within a class of restraints that has been held to be '*per se*' unreasonable, or because it violates what has come to be known as the 'Rule of Reason.'" Ind. Fed'n of Dentists, 476 U.S. at 457-58. Regulation of league sports is a textbook example of when the rule of reason applies. *See* Nat'l Collegiate Athletic Ass'n v. Bd. of Regents of Univ. of Okla., 468 U.S. 85, 101, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (1984).

---

[11] How NASL is challenging the Standards is unclear. *See* A-135 (the District Court, with NASL's later agreement, summarized NASL's position as: "You're saying standards are okay, Division I, Division II is okay; the manner in which [USSF] set[s] the requirements for each is wrong"); *see also* A-137 (NASL stating "I'm challenging the requirements here . . . that a standard setting body should set [the minimum-team requirement] . . . [challenging] [t]hat particular rule"). There is room for disagreement as to whether NASL's reference to the Standards, as "effectuat[ing] the USSF's anticompetitive conspiracy," wages war on the Standards or just fires shots at their role in the larger alleged conspiracy. Compl. ¶ 122. *See* Summit Health, Ltd. v. Pinhas, 500 U.S. 322, 339-40, 111 S. Ct. 1842, 114 L. Ed. 2d 366 (1991) (Scalia, *J.*, dissenting) (describing an alleged agreement to boycott as "not the totality of the conspiracy, but merely the means used to enforce it"). *Compare* Wilk v. Am. Med. Ass'n, 895 F.2d 352, 374 n.9 (7th Cir. 1990) (saying plaintiffs did not directly challenge standards alleged to "*perpetuate[]* the boycott"), *with* Robertson v. Sea Pines Real Estate Cos., Inc., 679 F.3d 278, 283, 288, 289 (4th Cir. 2012) (finding direct evidence of conspiracy where defendants used joint venture as an "instrumentality" and "conduit," saying that "board members conspired in the form of [their] rules, the very passage of which establishes that the defendants convened and came to an agreement").

NASL argues for an **[**16]** abbreviated, "quick look" version of the rule of reason,[12] which applies when "no elaborate industry analysis is required to demonstrate the anticompetitive character of [the challenged] agreement." *Ind. Fed'n of Dentists, 476* ***[*42]*** *U.S. at 459* (internal quotation mark omitted). Here, however, far from being obviously anticompetitive, the Standards could be found to have a net procompetitive effect, or no competitive effect at all. *See* *Cal. Dental Ass'n v. FTC, 526 U.S. 756, 771, 119 S. Ct. 1604, 143 L. Ed. 2d 935 (1999)*. Indeed, the Standards are seemingly designed to avoid a flaw in the relevant market: implosion of leagues due to minimal consumer demand and teams' financial instability. Because the alleged restraints might avoid a flaw in the market, the full rule-of-reason analysis applies. *See id.* (using three-step rule of reason when reviewing restrictions designed to address deceptive advertising in market prone to information gaps).

The District Court properly applied ***HN10***[] the three-step rule-of-reason framework. First, a plaintiff bears the initial burden of demonstrating that a defendant's challenged behavior can have an adverse effect on competition in the relevant market. *United States v. Am. Express Co., 838 F.3d 179, 194 (2d Cir. 2016)*, *cert. granted, Ohio v. Am. Express Co., 138 S. Ct. 355, 199 L. Ed. 2d 261 (Oct. 16, 2017)* (mem.). Second, if the plaintiff satisfies this initial burden, the burden shifts to the defendant, who must demonstrate **[**17]** the procompetitive effects of the challenged restraint. *Id. at 195*. Third, if the defendant provides that proof, the burden shifts back to the plaintiff to show that these "legitimate competitive benefits . . . could have been achieved through less restrictive means." *Id.* (internal quotation marks omitted). Ultimately, "[t]he true test of legality is whether the restraint imposed is such as merely regulates and perhaps thereby promotes competition or whether it is such as may suppress or even destroy competition." *Nat'l Soc'y of Prof'l Eng'rs v. United States, 435 U.S. 679, 691, 98 S. Ct. 1355, 55 L. Ed. 2d 637 (1978)* (quoting *Chi. Bd. of Trade v. United States, 246 U.S. 231, 238, 38 S. Ct. 242, 62 L. Ed. 683 (1918))*.

HN11[] Under the first step of the rule of reason, a plaintiff must demonstrate that the alleged restraint has an adverse effect on competition. *Am. Express, 838 F.3d at 194*. The plaintiff can do this directly, by showing an "actual adverse effect on competition as a whole in the relevant market." *Id.* (emphasis omitted) (internal quotation mark omitted) (giving examples of higher prices or reduced output).[13] Or the plaintiff can make her case indirectly, "by showing that the defendant has sufficient market power to cause an adverse effect on competition." *Id.* (internal quotation marks omitted). Plaintiffs seeking to show adverse effect indirectly must demonstrate both the defendant's market power and "other **[**18]** grounds" for believing the challenged restraint harms competition. *MacDermid Printing Sols. LLC v. Cortron Corp., 833 F.3d 172, 183-84 (2d Cir. 2016)*. These other grounds might include price increases, reduced output or market quality, significantly heightened barriers to entry, or reduced consumer choice. *Id. at 183 & n.42, 184, 186 n.56*.

The District Court did not err in finding that NASL indirectly established an adverse effect on competition in "the market for (1) top-tier and (2) second-tier men's professional soccer leagues located in the United States and Canada." *NASL, 17-CV-05495, 2017 U.S. Dist. LEXIS 183202, 2017* ***[*43]*** *WL 5125771, at *17 & n.40*.[14] USSF's market power is evident in its "power to . . . exclude competition" through the Standards. *United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 391, 76 S. Ct. 994, 100 L. Ed. 1264 (1956)*. And the ratcheting up of the Standards over the last two decades imposes increasingly "significant barriers to entry" in the relevant soccer market. *CDC Techs., Inc. v. IDEXX Labs., Inc., 186 F.3d 74, 80 (2d Cir. 1999)*; *see also* *MacDermid, 833 F.3d at 183-84, 186 n.56*.

The burden then shifts to USSF to offer evidence of the Standards' procompetitive effects. *See* *Am. Express, 838 F.3d at 195*. ***HN12***[] Although fraught with anticompetitive potential, standards promulgated by standard-setting

---

[12] The parties did not, and do not, dispute the rule of reason's applicability.

[13] The District Court found that NASL had not directly shown an actual adverse effect on competition in the market. *NASL, 17-CV-05495, 2017 U.S. Dist. LEXIS 183202, 2017 WL 5125771, at *18 & n.41* (no customer confusion and no reduced output beyond NASL's own exclusion from Division II).

[14] The District Court defined the market as proposed by NASL, and the parties do not contest this definition. In light of that consensus, we regard the relevant market to be the same.

organizations can be flush with "significant procompetitive advantages." *See* Allied Tube, 486 U.S. at 501. "The history of the restraint, the evil believed to exist, the reason for adopting the particular remedy, the purpose or end sought to be attained, are all **[**19]** relevant facts." Capital Imaging, 996 F.2d at 543 (quoting Chi. Bd. of Trade, 246 U.S. at 238).

The District Court also did not err in finding that USSF offered sufficient evidence of the Standards' procompetitive virtues. *See* NASL 17-CV-05495, 2017 U.S. Dist. LEXIS 183202, 2017 WL 5125771, at *18-19 (considering minimum-team count, time zones, market size, stadium capacity, and financial viability). The court found that the minimum-team requirement increases output through sustained fan interest and provides stability because larger leagues are less likely to collapse. 2017 U.S. Dist. LEXIS 183202, [WL] at *19. The court further found that the time-zone and market-size requirements generate fan and media interest, and, along with the stadium-capacity requirement, promote league quality. *Id.* The court lastly determined that the financial-viability requirements keep fans interested, stabilize the leagues financially, and prevent free riding. *Id.* These findings by the District Court are not clearly erroneous. *See* Almontaser, 519 F.3d at 508.

The Standards further benefit the market by coordinating necessary competition. As the Supreme Court recognized when addressing the National Collegiate Athletic Association's ("NCAA") role in regulating intercollegiate athletics, "this case involves an industry in which horizontal restraints on competition are essential if the product **[**20]** is to be available at all." Bd. of Regents, 468 U.S. at 101; *see also* id. at 102 ("[The NCAA's] actions widen consumer choice—not only the choices available to sports fans but also those available to athletes—and hence can be viewed as procompetitive.").

NASL argues that the District Court erred in finding some of the Standards' requirements justified in part by their procompetitive effects of eliminating free riding and stabilizing the market. However,***HN13***[] it is permissible for courts to consider free riding and stability as two potential procompetitive justifications in the standard-setting context.

Eliminating free riders can be a procompetitive advantage of alleged restraints on competition like vertical price agreements. *See* Leegin Creative Leather Prods., Inc. v. PSKS, Inc., 551 U.S. 877, 889-92, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007) (discussing free riding and other procompetitive justifications). The same holds true in the standard-setting context. Here, the District **[*44]** Court did not err in finding that the Standards reduce leagues' incentive to free ride on USSF's efforts and expenditures without making similar investments to generate fan interest in the sport. NASL, 2017 U.S. Dist. LEXIS 183202, 2017 WL 5125771, at *19.

HN14[] Courts can also consider whether evidence of a defendant's stabilizing behavior constitutes a procompetitive benefit of standard-setting. NASL argues that anticompetitive **[**21]** behavior cannot be justified as preventing "[r]uinous competition, financial disaster, [or the] evils of price cutting." United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 221, 60 S. Ct. 811, 84 L. Ed. 1129 (1940). However, that logic is tied to cases where courts were confronted with per se illegal practices. Per se illegal practices, like horizontal price-fixing, are those that "because of their pernicious effect on competition and lack of any redeeming virtue are conclusively presumed to be unreasonable and therefore illegal without elaborate inquiry as to the precise harm they have caused or the business excuse for their use." N. Pac. Ry. Co. v. United States, 356 U.S. 1, 5, 78 S. Ct. 514, 2 L. Ed. 2d 545 (1958). Though courts might reject the stability rationale where conduct is so anticompetitive as to be beyond redemption, *see* Socony-Vacuum, 310 U.S. at 228, that and other procompetitive justifications still can be relevant elsewhere—as in the sports standards context.

HN15[] A defendant cannot, of course, justify anticompetitive arrangements by saying an industry's "special characteristics" warrant them. Nat'l Soc'y of Prof'l Eng'rs, 435 U.S. at 689. But in the context of a soccer industry historically prone to collapse, the free-rider and stability justifications do not rationalize anticompetitive effects—they evince procompetitive ones. Specifically, as USSF urges, the Standards avoid free riders on, and lock in consumer interest **[**22]** for, the relevant competitive market. *See* Bd. of Regents, 468 U.S. at 117 ("[M]ost of the regulatory controls of the NCAA are justifiable means of fostering competition among amateur athletic teams and *therefore procompetitive because they enhance public interest in intercollegiate athletics*.") (emphasis added).

NASL separately argues that the District Court should have concluded NASL was clearly likely to succeed on the merits once the court found problems with the SUM agreement and USSF's early use of the Standards to favor MLS. *NASL, No. 17-CV-05495, 2017 U.S. Dist. LEXIS 183202, 2017 WL 5125771, at *11, *13*. As the District Court noted, however, USSF's voting procedures and early history are a far cry from the collusive activity that would warrant per se antitrust analysis. *See* *Allied Tube, 486 U.S. at 501* (excluding product by packing the annual meeting vote); *Gelboim v. Bank of Am. Corp., 823 F.3d 759, 775 (2d Cir. 2016)* (acting collusively by circumventing LIBOR-setting rules). NASL has not shown a meaningful financial conflict of interest stemming from the SUM agreement; Board members with ties to professional leagues do not participate in the Task Forces and must abstain from votes regarding the Standards. As for USSF sheltering MLS from competition in the mid-1990s, USSF's alleged co-conspirator leagues did not yet exist. Any anticompetitive promulgation or misuse of the **[**23]** Standards would be attributable to USSF alone. And ***HN16***[] unilateral action does not violate *§ 1* of the Sherman Act. *Am. Needle, 560 U.S. at 190-91*; *see also* *United States* ***[*45]*** *Football League v. Nat'l Football League, 842 F.2d 1335, 1372 (2d Cir. 1988)* (saying prior judgments against defendant, "admitted as evidence of a longstanding conspiracy," were "at best marginally probative of an ongoing intent to exclude competitors").

Because USSF has demonstrated procompetitive effects of the Standards, the burden shifts to NASL to prove that "any legitimate competitive benefits offered by [USSF] could have been achieved through less restrictive means." *Am. Express, 838 F.3d at 195* (internal quotation mark omitted). Less restrictive alternatives are "those that would be less prejudicial to competition as a whole." *Capital Imaging, 996 F.2d at 543*. The District Court did not err in concluding that NASL failed to demonstrate viable less restrictive alternatives to the current Standards.

NASL points to the earlier renditions of the Standards as less restrictive alternatives to the current version of the Standards.[15] NASL notes, for example, that the Standards' eight-team requirement for Division II is less restrictive than its current twelve-team requirement. Having fewer requirements generally is less restrictive than having more. But NASL fails to show how reverting to earlier versions **[**24]** of the Standards would achieve the same legitimate procompetitive objectives as the Standards' current form. The Standards' evolution could show simply that its earlier renditions were no longer viable. Growing industries have developing standards; antitrust plaintiffs cannot just point to earlier standards as less restrictive alternatives without additionally showing the equivalent viability of the alternatives proffered.

NASL also urges that eliminating the Standards—using league rules instead of federation rules—is a less restrictive alternative. Again, we fail to see that leagues-based rules would accomplish the same ends as those issued by a federation. As the Supreme Court said of the NCAA's regulating function in intercollegiate sports, "[w]hat the NCAA and its member institutions market in this case is competition itself—contests between competing institutions. Of course, this would be completely ineffective if there were no rules on which the competitors agreed to create and define the competition to be marketed." *Bd. of Regents, 468 U.S. at 102*. The same holds true here.

III

NASL has a case left to make. But we cannot say at this point that NASL has shown a clear likelihood of its success on the merits under **[**25]** *15 U.S.C. § 1*. Accordingly, the order of the District Court denying NASL's motion for a preliminary injunction is **AFFIRMED**, and the matter is **REMANDED** for further adjudication of this case on the merits.

End of Document

---

[15] By making this argument, NASL apparently concedes that the earlier Standards had procompetitive justifications.

Opinion

MEMORANDUM OPINION

Conti, Chief District Judge.

This case involves a franchise dispute. Defendants owned seven General Nutrition Corporation ("GNC") franchises in New York, New Jersey and Maryland. GNC terminated the franchise agreements on August 17, 2017, alleging a pattern of wholesaling behavior and false purchases or returns of products close to their expiration **[*2]** date.

Defendants returned the keys to three stores, but refused as to the other four stores, which they continue to operate. GNC initiated this lawsuit, alleging breach of the franchise agreement, fraud, trademark infringement, tarnishment of GNC's proprietary marks under the Lanham Act, and breach of guarantee.

Defendants filed an answer and five-count counterclaim against GNC alleging: (1) breach of contract; (2) breach of the Sherman Antitrust Act; (3) violation of *Maryland Commercial Law §11-204*, a parallel Maryland ***antitrust law***; (4) declaratory judgment; and (5) injunctive relief. (ECF No. 70). Defendants' antitrust theory is that GNC is using its allegations of "wholesaling" as a pretext to prevent franchisees from selling product at discounts GNC considers too steep (i.e., GNC is attempting to dictate minimum prices).

GNC filed a partial motion to dismiss the antitrust claims in counts 2 and 3 of the counterclaim. GNC argues: (1) Defendants lack standing to allege antitrust harm; and (2) Defendants failed to plead facts of a conspiracy to establish minimum pricing.

The general principles of law governing antitrust claims are well known.

> *Section 1* of the Sherman Act provides that "[e]very contract, combination in the **[*3]** form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is hereby declared to be illegal." *15 U.S.C. § 1*. An antitrust plaintiff must plead the following two elements: (1) "that the defendant was a party to a contract, combination ... or conspiracy" and (2) "that the conspiracy to which the defendant was a party imposed an unreasonable restraint on trade." *Ins. Brokerage, 618 F.3d at 315* (citation and internal quotation marks omitted).
>
> The first element—a contract, combination, or conspiracy—requires "'some form of concerted action,'" which we define as "'unity of purpose or a common design and understanding or a meeting of minds' or 'a conscious commitment to a common scheme.'" *Id.* (citing *In re Baby Food Antitrust Litig., 166 F.3d 112, 117 (3d Cir. 1999)*; *In re Flat Glass Antitrust Litig., 385 F.3d 350, 357 (3d Cir. 2004))*. In other words, *Section 1* claims always require "the existence of an agreement." *Id.* (citations and internal quotation marks omitted); *see also Howard Hess, 602 F.3d at 254* ("*Section 1* claims are limited to combinations, contracts, and conspiracies and thus always require the existence of an agreement."); *West Penn Allegheny Health Sys. v. UPMC, 627 F.3d 85, 99 (3d Cir. 2010)* ("To prevail on a *section 1* claim ... a plaintiff must establish the existence of an agreement."). Unilateral action, regardless of the motivation, is not a violation of *Section 1*. *Ins. Brokerage, 618 F.3d at 321*.

Burtch v. Milberg Factors, Inc., 662 F.3d 212, 221 (3d Cir. 2011).

To establish standing to assert an antitrust **[*4]** claim, a plaintiff "must show an injury to them resulting from the illegal conduct." *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 586, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*. A franchisee has standing to allege an antitrust claim even if the franchisee signed the contract. As explained in *Perma Life Mufflers, Inc. v. International Parts Corporation*:

> [W]e held in *Kiefer-Stewart Co. v. Joseph E. Seagram & Sons, 340 U.S. 211, 71 S.Ct. 259, 95 L.Ed. 219 (1951)*, that a plaintiff in an antitrust suit could not be barred from recovery by proof that he had engaged in an unrelated conspiracy to commit some other antitrust violation. Similarly, in *Simpson v. Union Oil Co., 377 U.S. 13, 84 S.Ct. 1051, 12 L.Ed.2d 98 (1964)*, we held that a dealer whose consignment agreement was canceled for failure to adhere to a fixed resale price could bring suit under the antitrust laws even though by signing the agreement he had to that extent become a participant in the illegal, competition-destroying scheme. Both *Simpson* and *Kiefer-Stewart* were premised on a recognition that the purposes of the antitrust laws are best served by insuring that the private action will be an ever-present threat to deter anyone contemplating business behavior in violation of the antitrust laws.

392 U.S. 134, 138-39, 88 S. Ct. 1981, 20 L. Ed. 2d 982 (1968), *overruled on other grounds by Copperweld Corp. v. Indep. Tube Corp., 467 U.S. 752, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)*.

The "contract, combination or conspiracy" prong may be satisfied by the existence of a franchisor-franchisee contract. In *Continental TV, Inc. v. GTE Sylvania Inc., 433 U.S. 36, 40, 97 S. Ct. 2549, 53 L. Ed. 2d 568 (1977)*, the Supreme Court recognized an **[*5]** antitrust claim brought by a franchisee alleging that the franchisor was enforcing franchise agreements that prohibited the sale of Sylvania products other than from specified locations. The franchisor, Sylvania, initially contended that its policy was unilaterally enforced, but then conceded that its location restriction involved understandings or agreements with the retailers. *Id.* at n.8.

In the counterclaim, defendants allege that multiple GNC franchise agreements are at issue. Defendants allege that GNC is improperly attempting to control discounted pricing by multiple franchisees because selling products at steep discounts reduces the amount of royalties and advertising fees GNC receives and drives customers to purchase products from franchise stores rather than company stores or the GNC online website. Counterclaim ¶¶ 38-39.

The alleged vertical price fixing scheme is analyzed under the fact-intensive "rule of reason" to determine if there is an unreasonable restraint on trade. *Burtch, 662 F.3d at 222*. At this stage of the case there are sufficient facts pleaded, when viewed in the light most favorable to Defendants, to state a federal antitrust claim under this theory. The same analysis governs the **[*6]** parallel Maryland state law antitrust claim. In summary, GNC's partial motion to dismiss counts 2 and 3 (ECF No. 78) will be DENIED.

An appropriate order follows.

February 26, 2018.

/s/ Joy Flowers Conti

Joy Flowers Conti

Chief United States District Judge

ORDER OF COURT

AND NOW, this 26th day of February, 2018, IT IS HEREBY ORDERED that for the reasons set forth in the accompanying memorandum opinion, GNC's partial motion to dismiss counts 2 and 3 of the counterclaim (ECF No. 78) is DENIED.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN1[] **Class Actions, Certification of Classes**

The class action is an exception to the usual rule that litigation is conducted by and on behalf of the individual named parties only. To come within the exception, a party seeking to maintain a class action must affirmatively demonstrate his compliance with *Fed. R. Civ. P. 23*. When presented with a motion for class certification, a court is to assess all of the relevant evidence admitted at the class certification stage and determine whether each *Rule 23* requirement has been met, just as the court would resolve a dispute about any other threshold prerequisite for continuing a lawsuit. This assessment necessarily entails the resolution of factual disputes relevant to each *Rule 23* requirement, an obligation that is not lessened by overlap between a *Rule 23* requirement and a merits issue, even a merits issue that is identical with a *Rule 23* requirement. The preponderance of the evidence standard applies to evidence proffered to establish Rule 23's requirements.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Constitutional Law > ... > Case or Controversy > Standing > Elements

Constitutional Law > ... > Case or Controversy > Standing > Particular Parties

HN2[] Class Actions, Certification of Classes

Before considering the *Fed. R. Civ. P. 23* requirements, a court first considers threshold standing issues. Standing in the class action context refers to two related but analytically distinct doctrines separated by a murky line: traditional U.S. Const. art. III standing on the one hand and so-called class standing on the other. Article III standing is assessed using a three-part formulation set forth by the Supreme Court: a plaintiff must have (1) suffered an injury in fact, (2) that is fairly traceable to the challenged conduct of the defendant, and (3) that is likely to be redressed by a favorable judicial decision. While an injury-in-fact must be concrete and particularized and actual or imminent, an injury-in-fact need not be capable of sustaining a valid cause of action. Rather, the fact that an injury may be outweighed by other benefits, while often sufficient to defeat a claim for damages, does not negate Article III standing. In the class action context, the Second Circuit has made clear that no class may be certified that contains members lacking Article III standing and that any class must therefore be defined in such a way that anyone within it would have Article III standing.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Constitutional Law > ... > Case or Controversy > Standing > Particular Parties

Civil Procedure > Special Proceedings > Class Actions > Class Members

HN3[] Class Actions, Certification of Classes

When presented with a putative class, a court does not require that each member submit evidence of personal standing. Rather, only one of the named plaintiffs is required to establish standing in order to seek relief on behalf of the entire class. Passive members need not make any individual showing of standing, because the standing issue focuses on whether the plaintiff is properly before the court, not whether represented parties or absent class members are properly before the court. While only one named plaintiff need establish U.S. Const. art. III standing and the court's analysis need not consider evidence from absent class members, the court must nonetheless consider Article III standing as against each defendant. For every named defendant there must be at least one named plaintiff who can assert a claim directly against that defendant. At that point, Article III standing is satisfied and only then will the inquiry shift to a class action analysis and the question of class standing, which refers to a named plaintiff's ability to assert claims on behalf of absent class members.

Civil Procedure > Special Proceedings > Class Actions > Class Members

Constitutional Law > ... > Case or Controversy > Standing > Particular Parties

HN4[] Class Actions, Class Members

In a putative class action, a plaintiff has class standing if he plausibly alleges (1) that he personally has suffered some actual injury as a result of the putatively illegal conduct of the defendant, and (2) that such conduct implicates the same set of concerns as the conduct alleged to have caused injury to other members of the putative class by the same defendants. This standard, derived from constitutional standing principles but also distinct from U.S. Const. art. III standing itself, serves to insure that the named plaintiff's litigation incentives are sufficiently aligned with those of the absent class members that the named plaintiff may properly assert claims on their behalf. Class standing is assessed based on allegations rather than evidence.

Civil Procedure > Special Proceedings > Class Actions > Prerequisites for Class Action

HN5[] Class Actions, Prerequisites for Class Action

To proceed as a class action, each of the requirements of Fed. R. Civ. P. 23(a) must be met. Rule 23(a) provides that one or more members of a class may sue as representative parties on behalf of all members only if: (1) the class is so numerous that joinder of all members is impracticable; (2) there are questions of law or fact common to the class; (3) the claims of the representative parties are typical of the claims of the class; and (4) the representative parties will fairly and adequately protect the interests of the class. These requirements are generally referred to as numerosity, commonality, typicality, and adequacy of representation.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Numerosity

HN6[] Prerequisites for Class Action, Numerosity

Fed. R. Civ. P. 23(a)(1) requires a class to be sufficiently numerous such that joinder of all members is impracticable, but this requirement does not mandate that joinder of all parties be impossible. Though the numerosity inquiry is not strictly mathematical, numerosity is presumed for classes larger than forty members. Plaintiffs need not furnish evidence of exact class size or identity of class members to satisfy the numerosity requirement.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

HN7[] Prerequisites for Class Action, Commonality

The requirement of commonality demands that there be questions of law or fact common to the class. Fed. R. Civ. P. 23(a)(2). A question is common to the class if it is capable of classwide resolution — which means that determination of its truth or falsity will resolve an issue that is central to the validity of each one of the claims in one stroke. That is, commonality requires the plaintiff to demonstrate that the class members have suffered the same injury, which requires establishing more than the mere fact that class members have all suffered a violation of the same provision of law. However, where the same conduct or practice by the same defendant gives rise to the same kind of claims from all class members, there is a common question.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Typicality

HN8[] Prerequisites for Class Action, Typicality

To establish typicality under Fed. R. Civ. P. 23(a)(3), the party seeking certification must show that each class member's claim arises from the same course of events and each class member makes similar legal arguments to prove the defendant's liability. This requirement is related to, but distinct from, the requirement of class standing. Typicality requires that the disputed issues of law or fact occupy essentially the same degree of centrality to the named plaintiff's claim as to that of other members of the proposed class. Accordingly, typicality is not satisfied where a putative class representative is subject to unique defenses which threaten to become the focus of the litigation. The defendant need not show at the certification stage that a unique defense will prevail, only that it is meritorious enough to require the plaintiff to devote considerable time to rebut the unique defense. However, the court should not disqualify a named plaintiff based upon any groundless, far-fetched defense that the defendant manages to articulate.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Adequacy of Representation

HN9[] Prerequisites for Class Action, Adequacy of Representation

The representative parties must fairly and adequately protect the interests of the class. Fed. R. Civ. P. 23(a)(4). This requirement overlaps in part with those of commonality and typicality, but adequacy of representation also raises concerns about the competency of class counsel and conflicts of interest. Accordingly, an analysis of adequacy of representation considers whether the class representative has adequate incentive to pursue the class's claim, and whether some difference between the class representative and some class members might undermine that incentive. However, not every conflict among subgroups of a class will prevent class certification — the conflict must be fundamental to violate Rule 23(a)(4).

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Superiority

HN10[] Prerequisites for Class Action, Predominance

In addition to satisfying each requirement of Fed. R. Civ. P. 23(a), a putative class must also meet one of the bases for certification under Rule 23(b). A class action may proceed as such if the court finds that the questions of law or fact common to class members predominate over any questions affecting only individual members, and that a class action is superior to other available methods for fairly and efficiently adjudicating the controversy. Rule 23(b)(3). Predominance and superiority must each be satisfied.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN11[] Prerequisites for Class Action, Predominance

The Fed. R. Civ. P. 23(b)(3) predominance inquiry tests whether proposed classes are sufficiently cohesive to warrant adjudication by representation. It serves to ensure that the class will be certified only when it would achieve economies of time, effort, and expense, and promote uniformity of decision as to persons similarly situated, without sacrificing procedural fairness or bringing about other undesirable results. The predominance analysis entails careful scrutiny to the relation between common and individual questions in a case. An individual question is one where members of a proposed class will need to present evidence that varies from member to member, while a common question is one where the same evidence will suffice for each member to make a prima facie showing or the issue is susceptible to generalized, class-wide proof. As its name suggests, the predominance requirement calls only for predominance, not exclusivity, of common questions. The inquiry is inherently comparative, taking into account the weight and significance of common and individual issues rather than simply their numbers.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN12[] Prerequisites for Class Action, Commonality

The existence of a single common question suffices to establish commonality, but the Fed. R. Civ. P. 23(b)(3) predominance requirement is more demanding than Rule 23(a). Ultimately, the court asks whether issues susceptible to generalized proof outweigh individual issues, or put differently, whether common issues are more substantial than individual ones. In conducting this balancing test, a court assesses (1) the elements of the claims and defenses to be litigated; and (2) whether generalized evidence could be offered to prove those elements on a class-wide basis or whether individualized proof will be needed to establish each class member's entitlement to relief. This analysis is more qualitative than quantitative, and must account for the nature and significance of the material common and individual issues in the case.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Superiority

HN13[] **Prerequisites for Class Action, Predominance**

In addition to establishing the predominance of common questions, plaintiffs must also establish that a class action is superior to other available methods for fairly and efficiently adjudicating the controversy. *Fed. R. Civ. P. 23(b)(3)*. *Rule 23(b)(3)* sets forth four matters pertinent to the superiority inquiry: (A) the class members' interests in individually controlling the prosecution or defense of separate actions; (B) the extent and nature of any litigation concerning the controversy already begun by class members; (C) the desirability or undesirability of concentrating the litigation of the claims in the particular forum; and (D) the likely difficulties in managing a class action. While these factors, structurally, apply to both predominance and superiority, they more clearly implicate the superiority inquiry.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Superiority

HN14[] **Prerequisites for Class Action, Superiority**

While *Fed. R. Civ. P. 23(b)(3)* sets out four individual factors for courts to consider, manageability is, by the far, the most critical concern in determining whether a class action is a superior means of adjudication. Despite the importance of manageability, the Second Circuit has also cautioned that failure to certify an action under *Rule 23(b)(3)* on the sole ground that it would be unmanageable is disfavored and should be the exception rather than the rule. Ultimately, these factors are nonexhaustive and nonexclusive, and assessing superiority is a fact-specific inquiry.

Civil Procedure > Special Proceedings > Class Actions > Prerequisites for Class Action

HN15[] **Class Actions, Prerequisites for Class Action**

In addition to the express requirements of *Fed. R. Civ. P. 23(a)*, *(b)*, the Second Circuit has recognized an implied requirement of ascertainability in *Rule 23*. Though the touchstone of ascertainability is whether the class is sufficiently definite so that it is administratively feasible for the court to determine whether a particular individual is a member, the Second Circuit has clarified that ascertainability does not itself require that a proposed class be administratively feasible. Rather, ascertainability imposes only a modest threshold requirement that asks only whether a proposed class is defined using objective criteria that establish a membership with definite boundaries. It will only preclude certification if a proposed class definition is indeterminate in some fundamental way.

Civil Procedure > Special Proceedings > Class Actions > Prerequisites for Class Action

HN16[] **Class Actions, Prerequisites for Class Action**

Given that ascertainability is distinct from the predominance requirement, the case law does not preclude a consideration of administrative feasibility concerns in analyzing predominance and superiority. A freestanding administrative feasibility requirement as part of ascertainability would be duplicative of the manageability factor of the superiority inquiry (if administrative feasibility were considered comparatively rather than absolutely) and would risk encroaching on territory belonging to the predominance requirement, such as classes that require highly individualized determinations of member eligibility.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN17[] Class Actions, Certification of Classes

A court is not bound by the class definition proposed in the complaint and should not dismiss the action simply because the complaint seeks to define the class too broadly. *Fed. R. Civ. P. 23(c)(4)*, *(5)* provide two specific means of modification, but a court also has broad discretion to modify the class definition as appropriate.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN18[] Class Actions, Certification of Classes

Fed. R. Civ. P. 23(c)(4) provides that when appropriate, an action may be brought or maintained as a class action with respect to particular issues. The rule may be applied to certify a class on a particular issue even if the action as a whole does not satisfy *Rule 23(b)(3)*'s predominance requirement. Additionally, if an action includes multiple claims, one or more of which might qualify as a certifiable class claim, the court may separate such claims from other claims in the action and certify them under the provisions of *Rule 23(c)(4)*. The Second Circuit has instructed that district courts should take full advantage of this provision to certify separate issues, but has also recognized that issue certification may be inappropriate if a number of questions would remain for individual adjudication or if issue certification would not materially advance the litigation because it would not dispose of larger issues relevant to the case.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN19[] Class Actions, Certification of Classes

Fed. R. Civ. P. 23(c)(4) should not be invoked merely to postpone confronting difficult certification questions, and indeed, overly aggressive application of *Rule 23(c)(4)* would nullify *Rule 23(b)(3)*'s predominance requirement, as a class may be certified only as to the common issues raised. A class action movant cannot gerrymander predominance by suggesting that only a single issue be certified for class treatment (in which, by definition, it will predominate) when more substantial individual issues remain.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN20[] Class Actions, Certification of Classes

Fed. R. Civ. P. 23(c)(5) provides that when appropriate, a class may be divided into subclasses that are each treated as a class under this rule. For example, when conflicts exist between class members, they can be cured by dividing the class into separate homogeneous subclasses with separate representation to eliminate conflicting interests. However, the placement of plaintiffs into multiple subclasses can generate unnecessary administrative inefficiencies, and at some point there must be an end to reclassification. The necessity of a large number of subclasses may indicate that common questions do not predominate, and the creation of a number of subclasses may make the case unmanageable and may defeat the superiority requirement.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN21[] Class Actions, Certification of Classes

Fed. R. Civ. P. 23(c)(4), *(5)* are phrased permissively. Consistent with the text of the rule, the court is not obligated to implement *Rule 23(c)(4)*, *(5)* on its own initiative by certifying classes only as to certain issues or creating subclasses. It remains the plaintiff's burden to show how the action may be modified to avoid certification problems. Similarly, the decision to otherwise modify a class definition is a discretionary one. Accordingly, in order to avoid the perverse effect of turning defense counsel and the court into the plaintiffs' counsel's co-counsel, with the plaintiffs waiting to see what objections defendants raise and how the court rules on those objections and then amending their proposed class definitions as necessary based on what they learned in the process, it is appropriate to consider issue certification under *Rule 23(c)(4)*, subclass creation under *Rule 23(c)(5)*, and other modifications of the proposed class definitions under the court's discretionary authority only where the plaintiffs have set forth such proposals in sufficient detail.

Evidence > Admissibility > Expert Witnesses > Daubert Standard

HN22[] Expert Witnesses, Daubert Standard

Courts have a gatekeeping function under *Fed. R. Evid. 702*, under which a court is charged with the task of ensuring that an expert's testimony both rests on a reliable foundation and is relevant to the task at hand. The proponent of expert testimony has the burden of establishing by a preponderance of the evidence that the admissibility requirements of *Rule 702* are satisfied. The Second Circuit has distilled Rule 702's requirements into three broad criteria: (1) qualifications, (2) reliability, and (3) relevance and assistance to the trier of fact.

Evidence > ... > Testimony > Expert Witnesses > Qualifications

HN23[] Expert Witnesses, Qualifications

When presented with expert testimony, courts first consider the threshold question of whether a witness is qualified as an expert by knowledge, skill, experience, training, or education to render his or her opinions. *Fed. R. Evid. 702*. The court analyzes the totality of the witness's background to determine whether he or she exhibits any one or more of the qualifications listed in *Rule 702* with respect to a relevant field. As Rule 702's use of the disjunctive suggests, any one of the five forms of qualifications will satisfy the rule. A formal education in a particular field is sufficient to qualify a witness as an expert as a general matter, such that a lack of extensive practical experience directly on point does not necessarily preclude the expert from testifying. Similarly, a lack of formal training does not necessarily disqualify an expert from testifying if he or she has equivalent relevant practical experience.

Evidence > ... > Testimony > Expert Witnesses > Qualifications

HN24[] Expert Witnesses, Qualifications

Courts in the Second Circuit have noted that an expert should not be required to satisfy an overly narrow test of his own qualifications. The Second Circuit has allowed an expert to testify as to matters within his general expertise even though he lacked qualifications as to certain technical matters within that field. A court compares the area in which the witness has superior knowledge, education, experience, or skill with the subject matter of the proffered testimony, which must overlap. Because a witness qualifies as an expert with respect to certain matters or areas of knowledge, it by no means follows that he or she is qualified to express expert opinions as to other fields. Conversely, an expert's lack of qualifications as to some of the opinions offered does not render inadmissible the opinions that he is qualified to offer.

Evidence > Admissibility > Expert Witnesses > Daubert Standard

HN25[] **Expert Witnesses, Daubert Standard**

A court, after assessing an expert's qualifications, next determines whether the proffered testimony has a sufficiently reliable foundation to permit it to be considered. In this inquiry, the court should consider the indicia of reliability identified in *Fed. R. Evid. 702*, namely, (1) that the testimony is grounded on sufficient facts or data; (2) that the testimony is the product of reliable principles and methods; and (3) that the witness has applied the principles and methods reliably to the facts of the case. The Supreme Court has identified a number of factors that may be considered in assessing reliability: (1) whether a theory or technique can be (and has been) tested; (2) whether the theory or technique has been subjected to peer review and publication; (3) a technique's known or potential rate of error, and the existence and maintenance of standards controlling the technique's operation; and (4) whether a particular technique or theory has gained general acceptance in the relevant scientific community. These factors are not a definitive checklist or test, as the gatekeeping inquiry must be tied to the facts of a particular case and will necessarily vary from case to case.

Evidence > Admissibility > Expert Witnesses > Daubert Standard

HN26[] **Expert Witnesses, Daubert Standard**

The law grants a district court the same broad latitude when it decides how to determine reliability as it enjoys in respect to its ultimate reliability determination. Accordingly, in assessing the reliability of an expert opinion, a resort to common sense is not inappropriate.

Evidence > Admissibility > Expert Witnesses > Daubert Standard

HN27[] **Expert Witnesses, Daubert Standard**

Though flexible, the reliability inquiry must focus on the principles and methodology employed by the expert, without regard to the conclusions the expert has reached or the court's belief as to the correctness of those conclusions. The expert's methodology is to be assessed step-by-step, and it is critical that an expert's analysis be reliable at every step. Any step that renders the analysis unreliable under the Daubert factors renders the expert's testimony inadmissible. But conclusions and methodology are not entirely distinct from one another. Nothing in either Daubert or the Federal Rules of Evidence requires a district court to admit opinion evidence that is connected to existing data only by the ipse dixit of the expert, and a court may conclude that there is simply too great an analytical gap between the data and the opinion proffered. when an expert opinion is based on data, a methodology, or studies that are simply inadequate to support the conclusions reached, Daubert and *Fed. R. Evid. 702* mandate the exclusion of that unreliable opinion testimony.

Evidence > Admissibility > Expert Witnesses > Daubert Standard

HN28[] Expert Witnesses, Daubert Standard

Regarding the incomplete distinction between "methodology" on the one hand and "conclusions" and "results" on the other, first, a challenge to an expert's methodology will necessarily call into question the conclusions derived from the application of that methodology. Such a challenge does not impermissibly attack an expert's results simply because those results are collaterally damaged by the challenge directed towards the expert's methodology. Second, robustness testing of an expert's methodology — by applying that methodology to different data or with different assumptions and examining the results produced by the methodology so applied — is not an impermissible challenge to the expert's results. Rather, this robustness and sensitivity testing relates directly to two of the Daubert factors articulated by the Supreme Court: whether the methodology can be (and has been) tested and the methodology's known or potential rate of error. Robustness testing and sensitivity testing that produces contradictory or otherwise implausible results strongly suggest that a methodology has been insufficiently tested and that the methodology has a high potential rate of error.

Evidence > Admissibility > Expert Witnesses > Daubert Standard

HN29[] Expert Witnesses, Daubert Standard

Inconsistent results are an indicia of unreliability in an expert's methodologies. This principle is clearest in the context of inconsistent results produced by the same methodology. However, it is no less applicable to multiple methodologies intended to measure the same phenomenon that ultimately produce inexplicably inconsistent results.

Evidence > Admissibility > Expert Witnesses > Daubert Standard

HN30[] Expert Witnesses, Daubert Standard

When faced with expert testimony that contains both reliable and unreliable opinions, district courts often exclude only the unreliable testimony. If the unreliable portion of an opinion can easily be distinguished from testimony that could help the trier of fact, it may be an abuse of discretion to throw the good out with the bad. However, courts are not obligated to prune away all of the problematic elements of an expert's proposed testimony to save the remaining portions, however small.

Evidence > Admissibility > Expert Witnesses > Daubert Standard

Evidence > Admissibility > Expert Witnesses > Helpfulness

Evidence > Relevance > Relevant Evidence

HN31[] Expert Witnesses, Daubert Standard

Even after determining that a witness is qualified as an expert to testify as to a particular matter, and that the opinion is based upon reliable data and methodology, Fed. R. Evid. 702(a) requires a district court to make a third inquiry: whether the expert's testimony will assist the trier of fact in understanding the evidence or determining a fact in issue. This condition goes primarily to relevance, as expert testimony which does not relate to any issue in the case is not relevant and, ergo, non-helpful. Relevance, in turn, is assessed with respect to *Fed. R. Evid. 401*: whether it has any tendency to make the existence of any fact that is of consequence to the determination of the action more probable or less probable than it would be without the evidence. Accordingly, the Second Circuit has consistently held that expert testimony that usurps either the role of the trial judge in determining the applicable law or the role of the trier of fact in applying that law to the facts before it is inadmissible because it by definition does not aid the trier of fact in making a decision.

Evidence > Admissibility > Expert Witnesses > Daubert Standard

Evidence > Admissibility > Expert Witnesses > Helpfulness

HN32[] **Expert Witnesses, Daubert Standard**

Expert testimony that seeks to address lay matters which the trier of fact is capable of understanding and deciding without the expert's help is not relevant and is therefore inadmissible. That is, testimony addressing lay matters is not based on an expert's scientific, technical, or other specialized knowledge, and therefore fails to satisfy the first part of Fed. R. Evid. 702(a). Accordingly, it is inappropriate for experts to become a vehicle for factual narrative.

Evidence > Admissibility > Expert Witnesses > Daubert Standard

Evidence > Admissibility > Expert Witnesses > Helpfulness

HN33[] **Expert Witnesses, Daubert Standard**

As with qualifications and reliability, courts also disaggregate an expert's opinions before assessing their relevance and helpfulness: the fact that some of an expert's opinions are irrelevant does not render all of the expert's opinions inadmissible. Nonetheless, a court need not overly fragment an expert's opinions in order to pick out only the relevant and helpful portions.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > Admissibility > Expert Witnesses > Daubert Standard

HN34[] **Class Actions, Certification of Classes**

Neither the Supreme Court nor the Second Circuit has definitely decided whether the Daubert standard governs the admissibility of expert evidence submitted at the class certification stage. Indeed, the issue remains unsettled nationally and in the Southern District of New York. The view that expert evidence submitted at the class certification stage is subject to the Daubert standard is persuasive. The Supreme Court has suggested in dicta that Daubert applies, and the Second Circuit's decisions support a more searching examination of expert testimony offered at the class certification stage. Indeed, given the Second Circuit's direction that courts consider the relevant evidence admitted at the class certification stage, it appears that the standard rules of evidence should apply. At least two leading treatises endorse this view. An undiluted Daubert analysis is consonant with a class certification standard that requires a determination by a preponderance of the evidence that each *Fed. R. Civ. P. 23* requirement has been met, and under which head-to-head weighing of competing expert evidence is proper. It is not sufficient for the court simply to determine that the testimony could evolve into something admissible by the time of trial.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > Admissibility > Expert Witnesses > Daubert Standard

HN35[] Class Actions, Certification of Classes

Though Daubert applies at the class certification stage, a court's inquiry is guided by the purpose for which the evidence is introduced — establishing the various class certification requirements. The question is not whether a jury at trial should be permitted to rely on the expert's report to find facts as to liability, but rather whether the court may utilize it in deciding whether the requisites of *Fed. R. Civ. P. 23* have been met. However, a conclusion that proffered expert evidence is sufficiently reliable and relevant to pass Daubert muster does not end the inquiry on class certification. Rather, expert opinion deemed to be admissible comprises only one part of the relevant evidence admitted at the class certification stage to be weighed in determining whether each *Rule 23* requirement has been met, and each requirement must still be established by a preponderance of the evidence.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > Admissibility > Expert Witnesses > Daubert Standard

HN36[] Class Actions, Certification of Classes

To the extent that flaws in expert testimony proffered at class certification do not warrant that testimony's exclusion by the court as gatekeeper under Daubert at the threshold, those flaws may nonetheless be considered in the *Fed. R. Civ. P. 23* analysis undertaken by the court as trier of fact. Put differently, though a Daubert motion is an improper venue in which to take sides in a battle of the experts offered by competing parties, disputes between experts must be resolved if necessary to the *Rule 23* analysis.

Evidence > Admissibility > Expert Witnesses > Daubert Standard

HN37[] Expert Witnesses, Daubert Standard

There is case law holding that purported inconsistencies in an expert's methodology go to the weight, not the admissibility, of his testimony. However, the cases establish a distinction between inconsistencies within an expert's application of a single methodology on the one hand and inconsistencies across an expert's multiple methodologies on the other. The former has been held not to be a basis for exclusion.

Evidence > Admissibility > Expert Witnesses > Helpfulness

HN38[] Expert Witnesses, Helpfulness

Acting simply as a narrator of the facts does not convey opinions based on an expert's knowledge and expertise. This concern is heightened where the expert offers no explanation of how the communications that she reviewed were selected. Similarly, to the extent an expert interprets communications to opine on their authors' actual motives and states of mind, these opinions are impermissible. While an expert may opine on economic incentives as a general matter, those opinions may not extend to specific states of mind.

Evidence > Admissibility > Expert Witnesses

HN39[] Admissibility, Expert Witnesses

An expert may rely on the admissible opinions of another expert under *Fed. R. Evid. 703*, but an expert is not entitled to rely on another expert's unreliable opinions for support.

Evidence > Admissibility > Expert Witnesses > Daubert Standard

HN40[] **Expert Witnesses, Daubert Standard**

An expert opinion need not have been peer reviewed and need not be generally accepted in the community in order to be admissible. Peer review is relevant, though not dispositive.

Evidence > Admissibility > Expert Witnesses > Daubert Standard

HN41[] **Expert Witnesses, Daubert Standard**

Methodology and results are not entirely distinct from one another, and robustness testing of an expert's methodology relates directly to two of the reliability factors identified by the Supreme Court: whether a methodology can be (and has been) tested, and a methodology's known or potential rate of error.

Evidence > Admissibility > Expert Witnesses > Daubert Standard

HN42[] **Expert Witnesses, Daubert Standard**

While Monte Carlo simulation is a generally accepted technique, general acceptance does not end the reliability inquiry. Problems in implementing the technique may nonetheless render it unreliable as applied.

Evidence > Admissibility > Expert Witnesses > Daubert Standard

HN43[] **Expert Witnesses, Daubert Standard**

A court's role at the Daubert stage is not to conclusively assess the correctness of an expert's opinions. A court must undertake a Daubert analysis without regard to the conclusions the expert has reached or the court's belief as to the correctness of those conclusions.

Evidence > Types of Evidence > Judicial Admissions > Amendments

Evidence > Types of Evidence > Judicial Admissions > Pleadings

HN44[] **Judicial Admissions, Amendments**

The amendment of a pleading does not make it any less an admission of the party. The facts alleged in a complaint can be self-defeating.

Evidence > Admissibility > Expert Witnesses > Daubert Standard

HN45[] **Expert Witnesses, Daubert Standard**

It seems safe to assume that an expert, as a practitioner of the scientific method, would consider relevant additional information and incorporate that information into his opinions. There is little reason why experts should be required to explicitly disclaim as much.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > Special Proceedings > Class Actions > Prerequisites for Class Action

HN46[] **Class Actions, Certification of Classes**

Courts have taken varying approaches to the propriety of certifying a fail-safe class, or one that begs the liability question and is defined circularly in terms of legal injury. For instance, some cases suggest that a fail-safe class raises predominance issues under *Fed. R. Civ. P. 23(b)(3)*, reasoning that such a class necessarily raises individual questions, as the factfinder must determine whether an individual has a claim in order to determine whether he or she belongs in the class. Courts have also concluded that fail-safe classes create manageability problems bearing on superiority under *Rule 23(b)(3)*, are fundamentally unfair, or render the proposed class unascertainable. Other courts have rejected these concerns, often reasoning that potentially fail-safe language such as "and were damaged thereby" is superfluous and does not substantively alter the class definition's scope.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN47[] **Class Actions, Certification of Classes**

Fed. R. Civ. P. 23 does not explicitly preclude certification of fail-safe classes. Rather, the contention that a class is "fail-safe" often serves as shorthand for defects in the requirements explicitly set forth in *Rule 23*, including predominance in particular.

Civil Procedure > ... > Class Actions > Class Members > Absent Members

Constitutional Law > ... > Case or Controversy > Standing > Particular Parties

Civil Procedure > ... > Class Actions > Class Members > Named Members

HN48[] **Class Members, Absent Members**

Since the elements of U.S. Const. art. III standing are not mere pleading requirements but rather an indispensable part of the plaintiff's case, each element must be supported in the same way as any other matter on which the plaintiff bears the burden of proof. Accordingly, Article III standing is assessed based on the plaintiff's allegations at the pleading stage. In response to a summary judgment motion, however, the plaintiff can no longer rest on such mere allegations, but must set forth by affidavit or other evidence specific facts that are taken as true. Class certification does not always fit neatly into this framework. For example, when the consideration of class certification occurs at the pleading stage and precedes motions to dismiss, allegations as to the named plaintiffs' standing would appear to suffice. However, where the case has proceeded beyond the pleading stage but has not yet reached summary judgment, this framework does not directly address whether standing should be assessed at this point based on allegations or evidence. The Second Circuit does not require that each member of a class submit evidence of personal standing, but it has referenced standing in terms of allegations and further held that passive members need not make any individual showing of standing.

Civil Procedure > ... > Class Actions > Class Members > Absent Members

Constitutional Law > ... > Case or Controversy > Standing > Particular Parties

Civil Procedure > ... > Class Actions > Class Members > Named Members

HN49[] Class Members, Absent Members

Though the law remains somewhat unsettled, the following principles guide an analysis of standing when class certification is considered in a case that has proceeded beyond the pleading stage but has not yet reached summary judgment. First, the class must be defined in such a way that anyone within it would have U.S. Const. art. III standing. Second, because absent class members need not submit evidence of personal standing, the court considers absent class members' Article III standing solely based on plaintiffs' allegations and the class definition. Third, by negative implication, evidence of the named plaintiffs' standing is required at this juncture. Though the record may not be as well-developed as at summary judgment, the class certification process has nonetheless entailed discovery, and evidence establishing a named plaintiff's standing should be well within that plaintiff's control in any event.

Civil Procedure > Special Proceedings > Class Actions > Prerequisites for Class Action

HN50[] Class Actions, Prerequisites for Class Action

Though a class definition's use of language may not be as definite as would be ideal, if it remains clear who is suing about what, this is all that ascertainability requires.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

HN51[] Prerequisites for Class Action, Commonality

Fed. R. Civ. P. 23(a)(2) simply requires that there be issues whose resolution will affect all or a significant number of the putative class members.

Business & Corporate Compliance > ... > Contracts Law > Standards of Performance > Assignments

Civil Procedure > ... > Justiciability > Standing > Personal Stake

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Typicality

HN52[] Standards of Performance, Assignments

As a general matter, the assignee of a claim possesses the same interest as the assignor and thus may continue to assert a claim for the same injury shared by all members of the class. It is commonplace for an assignee to institute or continue an action of his or her assignor on an assigned claim even though he or she, apart from the assignment, is without standing.

Torts > ... > Fraud & Misrepresentation > Actual Fraud > Remedies

HN53[] Actual Fraud, Remedies

A plaintiff both injured and enriched by illegal activity cannot choose to recover for his injuries yet retain his windfall where both result from a single wrong. That is, a plaintiff cannot claim damages where the same fraud alleged to be the cause of a loss to certain funds also permitted a countervailing gain to other funds.

Securities Law > Commodities Futures Trading

HN54[] Securities Law, Commodities Futures Trading

A plaintiff asserting a direct *Commodity Exchange Act* claim must establish (1) that the defendant had the ability to influence market prices; (2) that he specifically intended to do so; (3) that artificial prices existed; and (4) that the defendant caused the artificial prices.

Securities Law > Commodities Futures Trading

HN55[] Securities Law, Commodities Futures Trading

Vicarious liability may be imposed where (1) the agent participated in the alleged unlawful activity and (2) his actions were within the scope of his employment or office, and requires a primary violation of the *Commodity Exchange Act* (CEA) in the first instance. Aiding-and-abetting claims are also contingent on a primary CEA violation.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

Securities Law > Commodities Futures Trading

Securities Law > ... > Remedies > Damages > Compensatory Damages

HN56[] Prerequisites for Class Action, Predominance

The question of damages, to some extent, is necessarily individual in every securities case, because damages will almost always be a function of the specific transactions undertaken by each class member and the prices and quantities involved in those transactions. Accordingly, individualized damages determinations alone cannot preclude certification under *Fed. R. Civ. P. 23(b)(3)*, though the fact that damages may have to be ascertained on an individual basis is a factor that a court must consider in the predominance analysis. Though a court may set forth at class certification the netting principles to be applied in determining actual damages under *7 U.S.C.S. § 25(a)*, the court need not finalize any netting principles in order to find that they introduce individual issues. Netting of gains and losses is not a hard-and-fast rule, as courts decline to net where doing so would unjustly enrich the defendant, shelter it from any appreciable liability, or undermine the goal of deterrence. Nonetheless, there is no unjust enrichment where a claimant has actually benefited from the alleged wrongdoing of another, and undeserved windfalls to plaintiffs may be inappropriate.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Superiority

HN57[] Prerequisites for Class Action, Superiority

Courts should distinguish claims in which the cost of prosecution exceeds recovery from truly negative value claims — those in which the class member actually benefited from the conduct in question. To the extent a putative class includes a substantial number of members who were not ultimately damaged, a negative value rationale for superiority is properly evaluated against a concern regarding the in terrorem effect that a certified class may have.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Superiority

HN58[] **Prerequisites for Class Action, Superiority**

Concerns about foreign recognition of the court's judgments are reasonably related to superiority. Status as foreign entities does not preclude parties from serving as class representatives, but the presence of a significant number of foreign putative class members can give a court pause on whether concentration is desirable.

Torts > Remedies > Damages > Proof

HN59[] **Damages, Proof**

A defendant must bear the risk of uncertainty from its wrongdoing, but a plaintiff first bears the burden of showing that the claimed damages are the certain result of the wrong.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

Torts > ... > Fraud & Misrepresentation > Actual Fraud > Elements

HN60[] **Prerequisites for Class Action, Commonality**

In the context of fraud claims based on uniform misrepresentations made to all members of the class, misrepresentation is a common question because the standardized misrepresentations may be established by generalized proof.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Adequacy of Representation

HN61[] **Prerequisites for Class Action, Adequacy of Representation**

Adequacy of representation is called into question when some difference between the class representative and some class members might undermine the class representative's incentive to pursue the class's claims. A key element in the determination of whether a plaintiff's interests are antagonistic to those of other members of the class is the relationship between the class representative and class counsel. This concern arises because, when a class representative is closely associated with class counsel, he or she may permit a settlement less favorable to the interests of absent class members. However, a relationship between a class representative and class counsel is not inevitably disabling, and there is no per se rule against relatives of class counsel serving as class representatives.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Adequacy of Representation

HN62[] **Prerequisites for Class Action, Adequacy of Representation**

Whether a close relationship with class counsel renders a named plaintiff inadequate is a fact-intensive inquiry. In making this assessment, courts have considered numerous factors such as: (1) the closeness and extent of the relationship; (2) whether the related attorney's relationship and role in the litigation have been disclosed; (3) whether attorneys' fees will greatly exceed the class representative's recovery; and (4) the extent of the related attorney's involvement in the litigation. A potential conflict of interest is sufficient to render a named plaintiff an inadequate class representative, and a conflict need not violate state law or professional responsibility rules in order to render a named plaintiff inadequate.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Adequacy of Representation

HN63[] Prerequisites for Class Action, Adequacy of Representation

Fed. R. Civ. P. 23(a)(4) requires a court to ask whether the representative parties will fairly and adequately protect the interests of the class, not whether the court believes the interests of absent class members are being fairly treated. Consistent with this distinction set forth in the structure of Rule 23, the Supreme Court and Second Circuit have made clear that the adequacy of a named plaintiff's representation and the fairness of a subsequent settlement are wholly distinct inquiries. The adequacy of the proposed class representative is widely considered the most important of the Rule 23(a) factors because it directly implicates the due process rights of absent class members who will be bound by the judgment.

Torts > ... > Fraud & Misrepresentation > Actual Fraud > Elements

HN64[] Actual Fraud, Elements

Under New York law, to state a claim for fraud a plaintiff must demonstrate: (1) a misrepresentation or omission of material fact; (2) which the defendant knew to be false; (3) which the defendant made with the intention of inducing reliance; (4) upon which the plaintiff reasonably relied; and (5) which caused injury to the plaintiff.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

Torts > ... > Fraud & Misrepresentation > Actual Fraud > Elements

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN65[] Prerequisites for Class Action, Commonality

Though misrepresentation is a common question when fraud claims are based on uniform misrepresentations to all members of the class, proof of misrepresentation — even widespread and uniform misrepresentation — only satisfies half of the equation. The answer to the other half, reliance on the misrepresentation, is not dictated by the first half.

Securities Law > ... > Elements of Proof > Reliance > Fraud on the Market

Torts > ... > Fraud & Misrepresentation > Actual Fraud > Elements

HN66[] Reliance, Fraud on the Market

The common law does not generally recognize a fraud on the market theory of reliance. Common-law fraud claims require a different analysis than those brought under the federal securities regulation scheme.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN67[] Prerequisites for Class Action, Predominance

An assessment of predominance requires consideration of the elements of the claims and defenses to be litigated. Though the question for purposes of determining predominance is not whether a defense exists, but whether the common issues will predominate over the individual questions raised by that defense, affirmative defenses may, and must, be considered in the predominance analysis. Statutes of limitations are no exception to this general rule. Situations abound where statute-of-limitations issues overlap with certain of the *Fed. R. Civ. P. 23* requirements. Indeed, defendants may oppose class certification on the ground that class members with untimely claims must rely on equitable tolling to save their claims, which presents an individual question of law and fact that could predominate over common questions under *Rule 23(b)(3)*, or challenge the predominance requirement in light of the presence of idiosyncratic statute-of-limitations issues among the laws of various states in a nationwide class action.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN68[] Prerequisites for Class Action, Predominance

While an affirmative defense affecting different class members differently does not compel a finding that individual issues predominate, the varying applicability of affirmative defenses weighs on the individual question side of the scale.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN69[] Prerequisites for Class Action, Predominance

Variations in state law may swamp any common issues and defeat predominance. One of the matters pertinent to a finding of predominance is the likely difficulties in managing a class action. *Fed. R. Civ. P. 23(b)(3)(D)*. When claims in a class action arise under state law — and the class comprises multiple states — the court must consider whether different state laws will apply to different members of the class. If the forum state's choice-of-law rules require the application of only one state's laws to the entire class, then the representation of multiple states within the class does not pose a barrier to class certification.

Civil Procedure > ... > Federal & State Interrelationships > Choice of Law > Forum & Place

Torts > Procedural Matters > Conflict of Law > Place of Injury

Civil Procedure > ... > Federal & State Interrelationships > Choice of Law > Governmental Interests

HN70[] Choice of Law, Forum & Place

Under New York's choice-of-law rules, the first question to resolve in determining whether to undertake a choice of law analysis is whether there is an actual conflict of laws. If there is a conflict of laws, New York courts apply an interests analysis, under which the law of the jurisdiction having the greatest interest in the litigation is applied.

Applying this test, fraud claims are governed by the law of the state in which the injury occurred, which is where the plaintiff maintains its principal place of business.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN71[] Prerequisites for Class Action, Predominance

Putative class actions involving the laws of multiple states are often not properly certified pursuant to *Fed. R. Civ. P. 23(b)(3)* because variation in the legal issues to be addressed overwhelms the issues common to the class. Accordingly, courts routinely deny class certification because the plaintiffs' claims would require application of the substantive law of multiple states. Nonetheless, the specter of having to apply different substantive laws does not necessarily warrant refusing to certify a class. Nationwide class action movants must creditably demonstrate, through an extensive analysis of state law variances, that class certification does not present insuperable obstacles.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Typicality

HN72[] Prerequisites for Class Action, Typicality

A representative may satisfy the typicality requirement even though that party may later be barred from recovery by a defense particular to him or her that would not impact other class members.

Antitrust & Trade Law > Sherman Act > Claims

HN73[] Sherman Act, Claims

An antitrust claim has three elements: (1) a violation of ***antitrust law***; (2) injury and causation; and (3) damages. The second element has also been termed "antitrust injury" and "causation or impact."

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN74[] Sherman Act, Claims

The second element of an antitrust cause of action — antitrust injury — poses two distinct questions. One is the familiar factual question whether the plaintiff has indeed suffered harm, or injury-in-fact. The other is the legal question whether any such injury is injury of the type the antitrust laws were intended to prevent and that flows from that which makes the defendants' acts unlawful.

Antitrust & Trade Law > Sherman Act > Claims

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN75[] Sherman Act, Claims

The Second Circuit has held that antitrust injury and damages are related, but nonetheless distinct, concepts. The injury-in-fact question considers whether a plaintiff was harmed, and the damages question considers by how much a plaintiff was harmed. Antitrust plaintiffs at class certification need not demonstrate through common evidence the precise amount of damages incurred by each class member, but are expected to provide common evidence to show all class members suffered some injury.

Business & Corporate Compliance > ... > Contract Conditions & Provisions > Contracts Law > Contract Conditions & Provisions

Civil Procedure > ... > Federal & State Interrelationships > Choice of Law > Forum & Place

Civil Procedure > ... > Federal & State Interrelationships > Choice of Law > Significant Relationships

HN76[] **Contracts, Contract Conditions & Provisions**

Under New York law, the center of gravity or grouping of contacts is the appropriate analytical approach to choice of law questions in contract cases. In addition to the traditionally determinative choice of law factor of the place of contracting, four other factors are considered in establishing this most significant relationship: the places of negotiation and performance; the location of the subject matter; and the domicile or place of business of the contracting parties. However, when a contract contains a choice-of-law provision, that provision may reasonably be read as a substitute for the conflict-of-laws analysis that otherwise would determine what law to apply to disputes arising out of the contractual relationship. Indeed, as a general rule, choice of law provisions are valid and enforceable in New York.

Business & Corporate Compliance > ... > Contract Conditions & Provisions > Contracts Law > Contract Conditions & Provisions

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > Choice of Law

Contracts Law > Remedies > Restitution

HN77[] **Contracts, Contract Conditions & Provisions**

Under New York law, the choice of law analysis is generally done separately for each claim and defense. Some controversy appears to exist as to whether a claim for unjust enrichment is governed by a contract's enforceable choice-of-law provision, or whether it is instead governed by the law of the state that New York's interest analysis yields, being a fundamentally non-contractual cause of action. While in general, New York courts are reluctant to construe contractual choice-of-law clauses broadly to encompass extra-contractual causes of action, the more an unjust enrichment claim relates to an enforceable contract, the more likely it is to be considered contractual in nature for the purposes of New York's choice-of-law analysis.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

Contracts Law > Remedies > Restitution

HN78[] **Prerequisites for Class Action, Predominance**

Variations in state law have generally precluded nationwide class certifications based on unjust enrichment theories. Rejection of nationwide unjust-enrichment classes is not a universal rule, and some decisions have certified nationwide unjust enrichment classes. More persuasive is the line of cases declining to certify a nationwide class. The states' different approaches to, or elements of, unjust enrichment are significant.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN79[] **Class Actions, Certification of Classes**

Fed. R. Civ. P. 23(c) contemplates that class certification is not a one-shot process, as an order that grants or denies class certification may be altered or amended before final judgment. The Second Circuit has interpreted *Rule 23(c)(1)(C)* to require courts to reassess class rulings as the case develops. Though class certification is not an iterative process and proponents of class certification should be diligent in establishing their compliance with class certification requirements the first time around, a court may nonetheless exercise its discretion and consider a proposal that the class definition be modified.

Business & Corporate Compliance > ... > Contract Conditions & Provisions > Contracts Law > Contract Conditions & Provisions

HN80[] **Contracts, Contract Conditions & Provisions**

New York law appears to treat as identical a choice-of-law provision designating New York law exclusive of New York conflict-of-law principles and a choice-of-law provision designating New York law without such an exclusion.

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > Erie Doctrine

HN81[] **Federal & State Interrelationships, Erie Doctrine**

A federal court in New York sitting in diversity is bound to apply New York law as established by the New York Court of Appeals.

Contracts Law > Contract Interpretation > Good Faith & Fair Dealing

HN82[] **Contract Interpretation, Good Faith & Fair Dealing**

Under New York law, a covenant of good faith and fair dealing in the course of contract performance is implicit in all contracts. The implied covenant of good faith and fair dealing obligates a promisor to fulfill any promises which a reasonable person in the position of the promisee would be justified in understanding were included in the contract. Specifically, implied in every contract is a promise that neither party shall do anything which will have the effect of destroying or injuring the right of the other party to receive the fruits of the contract. The duty of good faith and fair dealing, however, is not without limits, and no obligation can be implied that would be inconsistent with other terms of the contractual relationship. The relevant inquiry called for by the implied covenant is objective, not subjective: the court considers any promises which a reasonable person in the position of the promisee would be justified in understanding were included.

Civil Procedure > Special Proceedings > Class Actions > Appellate Review

HN83[] **Class Actions, Appellate Review**

Under *Fed. R. Civ. P. 23(f)*, a court of appeals may permit an appeal from an order granting or denying class-action certification. The Second Circuit has held that views expressed by the district court at the time of class certification, although not required, are relevant to a determination of whether interlocutory appeal is warranted. A party seeking leave to appeal pursuant to *Rule 23(f)* must demonstrate either (1) that the certification order will effectively terminate the litigation and there has been a substantial showing that the district court's decision is questionable, or (2) that the certification order implicates a legal question about which there is a compelling need for immediate resolution. The first category comprises the so-called "death knell" cases and their counterparts — namely cases in which the class certification order effectively terminates the litigation either because the denial of certification makes the pursuit of individual claims prohibitively expensive or because the grant of certification forces the defendants to settle. The second category requires a novel legal question that is of fundamental importance to the development of the law of class actions and is likely to escape effective review after entry of final judgment.

For Bank of America N.A., Defendant (1:12-cv-05723-NRB): Arthur J. Burke, Davis Polk & Wardwell, New York, NY; Edward Fu, Davis Polk & Wardwell LLP (NYC), New York, NY; Patrick Wyatt Blakemore, Robert Frank Wise, Jr, Davis Polk & Wardwell LLP, New York, NY.

For Bank of Tokyo Mitsubishi UFJ Ltd., Defendant (1:12-cv-05723-NRB): **[**72]** Arthur J. Burke, Davis Polk & Wardwell, New York, NY; Christopher Michael Viapiano, Daryl Andrew Libow, Sullivan & Cromwell LLP (Washington DC), Washington, DC; Robert Frank Wise, Jr, Davis Polk & Wardwell LLP, New York, NY.

For Barklays Bank Plc, Defendant (1:12-cv-05723-NRB): Arthur J. Burke, Davis Polk & Wardwell, New York, NY; Jeffrey T. Scott, Sullivan and Cromwell, LLP(NYC), New York, NY; Jonathan David Schiller, Boies Schiller & Flexner LLP, New York, NY; Robert Frank Wise, Jr, Davis Polk & Wardwell LLP, New York, NY.

For Citigroup Inc., Citibank N.A., Defendants (1:12-cv-05723-NRB): Andrew Arthur Ruffino, Covington & Burling LLP(NYC), New York, NY; Arthur J. Burke, Davis Polk & Wardwell, New York, NY; Robert Frank Wise, Jr, Davis Polk & Wardwell LLP, New York, NY.

For Cooperative Centrale Raiffeisenboerenleenbank B.A., Defendant (1:12-cv-05723-NRB): David Robert Gelfand, LEAD ATTORNEY, Mark David Villaverde, Sean Miles Murphy, Milbank, Tweed, Hadley & McCloy LLP, New York, NY; Arthur J. Burke, Davis Polk & Wardwell, New York, NY; Melanie Westover Yanez, Milbank, Tweed, Hadley & McCloy LLP (NYC), New York, NY; Robert Frank Wise, Jr, Davis Polk & Wardwell LLP, New York, NY.

For Credit **[**73]** Suisse Group AG, Royal Bank of Canada, The Norinchukin Bank, UBS AG, Westdeutsche Immobilienbank AG, Defendants (1:12-cv-05723-NRB): Arthur J. Burke, Davis Polk & Wardwell, New York, NY; Robert Frank Wise, Jr, Davis Polk & Wardwell LLP, New York, NY.

For Deutsche Bank AG, Defendant (1:12-cv-05723-NRB): Aidan John Synnott, LEAD ATTORNEY, Paul Weiss (NY), New York, NY; Moses Silverman, LEAD ATTORNEY, Paul, Weiss, Rifkind, Wharton & Garrison LLP (NY), New York, NY; Arthur J. Burke, Davis Polk & Wardwell, New York, NY; Robert Frank Wise, Jr, Davis Polk & Wardwell LLP, New York, NY.

For HSBC Holdings plc., HSBC Bank Plc., Defendants (1:12-cv-05723-NRB): Arthur J. Burke, Davis Polk & Wardwell, New York, NY; Gregory Thomas Casamento, Locke Lord LLP (NYC), New York, NY; Robert Frank Wise, Jr, Davis Polk & Wardwell LLP, New York, NY. Roger Brian Cowie, Locke, Liddell & Sapp, L.L.P., Dallas, TX.

For JPMorgan Chase & Co., JPMorgan Chase Bank, National Association, Defendants (1:12-cv-05723-NRB): Arthur J. Burke, Davis Polk & Wardwell, New York, NY; Mary Beth Forshaw, Paul Christopher Gluckow, Simpson Thacher & Bartlett LLP (NY), New York, NY; Robert Frank Wise, Jr, Davis Polk & Wardwell LLP, New **[**74]** York, NY.

For Lloyds Banking Group plc., HBOS Plc., Defendants (1:12-cv-05723-NRB): Arthur J. Burke, Davis Polk & Wardwell, New York, NY; Lisa Jean Fried, Hogan Lovells US LLP (nyc), New York, NY; Robert Frank Wise, Jr, Davis Polk & Wardwell LLP, New York, NY.

For The Royal Bank of Scotland Group Plc., Defendant (1:12-cv-05723-NRB): Alan Schoenfeld, David Sapir Lesser, Fraser Lee Hunter, Jr, Wilmer Cutler Pickering Hale & Dorr LLP (NYC), New York, NY; Robert Frank Wise, Jr, Davis Polk & Wardwell LLP, New York, NY.

For WestLB AG, Royal Bank of Scotland Group plc, Defendants (1:12-cv-05723-NRB): Arthur J. Burke, Davis Polk & Wardwell, New York, NY.

For British Bankers' Association, BBA Enterprises Ltd., BBA Libor Ltd., Defendants (1:12-cv-05723-NRB): Jeff G. Hammel, LEAD ATTORNEY, Latham and Watkins (NY), New York, NY; Richard David Owens, LEAD ATTORNEY, Latham & Watkins LLP (NY), New York, NY; Robert Frank Wise, Jr, Davis Polk & Wardwell LLP, New York, NY.

For UBS AG, Defendant (1:12-cv-05723-NRB): Eric Jonathan Stock, Gibson, Dunn & Crutcher, LLP (NY), New York, NY.

LIBOR VII

Table of Contents

[*457] I. INTRODUCTION [76]**

After more than six years of litigation and six substantial opinions[1] considering extensively the nature of LIBOR and its alleged manipulation,[2] we consider in this, our seventh major opinion, whether three of the cases consolidated into this multidistrict litigation should proceed as class actions: the Exchange-Based action, Metzler Investment GmbH v. Credit Suisse Group AG, No. 11 Civ. 2613; the Lender action, Berkshire Bank v. Bank of America Corp., No. 12 Civ. 5723; and the Over-the-Counter (OTC) action, Mayor of Baltimore v. **[*458]** Credit Suisse Group AG, No. 11 Civ. 5450. For the reasons stated below, Exchange plaintiffs' and Berkshire Bank's motions for certification of an Exchange-based class and a Lender class are denied. We grant in part and deny in part OTC plaintiffs' motion, certifying a class only as to the antitrust claims in that action.

In litigating the question of class certification, the parties have also filed ten motions to exclude expert testimony under the admissibility standards set forth in *Daubert v. Merrell Dow Pharmaceuticals, Inc., 509 U.S. 579, 113 S. Ct. 2786, 125 L. Ed. 2d 469 (1993)*. The only one-line summary we can provide is that some of the Daubert motions are granted, some are denied, and others are granted in part and denied in part, as set forth in extensive detail below.

---

[1] *In re LIBOR-Based Fin. Instruments Antitrust Litig. ("LIBOR VI"), 2016 U.S. Dist. LEXIS 175929, 2016 WL 7378980 (S.D.N.Y. Dec. 20, 2016)*, ECF No. 1676; *In re LIBOR-Based Fin. Instruments Antitrust Litig. ("LIBOR V"), 2015 U.S. Dist. LEXIS 149629, 2015 WL 6696407 (S.D.N.Y. Nov. 3, 2015)*, ECF No. 1234; *In re LIBOR-Based Fin. Instruments Antitrust Litig. ("LIBOR IV"), 2015 U.S. Dist. LEXIS 147561, 2015 WL 6243526 (S.D.N.Y. Oct. 20, 2015)*, ECF No. 1222, aff'd in part, vacated and remanded in part sub nom. *Charles Schwab Corp. v. Bank of Am. Corp. ("Schwab"), 2018 U.S. App. LEXIS 4519, 883 F.3d 68, 2018 WL 1022541 (2d Cir. 2018)*; *In re LIBOR-Based Fin. Instruments Antitrust Litig. ("LIBOR III"), 27 F. Supp. 3d 447 (S.D.N.Y. 2014)*, ECF No. 568; **[**77]** *In re LIBOR-Based Fin. Instruments Antitrust Litig. ("LIBOR II"), 962 F. Supp. 2d 606 (S.D.N.Y. 2013)*, ECF No. 389; *In re LIBOR-Based Fin. Instruments Antitrust Litig. ("LIBOR I"), 935 F. Supp. 2d 666 (S.D.N.Y. 2013)*, ECF No. 286, vacated and remanded sub nom. *Gelboim v. Bank of Am. Corp. ("Gelboim"), 823 F.3d 759 (2d Cir. 2016)*.

[2] "Even where we omit to use a word such as 'alleged' in reference to claims against defendants, nothing in this opinion should be taken as a finding that any defendant manipulated LIBOR, that any defendant committed any other form of wrongdoing, or that any plaintiff suffered injury." LIBOR V, 2015 WL

II. GENERAL LEGAL STANDARDS

We first set forth the general legal standards applicable to our resolution of the pending motions.

1. Class Certification

HN1[] "The class action is 'an exception to the usual rule that litigation is conducted by and on behalf of the individual named parties only.'" *Wal-Mart Stores, Inc. v. Dukes, 564 U.S. 338, 348, 131 S. Ct. 2541, 180 L. Ed. 2d 374 (2011)* (quoting *Califano v. Yamasaki, 442 U.S. 682, 700-01, 99 S. Ct. 2545, 61 L. Ed. 2d 176 (1979))*. "To come within the exception, a party seeking to maintain a class action 'must affirmatively demonstrate his compliance' with *Rule 23*." *Comcast Corp. v. Behrend, 569 U.S. 27, 33, 133 S. Ct. 1426, 185 L. Ed. 2d 515 (2013)* (quoting *Dukes, 564 U.S. at 350*). When presented with a motion for class certification, we are to "assess all of the relevant evidence admitted at the class certification stage and determine whether each *Rule 23* requirement has been met, just as [we] would resolve **[**78]** a dispute about any other threshold prerequisite for continuing a lawsuit." *In re Initial Pub. Offerings Sec. Litig. ("In re IPO"), 471 F.3d 24, 42 (2d Cir. 2006)*. This assessment necessarily entails the resolution of "factual disputes relevant to each *Rule 23* requirement," an obligation that "is not lessened by overlap between a *Rule 23* requirement and a merits issue, even a merits issue that is identical with a *Rule 23* requirement." *Id. at 41*; see also *Dukes, 564 U.S. at 351* (noting that the "rigorous analysis" of the *Rule 23* requirements "will entail some overlap with the merits of the plaintiff's underlying claim"). "[T]he preponderance of the evidence standard applies to evidence proffered to establish *Rule 23*'s requirements." *Teamsters Local 445 Freight Div. Pension Fund v. Bombardier Inc., 546 F.3d 196, 202 (2d Cir. 2008)*.

1.1. Standing

HN2[] Before considering the *Rule 23* requirements, we first consider threshold standing issues. "Standing" in the class action context refers to two related but analytically distinct doctrines separated by a "murky line": "traditional Article III standing" on the one hand and "so-called 'class standing'" on the other. *Ret. Bd. of the Policemen's Annuity & Benefit Fund v. Bank of N.Y. Mellon ("RBPA"), 775 F.3d 154, 160 (2d Cir. 2014)*; see also *LIBOR III, 27 F. Supp. 3d at 480-82, slip op. at *108*.

Article III standing is assessed using the oft-recited threepart formulation set forth by the Supreme Court: a "plaintiff must have (1) suffered **[**79]** an injury in fact, (2) that is fairly traceable to the challenged conduct of the defendant, and (3) that is likely to be redressed by a favorable judicial decision." *Spokeo, Inc. v. Robins, 136 S. Ct. 1540, 1547, 194 L. Ed. 2d 635 (2016)*; see also *LIBOR III, 27 F. Supp. 3d at 481, slip op. at *66* (citing *Lujan v. Defs. of Wildlife, 504 U.S. 555, 560-61,* ***[*459]*** *112 S. Ct. 2130, 119 L. Ed. 2d 351 (1992))*. While an injury-in-fact must be "concrete and particularized" and "actual or imminent," *Lujan, 504 U.S. at 560*, "an injury-in-fact need not be capable of sustaining a valid cause of action," *Denney v. Deutsche Bank AG, 443 F.3d 253, 264 (2d Cir. 2006)*. Rather, "the fact that an injury may be outweighed by other benefits, while often sufficient to defeat a claim for damages, does not negate [Article III] standing." *Id. at 265*.

In the class action context, the Second Circuit has made clear that "no class may be certified that contains members lacking Article III standing" and that any "class must therefore be defined in such a way that anyone within it would have [Article III] standing." *Id. at 264*. However, HN3[] when presented with a putative class, "[w]e do not require that each member . . . submit evidence of personal standing." *Id. at 263*. Rather, "only one of the named Plaintiffs is required to establish standing in order to seek relief on behalf of the entire class." *Cent. States Se. & Sw. Areas Health & Welfare Fund v. Merck-Medco Managed Care, L.L.C., 504 F.3d 229, 241 (2d Cir. 2007)* (emphasis added). "[P]assive members need not make any individual showing of standing, because the standing issue focuses on whether the plaintiff **[**80]** is properly before the court, not whether represented parties or absent class members are properly before the court." *Denney, 443 F.3d at 264* (alteration in original) (quoting 1 Herbert B. Newberg & Alba Conte, Newberg on Class Actions § 2:7 (4th ed. 2002)).

While only one named plaintiff need establish Article III standing and our analysis need not consider evidence from absent class members, we must nonetheless consider Article III standing as against each defendant. "[F]or every named defendant there must be at least one named plaintiff who can assert a claim directly against that defendant." *LIBOR III, 27 F. Supp. 3d at 481, slip op. at *66* (emphasis omitted) (quoting *NECA-IBEW Health & Welfare Fund v. Goldman Sachs & Co. ("NECA"), 693 F.3d 145, 159 (2d Cir. 2012))*.

"[A]t that point, [Article III] standing is satisfied and only then will the inquiry shift to a class action analysis" and the question of class standing, which refers to a named plaintiff's ability to assert claims on behalf of absent class members. *NECA, 693 F.3d at 159* (quoting *Merck-Medco, 504 F.3d at 241*). ***HN4***[] "[I]n a putative class action, a plaintiff has class standing if he plausibly alleges (1) that he personally has suffered some actual injury as a result of the putatively illegal conduct of the defendant, and (2) that such conduct implicates the same set of concerns **[**81]** as the conduct alleged to have caused injury to other members of the putative class by the same defendants." *RBPA, 775 F.3d at 161* (emphasis added) (alteration in original) (quoting *NECA, 693 F.f3d at 162*). This standard, "derive[d] from constitutional standing principles" but also distinct from Article III standing itself, serves to insure that "the named plaintiff's litigation incentives are sufficiently aligned with those of the absent class members that the named plaintiff may properly assert claims on their behalf." Id. As the Second Circuit's formulation of the class standing test makes clear, class standing is assessed based on allegations rather than evidence. See, e.g., id. (holding that named plaintiffs had satisfied the first prong of the two-prong class standing test because "they ha[d] adequately pled that they have personally suffered an actual injury as a result of [the defendant's] putatively illegal conduct").

1.2. *Rule 23(a)*

HN5[] To proceed as a class action, each of the requirements of *Rule 23(a)* must be met. **[*460]** As relevant here, *Rule 23(a)* provides that "[o]ne or more members of a class may sue . . . as representative parties on behalf of all members only if: (1) the class is so numerous that joinder of all members is impracticable; (2) there **[**82]** are questions of law or fact common to the class; (3) the claims . . . of the representative parties are typical of the claims . . . of the class; and (4) the representative parties will fairly and adequately protect the interests of the class." *Fed. R. Civ. P. 23(a)*. These requirements are generally referred to as numerosity, commonality, typicality, and adequacy of representation.

HN6[] *Rule 23(a)(1)* requires the class to be sufficiently numerous such that "joinder of all members is impracticable," *Fed. R. Civ. P. 23(a)(1)*, but this requirement "does not mandate that joinder of all parties be impossible," *Merck-Medco, 504 F.3d at 244*. Though "the numerosity inquiry is not strictly mathematical," numerosity "is presumed for classes larger than forty members." *Pa. Pub. Sch. Emps.' Ret. Sys. v. Morgan Stanley & Co., 772 F.3d 111, 120 (2d Cir. 2014)*. Plaintiffs need not furnish "evidence of exact class size or identity of class members to satisfy the numerosity requirement." *Robidoux v. Celani, 987 F.2d 931, 935 (2d Cir. 1993)*.

HN7[] The next requirement, commonality, demands that there be "questions of law or fact common to the class." *Fed. R. Civ. P. 23(a)(2)*. A question is common to the class if it is "capable of classwide resolution -- which means that determination of its truth or falsity will resolve an issue that is central to the validity of each one of the claims in one stroke." *Dukes, 564 U.S. at 350*. That is, "[c]ommonality requires the plaintiff to demonstrate **[**83]** that the class members 'have suffered the same injury,'" which requires establishing more than the mere fact that class members "have all suffered a violation of the same provision of law." *Id. at 349-50* (quoting *Gen. Tel. Co. of the Sw. v. Falcon, 457 U.S. 147, 157, 102 S. Ct. 2364, 72 L. Ed. 2d 740 (1982))*. However, "[w]here the same conduct or practice by the same defendant gives rise to the same kind of claims from all class members, there is a common question." *Johnson v. Nextel Commc'ns, Inc., 780 F.3d 128, 137 (2d Cir. 2015)* (quoting *Suchanek v. Sturm Foods, Inc., 764 F.3d 750, 756 (7th Cir. 2014))*.

Third, ***HN8***[] "[t]o establish typicality under *Rule 23(a)(3)*, the party seeking certification must show that 'each class member's claim arises from the same course of events and each class member makes similar legal arguments to prove the defendant's liability.'" *In re Flag Telecom Holdings, Ltd. Sec. Litig., 574 F.3d 29, 35 (2d Cir.*

2009) (quoting Robidoux, 987 F.2d at 936). This requirement is related to, but distinct from, the requirement of class standing. See RBPA, 775 F.3d at 161 (citing NECA, 693 F.3d at 158 n.9). "Typicality requires that 'the disputed issue[s] of law or fact occupy essentially the same degree of centrality to the named plaintiff's claim as to that of other members of the proposed class.'" Mazzei v. Money Store, 829 F.3d 260, 272 (2d Cir. 2016) (internal quotation marks omitted) (quoting Caridad v. Metro-N. Commuter R.R., 191 F.3d 283, 293 (2d Cir. 1999), overruled on other grounds by In re IPO, 471 F.3d 24). Accordingly, typicality is not satisfied "where a putative class representative is subject to unique defenses which threaten to become the focus of the litigation." Baffa v. Donaldson, Lufkin & Jenrette Sec. Corp., 222 F.3d 52, 59 (2d Cir. 2000) (quoting Gary Plastic Packaging Corp. v. Merrill Lynch, Pierce, Fenner & Smith, Inc., 903 F.2d 176, 180 (2d Cir. 1990)). "[T]he defendant **[**84]** need not show at the certification stage that [a] unique defense will prevail, only that it is meritorious enough to **[*461]** require the plaintiff to devote considerable time to rebut the unique defense," In re Digital Music Antitrust Litig., 321 F.R.D. 64, 97 (S.D.N.Y. 2017) (quoting Lapin v. Goldman Sachs & Co., 254 F.R.D. 168, 179 (S.D.N.Y. 2008)). "However, the court should not disqualify a named plaintiff based upon any groundless, far-fetched defense that the defendant manages to articulate." Lapin, 254 F.R.D. at 179 (quoting Hallet v. Li & Fung Ltd., No. 95 Civ. 8917 (JSM), 1997 U.S. Dist. LEXIS 15509, 1997 WL 621111, at *3 (S.D.N.Y. Oct. 6, 1997)).

Finally, **HN9**[] "the representative parties [must] fairly and adequately protect the interests of the class." Fed. R. Civ. P. 23(a)(4). This requirement overlaps in part with those of commonality and typicality, but adequacy of representation "also raises concerns about the competency of class counsel and conflicts of interest." Dukes, 564 U.S. at 349 n.5 (quoting Falcon, 457 U.S. at 158 n.13); see also Baffa, 222 F.3d at 60 ("Generally, adequacy of representation entails inquiry as to whether: 1) plaintiff's interests are antagonistic to the interest of other members of the class and 2) plaintiff's attorneys are qualified, experienced and able to conduct the litigation."). Accordingly, an analysis of adequacy of representation considers "whether the class representative has adequate incentive to pursue the class's claim, and whether some difference between the class representative and some class members might undermine that **[**85]** incentive." In re Payment Card Interchange Fee & Merch. Disc. Antitrust Litig., 827 F.3d 223, 231 (2d Cir. 2016). However, "[n]ot every conflict among subgroups of a class will prevent class certification -- the conflict must be 'fundamental' to violate Rule 23(a)(4)." In re Literary Works in Elec. Databases Copyright Litig., 654 F.3d 242, 249 (2d Cir. 2011).

1.3. Rule 23(b)(3)

HN10[] In addition to satisfying each requirement of Rule 23(a), a putative class must also meet "[o]ne of the bases for certification under Rule 23(b)." Roach v. T.L. Cannon Corp., 778 F.3d 401, 405 (2d Cir. 2015). Each class of plaintiffs here seeks to proceed under Rule 23(b)(3), which provides that a class action may proceed as such if "the court finds that the questions of law or fact common to class members predominate over any questions affecting only individual members, and that a class action is superior to other available methods for fairly and efficiently adjudicating the controversy." Fed. R. Civ. P. 23(b)(3) (emphasis added). Predominance and superiority must each be satisfied. See Sykes v. Mel S. Harris & Assocs., 780 F.3d 70, 82 (2d Cir. 2015) (referring to Rule 23(b)(3) as a "disjunctive inquiry"); see also Roach, 778 F.3d at 405.

HN11[] "The Rule 23(b)(3) predominance inquiry tests whether proposed classes are sufficiently cohesive to warrant adjudication by representation." Amchem Prods., Inc. v. Windsor, 521 U.S. 591, 623, 117 S. Ct. 2231, 138 L. Ed. 2d 689 (1997). It serves to "ensure[] that the class will be certified only when it would 'achieve economies of time, effort, and expense, and promote . . . uniformity of decision as to persons similarly situated, without sacrificing procedural fairness or bringing about other undesirable **[**86]** results.'" Cordes & Co. Fin. Servs., Inc. v. A.G. Edwards & Sons, Inc., 502 F.3d 91, 104 (2d Cir. 2007) (omission in original) (quoting Amchem, 521 U.S. at 615).

The predominance analysis entails "careful scrutiny to the relation between common and individual questions in a case." Tyson Foods, Inc. v. Bouaphakeo, 136 S. Ct. 1036, 1045, 194 L. Ed. 2d 124 (2016). "An individual question is one where 'members of a proposed **[*462]** class will need to present evidence that varies from member to member,' while a common question is one where 'the same evidence will suffice for each member to make a prima facie showing [or] the issue is susceptible to generalized, class-wide proof.'" Id. (alterations in original) (quoting 2

William B. Rubenstein, Newberg on Class Actions § 4:50 (5th ed. 2012)). As its name suggests, "[t]he predominance requirement calls only for predominance, not exclusivity, of common questions." *In re Visa Check/MasterMoney Antitrust Litig., 280 F.3d 124, 140 (2d Cir. 2001)* (quoting *In re Alcoholic Beverages Antitrust Litig., 95 F.R.D. 321, 328 (E.D.N.Y. 1982)*, overruled on other grounds by *In re IPO, 471 F.3d 24*. The inquiry is inherently comparative, taking into account the weight and significance of common and individual issues rather than simply their numbers. See, e.g., *In re Petrobras Sec., 862 F.3d 250, 268 (2d Cir. 2017)* ("[P]redominance is a comparative standard.").

HN12[] The existence of a single common question suffices to establish commonality, but "*Rule 23(b)(3)*'s predominance requirement is 'more demanding than *Rule 23(a)*.'" *Nextel, 780 F.3d at 138* (quoting *Comcast, 569 U.S. at 34*)). Ultimately, we ask "whether issues susceptible to generalized proof outweigh individual **[**87]** issues," *Sykes, 780 F.3d at 88* (internal quotation marks omitted) (quoting *McLaughlin v. Am. Tobacco Co., 522 F.3d 215, 231 (2d Cir. 2008)*, abrogated on other grounds by *Bridge v. Phx. Bond & Indem. Co., 553 U.S. 639, 128 S. Ct. 2131, 170 L. Ed. 2d 1012 (2008))*, or put differently, whether "common issues are 'more substantial' than individual ones," *Myers v. Hertz Corp., 624 F.3d 537, 549 (2d Cir. 2010)* (quoting *Moore v. PaineWebber, Inc., 306 F.3d 1247, 1252 (2d Cir. 2002))*. In conducting this balancing test, we "assess (1) the 'elements of the claims and defenses to be litigated,' and (2) 'whether generalized evidence could be offered to prove those elements on a class-wide basis or whether individualized proof will be needed to establish each class member's entitlement to relief.'" *Nextel, 780 F.3d at 138* (quoting 1 McLaughlin on Class Actions § 5:23 (11th ed. 2014)); see also *Erica P. John Fund, Inc. v. Halliburton Co. ("Halliburton I"), 563 U.S. 804, 809, 131 S. Ct. 2179, 180 L. Ed. 2d 24 (2011)* ("Considering whether 'questions of law or fact common to class members predominate' begins, of course, with the elements of the underlying cause of action." (quoting *Fed. R. Civ. P. 23(b)(3)*)). "This analysis is 'more[] qualitative than quantitative,' and must account for 'the nature and significance of the material common and individual issues in the case.'" *In re Petrobras, 862 F.3d at 271* (alterations in original) (citations omitted) (quoting 1 William B. Rubenstein, Newberg on Class Actions § 4:50 (5th ed. 2012)).

HN13[] In addition to establishing the predominance of common questions, plaintiffs must also establish "that **[**88]** a class action is superior to other available methods for fairly and efficiently adjudicating the controversy." *Fed. R. Civ. P. 23(b)(3)*. *Rule 23(b)(3)* sets forth four "matters pertinent" to the superiority inquiry: "(A) the class members' interests in individually controlling the prosecution or defense of separate actions; (B) the extent and nature of any litigation concerning the controversy already begun by . . . class members; (C) the desirability or undesirability of concentrating the litigation of the claims in the particular forum; and (D) the likely difficulties in managing a class action." *Fed. R. Civ. P. 23(b)(3)*. "[W]hile these factors, structurally, apply to both predominance and superiority, they more clearly implicate the superiority inquiry." *Sykes, 780 F.3d at 82*; see also *In re Am. Int'l Grp., Inc. Sec. Litig., 689 F.3d 229, 242 (2d Cir. 2012)* ("[T]he plain text of *Rule 23(b)(3)* states that one of the 'matters pertinent' to a finding of **[*463]** predominance is 'the likely difficulties in managing a class action.'" (quoting *Fed. R. Civ. P. 23(b)(3)*)).

HN14[] "While *Rule 23(b)(3)* sets out four individual factors for courts to consider, manageability 'is, by the far, the most critical concern in determining whether a class action is a superior means of adjudication.'" *Sykes, 780 F.3d at 82* (quoting 2 William B. Rubenstein, Newberg on Class Actions § 4:72 (5th ed. 2014)). Despite the importance of manageability, **[**89]** the Second Circuit has also cautioned that "failure to certify an action under *Rule 23(b)(3)* on the sole ground that it would be unmanageable is disfavored and should be the exception rather than the rule." *In re Petrobras, 862 F.3d at 268* (quoting *In re Visa Check, 280 F.3d at 140*). Ultimately, these factors are "nonexhaustive" and nonexclusive, *Amchem, 521 U.S. at 615*, and "assessing superiority is a fact-specific inquiry," *In re Vivendi, S.A., Sec. Litig., 838 F.3d 223, 264 (2d Cir. 2016)*.

1.4. Ascertainability

HN15[] In addition to the express requirements of *Rule 23(a)* and *Rule 23(b)*, the Second Circuit has "recognized an 'implied requirement of ascertainability' in *Rule 23*." *Brecher v. Republic of Argentina, 806 F.3d 22, 24 (2d Cir. 2015)* (quoting *In re IPO, 471 F.3d at 30*). Though "the touchstone of ascertainability is whether the class is 'sufficiently definite so that it is administratively feasible for the court to determine whether a particular individual is a member,'" id. (quoting 7A Charles A. Wright et al., Federal Practice & Procedure § 1760 (3d ed. 1998)), the Second Circuit has clarified that ascertainability does not itself require that a proposed class be administratively feasible, see *In re Petrobras, 862 F.3d at 268-69*. Rather, ascertainbility imposes only a "modest threshold requirement" that asks only "whether a proposed class is defined using objective criteria that establish a membership with definite boundaries." *Id. at 269*. It "will only preclude certification if a proposed class definition **[**90]** is indeterminate in some fundamental way." Id.

HN16[] Given that ascertainability is "distinct from the predominance requirement," *id. at 264 n.15* (quoting *In re IPO, 471 F.3d at 45*), we do not read In re Petrobras to preclude a consideration of administrative feasibility concerns in analyzing predominance and superiority. Indeed, In re Petrobras reasoned that a freestanding administrative feasibility requirement as part of ascertainability would be duplicative of the manageability factor of the superiority inquiry (if administrative feasibility were considered comparatively rather than absolutely), *id. at 268*, and would "risk[] encroaching on territory belonging to the predominance requirement, such as classes that require highly individualized determinations of member eligibility," id. (citing *Mazzei, 829 F.3d at 272*). Accordingly, to the extent that any of the putative classes present administrative feasibility concerns, we will consider those issues not as part of the ascertainability analysis, but as part of the *Rule 23(b)(3)* predominance and superiority inquiries.

1.5. Modifications to the Class Definition

As we have recognized in denying defendants' motions to strike plaintiffs' class-action allegations, ***HN17***[] "[a] court is not bound by the class definition proposed in the complaint **[**91]** and should not dismiss the action simply because the complaint seeks to define the class too broadly." May 13, 2016 Order, *2016 U.S. Dist. LEXIS 63745 at 74, 2016 WL 2851333, at *2,* (quoting *Robidoux, 987 F.2d at 937*), ECF No. 1408. *Rule 23(c)(4)* and *Rule 23(c)(5)* provide two specific means of modification, but a court also "has broad **[*464]** discretion to modify the class definition as appropriate." 5 *Moore's Federal Practice § 23.21[6]* (3d ed. 2017).

HN18[] *Rule 23(c)(4)* provides that "[w]hen appropriate, an action may be brought or maintained as a class action with respect to particular issues." *Fed. R. Civ. P. 23(c)(4)*. The rule may be applied "to certify a class on a particular issue even if the action as a whole does not satisfy *Rule 23(b)(3)*'s predominance requirement." *In re Nassau Cty. Strip Search Cases, 461 F.3d 219, 225 (2d Cir. 2006)*. Additionally, "[i]f an action includes multiple claims, one or more of which might qualify as a certifiable class claim, the court may separate such claims from other claims in the action and certify them under the provisions of *subsection (c)(4) of Rule 23*." 1 McLaughlin on Class Actions § 4:44 (14th ed.) (Westlaw 2017) (internal quotation marks omitted); see also, e.g., *In re AMF Bowling Secs. Litig., No. 99 Civ. 3023 (DC), 2002 U.S. Dist. LEXIS 4949, 2002 WL 461513 (S.D.N.Y. Mar. 26, 2002)*.

The Second Circuit has instructed that "[d]istrict courts should take full advantage of this provision to certify separate issues," *Robinson v. Metro-N. Commuter R.R. Co., 267 F.3d 147, 167 (2d Cir. 2001)* (alterations incorporated) (internal quotation marks omitted), abrogated on other grounds by *Dukes, 564 U.S. 338, 131 S. Ct. 2541, 180 L. Ed. 2d 374*, but has also recognized that issue certification may be **[**92]** inappropriate if a "number of questions . . . would remain for individual adjudication" or if issue certification "would not materially advance the litigation because it would not dispose of larger issues" relevant to the case. *McLaughlin, 522 F.3d at 234*.

That is, ***HN19***[] "the rule should not be invoked merely to postpone confronting difficult certification questions," 7AA Charles A. Wright et al., Federal Practice & Procedure § 1790 (3d ed.) (Westlaw 2017), and indeed, overly aggressive application of *Rule 23(c)(4)* would nullify *Rule 23(b)(3)*'s predominance requirement, as a class may be certified only as to the common issues raised, cf. *Castano v. Am. Tobacco Co., 84 F.3d 734, 745 n.21 (5th Cir. 1996)* ("[T]he result would be automatic certification in every case where there is a common issue, a result that could not have been intended."). "[A] class action movant cannot gerrymander predominance by suggesting that only a single issue be certified for class treatment (in which, by definition, it will 'predominate')" when more substantial individual issues remain. 1 McLaughlin on Class Actions § 4:43 (14th ed.) (Westlaw 2017) (quoting *Hyderi v. Wash. Mut. Bank, FA, 235 F.R.D. 390, 398 (N.D. Ill. 2006))*.

Paralleling *Rule 23(c)(4)*, ***HN20***[] *Rule 23(c)(5)* provides that "[w]hen appropriate, a class may be divided into subclasses that are each treated as a class under this rule." *Fed. R. Civ. P. 23(c)(5)*.[3] For example, when conflicts exist between class **[**93]** members, they "can be cured by dividing the class into separate 'homogeneous subclasses . . . with separate representation to eliminate conflicting interests.'" *In re Literary Works, 654 F.3d at 249-50* (quoting *Ortiz v. Fibreboard Corp., 527 U.S. 815, 856, 119 S. Ct. 2295, 144 L. Ed. 2d 715 (1999)*). However, the placement of plaintiffs into "multiple subclasses **[*465]** . . . can generate unnecessary administrative inefficiencies," 3 William B. Rubenstein, Newberg on Class Actions § 7:30 (5th ed.) (Westlaw 2017) (footnote omitted), and "at some point there must be an end to reclassification," *Ortiz, 527 U.S. at 857*; see also *In re Literary Works, 654 F.3d at 257* (describing seven subclasses as "surely beyond the point at which 'reclassification with separate counsel' must end"). "The necessity of a large number of subclasses may indicate that common questions do not predominate," and "[t]he creation of a number of subclasses . . . may make the case unmanageable [and] may defeat the superiority requirement." Manual for Complex Litigation § 21.23 (4th ed. 2004).

HN21[] *Rule 23(c)(4)* and *Rule 23(c)(5)* are phrased permissively. Consistent with the text of the rule, "[t]he court . . . is not obligated to implement *Rule 23(c)(4)* [and *Rule 23(c)(5)*] on its own initiative" by certifying classes only as to certain issues or creating subclasses. *Lundquist v. Sec. Pac. Auto. Fin. Servs. Corp., 993 F.2d 11, 14 (2d Cir. 1993)* (citing *U.S. Parole Comm'n v. Geraghty, 445 U.S. 388, 408, 100 S. Ct. 1202, 63 L. Ed. 2d 479 (1980)*); see also 7AA Charles A. Wright et al., Federal Practice & Procedure § 1790 (3d ed.) (Westlaw 2017) ("[T]he trial court has no independent **[**94]** obligation to utilize *Rule 23(c)(4)* sua sponte."). It remains "plaintiff's burden to show how the action may be [modified] to avoid certification problems." *Lundquist, 993 F.2d at 14* (quoting *Geraghty, 445 U.S. at 408*).[4] Similarly, the decision to otherwise modify a class definition is a discretionary one. See *Mazzei v. Money Store, 288 F.R.D. 45, 55 (S.D.N.Y. 2012)* ("[C]ourts have the discretion to construe the complaint or redefine the class to bring it within the scope of *Rule 23*." (internal quotation marks omitted)); see also 7A Charles A. Wright et al., Federal Practice & Procedure § 1759 (3d ed.) (Westlaw 2017).

Accordingly, in order to avoid "the perverse effect of turning defense counsel and the Court into plaintiffs' counsel's co-counsel, with plaintiffs waiting to see what objections defendants raise and how the Court rules on those objections and then amending their [proposed class definitions] as necessary based on what they learned in the process," *LIBOR II, 962 F. Supp. 2d at 626-27, slip op. at *42*, we will consider issue certification under *Rule 23(c)(4)*, subclass creation under *Rule 23(c)(5)*, and other modifications of the proposed class definitions under our discretionary authority only where plaintiffs have set forth such proposals in sufficient detail.

2. Expert Opinion

2.1. The Daubert Standard

Expert testimony is admissible under *Rule 702 of the Federal Rules of Evidence*, which provides in full: **[**95]**

> A witness who is qualified as an expert by knowledge, skill, experience, training, or education may testify in the form of an opinion or otherwise if: (a) the expert's scientific, technical, or other specialized knowledge will help

---

[3] Prior to the 2007 amendments to the *Federal Rules of Civil Procedure, Rule 23(c)(4)* encompassed the current version of *Rule 23(c)(4)* as *Rule 23(c)(4)(A)* and the current version of *Rule 23(c)(5)* as *Rule 23(c)(4)(B)*. In its entirety, the pre-2007 version of *Rule 23(c)(4)* read as follows: "When appropriate (A) an action may be brought or maintained as a class action with respect to particular issues, or (B) a class may be divided into subclasses and each subclass treated as a class, and the provisions of this rule shall then be construed and applied accordingly." 5 *Moore's Federal Practice § 23App.07[1]* (3d ed. 2017).

[4] We accordingly do not read *Robidoux*'s statement that a court "should not dismiss the action simply because the complaint seeks to define the class too broadly," *987 F.2d at 937*, to require that a court explore every avenue in order to certify a class in some form in each case. See *Lundquist, 993 F.2d at 15* ("[T]he district court's refusal to shoulder what, in the final analysis, is plaintiff's burden cannot be regarded in this case as an abuse of discretion.").

> the trier of fact to understand the evidence or to determine a fact in issue; (b) the testimony is based on sufficient facts or data; (c) the testimony is the product of reliable principles and methods; and (d) the **[*466]** expert has reliably applied the principles and methods to the facts of the case.

Under the Supreme Court's decisions in *Daubert v. Merrell Dow Pharmaceuticals, Inc., 509 U.S. 579, 113 S. Ct. 2786, 125 L. Ed. 2d 469 (1993)*, and *Kumho Tire Co. v. Carmichael, 526 U.S. 137, 119 S. Ct. 1167, 143 L. Ed. 2d 238 (1999)*, ***HN22***[] we have a "'gatekeeping' function under *Rule 702*," under which we are "charged with 'the task of ensuring that an expert's testimony both rests on a reliable foundation and is relevant to the task at hand.'" *Amorgianos v. AMTRAK, 303 F.3d 256, 265 (2d Cir. 2002)* (quoting *Daubert, 509 U.S. at 597*). "[T]he proponent of expert testimony has the burden of establishing by a preponderance of the evidence that the admissibility requirements of *Rule 702* are satisfied." *United States v. Williams, 506 F.3d 151, 160 (2d Cir. 2007)*.

The Second Circuit has distilled *Rule 702*'s requirements into three broad criteria: (1) qualifications, (2) reliability, and (3) relevance and assistance to the trier of fact. See *Nimely v. City of New York, 414 F.3d 381, 396-97 (2d Cir. 2005)*.

2.1.1. Qualifications

HN23[] When presented with expert testimony, we first consider "the **[**96]** threshold question of whether a witness is 'qualified as an expert by knowledge, skill, experience, training, or education' to render his or her opinions." *Id. at 396 n.11* (quoting *Fed. R. Evid. 702*). We analyze "the totality of the witness's background to determine whether he or she exhibits any one or more of the qualifications listed in *Rule 702* . . . with respect to a relevant field." *Washington v. Kellwood Co., 105 F. Supp. 3d 293, 304 (S.D.N.Y. 2015)*.

As *Rule 702*'s use of the disjunctive suggests, "any one of [the] five forms of qualifications will satisfy the rule." *Tiffany (NJ) Inc. v. eBay, Inc., 576 F. Supp. 2d 457, 458 (S.D.N.Y. 2007)*. "A formal education in a particular field is sufficient to qualify a witness as an expert" as a general matter, such that a "lack of extensive practical experience directly on point does not necessarily preclude [the] expert from testifying." *Cary Oil Co. v. MG Ref. & Mktg., Inc., No. 99 Civ. 1725 (VM), 2003 U.S. Dist. LEXIS 6150, 2003 WL 1878246, at *2 (S.D.N.Y. Apr. 11, 2003)* (internal quotation marks omitted). Similarly, "a lack of formal training does not necessarily disqualify an expert from testifying if he or she has equivalent relevant practical experience." *In re Rezulin Prods. Liab. Litig., 309 F. Supp. 2d 531, 559 (S.D.N.Y. 2004)*.

Indeed, ***HN24***[] "[c]ourts in this circuit have noted that an expert should not be required to satisfy an overly narrow test of his own qualifications." *United States v. Tuzman, No. 15 Cr. 536 (PGG), 2017 U.S. Dist. LEXIS 208410, 2017 WL 6527261, at *9 (S.D.N.Y. Dec. 18, 2017)* (collecting cases) (quoting *Arista Records LLC v. Lime Grp. LLC, No. 06 Civ. 5936 (KMW), 2011 U.S. Dist. LEXIS 47416, 2011 WL 1674796, at *3 (S.D.N.Y. May 2, 2011))*. "[T]he Second Circuit [has] allowed an expert to testify as to matters within his general expertise **[**97]** even though he lacked qualifications as to certain technical matters within that field." *Pension Comm. of the Univ. of Montreal Pension Plan v. Banc of Am. Sec., LLC, 691 F. Supp. 2d 448, 457 (S.D.N.Y. 2010)* (citing *McCullock v. H.B. Fuller Co., 61 F.3d 1038, 1042-43 (2d Cir. 1995))*.

We then "compare the area in which the witness has superior knowledge, education, experience, or skill with the subject matter of the proffered testimony," which must overlap. *United States v. Tin Yat Chin, 371 F.3d 31, 40 (2d Cir. 2004)*. "[I]t is worth emphasizing that, because a witness qualifies as an expert with respect to certain matters or areas of knowledge, it by no means follows that he or she is qualified to express expert opinions as to other fields." *Nimely, 414 F.3d at 399 n.13*. **[*467]** Conversely, an expert's lack of qualifications as to some of the opinions offered does not render inadmissible the opinions that he is qualified to offer.

2.1.2 Reliability

HN25[] We next determine "whether the proffered testimony has a sufficiently 'reliable foundation' to permit it to be considered." Campbell ex rel. Campbell v. Metro. Prop. & Cas. Ins. Co., 239 F.3d 179, 184 (2d Cir. 2001) (quoting Daubert, 509 U.S. at 597). "In this inquiry, [we] should consider the indicia of reliability identified in Rule 702, namely, (1) that the testimony is grounded on sufficient facts or data; (2) that the testimony 'is the product of reliable principles and methods'; and (3) that 'the witness has applied the principles and methods reliably to the facts of the case.'" Amorgianos, 303 F.3d at 265 (quoting Fed. R. Evid. 702).

The Supreme Court has identified a number **[**98]** of factors that may be considered in assessing reliability: "(1) whether a theory or technique 'can be (and has been) tested,' (2) 'whether the theory or technique has been subjected to peer review and publication,' (3) a technique's 'known or potential rate of error,' and 'the existence and maintenance of standards controlling the technique's operation,' and (4) whether a particular technique or theory has gained 'general acceptance' in the relevant scientific community." Id. at 266 (citations omitted) (quoting Daubert, 509 U.S. at 593-94). These factors are not a "definitive checklist or test," Daubert, 509 U.S. at 593, as "the gatekeeping inquiry must be tied to the facts of a particular case," Kumho Tire, 526 U.S. at 150 (internal quotation marks omitted), and "will necessarily vary from case to case," Amorgianos, 303 F.3d at 266. HN26[] "[T]he law grants a district court the same broad latitude when it decides how to determine reliability as it enjoys in respect to its ultimate reliability determination." Restivo v. Hessemann, 846 F.3d 547, 576 (2d Cir. 2017) (emphasis omitted) (quoting Kumho Tire, 526 U.S. at 142).[5] Accordingly, "[i]n assessing the reliability of an expert opinion, a resort to common sense is not inappropriate." Johnson Elec. N. Am. Inc. v. Mabuchi Motor Am. Corp., 103 F. Supp. 2d 268, 286 (S.D.N.Y. 2000).

HN27[] Though "flexible," the reliability inquiry "must focus on the principles and methodology employed by the expert, without **[**99]** regard to the conclusions the expert has reached or [our] belief as to the correctness of those conclusions." Amorgianos, 303 F.3d at 266. The expert's methodology is to be assessed step-by-step, and "it is critical that an expert's analysis be reliable at every step." Id. at 267. "[A]ny step that renders the analysis unreliable under the Daubert factors renders the expert's testimony inadmissible." Id. (emphasis omitted) (quoting In re Paoli R.R. Yard PCB Litig., 35 F.3d 717, 745 (3d Cir. 1994)).

"But conclusions and methodology are not entirely distinct from one another." GE v. Joiner, 522 U.S. 136, 146, 118 S. Ct. 512, 139 L. Ed. 2d 508 (1997). "[N]othing in either Daubert or the Federal Rules of Evidence requires a district **[*468]** court to admit opinion evidence that is connected to existing data only by the ipse dixit of the expert," and "[a] court may conclude that there is simply too great an analytical gap between the data and the opinion proffered." Id. That is, "when an expert opinion is based on data, a methodology, or studies that are simply inadequate to support the conclusions reached, Daubert and Rule 702 mandate the exclusion of that unreliable opinion testimony." Amorgianos, 303 F.3d at 266.

We offer three additional observations HN28[] regarding the incomplete distinction between "methodology" on the one hand and "conclusions" and "results" on the other. First, a challenge to an expert's **[**100]** methodology will necessarily call into question the conclusions derived from the application of that methodology. Such a challenge does not impermissibly attack an expert's results simply because those results are collaterally damaged by the challenge directed towards the expert's methodology.

Second, robustness testing of an expert's methodology -- by applying that methodology to different data or with different assumptions and examining the results produced by the methodology so applied -- is not an impermissible challenge to the expert's results. Rather, this robustness and sensitivity testing relates directly to two of the Daubert factors articulated by the Supreme Court: whether the methodology "can be (and has been) tested" and the methodology's "known or potential rate of error." Daubert, 509 U.S. at 594. Robustness testing and sensitivity

[5] "While the gatekeeping function requires the district court to ascertain the reliability of [an expert's] methodology, it does not necessarily require that a separate hearing be held in order to do so." Williams, 506 F.3d at 161. Because the parties' Daubert motions have been extensively briefed and the record is well-developed, we conclude that the "formality of a separate hearing [is] not required." Id.; see also In re U.S. Foodservice Inc. Pricing Litig., 729 F.3d 108, 130 (2d Cir. 2013) ("[E]ven though the district court did not conduct a Daubert hearing, it considered the admissibility of the expert testimony on the papers.").

testing that produces contradictory or otherwise implausible results strongly suggest that a methodology has been insufficiently tested and that the methodology has a high potential rate of error.

Third, ***HN29***[] inconsistent results are an "indicia of unreliability" in an expert's methodologies. *Lippe v. Bairnco Corp., 99 F. App'x 274, 279 (2d Cir. 2004)*. This principle is clearest in the context of inconsistent results produced by **[**101]** the same methodology. See, e.g., *Louis Vuitton Malletier v. Dooney & Bourke, Inc., 525 F. Supp. 2d 558, 569 (S.D.N.Y. 2007)* (finding "unexplained inconsistency between the results" produced by two iterations of the same methodology to be a basis for exclusion); *United States v. Hermanek, 289 F.3d 1076, 1097 (9th Cir. 2002)* ("Inconsistent results may be an indicator of unreliability."). However, it is no less applicable to multiple methodologies intended to measure the same phenomenon that ultimately produce inexplicably inconsistent results. See *Lippe, 99 F. App'x at 279*; see also *In re Paoli, 35 F.3d at 777* (identifying "inconsistent results" produced by two analyses as supporting the exclusion of an expert's evidence).

HN30[] "When faced with expert testimony that contains both reliable and unreliable opinions, district courts often exclude only the unreliable testimony." *In re Pfizer Inc. Sec. Litig., 819 F.3d 642, 665 (2d Cir. 2016)*. If "the unreliable portion of an opinion can easily be distinguished from testimony that could help the [trier of fact], it may be an abuse of discretion to throw the good out with the bad." Id. However, "[we] are 'not obligated to prune away all of the problematic' elements of an expert's proposed testimony 'to save the remaining portions, however small.'" Id. (quoting *Bricklayers & Trowel Trades Int'l Pension Fund v. Credit Suisse Sec. (USA) LLC, 752 F.3d 82, 96 (1st Cir. 2014))*.

2.1.3 Relevance and Assistance to the Factfinder

HN31[] "Even after determining that a witness is 'qualified as an expert' to testify as to a particular matter, **[**102]** and that the opinion is based upon reliable data and methodology, *Rule 702*[(a)] requires the district court to make a third inquiry: whether the expert's testimony . . . will **[*469]** 'assist the trier of fact'" in understanding the evidence or determining a fact in issue. *Nimely, 414 F.3d at 397* (citations momitted) (quoting *Fed. R. Evid 702*). "This condition goes primarily to relevance," *Daubert, 509 U.S. at 591*, as "[e]xpert testimony which does not relate to any issue in the case is not relevant and, ergo, non-helpful," *Raskin v. Wyatt Co., 125 F.3d 55, 66 (2d Cir. 1997)* (alteration in original) (quoting *Daubert, 509 U.S. at 591*). Relevance, in turn, is assessed with respect to *Rule 401 of the Federal Rules of Evidence*: "whether it 'ha[s] any tendency to make the existence of any fact that is of consequence to the determination of the action more probable or less probable than it would be without the evidence.'" *Campbell, 239 F.3d at 184* (alteration in original) (quoting *Fed. R. Evid. 401*).

Accordingly, the Second Circuit has "consistently held . . . that expert testimony that usurps either the role of the trial judge" in determining "the applicable law or the role of the [trier of fact] in applying that law to the facts before it" is inadmissible because it "by definition does not aid the [trier of fact] in making a decision," *Nimely, 414 F.3d at 397* (quoting *United States v. Bilzerian, 926 F.2d 1285, 1294 (2d Cir. 1991)* and *United States v. Duncan, 42 F.3d 97, 101 (2d Cir. 1994))* (alterations incorporated and citations omitted).

Similarly, ***HN32***[] "expert testimony **[**103]** that seeks to address 'lay matters which [the trier of fact] is capable of understanding and deciding without the expert's help' is not relevant and is therefore inadmissible." *United States v. Jiau, 734 F.3d 147, 154 (2d Cir. 2013)* (quoting *Andrews v. Metro N. Commuter R.R. Co., 882 F.2d 705, 708 (2d Cir. 1989))*. That is, testimony addressing lay matters is not based on an "expert's scientific, technical, or other specialized knowledge," and therefore fails to satisfy the first part of *Rule 702(a)*. Accordingly, it is "inappropriate for experts to become a vehicle for factual narrative." *SEC v. Tourre, 950 F. Supp. 2d 666, 675 (S.D.N.Y. 2013)* (citing, inter alia, *Highland Capital Mgmt., L.P. v. Schneider, 551 F. Supp. 2d 173, 187 (S.D.N.Y. 2008))*.[6]

---

[6] Further, as Tourre recognized, factual narrative offered by an expert is not "traceable to a reliable methodology" and therefore "fails to fulfill Daubert's most basic requirements" in a second way. *950 F. Supp. 2d at 675* (citing *In re Rezulin, 309 F. Supp. 2d at 551*).

HN33[] As with qualifications and reliability, we also disaggregate an expert's opinions before assessing their relevance and helpfulness: the fact that some of an expert's opinions are irrelevant does not render all of the expert's opinions inadmissible. Nonetheless, we need not overly fragment an expert's opinions in order to pick out only the relevant and helpful portions. Cf. *In re Pfizer, 819 F.3d at 665*.[7]

[*470] 2.2 Application at Class Certification

HN34[] "Neither the Supreme Court nor the Second Circuit has definitely decided whether the Daubert standard governs the admissibility of expert evidence submitted at the class certification stage." *Adkins v. Morgan Stanley, 307 F.R.D. 119, 148 (S.D.N.Y. 2015)* (quoting *Chen-Oster v. Goldman, Sachs & Co., 114 F. Supp. 3d 110, 114 (S.D.N.Y. 2015))*. Indeed, **[**104]** the issue remains unsettled nationally and in this district. Compare, e.g., *In re Blood Reagents Antitrust Litig., 783 F.3d 183, 187 (3d Cir. 2015)* ("[A] plaintiff cannot rely on challenged expert testimony, when critical to class certification, to demonstrate conformity with *Rule 23* unless the plaintiff also demonstrates, and the trial court finds, that the expert testimony satisfies the standard set out in Daubert."); *Messner v. Northshore Univ. HealthSystem, 669 F.3d 802, 812-14 (7th Cir. 2012)*; *Ellis v. Costco Wholesale Corp., 657 F.3d 970, 982 (9th Cir. 2011)*; *Sher v. Raytheon Co., 419 F. App'x 887, 890-91 (11th Cir. 2011)*; and *Dandong v. Pinnacle Performance Ltd., No. 10 Civ. 8086 (JMF), 2013 U.S. Dist. LEXIS 150259, 2013 WL 5658790, at *13 (S.D.N.Y. Oct. 17, 2013)*, with, e.g., *In re Zurn Pex Plumbing Prods. Liab. Litig., 644 F.3d 604, 613 (8th Cir. 2011)* ("The main purpose of Daubert exclusion is to protect juries from being swayed by dubious scientific testimony. That interest is not implicated at the class certification stage where the judge is the decision maker."), and *In re Scotts EZ Seed Litig., 304 F.R.D. 397, 412 n.8 (S.D.N.Y. 2015)* (analyzing "whether each of [the expert's] proposed methodologies satisfy Comcast" rather than conducting a Daubert analysis).

We are persuaded by the view that expert evidence submitted at the class certification stage is subject to the Daubert standard. First, the Supreme Court has suggested in dicta that Daubert applies, commenting that "the District Court concluded that Daubert did not apply to expert testimony at the certification stage of class-action proceedings. We doubt that is so . . . ." *Dukes, 564 U.S. at 354*. Not only has the Second Circuit characterized this statement as "suggesting that a Daubert analysis **[**105]** may be required at least in some circumstances," *In re U.S. Foodservice Inc. Pricing Litig., 729 F.3d 108, 129 (2d Cir. 2013)*, but this statement (though dicta) is also "the only discussion of [the issue] by the Supreme Court of which we are aware" such that we consider it "to be persuasive authority here," *Tiffany (NJ) Inc. v. eBay Inc., 600 F.3d 93, 108 (2d Cir. 2010)*.

Second, we interpret the Second Circuit's decisions in *In re IPO*, *Bombardier*, and *In re U.S. Foodservice*, as supporting a more searching examination of expert testimony offered at the class certification stage. See 1 McLaughlin on Class Actions § 3:14 (14th ed.) (Westlaw 2017) (describing the Second Circuit's "substantial expansion of the extent to which district courts may evaluate expert testimony on class certification" and citing, inter alia, In re IPO and Bombardier). Though the Second Circuit did not decide in In re U.S. Foodservice whether or when a Daubert analysis forms a necessary component of a district court's rigorous analysis," it reasoned that "[i]n In re IPO, we disavowed our earlier statement that 'an expert's testimony may establish a component of a *Rule 23* requirement simply by not being fatally flawed.'" *In re U.S. Foodservice, 729 F.3d at 129-30* (quoting *In re IPO, 471*

---

[7] We note that expert opinion is additionally subject to the requirements of *Rule 403 of the Federal Rules of Evidence* and "may be excluded if its probative value is substantially outweighed by the danger of unfair prejudice, confusion of the issues, or misleading the jury." *Nimely, 414 F.3d at 397* (quoting *Fed. R. Evid. 403*). Accordingly, some courts have subjected expert opinion offered at, or prior to, the class certification to the strictures of *Rule 403*. See, e.g., *Scott v. Chipotle Mexican Grill, Inc., 315 F.R.D. 33, 44, 47 (S.D.N.Y. 2016)*; *In re Air Cargo Shipping Servs. Antitrust Litig., No. 06 md-1175 (JG)(VVP), 2014 U.S. Dist. LEXIS 180914, 2014 WL 7882100 (E.D.N.Y. Oct. 15, 2014)*.

However, we decline to apply *Rule 403* to expert testimony offered at this stage. *Rule 403*'s concerns regarding unfair prejudice and misleading the jury have less force in the class certification context, where the Court serves as the trier of fact. Cf. *Nimely, 414 F.3d at 397* (identifying "the uniquely important role that *Rule 403* has to play in a district court's scrutiny of expert testimony, given the unique weight such evidence may have in a jury's deliberations" (emphasis added)).

F.3d at 41). Indeed, given the Second Circuit's direction that we consider "the relevant evidence admitted at the class **[**106]** certification stage," In re IPO, 471 F.3d at 42 (emphasis added), it appears to us that the standard rules of evidence should apply, see Chen-Oster, 114 F. Supp. 3d at 114 ("Daubert is an amplification of Rule 702, **[*471]** and the Federal Rules of Evidence apply generally to 'proceedings' in the courts of the United States.").

Third, at least two leading treatises endorse this view. "An undiluted Daubert analysis is consonant with a class certification standard that requires a determination by a preponderance of the evidence that each Rule 23 requirement has been met, and under which head-to-head weighing of competing expert evidence is proper." 1 McLaughlin on Class Actions § 3:14 (14th ed.) (Westlaw 2017). "It is not sufficient for the court simply to determine that the testimony could evolve into something admissible by the time of trial." 7AA Charles A. Wright et al., Federal Practice & Procedure § 1785 (4th ed.) (Westlaw 2017).

HN35[] Though we conclude that *Daubert* applies, our inquiry is guided by the purpose for which the evidence is introduced -- establishing the various class certification requirements. "[T]he question is not whether a jury at trial should be permitted to rely on the expert's report to find facts as to liability, but rather whether the Court may utilize it **[**107]** in deciding whether the requisites of Rule 23 have been met." Pinnacle Performance, 2013 U.S. Dist. LEXIS 150259, 2013 WL 5658790, at *13 (alterations incorporated) (quoting In re Visa Check/MasterMoney Antitrust Litig., 192 F.R.D. 68, 77 (E.D.N.Y. 2000)); see also Fort Worth Emps.' Ret. Fund v. J.P. Morgan Chase & Co., 301 F.R.D. 116, 126 (S.D.N.Y. 2014) (limiting the Daubert inquiry "to whether or not the expert reports are admissible to establish the requirements of Rule 23" (quoting Pinnacle Performance, 2013 U.S. Dist. LEXIS 150259, 2013 WL 5658790, at *13)).

However, "[a] conclusion that proffered expert evidence is sufficiently reliable and relevant to pass Daubert muster does not end the inquiry on class certification." 1 McLaughlin on Class Actions § 3:14 (14th ed.) (Westlaw 2017); see In re IPO, 471 F.3d at 42 ("[W]e also disavow the suggestion . . . that an expert's testimony may establish a component of a Rule 23 requirement simply by being not fatally flawed."). Rather, expert opinion deemed to be admissible comprises only one part of "the relevant evidence admitted at the class certification stage" to be weighed in determining "whether each Rule 23 requirement has been met," In re IPO, 471 F.3d at 42, and each requirement must still be established by a preponderance of the evidence, see Bombardier, 546 F.3d at 202.

Therefore, ***HN36***[] to the extent that flaws in expert testimony proffered at class certification do not warrant that testimony's exclusion by the Court as gatekeeper under Daubert at the threshold, those flaws may nonetheless be considered in the Rule 23 analysis undertaken by the Court as trier of fact. **[**108]** Put differently, though a Daubert motion is an improper venue in which to take sides in a "battle of the experts" offered by competing parties, In re Joint E. & S. Dist. Asbestos Litig., 52 F.3d 1124, 1135 (2d Cir. 1995), disputes between experts must be resolved if necessary to the Rule 23 analysis, see In re IPO, 471 F.3d at 42.

III. EXCHANGE-BASED ACTION

Exchange plaintiffs seek certification of a class comprised of traders of Eurodollar futures (EDF) contracts and options on EDF contracts. Specifically, they seek certification of a class defined as follows:

> All persons, corporations and other legal entities (other than Defendants, their employees, affiliates, parents, subsidiaries, and co-conspirators) ("Eligible Persons") that transacted in Eurodollar futures and options on Eurodollar futures on the Chicago Mercantile Exchange between January 1, 2005 and May 17, 2010 (the "Class Period") and that were harmed or satisfy one or more of "A," "B," or "C" below.[8]

[8] We have previously broken the class period into several "Periods" to facilitate our discussion of statutes of limitations, inquiry notice, and tolling. "Period 0" refers to the period between the start of the class period and August 8, 2007. "Period 1" refers to the period between August 9, 2007 and May 28, 2008. "Period 2" refers to the period between May 29, 2008 and April 14, 2009. "Period 3" refers to the period between April 15, 2009 and the end of the class period. See LIBOR IV, 2015 U.S. Dist. LEXIS 147561 at *277-78, 2015 WL 6243526, at *115-16. We use "Suppression Period" to refer to Periods 1, 2, and 3.

[*472] The proposed class definition then defines three subcriteria, the second of which consists of three sub-subcriteria and the third of which consists of two sub-subcriteria:

> SUBPART A. Eligible Persons that sold a Eurodollar futures contract, or bought a put option or sold a call option on Eurodollar futures before August 7, 2007 and purchased **[**109]** all or part of this short position back at the final expiration formula price of a Eurodollar futures contract expiring after August 7, 2007 and before May 17, 2010.
>
> SUBPART B. Eligible Persons that (1) purchased Eurodollar futures contract(s) or call options on Eurodollar futures on the following dates: April 7, 2006, August 17, 2006, October 26, 2006, and December 22, 2006; or (2) sold Eurodollar futures contracts or purchased put options on Eurodollar futures on the following dates: September 29, 2005, November 28, 2005, June 30, 2006, September 1, 2006, November 29, 2006, February 28, 2007, March 1, 2007, July 30, 2007, and August 6, 2007; or (3) purchased or sold Eurodollar futures contracts (or options) and that were harmed between January 1, 2005 and August 6, 2007 inclusive.[9]
>
> SUBPART C. Eligible Persons that initiated a Eurodollar futures contract or options position on or after April 15, 2009 and on or before May 17, 2010 ("Period 3"), and who satisfy "1" or "2" below.
>
> > 1. Eligible Persons included in "C" are those that purchased or sold a Eurodollar futures or options contract to initiate a position during Period 3 and that were harmed.
> >
> > 2. Eligible Persons included in "C" are also **[**110]** those that purchased a Eurodollar futures contract (including Eurodollar futures contracts the expiration for which was less than 365 calendar days after the date of such purchase) to initiate a long position during Period 3, and continued to hold all or part of such long position until liquidating the position after Period 3.

The operative Corrected Fourth Amended Consolidated Class Action Complaint, identified panel banks Bank of America, Barclays, Citi, Deutsche Bank, JPMorgan Chase, Rabobank, and UBS (and certain affiliates of these panel banks) as defendants. (Corrected Fourth Am. Consolidated Class Action Compl. ("Corrected 4AC") ¶¶ 34-38, 45, 57-59, 66-68, 77-78, Dec. 11, 2017, ECF No. 2363.) Exchange plaintiffs assert five claims, four under the *Commodities Exchange Act* (CEA) and the fifth under the *Sherman Act*. The CEA claims are asserted against all defendants, whereas the antitrust claims are asserted against only Bank of America, Citi, and JPMorgan Chase consistent with our rulings in LIBOR VI, see *2016 U.S. Dist. LEXIS 175929, 2016 WL 7378980, at *25*, slip op. at app. A-1. (Corrected 4AC ¶¶ 668-705.)

The scope of claims remaining in this action has also been narrowed by several settlements between Exchange plaintiffs and **[**111]** particular defendants. We preliminarily approved a settlement with Barclays, **[*473]** see Dec. 2, 2014 Order, *2014 U.S. Dist. LEXIS 172487, 2014 WL 6851096*, ECF No. 861, and we deferred preliminary approval of the settlements with Citi and Deutsche Bank (Letter from Christopher Lovell & David Kovel to the Court, Oct. 11, 2017, ECF No. 2307) pending our resolution of the class-certification motions. Bank of America and JPMorgan Chase have also reached settlements with Exchange plaintiffs, though no documentation memorializing the settlement has yet been filed.[10] (Jan. 18, 2018 Hr'g Tr. ("Hr'g Tr.") 24:10-25:21.) As a result of these settlements, only CEA claims remain in this action: those based on trader-based manipulation under direct and vicarious liability theories against Rabobank, and those based on persistent suppression under direct, vicarious liability, and aiding and abetting theories against UBS. (Corrected 4AC ¶¶ 668-705.)

As part of briefing the motion for class certification, the parties have submitted reports and deposition testimony from eight experts. Seven of these experts' opinions have prompted Daubert motions. Rabobank has moved to exclude the opinions of (1) Dr. H. Nejat Seyhun, (2) Dr. Janet Netz, (3) Mr. Craig **[**112]** Beevers, and (4) Mr. Eric

---

[9] The dates in subparts A and B of the proposed class definition therefore do not track exactly the Periods we have previously specified. We follow Exchange plaintiffs' proposed definition where applicable.

[10] Though no longer a defendant following our personal-jurisdiction rulings in LIBOR IV and LIBOR VI, HSBC has also settled with the Exchange plaintiffs (Letter from Christopher Lovell & David Kovel to the Court, Oct. 11, 2017, ECF No. 2307), and we similarly deferred preliminary approval of that settlement.

Miller. Exchange plaintiffs have moved to exclude the opinions of (5) Dr. Robert Willig, (6) Dr. Christopher Culp, and (7) Dr. R. Glenn Hubbard. We first consider the Daubert motions before proceeding to the motion for class certification itself.[11]

1. Rabobank's Daubert Motions

1.1 Dr. Seyhun

Exchange plaintiffs offer two reports from Dr. H. Nejat Seyhun: (1) an initial report dated February 2, 2017 (Decl. of David Kovel ex. G., July 10, 2017, ECF No. 2071); and (2) a rebuttal report dated May 3, 2017 (Decl. of Jefferson Bell ex. 5, June 30, 2017, ECF No. 2008). We refer to these as the Seyhun Initial Report and the Seyhun Rebuttal Report. Across these two reports, Dr. Seyhun's opinions relate primarily to two subjects: (1) the determination of what LIBOR, and each bank's LIBOR submissions, would have been but-for the alleged manipulative conduct, and (2) the determination of what effect changes in LIBOR have on the trading prices of EDF contracts and options. Rabobank does not challenge Dr. Seyhun's qualifications, and we agree that Dr. Seyhun is well qualified to offer these opinions.[12]

Models of But-For Published LIBOR and But-For LIBOR Submissions

Dr. Seyhun **[**113]** first opines that certain statistical and mathematical analyses can demonstrate that the defendants' alleged conduct impacted LIBOR and calculate the amount of impact. (Seyhun Initial Report **[*474]** ¶ 12.) To support this conclusion, Dr. Seyhun offers several models for estimating but-for LIBOR and each bank's but-for LIBOR submissions as evidence that these statistical and mathematical analyses are available. (E.g., Seyhun Initial Report ¶ 87.) In his initial report, Dr. Seyhun offers two methodologies that involve first the calculation of but-for published LIBOR and then the derivation of each bank's but-for LIBOR submission from but-for published LIBOR. In his rebuttal report, Dr. Seyhun offers two additional models that are entirely distinct from the two models presented in his initial report. In each of these models, Dr. Seyhun first calculates but-for LIBOR submissions for each panel bank and then applies the BBA's trimming methodology -- which excludes the top quartile of submissions and the bottom quartile of submissions and averages the remaining submissions -- in order to determine but-for published LIBOR.

The two models presented in Dr. Seyhun's initial report each begin with the **[**114]** calculation of but-for published LIBOR. Dr. Seyhun models the mathematical relationship between LIBOR and a reference rate on a daily basis during a "clean period" using an ordinary least squares (OLS) regression,[13] and uses that relationship to predict LIBOR over the Class Period. Though Dr. Seyhun varies the reference rate and clean period at various points in his report,[14] Dr. Seyhun primarily uses the ICAP-Ask rate[15] as the reference rate and the aggregated period from 2000

---

[11] UBS also submitted two expert reports from Dr. Janusz Ordover: (1) an initial report dated April 21, 2017 (Decl. of Jefferson Bell ex. 1, June 30, 2017, ECF No. 2008); and (2) a sur-rebuttal report dated June 30, 2017 (Decl. of Jefferson Bell ex. 2, June 30, 2017, ECF No. 2008). Exchange plaintiffs did not seek to exclude any portion of Dr. Ordover's reports. UBS also did not file any Daubert motions.

[12] Dr. Seyhun is the Jerome B. and Eilene M. York Professor of Business Administration and a Professor of Finance at the University of Michigan's Ross School of Business. He holds a Ph.D. and M.S. from the University of Rochester and a B.S. from Northwestern University, and has written a number of published papers on various finance and securities topics. (Seyhun Initial Report app. B.)

[13] "Specifically, the ordinary least-squares (OLS) method of linear regression solves for a [line of best fit] that minimizes the sum of the squared residuals." *Reed Constr. Data Inc. v. McGraw-Hill Cos., 49 F. Supp. 3d 385, 397 n.5 (S.D.N.Y. 2014)*. Each "residual" is the difference between the actual observed value of the dependent variable and the value of the dependent variable estimated using the line of best fit.

through 2004 combined with 2013 as the clean period. (Seyhun Initial Report ¶¶ 70-78, tbl.2.2.) Dr. Seyhun defines LIBOR "artificiality" to be the difference between his calculated but-for published LIBOR and actual published LIBOR and tests the statistical significance of the artificiality during the Suppression Period (but not Period 0) using another regression. (Seyhun Initial Report tbl.2.3.)

Dr. Seyhun also estimates but-for LIBOR using the ICAP-Ask rate as the reference rate in a second regression. Otherwise identical, this second ICAP-Ask model uses a clean period of 2000 through 2002 aggregated with 2013. Dr. Seyhun presents an analysis of the statistical significance of his artificiality estimates **[*475]** based on **[**115]** this specification (Seyhun Initial Report tbl.2.4), but does not present the results of the regression itself and does not reference this 2000-2002 plus 2013 regression elsewhere in his initial report.

Dr. Seyhun then derives, for each panel bank, but-for LIBOR submissions from the first ICAP-Ask-based model of but-for LIBOR using two different methods.[16] Under the first method (the "Relative Artificiality" model), Dr. Seyhun assesses the "relative artificiality" of a bank's submission by calculating the difference between a bank's actual submission and actual published LIBOR. If the bank's submission was not trimmed from the calculation of published LIBOR, the relative artificiality equals the difference between published LIBOR and the bank's LIBOR submission. If the bank's submission was trimmed from the calculation of published LIBOR by virtue of being higher than the third quartile submission (or lower than the first quartile submission), Dr. Seyhun limits the bank's relative artificiality to the relative artificiality of the highest (or lowest) submission that was retained in the actual LIBOR calculation. This "relative artificiality" in the bank's submission is then added to overall **[**116]** LIBOR artificiality to estimate the total extent of artificiality in the bank's submission. (Seyhun Initial Report ¶¶ 92-94, figs.1E1-1E17.)

Under the second method (the "CDS Spread" model), Dr. Seyhun first estimates, for each panel bank, the relationship between the bank's LIBOR submission and the spreads on the bank's credit default swaps (CDS).[17] Dr. Seyhun uses a regression specified as the natural logarithm of the LIBOR submission against the natural logarithm of the CDS spread and a set of "dummy" indicator variables corresponding to each day, over a clean period from May 18, 2010 to December 31, 2015.[18] Then, for each bank, Dr. Seyhun calculates the percentage deviation of the bank's CDS spread from the average CDS spread across all panel banks and uses that deviation to calculate the

---

[14] Dr. Seyhun also uses Federal Reserve Eurodollar Rate (FRED) as the reference rate in part of his analysis. (Seyhun Initial Report 9191 59-69, tbl.2.1.) However, his subsequent calculations do not rely on but-for LIBOR calculated using the FRED rate.

[15] The ICAP-Ask rate is a data series, published alongside the ICAP-Bid rate, by ICAP Capital Markets LLC. In response to subpoenas issued in this case, ICAP explained that this rate is "meant to provide general 'market color' regarding the range of offer rates by top tier banks on unsecured liabilities in the overnight wholesale money market" and was "formed from pricing indications and other market information, including but not limited to the range of offers that ICAP's brokers observe in the market." (Decl. of Jamie Heine ex. 41, July 1, 2017, ECF No. 2031.) The parties dispute whether the ICAP-Ask rate in fact represents ask (or offer) rates, and ICAP explained that it "interpreted the range that it quoted as a high and a low for the expected range for trades done by upper tier banks," which "Bloomberg's methodology converted . . . to a bid and an offer." (Decl. of Jamie Heine ex. 41, July 1, 2017, ECF No. 2031.) In referring to this rate as the "ICAP-Ask rate," we do not suggest that the data series in fact corresponds to ask (or offer) rates rather than bid rates or some other indicator.

[16] Dr. Seyhun suggests that these methods apply only during the Suppression Period and not Period 0, but presents data for both periods. (Seyhun Initial Report ¶¶ 91-102, figs.1E1-1F17.)

[17] "[A] credit default swap allows an investor to buy . . . in essence an insurance policy, to protect him against the probability of default by requiring the seller of protection to pay the investor the par value if there is a default before the bond matures. A credit default swap spread [is] the price the seller of protection charges, capturing 'the spread between a risk-free bond and . . . a risky bond.'" *In re Enron Corp. Sec. Derivative & "ERISA" Litig., 529 F. Supp. 2d 644, 764 (S.D. Tex. 2006)*.

[18] A logarithm (or log) is the mathematical inverse of exponentiation: if x taken to the yth power equals z, the log base x of z equals y. To take a specific example: 10 to the third power equals 1000, and the log base 10 of 1000 equals 3. The natural logarithm is one specific logarithm in which the base is the mathematical constant e, which is equal to approximately 2.7183. Because Dr. Seyhun has specified this regression using the natural log of LIBOR submissions and the natural log of CDS spreads, the results may be interpreted in percentage terms.

percentage difference between the bank's but-for LIBOR submission from published LIBOR, and applies that difference to but-for LIBOR to calculate the bank's but-for LIBOR submission. (Seyhun Initial Report ¶¶ 95-102.)

In his third model (his rebuttal report's first model), which we refer to as the "Rebuttal Period 0 Model," Dr. Seyhun reviews documents **[**117]** to identify "events" of trader-based manipulation and determines whether the event has "a clear directionality," finding 63 "events" over 45 different days. (Seyhun Rebuttal Report ¶ 488.) Independently, to estimate each bank's but-for **[*476]** LIBOR submission, Dr. Seyhun regresses each bank's LIBOR submission on a given day against the ICAP-Ask rate, a one-day lag of the ICAP-Ask rate,[19] a set of dummy variables for each month over Period 0, a first set of interaction terms between the monthly dummy variables and the ICAP-Ask rate, and a second set of interaction terms between the monthly dummy variables and the lagged ICAP-Ask rate. (Seyhun Rebuttal Report ¶¶ 489-91.) That is, Dr. Seyhun estimates, for each panel bank on a given day, the bank's but-for LIBOR submission based on, among other variables, that day's ICAP-Ask rate and the prior day's ICAP-Ask rate. From these but-for LIBOR submissions, Dr. Seyhun then calculates but-for LIBOR by applying the BBA's trimming methodology. Comparing the results from this model and his documentary analysis, Dr. Seyhun concludes that there is "confirmed manipulation by at least one bank on 45 different occasions." (Seyhun Rebuttal Report ¶ 494.)

In his **[**118]** fourth model (his rebuttal report's second model), which we refer to as the "Rebuttal Suppression model," Dr. Seyhun conducts another regression in order to estimate each panel bank's but-for LIBOR submissions. He regresses, using an aggregated clean period of January 1, 2004 through August 7, 2007 and May 18, 2010 through December 31, 2012,[20] each bank's actual LIBOR submission against (1) the ICAP-Ask rate, (2) a one-day lag of the ICAP-Ask rate, (3) the one-month overnight indexed swap (OIS) rate, (4) the standard deviation of the panel banks' CDS spreads, and (5) the difference between the bank's CDS spread and the panel banks' mean CDS spread. Dr. Seyhun then calculates "artificiality" during the Suppression Period as the difference between a bank's actual submission and the bank's but-for submission estimated using his five-variable regression. As in his initial report, Dr. Seyhun also tests the statistical significance of his measured artificiality.

Rabobank contends that Dr. Seyhun's models, and his opinions based on these models, are unreliable because (1) the four models yield directionally inconsistent results; (2) the four models produce implausible findings of artificiality, **[**119]** including substantial artificiality during purported "clean" periods; (3) the ICAP-Ask models and Rebuttal Period 0 models produce estimates of artificiality inconsistent with Dr. Netz's opinions and Exchange plaintiffs' allegations; and (4) his Relative Artificiality and CDS Spread models of but-for LIBOR submissions are reliant on unreliable estimates of but-for LIBOR improperly estimated using 2013 as part of the clean period. We consider each argument in turn.

1.1.1.1. Internal Inconsistencies

Rabobank, relying on Dr. Hubbard's opinions, contends that Dr. Seyhun's methodologies are internally inconsistent. According to Rabobank and Dr. Hubbard, across Dr. Seyhun's four models of but-for **[*477]** LIBOR (the two ICAP-Ask based models presented in the initial report, the Rebuttal Period 0 model, and the Rebuttal Suppression model), at least one model finds upward manipulation on 65% of days in Period 0 and at least one model finds downward manipulation of LIBOR on 89% of days in Period 0. Similarly, across Dr. Seyhun's four models of but-for LIBOR submissions (the Relative Artificiality and CDS Spread models based on the first ICAP-Ask-based model of

---

[19] Generally, the nth "lagged" value of explanatory variable refers to that variable's value n time periods prior. In Dr. Seyhun's models, which are daily, the third lag of an explanatory variable, for example, would refer to that variable's value three days earlier.

[20] The text of Dr. Seyhun's report indicates that his clean period is "January 1, 2004 to August 7, 2007 and May 18, 2010-Dec. 31, 2013." (Seyhun Rebuttal Report ¶ 497.) However, in a footnote, he states that "[t]he end of my estimation period is December 31, 2012," acknowledging Dr. Hubbard's observation that ICAP-Ask remains constant for an eight-month period in 2013. (Seyhun Rebuttal Report ¶ 497 n.301.) We accordingly assume that the clean period for this regression ended in 2012 as Dr. Seyhun states in a footnote rather than in 2013 as Dr. Seyhun states in the text of his report.

but-for LIBOR, the Rebuttal Period 0 model, **[**120]** and the Rebuttal Suppression model), at least one model finds upward manipulation of Rabobank's LIBOR submission on 95% of days in Period 0 and at least one model finds downward manipulation on 84% of days in Period 0.

Because the sum of each set of figures is greater than 100%, Rabobank asserts that this "mathematical impossibility" establishes the unreliability of Dr. Seyhun's models. (Rabobank Seyhun Mem. 8; Hubbard Rebuttal Report ¶ 17 & n.54.) Exchange plaintiffs do not dispute Rabobank's cited statistics, but contend that those statistics are meaningless because Dr. Seyhun's models are presented as alternatives and their results therefore "are not meant to be combined." (Exch. Pls.' Seyhun Opp'n 11.)

Rabobank's "mathematical impossibility" argument is not necessarily persuasive, as the 100% threshold on which the argument relies is of little significance here. An expert's models are not necessarily questionable if that percentage exceeds 100%; the extent to which the models disagree matters more than the mathematical sum of certain results that they produce. For example, if an expert presented two models, one of which found upward manipulation on days amounting to 51 days of a **[**121]** 100-day class period and the other of which found downward manipulation on the remaining 49 days but also one day in which the first model found upward manipulation, that one day of conflicting results does not necessarily call into question the entirety of the models. Conversely, an expert's models may be questionable even if the relevant percentages did not exceed 100%.[21] Further, Dr. Seyhun's models are structured differently -- at least in part -- in order to reflect differences between Period 0 and the Suppression Period. (Seyhun Initial Report ¶¶ 81-102; Seyhun Rebuttal Report ¶¶ 487-500.)

Nonetheless, in this case, the inconsistencies in the results produced by Dr. Seyhun's models do call into question the models' reliability. Even when intended to measure artificiality during the same period of time, Dr. Seyhun's models produce directionally inconsistent results a substantial portion of the time. Even though all three models are intended to estimate artificiality in Rabobank's LIBOR submissions during Period 0, the Rebuttal Period 0 model produces results directionally inconsistent[22] from those produced by and the CDS Spread and Relative Artificiality models on 49% and 40% of days **[**122]** in Period 0, respectively. (Hubbard Rebuttal Report ¶ 20, tbl.1.) Similarly, the Rebuttal Period 0 model produces directionally inconsistent estimates of artificiality in LIBOR from the two ICAP-Ask-based models of but-for LIBOR on 44% and 42% of the days in **[*478]** Period 0. (Hubbard Rebuttal Report ¶ 24, tbl.2.)

Accordingly, Exchange plaintiffs cannot seriously dispute that Dr. Seyhun's models produce meaningfully different estimates of artificiality, in directionally inconsistent ways. (Hubbard Rebuttal Report exs. 21A-21Q, 22.) Rabobank has not "manipulated" Dr. Seyhun's models as Exchange plaintiffs suggest by comparing the results produced by one model to those produced by other models; rather, Rabobank identified pervasive inconsistencies. Even if the models are formally designated "alternatives," each is nonetheless intended to estimate the same measures: the amount of artificiality in LIBOR and each panel bank's LIBOR submissions. Some minor disagreement between the models would naturally be expected, but Dr. Seyhun's models produce internally inconsistent results on more than half of days. Inconsistencies of this magnitude indicate a lack of reliability. See *Lippe, 99 F. App'x at 279* ("[The expert] failed **[**123]** to explain why her [two] analyses did not yield similar results -- after admitting that they should."); *In re Fed. Home Loan Mortg. Corp. (Freddie Mac) Secs, 281 F.R.D. 174, 181 (S.D.N.Y. 2012)* ("[The expert's] analysis changed so many times in important ways and was so internally inconsistent that I found it unreliable and unpersuasive."). Dr. Seyhun has not made a similar concession, but his models are, at bottom, intended to measure the same things -- artificiality in LIBOR and LIBOR submissions.

Exchange plaintiffs argue that we should reject Lippe and In re Freddie Mac, contending that we should instead follow *U.S. Information Systems, Inc. v. IBEW Local Union No. 3, 313 F. Supp. 2d 213, 236 (S.D.N.Y. 2004)*, ***HN37***[] which held that "purported inconsistencies in [an expert's] methodology go to the weight, not the admissibility of

[21] For example, if an expert presented two models, one of which found upward manipulation on days amounting to 49% of the class period and the other of which found downward manipulation on exactly the same days, we would have serious doubts as to the reliability of those models even though the sum of the percentages -- 49% plus 49% -- is less than 100%.

[22] That is, where one model finds positive artificiality and another model finds negative artificiality.

his testimony." (Exch. Pls.' Seyhun Opp'n 10 n.9.). However, these cases establish a distinction between inconsistencies within an expert's application of a single methodology on the one hand and inconsistencies across an expert's multiple methodologies on the other. U.S. Information Systems establishes at most that the former was not a basis for exclusion in that case, see *313 F. Supp. 2d at 235-36* (addressing an expert's "inconsistent application of methodology").[23] By contrast, Lippe, Freddie Mac, and Dr. Seyhun's multitude of models all present the latter issue. See **[**124]** *Lippe, 99 F. App'x at 279* (identifying an expert's failure "to explain why her [two alternative] analyses did not yield similar results"); *Freddie Mac, 281 F.R.D. at 179-81* (finding an expert's two event studies "internally inconsistent"). In sum, we conclude that the internally inconsistent nature of Dr. Seyhun's models seriously undermine their reliability.

1.1.1.2. Implausible Artificiality Findings

Next, Rabobank argues that Dr. Seyhun's ICAP-Ask-based models of but-for LIBOR and his Rebuttal Period 0 model are unreliable because the three models identify artificiality in published LIBOR on a substantial percentage of days during the models' respective clean periods. Specifically, the first ICAP-Ask-based model identifies artificiality on 57% of days between 2000 and 2004, the second ICAP-Ask-based model identifies artificiality on 39% of days between 2000 and 2002, and the Rebuttal Period 0 model identifies artificiality on every single day in Period 0. (Rabobank Seyhun Mem. 9.)

Rabobank's statistics are not entirely fairly presented, as they represent percentages of only certain portions of the clean periods underlying the three models **[*479]** rather than the entireties of the clean periods. Nonetheless, restating those percentages slightly to **[**125]** represent percentages of the entire clean periods, Dr. Seyhun's models continue to find significant artificiality during clean periods. The first ICAP-Ask-based model identifies artificiality on 50% of clean-period days,[24] the second ICAP-Ask-based model identifies artificiality on 29% of clean-period days,[25] and the Rebuttal Period 0 identifies artificiality on at least 58% of clean-period days.[26]

As to the ICAP-Ask-based models of but-for LIBOR, Exchange plaintiffs again do not dispute Rabobank's statistics, but contend that the clean periods in those models "were not 100% clean periods," "merely cleaner periods." (Exch. Pls.' Seyhun Opp'n 12 n.11.) Accordingly, they reassure us, the ICAP-Ask-based models retain validity because they find comparatively more artificiality during the Class Period than during the clean periods.

We seriously question whether a period with artificiality on half of days, or even 29% of days, may be fairly characterized as a "clean" period. As an initial matter, this defense is plainly inconsistent with Exchange plaintiffs' theory of the case, which does not extensively allege manipulation between 2000 and 2004. But even had Exchange plaintiffs done so, the reliability **[**126]** of Dr. Seyhun's regressions -- ultimately intended to gauge the relationship between LIBOR and ICAP-Ask absent the defendants' challenged conduct -- would be seriously undermined by their incorporation of data pervasively affected by that very conduct. Cf. *Fogarazzo v. Lehman Bros., Inc., 263 F.R.D. 90, 105 & n.124 (S.D.N.Y. 2009)* (expressing skepticism regarding an expert's use of control periods that had been affected by the defendants' challenged conduct). Moreover, this belated rationalization is belied by Dr. Seyhun's opinions. In offering his ICAP-Ask-based models of but-for LIBOR in his initial report, Dr.

---

[23] We also question whether a single methodology, if applied inconsistently by an expert, could be properly termed a "methodology" at all, let alone a reliable one.

[24] Rabobank's 57% figure is calculated as 700 days with identified artificiality in 2000 through 2004, divided by 1225 trading days in that period. In the 251 trading days in 2013, the first ICAP-Ask based model identifies 31 days with artificiality; 50% is calculated as the sum of 700 and 31 divided by the sum of 1225 and 251. (Hubbard Initial Report ex. 9.1.)

[25] Rabobank's 39% figure is calculated as 284 days with identified artificiality in 2000 through 2002, divided by 732 trading days in that period. Because the second ICAP-Ask-based model does not identify any artificiality in 2013, 29% is calculated as 284 divided by the sum of 732 and 251, the total number of trading days in the entire clean period. (Hubbard Initial Report ex. 9.2.)

[26] Even assuming the Rebuttal Period 0 model identifies no artificiality whatsoever in the second part of its clean period, Period 0 accounts for 58% of trading days in the Rebuttal Period 0 model's aggregate clean period.

Seyhun specifically opined that "[b]y definition, the estimation period should be free from manipulation" and suggested that a clean period incorporating the period between May 18, 2010 and December 31, 2012 was inappropriate because "there is some evidence that suggests that some manipulation may have continued into 2012 after the Class Period." (Seyhun Initial Report ¶ 72, n.32 (emphasis added).)[27]

Our confidence in the first ICAP-Ask-based model is further undermined by the fact that in addition to finding substantial artificiality between 2000 and 2004, it apparently finds no significant artificiality **[**127]** during Period 0. (Hubbard Initial Report **[*480]** ¶ 125, ex. 10.2.). That is, this model identifies significant LIBOR artificiality when Exchange plaintiffs have not alleged manipulation, and no significant LIBOR artificiality when they have so alleged. While sporadic findings of artificiality in clean periods may be attributable to statistical noise, this exactly-backwards relationship suggests either an unreliable model or a deeper flaw in Exchange plaintiffs' theory of the case. Because the Relative Artificiality and CDS Spread models of but-for LIBOR submissions are reliant on the first ICAP-Ask-based model's estimates of but-for LIBOR, the reliability of those models is necessarily called into question as well.

As to the Rebuttal Period 0 model, Exchange plaintiffs respond first that Dr. Seyhun's Rebuttal Period 0 model "predicts artificiality [only] on days where there exists documented evidence that is consistent in direction with the model's prediction" (Exch. Pls.' Seyhun Opp'n 11), and second that the Rebuttal Period 0 Model "breaks up Period 0 into separate control and treatment periods" based on "documented evidence of TBM," (Exch. Pls.' Seyhun Opp'n 16).

Exchange plaintiffs' first **[**128]** response is little more than definitional sleight-of-hand. Rabobank's contention is that the Rebuttal Period 0 model finds mathematical artificiality on 100% of days in Period 0 -- that is, the Rebuttal Period 0 model calculates a but-for LIBOR that is different from actual published LIBOR. By contrast, Exchange plaintiffs' response defines "artificiality" to mean mathematical artificiality supported by "corroborating evidence" based on Dr. Seyhun's assessment of documents.

This terminological slipperiness is unavailing. In contending that Dr. Seyhun's models are in fact capable of identifying trader-based manipulation, Exchange plaintiffs argue that "on days that documents do not show evidence of manipulation, the TBM Model finds positive artificiality only 51% of the time" and "negative artificiality only 49% of the time." (Exch. Pls.' Seyhun Opp'n 17 n.18 (emphasis added) (citing Seyhun Rebuttal Report ¶ 493).) But this statement is wholly irreconcilable with their contention now that the Rebuttal Period 0 "predicts artificiality [only] on days where there exists documented evidence that is consistent in direction with the model's prediction." (Exch. Pls.' Seyhun Opp'n 11.) Accepting **[**129]** this latter statement as true, then on days where no documents show evidence of manipulation, the TBM Model should find positive artificiality 0% of the time and negative artificiality 0% of the time. But it does not.

Ultimately, Dr. Seyhun's Rebuttal Period 0 Model finds mathematical artificiality on 100% of days in Period 0, and we conclude that this implausible finding of (mathematical) artificiality undermines the reliability of the Rebuttal Period 0 Model. Exchange plaintiffs' attempt to obfuscate this reality by shifting the definition of "artificiality" to include a requirement of documentary corroboration does not affect our conclusion regarding the unreliability of Dr. Seyhun's methodology. Indeed, accepting this revised definition of "artificiality," Dr. Seyhun's models would be wholly incapable of identifying instances of TBM-caused artificiality. The documentary corroboration requirement becomes the only filter separating true "artificiality" from the mathematical artificiality identified by the Rebuttal Period 0 Model on 100% of days in Period 0, even though the days may otherwise be difficult to distinguish.[28] Exchange plaintiffs' dual contentions -- that **[*481]** the Rebuttal Period **[**130]** 0 model is capable of identifying

---

[27] Similarly, in describing Dr. Seyhun's analyses, Dr. Netz explains that "Dr. Seyhun proposed to model the relationship between LIBOR and a benchmark interest rate during a time period that was not subject to manipulation." (Netz Rebuttal Report 5 (emphasis added).)

[28] This reliance would be especially troubling in light of Exchange plaintiffs' contentions, and Mr. Beevers's opinions, that many instances of trader-based manipulation would have occurred verbally and are not documented. (Beevers Initial Report ¶¶ 118-24.)

trader-based manipulation independent of documentary evidence on the one hand (based on its findings of mathematical artificiality) but that the Rebuttal Period 0 model does not identify artificiality on 100% of days in Period 0 (because it requires documentary evidence) -- cannot be reconciled.

Nor do we find much comfort in Exchange plaintiffs' assurances that Dr. Seyhun's Rebuttal Period 0 model finds positive (mathematical) artificiality on 71% of days with documentary evidence of upward manipulation and finds negative (mathematical) artificiality on 75% of days with documentary evidence of downward manipulation. (Exch. Pls.' Seyhun Opp'n 17 n.18.) Rephrasing slightly, this contention acknowledges that even on days for which Dr. Seyhun has already identified documentary evidence of manipulation, the Rebuttal Period 0 model has an error rate between 25% and 29%.

Exchange plaintiffs' second response, that the Rebuttal Period 0 model in fact divides Period 0 into a control period and a treatment period, is difficult to evaluate based on Dr. Seyhun's report, and Rabobank disputes whether Dr. Seyhun based his regressions only on days without evidence **[**131]** of trader-based manipulation. If Dr. Seyhun did in fact separate days in Period 0 with documentary evidence of trader-based manipulation from days without such evidence and used only the latter as a control period as plaintiffs assert, his report is conspicuously devoid of any indication to that effect. (Seyhun Rebuttal Report ¶¶ 487-94.) Nonetheless, we accept counsel's representation at oral argument that Dr. Seyhun did so separate (Hr'g Tr. 5:2-6:8), and conclude that this second defense is also unpersuasive. Regressions relying on piecemeal clean periods have been described as "unorthodox," and at least one court has noted that the selection of a clean period wholly independent of periods involving challenged conduct is recommended practice. See *Fogarazzo, 263 F.R.D. at 105*. Indeed, this choice of clean period becomes especially difficult to justify given that Exchange plaintiffs assert that there likely exist additional instances of trader-based manipulation in Period 0 that could be identified through additional discovery, which would taint days in the clean period -- a point acknowledged by counsel at oral argument. (Hr'g Tr. 6:3-9; Exch. Pls.' Seyhun Opp'n 13.)

1.1.1.3. Inconsistencies with Dr. Netz

Rabobank **[**132]** casts further doubt on the reliability of Dr. Seyhun's methodologies by identifying substantial inconsistency between Dr. Seyhun's findings and Dr. Netz's findings on the existence and direction of manipulation. Rabobank notes that, when compared to Dr. Netz's findings of manipulation of Rabobank's LIBOR submissions in a particular direction, Dr. Seyhun identifies LIBOR artificiality in the opposite direction 52% of the time using his first ICAP-Ask-based model of but-for LIBOR and 56% of the time using his Rebuttal Period 0 Model. (Hubbard Initial Report ¶¶ 84-86, ex. 1.1; Hubbard Rebuttal Report ¶¶ 46-47.)

Exchange plaintiffs again do not deny the existence of these inconsistencies, but relying on *In re Vitamin C Antitrust Litigation, No. 06 MD 1738 (BMC)(JO), 2012 U.S. Dist. LEXIS 181158, 2012 WL 6675117, at *4 (E.D.N.Y. Dec. 21, 2012)*, suggest that any disagreement between Dr. Seyhun and Dr. Netz is merely a "battle of the experts" that need not be resolved now. However, we are unpersuaded that fundamental disagreements between a party's own experts can be considered a mere "battle of the experts." See, e.g., *Deutsch v. Novartis Pharms. Corp., 768 F. Supp. 2d 420, 469 (E.D.N.Y. 2011)* **[*482]** (identifying inconsistencies between two of the same party's experts as a basis for exclusion).

Further, Dr. Netz's opinions regarding specific instances of **[**133]** trader-based manipulation largely overlap with the allegations of trader-based manipulation set forth in the Exchange plaintiffs' operative complaint. (Compare Netz Initial Report ex. 1, with, e.g., Corrected 4AC ¶¶ 157-79 (Barclays allegations); *id. ¶¶ 194-97* (Rabobank allegations); *id. ¶ 227* (Deutsche Bank allegations).) Consequently, to the extent Dr. Seyhun's opinions contradict Dr. Netz's opinions regarding specific instances of trader-based manipulation and the direction of that manipulation, they contradict Exchange plaintiffs' allegations as well. Such a misfit also indicates a lack of reliability.

Exchange plaintiffs further assure us that any inconsistencies between Dr. Seyhun's opinions and Dr. Netz's opinions (and, by extension, the allegations in the complaint) are of no concern because "where documentary evidence is limited, an initial review of that evidence may yield a result that is directionally inconsistent with the results of a statistical analysis." (Exch. Pls.' Seyhun Opp'n 12-13.) For instance, they suggest, if on a given day, one bank manipulated its submission downward and two banks manipulated their submissions upward, but only documentary evidence of the first **[**134]** bank's manipulation were available, Dr. Seyhun's models could correctly show upward manipulation in LIBOR even though such a result would be seemingly inconsistent with the available documentary evidence (of only the first bank's downward manipulation). (Exch. Pls.' Seyhun Opp'n 13 n.13.)

The possibility of undiscovered instances of manipulation explains away little of the inconsistency between Dr. Seyhun and Dr. Netz, as further documentary evidence of manipulation by additional banks cannot explain away directional inconsistency between documentary evidence of trader-based manipulation by one bank as identified by Dr. Netz (and as alleged by Exchange plaintiffs) and artificiality in that bank's LIBOR submissions as calculated by Dr. Seyhun's models. Accordingly, to the extent artificiality in LIBOR as calculated by Dr. Seyhun's models shares the same direction as artificiality in LIBOR submissions, inconsistency between Dr. Netz's findings (and Exchange plaintiffs' allegations) and the former implies inconsistency between Dr. Netz's findings and the latter as well.

Under Dr. Seyhun's Relative Artificiality model, the direction of artificiality in each bank's LIBOR submissions will **[**135]** generally be the same as the direction of artificiality in overall published LIBOR. Indeed, when a bank's LIBOR submission is within the interquartile range and is therefore retained in calculating LIBOR, Dr. Seyhun's Relative Artificiality model will find artificiality in the bank's LIBOR submission identical in both direction and magnitude to artificiality in LIBOR. Similarly, under the CDS Spread Model of Rabobank's but-for LIBOR submissions, Dr. Seyhun generally finds that Rabobank manipulated its submissions upward throughout Period 0. Figure 1F13 in the Seyhun Initial Report, displaying the CDS Spread Model's results for Rabobank, generally shows Rabobank's actual LIBOR submissions to be above Rabobank's but-for LIBOR submissions during Period 0. By contrast, of the 32 instances of TBM identified by Dr. Netz associated with Rabobank, she finds that only 17 (or 53%) involved upward manipulation.[29] (Netz Initial **[*483]** Report ex. 1; Netz Rebuttal Report ex. 26.) That is, Dr. Netz reaches an inconsistent conclusion on 47% of days. Further, Dr. Seyhun acknowledges inconsistency between the direction of artificiality in a bank's LIBOR submissions suggested by documentary evidence -- also the **[**136]** basis for Dr. Netz's opinions -- and the direction of artificiality calculated by the Rebuttal Period 0 Model: two of the exhibits in the Seyhun Rebuttal Report identify only "Documented Trader Manipulation Events Consistent with [the Rebuttal] Period 0 Model," suggesting the exclusion of inconsistent events. (Seyhun Rebuttal Report ¶ 493, exs. 1-2.)

In sum, none of these inconsistencies between Dr. Seyhun's various models of but-for LIBOR submissions and Dr. Netz's document-based identification of manipulation can be explained away by the specter of additional documentary evidence of manipulation by additional panel banks. Accordingly, these inconsistencies further erode our confidence in the reliability of Dr. Seyhun's models.

1.1.1.4. Inclusion of 2013 in Clean Periods

Rabobank argues that Dr. Seyhun's inclusion of 2013 in his clean periods is improper cherry-picking, as the ICAP-Ask-based models of but-for LIBOR show no statistically significant artificiality during Period 0 when 2013 is removed from the clean period. The inclusion of 2013 is problematic, Rabobank argues, because the relationship between published LIBOR and ICAP-Ask differs between the two discontinuous pieces of **[**137]** Dr. Seyhun's clean periods -- the spread averages 2.7 basis points between 2000 and 2004, but averages negative 1.4 basis points in 2013 (Rabobank Seyhun Mem. 13; Hubbard Initial Report ¶ 115, ex. 7.1) -- and because the ICAP-Ask rate in 2013 exhibits data-quality problems in that it remains entirely unchanged for more than eight consecutive months. (Rabobank Seyhun Reply 3 n.8; Hubbard Initial Report ¶ 116, ex. 8.1.)

Exchange plaintiffs admit that the spread between LIBOR and the ICAP-Ask rate in 2000-2004 (and 2000-2002) differs from the spread in 2013, do not dispute the ICAP-Ask data-quality issue, and do not appear to dispute Dr. Hubbard's findings that the Initial ICAP-Ask models identify no statistically significant artificiality when 2013 is

[29] Of the remaining 15 instances, Dr. Netz finds that 10 involved downward manipulation and five instances in which the LIBOR submission was unchanged.

removed from the respective clean periods. (Exch. Pls.' Seyhun Opp'n 14-15). Rather, they argue that the difference in spread is "inconsequential" because the spread is "absorbed" into the intercept term of Dr. Seyhun's regressions. (Exch. Pls.' Seyhun Opp'n 15; Seyhun Rebuttal Report ¶ 463.)

This contention is unavailing. In assessing the relationship of LIBOR and the 3-month ICAP-Ask rate, Dr. Seyhun conducts an Ordinary Least Squares (OLS) **[**138]** regression[30] specified as follows:

LIBOR = $\alpha + \beta$.(ICAP-Ask) + ε

(Seyhun Report tbl.2.2.) In an OLS regression of this form, α represents the intercept, β represents the coefficient capturing the relationship between ICAP-Ask and LIBOR, and ε represents the error term. In turn, β is calculated as (1) the covariance of dependent variable (LIBOR) and the single explanatory variable (ICAP-Ask), divided by (2) the variance of the explanatory variable (ICAP-Ask). The intercept term, α, is then calculated as the mean of the dependent variable (LIBOR) minus the product of the coefficient β and the mean of explanatory variable (ICAP-Ask). The different absolute relationship between LIBOR and ICAP-Ask in 2000-2004 and in 2013 will affect the covariance of the two series, which in turn impacts the calculated beta. Exchange plaintiffs **[*484]** are correct in that α is also impacted by this difference in spread, since α is, in part, a function of β. Nonetheless, unless β equals exactly 1, the spread between LIBOR and ICAP-Ask will never be differenced out in its entirety. That is, not only is the changing spread not entirely accounted for by the intercept term, the reason it is not so "absorbed" is **[**139]** because the changing spread impacts β, the estimate of how much but-for LIBOR should change given a change in the ICAP-Ask rate.

That is, we know that the inclusion of 2013 in Dr. Seyhun's clean periods is a significant driver of his results, even though the inclusion of 2013 in the clean periods not only introduces a significant data-quality issue but also introduces a qualitatively different relationship between ICAP-Ask and published LIBOR, a difference that is only partially absorbed into the intercept term. Absent an affirmative justification for adding 2013 to the clean periods and a more robust explanation for why such an addition does not skew the results, we conclude that Dr. Seyhun's inclusion of 2013 strongly suggests cherry-picking and renders the ICAP-Ask-based models of but-for LIBOR (and the Relative Artificiality and CDS Spread models of but-for LIBOR submissions) unreliable.[31]

1.1.2 Effect of Changes in LIBOR on EDF Prices

Dr. Seyhun opines that "statistical regression or other mathematical analyses" are available to show that "artificial LIBOR caused Eurodollar futures (and options) contract prices to be artificial," and that further analyses are available to "estimate **[**140]** the approximate amounts of such artificiality." (Seyhun Initial Report ¶ 12.b (emphasis added).) Dr. Seyhun bases this opinion on numerous regression models, from which he derives a number of "impact factors" that purport to measure, on a daily basis, how a change in LIBOR would have been reflected in EDF prices.

Across his two reports, Dr. Seyhun calculates 31 different values representing the "impact" of a change in 3-month LIBOR on each of the 44 Eurodollar contracts traded on the Chicago Mercantile Exchange: 10 in his initial report and 21 in his rebuttal report. (Seyhun Initial Report tbls.5, 10.2; Seyhun Rebuttal Report tbls.3, 6, 9, 12.) Dr. Seyhun also calculates corresponding sets of impact factors for changes in 1-month LIBOR and 6-month LIBOR. (E.g., Seyhun Rebuttal Report tbls.2, 4.) However, because Dr. Seyhun focuses his opinions on measuring the effect of changes in 3-month LIBOR, we so focus as well.

---

[30] For a description of OLS regressions, see supra note 13.

[31] To the extent that Exchange plaintiffs suggest that a regression's high coefficient of determination, which is commonly referred to as "R-squared" and measures the percentage of variation in the dependent variable that is explained by the selected explanatory variables, necessarily implies that regression's reliability and admissibility, (Exch. Pls.' Seyhun Opp'n 15 & n.17), we disagree. A regression may be unreliable, and therefore excludable, despite having a high R-squared, for being misspecified (including by failing to account for significant explanatory variables), among other reasons.

Broadly speaking, these 31 models vary in three primary ways: (1) whether the 3-month LIBOR series is contemporaneous or shifted backwards by one day (i.e., for each day, using the change in LIBOR between the day in question and the day after, rather than the change in LIBOR **[**141]** from the day before to the day in question); (2) whether changes in the implied 3-month forward rate are included as explanatory variables; (3) whether, and how many, lags of explanatory variables are used.[32]

[*485] Initial Report Table 5 presents the results of three models, each using shifted LIBOR and omitting as an explanatory variable changes in the implied 3-month forward rate.[33] The first model regresses changes in EDF prices on changes in LIBOR, with no lags. The second model regresses changes in EDF prices on lagged changes in EDF prices and changes and lagged changes in LIBOR, using the number of lags suggested by the Bayesian information criterion. The third model is like the second model, but uses the number of lags suggested by the Akaike information criterion.[34] Initial Report Table 10.2 presents the results of seven models, each using next-day LIBOR and including as an explanatory variable changes in the implied 3-month forward rate. Each model regresses changes in EDF prices on lagged changes in EDF prices, changes and lagged changes in 3-month LIBOR, and changes and lagged changes in the implied 3-month forward rate. The number of lags varies from 0 to 6, with one model for each **[**142]** number.

Dr. Seyhun's rebuttal report introduces 21 models intended to supersede, at least in part, the 10 models presented in his initial report. Rebuttal Report Table 3 presents the results of four models, three of which use the same regression specification as the three models presented in Initial Report Table 5. However, the results here differ from those presented in the Initial Report Table 5 because Dr. Seyhun has corrected the data processing error attributable to "rollover" days made in his initial report. By contrast, the fourth model regresses changes in EDF prices on changes in today's LIBOR and changes in next-day LIBOR. Dr. Seyhun uses the impact factors produced by one of these models for his damages estimates, though he does not specify which one. (Seyhun Rebuttal Report ¶ 86.) Rebuttal Report Table 6 presents the results of seven models, specified exactly as the seven models reported in Initial Report Table 10.2 (including the use of next-day LIBOR). As with the relationship between Rebuttal Report Table 3 and Initial Report Table 5, the results here differ from those presented in the corresponding Initial Report Table 10.2 because Dr. Seyhun has corrected the data processing **[**143]** error attributable to "rollover" days. Rebuttal Report Table 9 presents the results of three models, specified identically to Initial Report Table 5, but using contemporaneous LIBOR rather than next-day LIBOR and correcting the data-processing error. Similarly, Rebuttal Report Table 12 presents the results of seven models, specified identically to Initial Report Table 10.2 (and Rebuttal Report Table 6), but also using contemporaneous LIBOR and correcting the data-processing error.

Rabobank offers several criticisms of these models: (1) that they cannot be properly interpreted to support causation; (2) that they fail to account for intraday movements in EDF prices; (3) that they fail to account minimum price increments in **[*486]** EDF prices; and (4) that they are contradicted by Dr. Culp's findings that EDF prices exhibit little reaction when LIBOR is published.[35]

---

32 In his initial report, Dr. Seyhun also makes a data processing error in assembling his EDF price series involving "rollover" dates, as Dr. Culp documents. (Culp Initial Report app. D ¶¶ 388-400.) Dr. Seyhun's rebuttal report acknowledges and corrects this error. (Seyhun Rebuttal Report ¶¶ 184-87.)

33 Dr. Seyhun's initial report bears no indication that he uses the shifted (next-day) 3-month LIBOR series rather than a contemporaneous series for the analyses contained in that report. However, in response to Dr. Culp's and Dr. Ordover's identification of the issue, Dr. Seyhun acknowledges in his rebuttal report that he did so, and explicitly indicates whether each model presented in his rebuttal report uses contemporaneous or next-day LIBOR. (Seyhun Rebuttal Report ¶¶ 84, 86.)

34 These criteria each offer a method of determining how many lags of a given variable to use in a regression.

35 Rabobank also criticizes Dr. Seyhun for having conducted these regressions using data from the full class period, January 1, 2005 to May 17, 2010, rather than from only Period 0. (Rabobank Seyhun Mem. 20.) This argument is not necessarily persuasive, as Dr. Seyhun's opinions regarding the relationship between changes in LIBOR and changes in EDF prices apply equally to changes in LIBOR caused by trader-based manipulation in Period 0 and changes in LIBOR caused by persistent suppression in the later part of the Class Period. Dr. Culp finds meaningfully different results when Dr. Seyhun's analyses are

1.1.2.1. Correlation, Not Causation

Rabobank and Exchange plaintiffs primarily dispute whether Dr. Seyhun's models can be properly interpreted to suggest that changes in LIBOR cause determinable changes in EDF prices[36] -- Dr. Seyhun's ultimate opinion for which he relies on these models.

As to the 11 models relying on shifted (next-day) LIBOR, **[**144]** which, according to Dr. Seyhun, establishes that changes in tomorrow's LIBOR cause changes in EDF prices today, we reject them as unreliable at the threshold. The causal relationship purportedly supported by these regressions defies common sense: needless to say, a phenomenon must precede any effects that it causes, and Exchange plaintiffs offer no remotely cogent theory as to how changes in LIBOR manage to travel backward in time in order to affect EDF prices in the past.[37] Dr. Seyhun acknowledges this feature of his models, but contends that his methodology is proper because next-day LIBOR better incorporates "any economic event that happens during most of the U.S. business hours" and "U.S. business developments." (Seyhun Rebuttal Report ¶ 84; Exch. Pls.' Seyhun Opp'n ¶ 20.) That is, Dr. Seyhun asserts, using next-day LIBOR "captures the fact that Eurodollar futures prices can at times react earlier to interest-rate sensitive information before LIBOR actually changes." (Seyhun Rebuttal Report ¶ 87.) In offering these defenses of Dr. Seyhun's models, Exchange plaintiffs have apparently lost sight of the ultimate proposition that Dr. Seyhun set out to prove: that changes in LIBOR cause **[**145]** determinable changes in EDF prices. Exchange plaintiffs' references to "economic events," "business developments," and "interest-rate sensitive information" admit only one fair interpretation: namely, as a concession that those events, those developments, and that information confound the relationship between LIBOR and EDF prices presented in Dr. Seyhun's models, which offer no means of distinguishing changes in EDF prices caused by changes in LIBOR from other conditions causing changes in both EDF prices and LIBOR.

These confounding variables loom large, too, over Dr. Seyhun's remaining models relying on contemporaneous LIBOR. The **[*487]** fact that these models do not rely on the assumption that changes in LIBOR have retrospective effect does not remedy the more glaring error that Rabobank has identified and that Exchange plaintiffs have conceded. Because Dr. Seyhun's models offer no means of controlling for the effects of economic events and business developments, we conclude that they cannot reliably support Dr. Seyhun's causation opinion. See *Bickerstaff v. Vassar Coll., 196 F.3d 435, 449-50 (2d Cir. 1999)*; *Reed Constr. Data Inc. v. McGraw-Hill Cos., 49 F. Supp. 3d 385, 400 (S.D.N.Y. 2014)*; *Bonton v. City of New York, No. 03 Civ. 2833 (SAS), 2004 U.S. Dist. LEXIS 22105, 2004 WL 2453603, at *3 n.32 (S.D.N.Y. Nov. 3, 2004)*.

In sum, "[t]he argument post hoc, ergo propter hoc, is not always a strong one; but the argument ante hoc, ergo propter hoc, must be a good deal **[**146]** weake[r]." 7 May 1861, 162 Parl Deb HC (3d ser.) 1677, 1679. Dr. Seyhun's contemporaneous LIBOR models cannot support his opinions regarding causation, as Exchange plaintiffs concede (and, curiously, emphasize) that LIBOR and EDF prices are each driven by business developments and economic events (Exch. Pls.' Seyhun Opp'n 20; Seyhun Rebuttal Report ¶ 84), and Dr. Seyhun's models offer no means of separating changes in EDF prices caused by those events rather than by changes in LIBOR. Dr. Seyhun's next-day LIBOR models fare even worse, not only suffering from the same confounding variable problem

---

conducted separately only over Period 0 and not the Suppression Period (Culp Initial Report ¶ 216, tbl.6), which lends support for the theory that macroeconomic factors -- which differed substantially between Period 0 and the Suppression Period -- heavily influence the "impact factors" that Dr. Seyhun calculates.

We are similarly skeptical of Rabobank's arguments relying on inconsistency between Dr. Seyhun's findings and Dr. Culp's findings, as any such inconsistency would not call into question the reliability of Dr. Seyhun's methodologies. (Rabobank Seyhun Mem. 17-18; Exch. Pls.' Seyhun Opp'n 17-19.)

[36] The parties do not dispute that an EDF contract settles at the price of 100 minus LIBOR on the settlement date.

[37] Dr. Seyhun suggests at one point that panel banks may have engaged in insider trading (Seyhun Rebuttal Report ¶¶ 133, 137), but Exchange plaintiffs do not rely on this argument in their opposition to Rabobank's motion.

but also relying on the unfounded assumption that a change in LIBOR one day can effect changes in EDF prices in the past.

1.1.2.2. Intraday Variations in Price

Rabobank next argues that Dr. Seyhun's models fail to analyze intraday EDF data, opting instead to rely on the daily settlement prices calculated each day at 2:00 p.m. Chicago time. This method is unreliable, Rabobank contends, because it relies upon the unfounded assumption that any artificiality in LIBOR has an impact of constant magnitude over the 23 hours per day during which EDFs are traded. (Rabobank Seyhun Mem. 21-22.) Exchange **[**147]** plaintiffs respond that no analysis of intraday EDF data is necessary "because there is a single LIBOR fix per day and a single LIBOR artificiality per day," and consideration of intraday measurements would be "futile for purposes of demonstrating the impact of LIBOR on EDF prices." (Exch. Pls.' Seyhun Opp'n 22.)

Notably, Exchange plaintiffs do not dispute that Rabobank's assertion that Dr. Seyhun's decision to conduct his analysis at a daily level incorporates the assumption that LIBOR artificiality has a single, constant amount of impact on EDF prices over a given trading day. But this assumption is inconsistent with Dr. Seyhun's assertions that EDFs "trade in efficient markets and react to all relevant information in a timely and complete manner," (Seyhun Rebuttal Report ¶ 124), and Exchange plaintiffs' assertion that "EDF prices continually incorporate all fundamental information" (Exch. Pls.' Seyhun Opp'n 22). And indeed, intraday variations in EDF pricing are of particular relevance to this action. Unlike, for example, the OTC or Lender plaintiffs, whose LIBOR-based instruments are pegged to LIBOR and reset on a periodic basis using published LIBOR on a given day, EDF traders' **[**148]** exposure to changes in LIBOR, even under Exchange plaintiffs' theory, was less periodic and less consistent. The record establishes that named plaintiffs actively opened and closed EDF positions within a single day (Ordover Initial Report sec. VIII), and Exchange plaintiffs themselves have acknowledged that these "in-and-out" traders make up a large proportion of the putative class (Nov. 1, 2017 Hr'g Tr., 12:24-13:11, ECF No. 2341).

[*488] Given the importance of intraday trading in assessing the impact of LIBOR artificiality on EDF traders, Dr. Seyhun's failure to account for intraday variation in EDF prices further undermines the reliability of his ultimate opinion that statistical methods are available to determine that impact.

1.1.2.3. Minimum Price Increments ("Tick" Size)

Rabobank further criticizes Dr. Seyhun's model for failing to incorporate "ticks," or the minimum price increments in which EDF contracts trade. Under Rabobank's theory, the impact of trader-based manipulation on published LIBOR was often less than one tick in magnitude, and such a small extent of impact will not move EDF prices by one "tick" even assuming some causal relationship flowing from LIBOR to EDF prices. Therefore, **[**149]** Rabobank argues, Dr. Seyhun's model is further flawed for this failure to incorporate minimum tick sizes. (Rabobank Seyhun Mem. 22-23.) Exchange plaintiffs respond that Dr. Seyhun has in fact offered a formula to account for minimum price increments, and that Dr. Seyhun's failure to incorporate that formula into his models is of "no consequence" because "it involves a logical rather than an empirical argument." (Exch. Pls.' Seyhun Opp'n 22-23.)

Exchange plaintiffs are correct to the limited extent that Dr. Seyhun has indeed offered a formula regarding tick sizes. This formula is, however, wholly unhelpful: Dr. Seyhun opines that the <u>probability</u> that LIBOR artificiality affected EDF prices is equal to the amount of LIBOR artificiality divided by the tick size for the EDF contract in question. (Seyhun Rebuttal Report ¶ 216.) But knowing that EDF prices will be affected, on average, a certain percentage of the time is insufficient; the operative question for class certification purposes is determining which prices were affected and which prices were not. That is, we are ultimately interested in the <u>empirical</u> question of how much EDF prices were affected by artificiality in LIBOR; knowing **[**150]** that EDF prices may or may not, as a matter of logic, have been impacted a certain percentage of the time is not responsive.

Exchange plaintiffs attempt to minimize the importance of tick sizes, reasoning that "[t]he minimum tick size will either nullify the effect of LIBOR artificiality on that day, or amplify it, based on the tipping point of the minimum tick size." (Exch. Pls.' Seyhun Opp'n 23.) We agree with this analysis of the impact of minimum tick sizes; indeed, it is the root of our concern regarding Dr. Seyhun's failure to consider tick sizes: the difference between amplification or nullification of LIBOR artificiality, i.e., some impact or no impact whatsoever, is difficult to overstate. Knowing which of the two will occur is of critical importance in assessing the impact of LIBOR manipulation on EDF prices, and Dr. Seyhun's models offer no aid in making that assessment. While we could conceive of an additional rounding step that could be incorporated into Dr. Seyhun's models, it is Exchange plaintiffs' responsibility, and not ours, to provide models that are sufficiently complete so as to be reliable and helpful to the factfinder. Dr. Seyhun's failure to do so further supports **[**151]** the exclusion of his opinions.

1.1.3. Conclusion

Rabobank's motion to exclude Dr. Seyhun's opinions is granted. Dr. Seyhun's ultimate opinions, that classwide methods are available to determine the existence and extent of LIBOR manipulation and to determine the impact of that manipulation on EDF prices, are unreliable. The numerous models that Dr. Seyhun proposes are inadequate to support this conclusion, as Exchange plaintiffs have not established that those models are themselves reliable. **[*489]** Because Dr. Seyhun's opinions regarding damages rely on his opinions regarding the determination of LIBOR manipulation and resulting impact on EDF prices, we conclude that those opinions should be excluded as well.

Dr. Seyhun's multitude of models of artificiality in LIBOR and LIBOR submissions are rife with inconsistencies: they are internally inconsistent, they are inconsistent with Dr. Netz's opinions, and they are inconsistent with Exchange plaintiffs' own allegations of trader-based manipulation. Dr. Seyhun's models of changes in EDF prices caused by changes in LIBOR, though greater in number, are no more reliable, as they are not only incapable of separating the effect of macroeconomic events **[**152]** but also incapable of actually determining when EDF prices would have changed in light of minimum price increments. We have previously questioned whether plaintiffs would "be able to show that LIBOR suppression of a particular amount would have caused a corresponding, determinable change in [EDF] trading prices," *LIBOR VI, 2016 U.S. Dist. LEXIS 175929 at 63, 2016 WL 7378980*, and nothing in Dr. Seyhun's reports causes us to reconsider that skepticism.

1.2. Dr. Netz

Exchange plaintiffs present two reports from Dr. Janet Netz: (1) an initial report dated February 2, 2017 (Decl. of Thomas Elrod ex. 1, July 21, 2017, ECF No. 2121); and (2) a rebuttal report dated May 3, 2017 (Decl. of Thomas Elrod ex. 2, July 21, 2017, ECF No. 2121). We refer to these as the Netz Initial Report and the Netz Rebuttal Report. In her reports, Dr. Netz offers: (1) a number of opinions derived from her review of communications between traders; (2) the opinion that manipulation in LIBOR submissions impacted published LIBOR; (3) the opinion that changes in LIBOR cause calculable changes in prices of EDF contracts and options; and (4) a number of opinions regarding the calculation of damages. Based on Dr. Netz's credentials,[38] we conclude that she is generally qualified to offer **[**153]** opinions of this type. We accordingly reject Rabobank's challenges to Dr. Netz's expert qualifications, but address them specifically in assessing Dr. Netz's specific opinions.

1.2.1. Opinions Based on Trader Communications

Dr. Netz devotes a substantial portion of her reports to analyzing documentary evidence of communications between traders, LIBOR submitters, and other individuals affiliated with panel banks. Relying on her interpretation

---

[38] Dr. Netz is a founder and partner of ApplEcon, an economics consulting firm, and was formerly a professor of economics at Purdue University. She holds a Ph.D. and M.A. in economics from the University of Michigan and a B.A. in economics from the University of California, Berkeley, has written a number of papers on antitrust economics, and has served as an expert witness in numerous antitrust cases. (Netz Initial Report app. A.)

of these documents, Dr. Netz opines that (1) panel banks manipulated their LIBOR submissions; (2) these manipulated LIBOR submissions impacted published LIBOR; (3) panel banks believed that LIBOR manipulation would affect EDF prices. In reaching these opinions, Dr. Netz also concludes that review of documentary evidence "is a common, class-wide method using common evidence that can prove liability." (Netz Rebuttal Report 10.)

At the outset, we note that Exchange plaintiffs and Rabobank dispute the scope of Dr. Netz's opinions. Rabobank asserts that Dr. Netz concludes that certain challenged conduct in fact occurred, and Exchange **[*490]** plaintiffs respond that Dr. Netz "does not opine that Defendants engaged in trader-based conduct or colluded in doing so," **[**154]** but rather opines only that "documents consistent with those allegations are available, and are common to the class." (Exch. Pls.' Netz Opp'n 8 (emphasis omitted).)

Dr. Netz's opinions simply are not limited in the way Exchange plaintiffs suggest. The Netz Initial Report contains numerous conclusions that, based on her review of trader communications, certain challenged conduct in fact occurred and Exchange plaintiffs were in fact impacted. For example, Dr. Netz opines that "[t]he discovery record shows that Defendants manipulated their LIBOR submissions in ways that were inconsistent with the reporting rules established by the BBA," that "Defendants engaged in coordinated trader-based manipulation," and that "Defendants engaged in suppression manipulation." (Netz Initial Report 13, 18, 20.) While Dr. Netz later opines on the availability and applicability of common evidence, for example that "[l]iability can be proven using common, class-wide methods based on common evidence," (Netz Rebuttal Report 4), these subsequent opinions do not supersede her earlier opinions. We consider different aspects of Dr. Netz's opinions in turn.

To the extent Dr. Netz offers her interpretation of trader **[**155]** communications to conclude that manipulation in fact occurred, these opinions are not based on Dr. Netz's "scientific, technical, or other specialized knowledge" as required by *Rule 702(a)*. While Exchange plaintiffs correctly suggest that an expert's testimony may be permissible, for example, "to translate esoteric terminology," *United States v. Mejia, 545 F.3d 179, 190 (2d Cir. 2008)*, the trader communications that Dr. Netz interprets are clear on their face and "address issues of fact that [the trier of fact] is capable of understanding without the aid of expert testimony," *In re Longtop Fin. Techs. Ltd. Sec. Litig., 32 F. Supp. 3d 453, 460 (S.D.N.Y. 2014)*.[39] Exchange plaintiffs fail to explain what specialized knowledge Dr. Netz drew upon to conduct her review of trader communications, and ***HN38***[] "[a]cting simply as a narrator of the facts does not convey opinions based on an expert's knowledge and expertise." *Tourre, 950 F. Supp. 2d at 675*. Our concern is heightened here, as Dr. Netz offers no explanation of how the communications that she reviewed were selected.

Similarly, to the extent Dr. Netz interprets trader communications to opine on the traders' actual motives and states of mind, these opinions are impermissible. See, e.g., *Highland Capital Mgmt., L.P. v. Schneider, 379 F. Supp. 2d 461, 469-70 (S.D.N.Y. 2005)*; *In re Rezulin, 309 F. Supp. 2d at 547*. While she may opine on traders and LIBOR submitters' economic incentives as a general matter, those opinions may not extend to the **[**156]** traders and submitters' specific states of mind.

Finally, to the extent that Dr. Netz opines on the existence of documents, these opinions are also excluded. The general proposition that some documents may pertain to all class members is obvious and not insightful, and Exchange plaintiffs offer no explanation why someone with Dr. Netz's expertise and qualifications is needed to offer it. At class certification, the operative question is whether LIBOR manipulation, once established through documents or other evidence, will pertain to all class members; the issue at this stage is not whether those documents exist. Indeed, Exchange plaintiffs offer no authority **[*491]** supporting their position that the "existence [of documents and data regarding defendants' conduct] is an appropriate topic for the opinion of Plaintiffs' expert on class certification," (Exch. Pls.' Netz Opp'n 7), and we find none.

Dr. Netz's opinions that documents exist establishing certain elements of liability, when properly understood, are opinions on the merits that are irrelevant at the class certification stage. An economic expert at class certification may permissibly opine that event *x* -- as established through documents **[**157]** or otherwise -- has an economic

---

[39] Additionally, even if the trader communications interpreted by Dr. Netz required expert knowledge, we would question whether Dr. Netz's expertise in antitrust economics extends so far as to include terminology used by EDF traders.

effect that is common to all class members. But she may not opine that event *x* in fact occurred, which remains for the trier of fact to determine. Even when such an opinion is formulated as "evidence exists establishing that event *x* occurred," it is no more relevant at class certification and is no more admissible than a direct opinion on the merits.

Further, even if these opinions were offered at the merits stage, the latter formulation would be no less invasive of the province of the trier of fact. And as a corollary, it would be no more admissible at that stage, either. See *Tourre, 950 F. Supp. 2d at 675* ("Expert testimony may not usurp the province of the judge to instruct on the law, or of the jury to make factual determinations.").[40] Therefore, even accepting Exchange plaintiffs' characterization that Dr. Netz "opine[s] on whether documents exist that could prove [their] allegation[s] on a common basis," (Exch. Pls.' Netz Opp'n 12), her opinions to that effect remain inadmissible.

In sum, we conclude that Dr. Netz's opinions interpreting documents and commenting on their existence are not admissible. Of course, this holding regarding Dr. Netz's opinions derived from **[**158]** her review of trader communications does not, by itself, preclude her from opining that manipulation of LIBOR submissions impacted LIBOR in a way common to all class members, or from opining that changes in LIBOR impacted EDF prices in a way common to all class members. We next consider whether those opinions are inadmissible for other reasons.

1.2.2. Effect of Manipulation on LIBOR

Dr. Netz subsequently opines that "manipulated LIBOR submissions affected published LIBOR." (Netz Initial Report 29.) As to trader-based manipulation, Dr. Netz first identifies, by reviewing documentary evidence, 163 instances of alleged trader-based manipulation. Dr. Netz determines that in 111 of those instances, the manipulated submission could have affected published LIBOR once the BBA's trimming methodology is considered. In turn, for each of those 111 instances, Dr. Netz assumes that, in the absence of manipulation, the panel bank in question would have made as its LIBOR submission the median submission reported by all panel banks on that day, and concludes that the replacement of a manipulated submission with the median submission would have affected published LIBOR on 65 of those days. Dr. Netz then **[**159]** highlights three specific examples (from the 65 days identified through her documentary analysis), examines the range of LIBOR submissions made on those dates, and explains how the alleged manipulation could have impacted published LIBOR. (Netz Initial Report 29-31.)

Rabobank contends that these opinions are inadmissible because they are not reliable **[*492]** and not helpful to the trier of fact. Specifically, Rabobank asserts that Dr. Netz's analysis is unreliable because it is based on the "arbitrary and speculative assumption" that a panel bank would have submitted the median of all banks' submissions absent trader-based manipulation. (Rabobank Netz Mem. 12.) In opposition, Exchange plaintiffs respond that Dr. Netz's analysis is probative of the "hotly contested" question of whether trader-based manipulation of one bank's submission could have affected published LIBOR, given the trimming of submissions outside the interquartile range. (Exch. Pls.' Netz Opp'n 13-14.) Rabobank implicitly concedes that whether a single bank's LIBOR submissions could have impacted published LIBOR is a germane question, but disputes Exchange plaintiffs' characterization of the issue as "hotly contested" based **[**160]** on the consistency between Dr. Netz's and Dr. Hubbard's opinions on the issue. (Rabobank Netz Reply 4-5.)

We cannot conclude, as Rabobank urges, that Dr. Netz's opinions in this realm are entirely unhelpful. The ability to impact the market, the existence of artificial prices, and the defendant's causation of those prices are elements of a CEA claim, see, e.g., *LIBOR I, 935 F. Supp. 2d at 713, slip op. at *94-95*; *In re Platinum & Palladium Commodities Litig., 828 F. Supp. 2d 588, 598 (S.D.N.Y. 2011)*, and the question of whether its submissions could impact published LIBOR is therefore "a fact in issue," *Fed. R. Evid. 702(a)*.

---

[40] To the extent that Dr. Netz's "evidence exists" opinions address the admissibility of evidence, those opinions are inadmissible for yet another reason: opining on a legal question, the resolution of which is left to the Court. See *Foreman, 950 F. Supp. 2d at 975*; see also *Fed. R. Evid. 104(a)*.

We find little merit in Rabobank's contention that Dr. Netz's opinion here is irrelevant because she and Dr. Hubbard reach the same conclusion: that Rabobank could have impacted 3-month LIBOR on 46% of days in Period 0. The parties' agreement means that the issue is not as "hotly contested" as Exchange plaintiffs suggest, but does not render evidence directed to that fact irrelevant. See *Old Chief v. United States, 519 U.S. 172, 179, 117 S. Ct. 644, 136 L. Ed. 2d 574 (1997)* ("The fact to which the evidence is directed need not be in dispute." (quoting *Fed. R. Evid. 401* advisory committee's note)). Indeed, Rabobank's argument here is somewhat circular in that it relies on Dr. Netz's opinion, which it seeks to have excluded, to establish agreement on the point. The trimming methodology applied to LIBOR submissions in order **[**161]** to calculate published LIBOR introduces sufficient complexity such that Dr. Netz's analysis is at least somewhat helpful.

We also reject Rabobank's argument that Dr. Netz's opinion is unreliable because her median-replacement methodology relies on unsupported assumptions. As Dr. Netz disclosed in her initial report, she "do[es] not claim that the median LIBOR submission is necessarily the correct proxy for the but-for LIBOR submissions or that the LIBORs in Exhibit 2 are accurate measures of but-for LIBOR." (Netz Initial Report 29.) Rather, Dr. Netz opines that Rabobank's submissions could have impacted published LIBOR, which her median-replacement methodology is in fact capable of demonstrating.[41] In the absence of any suggestion that she has implemented her methodology in an unreliable manner, we conclude that Dr. Netz's methodology is sufficiently reliable to support her opinion that Rabobank's submissions could impact published LIBOR.

[*493] 1.2.3. Effect of Changes in LIBOR on EDF Prices

Dr. Netz, like Dr. Seyhun, opines that changes in LIBOR would have affected the prices of EDF contracts and options in a determinable way, basing this opinion on an arbitrage theory, her interpretation of **[**162]** several communications between traders and LIBOR submitters, and a correlation analysis. (Netz Initial Report 32-38.)

Rabobank contends at the threshold that Dr. Netz is unqualified to opine on the relationship between LIBOR and EDFs because her experience in economics broadly does not extend to the specific subject of EDFs and EDF trading. (Rabobank Netz Mem. 13-15.) Exchange plaintiffs' appeals to Dr. Netz's extensive experience in antitrust cases more broadly are not persuasive because the substance of the arbitrage theory that Dr. Netz propounds hardly resembles the issues of "supply, demand, pricing, etc." at play in a more typical antitrust case (Exch. Pls.' Netz Opp'n 15); indeed, no antitrust claims remain in the Exchange plaintiffs' action at all. Nonetheless, we conclude that Dr. Netz's prior research into arbitrage -- albeit in physical commodities markets -- is sufficient to allow her to opine on the subject in her reports. Indeed, as an economist, Dr. Netz has sufficient training and experience in econometrics in order to conduct statistical testing of correlation and causation and to interpret the results of those tests.[42]

Turning to reliability, we consider the bases for **[**163]** Dr. Netz's causation opinion: interpretations of certain trader communications, an analysis of correlations between published LIBOR and EDF prices, Dr. Seyhun's analyses, and two academic papers analyzing the relationship between LIBOR and EDF prices.

First, Dr. Netz interprets several communications between traders and LIBOR submitters to opine that "traders and submitters understood that any changes to LIBOR would immediately and directly impact Eurodollar futures prices." (Netz Initial Report 36.) These opinions impermissibly go to the beliefs and states of mind of those traders and

---

[41] Dr. Netz's median-replacement methodology maximizes the frequency with which Rabobank's submission impacts but-for LIBOR, though not the magnitude of that impact. A but-for LIBOR submission by Rabobank equal to the median of actual submissions ensures that the but-for submission will fall within the interquartile range and therefore will not be excluded by the trimming methodology.

[42] Additionally, as we have already held, the various documents that Dr. Netz purports to interpret are understandable on their face and do not require particular expertise to interpret. It naturally follows that her resulting opinions should not be excluded based on a lack of qualifications (though they may be inadmissible for other reasons).

submitters, and are inadmissible.[43] See *Highland Capital, 379 F. Supp. 2d at 469-70*; *In re Rezulin, 309 F. Supp. 2d at 547*.

Second, Dr. Netz calculates the correlations between EDF prices and various tenors of LIBOR. (Netz Initial Report 36-37, ex. 3). From these correlations, her review of Dr. Seyhun's report, and two academic articles, Dr. Netz concludes that changes in LIBOR cause calculable changes in EDF prices. While correlations may be probative of causation in other circumstances, we conclude that they are not in this case: any correlation is confounded by the presence of macroeconomic events. See supra section III.1.1.2.1. Exchange **[*494]** plaintiffs argue that the presence of other **[**164]** factors impacting EDF prices "does not mean that LIBOR's effect disappears in the wake of these other factors," (Exch. Pls.' Netz Opp'n 20), but Exchange plaintiffs have not sufficiently established that LIBOR has an effect as an initial matter and they offer no means of separating the effect of changes in LIBOR (if any) from that of other factors.

Weaker still is Exchange plaintiffs' argument that parsing out "macroeconomic factors affecting interest rates" is unnecessary because they "exist in both the real world and in the but-for world." (Exch. Pls.' Netz Opp'n 20.) As Dr. Netz and Dr. Seyhun both concede, those factors confound a relationship between LIBOR and EDF prices, and the failure to parse them out in assessing the difference between the real world and the but-for world is therefore likely to construct a but-for world that differs from the actual world in ways other than the absence of alleged LIBOR manipulation.

Dr. Seyhun's causation opinions do not, as Exchange plaintiffs suggest, bolster Dr. Netz's causation opinions. (Exch. Pls.' Netz Opp'n 20.) To be sure, ***HN39***[] an expert may rely on the admissible opinions of another expert, see *Gussack Realty Co. v. Xerox Corp., 224 F.3d 85, 94-95 (2d Cir. 2000)*; see also *Fed. R. Evid. 703*, but Dr. Netz is not entitled **[**165]** to rely on Dr. Seyhun's unreliable opinions for support. Indeed, Dr. Netz's opinions suffer from the same tick-size flaw in Dr. Seyhun's opinions: she similarly opines that she is able to determine the probability that EDF contract prices were impacted by changes in LIBOR, an opinion that is unhelpful.[44] See supra section III.1.1.2.3.

Nor do the two academic articles cited by Dr. Netz[45] support her causation opinion. We are dubious that Grinblatt and Jegadeesh's analysis of weekly changes in LIBOR and EDF prices supports Dr. Netz's opinions regarding daily causation given the specific timing issues discussed at length in Dr. Seyhun's and Dr. Culp's reports. See Grinblatt & Jegadeesh at 1516-19. Similarly, Fung and Leung's analysis examines actual Eurodollar rates observed in the market, not LIBOR, see Fung & Leung at 119 n.6 (referring to Eurodollar rate quotes corresponding to the end of the trading day in London), which has different implications for the viability of any arbitrage strategy and, by extension, the relationship between changes in LIBOR and changes in EDF prices (e.g., Culp Initial Report ¶¶ 353-61, Culp Rebuttal Report ¶ 26).

---

[43] Further, the documents bear little indication that the traders were referring to EDFs as opposed to other futures contracts or other LIBOR-based instruments, and Dr. Netz appears to assume so without justifying that assumption. Additionally, Dr. Netz's final example, regarding LIBOR manipulation on a settlement date, does not establish that traders believed changes in LIBOR caused changes in EDF prices generally. The proposition that the settlement price of an EDF is dependent on the settlement date's published LIBOR is uncontroverted. (E.g., Culp Initial Report ¶ 92).

[44] Her further opinion that the impact of alleged LIBOR manipulation on EDF prices was "frequent and common" is additionally unsupported; it is unclear how she reaches that opinion based on the probabilities stated in her initial report. (Netz Rebuttal Report 20.) If on a given day the impact of manipulation on published LIBOR is less than half the minimum price increment, the probability that that manipulation impacted EDF prices would be less than 50% under Dr. Netz's formula and she would therefore be unable to conclude that the manipulation more likely than not impacted EDF prices.

[45] Mark Grinblatt & Narasimhan Jegadeesh, Relative Pricing of Eurodollar Futures and Forward Contracts, 51 J. Fin. 1499 (1996) ("Grinblatt & Jegadeesh"); Hung-Gay Fung & Wai K. Leung, The Pricing Relationship of Eurodollar Futures **[**166]** and Eurodollar Deposit Rates, 13 J. Futures Markets 115 (1993) ("Fung & Leung").

Absent further support, Dr. Netz's correlation analysis can show only that -- correlation. Because Dr. Netz fails to bridge the analytical gulf between correlation and causation, her opinions that changes in LIBOR caused changes in EDF prices are excluded.

[*495] 1.2.4. Damages

Finally, Dr. Netz offers several opinions regarding the calculation of damages: (1) that published LIBOR being lower than but-for LIBOR harmed class members who initiated or closed certain positions during different periods (Netz Initial Report 38-44); (2) that all class members were harmed because it is "statistically improbable" that EDF traders are unlikely to have "benefited from or been unharmed by every single act of Defendants' LIBOR manipulation" (Netz Initial Report 44-46); (3) that class members also suffered common harm in the form of the time-value of money in their margin accounts (Netz Initial Report 46-47), and that (4) damages can be calculated on a formulaic basis (Netz Initial Report 48).

As a general matter, these opinions rely on Dr. Netz's earlier opinion that changes in LIBOR cause determinable changes in EDF prices and Dr. Seyhun's opinions to the same effect. Because **[**167]** we determine those opinions to be unreliable, Dr. Netz's derivative damages opinions are therefore insufficiently supported and are therefore inadmissible as well.

We also make three further specific observations. First, the parties' dispute over Dr. Netz's opinion that almost all traders were "harmed" as a result of LIBOR manipulation is, in essence, a dispute over the proper interpretation of the term "harmed." Exchange plaintiffs and Dr. Netz interpret "harmed" to mean "have been negatively impacted at least once" (i.e., the trader paid too much money or received not enough money from a single EDF transaction), even if the trader benefited overall from alleged LIBOR manipulation. (Exch. Pls.' Netz Opp'n 22-23). Rabobank interprets "harmed" to mean a negative impact overall once all impacts of LIBOR manipulation have been taken into account. (Rabobank Netz Mem. 20-21). Given our conclusion that Dr. Netz's damages opinions are unreliable, we need not definitively resolve this question here.[46]

Second, Exchange plaintiffs' reliance on Mr. Miller's opinions to support Dr. Netz's statement that "data could be obtained from traders themselves, their brokers (FCMs), or the Chicago Mercantile **[**168]** Exchange" is unavailing. (Exch. Pls.' Netz Opp'n 24-25.) Dr. Netz did not rely on Mr. Miller's opinions and instead based her opinion on her "understanding that Eurodollar futures and options are transparent, public markets in which common practice and exchange and federal requirement[s] provide that customers for each transaction be identifiable." (Netz Initial Report 47 n.172.) We question whether Dr. Netz's expertise extends to a subject like the availability of trading records, and Mr. Miller's opinions provide no support because they are inadmissible as we discuss below.

Third, we do not share Rabobank's certainty that Dr. Netz's opinions regarding time-value damages are entirely irrelevant. Compare *Helena Assocs., LLC v. EFCO Corp., No. 06 Civ. 861 (PKL), 2009 U.S. Dist. LEXIS 65582, 2009 WL 2355811, at *4 (S.D.N.Y. July 29, 2009)* (allowing a plaintiff to claim additional damages that were "more properly considered an extension of [its] original damages theory rather than a new theory of liability"), with *Point Prods. A.G. v. Sony Music Entm't, Inc., No. 93 Civ. 4001 (NRB), 2002 U.S. Dist. LEXIS 24450, 2002 WL 31856951, at *5 (S.D.N.Y. Dec. 19, 2002)* (precluding a plaintiff "from changing its damage theory nine years into this litigation"). To the extent these damages may be taken into account, Dr. Netz's **[*496]** opinions regarding time-value damages on the one hand and formulaic calculation on the other are in considerable tension: Dr. Netz does not opine that **[**169]** all EDF traders were subject to the same margin requirements, or that they all shared the same time-value of money. (Netz Initial Report 46-47.) Indeed, an assessment of each trader's margin requirements and personal discount rates appears to necessitate individualized inquiry and does not appear susceptible to formulaic calculation.

---

[46] Under the CEA, "a plaintiff has standing to bring a commodities manipulation action only if he has suffered 'actual damages' as a result of defendant's manipulation." *LIBOR II, 962 F. Supp. 2d at 620* (quoting *7 U.S.C. § 25(a)(1)*). Establishing "actual damages" requires some notion of netting. See id.

1.2.5. Conclusion

Rabobank's motion to exclude Dr. Netz's opinions is granted in part and denied in part. Dr. Netz's opinions derived from her review of trader communications are excluded, regardless of whether she opines that manipulation actually occurred or whether she opines that documents establishing manipulation are available. Dr. Netz's opinions that changes in LIBOR cause calculable changes in EDF prices are excluded based on the reasons discussed at length in our consideration of Dr. Seyhun's opinions, and her opinions regarding damages are excluded as well because they are reliant on her causation opinions. Dr. Netz's opinions regarding the impact of LIBOR submissions on published LIBOR, which address facts in issue, remain admissible.

1.3. Mr. Beevers

Exchange plaintiffs submit two reports from Mr. Craig Beevers: (1) an initial report dated February **[**170]** 2, 2017 (Decl. of David Kovel ex. A, July 10, 2017, ECF No. 2071); and (2) a rebuttal report dated May 3, 2017 (Decl. of David Kovel ex. B, July 10, 2017, ECF No. 2071). We refer to these as the Beevers Initial Report and the Beevers Rebuttal Report. In these two reports, Mr. Beevers offers several opinions across a number of subjects: (1) the adequacy of Rabobank's data productions; (2) a methodology for identifying trader-based manipulation; (3) a Monte Carlo analysis suggesting that panel banks engaged in collusive behavior; and (4) the frequency of alleged manipulation. We conclude that Mr. Beevers is generally qualified to offer these opinions based on his extensive experience in the financial industry.[47]

1.3.1. Data Adequacy

Mr. Beevers first offers a number of opinions regarding Rabobank's data productions. After providing an overview of trade reporting and risk reporting systems both generally and at Rabobank specifically (Beevers Initial Report ¶¶ 24-39), Mr. Beevers opines that Rabobank's data productions have been deficient in certain ways, (Beevers Initial Report ¶¶ 46-63), and that trader-level records should be produced because they are necessary to his methodology for identifying **[**171]** trader-based manipulation and the burden to defendants is low. (Beevers Initial Report ¶¶ 40-45, 64-72).

1.3.1.1. Discussion of Trade Reporting and Risk Reporting Systems

Mr. Beevers may address trade reporting and risk reporting in the financial industry generally. We agree with Exchange plaintiffs that his experience provides him with the requisite knowledge and qualifies him to so opine. He may not, however, interpolate these general opinions regarding the financial industry as a whole to Rabobank specifically. Mr. Beevers lacks knowledge as to what data Rabobank in fact possesses, a point that he **[*497]** concedes and Exchange plaintiffs cannot seriously dispute. (Beevers Dep. 408:3-4, Decl. of Robert Lindholm ex. 73, July 7, 2017, ECF No. 2061). While we would view these Rabobank-specific opinions differently had they been anchored in specific legal or regulatory requirements, the fact that other banks possess certain data as a general matter says little about either (1) whether Rabobank ever had this data or (2) Rabobank has maintained this data until now. Therefore, Mr. Beevers's opinions are excluded to the extent they suggest that Rabobank in fact maintains certain reporting systems **[**172]** or possesses certain data.

---

[47] Specifically, Mr. Beevers has worked at various financial institutions for more than 20 years, including as a trader and in certain risk management positions. (Beevers Initial Report app. A.) More recently, as counsel informed us at oral argument, Mr. Beevers was appointed by the Governor of Bank of England to the working group studying replacements for LIBOR. (Hr'g Tr. 16:24-17:3.)

1.3.1.2. Specific Data Deficiencies

Mr. Beevers next opines that Rabobank's productions are deficient in four specific ways: (1) certain risk management reports are missing; (2) data files contain inconsistent formatting for date information; (3) inconsistent mapping information was provided; and (4) certain datasets appear to be incomplete and contain duplicates.

Mr. Beevers's opinion that certain risk management reports are missing is not admissible for the reasons discussed above: Mr. Beevers lacks knowledge as to what data Rabobank in fact possesses (or possessed) and is forced to speculate as to the existence of those reports. This speculation is plain on the face of his opinions, suggesting, for example, that certain reports "are routinely emailed to desk-wide or division-wide distribution lists on a periodic basis," and that he therefore "believe[s] such reports may exist in Rabobank's email archive." (Beevers Initial Report ¶¶ 46-47 (emphasis added).) We find similarly speculative Mr. Beevers's contention that Rabobank did not produce all of its trade data because the number of trades appears "to be too low by a factor of approximately two" based solely **[**173]** on the opinion of unidentified "experienced money market traders." (Beevers Initial Report ¶ 58.)

As to Mr. Beevers's remaining criticisms, each relies on the implicit assumption that Rabobank possessed immediately tractable data and should have produced it. Mr. Beevers identifies no basis for this assumption, and we find no authority for such a proposition.[48] Rather, the process of data cleansing and ensuring that data are tractable is not only a topic addressed extensively in the literature, see, e.g., Jonathan I. Maletic & Andrian Marcus, Data Cleansing: A Prelude to Knowledge Discovery, in Data Mining and Knowledge Discovery Handbook, (Oded Maimon & Lior Rokach, eds. 2005) ("Data entry and acquisition is inherently prone to errors, both simple and complex."), but is also a task performed by experts with regularity (including by Dr. Willig in this case (Willig Initial Report app. 4), see, e.g., *DL v. District of Columbia, 194 F. Supp. 3d 30, 40 (D.D.C. 2016)* ("Although the primary focus of [the expert's] testimony in those cases has been statistical analysis, he would not have been able to perform that analysis if he had not initially performed the programming and required data cleaning."); *Callahan v. City of Chicago, 78 F. Supp. 3d 791, 815 (N.D. Ill. 2015)* ("[The expert] 'cleaned' the data set before using it **[**174]** . . . ."); *In re Polyurethane Foam Antitrust Litig., 314 F.R.D. 226, 278 (N.D. Ohio 2014)* (referencing an expert's discussion of "the extent of each Defendant's **[*498]** transactional data and the 'cleaning' steps [the expert] took to make the data usable"). Indeed, Mr. Beevers's expectation appears particularly unrealistic here given the breadth of the data that he seeks and Rabobank's scale as an entity.

We therefore conclude that Mr. Beevers's opinions purporting to identify specific deficiencies in Rabobank's data productions are speculative, and therefore inadmissible.

1.3.1.3. Production

Finally, Mr. Beevers offers a number of opinions addressing whether certain trader-level data must be produced. He opines that trader-level records are "required" in order "to analyze the impact of trader-based manipulation," (Beevers Initial Report ¶ 64), and that this necessity outweighs the burden on defendants of making this production, (Beevers Initial Report ¶¶ 40-41). Therefore, Mr. Beevers concludes, "data quality issues presented by Rabobank not only limit the depth and quality of analysis available to civil litigants, but likely substantially impeded regulatory investigations" and that this poor quality "dictates that Defendants should be required to remediate and **[**175]** supplement the productions to date." (Beevers Initial Report ¶¶ 41, 72.) These opinions are inadmissible both because they are irrelevant and because they offer legal conclusions (including on issues that we have already considered and adjudicated).

---

[48] Mr. Beevers's specific criticism of "nonsensical" date information in certain records is also not supported by the example he identifies at paragraphs 52 and 53 of his initial report. He asserts that "the maturity date is nonsensical insofar as the maturity date is before the trade date," but the identified maturity date of September 22, 2015 is obviously well after the trade date of June 10, 2005. (Beevers Initial Report ¶¶ 52-53.)

These opinions are irrelevant because Exchange plaintiffs need not identify all instances of trader-based manipulation at this stage. Exchange plaintiffs' defense of their relevance is incoherent: they simultaneously contend that Mr. Beevers must explain why he "has not thus far been able to identify all instances of trader-based manipulation at Rabobank during Period 0" on the one hand (Exch. Pls.' Beevers Opp'n 8), and that "Plaintiffs (through Mr. Beevers) are not required to identify all instances of trader-based manipulation at this stage" on the other (Exch. Pls.' Beevers Opp'n 11). Of course, if all instances of manipulation need not be identified at class certification, Mr. Beevers need not explain his failure to do so. Indeed, we highlight here Exchange plaintiffs' assertion that "Mr. Beevers takes no position on" the question of whether "production of Defendants' trade data was necessary for purposes of Plaintiffs' class certification **[**176]** motion." (Exch. Pls.' Beevers Opp'n 11 (emphasis omitted).) Accepting this concession, Mr. Beevers's opinions are plainly irrelevant.

Further, these opinions amount to legal conclusions regarding the scope of discovery, one that impinges on our responsibility to assess whether the discovery being sought is "proportional to the needs of the case." *Fed. R. Civ. P. 26(b)(1)*. To the extent Mr. Beevers's opinions regarding additional production overlap with Exchange plaintiffs' prior motion to compel the production of certain trading records (Letter from Christopher Lovell & David Kovel to the Court, Nov. 4, 2016, ECF No. 1636), those issues have already been resolved by our order denying that motion, see Dec. 6, 2016 Order, ECF No. 1667, and Mr. Beevers's opinions are squarely precluded by that order. To the extent that Exchange plaintiffs rely on Mr. Beevers's opinions to request reconsideration of our order denying Exchange plaintiffs' motion to compel certain trading data, we reaffirm our conclusion that the burden of making available Exchange plaintiffs' requested production -- data sufficient to establish trader positions for every single trader at Rabobank over the class period -- is not proportional to **[**177]** the relevance and importance of that data, see *Fed. R. Civ. P. 26(b)(1)*.[49]

[*499] But even if these opinions extend to data not previously sought as Exchange plaintiffs suggest (Exch. Pls.' Beevers Opp'n 11), that breadth does not change their fundamentally legal nature or their inadmissibility. To the extent that they rely on Mr. Beevers's opinions to so argue, we conclude that such a request is remarkably untimely. The class certification schedule for this case was established in February 2016, see Scheduling Order, Feb. 23, 2016, ECF No. 1327, and Exchange plaintiffs offer no explanation for why this information could not have been requested earlier. Rather, they have had more than ample time to seek additional discovery necessary for class-certification purposes, and cannot now complain of any insufficiency.[50]

Ultimately, this initial portion of Mr. Beevers's opinions reduces to the proposition that the data Rabobank has produced is not as tractable as he and Exchange plaintiffs would desire for class certification purposes. But Mr. Beevers is not permitted to offer a definition of completeness that is untethered from any concrete requirements (beyond his personal definition of what is "necessary") and then opine **[**178]** that Rabobank's productions fail to meet that wholly subjective standard. Even if these opinions are correct -- and the record strongly suggests that at least some are not -- they are irrelevant to our consideration of the Exchange plaintiffs' class certification motion. To the extent Exchange plaintiffs assert, relying on Mr. Beevers's expert opinions, that they were afforded insufficient class certification discovery, we reaffirm our decision to deny Exchange plaintiffs' motion to compel and further conclude that the time to litigate class-certification discovery issues has long ago passed.

1.3.2. Identification of Trader-Based Manipulation

Next, Mr. Beevers offers a process for identifying trader-based manipulation, consisting of three different techniques: (1) identifying "anomalous" submissions based on certain mathematical criteria; (2) interpreting trader communications for "corroborating evidence" of manipulation; and (3) analyzing trader positions to see if LIBOR

---

[49] Our skepticism is confirmed by the amorphousness of the correlation analysis proposed by Mr. Beevers, which we address fully below.

[50] Again, Mr. Beevers's opinions regarding the "necessity" of trader-level records in establishing trader-based manipulation directly conflict with those of Dr. Seyhun, who opines that TBM can be identified using various methodologies, none of which rely on the trader-level records sought by Mr. Beevers.

manipulation benefited particular traders. (Beevers Initial Report ¶¶ 73-87; Beevers Rebuttal Report ¶¶ 40-62.) Rabobank and Exchange plaintiffs dispute whether these three components of Mr. Beevers's methodology should **[**179]** be analyzed individually or together; Exchange plaintiffs contend that "Rabobank improperly breaks up Mr. Beevers' methodology into three steps" and suggest that the three components should not be analyzed separately. (Exch. Pls.' Beevers Opp'n 12.)

Mr. Beevers apparently disagrees with Exchange plaintiffs' argument. In responding to Dr. Hubbard's criticism that his methodology is dependent on review of trader communications, Mr. Beevers asserts that his "anomalous submission" criteria are sufficient to identify trader-based manipulation standing alone, as the subsequent steps merely "corroborate" the initial findings of anomalies. (Beevers Rebuttal Report ¶ 57.) But even if Mr. Beevers's methodology were to consist of three steps to be considered together, Daubert requires as a matter of law that "an expert's analysis be reliable at every step." *Amorgianos, 303 F.3d at 267*. Because "any step that renders the analysis unreliable under **[*500]** the Daubert factors renders the expert's testimony inadmissible," id. (emphasis omitted) (quoting *In re Paoli, 35 F.3d at 745*), we analyze Mr. Beevers's three techniques individually.

1.3.2.1. Anomalous Submissions

First, Mr. Beevers offers a two-part definition for what constitutes an "anomalous" submission. **[**180]** Under the first part, for a given bank and given tenor, a submission is considered anomalously high (or low) if three conditions are met: (1) the bank made a submission greater (or less) than published LIBOR; (2) the bank's submission is higher (or lower) than the submission made the prior day; and (3) compared to the prior day, the increase (or decrease) in the bank's submission was greater in magnitude than the corresponding change in published LIBOR. (Beevers Rebuttal Report ¶ 47.) Under the second part, for a given bank and any two tenors, one or both submissions[51] are considered anomalous if two conditions are satisfied: (1) the bank increased its submission in one tenor compared to the day before and decreased the submission in the other tenor, and (2) such directionally dissimilar changes are observed for fewer than 25% of panel banks on the day in question. (Beevers Rebuttal Report ¶ 50.)

We agree with Exchange plaintiffs to the limited extent they contend that ***HN40***[] an expert opinion need not have been peer reviewed and need not be generally accepted in the community in order to be admissible. See *Daubert, 509 U.S. at 593* (holding that "peer review" is "relevant, though not dispositive" and rejecting the **[**181]** general acceptance standard set forth in *Frye v. United States, 293 F. 1013 (D.C. Cir. 1923))*. We agree with Rabobank, however, that Mr. Beevers's methodology for identifying anomalous submissions is insufficiently reliable.

As an initial matter, Mr. Beevers provides scant explanation for how this two-part definition for anomalous submissions was developed. Mr. Beevers's initial report simply defines "anomalous" in a footnote without further explanation. (Beevers Initial Report ¶ 76 n.7.) Standing alone, this definition would be little more than Mr. Beevers's inadmissible ipse dixit that the submissions in question were anomalous. Mr. Beevers's rebuttal report is slightly more detailed, explaining that his criteria are designed to capture instances where one bank "has raised its submission from one day to the next by an inexplicably large amount" and where changes across tenors cannot be explained by "a general [yield] curve steepening or flattening," but the jump from this explanation to the specific mathematical criteria applied appears to be supported only by his ipse dixit, which is insufficient. (Beevers Rebuttal Report ¶¶ 45-54, n.16.)

Indeed, it appears that the first part of the two-part definition would tend to find, for banks **[**182]** whose submissions were consistently above (or below) published LIBOR, anomalous submissions over periods when interest rates were consistently increasing (or decreasing), as the first two criteria would generally be satisfied. As

---

[51] Mr. Beevers's reports leave ambiguous whether this second criterion identifies one submission or both submissions as anomalous. At oral argument, counsel clarified that whether one submission is considered anomalous or both submissions are "depends on the circumstances and requires a little bit more facts." (Hr'g Tr. 16:18-19.) This response is hardly illuminating, though as we explain below, the ambiguity left in Mr. Beevers's opinion here does not affect our conclusion as to its admissibility.

to the second, Mr. Beevers does not explain whether one or both submissions are considered anomalous if the two criteria are satisfied. Accepting counsel's representation at oral argument that the determination of whether one or both submissions **[*501]** are considered anomalous depends on further inquiry into the circumstances (Hr'g Tr. 16:15-19), Mr. Beevers's reports do not explain when both submissions are considered anomalous, when only one submission is considered anomalous, and if only one submission, which one of the two. Absent some explanation as to how these additional "circumstances" and "facts" are analyzed, and given the implementation error that Mr. Beevers has made in applying these criteria (Hubbard Rebuttal Report ¶ 53 n.111), we cannot conclude this part of Mr. Beevers's methodology is sufficiently reliable such that it is admissible.

Our hesitation is confirmed by the nonsensical results produced by these criteria when they are applied to actual **[**183]** LIBOR submissions made outside of Period 0 and the but-for LIBOR submissions calculated by Dr. Seyhun. Specifically, Mr. Beevers's methodology characterizes as anomalous 27 percent of Rabobank's 3-month LIBOR submissions made between 2000 and 2002, and 19 percent of Rabobank's 3-month LIBOR submissions made in 2003 and 2004,[52] both of which are greater than the 17 percent identified during Period 0. (Hubbard Rebuttal Report ¶ 58, ex. 29.) Exchange plaintiffs do not dispute these statistics, but assert that an evaluation of the results produced by Mr. Beevers's criteria is "impermissible under Daubert," and that these results are not implausible because some evidence suggests that trader-based manipulation occurred as early as 2000. (Exch. Pls.' Beevers Opp'n 13-14.)

But as we have discussed, ***HN41***[] methodology and results "are not entirely distinct from one another," *Amorgianos, 303 F.3d at 266* (quoting *Joiner, 522 U.S. at 146*), and indeed, Rabobank's robustness testing of Mr. Beevers's methodology relates directly to two of the reliability factors identified by the Supreme Court: whether a methodology "can be (and has been) tested" and a methodology's "known or potential rate of error," *Daubert, 509 U.S. at 593-94*. In this case, the high rates of anomalous submissions **[**184]** between 2000 and 2004 identified by Mr. Beevers's methodology suggests that it was not well-tested and that it has a high potential rate of error.

Exchange plaintiffs additionally respond that Rabobank engaged in trader-based manipulation as early as 2003 and that there is therefore no reason to expect Mr. Beevers's methodology to show zero instances of anomalous submissions during this time. But even assuming that Rabobank engaged in trader-based manipulation as early as 2003, Exchange plaintiffs offer no explanation for why, considering the three periods 2000-2002, 2003-2004, and Period 0, Mr. Beevers's analysis identifies the lowest rate of anomalous submissions in the third (17%) and the highest rate of anomalous submissions in the first (27%) when Exchange plaintiffs' allegations and proffered evidence of trader-based manipulation is strongest in the third and concededly nonexistent in the first. While sporadic findings of anomalous submissions prior to Period 0 might be considered indicia of only a minor flaw in Mr. Beevers's criteria, the substantial rates of anomalous submissions found prior to Period 0 and the exactly-backwards relationship between Mr. Beevers's findings of **[**185]** manipulation and Exchange plaintiffs' allegations suggest that Mr. Beevers's methodology has a high rate of error and is insufficiently reliable.[53]

[*502] Similarly, Mr. Beevers's criteria characterize as anomalous a substantial percentage of the but-for LIBOR submissions calculated by Dr. Seyhun -- that is, the submissions Dr. Seyhun contends that panel banks would have made in the absence of LIBOR manipulation.[54] Specifically, Mr. Beevers's methodology identifies as anomalous 5% to 35% of Rabobank's "but-for" LIBOR submissions calculated by Dr. Seyhun, depending on which of Dr. Seyhun's models is considered. Indeed, for two of Dr. Seyhun's models, Mr. Beevers's methodology finds more anomalies in

---

52 This statistic is calculated by differencing the figures presented in Exhibit 29 of the Hubbard Rebuttal Report.

53 Mr. Beevers's criteria apparently also identify high rates of anomalous submissions in 2015 and 2016, periods in which Exchange plaintiffs have not alleged, and cannot credibly allege, manipulation. (Hubbard Rebuttal Report ¶ 58 n.120.)

54 Mr. Beevers's and Dr. Seyhun's methodologies also frequently yield directionally inconsistent results. Dr. Seyhun's models identify artificiality in the opposite direction from artificiality identified by Mr. Beevers's methodology on 23% to 43% of the days in Period 0 on which Mr. Beevers identifies anomalous 3-month LIBOR submissions by Rabobank. (Hubbard Rebuttal Report ¶ 63, tbl.3, ex. 30.)

Rabobank's but-for LIBOR submissions than in Rabobank's actual (allegedly manipulated) submissions. (Hubbard Rebuttal Report ¶¶ 70-72, ex. 31.)

In response, Exchange plaintiffs assure us that any inconsistency does not bear on the reliability of Mr. Beevers's opinions because (1) the anomalous-submission definition is only the first step of Mr. Beevers's overall methodology and (2) any disagreement between Mr. Beevers and Dr. Seyhun need not be resolved now. (Exch. Pls.' Beevers Opp'n 14-15). Though **[**186]** Exchange plaintiffs accuse Rabobank of making an "illogical, apples-to-oranges comparison" by comparing Mr. Beevers's "anomalous submissions" analysis to the results of Dr. Seyhun's methodology (Exch. Pls.' Beevers Opp'n 15), Mr. Beevers himself asserts that his analysis is not necessarily reliant on subsequent steps, (Beevers Rebuttal Report ¶ 57). And based on our previously expressed skepticism that the concept of a "battle of the experts" can extend to this extent of disagreement between a party's own experts, we conclude that poor performance of Mr. Beevers's anomalous-submission definition when applied to Dr. Seyhun's findings strongly suggests an untested methodology with an unacceptably high rate of error.

1.3.2.2. Trader Communications

Having identified submissions of interest based on his two two-part definition of "anomalous submissions," Mr. Beevers next proposes to review various trader communications, including "emails, instant message conversations, and recorded conversations." (Beevers Rebuttal Report ¶¶ 11, 57.) We conclude this step is unreliable because it amounts to no methodology at all.

Exchange plaintiffs assert that Mr. Beevers has in fact offered a methodology, **[**187]** "part of which involves applying Mr. Beevers' vast experience and knowledge gained through his work in the dealing rooms of financial institutions." (Exch. Pls.' Beevers Opp'n 15.) Such a vague methodology is not a methodology at all, and it is certainly not a methodology that can or has been tested or one with a known or potential rate of error. In the absence of some recognizable, describable methodology beyond an appeal to Mr. Beevers's qualifications, his opinions that certain documents "clearly show" manipulation whereas others do not (Beevers Rebuttal Report ¶ 58) would be "the essence of unverifiable subjectivity, amounting to the sort of ipse dixit connection between methodology and conclusion" that is properly excluded, *Nimely, 414 F.3d at 399*.[55]

[*503] 1.3.2.3. Individual Trader Positions

At step three, Mr. Beevers proposes to "consider the positions of individual traders on [each day with an anomalous submission] to see if there was a relationship between the profit motive (trader position such that a trader or group of traders would benefit from the anomalous submission) and the submission." (Beevers Rebuttal Report ¶ 42.) Specifically, Mr. Beevers intends to undertake "a comparison of which traders were **[**188]** long or short on each particular day with unusually high or low LIBOR submissions," with a "high correlation" between trader positions and anomalous LIBOR submissions serving as "strong corroboration for manipulation." (Beevers Rebuttal Report ¶ 55.) Mr. Beevers does not actually undertake such an analysis, asserting that "the lack of reliable trader-level position data limits [his] ability" to conduct it, but opines that doing so would be feasible once "Defendants produce a complete set of accurate historical trading data for each day during the Class Period that identifies the relevant trader for each position." (Beevers Initial Report ¶ 75.)

---

[55] Additionally, we would question whether opinions based on the interpretation of trader communications are products of Mr. Beevers's expertise. Contrary to Exchange plaintiffs' suggestion that the interpretation of the communications between traders in question involves "parsing through the technical jargon and terminology" found in those communications and "requires experience and familiarity with the practices and customs of dealing rooms," (Exch. Pls.' Beevers Opp'n 16), Dr. Netz -- did not claim any such experience -- was able to undertake a similar exercise interpreting trader communications (Netz Initial Report 13, 18, 20). Indeed, Exchange plaintiffs identify no instances in which the communications that Mr. Beevers canvasses for indicia of trader-based manipulation contains "technical jargon and terminology" obscuring their meaning; their attempt to recast a reading comprehension exercise as something more is unavailing.

Rabobank contends that this step of Mr. Beevers's analysis is governed only by arbitrary criteria susceptible to cherry-picking, especially in light of Mr. Beevers's opinions that different traders within a single bank will often have different exposures to LIBOR (and therefore different profit motives) and in light of Mr. Beevers's failure to explain what he means by a "relationship" between traders' profit motive and a bank's LIBOR submission or what constitutes a "high correlation." (Rabobank Beevers Mem. 11-12.) Exchange plaintiffs respond **[**189]** that Mr. Beevers intends to "perform statistical analysis that would detect those traders who systematically benefit from Rabobank's LIBOR submissions over time," namely, significance testing of the relationship between a trader's positions and Rabobank's LIBOR submissions. (Exch. Pls.' Beevers Opp'n 17.)

As an initial matter, we share Rabobank's skepticism as to whether Mr. Beevers's reports can be fairly interpreted to propose statistical testing. (Rabobank Beevers Reply 8.) The closest Mr. Beevers comes to setting forth any statistical test (which he would perform once he receives all the data he desires) is referencing a "high correlation" serving as "strong corroboration for manipulation." (Beevers Rebuttal Report ¶ 55.)

This lack of detail renders unpersuasive plaintiffs' defense of Mr. Beevers's opinions, even accepting plaintiffs' post hoc exegesis of his methodology. Mr. Beevers could have selected certain statistical tests to perform, discussed the data series to which he would have applied his selected tests (even if the series themselves have not yet been generated), identified what his null hypothesis would have been, and determined the level of statistical significance **[**190]** he would have demanded in order to reject the null hypothesis.[56] But he has **[*504]** done none of those things, and his failure to do so makes examining the reliability of his methodology essentially impossible. While incomplete data may, understandably, impair an expert's ability to fully conduct the analyses that he proposes, it does not excuse the failure to construct an analytical framework under which the data is to be analyzed. The flaw in Mr. Beevers's opinion is the latter, not the former, and we therefore conclude that his opinion is inadmissible.

Of course, even if Mr. Beevers's correlation methodology had been more fully developed, we would conclude that any opinions resulting from the application of that methodology would be inadmissible for lack of reliability. The first step of Mr. Beevers's analysis is unreliable for the reasons discussed above, and any correlation analysis between trader positions and Rabobank's LIBOR submissions to be performed at the third step will rely on those "anomalous subimssions" identified at that first step as an input. (Beevers Rebuttal Report ¶¶ 42, 55.) Because Mr. Beevers would not be conducting this correlation analysis using reliable data, any **[**191]** results that it produced would be similarly unreliable. See *Nimely, 414 F.3d at 397* (requiring both "reliable data and methodology"); see also *Fed. R. Evid. 702(a)*.

In sum, we conclude that Mr. Beevers's proposed three-step method for identifying trader-based communications is inadmissible. Each step is unreliable as we have explained, and three unreliable steps does not an admissible methodology make.

1.3.3. Monte Carlo Analysis

Next, Mr. Beevers conducts a statistical "Monte Carlo" analysis. "Monte Carlo simulation involves repeated random sampling of various potential scenarios to compute an average result [and is] a technique which obtains a probabilistic approximation to the solution of a problem by using statistical sampling techniques." *Advanced Analytics, Inc. v. Citigroup Glob. Markets, Inc., No. 04 Civ. 3531 (LTS)(HBP), 2009 U.S. Dist. LEXIS 130133, 2009 WL 7133660, at *1 n.5 (S.D.N.Y. Aug. 5, 2009)*, report and recommendation adopted in part and rejected in part,

---

[56] "In conducting a formal significance test, researchers start from the hypothesis they are seeking to disprove, called the 'null hypothesis' or 'null.' They then ask: Assuming the null hypothesis is true, what is the probability of observing data that conflict with the null hypothesis to at least as great an extent as do the data actually observed? . . . If the answer falls below a predetermined significance threshold (often 5%), then the null hypothesis is sufficiently inconsistent with the data that it is deemed 'rejected,' and the result is deemed 'statistically significant.'" *Nat. Res. Def. Council, Inc. v. Rauch, 244 F. Supp. 3d 66, 89-90 (D.D.C. 2017)* (citations omitted).

2010 U.S. Dist. LEXIS 123476, 2010 WL 4780772 (S.D.N.Y. Nov. 22, 2010). Based on this analysis, Mr. Beevers opines that further merits discovery will allow plaintiffs to discover more instances of trader-based manipulation, as he concludes that "submissions are not independent and are thus consistent with collusion." (Beevers Initial Report ¶¶ 88, 100.)

As with Dr. Seyhun and Dr. Netz's probabilistic opinions, we conclude that Mr. Beevers's opinion here is irrelevant at class certification and **[**192]** not helpful to the trier of fact. Even assuming that Mr. Beevers's Monte Carlo analysis is reliably implemented, it cannot prove that any trader-based manipulation actually occurred, let alone on which days, by which banks, the extent to which it actually impacted LIBOR submissions, or whether those findings pertain to all class members or only certain class members. Indeed, Mr. Beevers's Monte Carlo analysis, by construction, yields results for an aggregated period and across pairs of banks at its most detailed level. Therefore, contrary to Exchange plaintiffs' contentions, Mr. Beevers's Monte Carlo analysis neither "serve[s] to show Rabobank's anomalous submissions" nor "identif[ies] collusive behavior between panel banks" with any specificity. (Exch. Pls.' Beevers Opp'n 19.)

But even if Mr. Beevers's analysis were helpful to the trier of fact, it would founder on reliability grounds. Mr. Beevers's Monte Carlo simulation analyzes the relationship between a pair of banks' LIBOR submissions for every pair of panel banks, and analyzes the probability that the submissions **[*505]** are both above or both below a reference rate (that is, the submissions have the same "directionality" compared to **[**193]** the reference rate). (Beevers Initial Report ¶¶ 88-110.) Mr. Beevers considers two different reference rates: published LIBOR and the mode of the panel banks' LIBOR submissions (i.e., the most frequent submission on a given day).[57]

Mr. Beevers then calculates, through random simulation, the expected probability that, conditional on one bank's submission having one directionality, that each other bank's submission has the same directionality. In performing this calculation, Mr. Beevers first determines the percentage of time each bank's submission is above, equal to, or below the reference rate. (Beevers Initial Report tbls.1-2.) With these directionality distributions calculated, Mr. Beevers then runs a large number of simulations.[58] In each simulation, using those distributions calculated at the first step, Mr. Beevers randomly determines, for each bank, whether that bank's submission was above, at, or below the reference rate. Mr. Beevers then aggregates the results of these numerous simulations in order to calculate the "expected" probabilities of one bank's submissions having a certain directionality given another bank submissions having the same directionality, under the assumption **[**194]** that the directionality of one bank's LIBOR submission is independent of the directionalities of all other banks' LIBOR submissions.

Mr. Beevers then compares these "expected" directionality probabilities to the actual probabilities observed, and concludes that the deviation of the actual probabilities from the expected probabilities are generally statistically significant. (Beevers Initial Report ¶ 101.) From this result, Mr. Beevers opines that "submissions are not independent and are thus consistent with collusion." (Beevers Initial Report ¶ 100.)

At the outset, we note that randomness is a deliberate feature of Monte Carlo simulation and reject Rabobank's arguments to the extent they suggest that this randomness by itself is a flaw rendering this analysis unreliable. (Rabobank Beevers Mem. 15.) Under Mr. Beevers's framework, each bank's submission on a given day can fall into one of three categories, meaning that for 16 banks, there are three to the 16th power, or more than 43 million, permutations of the relationships of each bank's submission to the reference rate. The "expected" probabilities that Mr. Beevers calculates would, most rigorously, be calculated based on all 43 million **[**195]** permutations. But given the computational difficulties involved in so calculating, Monte Carlo simulation is helpful in arriving at a reasonable approximation for the "expected" probabilities that Mr. Beevers presents.

---

[57] In one instance, Mr. Beevers refers to the "median" value (Beevers Initial Report ¶ 93), though he more often refers to the second reference rate as the "mode" or the "modal value" (Beevers Initial Report ¶¶ 95, 98, 99, tbl.2). Assuming that Mr. Beevers did in fact use the mode as his second reference rate, Mr. Beevers does not explain his methodology when two different submissions were equally frequent on a given day.

[58] Mr. Beevers does not specify how many simulations are incorporated into the results presented in his report beyond "many thousands." (Beevers Initial Report ¶ 94.)

HN42[] While Monte Carlo simulation is a generally accepted technique, general acceptance does not end the reliability inquiry.[59] Problems in implementing the technique **[*506]** may nonetheless render it unreliable as applied, Mr. Beevers's Monte Carlo simulation includes at least two flaws undermining its reliability. First, the Monte Carlo simulation relies on probability distributions of each bank's LIBOR submissions being above, equal to, or below, the reference rate calculated based on Period 0; and second, Mr. Beevers's assumption that each bank's directionality must be independent of all other banks' directionalities is not only unsupported, but demonstrably false.

Mr. Beevers does not identify the time period over which he draws his initial distribution of each bank's submissions compared to the reference rate. However, counsel at oral argument clarified that Mr. Beevers conducted his analysis over Period 0 (Hr'g Tr. 17:9-13), and this representation is consistent with Mr. Beevers's **[**196]** use, for almost all banks and tenors analyzed, of 666 daily observations.[60] Mr. Beevers's reliance on Period 0 -- a period in which Exchange plaintiffs allege trader-based manipulation to be especially prevalent -- as a benchmark period for his distributions undermines the reliability of the analysis. In the same way that regressions relying on clean periods overlapping with challenged conduct may be unreliable because the relationships between variables measured during the "clean" period will be tainted by the challenged conduct, the distributions underlying Mr. Beevers's calculations are not in fact "clean."

Additionally, Mr. Beevers's central assumption in running his Monte Carlo analysis -- the statistical independence of each bank's directionality -- is untenable. First, macroeconomic effects are likely to affect different subsets of panel banks differently. Mr. Beevers asserts that macroeconomic factors "impact all banks equally," but this assertion is difficult to accept given geographic differences between panel banks, among other distinctions. (Beevers Rebuttal Report ¶ 112.) The contention, for example, that European monetary policy would affect Rabobank, Bank of America, and **[**197]** Bank of Tokyo-Mitsubishi to the same extent is simply not credible. To the extent Mr. Beevers tautologically defines "macroeconomic" factors to be those that impact all banks equally and all other factors are "micro economic effects," (Beevers Rebuttal Report ¶ 112), this definition undermines Mr. Beevers's decision to account only for credit risk in his submission analysis (Beevers Initial Report ¶¶ 103-10).

But even disregarding macroeconomic effects, Mr. Beevers's independence assumption is false as a matter of mathematical logic because each of his reference rates is itself a function of each bank's LIBOR submissions. That is, one bank's directionality is necessarily related to all other bank's directionalities through the reference rate itself, and therefore cannot be independent to the extent Mr. Beevers assumes.

When published LIBOR is the reference rate, the directionalities cannot be completely independent because they are constrained by the method by which published LIBOR is calculated. To take an extreme example, a result that all 16 banks' submissions were below published LIBOR (i.e., had negative directionality) is impossible in actuality but a possible result under Mr. **[**198]** Beevers's independence assumption. Nor must all impossible results be so extreme: for example, a result that 4 banks had positive directionality and 12 banks had negative directionality is also impossible, because those four banks with the highest submissions would be "trimmed" as being outside the interquartile **[*507]** range and the remaining 12 banks cannot all have made LIBOR submissions below published LIBOR. Similarly, when the modal submission is the reference rate, the directionalities cannot be completely independent because they are constrained by the fact that the mode must have been generated by a certain number of bank's submissions being the same. To take another example, a result that fewer than two banks' submissions was equal to the modal submission (i.e., had no directionality) is impossible, as that value could not be the reference rate because it would not be the mode.

In sum, even assuming that Mr. Beevers's Monte Carlo analysis can overcome a fundamental relevance problem at this stage, we are unpersuaded that Mr. Beevers has implemented his Monte Carlo analysis in a robust way that supports his conclusion of collusion.

---

[59] We reject out of hand Exchange plaintiffs' suggestion that a model or statistical technique that is accepted and reliable in one context should be considered reliable and admissible in all contexts. (Exch. Pls.' Beevers Opp'n 21.)

[60] Based on a year having approximately 252 trading days, 666 days corresponds roughly to the 2.64-year length of Period 0.

1.3.4. Continuity of Manipulation

Finally, Mr. Beevers **[**199]** opines that "it will feasible to prepare a matrix of a chronological listing of each day of trader based manipulation by each Defendant," and that such a matrix will "potentially likely contain thousands of instances of trader based manipulation by many of the Defendants." (Beevers Initial Report ¶ 117.) This compound opinion encompasses two distinct opinions: (1) that a "matrix" listing instances of trader-based manipulation can be assembled, and (2) that panel banks "potentially likely" engaged in thousands of instances of trader-based manipulation.

We agree with plaintiffs that the first part of this opinion is "straightforward" (Exch. Pls.' Beevers Opp'n 21-22), a quality that weighs not in favor of, but against, admissibility. Mr. Beevers's opinion here appears to be that once discovered (through review of trader communications, statistical analysis, or some other method), all instances of trader-based manipulation can be compiled into a single table with one direction corresponding to each panel bank and the other corresponding to days. The rather obvious statement is not helpful to the trier of fact and is not the product of Mr. Beevers's expertise.

The second part of this opinion **[**200]** is more substantive. Mr. Beevers opines that panel banks "potentially likely" engaged in thousands of instances of trader-based manipulation, basing this opinion on allegations in Exchange plaintiffs' complaint quoting statements of facts incorporated into certain settlements between panel banks and regulatory authorities, his interpretation of the trial testimony of Rabobank trader Lee Stewart, and an analysis of Deutsche Bank's trading positions. (Beevers Initial Report ¶¶ 118-30.) As a general matter, these opinions are irrelevant and unhelpful to the trier of fact at this stage. The operative question at class certification is not how many times defendants engaged in trader-based manipulation in total -- a point that Exchange plaintiffs have repeatedly stressed, and Mr. Beevers's attempt to quantify, however imprecisely, an upper bound on trader-based liability simply has no bearing on the class certification analysis.

Further, Mr. Beevers's recitation of complaint allegations and interpretation of trial testimony and trader communications is not based on his specialized knowledge. Much of this section is devoted to canvassing the documentary evidence for words suggesting frequency, **[**201]** such as "weekly," "regularly," and "common." (Beevers Initial Report ¶¶ 118-19, 124.) Absent some suggestion that these words have special or coded meaning in this context of trader communications, this exercise is readily performable by the trier of fact and does not require Mr. Beevers's expertise. Mr. Beevers also reviews two settlements between panel banks and regulatory authorities for evidence that trader-based manipulation **[*508]** sometimes occurred orally and would not be documented, a task that is again performable by the factfinder.

Next, Mr. Beevers opines that the "steepness" of the yield curve implied by Deutsche Bank's 1-month and 3-month LIBOR submissions suggests that "Deutsche Bank was intentionally misreporting its LIBOR during this period" in order to systematically benefit its trading positions between January 2008 and September 2008, and that this manipulation is unlikely to be corroborated with documentary evidence.[61] (Beevers Initial report ¶¶ 125-29.) Mr. Beevers, however, does not articulate the relevance of this analysis of "steepness" in Deutsche Bank's submissions outside of Period 0 to trader-based manipulation by Rabobank.

1.3.5. Conclusion

Rabobank's motion to **[**202]** exclude Mr. Beevers's opinions is granted in part and denied in part. Though Mr. Beevers may opine on trade reporting and risk reporting systems in the financial industry as a general matter, he may not offer opinions regarding what specific data Rabobank possesses or opinions as to whether certain data

---

[61] Mr. Beevers's opinion here, that many instances of trader-based manipulation would not be reflected in a written record because they involved in-person requests, significantly undermines Dr. Seyhun's reliance on documentary evidence of trader-based manipulation in his Rebuttal Period 0 Model. (E.g., Seyhun Initial Report ¶ 89; Exch. Pls.' Seyhun Opp'n 12-13, 17-18.)

should have been produced. Mr. Beevers lacks a basis on which to opine on Rabobank-specific data issues. His related opinions, regarding whether Rabobank's data productions meet his standards for completeness, are speculative and infringe on our role in establishing the scope of necessary discovery.

Further, his methodology for identifying trader-based manipulation is not reliable: it proceeds from an unreliable first step, as demonstrated by the implausible results it produces when applied to other time periods and data series, and compounds any unreliability with further unreliable steps. His Monte Carlo analysis is both unhelpful, as it is incapable of identifying trader-based manipulation with any specificity, and unreliable, as it depends on several assumptions that range between questionable and demonstrably false. And finally, his opinion regarding continuity of manipulation is **[**203]** not a product of his expertise and irrelevant as to Rabobank.

1.4. Mr. Miller

Exchange plaintiffs offer a declaration from Mr. Eric Miller (the "Miller Declaration") dated May 2, 2017 (Decl. of Thomas Elrod ex. 13, July 21, 2017, ECF No. 2121), setting forth Mr. Miller's opinions "regarding what information is available to identify members of the putative Exchange-Based class in this action and how the identification process could work." (Miller Decl. ¶ 2.) In particular, Mr. Miller opines: (1) that EDF traders who transacted during the Class Period could be efficiently notified through a certain process; (2) that the Chicago Mercantile Exchange (CME) maintains a "street book" of transaction data that could be used to fill gaps in data from other sources; (3) that his class action administration firm, A.B. Data, Ltd., has the capacity to process claims forms and perform damages calculations pursuant to a methodology to be ordered by the Court; and (4) that named plaintiff Atlantic Trading held certain trading positions on EDF contracts settling in December 2007. Based on Mr. Miller's experience in the administration of class action settlements,[62] we conclude that he is generally qualified **[**204]** to offer these opinions.

[*509] Mr. Miller first opines that class members could be identified through a notice program involving (1) the collection of "the names and addresses of all 'Large Traders' that cleared trades" in EDFs; (2) the collection of "the names and addresses of all clearing Futures Commission Merchants" (FCMs); (3) the collection of "additional names and addresses of potential settlement class members from banks, brokers, and other nominees"; (4) the conducting of a print and electronic media campaign; and (5) the establishment of a website and telephone hotline. (Miller Decl. ¶¶ 5-14 (footnotes omitted).) Potential class members identified by name and address would be sent a "Notice Packet" consisting of "the Court-Approved Notice of Class Action, Claim Form, and other documents." (Miller Decl. ¶ 6.)

Implicitly assuming that the individuals and entities identified through this process -- Large Traders, FCMs, and class members otherwise receiving notice -- maintained some records, Mr. Miller suggests that the CME retains records in the form of a "Street Book" sufficient to "fill[] gaps" in those records. (Miller Decl. ¶ 15.) Mr. Miller concludes that, to the extent that potential **[**205]** class members have not "retained the records necessary to perfect a claim," the CME's Street Book contains "records of the historical daily activity of all transactions for futures and options contracts" that could be used to determine each class member's transactions. (Miller Decl. ¶¶ 15-16.)

Mr. Miller's opinion regarding the gap-filling "Street Book" rests on a speculative assumption and is inadmissible. Mr. Miller does not claim to have personal experience with data produced by the CME, but bases his opinions on his "experience in past and current cases," including *In re Amaranth Natural Gas Commodities Litigation, 587 F. Supp. 2d 513 (S.D.N.Y.)* and In re Optiver Commodities Litigation, No. 08 Civ. 6842 (LAP) (S.D.N.Y.). But Amaranth and Optiver each involved records maintained by the New York Mercantile Exchange and not the CME, see *In re Amaranth Nat'l Gas Commodities Litig., 587 F. Supp. 2d 513, 519 (S.D.N.Y. 2008)*, aff'd, *730 F.3d 170, 172 (2d Cir. 2013)*; Compl. ¶ 1, In re Optiver Commodities Litig., (S.D.N.Y. filed July 30, 2008), No. 08 Civ. 6842 ECF No. 1, a distinction that Mr. Miller ultimately acknowledged at his deposition, (Miller Dep. 122:21-128:20, Decl.

---

[62] Mr. Miller is a vice president of A.B. Data has participated in the administration of numerous class-action settlements. (Miller Decl. ¶¶ 1, 3.)

of Robert Lindholm ex. 74, July 7, 2017, ECF No. 2061). In the absence of additional support for his opinion regarding a CME "Street Book," this opinion in unreliable.

Exchange plaintiffs attempt to bolster Mr. Miller's opinion by asserting that they had served **[**206]** a subpoena on the CME to produce street book data, but CME was "instructed not to produce street book data" at the class certification stage. (Exch. Pls.' Miller Opp'n 17.) Implicit in this argument is the suggestion that the CME might very well have street book data, and whether that data exists is simply unknown at the moment because the CME has not been required to respond to the subpoena. We find this argument unpersuasive: Mr. Miller is not entitled to base his affirmative opinion, that CME in fact maintains street book data, on mere uncertainty as to whether such data exists.

Further, the gap-filling purpose of "street book" data is implicated only if some base of (gap-containing) data exists in the first place. While Mr. Miller opines that identified EDF traders could "provide historical transaction data in hard copy and/or electronically," he never states whether the EDF traders identified through the various methods of notice have maintained records at all.[63] Without **[*510]** that critical link, Mr. Miller's opinions on how best to provide notice to EDF traders -- necessary after certification of a class (particularly in the settlement context[64]), see *Fed. R. Civ. P. 23(c)(2)(B)*, *(e)(1)*, are irrelevant.

While the parties **[**207]** dispute the import of the Second Circuit's decision in In re Petrobras, the availability of trading records is an issue relevant to our consideration of the predominance of common questions and the superiority of class-action status. Mr. Miller's notice opinions do not address whether EDF traders, having received notice, actually possess relevant records. The subject that his notice opinions do address -- the mechanics of the notice process -- are of minimal relevance and do not help us determine a fact in issue. Nor can Mr. Miller's street book opinions salvage his notice opinions, given the speculative nature of the former.

Mr. Miller additionally opines A.B. Data has the capability to process claims "precisely in accordance with the court-approved plan of allocation and settlement stipulation," describes certain features of A.B. Data's proprietary software, and concludes that A.B. Data can handle "large volumes of complex damage calculations." (Miller Decl. ¶¶ 19-26.) We have no particular reason to doubt that A.B. Data has the technological capability to process trading records and perform damages calculations on those records as a general matter. But in order for A.B. Data to do **[**208]** so, those trading records must exist as an initial matter, and Mr. Miller does not reliably opine that they do.[65]

Finally, Mr. Miller provides several statistics regarding named plaintiff Atlantic Trading's positions on the EDF contract expiring in December 2007. (Miller Decl. ¶ 27.) However, Mr. Miller does not explain the data that he analyzed, the method he applied, or the assumptions that he made in making those calculations. This opinion is therefore also inadmissible.[66]

Accordingly, Rabobank's motion to exclude Mr. Miller's declaration is granted. Mr. Miller's opinions regarding the availability of a CME "street book" are not only speculative, but also concededly incorrect. His opinions regarding the provision of notice to EDF traders are of minimal relevance and do not help us "determine a fact in issue." *Fed.*

---

[63] Indeed, as counsel conceded at oral argument, Exchange plaintiffs have served 89 subpoenas on various FCMs, and have received no data in response. (Hr'g Tr. 9:22-25; 11:14-24.)

[64] Mr. Miller's declaration refers to "settlement" several times. (Miller Decl. ¶¶ 5, 9, 19.) We are, of course, considering whether a litigation class should be certified.

[65] Mr. Miller also lacks personal knowledge as to the existence and retention of these trading records.

[66] Additionally, following Bank of America and JPMorgan Chase's settlements with Exchange plaintiffs, no live antitrust claims remain in this action. Though Mr. Miller offers this opinion divorced from context, it appears to be offered to support Atlantic Trading's standing to assert antitrust claims corresponding to subpart A of the class definition. Because no antitrust claims remain, this opinion has likely been rendered irrelevant.

R. Evid. 702(a). Given the lack of context for his trading-position calculations, we also cannot conclude that those statistics are sufficiently reliable to be admissible.

2. Exchange Plaintiffs' Daubert Motions

2.1 Dr. Culp

Rabobank submitted two expert reports from Dr. Christopher L. Culp: (1) an initial report dated April 3, 2017 (Decl. of Robert Lindholm ex. 67, June 30, 2017, ECF No. 2027); and **[**209]** (2) a surrebuttal report dated June 30, 2017 (Decl. of Robert Lindholm **[*511]** ex. 68, June 30, 2017, ECF No. 2027). We refer to these as the Culp Initial Report and the Culp Rebuttal Report. Exchange plaintiffs seek to exclude the portions of Dr. Culp's reports in which he opines that changes in LIBOR do not necessarily cause changes in EDF prices.[67] (Exch. Pls.' Culp Mem. 1) They do not challenge Dr. Culp's qualifications to offer those opinions and we conclude that Dr. Culp is amply qualified to offer them.[68]

Exchange plaintiffs contend that Dr. Culp's opinions should be excluded for five reasons: (1) they are allegedly contradicted by a document published by the Chicago Mercantile Exchange; (2) they are allegedly contradicted by statements made by Robert Wise, counsel for defendant Bank of America, during a March 2013 oral argument; (3) they fail to address the "overlap" theory briefly discussed in the Seyhun Rebuttal Report and more fully developed in Exchange plaintiffs' motion papers; (4) they are contradicted by certain trader communications; and (5) they are based on unreliable empirical analyses.[69]

Before analyzing these specific challenges, we first consider the proper interpretation of **[**210]** Dr. Culp's opinions. Exchange plaintiffs assert that Dr. Culp opines that there is "no mathematical relationship between spot LIBOR and expected future spot LIBOR," (Exch. Pls.' Culp Mem. 7), but this is a mischaracterization. Rather, Dr. Culp explains that changes in LIBOR do not necessarily cause changes in EDF prices. (Culp Initial Report ¶ 19 (criticizing Dr. Seyhun's and Dr. Netz's assumption that "changes in current 3mLIBOR impact Eurodollar futures prices . . . on days before futures contracts expire"); ¶ 21 ("[C]hanges in LIBOR do not have an independent causal effect on Eurodollar futures prices."); ¶ 24 ("[Dr. Seyhun and Dr. Netz] do not have a reliable theoretical basis for their assumption that changes in LIBOR on a given day cause changes in Eurodollar futures prices."). This difference parallels the distinction between correlation and causation: correlation between LIBOR and EDF prices is sufficient to establish a "mathematical relationship" between the two, but the operative question is whether changes in LIBOR cause determinable changes in EDF prices. With this understanding in mind, we consider Exchange plaintiffs' specific arguments.

First, Exchange plaintiffs contend **[**211]** that Dr. Culp's opinion is "patently incorrect" because it is contradicted by a CME publication[70] discussing implied forward rates and providing a formula for the calculation of implied forward

---

[67] Specifically, Exchange plaintiffs seek to exclude the following paragraphs of Dr. Culp's reports: paragraphs 16 through 37, 40, 92 through 111, 187 through 222, 271 through 278, 349, and 352 through 364 of the Culp Initial Report and paragraphs 5, 6, 8 through 12, 20 through 22, 25 through 28, and 51 through 56 of the Culp Rebuttal Report. (Exch. Pls.' Culp Mem. 1.)

[68] Dr. Culp serves as an adjunct professor at both the Swiss Finance Institute and the University of Bern and holds a Ph.D. in financial economics from the University of Chicago Booth School of Business and a B.A. in economics from the Johns Hopkins University. He has also conducted extensive research and written numerous papers on various finance topics. (Culp Initial Report app. F.)

[69] The first four of these critiques can also be rejected at the threshold as critiques going to the weight of Dr. Culp's opinions rather than their admissibility. These critiques do not seriously challenge Dr. Culp's theoretical reasoning or empirical methodology; they at most offer competing evidence to be weighed in the Rule 23 analysis.

[70] John W. Labuszewski, Understanding Eurodollar Futures, CME Group Inc. (2013).

rates. (Exch. Pls.' Culp Mem. 7-8). We reject at the start Exchange plaintiffs' arguments to the extent they suggest that Dr. Culp ignored this **[*512]** publication, as he explicitly considered this publication in his evaluation of Dr. Netz's report. (Culp Initial Report ¶ 41 n.103). Further, based on our review of the publication, it discusses the relationship between "Eurodollar (Euro) futures and cash markets" rather than EDFs and LIBOR, which is not itself a cash market. This publication does not render Dr. Culp's causation opinion fatally flawed.

Second, Exchange plaintiffs assert that counsel for defendant Bank of America stated at oral argument in 2013 that "[e]ssentially what people are doing there is making bets, if you will. . . . [B]ut they're taking a position with respect to where LIBOR is going, up or down." (Exch. Pls.' Culp Mem. 8 & n.4 (citing Mar. 5, 2013 Hr'g Tr. 25:25-26:4, ECF No. 325)). We reject the notion that this remark from counsel made during oral **[**212]** argument almost five years ago seriously calls into the question of a qualified expert witness. Indeed, counsel prefaced his statement with the remark that "I'm not an expert in futures contracts and the Chicago Exchange." (Mar. 5, 2013 Hr'g Tr. 25:24-25.) And even if we did not reject the notion, counsel's statement was immediately preceded by plaintiffs' counsel's statement that EDF contracts settled at a price of 100 minus LIBOR (Mar. 5, 2013 Hr'g Tr. 25:16-20); nothing in the statement by counsel for Bank of America supports the notion that changes in LIBOR cause changes in EDF prices before the settlement date.

Third, Exchange plaintiffs argue that Dr. Culp failed to take into account their "overlap" theory. Under this theory, on a given day, the relationship between spot LIBOR and expected spot LIBOR at settlement is a function of the "overlap" between the three-month period following that day and the three-month period following the settlement date. (Exch. Pls.' Culp Mem. 10-13; Exch. Pls.' Culp Reply 3-5.) Using the specific example of March 14, 2008 and an EDF contract settling on March 18, 2008, Exchange plaintiffs assert that expected 3-month LIBOR on March 18, 2008 must **[**213]** be a function of spot 3-month LIBOR on March 14, 2008, because the former 3-month rate covers a period between March 18, 2008 and June 17, 2008 and the latter 3-month rate covers a period between March 14, 2008 and June 12, 2008 -- an overlap of 87 days out of 91 days in the period. Therefore, they contend, the March 14, 2008 expectation of 3-month LIBOR on March 18, 2008 can be calculated as the weighted average of 3-month spot LIBOR on March 14, 2008 (with 95.6% weight, calculated as 87 divided by 91) and the 3-month implied forward rate calculated from spot 3-month LIBOR and spot 6-month LIBOR on March 14, 2008 (with 4.4% weight, calculated as 4 divided by 91). According to Exchange plaintiffs, Dr. Culp's failure to consider this "mathematical fact" renders his challenged opinions inadmissible. (Exch. Pls.' Culp Mem. 12.)

As a threshold matter, the criticism that Dr. Culp did not consider the weighted-average formula presented for the first time in Exchange plaintiffs' motions papers (Exch. Pls.' Culp Reply 5) -- but not in Dr. Seyhun's reports -- is mystifying. Exchange plaintiffs cannot credibly fault Dr. Culp for failing to address a novel formula never presented until after his **[**214]** reports were written: Exchange plaintiffs' motion was filed on July 10, 2017, more than three months after Dr. Culp's initial report (dated April 3, 2017) and ten days after his sur-rebuttal report (dated June 30, 2017).

In any event, Exchange plaintiffs' "overlap" formula fares no better on the merits. While the validity of the implied forward rate formula incorporated as an input into the weighted-average formula is not questioned,[71] they appear to have conjured the **[*513]** weighted-average formula from absolutely nothing.[72] Indeed, as we will explain, it rests on the unfounded assumption that a market participant attaches equal significance to each day over a given three-month period and maintains an unchanging expectation of relevant conditions during that three-month period.

Taking Exchange plaintiffs' 2008 exemplar dates, the period supposedly reflected in spot 3-month LIBOR on March 14 covers the period between March 14 and June 12, and this period is divisible into two periods: (1) the four days

---

[71] For any two times in the future, *t1* and *t2*, the implied forward rate formula calculates the spot rate expected at time *t1* covering the time period between time *t1* and time *t2*. Taking three months and six months as an example, the three-month spot rate expected in three months may be derived from the currently observed three-month rate spot and currently observed six-month spot rate.

[72] While Dr. Seyhun offers the overlap theory in his rebuttal report (Seyhun Rebuttal Report ¶¶ 38-50), he never reduces the overlap theory into the weighted-average formula offered by Exchange plaintiffs in their challenge to Dr. Culp.

between March 14 and March 17 (which do not overlap with the three-month period reflected in spot 3-month LIBOR on March 18), and (2) the 87 days between March 18 and June 12 (which do **[**215]** overlap with the three-month period reflected in spot 3-month LIBOR on March 18). Exchange plaintiffs appear to acknowledge that the first, non-overlapping period captured in spot 3-month LIBOR on March 14 should be excluded from the determination of expected 3-month spot LIBOR on March 18, but the formula's means of excluding those dates is to reduce the weight attributable to spot 3-month LIBOR on March 14 proportionally by the number of days. But this proportional reduction is appropriate only if the expectations for the first, non-overlapping period and expectations for the second, overlapping period are themselves proportional to the number of days. Because Exchange plaintiffs similarly rely on a proportional reduction of the 3-month implied forward rate (calculated from 3-month and 6-month spot LIBOR) to exclude the non-overlapping portion of the latter period, the same proportionality and uniformity are required of the 3-month period covered by the implied forward rate.

This March 14 and March 18 example establishes Exchange plaintiffs' reliance on proportionality for dates that are four days apart, but this principle generalizes to any combination of days. For example, Exchange **[**216]** plaintiffs' formula for spot 3-month LIBOR on March 18 expected as of March 13 would apply a 94.5% weighting (86 divided by 91) to spot 3-month LIBOR on March 13, which assumes that expectations for the five-day non-overlapping period are proportional to those for the 86-day overlapping period. Similarly, the 5.5% weighting applied to the 3-month implied forward rate assumes that expectations for the five-day overlapping period are proportional to those for the 86-day nonoverlapping period. And more generally, for all *n* between 0 and 91, Exchange plaintiffs' weighted-average formula requires proportionality between the first *n* days and the remaining 91 minus *n* days; the formula therefore assumes "uniformity" across all days in the 3-month period because each additional day in the overlapping period must account for 1/91 of expectations. This assumption is dubious at best, given that some days are more likely to have significant macroeconomic information impacting LIBOR (as Dr. Seyhun, Dr. Netz, and Exchange plaintiffs concede occurs): the Federal Reserve could announce a rate change, or certain government statistical releases regarding the state of the economy could be published, among **[**217]** many other events of significance.

[*514] In sum, Exchange plaintiffs' casual empiricism is entirely unavailing. We have significant doubts regarding the weighted-average formula proposed for the first time in Exchange plaintiffs' motion papers, and it certainly does not offer a basis on which to exclude Dr. Culp's opinions.

Fourth, plaintiffs assert that three communications between traders establish that changes in LIBOR caused changes in EDF prices, contradicting Dr. Culp's causation opinion. In particular, they rely on communications in which traders stated (1) "higher libor caused Sep09 and Dec09 ED to sell-off"; (2) "libors appear only relevant for futures"; and (3) "[t]he front 2 contracts in Eurodollars which most closely track the LIBOR settings have gotten killed this morning[] as the expectation is libors will set higher out of fear." (Exch. Pls.' Culp Mem. 8 n.3, Exch. Pls.' Culp Reply 6-7.) For one, these communications reflect only the beliefs of those traders, rather than the behavior of the market as a whole, and as Rabobank correctly notes, other traders (including several of the named plaintiffs in this action) viewed LIBOR as irrelevant in their trading considerations. Exchange **[**218]** plaintiffs offer no reason why, in assessing the reliability of Dr. Culp's opinions, we should give more weight to these three identified statements as compared to the named plaintiffs' sworn deposition testimony. The fact that some traders considered LIBOR in making their trading decisions does not establish that changes in LIBOR cause determinable changes in EDF prices, a distinction that Exchange plaintiffs attempt to elide. (Exch. Pls.' Culp Reply 7.)[73]

Finally, in their reply brief, Exchange plaintiffs offer two critiques of Dr. Culp's empirical methodology: (1) that he improperly analyzed changes in EDF prices in a one-hour window surrounding publication of LIBOR, from 11:30 a.m. to 12:30 p.m. London time, and (2) that his analysis of the relationship between LIBOR-derived implied forward

---

[73] Further, these documents are susceptible to interpretation at best. For example, the third communication appears to reference EDF trading based on <u>expectations</u> of LIBOR in advance of its publication. This interpretation would be consistent with Rabobank's argument -- and Dr. Seyhun, Dr. Netz, and Exchange plaintiffs' concessions -- that EDF prices incorporate significant macroeconomic information that is also incorporated into LIBOR, as that information guides "expectations" of LIBOR.

rates and EDF-implied rates is irrelevant. (Exch. Pls.' Culp Reply 8-10.) Because Exchange plaintiffs do not seek exclusion of these analyses,[74] we discuss them and Exchange plaintiffs' criticisms only briefly.[75]

In his analysis of changes in EDF prices surrounding the publication of LIBOR, Dr. Culp finds that EDF trading prices respond quickly to significant macroeconomic events. (E.g., **[**219]** Culp Initial Report ¶ 121.) Dr. Culp's focus on the publication of LIBOR itself, as a means of isolating changes **[*515]** in EDF prices attributable to LIBOR apart from changes in EDF prices attributable to macroeconomic events would therefore appear to be a feature, not a flaw, of his analysis. Exchange plaintiffs' reliance on Dr. Seyhun's speculative "insider trading" theory is unpersuasive, and their suggestion that the EDF market may not be sufficiently liquid around 11:30am London time (or 5:30am Chicago time) is difficult to reconcile with their (and Dr. Seyhun's) contrary suggestions that EDFs "trade on an efficient market." (Exch. Pls.' Culp Reply 8; Seyhun Rebuttal Report ¶ 126.)

In his analysis of the relationship between LIBOR-derived implied forward rates and EDF-implied rates, Dr. Culp concludes that the two rates substantially differ over the Class Period. (E.g., Culp Rebuttal Report ¶ 49.) Because the spread between the two rates ranges between negative 157.56 and 21.79 basis points over the class period, Dr. Culp concludes that these differences are substantially greater in magnitude than the maximum 0.125 basis point change in LIBOR attributable to Rabobank's alleged manipulation **[**220]** of LIBOR.[76] (Culp Rebuttal Report ¶¶ 48-50.) Exchange plaintiffs complain that Dr. Culp fails to take into account the fact that banks other than Rabobank may have engaged in manipulation, and the collective impact of manipulation by multiple banks could be "more than ten-fold" greater than the 0.125 bp maximum change attributable to Rabobank. (Exch. Pls.' Culp Reply 10.) But even accepting that manipulation by more than one bank will have a greater impact on published LIBOR, Dr. Culp's point still stands: the large spreads between LIBOR-derived implied forward rates and EDF-implied rates often could not be explained by alleged LIBOR manipulation even by more than one bank. For example, the most extreme positive and negative spreads, at 21.79 bp and negative 157.56 bp, are 174 times and 1,260 times greater than the maximum Rabobank impact of 0.125 bp, respectively.

Exchange plaintiffs' motion to exclude certain of Dr. Culp's opinions is therefore denied. Even accepting that Exchange plaintiffs' criticisms are anything more than attacks on Dr. Culp's conclusions premised on a mischaracterization of his reports, none of those critiques call into question the reliability of Dr. Culp's opinions. **[**221]** Dr. Culp's opinions are not contradicted by a CME publication discussing Eurodollar cash markets, a statement made by counsel for Bank of America during oral argument, or certain trader communications. Nor are they excludable for having failed to consider the "overlap" formula that Exchange plaintiffs alchemize from nothing and present for the first time in their motions papers. And ultimately, we reject Exchange plaintiffs' overarching theory that a logical or theoretical argument is not susceptible to rebuttal or disproof through empirical evidence. We would assume that empirical evidence running counter to a logical or theoretical argument would spur one to ensure that the argument is free of logical fallacies and reevaluate the theoretical basis for the argument. But even if not, Exchange plaintiffs' attempted distinction of "logical" and "theoretical" arguments on the one hand and "empirical" arguments on the other simply does not offer a basis for excluding Dr. Culp's opinions under Daubert.

2.2 Dr. Hubbard

---

[74] The analysis of changes in EDF prices surrounding the publication of LIBOR is presented at paragraphs 116 through 169 of the Culp Initial Report and the analysis of the relationship between LIBOR-derived implied forward rates and EDF-implied rates is presented at paragraphs 45 through 51 of the Culp Rebuttal Report. Exchange plaintiffs do not include these paragraphs in the list of sections they seek to exclude. (Exch. Pls.' Culp Mem. 1.)

[75] Exchange plaintiffs also contend that these analyses are "ultimately irrelevant." (Exch. Pls.' Culp Reply 10.) This suggestion is baffling, given that Exchange plaintiffs' experts -- and Exchange plaintiffs themselves -- expound extensively on the significance of implied forward rates and arbitrage in establishing a causal relationship between LIBOR and EDF prices. (Seyhun Initial Report ¶¶ 108-09; Netz Initial Report 32-33; Netz Rebuttal Report 15-16; Exch. Pls.' Culp Mem. 7-9; Exch. Pls.' Culp Reply 3-4.)

[76] Dr. Culp relies on Dr. Hubbard's calculations that Rabobank's alleged manipulation of LIBOR had a maximum impact of 0.125 basis points. (Culp Initial Report ¶¶ 221-22; Hubbard Initial Report ¶ 216.)

Rabobank offers two reports from Dr. R. Glenn Hubbard: (1) an initial report dated April 3, 2017 (Decl. of Robert Lindholm **[*516]** ex. 65, June 30, 2017, ECF No. 2027); and (2) a sur-rebuttal **[**222]** report dated June 30, 2017 (Decl. of Robert Lindholm ex. 66, June 30, 2017, ECF No. 2027). We refer to these as the Hubbard Initial Report and the Hubbard Rebuttal Report. Exchange plaintiffs seek to exclude only certain portions of Dr. Hubbard's opinions, those in which he addresses Mr. Beevers's opinions regarding certain data produced by Rabobank and the sufficiency of that data.[77]

Specifically, Dr. Hubbard opines that Mr. Beevers's data-sufficiency critiques are misguided because: (1) Mr. Beevers constructed a dataset with duplicate entries (Hubbard Initial Report ¶¶ 174-76); (2) the date-coding issues identified by Mr. Beevers are illusory (Hubbard Initial Report ¶¶ 177-80); (3) information attributing trading "folders" to the individual trader with responsibility for that "folder" was made available for each of the traders identified over the course of Mr. Beevers's review of trader communications; and (4) Mr. Beevers did not consider certain risk reports produced by Rabobank (Hubbard Initial Report ¶¶ 181-85).

Dr. Hubbard is qualified to offer the challenged opinions.[78] Dr. Hubbard, in the challenged sections of his report, does not opine that Rabobank's data productions were complete **[**223]** and contain all information necessary to identify trader-based manipulation, but rather that they are not deficient in the various ways suggested by Mr. Beevers. Accordingly, Dr. Hubbard does not need an "understanding of, and experience with, the day-to-day conduct and reporting in dealing rooms of financial services organizations" to offer these opinions (Exch. Pls.' Hubbard Mem. 8); rather, Dr. Hubbard's formal training in economics and his extensive experience working with economic and financial data qualify him to do so. Exchange plaintiffs' suggestions to the contrary mischaracterize the opinions in question and are unpersuasive.

First, citing Dr. Hubbard's statement that "Mr. Beevers' own errors -- not deficient data -- are the cause of many of the data deficiencies he mistakenly claims exist in the Rabobank data" (Hubbard Initial Report ¶ 17b), Exchange plaintiffs claim that "[i]t is hard to imagine how this statement could mean anything other than what it says; namely, that it is Dr. Hubbard's opinion that Rabobank's data productions are 'not deficient,' and that Mr. Beevers' opinion that they are deficient, is 'mistaken[].'" (Exch. Pls.' Hubbard Reply 4.)

We have no such difficulty. **[**224]** Dr. Hubbard's statement is clear: he opines that many of the data deficiencies identified by Mr. Beevers are attributable to Mr. Beevers's own errors and not deficiencies in Rabobank's data. Exchange plaintiffs' interpretation overreads Dr. Hubbard's opinion, which pertains to the deficiencies identified by Mr. Beevers and is not a representation regarding the quality of Rabobank's data generally. Indeed, such an interpretation is expressly contradicted by Dr. Hubbard's qualification that "many of" the deficiencies identified by Mr. Beevers are not deficiencies in actuality.[79]

[*517] Exchange plaintiffs also identify subsequent portions of Dr. Hubbard's report and deposition testimony regarding the presence of inconsistent date formats, the availability of "folder mapping" information[80] for specific traders identified in Mr. Beevers's report, and the sufficiency of certain risk reports. Again, Dr. Hubbard limits each of these statements to be a response to Mr. Beevers's opinions, and these statements cannot reasonably be read

---

[77] Exchange plaintiffs seek the exclusion of paragraphs 17(b), 32 through 34, 164, 171, and 174 through 185 of the Hubbard Initial Report and Appendix D of that report. (Exch. Pls.' Hubbard Mem. 1.)

[78] Dr. Hubbard serves as Dean and Russell L. Carson Professor of Economics and Finance at the Columbia Graduate School of Business and on the Federal Reserve Bank of New York's Panel of Economic Advisors. Dr. Hubbard holds a Ph.D. and an A.M. in Economics from Harvard University, and has written extensively on various topics in finance and economics. (Hubbard Initial Report app. A.)

[79] For the same reasons, Exchange plaintiffs' reliance on paragraph 174 of the Hubbard Initial Report, where Dr. Hubbard opines that "most of" the data deficiencies identified by Mr. Beevers are not actually deficiencies, is unavailing. (Hubbard Initial Report ¶ 174.)

[80] Broadly speaking, "folder mapping" refers to the ability to identify the individual trader responsible for specific trading positions and transactions.

to offer an opinion regarding the overall completeness of Rabobank's production. For instance, Exchange plaintiffs identify Dr. Hubbard's opinion that inconsistent date formats **[**225]** "should not have contributed to [Mr. Beevers's] inability to construct trader-level LIBOR-related positions." (Exch. Pls.' Hubbard Reply 5 (quoting Hubbard Initial Report ¶ 179).) This opinion is limited, on its face, to one specific difficulty that Mr. Beevers identified in his report. Similarly, Exchange plaintiffs identify Dr. Hubbard's statement that folder mapping information is available "for every Rabobank trader that . . . Mr. Beevers identified as being involved in trader communications." (Exch. Pls.' Hubbard Reply 5 (quoting Hubbard Initial Report ¶ 177 n.302).) But again, this statement is on its face limited to a certain group of traders specifically identified by Mr. Beevers and does not extend to the availability of folder mapping information for all traders more broadly. Finally, Exchange plaintiffs identify Dr. Hubbard's opinion that Rabobank produced "most of the risk reports" that Mr. Beevers asserts are missing, "namely, 'risk positions by trading book on a daily basis,' and reports of 'which activities or individuals are taking significant risk positions.'" (Exch. Pls.' Hubbard Reply 5 (quoting Hubbard Initial Report ¶ 185 and Beevers Initial Report ¶¶ 48-49).) **[**226]** This selective quotation mischaracterizes the scope of Dr. Hubbard's opinion, which refers only to Mr. Beevers's description of "routine periodic reports, sometimes called 'dashboards', for use in internal and regulatory reporting,'" (Hubbard Initial Report ¶ 184 (quoting Beevers Initial Report ¶ 31)), and not to trader-by-trader positions more broadly.

When the challenged opinions are characterized accurately, Dr. Hubbard is qualified to offer them. Dr. Hubbard's opinions are primarily directed to how Mr. Beevers analyzed the data, rather than what specific data Mr. Beevers analyzed. Accordingly, Dr. Hubbard's extensive training and experience in the fields of economics and finance renders him qualified to work with spreadsheets and data, and therefore qualifies him to opine that Mr. Beevers made certain errors in analyzing the data produced by Rabobank.[81]

Nor are Dr. Hubbard's opinions excludable on account of incorrectness or speculativeness. Exchange plaintiffs suggest that Dr. Hubbard's opinions are not based on sufficient facts because Rabobank's data production contains "significant deficiencies . . . that are easily ascertained upon review," and Dr. Hubbard conceded that his opinions **[**227]** were incorrect. (Exch. Pls.' Hubbard Mem. 11-12). As a threshold matter, ***HN43***[] our role at the Daubert stage is not to conclusively assess the correctness of an expert's opinions, see *Amorgianos, 303 F.3d at 266* (holding that we **[*518]** undertake a Daubert analysis "without regard to the conclusions the expert has reached or [our] belief as to the correctness of those conclusions"), a point that plaintiffs have repeatedly emphasized (e.g., Exch. Pls.' Seyhun Opp'n 10). Exchange plaintiffs' focus on the correctness of Dr. Hubbard's conclusions is therefore an analytic nonstarter. Further, we have already rejected the premise of the assertion that Dr. Hubbard's opinions are incorrect because Rabobank's data productions are in fact incomplete -- Dr. Hubbard does not opine on the overall completeness of Rabobank's data productions, but rather only certain deficiencies identified by Mr. Beevers.

Second, Dr. Hubbard's opinions are not speculative. Dr. Hubbard undertook a review of the work product supporting Mr. Beevers's report and of the data produced by Rabobank, (Hubbard Report app. C), and one can trace a direct analytical path from that review to the conclusions that Dr. Hubbard reaches: namely, that Mr. Beevers made certain **[**228]** errors in analyzing the data produced by Rabobank and failed to consider certain risk reports in formulating his opinions. Indeed, the Delta reports, the MRE reports, and the Daily Revenue and Risk reports identified at paragraph 185 of the Hubbard Initial Report[82] are not cited in the appendices listing the materials relied upon in Mr. Beevers's reports. (Beevers Initial Report app. A; Beevers Rebuttal Report app. A.). Proceeding from that fact to the conclusion that Mr. Beevers failed to take those reports into account is a natural inference, not an analytical leap suggesting a lack of reliability.

In sum, Exchange plaintiffs' motion to exclude certain of Dr. Hubbard's opinions is denied. The motion is premised on a mischaracterization of Dr. Hubbard's opinions: the disputed sections of his report do not offer, and cannot

---

[81] This conclusion is consistent with our prior holding that Dr. Netz is qualified to opine on the relationship between LIBOR and EDF prices based on her training and experience in economics and econometrics, her lack of specific experience with EDFs and EDF trading notwithstanding.

[82] Dr. Hubbard identifies specifically the documents located at Bates ranges RABO_METZLER_ 0188130-0189842, 0189843-0190724, and 0190725-0193254. (Hubbard Initial Report app. C.)

reasonably be read to offer, the opinion that Rabobank's data productions were "complete" in some platonic sense. Based on his extensive training and experience in economics and finance, Dr. Hubbard is qualified to offer his opinions regarding Mr. Beevers's data analysis and any errors that Mr. Beevers may have made.

2.3. Dr. Willig

UBS submits two reports from Dr. Robert **[**229]** Willig: (1) an initial report dated April 3, 2017 (Decl. of Jamie Heine ex. 5, July 1, 2017, ECF No. 2031); and (2) a sur-rebuttal report dated June 30, 2017 (Decl. of Jamie Heine ex. 7, July 1, 2017, ECF No. 2031). In the context of the Exchange plaintiffs' action, we refer to these as the Willig Initial Report and the Willig Rebuttal Report. Exchange plaintiffs do not challenge Dr. Willig's qualifications, and we conclude that he is qualified to offer the opinions presented in his reports.[83]

In these reports, Dr. Willig offers several opinions as to "whether Plaintiffs can demonstrate using common proof on a class-wide basis that panel banks, either individually or jointly, systematically suppressed their LIBOR submissions and the resulting published LIBOR rates during the Suppression Class Period." (Willig Initial **[*519]** Report ¶ 5 (footnote omitted).) Central to these opinions is an analysis of interbank lending transactions into which the panel banks actually entered, which Dr. Willig characterizes as "the most informative data for evaluating the accuracy of their LIBOR submissions." (Willig Initial Report ¶ 18.) Dr. Willig compiles a dataset of transactions from data files produced by **[**230]** the panel banks, and from this dataset identifies transactions between banks occurring in London, and matches each transaction in this dataset to a LIBOR submission by panel bank, tenor, and date. (Willig Initial Report ¶¶ 21-22, 30; app. 4.) Using this dataset, he concludes that "[c]ommon evidence cannot show that the panel banks' LIBOR submissions during the Suppression Class Period were systematically 'Low'," defining "Low" to mean below the "actual borrowing costs of the panel bank that made the submission" (Willig Initial Report ¶ 6(a)); that "[c]ommon evidence cannot show that any LIBOR suppression alleged by Plaintiffs was the result of the panel banks acting jointly" (Willig Initial Report ¶ 6(b)); and that "[c]ommon evidence cannot show that alleged suppression of LIBOR submissions caused LIBOR rates to be lower than they otherwise would have been" (Willig Initial Report ¶ 6(c)).

Exchange plaintiffs seek the exclusion of Dr. Willig's reports, though they focus their challenges on opinions based on Dr. Willig's analysis of transaction data.[84] They contend that Dr. Willig's analysis runs counter to the proper interpretation of the "LIBOR question" -- the question posed by the BBA **[**231]** that a panel bank is supposed to answer in making its LIBOR submission as well as certain guidance published by the BBA and certain panel banks' internal documents, among other authorities. They also assert that Dr. Willig's analysis is inadmissible because it relies on insufficient data, and because it offers an opinion on the merits.

2.3.1. Interpretation of the LIBOR Question

Exchange plaintiffs first argue that because Dr. Willig's analysis focuses on the rates observed in actual interbank lending transactions and not offered rates, his analysis contradicts the LIBOR question and is therefore unreliable and irrelevant. (Exch. Pls.' Willig Mem. 9-10.) They further assert that Dr. Willig's methodology is "guaranteed to produce Defendant-favorable false negatives," which "gives rise to a reasonable inference that Dr. Willig's first calculation set out to find only one Defendant-favorable result: no systematic suppression," and that Dr. Willig's methodology "completes Defendants' highly unusual and parallel violation of the BBA requirement of 'accountability' which was the original purpose of the offered rates." (Exch. Pls.' Willig Mem. 11-12.)

---

[83] Dr. Willig is a Professor Emeritus of Economics and Public Affairs at Princeton University, having served as a professor from July 1978 through June 2016. He holds a Ph.D. in Economics and an M.S. in Operations Research from Stanford University, and an A.B. in Mathematics from Harvard University, and his written extensively on topics in economics and finance. (Willig Initial Report app. 1.)

[84] Exchange plaintiffs do not specify that they challenge only certain parts of Dr. Willig's reports, but also offer no argument as to Dr. Willig's opinions that are not dependent on his analysis of transaction data.

2.3.1.1. Exchange Plaintiffs' "Borrowing [232] Cost" Allegations**

This line of argument is readily refuted by Exchange plaintiffs' repeated references to panel banks' "borrowing costs" throughout the course of this litigation -- or least up until interbank lending data was produced and analyzed by the parties' experts. Though Exchange plaintiffs have now amended their complaints to omit certain references to "borrowing costs," the Second Circuit has made clear that ***HN44***[] "[t]he amendment of a pleading does not make it any less an admission of the party," *Andrews v. Metro N. Commuter R.R. Co., 882 F.2d 705, 707 (2d Cir. 1989)*. "[T]he facts alleged in a complaint . . . can be **[*520]** self-defeating." *TufAmerica, Inc. v. Diamond, 968 F. Supp. 2d 588, 600 (S.D.N.Y. 2013)*, and in this case, Exchange plaintiffs' repeated allegations regarding "borrowing costs" is indeed self-defeating of their motion to exclude Dr. Willig's reports.

For example, in the first consolidated amended complaint, filed in April 2012, Exchange plaintiffs alleged that "Defendants conspired to suppress LIBOR below the levels it would have been set had Defendants accurately reported their borrowing costs to the BBA" and addressed "the striking discrepancy between Defendants' submissions to the BBA and their actual borrowing costs." (Consolidated Am. Compl. ¶¶ 45, 122, Apr. 30, 2012, ECF No. 134.) In a subsequent complaint, **[**233]** the corrected second amended consolidated class action complaint, Exchange plaintiffs asserted that "Defendants understated their borrowing costs to the British Bankers' Association," that "[b]y acting together and in concert to knowingly understate their true borrowing costs, Defendants caused LIBOR to be set at artificial levels," and that "Defendants' LIBOR quotes during the Class Period did not appropriately reflect those banks' actual borrowing costs at that time." (Corrected Second Am. Consolidated Class Action Compl. ¶¶ 5, 13, 162, Sept. 30, 2013, ECF No. 438.) The proposed third amended complaint contains similar allegations, (Proposed Third Am. Consolidated Class Action Compl. ¶¶ 5, 13, 130, June 29, 2015, ECF No. 1159), as does the proposed fourth amended complaint (Proposed Fourth Am. Consolidated Class Action Compl. ¶¶ 5, 13, 131, Jan. 14, 2017, ECF No. 1726).

Exchange plaintiffs cannot now assert that Dr. Willig's analysis -- which performs a comparison that plaintiffs themselves have repeatedly alleged in their complaints and otherwise referenced -- is irrelevant or unreliable by changing their interpretation of the LIBOR question post hoc. As a corollary, the related **[**234]** insinuation that Dr. Willig's methodology is "guaranteed" to produce only defendant-favorable results borders on the frivolous.

Indeed, Exchange plaintiffs' attempt to evade the effect of their "borrowing costs" allegations is especially unpersuasive once the timing of Dr. Willig's reports is considered. In November 2016, in document requests made as part of class-certification discovery, Exchange plaintiffs defined "LIBOR Suppression" as "making LIBOR Submissions below the LIBOR Panel Bank's actual cost of borrowing in the London Interbank Market." (Decl. of Paul Mishkin ex. 12, July 21, 2017, ECF No. 2112 ("Mishkin Willig Decl.").) In April 2017, when Dr. Willig's initial report was produced, both the operative complaint and the proposed fourth amended complaint submitted by Exchange plaintiffs in January 2017 contained numerous allegations regarding Defendants' "borrowing costs." (Corrected Second Am. Consolidated Class Action Compl. ¶¶ 5, 13, 162; Proposed Fourth Am. Consolidated Class Action Compl. ¶¶ 5, 13, 131.)

Only after we granted further leave to amend in April 2017 and Exchange plaintiffs in fact filed their corrected fourth amended complaint in December 2017 -- after the **[**235]** class certification motions and Daubert motions had been fully briefed -- did Exchange plaintiffs replace certain references to "borrowing costs" with "offered rates." For instance, the proposed fourth amended complaint alleges that the panel banks "conspired to suppress LIBOR below the levels it would have been set had Defendants accurately reported their competitive borrowing costs" and that "Defendants' LIBOR quotes during the Class Period did not appropriately reflect those banks' actual borrowing costs." (Proposed Fourth Am. Consolidated Class Action **[*521]** Compl. ¶¶ 124, 131 (emphasis added).) By contrast, in the corrected fourth amended complaint, Exchange plaintiffs changed these allegations, which now assert that the panel banks "conspired to suppress LIBOR below the levels it would have been set had Defendants accurately reported their competitive offered rates" and that "Defendants' LIBOR quotes during the Class Period did not appropriately reflect those banks' actual offered rates." (Corrected Fourth Amended Complaint ¶¶ 115, 122, Dec. 11, 2017, ECF No. 2363 (emphasis added).)[85]

By asserting that "Dr. Willig concluded that LIBOR supposedly was not 'systematically' suppressed" **[**236]** (Exch. Pls.' Willig Mem. 6 (citing Willig Initial Report ¶¶ 6, 75, 192)), Exchange plaintiffs have either continued to define LIBOR suppression as the making of submissions below actual borrowing costs or mischaracterized Dr. Willig's opinions deliberately. In each of Dr. Willig's opinions identified by Exchange plaintiffs, Dr. Willig opines that panel banks' LIBOR submissions were not systematically below their average borrowing costs as observed in interbank transaction data; he does not opine that there was no systematically suppression of LIBOR. (Willig Initial Report ¶ 6(a) ("Common evidence cannot show that the panel banks' LIBOR submissions during the Suppression Class Period were systematically 'Low,'" with "Low" defined as being below "the actual borrowing costs of the panel bank that made the submission"); *id. ¶ 75* ("Plaintiffs cannot establish using common evidence that panel banks systematically made LIBOR submissions below their borrowing costs." (emphasis added)); *id. ¶ 192* ("[A]vailable data on banks['] borrowing costs do not indicate that banks systematically made submissions below their borrowing costs . . . ." (emphasis added)).) Exchange plaintiffs' characterization **[**237]** of Dr. Willig's opinion is valid only if "suppression" is defined to be the making of submissions below actual borrowing costs -- a position that is difficult to reconcile with Exchange plaintiffs' criticisms of Dr. Willig's opinions premised on the notion that borrowing costs observed in actual transactions are irrelevant to the LIBOR question.

In one section of his report, Dr. Willig does conduct an analysis in which panel banks' actual LIBOR submissions are replaced with the corresponding average rate observed in the transaction data. (Willig Initial Report ¶¶ 89-101.) However, this analysis is intended to be illustrative of the principle that changes in LIBOR submissions may not always impact published LIBOR, as Dr. Willig explicitly disclaims: his "re-calculations of the LIBOR rates after substituting banks' average London Interbank Borrowing costs for their submissions are not intended to be estimates of but-for rates." (Willig Initial Report ¶ 96 n.82.) This analysis is comparable to Dr. Netz's median-replacement analysis, which is similarly intended to show that changes in LIBOR submissions impact published **[*522]** LIBOR only some of the time, which is also not intended to be a calculation **[**238]** of but-for LIBOR, and which is also admissible. See supra section III.1.2.2.

2.3.1.2. The Text of the LIBOR Question

Exchange plaintiffs' extensive allegations regarding "borrowing costs" and reliance on a mischaracterization of Dr. Willig's opinions warrant denial of their motion standing alone, but we nonetheless proceed to consider the various sources on which Exchange plaintiffs rely to bolster their recently adopted interpretation of the LIBOR question.

As an initial matter, despite their repeated invocation of "offer rates" and "offered rates," Exchange plaintiffs never define with precision what exactly they mean by those terms: it remains unclear whether, under their interpretation, whether an "offer rate" or "offered rate" refers to the first rate floated by a lending bank (regardless of how high or how serious that number might be), the first rate offered by a lending bank that is sufficiently reasonable such that it serves as a starting point for negotiations, or some other number entirely. Regardless, to render Dr. Willig's analyses inadmissible, the LIBOR question must preclude consideration of actual transaction rates altogether. None of the myriad sources relied upon by **[**239]** Exchange plaintiffs comes close to establishing such a proposition,

---

[85] Exchange plaintiffs did not initially disclose these changes, which we discovered after we directed the filing of a redline comparing the proposed fourth amended complaint and the corrected fourth amended complaint. (Letter from Christopher Lovell & David Kovel to the Court, Dec. 13, 2017, ECF No. 2370.) Even setting aside the question of whether the scope of Exchange plaintiffs' leave to amend extends to changes like these, see *Apr. 20, 2017 Order, 2017 U.S. Dist. LEXIS 118230 at *113-114*, ECF No. 1859 (granting "plaintiffs leave to supplement their complaint in [a] single regard," "the issue of speculative damages in the context of the efficient enforcer analysis"), they have only removed some of the "borrowing costs" allegations in the operative complaint. (e.g., Corrected 4AC ¶ 13 ("By acting together and in concert to knowingly understate their true borrowing costs, Defendants caused LIBOR to be set at artificial levels.")).

i.e., that consideration of actual transaction rates is irrelevant to considering whether LIBOR submissions were suppressed.

We follow the parties' lead and begin with the text of the LIBOR question, which asks: "At what rate could you borrow funds, were you to do so by asking for and then accepting inter-bank offers in a reasonable market size just prior to 11 am" London time? Exchange plaintiffs cite the phrase "by asking for and accepting inter-bank offers" to emphasize that the LIBOR question asks about offered rates, (Exch. Pls.' Willig Mem. 9.); UBS counters that the words "accepting" and "offers" indicate that the LIBOR question refers to "final offers that would result in transactions," as "[t]he offer a bank would accept is the final offer, not any initial offer it might have received." (UBS Willig Opp'n 6, 8.)

We conclude that the text of the LIBOR question is at least somewhat ambiguous. We agree with UBS that the LIBOR question cannot refer to any initial "offer" that is made, as doing so would render superfluous the LIBOR question's language "and accepting." An offer could be sufficiently high such that **[**240]** the panel bank would not "accept" the offer, even as a starting point for negotiations. On the other hand, we do not share UBS's confidence that the LIBOR question refers to only final "offers" that are "accepted" (akin to how those terms are used in contract law) and become consummated transaction rates. UBS's argument would eliminate entirely the distinction between offered rates and transaction rates, and LIBOR remains an offered rate.

We need not resolve definitively this ambiguity now, as it does not render Dr. Willig's analysis of actual transaction rates inadmissible. Dr. Willig acknowledges that LIBOR represents an "offered" rate (Willig Initial Report ¶ 66), and does not suggest that panel banks' actual transaction rates should be substituted as but-for estimates of panel banks' LIBOR submissions (Willig Initial Report ¶ 96 n.82). Rather, Dr. Willig opines that consummated transaction rates are relevant in the determination of a panel bank's LIBOR submissions; nothing in the wording of the LIBOR question suggests that this assumption is an unreliable one.

[*523] 2.3.1.3. BBA Publications

This understanding of the LIBOR question is confirmed by several BBA publications identified by **[**241]** the parties. None of these sources precludes the consideration of actual transaction rates.

The first BBA publication addressed by the parties is the October 2010 version of a BBA webpage titled The Basics, which according to Exchange plaintiffs (Exch. Pls.' Willig Reply 3), states that LIBOR rates "are not based on actual transaction[s]" and that "[t]he key concept is that [LIBOR] is based on the offered rate, and not the bid rate." (Decl. of Victor Stewart ex. 2, Aug. 4, 2017, ECF No. 2188 ("Stewart Willig Decl.").) In so arguing, Exchange plaintiffs conspicuously omit the first quoted sentence's full context. In full, that sentence reads: "The rates are not necessarily based on actual transaction[s], indeed it would not be possible to create the suite of [LIBOR] rates if this was a requirement, as not all banks will require funds in marketable size each day in each of the currencies and maturities they quote." (Stewart Willig Decl. ex. 2 (emphasis added).) The use of "necessarily" implies that actual transaction rates do form a basis for a bank's LIBOR submissions, an implication confirmed by the subsequent reference to potential data availability issues as the reason why a basis **[**242]** in actual transaction rates is not a "requirement" of panel bank's LIBOR submissions. The second quoted sentence is irrelevant to our analysis, as Dr. Willig's analysis of actual transaction rates is not an analysis of bid rates. Exchange plaintiffs also cite similar language in a May 2008 supplementary memorandum, which uses language largely identical to the The Basics webpage cited by Exchange plaintiffs. (Stewart Willig Decl. ex. 3.) The lone difference is that it omits the word "necessarily" that Exchange plaintiffs also omitted in their discussion of the The Basics webpage, and we find plaintiffs' reliance similarly unavailing.

Exchange plaintiffs also misattribute the first sentence to an October 2009 BBA document entitled "Guidelines for [C]ontributing BBA LIBOR Rates," (Decl. of Fred Isquith ex. 5, July 10, 2017, ECF No. 2074 ("Isquith Willig Decl.")), which turns out to provide interpretive guidance. This document states that "[u]nder certain circumstances, contributor banks will take funds at levels above or below LIBOR" and that such an occurrence "does not necessarily mean that they should raise or drop their rates to these levels" (emphasis added), and also explains that **[**243]** "the rates submitted into the process are a bank's own view of its cost of funds, based on the totality of the information available to a bank from both internal and external sources." (Isquith Willig Decl. ex. 5.) This document strongly suggests that a panel bank's submission should be informed by actual transaction rates, which unquestionably form part of the "totality of information available to [the] bank."

A second BBA webpage, titled Definitions, is a second point of contention.[86] Here, the BBA states that "[c]ontributions must represent rates at which a bank would be offered funds in the London interbank market," and that "[t]he rate at which each bank submits must be formed from that bank's perception of its cost of unsecured funds in the London interbank market." (Mishkin Willig Decl. ex. 8; Isquith Willig Decl. ex. 8.) Again, we interpret this page to mean that while LIBOR represents an offered rate, actual transaction rates retain relevance in a bank's determination **[*524]** of its LIBOR submission. The rate at which the bank is actually receiving funding is plainly relevant to how the bank forms its "perception of its cost of unsecured funds."

Exchange plaintiffs also attribute to this **[**244]** webpage the BBA's statement that the 1998 revision to the LIBOR question "enables accountability for the rates."[87] (Exch. Pls.' Willig Mem. 12.) According to Exchange plaintiffs, "[s]uch 'accountability' could be achieved only if each Defendant preserved the 'offers' on which it based its daily submissions" (emphasis added), and that "all Defendants have engaged in the highly unusual, parallel conduct of refusing to maintain such offers or otherwise supply an 'accountable' offer as was promised by the BBA." (Exch. Pls.' Willig Mem. 11-12.)

Contrary to Exchange plaintiffs' assertion, the quoted statement actually appears in a May 2008 BBA memorandum. (Stewart Willig Decl. ex. 3). But regardless of source, this argument is rank speculation. Exchange plaintiffs provide no cogent explanation for why the BBA's remark about "accountability" made in the process of changing the focus of the LIBOR question from a hypothetical prime bank to the specific panel bank making a submission bears on the distinction between transaction rates and offered rates and whether Dr. Willig properly analyzed actual transaction data. Rather, changing the scope of the LIBOR question to be panel bank-specific is consistent **[**245]** with one notion of "accountability" in that it requires the panel bank to focus on its own circumstances and not those of a hypothetical bank, a focus consistent with Dr. Willig's approach of examining the transactions in which a panel bank actually engaged.

Third, Exchange plaintiffs rely on a June 2008 BBA "consultative paper" titled "Understanding the Construction and Operation of BBA LIBOR -- Strengthening for the Future," (Stewart Willig Decl. ex. 8), and what appear to be two earlier drafts from May 6, 2008 and May 13, 2008 (Stewart Willig Decl. ex. 4; Isquith Willig Decl. ex. 11).[88] Exchange plaintiffs quote the BBA's statement in the final paper that "[t]here is confusion amongst market commentators about what BBA LIBOR is for, and how it is constructed,"[89] but the final paper also explains that "[t]he rate at which each bank submits must be formed from that bank's perception of its cost of funds in the interbank market." (Stewart Willig Decl. ex. 8.) As we have discussed, a panel bank's perception unquestionably includes the rates at which it is actually obtaining funding.

The two earlier drafts discuss one potential change to LIBOR and the LIBOR question, "[l]oosen[ing] the definition **[**246]** of what is 'offered.'" (Stewart Willig Decl. ex. 4; Isquith Willig Decl. ex. 11.) Specifically, the drafts propose that "[a] change could be made [from the current "offer" definition] to the rate at which a bank can obtain unsecured funds." (Stewart Willig Decl. ex. 4; Isquith Willig Decl. ex. 11.) This statement also supports the contention that LIBOR is an offered rate, but again says nothing to undermine the propriety of considering actual transaction rates in a bank's determination of its LIBOR submission.

---

[86] Exchange plaintiffs rely on the July 10, 2017 version of the webpage and UBS relies on the July 20, 2017 version, but the two versions are identical. (Isquith Willig Decl. ex. 8; Mishkin Willig Decl. ex. 8.)

[87] Prior to this revision, the LIBOR question read: "At what rate do you think interbank term deposits will be offered by one prime bank to another prime bank [in a] reasonable market size today at 11.00 am?"

[88] These two earlier versions appear to be identical.

[89] This statement also bolsters our earlier conclusion that the text of the LIBOR question is ambiguous.

[*525] 2.3.1.4. Additional Authorities

Next, Exchange plaintiffs rely on a JPMorgan Chase internal document from 2010 that purports to set forth JPMorgan Chase's LIBOR-submission policy. According to Exchange plaintiffs, JPMorgan Chase's policy establishes that LIBOR submissions are "not based on actual transaction[s]" and that LIBOR is to be "based upon the offered rate, and not the bid rate." (Exch. Pls.' Willig Mem. 10 (emphasis omitted).) As an initial matter, the characterization of this document as a JPMorgan Chase internal document is at least somewhat misleading, as Exchange plaintiffs do not acknowledge that the document quotes a significant portion of the BBA's Definitions page **[**247]** that Exchange plaintiffs have already cited. (Isquith Willig Decl. ex. 6; Mishkin Willig Decl. ex. 9.) Further, it is unpersuasive for the same reasons we find Exchange plaintiffs' reliance on the BBA's Definitions page unpersuasive: the first statement that "rates are not based on actual transaction[s]," when read in its proper context, refers to the fact that actual transactions may not occur in all currencies and all tenors, and the second statement that LIBOR is "based upon the offered rate, and not the bid rate" is irrelevant because Dr. Willig analyzes observed transaction rates, which are neither bid rates nor (as Exchange plaintiffs strenuously contend) offered rates.[90]

Exchange plaintiffs also contend that "academic papers have repeatedly followed" the description of LIBOR as an offer rate, citing only A Comparison of LIBOR to Other Measures of Bank Borrowing Costs, a 2012 working paper coauthored by Dennis Kuo, a then-PhD student at the University of California, Los Angeles, and two economists at the Federal Reserve Bank, David Skeie and James Vickery. (Stewart Willig Decl. ex. 5 ("Kuo, Skeie & Vickery")). They identify specifically the authors' statement that "Libor is an offer **[**248]** rate" and that "Libor measures the rate at which banks estimate they would be offered unsecured funds, not the rate at which they would accept those offers." (Kuo, Skeie & Vickery at 7 (emphasis omitted).) Setting aside the question of the weight to which the paper is entitled given its unpublished nature, we find nothing in this paper that undercuts Dr. Willig's reliance on observed transaction rates. Indeed, we find Exchange plaintiffs' reliance on this paper somewhat curious, as the authors devote a substantial portion of the paper to comparing LIBOR submissions to actual interbank loan rates calculated from a payment dataset published by the Federal Reserve. (Kuo, Skeie & Vickery fig.5, tbl.2.).[91]

In reply, Exchange plaintiffs also cite a February 2010 Credit Suisse Fixed Income Research report titled A Guide to **[*526]** the Front-End and Basis Swap Markets, and in particular, the report's statement that "[t]he fixed LIBOR rate is not precisely linked to the rate a contributing bank would bid for funding, nor it is directly tied to the rate at which a given contributor would offer funding." (Stewart Willig Decl. ex. 6. (emphasis added)). But this statement diminishes, rather than heightens, the importance of the initial **[**249]** rates "offered" by a lending bank, as it provides on its face that a panel bank's LIBOR submission is "not directly tied" to any specific offers. Rather, the report continues: "Instead, it reflects where a given bank deems it could borrow funds in reasonable size should it seek to do so. In essence, the banks are being asked to disclose the rate at which they believe the market would be willing to offer cash to them should they desire funding. It is the contributing bank's perception of where others would offer them funding. Sentiment is, therefore, critical for the direction of LIBOR." (Stewart Willig Decl. ex. 6.). This discussion again suggests that a panel bank's submission should be based on its "perception" of the rate at which it could receive funding. Though we have already so held, it bears repeating that the rate at which the bank is actually receiving funding is relevant to the bank's belief regarding the rate at which the market would be willing to offer it funding.

---

[90] Given that we find unpersuasive Exchange plaintiffs' reliance on this JPMorgan Chase document, we also reject the notion that JPMorgan Chase should be "estopped" from offering Dr. Willig's opinions. (Exch. Pls.' Willig Mot. 10.) This questionable conception of "estoppel" has no basis in law, but if we were to apply it, we would conclude that certain named plaintiffs' testimony that LIBOR is based on actual transaction rates would preclude Exchange plaintiffs from offering many of the arguments supporting their challenge to Dr. Willig's opinions. For example, Atlantic Trading's 30(b)(6) representative testified, in response to the question "when a LIBOR submitter is making their decision about what to submit, could they consider their actual borrowing costs that day," that he "would think that's the sole thing they're basing it on." (Mishkin Willig Decl. ex. 3.)

[91] Indeed, the paper makes clear that the relationship between actual transaction rates and offered rates is a function of the bid-ask spread. (Kuo, Skeie & Vickery at 7.) The existence of such a relationship, which suggests that the difference between actual transaction rates and offered rates can be controlled for, bolsters Dr. Willig's analysis.

2.3.1.5. Conclusion

In sum, the text of the LIBOR question and various documentary sources make clear that while LIBOR represents an offer rate and is not itself a transaction rate, rates observed in actual, consummated **[**250]** transactions are nonetheless properly considered in a panel bank's determination of its LIBOR submissions. In turn, because actual transaction rates are properly considered in a panel bank's determination of its LIBOR submissions, they are properly considered in our assessment of whether a bank's LIBOR submissions were suppressed and whether such suppression can be established through common evidence. Exchange plaintiffs' argument to the contrary -- the necessary implication of their argument here -- is simply unavailing.

Exchange plaintiffs' criticism of Dr. Willig's secondary analysis, in which he analyzes "the 95th percentile spread above the weighted average rate for each bank-tenor-day" as a "conservative measure of the ask rate," (Willig Initial Report ¶ 67 & n.68), is unpersuasive for the same reasons. Exchange plaintiffs cannot dispute that the Dr. Willig's 95th percentile measure is higher than, and therefore conservative as compared to, the weighted-average transaction rates examined in his primary analysis.[92]

2.3.2. Data Sufficiency

Exchange plaintiffs next argue that Dr. Willig's opinions are based on insufficient data. In particular, they contend that "Dr. Willig states that **[**251]** 'Bank of America had Low LIBOR submissions on only 2 percent of tenor-days and JPMorgan on 4 percent of tenor-days' during the Suppression Period' [sic]", and that for the 3-month tenor, this assessment is based on only 15 days and 4 days of data for Bank of America and JPMorgan Chase, respectively. (Exch. Pls.' Willig Mem. 19.) In support of this argument, Exchange plaintiffs cite two authorities identifying problems posed by small sample sizes in the statistical context.

First, Exchange plaintiffs offer no explanation why an assessment of Dr. Willig's **[*527]** sample size should be based on only one specific tenor. Rather, we expect more interbank lending activity in certain tenors than others, an expectation confirmed by the BBA's statement that "not all banks will require funds in marketable size each day in each of the currencies and maturities they quote" (e.g., Stewart Willig Decl. ex. 2), and through a review of Appendix 5 to the Willig Initial Report (which indicates substantially more activity in the overnight, one week, and one-month tenors).

Indeed, Exchange plaintiffs have alleged persistent suppression of LIBOR based on the panel banks' reputational concerns, and offer no reason **[**252]** why those concerns would be reflected in only one tenor. They cite allegations that traders sought "to profit from the widening of the spread between the 1-month, 3-month and 6-month LIBOR tenors" (Proposed Third Am. Consolidated Class Action Compl. ¶¶ 19, 226-27), and argue that "[t]his spread trading strategy could not have been successful if all LIBOR tenors were manipulated in the same direction at the same time." (Exch. Pls.' Willig Reply 10.) However, this argument fails to consider the fact that the spread-trading strategy so alleged could be successful if all LIBOR tenors were manipulated in the same direction, but to different extents.

Nor are Exchange plaintiffs' sample-size authorities persuasive in this context. *Pollis v. New School for Social Research, 132 F.3d 115 (2d Cir. 1997)*, considered a statistical analysis on the merits, not whether that analysis was admissible under Daubert. Further, it referenced sample sizes far smaller than the datasets on which Dr. Willig bases his opinions. See *id. at 120-22*. The Reference Manual on Scientific Evidence identifies certain concerns regarding the application of statistical testing to small samples, but also states that "[h]owever, a meaningful statistical analysis yielding a significant result can be based **[**253]** on a small sample, and reliability does not depend on sample size alone." David H. Kaye & David A. Freedman, Reference Guide on Statistics, in Reference

---

[92] Exchange plaintiffs additionally argue that Dr. Willig's selection of the 95th percentile is unsupported and speculative. This assumption is not troubling given that this analysis is conservative compared to Dr. Willig's primary analysis based on weighted-average transaction rates; the line must be drawn somewhere.

Manual on Scientific Evidence 211, 255 n.108 (3d ed. 2011). Exchange plaintiffs do not explain which statistical tests conducted by Dr. Willig are rendered flawed by small sample sizes, and we decline to speculate.

2.3.3. Opinion on the Merits

Finally, Exchange plaintiffs argue that we should construe Dr. Willig's opinions as his "final merits opinion on the ultimate issues" because "Dr. Willig does not state that his work is ongoing, that his opinions are not final, and that he is waiting for a full record to be developed before determining the appropriate, data-driven methods of analysis." (Exch. Pls.' Willig Mem. 6.)

This argument is patently absurd. First, the assertion that Dr. Willig offers ultimate opinions on the merits of whether LIBOR was in fact suppressed plainly mischaracterizes Dr. Willig's opinions and is an argument that we have already considered and readily rejected. Second, to the extent Dr. Willig's class certification opinions overlap with the merits question of whether LIBOR was in fact persistently suppressed, the **[**254]** "rigorous analysis" to be undertaken at class certification often "will entail some overlap with the merits of the plaintiff's underlying claim." *Dukes, 564 U.S. at 351*.

Ultimately, Exchange plaintiffs identify no authority for this "gotcha" argument that Dr. Willig did not expressly reserve the right to supplement his opinions if new information were made available to him. ***HN45***[] It seems safe to assume that an expert, as a practitioner of the scientific method, would consider relevant additional information and incorporate that information into his opinions. We see little reason why experts **[*528]** should be required to explicitly disclaim as much.

2.3.4. Conclusion

Exchange plaintiffs' motion to exclude Dr. Willig's opinions is denied. Even if Exchange plaintiffs were not bound by the extensive history of their allegations that panel banks suppressed LIBOR by understating their actual "borrowing costs," the motion is premised on a mischaracterization of Dr. Willig's report and Dr. Willig's analysis of rates observed in consummated transactions. Rather, we conclude from our review of the text of the LIBOR question and other interpretive sources that a panel bank's LIBOR submission should be based on its perception of the **[**255]** rates it would be offered and the "totality of the information" available to it. Rates observed in consummated transactions are, almost axiomatically, part of that "totality of the information."

3. Trader-Based Manipulation Class

Having resolved the parties' Daubert motions, we now address the Exchange plaintiffs' motion for class certification itself. Though the Exchange plaintiffs seek certification of a single class of EDF traders who "were harmed" by trader-based manipulation, persistent suppression, or both, we conclude that the class should be analyzed as two separate subclasses: (1) class members advancing claims under a trader-based manipulation theory and (2) those advancing claims under a persistent suppression theory. See *Fed. R. Civ. P. 23(c)(5)* ("When appropriate, a class may be divided into subclasses that are each treated as a class under this rule."). As we have discussed extensively, claims grounded in allegations of trader-based manipulation are considerably different from claims rooted in allegations of persistent manipulation, see, e.g., *LIBOR VI, 2016 U.S. Dist. LEXIS 175929, at *14, 2016 WL 7378980, at *5 & n.8* ("Profit-motivated trader-based manipulation, which was sporadic and would result in both the inflation and deflation of LIBOR submissions, **[**256]** has nothing to do with the persistent suppression conspiracy that is at issue in the antitrust claims." (citations omitted)), and indeed, the parties' briefing reflects such a distinction.

A trader-based manipulation class, to the extent one is certified, would consist of (1) EDF traders holding certain EDF positions on the dates specified in subparts B.1 and B.2 of the class definition, and (2) traders "that were harmed" as a result of trader-based manipulation during the Class Period, as captured by the prefatory language in the class definition as well as subpart B.3. The prefatory language corresponds to the entire class period, January 1, 2005 to May 17, 2010, whereas subpart B.3 corresponds only to Period 0 (as Exchange plaintiffs have defined it), the period between January 1, 2005 to August 6, 2007.[93]

We first consider whether Exchange plaintiffs' proposed trader-based class relies on an impermissible "fail-safe" class definition as well as preliminary issues of standing, before turning to implied requirement ascertainability and the express requirements of *Rule 23(a)* and *Rule 23(b)(3)*.

3.1. "Fail-Safe" Class Definition

HN46[] Courts have taken varying approaches to the propriety of certifying a "fail-safe" class, **[**257]** or one that begs the liability question and is defined circularly in terms of legal injury. For instance, we have previously suggested that a fail-safe class raises predominance issues under *Rule 23(b)(3)*, reasoning that "[s]uch a class necessarily raises individual questions, as the factfinder must determine whether an individual has a claim in order to determine whether **[*529]** he or she belongs in the class." May 13, *2016 Order, 2016 U.S. Dist. LEXIS 63745, at *76-77, 2016 WL 2851333 at *2*. Courts have also concluded that fail-safe classes create manageability problems bearing on superiority under *Rule 23(b)(3)*, are fundamentally unfair, or render the proposed class unascertainable. See *Mazzei, 288 F.R.D. at 55*; *Ruiz v. Citibank, N.A., No. 10 Civ. 5950 (KPF), 2015 U.S. Dist. LEXIS 101777, 2015 WL 4629444, at *7 (S.D.N.Y. Aug. 4, 2015)*; see also 1 William B. Rubenstein, Newberg on Class Actions § 3:6 (5th ed.) (Westlaw 2017). Other courts have rejected these concerns, often reasoning that potentially fail-safe language such as "and were damaged thereby" is superfluous and does not substantively alter the class definition's scope. See, e.g., *Royal Park Invs. SA/NV v. Deutsche Bank Nat'l Tr. Co., No. 14 Civ. 4394 (AJN), 2017 U.S. Dist. LEXIS 55881, 2017 WL 1331288, at *11 (S.D.N.Y. Apr. 4, 2017)* (citing, inter alia, *Fort Worth, 301 F.R.D. at 143-44*); *see also* *In re Initial Pub. Offering Sec. Litig. ("In re IPO II"), 671 F. Supp. 2d 467, 491-92 (S.D.N.Y. 2009)*; 1 William B. Rubenstein, Newberg on Class Actions § 3:6 (5th ed.) (Westlaw 2017) (collecting cases).

Exchange plaintiffs left ambiguous in their briefing whether the use of "harmed" refers to the concept of injury **[**258]** as articulated in Denney, which would be established as long as a trader was required to pay more money or received less money from a single EDF trade, see *443 F.3d at 264-65*, or to the concept of "damages" (which requires a net harm once any harm from the alleged conduct are properly netted against any benefits resulting from that same conduct). The various decisions that certified a class that had been criticized for being impermissibly fail-safe -- In re Petrobras,[94] *Royal Park*, *Fort Worth*, and *In re IPO II* -- each used the term "damaged" rather than "harmed," thereby suggesting that Exchange plaintiffs meant the latter, but counsel at oral argument clarified that they meant the former. Hr'g Tr. 22:16-23:5.

Interpreted this way, the proposed class definition's use of "and were harmed" in this context is not mere surplusage, unlike the use of "and were damaged" deemed inoffensive in the cases upon which Exchange plaintiffs rely. In each instance, the fact of "damage" to any class member could be imputed from other parts of the class definition. For example, Royal Park considered the impairment of certain residential mortgage-backed securities (RMBS) resulting from the trustee's **[**259]** alleged failure to fulfill certain contractual obligations and considered a proposed class encompassing "[a]ll persons and entities who held Certificates in [certain RMBS trusts] and were damaged thereby." *2017 U.S. Dist. LEXIS 55881, 2017 WL 1331288, at *1-2*. The fact of damage could be implied from having held the RMBS certificates in question, since those certificates ultimately became impaired. Fort Worth considered an analogous factual circumstance (the issuance of RMBS certificates) and an analogous class definition ("persons or entities who, prior to March 23, 2009, purchased or otherwise acquired any Certificates [in specified offerings] and were damaged thereby"). *301 F.R.D. at 124-25*. Similarly, in a typical securities fraud class

---

[93] Subpart B.3 is, therefore, wholly redundant of the prefatory language.

[94] Contrary to Exchange plaintiffs' contention (Exch. Pls.' TBM Reply 7), the Second Circuit in In re Petrobras considered the certification of classes whose definitions included the criteria "and were damaged thereby," *862 F.3d at 259* (emphasis added), not "and were harmed thereby."

action brought under *Rule 10b-5* -- where the class period corresponds to the period during which the price of the security in question is inflated due to a defendant's material misrepresentations or omissions, and where the class definition refers to purchasers of securities during those periods -- language such as "and were damaged" also becomes superfluous. **[*530]** The fact of damage follows from the fact of price inflation and the limitation of the class to purchasers, who by definition will have overpaid for the security in question. **[**260]** Cf. *In re Petrobras, 862 F.3d at 259-60*.

Not so here. The mere fact that a person or entity traded in EDFs during the class period does not mean that the trader was damaged, unlike the holder of an impaired RMBS certificate or the buyer of a security who purchased at an inflated price. Indeed, by arguing that Rabobank's "fail-safe" argument seeks "to limit the Class prematurely to presently-known TBM dates," (Exch. Pls.' TBM Reply 8), Exchange plaintiffs implicitly concede that the inclusion of "and were harmed" in the proposed class definition serves to incorporate traders "harmed" by currently unidentified instances of trader-based manipulation -- instances that are, by definition, not otherwise captured in the class definition.

However, we need not determine finally the impact of the class definition's use of "and were harmed" on whether the class may be certified, as ***HN47***[] *Rule 23* does not explicitly preclude certification of fail-safe classes. Rather, the contention that a class is "fail-safe" often serves as shorthand for defects in the requirements explicitly set forth in *Rule 23*, including predominance in particular. Cf. *Mazzei, 288 F.R.D. at 55* ("The fail-safe appellation is simply a way of labeling the obvious problems that exist." (quoting *Kamar v. Radio Shack Corp., 375 F. App'x 734, 736 (9th Cir. 2010))*. Accordingly, **[**261]** we will undertake the "rigorous analysis" of each *Rule 23* requirement as directed by the Supreme Court, *Dukes, 564 U.S. at 351*, and in doing so take into account the considerations supporting the assertion that the proposed class is improperly "fail-safe." These considerations, of course, include our previously expressed concern that plaintiffs' use of "were harmed" raises predominance issues because individual inquiry will be necessary to determine who is even a class member. *May 13, 2016 Order, 2016 U.S. Dist. LEXIS 63745, at *76, 2016 WL 2851333 at *2*.

3.2. Standing

The parties next dispute issues of "standing" as they relate to the class representatives and the proposed class. Rabobank's arguments appear to pertain to class standing, whereas Exchange plaintiffs respond with arguments regarding Article III standing. We consider both.

3.2.1. Article III Standing

To reiterate, any class must "be defined in such a way that anyone within it would have [Article III] standing." *Denney, 443 F.3d at 264*. Though Denney's requirement that all class members have Article III standing is stringent, its definition of what constitutes "injury" is relaxed: "the fact that an injury may be outweighed by other benefits, while often sufficient to defeat a claim for damages, does not negate [Article III] standing." *Id. at 265*.[95]

---

[95] Exchange plaintiffs' reliance on the Seventh Circuit's decision in *Kohen v. Pacific Investment Management Co. ("Kohen II"), 571 F.3d 672 (7th Cir. 2009)*, **[**262]** is not persuasive. Though Kohen II held that "as long as one member of a certified class has a plausible claim to have suffered damages, the requirement of standing is satisfied" in the Seventh Circuit, *id. at 676*, and accepted the probability that "a class will often include persons who have not been injured by the defendant's conduct," *id. at 677*, the Second Circuit takes a different approach in requiring at least some analysis of absent class members' Article III standing, see *Denney, 443 F.3d at 264-65*. See generally *In re Deepwater Horizon, 739 F.3d 790, 800-02 (5th Cir. 2014)* (comparing the Seventh Circuit's approach to Article III standing in Kohen II and the Second Circuit's approach in Denney). Kohen II and Denney may ultimately yield the same result, cf. *id. at 802-04* (reaching the same result applying both tests), but we are nonetheless bound to apply *Denney*.

HN48[] **[*531]** "Since [the elements of Article III standing] are not mere pleading requirements but rather an indispensable part of the plaintiff's case, each element must be supported in the same way as any other matter on which the plaintiff bears the burden of proof." *Lujan, 504 U.S. at 561*. Accordingly, Article III standing is assessed based on the plaintiff's allegations at the pleading stage. Id.; see, e.g., *Spokeo, 136 S. Ct. at 1547*. "In response to a summary judgment motion, however, the plaintiff can no longer rest on such 'mere allegations,' but must 'set forth' by affidavit or other evidence 'specific facts'" that are taken as true. *Lujan, 504 U.S. at 561* (quoting *Fed. R. Civ. P. 56(e)*).

Class certification does not always fit neatly into this framework. For example, when the consideration of class certification occurs at the pleading stage and precedes motions to dismiss, see, e.g., 1 William B. Rubenstein, Newberg on Class Actions § 2:2 (5th ed.) (Westlaw 2017), allegations as to the named plaintiffs' standing would appear to suffice under Lujan and its progeny. Here, however, we have proceeded beyond the pleading stage, but have not yet reached summary judgment. The Lujan framework accordingly **[**263]** does not directly address whether standing should be assessed at this point based on allegations or evidence. Cf. *In re Deepwater Horizon, 739 F.3d at 800* ("[This framework] does not explain, in particular, how courts are to evaluate standing for the purposes of class certification . . . .") The Second Circuit in Denney held that "[w]e do not require that each member of a class submit evidence of personal standing," *443 F.3d at 263* (emphasis added), but also referenced standing in terms of allegations, see id. ("For purposes of determining standing, we 'must accept as true all material allegations of the complaint.'" (quoting *Warth v. Seldin, 422 U.S. 490, 501, 95 S. Ct. 2197, 45 L. Ed. 2d 343 (1975))*, and further held that "[p]assive members need not make any individual showing of standing," *id. at 264* (emphasis added) (quoting 1 Herbert B. Newberg & Alba Conte, Newberg on Class Actions § 2:7 (4th ed. 2002)).

HN49[] Though the law remains somewhat unsettled, we nonetheless distill the following principles to guide our analysis. First, the class must "be defined in such a way that anyone within it would have [Article III] standing." *Id. at 264*. Second, because absent class members need not "submit evidence of personal standing," *id. at 263*, we consider absent class members' Article III standing solely based on plaintiffs' allegations and the class definition. **[**264]** Third, we interpret the same holding in Denney to require, by negative implication, evidence of named plaintiffs' standing at this juncture. Though the record may not be as well-developed as at summary judgment, the class certification process in this case has nonetheless entailed extensive discovery (including the production of documents pertaining more to the merits than to class certification), and evidence establishing a named plaintiff's standing should be well within that plaintiff's control in any event.[96]

Applying *Denney*'s stringent requirement that every class member have Article III standing coupled with its relaxed standard for what constitutes Article III "injury," we conclude that the proposed trader-based class satisfies Article III's standing **[*532]** requirements. For the thirteen instances of trader-based manipulation specifically identified by date in subparts B.1 and B.2 of the class definition, the direction of manipulation alleged and the trading position specified in the class definition are sufficient to ensure that each class member captured by these subparts has experienced some injury-in-fact. As to the catch-all for undiscovered instances of trader-based manipulation, **[**265]** the class definition's use of "were harmed" necessarily limits the prefatory language and subpart B.3 to individuals and entities that were injured.

Additionally, Exchange plaintiffs have presented evidence of named plaintiff Atlantic Trading's standing to assert trader-based claims in response to our January 9, 2018 order directing the submission of data regarding the named plaintiffs' trading positions on the 13 days identified in subparts B.1 and B.2 of the class definition. (Decl. of Thomas Elrod, Jan. 16, 2018, ECF No. 2405.) While this submission also indicates certain named plaintiffs had no net trading position on the 13 identified days (or engaged in no trading at all), and Rabobank identifies significant issues as to named plaintiff 303030 Trading's ability to assert claims,[97] these issues do not defeat the class's Article III

---

[96] Further, even if we were to assess the named plaintiffs' Article III standing based only on allegations, any evidentiary deficiencies would likely present typicality and adequacy of representation issues at the *Rule 23* stage. See *In re IPO, 471 F.3d at 41-42*.

[97] We revisit these issues in our analysis of typicality.

standing. For purposes of the trader-based manipulation class, these named plaintiffs could be considered merely "absent" class members whose standing would be assessed on allegations and the class definition rather than on evidence, since we have already concluded that the proposed class definition satisfies Denney's requirements as to absent class members. **[**266]** [98]

3.2.2. Class Standing

Finally, turning to class standing, we reiterate that a named plaintiff must have a net trading position that would have been adversely affected by the manipulation on a given day in order to have class standing to represent absent class members with claims based on manipulation on that date. See *Apr. 15, 2016 Order, 2016 U.S. Dist. LEXIS 51190, at *108, 2016 WL 1558504, at *9*, ECF No. 1380. Comparing the Second Circuit's decisions in NECA and RBPA, both of which involved suits by RMBS certificate holders against the issuers and underwriters of those certificates, we noted that "[u]nlike the violations alleged in NECA, which involved 'the same misstatements across multiple offerings,' the claims in [RBPA] 'must be proved loan-by-loan and trust-by-trust.'" *2016 U.S. Dist. LEXIS 51190, at *110, [WL] at *8* quoting *RBPA, 775 F.3d at 162*). Reasoning that because "[t]rader-based claims are 'day-to-day' and 'episodic,' and plaintiffs must prove the substantive elements of each claim," we concluded that "named plaintiffs do not have class standing to bring claims on days on which they did not hold a relevant net position." *2016 U.S. Dist. LEXIS 51190, at *110, [WL] at *9*. Exchange plaintiffs' arguments, directed towards Article III standing, offer no reason to revisit **[**267]** this class standing analysis, see *LIBOR III, 27 F. Supp. 3d at 481* ("[T]he Second Circuit considers the **[*533]** questions of Article III, statutory, and class standing as distinct."), and we again conclude that a named plaintiff must have a net trading position on a given day in order to have class standing to assert trader-based claims on behalf of absent class members.

3.3. Ascertainability

Rabobank, in its brief in opposition to class certification, contended that the proposed class was not ascertainable. Citing a lack of available trading records and Exchange plaintiffs' apparent difficulty in obtaining such records, Rabobank argued that the class was not ascertainable because it was not administratively feasible. (Rabobank TBM Opp'n 7-14.) Following the Second Circuit's decision in In re Petrobras, Rabobank has generally recast its administrative feasibility arguments as predominance arguments, limiting its ascertainability argument to the critique that Exchange plaintiffs' use of "were harmed" in the class definition is insufficiently definite or objective. (Letter from David Gelfand to the Court, July 21, 2017, ECF No. 2098.)

Rabobank's administrative feasibility arguments now present predominance issues; they do not **[**268]** raise a serious ascertainability challenge. See *In re Petrobras, 862 F.3d at 269* ("Ascertainability does not directly concern itself with the plaintiffs' ability to offer proof of membership, an issue that is already accounted for in *Rule 23*." (emphasis omitted)). To the extent that Rabobank continues to contest ascertainability, we conclude that the criteria Exchange plaintiffs have used, which define class members based on the timing of their trades, are sufficiently objective and definite to satisfy the "modest" ascertainability requirement. ***HN50***[] Though the class definition's use of "and were harmed" in the class definition is perhaps not as definite as would be ideal, it remains clear "who is suing about what," which is all that ascertainability requires. Id.

---

[98] For this reason, *Denney* and *Kohen II* are likely to produce the same substantive result in most cases. Provided there is at least one named plaintiff providing sufficient evidence of its personal Article III standing, additional named plaintiffs failing to meet the (higher) evidentiary threshold would simply be considered absent class members subject to the (lower) pleading standard. As Waller v. Hewlett-Packard Co. observed in the context of the Ninth Circuit's intra-circuit Denney/Kohen II split: "Stearns [the Ninth Circuit's application of Kohen II] says absent class members don't need standing and Mazza [the Ninth Circuit's application of Denney] says they do, but Mazza . . . seems to set a rather low bar for standing anyway." *295 F.R.D. 472, 476 (S.D. Cal. 2013)* (citing *Mazza v. Am. Honda Motor Co., 666 F.3d 581 (9th Cir. 2012)*; *Stearns v. Ticketmaster Corp., 655 F.3d 1013 (9th Cir. 2011))*.

3.4. *Rule 23(a)*

3.4.1. Numerosity

We find it more likely than not that the proposed class definition encompasses more than 40 individuals and entities. We base this conclusion on the sheer number of "large traders" transacting in the EDF market, who themselves form only a portion of the total population of EDF traders in the market. See *LIBOR VI, 2016 U.S. Dist. LEXIS 175929, at *48, 2016 WL 7378980, at *17 & n.27* (noting evidence establishing a "total population of over 2,900 large traders" in the EDF market between October 2008 through December **[**269]** 2010). Though this statistic does not correspond to Period 0 (as Rabobank correctly identifies), we nonetheless find that the number of large traders in Period 0 is unlikely to be so much smaller than the number of large traders identified by the CME from 2008 through 2010 such that numerosity would be called into question. Given this high starting point, the class definition more likely than not encompasses 40 members even if limited to class members with net positions on days with trader-based manipulation, thereby satisfying *Rule 23(a)(1)*'s numerosity requirement. See *Pa. Pub. Sch. Emps., 772 F.3d at 120*.

3.4.2. Commonality

HN51[] "*Rule 23(a)(2)* simply requires that there be issues whose resolution will affect all or a significant number of the putative class members." *Nextel, 780 F.3d at 137*. Under this standard, we find that the question of the days on which manipulation of Rabobank's 3-month LIBOR submission could have impacted published LIBOR is one common to the class. The inputs to this determination -- Rabobank's LIBOR submissions, the submissions **[*534]** made by the other panel banks, and the interquartile trimming methodology applied by the BBA -- are sufficient to yield an answer for all class members.

Rabobank asserts that the answer to the question of whether its 3-month **[**270]** LIBOR submissions could have impacted published LIBOR will vary day-to-day and, by extension, from class member to class member. The point is well-taken, but Rabobank poses the wrong question: the same evidence -- data series of each panel bank's LIBOR submissions -- suffices to determine whether Rabobank's submission could have affected LIBOR on each day in the class period. There is no reason to conduct this analysis at the daily level (as Rabobank implicitly suggests) when historical LIBOR submissions data are available as a single data series for the entire Class Period -- data on which Dr. Hubbard, Rabobank's own expert, relied. We accordingly conclude that this question is a common one, as "the same evidence will suffice for each member to make a prima facie showing." *Tyson Foods, 136 S. Ct. at 1045* (quoting 2 William B. Rubenstein, Newberg on Class Actions § 4:50 (5th ed. 2012)).

3.4.3. Typicality

As an initial matter, a named plaintiff must have a trading position that would have been negatively impacted by alleged LIBOR manipulation in order to have a claim that is typical.[99] Rabobank accordingly contends that the named plaintiffs' claims are not typical because none of the three named plaintiffs asserting TBM claims **[**271]** -- 303030 Trading, Atlantic Trading, and Metzler Investment -- have provided evidence of their net trading positions.[100] (Rabobank TBM Opp'n 19-21.) This issue is mitigated, but not resolved entirely, by Exchange

---

[99] We are unpersuaded by Exchange plaintiffs' reliance on *In re Amaranth Natural Gas Litigation, 269 F.R.D. 366, 371 n.9 (S.D.N.Y. 2010)*, for the proposition that class certification (including a finding of typicality) is proper even when named plaintiffs "may have received a net benefit as a result of the alleged manipulation." (Exch. Pls.' TBM Reply 9.) Amaranth cited Kohen v. Pacific Investment Management Co. ("Kohen I"), for this proposition, but Kohen I referenced net benefit to absent class members swept into an allegedly overbroad class definition, not to named plaintiffs. See *Kohen I, 244 F.R.D. 469, 475 (N.D. Ill. 2007)*.

plaintiffs' submission regarding their trading positions (Decl. of Thomas Elrod, Jan. 16, 2018, ECF No. 2405), made pursuant to our January 9, 2018 order, see Jan. 9, 2018 Order, ECF No. 2400.[101] We consider each named plaintiff in turn.

First, we find that Atlantic Trading's claims are typical of the class's claims as to the 13 days specified in subparts B.1 and B.2 of the class definition. Exchange plaintiffs' **[*535]** submission shows that Atlantic Trading, for each of those 13 days, held a net trading position that would have been harmed by the direction of manipulation alleged: it took a long net position on EDFs on the four days identified in subpart B.1 and a short net position on EDFs on the nine days identified in subpart B.2.

Second, we conclude that 303030 Trading's claims are not typical because 303030 Trading is subject to the unique defense that its claims were invalidly assigned to it from its principal, **[**272]** Bradley Belden. A report from the Illinois Secretary of State establishes that 303030 Trading was not formed until November 29, 2007, (Decl. of Robert Lindholm ex. 61, June 30, 2017, ECF No. 2027), and therefore could not have engaged in trading during Period 0, which ended in August 2007. After Rabobank identified in its opposition brief that Belden had not assigned any of his claims to 303030 Trading, (Rabobank TBM Opp'n 19 n.15), Belden executed an assignment of claims to 303030 Trading on August 4, 2017 -- the date on which Exchange plaintiffs' reply briefs in support of class certification were due. (Decl. of Thomas Elrod ex. 33, Aug. 4, 2017, ECF No. 2176.) We previously reserved judgment on the validity of this assignment. Sept. 7, 2017 Order, ECF No. 2255, slip op. at *1 n.1.

We now conclude that Belden's assignment is invalid. ***HN52***[] As a general matter, the assignee of a claim "possess[es] the same interest" as the assignor "and thus may continue to assert a claim for the same injury shared by all members of the class." *Cordes & Co., 502 F.3d at 101*. As the Second Circuit has recognized, "[i]t is indeed commonplace for an assignee to institute or continue an action of his or her assignor on an assigned claim even though he or **[**273]** she, apart from the assignment, is without standing." *Id. at 102*. However, the analysis in this case is complicated by the fact that 303030 Trading was voluntarily dissolved on October 25, 2011, as evidenced by the same report from the Illinois Secretary of State. (Decl. of Robert Lindholm ex. 61, June 30, 2017, ECF No. 2027.) Under Illinois law, "a limited liability company continues after dissolution only for the purpose of winding up its business," subject to limited exceptions. *805 Ill. Comp. Stat § 180/35-3(a)*. As relevant here, "[a] person winding up a limited liability company's business (1) may . . . prosecute and defend actions and proceedings, whether civil, criminal, or administrative." Id. *§ 180/35-4(c)*. But Belden's eleventh-hour assignment to 303030 Trading of claims -- based at least in part on trades occurring prior to 303030 Trading's formation -- can hardly be characterized as "for the purpose of winding up [303030 Trading's] business." Id. *§ 180/35-3(a)*. Rather, the assignment appears wholly unrelated to the business in which 303030 Trading may have engaged during its entirely post-Period 0 existence. 303030 Trading's claims were therefore not validly assigned and are, by extension, atypical.

But of course, we need not have concluded **[**274]** that Belden's assignment to 303030 Trading was in fact invalid under Illinois law to hold that 303030 Trading's claims are not typical. Rather, the mere fact that 303030 Trading's claims are subject to a unique defense involving this question of Illinois law, which does not appear to have been extensively addressed by Illinois courts, is sufficient to render them atypical. See, e.g., *In re Digital Music, 321*

---

[100] Rabobank frames these arguments as challenges to the named plaintiffs' standing, but we conclude they are equally applicable to typicality.

[101] At oral argument, Rabobank questioned whether the data presented in Exchange plaintiffs' January 16, 2018 submission are accurate, asserting that several of the critical assumptions underlying those calculations were not disclosed. (Hr'g Tr. 72:22-74:24.) Though we have previously emphasized the importance of making clear the bases for any calculation of trading positions and question why Exchange plaintiffs did not proffer evidence establishing the named plaintiffs' standing after we struck Dr. Seyhun's August 2017 declaration, see Jan. 9, 2018 Order, ECF No. 2400; Sept. 7, 2017 Order, ECF No. 2255, we nonetheless afford Exchange plaintiffs the benefit of the doubt and accept the data presented in the January 16, 2018 Elrod declaration. Absent the information contained in that declaration, Exchange plaintiffs would have scant evidence supporting the typicality of their claims or the adequacy of their representation. Exchange plaintiffs' representations that they engaged in extensive trading throughout the class period (e.g., Exch. Pls.' TBM Reply 10-11), absent some supporting evidence, are simply insufficient.

F.R.D. at 97-98 ("[T]he defendant need not show at the certification stage that [a] unique defense will prevail." (second alteration in original) (quoting Lapin, 254 F.R.D. at 179)).

Third, we also have serious doubts as to the typicality of Metzler's claims. Some ambiguity arises as to whether Metzler's **[*536]** constituent funds are legally distinct entities with the capacity to sue and be sued. Counsel suggested at oral argument that they were legally distinct and that only certain of Metzler's funds had assigned their claims to Metzler Investment, the named plaintiff. (Hr'g Tr. 75:22-25.) However, Metzler's 30(b)(6) representative had previously testified that the funds were not separate legal entities (Neuman Dep. 92:19-93:4, Decl. of Robert Lindholm ex. 63, June 30, 2017, ECF No. 2027), and Exchange plaintiffs had previously represented that "[n]one **[**275]** of Metzler's funds have authority to bring legal claims themselves, and therefore all claims must instead be brought by Metzler as the funds' investment management company." (Letter from Christopher Lovell & David Kovel to the Court, July 5, 2017, ECF No. 2044.)[102]

To the extent Metzler's funds are not separate legal entities, netting of EDF trading positions would need to occur across all of Metzler's funds. ***HN53***[] "[A] plaintiff both injured and enriched by illegal activity cannot choose to recover for his injuries yet retain his windfall" where "both result from a single wrong." *Minpeco, S.A. v. Conticommodity Servs., Inc., 676 F. Supp. 486, 488 (S.D.N.Y. 1987)* (emphasis omitted) (citing *Abrahamson v. Fleschner, 568 F.2d 862, 878 (2d Cir. 1977))*. That is, Metzler "cannot claim damages where the same fraud alleged to be the cause of a loss" to certain funds "also permitted a countervailing gain" to other funds. *Gordon v. Sonar Capital Mgmt. LLC, 92 F. Supp. 3d 193, 201-02 (S.D.N.Y. 2015)* (quoting *In re Refco Inc. Sec. Litig., No. 07 MD 1902 (JSR), 2013 U.S. Dist. LEXIS 116700, 2013 WL 4078410, at *2 (S.D.N.Y. July 31, 2013))*. At minimum, the fact that any ambiguity persists at this point as to Metzler's status weighs against a finding of typicality.

But even accepting counsel's representation that Exchange plaintiffs' supplemental submission corresponds to each of Metzler's funds "that was relevant" to Period 0 or subpart C.2 of the class definition (Hr'g Tr. 75:10), we nonetheless conclude **[**276]** that Metzler's claims are not typical as to any of the 13 days identified in subparts B.1 and B.2 of the class definition. Rather, the only day on which any of the identified funds held a net trading position was July 30, 2007, when one of the funds held +89 EDF contracts. This trading position does not fit subpart B.2, which refers to traders having "sold Eurodollar futures contracts or purchased put options on Eurodollar futures" on July 30, 2007. Accordingly, Metzler's claims are not typical.

Fourth, a similar problem befalls the typicality of FTC Futures Fund PCC's claims. The only days in which it held net trading positions are September 1, 2006, and August 6, 2007, when it held +152 EDF contracts and +338 EDF contracts, respectively. As with Metzler on July 30, 2007, both of these trading positions are inconsistent with subpart B.2's description of class members having sold EDF contracts (or purchased put options on EDF contracts) on those two days. This problem extends, too, to FTC Futures Fund SICAV and September 1, 2006, when it held +405 EDF contracts. FTC Futures Fund SICAV did hold a net trading position of -479 EDF contracts on September 29, 2005, which is the only instance **[**277]** of either FTC entity holding a net trading position consistent with subparts B.1 and B.2 of the class definition.

Accordingly, once the named plaintiffs' trading positions are taken into account and the possibility of any unique defenses considered, we conclude that, as to the 13 **[*537]** days identified specifically in subparts B.1 and B.2 of the class definition, Atlantic Trading holds claims typical of the class's as to each of the 13 days and FTC Futures Fund SICAV holds claims typical of the class's claims only as to September 29, 2005.

But even if Atlantic Trading's and FTC Futures Fund SICAV's claims are typical of claims arising out of the 13 dates identified in subparts B.1 and B.2 of the class definition, their claims still would not be typical of those of the class when the class is defined to include any EDF trader that was "harmed" over Period 0. Just as we concluded that "the named plaintiffs do not have class standing to bring claims on days on which they did not hold a relevant net position" because such claims "do not involve 'the same set of concerns' as the claims brought on behalf of named

[102] In light of this prior representation regarding the legal capacity of Metzler's constituent funds, counsel's reference to the assignment of certain claims to Metzler as fund manager is somewhat puzzling.

plaintiffs," *April 15, 2016 Order, 2016 U.S. Dist. LEXIS 51190, at *110, 2016 WL 1558504, at *9* (quoting *NECA, 693 F.3d at 162*), such claims would not "arise[] from the same course **[**278]** of events," *In re Flag Telecom, 574 F.3d at 35* (quoting *Robidoux, 987 F.2d at 936*), such that the pertinent issues of fact underlying the named plaintiffs' claims would not "occupy essentially the same degree of centrality" as these additional claims, *Mazzei, 829 F.3d at 272* (quoting *Caridad, 191 F.3d at 293*).[103]

Accordingly, our analysis of typicality more broadly follows from our class standing analysis. Exchange plaintiffs' attempt to cast trader-based manipulation at a high level of generality as a "unitary course of conduct" is unavailing (Exch. Pls.' TBM Reply 11), in light of our holdings that trader-based claims are by nature "day-to-day" and "episodic," *Apr. 15, 2016 Order, 2016 U.S. Dist. LEXIS 51190, at *110, 2016 WL 1558504, at *9*.[104] Rather than arising from the "same events and conduct," we find that the claims here arise from distinct and discrete instances of alleged manipulation by individual traders. Indeed, the bulk of the evidence that Exchange plaintiffs present as to manipulation -- including trader communications suggesting manipulation -- pertain to only a single panel bank on one or two days, which not only confirms our earlier conclusion as to class standing but also bolsters our conclusion now about typicality.

3.4.4. Adequacy of Representation

Exchange plaintiffs assert, conclusorily, **[**279]** that Rabobank has not identified any antagonistic interests between members of the class and suggest that several cases, including *In re Amaranth, 587 F. Supp. 2d 513*; *Kohen I, 244 F.R.D. 469*; and *In re* ***[*538]*** *Sumitomo Copper Litigation, 182 F.R.D. 85 (S.D.N.Y. 1998)*, support a finding of adequacy of representation here. (Exch. Pls.' Class Mem. 11-14; Exch. Pls.' TBM Reply 11-12.) However, the record strongly supports a finding of conflicts between class members in the context of this action, as a named plaintiff has incentive to establish trader-based manipulation only on days when it held trading positions that would have been harmed by that manipulation.

The classes in the three cases cited by Exchange plaintiffs, unlike the proposed class in this case, were defined to include only traders who transacted in a single direction and alleged manipulation in defined directions over the class period. For instance, the plaintiffs in In re Amaranth alleged that defendants "artificially inflat[ed] the spread between [certain] contracts" and "artificially depress[ed] settlement prices" and limited their proposed class to purchasers of natural gas futures contracts who did so for certain trading purposes. See *In re Amaranth, 269 F.R.D at 373-74*. Similarly, the plaintiffs in Kohen I alleged that defendants sought to "profit from artificially high prices" **[**280]** of a certain futures contract and defined the proposed class to include only traders who purchased "a [specific] Treasury note futures contract in order to liquidate a short position." *Kohen I, 244 F.R.D. at 473, 475*. And in In re Sumitomo Copper, the plaintiffs alleged that "copper futures contract prices rose to artificially high levels by reason of conspiratorial misconduct of defendants" and created sub-classes for plaintiffs with long positions and plaintiffs with short positions. *182 F.R.D. at 87*; see *id. at 88* (defining subclasses).

---

[103] The class standing analysis is distinct from the analysis of typicality under *Rule 23(a)(3)*, see *NECA, 693 F.3d at 158 n.9*, but the second prong of NECA's class standing test -- whether the challenged conduct "implicates the same set of concerns as the conduct alleged to have caused injury to other members of the putative class," *RBPA, 775 F.3d at 161*, parallels typicality's requirements that "each class member's claim arises from the same course of events," *In re Flag Telecom, 574 F.3d at 35* (quoting *Robidoux, 987 F.2d at 936*), and that disputed issues "occupy essentially the same degree of centrality to the named plaintiff's claim as to that of other members of the proposed class," *Mazzei, 829 F.3d at 272* (quoting *Caridad, 191 F.3d at 293*). See generally 1 William B. Rubenstein, Newberg on Class Actions § 2:6 (5th ed.) (Westlaw 2017) (considering the overlap between class standing requirements and *Rule 23(a)*). Of course, class standing may be established based on allegations alone, see *RBPA, 775 F.3d at 161*, but typicality must be established based on evidence presented at class certification and a preponderance of that evidence, see *Bombardier, 546 F.3d at 202*.

[104] And though we exclude this portion of Mr. Beevers's opinions, we observe that the argument that Rabobank pursued a "unitary course of conduct" is difficult to reconcile with Mr. Beevers's opinion that competing trading desks within a single financial institution are akin to "warring factions." (Beevers Initial Report ¶ 68.)

The proposed class here remains far more open-ended. The class definition is indeterminate not only as to the days on which trader-based manipulation occurred, but also the direction of manipulation on those days. This indeterminancy presents far more opportunity for conflicting incentives between class members than existed in In re Amaranth, Kohen I, and In re Sumitomo Copper.[105]

An examination of the trading records produced by named plaintiff Atlantic Trading, the named plaintiff FTC Futures Fund entities, and Bradley Belden (who assigned his claims to named plaintiff 303030 Trading), confirms that these conflicts are concrete and hardly hypothetical.[106] Consider, for example, the trading **[**281]** position data presented in Exchange plaintiffs' January 16, 2018 submission. (Decl. of Thomas Elrod, Jan. 16, 2018, ECF No. 2405.) Again accepting as valid the underlying calculations, these data show conflicts between named plaintiffs on several of the 13 days specifically identified in the class definition. For instance, on September 1, 2006, while Atlantic Trading had a net trading position of -205.92 EDF contracts, FTC Futures Fund PCC had a net trading position of +152 EDF contracts and FTC Futures Fund SICAV had a net trading position of +405 EDF contracts. Similarly, on July 30, 2007, while Atlantic Trading had a net trading position of -2,162.68 EDF contracts, Metzler had a net trading position of +89 contracts. And finally, on August 6, 2007, while Atlantic Trading had a net trading position of -387.52 **[*539]** EDF contracts, FTC Futures Fund PCC had a net trading position of +338 EDF contracts. On those days, the named plaintiffs with opposite net trading positions will have directly conflicting incentives to establish not only the existence but also the magnitude of any manipulation that occurred on those dates.

Further, if Dr. Seyhun's various models of suppression were admissible, **[**282]** the estimates of suppression that they produce -- differing in both direction and magnitude -- would further undermine the adequacy of named plaintiffs' representation by heightening conflicts between class members' interests. Directional differences are particularly corrosive of adequacy in that they create directly conflicting incentives, but differences in the magnitude of suppression will similarly cause different class members to advocate for different models.

We therefore conclude that the proposed class fails to meet *Rule 23(a)(4)*'s adequacy of representation requirement. We find that class members' differing exposures to EDFs on different trading days creates differences between class members (both named plaintiffs and absent members) that undermine the class representatives' incentive to fully pursue the class's claims. See, e.g., *In re Payment Card Interchange Fee, 827 F.3d at 231*. To reiterate, a named plaintiff has an incentive to establish trader-based manipulation only on days when it held trading positions that would have been harmed by that manipulation. That is, phrased in the negative, a named plaintiff has no incentive to establish trader-based manipulation on a day on which it had no exposure to EDFs and has active disincentive **[**283]** to establish trader-based manipulation when the direction of that manipulation benefited its trading positions -- even if that manipulation harmed more class members or harmed class members in the aggregate. Exchange plaintiffs' own analysis of trading positions belies the contention that "all class members . . . have the same interest in proving price artificiality" (Exch. Pls.' TBM Reply 16), and they ultimately offer no reason to believe that conflicts of this type do not exist within named plaintiffs and between named plaintiffs and absent class members throughout the class period, especially in light of the active, two-sided nature of the EDF trading market.

3.5. Predominance

Exchange plaintiffs' trader-based claims are based solely on the CEA, and we begin our analysis "with the elements of the underlying cause of action." *Halliburton I, 563 U.S. at 809*. To reiterate, ***HN54***[] a plaintiff asserting a direct

---

[105] We accordingly find Exchange plaintiffs' reliance on *In re Natural Gas Commodities Litigation, 231 F.R.D. 171 (S.D.N.Y. 2005)*, which relied on Sumitomo Copper to certify a class of both "purchasers and sellers" alleging manipulation in both directions, unpersuasive. See *In re Nat. Gas, 231 F.R.D. at 182-83* (citing *In re Sumitomo Copper, 182 F.R.D. at 92*).

[106] These conflicts are between named plaintiffs, but we fully expect that similar conflicts would arise between named plaintiffs and absent class members.

CEA claim must establish "(1) that the [defendant] had the ability to influence market prices; (2) that [he] specifically intended to do so; (3) that artificial prices existed; and (4) that the [defendant] caused the artificial prices." *LIBOR I, 935 F. Supp. 2d at 713* (alterations in original) (quoting *DiPlacido v. CFTC, 364 F. App'x 657, 661 (2d Cir. 2009)* (applying the four-part test applied by **[**284]** the CFTC)); see also, e.g., *In re Platinum & Palladium, 828 F. Supp. 2d at 598*. In analyzing these elements, we adhere to our earlier conclusion that EDFs, not published LIBOR, are the commodity in question. See *LIBOR II, 962 F. Supp. 2d at 612*; *LIBOR I, 935 F. Supp. 2d at 721*.

The parties do not distinguish between Exchange plaintiffs' direct CEA claims on the one hand and their vicarious liability and aiding-and-abetting claims on the other. Neither do we. ***HN55***[] Vicarious liability "may be imposed where (1) the agent participated in the alleged unlawful activity and (2) his actions were within the scope of his employment or office" and requires a primary violation of the CEA in the first **[*540]** instance. *In re Platinum & Palladium, 828 F. Supp. 2d at 599*; see also *Guttman v. CFTC, 197 F.3d 33, 39 (2d Cir. 1999)*. Therefore, to the extent common questions do not predominate the analysis of direct CEA claims, they also do not predominate the analysis of CEA vicarious liability claims.[107]

Additionally, regardless of whether plaintiffs may assert aiding-and-abetting claims against Rabobank, see *LIBOR IV, 2015 U.S. Dist. LEXIS 147561, at *120, 2015 WL 6243526, at *49*, our predominance analysis does not meaningfully differ between direct liability and aiding-and-abetting. Aiding-and-abetting claims, to the extent properly asserted, are also contingent on a primary CEA violation. See *In re Platinum & Palladium, 828 F. Supp. 2d at 599* ("In order to recover damages from a secondary party in an action for 'aiding and abetting' liability **[**285]** under the *Commodities Exchange Act*, a plaintiff must first prove that a primary party committed a commodities violation." (quoting *Tatum v. Legg Mason Wood Walker, Inc., 83 F.3d 121, 123 (5th Cir. 1996)* (per curiam)); see also *In re Commodity Exch., Inc. Silver Futures & Options Trading Litig., 560 F. App'x 84, 87 (2d Cir. 2014)* ("As plaintiffs failed to allege a CEA violation, their aiding and abetting claim was properly dismissed as well.").

3.5.1. Ability to Influence EDF Prices

The first element in this case, "the ability to influence market prices" presents a two-part question: whether a panel bank has the ability to impact published LIBOR and whether a panel bank has the ability to impact EDF prices. As we concluded in our analysis of commonality under *Rule 23(a)(2)*, the former is a common question. It is of limited significance, however, as the calculation is rather straightforward and not particularly intensive.[108] The ability to impact EDF prices, however, is an individual question. We view this issue as closely related to the third and fourth elements of a CEA claim (existence and causation of an artificial price, respectively), and we analyze them below.

3.5.2. Intent to Influence EDF Prices

We find intent to be an individual question. Because trader-based manipulation occurs on a day-by-day basis and is inherently episodic, evidence of a trader's intent on **[**286]** one day will not be "central to the validity of each one of the claims" asserted by the class when those claims arise from manipulation on different dates. *Dukes, 564 U.S. at 350*. That is, evidence of a trader's intent on one day, standing alone, would not "suffice for each [class] member to make a prima facie showing" of intent on other dates; more will be required. *Tyson Foods, 136 S. Ct. at 1045* (quoting 2 William B. Rubenstein, Newberg on Class Actions § 4:50 (5th ed. 2012)). Therefore, even assuming that intent is properly determined based on "a person's actions and the totality of the circumstances" as Exchange

---

[107] Rather, analyzing vicarious liability will likely introduce further individual questions, such as the agent's scope of employment, which are likely to differ from trader to trader and from bank to bank.

[108] We note that the parties agree as to the days on which Rabobank's LIBOR submission could have affected published LIBOR, though the fact of agreement does not figure into the predominance analysis. Cf. *In re Nassau Cty, 461 F.3d at 227* ("[A] concession does not eliminate a common issue from the predominance calculus.").

plaintiffs suggest, *In re DiPlacido, CFTC No. 01-23, 2008 CFTC LEXIS 101, 2008 WL 4831204, at *27 (Nov. 5, 2008)*, evidence of intent on one day will be only minimally probative of intent on other days.

In arguing that intent is a common question, Exchange plaintiffs cite our prior **[*541]** holding that "[b]ecause plaintiffs may be able to make such a showing through common proof, intent does not present an inherently individual issue, much less one that necessarily predominates over common issues." (Exch. Pls.' TBM Reply 14-15 (citing *May 13, 2016 Order, 2016 U.S. Dist. LEXIS 63745, at *81, 2016 WL 2851333, at *3*).) This argument distorts our prior holding, and Exchange plaintiffs' reliance is misplaced. We reasoned -- in the context of OTC plaintiffs' suppression claims -- that intent was not "an **[**287]** inherently individual issue" because OTC plaintiffs "may prove intent by focusing on the alleged manipulation of LIBOR." *May 13, 2016 Order, 2016 U.S. Dist. LEXIS 63745, at *81, 2016 WL 2851333, at *3* (emphasis added). In so holding, we relied on LIBOR III's articulation of pleading standards for the OTC plaintiffs' contract claims. See *LIBOR III, 27 F. Supp. 3d at 482-83* (discussing OTC plaintiffs' claims based on the implied covenant of good faith and unjust enrichment). These differences are meaningful, as Exchange plaintiffs not only must establish intent to manipulate market prices of EDFs and not LIBOR, but also assert trader-based claims considerably different in nature from OTC plaintiffs' claims (and their own claims) of persistent suppression.[109]

3.5.3. Existence and Causation of Artificial EDF Prices

In order for the existence of artificial EDF prices and Rabobank's causation of those artificial prices to be common questions, Exchange plaintiffs must establish that classwide methodologies are available to determine (1) what LIBOR submissions panel banks would have made (and by extension, what LIBOR would have been) absent trader-based manipulation and (2) what impact a change from actual published LIBOR to but-for published LIBOR would have had on EDF prices. They have done neither. **[**288]**

To satisfy the first requirement, Exchange plaintiffs rely on Dr. Seyhun's Rebuttal Period 0 model, which they assert produces "estimate[s] of what LIBOR submissions would have been absent TBM -- for each panel bank on the dates during Period 0 for which there exists documented evidence of TBM." (Exch. Pls.' TBM Reply 15.)

For the reasons articulated in our exclusion of Dr. Seyhun's opinions under *Daubert*, this model is insufficient to meet Exchange plaintiffs' burden. See supra section III.1.1.1. Dr. Seyhun's Rebuttal Period 0 Model does not reliably identify the magnitude of trader-based manipulation and frequently contradicts Exchange plaintiffs' allegations regarding the direction of manipulation.[110] But even if we had not deemed the Rebuttal Period 0 model inadmissible, we would conclude that its heavy reliance on documentary corroboration defeats any suggestion that it is a classwide **[*542]** methodology. A detailed examination of trader communications, which necessarily pertain to a single date or a limited number of days, will in turn relate only to class members with net trading positions on those days and not all class members. Indeed, we note that in a summary table identifying documentary **[**289]** evidence of trader-based manipulation that Exchange plaintiffs submitted in support of class certification, no document appears to pertain to manipulation by more than one bank or by the same bank on more than five days. (Decl. of Thomas Elrod ¶ 203, May 2, 2017, ECF No. 1890.)

---

[109] Our conclusion that intent is an individual question implies that Rabobank's asserted personal jurisdiction defense similarly poses an individualized question. See *LIBOR V, 2015 U.S. Dist. LEXIS 149629, 2015 WL 6696407, at *19-20* (discussing the significance of intent in assessing personal jurisdiction).

[110] We also reject Exchange plaintiffs' assertion that "[t]o the extent Rabobank challenges the models as insufficient, its defense applies to the Class as a whole." (Exch. Pls.' TBM Reply 16). Dr. Seyhun's models form part of Exchange plaintiffs' affirmative case, and they must carry the burden of establishing a classwide methodologies to calculate but-for LIBOR submissions and but-for published LIBOR. Rabobank's assertion that Dr. Seyhun's models are flawed is therefore not an affirmative defense, but a failure in Exchange plaintiffs' prima facie case. Indeed, taken to its natural conclusion, Exchange plaintiffs' argument would return us to the days when "an expert's report will sustain a plaintiff's burden so long as it is not 'fatally flawed,'" a notion the Second Circuit disavowed in In re IPO. See *471 F.3d at 40*.

To satisfy the second requirement, Exchange plaintiffs rely on Dr. Seyhun's "impact factor" models, which purport to estimate "the impact of TBM on EDF prices." (Exch. Pls.' TBM Reply 17.) Again, our exclusion of those models under *Daubert* dictates the conclusion that Exchange plaintiffs have not established that impact of changes in LIBOR on EDF prices is a common question. Macroeconomic events impact both LIBOR and EDF prices (as Exchange plaintiffs have conceded), and Dr. Seyhun's model is incapable of parsing the effects of those events from the effect of changes in LIBOR itself. But even if this flaw were insufficient to render Dr. Seyhun's impact factor models inadmissible under Daubert, a mismatch would remain between Exchange plaintiffs' theory of harm and impact on EDF prices (and by extension, damages), as measured by Dr. Seyhun's models.[111] Exchange plaintiffs have never alleged an entitlement **[**290]** to recover for damages incurred as a result of macroeconomic events (nor could they plausibly do so), and Dr. Seyhun's impact factor models therefore "fail[] to measure damages resulting from the particular . . . injury on which [plaintiffs'] liability in this action is premised." *Comcast, 569 U.S. at 36*.

Further, even assuming that any change in EDF prices caused by a change in LIBOR may be isolated and measured, the issue of the minimum price increments in which EDFs trade (or "tick sizes") precludes the conclusion that the existence and causation of artificial prices are common questions. Exchange plaintiffs have offered no methodology to determine when a particular trade would have been impacted by changes in LIBOR: rather, Dr. Seyhun and Dr. Netz each offer probabilistic opinions that are incapable of making such a determination. (Seyhun Rebuttal Report ¶ 216; Netz Initial Report 38.) Contrary to the suggestion that Dr. Seyhun's probabilistic formula (which divides artificiality on a given day by the minimum price increment)[112] is "a methodology to determine when [a change in LIBOR] in fact affected EDF prices" (Exch. Pls.' TBM Reply 19 n.33), the output of this formula is a probability, not a concrete **[**291]** yes-or-no answer (Seyhun Rebuttal Report ¶ 216).

Indeed, Exchange plaintiffs' subsequent argument, that this formula establishes that tick size "will either nullify the effect of LIBOR artificiality on the day in question, or amplify it," demonstrates the formula's very weakness. (Exch. Pls.' TBM Reply 19 n.33.) Of course, if the tick size "nullif[ies] the effect of LIBOR artificiality" on a given day (which will occur with a certain probability per Dr. Seyhun and Dr. Netz), Exchange plaintiffs will have failed to establish both the existence of artificial prices and Rabobank's causation of those prices on that day. Exchange plaintiffs' argument, therefore, is tantamount to a **[*543]** concession that Dr. Seyhun's models cannot (even setting aside the causation question) methodically separate instances when artificial EDF prices existed as a result of LIBOR manipulation and when they did not.

3.5.4. Damages

Finally, we consider the issue of damages. ***HN56***[] The question of damages, to some extent, is necessarily individual in every securities case, because damages will almost always be a function of the specific transactions undertaken by each class member and the prices and quantities involved in those **[**292]** transactions. Accordingly, "individualized damages determinations alone cannot preclude certification under *Rule 23(b)(3)*," *Roach, 778 F.3d at 409*, though "the fact that damages may have to be ascertained on an individual basis is . . . a factor that we must consider" in the predominance analysis, *id. at 408* (omission in original) (quoting *McLaughlin, 522 F.3d at 231*).

In analyzing damages, we first consider the netting principles to be applied and whether they introduce individual issues. Though we may set forth at class certification the netting principles to be applied, see, e.g., *In re Vivendi Universal, S.A. Sec. Litig., 284 F.R.D. 144, 159 (S.D.N.Y. 2012)* (prescribing, at class certification, "the netting methodology to be employed"),[113] we need not finalize any netting principles in order to find that they do. Exchange

[111] We would also find more compelling Dr. Culp's extensive findings that changes in LIBOR do not cause determinable changes in EDF prices.

[112] Dr. Netz offers the same formula. (Netz Initial Report 38.)

plaintiffs appear to reject any netting requirement, but we conclude that some degree of netting will be appropriate here. As we have discussed, "a plaintiff both injured and enriched by illegal activity cannot choose to recover for his injuries yet retain his windfall." *Minpeco, 676 F. Supp. at 488*. We acknowledge that "netting of gains and losses is not a hard-and-fast rule," as "[c]ourts decline to net where doing so would 'unjustly enrich' the defendant, 'shelter it from any appreciable liability,' or 'undermine the goal of deterrence.'" **[**293]** *Gordon, 92 F. Supp. 3d at 202* (citing *Apex Oil, 744 F. Supp. at 55*); cf. *Randall v. Loftsgaarden, 478 U.S. 647, 663-64, 106 S. Ct. 3143, 92 L. Ed. 2d 525 (1986)* (rejecting, in a securities fraud case, the netting of tax benefits received by investors against their losses). Nonetheless, "[t]here is no unjust enrichment where a claimant has actually benefited from the alleged wrongdoing of another," *Apex Oil, 744 F. Supp. at 55*, and undeserved windfalls to plaintiffs may also be inappropriate, cf. *Randall, 478 U.S. at 663*.

In this case, netting across EDF trades will be required, at minimum.[114] Assuming that LIBOR manipulation had measurable price impact on EDFs, any EDF trading losses experienced by a class member resulting from that manipulation over the class period must be netted against any gains resulting from that manipulation **[*544]** over the class period. Those transactions were all undertaken as part of the same type of trading in LIBOR-based instruments undertaken by the class member, and unlike the unnetted tax benefits in Randall that "emerge[d] more as a function of the operation of the Internal Revenue Code's complex provisions" than the defendants' conduct at issue, *478 U.S. at 664*, any nettable gains to a class member result from the "single wrong" of LIBOR manipulation.

Given this understanding of netting, we readily conclude that **[**294]** the damages inquiry in this case will be a highly individualized one. Indeed, each class member "will need to present evidence that varies from member to member" -- all of the EDF trades they undertook -- in order to determine whether it has suffered any damages. *Tyson Foods, 136 S. Ct. at 1045* (quoting 2 William B. Rubenstein, Newberg on Class Actions § 4:50 (5th ed. 2012)). And unlike CEA cases in which centralized trading records may be reasonably attainable, see, e.g., *In re Amaranth, 269 F.R.D. at 372* (concerning manipulation of futures on NYMEX); *In re Sumitomo Copper, 182 F.R.D. at 87* (same), no such records appear to exist in this case. We find Exchange plaintiffs' difficulties in obtaining centralized records to be informative, as they have subpoenaed the CME and 89 FCMs, all to little avail. The possibility that certain FCMs (panel bank affiliates or otherwise) may have retained some records, as suggested by counsel at oral argument (Hr'g Tr. 11:3-8; 12:12-13:2), is insufficient. Accordingly, even to the extent a common formula to calculate damages is available, the question of the data to which that formula will be applied remains. The latter will require evidence that varies from class member to class member, even if the formula is the same.[115] Damages are accordingly an individual **[**295]** question.

3.5.5. Conclusion

In this action, common questions do not predominate over individual ones. While the proposed trader-based class certainly raises a common question as to Rabobank's ability to impact LIBOR, this common question is outnumbered and substantially outweighed by individual questions relating to whether Rabobank (or its traders) had

---

[113] Exchange plaintiffs' contentions to the contrary are simply incorrect. Neither *Apex Oil Co. v. DiMauro, 744 F. Supp. 53 (S.D.N.Y. 1990)*, nor *Minpeco, 676 F. Supp. 486*, were class actions, and *In re Lidoderm Antitrust Litigation, No. 14-md-2521-WHO, 2017 U.S. Dist. LEXIS 24097, 2017 WL 679367, at *17-18 (N.D. Cal. Feb. 21, 2017)*, held at most that the selection of but-for price and the final damages calculation are reserved for the trier of fact. Here, we consider how to interpret as a matter of law the "actual damages" language found in the text of the CEA, *7 U.S.C. § 25(a)*, see also *In re Vivendi Universal, 284 F.R.D. at 159* (noting, in the securities fraud context, that "this Court has considerable discretion in determining how best to calculate compensable losses"), and whether that interpretation introduces individualized questions into the predominance analysis.

[114] We reserve judgment here as to whether more extensive forms of netting, such as cross-instrument netting (across different types of LIBOR-based instruments), will be necessary.

[115] To the extent Exchange plaintiffs claim that damages should be defined to include the time-value of money in their margin accounts (Netz Initial Report 46-47), doing so would introduce additional individualized questions as to each class member's margin requirements and cost of capital.

intent to manipulate EDF prices, by how much LIBOR was manipulated (if at all), what impact that manipulation ultimately had on EDF prices, and by how much each individual class member was damaged. The proposed class therefore does not satisfy, and does not come close to satisfying, *Rule 23(b)(3)*'s predominance requirement.

3.6. Superiority

Rule 23(b)(3)'s superiority inquiry asks whether class status would be superior to the maintenance of individual actions. Our analysis is guided by the four factors set forth in *Rule 23(b)(3)*, see *Sykes, 780 F.3d at 81*, though the factors are not exclusive.

First, we find that class members have a strong interest in controlling the prosecution of separate actions, given the extent of conflicting interests we have identified. See *Fed. R. Civ. P. 23(b)(3)(A)*. Though this case unquestionably presents complex issues, we find that individual actions would allow individual plaintiffs to better **[**296]** tailor the necessary inquiries into potential trader-based manipulation to the days on which they had net trading positions and **[*545]** would not require them to assert that certain instances of trader-based manipulation occurred when those instances either do not pertain to them at all or would actively reduce their recovery.

Exchange plaintiffs' point that many class members may have "negative value" claims (where the cost of prosecuting an individual action would greatly outweigh any recovery) has some force, and we agree that class members may lack incentive to pursue individual actions to at least some extent. Nonetheless, we view this case as easily distinguishable from cases such as consumer class actions, in which class members allege harm that is small in magnitude but generally certain in existence. By contrast, the two-sided, zero-sum nature of the EDF trading market involved in this case likely results in many EDF traders not having been harmed (or having benefited outright) from any EDF price impact caused by LIBOR manipulation.

That is, ***HN57***[] we should distinguish "negative" value claims -- those in which the cost of prosecution exceeds recovery -- from truly negative value claims -- **[**297]** those in which the class member actually benefited from the conduct in question. To the extent a putative class includes a substantial number of members who were not ultimately damaged, the "negative" value rationale for superiority advanced by Exchange plaintiffs is properly evaluated against a concern regarding the in terrorem effect that a certified class may have. Cf. *Kohen II, 571 F.3d at 677-78* ("A related point is that a class should not be certified if it is apparent that it contains a great many persons who have suffered no injury at the hands of the defendant, if only because of the in terrorem character of a class action." (citations omitted)); *Newton v. Merrill Lynch, Pierce, Fenner & Smith, Inc., 259 F.3d 154, 190 192 (3d Cir. 2001)* (observing, in a case where "at least some of the plaintiffs have not suffered economic injury," that "class certification would place hydraulic pressure on defendants to settle which weighs in the superiority analysis"). That appears to be the case here, and we accordingly conclude the first *Rule 23(b)(3)* factor weighs against superiority.

Second, we find that the extent and nature of any litigation already begun by class members weighs in favor of superiority. See *Fed. R. Civ. P. 23(b)(3)(B)*. We base this finding on the fact that this case is rapidly approaching its seventh birthday, having journeyed **[**298]** up and down the appellate ladder in the process. See, e.g., *Gelboim v. Bank of Am. Corp., 135 S. Ct. 897, 190 L. Ed. 2d 789 (2015)*; *Schwab, 2018 U.S. App. LEXIS 4519, 2018 WL 1022541*; *Gelboim, 823 F.3d 759*.

Third, we find that "the desirability . . . of concentrating the litigation of claims" in this forum tips in neither direction. *Fed. R. Civ. P. 23(b)(3)(C)*. On the one hand, for the reasons identified by the Judicial Panel on Multidistrict Litigation (JPML) in creating the multidistrict litigation in this district, concentrating litigation in this district may be desirable. See *In re LIBOR-Based Fin. Instruments Antitrust Litig., 802 F. Supp. 2d 1380, 1381 (J.P.M.L. 2011)*. Further, though individual actions advancing theories similar to those offered by Exchange plaintiffs here would likely be transferred to this forum given this case's multidistrict litigation status, this transfer would be limited to pretrial proceedings and we would be required to return any individual actions not initially filed in this district to the transferor court for trial. See *Lexecon Inc. v. Milberg Weiss Bershad Hynes & Lerach, 523 U.S. 26, 28, 118 S. Ct. 956, 140 L. Ed. 2d 62 (1998)*.

On the other hand, the res judicata issues identified by Rabobank do counsel against concentrating litigation in this district. See *In re Vivendi, 838 F.3d at 264* **[*546]** (***HN58***[] "Concerns about foreign recognition of our judgments are reasonably related to superiority."); see also *Bersch v. Drexel Firestone, Inc., 519 F.2d 974, 996-97 (2d Cir. 1975)* (Friendly, J.) (identifying foreign non-recognition of a class action's preclusive effect as a concern), abrogated on other grounds by *Morrison v. Nat'l Austl. Bank Ltd., 561 U.S. 247, 130 S. Ct. 2869, 177 L. Ed. 2d 535 (2010)*. Indeed, named **[**299]** plaintiffs FTC Futures Fund PCC and FTC Futures Fund SICAV are also foreign entities, being based in Gibraltar and Luxembourg, respectively. (Corrected 4AC ¶¶ 26-27.) These named plaintiffs and Metzler's status as foreign entities does not preclude them from serving as class representatives, but the presence of a significant number of foreign putative class members gives us pause on whether concentration here is desirable.

Finally, our manageability conclusion follows largely from our findings on predominance. See 2 William B. Rubenstein, Newberg on Class Actions § 4:74 (5th ed.) (Westlaw 2017) ("[A] finding of non-predominance is easily paired with a finding that a class action is unmanageable and hence not a superior form of litigation."). We find that a class action would be unmanageable given the extent of conflict between class members and the substantial individual questions of intent, causation, and damages.

In sum, we find that Exchange plaintiffs have not established that a class action would be superior to the maintenance of individual actions. While the second *Rule 23(b)(3)* supports a finding of superiority, the remaining factors are neutral or weigh against such a finding.

3.7. Modification [**300] of the Class Definition

Perhaps recognizing certain weaknesses in the class definition as proposed, Exchange plaintiffs suggest that two modifications to the class definition may be appropriate to salvage a class in some form: the removal of "were harmed" and the creation of day-by-day subclasses. We consider each suggestion in turn.

3.7.1. Removal of "Were Harmed"

Exchange plaintiffs suggest that any defects resulting from the inclusion of "were harmed" in the class definition could be resolved by our sua sponte modification of the class definition to exclude "were harmed." Such modification, however, would be without prejudice to subsequent modification in order to include instances of trader-based manipulation on additional days once discovered.[116] (Exch. Pls.' TBM Reply 8.)

We decline to exercise our discretion to modify the class definition here. First, Exchange plaintiffs have been on notice of the potential fail-safe class definition issue presented by their proposed definition for more than a year, when we expressed concern that "[s]uch a class necessarily raises individual questions, as the factfinder must determine whether an individual has a claim in order to determine whether **[**301]** he or she belongs in the class." *May 13, 2016 Order, 2016 U.S. Dist. LEXIS 63745, at *76-77, 2016 WL 2851333, at *2*. Though we explicitly held that "[Exchange] plaintiffs will bear the burden of articulating a class definition that meets the requirements of *Rule 23*" at class certification, *2016 U.S. Dist. LEXIS 63745, at *75, [WL] at *1*, they have insisted on offering the same class definition. We are accordingly disinclined **[*547]** to afford Exchange plaintiffs any potential benefit that would result from modification.

Second, when we contemplated the possibility of modifying the class definition, we reasoned that "[t]he precise scope of [Exchange] plaintiffs' claims will presumably be clarified by the completion of class discovery." Id. Class discovery has been completed, but the scope of Exchange plaintiffs' claims has not been significantly clarified.

---

[116] Of course, based on the class standing requirements that we have previously set forth, some showing that at least one named plaintiff held a net trading position adversely impacted by trader-based manipulation would be required before the class definition could be so modified.

Exchange plaintiffs continue to suggest that an unknown number of unknown instances of TBM have yet to be uncovered.

Finally, and most significantly, modification of the class definition would be futile. Because Exchange plaintiffs suggest modification without prejudice to the inclusion of additional instances of trader-based manipulation, the adequacy of representation issues identified above remain: class members, based on their trading positions, have conflicting **[**302]** incentives as to the discovery of those additional instances and to their inclusion in subsequent modifications of the class definition. And even if the class definition were ultimately limited to the 13 dates specified in the current definition, such a modification would not meaningfully alter the predominance analysis such that we would conclude that common questions predominate.[117]

3.7.2. Day-by-Day Subclasses

In a footnote in reply, Exchange plaintiffs assert that the creation of "single-day subclasses would meet *Rule 23(b)(3)*'s requirements" if a broad class corresponding to the entire class period were not certified. (Exch. Pls.' TBM Reply 13-14 n.26.) The creation of day-by-day subclasses may address some of the typicality and adequacy of representation issues that we have identified, but would not sufficiently alter the predominance calculus such that common questions would predominate.

Further, under *Rule 23(b)(3)*'s superiority prong, day-by-day subclasses are likely to become sufficiently numerous to render a class action utterly unmanageable. Even based on the current proposed class definition, day-by-day subclasses would require the creation of thirteen subclasses within the trader-based class, and the **[**303]** possibility that additional instances of trader-based manipulation beyond those currently identified (a point that Exchange plaintiffs have repeatedly emphasized) necessarily entails the likely creation of even more subclasses. For example, one declaration submitted by Exchange plaintiffs lists 62 dates in its "Timeline of Panel Bank Defendants' Trader-Based Manipulation of LIBOR," (Decl. of Thomas Elrod ¶ 203, May 2, 2017, ECF No. 1890), and Dr. Netz considers evidence of 163 instances of trader-based manipulation (Netz Initial Report 29-31).[118]

While *Rule 23(c)(5)* unquestionably allows for the creation of subclasses "[w]hen appropriate," we find little appropriate about the establishment of dozens, if not hundreds, of subclasses. Cf. Manual for Complex Litigation § 21.23 (4th ed. 2004) ("The creation of a number of subclasses . . . may make the case unmanageable [and] may defeat the superiority requirement."). As the Second Circuit remarked about the possibility of seven separate subclasses, **[*548]** "[t]hat is surely beyond the point at which [subclassing] must end." *In re Literary Works, 654 F.3d at 257*. So too here.

3.8. Conclusion

Exchange plaintiffs' motion for certification of a trader-based class is denied. We find that the proposed class meets the numerosity and commonality **[**304]** requirements of *Rule 23(a)* and the implied requirement of ascertainability, but fails to meet the typicality and adequacy requirements of *Rule 23(a)* and the predominance and superiority requirements of *Rule 23(b)(3)*. We decline Exchange plaintiffs' invitations to exercise our discretion to modify the class definition. Omitting "were harmed" from the class definition would do little to ameliorate the predominance and superiority problems from which the proposed class suffers, and even to the extent that day-by-day subclasses

---

117 For this reason, we would also reject any suggestion that issue certification under *Rule 23(c)(4)* would be appropriate in this case: issue certification "would not materially advance the litigation because it would not dispose of [these] larger issues." *McLaughlin, 522 F.3d at 234*.

118 Mr. Beevers also opines that there are "potentially likely" thousands of instances of trader-based manipulation. (Beevers Initial Report ¶ 117.)

would resolve the typicality and adequacy of representation problems that we identify above, they would not tip the predominance balance and would additionally create intractable management problems.

4. Suppression Class

A suppression class, to the extent one is certified, would consist of (1) traders purchasing EDF contracts with less than 365 days to expiration between April 15, 2009 and May 17, 2010 (Period 3) as specified in subpart C.2 of the class definition and (2) traders who transacted in EDF contracts or options during Period 3 and "were harmed" as a result of LIBOR suppression, which corresponds to subpart C.1 of the class definition.[119] Because antitrust claims are no longer at issue in **[**305]** this action, subpart A and the pre-Period 3 claims it encompasses are no longer figure into the class certification analysis -- a point the parties acknowledged at oral argument. (Hr'g Tr. 25:10-21.) Accordingly, in the remainder of our analysis of the proposed suppression class, we will consider only Period 3 CEA claims.

Before proceeding to the analysis of the proposed suppression class, we consider another preliminary issue: the impact of Rabobank's Daubert motions. While Rabobank moved to exclude the opinions offered by Exchange plaintiffs' experts in the trader-based context, UBS did not. Nonetheless, to the extent that we have granted Rabobank's Daubert motions and excluded certain opinions offered by Exchange plaintiffs' experts, we will not consider those opinions as evidence in our analysis of the suppression class's compliance with *Rule 23*. After all, *Rule 702 of the Federal Rules of Evidence* establishes threshold requirements that an expert opinion must satisfy before that opinion may be considered; nothing in the Rule suggests that expert testimony offered for the same purpose that is determined to be insufficiently reliable in one context (or as to one defendant) may somehow become cured of that reliability flaw **[**306]** in another context (or as to another defendant).

4.1. Class Definition

At the outset, UBS criticizes the class definition's use of "were harmed," contending that the proposed class amounts to an impermissible fail-safe class. (UBS Suppr. Opp'n 11-13.) While Exchange plaintiffs' use of "were harmed" is initially ambiguous, they subsequently clarify that a class **[*549]** member is "harmed" by suppression if it: (1) "purchased an EDF contract when prices were artificially inflated"; (2) "sold an EDF contract when prices were artificially depressed"; (3) "purchased an EDF call option or sold an EDF put option when EDF prices were artificially inflated"; or (4) "sold an EDF put or call option when EDF prices were artificially depressed." (Exch. Pls.' Suppr. Reply 29.) This fourth criteria, as currently formulated, directly conflicts with the third criteria; we assume Exchange plaintiffs meant to say "sold an EDF put option or purchased an EDF call option when EDF prices were artificially depressed."

Such clarity would have been helpful at the outset, but we find no reason not to analyze the proposed class using the definition of "harmed" set forth in Exchange plaintiffs' reply. Exchange plaintiffs **[**307]** suggest that criteria (2) and (4) were never triggered during the suppression period as a categorical matter because LIBOR was strictly suppressed, but even Dr. Seyhun finds that actual published LIBOR sometimes exceeded but-for LIBOR. (Seyhun Rebuttal Report figs.14.1-14.17.) Accordingly, we interpret "harmed" to include all four criteria.[120]

---

[119] Subpart C.1 is therefore redundant of the class definition's prefatory language, which refers to any individual that transacted in EDFs during the Class Period. Because CEA claims based on trades in Period 1 and Period 2 are untimely, see *LIBOR IV, 2015 U.S. Dist. LEXIS 147561, at *109, 2015 WL 6243526, at *116-17* (citing *LIBOR III, 27 F. Supp. 3d at 471-77*), subpart C.1 and the prefatory language capture the same set of putative class members once the CEA statute of limitations is considered.

[120] This class definition continues to satisfy Article III standing requirements, given the relaxed definition of Article III "injury-in-fact" established by the Second Circuit in Denney. See *443 F.3d at 263-64*.

4.2. Ascertainability

UBS, in its brief submitted prior to the Second Circuit's decision in In re Petrobras, argued that Exchange plaintiffs' difficulties in obtaining trading records render the proposed class unascertainable on account of administrative infeasibility. (UBS Suppr. Opp'n 13-14.) As with Rabobank's ascertainability arguments, we conclude that In re Petrobras's rejection of an administrative feasibility requirement deprives these arguments of persuasive force. See *862 F.3d at 268-69*. As with the trader-based subclass, we conclude that the suppression-based subclass is ascertainable under In re Petrobras's standard: the proposed class definition incorporates objective and definite criteria that limit the class based on the dates and types of trades in which members engaged. See supra section III.3.3.

4.3. *Rule 23(a)*

UBS does not dispute that the proposed **[**308]** persistent-suppression class satisfies *Rule 23(a)(1)*'s numerosity requirement and *Rule 23(a)(2)*'s commonality requirement. We similarly conclude that these requirements are satisfied. As with the trader-based subclass, we find that the evidence regarding the number of "large traders" who traded on the CME during the suppression period (which includes Period 3) is sufficient to establish that the proposed class more likely than not contains at least 40 members and accordingly satisfies the numerosity requirement. See supra section III.3.4.1. We also conclude that the question of whether panel bank suppressed LIBOR by making artificially low submissions throughout the suppression period is a common question, as evidence sufficient for one class member to establish that the panel bank did so will be sufficient for all other class members.[121]

4.3.1. Typicality

UBS argues that the named plaintiffs' claims are not typical of the class's because class members hold "hopelessly conflicting **[*550]** interests." (UBS Suppr. Opp'n 25.) Under this theory, class members have differing incentives to establish the magnitude of suppression on a given day based on the trading positions they held on that day. In response, Exchange plaintiffs **[**309]** contend that the named plaintiffs and absent class members' claims involve "common questions of law . . . and the same course of conduct." (Exch. Pls.' Suppr. Reply 33-34.)

We conclude, as we do in the trader-based context, that 303030 Trading and Metzler's claims are not typical of the class's. 303030 Trading remains subject to the unique defense that its claims were not validly assigned to it,[122] and the lack of clarity as to the legal status of Metzler's funds renders its claims atypical in this context as well. Additionally, we conclude that named plaintiff Gary Francis's claims are atypical, as the evidence shows that over Period 3, Francis had no net trading position and Dr. Seyhun's methodologies would show that he ultimately benefited from LIBOR suppression.[123] (Ordover Initial Report ¶¶ 144-46, tbl.24.)

---

[121] Though no antitrust claims remain in this action, this question is similar to the question of whether a conspiracy to suppress LIBOR existed, and "allegations of the existence of a price-fixing conspiracy" are often "susceptible to common proof." *Cordes & Co., 502 F.3d at 105*.

[122] Additionally, 303030 Trading appeared to have no produced no records corresponding to trades in Period 3. (Ordover Initial Report ¶ 137, tbl.22.)

[123] Based on Dr. Ordover's analysis, we would reach a similar conclusion regarding named plaintiffs FTC Futures Fund PCC and FTC Futures Fund SICAV if all FTC Futures Fund entities were properly considered together. (Ordover Initial Report ¶¶ 132-34, tbl.21.) However, the two FTC Futures Fund named plaintiffs appear to be separate legal entities -- one incorporated in Gibraltar and one incorporated in Luxembourg (Corrected 4AC ¶¶ 26-27) -- and we cannot discern whether either or both actually benefitted from LIBOR suppression.

Accordingly, only Atlantic Trading, the two FTC Futures Fund entities, and Nathanial Haynes remain. As to these named plaintiffs, we conclude that their claims are typical of the class's. Their claims, along with the absent class members' claims, arise generally from the same course of events: the alleged pattern of suppressing LIBOR submissions motivated by reputational concerns. **[**310]** Unlike the episodic nature of trader-based manipulation alleged in the trader-based class that animated our concerns as to class standing and typicality, the LIBOR suppression alleged here is inherently persistent and can be reasonably characterized as a single course of conduct by each panel bank. We therefore conclude, for this subset of named plaintiffs, that their claims are typical of the class's claims.

4.3.2. Adequacy of Representation

In challenging adequacy of representation, UBS relies on the same conflicting-interest argument supporting its typicality challenge. (UBS Suppr. Opp'n 25.) Exchange plaintiffs respond that "[a]ll Plaintiffs have an interest in proving the maximum claim against Defendants," and that conflicts, to the extent they exist, are therefore not sufficiently serious to justify a finding of inadequacy of representation. (Exch. Pls.' Suppr. Reply 34-35.)

UBS correctly asserts that because Exchange plaintiffs not only held different trading positions over the class period but have also offered multiple models yielding different estimates of suppression, conflicts between class members will arise because different class members will prefer different models that **[**311]** maximize their recovery. Exchange plaintiffs' suggestion that "[n]o Plaintiff controls, or wants to control, the price artificiality in the expert reports," (Exch. Pls.' Suppr. Reply 35), is simply incorrect, in light of the numerous models they have offered. Each plaintiff certainly has in interest in maximizing its claim against defendants, but Exchange **[*551]** plaintiffs' response ignores entirely the difficulty that UBS correctly identifies.

Nonetheless, in the suppression context, we find that the conflicts created by class members' conflicting trading positions and disparate preferences for one but-for LIBOR model over others do not rise to the level of "fundamental" conflicts that preclude a finding of adequacy of representation. A comparison to the trader-based class, and the fundamental conflict that we identified there, is again illustrative. Unlike that class, where Exchange plaintiffs have left open the possibility of additional instances of trader-based manipulation of unknown direction and magnitude, the contours of Exchange plaintiffs' suppression claims are far more clearly defined. See supra section III.3.4.4. The open-ended nature of the trader-based claims significantly amplified **[**312]** the conflicts generated by disparate trading positions and competing models in that context; those enhancements are not present here. We accordingly conclude that adequacy of representation is satisfied.

4.4. Predominance

We analyze predominance with respect to plaintiffs' suppression-based CEA claims using the same four elements that we considered with respect to Exchange plaintiffs' trader-based claims: "(1) that defendant had the ability to influence market prices; (2) that he specifically intended to do so; (3) that artificial prices existed; and (4) that defendant caused the artificial prices." *LIBOR I, 935 F. Supp. 2d at 713* (alterations incorporated).[124] As before, EDFs remain the commodity in question. See *LIBOR II, 962 F. Supp. 2d at 612*; *LIBOR I, 935 F. Supp. 2d at 721*.

4.4.1. Intent to Influence EDF Prices

Exchange plaintiffs must establish specific intent to influence market prices, which in this action requires a showing of intent to manipulate EDF prices. Because EDFs are the commodity in question and not LIBOR, we again conclude that the question of intent to manipulate EDF prices is an individual question.

---

[124] We again subsume our consideration of the first element, panel banks' ability to influence market prices, into the third and fourth elements, the existence of and panel banks' causation of artificial prices.

Evidence going towards panel banks' intent to manipulate LIBOR will generally apply throughout the suppression period and therefore pertain to all class members. **[**313]** A panel bank suppressing its LIBOR submission on one day based on reputational concerns is likely to have done so the day before and is likely to have done so the day after, as its reputational concerns are unlikely to materialize and disappear entirely from day to day over the financial crisis and suppression period. Accordingly, evidence showing that a panel bank possessed or lacked a reputation-based intent to suppress LIBOR on one day will be highly probative of that bank's intent (or lack thereof) throughout the suppression period. Indeed, if the critical inquiry were whether panel banks had intent to manipulate LIBOR, we would conclude that it is a common question weighing in favor of a finding of predominance.

But it is not, and the common nature of the question of intent to manipulate LIBOR does not translate to the EDF context. Establishing intent to manipulate EDF prices through reputation-motivated suppression of LIBOR is at least somewhat paradoxical, and we have considerable difficulty imagining what evidence tending to show (or disprove) such intent would even look like, let alone whether that evidence would pertain to all class members or only a few. To the extent we **[**314]** **[*552]** can even conceive of any such evidence, that evidence would more closely resemble the individualized, day-specific, panel bank-specific evidence that Exchange plaintiffs rely on in the trader-based context than the broadly scoped evidence pertaining to a panel bank's suppression of LIBOR submissions based on an intent to protect its reputation. We accordingly conclude that the question of specific intent to influence EDF prices through reputation-driven suppression of LIBOR is an individual question.[125]

4.4.2. Existence and Causation of EDF Prices

As in the context of trader-based manipulation, Exchange plaintiffs must establish by a preponderance of the evidence that classwide methodologies are available to determine both but-for LIBOR and how the difference between but-for LIBOR and actual LIBOR would have impacted EDF prices.[126] They again have done neither.

Exchange plaintiffs rely on Dr. Seyhun's ICAP-Ask-based models and his Rebuttal Suppression Model to meet this burden. (Exch. Pls.' Suppr. Reply 3-10.) This question is closer than in the trader-based context because the suppression class considers across-the-board suppression during the later portions of the class period, which by construction **[**315]** is one-directional. Nonetheless, given that we have excluded Dr. Seyhun's opinions to this effect under Daubert, they are insufficient. See *Laumann v. Nat'l Hockey League, 105 F. Supp. 3d 384, 398-99 (S.D.N.Y. 2015)* ("Here, [the expert's] model was the common evidence -- and the model has been excluded. Therefore, no [*Rule 23](b)(3)* class may be certified."). Nonetheless, we discuss here two further criticisms of Dr. Seyhun's Rebuttal Suppression Model offered by UBS.

First, UBS asserts that Dr. Seyhun's reliance on the ICAP-Ask data series in his Rebuttal Suppression model fails to account for differences in credit risk between the broader category of prime banks underlying the ICAP-Ask data and LIBOR panel banks. (Defs.' Upstream Opp'n 19-20.) Exchange plaintiffs' rejoinder -- that Dr. Seyhun "does adjust his analysis to take account of each Defendant's credit worthiness" -- is entirely nonresponsive. (Exch. Pls.' Suppr. Reply 8.) UBS argues that the ICAP-Ask series on which Dr. Seyhun relies in his Initial ICAP-Ask Models and Rebuttal Suppression Models fails to account for differences in credit risk between panel banks and other prime non-panel banks, not differences in credit risk within panel banks.

[125] Further, even if LIBOR suppression were motivated by financial incentives like trading profits, intent to manipulate EDF prices would still need to be distinguished from intent to manipulate prices of other LIBOR-based instruments not at issue in this action.

[126] In asserting that they have met these requirements, Exchange plaintiffs criticize Dr. Willig's opinions and assert, mystifyingly, that "Defendant-friendly interpretations of emails or documents is inappropriate on the class motion as well as on summary judgment," citing cases in the summary judgment and directed verdict context. (Exch. Pls.' Suppr. Reply 4 & n.4.) In so contending, they have apparently forgotten that we are tasked with "assess[ing] all of the relevant evidence admitted at the class certification stage" and "resolv[ing] factual disputes relevant to each *Rule 23* requirement." *In re IPO, 471 F.3d at 41-42*. Indeed, this objection is particularly difficult to understand in light of Exchange plaintiffs' subsequent argument that we should disregard Dr. Willig's opinions regarding the extent of suppression because they "[c]ontradict independent evidence." (Exch. Pls.' Suppr. Reply 7.)

Second, UBS contends that Dr. Seyhun's analysis of the relationship **[**316]** between CDS spreads and LIBOR submissions is flawed. (UBS Suppr. Opp'n 34-35.) Since, within the Rebuttal Suppression model, **[*553]** CDS spreads serve as an input to the Rebuttal Suppression model that Dr. Seyhun uses to control for differences in panel banks' LIBOR submissions attributable to differences in credit risk, the absence of a relationship between CDS spreads and LIBOR submissions suggests that the Rebuttal Suppression Model does not sufficiently control for differences in credit risk across panel banks.

According to UBS, Dr. Seyhun's regressions are based on an improper benchmark period that incorporates pre-Class Period CDS spread data, even though Dr. Seyhun himself suggests that inclusion of pre-Class Period CDS spread data is inappropriate. (Seyhun Rebuttal Report ¶¶ 416-17.) Dr. Willig, in turn, determines that Dr. Seyhun's methodology would show no statistically significant relationship between a bank's LIBOR submission and its CDS spread when the pre-Class Period CDS spread data is omitted from Dr. Seyhun's regressions (Willig Rebuttal Report ¶¶ 6-12). Exchange plaintiffs respond that this critique is not "passably scientific" because Dr. Willig has not offered a justification **[**317]** for excluding pre-Class Period ICAP-Ask data from his analysis in addition to excluding the pre-Class Period CDS spread data disavowed by Dr. Seyhun. (Exch. Pls.' Suppr. Reply 8-9.)

This "passably scientific" critique demonstrates a failure to properly interpret Dr. Willig's report or a failure to understand econometrics. To the extent Exchange plaintiffs challenge Dr. Willig's analysis of the LIBOR submission-CDS spread relationship presented in the Seyhun Initial Report, that analysis did not rely on ICAP-Ask data. (Seyhun Initial Report tbl.2.5.) To the extent Exchange plaintiffs challenge Dr. Willig's discussion of the LIBOR submission-CDS spread analysis presented in the Seyhun Rebuttal Report, they fail to understand how regressions are conducted. In order to exclude the pre-Class Period CDS spread data (which Dr. Seyhun acknowledges are uninformative), Dr. Willig changed the benchmark period, a change that necessarily applies to every time-series explanatory variable included in the regression. Here, that necessarily includes both the ICAP-Ask series and the multiple CDS spread series (corresponding to each panel bank) on which Dr. Seyhun relied. By construction, a regression **[**318]** does not incorporate time-series data from outside the benchmark period in order to estimate the relationship between the variables in question.

In sum, we conclude that Exchange plaintiffs have not established that the determination of what submissions each panel bank would have made in the absence of suppression is a common question. Each of the models relied upon by Exchange plaintiffs is insufficiently reliable, as we have concluded above, and their further defenses of Dr. Seyhun's Rebuttal Suppression Model are incoherent.

As to the second question, what impact changes in LIBOR would have had on EDF prices, we again conclude that the question is an individual one. Dr. Seyhun's and Dr. Netz's opinions remain inadmissible at the threshold under *Daubert*, but they would do little more to meet Exchange plaintiffs' burden even if they were admissible. Dr. Seyhun's "impact factor" models remain confounded by macroeconomic variables, again resulting in a mismatch between Exchange plaintiffs' theory of harm and the impact on EDF prices that it calculates, a disparity that is impermissible under Comcast. See *569 U.S. at 36*. This flaw is no less fatal here than in the trader-based context. Further, Dr. **[**319]** Seyhun and Dr. Netz's probabilistic "tick size" opinions equally establish that Exchange plaintiffs cannot determine with any certainty which trades were in fact impacted by LIBOR manipulation, **[*554]** whether in the context of trader-based manipulation or in the context of suppression.

This conclusion as to the relationship between changes in LIBOR and changes in EDF prices is bolstered by evidence that while LIBOR is published only once each day, EDF prices fluctuate significantly within a trading day in magnitudes greater than day-to-day changes in LIBOR, and by evidence that EDF prices and LIBOR move in inconsistent directions.[127] (Ordover Initial Report ¶¶ 65-75.) We also find noteworthy Exchange plaintiffs' experts' acknowledgement that LIBOR and EDFs have a two-way causal relationship, an acknowledgement confirmed by at

[127] By "inconsistent," we mean in a direction inconsistent with Exchange plaintiffs' theory. Under their theory, a decrease in LIBOR should cause an increase in EDF prices, since EDF contracts ultimately settle at a price of 100 minus 3-month LIBOR published on the settlement date. We find, relying on Dr. Ordover's analysis, that changes in LIBOR are often observed together with corresponding changes in EDF prices in the same direction, which is inconsistent with Exchange plaintiffs' theory.

least one academic paper (cited by Dr. Seyhun and Dr. Netz) that measures information transfer in both directions from LIBOR to EDF prices and from EDF prices to LIBOR. Indeed, we interpret Dr. Seyhun's cointegration findings to be consistent with such a two-way causal relationship.

Exchange plaintiffs advance numerous additional arguments and identify further pieces of evidence **[**320]** in their attempt to establish that changes in LIBOR cause changes in EDF prices. We find them unpersuasive taken together, but discuss several specific arguments below. First, Exchange plaintiffs assert that "the EDF market's expectation today of what 3-month LIBOR will be at the EDF expiration is based upon today's LIBOR." (Exch. Pls.' Suppr. Reply 12.) This statement is true, but only to a limited extent: the evidence establishes that far more relevant than today's LIBOR is the market's expectations regarding macroeconomic conditions at expiration. Though LIBOR may capture some of those conditions and events, LIBOR does not itself form the basis of those expectations.

Second, Exchange plaintiffs' attempt to portray the lack of immediate response in EDF trading prices to the publication of LIBOR as a strength of their case rather than a weakness is incomprehensible. (Exch. Pls.' Suppr. Reply 12). Rather, the lack of response in EDF trading prices is more consistent with the proposition that changes in LIBOR do not necessarily cause measurable changes in EDF prices.

Equally unpersuasive are Exchange plaintiffs' arbitrage and "overlap" theories of causation. (Exch. Pls.' Suppr. Reply **[**321]** 14-15.) Dr. Seyhun and Dr. Netz do not articulate workable arbitrage strategies, as LIBOR is not a tradable asset. (Ordover Initial Report ¶¶ 60-63.) And as we discussed in the context of Exchange plaintiffs' motion to exclude Dr. Culp's opinions, the overlap theory is nonsensical; this finding is confirmed by Dr. Ordover's analysis showing a lack of convergence between spot LIBOR and expected LIBOR at settlement implied by EDF prices as Dr. Seyhun's theory would require, despite increasing overlap between the time periods in question. (Ordover Rebuttal Report ¶¶ 5-15, figs.1-2.)

Finally, we are unpersuaded by Exchange plaintiffs' reliance on the "chronological sequence of events on April 16-18, 2008," (Exch. Pls.' Suppr. Reply 13), and evidence that some EDF traders took LIBOR into account when trading (Exch. Pls.' Suppr. Reply 13-14, 16). We previously found unpersuasive the April 16-18, 2008 example, see *LIBOR VI, 2016 U.S. Dist. LEXIS 175929, at *62, 2016 WL* ***[*555]*** *7378980, at *22*, and Exchange plaintiffs' additional gloss on that example does not cause us to reassess that conclusion. Again, EDF prices appeared to react to the announcement (that LIBOR appeared to have been suppressed) before LIBOR itself increased in response to this announcement.

But even **[**322]** assuming we were to find this example at least somewhat persuasive, we are skeptical that a single example corresponding to three days of the class period -- days that we have identified as having particular significance -- that are likely less than representative of the broader class period. See, e.g., *LIBOR IV, 2015 U.S. Dist. LEXIS 147561, at *347, 2015 WL 6243526, at *114-15*. Similarly, evidence that some plaintiffs considered LIBOR in making their EDF trading decisions establish that changes in LIBOR would cause changes in EDF trading prices; such behavior is equally consistent with LIBOR serving as a proxy for the macroeconomic conditions and business events that Exchange plaintiffs concede drive both LIBOR and EDF prices.

4.4.3. Damages

We find, as we do for the trader-based class, that the question of damages is an individual question of significant magnitude, given the extensive difficulties plaintiffs have experienced in obtaining trading records and the netting requirements that will be imposed. See supra section III.3.5.4.

4.4.4. Conclusion

We ultimately conclude that Exchange plaintiffs have not established that common questions predominate over individual ones. The limited number of common questions are substantially outweighed by individualized **[**323]** questions of specific intent to manipulate EDF prices through reputation-motivated suppression of LIBOR, existence and causation of artificial EDF prices, and damages.

4.5 Superiority

We again analyze superiority using the *Rule 23(b)(3)* factors and again find a lack of superiority. First, favoring superiority, we find that class members lack a strong interest in controlling the prosecution of separate actions, even though we remain unmoved by the "negative value" argument advanced by plaintiffs for the reasons articulated in our analysis of this factor in the trader-based context and based on evidence showing that at least several of the named plaintiffs were not harmed by LIBOR suppression. See supra section III.3.6. The conflicts within the class, limited in significance by the one-directional nature of Exchange plaintiffs' allegations of suppression here, and the presence of only one separate action concerning LIBOR manipulation in the context of EDF trading persuades us that this factor tips in favor of superiority. Next, our analysis of the second and third factors remains unchanged from our analysis in the trader-based context. The extent and nature of litigation already begun weighs in favor **[**324]** of superiority; the desirability of concentrating litigation in this forum is neutral given the limitations on an MDL court's power and concerns about foreign non-recognition of a class action's preclusive effects. And finally, though we view predominance as a somewhat closer question in this context than in the trader-based context, we again conclude that a class action would be unmanageable given our predominance findings. In sum, though the first and second *Rule 23(b)(3)* factors weigh in favor of superiority, we again conclude that a class action would be unmanageable in light of the predominance issues we identify, and this manageability issue is sufficient to defeat superiority.

4.6. Conclusion

Exchange plaintiffs' motion for certification of a suppression class is denied. While Exchange plaintiffs have established the **[*556]** four *Rule 23(a)* requirements, the proposed class stumbles at *Rule 23(b)(3)*'s predominance and superiority hurdles. While the common-question side of the scale is weightier here than for the proposed trader-based class, Exchange plaintiffs nonetheless have not carried their burden of demonstrating preponderance by establishing that but-for LIBOR may be calculated on a classwide basis, that changes in **[**325]** LIBOR would have been reflected in EDF prices in a classwide manner, or that damages may be calculated for all class members relying on the same evidence. Exchange plaintiffs' pro forma suggestion that we "modify the Class or certify [a] remaining portion" (Exch. Pls.' Suppr. Reply 35), unaccompanied by any serious analysis, does not offer a basis on which to modify the class definition.[128]

IV. LENDER ACTION

Berkshire Bank, the sole named Lender plaintiff remaining,[129] seeks certification of a class defined as follows:

> All lending institutions headquartered in the United States, including its fifty (50) states and United States territories, that originated loans, held loans, purchased whole loans, purchased interests in loans or sold loans with interest rates tied to USD LIBOR, which rates adjusted at any time between August 1, 2007 and May 31, 2010.

---

[128] Issue certification under *Rule 23(c)(4)* is also inappropriate, as it "would not materially advance the litigation because it would not dispose of larger issues" remaining in the action. *McLaughlin, 522 F.3d at 234*.

[129] The operative complaint lists the Government Development Bank for Puerto Rico and Directors Financial Group as named plaintiffs. (SAC ¶¶ 22-23.) We previously dismissed the Government Development Bank's claims for being untimely under Puerto Rico law, *LIBOR V, 2015 U.S. Dist. LEXIS 149629, at *76, 2015 WL 6694607, at *12-13*, and Directors Financial Group withdrew its claims, (Stipulation of Dismissal with Prejudice, Feb. 2, 2017, ECF No. 1758).

The operative Second Amended Consolidated Class Action Complaint identified all 16 panel banks (and certain affiliates) as defendants along with the BBA. (Second Am. Consol. Class Action Compl. ("SAC") ¶¶ 24-41, Apr. 18, 2016, ECF No. 1383.) In LIBOR V, we reaffirmed the personal jurisdiction conclusions initially set forth in LIBOR IV, see *LIBOR V, 2015 U.S. Dist. LEXIS 149629, at *68, 2015 WL 6696407, at *8-9* (citing **[**326]** *LIBOR IV, 2015 U.S. Dist. LEXIS 147561, at *452, 2015 WL 6243526, at *30, *37-38)*, ultimately dismissing the BBA and a number of panel bank defendants. Additionally, Berkshire has reached a settlement with Citi and has moved for preliminary approval of that settlement.[130] (Letter from Jeremy Lieberman to the Court, Jan. 16, 2018, ECF No. 2403.) Accordingly, to the extent a class is certified in this action, it would be certified against only Bank of America, JPMorgan Chase, and UBS (collectively, "Lender defendants"). The SAC asserts two causes of action, one for fraud and the other for civil conspiracy to commit fraud, both under state law. (SAC ¶¶ 362-81.)

1. Daubert Motions

In litigating the class certification motion, Berkshire has offered expert testimony from Dr. Robert Webb and Lender defendants have offered expert testimony from Dr. Robert Willig, Dr. Janusz Ordover, and Mr. Brian Kelley. Defendants have moved to exclude certain portions of Dr. Webb's testimony, and Berkshire has moved to exclude certain portions of Dr. Willig's testimony.[131] We again consider **[*557]** the Daubert motions before proceeding to the class certification motion.

1.1. Dr. Webb

Berkshire offers two reports from Dr. Robert Webb: (1) an initial report dated February 2, 2017 (Decl. of Jeremy Lieberman **[**327]** ex. 5, May 2, 2017, ECF No. 1889); and (2) a rebuttal report dated May 3, 2017 (Decl. of Paul Mishkin ex. 5, June 30, 2017, ECF No. 2025). We refer to these as the Webb Initial Report and the Webb Rebuttal Report, respectively. Across these two reports, Dr. Webb's opinions relate primarily to: (1) calculating the extent to which LIBOR was suppressed during the class period; and (2) calculating damages to putative class members as a result of LIBOR manipulation. Lender defendants do not challenge Dr. Webb's qualifications to offer these opinions; we agree that Dr. Webb is so qualified.[132]

As to suppression, Dr. Webb first compares published LIBOR to a number of "potential measures" of suppression, including a "Bank Funding Rate" calculated based on "the actual rates paid by Defendants in their issuance of funding instruments linked to USD LIBOR with a six months maturity" (Webb Initial Report ¶ 41 (footnote omitted)) and the ICAP-Ask rate,[133] which Dr. Webb refers to as the "ICAP EDDR" rate (Webb Initial Report ¶ 46), among others. To ultimately estimate what LIBOR would have been in the absence of suppression, Dr. Webb uses a Eurodollar deposit rate published by **[**328]** Bloomberg, the "Bloomberg CMPL" rate. (Webb Initial Report ¶ 45.) Dr. Webb calculates but-for LIBOR by regressing actual published LIBOR against the Bloomberg CMPL over an

---

[130] Though we dismissed HSBC as a defendant in this action, HSBC has also settled with Berkshire. (Letter from Jeremy Lieberman to the Court, Jan. 16, 2018, ECF No. 2403.)

[131] Berkshire does not challenge the admissibility of Mr. Kelley's report (Decl. of Paul Mishkin ex. 1, June 30, 2017, ECF No. 2025) or Dr. Ordover's report (Decl. of Paul Mishkin ex. 2, June 30, 2017, ECF No. 2025). We refer to these reports, which are both dated April 3, 2017, as the Kelley Report and the Ordover Report, respectively.

[132] Dr. Webb is the Martin J. Pastel, Jr. Research Professor at the University of Virginia McIntire School of Commerce and is the Editor-in-Chief of the Journal of Futures Markets. He holds a Ph.D. and M.B.A. in Finance from the University of Chicago Graduate School of Business and has written extensively on various economic and finance subjects. (Webb Initial Report app. A.)

[133] For a description of the ICAP-Ask rate, see supra note 15.

unspecified clean period[134] and then using the results of that regression to estimate but-for LIBOR during the class period. (Webb Initial Report ¶ 72). Lender defendants do not seek exclusion of these opinions under Daubert.

As to damages, Dr. Webb opines that "[t]he calculation of damages to the Class is susceptible to common proof on a formulaic basis," reasoning that "[t]he amount of damage suffered by the Class member on [each reset date] is equal to the amount of suppression of USD LIBOR multiplied by the outstanding nominal loan amount(s) owed to that Class member" for the reset period. (Webb Initial Report ¶ 26.) Dr. Webb supports this opinion by taking his Bloomberg CMPL-based but-for LIBOR series and calculating damages to be the difference between the actual interest received on certain loans (calculated based on published LIBOR) and the interest that would have been received on those loans (calculated based on his but-for LIBOR series). (Webb Initial Report ¶¶ 77-83.) In his rebuttal report, **[**329]** Dr. Webb expands on these analyses to incorporate damages on **[*558]** LIBOR-based instruments other than loans, the issues of absorption that we identified in LIBOR VI, and the effect of interest-rate floors. (Webb Rebuttal Report ¶¶ 114-33.)

Lender defendants do seek exclusion of these opinions. They contend first that Dr. Webb's methodology does not assess damages under the out-of-pocket loss rule that we concluded applied to Berkshire's claims in LIBOR V, a mismatch that is fatal to class certification under Comcast. Second, Lender defendants assert that Dr. Webb's damages methodology is unreliable because it fails to account for certain significant aspects of the but-for world, including (1) "what demand and default rates for their LIBOR-linked loans would have been"; (2) "how alleged LIBOR suppression would have affected the price and other terms of their LIBOR-linked loans"; and (3) "how lenders' LIBOR-linked borrowings, hedges, and other transactions would have been impacted." (Lender Defs.' Class Opp'n 18-19.) We consider each argument in turn.

1.1.1. Assessment of Damages

Berkshire first responds that Dr. Webb's analysis is consistent with its liability case because some class members **[**330]** will be subject to a benefit-of-the-bargain rule (under which but-for LIBOR is relevant) and because calculation of damages using alternative rates (which is required under New York's out-of-pocket damages rule) could be performed applying "only grade-school arithmetic" once the alternative rate is determined. (Berkshire Webb Opp'n 13-14.) Citing In re Scotts EZ Seed's holding that "Nothing in Comcast requires an expert to perform his analyses at the class certification stage," *304 F.R.D. at 414*, Berkshire contends that the operative question is "whether plaintiffs have established a workable damages model, not whether the model actually works." (Berkshire Webb Opp'n 14-15.)

This response is unpersuasive. Though we agree that the substitution of an alternative rate, once determined, in place of but-for LIBOR would not be an analytically intensive exercise, but Dr. Webb never opines that determining the alternative rate may be done formulaically, which is necessary to support his opinion regarding the calculation of damages. Further, Dr. Webb's failure to actually perform an alternative rate is not excused by the straightforward nature of the calculation. As Dr. Webb does not claim that he lacks necessary **[**331]** data, his failure to do so is particularly inexcusable in light of that ease.

At bottom, Dr. Webb's model does not calculate, and does not purport to calculate, "damages" to Berkshire or any other putative class member under the out-of-pocket damages rule that we set forth in LIBOR V, and the out-of-pocket damages rule is of particular significance here because Berkshire is the only named plaintiff remaining.[135]

---

[134] Dr. Webb explains that the R-squared of his Bloomberg CMPL regression is 99.99% over the period from January 1, 2004 to July 31, 2007, and his but-for LIBOR regression is presumably based on such a clean period. (Webb Initial Report ¶ 49 n.17.) R-squared refers to the coefficient of determination, which measures the amount of variation in the dependent variable that can be explained by variation in the explanatory variables. See supra note 31.

[135] Perhaps acknowledging this shortcoming of Dr. Webb's opinion, Berkshire belatedly suggests that we should revisit this analysis in LIBOR V. For the reasons we explain fully below, we decline this invitation.

Unlike the expert's models in In re Scotts EZ Seed, Dr. Webb's models simply do not "match plaintiffs' theories of liability" under New York law. *304 F.R.D. at 414*.

1.1.2. Construction of the But-For World

Berkshire offers three responses to Lender defendants' second argument. First, Berkshire argues that regressions are considered the "gold standard" in antitrust actions. (Berkshire Webb Opp'n 16, 18-19.) Second, Berkshire contends that the issues that Lender defendants accuse Dr. Webb of having failed to consider are speculative as a factual matter. (Berkshire **[*559]** Webb Opp'n 17.) Third, Berkshire asserts that, as a matter of law, Dr. Webb was not required to take into account these aspects of the but-for world because defendants must bear the consequences of any uncertainty resulting from their **[**332]** wrongdoing. (Berkshire Webb Opp'n 17-20.)

First, Berkshire's invocation of general case law about regressions in antitrust actions is not responsive on multiple levels. For one, this action raises fraud claims, not antitrust claims. Second, while Dr. Webb conducts regressions in order to calculate one of the inputs to his damages model -- but-for LIBOR -- Lender defendants' motion challenges how Dr. Webb subsequently applies the results of that regression, not the regression itself. Indeed, a regression, even if conducted in a reliable manner consistent with econometric principles, may still be applied in an unreliable way.[136]

Second, Berkshire's suggestion that "[n]either Professor Ordover nor Mr. Kelley identify a single term from any class member loan that would have definitely been different" is simply unpersuasive. (Berkshire Webb Opp'n 17.) As to demand, Berkshire's attempt to escape the laws of supply and demand fail. Consider, for example, a would-be homeowner seeking a mortgage loan: a higher interest rate means that the borrower will have higher monthly mortgage payments for a given loan amount; a borrower who wishes to keep his monthly payment **[**333]** constant will seek a smaller loan amount. Cf. *Robinson v. Tex. Auto Dealers Ass'n, 387 F.3d 416, 423 (5th Cir. 2004)* (describing "[b]ottom-line purchasers"). More broadly, in making loans, lenders sell a good -- capital -- to borrowers at a given price -- the interest rate. Therefore, it is wholly unsurprising that (absent shifts in the demand curve) a higher interest rate will decrease demand, resulting in a lower volume of loans being made. Dr. Webb concedes the point himself, (Webb Dep. 276:13-18, Decl. of Paul Mishkin ex. 6, June 30, 2017, ECF No. 2025), and as the Second Circuit summarized: "[i]ncreased mortgage interest rates led to a spike in prices that made many homes too expensive for potential buyers, decreasing demand." *Fed. Hous. Fin. Agency v. Nomura Holding Am., Inc., 873 F.3d 85, 108 (2d Cir. 2017)*. As to default rate, resets to higher interest rates over the life of a loan will increase defaults. Dr. Webb again concedes the point, (Webb Dep. 278:16-279:6), and as the Second Circuit recognized, "[d]efaulting on mortgage loans became an attractive option for homeowners" as a result of rising interest rates and decreased home values leading to the financial crisis. *Nomura, 873 F.3d at 107*. And as to spread, Berkshire does not meaningfully rebut Dr. Ordover's testimony that spreads on floating-rate loans are subject to negotiation or, for that **[**334]** matter, its own representative's testimony that its loans were in fact negotiated and that its spreads were sensitive to underlying interest rates.[137] (Ordover Report ¶¶ 39-40; Lukens Dep. 36:5-7, 240:4-6, 271:4-6, **[*560]** Decl. of Paul Mishkin ex. 7, June 30, 2017, ECF No. 2025 ("Lukens Dep.").)

Third, Berkshire's reliance on In re Electronic Books, which held that an expert was not required to model various "features of a but-for world" because "the but-for world does not exist" is unavailing in this context. *In re Elec. Books Antitrust Litig., No. 11 MD 2293 (DLC), 2014 U.S. Dist. LEXIS 42537, 2014 WL 1282293, at *27 (S.D.N.Y. Mar. 28,*

---

[136] It also bears repeating that the acceptance of regressions as a statistical method generally does not imply that all regressions will be admissible under Daubert. Questions remain in each case as to whether the regression takes reliable data as inputs, see *Fed. R. Evid. 702(b)*, whether the regression is properly specified, see, e.g., *Bickerstaff, 196 F.3d at 449-50*, and whether the expert properly interprets the regression to support any conclusions ultimately reached, see, e.g., *Amorgianos, 303 F.3d at 267*.

[137] The interest rate associated with a floating rate loan consists of two components: the benchmark rate and a spread above or below that benchmark. For example, a floating rate loan might have an interest rate of 3-month LIBOR plus 50 basis points. The benchmark rate is 3-month LIBOR, and the spread is +50 basis points.

2014). In re Electronic Books concluded that certain features of the but-for world "lost all relevance once the conspirators raised the prices for e-books," 2014 U.S. Dist. LEXIS 42537, [WL] at *28, but we are hesitant to read these statement too broadly. The but-for world, by construction, does not exist, but it still must be constructed in a reasonable way such that a reasonable approximation of damages may be made. An oversimplification that fails to consider important aspects of the but-for world will fail to yield such a reasonable approximation, and indeed, In re Electronic Books acknowledged that demand for e-books remained relevant to the damages analysis. Id. (referencing **[**335]** "the frequency with which a consumer may have purchased e-books"). Demand is relevant here, too.

We recognize that ***HN59***[] a defendant must bear the risk of uncertainty from its wrongdoing, see, e.g., *Story Parchment Co. v. Paterson Parchment Paper Co., 282 U.S. 555, 563, 51 S. Ct. 248, 75 L. Ed. 544 (1931)* ("[T]he risk of the uncertainty should be thrown upon the wrongdoer instead of upon the injured party."), but also adhere to the principle that a plaintiff first "bears the burden of showing that the claimed damages are the 'certain result of the wrong,'" *Anderson Grp., LLC v. City of Saratoga Springs, 805 F.3d 34, 52-53 (2d Cir. 2015)* (quoting *Story Parchment, 282 U.S. at 563*)). The question, therefore, is whether Berkshire has carried this burden. It has not.

1.1.3. Conclusion

Lender defendants' motion to exclude Dr. Webb's damages opinions is therefore granted. By calculating only the difference between actual published LIBOR and but-for LIBOR and failing to take into account not only the applicable legal standard that we set forth in LIBOR V but also other relevant aspects of the but-for world, Dr. Webb's methodology cannot be fairly said to calculate "damages."[138]

1.2. Dr. Willig

Lender defendants offer an expert report from Dr. Robert Willig dated April 3, 2017, which we refer to in the context of this action as the Willig Report. (Decl. of Paul Mishkin ex. 3, June 30, 2017, ECF No. 2025.) As in the Exchange-based **[**336]** action, the Willig Report includes several opinions based on an analysis of interbank lending transactions into which panel banks actually entered. (Willig Report ¶ 14.) Berkshire moves to exclude Dr. Willig's opinions to the extent they are based on this analysis, specifically, sections IV through VI of the Willig Report. (Berkshire Willig Mem. 1.)

Berkshire contends that these opinions are excludable under Daubert for three primary reasons: (1) Dr. Willig's comparison of observed interbank transaction rates contradicts the LIBOR question's focus on "offered rates" and is therefore unreliable and irrelevant (Berkshire Willig Mem. 16-22); (2) Dr. Willig's opinions are dependent on an unreliable dataset that does not distinguish offer-initiated transactions from bid-initiated transactions (Berkshire Willig Mem. 22-23); and (3) Dr. Willig's results are contradicted by certain **[*561]** bank documents and resulted from Dr. Willig's "bad faith" (Berkshire Willig Mem. 23-24).[139]

1.2.1. The LIBOR Question

Berkshire's first argument challenges Dr. Willig's assumption that "panel banks' borrowing transactions provide the most informative data for evaluating the accuracy of their LIBOR submissions" **[**337]** and his analysis's subsequent reliance on observed interbank transaction rates. (Willig Report ¶ 16.) Like Exchange plaintiffs, Berkshire bases this challenge on the LIBOR question itself, BBA documents, and certain other sources.

---

[138] Of course, the "upstream" aspects of Dr. Webb's analysis were not challenged by Lender defendants and remain admissible, our misgivings about certain aspects of that analysis notwithstanding.

[139] Berkshire does not challenge Dr. Willig's qualifications. We conclude here, as we do in the Exchange-based action, that Dr. Willig is well qualified to offer the opinions presented in his report. See supra note 83.

As in the Exchange-based action, Berkshire's repeated reliance on panel banks' "borrowing costs" in its allegations is sufficient to warrant denial of this motion. See *Andrews, 882 F.2d at 707*; *TufAmerica, Inc., 968 F. Supp. 2d at 600*. For example, in the operative complaint, Berkshire alleges that Defendants manipulated LIBOR by making submissions that "did not honestly reflect the submitting banks' actual borrowing costs on the interbank market" and conspired to make LIBOR submissions "below their actual borrowing costs." (SAC ¶¶ 261, 377.) Further, Berkshire repeatedly asserted that interbank transaction data were necessary to assess the true extent of suppression. For instance, Berkshire alleged that "[t]he Panel Bank Defendants' actual borrowing costs were not publicly disclosed, rendering it impossible to discern without internal documents and sophisticated expert analysis the full extent of their fraud," (SAC ¶ 284 (emphasis added)), and that the public unavailability of data on "the rates at which panel banks could **[**338]** borrow" served as a basis for tolling statutes of limitations, (e.g., SAC ¶ 333).

Berkshire's earlier complaints contain materially similar allegations. (E.g., First Am. Consolidated Class Action Compl. ¶¶ 252, 368, Nov. 17, 2015, ECF No. 1238; Am. Class Action Compl., ECF No. 242, ¶¶ 40, 88, Nov. 21, 2012, ECF No. 242.) Berkshire, in reply, accuses Lender defendants of "elevat[ing] form above substance," and now contends that its repeated references to "borrowing costs" were merely "short-hand wording in the Complaint" intended to refer only to offered rates. (Berkshire Willig Reply 3.) Even if we were to accept this revisionist history, which is truly difficult to reconcile with Berkshire's own understanding that LIBOR represents the rate at which a panel bank "actually borrowed in the market" (Krausz Dep. 19:2-7, Decl. of Paul Mishkin ex. 10, June 30, 2017, ECF No. 2025 ("Krausz Dep.")), Berkshire's argument would still fail. Berkshire relies largely on the same sources relied upon by Exchange plaintiffs: the text of the LIBOR question; the BBA "definitions" page; the Kuo, Skeie, and Vickery working paper; the Credit Suisse Fixed Income Research Report; and the JPMorgan Chase internal **[**339]** document purporting to set forth the bank's LIBOR submission policy. (Berkshire Willig Mem. 5-8.)

We have already analyzed these sources and have already concluded that they establish that while LIBOR represents an offered rate and is not itself a transaction rate, rates observed in actual transactions are, at minimum, properly considered in a bank's determination of its LIBOR submissions. See supra section III.2.3.1. Given that actual transaction rates are properly considered in a panel bank's determination of its LIBOR submissions, they may similarly be properly considered in determining whether a bank's LIBOR submissions were suppressed **[*562]** and whether such suppression can be established through common evidence. Indeed, Berkshire's argument here is particularly surprising given that Dr. Webb constructs a "Bank Funding Rate" series using actual interest rates paid by panel banks in issuing certain funding instruments and compares that rate to LIBOR submissions (Webb Initial Report ¶¶ 41-42), and further given Dr. Webb's concession that "unsecured borrowing transaction[s] by a panel member in the London interbank market [is] are relevant to the LIBOR question (Webb Dep. 24:21-25, Decl. **[**340]** of Jamie Heine ex. 6, July 21, 2017, ECF No. 2105). To conclude, we reaffirm our conclusion that actual transactions are relevant in analyzing whether a panel bank made suppressed LIBOR submissions.

1.2.2. Bid-Initiated and Offer-Initiated Transactions

Second, Berkshire asserts that Dr. Willig did not distinguish transactions initiated by offers from transactions initiated by bids in conducting his analysis, and that this oversight undermines the reliability of his opinions because "'[b]ids' and bid [-initiated] transactions are irrelevant to the LIBOR Question." (Berkshire Willig Mem. 22.)

We are unpersuaded that the distinction between bid-initiated transactions and offer-initiated transactions is a meaningful one. While bids are unquestionably different from offers (or asks), Berkshire provides no credible authority for why bid-initiated transactions would be different from offer-initiated transactions, particularly in the LIBOR context where the parties to interbank transactions are banks, and generally large ones, by definition. Notably, the sources on which the parties rely in advancing their interpretations of the LIBOR question refer to "transaction[s]," with no distinction made **[**341]** between whether the transactions were initiated by a bid or an offer.

Indeed, the price (which in this case is an interest rate) at which a transaction actually occurs will generally represent some compromise between the parties' initial positions after negotiation. Berkshire's primary argument rests on the proposition that the seller's initial position -- the offer -- is a pre-negotiation position distinct from the ultimate transaction rate produced through the negotiation process, which in turn is distinct from the buyer's initial position, the bid. (E.g., Berkshire Willig Reply 4.)

But bid-initiated transaction rates and offer-initiated transaction rates are first and foremost (post-negotiation) transaction rates. That is, bids are distinct from offers, and both are distinct from transaction rates. Berkshire has not established that, within the broader category of transactions, rates will differ post-negotiation based on whether the seller approached the buyer or vice versa.[140]

1.2.3. Contradiction by Bank Documents

Finally, Berkshire contends that the reliability of Dr. Willig's analysis is undermined by "the Panel Banks' own Class Period admissions as to where their LIBOR submissions **[**342]** should be," relying on communications between panel bank employees speculating as to what a panel bank's LIBOR submission should have been. (Berkshire Willig Mem. 24.) Berkshire also suggests that Dr. Willig's reliance on data that is "so unreliable and irrelevant" "can only be explained by . . . **[*563]** 'bad faith.'" (Berkshire Willig Mem. 24.) Neither argument is remotely persuasive.

The comparison of Dr. Willig's interbank transaction rates to but-for LIBOR (and but-for LIBOR submissions) as contemplated by certain panel bank employees is inapt. Berkshire's attempted direct comparison mischaracterizes Dr. Willig's opinions, as it ignores Dr. Willig's statement that his "re-calculations of the LIBOR rates after substituting banks' average London Interbank Borrowing costs for their submissions are not intended to be estimates of but-for rates." (Willig Report ¶ 93 n.80.) Indeed, Dr. Webb comes comparably close to using transaction rates to calculate but-for LIBOR, constructing a "Bank Funding Rate Implied LIBOR" series. (Webb Initial Report ¶ 66.)

Berkshire's additional suggestion that Dr. Willig's decision to analyze interbank transaction data instead of alternative data sources can be explained **[**343]** only by "bad faith" is simply not credible. Berkshire has repeatedly relied on such a comparison over the course of this case, as we have recounted above. Further, Dr. Willig explains -- in portions of his report that Berkshire does not seek to exclude -- why the alternative data sources for which Berkshire advocates (and on which Dr. Webb relies) are inferior choices compared to his analysis of transaction rates. (Willig Report ¶¶ 118-43.) We need not decide whether these explanations are ultimately persuasive in order to conclude that Berkshire's "bad faith" aspersion is wholly miscast.

1.2.4. Conclusion

Berkshire's motion to exclude sections IV through VI of the Willig Report is denied. Even if Berkshire were not bound by the history of its allegations that panel banks suppressed LIBOR by making submissions below their "actual borrowing costs," our review of the LIBOR question itself and other interpretive sources confirms that while LIBOR represents an offered rate, a bank's LIBOR submission should be based on its perception of the rates it would be offered and the "totality of the information" available to it. Berkshire's attempted distinction of bid-initiated transactions and offer-initiated **[**344]** transactions is illusory and does not render Dr. Willig's analysis unreliable; its attempt to paint Dr. Willig's transaction analysis as a calculation of but-for LIBOR is a mischaracterization and fares even worse.

2. Class Certification

Turning to Berkshire's motion for class certification, we consider whether the proposed class complies with the four *Rule 23(a)* requirements, the implied requirement of ascertainability, and the *Rule 23(b)(3)* requirements of predominance and superiority.

---

[140] Berkshire's references to the bid-ask spread are accordingly unavailing. The bid-ask (or bid-offer) spread -- as its name suggests -- refers to bids and asks (or offers) themselves as opposed to bid-initiated transactions and offer-initiated transactions.

2.1. *Rule 23(a)*

Lender defendants do not appear to dispute that the requirements of numerosity and commonality are satisfied, though they do dispute typicality and adequacy of representation. We consider *Rule 23(a)*'s requirements in order.

2.1.1. Numerosity

Berkshire contends that LIBOR-based loans were made "by thousands of financial institutions" such that the numerosity requirement is satisfied. (Berkshire Class Mem. 7) Though Berkshire provides no evidence in support of this assertion, we nonetheless conclude that it is more likely than not that more than 40 institutional lenders made LIBOR-based loans that reset during the class period and that numerosity is therefore satisfied. See *Pa. Pub. Sch. Emps., 772 F.3d at 120*.

2.1.2. Commonality

We also conclude that the proposed class **[**345]** raises at least one common **[*564]** question. ***HN60***[] In the context of "fraud claims based on uniform misrepresentations made to all members of the class," misrepresentation is a common question because "the standardized misrepresentations may be established by generalized proof." *Moore, 306 F.3d at 1253*. Here, Berkshire alleges that panel banks made misrepresentations by making inaccurate LIBOR submissions, and those submissions, which form the basis of published LIBOR, necessarily pertain to all class members.

While Lender defendants correctly point out that proof of misrepresentation, knowledge of falsity, and intent will differ across panel banks and days, these differences do not render these issues individual in nature. Each bank's submission serves as an input into published LIBOR, and published LIBOR is the means through which each class member was impacted by the alleged misrepresentations. And while different class members' LIBOR-based loans are likely to have different reset schedules such that different specific dates are of relevance to different class members, this day-to-day variation is of limited significance in the context of Berkshire's claims of persistent suppression and does not preclude a finding of **[**346]** commonality.

2.1.3. Typicality

Next, Lender defendants contend that Berkshire's claims are not typical because Berkshire in fact has no claim at all. They rely, in particular, on evidence that Berkshire had issued $22 million in LIBOR-based debt, which is greater in face value than the six LIBOR-based loans alleged in the complaint. (Lender Defs.' Class Opp'n 17.) Berkshire responds that the $22 million in "debt"[141] was issued by its holding company, and that Berkshire also held more than $100 million in LIBOR-based auction rate securities. (Berkshire Class Reply 19.)

If an entity had no exposure to LIBOR (or negative exposure such that it benefited from alleged suppression), we would agree that that entity's claim is atypical of the class's claims. Here, however, the factual record on this point remains underdeveloped and makes an assessment of Berkshire's overall exposure to LIBOR difficult. In its complaint, Berkshire alleges that it issued six LIBOR-based loans: (1) a $1.389 million amortizing mortgage; (2) a $2 million amortizing mortgage; (3) a $1.352 million amortizing real estate loan; (4) a $7.364 million commercial revolver; (5) a $5 million revolver; and (6) a $440,000 **[**347]** amortizing loan. (SAC ¶ 20.) These loans total

---

[141] At oral argument, counsel for Berkshire rejected the characterization of the $22 million as "debt" and referred to the instrument in question instead as a "security" and a "securitization." (Hr'g Tr. 61:5-6; 62:9.) We are unsure what exactly counsel meant (as debt would still be a "security"), but counsel did not appear to dispute that the instrument in question resulted in Berkshire's receipt of funds in exchange for payments by Berkshire at an interest rate based on LIBOR.

approximately $18 million in face value (though Berkshire's total LIBOR exposure at any given point in time would be less because many of the loans are amortizing), which is less than the $22 million of LIBOR-based securities issued by Berkshire's holding company. However, neither Berkshire nor Lender defendants have submitted comprehensive evidence of other LIBOR-based instruments that were held by Berkshire or its corporate affiliates during the class period. We ultimately know little about the $22 million "debt," and we know even less about the $100 million in auction-rate securities.

On this record, we conclude that Berkshire's claims are typical of the class's claims. We accept counsel's representation that the $22 million debt issuance was made by Berkshire's holding company and **[*565]** not Berkshire itself (Hr'g Tr. 61:5-7), and by extension the proposition that Berkshire had some positive exposure to LIBOR. In the absence of a full record and assuming Berkshire was a lender with net LIBOR exposure, we agree that the alleged conspiracy to suppress LIBOR is sufficiently central to all class members' claims such that typicality is satisfied. **[**348]**

2.1.4. Adequacy of Representation

HN61[] Adequacy of representation is called into question when "some difference between the class representative and some class members might undermine [the class representative's] incentive" to pursue the class's claims. *In re Payment Card Interchange Fee, 827 F.3d at 231*. "A key element in the determination of whether a plaintiff's interests are antagonistic to those of other members of the class is the relationship between the class representative and class counsel." *In re IMAX Sec. Litig., 272 F.R.D. 138, 155 (S.D.N.Y. 2010)*; see 5 *Moore's Federal Practice § 23.25[2][b][vi]* (3d ed. 2017) ("[I]f a class representative is closely affiliated with class counsel, courts usually consider this to be a disqualifying conflict of interest."); 1 William B. Rubenstein, Newberg on Class Actions § 3:70 (5th ed.) (Westlaw 2017) ("[A] few courts have held class representatives inadequate when they have a close familial or business relationship or friendship with class counsel."); see also *Susman v. Lincoln Am. Corp., 561 F.2d 86, 90 (7th Cir. 1977)* ("[A] majority of courts . . . have refused to permit class attorneys, their relatives, or business associates from acting as the class representative." (footnotes omitted)). This concern arises because "when a class representative is closely associated with class counsel, he or she may permit a settlement less favorable to the interests **[**349]** of absent class members." *In re IMAX, 272 F.R.D. at 155-56* (quoting *In re Discovery Zone Sec. Litig., 169 F.R.D. 104, 108 (N.D. Ill. 1996))*. However, a relationship between a class representative and class counsel "is not inevitably disabling," 1 William B. Rubenstein, Newberg on Class Actions § 3:70 (5th ed.) (Westlaw 2017), and "there is no per se rule against relatives of class counsel serving as class representatives," *Gross v. GFI Grp., Inc., No. 14 Civ. 9438 (WHP), 2017 U.S. Dist. LEXIS 134908, 2017 WL 3668844, at *2 (S.D.N.Y. Aug. 23, 2017)* (quoting *Dupler v. Costco Wholesale Corp., 249 F.R.D. 29, 42 (E.D.N.Y. 2008))*.

Rather, ***HN62***[] whether a close relationship with class counsel renders a named plaintiff inadequate is a fact-intensive inquiry. Cf. *Malchman v. Davis, 761 F.2d 893, 900 n.2 (2d Cir. 1985)* ("[T]he question whether named plaintiffs are adequate class representatives is one committed to the sound discretion of the district court."), abrogated on other grounds by *Amchem, 521 U.S. 591, 117 S. Ct. 2231, 138 L. Ed. 2d 689*. In making this assessment, courts have considered numerous factors such as: (1) the closeness and extent of the relationship, see *Gross, 2017 U.S. Dist. LEXIS 134908, 2017 WL 3668844, at *3*; *In re IMAX, 272 F.R.D. at 156*; (2) whether the related attorney's relationship and role in the litigation have been disclosed, see *Gordon, 92 F. Supp. 3d at 199*; *In re IMAX, 272 F.R.D. at 156*; (3) whether "attorneys' fees will greatly exceed the class representative's recovery," *Spagnola v. Chubb Corp., 264 F.R.D. 76, 96 (S.D.N.Y. 2010)* (quoting *Martz v. PNC Bank, N.A., No. 06-1075, 2007 WL 2343800, at *5 (W.D. Pa. Aug. 15, 2007))*; see also *Gross, 2017 U.S. Dist. LEXIS 134908, 2017 WL 3668844, at *1*; *Gordon, 92 F. Supp. 3d at 200*; and (4) the extent of the related attorney's involvement in the litigation, see *Gross, 2017 U.S. Dist. LEXIS 134908, 2017 WL 3668844, at *1*; *Gordon, 92 F. Supp. 3d at 199*. A "potential conflict of interest" is sufficient to render a named plaintiff an inadequate class representative, *Hale v. Citibank, N.A., 198 F.R.D. 606, 607 (S.D.N.Y. 2001)*; see also *Gordon, 92 F. Supp. 3d at 199* (referring **[**350]** to "the appearance of impropriety"); *In re IMAX, 272 F.R.D. at 157* (same); cf. *Malchman, 761* ***[*566]*** *F.2d at 900 n.2* (observing, in the adequacy of representation context, that "the notion that the appearance of conduct is as important as the conduct itself is a predicate for the Code of Professional Responsibility" (quoting Susman, 561 F.2d at 93)), and a conflict need not violate state law or professional responsibility rules in order to render a named plaintiff inadequate, see Hale, 198 F.R.D. at 607 ("Whether these problematic arrangements violate New York State law or ethics is not before this Court.").

Defendants' class certification papers revealed for the first time that Mordchai Krausz, whom interim class counsel Pomerantz LLP has agreed to pay "15% of the net fees that [Pomerantz] receives for [his] participating in the work and responsibility in connection with [this] litigation," is the son of Berkshire's CEO Moses Krausz (Mishkin Decl. ex. 16), and Mordchai Krausz's extensive history with Berkshire is a newer revelation still (Hr'g Tr. 29:13-14). Applying the factors outlined above, we conclude that Mordchai Krausz's 15% interest in attorneys' fees earned by class counsel is sufficient to create the "appearance of impropriety" and renders Berkshire an inadequate class representative. **[**351]**

First, the relationship between Berkshire, with Moses Krausz as Berkshire's CEO, and Mordchai Krausz is sufficiently close to raise at least some appearance of impropriety. Berkshire correctly identifies that this case is unique in that the named plaintiff is a corporate entity with a board of directors rather than an individual plaintiff, but a close relationship need not be familial in order to raise adequacy issues: "a close familial or business relationship or friendship with class counsel" is enough to do so. 1 William B. Rubenstein, Newberg on Class Actions § 3:70 (5th ed.) (Westlaw 2017) (emphasis added); see also, e.g., Susman, 561 F.2d at 90 ("[C]ourts . . . have refused to permit class attorneys, their relatives, or business associates from acting as the class representative." (emphasis added)). Berkshire's acknowledgement of an extensive business relationship with Mordchai Krausz beyond the context of this litigation (Hr'g Tr. 30:5-9) does not lessen this concern.

This concern is confirmed by the remaining factors that are frequently analyzed in assessing whether a close personal or business relationship precludes a finding of adequacy of representation. Mordchai Krausz's role in this case -- let alone **[**352]** his entitlement to fees -- was not disclosed until recently, and then only by Lender defendants. Further, Mordchai Krausz has not entered a notice of appearance nor has he signed any of the pleadings. See In re IMAX, 272 F.R.D. at 156 ("Even to this day, [the related attorney] has not filed a notice of appearance.").

Further, the amount of attorneys' fees to Pomerantz -- and Mordchai Krausz's 15% share thereof -- is likely to greatly exceed any recovery by Berkshire. Berkshire's complaint alleges a total of $45,861 in damages under its "but-for LIBOR" theory of damages. (SAC ¶ 20.) Mordchai Krausz would stand to receive more than this amount if Pomerantz's fee award were to exceed $305,740; given that this action has been extensively litigated for more than five years and that Berkshire has settled with Citi and HSBC for a combined $27 million, any fee award to Pomerantz is likely to greatly exceed this amount.[142]

[*567] And finally, we find that the record suggests that Mordchai Krausz's role in the litigation has been limited such that a 15% cut of Pomerantz's fees -- potentially 4.5% of the total recovery -- would be disproportionate. Berkshire contends that Mordchai Krausz is experienced and "has assisted substantially **[**353]** in the prosecution of this claim including the review of filings and providing comments to Pomerantz." (Berkshire Class Reply 29.) Even assuming Mordchai Krausz's experience and qualifications, Berkshire's description of his role in this litigation -- having reviewed the pleadings and provided comments to class counsel -- nonetheless suggests a limited role, not an extensive one.

Resisting this conclusion, Berkshire suggests that our power to review proposed settlements for fairness is sufficient to protect the class despite any potential impropriety. (Berkshire Class Reply 30.) Berkshire also identifies four cases in which a class representative was found to provide adequate representation despite a close personal relationship with class counsel: Judge Pauley's recent decision in Gross, 2017 U.S. Dist. LEXIS 134908, 2017 WL

---

[142] If Pomerantz were to seek attorneys' fees equal to 30% of the recovery produced by these settlements (the maximum it may seek), its fee award would be $8.1 million and Mordchai Krausz's share would be $1.22 million. We, of course, reserve judgment on the propriety of these settlements and any attendant application for attorneys' fees that might be made.

3668844, as well as Elias v. Ungar's Food Prods., Inc., 252 F.R.D. 233 (D.N.J. 2007); In re Cardizem CD Antitrust Litig., 200 F.R.D. 326 (E.D. Mich. 2001); and Zakaria v. Gerber Prods. Co., No. LA CV15-00200 JAK, 2016 U.S. Dist. LEXIS 184861, 2016 WL 6662723 (C.D. Cal. Mar. 23, 2016).

Berkshire's first argument cannot be reconciled with Rule 23 or Supreme Court and Second Circuit precedent. **HN63**[] Rule 23(a)(4) requires us to ask whether "the representative parties will fairly and adequately protect the interests of the class," Fed. R. Civ. P. 23(a)(4), not whether we believe the interests of absent class members are being fairly treated, cf. Fed. R. Civ. P. 23(e)(2) ("[T]he court may approve [a settlement] **[**354]** only after a hearing and on finding that it is fair, reasonable, and adequate."). Consistent with this distinction set forth in the structure of Rule 23, the Supreme Court and Second Circuit have made clear that the adequacy of a named plaintiff's representation and the fairness of a subsequent settlement are wholly distinct inquiries. See Amchem, 521 U.S. at 622 ("Federal courts, in any case, lack authority to substitute for Rule 23's certification criteria a standard never adopted -- that if a settlement is 'fair,' then certification is proper."); Denney, 443 F.3d at 268 ("Adequacy must be determined independently of the general fairness review of the settlement."). Indeed, as courts have recognized, "[t]he adequacy of the proposed class representative is widely considered the most important of the Rule 23(a) factors because it directly implicates the due process rights of absent class members who will be bound by the judgment." Gordon, 92 F. Supp. 3d at 198; see also Eisen v. Carlisle & Jacquelin, 391 F.2d 555, 562 (2d Cir. 1968) (concluding, following the 1966 enactment of Rule 23 and its allowance of class actions with preclusive effect, that "a court must now carefully scrutinize the adequacy of representation in all class actions").[143]

Berkshire's reliance on Gross fares no better. Contrary to Berkshire's characterization (Letter from Jeremy **[**355]** Lieberman to the Court, Aug. 25, 2017, ECF No. 2240), the related lawyer's role in Gross had **[*568]** been disclosed: the related lawyer had been named as class counsel, Gross, 2017 U.S. Dist. LEXIS 134908, 2017 WL 3668844, at *1, and a review of the docket shows that not only had the related lawyer entered a notice of appearance well before class certification, but the related lawyer had also been actively involved in litigating the case. He signed a number of the pleadings and motions papers filed by the plaintiff and made a number of court appearances on the putative class's behalf -- including presenting oral argument in opposition to defendants' motion to dismiss. (Gross, No. 14 Civ. 9438, ECF Nos. 1, 37, 44.) Accordingly, Gross's facts are simply not comparable to the facts here. Rather, under the factors identified in Gross which we analyze above, Mordchai Krausz's relationship with Berkshire and his father the CEO -- and his previously undisclosed 15% interest in any attorneys' fees awarded to Pomerantz -- suggests that Berkshire is not an adequate representative. The existence of a "large pool of disinterested investors who could serve as class representatives," In re IMAX, 272 F.R.D. at 157, which we presume to exist based on Berkshire's contention that there are "thousands **[**356]** of financial institutions" meeting the class definition (Berkshire Class Mem. 7), weighs further in favor of such a finding.

We are no more persuaded by Berkshire's additional authorities. In Elias and In re Cardizem, a named plaintiff had a parent-child relationship with a lawyer employed by one of the firms representing the putative class. *Elias, 252 F.R.D. at 244*; In re Cardizem, 200 F.R.D. at 337. Unlike those courts, our concern is not that "named plaintiffs would receive a benefit not available to other class members," *Elias, 252 F.R.D. at 244*, but rather that the class representative "might sacrifice the interests of the class for the benefit of class counsel." 5 Moore's Federal Practice § 23.25[2][b][vi] (3d ed. 2017); see also In re IMAX, 272 F.R.D. at 155-56. Further, there was no indication in those cases that the related lawyers were actively involved in litigating the case in which their relative was serving as named plaintiff, unlike Mordchai Krausz. See *Elias, 252 F.R.D. at 244-45*; In re Cardizem, 200 F.R.D. at 338. The firms in those cases also had a defined role, whereas Mordchai Krausz's role here remains unclear and limited at best. Additionally, the presence of multiple class representatives in those cases reduces the likelihood that a single named plaintiff -- like Berkshire here -- may conduct the litigation in an individually beneficial but class-detrimental

---

143 At oral argument, counsel for Berkshire suggested that we have jurisdiction to preclude Mordchai Krausz from receiving any attorneys' fees that are ultimately awarded to Pomerantz. (Hr'g Tr. 29:7-10.) We are skeptical that our jurisdiction extends to what is ultimately a private contractual agreement between class counsel and an attorney who still has not entered a notice of appearance in this case. But even if our jurisdiction does so extend, such a post hoc remedy would be no more effective than post-settlement fairness review in curing a first-order adequacy problem.

way.[144] Finally, **[**357]** the court in Zakaria explicitly acknowledged that "a relationship between the named plaintiff and class counsel can defeat adequacy of representation," but reasoned that "in general, more than such a relationship must be shown." *2016 U.S. Dist. LEXIS 184861, 2016 WL 6662723, at *6*. Here, Mordchai Krausz's 15% interest in class counsel's attorneys' fees provides that additional factor.

In sum, we conclude that Berkshire is not an adequate representative given the previously undisclosed relationship between Moses Krausz and Berkshire on the one hand and Mordchai Krausz on the other. "We do not suggest that [Berkshire's] representation would in fact be inadequate -- but the possibility of inadequacy and the appearance of impropriety are sufficient for us to deny certification of a class with [Berkshire] as [the only] representative." *In re IMAX, 272 F.R.D. at 157*.

[*569] 2.2. Ascertainability

Lender defendants offer no challenge to the proposed class's ascertainability. Berkshire makes no reference to the implied requirement of ascertainability in its papers, but we nonetheless conclude that the proposed class is ascertainable. The proposed class definition's reference to certain transactions into which a putative class member must have entered serves as the "objective **[**358]** criteria that establish a membership with definite boundaries." *In re Petrobras, 862 F.3d at 269*. Though what exactly constitutes a "lending institution" is not entirely clear, the class definition is nonetheless not "indeterminate in some fundamental way" warranting a finding that the class is not ascertainable. Id.

2.3. Predominance

Because Berkshire is domiciled in New York, we analyze its claims under New York law.[145] See *LIBOR V, 2015 U.S. Dist. LEXIS 149629, at *69, 2015 WL 6696407, at *9-11*. ***HN64***[] "Under New York law, to state a claim for fraud a plaintiff must demonstrate: (1) a misrepresentation or omission of material fact; (2) which the defendant knew to be false; (3) which the defendant made with the intention of inducing reliance; (4) upon which the plaintiff reasonably relied; and (5) which caused injury to the plaintiff." *Wynn v. AC Rochester, 273 F.3d 153, 156 (2d Cir. 2001)* (citing *Lama Holding Co. v. Smith Barney, Inc., 88 N.Y.2d 413, 421, 668 N.E.2d 1370, 646 N.Y.S.2d 76 (1996))*. Lender defendants argue that individual questions predominate because the proposed class raises "individualized issues of reliance, notice, and mitigation." (Lender Defs.' Class Opp'n 19.) We analyze these elements in turn.[146]

2.3.1. Misrepresentation, Knowledge of Falsity, and Intent

As we discuss in our analysis of commonality, the issue of misrepresentation and related issues of knowledge of falsity and intent are common questions: evidence establishing **[**359]** these elements will not differ substantially from class member to class member. See supra section IV.2.1.2.

2.3.2. Reliance

---

[144] Additionally, to the extent Berkshire relies on *In re Cardizem* to suggest that review of settlements for fairness under *Rule 23(e)(2)* may stand in for adequacy of representation under *Rule 23(a)(4)*, we have rejected that contention.

[145] We consider the issue of variations in state substantive law below.

[146] The parties do not address Berkshire's second claim, conspiracy to commit fraud. We accordingly do not consider that claim separately in analyzing predominance.

HN65[] Though misrepresentation is a common question when "fraud claims [are] based on uniform misrepresentations to all members of the class," *Moore, 306 F.3d at 1253*, "[p]roof of misrepresentation -- even widespread and uniform misrepresentation -- only satisfies half of the equation," *McLaughlin, 522 F.3d at 223*.[147] The answer to "the other half, reliance on the misrepresentation" is not dictated by the first half. Id.; see also *Hart v. BHH, LLC, No. 15 Civ. 4804 (WHP), 2017 U.S. Dist. LEXIS 105187, 2017 WL 2912519, at *8 (S.D.N.Y. July 7, 2017)*. In denying Lender defendants' motion to strike Berkshire's class action allegations, we contemplated that "Lender plaintiffs may [be able to] use circumstantial evidence to show that they relied on LIBOR." *Sept. 20, 2016 Order, 2016 U.S. Dist. LEXIS 185766at *69*, ECF **[*570]** No. 1574. However, we also reasoned that "such evidence may be insufficient in the face of, for instance, a showing that the Lender plaintiffs knew about or were indifferent to LIBOR suppression." Id.

We now conclude that reliance in this case is an individual question. "Reliance" on LIBOR (by issuing or holding a LIBORbased loan) is distinct from (legal) reliance on LIBOR's accuracy. As we held in LIBOR IV, the reasonableness of a class member's **[**360]** reliance on LIBOR's accuracy "depends on each particular plaintiff's reasons for investing in LIBOR-based instruments, the alternatives available to each particular plaintiff, each particular plaintiff's ability to investigate the possibility of LIBOR manipulation, and how much credence a reasonable investor would have lent to news articles criticizing LIBOR." *2015 U.S. Dist. LEXIS 147561, at *272, 2015 WL 6243526, at *67*. Answering these questions will require the assessment of plaintiff-specific evidence.

First, different lenders had varying exposures to LIBOR, as some lenders often obtained funding at LIBOR-based interest rates in order to issue LIBOR-based loans. (Kelley Report ¶¶ 97-100; Ordover Repot ¶¶ 66-74.) The extent of a lender's reliance on LIBOR depends, at least in part, on the lender's exposure to LIBOR -- a lender with no net exposure to LIBOR is far more likely to have been indifferent to the level at which LIBOR is set, and is far less likely to have relied on LIBOR at all -- and a lender's net exposure to LIBOR cannot be determined without evidence specific to that lender.

Because of LIBOR's dual nature in the lending context, Berkshire's reliance on In re U.S. Foodservice and Osberg v. Foot Locker, Inc. is unavailing. In re **[**361]** U.S. Foodservice reasoned that "payment may constitute circumstantial proof of reliance upon a financial representation," *729 F.3d at 119*, and Osberg extended this reasoning to hold that receipt of payment may similarly constitute circumstantial proof of reliance, see *No. 07 Civ. 1358 (KBF), 2014 U.S. Dist. LEXIS 158329, 2014 WL 5800501, at *6 (S.D.N.Y. Nov. 7, 2014)*. Neither case addresses a circumstance like that of an institutional lender that both makes and receives payments based on LIBOR.

Berkshire's reliance on cases in the federal securities context is similarly unavailing. We are skeptical that the federal securities framework is applicable to Berkshire's common law fraud claims, as the presumption of reliance often available in the securities fraud context is not available here. See *LIBOR IV, 2015 U.S. Dist. LEXIS 147561, at *264, 2015 WL 6243526, at *65* (*HN66*[] "[T]he common law does not generally recognize a 'fraud on the market' theory of reliance."); see also *Sec. Inv'r Prot. Corp. v. BDO Seidman, LLP, 222 F.3d 63, 73 (2d Cir. 2000)* ("[C]ommon-law fraud claims require a different analysis than those brought under the federal securities regulation scheme.").

---

[147] Berkshire's arguments relying solely on Moore accordingly conflate the issues of misrepresentation and reliance. Moore contrasted fraud claims based on uniform misrepresentations with fraud claims based on individualized misrepresentations and reasoned that the former were "appropriate subjects for class certification because the standardized misrepresentations may be established by generalized proof." *306 F.3d at 1253*. That is, Moore addresses whether misrepresentation is a common question, not reliance. In light of *McLaughlin*, Moore cannot be read to suggest that all putative classes asserting fraud claims based on uniform misrepresentations must be certified.

Similarly, lenders had different reasons for issuing LIBOR and had non-LIBOR alternatives for issuing loans.[148] For example, Berkshire's allegations regarding the omnipresence of LIBOR (Berkshire Class Reply 23) suggest that lenders may have relied on LIBOR despite knowledge of its **[**362]** inaccuracy, and Berkshire acknowledged that its selection of benchmark rates were "determined on a case-by-case basis" (Krausz Dep. 14:24-15:4).

Additionally, lenders likely had different understandings of what LIBOR represents, as evidenced by Berkshire's internally **[*571]** inconsistent views of LIBOR. Though Berkshire now advances a conception of LIBOR as strictly an "offered rate," (Berkshire Willig Mem.), its own representative testified that LIBOR represented "a rate at which the banks actually borrowed in the market" (Krausz Dep. 19:2-7). Berkshire's highly qualified expert witness Dr. Webb has advanced similarly inconsistent opinions on the meaning of LIBOR: in his initial report, for example, Dr. Webb refers to LIBOR as "the prevailing unsecured cost of USD denominated funds borrowed in the London interbank Money Market," opines that LIBOR suppression resulted when panel banks "submitt[ed] quotes which were lower than the rate at which they could actually borrow short term funds in the London inter-bank Money Market," and compares LIBOR submissions to "the actual rates paid by [panel banks] in their issuance of funding instruments linked to USD LIBOR." (Webb Initial Report ¶¶ 14-15, **[**363]** 41.) His rebuttal report, by contrast, emphasizes LIBOR's nature as an offered rate. (Webb Rebuttal Report ¶¶ 52-55.) Given Dr. Webb's lack of consistency on this point and our broader conclusion that the text of the LIBOR question is at least somewhat ambiguous, see supra section III.2.3.1.2, we conclude that lenders having different understandings of LIBOR is not a speculative improbability.

Finally, lenders may have had knowledge of alleged LIBOR suppression. As we held in LIBOR IV, "news articles in Spring 2008 revealed a meaningful probability that LIBOR had been, and continued to be, manipulated," *2015 U.S. Dist. LEXIS 147561, at *271, 2015 WL 6243526, at *67*, and our conclusion that certain lenders may have had knowledge is buttressed by Berkshire's and Dr. Webb's comparison of LIBOR to other publicly available interest rates that correlated closely to LIBOR prior to the alleged suppression. (E.g., SAC ¶¶ 81-97.) To the extent that certain lenders monitored comparable interest rates, this exercise of diligence would tend to undermine any claim of reliance. See *McLaughlin, 522 F.3d at 226* ("[D]ifferences in plaintiffs' knowledge and levels of awareness [may] also defeat the presumption of reliance."). The fact that some of the lenders captured in the class definition **[**364]** are sophisticated financial institutions -- including some that participated in the interbank lending market -- suggests that the probability that some class members had knowledge is not as speculative as Berkshire suggests it to be. (Ordover Report ¶¶ 66- 74.)

Accordingly, we conclude that assessing reliance would require extensive consideration of lender-specific evidence and is an individual question. The uncontroverted evidence in the record (and Berkshire's own testimony) hardly resembles the "bald speculation" found insufficient to render reliance an individual question in *In re U.S. Foodservice, 729 F.3d at 122*.

2.3.3. Statutes of Limitations

Lender defendants contend that statutes of limitations introduce additional individual questions. Berkshire responds, citing *In re Baldwin-United Corp. Litigation, 122 F.R.D. 424, 427-28 (S.D.N.Y. 1986)*, that we should not consider the issue in analyzing predominance because, as a threshold matter, the "existence of affirmative defenses regarding statute of limitations is 'outside the scope of *Rule 23*.'" (Berkshire Class Reply 24 n.18).

This contention is erroneous as a matter of law. As a general matter, the Second Circuit has made clear that ***HN67***[] an assessment of predominance requires consideration of the "elements of the claims and defenses to be litigated." *Nextel, 780 F.3d at 138* (emphasis **[**365]** added) (quoting 1 McLaughlin on Class Actions § 5:23 (11th ed. 2014)); see also *In re Visa Check, 280 F.3d at 138* ("[A] court must examine the relevant facts and both the

---

[148] Further, we note that contrary to Berkshire's suggestion that a class member would not "have purchased LIBOR-based loans without relying on LIBOR" (Berkshire Class Reply 21), Dr. Webb opines that "the prices for floating rate loans/bonds are not affected" by LIBOR. (Webb Rebuttal Report ¶ 139.)

claims and [*572] defenses in determining whether a putative class meets the requirements of Rule 23(b)(3)." (emphasis added)). Though "the question for purposes of determining predominance is not whether a defense exists, but whether the common issues will predominate over the individual questions raised by that defense," In re Visa Check, 280 F.3d at 138, affirmative defenses may, and must, be considered in the predominance analysis.

Statutes of limitations are no exception to this general rule. In holding that statutes-of-limitations issues were beyond the scope of Rule 23, In re Baldwin-United interpreted the Supreme Court's decision in Eisen v. Carlisle & Jacquelin, 417 U.S. 156, 94 S. Ct. 2140, 40 L. Ed. 2d 732 (1974), to forbid the consideration of any merits issues at the class certification stage. See In re Baldwin-United, 122 F.R.D. at 427. That interpretation of Eisen, of course, has since been disavowed by the Second Circuit in In re IPO, see 471 F.3d at 41, and by the Supreme Court in Dukes, see 564 U.S. at 351 & n.6.

In re Community Bank of Northern Virginia & Guaranty National Bank of Tallahassee Second Mortgage Loan Litigation, on which Berkshire mistakenly relies, cogently explains the point. In that case, the Third Circuit questioned (rather than **[**366]** ratified) certain courts' "refus[al] to consider statute-of-limitations issues at the class certification stage," reasoning that Eisen could no longer be read to bifurcate entirely consideration of Rule 23 requirements from consideration of the merits. 622 F.3d 275, 292-93 (3d Cir. 2010). Rather, as the Third Circuit stated, "[s]ituations abound where statute-of-limitations issues overlap with certain of the Rule 23 requirements." Id. at 293. Indeed, "defendants may oppose class certification on the ground that class members with untimely claims must rely on equitable tolling to save their claims, which presents an individual question of law and fact that could predominate over common questions under Rule 23(b)(3), or challenge the predominance requirement in light of the 'presence of idiosyncratic statute-of-limitations issues' among the laws of various states in a nationwide class action." Id. at 293-94 (quoting Waste Mgmt. Holdings, Inc. v. Mowbray, 208 F.3d 288, 295-96 (1st Cir. 2000)).

Indeed, the timeliness of a class member's claim presents an individual issue in this case. Contrary to Berkshire's suggestion (Berkshire Class Reply 24-25), any statute-of-limitations issues impacting the class here are not reducible simply to a question of inquiry notice. Even assuming inquiry notice operates on a classwide basis,[149] inquiry notice is of **[**367]** course only one form of notice; actual notice is no less effective at starting the limitations clock. See, e.g., N.Y. C.P.L.R. § 213(8). Berkshire fails to explain how evidence of actual notice may be presented on anything other than a class member-specific basis, and we accordingly conclude that statute of limitations also presents an individual question.

HN68[] While an affirmative defense "affect[ing] different class members differently . . . does not compel a finding that individual issues predominate," In re Nassau Cty., 461 F.3d at 225 (quoting In re Visa Check, 280 F.3d at 138), the varying applicability of affirmative defenses indisputably weighs on the individual question side of the scale. None of Berkshire's cited authorities -- many of which, including In **[*573]** re Baldwin-United, have been abrogated by In re IPO and Dukes -- establishes the contrary. Cf. Waste Mgmt., 208 F.3d at 296 (noting that while "variations in the sources and application of statutes of limitations will not automatically foreclose class certification under Rule 23(b)(3)," the "necessity for individualized statute-of-limitations determinations invariably weighs against class certification under Rule 23(b)(3)" (emphasis added)).

2.3.4 Damages

Though damages is necessarily an individual question (at least to some extent) in all cases, we find that it **[**368]** is a question of greater significance in this case than in others. Individual inquiry will be required into, at minimum, four aspects of determining damages: (1) what alternative rate a plaintiff would have used, (2) what spread would have been used (and what other terms of the loan would have been) had LIBOR not been suppressed, (3) the

[149] To the extent the Second Circuit held in Schwab that an assessment of whether a plaintiff relied on the BBA's assurances regarding the accuracy of LIBOR is necessary to the statute of limitations inquiry, this additional consideration would confirm that statute-of-limitations issues are individual in nature.

presence and applicability of interest-rate floors, and (4) netting against benefits received from other LIBOR-based instruments.[150]

First, we held in LIBOR V that New York adheres to an out-of-pocket damages rule, the application of which requires a determination of the alternatives that each plaintiff would have used for each loan.[151] See *2015 U.S. Dist. LEXIS 149629, at *69, 2015 WL 6696407, at *9-11*. The record establishes not only that other benchmark rates are available, (Lukens Dep. 143:9-25, 240:7-14; Decl. of Paul Mishkin ex. 18, July 3, 2017, ECF No. 2025), but also that a given loan may be tied to multiple interest rates and not only LIBOR (Ordover Report ¶ 80).

Second, the evidence shows that a floating-rate loan's spread above or below the benchmark rate is subject to negotiation. (Ordover Report ¶¶ 39-40.) Indeed, Berkshire's **[*574]** representative testified that its loans were "individually **[**369]** negotiated," that spreads may be sensitive to changing interest rates, and that "negotiation could be over what benchmark to use as well as over the spread." (Lukens Dep. 36:5-7, 143:12-16, 240:4-6, 271:4-6.)

Third, the record establishes that lenders -- including Berkshire itself -- frequently use interest-rate floors to guard against fluctuations in interest rates. (Kelley Report ¶¶ 102-14.) The inclusion of an interest-rate floor in a loan will tend to reduce the amount of damages attributable to that loan, as the floor places an upper bound on the impact that LIBOR suppression may have had.

Fourth, consistent with our dismissal of Highlander Realty in *LIBOR V, 2015 U.S. Dist. LEXIS 149629, at *52-53, 2015 WL 6696407, at *22-24*, a lender's net exposure to LIBOR is plainly relevant in considering damages. As we have held, "a plaintiff both injured and enriched by illegal activity cannot choose to recover for his injuries yet retain his windfall" where "both result from a single wrong." *Minpeco, 676 F. Supp. at 488* (emphasis omitted) (citing *Abrahamson, 568 F.2d at 878*). While we are cognizant of "the goal of deterrence" and avoiding unjust enrichment of the defendant, *Gordon, 92 F. Supp. 3d at 202*, an undeserved windfall to a plaintiff would be equally inappropriate, see *Minpeco, 676 F. Supp. at 488*. Netting in this case merely represents the economic reality that financial **[**370]** institutions hold both LIBOR-based assets and LIBOR-based liabilities (Kelley Report ¶¶ 97-100), cf. *LIBOR VI, 2016 U.S. Dist. LEXIS 175929, at *9, 2016 WL 7378980, at *3* ("Contrary to Shakespeare's advice,

---

[150] Mitigation presents an additional individualized damages issue, though Lender defendants present mitigation as an affirmative defense. In New York, "a party who claims to have suffered damage by the tort of another is bound 'to use reasonable and proper efforts to make the damage as small as practicable,' and if an injured party allows the damages to be unnecessarily enhanced, the incurred loss justly falls upon him." *Williams v. Bright, 230 A.D.2d 548, 550, 658 N.Y.S.2d 910 (1st Dep't 1997)* (quoting *Blate v. Third Ave. R.R. Co., 44 A.D. 163, 167, 60 N.Y.S. 732 (1st Dep't 1899))*. This assessment of what mitigation would have been "reasonable and proper" is almost necessarily individualized, since it depends on what "practicable" options were available to each lender in order to minimize its damages. Berkshire may very well be correct that in many instances, a lender would not have been required to mitigate its damages (Berkshire Class Reply 25 n.20), but its argument does not challenge the notion that an assessment of what is reasonable and proper will be plaintiff-specific.

[151] Berkshire did not move for reconsideration of LIBOR V, and none of the authorities on which they rely in advocating for reconsideration represent intervening changes in law. We are thoroughly disinclined to reconsider LIBOR V given this delay, but even if we were inclined to reconsider, we would be unpersuaded that cases addressing fraud damages resulting from the purchase and sale of securities under federal law have bearing on the issuance of loans under New York law. See *BDO Seidman, 222 F.3d at 73* ("[C]ommon-law fraud claims require a different analysis than those brought under the federal securities regulation scheme."). Indeed, we read the Second Circuit's Schwab opinion to be in considerable tension with Berkshire's argument, reliant on federal securities law, that its damages should be calculated only as the difference between interest payments received based on actual LIBOR and interest payments received based on but-for LIBOR. See *Schwab, 2018 U.S. App. LEXIS 4519, 2018 WL 1022541, at *15* ("[T]o the extent [a plaintiff] seeks to impose liability for false LIBOR submissions that affected the amount of money it received on instruments it had already purchased, its claims fail. . . . Defendants' LIBOR submissions, possibly occurring months after [the plaintiff] purchased a particular security, bore no relation to that original purchase." (emphasis omitted)).

'Neither a borrower nor a lender be,' the defendant banks are both."), with a perfectly hedged entity such as Highlander being a particularly stark example.[152]

Berkshire contends that Dr. Webb's model can be applied to calculate damages regardless of what alternative a lender would have used, adapted to take into account the effect of loan features such as interest-rate floors, and extended to calculate the effect of LIBOR suppression on other LIBOR-based instruments. (Berkshire Class Reply 16-19.) We excluded Dr. Webb's damages opinions under Daubert, but taking these excluded opinions into account would not alter our conclusion. Even accepting that but-for LIBOR is susceptible to class-wide calculation, individual issues remain in determining which alternative rate a plaintiff would have used, what the but-for spread on each loan would have been, what other terms the loan would have contained (including interest-rate floors), and which other instruments should be taken into account in the netting calculation.[153] The problem is not how to perform **[**371]** the numerical calculations once those plaintiff-specific unknowns have been determined, which the subject that Dr. Webb's excluded opinions address.

The more plaintiff-specific information that must be collected from each class member, the more significant the issue of damages becomes as an individual question. See *Megason v. Starjem Restaurant Corp., No. 12 Civ. 1299 (NRB), 2014 U.S. Dist. LEXIS 3910, 2014 WL 113711, at *6 (S.D.N.Y. Jan. 13, 2014)* ("[A] class action may be certified if the plaintiffs present a damages model capable **[*575]** of calculating damages on a class-wide basis, notwithstanding the 'feasibility-related issue [of] the potential need for manual input' of certain limited information." (emphasis added) (second alteration in original) (quoting *In re U.S. Foodservice, 729 F.3d at 130*)); cf. *Tyson Foods, 136 S. Ct. at 1045* ("An individual question is one where 'members of a proposed class will need to present evidence that varies from member to member.'" (quoting 2 William B. Rubenstein, Newberg on Class Actions § 4:50 (5th ed. 2012))). Because damages cannot be calculated here absent considerable inquiry into each loan held by each plaintiff, damages is an individual question of substantial magnitude.

2.3.5. Variations in State Law

As a threshold matter, Berkshire contends that issues of variation in state substantive law are strictly ones of manageability and not predominance. (Berkshire **[**372]** Class Reply 26-29.) The law counsels otherwise. ***HN69***[] "[V]ariations in state law may swamp any common issues and defeat predominance." *In re U.S. Foodservice, 729 F.3d at 127* (quoting *Castano, 84 F.3d at 741*); see also *In re AIG, 689 F.3d at 242* ("[O]ne of the 'matters pertinent' to a finding of predominance is 'the likely difficulties in managing a class action.'" (quoting *Fed. R. Civ. P. 23(b)(3)(D)*). We accordingly consider whether variations in how fraud is defined under substantive state laws introduce additional individual questions tending to defeat predominance.

"When claims in a class action arise under state law -- and the class comprises multiple states -- the court must consider whether different state laws will apply to different members of the class." *Nextel, 780 F.3d at 140*. "[I]f the forum state's choice-of-law rules require the application of only one state's laws to the entire class, then the representation of multiple states within the class does not pose a barrier to class certification." *Id. at 141*. We therefore assess whether New York's choice-of-law rules require the application of the substantive laws of other states, see id. (citing *Klaxon v. Stentor Elec. Mfg. Co., 313 U.S. 487, 496, 61 S. Ct. 1020, 85 L. Ed. 1477 (1941))*, and conclude (consistent with our prior holdings) that the class's claims are subject to the substantive fraud law of different states, see *LIBOR IV, 2015 U.S. Dist. LEXIS 147561, at *225, 2015 WL 6243526, at *50* ("For the most part, New York law applies, **[**373]** but the parties agree that California, New Jersey, Pennsylvania, Texas, or Virginia law applies to some cases and plaintiffs.").

---

[152] We also find Berkshire's reliance on *Randall, 478 U.S. 647, 106 S. Ct. 3143, 92 L. Ed. 2d 525*, unpersuasive for the reasons we have previously expressed. See supra section III.3.5.4.

[153] Dr. Webb opines that the necessary data may be "extracted in a systematic and comprehensive manner" because lenders tend to be "regulated financial institutions or institutional entities with appropriate bookkeeping and trade capture systems." (Webb Rebuttal Report § 120.) Dr. Webb cites nothing in support of this opinion and we give it correspondingly little weight.

HN70[] Under New York's choice-of-law rules, "the first question to resolve in determining whether to undertake a choice of law analysis is whether there is an actual conflict of laws." Curley v. AMR Corp., 153 F.3d 5, 12 (2d Cir. 1998) (citing In re Allstate Ins. Co. (Stolarz), 81 N.Y.2d 219, 223, 613 N.E.2d 936, 597 N.Y.S.2d 904 (1993)). "[I]f there is a conflict of laws, New York courts apply an 'interests analysis,' under which the law of the jurisdiction having the greatest interest in the litigation is applied." Id. (citing, inter alia, Babcock v. Jackson, 12 N.Y.2d 473, 481, 191 N.E.2d 279, 240 N.Y.S.2d 743 (1963)).

Applying this test, the Appellate Division and numerous courts in this district have concluded that fraud claims are governed by the law of the state in which the injury occurred, which is where the plaintiff maintains its principal place of business. See, e.g., Tradex Glob. Master Fund SPC LTD v. Titan Capital Grp. III, LP, 95 A.D.3d 586, 587, 944 N.Y.S.2d 527 (1st Dep't 2012) ("[P]laintiffs' fraud claim[] is governed by Connecticut law since plaintiffs' principal place of business is in that state."); Dhir v. Carlyle Grp. Emp. Co., No. 16 Civ. 6378 (RJS), 2017 U.S. Dist. LEXIS 162386, 2017 WL 4402566, at *4 (S.D.N.Y. Sept. 29, 2017); Odyssey Re (London) Ltd. v. Stirling Cooke Brown [*576] Holdings Ltd., 85 F. Supp. 2d 282, 292 (S.D.N.Y. 2000), aff'd, 2 F. App'x 109 (2d Cir. 2001). The Second Circuit has also so held in a nonprecedential opinion. Nat'l W. Life Ins. Co. v. Merrill Lynch, Pierce, Fenner & Smith, Inc., 89 F. App'x 287, 288 (2d Cir. 2004) ("Under New York conflict of law principles, fraud claims are governed by the state in which the injury is deemed to have occurred, which is usually where the plaintiff is located."); cf. Geron v. Seyfarth Shaw LLP (In re Thelen LLP), 736 F.3d 213, 220 (2d Cir. 2013) ("[F]or claims **[**374]** based on fraud, the locus of the tort is generally deemed to be the place where the injury was inflicted, rather than where the fraudulent act originated."). Each putative class member's fraud claim is therefore subject to the law of the state of its principal place of business, and we proceed to analyze the substantive differences in fraud causes of action.

HN71[] "[P]utative class actions involving the laws of multiple states are often not properly certified pursuant to Rule 23(b)(3) because variation in the legal issues to be addressed overwhelms the issues common to the class." In re U.S. Foodservice, 729 F.3d at 126-27. Accordingly, "courts routinely deny class certification because plaintiffs' claims would require application of the substantive law of multiple states." In re Currency Conversion Fee Antitrust Litig., 230 F.R.D. 303, 311 (S.D.N.Y. 2004). Nonetheless, "the specter of having to apply different substantive laws does not necessarily warrant refusing to certify a class." Rodriguez v. It's Just Lunch, Int'l, 300 F.R.D. 125, 140 (S.D.N.Y. 2014) (alterations incorporated and internal quotation marks omitted). "[N]ationwide class action movants must creditably demonstrate, through an extensive analysis of state law variances, that class certification does not present insuperable obstacles." In re U.S. Foodservice, 729 F.3d at 127 (alteration in original) (internal quotation marks omitted) (quoting Walsh v. Ford Motor Co., 807 F.2d 1000, 1017, 257 U.S. App. D.C. 85 (D.C. Cir. 1986)). As we previously noted **[**375]** in denying Lender defendants' motion to strike Berkshire's class-action allegations, it appears that "material differences exist between state fraud laws and that proving predominance and superiority will be challenging." Sept. 20, 2016, Order, 2016 U.S. Dist. LEXIS 185766 at *68. In particular, Lender defendants argue that state substantive law varies along three dimensions: reliance, statutes of limitations, and damages.

A first dimension of variation in state substantive law is reliance. As Lender defendants correctly point out, state substantive law varies materially on what suffices to establish reliance and when a would-be plaintiff is charged with a duty to investigate. Berkshire responds that states' substantive standards on reliance fall into only two categories. (Berkshire Class Reply 26-27.)

This response is an oversimplification and is belied by the first appendix to Berkshire's reply brief, which purports to catalog 52 jurisdictions' reliance standards. (Berkshire Class Reply 26 n.21.) We do not canvass Berkshire's state-law appendices for accuracy, but we are skeptical that Berkshire has in fact characterized state law correctly in all instances. For example, Oklahoma appears to impose an absolute duty to investigate, **[**376]** rather than a duty to investigate only if facts make it obvious to the plaintiff that the representation is not true as Berkshire suggests. See Silver v. Slusher, 1988 OK 53, 770 P.2d 878, 882 n.8 (Okla. 1988) ("An action for fraud may not be predicated on false statements when the allegedly defrauded party could have ascertained the truth with reasonable diligence."). Similarly, West Virginia appears to impose a duty to investigate in cases of obvious falsity, rather than possible falsity as Berkshire suggests. See Kidd v. Mull, 215 W. Va. 151, 595 S.E.2d 308, 316 (W. Va. 2004) (describing

[*577] as "consistent" with West Virginia law the formulation of reliance in the Restatement (Second) of Torts: "if [the plaintiff] knows that [the misrepresentation] is false or its falsity is obvious to him").[154]

But even accepting Berkshire's characterization of state substantive law, the first appendix shows three different standards, not two: (1) a "[d]uty to investigate if the plaintiff is aware of facts indicating the representation may be false"; (2) a "[d]uty to investigate only if facts make it obvious to the plaintiff that the representation is not true"; and (3) an unqualified duty to investigate. (Berkshire Class Reply app. I. (emphasis omitted))

Within these broad categories, different states also impose varying standards. **[**377]** For example, within the first broad category (states imposing a duty to investigate if the plaintiff is aware of facts indicating the representation may be false), Iowa, Missouri, South Carolina, and Tennessee appear to consider certain characteristics of the plaintiff while Colorado, Georgia, Illinois, New York, Ohio and Virginia apply a strictly objective standard. Compare, e.g., *Spreitzer v. Hawkeye State Bank, 779 N.W.2d 726, 737 (Iowa 2009)* (considering "the sophistication and expertise of the plaintiff in financial . . . matters" (omission in original)), with, e.g., *Schur v. Sprenkle, 84 Va. Cir. 418 (2012)* (referring to "the ordinary experience of mankind" more broadly (emphasis omitted)). Similarly, within the second broad category (states imposing a duty to investigate only if the facts make it obvious that the representation is not true), California, Kansas, Nevada, North Dakota, and Utah consider obviousness based on a person of comparable "intelligence" or "experience," whereas Rhode Island appears to apply a strictly objective "reasonable person" standard. Compare, e.g., *Collins v. Burns, 103 Nev. 394, 741 P.2d 819, 821 (Nev. 1987)* (referring to "any normal person of his intelligence and experience"), with, e.g., *Boisse v. Miller, No. WC 2003-0281, 2013 R.I. Super. LEXIS 155, 2013 WL 4235342, at *17 (R.I. Super. Aug. 8, 2013)* (referring only to "a reasonable person").

A second dimension of variation in state **[**378]** substantive law is the statute of limitations. In LIBOR IV, we remarked that "[t]he states apply many variations on the 'discovery' theme, so we must analyze the discovery rules of each state separately." *LIBOR IV, 2015 U.S. Dist. LEXIS 147561, at *417, 2015 WL 6243526, at *126*. Berkshire counters that variations in discovery rules and notice standards present no predominance issue, asserting that we have previously held that in the context of discovery rules, "constructive notice occurred as to all class members (except under California law) on May 29, 2008" (Berkshire Class Reply 27).[155] Berkshire does not explain why such a holding precludes actual notice to a **[*578]** plaintiff prior to May 29, 2008 or why this holding alleviates our concern regarding variations in statutes of limitations and discovery rules (which, as we have held, some states do not apply at all). See *LIBOR IV, 2015 U.S. Dist. LEXIS 147561, at *417, 2015 WL 6243526, at *126-33, slip op. at *303-17* (analyzing state-by-state variations in statutes of limitations and discovery rules).[156] Further, as Berkshire

[154] Berkshire's extensive reliance on state trial court decisions also does little to reassure us of the accuracy of its state-law appendices, particularly when states' highest courts or intermediate appellate courts have addressed the questions at issue. Cf. *Levin v. Tiber Holding Corp., 277 F.3d 243, 253 (2d Cir. 2002)* ("[T]his Court, sitting in diversity, must follow the holdings of [a state's highest court] and must reject inconsistent rulings from its lower courts."); ***County of Westchester v. Comm'r of Transp., 9 F.3d 242, 245 (2d Cir. 1993)*** ("[T]he highest court of a state has the final word on the meaning of state law." (internal quotation marks omitted)).

[155] Berkshire does not reference a particular holding, but we presume this statement refers either to our holding in LIBOR IV that "exchange-based plaintiffs were on constructive notice of news articles relating to LIBOR by May 29, 2008" under federal law, *LIBOR IV, 2015 U.S. Dist. LEXIS 147561, at *431, 2015 WL 6243526, at *133* (emphasis added), or to our holding in LIBOR V that "we consider [a now-dismissed Lender plaintiff] to have been on inquiry notice by May 29, 2008" under Puerto Rico law, *LIBOR V, 2015 U.S. Dist. LEXIS 149629, at *77, 2015 WL 6696407, at *12*.

[156] Lender defendants also suggest that the extent to which states recognize class-action tolling, and the extent to which states recognize cross-jurisdictional tolling in particular, introduces another degree of variation under the broad umbrella of statutes of limitations. (Lender Defs.' Class Opp'n 27.) Because we are to apply state class-action tolling law when analyzing claims asserted under state law, see *Casey v. Merck & Co., 653 F.3d 95, 100 (2d Cir. 2011)*, we engaged in an extensive analysis of cross-jurisdictional tolling in LIBOR IV, see *2015 U.S. Dist. LEXIS 147561, at *444-45, 2015 WL 6243526, at *138-47*. But cross-jurisdictional tolling is not implicated in this context: the operative question is whether the filing of this putative class action in this

concedes (Berkshire Class Reply 27), California's treatment of inquiry notice based on news articles is unique, see *LIBOR IV, 2015 U.S. Dist. LEXIS 147561, at *419, 2015 WL 6243526, at *127*, and the Second Circuit has emphasized that this assessment requires analysis of when "the plaintiff was aware of the reporting in question," *Schwab, 2018 U.S. App. LEXIS 4519, 2018 WL 1022541, at *19* (emphasis added), which in turn **[**379]** requires plaintiff-specific evidence.

A third dimension of variation in state substantive law is the damages methodology that is to be applied. Lender defendants correctly identify that some states always apply a "benefit of the bargain" rule, some states (like New York) always apply an "out of pocket" rule, and other states allow for either measure of damages depending on the circumstances.[157] (Lender Defs.' Class Opp'n 27.) Berkshire acknowledges the difference between benefit-of-the-bargain damages and out-of-pocket damages, but contends that 48 of 52 jurisdictions apply benefit-of-the-bargain while the remaining four apply out-of-pocket. (Berkshire Class Reply 27.)

This response is again an oversimplification and is again belied by Berkshire's state-law appendices. While the ultimate amount of damages in each state is calculated using two different formulae, complexity nonetheless arises in determining which rule to apply in the states allowing both forms of damages. And indeed, states differ in that decision rule: for example, according to Berkshire's own state-law appendix, Ohio **[**380]** defaults to the out-of-pocket rule while Washington defaults to the benefit-of-the-bargain rule. Compare, e.g., *Northpoint Props. v. Charter One Bank, 2011-Ohio-2512, ¶ 34 (Ct. App. 8th Dist. 2011)* ("The out-of-pocket rule is normally applied to determine the measure of damages for a fraudulent misrepresentation."), with, e.g., *Enger v. Richards, 134 Wash. App. 1068 (1st Div. 2006)* ("Courts generally apply the benefit of the bargain rule when plaintiffs seek recovery for general damages caused by misrepresentation or fraud.").

In sum, we conclude that variations in state substantive law introduce individual **[*579]** questions along at least three dimensions and therefore weigh against a finding of predominance.[158] Berkshire's state law appendices fall short of the "extensive analysis" needed to establish that variations in state law do not present "insuperable obstacles" to certification. *In re U.S. Foodservice, 729 F.3d at 127*.

2.3.6. Conclusion

Common issues do not predominate over individual ones. While the question of misrepresentation is a common issue, this common question is outweighed by the individual questions presented by reliance, damages, affirmative defenses, and variation in state laws. Though the presence of any one of these individual questions may be insufficient to support a finding of no predominance standing alone, see, **[**381]** e.g., *Roach, 778 F.3d at 408*; *In re Nassau Cty., 461 F.3d at 225*; *Hart, 2017 U.S. Dist. LEXIS 105187, 2017 WL 2912519, at *8*, these individual questions, when taken together, significantly outweigh common ones.

---

district would, under the law of the 56 jurisdictions, toll the applicable statute of limitations for each absent class member in a suit in this district. Therefore, class-action tolling is implicated only to the extent a state does not recognize class-action tolling at all.

[157] Lender defendants additionally suggest that the substantive law of mitigation also differs across states, though they do not identify any specific conflicts. (Lender Defs.' Class Opp'n 24.) Berkshire does not respond to this contention, but suggests instead that mitigation is irrelevant. (Berkshire Class Reply 25 n.20.) We reject the notion that mitigation is irrelevant to the damages analysis and conclude that to the extent state laws in fact differ on the issue of mitigation, such variation would introduce a further layer of complexity into the state-by-state damages analysis.

[158] In analyzing variations in state law, we have generally set aside the question of whether "[d]ifferent legal standards are masquerading behind similar legal labels." 18 Charles A. Wright et al., Federal Practice & Procedure § 4417 (3d ed.) (Westlaw 2017). As the Supreme Court has recognized in analyzing preclusion, courts in different jurisdictions may apply identically worded provisions differently, see *Smith v. Bayer Corp., 564 U.S. 299, 309, 131 S. Ct. 2368, 180 L. Ed. 2d 341 (2011)*, and these differences would amplify the variations we have already identified. While this concern is somewhat alleviated in this context because state substantive law need not be exactly identical to permit grouping, the likelihood remains that different states will interpret terms that are identical or similar terms in sufficiently different ways such that grouping would be improper.

2.4. Superiority

Finally, we consider whether class-action status in this case would be superior to the maintenance of individual actions. Our analysis is again guided by the factors set forth in *Rule 23(b)(3)*.

We find that the second factor, the extent and nature of any litigation already begun, and the third factor, the desirability of concentrating litigation in this forum, support a finding of superiority. Only a limited number of suits advancing a loan-based theory of injury attributable to LIBOR suppression were commenced, and concentration here is desirable for the reasons stated by the JPML in creating this multidistrict litigation in the first instance. See *In re LIBOR-Based Fin. Instruments Antitrust Litig., 802 F. Supp. 2d at 1381*.

As to class members' interests in individually controlling the prosecution of separate actions under *Rule 23(b)(3)(A)*, we are less confident that a class action is superior simply because the cost of prosecuting a separate action would exceed damages to each class member. (Berkshire Class Mem. 22, 26.) Indeed, the argument that superiority is established simply because individual actions "may not be pursued, [and] would be less efficient and lead to conflicting **[**382]** results," begs the superiority question and proves far too much: this reasoning could be deployed in almost every putative class action. As we explained in analyzing superiority in the Exchange-based action, this case does not resemble the type of consumer fraud class actions where damages are small in magnitude for each class member but certain in existence. See supra section III.3.6.

But even absent this skepticism, a class action is not superior because of manageability problems presented by the absence of predominance and the presence of variations in state law. See *Sykes, 780 F.3d at 82* ("[M]anageability 'is, by the far, the most critical concern in determining whether a class action is a superior means of adjudication.'" (quoting 2 William B. Rubenstein, Newberg on Class Actions **[*580]** § 4:72 (5th ed.) (Westlaw 2014)). As we explain above, Berkshire has not established that certification of a nationwide class "does not present insuperable obstacles" to management. *In re U.S. Foodservice, 729 F.3d at 127*. The creation of 56 subclasses (for 50 states plus 6 territories) would be unmanageable, see Manual for Complex Litigation § 21.23 (4th ed. 2004) ("The creation of a number of subclasses . . . may make the case unmanageable [and] may defeat the superiority requirement."), and Berkshire **[**383]** has not sufficiently established that grouping would alleviate our concerns about variations in state substantive law or that such grouping -- which would occur along three different dimensions -- would be manageable. "While numerous courts have talked-the-talk that grouping of multiple state laws is lawful and possible, very few courts have walked the grouping walk." *In re Pharm. Indus. Average Wholesale Price Litig., 252 F.R.D. 83, 94 (D. Mass. 2008)*.

Anticipating this issue, Berkshire contends that any manageability concerns are overblown. (Berkshire Class Reply 28.) Berkshire invokes the Second Circuit's identification of "a number of management tools available to a district court to address any individualized damages issues that might arise in a class action, including: (1) bifurcating liability and damage trials with the same or different juries; (2) appointing a magistrate judge or special master to preside over individual damages proceedings; (3) decertifying the class after the liability trial and providing notice to class members concerning how they may proceed to prove damages; (4) creating subclasses; or (5) altering or amending the class." *In re Visa Check, 280 F.3d at 141* (footnote omitted).

These tools address our manageability concerns, which are rooted in variations in state substantive **[**384]** law, only minimally. The first three pertain to individualized issues of damages and are not responsive. We have also rejected the creation of numerous subclasses, as the number of state-law subclasses required here would remain generally unmanageable. And finally, because Berkshire offers no serious argument that we should consider modification of the class definition or issue certification, we will not consider whether those approaches would be viable in this action. See *Lundquist, 993 F.2d at 14*.

2.5 Conclusion

Berkshire's motion to certify a Lender class is denied. While Berkshire has established the numerosity, commonality, and typicality requirements of *Rule 23(a)(1) through (3)*, we find that Berkshire would not be an adequate representative based on the previously undisclosed fee arrangement between Mordchai Krausz and interim class counsel. While our doubts about Berkshire's adequacy as a class representative is sufficient to preclude certification, the joinder of additional named plaintiffs that would fairly and adequately represent the class still would not render class certification appropriate, as we also conclude that common questions do not predominate over individual ones and that class-action status would not be superior **[**385]** to the maintenance of individual actions.[159]

[*581] V. OTC ACTION

OTC plaintiffs seek certification of a class defined as follows:

> All persons or entities residing in the United States that purchased, directly from a Panel Bank (or a Panel Bank's subsidiaries or affiliates), a LIBOR-Based Instrument that paid interest indexed to a U.S. dollar LIBOR rate set any time during the period August 2007 through August 2009 ("Class Period") regardless of when the LIBOR-Based Instrument was purchased.

The proposed class definition in turn defines "LIBOR-Based Instrument" and excludes certain entities and individuals associated with panel banks:

> "LIBOR-Based Instrument" means an interest rate swap or bond/floating rate note that includes any term, provision, obligation or right for the purchaser or counterparty to be paid interest by a Panel Bank (or a Panel Bank's subsidiaries or affiliates) based upon the 1 month or 3 month U.S. dollar LIBOR rate. For the avoidance of doubt, the term LIBOR-Based Instrument does not include instruments on which a Panel Bank (or a Panel Bank's subsidiaries or affiliates) does not pay interest, such as bonds/floating rate notes issued by entities other than Panel Banks (or Panel **[**386]** Banks' subsidiaries or affiliates). Nor does the term include instruments that include only a term, provision, or obligation requiring the purchaser or counterparty to pay interest, such as business, home, student or car loans, or credit cards.
>
> Excluded from the class are panel banks and their employees, affiliates, parents, and subsidiaries and any judicial officers and staff presiding over this action. "Panel Bank" means Bank of America, Bank of Tokyo Mitsubishi, Barclays Bank, Citibank, Credit Suisse, Deutsche Bank, HBOS, HSBC, JPMorgan, Lloyds, Norinchukin, Rabobank, Royal Bank of Canada, Royal Bank of Scotland, Societe Generale, UBS, and West LB (n/k/a Portigon).

The operative Corrected Third Consolidated Amended Complaint identifies six named plaintiffs: the Mayor and City Council of Baltimore, Maryland; the City of New Britain, Connecticut; Vistra Energy Corp.; Yale University; Jennie Stuart Medical Center, Inc.; and SEIU Pension Plans Master Trust (SEIU). (Corrected Third Consolidated Am. Compl. ("CTAC") ¶¶ 12-17, Apr. 20, 2017, ECF No. 1857.) Because OTC plaintiffs' claims may be asserted only against panel banks with which named plaintiffs transacted,[160] panel banks Bank of America, **[**387]** Barclays,

---

[159] Though it does not affect our resolution of the motions, the parties are reminded that this Court's individual rules of practice and *Local Civil Rule 11.1(b)(3)* specify the formatting to be applied to motions papers, including memoranda of law: "all text must be double-spaced, except for headings, text in footnotes, or block quotations, which may be single-spaced." Double-spaced means double-spaced. Not 1.9x spaced, not 1.8x spaced, and certainly not approximately 1.75x spaced as Berkshire's papers are.

[160] This limitation derives from two sources: first, our holding in LIBOR III that OTC plaintiffs lack Article III standing to assert claims against panel banks with which they did not transact, see *LIBOR III, 27 F. Supp. 3d at 482* ("[OTC] plaintiffs' [state law] claims against non-counterparty banks do not meet the threshold Article III standing requirements." (citing *NECA, 693 F.3d at 159*)); see also *NECA, 693 F.3d at 159* ("[T]o establish Article III standing in a class action . . . for every named defendant there must be at least one named plaintiff who can assert a claim directly against that defendant." (omission in original) (quoting *Merck-Medco, 504 F.3d at 241*)); and second, our holdings in LIBOR VI that a plaintiff who did not transact with a panel bank is

Citi, Credit Suisse, Deutsche Bank, JPMorgan Chase, Royal Bank of Canada (RBC), and UBS (and certain affiliates of these panel banks) are named as defendants (collectively, "OTC defendants"); the remaining panel banks are not. (CTAC ¶¶ 18-39.)

[*582] OTC plaintiffs assert three claims: antitrust claims under the *Sherman Act*, breach of the implied covenant of good faith and fair dealing under state law, and unjust enrichment under state law. (CTAC ¶¶ 378-409.) The state-law claims were asserted against all defendants, but our rulings in LIBOR VI dismissed the antitrust claims against all defendants except Bank of America, Citi, and JPMorgan Chase, see *2016 U.S. Dist. LEXIS 175929, at *67, 2016 WL 7378980, at *25*, slip op. at app. A-1.

In June 2017, SEIU sought to withdraw as a named plaintiff. (Letter from William Carmody to the Court, June 15, 2017, ECF No. 1981.) We granted this request, see June 26, 2017 Order, ECF No. 1992, which resulted in none of the remaining named plaintiffs having transacted with Credit Suisse or RBC. We allowed the substitution of the Bucks County Water and Sewer Authority ("Bucks County") as a named plaintiff, which thereby preserved the class's Article III standing against RBC.[161] **[**388]** See *Sept. 8, 2017 Order, 2017 U.S. Dist. LEXIS 155700, 2017 WL 4174925*, ECF No. 2256. We also dismissed, consistent with our holding in LIBOR III, Credit Suisse as a defendant. See Sept. 29, 2017 Order, ECF No. 2291.[162]

Settlements between the OTC plaintiffs and certain panel banks have narrowed the scope of claims remaining in this action as well. We have preliminarily approved the OTC plaintiffs' settlements with Barclays and Citi, and OTC plaintiffs have moved for final approval.[163] (Letter from Michael Hausfeld to the Court, Sept. 22, 2017, ECF No. 2277 (Barclays); Letter from Michael Hausfeld to the Court, Dec. 15, 2017, ECF No. 2381 (Citi).) OTC plaintiffs have also settled with Deutsche Bank. (Feb. 27, 2018 Motion, ECF No. 2448.)[164]

Accordingly, OTC plaintiffs' antitrust claims remain only against Bank of America and JPMorgan Chase. The state-law implied covenant and unjust enrichment claims remain against Bank of America, JPMorgan Chase, RBC, and UBS. Having delineated the scope of the claims remaining in this action, we turn to the pending Daubert and class certification motions.

[*583] 1. Daubert Motion against Dr. Stiglitz

---

not an efficient enforcer of the antitrust laws against that panel bank and therefore lacks antitrust standing to assert antitrust claims against that panel bank, see *LIBOR VI, 2016 U.S. Dist. LEXIS 175929, at *52-53, 2016 WL 7378980, at *16*.

[161] No amended complaint incorporating Bucks County's claims against RBC has yet been filed.

[162] When we allowed Bucks County's substitution, we cautioned that the withdrawal of SEIU presented "a unique situation which required a departure from the Court's schedule in the interest of justice" and expressly reserved judgment on whether Bucks County is an adequate representative with typical claims. *Sept. 8, 2017 Order, 2017 U.S. Dist. LEXIS 155700, at *99, 2017 WL 4174925, at *1*. We initially dismissed Credit Suisse without prejudice, reasoning that "OTC plaintiffs may move to add a named plaintiff that transacted with Credit Suisse." Sept. 29, 2017 Order, at *slip op. at *1. But in the intervening six months, OTC plaintiffs have not moved to add a named plaintiff that transacted with Credit Suisse. Thus, no named plaintiff has Article III standing to sue Credit Suisse, and any attempt to add such a plaintiff (or a plaintiff who transacted with any panel bank not currently a defendant) at this juncture of the action would be untimely and unduly prejudicial as a matter of law. Cf. *Block v. First Blood Assocs., 988 F.2d 344, 350 (2d Cir. 1993)* ("In determining what constitutes 'prejudice,' we consider whether the assertion of the new claim would: (i) require the opponent to expend significant additional resources to conduct discovery and prepare for trial; [or] (ii) significantly delay the resolution of the dispute."). We therefore again dismiss Credit Suisse as a defendant, but with prejudice this time.

[163] We held fairness hearings on both of these settlements, (Oct. 23, 2017 Hr'g Tr., ECF No. 2344 (Barclays); Jan. 23, 2018 Hr'g Tr., ECF No. 2427 (Citi)), and deferred consideration of final approval until our resolution of these class certification motions.

[164] Though no longer a defendant following our personal jurisdiction rulings in LIBOR III and LIBOR VI, HSBC has also settled with the OTC plaintiffs. (Feb. 23, 2018 Motion, ECF No. 2442.)

In litigating class certification, the parties offer a significant amount of expert testimony. OTC plaintiffs **[**389]** offer one report from Dr. Joseph Stiglitz dated February 2, 2017 (Decl. of Michael Kelso ex. 1, May 10, 2017, ECF No. 1906) and two reports from Dr. B. Douglas Bernheim: (1) an initial report dated February 2, 2017 (Decl. of Michael Kelso ex. 2, May 10, 2017, ECF No. 1906); and (2) a rebuttal report dated May 9, 2017 (Decl. of Michael Kelso ex. 3, May 10, 2017, ECF No. 1906). We refer to these as the Stiglitz Report, the Bernheim Initial Report, and the Bernheim Rebutal Report, respectively. OTC defendants offer one report from Dr. Robert Willig dated April 3, 2017 (Decl. of Jamie Heine ex. 1, July 1, 2017, ECF No. 2031), and two expert reports from Dr. Janusz Ordover: (1) an initial report dated April 21, 2017 (Decl. of Abram Ellis ex. 1, July 3, 2017, ECF No. 2033); and (2) a sur-rebuttal report dated July 3, 2017 (Decl. of Abram Ellis ex. 2, July 3, 2017, ECF No. 2033). We refer to these as the Willig report, the Ordover Initial Report, and the Ordover Rebuttal Report, respectively. Only one Daubert motion, against Dr. Stiglitz, was filed in this action.

Dr. Stiglitz[165] offers a number of opinions in his report, identifying the "important economic features of the LIBOR process" (Stiglitz **[**390]** Report ¶¶ 13-17); discussing the "importance of LIBOR in financial markets" (Stiglitz Report ¶¶ 18-24); addressing the relationship between "LIBOR and competition in financial markets" (Stiglitz Report ¶¶ 25-43); concluding that "LIBOR submitters have economic incentives to collude" (Stiglitz Report ¶¶ 44-51); and finally opining that "LIBOR contributors' actions were inconsistent with non-collusive independent behavior" (Stiglitz Report ¶¶ 52-59). In addition, Dr. Stiglitz opines that all of his analysis and the evidence on which he relies "are common to all plaintiffs and class members described in Plaintiffs' Compliant [sic]." (Stiglitz Report ¶ 61.) Despite these broad headings, Dr. Stiglitz's opinions defy easy categorization. Accordingly, rather than parse through Dr. Stiglitz's report paragraph by paragraph in order to salvage the admissible portions, cf. *In re Pfizer, 819 F.3d at 665*, we set forth several principles governing the admissibility of Dr. Stiglitz's opinions.[166]

Dr. Stiglitz offers a number of opinions that collusion in LIBOR resulted in the distortion of capital markets and impeded effective regulatory oversight. (E.g., Stiglitz Report ¶ 28.) Because OTC plaintiffs have not seriously **[**391]** alleged that type of harm and do not claim damages based on this harm, Dr. Stiglitz's opinions to that effect are accordingly irrelevant and inadmissible. See *Raskin, 125 F.3d at 66 & n.5*. Additionally, Dr. Stiglitz offers several opinions based on alleged collusion in other financial indices, including foreign-currency LIBOR, Euribor, and ISDAFix. **[*584]** (E.g., Stiglitz Report ¶¶ 41-42.) These opinions are likewise irrelevant to the analysis of USD LIBOR, see *LIBOR IV, 2015 U.S. Dist. LEXIS 147561, at *201, 2015 WL 6243526, at *45*; cf. *Fed. R. Evid. 404(b)*, and are inadmissible, see *Nimely, 414 F.3d at 397*. Finally, Dr. Stiglitz may not offer opinions that purport to interpret documents like trader communications, government reports, and orders issued by regulatory authorities. (E.g., Stiglitz Report ¶¶ 52-59.) These opinions are not the product of Dr. Stiglitz's expertise, as the documents he purports to interpret are equally understandable by the trier of fact at this stage, and these opinions are therefore inadmissible.[167] See *Jiau, 734 F.3d at 154*.

OTC defendants' motion to exclude Dr. Stiglitz's opinion is therefore granted in part and denied in part. Dr. Stiglitz may not offer opinions relating to the distortion of capital markets, those relating to alleged collusion in indices other than USD LIBOR, and those purporting to interpret **[**392]** trader communications, government reports, and similar

---

165 OTC defendants do not challenge Dr. Stiglitz's qualifications. We agree that he is qualified to offer the opinions presented in his report.

166 We also note, as a threshold matter, the limited relevance of Dr. Stiglitz's opinions at the class certification stage. The vast majority of Dr. Stiglitz's opinions consider whether the defendants could have engaged, and did engage, in collusion, with his opinions that the evidence necessary to prove such collusion is common and class-wide seemingly appended as an afterthought. As OTC plaintiffs themselves have reminded us, class certification is not an appropriate time for a full-on inquiry into the merits to the extent they do not overlap with *Rule 23*. See, e.g., *In re IPO, 471 F.3d at 41-42*. Nonetheless, because Dr. Stiglitz does opine that evidence of collusion will be common to all class members (e.g., Stiglitz Report ¶ 61), his report maintains some minimal relevance such that its wholesale exclusion is not warranted.

167 This conclusion is consistent with our holdings in the Exchange-based action, where we held that Exchange plaintiffs' experts Dr. Netz and Mr. Beevers may not offer opinions interpreting trader communications and other documents readily understandable by the trier of fact. See supra section III.1.2.1; section III.1.3.2.2.

documents. Additionally, based on OTC plaintiffs' concession that Dr. Stiglitz's opinions are limited and do not extend to "collusion's impact, its direction (suppression or inflation) or its magnitude," (OTC Pls.' Stiglitz Opp'n 11), Dr. Stiglitz may not opine on those subjects. The remainder of Dr. Stiglitz's opinions remain admissible, though their limited evidentiary basis will reduce the weight to which his opinions might otherwise be entitled.

2. Class Certification

Turning to class certification, we first consider issues of standing before addressing the *Rule 23(a)* requirements and the predominance and superiority requirements of *Rule 23(b)(3)*.

2.1. Standing

Following SEIU's withdrawal, each remaining named plaintiff alleges that it purchased LIBOR-based interest-rate swaps from panel banks; none asserts that it purchased LIBOR-based bonds (including floating-rate notes) from any panel bank. (CTAC ¶¶ 12-16.) OTC defendants contend that the named plaintiffs therefore lack both Article III standing and class standing to assert claims on behalf of bondholders. (OTC Defs.' Class Opp'n 29-30; OTC Defs.' Suppl. Opp'n 5.) They rely heavily on Sonterra Capital **[**393]** Master Fund, Ltd. v. UBS AG, a case alleging manipulation of Yen LIBOR and the Tokyo Interbank Offered Rate, in which Judge Daniels concluded that interest-rate swaps and forward rate agreements (FRAs) were sufficiently different such that plaintiffs transacting only in swaps "could not have suffered any injury traceable to [FRAs] and lack [Article III] standing to bring these claims." *No. 15 Civ. 5844 (GBD), 2017 U.S. Dist. LEXIS 38252, 2017 WL 1091983, at *2 (S.D.N.Y. Mar. 10, 2017)*.

OTC plaintiffs respond that swaps and bonds are sufficiently similar such that they have both Article III and class standing. (OTC Pls.' Class Reply 28-30.) They rely heavily on Sullivan v. Barclays Plc, a case alleging manipulation of Euribor, in which Judge Castel concluded that interest-rate swaps and forward rate agreements were sufficiently similar such that named plaintiffs transacting only in swaps had standing to represent absent class members transacting in FRAs, because "any harm suffered by a party to an FRA as a result of the Euribor's manipulation **[*585]** would have been caused by the identical misconduct of the identical parties." *No. 13 Civ. 2811 (PKC), 2017 U.S. Dist. LEXIS 25756, 2017 WL 685570, at *8 (S.D.N.Y. Feb. 21, 2017)*.

We are not entirely persuaded by OTC defendants' reliance on Sonterra. The Article III inquiry asks whether plaintiffs have suffered an injury-in-fact traceable to defendants' challenged behavior, **[**394]** not whether they have suffered a specific form of injury-in-fact. Injury suffered on swap purchases as a result of LIBOR suppression is not meaningfully different in the Article III context from injury suffered on bond purchases as a result of LIBOR suppression. Rather, named plaintiffs need only establish some injury from LIBOR manipulation, irrespective of the specific type of financial instrument on which that injury was incurred, to establish Article III standing; they have done so here. To the extent that differences between types of financial instruments raise "standing" considerations, they raise issues of class standing, not Article III standing.

To establish class standing to represent absent class members, a named plaintiff must "plausibly allege[] (1) that he personally has suffered some actual injury as a result of the putatively illegal conduct of the defendant, and (2) that such conduct implicates the same set of concerns as the conduct alleged to have caused injury to other members of the putative class by the same defendants." *RBPA, 775 F.3d at 161* (quoting *NECA, 693 F.3d at 162*). Consistent with our conclusion as to Article III standing, we first conclude that named plaintiffs have alleged that they have suffered **[**395]** actual injury on swaps purchased from panel banks as a result of defendants' alleged suppression of LIBOR during the class period. Second, we conclude that "such conduct" -- alleged LIBOR suppression during the class period -- is the same conduct that caused injury to absent class members purchasing bonds. Because the conduct in question is the same, NECA's second "same set of concerns" prong is satisfied. Accordingly, even though the named plaintiffs transacted only in swaps with panel banks, they nonetheless have class standing to represent absent class members transacting in bonds.

Despite this conclusion, we note that OTC plaintiffs' reliance on Sullivan is not entirely persuasive here. Interest-rate swaps and forward rate agreements are economically closer in nature than swaps and bonds. Compare *LIBOR VI, 2016 U.S. Dist. LEXIS 175929, at *55-56, 2016 WL 7378980, at *19* ("An interest rate swap is an instrument in which 'two parties agree to exchange interest rate cash flows, based on a specified notional amount from a fixed rate to a floating rate (or vice-versa) or from one floating rate to another.'"), with *Sullivan, 2017 U.S. Dist. LEXIS 25756, 2017 WL 685570, at *7* ("In an FRA, the parties contract for payment at a settlement date, with the amount due based on the difference between an agreed-upon, fixed 'forward **[**396]** rate' and a fluctuating 'market rate' set by the Euribor."). Unlike these "highly negotiated" two-way transactions, bond purchases are "non-negotiated." *LIBOR VI, 2016 U.S. Dist. LEXIS 175929, at *56, 2016 WL 7378980, at *18, *20*. But despite these difference in negotiability, we recognized that "[a]t bottom, swapholders are in a position similar to bondholders" with respect to LIBOR suppression, *2016 U.S. Dist. LEXIS 175929, at *58, [WL] at *20*; these differences therefore do not alter the ultimate outcome of the class standing analysis.

We conclude that differences between swaps and bonds do not, as a general matter, render the swap-only named plaintiffs lacking in class standing to assert claims on behalf of bond purchasers.

2.2. *Rule 23(a)*

Turning to the *Rule 23(a)* requirements, OTC defendants do not seriously dispute **[*586]** the requirements of numerosity or commonality.[168] We conclude that these requirements are satisfied: Dr. Bernheim's identification of thousands of swaps transactions into which Citi entered (Bernheim Initial Report ¶ 210), evidence that defendants do not challenge, is sufficient to establish numerosity. See *Pa. Pub. Sch. Emps., 772 F.3d at 120*.

As to commonality, we find that "the existence of a pricefixing conspiracy [is] susceptible to common proof" in this action. *Cordes & Co., 502 F.3d at 105*. The Second Circuit has held that a conspiracy to suppress LIBOR is in fact a horizontal **[**397]** pricefixing conspiracy, see *Gelboim, 823 F.3d at 771*, and we conclude that proof of the existence of the conspiracy will not differ from class member to class member. Each class member stands in the same position as to the conspiracy: receiving payments at an interest rate based on LIBOR. Though the actual impact that the conspiracy may have had may differ between class members, that variation does not render individual in nature the question of whether a conspiracy existed in the first instance. We conclude that the question of whether a conspiracy to suppress LIBOR existed is a common one, thereby satisfying *Rule 23(a)(2)*'s commonality requirement.

2.2.1. Typicality

OTC plaintiffs assert that their claims are typical of the class's claims, as all of the claims in question arise from the alleged suppression of LIBOR during the class period. (OTC Pls.' Class Mem. 16-17; OTC Pls.' Class Reply 28.) OTC defendants challenge specifically the typicality of Bucks County's claims based on a 2012 termination agreement between Bucks County and RBC, the panel bank with which Bucks County had transacted. (OTC Defs.' Suppl. Opp'n 2-5.) OTC defendants also challenge generally the typicality of the named plaintiffs' claims, contending **[**398]** that each named plaintiff is subject to the defense that it was not actually injured. (OTC Defs.' Class Opp'n 28.)

2.2.1.1 Bucks County

---

[168] OTC defendants also do not contest the issue of ascertainability. Ascertainability "requires only that a class be defined using objective criteria that establish a membership with definite boundaries." *In re Petrobras, 862 F.3d at 264*. By setting forth specific transactions into which putative class members must have entered, the class definition satisfies this requirement.

OTC defendants contend that Bucks County is subject to a unique defense: in terminating its swap with RBC, Bucks County released the claims it now asserts. (OTC Defs.' Suppl. Opp'n 2-5.)

The swap between Bucks County and RBC, initiated in April 2005 and intended to run through June 2019, was supported by several underlying documents: an ISDA Master Agreement between RBC and Bucks County setting forth more general provisions, an accompanying "Schedule" setting forth certain of the swap's specific attributes, (Decl. of Brian Poronsky ex. B, Nov. 3, 2017, ECF No. 2340 ("Poronsky Bucks County Decl.")), and an additional confirmation setting forth further terms of the swap (Poronsky Bucks County Decl. ex. C.).

The swap was terminated in 2012, as reflected in a termination agreement between RBC and Bucks County. The Termination Agreement defined the "Transaction" to be "a transaction on 14 Apr 2005" with certain enumerated attributes,[169] and **[*587]** further provided that "[t]he Agreement shall remain in full force and effect and the parties agree that any existing and **[**399]** subsequent interest rate swap and currency exchange transactions together with confirmations exchanged between the parties confirming such transactions shall be governed by and form part of the Agreement." (Poronsky Bucks County Decl. ex. D.) Among other provisions, the Termination Agreement then provided that "[t]he Transaction shall be terminated and cancelled as of 14 Feb 2012 . . . and all rights, duties, claims and obligations of each of [RBC] and [Bucks County] thereunder shall be released and discharged on that date." (Poronsky Bucks County Decl. ex. D.)

OTC plaintiffs assert that the release does not extend to Bucks County's claims. Specifically as to the implied-covenant claim, OTC plaintiffs contend that despite the language of the termination agreement, Bucks County's claim is not released because the "Transaction" is defined separately from the ISDA Master Agreement. Under this theory, termination of the swap could not have affected Bucks County's claim arising from the ISDA Master Agreement, which remained in effect following the termination. (OTC Pls.' Suppl. Reply 3.)

This attempt to divorce the Transaction from the ISDA Master Agreement is unavailing. While OTC plaintiffs **[**400]** correctly assert that the ISDA Master Agreement "shall remain in full force and effect" under the Termination Agreement, this statement refers only to "any existing and subsequent interest rate swap and currency exchange transactions together with the confirmations exchanged between the parties confirming such transactions." (Poronsky Bucks County Decl. ex. D.) The ISDA Master Agreement and the confirmation documents supporting a transaction "form a single agreement between the parties" (Poronsky Bucks County Decl. ex. B ¶ 1(c)), a principle confirmed by the Termination Agreement's reference to the ISDA Master Agreement "together with confirmations exchanged between the parties," (Poronsky Bucks County Decl. ex. D 2). OTC plaintiffs' contention that their claim for breach of the implied covenant arises only out of the ISDA Master Agreement and not the contractual documents supporting the swap itself is unavailing, as nothing in the ISDA Master Agreement standing alone incorporates LIBOR or obligates RBC to pay interest to Bucks County at a rate determined with reference to LIBOR.

Further, the Termination Agreement refers to the "Transaction" and the parties' "rights, duties, claims **[**401]** and obligations . . . thereunder." (Poronsky Bucks County Decl. ex. D.) The "Transaction" is "evidenced by a Confirmation (as described in the [ISDA Master] Agreement)," but the Termination Agreement does not restrict the "Transaction" to refer only to the ISDA Master Agreement or the accompanying confirmations. Accordingly, "thereunder" refers to the "Transaction" itself and not merely the documents supporting and memorializing the "Transaction." Absent the swap -- the "Transaction" in question as defined in the Termination Agreement -- Bucks County would have no implied covenant claim against RBC at all. We conclude that Bucks County's implied covenant claim was released under the Termination Agreement.

As to unjust enrichment, OTC plaintiffs argue that their unjust enrichment claims are not asserted under any contract and **[*588]** therefore could not have been released under the Termination Agreement. OTC plaintiffs correctly recite our holdings in LIBOR II and LIBOR III, in which we determined that OTC plaintiffs' "unjust

---

[169] The whereas clause in question recited, in full: "AND WHEREAS [RBC] and [Bucks County] entered into a transaction on 14 Apr 2005 (the 'Transaction') effective 18 Apr 2005 having a Notional Amount of USD 63,120,000.00 and a Termination date of 01 Jun 2019 such Transaction being evidenced by a Confirmation (as described in the Agreement) dated as of 14 Apr 2005." (Poronsky Bucks County Decl. ex. D.)

enrichment claims against counterparty banks are not barred by the existence of the contracts." LIBOR III, 27 F. Supp. 3d at 483-84. We reasoned that "[a]lthough the swap contracts clearly required defendants **[**402]** to pay plaintiffs the prescribed floating rate of return using the LIBOR reported by the BBA, the contracts did not clearly cover the subject matter now at issue, namely whether defendants were permitted to manipulate LIBOR itself and thereby depress the amount they were required to pay plaintiffs." LIBOR III, 27 F. Supp. 3d at 483 (alterations incorporated and internal quotation marks omitted) (quoting LIBOR II, 962 F. Supp. 2d at 630).

We are nonetheless unpersuaded that the extracontractual nature of an unjust enrichment claim implies that it was not released by the Termination Agreement. As we explained above in the implied covenant context, the Termination Agreement releases all claims arising under the "Transaction," which is defined to be the swap and includes more than simply the ISDA Master Agreement and accompanying confirmations. The operative question is not whether the unjust enrichment claim arises under the ISDA Master Agreement; it is whether it arises under the swap. We conclude that it does.[170]

In sum, we conclude that the release contained in the Termination Agreement extends to both Bucks County's implied covenant claim and its unjust enrichment claim.[171] While **HN72**[] "a representative may satisfy the typicality requirement even though that **[**403]** party may later be barred from recovery by a defense particular to him [or her] that would not impact other class members," Lapin, 254 F.R.D. at 179 (alteration in original) (quoting In re Frontier Ins. Grp., Inc. Sec. Litig., 172 F.R.D. 31, 41 (E.D.N.Y. 1997)), applying this principle here would be inappropriate. We allowed OTC plaintiffs to belatedly substitute Bucks County as a named plaintiff following the withdrawal of SEIU, see Sept. 8, 2017 Order, 2017 U.S. Dist. LEXIS 155700, 2017 WL 4174925, and Bucks County is the only plaintiff that transacted with RBC. Because Bucks County's presence is the only reason RBC remains as a defendant in this litigation, the unique defense that Bucks County released its claims nonetheless "threaten[s] to become the focus of the litigation" at this juncture. Baffa, 222 F.3d at 59.

Accordingly, we find that Bucks County's claims are not typical of the class's claims because it is subject to a unique defense: that it previously released its claims.[172] Because Bucks County is the **[*589]** only named plaintiff with standing to assert claims against RBC, no class will be certified against RBC even if the remaining Rule 23 requirements are met.

2.2.1.2. Lack of Injury

As to net injury, OTC defendants assert that each class representative is "subject to the unique defense that it suffered no injury," citing the "individualized, economically **[**404]** complex analysis required to evaluate injury." (OTC Defs.' Class Opp'n 28.) OTC Plaintiffs reply that because "netting and absorption apply to" all class members "and can be addressed with the same common formula," the defense is not "unique" and does not defeat typicality. (OTC Pls.' Class Reply 28.)

---

[170] Additionally, OTC plaintiffs' argument here runs directly counter to their suggestion that their unjust-enrichment claims are subject to the choice-of-law provisions in the ISDA Master Agreement. Presumably, to the extent an extracontractual unjust enrichment claim is controlled by a contract's choice-of-law provision, it is similarly controlled by a release extinguishing claims arising under the same contract.

[171] Again, we need not have so concluded in order to find that Bucks County's claims are not typical of the class's claims. See, e.g., In re Digital Music, 321 F.R.D. at 97-98 ("[T]he defendant need not show at the certification stage that [a] unique defense will prevail." (second alteration in original) (quoting Lapin, 254 F.R.D. at 179)).

[172] Additionally, the Schedule to the ISDA Master Agreement provides that the parties submit to the "exclusive jurisdiction of the Courts of the Commonwealth of Pennsylvania and the United States District Court located in the Eastern District of Pennsylvania" as to "any suit, action or proceedings relating to this Agreement." (Poronsky Bucks County Decl. ex. B at 29.) This forum-selection clause would also appear to present an additional unique defense.

We find that, in this context, the named plaintiffs' purported lack of injury (unlike the release contained in the Bucks County termination agreement) is not a unique defense precluding a finding of typicality. See 1 William B. Rubenstein, Newberg on Class Actions § 3:45 (5th ed.) (Westlaw 2017) ("Courts generally find typicality lacking if the proposed class representative's claims are subject to a procedural bar such as res judicata or if the claims arose before the law on which the class claims are based came into effect."). Indeed, this argument is difficult to reconcile with OTC defendants' broader argument that many of the named plaintiffs and a substantial portion of absent class members were not injured. Accepting those arguments, the lack of injury would hardly be a "unique" defense.

"[A] purported representative who lacks standing is not a member of the putative class and thus cannot **[**405]** satisfy the typicality or adequate representation requirements," 1 McLaughlin on Class Actions § 4:18 (14th ed.) (Westlaw 2017) (emphasis added), but the named plaintiffs here do have standing. A lack of net injury does not compel a finding that the named plaintiff has failed to allege sufficient injury-in-fact for Article III standing purposes. See *Denney, 443 F.3d at 264*.

Rather, this typicality argument is largely a repackaging of the damages arguments that OTC defendants offer in the predominance context. Variation in the amount of damages by itself, of course, is not sufficient to defeat typicality. See 1 William B. Rubenstein, Newberg on Class Actions § 3:43 (5th ed.) (Westlaw 2017) ("Courts routinely find that the proposed class representative's claims are typical even if the amount of damages sought differ from those of the class or if there are differences among class members in the amount of damages each is claiming."); 1 McLaughlin on Class Actions § 4:19 (14th ed.) (Westlaw 2017) ("[T]he fact that damages will need to be calculated on an individual basis does not defeat typicality or otherwise bar class certification.").

2.2.1.3. Conclusion

We accordingly find that the named plaintiffs' claims -- with the exception **[**406]** of Bucks County's -- are typical of the class's claims and that *Rule 23(a)(3)*'s typicality requirement is satisfied. However, Bucks County's claims are not typical, and because Bucks County is the only named plaintiff that transacted with RBC, no class will be certified against RBC. Furthermore, OTC plaintiffs have never filed a complaint that includes Bucks County as a named plaintiff,[173] and doing so has been rendered unnecessary by our conclusions here as to the typicality of Bucks County's claims. RBC is dismissed, with prejudice, as a defendant in this action.

[*590] 2.2.2. Adequacy of Representation

Turning finally to adequacy of representation, OTC defendants contend that named plaintiffs are not adequate representatives because several of them "likely benefited from any persistent suppression" and because absorption of any LIBOR suppression into swap and bond transactions creates conflicting incentives to establish suppression based on the timing of class members' transactions. (OTC Defs.' Class Opp'n 28-29.) OTC plaintiffs respond that netting and absorption do not create significant conflicts because the Court will set, as a matter of law, the scope of any netting required and because any netting **[**407]** requirement can be implemented formulaically. (OTC Pls.' Class Reply 28.)

We find, as OTC defendants argue, that when the effects of absorption are taken into account, the damages attributable to different class members will be maximized by different amounts of suppression over time. That is, each class member has incentive to establish lower amounts of suppression at the time it entered into a swap and greater suppression thereafter, thereby minimizing the extent to which absorption will reduce its damages. To be sure, these incentives do create the potential for some conflict. However, we considered substantially similar arguments in the Exchange-based action and concluded as to the suppression-based class that conflicts created by

---

[173] RBC also correctly points out that it has never had an opportunity to assert its defenses against Bucks County. (Letter from Brian Poronsky to the Court, Jan. 12, 2018, ECF No. 2402.)

differing incentives to establish the extent of suppression were not sufficiently fundamental so as to preclude a finding of adequacy. See supra section III.4.3.2. Unlike the trader-based class in the Exchange action, any diverging incentives within the putative OTC class (and within the proposed suppression class in the Exchange-based action) are necessarily limited by suppression's one-directional nature. Further, absorption is limited to swaps initiated **[**408]** during the suppression period. Accordingly, we again conclude that these conflicts, constrained as such, do not rise to the level of "fundamental" conflicts defeating adequacy. See *In re Payment Card Interchange Fee, 827 F.3d at 231*.

2.3. Predominance

In assessing predominance, we again begin with the elements of the OTC plaintiffs' claims. Because the issues raised by OTC plaintiffs' (federal) antitrust claims differ substantially from those raised by the state-law implied covenant and unjust enrichment claims, we analyze them separately.

2.3.1. Antitrust

HN73[] An antitrust claim has three elements: "(1) a violation of ***antitrust law***; (2) injury and causation; and (3) damages." *In re Visa Check, 280 F.3d at 136*. The second element has also been termed "antitrust injury" and "causation or impact." See *Cordes & Co., 502 F.3d at 105*. We analyze each, though we go out of order and consider damages before injury.

2.3.1.1. Violation of ***Antitrust Law***

As we have concluded, and as defendants do not substantially dispute, the existence of a conspiracy is a common question. See id. ("[Plaintiffs'] allegations of the existence of a price-fixing conspiracy are susceptible to common proof and, if proven true, would satisfy the first element of the plaintiffs' antitrust cause of action."); see also *In re Visa Check, 280 F.3d at 136*. Proof of a conspiracy **[**409]** to suppress LIBOR will be essentially the same for all class members, even if the conspiracy has ultimately differing impacts on different class members.

2.3.1.2. Damages

As we have consistently held, damages is an individualized question to some extent in every case, as the evidence **[*591]** needed to prove damages necessarily "varies from member to member." *Tyson Foods, 136 S. Ct. at 1045* (quoting 2 William B. Rubenstein, Newberg on Class Actions § 4:50 (5th ed. 2012)). Even when a common methodology or calculation may be applied, the evidence to which the methodology is applied or the calculation is based will generally vary from class member to class member. (Ordover Report ¶¶ 126-49.) Even assuming panel banks retained centralized records as to the swaps into which it entered (e.g., Bernheim Initial Report ¶ 210), the calculation of damages as to bonds will likely require individual records given their more actively traded nature; a class member cannot recover damages for reduced LIBOR-based interest payments if it had previously sold the underlying bond entitling the class member to those payments in the first place.

In addition to the individual question of exactly which LIBOR-based instruments a class member purchased from **[**410]** which panel bank, OTC defendants identify two additional individual issues: netting and absorption. By absorption, we mean specifically the principle we set forth in LIBOR VI that because parties "entering into a swap transaction . . . take into consideration the present level of LIBOR and their view of how LIBOR will change in the future," "the negotiated components [of a swap] absorbed the effects of LIBOR suppression" to some extent. *LIBOR VI, 2016 U.S. Dist. LEXIS 175929, at *57, 2016 WL 7378980, at *20*.

We agree that any netting requirements will add individual issues. As we have explained, "a plaintiff both injured and enriched by illegal activity cannot choose to recover for his injuries yet retain his windfall" where "both result from a single wrong." *Minpeco, 676 F. Supp. at 488* (emphasis omitted) (citing *Abrahamson, 568 F.2d at 878*). We will require some degree of netting in order to calculate damages, and determining exactly what other LIBOR-based instruments a class member held will entail individual inquiry. For example, a class member that purchased a LIBOR-based swap from a panel bank, with the express purpose of eliminating all or part of its LIBOR exposure from other LIBOR-based financial instruments -- for example, its issuance of a LIBOR-based floating-rate note (Ordover Report ¶ 125 & tbl.27) **[**411]** -- would receive an unwarranted windfall if the LIBOR-based note were not considered. The determination of what instruments should be incorporated into the netting analysis will require extensive evidence that is specific to a given class member.

We also conclude that absorption, at least for swaps initiated during the suppression period, cannot be measured on a classwide basis given the negotiated nature of swaps. We acknowledge that plaintiffs' expert Dr. Bernheim and defendants' expert Dr. Ordover disagree on the issue. We find Dr. Ordover's opinions more compelling, given the variation in the fixed-rate components of swaps observed in the market -- including among swaps entered into by the named plaintiffs. (Ordover Initial Report ¶¶ 50-70.) We do not find that Dr. Bernheim's opinions fully support the proposition that the impact of absorption can be calculated formulaically for all class members with no class member-specific evidence required (Ordover Rebuttal Report ¶¶ 9-13), and Dr. Bernheim concludes only that the effects of absorption "should be similar across market participants," (Bernheim Rebuttal Report ¶ 296 (emphasis added)). Accordingly, we find that for swaps initiated **[**412]** during the suppression period, determining the fixed-rate component of the swap will require individual evidence. Our finding here comports with our earlier observation that "there is every expectation that the negotiated component compensated for manipulated LIBOR." **[*592]** *LIBOR VI, 2016 U.S. Dist. LEXIS 175929, at *58, 2016 WL 7378980, at *20*; cf. *Gelboim, 823 F.3d at 780* ("The disputed transactions were done at rates that were negotiated.").

In sum, even to the extent that panel banks maintain centralized records of the swaps they issued, damages present an individual question that will require class member-specific evidence to analyze.

2.3.1.3. Antitrust Injury

HN74[] "[T]he second element of an antitrust cause of action -- 'antitrust injury' -- poses two distinct questions. One is the familiar factual question whether the plaintiff has indeed suffered harm, or 'injury-in-fact.' The other is the legal question whether any such injury is 'injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful.'" *Cordes & Co., 502 F.3d at 106* (quoting *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977))*. The Second Circuit has already answered the second question in the affirmative as to all class members. See *Gelboim, 823 F.3d at 772-75*. We accordingly focus on the first.

In disputing whether antitrust injury is susceptible to common proof, the **[**413]** parties dispute the proper definition of "injury" and the relationship between "injury" and "damages." OTC plaintiffs contend that "the law is clear that receiving at least one suppressed payment shows antitrust impact or injury from the conspiracy." (OTC Pls.' Class Reply 12.) They base this contention primarily on In re Nexium Antitrust Litigation, in which the First Circuit held that "antitrust injury occurs the moment the purchaser incurs an overcharge, whether or not that injury is later offset" and that "if a class member is overcharged, there is an injury, even if that class member suffers no damages." *777 F.3d 9, 27 (1st Cir. 2015)*.

OTC defendants respond that determining injury entails "a complex analysis of the net impact of the alleged LIBOR suppression on each class member's LIBOR-linked portfolio" (OTC Defs.' Class Opp'n 12 (emphasis added).) -- that is, injury should be defined as having suffered damages greater than zero. They base this argument on our dismissal of Highlander Realty as a plaintiff for having failed to plead standing, *LIBOR V, 2015 U.S. Dist. LEXIS 149629, at *52, 2015 WL 6696407, at *22-24*, and our reasoning that "the effect of a change in LIBOR cannot be isolated in the same way as the overcharge of a typical price-fixed product such as a book," *LIBOR VI, 2016 U.S. Dist. LEXIS 175929, at *53, 2016 WL 7378980, at *18*.

HN75[] The **[**414]** Second Circuit has held that antitrust injury and damages are related, but nonetheless distinct, concepts. As the Circuit has explained, "the injury-in-fact question" considers "whether a plaintiff was harmed," and "the damages question" considers "by how much a plaintiff was harmed." Cordes & Co., 502 F.3d at 107 n.11; see also In re Visa Check/MasterMoney Antitrust Litig., 192 F.R.D. 68, 82 (E.D.N.Y. 2000) ("The fact of injury, which is required as an element of the plaintiff's claim, should not be confused with the extent of injury (as reflected by the amount of damages)."), aff'd, 280 F.3d 124. Antitrust plaintiffs at class certification need not "demonstrate through common evidence the precise amount of damages incurred by each class member," but are expected to provide "common evidence to show all class members suffered some injury." Sykes, 780 F.3d at 82 (emphasis added) (quoting In re Rail Freight Fuel Surcharge Antitrust Litig., 725 F.3d 244, 252, 406 U.S. App. D.C. 371 (D.C. Cir. 2013)).

Both parties also rely on the Second Circuit's decision in Denney. The OTC defendants rely on Denney's statement that a **[*593]** class "must . . . be defined in such a way that anyone within it would have standing," 443 F.3d at 264, while OTC plaintiffs rely on its holding that "the fact that an injury may be outweighed by other benefits, while often sufficient to defeat a claim for damages, does not negate standing," id. at 265, which suggests that injury is distinct from net **[**415]** injury.

We are ultimately persuaded by neither interpretation of Denney. As to OTC defendants' interpretation, Denney's holding that a class must be defined to include only "injured" members refers to "injury" in the Article III context and not the antitrust context, and as we have pointed out, Denney sets a low bar for what injury-in-fact is required to establish Article III standing in the class-action context;[174] one underpayment as a result of LIBOR suppression is sufficient.[175] We are accordingly skeptical that Denney's Article III holding extends to the antitrust context.

But this same skepticism leads us to conclude that Denney's relaxed definition of "injury" does not bolster In re Nexium, which in effect defines (antitrust) "injury" in a way comparable to how Denney's defines (Article III) injury. Rather, Denney's statement that "an injury-in-fact need not be capable of sustaining a valid cause of action," 443 F.3d at 264, suggests that its interpretation of "injury" is specific to the Article III context and should not be generalized to every cause of action that requires "injury" as an element.

While these authorities guide our analysis, they do not squarely address **[**416]** the critical question: whether "injury" in the antitrust context may be established through a single overcharge or whether "injury" includes some conception of netting. We accordingly consider whether to apply In re Nexium's holding that an "antitrust injury occurs the moment the purchaser incurs an overcharge, whether or not that injury is later offset," 777 F.3d at 27, on its merits.

First and foremost, reduced payments on LIBOR-based instruments remain different from a series of purchases like the pharmaceuticals at issue in In re Nexium. Because LIBOR serves as a benchmark rate, a single pricing decision -- the setting of LIBOR on a given day -- necessarily diffuses to numerous instruments and impacts each of those instruments. By contrast, in a more conventional antitrust case, an inflated price impacts immediately only the sales

---

[174] Accordingly, we would reject any suggestion that the proposed class presents Article III standing issues by encompassing class members that were, on net, not injured by LIBOR suppression.

[175] We previously dismissed named plaintiff Highlander Realty for lack of standing. LIBOR V, 2015 U.S. Dist. LEXIS 149629, at *108, 2015 WL 6696407, at *22-24. At the time of that decision, no antitrust claims remained pending against any defendant as a result of our decision in LIBOR I; our dismissal of Highlander "for lack of standing" necessarily refers to Highlander's Article III standing. Accordingly, OTC plaintiffs' suggestion that we "did not rule that Highlander lacked Article III standing or even address the issue," (OTC Pls.' Class Reply 15-16), is incorrect. OTC plaintiffs further suggest that this holding is "directly contrary to Denney's holding that an injury offset does not negate standing" (OTC Pls.' Class Reply 16), but this suggestion ignores the fact that Highlander never pleaded any injury at all: it alleged at the outset that it engaged in a single transaction under which it not only borrowed money from a panel bank affiliate (such that it paid interest at a LIBOR-based rate) but also eliminated any exposure to LIBOR through an interest-rate swap. (Highlander Compl. ¶¶ 6-7, No. 13 Civ. 2343, ECF No. 1.) Because Highlander failed to plead any exposure to LIBOR, it failed to plead any injury that could have been caused by LIBOR manipulation.

occurring at that price (or at prices based on that price); subsequent offsetting undercharges on subsequent **[*594]** purchases result from transactions occurring at a subsequently set price. That temporal component is absent here.

Second, as we observed in LIBOR VI, both bonds and swaps are subject to second-order effects that influence how LIBOR suppression impacts each class **[**417]** member. "[I]f LIBOR was suppressed at the time the bondholder purchased the bond, then both the expected future interest payments and the purchase price of the bond would have reflected that lower LIBOR level." *LIBOR VI, 2016 U.S. Dist. LEXIS 17592, at *53, 2016 WL 7378980, at *19*; see also *Schwab, 2018 U.S. App. LEXIS 4519, 2018 WL 1022541, at *15* ("[A] depressed LIBOR that caused expectations of future interest payments to decrease might result in lock-step reductions in the price of floating-rate instruments."). Similarly, "in entering into a swap transaction the parties take into consideration the present level of LIBOR and their view of how LIBOR will change in the future." *LIBOR VI, 2016 U.S. Dist. LEXIS 17592, at *57, 2016 WL 7378980, at *20*. While we cannot conclude from these effects that LIBOR suppression "could not have caused any losses" whatsoever, *Schwab, 2018 U.S. App. LEXIS 4519, 2018 WL 1022541, at *15* (emphasis added), they render this case meaningfully different from the prescription drug purchases considered in *In re Nexium*.

We also question the legal underpinnings of *In re Nexium*'s holding in question. In re Nexium cited two Supreme Court cases, *Hawaii v. Standard Oil Co. of Cal., 405 U.S. 251, 262, 92 S. Ct. 885, 31 L. Ed. 2d 184 (1972)*, and *Adams v. Mills, 286 U.S. 397, 407, 52 S. Ct. 589, 76 L. Ed. 1184 (1932)*, see *In re Nexium, 777 F.3d at 27*, but we do not find In re Nexium's analysis of either case to be persuasive. Standard Oil considered whether antitrust injury suffered by the state of Hawaii as a consumer was properly offset by subsequent recoupment, reasoning that "damages are established by **[**418]** the amount of the overcharge" and that "courts will not go beyond the fact of this injury to determine whether the victim of the overcharge has partially recouped its loss in some other way, even though a State, for example, may ultimately recoup some part of the overcharge through increased taxes paid by the seller." *405 U.S. at 262 n.14* (emphasis added). We are skeptical that Standard Oil's exclusion of recoupment attributable to a distant second-order effect should extend to "later savings attributable to the same or related transaction," as the First Circuit reasoned, *777 F.3d at 27*.

Adams v. Mills, which considered damages under the Interstate Commerce Act incurred by livestock traders forced to pay extra unloading charges to a railyard operator, see *286 U.S. at 405-06*, is even further afield. There, the Supreme Court held that the third-party livestock shippers' reimbursement of the damaged traders was irrelevant to the defendant railyard operator's liability, reasoning that "the fact of subsequent reimbursement by the plaintiffs from funds of the shippers" was of no "concern to the wrongdoers." *Id. at 407*. Nothing in this holding suggests that it is translatable to the antitrust context or, for that matter, any claim involving a series **[**419]** of payments between the same parties rather than a third party.

In sum, we are skeptical of In re Nexium's holding that a single impacted payment is sufficient to establish antitrust injury, both as a general matter and as specifically applied to this action. Nonetheless, we need not squarely decide its applicability, as we conclude that the definition of injury does not ultimately alter the predominance balance.

On the one hand, accepting OTC plaintiffs' definition of injury, we conclude that they have established that the question of whether each class member has experienced **[*595]** injury as a result of the alleged 16-bank conspiracy is a common one. To show injury, OTC plaintiffs will need to offer classwide evidence that actual published LIBOR was suppressed (i.e., below but-for LIBOR). Regardless of whether this evidence consists of regressions that are capable of estimating but-for LIBOR over the class period in a few calculations (like those offered by Dr. Bernheim), or something more complex as Dr. Willig suggests is necessary, this evidence will nonetheless be classwide. OTC defendants' point that proof of the extent of suppression will differ across panel banks, tenors of LIBOR, and **[**420]** days is again well-taken, but these differences do not create individual questions because each putative class member is ultimately affected through published LIBOR.

On the other hand, if we accepted OTC defendants' definition, the element of "injury" would be an individual question, just as damages is an individual question, but it would be one that adds little to that side of the predominance balance. As counsel for the OTC defendants expressed at oral argument, "all that damages is in an antitrust case is the quantum of injury, not the fact of injury." (Hr'g Tr. 44:12-14.) Under OTC defendants' definition of injury, an assessment of whether a class member has been injured becomes an assessment of what amount of damages the class member has suffered and whether that amount of damages is greater than zero. The considerations that underlie this determination of "injury," including issues of absorption and netting, are otherwise identical to the determination of damages. Because any class member-specific question of fact relating to injury will be reducible to corresponding questions of fact relating to damages, and because those corresponding questions of fact are already taken into **[**421]** account as weighing against predominance in this action, those injury questions are of little marginal weight on the individual question side of the scale and do not tip the balance. That is, injury (as defined by OTC defendants) and damages would involve the same underlying (individual) questions of fact, and those same questions of fact should not be double-counted in the predominance inquiry simply because they bear on two closely related legal elements.

2.3.1.4. Conclusion

In sum, we conclude that common questions predominate as to OTC plaintiffs' antitrust claims. The only individual questions that OTC defendants have identified relate to damages -- or injury in a manner that essentially overlaps with damages, and "individualized damages determinations alone cannot preclude certification under *Rule 23(b)(3)*." *Roach, 778 F.3d at 409*.

2.3.2. State Law Claims

Because OTC plaintiffs' implied covenant and unjust enrichment claims are asserted under state law, we first conduct a choice-of-law analysis to determine "whether different state laws will apply to different members of the class," applying New York conflict-of-law principles. *Nextel, 780 F.3d at 140*. If certifying the proposed class would require the application of the laws of different **[**422]** jurisdictions, we consider whether variations in state law introduce individual questions and how those individual questions factor into the predominance analysis.

2.3.2.1. Implied Covenant of Good Faith and Fair Dealing

HN76[] Under New York law, the "'center of gravity' or 'grouping of contacts' [is] the appropriate analytical approach to choice of law questions in contract cases." *Zurich Ins. Co. v. Shearson Lehman Hutton, Inc., 84 N.Y.2d 309, 317, 642 N.E.2d 1065, 618 N.Y.S.2d 609 (1994)*. "[I]n addition to the traditionally determinative choice of law factor of the place of contracting," four other factors are considered **[*596]** "in establishing this 'most significant relationship': the places of negotiation and performance; the location of the subject matter; and the domicile or place of business of the contracting parties." Id. (citing *Restatement (Second) of Conflict of Laws § 188(1)*). However, when a contract contains a choice-of-law provision, that provision "may reasonably be read as . . . a substitute for the conflict-of-laws analysis that otherwise would determine what law to apply to disputes arising out of the contractual relationship." *Ministers & Missionaries Benefit Bd. v. Snow, 26 N.Y.3d 466, 470, 25 N.Y.S.3d 21, 45 N.E.3d 917 (2015)* (quoting *Mastrobuono v. Shearson Lehman Hutton, Inc., 514 U.S. 52, 59, 115 S. Ct. 1212, 131 L. Ed. 2d 76 (1995)*). Indeed, "as a general rule, choice of law provisions are valid and enforceable in New York." *Terwilliger v. Terwilliger, 206 F.3d 240, 245 (2d Cir. 2000)* (alterations incorporated) (quoting *Marine Midland Bank, N.A. v. United Mo. Bank, N.A., 223 A.D.2d 119, 123, 643 N.Y.S.2d 528 (1st Dep't 1996))*.

Accordingly, for OTC plaintiffs' claims of breach of the implied **[**423]** covenant of good faith and fair dealing, each class member's claim will be governed by a contractual choice-of-law provision to the extent one exists.[176] See,

---

[176] OTC defendants correctly note that "New York law allows a court to disregard the parties' choice when the most significant contacts with the matter in dispute are in another state." *Cap Gemini Ernst & Young, U.S., L.L.C. v. Nackel, 346 F.3d 360, 365 (2d Cir. 2003)* (per curiam) (internal quotation marks omitted) (quoting *Cargill, Inc. v. Charles Kowsky Res., Inc., 949 F.2d 51, 55 (2d Cir. 1991))*; see also ***Hartford Fire Ins. Co. v. Orient Overseas Containers Lines (UK) Ltd., 230 F.3d 549, 556 (2d Cir.***

e.g., *ARS Kabirwala, LP v. El Paso Kabirwala Cayman Co., No. 16 Civ. 6430 (GHW), 2017 U.S. Dist. LEXIS 125389, 2017 WL 3396422, at *3 (S.D.N.Y. Aug. 8, 2017)* ("Choice-of-law provisions that govern a contract also govern related claims for breach of the implied covenant of good faith and fair dealing."); *Comprehensive Habilitation Servs., Inc. v. Commerce Funding Corp., No. 05 Civ. 9640 (PKL), 2009 U.S. Dist. LEXIS 30386, 2009 WL 935665, at *10 n.14 (S.D.N.Y. Apr. 7, 2009)* ("[B]reach of the implied covenant of good faith and fair dealing is a contractual cause of action, and the choice of law provision applies to the interpretation and enforcement of the contract."). In the absence of a governing choice-of-law provision, however, a class member's implied covenant claim will be governed by the law determined under the center of gravity analysis set forth by the New York Court of Appeals. See *Zurich Ins., 84 N.Y.2d at 317*.

OTC plaintiffs contend that the ISDA Master Agreements[177] underlying the **[*597]** swap transactions at issue contain a choice-of-law provision designating either New York law or English law, thereby obviating any class member-specific inquiry into governing law and limiting variation in the substantive law to be applied. (OTC Pls.' Class Reply 24-25.)

This argument misreads the standardized ISDA Master Agreement, which includes a choice-of-law **[**424]** provision that reads in full: "Governing Law. This Agreement will be governed by and construed in accordance with the law specified in the Schedule." (E.g., Porosnky Bucks County Decl. ex. B at 13.) Rather than designating either New York law or English law as OTC plaintiffs suggest, the ISDA Master Agreement designates governing law only with reference to a separate transaction-specific "Schedule."[178] Consideration of each individual schedule is therefore necessary.

The next provision in the ISDA Master Agreement does reference New York law and English law, but is itself not a choice-of-law provision. Titled "Jurisdiction," the provision states that each party "submits to the jurisdiction of the English courts, if this Agreement is expressed to be governed by English law, or to the non-exclusive jurisdiction of the courts of the State of New York and the United States District Court located in the Borough of Manhattan in New York City, if this Agreement is expressed to be governed by the laws of the State of New York." (E.g., Poronsky Bucks County Decl. ex. B. at 13 (emphasis added).) This provision suggests that many parties will in fact designate English law or New York law as controlling, but **[**425]** it is not itself a choice-of-law provision.

2000) ("Absent fraud or violation of public policy, a court is to apply the law selected in the contract as long as the state selected has sufficient contacts with the transaction." (emphasis added)). This inquiry closely resembles the center-of-gravity analysis conducted in the absence of a choice-of-law provision, with "[f]actors potentially relevant to the existence of sufficient contacts include '(1) the place of contracting; (2) the place of contract negotiation; (3) the place of performance; (4) the location of the subject matter of the contract; and (5) the domicile[s] of the contracting parties.'" *McPhee v. Gen. Elec. Int'l, Inc., 736 F. Supp. 2d 676, 680 (S.D.N.Y. 2010)* (quoting *Sabella v. Scantek Med., Inc., No. 08 Civ. 453 (CM), 2009 U.S. Dist. LEXIS 88170, 2009 WL 3233703, at *12 (S.D.N.Y. Sept. 21, 2009))*, aff'd, *426 F. App'x 33 (2d Cir. 2011)*. However, in light of the New York Court of Appeals's admonition that "New York courts should not engage in any conflicts analysis where the parties include a choice-of-law provision in their contract," *Ministers & Missionaries, 26 N.Y.3d at 474*, we question whether we should continue to analyze sufficient contacts and will decline to set aside an otherwise valid choice-of-law provision based on a lack of sufficient contacts.

[177] The ISDA Master Agreement is a contract template published by the International Swaps and Derivatives Association, which, once adopted by the parties to a given transaction, "governs the legal and credit relationship between the parties and other aspects of the agreement." *Aon Fin. Prods., Inc. v. Societe Generale, 476 F.3d 90, 93 n.4 (2d Cir. 2007)*. "Supplemental documents, such as confirmations, set forth economic terms and other transaction-specific modifications to the Master Agreement and other standard documents." Id. The ISDA Master Agreement "serves as the contractual foundation for more than 90% of derivatives transactions globally." *Lehman Bros. Special Fin. Inc. v. Bank of Am. Nat'l Ass'n (In re Lehman Bros. Holdings Inc.), 553 B.R. 476, 484 n.21 (Bankr. S.D.N.Y. 2016)*.

[178] *Aon Financial Products, 476 F.3d at 90*, and *In re Lehman, 553 B.R. 476*, each reference the ISDA Master Agreement, but do not discuss the ISDA Master Agreement's treatment of choice-of-law issues. Similarly, while ISDA's amicus brief in Aon states that "[i]n choosing New York law to govern their CDSs, market participants reasonably expect that courts in this jurisdiction will effectuate their contractual intent as expressed within the four corners of each CDS," Brief 11-12, Aon, No. 06-1080-cv, 2006 WL 1517230 (May 8, 2006), this statement describes only the expectations of market participants who in fact select New York law and indicates little about the frequency with which market participants do so.

In short, we find that the ISDA Master Agreement does not mandate that all, or even most, of the contracts underlying swaps will be analyzed under New York law. Rather, choice-of-law would appear to raise an individual question, in that the governing law will vary from class member to class member based on the law designated in the transaction-specific schedules attached to the each ISDA Master Agreement.

After oral argument, at which we identified OTC plaintiffs' failure to properly interpret the ISDA Master Agreement (Hr'g Tr. 47:23-48:10), OTC plaintiffs submitted supplemental materials supporting the contention that the ISDA Master Agreements controlling each of the named plaintiffs' transactions of LIBOR-based instruments designated New York law as governing. (Letter from William Carmody to the Court, Jan. 25, 2018, ECF No. 2414; **[*598]** Decl. of Geng Chen, Jan. 25, 2018, ECF No. 2415 ("Chen Decl.").) OTC defendants responded to this submission, identifying an ISDA Master Agreement governing certain transactions by named plaintiff Yale University that designated English law rather than New York law. (Letter from Abram Ellis to the Court, Feb. **[**426]** 1, 2018, ECF No. 2419; Decl. of Abram Ellis, Feb. 1, 2018, ECF No. 2420.) OTC plaintiffs responded that the Yale ISDA Master Agreement designating English law did not apply to any of Yale's LIBOR-based instruments. (Letter from William Carmody to the Court, Feb. 13, 2018, ECF No. 2424.)

Accepting this latter representation, the proposition that each of the ISDA Master Agreements underlying the named plaintiffs' LIBOR-based transactions with panel banks designated New York law as the substantive law to be applied is a correct one. But this fact hardly establishes that all of the class's ISDA Master Agreements so designated (or at least a sufficiently overwhelming percentage such that variations in controlling law do not pose predominance issues). Rather, Yale's English law ISDA Master Agreement -- even if did not ultimately support any of Yale's LIBOR-based transactions -- suggests that the designation of non-New York law in an ISDA Master Agreement is hardly hypothetical. Certain other named plaintiffs' designation of non-New York law -- even if limited to certain issues of law -- corroborates OTC defendants' suggestion that not all ISDA Master Agreements designate only New York law. **[**427]** Taken together, we find that this evidence is sufficient to suggest that for the class as a whole -- the inquiry of relevance here -- not all class members will have ISDA Master Agreements designating only New York law. In the absence of definitive evidence to the contrary, examples in the record of ISDA Master Agreements designating non-New York law render OTC defendants' argument here easily distinguishable from the "bald speculation" rejected by the Second Circuit in In re U.S. Foodservice, see *729 F.3d at 122*. OTC plaintiffs have not established that all ISDA Master Agreements designate New York law; any requirement that OTC defendants more actively disprove the proposition that New York law controls all ISDA Master Agreements would improperly invert the burden of proof.

Further, in focusing on whether the ISDA Master Agreements governing the LIBOR-based swaps have designated New York law, OTC plaintiffs have not addressed the choice-of-law issues relating to bonds, which remain equally relevant to the proposed class. Specifically, while ISDA Master Agreements govern swaps, no evidence in the record suggests that ISDA Master Agreements also govern bonds.[179] Rather, the structure and terms of the **[**428]** ISDA Master Agreement contemplate an ongoing relationship between two specified parties, which is applicable in the swap context but is incongruent with the more retail nature of bond issuances.[180] For example, provisions referring to the netting of payments have little bearing in this context: after the bond is initially purchased, payments are made only by the bond issuer to the bondholder. Similarly, provisions referring to default by either party (ISDA Master Agreement ¶ 5) are inapplicable in the context of a bond issuance, where the obligations flow only from **[*599]** the bond issuer to the bondholder; the concept of "default" by a bondholder in this context is nonsensical. In sum, the extensive references of this type to mutual obligations suggest that the ISDA Master Agreements apply in the swap context but not the bond context. OTC plaintiffs have offered no evidence that all (or even most) LIBOR-based bonds were governed by New York law, under an ISDA Master Agreement or otherwise.

In sum, we find that while ISDA Master Agreements control the vast majority of swaps, they do not uniformly designate only New York law as controlling. Further, based on our reading of the ISDA Master Agreement **[**429]**

---

[179] There is no evidence in the record pertaining to named plaintiffs who purchased LIBOR-based bonds from panel banks. This fact is perhaps unsurprising given that there are no named plaintiffs who so transacted.

[180] OTC plaintiffs also allege that floating-rate notes are not derivatives. (CTAC ¶ 43.)

and the absence of evidence relating specifically to bonds, we find that bonds encompassed within the proposed class definition are not governed by ISDA Master Agreements at all. Because ISDA Master Agreements apply to only a portion of the LIBOR-based instruments in the class, certification of the proposed class will likely require the application of the substantive laws of multiple jurisdictions to OTC plaintiffs' implied covenant claim. Variations in substantive law are therefore a relevant consideration, and we turn to that issue.

As OTC defendants correctly point out and other courts have identified, the scope of the implied covenant varies across states. See, e.g., *Lane v. Wells Fargo Bank, N.A., No. C 12-4026 WHA, 2013 U.S. Dist. LEXIS 87669, 2013 WL 3187410, at *4 (N.D. Cal. June 21, 2013)* ("Plaintiffs' submission fails to address significant differences in state law raised by defendant, including whether the standard for good faith is subjective or objective . . . ."); *Yarger v. ING Bank, FSB, 285 F.R.D. 308, 325 (D. Del. 2012)* ("The states' laws vary as to whether there is an intent element and, if so, what intent must be proven.").[181]

In response, OTC plaintiffs contend, citing the Second Circuit's holding in In re U.S. **[**430]** Foodservice that "state contract law defines breach consistently such that the question will usually be the same in all jurisdictions," *729 F.3d at 127*, that variations in the state substantive law of the implied covenant of good faith and fair dealing do not preclude class certification. We are unpersuaded that In re U.S. Foodservice's holding, made in the context of claims for breach of contracts involving the sale of goods subject to the Uniform Commercial Code, see id., applies to OTC plaintiffs' claims for breach of the implied covenant of good faith and fair dealing. Additionally, In re U.S. Foodservice considered only contract claims under U.S. law; the record here suggests that application of English law will be required at least as to some swaps held by some class members.[182]

Additionally, in moving for class certification, the plaintiffs in *In re U.S. Foodservice* actually conducted an analysis of variations in state law, see, e.g., id. ("[P]laintiffs' papers in support of their motion for class certification demonstrate that all the relevant jurisdictions have adopted *U.C.C. § 1-303*."). By contrast, OTC plaintiffs have simply rested on their contention that no analysis of state-by-state variations need be **[**431]** undertaken and have not addressed the implied covenant of good faith and fair dealing under English **[*600]** law (OTC Pls.' Class Reply 24-25). The differences in state substantive laws identified by defendants -- that the scope of the implied covenant varies substantively between states -- stand essentially unrebutted, and we accordingly conclude that OTC plaintiffs have not carried their burden of establishing that variations in controlling law do not defeat predominance.

2.3.2.2. Unjust Enrichment

We consider unjust enrichment separately, as ***HN77***[] "[u]nder New York law, the choice of law analysis is generally done separately for each claim and defense." *2002 Lawrence R. Buchalter Alaska Tr. v. Phila. Fin. Life Assur. Co. ("Buchalter Trust"), 96 F. Supp. 3d 182, 200 (S.D.N.Y. 2015)*. "Some controversy appears to exist as to whether a claim for unjust enrichment is governed by a contract's enforceable choice-of-law provision, or whether it is instead governed by the law of the state that New York's interest analysis yields, being a fundamentally non-contractual cause of action." *Id. at 233*. While "[i]n general, New York courts are reluctant 'to construe contractual choice-of-law clauses broadly to encompass extra-contractual causes of action,'" *Tropical Sails Corp. v. Yext, Inc., No. 14 Civ. 7582 (JFK), 2017 U.S. Dist. LEXIS 38913, 2017 WL 1048086, at *12 (S.D.N.Y. Mar. 17, 2017)* **[**432]** (quoting *Fin. One Pub. Co. Ltd. v. Lehman Bros. Special Fin., Inc., 414 F.3d 325, 334 (2d Cir. 2005))*, "the more an unjust enrichment claim relates to an enforceable contract, the more likely it is to be considered contractual in nature for the purposes of New York's choice-of-law analysis," *Buchalter Trust, 96 F. Supp. 3d at 234*.

---

[181] OTC plaintiffs' reliance on Pinnacle Performance, which considered only implied covenant claims asserted under New York substantive law, see *2013 U.S. Dist. LEXIS 150259, 2013 WL 5658790, at *12*, for the proposition that a class may be certified on a claim for breach of the implied covenant is unpersuasive. Pinnacle Performance had no occasion to consider whether variations in controlling law impacted the predominance analysis.

[182] Of course, we know even less about the substantive law governing claims arising from class members' bond purchases.

In light of our rulings in LIBOR II and LIBOR III that "the [swap] contracts did not clearly cover the subject matter now at issue, namely whether defendants were permitted to manipulate LIBOR itself and thereby depress the amount they were required to pay plaintiffs," *LIBOR III, 27 F. Supp. 3d at 483* (alterations incorporated and internal quotation marks omitted) (quoting *LIBOR II, 962 F. Supp. 2d at 630*), we conclude that OTC plaintiffs' unjust enrichment claims sound more in tort than in contract. Indeed, as the Second Circuit held regarding unjust enrichment claims asserted by other plaintiffs who transacted directly with panel banks, such "unjust enrichment claims sound in fraud." *Schwab, 2018 U.S. App. LEXIS 4519, 2018 WL 1022541, at *18*. Accordingly, the unjust enrichment claims are not controlled by the choice-of-law provisions contained in the ISDA Master Agreement Schedules. See *Buchalter Trust, 96 F. Supp. 3d at 233-34*. Rather, under New York conflict-of-law principles, the "'interests analysis,' under which the law of the jurisdiction having the greatest interest in the litigation is applied," governs. *Curley, 153 F.3d at 12*. As with the fraud claims asserted in the Lender action, the law of the state in which the injury occurred applies under the interests analysis; each putative class member's unjust enrichment claim is subject to the state **[**433]** in which that class member has its principal place of business. See supra section IV.2.3.5.

This choice-of-law analysis notwithstanding, OTC plaintiffs contend that we should apply New York law because OTC defendants purportedly conceded the applicability of New York law to the unjust enrichment claims in an earlier memorandum of law. (OTC Pls.' Class Reply 26-27.) This argument, which relies on a memorandum of law filed in support of an earlier motion to dismiss, not only mischaracterizes that memorandum but also raises serious due process concerns.

In the memorandum in question, submitted in the course of briefing motions that we resolved in LIBOR III (Mem. of Law, Nov. 26, 2013, ECF No. 508 ("LIBOR III Defs.' Mem.")), OTC defendants argued that OTC plaintiffs had failed to **[*601]** state a claim under New York law. In so arguing, OTC defendants explained that "OTC Plaintiffs have not alleged that any other jurisdiction's law is applicable, and the Defendants therefore address the OTC Plaintiffs' unjust enrichment and breach of implied covenant of good faith and fair dealing claims under New York law only." (LIBOR III Defs.' Mem. at 1 n.3.) Indeed, OTC defendants expressly noted the possibility **[**434]** that "[o]ther arguments may be available under other states' laws." (LIBOR III Defs.' Mem. at 1 n.3.) Given OTC defendants' express contemplation that the substantive laws of other states may apply, OTC plaintiffs' characterization of these statements as a concession that New York law applies is not a fair one; rather, it is an utter distortion.

But even assuming that some concession binds OTC defendants to the application of New York law, cf. *Krumme v. WestPoint Stevens Inc., 238 F.3d 133, 138 (2d Cir. 2000)*, we are skeptical that any binding effect can permissibly extend to absent class members. Those class members may have an interest in applying the substantive law of other states, especially to the extent that other states' substantive laws of unjust enrichment are more favorable to them than New York's. Binding these absent class members to New York law on the basis of OTC defendants' concessions would not only come dangerously close to modifying those plaintiffs' substantive rights in violation of the *Rules Enabling Act*, cf. *Dukes, 564 U.S. at 367* ("[T]he *Rules Enabling Act* forbids interpreting *Rule 23* to 'abridge, enlarge or modify any substantive right.'" (quoting *28 U.S.C. § 2072(b)*)), but would also raise serious due process concerns as to those class members, cf. *In re Payment Card Interchange Fee, 827 F.3d at 231* ("Class actions and **[**435]** settlements that do not comply with . . . the *Due Process Clause* cannot be sustained."). These concerns cause us to roundly reject OTC plaintiffs' concession argument.

In sum, we conclude that each class member's unjust enrichment claims will be governed by the law of the state in which that class member has its principal place of business or resides, and proceed to consider whether variations in state law contribute individual issues.

Despite OTC plaintiffs' burden of showing that variations in state law do not present "insuperable obstacles" to class certification, *In re U.S. Foodservice, 729 F.3d at 127*, they have offered no analysis here beyond their contention that the ISDA Master Agreement causes New York law to be applied to all class members -- a contention that we reject for multiple reasons. Under such circumstances, courts have declined to certify a nationwide unjust enrichment class. See, e.g., *It's Just Lunch, 300 F.R.D. at 143* (concluding that common issues did not predominate because "[p]laintiffs have not acknowledged any of these variations in states' unjust enrichment laws"); see also *Kottler v. Deutsche Bank AG, No. 05 Civ. 7773 (PAC), 2010 U.S. Dist. LEXIS 30590, 2010 WL 1221809, at *4*

(S.D.N.Y. Mar. 29, 2010) (HN78[]) "[V]ariations in state law have generally precluded nationwide class certifications based on unjust enrichment theories.").

Rejection of nationwide unjust-enrichment classes **[**436]** is not a universal rule, and OTC plaintiffs correctly identify certain decisions that have certified nationwide unjust enrichment clases. See, e.g., Rapoport-Hecht v. Seventh Generation, Inc., No. 14 Civ. 9087 (KMK), 2017 U.S. Dist. LEXIS 218781, 2017 WL 5508915, at *3 (S.D.N.Y. Apr. 28, 2017).[183] **[*602]** In the face of this split of authority -- a split that the Second Circuit has not resolved -- we find more persuasive in this action the line of cases declining to certify a nationwide class. Coupled with OTC plaintiffs' lack of analysis as to variations in state law, cf. In re U.S. Foodservice, 729 F.3d at 127, we conclude that variations in state law warrant a finding of no predominance here. "As countless courts have found, 'the states' different approaches to, or elements of, unjust enrichment are significant.'" Rapp v. Green Tree Servicing, LLC, 302 F.R.D. 505, 513 (D. Minn. 2014) (collecting cases and noting that "state laws vary widely regarding how 'unjust' a defendant's conduct must be to give rise to a recovery on an unjust-enrichment claim"); see also 1 McLaughlin on Class Actions § 5:60 (14th ed.) (Westlaw 2017) ("Where certification of a multistate unjust enrichment class is sought, variations in state law also have precluded class certification based on unjust enrichment theories.").

2.3.2.1 Conclusion

Variations in substantive law defeat predominance for both the implied covenant claim and the unjust enrichment claim, **[**437]** though in slightly different ways. The implied covenant will require application of the law designated in transaction-specific ISDA Master Agreement Schedules, which do not uniformly designate New York law and may include English law.[184] The unjust enrichment claim will require application of the law of the state in which the class member resides or has a principal place of business, which under the class definition extends to all 50 states.

2.4 Modification of the Class Definition

In a submission made following oral argument, OTC plaintiffs suggest, for the first time in a serious manner, a modification of the class definition to limit the class to LIBOR-Based Instruments (as defined in the class definition) "that contained a contractual clause specifying that the contract is to be construed in accordance with the laws of the State of New York." (Letter from William Carmody to the Court, Jan. 25, 2018, ECF No. 2414.)[185]

We are strongly disinclined to consider this belated proposal for modification. OTC plaintiffs have had ample time to introduce into the record before us the evidence that they ultimately submitted post-argument, and they could have rigorously analyzed issues regarding variations **[**438]** in state law. Instead, they offered an argument that, at best, overreads the ISDA Master Agreement.

---

[183] Rapoport-Hecht considered variations in state substantive law in the context of a settlement class, see 2017 U.S. Dist. LEXIS 218781, 2017 WL 5508915, at *3, where the analysis of predominance differs from that in the context of a litigation class. "In the context of a settlement class, concerns about whether individual issues would create 'intractable management problems' at trial" -- such as issues presented by variations in governing law -- "drop out of the predominance analysis because 'the proposal is that there be no trial.'" In re AIG, 689 F.3d at 240 (quoting Amchem, 521 U.S. at 620).

[184] Further, different transactions undertaken by the same class member may be subject to different substantive law, if those transactions occurred under different ISDA Master Agreements. The record establishes, at minimum, that the same named plaintiff incorporated differing choice-of-law provisions into different ISDA Master Agreement Schedules. (Chen Decl. 3-4.)

[185] OTC plaintiffs' reply brief, which rattled off in a footnote a series of possible modifications to the class definition (OTC Pls.' Class Reply 25 n.60), does not qualify as serious analysis of modification. The footnote in question also asserts that "the vast majority of the LIBOR-based instruments in the class . . . are governed by New York law" based on the ISDA Master Agreement, which, as we discuss above, is unsupported by the record as to swaps and is entirely unfounded as to bonds.

However, *HN79*[] *Rule 23(c)* contemplates that class certification is not a one-shot process, as "[a]n order that grants or denies class **[*603]** certification may be altered or amended before final judgment." *Fed. R. Civ. P. 23(c)(1)(C)*. Indeed, the Second Circuit has interpreted *Rule 23(c)(1)(C)* to "require[] courts to 'reassess . . . class rulings as the case develops.'" *Amara v. CIGNA Corp., 775 F.3d 510, 520 (2d Cir. 2014)* (omission in original) (quoting *Boucher v. Syracuse Univ., 164 F.3d 113, 118 (2d Cir. 1999))*. Though we are loathe to make class certification an iterative process and strongly believe that proponents of class certification should be diligent in establishing their compliance with class certification requirements the first time around, cf. *LIBOR II, 962 F. Supp. 2d at 626-27*,[186] we will nonetheless exercise our discretion and consider -- however reluctantly -- OTC plaintiffs' proposal that the class definition be modified to limit the class to instruments governed by contracts designating New York law.

2.4.1 Implied Covenant of Good Faith and Fair Dealing

2.4.1.1 Remaining Choice-of-Law Issues

Turning to the implied covenant claims, OTC defendants argue first that the inclusion of a criterion requiring a New York choice-of-law provision does not resolve the choice-of-law issues plaguing **[**439]** the unmodified class definition. (Letter from Abram Ellis to the Court, Feb. 1, 2018, ECF No. 2419.) Citing certain named plaintiffs' ISDA Master Agreements belatedly supplied by the OTC plaintiffs, OTC defendants contend that even among choice-of-law provisions designating New York law, some explicitly exclude New York choice-of-law rules whereas others are silent on the issue. For example, one of named plaintiff Baltimore's ISDA Master Agreement Schedules designates simply "the laws of the State of New York," (Chen Decl. ex. C at 19), whereas another one of Baltimore's ISDA Master Agreement Schedules designates "the laws of the State of New York, without reference to its choice of law doctrine," (Chen Decl. ex. E at 7). Accordingly, OTC defendants contend, New York choice-of-law provision notwithstanding, that the determination of what substantive law to apply will continue to introduce individual issues.

HN80[] New York law, however, appears to treat as identical a choice-of-law provision designating New York law exclusive of New York conflict-of-law principles and a choice-of-law provision designating New York law without such an exclusion. The New York Court of Appeals has addressed choice-of-law **[**440]** provisions and the impact of an express exclusion of New York conflict-of-law principles in two recent decisions, *IRB-Brasil Resseguros, S.A. v. Inepar Invs., S.A., 20 N.Y.3d 310, 982 N.E.2d 609, 958 N.Y.S.2d 689 (2012)*, and *Ministers & Missionaries Benefit Bd. v. Snow, 26 N.Y.3d 466, 25 N.Y.S.3d 21, 45 N.E.3d 917*. IRB considered "whether a conflict-of-laws analysis must be undertaken when there is an express choice of New York law in the contract pursuant to *General Obligations Law § 5-1401*."[187] *20 N.Y.3d at 312*. The main **[*604]** contract in question, a guarantee, provided that it would be "governed by, and . . . construed in accordance with, the laws of the State of New York," but did not contain an express exclusion of New York conflict-of-laws principles. *Id. at 313*. A companion agreement also contained a choice-of-law provision designating New York law, but that agreement did include an express exclusion of New York conflict-of-laws principles. See id. The Court of Appeals concluded that New York substantive law governed the guarantee and that "parties are not required to expressly exclude New York conflict-of-laws principles in their choice-of-law provision in order to avail themselves of New York substantive law," relying on both the

---

[186] This principle should be especially applicable in a case such as this one, where we have issued opinions on substantive issues totaling more than 1000 pages and where certain class-certification concerns have been previously raised by the defendants, briefed by the parties, and addressed by the Court.

[187] *Section 5-1401* of the General Obligations Law provides that the parties to a contract "covering in the aggregate not less than two hundred fifty thousand dollars . . . may agree that the law of this state shall govern their rights and duties in whole or in part, whether or not such contract, agreement or undertaking bears a reasonable relation to this state." *N.Y. Gen. Oblig. Law § 5-1401*. This provision does not "apply to any contract, agreement or undertaking (a) for labor or personal services, (b) relating to any transaction for personal, family or household services, or (c) to the extent provided to the contrary in subsection two of ***section 1-105*** of the uniform commercial code." Id.

language of *section 5-1401* of the General Obligations Law and guidance from the Restatement (Second) of Conflict of Laws. *Id. at 315-16*.

Ministers & Missionaries considered a related question. The contracts **[**441]** at issue in that case, a retirement plan and a death benefit plan, each contained a choice-of-law provision designating New York law with no exclusion of New York conflict-of-laws principles. See *26 N.Y.3d at 468*. Because the contracts in question involved testamentary dispositions, they implicated *section 3-5.1(b)(2) of the New York Estates, Powers & Trusts Law*, which is itself a choice-of-law provision requiring that "[t]he intrinsic validity, effect, revocation or alteration of a testamentary disposition of personal property, and the manner in which such property devolves when not disposed of by will, are determined by the law of the jurisdiction in which the decedent was domiciled at death." *N.Y. Est. Powers & Trusts Law § 3-5.1(b)(2)*.

The Court of Appeals concluded that New York substantive law applied based on the contracts' choice-of-law provisions, even though *section 3-5.1(b)(2)* of the Estates, Powers & Trusts Law called for the application of the law of another jurisdiction. *Ministers & Missionaries, 26 N.Y.3d at 477*. Holding broadly that "New York courts should not engage in any conflicts analysis where the parties include a choice-of-law provision in their contract, even if the contract is one that does not fall within General Obligations Law *§ 5-1401*" (as the contract at issue in IRB did), the Court of Appeals reasoned that "logic dictates that, by including **[**442]** a choice-of-law provision in their contracts, the parties intended for only New York substantive law to apply." *Id. at 474-75*.

Taken together, *IRB* and *Ministers & Missionaries* mandate the rejection of OTC defendants' argument distinguishing choice-of-law provisions expressly excluding New York conflict-of-laws principles and those silent on the matter. New York substantive law applies regardless. Accordingly, in this case, an ISDA Master Agreement with a choice-of-law provision designating New York law -- regardless of whether that provision expressly excludes New York conflict-of-laws principles -- will implicate the implied covenant under New York law. No further choice-of-law analysis is needed.[188]

[*605] OTC defendants emphasize that an ISDA Master Agreement Schedule template recommends the inclusion of express language excluding New York conflict-of-laws principles within a choice-of-law provision, and contend that the contracting parties' deletion of such language suggests an intent that New York conflict-of-laws principles should apply. We are unpersuaded that such an inference is sufficient. Indeed, IRB considered two contracts with New York choice-of-law provisions, **[**443]** one with an express exclusion of New York conflict-of-laws principles and the other without. See *IRB, 20 N.Y.3d at 313*. The Court of Appeals did not find this difference to be significant; rather, it held that New York substantive law applied regardless. *Id. at 315*. The inference that OTC defendants seek to draw from the deletion of language expressly excluding New York conflict-of-laws principles from the schedule template is no stronger than any inference to be drawn from the two dissimilar contracts in IRB, and it is insufficient to escape the broad holdings of *IRB* and *Ministers & Missionaries*.

2.4.1.2. Application of New York Law

Accordingly, we analyze substantively the implied covenant under New York law. As we have previously summarized:

> ***HN82***[] Under New York law, "a covenant of good faith and fair dealing in the course of contract performance" is "[i]mplicit in all contracts." The implied covenant of good faith and fair dealing obligates a

[188] This application of IRB and Ministers & Missionaries is at least somewhat counterintuitive and renders superfluous contractual language in a choice-of-law provision expressly excluding New York conflict-of-law principles. Cf. *Lawyers' Fund for Client Prot. v. Bank Leumi Tr. Co. of N.Y., 94 N.Y.2d 398, 404, 727 N.E.2d 563, 706 N.Y.S.2d 66 (2000)* ("[The proposed] interpretation would render the second paragraph superfluous, a view unsupportable under standard principles of contract interpretation."). Nonetheless, ***HN81***[] we are bound to apply New York law as established by the New York Court of Appeals. See, e.g., *Tiber Holding Corp., 277 F.3d at 253* ("[We], sitting in diversity, must follow the holdings of the New York Court of Appeals.").

> promisor to fulfill "any promises which a reasonable person in the position of the promisee would be justified in understanding were included" in the contract. Specifically, implied in every contract is a promise that "neither party shall do anything which will have the effect of **[**444]** destroying or injuring the right of the other party to receive the fruits of the contract."

LIBOR II, 962 F. Supp. 2d at 631-32 (quoting *Dalton v. Educ. Testing Serv., 87 N.Y.2d 384, 389, 663 N.E.2d 289, 639 N.Y.S.2d 977 (1995))*. "The duty of good faith and fair dealing, however, is not without limits, and no obligation can be implied that 'would be inconsistent with other terms of the contractual relationship.'" *Dalton, 87 N.Y.2d at 389* (quoting *Murphy v. Am. Home Prods. Corp., 58 N.Y.2d 293, 304, 448 N.E.2d 86, 461 N.Y.S.2d 232 (1983))*.

The relevant inquiry called for by the implied covenant is objective, not subjective: we consider "any promises which a reasonable person in the position of the promisee would be justified in understanding were included." *Id. at 389* (emphasis added) (quoting *Rowe v. Great Atl. & Pac. Tea Co., 46 N.Y.2d 62, 69, 385 N.E.2d 566, 412 N.Y.S.2d 827 (1978))*. We accordingly reject OTC defendants' argument that the class members' subjective understandings of LIBOR will introduce additional individual questions. (OTC Defs.' Class Opp'n 24-25.) Given the strictly objective nature of this aspect of the class's implied covenant claims, this consideration does not weigh on the individual question side of the scale.

However, we lack OTC plaintiffs' confidence that a similar analysis of the implied covenant can be applied to all of the LIBOR-based instruments specified in the class definition. Because the implied covenant is limited by the "other terms of the contractual relationship," *Dalton, 87 N.Y.2d at 389*, the underlying contract **[**445]** must **[*606]** be analyzed. In this case, while ISDA Master Agreements (and accompanying schedules) govern the vast majority of swap transactions covered by the class definition, no evidence exists in the record as to whether bonds are similarly governed. Rather, as we analyzed above, the structure and format of the ISDA Master Agreement strongly suggests that bonds generally are not governed by ISDA Master Agreements at all. Again, OTC plaintiffs have offered no evidence of contracts governing bonds and have offered no analysis of whether those contracts may differ between bond issuances (even if issued by the same panel bank). In the face of this evidentiary void, we are skeptical that common questions will predominate over individual ones in analyzing the covenant of good faith and fair dealing implied in the contracts at issue.

This skepticism is confirmed by several additional dimensions of variation even within ISDA Master Agreements: some contain arbitration clauses, as suggested by an ISDA publication that "provides guidance on the use of an arbitration clause with either the ISDA 2002 Master Agreement . . . or the ISDA 1992 Master Agreement . . . and includes a range of model arbitration **[**446]** clauses" (OTC Defs.' Class Opp'n 24 & n.19); some contain waivers of a right to trial by jury, as one of Jennie Stuart's and one of Baltimore's ISDA Master Agreements do (Chen Decl. ex. B at 36, ex. C at 21); and some designate exclusive jurisdiction in other forums, such as the designation of Maryland state court or federal court in the District of Maryland in two of Baltimore's ISDA Master Agreements (Chen Decl. ex. D sched. at 7, ex. E sched. at 7), and the designation of Pennsylvania state court or federal court in the Eastern District of Pennsylvania in Bucks County's ISDA Master Agreement (Poronsky Bucks County Decl. ex. B at 29). Each of these dimensions of variation raises individual issues bearing directly on the justiciability of a putative class member's claims in a class action before this Court.

2.4.2. Unjust Enrichment

Limiting the class to instruments with a choice-of-law provision designating New York law also does not salvage class treatment for OTC plaintiffs' unjust enrichment claims. Those claims do not arise under a contract in this case. See *LIBOR III, 27 F. Supp. 3d at 483*; *LIBOR II, 962 F. Supp. 2d at 630*; cf. *Schwab, 2018 U.S. App. LEXIS 4519, 2018 WL 1022541, at *18*. Accordingly, OTC plaintiffs' unjust enrichment claims are not subject to any choice-of-law provision that may be contained in the contract(s) **[**447]** underlying the transaction. Thus, the proposed modification would not ameliorate the predominance issues presented by variations in states' substantive laws of unjust enrichment.

2.4.3. Conclusion

Modification of the class definition in the manner proposed by OTC plaintiffs at the eleventh, or perhaps thirteenth, hour would not cure the deficiencies that we have previously identified. Common questions would not predominate OTC plaintiffs' implied covenant claims even when the individual issues raised by variations in state law are not weighed in the predominance analysis. OTC plaintiffs have not established that the contracts underlying the LIBOR-based instruments specified in the class definition are sufficiently similar in material respects, and the individual questions introduced by the variations within ISDA Master Agreements identified by the OTC defendants further weigh against predominance. Further, modification of the class definition would have no impact on the predominance analysis as to unjust enrichment, given that contractual choice-of-law provisions will not dictate the state substantive law under which the unjust enrichment claims will be analyzed.

[*607] 2.5. Superiority

Once **[**448]** again applying the *Rule 23(b)(3)* factors, we conclude that class action treatment would be superior as to OTC plaintiffs' antitrust claims, but not their state-law implied covenant and unjust enrichment claims.

As we have discussed in the context of the other putative class actions, class members lack a strong interest in individually controlling the prosecution of separate actions in the absence of serious conflicts between them, supporting a finding of superiority under *Rule 23(b)(3)(A)*. This action has progressed further than the other actions asserting similar claims, thereby supporting superiority under *Rule 23(b)(3)(B)*. The desirability of concentrating litigation in this forum for the reasons expressed by the JPML, see *In re LIBOR-Based Fin. Instruments Antitrust Litig., 802 F. Supp. 2d at 1381*, coupled with the absence of plaintiffs implicating "[c]oncerns about foreign recognition of our judgments," *In re Vivendi, 838 F.3d at 264*, also support a finding of superiority under *Rule 23(b)(3)(C)*.

The antitrust claims and the state-law claims differ, however, under the manageability factor of *Rule 23(b)(3)(D)*. As we have discussed, a nationwide class asserting state-law causes of action raises manageability concerns. See *In re U.S. Foodservice, 729 F.3d at 127*; see also 2 William B. Rubenstein, Newberg on Class Actions § 4:75 (5th ed.) (Westlaw 2017) (noting that in a nationwide class of state-law claims, **[**449]** "common issues may not predominate . . . and/or the case may be unmanageable and therefore not a superior method of litigation"). Further, OTC plaintiffs have not attempted to demonstrate the feasibility of ameliorative measures such as the certification of subclasses grouped to accommodate variations in state law. Accordingly, as to OTC plaintiffs' state-law claims, we conclude that class-action treatment would not be superior to the maintenance of individual actions based on our manageability concerns. By contrast, OTC plaintiffs' antitrust claims, asserted under federal law, raise no such concerns; we accordingly find that class-action treatment would be superior as to those claims.

2.6. Conclusion

OTC plaintiffs' motion for class certification is granted in part and denied in part. A class limited to OTC plaintiffs' antitrust claims against Bank of America and JPMorgan Chase (Count 1 of the Corrected Third Consolidated Amended Complaint) will be certified. As to those claims, we conclude that OTC plaintiffs have sufficiently established the requirements of *Rule 23*, including the requirement that common questions predominate over individual ones. The individual questions of damages identified **[**450]** by OTC defendants are insufficient to defeat predominance or, by extension, certification.[189]

---

[189] Our decision to certify a class as to OTC plaintiffs' antitrust claims rests on the action in its current form, including on OTC plaintiffs' allegations of a sixteen-bank conspiracy to suppress LIBOR. To the extent subsequent developments in the case call into question those allegations or the other bases on which we rely, "[a]n order that grants or denies class certification may be

While we certify a class as to their antitrust claims, OTC plaintiffs have not established that common questions predominate as to their state-law claims for breach of the implied covenant of good faith and fair dealing and for unjust enrichment. Variations in the substantive law to be applied introduce individual questions defeating predominance and superiority for the class **[*608]** as initially proposed, and modification to limit the class to transactions including a New York choice-of-law provision would not tip the predominance balance as to these claims. Choice-of-law provisions do not govern OTC plaintiffs' unjust enrichment claims, and OTC plaintiffs have not established predominance in the analysis of their implied covenant claims given the variations in ISDA Master Agreements observed in the record and the lack of evidence as to LIBOR-based instruments not governed by ISDA Master Agreements.

For the foregoing reasons, a class is certified under *Rule 23(b)(3)*, defined as follows:

> All persons or entities residing in the United States that purchased, directly from a Panel Bank (or a Panel Bank's subsidiaries or **[**451]** affiliates), a LIBOR-Based Instrument that paid interest indexed to a U.S. dollar LIBOR rate set any time during the period August 2007 through August 2009 ("Class Period") regardless of when the LIBOR-Based Instrument was purchased.

The term "LIBOR-Based Instrument" is defined with reference to page 298 of this opinion, and certain individuals and entities are excluded from the class consistent with the exclusion set forth on page 298 of this opinion. Additionally, the Mayor and City Council of Baltimore, Maryland; the City of New Britain, Connecticut; Vistra Energy Corp.; Yale University; and Jennie Stuart Medical Center, Inc. are appointed as lead plaintiffs. Pursuant to *Rule 23(g)*, and consistent with our prior order appointing interim colead class counsel, see Dec. 22, 2011 Order, ECF No. 90, Susman Godfrey LLP and Hausfeld LLP are appointed as class counsel.

VI. INTERLOCUTORY APPEALABILITY

HN83[] Under *Rule 23(f) of the Federal Rules of Civil Procedure*, the Court of Appeals "may permit an appeal from an order granting or denying class-action certification." The Second Circuit has held that "[v]iews expressed by the district court at the time of class certification, although not required, would be relevant to our determination of whether interlocutory **[**452]** appeal is warranted." *In re Sumitomo Copper Litig., 262 F.3d 134, 140 (2d Cir. 2001)*. A party "seeking leave to appeal pursuant to *Rule 23(f)* must demonstrate either (1) that the certification order will effectively terminate the litigation and there has been a substantial showing that the district court's decision is questionable, or (2) that the certification order implicates a legal question about which there is a compelling need for immediate resolution." *Id. at 139*. "The first category comprises the socalled 'death knell' cases and their counterparts -- namely cases in which the class certification order effectively terminates the litigation either because the denial of certification makes the pursuit of individual claims prohibitively expensive or because the grant of certification forces the defendants to settle." *Id. at 138*. The second category requires a "novel legal question . . . of fundamental importance to the development of the law of class actions and . . . is likely to escape effective review after entry of final judgment." *Id. at 140*.

Accepting the Circuit's invitation to express our views as to the propriety of interlocutory review, we offer the following observations. First, all three groups of plaintiffs have been afforded more discovery than is typical at the class **[**453]** certification stage. The class certification schedule lasted for almost a year and a half (Letter to Counsel from the Court, Dec. 23, 2015, ECF No. 1268), and as counsel for OTC plaintiffs have summarized, the record in this case has included more than 1.1 million documents and 6000 audio files (Dec. 15, 2017 Motion, ECF No. 2386). As we recognized even before the class certification process began in earnest, plaintiffs **[*609]** have had access to the materials generated by "multiple government investigations, consent decrees, [and] trials" regarding LIBOR manipulation. (Dec. 16, 2015 Hr'g Tr. 21:1-2, ECF No. 1271.)

---

altered or amended before final judgment," *Fed. R. Civ. P. 23(c)(1)(C)*, and we must "ensure continued compliance with *Rule 23*'s requirements," *Amara, 775 F.3d at 520*.

Thus, the record is well-developed, and this extensive record has been considered in reaching the certification decisions set forth above. The parties have had ample time to marshal the strongest evidence in support of or in opposition to class certification, and the time to supplement the record -- at least for class certification purposes -- has passed. A lingering possibility as to the existence of more documents or data, potentially relevant to the propriety of certification but undiscovered after more than six years of litigation, will not be sufficient to render our certification **[**454]** decisions "questionable."

Second, in resolving these motions, we have analyzed -- over the course of several hundred pages -- each of the class certification requirements as they pertain to the three proposed classes, even when doing so was not strictly necessary to reach a decision on the certification question itself. Issues of standing, the varying definitions of what constitutes "injury," and the applicability of the First Circuit's decision in In re Nexium in this circuit have presented some challenge, and further clarity on those issues may broadly be helpful. However, none of our holdings depends strictly on our analysis of an unsettled area of law; rather, they represent our application of well-settled principles of class certification law to a unique set of facts. Accordingly, we do not view class certification in this case as having presented any "novel legal question[s] . . . of fundamental importance to the development of the law of class actions" that are also "likely to escape effective review after entry of final judgment." *In re Sumitomo, 262 F.3d at 140*.

VII. CONCLUSION

In the Exchange-based action, Rabobank's motions to exclude the opinions of Dr. Seyhun and Mr. Miller are granted; Rabobank's motions **[**455]** to exclude the opinions of Dr. Netz and Mr. Beevers are granted in part and denied in part; and Exchange plaintiffs' motions to exclude certain of Dr. Culp's and Dr. Hubbard's opinions and to exclude all of Dr. Willig's opinions are denied. Exchange plaintiffs' motion for class certification is denied.

In the Lender action, Lender defendants' motion to exclude certain opinions of Dr. Webb's is granted; Berkshire's motion to exclude certain opinions of Dr. Willig's is denied. Berkshire's motion for class certification is denied.

In the OTC action, OTC defendants' motion to exclude Dr. Stiglitz's opinions is granted in part and denied in part. OTC plaintiffs' motion for class certification is also granted in part and denied in part, with a class certified only as to OTC plaintiffs' antitrust claims against Bank of America and JPMorgan Chase as set forth fully in Section V above.

This memorandum and order resolves the motions listed at docket entries 1885, 1887, 1904, 2011, 2018, 2021, 2053, 2055, 2057, 2059, 2067, 2069, and 2072.

SO ORDERED.

Dated: New York, New York

February 28, 2018

Opinion

[*728] MEMORANDUM OPINION AND ORDER

MARVIN E. ASPEN, District Judge:

Plaintiff International Equipment Trading, Ltd. ("IET") alleges Defendant Illumina, Inc. ("Illumina") engaged in predatory and anticompetitive behavior that violated federal ***antitrust law*** and Illinois state law. (Am. Compl. (Dkt. No. 21) ¶ 1.) Presently before us are three pending motions. First, Illumina has filed a motion to dismiss IET's amended complaint in its entirety. (Pl's Mot. (Dkt. No. 23).) Second, IET has filed a motion to strike Illumina's affirmative defenses under *Federal Rule of Civil Procedure 12(f)*. (Pl.'s Mot. to Strike (Dkt. No. 27).) Third, Illumina filed a motion requesting **[**2]** we postpone briefing on IET's motion to strike pending our ruling on its **[*729]** motion to dismiss. (Def.'s Mot. to Postpone (Dkt. No. 30).) For the following reasons, we grant Illumina's motion to dismiss in part and deny in part, and dismiss Counts I through V without prejudice. We also deny Illumina's motion to postpone briefing on IET's motion to strike as moot, and order briefing on IET's motion to strike. Illumina may file a response to IET's motion to strike Illumina's affirmative defenses and IET's supporting brief on or before March 16, 2018, and IET may file a reply brief on or before March 30, 2018.

BACKGROUND

For the purposes of a motion to dismiss, "we accept the well-pleaded facts in the complaint as true." *McCauley v. City of Chi., 671 F.3d 611, 616 (7th Cir. 2011)*. IET, an Illinois corporation with its principal place of business in Vernon Hills, Illinois, sells and leases laboratory equipment to laboratories, hospitals, and research institutions across the United States and internationally. (Am. Compl. ¶¶ 2, 11.) As part of its business, IET sources various models of used or refurbished genome sequencing unit systems ("sequencing units") manufactured by Illumina. (*Id.* ¶¶ 2, 5.) Illumina manufactures "integrated systems" that "serve **[**3]** the sequencing, genotyping and gene expression markets" and sells its used sequencing units in competition with IET. (*Id.* ¶¶ 3-4.)

IET alleges that beginning in or around 2007, once Illumina learns of a possible sale or lease by IET of a refurbished Illumina sequencing unit, Illumina engages in "scare tactic[s] . . . intended to kill the sale or lease between the customer and IET " (*Id.* ¶ 7.) Specifically, IET alleges Illumina informs IET's potential customers that they must pay a significant "site licensing fee" for operation and data collection software needed to operate a used Illumina sequencing unit purchased from IET. (*Id.* ¶¶ 5-6.) IET claims Illumina has discretion in charging the fee, sometimes charges the fee for machines exempt from site licensing fees based on a preexisting contract, and only threatens the fee to interfere with sales from "third party resellers like IET." (*Id.* ¶¶ 7-8, 17-18.) IET further alleges Illumina refuses to service sequencing units purchased from IET when the purchasers do not pay Illumina the site licensing fee. (*Id.* ¶¶ 8, 18.) Based on these allegedly anti-competitive tactics, IET alleges Illumina "has unlawfully attempted to create a monopoly within **[**4]** the secondary sequencing unit market over [Illumina] sequencing units." (*Id.* ¶ 9.) As a result, IET has lost sales, including the sale of a HiSeq 4000 Illumina sequencing unit to the University of Central Florida. (*Id.* ¶ 19.)

IET's amended complaint alleges Illumina violated various antitrust laws, and asserts attempted monopolization claims under *Section 2* of the Sherman Act, *15 U.S.C. § 2* (Count I); *Sections 4* and *16* of the Clayton Act, *15 U.S.C. §§ 15(a)*, *26* (Count II); and the Illinois Antitrust Act ("IAA"), *740 ILCS 10/1 et seq.* (Count V). IET claims Illumina's "predatory and anticompetitive conduct" in charging site licensing fees has been an attempt to "drive IET and other third-party resellers from the . . . sequencing unit markets and thereby strengthen its dominant position within these markets." (*Id.* ¶ 29.)

IET's amended complaint also includes claims under the Illinois Consumer Fraud and Deceptive Business Practices Act, *815 ILCS 505/1 et seq*,. ("ICFA") (Count III) and Illinois Uniform Deceptive Trade Practices Act, *815 ILCS 510/2 et seq.*, ("UDTPA") (Count IV) based on Illumina's willful engagement in "deceptive trade practices" and "unfair conduct." (*Id.* ¶¶ 37-45.) IET additionally includes a claim for intentional interference with a prospective economic advantage ("intentional interference") **[**5]** (Count VI), alleging Illumina intentionally **[*730]** and maliciously interfered with customers with whom IET had a "reasonable expectancy of completing sales and/or leases of refurbished sequencing units." (*Id.* ¶¶ 49-51.) Finally, IET seeks a declaratory judgment pursuant to *28 U.S.C. § 2201(a)* declaring Illumina cannot legally charge or threaten to charge site licensing fees to IET customers who purchase used Illumina sequencing units. (*Id.* ¶¶ 52-59.)

LEGAL STANDARD

Federal Rule of Civil Procedure 12(b)(6) governs Illumina's motion to dismiss. "The purpose of a motion to dismiss is to test the sufficiency of the complaint, not to decide the merits." *Gibson v. City of Chi., 910 F.2d 1510, 1520 (7th Cir. 1990)* (internal citation omitted). When considering a motion to dismiss under *Rule 12(b)(6)*, we accept as true all well-pleaded facts alleged in the complaint and view them in the light most favorable to the plaintiff. *Santiago v.*

Walls, 599 F.3d 749, 756 (7th Cir. 2010). While "detailed factual allegations" are not required to survive a motion to dismiss, the complaint must "state a claim [for] relief that is plausible on its face." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 1949-50, 173 L. Ed. 2d 868 (2009)* (internal quotation marks omitted) (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 1974, 167 L. Ed. 2d 929 (2007))*. The plausibility standard "is not akin to a 'probability requirement,' but it asks for more than a sheer possibility that a defendant has acted unlawfully." *Ashcroft, 556 U.S. at 678, 129 S. Ct. at 1949* (quoting *Twombly, 550 U.S. at 556, 127 S. Ct. at 1965*). While the plaintiff need not **[**6]** plead "detailed factual allegations," the complaint must allege facts sufficient "to raise a right to relief above the speculative level." *Twombly, 550 U.S. at 555, 127 S. Ct. at 1964-65*. However, to protect defendants from expensive discovery, "[i]n a complex antitrust . . . case a fuller set of factual allegations . . . may be necessary to show that the plaintiff's claim is not largely groundless." *Limestone Dev. Corp. v. Vill. of Lemont, Ill., 520 F.3d 797, 803 (7th Cir. 2008)* (internal citation omitted).

ANALYSIS

I. Attempted Monopolization Claims (Counts I, II, and V)

We first consider whether IET sufficiently pled its antitrust claims to survive a *Rule 12(b)(6)* motion to dismiss. Our analysis focuses on the requirements of the Sherman Act, as IET's Clayton Act and IAA claims "stand or fall with the Sherman Act Claim."[1] *Int'l Equip. Trading, Ltd. v. AB SCIEX LLC, No. 13 C 1129, 2013 U.S. Dist. LEXIS 123109, 2013 WL 4599903, at *3 n.3 (N.D. Ill. Aug. 29, 2013)*. To succeed in an attempted monopolization claim under *Section 2* of the Sherman Act, a plaintiff must prove a defendant (1) engaged in predatory or anticompetitive conduct, (2) specifically intended to acquire monopoly power, and (3) reached a stage based on defendant's actions and market position where there is a **[*731]** dangerous probability defendant will achieve an actual monopoly. *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 456, 113 S. Ct. 884, 890-91, 122 L. Ed. 2d 247 (1993)*; *Attempted Monopolization*, Holmes & Mangiaracina, ***Antitrust Law*** Handbook § 3:6.

Illumina argues IET's antitrust claims must be dismissed **[**7]** 3 because IET failed to plead any non-conclusory facts to establish that Illumina has a dangerous probability of establishing monopoly power. (Def.'s Mem. in Support of Mot. to Dismiss ("Mem.") (Dkt. No. 24) at 15-17.) A dangerous probability of establishing a monopoly in a particular market requires more than allegations of merely "unfair or predatory conduct"; instead, "the antitrust plaintiff must also prove the defendant has market power in a relevant market" and that the "market power will tend to approach monopoly power if the alleged unlawful conduct remains unchecked." *Walter Kidde Portable Equip., Inc. v. Universal Sec. Instruments, Inc., 669 F. Supp. 2d 895, 900-01 (N.D. Ill. 2009)* (citing *Spectrum Sports, 506 U.S. at 457, 113 S. Ct. at 891*; *DSM Desotech Inc. v. 3D Sys. Corp., No. 08 C 1531, 2009 U.S. Dist. LEXIS 5980, 2009 WL 174989, at *7 (N.D. Ill., Jan. 26, 2009))*. Courts regularly find pleading the defendant's share of the relevant market sufficient to allege this element at the pleading stage. *Walter Kidde, 669 F. Supp. 2d at 901*; *see also* *Avnet, Inc. v. Motio, Inc., No. 12 C 2100, 2015 U.S. Dist. LEXIS 10799, 2015 WL 425442, at *6 (N.D. Ill. Jan. 30, 2015)* (finding an allegation that defendant controlled 95% of a market sufficient to survive a motion to dismiss); *Hon Hai Precision Indus. Co. v. Molex, Inc., No. 08 C 5582, 2009 U.S. Dist. LEXIS 9165, 2009 WL 310890, at *3 (N.D. Ill. Feb. 9, 2009)* (dismissing attempted monopolization claim under the Sherman Act for failure to plead dangerous probability of achieving a monopoly, noting that "the extent of [defendant's] worldwide share in the

[1] IET's Clayton Act claim depends on the survival of its Sherman Act claim because *Sections 4* and *16* of the Clayton Act merely establish a private right of action for any person injured by a violation of the Sherman Act. *15 U.S.C. § 15*; *see also* Am. Compl. ¶ 36 (incorporating the Sherman Act attempted monopolization claim into the Clayton Act claim). Furthermore, *Section 2* of the Sherman Act controls interpretation of the relevant section of the IAA. *See* *Nucap Indus., Inc. v. Robert Bosch LLC, 273 F. Supp. 3d 986, 1010 (N.D. Ill. 2017)* ("'Because *§ 3(3)* of the Illinois Antitrust Act was modeled upon *§ 2* of the Sherman Act, Illinois courts apply federal ***antitrust law*** to resolve questions arising under the state statutory provision,' so the *Rule 12(b)(6)* analysis of [the Illinois Antitrust Act claims] collapses into the question of whether Nucap has stated a claim under *§ 2* of the Sherman Act.") (internal citation omitted)).

relevant market . . . would allow the Court to infer that [defendant] threatens or even has the capacity to obtain monopoly power"). **[**8]** Lack of "competition in the relevant market" also suggests a dangerous probability of establishing a monopoly. *Hon Hai, 2009 U.S. Dist. LEXIS 9165, 2009 WL 310890, at *3*.

IET has failed plead the dangerous proximity of monopoly element of attempted monopolization because IET has not identified any facts that establish Illumina's market power in the relevant secondary market of refurbished Illumina sequencing units.[2] (Am. Compl. ¶¶ 14, 24.) The only non-conclusory facts in IET's amended complaint establishing Illumina's market control involve the market of new sequencing units: IET alleges "Illumina controls approximately 65% of the market for *new* sequencing units." (*Id.* ¶ 16 (emphasis added).) This information is irrelevant to IET's market control in the used Illumina sequencing unit market, a market IET itself argues is entirely distinct from the market for new Illumina sequencing units based on the "enormous price differential between new and used models." (*Id.* ¶ 14.) Furthermore, IET acknowledges the existence of a number of competitors in the used sequencing unit market, which in itself suggests Illumina does not have a dangerous proximity of monopoly power. (*Id.* ¶ 31 ("IET is one of fewer than five companies in the United States and Canada **[**9]** who sell Illumina's sequencing units in the secondary markets.")); *see, e.g., Hon Hai, 2009 U.S. Dist. LEXIS 9165, 2009 WL 310890, at *3*.

[*732] We cannot consider IET's remaining allegations about Illumina's market power in the relevant market as they are all conclusory. *McCauley, 671 F.3d at 616* ("[L]egal conclusions and conclusory allegations merely reciting the elements of the claim are not entitled to this presumption of truth. After excising the allegations not entitled to the presumption, we determine whether the remaining factual allegations 'plausibly suggest an entitlement to relief.'") (citing *Iqbal, 556 U.S. at 681, 129 S. Ct. at 1951*). In its amended complaint, IET repeats general statements about Illumina's market control that merely repeat the dangerous proximity element of attempted monopoly. For example, IET states "Illumina maintains substantial market power in the . . . secondary resale market of its own sequencing units." (Am. Compl. ¶ 31.) IET also argues that based on "Illumina's substantial position in the market for used Illumina sequencing units" and the "anticompetitive policies of its sales representatives . . . , a dangerous probability exists that its attempts to monopolize the secondary sequencing unit markets will succeed." (*Id.*) These "'naked assertions' devoid of 'further factual **[**10]** enhancement'" do not sufficiently establish an element of a claim to survive a *Rule 12(b)(6)* motion to dismiss. *Iqbal, 556 U.S. at 678, 129 S. Ct. at 1949* (citing *Twombly, 550 U.S. at 555-57, 127 S. Ct. at 1955*); *see also GlobalTap LLC v. Smart Tap LLC, No. 13 C 5322, 2015 U.S. Dist. LEXIS 21687, 2015 WL 791256, at **5-6 (N.D. Ill. Feb. 24, 2015)* (finding plaintiff's "conclusory statements" like "[t]here is a dangerous probability that GlobalTap[] . . . will create market power in the relevant market" without "factual allegations to support these conclusions" insufficient to survive a motion to dismiss); *Mitsubishi Elec. Corp. v. IMS Tech., Inc., No. 96 C 499, 1997 U.S. Dist. LEXIS 15350, 1997 WL 630187, at *6 (N.D. Ill. Sept. 30, 1997)* ("Mitsubishi's conclusory allegation that Hurco is 'one of the largest producers' of CNC systems, and the mere recitation that defendants possess 'substantial market presence' are not enough to allege market power."). Without any specific factual allegations about Illumina's power in the relevant market, IET has failed to sufficiently allege dangerous probability, a requisite element of attempted monopoly under the Sherman Act.

Citing *Endsley v. City of Chi., 230 F.3d 276, 282 (7th Cir. 2000)*, IET argues market share, a factually intensive inquiry, is "best addressed on a motion for summary judgment or a trial" instead of a motion to dismiss. (Pl.'s Resp. to Mot. to Dismiss ("Resp.") (Dkt. No. 33) at 12.) However, dismissal of IET's antitrust claims is proper here because IET has failed to identify any non-conclusory facts about Illumina's dominance in the used **[**11]** sequencing unit market. *GlobalTap LLC, 2015 U.S. Dist. LEXIS 21687, 2015 WL 791256, at **5-6* (finding dismissal proper when plaintiff "does not provide any factual allegations to support [market power] conclusions" despite *Endsley*).

---

[2] Illumina argues IET's proposed market of used Illumina sequencing units fails because IET did not allege facts establishing one of the "rare circumstances" needed to establish a single-brand product market. (Mem. at 12-14.) For the purposes of our analysis, we assume the validity of the market without deciding whether IET met its burden of establishing the existence of a single-brand market.

In light of IET's failure to adequately plead facts to support the requisite elements of attempted monopolization under the Sherman Act, we accordingly dismiss IET's antitrust claims (Counts I, II, and V) without prejudice for failure to state a claim under *Rule 12(b)(6)*.

II. ICFA and UDTPA Claims (Counts III & IV)

Illumina also moved to dismiss IET's claims under Illinois statutes: the ICFA and UDTPA. Because the same geographical issue determines the outcome of both ICFA and UDTPA claims, we analyze these claims together.

We must dismiss IET's ICFA and UDTPA claims because IET failed to plead the requisite nexus to Illinois. In 2005, the Illinois Supreme Court held that the ICFA does not "apply to fraudulent transactions which take place outside of Illinois" and **[*733]** does not have extraterritorial effect. *Avery v. State Farm Mut. Auto. Ins. Co., 216 Ill. 2d 100, 185, 835 N.E.2d 801, 853, 296 Ill. Dec. 448 (Ill. 2005)*; *see also* *Crichton v. Golden Rule Ins. Co., 576 F.3d 392, 396 (7th Cir. 2009)* (noting *Avery* "severely limited the extraterritorial reach of the ICFA"). In recent years, this district has interpreted *Avery*'s geographic requirement to also apply to the UDTPA. *LG Elecs. U.S.A., Inc. v. Whirlpool Corp., 809 F. Supp. 2d 857, 859 (N.D. Ill. 2011)* ("The Court concludes that the rule in *Avery* **[**12]** applies to the IUDTPA."); *see also* *Underground Sols., Inc. v. Palermo, No. 13 C 8407, 2014 U.S. Dist. LEXIS 132441, 2014 WL 4703925, at *10 (N.D. Ill. Sept. 22, 2014)* (listing cases applying the reasoning in *Avery* to UDTPA claims).

To qualify as sufficiently "within Illinois" to bring a claim under the ICFA or UDTPA, a plaintiff must allege "circumstances that relate to the disputed transaction occur primarily and substantially in Illinois." *Avery, 216 Ill. 2d at 187, 835 N.E.2d at 853*. "[T]here is no single formula or bright-line test for determining whether a transaction occurs within [Illinois]"; instead, "each case must be decided on its own facts." *Id.* Factors the Illinois Supreme Court has considered include "(1) the claimant's residence; (2) the defendant's place of business; (3) the location of the relevant item that is the subject of the disputed transaction; (4) the location of the claimant's contacts with the defendant; (5) where the contracts at issue were executed; (6) the contract's choice of law provisions, if there are any; (7) where the allegedly deceptive statements were made; (8) where payments for services were to be sent; and (9) where complaints about the goods or services were to be directed." *Haught v. Motorola Mobility, Inc., No. 12 C 2515, 2012 U.S. Dist. LEXIS 119575, 2012 WL 3643831, at *3 (N.D. Ill. Aug. 23, 2012)*.

We agree with Illumina that IET failed to allege Illumina's actions occurred primarily and substantially in Illinois. Based on IET's amended complaint, the only tangible connection **[**13]** to Illinois is that IET's state of corporation and principal place of business is in Illinois. (Am. Compl. ¶ 11.) IET claims its sales of occur within the United States, "including the State of Illinois," but the only specific sale IET alleges it lost because of Illumina impacted a customer in Florida. (*Id.* ¶¶ 2, 19.) Illumina is allegedly a dual citizen of Delaware and California with its principal place of business being San Diego, California. (*Id.* ¶ 11.) IET's ties to Illinois do not sufficiently establish the requisite connection to Illinois when the allegedly illegal actions of a California-based company impacted potential customers outside of Illinois. *Super Pawn Jewelry & Loan, LLC v. Am. Envtl. Energy, Inc., No. 11 C 8894, 2013 U.S. Dist. LEXIS 45112, 2013 WL 1337303, at *7 (N.D. Ill. Mar. 29, 2013)* (finding no substantial connection when only connection to Illinois is plaintiff being an Illinois business); *Vulcan Golf, LLC v. Google Inc., 552 F. Supp. 2d 752, 775 (N.D. Ill. 2008)* (dismissing case when only contact with Illinois is plaintiffs' residence in Illinois); *Walker v. S.W.I.F.T. SCRL, 491 F. Supp. 2d 781, 795 (N.D. Ill. 2007)* (same, further relying on lack of defendant connections to or transactions in Illinois).

IET cites *AB SCIEX*, a similar case in which IET was also a plaintiff, to argue that its citizenship in Illinois sufficiently establishes a nexus to Illinois at the pleading stage. (Resp. at 18.) We find inapposite because IET's *AB SCIEX* ***[**14]*** complaint pled connections beyond IET's incorporation and principal place of business in Illinois: IET also specifically identified three allegedly lost customers located in Illinois. *AB SCIEXAB SCIEX, LLC, 2013 U.S. Dist. LEXIS 123109, 2013 WL 4599903, at *11* (summarizing that three out of nineteen named customers were in Illinois). In this case, IET does not name any lost customers in Illinois; the only lost customer is in Florida. Accordingly, **[*734]** we dismiss IET's ICFA and UDTPA claims because IET has not pled a sufficient nexus to Illinois. To the extent Illumina's challenged behavior is "centered outside Illinois," IET "must rely on some other state's law" if it raises these claims in a second amended complaint. *LG Elecs. U.S.A., Inc., 809 F. Supp. 2d at 861* (internal citation omitted).

III. Intentional Interference with a Prospective Economic Advantage (Count VI)

We now turn to IET's claim for intentional interference with a prospective economic advantage. As a federal court sitting in diversity over this common law claim, state substantive law controls our analysis. *Harper v. Vigilant Ins. Co., 433 F.3d 521, 525 (7th Cir. 2005)*. Neither party raised any choice of law issues regarding the intentional interference claim, so we apply the law of Illinois, the forum state. *Camp v. TNT Logistics Corp., 553 F.3d 502, 505 (7th Cir. 2009)* ("Because none of the parties raised the choice of law issue, we apply the substantive law of **[**15]** Illinois, the forum state.")

To state a claim for intentional interference with prospective economic advantage under Illinois law, a plaintiff must allege "(1) a reasonable expectancy of entering into a valid business relationship, (2) the defendant's knowledge of the expectancy, (3) an intentional and unjustified interference by the defendant that induced or caused a breach or termination of the expectancy, and (4) damage to the plaintiff resulting from the defendant's interference." *Foster v. Principal Life Ins. Co., 806 F.3d 967, 971 (7th Cir. 2015)* (citing *Voyles v. Sandia Mortg. Co., 196 Ill. 2d 288, 300-01, 751 N.E.2d 1126, 1133, 256 Ill. Dec. 289 (Ill. 2001))*. "Actions that form the basis of a tortious interference claim must be directed at third-party business prospects." *F:A J Kikson v. Underwriters Labs., Inc., 492 F.3d 794, 800 (7th Cir. 2007)*.

Since we must accept all of IET's well-pleaded allegations as true when considering a motion to dismiss, we find that IET has plausibly pled the elements of an intentional interference at this stage. Illumina does not contest that IET adequately pled a reasonable expectancy of a business relationship, Illumina's knowledge of IET's expectancy, or damage to IET. (Mem. at 19.) Illumina argues, however, that IET has failed to plead that any interference with IET's prospective business relationships was unjustified. (*Id.*) While IET claims Illumina falsely told its customers it could **[**16]** charge a site relicensing fee, Illumina argues it had the right to impose site licensing fees under its sales contracts and did not otherwise engage in "predatory or anticompetitive conduct under the antitrust laws." (*Id.*, Resp. at 20.) For the purposes of a motion to dismiss, we construe the pleadings in the light most favorable to the plaintiff. *Santiago, 599 F.3d at 756*. As false statements to potential customers "do[] not constitute privileged lawful competition," we find IET has plausibly pled unjustified interference. *AB Sciex, 2013 U.S. Dist. LEXIS 123109, 2013 WL 4599903, at *11*; *see also* *Medscript Pharmacy, LLC v. My Script, LLC, 77 F. Supp. 3d 788, 796 (N.D. Ill. 2015)* ("[A] plaintiff's claim for tortious interference survives when his complaint alleges that defendants made false statements that caused plaintiff to lose potential customers.").

Illumina also argues we should dismiss this claim because IET did not plead the purportedly false statements with *Rule 9(b)* particularity. (Resp. at 19.) Indeed, *Rule 9(b)* heightened pleading requirements apply to intentional interference claims when the claim alleges the defendant engaged in "fraudulent conduct," including making false statements to **[*735]** potential customers. *Medscript, 77 F. Supp. 3d at 793*; *see also* *PharMerica Chi., Inc. v. Meisels, 772 F. Supp. 2d 938, 955 (N.D. Ill. 2011)*. While IET argues *Rule 9(b)* does not apply to this claim because "it does not sound in fraud" (Reply at 20, n.9), we agree with Illumina that *Rule 9(b)* applies **[**17]** because IET alleges Illumina misled potential IET customers by misrepresenting its ability to charge site licensing fees.[3] *See* *Medscript, 77 F. Supp. 3d at 793, 797* (finding plaintiff's claims required *Rule 9(b)* particularity because defendant allegedly made false statements to plaintiff's patients and prescribers).

Nonetheless, IET sufficiently pled the elements of intentional interference under the heightened *Rule 9(b)* pleading standard. *Fed. R. Civ. P. 9(b)* ("In alleging fraud or mistake, a party must state with particularity the circumstances

---

[3] The parties attempt to litigate whether Illumina licensed or sold operating software in sales of new Illumina sequencing units. (*See* Mem. at 3-6; Resp. at 13-17.) As discussed below, because it is not proper to consider the merits of the underlying claim on a motion to dismiss, we do not rule on this fact-intensive dispute at this time. *See* *Gibson, 910 F.2d at 1520*.

constituting fraud or mistake."). Under *Rule 9(b)*, the complaint must contain "'the who, what, when, where, and how' of the fraudulent conduct," but need not contain "extreme specificity." *Medscript, 77 F. Supp. 3d at 793* (citing *DiLeo v. Ernst & Young, 901 F.2d 624, 627 (7th Cir. 1990))*. In its amended complaint, IET claims Illumina contacted potential IET customers beginning in or around 2007 and informed these third parties that unless they purchased a used sequencing unit directly from Illumina, Illumina would demand a site licensing fee to operate the units' operating software. (Am. Compl. ¶ 5.) IET cites exact figures Illumina stated it would charge for specific Illumina sequencing unit models, and identifies with particularity the potential sale of a specific unit model to the University of Central **[**18]** Florida that allegedly fell through because of Illumina's fraudulent communications. (*Id.* ¶¶ 5, 19.) Considering these allegations, we find IET has pled with adequate particularity how and when Illumina allegedly interfered with IET's prospective sales or leases to provide notice to Illumina of the claims against it. *Vicom, Inc. v. Harbridge Merch. Servs, Inc., 20 F.3d 771, 777-78 (7th Cir. 1994)* (noting "fair notice" to defendants is "'[p]erhaps the most basic consideration' underlying *Rule 9(b)*") (citing 5A Wright &Miller, Fed. Prac. & Proc. Civ. § 1297 (3d ed.)); *see* *Swervo Entm't Grp., LLC v. Mensch, No. 16 C 4692, 2017 U.S. Dist. LEXIS 56351, 2017 WL 1355880, at *4 (N.D. Ill. Apr. 13, 2017)* (slip op.) (finding *Rule 9(b)* did not require pleading of defendant's exact location when she made alleged misrepresentations, and did not necessitate identifying specific individuals within an entity who engaged in communications); *Medscript, 77 F. Supp. 3d at 793, 796* (finding identification of plaintiff's customers as a group, without individually naming them, sufficient under *Rule 9(b)*). Accordingly, we find IET has sufficiently alleged its intentional interference claim and deny Illumina's motion to dismiss Count VI.

IV. Declaratory Judgment under *29 U.S.C. § 2201(a)* (Count VII)

Finally, we consider IET's motion for a declaratory judgment under the Declaratory Judgment Act, *28 U.S.C. § 2201(a)*. IET requests a declaration as to whether Illumina "may charge or threaten to charge a 'site licensing fee' **[**19]** to customers purchasing Illumina sequencing units from IET." (Am. Compl. ¶¶ 52-59.) Because of constitutional limits on the jurisdiction of federal courts, the Declaratory Judgment **[*736]** Act "allows federal courts, in their discretion, to render declaratory judgments only where there exists an 'actual controversy.'" *Trippe Mfg. Co. v. Am. Power Conversion Corp., 46 F.3d 624, 627 (7th Cir. 1995)* (citing *Crown Drug Co., Inc. v. Revlon, Inc., 703 F.2d 240, 243 (7th Cir. 1983))*. Accordingly, to survive a motion to dismiss, a complaint seeking declaratory relief "must allege facts sufficient to establish such an actual controversy." *Int'l Harvester Co. v. Deere & Co., 623 F.2d 1207, 1210 (7th Cir. 1980)*. Even if a court considers the declaratory action otherwise justiciable, it is within our discretion to decline to consider a declaratory judgment action. *Tempco Elec. Heater Corp. v. Omega Eng'g, Inc., 819 F.2d 746, 747 (7th Cir. 1987)* ("It is well settled that the federal courts have discretion to decline to hear a declaratory judgment action, even though it is within their jurisdiction.").

Illumina argues we should dismiss the declaratory judgment claim because Illumina licenses instead of sells its operating software on new Illumina sequencing units, and thus had the legal right to charge site licensing fees to purchasers of its resold machines. (Mem. at 20.) Illumina argues the Software License Agreement attached to its motion to dismiss as Exhibit A makes incontrovertible that Illumina **[**20]** licensed the operating software on its sequencing units, that the first sale doctrine does not apply, and that Illumina accordingly could charge site licensing fees to customers purchasing Illumina sequencing units from IET. (*Id.* at 4-6.) We may consider documents attached to a motion to dismiss as "part of the pleadings" under *Federal Rule of Civil Procedure 10(c)* "if they are referred to in the plaintiff's complaint and are central to [its] claim." *McCready v. eBay, Inc., 453 F.3d 882, 891 (7th Cir. 2006)* (internal citation omitted). IET argues we should not consider the Software License Agreement filed by Illumina because Illumina has not established that this is the software contract referred to in its amended complaint. (Resp. at 16 n.16 (arguing that Illumina has not established that the attached Agreement "governs all of its sales, or even the transactions identified in IET's Amended Complaint," and should not be considered at this stage as part of the pleadings because IET did not refer to this contract in its amended complaint).)

Without ruling on whether the submitted Agreement governed the transactions at issue, we have concerns about the applicability of this contract to all of the transactions at issue in the amended complaint: while the amended complaint **[**21]** involves IET's sales of equipment starting in 2007, the Agreement itself was not copyrighted until 2013. (Mem. Ex. A at 2.) Even assuming arguendo the Agreement governed all Illumina sequencing units IET attempted to sell during the relevant period, we nevertheless find that the Agreement does not conclusively establish that Illumina licensed its software equipment. *See* *Vernor v. Autodesk, Inc., 621 F.3d 1102, 1109 (9th Cir. 2010)* (requiring consideration of a number of factors in a software transfer to determine whether a license or sale occurred, beyond "whether the agreement was labeled a license"). Furthermore, a factually-intense analysis of the terms of the transfer of Illumina's software at the original sale of its unit sequencing machines is not properly addressed on a motion to dismiss. *See, e.g.,* *Burroughs Payment Sys., Inc. v. Symco Grp., Inc., No. C 11 06268 JCS, 2012 U.S. Dist. LEXIS 67198, 2012 WL 1670163, at *9 (N.D. Cal. May 14, 2012)* (denying motion to dismiss based on whether a transfer of software granted license or ownership, stating the analysis is "more appropriately addressed at a later stage of the case, after the factual record has been developed"). Taking IET's allegations as true, we find IET sufficiently alleged an actual controversy to survive a motion to dismiss **[*737]** its intentional interference claim. **[**22]** *F. McConnell & Sons, Inc. v. Target Data Sys., Inc., 84 F. Supp. 2d 961, 974 (N.D. Ind. 1999)* ("The purpose of the motion to dismiss is to test the legal sufficiency of the complaint and not to decide the merits.").

Illumina also argues IET's declaratory judgment claim is needlessly redundant and thus should be dismissed. (Mem. at 20.) IET does not address Illumina's redundancy argument in its response. While district courts regularly decline jurisdiction over a declaratory judgment action when it "substantially overlaps with Plaintiff's substantive claims," we disagree that the legal issue on which IET seeks a judgment is redundant. *Cohn v. Guaranteed Rate Inc., 130 F. Supp. 3d 1198, 1205 (N.D. Ill. 2015)* (citing *Vill. of Sugar Grove v. F.D.I.C., No. 10 C 3562, 2011 U.S. Dist. LEXIS 98438, 2011 WL 3876935, at *9 (N.D. Ill. Sept. 1, 2011)* (listing cases)); *c.f.* *Amari v. Radio Spirits, Inc., 219 F. Supp. 2d 942, 944 (N.D. Ill. 2002)* ("All of the issues in the declaratory judgment claim will be resolved by the substantive action, so the declaratory judgment serves no useful purpose."). The only other claim that stands in light of this Order is the intentional interference claim; we have dismissed Counts I through V. Taking all inferences in favor of IET, the declaratory judgment claim may proceed because it is sufficiently different from IET's intentional interference claim. *C.f.* *Cohn, 130 F. Supp. 3d at 1205* (finding claim for a declaratory judgment that plaintiff was discharged without cause redundant to a breach of contract claim because the legal issue is the same **[**23]** in both counts). Accordingly, we deny Illumina's motion to dismiss Count VII.

CONCLUSION

For the aforementioned reasons, we grant Illumina's motion to dismiss in part and deny in part. We hereby dismiss without prejudice Counts I through V and deny Illumina's motion to dismiss Counts VI and VII.[4] IET is granted leave to file a second amended complaint on or before March 16, 2018.

In light of our ruling, we deny Illumina's motion to postpone briefing on IET's motion to strike as moot. Illumina may file a response to IET's motion to strike Illumina's affirmative defenses on or before March 16, 2018, and IET may file a reply brief on or before March 30, 2018. It is so ordered.

/s/ Marvin E. Aspen

Honorable Marvin E. Aspen

United States District Judge

Dated: February 28, 2018

Chicago, Illinois

---

[4] Whether or not IET can adequately re-plead a federal antitrust claim, we retain jurisdiction over this case based on diversity jurisdiction pursuant to *28 U.S.C. § 1332*, as IET sufficiently pled diversity of citizenship and the amount in controversy in its amended complaint. (Am. Compl. ¶ 11).

Opinion

REPORT AND RECOMMENDATION RE: COUNTERCLAIM-DEFENDANT CALIFORNIA ASSOCIATION OF REALTORS, INC.'S MOTION TO DISMISS AMENDED COUNTERCLAIMS AND AMENDED THIRD-PARTY COMPLAINT OF PDFFILLER, [*3] INC. (DOCKET ENTRY # 121); DEFENDANTS' PARTIAL MOTION FOR JUDGMENT ON THE PLEADINGS (DOCKET ENTRY # 141)

BOWLER, U.S.M.J.

In this action, plaintiff and counterclaim defendant California Association of Realtors, Inc. ("CAR") sued defendants PDFfiller, Inc., Vadim Yasinovsky, and Boris Shakhnovich ("defendants") for copyright infringement under *17 U.S.C. § 501(a)*, trademark infringement under *15 U.S.C. §§ 1125(a)(1)* and *1114(1)*, violation of the *Digital Millennium Copyright Act ("DMCA"), 17 U.S.C § 1201(a)*, and violation of *Massachusetts General Laws chapter 93A ("chapter 93A"), sections two* and *11* ("*section 11*"). CAR alleges that defendants reproduce and sell unauthorized copies of CAR's works. (Docket Entry # 1). The works at issue purportedly bear CAR's trade name and logo, which are registered trademarks belonging to CAR and copyrighted. (Docket Entry # 1).

Defendant and third-party plaintiff PDFfiller, Inc. ("PDFfiller") brought an amended third-party complaint ("the third-party complaint") for antitrust violations under the *Sherman Act, 15 U.S.C. § 2*, against third-party defendant Real Estate Business Services, Inc. ("REBS") and third-party defendant RE FormsNet, LLC d/b/a zipLogix TM ("zipLogix"). (Docket Entry # 101). PDFfiller also brought amended counterclaims ("the **[*4]** counterclaims") for similar antitrust violations under the Sherman Act, *15 U.S.C. § 2*, against CAR, REBS, and zipLogix ("the CAR Parties"). (Docket Entry # 100).

Pending before this court is a motion filed by the CAR Parties to dismiss the counterclaims (Docket Entry # 100) and the third-party complaint (Docket Entry # 101) pursuant to *Fed. R. Civ. P. 12(b)(6)* ("*Rule 12(b)(6)*"). (Docket Entry # 121). PDFfiller opposes the motion. (Docket Entry # 123).

Also pending before this court is a motion for judgment on the pleadings filed by defendants to dismiss with prejudice CAR's chapter 93A claim pursuant to *Fed. R. Civ. P 12(c)* ("*Rule 12(c)*"). (Docket Entry # 141). CAR opposes the motion. (Docket Entry # 153). After conducting a hearing on January 10, 2018, this court took the motions (Docket Entry ## 121, 141) under advisement.

PROCEDURAL HISTORY

The complaint filed by CAR sets out the following causes of action: (1) copyright infringement under the United States *Copyright Act, 17 U.S.C § 501(a)*; (2) trademark infringement under the *Lanham Act, 15 U.S.C § 1125(a)(1)*; (3) violation of the DMCA, *17 U.S.C § 1201(a)*; and (4) violation of *chapter 93A, sections two* and *11*. (Docket Entry # 1). In the counterclaims against the CAR Parties and the third-party complaint against REBS and zipLogix, PDFfiller alleges: (1) unlawful tying **[*5]** in violation of the Sherman Act, *15, U.S.C. § 2*; (2) monopolization in violation of the Sherman Act, 15 U.S.C. § 2; and (3) attempted monopolization in violation of the Sherman Act, 15 U.S.C. § 2. (Docket Entry ## 100, 101).

I. The CAR Parties' Rule 12(b)(6) Motion

As previously noted, the CAR parties move to dismiss PDFfiller's Sherman Act claims for unlawful tying, monopolization, or attempted monopolization. To survive a Rule 12(b)(6) motion to dismiss, a complaint "must contain 'enough facts to state a claim to relief that is plausible on its face'" even if actual proof of the facts is improbable. *Bell Atlantic v. Twombly, 550 U.S. 544, 556, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*; *Miller v. Town of Wenham Massachusetts, 833 F.3d 46, 51 (1st Cir. 2016)*. The "standard is 'not akin to a probability' requirement," but it requires "'more than a sheer possibility that a defendant has acted unlawfully.'" *Saldivar v. Racine, 818 F.3d 14, 18 (1st Cir. 2016)*; *Feliciano-Hernández v. Pereira-Castillo, 663 F.3d 527, 533 (1st Cir. 2011)*. "[A]ll reasonable inferences" are drawn "in the pleader's favor." *Sanders v. Phoenix Ins. Co., 843 F.3d 37 (1st Cir. 2016)*. Legal conclusions in the complaint are not part of the Rule 12(b)(6) record. See *In re Ariad Pharmacy, Inc. Securities Litigation, 842 F.3d 744, 750 (1st Cir. 2016)*. Facts are confined to those in the counterclaims and the third-party complaint supplemented by matters of public record and facts susceptible to judicial notice. See *Butler v. Balolia, 736 F.3d 609, 611 (1st Cir. 2013)* (supplementing facts in complaint "by examining 'documents incorporated by reference into the complaint, matters of public record, and facts susceptible to judicial notice'").

"[W]hile there are no special **[*6]** pleading requirements for antitrust claims . . . invocation of antitrust terms of art does not confer immunity from a motion to dismiss." *Boston Scientific Corp. v. Schneider (Europe) AG, 983 F.Supp. 245, 253 (D. Mass. 1997)*. That being said, "[i]n antitrust cases, 'dismissals prior to giving the plaintiff ample opportunity for discovery should be granted very sparingly.'" *In re Asacol Antitrust Litig., 233 F.Supp.3d 247, 254 (D. Mass. 2017)* (citing *Meijer, Inc. v. Ranbaxy Inc., Civil Action No. 15-11828-NMG, 2016 U.S. Dist. LEXIS 120780, 2016 WL 4697331, at *8 (D. Mass. Sept. 7, 2016))* (quoting *Hosp. Bldg. Co. v. Trustees of Rex Hosp., 425 U.S. 738, 746, 96 S. Ct. 1848, 48 L. Ed. 2d 338 (1976))*.

FACTUAL BACKGROUND

PDFfiller is a Massachusetts corporation with a principal place of business in Massachusetts. (Docket Entry # 100, p. 23) (Docket Entry # 101, p. 3).[1] CAR is a "California not-for-profit trade association" and its principal place of business is located in California. (Docket Entry # 100, p. 23). REBS is a California corporation also with a principal place of business in California. (Docket Entry # 100, p. 23) (Docket Entry # 101, p. 3). REBS is a "wholly-owned for-profit subsidiary of CAR." (Docket Entry # 100, p. 23) (Docket Entry # 101, p. 4). [Z]ipLogix is a "Delaware limited liability company" and its principal place of business is located in Michigan. (Docket Entry # 100, p. 23) (Docket Entry # 101, p. 4).

PDFfiller provides a "paperless transaction management system through the PDFfiller Website" ("PTM"). **[*7]** (Docket Entry # 100, p. 23) (Docket Entry # 101, p. 2). The PTM system "allows users to fill, edit, and modify electronic fillable forms, including EFRE." (Docket Entry # 100, p. 23) (Docket Entry # 101, p. 2). CAR is a producer of electronic fillable real estate forms, and specifically produces EFREs "for use in California."[2] (Docket Entry # 100, p. 21) (Docket Entry # 101, p. 2). PDFfiller's PTM Software is designed to edit and manage the same type of electronic fillable real estate form. (Docket Entry # 100, pp. 21-22). CAR devotes "significant resources to ensuring that its California EFRE remain up-to-date and compliant with relevant law." (Docket Entry # 100, p. 21) (Docket Entry # 101, p. 2). Specifically, CAR expends "considerable" resources "to continually revise, improve, and update the CAR Library to ensure that its works remain current with the myriad of legal and policy changes affecting the California real estate services industry." (Docket Entry ## 100, pp. 21, 25) (Docket Entry # 101, p. 6).

---

[1] Page numbers refer to the page as docketed as opposed to the page number of the document itself.

[2] Electronic real estate forms used in California will be referred to hereinafter as "California EFREs."

CAR members are able to access CAR's EFRE[3] through a library ("the CAR Library") as a resulting benefit of their CAR membership. (Docket Entry # 100, p. 21) (Docket Entry # 101, p. **[*8]** 2). CAR EFRE can be edited using PTM Software that is comparable to PTM Software provided by PDFfiller. (Docket Entry # 100, p. 21) (Docket Entry # 101, p. 2).

PDFfiller's PTM Software is available through the PDFfiller website and, as noted above, it "allows users to fill, edit, manage, sign, and send a variety of electronic forms online." (Docket Entry # 100, p. 21) (Docket Entry # 101, p. 2). CAR, however, requires users to manage and edit CAR EFRE "only with 'zipFormx00AE;,' which is a real estate PTM Software offered for sale by zipLogix." (Docket Entry 100, p. 22) (Docket Entry # 101, p. 3). [Z]ipLogix is "majority-owned and managed" by CAR's wholly-owned subsidiary, REBS. (Docket Entry # 100, p. 22) (Docket Entry # 101, p. 2).

[Z]ipForm products include, but are not limited to, "zipForm Plus, zipForm Standard, and any other zipForm product sold, provided by, or otherwise offered by the CAR Parties that allows users to fill, edit, and sign EFRE." (Docket Entry # 100, p. 22) (Docket Entry # 101, p. 3). [Z]ipForm is "considerably more expensive than competitors' products," including products offered by PDFfiller. (Docket Entry # 100, p. 22) (Docket Entry # 101, p. 3). Additionally, **[*9]** when a non-CAR real estate professional "attempts to purchase a CAR EFRE online via CAR's website," he or she must also purchase zipForm. (Docket Entry # 100, pp. 22, 25) (Docket Entry # 101, pp. 3, 5). When non-member users click on the link to purchase zipForm, he or she is led "back to the zipLogix e-commerce website to create a zipLogix account and proceed with purchasing zipForm." (Docket Entry # 100, p. 25) (Docket Entry # 101, p. 5).

Real estate attorneys are able to "create a document similar to CAR EFRE." (Docket Entry # 100, p. 26) (Docket Entry # 101, p. 6). The use of real estate attorneys to create this type of document, however, is "significantly more expensive than EFRE" since EFREs are provided to CAR members for free. (Docket Entry # 100, p. 26) (Docket Entry # 101, p. 6). Further, EFREs maintain several "unique" features compared to other types of real estate forms, such as paper forms. (Docket Entry # 100, p. 26) (Docket Entry # 101, pp. 6-7). Some of these features include: the ability to easily change and edit EFREs; EFREs, combined with "search functionality," speed up the "process of reviewing and revising documents"; EFREs' format allows them "to be stored and **[*10]** retrieved without the significant storage fees typically endured in relation to the storage of a large number of paper real estate documents"; they minimize the risk of losing forms; it is easy and inexpensive to transfer EFREs, as they can be transferred by e-mail, which in turn "increases real estate transaction efficiency by simplifying the transmission of real estate forms between real estate professionals and their clients." (Docket Entry # 100, p. 26) (Docket Entry # 101, p. 7).

The electronic design of California EFRE "necessitate[es] software that is capable of filling, editing, managing, signing, and sending these types of forms - precisely what PTM Software is made to do." (Docket Entry # 100, p. 26) (Docket Entry # 101, p. 7). In addition, e-signatures allow "users to sign forms without having to print them out, and in some instances these signatures can be encrypted to remove doubts as to their authenticity." (Docket Entry # 100, p. 27) (Docket Entry # 101, pp. 7-8). California EFRE also allows for greater security measures, such as "two-factor" authentication, for payments to be linked to the forms and for an increase in overall efficiency for real estate professionals. **[*11]** (Docket Entry # 100, p. 27) (Docket Entry # 101, p. 8).

While PTM Software is needed to "obtain the full benefit of [an] EFRE," various types of PTM Software can be used to manage EFRE. (Docket Entry # 100, p. 27) (Docket Entry # 101, p. 8). Some consumers "frequently seek out non-Car PTM Software to edit CAR EFRE" from PTM Software providers like Dotloop, Instanet Solutions, and PDFfiller. (Docket Entry # 100, p. 27) (Docket Entry # 101, p. 8). Moreover, some California competitors offer EFRE

[3] "CAR EFRE" refers to the California EFRE produced by CAR. When CAR EFRE or CAR's EFRE is referenced, the reference is to California EFRE produced by CAR.

and PTM Software products separately, rather than bundling the two products as CAR does with its EFRE and zipLogix's zipForm.[4] (Docket Entry # 100, p. 27) (Docket Entry # 101, p. 8).

Moreover, "CAR EFRE has a market share of approximately 90% of all EFRE in California" and CAR describes its products "as 'the standard forms used in nearly every transaction in California.'" (Docket Entry # 100, p. 27) (Docket Entry # 101, p. 8). CAR EFRE forms and zipForm software are provided to members as a benefit[5] and CAR memberships are obtained "by joining a local REALTOR® affiliate." (Docket Entry # 100, p. 27) (Docket Entry # 101, p. 8).

Membership costs vary "by affiliate, but **[*12]** total membership fees are in excess of $600 per year." (Docket Entry # 100, p. 28) (Docket Entry # 101, p. 8). Non-members must purchase zipForm before they are able to purchase CAR's ERFE and the most basic version of zipForm "costs $849 for an annual license." (Docket Entry # 100, p. 28) (Docket Entry # 101, p. 8). Therefore, it costs between $600 and $849 per year for non-members to access CAR EFRE. (Docket Entry # 100, p. 28) (Docket Entry # 101, p. 8). In contrast, a number of competitors of CAR, such as PDFfiller, offer PTM Software that is comparable to zipForm for prices as low as $72 per year. Other competitors even offer their most basic PTM Software for free. (Docket Entry # 100, p. 28) (Docket Entry # 101, pp. 8-9). Because CAR only allows users to manage CAR EFRE with zipForm PTM Software, however, users cannot use these cheaper alternatives provided by competitors. (Docket Entry # 100, p. 22) (Docket Entry # 101, p. 9).

REBS[6] "is licensed to sell CAR EFRE to non-CAR members for the benefit of CAR." (Docket Entry # 100, p. 28) (Docket Entry # 101). In general, however, CAR "does not license the use of its EFRE in California to third parties." (Docket Entry # 100, p. 28) **[*13]** (Docket Entry # 101, p. 9). Thus, consumers must "either join a REALTOR® affiliate or purchase a zipForm® subscription" if they wish to buy a CAR EFRE. (Docket Entry # 100, p. 28) (Docket Entry # 101, p. 9). Either option of joining a REALTOR® affiliate or purchasing a zipForm® subscription is "significantly more expensive than CAR's competitors in the California EFRE market, and both options are conditioned on the purchase and use of zipForm®." (Docket Entry # 100, p. 28) (Docket Entry # 101, p. 9). A "considerable number of consumers" have expressed frustration because they are unable to use a PTM Software other than zipForm to edit CAR EFRE. (Docket Entry 100, p. 31) (Docket Entry # 101, p. 11). Additionally, some consumers of zipForm complain that the "software has compatibility issues with mobile devices and occasionally requires forms to be printed in order to be completed." (Docket Entry # 100, p. 31) (Docket Entry # 101, 11).

Finally, on several occasions, CAR engaged in legal disputes over CAR's copyright policy.[7] (Docket Entry # 100, p. 29) (Docket Entry # 101, p. 10). CAR's copyright policy prohibits the "printing [of] blank CAR EFRE from zipForm®, or placing CAR EFRE in any **[*14]** PTM Software other than zipForm®." (Docket Entry # 100, p. 29) (Docket Entry # 101, p. 10). "[O]n information and belief, CAR is encouraging or asking its sister state realtor associations to sue PDFfiller." (Docket Entry 100, p. 30) (Docket Entry # 101, p. 11). The Texas Association of Realtors, Inc. ("TAR") "sent a cease-and-desist letter to and filed suit against PDFfiller, making essentially the same allegations as CAR in

---

[4] As noted previously, zipForm is a type of PTM Software that is offered for sale by zipLogix. (Docket Entry # 100-22) (Docket Entry # 101).

[5] Assuming dubitánte that it is appropriate to consider an admission in a prior pleading in the context of a *Rule 12(b)(6)* motion, compare *Sulton v. Wright, 265 F.Supp.2d 292, 295 (S.D.N.Y. 2003)*, with *In re PXRE Grp., Ltd., Secs. Litig., 600 F.Supp.2d 510, 525 (S.D.N.Y. 2009)*; see also *TufAmerica, Inc. v. Diamond, 968 F.Supp.2d 588, 600 (S.D.N.Y. 2013)*, the added fact that CAR did not charge an "*additional* fee" for the benefit (Docket Entry # 32, p. 27) (emphasis added) does not alter this court's recommendation.

[6] As previously mentioned, REBS is a wholly-owned subsidiary of CAR. (Docket Entry # 100, p. 22) (Docket Entry # 101).

[7] PDFfiller cites to California Association of Realtors v. Zachery Childress, et al., Case No. 8:11-cv-304, 8:11-cv-1553 (C.D. Cal. 2011); California Association of Realtors v. Commerce Inn Inc., Case No. 2:02-cv-251 (C.D. Cal. 2002); California Association of Realtors v. Equisource Real Estate Inc., et al., Case No. 2:01-cv-01603 (C.D. Cal. 2001), to demonstrate current instances where CAR "has threatened and instituted lawsuits against non-CAR real estate professionals that use CAR EFRE without permission by claiming alleged copyright protection." (Docket Entry # 100, p. 29) (Docket Entry # 101, p. 10).

the present litigation." (Docket Entry # 100, p. 30) (Docket Entry # 101, p. 11). Similar to CAR, TAR owns an interest in zipForm. (Docket Entry # 100, p. 30) (Docket Entry # 101, p. 11).

DISCUSSION

A. Antitrust Claims: Unlawful Tying; Monopolization; and Attempted Monopolization

The Sherman Act was created "to be a comprehensive charter of economic liberty aimed at preserving free and unfettered competition as the rule of trade." *Northern Pacific Railway Co. v. United States, 356 U.S. 1, 4, 78 S. Ct. 514, 2 L. Ed. 2d 545 (1958)*. To maintain the fundamental liberties of competition, the Sherman Act "prohibits '[e]very contract, combination . . . or conspiracy, in restraint **[*15]** of trade or commerce among the several States.'" Id.; *15 U.S.C. § 1*. "Although this prohibition is literally all-encompassing, the courts have construed it as precluding only those contracts or combinations which 'unreasonably' restrain competition." *Northern Pacific Railway Co., 356 U.S. at 5*. Section two of the Sherman Act "holds liable 'every person who shall monopolize, or attempt to monopolize, or combine or conspire to monopolize . . . any part of the trade or commerce among the several States.'" *Boston Scientific Corp., 983 F.Supp. at 268*; *15 U.S.C. § 2*.

The CAR Parties first contend that PDFfiller has not sufficiently defined the relevant product markets to satisfy any of PDFfiller's antitrust claims and, as such, all of the antitrust claims should be dismissed. Specifically, the CAR Parties suggest that California EFRE and PTM Software for California are incorrect tying and tied product markets, respectively. (Docket Entry # 122) (Docket Entry # 127). The CAR Parties further maintain that even if PDFfiller properly defined the relevant product markets, PDFfiller's unlawful tying claim[8] is still subject to dismissal because PDFfiller incorrectly considered California EFRE and California PTM Software as two separate products. (Docket Entry # 122, p. 15) (Docket Entry # 127, p. 5). Additionally, **[*16]** the CAR Parties argue that PDFfiller fails to plead sufficient facts to demonstrate the CAR Parties' market power in the alleged tying market, and also that PDFfiller's monopoly and attempted monopoly claims fail because PDFfiller has not pled wrongful or anticompetitive conduct by the CAR Parties, nor have they pled any antitrust injury. (Docket Entry # 122) (Docket Entry # 127).

Conversely, PDFfiller maintains that at this stage in the proceedings, it pled a factually detailed, legally sound basis for its allegations of the relevant tying and tied product markets. (Docket Entry # 123, p. 6). Additionally, PDFfiller argues that it not only pled sufficient facts to satisfy an unlawful tying claim using either a per se or rule of reason standard, but it also pled sufficient facts to show that the tying and tied products are separate products as well as sufficient facts to show the CAR Parties' market power (Docket Entry # 123). Finally, PDFfiller argues that its allegations of the CAR Parties' sham litigation demonstrate the CAR Parties' wrongful or anticompetitive conduct and this same conduct resulted in PDFfiller's antitrust injury. (Docket Entry ## 123, pp. 20-21).

1. Relevant Markets **[*17]** for Antitrust Claims

Turning to the relevant market argument, the CAR Parties maintain that the first criterion for all of PDFfiller's antitrust claims is to define the relevant markets. As set out in the counterclaims and the third-party complaint, PDFfiller defines the relevant tying market as California EFRE and the relevant tied product market as PTM Software for California EFRE. (Docket Entry # 100, pp. 25-26) (Docket Entry # 101, p. 6). The CAR Parties argue that naming California EFRE as the tying product market "excludes obvious substitute products" that "serve the same purpose as California EFRE." (Docket Entry # 122) (Docket Entry # 127). Additionally, the CAR Parties argue that naming PTM Software for California EFRE as the tied product market excludes possible substitutes and that PDFfiller provides no support for "why the relevant market should be PTM Software for California EFRE rather than PTM Software in general." (Docket Entry # 122, p. 18) (Docket Entry # 127, pp. 4-5). In response, PDFfiller maintains that the relevant tying and tied markets are properly defined, noting that these markets do not exclude reasonable substitute products. (Docket Entry # 123, p. 10).

---

[8] A tying arrangement "may be defined as an agreement by a party to sell one product but only on the condition that the buyer also purchases a different (or tied) product, or at least agrees that he will not purchase that product from any other supplier." *Northern Pacific Railway Co., 356 U.S. at 5-6*.

[*18] All parties agree that the standard used to determine a relevant product market is a "reasonable interchangeability" standard; specifically, the determination of a relevant product market depends on "an analysis of the interchangeability of use" or rather, that a relevant product market "includes all goods that are reasonably interchangeable with each other." (Docket Entry # 122, p. 16) (Docket Entry # 123, p. 8). Each party, however, defines reasonable interchangeability differently. The CAR Parties suggest that reasonable interchangeability is determined by an equivalence test and that a relevant product market includes all products that serve the same purpose as each other. (Docket Entry # 122, pp. 16-17). PDFfiller suggests that reasonable interchangeability is determined instead by "the cross-elasticity of demand for the product in question - the extent to which purchasers will accept substitute products in instances of price fluctuation and other changes." (Docket Entry # 123).

For antitrust purposes, the "definition of the relevant market is ordinarily a question of fact." *Flovac, Inc. v. Airvac, Inc., 817 F.3d 849, 853 (1st Cir. 2016)*. There are two components that comprise the relevant market, the first being the relevant *geographic* market, **[*19]** and the second being the relevant *product* market. *Id.* "In general, the relevant geographic market consists of the *geographic area in which the defendant faces competition* and to which consumers can practically turn *for alternative sources of the product*." *Coastal Fuels of Puerto Rico, Inc. v. Caribbean Petroleum Corp., 79 F.3d 182, 196 (1st Cir. 1996)* (emphasis added with internal citations omitted). The geographic market is relatively self-evident, whereas the product market demands a more complex analysis. *Flovac, 817 F.3d at 853*.

A relevant product market is "made up of 'commodities reasonably interchangeable by consumers for the same purposes.'" *In re Nexium (Esomeprazole) Antitrust Litig., 968 F.Supp.2d 367, 387 (D. Mass. 2013)* (quoting *United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 395, 76 S. Ct. 994, 100 L. Ed. 1264 (1956))*. For a relevant product market to survive a *Rule 12(b)(6)* motion to dismiss, the CAR Parties aptly note that, "[A]n alleged product must bear a rational relation to the methodology courts prescribe to define a market for antitrust purposes-analysis of the *interchangeability of use* or *the cross-elasticity of demand*, and it must be plausible." *Chapman v. N.Y. State Div. for Youth, 546 F.3d 230, 237-38 (2d Cir. 2008)* (emphasis added). As also correctly noted by PDFfiller:

> The reasonable interchangeability of a set of products is not dependent on the similarity of their forms or functions; instead, "Such limits are drawn according to the cross-elasticity of demand for the product in question-the extent to such purchasers will accept **[*20]** substitute products in instances of price fluctuation and other changes."

In re Nexium (Esomeprazole) Antitrust Litig., 968 F.Supp.2d at 387-88 (quoting *George R. Whitten, Jr., Inc. v. Paddock Pool Builders, Inc., 508 F.2d 547, 552 (1st Cir. 1974))*. Thus, as explained by the Third Circuit in Queen City Pizza:

> [W]here the plaintiff fails to define its proposed relevant market with reference to the rule of reasonable interchangeability and cross-elasticity of demand, or alleges a proposed relevant market that clearly does not encompass all interchangeable substitute products even when all factual inferences are granted in plaintiff's favor, the relevant market is legally insufficient and a motion to dismiss may be granted.

Queen City Pizza, Inc. v. Domino's Pizza, Inc., 124 F.3d 430, 436 (3d Cir. 1997).

Although reasonable interchangeability need not focus solely on similar form and function of possible substitute products, *George R. Whitten, 508 F.2d at 552*, the determination of the interchangeability of products is a fact-intensive process. See *Eastman Kodak, 504 U.S. at 482* ("in most cases, proper market definition can be determined only after a factual inquiry into the commercial realities faced by consumers"). Here, at this stage in the pleadings, however, "courts hesitate to grant motions to dismiss for failure to plead a relevant product market" due to the "deeply fact-intensive" nature of the inquiry. *Todd v. Exxon Corp., 275 F.3d 191, 199-200 (2d Cir. 2001)*. The Second Circuit in Todd further explains that:

> Cases in which dismissal on the **[*21]** pleadings is appropriate frequently involve either (1) failed attempts to limit a product market to a single brand, franchise, institution, or comparable entity that competes with potential substitutes or (2) failure even to attempt a plausible explanation as to why a market should be limited in a particular way.

Todd, 275 F.3d. at 200. Thus, Todd instructs that, "it is sufficient that plaintiff has alleged specific facts that support a narrow product market in a way that is plausible and bears a rational relation to the methodology courts prescribe to define a market for antitrust purposes." Id. at 203.

A determination of reasonable interchangeability using an equivalence test is based on "whether the substituted element in the accused device performs substantially the same function, in substantially the same way, to produce substantially the same result as the claimed element." Boston Scientific Corp., 983 F.Supp. at 261 (internal citations omitted). The Federal Circuit notes, however, that this type of test "goes too far . . . to describe the function-way-result test as 'the' test for equivalency" and that, "[a]s technology becomes more sophisticated, and the innovative process more complex, the function-way-result test may not invariably suffice to show **[*22]** the substantiality of the differences." Id. at 261 (internal citations omitted); see, e.g., In re Nexium (Esomeprazole) Antitrust Litig., 968 F.Supp. at 367, 388 ("Although it may be beyond this Court's competence to confirm the accuracy of the Direct Purchasers' characterization of the reasonable interchangeability of brand Nexium with other drugs, such a factually intensive determination is better left for resolution by a jury.").

Turning to the task, in the counterclaims and the third-party complaint, PDFfiller suggests that the relevant geographic market is EFRE in *California*. (Docket Entry # 100, p. 26) (Docket Entry # 101, p. 6). The pleadings specifically note that "real estate laws vary significantly by state and a consumer of EFRE is unlikely to have sufficient knowledge of the difference between different states' laws to efficiently adapt an out-of-state EFRE so that it is suitable for use in California." (Docket Entry # 100, p. 26) (Docket Entry # 101, p. 6). The aforementioned allegations render it plausible that EFRE, specifically in California, is a plausible geographic market for the tying product. It is reasonable to define California as the relevant geographic market particularly because, as PDFfiller alleges, real estate laws are unique to each **[*23]** state and EFRE deals explicitly with real estate laws. Moreover, based on the state-by-state peculiarity of real estate laws, the pleadings allow for a reasonable inference that the geographic area in which the CAR Parties face competition is California, as it is the area which consumers can turn for alternative sources of PTM Software to edit EFRE for California. Construing the facts in PDFfiller's favor, the alleged relevant geographic market in the pleadings is plausible.

Moving to the relevant product market, under either an equivalence analysis or a cross-elasticity demand analysis, the antitrust claims survive the Rule 12(b)(6) challenge. PDFfiller provides a reasonable basis not to broaden the product market from California electronic real estate forms to include non-electronic forms, namely paper forms created by attorneys or standard paper forms provided by a real estate professional. Thus, as stated in the counterclaims and the third-party complaint: real estate professionals are not reasonable substitutes for EFRE because it takes "considerable amounts of time and money . . . to continually revise, improve and update the CAR Library to ensure that its works remain current with the myriad **[*24]** of legal and policy changes affecting the California real estate industry"; real estate attorneys are also not reasonable substitutes because it would be significantly more expensive to use a real estate attorney "to create a document similar to CAR EFRE," and also because "attorneys themselves are consumers of EFRE"; and paper is not a reasonable substitute because, unlike paper forms, electronic forms can be changed easily, increase the efficiency of reviewing and revising documents, do not incur storage fees, and provide a low cost of transferring electronic forms. (Docket Entry # 100, pp. 25-26) (Docket Entry # 101, p. 7).

Here, PDFfiller pled adequate facts to demonstrate that under either interpretation of reasonable interchangeability, it is plausible that California EFRE is a relevant product market. Specifically, PDFfiller's allegations of "product performance differences" with non-electronic California real estate forms, "lack of interchangeability with other [non-electronic California real estate] products, and significant price differences between California EFRE and those other products" are sufficient to state a plausible product market consisting of electronic real estate **[*25]** forms in California. (Docket Entry # 123, p. 9). Whether this market definition adheres at trial or at summary judgment is not before this court. Additionally, PDFfiller's allegations render it plausible that the products the CAR Parties suggest as reasonable substitute products for California EFRE because they "serve the same purpose as California EFRE - preparation of real estate contracts - and are put to the same use" are not reasonable substitutes because PDFfiller provides ample support for its claim as to why these alternatives (attorneys, paper forms, and real estate professionals) either do not serve the same purpose or are not put to the same use. In particular, PDFfiller's allegations regarding the increased expense and time-consuming nature of the non-electronic products render it plausible that California EFRE provides an appropriate tying product market, at least for purposes of a *Rule 12(b)(6)* challenge.

In short, the relevant product market is a deeply fact-intensive process and it is necessary that the pleader adequately assert facts to demonstrate that the stated relevant market is plausible. Here, the counterclaims and the third-party complaint are sufficient to render California **[*26]** electronic real estate forms a plausible market. The antitrust claims therefore survive the *12(b)(6)* challenge to the alleged relevant market because the pleadings set out a plausible relevant product market.

2. Per Se Unlawful Tying

The CAR Parties next maintain that PDFfiller's unlawful tying claim is subject to dismissal because PDFfiller fails to demonstrate the existence of separate product demand for the tying and the tied products. (Docket Entry # 122, p. 18) (Docket Entry # 127, p. 5). The CAR Parties contend that there is no separate demand for the tied product. More specifically, they submit "there is no plausible basis to believe a consumer would purchase EFRE without also purchasing or obtaining the necessary software, or buy the software but not the EFRE." (Docket Entry # 122, p. 19) (Docket Entry # 127, p. 5). The CAR Parties argue that, because California EFRE cannot be used without some type of PTM Software, they cannot be considered separate products. The CAR Parties explain that California EFRE is "useless" without PTM Software and there is no "plausible demand for PTM Software for California EFRE without the California EFRE." (Docket Entry 122, p. 20) (Docket Entry **[*27]** # 127, p. 5).

PDFfiller, on the other hand, asserts that, because "there is consumer demand to use CAR EFRE on platforms other than zipForm, and that other providers of California EFRE do not bundle it with PTM Software," it has shown that "demand for California EFRE, the tying product, is not strongly correlated with the demand for the tied product, PTM Software for California EFRE." (Docket Entry # 123, p. 13). Thus, PDFfiller maintains that California EFRE and PTM Software for California are separate products because any variation of PTM Software can be used to edit California EFRE.[9] PDFfiller also argues that PTM Software for California, the alleged tied product, can be used to edit different electronic forms other than California EFRE and other providers of California EFRE do not bundle EFRE with PTM Software. (Docket Entry # 123, p. 14). According to PDFfiller, these characteristics establish a separate demand and therefore a separate product market for PTM Software for California from California EFRE.

Courts have "long recognized that 'certain tying arrangements pose an unacceptable risk of stifling competition and therefore are unreasonable "per se".'" *Lee v. Life Ins. Co. of N. Am., 829 F.Supp. 529, 536 (D.R.I. 1993)* (quoting *Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 9, 104 S. Ct. 1551, 80 L. Ed. 2d 2 (1984)*, abrogated on **[*28]** other grounds by *Illinois Tool Works Inc. v. Indep. Ink, Inc., 547 U.S. 28, 126 S. Ct. 1281, 164 L. Ed. 2d 26 (2006))*. The most important per se categories are "naked horizontal price-fixing, market allocation, and output restrictions." *Stop & Shop Supermarket Co. v. Blue Cross & Blue Shield of R.I., 373 F.3d 57, 61 (1st Cir. 2004)*. The four elements of a per se tying claim are as follows:

> (1) the tying and the tied products are actually two distinct products; (2) there is an agreement or condition, express or implied, that establishes a tie; (3) the entity accused of tying has sufficient economic power in the market for the tying product to distort consumers' choices with respect to the tied product; and (4) the tie forecloses a substantial amount of commerce in the market for the tied product.

CCBN.Com, Inc. v. Thomson Fin., Inc., 270 F.Supp.2d 146, 154 (D. Mass. 2003) (citing *Borschow Hospital and Medical Supplies, Inc. v. Cesar Castillo Inc., 96 F.3d 10, 17 (1st Cir. 1996)* (citations omitted)); see also *AVX Corp. v. Cabot Corp., 600 F.Supp.2d 286, 288-89 (D. Mass. 2009)* (quoting *Data Gen. Corp. v. Grumman Sys. Support Corp., 36 F.3d 1147, 1178-79 (1st Cir. 1994)*, abrogated on other grounds by *Reed Elsevier, Inc. v. Muchnick, 559*

---

[9] This is an area of dispute because, as alleged in the amended counterclaim and third-party complaint, any general PTM Software can be used to edit California EFRE. The CAR Parties argue, however, that this is not true because CAR's copyright policy allegedly restricts any electronic manipulation of CAR's California EFRE forms using software other than zipForm. (Docket Entry # 100, pp. 26-29) (Docket Entry # 122, p. 8).

U.S. 154, 130 S. Ct. 1237, 176 L. Ed. 2d 18 (2010)); BookLocker.com, Inc. v. Amazon.com, Inc., 650 F.Supp 2d 89, 96 (D. Me. 2009). "[E]very refusal to sell two products separately cannot be said to restrain competition." Jefferson Parish Hosp., 466 U.S. at 11-12.

Moreover, "if each of the products may be purchased separately in a competitive market, one seller's decision to sell the two in a single package imposes no unreasonable restraint on either market," especially if "competing suppliers are free to sell either the entire package or its several parts." Id.; see also Northern Pacific Railway Co., 356 U.S. at 7 ("[I]f one of a dozen food stores in a community were to refuse to sell flour unless the buyer also **[*29]** took sugar it would hardly tend to restrain competition in sugar if its competitors were ready and able to sell flour by itself."). Thus, the determination of the first element of a per se tying claim hinges on the existence of separate markets of both the tying and the tied products. See Jefferson Parish, 466 U.S. at 21-22.

A. Separate Products

To determine whether the tying and the tied products are distinct, "the Court looks to the character of the demand for the two items." Kell v. Am. Capital Strategies, Ltd., 278 F.Supp.2d 156, 161 (D.P.R. 2003); see Eastman Kodak, 504 U.S. at 462 ("[T]here must be sufficient consumer demand so that it is efficient for a firm to provide service separately from parts."). In addition, "The success of a single product defense ordinarily hinges on observations of actual market practices." SMS Sys. Maint. Servs., Inc. v. Digital Equip. Corp., 188 F.3d 11, 15 (1st Cir. 1999). In particular, "[i]f evidence shows that there is significant demand for separate components of what is alleged to be a single product and the product is in fact sold in those forms, there is no single product." Id. In other words, a tying arrangement cannot exist unless it can be shown that there is a sufficient demand for the purchase of the tied product separate from the tying product in order to "identify a distinct product market in which it is efficient to offer [the tied product] services separately **[*30]** from [the tying product] services." Jefferson Parish, 466 U.S. at 21-22.

Here, PDFfiller pled facts that demonstrate it is plausible there is a separate product market for the alleged tied product, PTM Software for California EFRE. The counterclaims and the third-party complaint state that the demand for the tying and the tied product is "not identical." (Docket Entry # 100, p. 27) (Docket Entry # 101, p. 8). Moreover, as also stated in the counterclaims and the third-party complaint, "consumers frequently seek out non-CAR PTM Software to edit CAR EFRE, turning to PTM Software providers such as Dotloop, Instanet Solutions, and PDFfiller." (Docket Entry # 100, p. 27) (Docket Entry # 101, p. 8). In addition, numerous competitors "do not typically bundle EFRE and PTM Software products." (Docket Entry # 100, p. 27) (Docket Entry # 101, p. 9). These allegations are sufficient to avoid a Rule 12(b)(6) dismissal based on the CAR Parties' argument that the tying and the tied products are not two distinct products.

B. Economic Power to Distort Consumer Choice

The CAR Parties next contend that PDFfiller failed to plead plausible facts that demonstrate that "CAR has market power in the alleged tying market." (Docket Entry # 122, p. 21) (Docket **[*31]** Entry # 127, p. 5). Nor has PDFfiller, according to the CAR Parties, pled sufficient facts to show "high (or any) barriers to entry in the alleged market." (Docket Entry # 122, p. 21) (Docket Entry # 127, 6). PDFfiller maintains it alleged sufficient facts indicating CAR's "extremely high market share in the tying market, which is sufficient to demonstrate market power at this stage in the litigation." (Docket Entry # 123, p. 15). PDFfiller further contends it is not necessary to allege high barriers to entry in order to demonstrate market power in the tying market. (Docket Entry # 123, p. 15).

To determine the market power of the seller, "the law draws a distinction between the exploitation of market power by merely enhancing the price of the tying product, on the one hand, and by attempting to impose restraints on competition in the market for a tied product, on the other." Jefferson Parish, 466 U.S. at 14. More specifically:

> Our cases have concluded that the essential characteristic of an invalid tying arrangement lies in the seller's exploitation of its control over the tying product to force the buyer into the purchase of a tied product that the buyer either did not want at all, or might have preferred to purchase **[*32]** elsewhere on different terms. When such "forcing" is present, competition on the merits in the market for the tied item is restrained and the Sherman Act is violated.

Id. at 12. "Accordingly, we have condemned tying arrangements when the seller has some special ability—usually called 'market power' to force a purchaser to do something that he would not do in a competitive market." Id. at 13-14. There must be more than a single purchaser "forced" into buying the tied product for the "impact on competition . . . to warrant the concern of ***antitrust law***." Id. at 16; see also Lee v. Life Ins. Co. of North America, 23 F.3d 14, 16 (1st Cir. 1994) ("'market power' is the demonstrated ability of a seller to force a purchaser to do something that he would not do in a competitive market") (citations omitted).

Market power may be inferred from the seller's predominate share of the tying market. Hewlett-Packard Co. v. Boston Scientific Corp., 77 F.Supp.2d 189, 195 (D. Mass. 1999). "For pleading purposes, an allegation of market share of 70 percent has been held to be an adequate basis for an inference of power in a relevant market." Id. at 195-196 (citations omitted). Finally, "[w]hen the seller's share of the market is high . . . the Court has held that the likelihood that market power exists and is being used to restrain competition in a separate market is sufficient to make per se condemnation **[*33]** appropriate." Jefferson Parish, 466 U.S. at 17.

PDFfiller pled facts to render it plausible that the CAR Parties' market power in the tying product market is so substantial that it forces users to purchase the tied product. See Jefferson Parish, 466 U.S. at 14. In the counterclaims and the third-party complaint, PDFfiller alleges that CAR has substantial market power based on: CAR's 90% market share of the tying market; CAR's 150,000 members in California; CAR's statements that "CAR products are the standard forms used in nearly every transaction in California"; and that the CAR Parties "are able to prevent California consumers from using the PTM Software of their choice" and "force those consumers to pay significantly higher prices for PTM Software." (Docket Entry # 100, pp. 21, 23, 27, 30-31) (Docket Entry # 101, pp. 8, 10, 12).

As set out in the counterclaims and the third-party complaint, these allegations render it plausible that the CAR Parties have substantial economic power in the tying product market and therefore *could* plausibly restrain competition in the tied product market. The allegation that CAR possesses 90% market share of the tying market alone is sufficient to infer the CAR Parties' economic power in the tying product market at **[*34]** this stage in the pleadings. See Hewlett-Packard Co., 77 F.Supp.2d at 195.

C. Tie Forecloses Substantial Amount Commerce in Market for Tied Product

The CAR Parties next argue that, "because PDFfiller is a competitor in the alleged tied market, it must allege that it has been wrongfully foreclosed as a competitor, rather than merely losing sales to a favored rival." (Docket Entry # 122, p. 24). The CAR Parties contend that, "PDFfiller has not alleged that it has been excluded or eliminated as a competitor, and it even admits that it continues to compete with zipLogix. Nor has it alleged injury to competition." (Docket Entry # 122, p. 24). Conversely, PDFfiller suggests it "satisfied this minimal showing by alleging that Defendants' conduct has excluded a substantial amount of competitors from the tied market." (Docket Entry # 123, p. 22).

To determine if the alleged tie forecloses a substantial amount of commerce in the market for the tied product:

> the controlling consideration is simply whether a total amount of business, substantial enough in terms of dollar-volume so as not to be merely de minimis, is foreclosed to competitors by the tie, for it is unreasonable, per se, to foreclose competitors from any substantial market **[*35]** by a tying arrangement.

Fortner Enterprises, Inc. v. U.S. Steel Corp., 394 U.S. 495, 501, 89 S. Ct. 1252, 22 L. Ed. 2d 495 (1969) (citations omitted). Additionally, "the plaintiff must also 'make some showing of actual injury attributable to something the antitrust laws were designed to prevent.'" AVX Corp. v. Cabot Corp., 600 F.Supp.2d 286, 294 (D. Mass. 2009) (quoting Perkins v. Standard Oil Co., 395 U.S. 642, 648, 89 S. Ct. 1871, 23 L. Ed. 2d 599 (1969)). To survive a Rule 12(b)(6) motion, the counterclaims and the third-party complaint are sufficient if they demonstrates that "a not insubstantial amount of commerce has been foreclosed as a result of the alleged tying arrangement." Copeca, Inc. v. W. Aviation Servs. Corp., 653 F.Supp.2d 141, 148 (D.P.R. 2009).

Here, as set out in the counterclaims and the third-party complaint, "CAR does not license the use of its EFRE in California to third parties" and, as a result, "consumers that wish to buy CAR EFRE must either join a REALTOR affiliate or purchase zipForm subscription." (Docket Entry # 100, p. 28) (Docket Entry # 101, p. 9). Either option is "significantly more expensive than CAR's competitors in the California EFRE Market, and both options are conditioned on the purchase and use of zipForm." (Docket Entry # 100, p. 28) (Docket Entry # 101, p. 9). The CAR Parties' tying also forces users of CAR EFRE in California to use zipForm with CAR EFRE and "prevents users from using PTM Software that competes with zipForm, even if they are unsatisfied with the quality or price **[*36]** of zipForm." (Docket Entry # 100, p. 29) (Docket Entry # 100, p. 10). Finally, the CAR Parties' conduct "reduce[s] the likelihood of new entrants in the market for PTM Software" and also eliminates the opportunity for competition on the merits because CAR's EFRE products cost "several hundred dollars more than competitors." (Docket Entry # 100, pp. 28-31) (Docket Entry # 101, pp. 9-12).

The counterclaims and the third-party complaint, therefore, adequately allege facts from which it is reasonable to infer that a substantial amount of commerce has been foreclosed as a result of the CAR Parties' alleged tying arrangement. The alleged price discrepancies evidence the plausibility that a total amount of business - especially in terms of dollar-volume of lost business for competitors — is foreclosed to competitors as a result of the CAR Parties' conduct. In sum, at this stage in the proceedings and with facts construed in its favor, PDFfiller pled sufficient facts to render the elements of its per se tying claim plausible. The per se tying claim therefore survives the CAR Parties' *Rule 12(b)(6)* challenge.[10]

3. Monopoly and Attempted Monopoly

The CAR Parties next argue that PDFfiller's monopoly and attempted **[*37]** monopoly claims fail because PDFfiller did not allege facts "showing any evidence of market power or even indirect evidence in the form of market share and high entry barriers" in the alleged relevant market. (Docket Entry # 122, p. 22) (Docket Entry # 127, p. 7). The CAR Parties also assert that PDFfiller's monopoly and attempted monopoly claims fail because "PDFfiller has not pled wrongful or anticompetitive conduct by the CAR Parties." (Docket Entry # 122, p. 22) (Docket Entry # 127, p. 8). The CAR Parties suggest "there are no facts alleged to support any inference that CAR's copyrights are invalid, or that CAR has not acted in the lawful exercise of its rights as a copyright owner," and that PDFfiller fails to plead any facts to support its allegations of the CAR Parties' "baseless lawsuits." (Docket Entry # 122, p. 23) (Docket Entry # 127, p. 8). Finally, the CAR Parties argue that all claims fail because PDFfiller has not pled facts "sufficient to show not only that it has suffered injury-in-fact, but also that its alleged injury constitutes 'antitrust injury' - that is, 'injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' **[*38]** act unlawful.'" (Docket Entry # 122, p. 24) (quoting *Atlantic Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 334, 342, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990))*.

PDFfiller suggests that it pled sufficient facts that, "if proven, would constitute direct evidence of Defendants' monopoly power in the tied market." (Docket Entry # 123, p. 18). PDFfiller maintains that its contention that the CAR Parties charge supracompetitive prices for the tied product is sufficient to constitute "direct evidence of the CAR Parties' monopoly power" in the tied market. (Docket Entry # 123, p. 19) (Docket Entry # 100, pp. 27-28) (Docket Entry # 101, pp. 8-9). PDFfiller further contends that it need not show that the entity offering the tied product is the only entity in its market in order to provide evidence of monopoly power. (Docket Entry # 123, pp. 18-19).

Section two of the Sherman Act makes it illegal to "monopolize, or attempt to monopolize . . . any part of the trade or commerce among the several States . . .." *Díaz Aviation Corp. v. Airport Aviation Servs., 716 F.3d 256, 265 (1st Cir. 2013)*; *15 U.S.C. § 2*. The necessary elements of a monopolization claim are:

---

[10] Because PDFfiller's per se tying claim survives the *Rule 12(b)(6)* challenge, it is not necessary to address PDFfiller's rule of reason argument.

> "(1) [p]ossession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." **[*39]**

Id. at 256 (quoting *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966))*; see also *In re Asacol Antitrust Litig., 233 F.Supp.3d 247, 266 (D. Mass. 2017)*. "In the First Circuit, courts refer to 'improper methods of acquiring or maintaining monopoly power as 'exclusionary conduct.'" *In re Asacol, 233 F.Supp.3d at 266* (quoting *Town of Concord v. Boston Edison Co., 915 F.2d 17, 21 (1st Cir. 1990))*. "This means conduct, other than competition on the merits or restraints reasonably 'necessary' to competition on the merits, that reasonably appears capable of making a significant contribution to creating or maintaining monopoly power." Id. (internal citations omitted).

The elements of attempted monopolization are "(1) that the defendant has engaged in predatory or anticompetitive conduct with (2) a specific intent to monopolize and (3) a dangerous probability of achieving monopoly power." *Diaz Aviation, 716 F.3d at 265* (citing *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 456, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993))*. Attempted monopolization "requires a finding of specific intent." *In re Asacol, 233 F.Supp.3d at 267*.

A. Monopoly Power

Monopoly power is defined as the "power of controlling prices or unreasonably restricting competition." *United States v. E.I. DuPont de Nemours & Co., 351 U.S. 377, 391, 76 S. Ct. 994, 100 L. Ed. 1264 (1956)*. Simply stated, monopoly power is the "power to control price or exclude competition." *Id. at 392*; see also *Abarca Health, LLC v. PharmPix Corp., 915 F.Supp.2d 210, 218 (D.P.R. 2012)* (monopoly power "is evaluated in light of the 'relevant market' and 'the defendant's ability to lessen or destroy competition in that market'") (quoting *Coastal Fuels of Puerto Rico, Inc. v. Caribbean Petroleum Corp., 79 F.3d 182, 196 (1st Cir. 1996))*. It is generally determined in one of two ways, the first is through a **[*40]** showing of supracompetitive prices. See *Diaz Aviation, 716 F.3d at 265*. "Absent direct proof of supracompetitive prices, monopoly power is typically proven by defining a relevant market and showing that the defendant has a dominant share of that market." Id.

PDFfiller adequately alleges that the CAR Parties have monopoly power in the tied product market. In the counterclaims and the third-party complaint, PDFfiller states that, "CAR's EFRE forms are provided as a benefit to members" and "[m]embership is obtained by joining a local REALTOR affiliate." (Docket Entry # 100, p. 27) (Docket Entry # 101, p. 8). The pleadings further allege that the cost of CAR membership fees "are in excess of $600 per year" and that "[n]on-members may not purchase CAR EFRE without first purchasing zipForm," which, in its most basic form, "costs $849 for an annual license." (Docket Entry # 100, p. 28) (Docket Entry # 101, p. 8). As also stated in the counterclaims and the third-party complaint, CAR's EFRE competitors offer California EFRE forms for free and also offer PTM Software "starting at $72 per year" or for free. (Docket Entry # 100, p. 28) (Docket Entry # 101, p. 9). The aforementioned statements sufficiently allege facts showing **[*41]** that the CAR Parties have monopoly power in the tied product market through supracompetitive pricing and maintain the ability to control prices in the tied product market and potentially exclude competition.

The CAR Parties suggest that PDFfiller must also plead facts showing high barriers to entry in the alleged market in order to satisfy the market power element. Barriers of entry, however, is not the requisite standard under First Circuit law and, while the Ninth Circuit suggests that entry barriers also demonstrate monopoly power, the First Circuit in Diaz provides that supracompetitive prices will suffice to show monopoly power. See *Diaz Aviation, 716 F.3d at 265*.

B. Wrongful or Anticompetitive Conduct

The CAR Parties next argue that PDFfiller's allegations of CAR's "baseless lawsuits" are insufficient to satisfy wrongful or anticompetitive conduct. The CAR Parties contend that PDFfiller fails to allege facts that "support any inference that CAR's copyrights are invalid, or that CAR has not acted in the lawful exercise of its rights as a copyright owner" and that, in any event, such allegations of fraudulent lawsuits "must be pled with particularity under *Fed. R. Civ. P. 9(b)*." (Docket Entry # 122, p. 23). PDFfiller maintains, however, **[*42]** that it sufficiently alleged that CAR "engaged in a pattern of objectively baseless litigation, the intent of which" was "to intimidate consumers and competitors from using PTM Software for California EFRE other than zipForm." (Docket Entry # 123, p. 20). PDFfiller further points out that "this court has held in no uncertain terms that allegations of sham litigation do not require a heightened pleading standard." (Docket Entry # 123, p. 20).

To satisfy both the monopoly and the attempted monopoly claims, PDFfiller must show that the CAR Parties engaged in wrongful or anticompetitive conduct. See *In re Asacol, 233 F.Supp.3d at 247*. More specifically, PDFfiller must plead facts sufficient to show that the CAR Parties engaged in conduct designed to maintain, or with the intent to create, monopoly power in the relevant market. *Diaz Aviation, 716 F.3d at 265*. Further, anticompetitive means require a showing that is "distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." *Wojcieszek v. New England Tel. & Tel. Co., 977 F.Supp. 527, 533 (D. Mass. 1997)*; see also *Hewlett-Packard Co., 77 F.Supp.2d at 197*. "This means conduct, other than competition on the merits or restraints reasonably 'necessary' to competition on the merits, that reasonably appears capable of making a significant contribution to creating **[*43]** or maintaining monopoly power." *In re Asacol, 233 F.Supp.3d at 267*. Conduct crosses into the threshold of anticompetitive "'when it obstructs the achievement of competition's basic goals—lower prices, better products, and more efficient production methods.'" *Sullivan v. Nat'l Football League, 34 F.3d 1091, 1097 (1st Cir. 1994)* (quoting *Town of Concord, Mass. v. Boston Edison Co., 915 F.2d 17, 21-22 (1st Cir. 1990))*. The filing of a lawsuit violates antitrust laws when the lawsuit's primary purpose is not to seek the outcome of the governmental process, but rather to seek the use of the governmental process merely to interfere with the business relationships of a competitor. *Prof'l Real Estate Inv'rs, Inc. v. Columbia Pictures Indus., Inc., 508 U.S. 49, 51, 113 S. Ct. 1920, 123 L. Ed. 2d 611 (1993)* ("PRE").

PDFfiller submits that the CAR Parties' use of litigation constitutes anticompetitive conduct. (Docket Entry # 100) (Docket Entry # 101). As set forth in the Noerr-Pennington doctrine, "which arose in antitrust cases under the Sherman Act, . . . '[t]hose who petition [the] government for redress are generally immune from antitrust liability.'" *Picone v. Shire PLC, Civil Action No. 16-12396-ADB, 2017 U.S. Dist. LEXIS 178150, 2017 WL 4873506, at *5 (D. Mass. Oct. 20, 2017)* (internal citation omitted). There are exceptions to the Noerr-Pennington doctrine, however, the first dealing with a patent procured by fraud, and the second being that "immunity does not apply where petitioning the government 'is a mere sham to cover . . . an attempt to interfere directly with **[*44]** the business relationships of a competitor.'" *Crocs, Inc. v. Effervescent, Inc., 248 F.Supp.3d 1040, 1055 (D. Colo. 017)* (quoting *PRE, 508 U.S. at 56*). Thus, "litigation cannot be deprived of immunity as a sham unless the litigation is objectively baseless." *PRE, 508 U.S. at 51*. Courts describe a sham as "evidenced by repetitive lawsuits carrying the hallmark of *insubstantial* claims." *Id. at 58* (emphasis added).

The Supreme Court established a two-prong inquiry of sham litigation, with the first prong being objective and the second prong subjective. *Id. at 51*. First, "the lawsuit must be objectively baseless in the sense that no reasonable litigant could realistically expect success on the merits." *Id. at 60*. Second, "the court should focus on whether the baseless lawsuit conceals an attempt to interfere *directly* with the business relationships of a competitor, through the use of the governmental *process*—as opposed to the *outcome* of that process—as an anticompetitive weapon." *Id. at 60-61* (internal citations and brackets omitted); see also *Advanced Ion Beam Tech., Inc. v. Varian Semiconductor Equip. Assocs., Inc., 721 F.Supp.2d 62, 74-75 (D. Mass. 2010)*. An antitrust plaintiff is required "to prove that the defendant lacked probable cause to institute an unsuccessful civil lawsuit and that the defendant pressed the action for an improper, malicious purpose." *PRE, 508 U.S. at 62*. "Probable cause to institute civil proceedings requires no more than a "reasonabl[e] **[*45]** belie[f] that there is a chance that [a] claim may be held valid upon adjudication." *Id. at 62-63*.

With respect to the applicability of the heightened pleading standard of *Fed. R. Civ. P. 9* ("*Rule 9(b)*"), "[a]lthough some cases in *other* Circuits have required greater specificity in pleading, the Federal Rules of Civil Procedure *do not contain such a requirement* and the Supreme Court has recently *expressed disapproval* of judicial attempts to heighten pleading requirements in other contexts." *Skinder-Strauss Assocs. v. Massachusetts Continuing Legal Educ., Inc., 870 F.Supp. 8, 11 (D. Mass. 1994)* (emphasis added). In fact, "There is no heightened pleading requirement for a claim of unfair competition based upon the institution of sham litigation." *Honeywell Consumer Prods. v. Windmere Corp., 993 F. Supp. 22, 24 (D. Mass. 1998)*. The more rigorous pleading standards of *Rule 9(b)* apply only to allegations of fraud or when fraud "lies at the core" of a claim. *Hayduk v. Lanna, 775 F.2d 441, 443*

(1st Cir. 1985) (conspiracy to commit fraud falls within *Rule 9(b)*'s requirements); *Enercon v. Global Computer Supplies, Inc., 675 F.Supp.2d 188, 197 (D. Me. 2009)* (tracing Hayduk line of cases and concluding that *Rule 9(b)* did not apply to negligent misrepresentation claim). Whereas *Rule 9(b)* may apply to the first exception to the Noerr-Pennington doctrine, i.e., a patent procured by fraud, it does not apply to the second exception, i.e., sham litigation. See *Honeywell, 993 F.Supp. at 24*. Simply stated, fraud does not lie at the core of the latter exception, which is the one PDFfiller invokes. Accordingly, **[*46]** *Rule 9(b)* does not provide a basis for dismissal.

Turning to the two prongs of sham litigation, the counterclaims and the third-party complaint state that, "CAR has threatened and instituted lawsuits against non-CAR real estate professionals that use CAR EFRE without permission by claiming copyright protection" and that, "on information and belief, these are sham lawsuits, objectively baseless, and subjectively intended to use the judicial process, as opposed to the outcome of that process, as an anticompetitive weapon." (Docket Entry # 100, p. 29) (Docket Entry # 101, p. 10). The counterclaims and the third-party complaint identify a number of cases[11] that either resulted in default judgments for failure to appear or settled before a decision was rendered on the merits of CAR's claims. Taking judicial notice of the dockets in these cases, none of the cases resulted in a judicial decision on the merits. See *Kowalski v. Gagne, 914 F.2d 299, 305 (1st Cir. 1990)* ("federal courts may take judicial notice of proceedings in other courts if those proceedings have relevance to the matters at hand"); see, e.g., *Bluetarp Financial, Inc. v. Matrix Construction Co., Inc., 709 F.3d 72, 78 n.4 (1st Cir. 2013)* (taking judicial notice of related state court cases).

The counterclaims and the third-party complaint further allege that, "CAR is encouraging or asking its sister state realtor association to sue PDFfiller" and that "the Texas Association of Realtors, Inc. sent a cease-and-desist letter to and filed suit against PDFfiller, making essentially the same allegations as CAR in the present litigation." (Docket Entry # 100, p. 30) (Docket Entry # 101, pp. 10-11). The counterclaims and the third-party complaint elaborate by stating that, "as with CAR's complaint, those allegations are baseless" and TAR "owns an interest in zipForm, and therefore has an interest in assisting CAR's anticompetitive practices through additional sham litigation." (Docket Entry # 100, p. 30) (Docket Entry # 101, p. 11).

Moreover, the counterclaims and the third-party complaint allege that the CAR Parties are using these lawsuits "to prevent competition on the merits between zipForm and competing PTM Software products, including PDFfiller"; "to reduce the likelihood of new entrants in the market for PTM Software"; "to enable the CAR Parties to improperly acquire and **[*48]** maintain market power in the tied market for PTM Software"; and "to acquire, maintain, and/or expand their monopoly power in the market for California EFRE." (Docket Entry # 100, p. 31) (Docket Entry # 101, p. 12). On balance, the allegations in the counterclaims and the third-party complaint sufficiently satisfy both prongs and adequately allege conduct that crosses into the threshold of anticompetitive to withstand the *Rule 12(c)* motion.

C. Antitrust Injury

As a final challenge to the monopolization and attempted monopolization claims, the CAR Parties assert that PDFfiller fails to allege facts showing an antitrust injury. The CAR Parties contend that PDFfiller must set out facts that "its alleged injury constitutes 'antitrust injury.'" (Docket Entry # 122). The CAR Parties submit that, "PDFfiller has not alleged that it has been excluded or eliminated as a competitor[,]" or "alleged injury to competition." (Docket Entry # 122, p. 25). PDFfiller maintains that it alleged facts from which an antirust injury can be inferred and particularly points to its allegations that PDFfiller "has been prevented from competing for the PTM Software business of California EFRE users that are unsatisfied with **[*49]** zipForm, and as a result has lost sales and suffered damage to its reputation and goodwill." (Docket Entry # 123, p. 24) (Docket Entry # 100, pp. 31-33) (Docket Entry # 101, pp. 12-15).

Here, both PDFfiller and the CAR Parties agree (Docket Entry # 122, p. 24) (Docket Entry # 123, p. 24) that "antitrust injury is 'injury of the type the antitrust laws were intended to prevent and that flows from that which makes

---

[11] California Association of Realtors v. Zachery Childress, et al., Case No. 8:11-cv-304, 8:11-cv-1553 (C.D. Cal. 2011); **[*47]** California Association of Realtors v. Commerce Inn Inc., Case No. 2:02-cv-251 (C.D. Cal. 2002); California Association of Realtors v. Equisource Real Estate Inc., et al., Case No. 2:01-cv-01603 (C.D. Cal. 2001).

defendants' acts unlawful.'" *Sterling Merch., Inc. v. Nestlé, S.A., 656 F.3d 112, 121 (1st Cir. 2011)* (quoting *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701, (1977))*; see also *Atlantic Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 334, 342, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)*. Moreover, "[p]laintiffs must show not only that they were injured as a result of the defendant's actions and that those actions constituted an antitrust violation, but also that their injury is the type of injury the antitrust violation would cause *to competition*." *Sterling Merch., 656 F.3d at 121* (emphasis in original).

The counterclaims and the third-party complaint allege that, as a result of the CAR Parties' actions, there has been antitrust injury in the following ways: (1) "CAR's unlawful tying . . . affects a substantial volume of interstate commerce"; (2) the CAR Parties' "anticompetitive practices" unreasonably restrained "competition in the relevant market, which is harmful to consumers by restricting consumer choice **[*50]** and forcing consumers to pay zipForm's monopoly price in order to be able to use CAR EFRE"; (3) "users of CAR EFRE in California have been and continue to be forced to use zipForm with CAR EFRE" and this conduct excludes "a substantial amount of competing PTM Software from the California market"; (4) the CAR Parties' conduct forces "users of CAR EFRE to use zipForm in place of other PTM Software" which "*harms PDFfiller* and competition in the market for PTM Software for California EFRE because it deprives PTM Software competitors, *including PDFFiller*, of the opportunity to freely compete in the marketplace with the CAR Parties"; (5) the CAR Parties' pattern of "sham litigation" intimidates customers "from using competition PTM Software other than zipForm and reduces "the likelihood of new entrants in the market for PTM Software"; and (6) "*PDFfiller* has been . . . injured by the CAR Parties' exclusionary and anticompetitive practice of depriving users of CAR EFRE of the benefits of competition, including the freedom to choose among PTM Software offerings such as the PTM Software offered through the PDFfiller website." (Docket Entry # 100, pp. 30-32) (Docket Entry # 101, 11-13) (emphasis **[*51]** added).

Such facts provide a plausible antitrust injury, namely, that PDFfiller was injured as a result of the CAR Parties' actions in a way that constituted an antitrust violation, and that its injury is the type of injury the antitrust violation would cause to competition. In sum, at this stage in the proceedings, counts one and two survive the CAR Parties' *Rule 12(b)(6)* challenge.

II. Defendants' *Rule 12(c)* Motion

PDFfiller seeks to dismiss CAR's chapter 93A claim because the misconduct did not occur "primarily and substantially" in Massachusetts. (Docket Entry # 141). It also maintains that CAR, as a nonprofit corporation, does not engage in "trade or commerce" as required under *section 11*. (Docket Entry # 142). CAR opposes the *Rule 12(c)* motion. (Docket Entry # 153).

STANDARD OF REVIEW

A *Rule 12(c)* motion for judgment on the pleadings "is treated much like a *Rule 12(b)(6)* motion to dismiss." *Perez Acevedo v. Rivero-Cubano, 520 F.3d 26, 29 (1st Cir. 2008)*. Legal conclusions are ignored and, "under *Rule 12(c)*, courts need not credit conclusory statements or merely subjective characterizations." *Class v. Commonwealth of Puerto Rico, 309 F.Supp.2d 235, 236 (D.P.R. 2004)*; see *Soto-Torres v. Fraticelli, 654 F.3d 153, 158-159 (1st Cir. 2011)*.

A *Rule 12(c)* "motion calls for an assessment of the merits of the case at an embryonic stage, [so] the court must view the facts contained in the pleadings in the light most favorable to the nonmovant and draw all reasonable inferences **[*52]** therefrom" in the nonmovant's favor. *R.G. Financial Corp. v. Vergara-Nunez, 446 F.3d 178, 182 (1st Cir. 2006)*. Accordingly, "There is no resolution of contested facts in connection with a *Rule 12(c)* motion: a court may enter judgment on the pleadings only if the properly considered facts conclusively establish the movant's point." Id. In the event "a court grants a . . . *Rule 12(c)* motion based on an affirmative defense, the facts establishing that defense must: (1) be 'definitively ascertainable from the complaint and other allowable sources of information,' and (2) 'suffice to establish the affirmative defense with certitude.'" *Gray v. Evercore Restructuring L.L.C., 544 F.3d 320, 324 (1st Cir. 2008)*.

Subject to certain narrow exceptions and absent a conversion of the Rule 12(c) motion to a summary judgment motion under the procedure set forth in Rule 12(d), this court's review is confined to the complaint, the answer, and any attached exhibits. Fed. R. Civ. P. 12(d); see Fed. R. Civ. P. 10(c) ("a written instrument that is an exhibit to a pleading is part of the pleading for all purposes"). In evaluating a Rule 12(c) motion, a court may supplement the complaint with "facts of which judicial notice may be taken." R.G. Fin. Corp. v. Vergara-Nunez, 446 F.3d 178, 182 (1st Cir. 2016). For purposes of the Rule 12(c) challenge to the chapter 93A claim, the facts are as follows.

FACTUAL BACKGROUND

CAR is a "California not-for-profit corporation with its principal place of business located in Los Angeles, **[*53]** California." (Docket Entry # 1, p. 2). It is not registered to do business in Massachusetts. (Docket Entry # 143-1).[12] PDFfiller is "a Massachusetts corporation with its principal place of business located at 167 Corey Road" in "Brighton, Massachusetts." (Docket Entry # 1, p. 2). Defendant Vandim Yasinovsky ("Yasinovsky") is "the CEO and Secretary of PDFfiller," "operates the website, pdffiller.com," and is "an individual domiciled in the Commonwealth of Massachusetts." (Docket Entry # 1, p. 2). Defendant Boris Shakhnovich ("Shakhnovich") is the "President, Treasurer, and Director of PDFfiller," "operates the website, pdffiller.com," and is "an individual domiciled in the Commonwealth of Massachusetts." (Docket Entry # 1, p. 3). Drawing reasonable inferences in favor of CAR, Yasinovsky and Shakhnovich both operate the website from Massachusetts where they are domiciled and where PDFfiller has its principal place of business and office in Brighton. The Massachusetts office is "a focus of the unauthorized activities." (Docket Entry # 1, p. 4).

CAR was "founded in 1905 and is a non-profit trade association" that represents approximately 170,000 real estate professionals in California. **[*54]** (Docket Entry # 1, p. 4). CAR created and developed programs and services to assist its members in the real estate field. (Docket Entry # 1, p. 4). "Over many years, CAR[13] has created and maintained" the CAR Library, which is "an extensive resource library of specialized and copyrighted business works created and designed to cover essentially all aspects of the types of residential and commercial real estate purchase, sales, and leasing transactions in which CAR's members engage." (Docket Entry # 1, p. 4). The CAR name and logo are registered trademarks. (Docket Entry # 1, p. 4).

CAR restricts the access to the CAR Library to "paid members and other licensees." (Docket Entry # 1, ¶ 31). "Electronic versions of the CAR Library are only available via software" called zipForm, which is offered by zipLogix. (Docket Entry # 1, p. 5). [Z]iplogix is managed by REBS, "a wholly-owned subsidiary of CAR." (Docket Entry # 1, p. 5).

"REBS is licensed to provide the works in the CAR Library to CAR members and other non-member real estate professionals for the benefit of CAR." (Docket Entry # 1, p. 5). Access to certain works in the CAR Library "is also offered to CAR's paid members and other licensees **[*55]** for sale through the CAR Business Solutions online store operated by REBS." (Docket Entry # 1, p. 5). CAR's members gain access to the CAR Library "as a member benefit." (Docket Entry # 1, p. 5). "Access to the CAR Library," however, "is restricted to CAR's paid members and other licensees." (Docket Entry # 1, p. 5). Non-member real estate professionals are able to purchase "an annual license to access the CAR Library through zipForm" for a fee between $799 and $999 per year. (Docket Entry # 1, p. 5). Users must be licensed zipForm users in order to "access and use the software" that enables them "to fill in client transaction details and create different types of documents with different purposes and functions, as needed, and then download and send completed documents for use in a real estate transaction." (Docket Entry # 1, p. 6).

---

[12] This court takes judicial notice of the screenshot of the business entity search for CAR that PDFfiller conducted through the publically available search tool on the corporations division of the Secretary of the Commonwealth of Massachusetts' website. PDFfiller filed the screenshot. (Docket Entry # 143-1); see Hadley v. Chrysler Group LLC, 2014 U.S. Dist. LEXIS 32547, 2014 WL 988962, at *2 (E.D.Mich. Mar. 13, 2014). ("[c]ourt can take judicial notice and consider documents posted on a government website").

[13] The complaint refers to CAR as C.A.R. For consistency, this court refers to CAR without including the periods.

PDFfiller's website is "designed to do the same thing," meaning, it allows users to access software that lets them fill in transaction details, create different types of documents, and download and send completed documents. (Docket Entry # 1, p. 6). As elaborated below, PDFfiller's website "directly mimics the functionality of zipForm concerning numerous **[*56]** works from the CAR Library." (Docket Entry # 1, p. 6).

Licensed and registered zipForm users are subject to an end-user license agreement for zipLogix products and services ("the zipLogix EULA"). (Docket Entry # 1, p. 6). The zipLogix EULA prohibits "the removal or alteration of any trademark or copyright notices" and also prohibits the "reproduction of blank documents from within zipForm in any file format or representation," including PDF, "except as expressly permitted in the zipLogix EULA." (Docket Entry # 1, p. 7). The zipLogix EULA also states that blank or partially blank CAR forms "may not be printed or exported" and that "use of CAR works other than as expressly licensed in prohibited." (Docket Entry # 1, p. 7).

CAR's copyrighted works "may only be downloaded from zipForm" and, once completed by the licensed user, used only "for the user's real estate transaction." (Docket Entry # 1, p. 7). Licensed zipForm users are able to export completed works in PDF format. (Docket Entry # 1, p. 7). "[T]the PDF versions," however, "are 'locked' by means of a password generated by zipForm and may not be altered or manipulated outside zipForm." (Docket Entry # 1, p. 7). [Z]ipForm users are **[*57]** "expressly advised when they email a filled out PDF document that the zipLogix EULA 'prohibits the modification of documents.'" (Docket Entry # 1, p. 7). The zipLogix EULA likewise bars "the printing, reproducing, or displaying on the Internet any blank or partially blank documents available through zipForm." (Docket Entry # 1, p. 7).

The CAR Library "reflects many original and creative copyrighted" CAR works. (Docket Entry # 1, p. 8). There are 64 CAR copyrighted works reproduced, distributed, or used, i.e., purportedly infringed, through the PDFfiller website. (Docket Entry # 1, p. 8). Each work bears a copyright notice as well as CAR's trade name and logo. (Docket Entry # 1, pp. 8-9).

Yasinovsky and Shakhnovich operate the PDFfiller website in Massachusetts. (Docket Entry # 1, pp. 1-3). The website mimics the functionality of zipForm and provides the basis of the purported misconduct by PDFfiller, Yasinovsky, and Shakhnovich. (Docket Entry # 1, pp. 6, 9-13). Through the website, PDFfiller allows registered and subscribing users "to upload forms and other documents to their accounts on the PDFfiller Website." (Docket Entry # 1, p. 9). Users can also "convert the uploaded documents **[*58]** into stock forms in PDF format" and then fill out the forms or documents "in a fillable PDF document." (Docket Entry # 1, p. 9). PDFfiller's website allows users "to save and maintain the electronic forms created from the uploaded content on the PDFfiller Website," which users can complete, repeatedly use, "email[] to any email address, or otherwise export[]." (Docket Entry # 1, p. 9). PDFfiller "designed and maintained" its website and software in order to "bypass the password lock on native CAR documents." (Docket Entry # 1, p. 9). PDFfiller also designed and maintained the website and software "to modify the completed documents exported from the CAR Library by converting a completed, locked file into an unlocked and fillable PDF." (Docket Entry # 1, p. 9). These fillable PDF documents exported from the CAR Library are then "maintained as part of the PDFfiller Website user's personal account and the PDFfiller Website database." (Docket Entry # 1, p. 9). PDFfiller also created "a private database of fillable PDF forms and business documents derived from the documents users have uploaded to the PDFfiller Website and other forms" as well as other documents collected by PDFfiller. (Docket **[*59]** Entry # 1, p. 10).

PDFfiller markets to the general public and sells subscriptions to use its "website and access its database of documents and forms." (Docket Entry # 1, p. 10). PDFfiller's users pay for the ability to: (1) "access and search the database of forms and documents maintained by" PDFfiller; (2) download "forms and documents to their accounts"; and (3) "use the PDFfiller Website to create and maintain" documents like fillable PDF documents, "which users can then use, email, download, or otherwise export from the PDFfiller Website." (Docket Entry # 1, p. 10). PDFfiller additionally sells "the newly created unlocked, reusable, and fillable PDFs maintained as part of" its website's database in a "form identical to CAR works" that are made available only through zipForm, "including all of CAR's content, trademarked name and logo, and CAR's copyright designations." (Docket Entry # 1, p. 10).

Without CAR's permission, PDFfiller, a Massachusetts corporation located in Massachusetts with employees in Massachusetts and the Ukraine, along with Yasinovsky and Shakhnovich, both domiciled in Massachusetts, created and sold "fillable PDFs identical to" CAR's works, which are "available **[*60]** only through zipForm." (Docket Entry # 1, p. 10). They also obtained and sold "numerous copyrighted works from the CAR Library" on the searchable PDFfiller database. (Docket Entry # 1, p. 10). PDFfiller markets its product and services by discussing on its website "the number of times users have downloaded a particular work" and by providing a running total of this statistic on its website. (Docket Entry # 1, P. 10). For example, PDFfiller's website, when searched for the terms "CAR form rpa ca," returned results that "the 'California Residential Purchase Agreement and Joint Escrow Instructions' work has been filled out 89,471 times." (Docket Entry # 1, p. 11).

PDFfiller also "engaged in search engine optimization techniques." (Docket Entry # 1, p. 11). The techniques include "making the titles of numerous CAR copyrighted works" searchable in its database through search engines "such as Google," and ensuring that "links to the PDFfiller Website also appear at the top of the list or near the top of the list of unpaid search results." (Docket Entry # 1, p. 11). In Massachusetts, PDFfiller has "over 15 full time employees" who are dedicated to "marketing and selling content including the **[*61]** Infringed Works" through methods such as "search engine optimization, Google and other search engine advertising, website analytics, and other strategic and state of the art techniques for targeting the public." (Docket Entry # 1, p. 12). These employees in Massachusetts use these methods to target the public, "including California real estate licensees," home buyers, and sellers, who are prospective customers of CAR and prospective clients of CAR's members. (Docket Entry # 1, p. 12). In the Ukraine, PDFfiller "has over 40 full time employees . . . dedicated to writing and maintaining software, website analytics, data mining, and maintaining the operation of the PDFfiller Website and business." (Docket Entry # 1, p. 12).

PDFfiller maintained, marketed, and sold a number of CAR's works to the public, all of which "contain express reference to CAR's copyright registration" that "forbids the unauthorized distribution, display and reproduction of the form, or any portion thereof, by photocopy machine or any other means, including facsimile or computerized formats." (Docket Entry # 1, pp. 8, 12) (Docket Entry # 1-2). Each of CAR's works maintained, marketed, and sold to the public via PDFfiller's **[*62]** website also "contain express reference to the trademarked name and logo of CAR by stating 'California Association of Realtors®, Inc.' next to CAR's logo." (Docket Entry # 1, p. 13).

CAR identifies the following purported misconduct in the complaint: "republishing the CAR works in their entirety on the PDFfiller searchable database"; "creating and selling unlocked, reusable and fillable PDF forms copied and derived from the CAR works in their entirety on the PDFfiller searchable database"; and "marketing, advertising, offering to sell[,] and selling the works from the CAR Library, bearing Plaintiff's trademarked name and logo, to the public through the PDFfiller Website." (Docket Entry # 1, p. 13).

Finally, CAR sent, and all defendants received, notices to "cease and desist from further sale and use of [sic] all documents bearing CAR's copyright notices and CAR's trademarks." (Docket Entry # 1, p. 13). Defendants, however, have not removed any of the works in question from PDFfiller's website. (Docket Entry # 1, p. 13).

DISCUSSION

In seeking to dismiss the *section 11 chapter 93A* claim, defendants first maintain that the conduct did not occur "'primarily and substantially' within the Commonwealth." **[*63]** (Docket Entry # 142, p. 5) (quoting *section 11*). According to defendants, the harm or injury took place exclusively in California, no wrongdoing occurred in Massachusetts, and the "'center of gravity' . . . does not rest in Massachusetts." (Docket Entry # 142, p. 7). Second, they submit that: (1) CAR, as a nonprofit corporation, did not engage in "trade or commerce"; and (2) *section 1(b) of chapter 93A* requires the "trade or commerce" to "directly or indirectly affect[] the people of this commonwealth." (Docket Entry # 142, p. 13).

CAR points out that defendants have the burden of proof to show "'with certitude'" that the "'transactions and actions did not occur primarily and substantially within the commonwealth.'" (Docket Entry # 153) (quoting *Gray v. Evercore Restructuring LLC, 544 F.3d at 324*, and *section 11*). CAR further maintains that the facts in the complaint sufficiently show that the misconduct occurred in Massachusetts and the center of gravity giving "'rise to the claim is primarily and substantially within the Commonwealth.'" (Docket Entry # 153) (quoting *Kuwaiti Danish Computer Co.*

v. Digital Equip. Corp., 438 Mass. 459, 781 N.E.2d 787, 788-99 (Mass. 2003)). CAR additionally contends that its status as a nonprofit corporation is not dispositive of whether it engaged in "trade or commerce" under section 11 and the fact-specific nature of the inquiry precludes a Rule 12(c) **[*64]** dismissal. (Docket Entry # 153).

I. Primarily and Substantially in Massachusetts

Section 11 precludes relief "unless the actions and transactions constituting the alleged unfair method of competition or the unfair or deceptive act or practice occurred primarily and substantially within the commonwealth." Mass. Gen. Laws ch. 93A, § 11. The underlying burden of proof is on "the person claiming that such transactions and actions did not occur primarily and substantially within the commonwealth," i.e., defendants. Mass. Gen. Laws ch. 93A, § 11. The applicable analysis considers the facts "'in the context of the entire § 11 claim'" and then determines "'whether the center of gravity of the circumstances that give rise to the claim is primarily and substantially within the Commonwealth.'" Sonoran Scanners, Inc. v. Perkinelmer, Inc., 585 F.3d 535, 546 (1st Cir. 2009) (quoting Kuwaiti Danish Computer Corp. v. Digital Equip. Co., 781 N.E.2d at 799). Furthermore, "[t]he center of gravity analysis examines 'actionable conduct as opposed to conduct that is neither unfair nor deceptive.'" Controlled Kinematics, Inc. v. Novanta Corp., Civil Action No. 17-11029-ADB, 2017 U.S. Dist. LEXIS 195989, 2017 WL 5892200, at *3 (D. Mass. Nov. 29, 2017); see Kuwaiti Danish Computer Corp. v. Digital Equip. Co., 781 N.E.2d at 800 (because "[t]here was nothing unfair or deceptive about" corporate policies adopted and applied in Massachusetts, they "cannot be considered" regarding whether "wrongful conduct occurred 'primarily and substantially' in Massachusetts"); accord Kenda Corp., Inc. v. Pot O'Gold Money Leagues, Inc., 329 F.3d 216, 236 (1st Cir. 2003) (noting **[*65]** that "defendants' actionable conduct occurred primarily in Michigan" and concluding that center of gravity "occurred primarily outside the Commonwealth").

No one factor predominates the analysis in every case "because of a tendency to shift the focus of the inquiry away from the purpose and scope of [chapter] 93A." Kuwaiti Danish Computer Corp. v. Digital Equip. Co., 781 N.E.2d at 799; accord In re Pharm. Indus. Average Wholesale Price Litig., 582 F.3d 156, 194 (1st Cir. 2009) (inquiry is "'fact intensive'" with focus on "'purpose and scope' of Chapter 93A"). Moreover, the significance and weight of factors in "one case may be nonexistent in another" case such that the inquiry is not grounded on "any precise formula" and is "unique to each case." Kuwaiti Danish Computer Corp. v. Digital Equip. Co., 781 N.E.2d at 798; In re Pharm. Indus. Average Wholesale Price Litig., 582 F.3d at 194. Hence, it may be appropriate to decide a case based on one instance of misconduct in one jurisdiction when that misconduct has a greater significance or impact on the case as a whole rather than on "a multiplicity of instances of misconduct in another jurisdiction." Kuwaiti Danish Computer Corp. v. Digital Equip. Co., 781 N.E.2d at 798-799, 799 n.14. Depending upon each unique case, "[t]he situs of the loss," id. at 798 n.13, the locus of the misconduct, and the location where the plaintiff received and acted upon the unfair or deceptive act or practice may guide the analysis. See Controlled Kinematics, Inc. v. Novanta Corp., 2017 U.S. Dist. LEXIS 195989, 2017 WL 5892200, at *4; see also Kuwaiti Danish Computer Corp. v. Digital Equip. Co., 781 N.E.2d at 799.

In the case at bar, a significant amount of the misconduct of marketing and selling the copyrighted **[*66]** and trademarked works through search engine optimization took place in Massachusetts. Fifteen PDFfiller employees in Massachusetts worked full time in selling and marketing the purportedly infringed works. Whereas 40 full-time employees in Ukraine worked on data mining, website analytics, and maintaining the website, Yasinovsky, the chief executive officer, and Shakhnovich, the president, both domiciled in Massachusetts, worked in PDFfiller's Massachusetts office operating the website.[14] See, e.g., Controlled Kinematics, Inc. v. Novanta Corp., 2017 U.S. Dist. LEXIS 195989, 2017 WL 5892200, at *5 (section 11 claim based on "actions of Defendant's senior employees in Massachusetts" where practice of withholding commissions "was developed by senior company officials" survived Rule 12(b)(6) challenge). Reasonable inferences demonstrate that their activities operating the website in Massachusetts involved extensive misconduct in Massachusetts, including approving and designing the website to allow PDFfiller subscribers to export locked, copyrighted documents from the CAR Library and convert them to

[14] As previously noted, the above finding is made by drawing reasonable inferences from the facts in the complaint in CAR's favor.

unlocked, fillable PDF documents in their personal PDFfiller accounts. Indeed, the website's database contains at least 64 separate copyrighted works.

Reasonable inferences also permit a finding that Yasinovsky and **[*67]** Shakhnovich operated the website in Massachusetts by, inter alia, allowing its users to save, maintain, download, and email proprietary documents obtained and converted from the CAR Library to their personal PDFfiller accounts without CAR's authorization. As further stated in the complaint, the website allows the unauthorized activities of unlocking the CAR Library of documents and making CAR's intellectual property, including its licensed and registered zipForms, available to the public for copying and use. The foregoing is sufficient to avoid a *Rule 12(c)* dismissal even under the more defendant-favorable standard applicable in the absence of an affirmative defense.

Defendants' remaining arguments are not convincing. Acknowledging that a number of cases in this district deny *Rule 12(b)(6)* motions due to language in Kuwaiti that "[s]ection 11 suggests" the court should determine the center of gravity "after making findings of fact," *Kuwaiti, 781 N.E.2d at 799*; see, e.g., *Workgroup Tech. Corp. v. MGM Grand Hotel, LLC, 246 F.Supp.2d 102, 118 (D. Mass. 2003)*, defendants distinguish these cases as "involve[ing] allegations that the plaintiff was located in and suffered an injury in Massachusetts." (Docket Entry # 142, n.3) (citing *Bruno Intl. Ltd. v. Vicor Corp., Civil Action No. 14-10037-DPW, 2015 U.S. Dist. LEXIS 123556, 2015 WL 5447652, at *18 (D. Mass. Sept. 16, 2015))*. As explained by the court in **[*68]** Bruno, courts in this district show a reluctance to allow motions to dismiss and reserve "the Kuwaiti assessment for after the factual record has been developed" when "the plaintiff has alleged that it is located in and claims some injury in Massachusetts." *Bruno Intl. Ltd. v. Vicor Corp., 2015 U.S. Dist. LEXIS 123556, 2015 WL 5447652, at *18* (collecting cases); see, e.g., *Guest-Tek Interactive Ent. Inc. v. Pullen, 731 F.Supp.2d 80, 92 (D. Mass. 2010)*. Defendants reason that these cases are consistent with cases dismissing *section 11* claims when an out-of-state plaintiff, such as CAR, "fails to allege sufficient harm or injury within Massachusetts." (Docket Entry # 142). Defendants accurately point out that CAR is a California corporation with a principal place of business in California and is not registered to do business in Massachusetts. (Docket Entry # 1, ¶¶ 7, 23) (Docket Entry # 143-1).

The Kuwaiti center of gravity analysis, however, eschews reliance on any one factor, such as the situs of the loss or the location of the plaintiff. See *Kuwaiti Danish Computer Corp. v. Digital Equip. Co., 781 N.E.2d at 799* (analysis "should not be based on any one factor or factors"). Rather, the focus is appropriately placed on the unique facts in the *Rule 12(c)* record in the context of the entire *section 11* claim. See generally *id. at 798-799*. Those facts and reasonable inferences show that a significant portion of the misconduct took place in Massachusetts thereby **[*69]** providing a sufficient basis to deny the *Rule 12(c)* motion. See, e.g., *Controlled Kinematics, Inc. v. Novanta Corp., 2017 U.S. Dist. LEXIS 195989, 2017 WL 5892200, at *5* (denying motion to dismiss *section 11* claim brought by out-of-state plaintiff injured in California against Michigan corporation with principal place of business in Massachusetts because complaint referenced actions that took place in Massachusetts); see *Fishman v. John Hancock Life Ins. Co., Civil Action No. 13-12166-LTS, 2014 U.S. Dist. LEXIS 40938, 2014 WL 1326989, at *3 (D. Mass. Mar. 27, 2014)* (out-of-state plaintiffs' *section 11* suit for nonpayment of commissions against Massachusetts company alleging failure to supervise general agents and respond to reports *in Massachusetts* warranted denying *Rule 12(b)(6)* motion). Indeed, the court in Kinematics rejected an argument similar to defendants' argument and determined that the allegations indicating "that Defendant committed the misconduct in Massachusetts" were sufficient to avoid a *Rule 12(b)(6)* dismissal. *Id. at *4-5*.

The *Weber* case relied on by defendants (Docket Entry # 142, p. 10) is distinguishable because the misconduct did not occur in Massachusetts. See *Weber v. Sanborn, 502 F.Supp.2d 197, 199 (D. Mass. 2007)* (events giving "rise to this lawsuit are centered around the planning and development of property in New Hampshire, by New Hampshire and New Jersey residents and/or business entities, to 'bring'" stadium to New Hampshire). CAR aptly distinguishes **[*70]** two other cases cited by defendants as relying on a three-factor test rejected in *Kuwaiti, 781 N.E.2d at 798-799*. (Docket Entry # 153, n.2).

Defendants additionally argue that the contacts of the competing jurisdictions are approximately in balance which leads to a determination that the conduct did not occur primarily in Massachusetts. (Docket Entry # 142, pp. 11-12). It is true that "Kuwaiti Danish did not retreat from the proposition that, if the significant contacts of the competing jurisdictions are approximately in the balance, the conduct in question cannot be said to have occurred primarily and substantially in Massachusetts." *Uncle Henry's Inc. v. Plaut Consulting Co., Inc., 399 F.3d 33, 45 (1st Cir. 2005)*. Drawing reasonable inferences and viewing the record in CAR's favor, however, the competing jurisdictions are not in approximate balance but, rather, weigh in favor of Massachusetts when viewed under a *Rule 12(c)* standard. Coupled with the purpose of chapter 93A "'to encourage more equitable behavior in the marketplace and impose liability on persons seeking to profit from unfair practices,'" defendants fail to satisfy their burden on the primarily and substantially issue to warrant a *Rule 12(c)* dismissal.

II. Trade or Commerce

Defendants next maintain that CAR, "as a not-for-profit corporation," does **[*71]** not meet chapter 93A's "trade or commerce" requirement. (Docket Entry # 142). CAR submits that its status as a nonprofit corporation is not dispositive and that PDFfiller's use of CAR's trademarks to sell CAR forms on its website is actionable. (Docket Entry # 153).

In addition to a commercial transaction, *section 11* requires, inter alia, a finding that CAR was "engaged in 'trade or commerce,' and therefore acting in a 'business context.'" *Linkage Corp. v. Trustees of Boston University, 425 Mass. 1, 679 N.E.2d 191, 206 (Mass. 1997)* (*sections 2(a)* and *11* "requires a dual inquiry," first, whether "interaction is 'commercial' in nature, and second, whether the parties were both engaged in 'trade or commerce,' and therefore acting in a 'business context'"); accord *Selmark Associates, Inc. v. Ehrlich, 467 Mass. 525, 5 N.E.3d 923, 942 (Mass. 2014)*; *States Resources Corp. v. The Architectural Team, Inc., 433 F.3d 73, 84 (1st Cir. 2005)*. An entity's "nonprofit status is not dispositive" of whether it was engaged in trade or commerce. *Kunelius v. Town of Stow, 588 F.3d 1, 17 (1st Cir. 2009)*; accord *Linkage Corp. v. Trustees of Boston University, 679 N.E.2d. at 207*. In applying the "'business context'" test, the court assesses "'the nature of the transaction, the character of the parties involved, and the activities engaged in by the parties'" as well as "'[o]ther relevant factors.'" *Kraft Power Corp. v. Merrill, 464 Mass. 145, 981 N.E.2d 671, 683 n.13 (Mass. 2013)*; *Milliken & Co. v. Duro Textiles, LLC, 451 Mass. 547, 887 N.E.2d 244, 259 (Mass. 2008)*; *Begelfer v. Najarian, 381 Mass. 177, 409 N.E.2d 167, 176 (Mass. 1980)*.

CAR is a nonprofit trade association comprised of an estimated 170,000 California real estate professionals which promotes real estate services for its members. (Docket Entry # 1, ¶¶ 23, 24). PDFfiller, in turn, **[*72]** sells subscriptions of its services to the public. (Docket Entry # 1, ¶ 71). In particular, PDFfiller's users pay to obtain access to the company's database of forms, including CAR's copyrighted forms. They also download forms to their accounts and use the website to "create and maintain such documents as fillable" PDF forms. (Docket Entry # 1, ¶ 66). CAR restricts access to the CAR Library and its locked forms to "paid members and other licensees." (Docket Entry # 1, p. 5). CAR also sells annual licenses to access the CAR Library and obtain access to its locked forms for $799 to $999. PDFfiller's website shows that users filled out CAR's copyrighted residential purchase agreement and joint escrow instructions 89,471 times. (Docket Entry # 1, ¶ 70) (Docket Entry # 1-2, p. 2).

CAR identifies the transactions at issue as involving PDFfiller's use of CAR's copyrighted works "to sell ripped off copies" of CAR forms on PDFfiller's website without CAR's permission. (Docket Entry # 153, p. 9). Here, construing the record in CAR's favor, CAR charged for its services or included the services as a membership benefit for "paid members." See *Linkage Corp. v. Trustees of Boston University, 679 N.E.2d. at 208* (paraphrasing *Planned Parenthood Federation of America, Inc. v. Problem Pregnancy of Worcester, Inc., 398 Mass. 480, 498 N.E.2d 1044, 1052 (Mass. 1986)*, that charitable entity did not charge **[*73]** for its services as showing it was beyond reach of chapter 93A). PDFfiller also charged website users for its services. It is also plausible that CAR's motivations (as well as PDFfiller's motivations) for charging membership fees or other fees to access and use the copyrighted forms were financial, namely, to obtain profits for the corporation, and that CAR viewed PDFfiller's activities of allowing subscribers to access and use fillable CAR forms as reducing that profit. See *Klairmont v. Gainsboro Restaurant, Inc., 465 Mass. 165, 987 N.E.2d 1247, 1256 (2013)* ("judge was permitted to infer that the defendants had a profit-seeking motive in constructing and maintaining the hazardous staircase in the context of their commercial enterprise, an enterprise that Jacob patronized as a paying customer"). It is also plausible that the nature of the transactions are business related. Finally, the transactions were not isolated, see *Begelfer v. Najarian, 409 N.E.2d at 176*, or incidental to CAR's business. See *Linkage Corp. v. Trustees of Boston University, 679 N.E.2d. at 208*.

Accordingly, the chapter 93A claim is not subject to dismissal on the basis that CAR was not engaged in trade or commerce.

As a final matter, defendants assert that the "indirectly or directly" language in *section 1(b)* precludes the *section 11* claim because CAR fails to allege any connection to Massachusetts that impacts Massachusetts **[*74]** citizens. *Section 1(b)* defines "'trade' and 'commerce'" and states, in part, that the term "shall include any trade or commerce directly or indirectly affecting the people of this commonwealth."[15] *Mass. Gen. Laws ch. 93A, § 1(b)*. The language "is of minimal utility in construing" the trade or commerce phrase because it "merely 'recites certain activities which are included within those terms and concludes by incorporating . . . "any trade or commerce directly or indirectly affecting the people of this commonwealth."'" *Lantner v. Carson, 374 Mass. 606, 373 N.E.2d 973, 976 n.4 (Mass. 1978)*. The language in *section 11*, which depicts the conduct of the person filing suit, i.e., CAR, as engaging in "*any* trade or commerce," is undeniably broad. *Mass. Gen. Laws ch. 93A, § 11*. Furthermore, courts interpret this language as restricting "trade or commerce" to transactions that are not private in nature. See *Gannett v. Lowell, 16 Mass. App. Ct. 325, 450 N.E.2d 1121, 1124 (Mass. App. Ct. 1983)*; *Newton v. Moffie, 13 Mass. App. Ct. 462, 434 N.E.2d 656, 659 (Mass. App. Ct. 1982)*. Thus, the conduct of "administering the estate" in Gannett did not constitute "trade or commerce 'directly or indirectly affecting the people of this Commonwealth'" because *section 11* "'is not available where the transaction is strictly private in nature and is no way undertaken in the ordinary course of a trade or business.'" *Gannett v. Lowell, 450 N.E.2d at 1124*. Likewise, the settlement of a dispute over a note in Newton did not "constitute[] trade or commerce 'directly or indirectly **[*75]** affecting the people of this commonwealth,' within the meaning of *§ 1(b)*" because section "11 was not enacted to 'provide an additional remedy for private wrongs which do not'" affect the "'public generally.'" *Newton v. Moffie, 434 N.E.2d at 659*. Moreover, the "directly or indirectly affecting the people of the commonwealth" language "was not intended . . . to create a separate element of the cause of action." Id. (dicta); see *Lantner v. Carson, 373 N.E.2d at 976 n.4*.

Here, CAR's conduct is public as opposed to private. In any event, solely for purposes of the *Rule 12(c)* motion, this court deems it plausible that CAR engages in conduct that indirectly affects Massachusetts residents.

CONCLUSION

In accordance with the foregoing **[*76]** discussion, this court **RECOMMENDS**[16] that CAR's motion to dismiss the amended counterclaims and the third-party complaint (Docket Entry # 121) and defendants' partial motion for judgment on the pleadings (Docket Entry # 141) be **DENIED**. This court will conduct a status conference on March 14, 2018, at 2:00 p.m. to address the discovery schedule for the antitrust claims.

MARIANNE B. BOWLER

---

[15] In full, the definition reads as follows:

> (b) "Trade" and "commerce" shall include the advertising, the offering for sale, rent or lease, the sale, rent, lease or distribution of any services and any property, tangible or intangible, real, personal or mixed, any security as defined in *subparagraph (k) of section four hundred and one of chapter one hundred and ten A* and any contract of sale of a commodity for future delivery, and any other article, commodity, or thing of value wherever situate, and shall include any trade or commerce directly or indirectly affecting the people of this commonwealth.

Mass. Gen. L. ch. 1(b).

[16] Any objections to this Report and Recommendation must be filed with the Clerk of Court within 14 days of receipt of the Report and Recommendation to which objection is made and the basis for such objection should be included. See *Fed. R. Civ. P. 72(b)*. Any party may respond to another party's objections within 14 days after service of the objections. Failure to file objections within the specified time waives the right to appeal the order.

Opinion

[*227] ORDER ON THE DEFENDANTS' MOTION TO DISMISS

The Plaintiffs' class action lawsuit centers on allegations of antitrust violations **[**2]** in the manner and fees associated with the service of civil process in Maine. Pursuant to *Rule 12(b)(6)*, the Defendants have moved to dismiss all the claims in the Plaintiffs' Complaint. Defs.' Mot. to Dismiss (ECF No. 6). For the reasons discussed below, I grant the Defendants' motion to dismiss.

FACTS

The Complaint generally alleges that the Defendants have a monopoly in the service of civil process and are price-gouging for their services. Complaint (ECF No. 1). The Complaint includes claims for violations of: the *Maine Freedom of Access Act* (Count I); the *Maine Unfair Trade Practices Act* (Count II); the duty of good faith and fair dealing (Count III); the Maine antitrust statute (Count IV); the *Sherman Antitrust Act* (restraint of trade) (Count V); the *Sherman Antitrust Act* (exclusive dealing and other exclusionary agreements) (Count VI); the *Sherman Antitrust Act* (monopoly) (Count VII); the Maine antitrust statute (Count VIII); the Clayton Antitrust Act (Count IX); the *Sherman Antitrust Act* (attempted monopolization) (Count X); the *Federal Trade Commission Act* (Count XI); civil conspiracy (Count XII); unjust enrichment (Count XIII); accounting (Count XIII); the **[**3]** *Racketeer Influenced and Corrupt Organizations Act ("RICO")* (Count XIV); and punitive conduct (Count XV). The Plaintiffs seek damages and declaratory and injunctive relief.

STANDARD OF REVIEW

Pursuant to *Federal Rule of Civil Procedure 12(b)(6)*, a party may seek dismissal of "a claim for relief in any pleading" if that party believes that the pleading fails "to state a claim upon which relief can be granted." In assessing a motion to dismiss under *Rule 12(b)(6)*, a court "assume[s] the truth of all of the well-pleaded facts in the complaint and draw[s] all reasonable inferences in the plaintiff's favor." *Román—Oliveras v. Puerto Rico Elec. Power Auth., 655 F.3d 43, 45 (1st Cir. 2011)* (internal quotations omitted). To overcome the motion, the Plaintiffs must establish that their allegations raise a plausible basis for a fact finder to conclude that the defendant is **[*228]** legally responsible for the claims at issue. *Id. at 49*.

ANALYSIS

I. State Action Immunity

The Defendants have asserted state action immunity as a basis to dismiss the Plaintiffs' antitrust claims. The Supreme Court, relying on principles of federalism and state sovereignty, has held that the Sherman Act did not apply to anticompetitive restraints imposed by states "as an act of government." *Parker v. Brown, 317 U.S. 341, 352, 63 S. Ct. 307, 87 L. Ed. 315 (1943)*.[1]

Parker immunity does not apply to substate entities, such as municipalities and other political **[**4]** subdivisions, but "substate governmental entities do receive immunity from antitrust scrutiny when they act 'pursuant to state policy to displace competition with regulation or monopoly public service.'" *FTC v. Phoebe Putney Health Sys., Inc., 568 U.S. 216, 225-26, 133 S. Ct. 1003, 185 L. Ed. 2d 43 (2013)* (quoting *Lafayette v. La. Power & Light Co., 435 U.S. 389, 413, 98 S. Ct. 1123, 55 L. Ed. 2d 364 (1978)*); *see also* *Hallie v. Eau Claire, 471 U.S. 34, 38, 105 S. Ct. 1713, 85 L. Ed. 2d 24 (1985)*. "[I]mmunity will only attach to the activities of local governmental entities if they are undertaken pursuant to a 'clearly articulated and affirmatively expressed' state policy to displace competition." *Id. at 226* (quoting *Cmty. Commc'ns Co., v. City of Boulder, 455 U.S. 40, 52, 102 S. Ct. 835, 70 L. Ed. 2d 810 (1982)*).[2]

---

[1] The state action immunity doctrine has also been applied to claims brought under the *Clayton Act*, *see* *Cine 42nd St. Theater Corp. v. Nederlander Org., Inc., 790 F.2d 1032 (2d Cir. 1986)*, and the *Federal Trade Commission Act*, *see* *N.C. State Bd. Of Dental Exam'rs v. FTC, 135 S. Ct. 1101, 1117-1118, 191 L. Ed. 2d 35 (2015)*.

[2] The Plaintiffs assert that in order to shield the anticompetitive actions of the Defendants from antitrust laws, "a State must adopt some alternative regulatory mechanism that provides active state supervision of that conduct." Pls.' Opp'n 4 (ECF No. 7). While that requirement is true for private parties asserting state action immunity, it does not apply to substate entities. "[U]nlike private parties, [substate] entities are not subject to the 'active state supervision requirement' because they have less of an incentive to pursue their own self-interest under the guise of implementing state policies." *FTC v. Phoebe Putney Health Sys., Inc., 568 U.S. 216, 226, 133 S. Ct. 1003, 185 L. Ed. 2d 43 (2013)* (quoting *Hallie v. Eau Claire, 471 U.S. 34, 46-47, 105 S. Ct. 1713, 85 L. Ed. 2d 24 (1985)*).

The "clear articulation" test does not require a "state legislature to have stated explicitly that it expected [the governmental entity] to engage in conduct that would have anticompetitive effects." *Hallie, 471 U.S. at 42*. To satisfy the "clear articulation" test, the state need only delegate to the county "the express authority to take action that foreseeably will result in anticompetitive effects." *Id. at 43*. Mere authorization to act is insufficient; "the substate governmental entity must also show that it has been delegated authority to act or regulate anticompetitively." *Phoebe Putney, 568 U.S. at 228*.

The Supreme Court has acknowledged that it would be "unrealistic" to "require state legislatures to explicitly authorize specific anticompetitive effects before state action immunity could apply" because **[**5]** " '[n]o legislature . . . can be expected to catalog all of the anticipated effects' of a statute delegating authority to a substate governmental entity." *Phoebe Putney, 568 U.S. at 229* (quoting *Hallie, 471 U.S. at 43*). Instead, the Supreme Court has "approached the clear-articulation inquiry more practically, but without diluting the **[*229]** ultimate requirement that the State must have affirmatively contemplated the displacement of competition such that the challenged anticompetitive effects can be attributed to the 'state itself.'" *Id.* (quoting *Parker, 317 U.S. at 352*). "[A] state policy to displace federal ***antitrust law*** [is] sufficiently expressed where the displacement of competition [is] the inherent, logical, or ordinary result of the exercise of authority delegated by the state legislature." *Id.* "In that scenario, the State must have foreseen and implicitly endorsed the anticompetitive effects as consistent with its policy goals." *Id.*

A. The Maine Statutory Scheme

Under Maine law, "[s]ervice of process shall be as proscribed by rule of court." *14 M.R.S. § 701*. Rule 4(c) of the Maine Rules of Civil Procedure sets forth the requirements for service of a complaint and summons. It provides:

> (c) Service. Service of the summons and complaint may be made as follows:
>
> (1) By mailing a copy of the summons and of the complaint **[**6]** (by first-class mail, postage prepaid) to the person to be served, together with two copies of a notice and acknowledgment form and a return envelope, postage prepaid addressed to the sender. If no acknowledgment of service under this paragraph is received by the sender within 20 days after the date of mailing, service of the summons and complaint shall be made under paragraph (2) or (3) of this subdivision.
> (2) By a sheriff or a deputy within the sheriff's county, or other person authorized by law, or by some person specially appointed by the court for that purpose. Special appointments to serve process shall be made freely when substantial savings in travel fees will result.
> (3) By any other method permitted or required by this rule of by statute.

Me. R. Civ. P. 4(c).[3]

By statute, "[e]very sheriff and each of his deputies shall serve and execute, within his county, all writs and precepts issued by lawful authority to him directed and committed." *14 M.R.S. § 702*. Maine law provides that sheriffs and their deputies shall receive fees unless the sheriffs and deputies are paid a salary instead of the fees for service of process.

> 1. Civil process. For service of all writs or complaints with summonses, precepts, notices, executions, **[**7]** court orders, orders of service, copies and all other civil process or papers requiring service which are not specified in this section:
>
> A. For proceedings in forma pauperis, $4 for each such service and $8 if the service is made in hand;
> B. For service on behalf of the State, $4 for each such service and $8 if the service is made in hand; and
> C. For all other proceedings, $8 for each such service and $16 if the service is made in hand.

30-A M.R.S. § 421(1). The statute goes on to identify fees for enumerated types of service. *30-A M.R.S. § 421(2)-(15)*. The statute further provides for reimbursement for mileage in addition to the fees. *30-A M.R.S. § 421*.

---

[3] The Federal counterpart to this rule permits personal service by "[a]ny person who is at least 18 years old and not a party." *Fed. R. Civ. P. 4(c)(2)*.

B. Anticompetitive Effects are a Foreseeable Result

Although Maine law does not grant county sheriffs exclusive authority to serve civil process, the statutory scheme demonstrates that the legislature intended county sheriffs and their deputies to play the **[*230]** primary role in completing personal service of civil process in Maine. The legislature's grant of broad authority to sheriffs and deputies as process servers displaces some competition. In order to have process served personally by someone other than the sheriff or his deputies, one would have to obtain a special **[**8]** appointment from the court or use one of a narrow class of individuals otherwise authorized by law to effectuate service. *See, e.g.*, *14 M.R.S. § 703* (service by constables). Although special appointments are to be granted liberally, the extra step creates an impediment to the use of alternate forms of personal service of process. Me. R. Civ. P. 4(c)(2).

Two other features of the Maine service statutes also support the foreseeability of an anticompetitive effect. First, the statute here not only authorizes the sheriff to effectuate personal service, it also sets the fees which can be charged. This is not a case like *FTC v. Ticor Title Ins. Co.*, where rating bureaus for title insurance companies were authorized by state statute to set fees because here the state set the fees. *504 U.S. 621, 112 S. Ct. 2169, 119 L. Ed. 2d 410 (1992)*; *see also* *Phoebe Putney, 586 U.S. at 228* (broad grant of authority to hospital authorities did not delegate authority to act anticompetitively); *Cmty. Commc'ns Co., 455 U.S. at 52* (state's grant of broad neutral authority to municipalities to govern local affairs did not contemplate anticompetitive actions later taken by the municipality). Second, contrary to the Plaintiffs' contention, the statute is not neutral with respect to the actions challenged as anticompetitive. The statute compels sheriffs and **[**9]** their deputies to execute service of lawfully issued writs and precepts presented to them. The statutory language indicates that, provided payment is received, the sheriffs and their deputies "*shall* serve and execute" these documents. *14 M.R.S. § 702* (emphasis added). In *Hallie*, the Supreme Court stated that a municipality was not required to show compulsion in order to receive the benefit of state action immunity, but it acknowledged that "compulsion affirmatively expressed may be the best evidence of state policy [to displace competition]." *471 U.S. at 45-46*. Thus, in this case the anticompetitive effect can be attributed to the state itself.

Because displacement of competition is the ordinary, logical, and inherent result of the Maine statutory scheme, its anticompetitive effect on personal service of process is foreseeable and the "clear articulation" test is satisfied. Thus, the sheriffs and county Defendants are entitled to state action immunity on all the Plaintiffs' federal antitrust claims. *See* *Fisichelli v. Town of Methuen, 956 F.2d 12, 15-16 (1st Cir. 1992)* (where immunity attaches, it shields not only the municipality as a body corporate and politic, but also municipal officials who are responsible for implementation of the anticompetitive policy). This state **[**10]** action immunity encompasses both claims for damages and for injunctive relief.

II. The Plaintiffs' Abandoned Claims

The Defendants raised numerous additional arguments to support the dismissal of the remaining counts of the Complaint.[4] **[*231]** The Plaintiffs focused their response on state action immunity. Despite filing a 23-page brief in one-and-one-half line spacing,[5] the Plaintiffs failed to respond meaningfully to any of the Defendants' arguments

---

[4] The Defendants assert that: 1) state action immunity extends to claims brought under state antitrust laws; 2) all antitrust claims fail because there is no connection to commerce; 3) the breach of duty of good faith and fair dealing count fails because the UCC does not apply to contracts for services; 4) the civil conspiracy claim fails because the Plaintiffs have not alleged an independently recognized tort; 5) the unjust enrichment claim fails because the Plaintiffs have failed to allege any benefit that they conferred on any of the defendants; 6) the accounting claim is not a separate cause of action; 7) violations of antitrust laws do not constitute predicate acts under RICO; and 8) the FOAA claim is an untimely appeal of an undefined request. Because I conclude that the Plaintiffs have abandoned these counts, I do not address the merits of any of the Defendants' additional arguments.

[5] Local Rule 7(d) requires memoranda to be double spaced and provides that "no memorandum of law . . . in opposition to a motion to dismiss . . . shall exceed 20 pages."

concerning the remaining counts.[6] I will not attempt to supply arguments that the Plaintiffs have not articulated. I find that the Plaintiffs have abandoned the remaining counts in their Complaint and have waived the right to challenge a judgment in favor of the Defendants on those claims. *Astro-Med, Inc. v. Nihon Kohden America, Inc., 591 F.3d 1, 19 (1st Cir. 2009)* ("[I]ssues adverted to . . . in a perfunctory manner, unaccompanied by some developed argumentation, are deemed to have been abandoned."(internal quotations omitted)); *Hopkins v. Women's Div., Gen. Bd. of Global Ministries, 284 F. Supp. 2d 15, 25 (D.D.C. 2003)* ("[W]hen a plaintiff files an opposition to a dispositive motion and addresses only certain arguments raised by the defendant, a court may treat those arguments that the plaintiff failed to address as conceded."), *aff'd* *98 F. App'x 8 (D.C. Cir. 2004)*.

CONCLUSION

For the reasons stated above, I **GRANT** the Defendants' motion to dismiss the Plaintiffs' Complaint.

SO ORDERED.

/s/ Nancy Torresen

United States Chief District Judge

Dated this 5th day of March, 2018.

End of Document

---

[6] The Plaintiffs' Opposition included one paragraph addressing the intrastate commerce argument and relying on "common sense" as opposed to properly cited authority. Pls.' Opp'n 4. I am not basing my ruling on the commerce issue. Aside from that one paragraph, the sum and substance of the Plaintiffs' response to the Defendants' additional arguments is as follows:

> The rest of Defendants [sic] arguments, such as "the Plaintiffs do not allege **[**11]** that the Defendants committed any torts," for example, is just too derisory and contemptable [sic] to even dignify with a response. The Defendants' counsel should be subject to sanctions for their motion to dismiss which is an act of absurd and illogical.[sic]"

Pls.' Opp'n 23.

Opinion

[*838] **MEMORANDUM OPINION AND ORDER**

Pending before the Court are Defendant Texhoma Fiber, LLC's Motion for Summary Judgment (Dkt. #36) and Plaintiff PEG Bandwidth TX, LLC's Motion for Partial Summary Judgment (Dkt. #37). Having considered the relevant pleadings and evidence, the Court finds that Plaintiff's motion should be granted. The Court further finds that Defendant's motion should be granted in part and denied in part.

BACKGROUND

Plaintiff PEG Bandwidth TX, LLC ("PEG") provides network solutions for cellular telephone carriers. In 2010 and 2011, PEG began discussions with the Hilliary family about providing PEG access to fiber optic cables for the purpose of supplying "backhaul" service to cellular carriers in the Wichita Falls area. **[**2]** [1] Defendant Texhoma Fiber, LLC ("Texhoma Fiber") is owned by the Hilliarys. The fiber in Wichita Falls was owned by Community

[1] "Backhaul" service connects a cell phone tower or site to a switch location designated by the cellular telephone carrier in order to enable the cellular carrier to service a market.

Telephone, a subsidiary of Comcell, Inc. ("Comcell"), which was owned by the Humpert family. The Hilliarys were in discussions to purchase Comcell, but had not finalized the acquisition.

The parties negotiated an agreement whereby Texhoma Fiber would lease to PEG pre-existing fiber in the Wichita Falls area and PEG would pay Texhoma Fiber to build out and extend the Wichita Falls fiber network to make it suitable for PEG to supply backhaul service to its customers. **[*839]** In May 2011, the parties finalized the contract into an agreement called the Dark Fiber Lease Agreement (the "Lease Agreement"). Texhoma Fiber was named as the lessor in the Lease Agreement. The dark fiber leased in the Lease Agreement would eventually connect numerous sites in the Wichita Falls area. Under the Lease Agreement, PEG could connect its equipment to the fiber at each site and thereby use the fiber to transmit data between the sites for the benefit of its customers.[2] Specifically, PEG used the fiber leased pursuant to the Lease Agreement in order to service three CMRS [Commercial Mobile Radio **[**3]** Service] carriers — Verizon Wireless, US Cellular, and AT&T. The term of the Lease Agreement was thirty (30) years.

The Lease Agreement stated that "TEXHOMA FIBER owns and operates a continuous fiber optic network between the points identified in Exhibit A." The Lease Agreement defined the location of the fiber in Exhibit A as the "Texhoma Fiber Route." The Lease Agreement provided for PEG to pay Texhoma Fiber $1.6 million in order to design, engineer, and construct a continuous fiber optic network in the Wichita Falls area that PEG could lease for the purpose of serving its cellular telephone customers.

Initially, the network would consist of 48-count fiber optic cable that connected the cell sites described on Exhibit "A" to the Lease Agreement. As amended, the Lease Agreement gave PEG the exclusive right to use only six of those fibers throughout the network.[3] Therefore, there were 42 fibers in the bundle to which PEG did not have exclusive access, even though it had largely paid for the construction of the network for those additional fibers. In total, PEG paid Texhoma Fiber $2,240,000 for the Texhoma Fiber Route.

In order to protect PEG's interests, the parties agreed that Texhoma **[**4]** Fiber could lease the other 42 fibers to other lessees subject to a non-circumvention provision:

> 18.1 NON-CIRCUMVENTION. TEXHOMA FIBER shall not, directly or indirectly through other customers, offer or provide services to licensed CMRS carriers at the sites contained in Exhibit A, without the prior written consent of PEG. Nothing herein shall restrict TEXHOMA FIBER'S right to provide any services to wireless carriers at sites not contained in Exhibit A.

Lease Agreement, at § 18.1.

This 30-year non-compete obligation restricts Texhoma Fiber from directly or indirectly offering or providing any service to any licensed CMRS carriers at any of the sites located on Texhoma Fiber Route (or any other sites that became subject to the Lease Agreement), without first receiving written consent from PEG. The non-circumvention provision allowed Texhoma Fiber to use the other 42 fibers to service customers other than licensed CMRS carriers, such as local businesses seeking to connect multiple sites. It also permitted Texhoma Fiber to use the other **[*840]** 42 fibers to provide backhaul service to CMRS carriers at locations not subject to the Lease Agreement.

On July 15, 2011, PEG entered into a Master Services Agreement **[**5]** (the "US Cellular Agreement") to provide cellular communication services to United States Cellular Corporation ("US Cellular"). On August 10, 2011,

---

[2] This is a typical arrangement in the telecommunications industry whereby the lessor installs, maintains, and retains title to the fibers but attaches no electronics to the fibers. Instead, at each end of the fibers and at other locations between the end points, the lessee attaches the transmitting and receiving electronic equipment that processes and passes the communications signals over the optical fibers. Typically, as is the case here, the lessor builds a network consisting of a large number of fibers and then leases or otherwise conveys, pursuant to a substantial upfront fee paid prior to and/or contemporaneously with the delivery of the fibers, the exclusive right to use a subset of those fibers to the lessee for the entire anticipated useful life of the fibers.

[3] After negotiations, the parties agreed that Texhoma Fiber would lease two fibers to PEG in the "backbone" of the fiber route, and four fibers in the "lateral" routes.

pursuant to the US Cellular Agreement, US Cellular issued a Market Service Order that authorized PEG to provide cell site backhaul services to US Cellular for five years at fourteen new cell sites in the Texhoma Fiber Route.

Texhoma Fiber ultimately never finalized its purchase of Comcell. Because Texhoma Fiber was using fiber owned by Comcell's subsidiary, Community Telephone, apparently without compensating Comcell, Comcell and Community Telephone eventually threatened to disconnect their fiber from the Texhoma Fiber Route. Then, Comcell and Community Telephone filed suit against both Texhoma Fiber and PEG.

Texhoma Fiber settled with Comcell and Community Telephone in 2014. In the settlement, Texhoma Fiber agreed to pay Comcell and Community Telephone $250,000, to assign to Comcell the Lease Agreement, and to convey to Comcell half the fiber in the route served by the Lease Agreement. PEG was not a party to this settlement. On January 1, 2014, Texhoma Fiber, pursuant to § 18.10 of the Lease Agreement, assigned the Lease Agreement to Comcell ("Comcell **[**6]** Assignment"). The relevant assignment provision reads:

> Texhoma does hereby assign and transfer unto Comcell, effective as of [January 1, 2014], all of Texhoma's benefits, obligations and liabilities under the PEG Bandwidth Contract, to have and hold the same. Subject to the provisions of Section 1(b) below, Comcell hereby accepts such assignment and transfer and therefore agrees to assume all of Texhoma's benefits, obligations and liabilities under the PEG Bandwidth Contract pursuant to the terms of this Assignment.

(Dkt. #36, Exhibit 6).

By letter dated March 12, 2014, Texhoma Fiber, pursuant to § 18.10 of the Lease Agreement, notified PEG about the Comcell Assignment, and directed PEG to send all further payments due under the Lease Agreement to Comcell. The notice letter stated, "Texhoma Fiber, LLC assigned to Comcell Inc., all rights, title and interest in the Dark Fiber Lease Agreement . . . . By this Notice, you are directed to make all future payments due under said Lease and amendments to Comcell, Inc." (Dkt. #37, Exhibit 21). On July 2, 2014, PEG and Comcell agreed to amend the Lease Agreement for a third time to include Comcell as successor in interest to Texhoma Fiber. After the assignment, the **[**7]** fiber optic sheath in the Texhoma Fiber Route contained 24 fibers owned by Texhoma Fiber and 24 fibers owned by Comcell, with Comcell's fibers servicing PEG (Dkt. #37, Exhibit 15).

After the assignment, Texhoma leased certain fiber to Dobson Technologies ("Dobson"), which Dobson has used to provide cellular communication services to US Cellular at some of the US Cellular Sites (Dkt. #39 at p. 7). In 2016, US Cellular did not renew its contract with PEG. US Cellular instead contracted for Dobson Technologies to provide service at the same sites subject to the Lease Agreement in the Wichita Falls area.

On December 1, 2016, PEG filed its amended complaint asserting that Texhoma Fiber breached the Lease Agreement's thirty-year non-compete obligation by leasing fiber to Dobson at some of the US Cellular Sites where PEG formerly provided cell site backhaul services to US Cellular **[*841]** (Dkt. #4). On December 8, 2017, the Texhoma Fiber filed its Motion for Summary Judgment (Dkt. #36). On the same day, PEG filed its Motion for Partial Summary Judgment (Dkt. #37). On December 29, 2017, both parties filed their respective responses (Dkt. #38; Dkt. #39). On January 5, 2018, Texhoma Fiber filed its reply **[**8]** (Dkt. #41). On January 8, 2018, PEG filed its reply (Dkt. #43). On January 8, 2018, PEG filed its sur-reply (Dkt. #44). On January 11, 2018, Texhoma Fiber filed its sur-reply (Dkt. #45).

LEGAL STANDARD

The purpose of summary judgment is to isolate and dispose of factually unsupported claims or defenses. *Celotex Corp. v. Catrett, 477 U.S. 317, 323-24, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986)*. Summary judgment is proper under *Rule 56(a) of the Federal Rules of Civil Procedure* "if the movant shows that there is no genuine dispute as to any material fact and the movant is entitled to judgment as a matter of law." *Fed. R. Civ. P. 56(a)*. A dispute about a material fact is genuine when "the evidence is such that a reasonable jury could return a verdict for the nonmoving party." *Anderson v. Liberty Lobby Inc., 477 U.S. 242, 248, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*. Substantive law identifies which facts are material. *Id.* The trial court "must resolve all reasonable doubts in favor of the party opposing the motion for summary judgment." *Casey Enters., Inc. v. Am. Hardware Mut. Ins. Co., 655 F.2d 598, 602 (5th Cir. 1981)*.

The party seeking summary judgment bears the initial burden of informing the court of its motion and identifying "depositions, documents, electronically stored information, affidavits or declarations, stipulations (including those made for purposes of the motion only), admissions, interrogatory answers, or other materials" that demonstrate the absence of a genuine issue of material fact. *Fed. R. Civ. P. 56(c)(1)(A)*; *Celotex, 477 U.S. at 323*. If the **[**9]** movant bears the burden of proof on a claim or defense for which it is moving for summary judgment, it must come forward with evidence that establishes "beyond peradventure *all* of the essential elements of the claim or defense." *Fontenot v. Upjohn Co., 780 F.2d 1190, 1194 (5th Cir. 1986)*. Where the nonmovant bears the burden of proof, the movant may discharge the burden by showing that there is an absence of evidence to support the nonmovant's case. *Celotex, 477 U.S. at 325*; *Byers v. Dall. Morning News, Inc., 209 F.3d 419, 424 (5th Cir. 2000)*. Once the movant has carried its burden, the nonmovant must "respond to the motion for summary judgment by setting forth particular facts indicating there is a genuine issue for trial." *Byers, 209 F.3d at 424* (citing *Anderson, 477 U.S. at 248-49*). A nonmovant must present affirmative evidence to defeat a properly supported motion for summary judgment. *Anderson, 477 U.S. at 257*. Mere denials of material facts, unsworn allegations, or arguments and assertions in briefs or legal memoranda will not suffice to carry this burden. Rather, the Court requires "significant probative evidence" from the nonmovant to dismiss a request for summary judgment. *In re Mun. Bond Reporting Antitrust Litig., 672 F.2d 436, 440 (5th Cir. 1982)* (quoting *Ferguson v. Nat'l Broad. Co., 584 F.2d 111, 114 (5th Cir. 1978))*. The Court must consider all of the evidence but "refrain from making any credibility determinations or weighing the evidence." *Turner v. Baylor Richardson Med. Ctr., 476 F.3d 337, 343 (5th Cir. 2007)*.

ANALYSIS

I. Breach of Contract

Both parties have moved for summary judgment on the contract **[**10]** issues **[*842]** (Dkt. #36; Dkt. #37). The Court, sitting in diversity, applies Texas law in the interpretation of contracts. *H.E. Butt Grocery Co. v. Nat'l Union Fire Ins. Co. of Pittsburgh, Pa., 150 F.3d 526, 529 (5th Cir. 1998)*. Under Texas law, "[t]he elements of a breach of contract claim are: (1) the existence of a valid contract between plaintiff and defendant; (2) the plaintiff's performance or tender of performance;[4] (3) the defendant's breach of the contract; and (4) the plaintiff's damage as a result of the breach." *In re Staley, 320 S.W.3d 490, 499 (Tex. App.—Dallas 2010, no pet.)*. PEG claims that it can establish each element. Texhoma Fiber argues that the non-circumvention provision is invalid because it is overly broad, and that even if the covenant is valid, it did not breach the terms. The Court will address each argument in turn.

Section 18.1 of the Lease Agreement disallows Texhoma Fiber from, directly or indirectly through other customers, offering or providing services to licensed CMRS carriers at the sites contained in Exhibit A, without the prior written consent of PEG. It is undisputed that Texhoma Fiber, indirectly through its customer Dobson, has since 2016 provided service to US Cellular at sites listed in Exhibit A to the Lease Agreement, as amended (Dkt. #39 at ¶ 18). Thus, Texhoma Fiber would **[**11]** seem to be in breach of the Lease Agreement.

---

[4] In its Response to PEG's Motion for Partial Summary Judgment, Texhoma fiber asserts that "PEG committed a prior breach of the [Lease Agreement] which excused Texhoma from continuing to perform." (Dkt. #39 at p. 20). "[T]he contention that a party to a contract is excused from performance because of a prior material breach by the other contracting party is an affirmative defense that must be affirmatively pleaded." *Pivotal Payments, Inc. v. Taking You Forward LLC, No. 4:16CV-00598, 2017 U.S. Dist. LEXIS 29411, 2017 WL 834980, at *3 (E.D. Tex. Mar. 1, 2017)* (quoting *Compass Bank v. MFP Fin. Servs., Inc., 152 S.W.3d 844, 852 (Tex. App.—Dallas 2005, pet. denied))* (citing *RE/MAX of Tex., Inc. v. Katar Corp., 961 S.W.2d 324, 327 (Tex. App.-Houston [1st Dist.] 1997, pet. denied)* (citing *Tex. R. Civ. P. 94*)). *See* *Mullins v. TestAmerica, Inc., 564 F.3d 386, 411 (5th Cir. 2009)*. Here, Texhoma Fiber failed to affirmatively plead such defense. Thus, this affirmative defense is waived.

However, Texhoma Fiber argues that it assigned to Comcell all of its "benefits, obligations and liabilities" under the Lease Agreement. It further argues that the Lease Agreement does not limit the rights or obligations it can assign under the Lease Agreement, but simply requires it to provide notice to PEG of the assignment pursuant to § 18.10. Thus, the assignment did not exclude any of Texhoma Fiber's obligations under the Lease Agreement, and therefore, included the thirty-year non-circumvention obligation. Texhoma Fiber further claims that it conveyed to Comcell all of the fibers in the Wichita Falls Network that PEG had an exclusive right to use.

PEG claims that Texhoma Fiber's notice was incomplete. PEG asserts that Texhoma Fiber notified PEG only that it had "assigned to Comcell, Inc., all *rights, title, and interest*" in the Lease Agreement. Further, PEG asserts that the notice specifically addresses only payments due from PEG, which are to be directed to Comcell, instead of Texhoma Fiber, going forward. Thus, PEG claims that Texhoma Fiber did not notify PEG Bandwidth about assignment of any "obligations," such as the non-circumvention obligation. **[**12]**

PEG further claims that Texhoma Fiber's notice was false because Texhoma Fiber had not assigned *all* rights, title, and interest to Comcell. Rather, Texhoma Fiber had retained its rights, title, and interest in *half* of the fiber which is the subject matter of the Lease Agreement. The Settlement Agreement with Comcell required Texhoma Fiber to execute a Bill of Sale, in **[*843]** which Texhoma Fiber conveyed only half of its interest in the Texhoma Fiber Route. As a result, at most locations in the Texhoma Fiber Route, the fiber optic sheath contained twenty-four fibers owned by Texhoma Fiber and twenty-four fibers owned by Comcell, with Comcell's fibers servicing PEG Bandwidth.

PEG further argues that § 18.10 does not permit an assignment of all obligations, including the non-circumvention provision, but only part of the rights. According to PEG, in order to avoid the non-circumvention obligation with respect to its retained fibers, Texhoma Fiber has to prove a novation with respect to that obligation and asserts Texhoma Fiber has not presented any evidence showing PEG agreed to extinguish the non-circumvention obligation with respect to half of the fibers. PEG further argues Texhoma Fiber cannot point **[**13]** to any authority allowing it to destroy a contractual obligation by purporting to assign the obligation while keeping the contractual rights or property to which that obligation pertains.

The Court need not address whether Texhoma Fiber's notice of the assignment was sufficient because it finds that the Lease Agreement does not extinguish Texhoma Fiber's non-circumvention obligation through an assignment.

In *Seagull Energy E&P, Inc. v. Eland Energy, Inc.*, the Texas Supreme Court held that an assignment relieves a party of its obligations only if it effects a novation. *207 S.W.3d 342, 346 (Tex. 2006)*. The Texas Supreme Court looked to the *Restatement (Second) of Contracts*, which states:

> An obligor is discharged by the substitution of a new obligor only if the contract so provides or if the obligee makes a binding manifestation of assent, *forming a novation*. . . . Otherwise, the obligee retains his original right against the obligor, even though the obligor manifests an intention to substitute another obligor in his place and the other purports to assume the duty.

RESTATEMENT (SECOND) OF CONTRACTS § 318, cmt. d. (emphasis added).

> *A duty cannot be "assigned" in the sense in which "assignment" is used in this Chapter*. The parties to an assignment, however, may not distinguish **[**14]** between assignment of rights and delegation of duties. A purported "assignment" of duties may simply manifest an intention that the assignee shall be substituted for the assignor. *Such an intention is not completely effective unless the obligor of the assigned right joins in a novation*, but the rules of this Section give as full effect as can be given without the obligor's assent.

RESTATEMENT (SECOND) OF CONTRACTS § 328, cmt. a. (emphasis added). *See* *Seagull Energy, 207 S.W.3d at 346-47*.

"A party raising the defense of novation must prove (1) the validity of a previous obligation; (2) an agreement among all parties to accept a new contract; (3) the extinguishment of the previous obligation; and (4) the validity of the new agreement. . . . It must clearly appear that the parties intended a novation, and novation is never presumed." *Fulcrum Central v. AutoTester, Inc., 102 S.W.3d 274, 277-78 (Tex. App.—Dallas 2013, no pet.)*.

Texhoma Fiber has failed to come forth with any evidence of novation and concedes that a party to a contract generally cannot escape its contractual obligations merely by assigning the contract to a third party (Dkt. #36 at p. 8). However, Texhoma Fiber contends that the operative language of the Lease Agreement, specifically Section 18.10, expressly and unambiguously permits Texhoma Fiber to assign all its contractual obligations, including the non-circumvention **[**15]** obligation (Dkt. #36 at p. 9).

[*844] "An unambiguous contract must be interpreted by the court as a matter of law." *Id.* (citing *SAS Institute, Inc. v. Breitenfeld, 167 S.W.3d 840, 841 (Tex. 2005))*. If a contract "is worded so that a court can give it a certain or definite legal meaning or interpretation, it is not ambiguous." *Id.* When a contract is unambiguous, extrinsic evidence "will not be received for the purpose of creating an ambiguity or to give the contract a meaning different from that which its language imports.'" *Skyland Developers, Inc. v. Sky Harbor Assocs., 586 S.W.2d 564, 568 (Tex. App—Corpus Christi 1979, no writ)* (quoting *Universal C.I.T. Credit Corp. v. Daniel, 150 Tex. 513, 243 S.W.2d 154, 157 (Tex. 1951))*. The court must enforce the unambiguous language in a contract as written, and the applicable standard is the "objective intent" evidenced by the language used, rather than the subjective intent of the parties. *See* *Sun Oil Co. v. Madeley, 626 S.W.2d 726, 731-32 (Tex. 1981)*.

Contract terms "are given their plain, ordinary, and generally accepted meanings unless the contract itself shows them to be used in a technical or different sense." *Valence Operating Co. v. Dorsett, 164 S.W.3d 656, 662 (Tex. 2005)*. The Court's primary concern is to enforce the parties' intent as expressed in the contract. *Sundaram, 2008 U.S. Dist. LEXIS 863, 2008 WL 80017 at *9*. When construing a contract, the intention of the parties is to be gathered from the instrument as a whole. *See* *Seagull Energy, 207 S.W.3d at 345*; *SAS Institute, 167 S.W.3d at 841*. The "court is bound to read all parts of a contract together to ascertain the agreement of the parties." *Forbau v. Aetna Life Ins. Co., 876 S.W.2d 132, 133 (Tex. 1994)*. "No single provision taken alone will **[**16]** be given controlling effect; rather, all the provisions must be considered with reference to the whole instrument." *SAS Institute, Inc., 167 S.W.3d at 841*.

The assignment provision reads:

> PEG shall not assign this Agreement in whole or in part, nor sublet the Leased Fibers, without the prior written consent of TEXHOMA FIBER, which TEXHOMA FIBER may withhold in its sole discretion. Provided, PEG may assign this Agreement in whole or in part to an affiliate, subsidiary or parent company of PEG or pursuant to a merger, stock sale or sale or exchange of substantially all of the assets of PEG or any of its affiliates, subsidiaries or parent companies with prior notice to TEXHOMA FIBER. TEXHOMA FIBER may, without PEG's consent, but with notice to PEG, assign its rights and obligations hereunder to any entity, or to any affiliate of TEXHOMA FIBER or pursuant to a merger, stock sale or sale or exchange of substantially all the assets of TEXHOMA FIBER. This Agreement binds and inures to the benefit of any permitted assignees or successors to the parties.

Lease Agreement, at § 18.10.

Neither party disputes that the Lease Agreement is unambiguous. Furthermore, a plain reading of the Lease Agreement leads the Court to the conclusion that the **[**17]** contract is unambiguous and the Court, therefore, will interpret its meaning as a question of law. The Court finds that an assignment pursuant to § 18.10 of the Lease Agreement is not a valid release of Texhoma Fiber's liabilities and responsibilities.

"Generally speaking, a party cannot escape its obligations under a contract merely by assigning the contract to a third party." *Seagull Energy, 207 S.W.3d at 346-47* (citations omitted). "Thus, as a general rule, a party who assigns its contractual rights and duties to a third party **[*845]** remains liable unless expressly or impliedly released by the other party to the contract." *Id. at 347* (citations omitted). In *Seagull Energy*, the operator sought the reimbursement of costs incurred after the assignor assigned its interests to the assignee. The operating agreement in *Seagull Energy* included a provision entitled "Assignment of Interest." It states:

> Each Participating Party desiring to abandon a well pursuant to Section 14.2 shall assign effective as of the last applicable election date, to the non-abandoning Parties, in proportion to their Participating Interests, its interests in such well and the equipment therein and its ownership in the production from such well. Any party so assigning *shall be relieved* ***[**18]*** *from any further liability* with respect to said well.

Id. (emphasis in original). The Texas Supreme Court found that "[t]he operating agreement simply does not explain the consequences of an assignment of a working interest to a third party." *Id. at 346*. "[T]he operating agreement did not expressly provide that Eland's obligations under the operating agreement should terminate upon assignment and Seagull did not expressly release Eland following the assignment of its working interest." *Id. at 347*.

Accordingly, the Court reaches the same conclusion in this case. Section 18.10 of the Lease Agreement did not expressly provide that Texhoma Fiber's obligations under the agreement should terminate upon assignment; thus, Texhoma Fiber was not expressly released from its non-circumvention obligation following the assignment to Comcell.

When a court finds that there is no express release in an assignment, "the contract's subject or other circumstances may indicate that obligations were not intended to survive assignment." *Id.* The Court does not find that the Lease Agreement's subject or any other circumstances imply that Texhoma Fiber should be released from its non-circumvention obligation after it assigned its interests to **[**19]** Comcell. Section 18.8 of the Lease Agreement provides that "[n]o subsequent agreement concerning the Route shall be effective unless made in writing and executed by authorized representatives of the parties." There is no written, executed agreement releasing half of the fibers in the Texhoma Fiber Route from the non-circumvention obligation. Furthermore, the purpose of the non-circumvention provisions was to prevent Texhoma Fiber from providing cell site backhaul service to PEG's competitors at the sites subject to the Lease Agreement using the network paid for by PEG. To allow Texhoma Fiber to assign its non-circumvention obligation, retain half of the fibers subject to the Lease Agreement, and then subsequently lease those fibers to one of PEG's competitors would directly contradict that purpose. Therefore, the Court finds that Texhoma Fiber has a continuing obligation to not, directly or indirectly through other customers, offer or provide services to licensed CMRS carriers at the sites contained in Exhibit A to the Lease Agreement. Thus, the Court finds granting summary judgment in Texhoma Fiber's favor is unwarranted.

II. Texas Free Enterprise and Antitrust Act, and Texas Covenants Not to [**20] Compete Act

Texhoma Fiber asserts that § 18.1 of the Lease Agreement, the non-circumvention provision, is an unlawful, unreasonable, and unenforceable restraint of trade in violation of the *Texas Free Enterprise and Antitrust Act, Tex. Bus. & Com. Code § 15.01, et seq.*, and the *Texas Covenants Not to Compete Act, Tex. Bus. & Com. Code § 15.50, et seq.* The thirty-year non-compete obligation reads:

> **[*846]** TEXHOMA FIBER shall not, directly or indirectly through other customers, offer or provide services to licensed CMRS carriers at the sites contained in Exhibit A, without the prior written consent of PEG. Nothing herein shall restrict TEXHOMA FIBER'S right to provide any services to wireless carriers at sites not contained in Exhibit A.

Lease Agreement, at § 18.1.

Texhoma Fiber asserts that the Texas Covenants Not to Compete Act "supplements and clarifies" the Texas Free Enterprise and Antitrust Act's "broad proscription against trade restraints by establishing specific standards for covenants not to compete." (Dkt. #39 at p. 22). Texhoma Fiber further asserts that

> the general rule of reason [under the Texas Free Enterprise and Antitrust Act] does not apply to the noncompete obligation at issue in this case. Texhoma does not dispute that the Texas Free Enterprise and Antitrust Act **[**21]** is patterned off federal antitrust statutes or that the rule of reason standard that governs most restraints of trade under federal ***antitrust law*** also generally applies to contracts in restraint of trade under Texas law.

(Dkt. #39 at p. 23). Thus, the Court finds Texhoma Fiber has abandoned its affirmative defense under Texas Free Enterprise and Antitrust Act and exclusively relies on the Texas Covenants Not to Compete Act to invalidate the non-circumvention provision.

PEG asserts that the Covenants Not to Compete Act does not apply to the Lease Agreement because it applies exclusively to employment contracts, not commercial contracts (Dkt. #37 at pp. 20-22). The Court disagrees with

PEG's argument but finds the Texas Covenants Not to Compete Act is still inapplicable to the Lease Agreement because the non-circumvention provision is a restrictive covenant running with the land, i.e. the Texhoma Fiber Route, and should be analyzed as such.

Although not legally binding, the Court finds the analysis in *Rolling Lands Investments, L.C. v. Northwest Airport Management, L.P.* persuasive. *111 S.W.3d 187 (Tex. App.—Texarkana 2003, pet. denied)*. In that case, the court rejected a challenge under the Texas Covenants Not to Compete Act to a deed restriction **[**22]** associated with a sale of real property which prevented competition with a neighboring airport. *Id. at 200*. The court held that "[t]he fueling rights restriction [was] a restraint on the use of a single parcel of real property and thus should not be reviewed as a noncompetition contract." *Id.* Similar to the fueling rights restriction in *Rolling Lands*, the non-circumvention agreement is a restraint on the use of fiber optic cables at the specific locations in the Texhoma Fiber Route. Texhoma Fiber asserts that

> Section 18.1 of the [Lease Agreement] does not provide that Texhoma is prohibited from using the fibers in the Texhoma Fiber Route to compete with PEG for certain business at certain locations; it broadly provides that Texhoma is prohibited from offering or providing services to Cell Phone Companies at the sites covered by the [Lease Agreement] by any means whatsoever.

(Dkt. #39 at p. 11). The distinction is unavailing. The non-circumvention provision prevents Texhoma "from using the fibers in the Texhoma Fiber Route . . . [to offer or provide] services to Cell Phone Companies at the sites covered by the Lease Agreement by any means whatsoever." (Dkt. #39 at p. 11).

The noncompete agreements in the cases **[**23]** cited by Texhoma Fiber are also distinguishable because they specifically prohibit certain competitive conduct, not necessarily limit the use of the specific **[*847]** land (or in this case, fibers). *See* *CBIF Ltd. P'ship v. TGI Friday's Inc., No. 05-15-00157-CV, 2017 Tex. App. LEXIS 3605, 2017 WL 1455407, at *7 (Tex. App.—Dallas Apr. 21, 2017)* (analyzing a restrictive covenant providing the venture partners would not participate in other restaurant operations at the Airport, and a restrictive covenant concerning the ownership or operations of restaurants in direct competition with TGI Friday's); *Butts Retail, Inc. v. Diversifoods, Inc., 840 S.W.2d 770, 772 (Tex. App.—Beaumont 1992)*, *writ denied* (Apr. 21, 1993) (analyzing two restrictive covenants: (1) that if prior to the expiration of the franchise agreement, Appellee terminated the franchise agreement, Appellant was prohibited from operating a business selling fruit and nuts in Parkdale Mall for a period of two years from the date which Appellant ceased to conduct business pursuant to this agreement, and (2) that during the five-year term of the franchise agreement, Appellant would not operate another business selling fruit and nuts within the metropolitan area of the Parkdale Mall store in Beaumont, Texas). Those restrictive covenants prohibit competitive conduct within a specified geographical area, not necessarily prohibit the **[**24]** use of specific land. *See* *Ehler v. B.T. Suppenas Ltd., 74 S.W.3d 515, 520-21 (Tex. App.—Amarillo 2002, no pet.)*.

The Court now analyzes whether the non-circumvention provision is a valid restrictive covenant running with the land.[5] "A real covenant 'runs with land' if:(1) it touches and concerns the land; (2) it relates to a thing in existence or specifically binds the parties and their assigns; (3) it is intended by the original parties to run with the land; and (4) when the successor to the burden has notice." *Cummings v. Williams Prod.-Gulf Coast Co., L.P., No. 4:06CV11, 2007 U.S. Dist. LEXIS 3669, 2007 WL 172536, at *4 (E.D. Tex. Jan. 18, 2007)* (citing *Inwood North Homeowners' Ass'n, Inc. v. Harris, 736 S.W.2d 632, 635 (Tex. 1987)*. The Lease Agreement specifically provides that it is binding on the successors and assigns of Texhoma Fiber. Lease Agreement, at § 18.10 (the Lease Agreement "binds and inures to the benefit of any permitted assignees or successors to the parties."). The land is specifically identified. The agreement is to build a fiber optic cable network to service licensed CMRS carriers at the sites located in the

---

[5] In its sur-reply, Texhoma Fiber asserts that "the fibers leased by PEG under the [Lease Agreement], and the remaining fibers in the Texhoma Fiber Route, are all personal property, not real property" and , thus, "the non-compete obligation cannot 'run with the fiber.'" (Dkt. #45 at p. 4). The Court disagrees. *See* *In re Energytec, Inc., 739 F.3d 215, 221 (5th Cir. 2013)* (finding "[t]he real property at issue . . . is a gas pipeline system and the rights-of-way required for its placement" constituted covenants running with the land including the right to transportation fees—because the traveling of natural gas along the length of the pipeline was for the use of the real property—and the right to consent to the assignment of the pipeline—because the rights impact the owner's interest in the pipeline).

Texhoma Fiber Route. There is also privity between the parties. The Court finds that the non-circumvention provision is a valid restrictive covenant that "runs with the fibers" and is binding on Texhoma Fiber. As such, summary judgment is PEG's favor is warranted.

III. Declaratory Relief

Both parties **[**25]** also move for summary judgment on PEG's claim for declaratory relief. PEG specifically seeks a declaration that "Texhoma Fiber has a continuing duty, extending for thirty years from the date of acceptance, for each site listed in the [Lease Agreement] or its amendments, not to directly or through other customers, offer or provide services to licensed CMRS carriers, without prior written consent of **[*848]** PEG Bandwidth." (Dkt. #37 at p. 37) (quotations omitted).

The federal Declaratory Judgment Act states, "[i]n a case of actual controversy within its jurisdiction, . . . any court of the United States, upon the filing of an appropriate pleading, may declare the rights and other legal relations of any interested party seeking such declaration, whether or not further relief is or could be sought." *28 U.S.C. § 2201*. Federal courts have broad discretion to grant or refuse declaratory judgment. *Torch, Inc. v. LeBlanc, 947 F.2d 193, 194 (5th Cir. 1991)*. "Since its inception, the *Declaratory Judgment Act* has been understood to confer on federal courts unique and substantial discretion in deciding whether to declare the rights of litigants." *Wilton v. Seven Falls Co., 515 U.S. 277, 286, 115 S. Ct. 2137, 132 L. Ed. 2d 214 (1995)*. The Declaratory Judgment Act is "an authorization, not a command." *Public Affairs Assocs., Inc. v. Rickover, 369 U.S. 111, 112, 82 S. Ct. 580, 7 L. Ed. 2d 604 (1962)*. It gives federal courts the competence to declare rights, but **[**26]** does not impose a duty to do so. *Id.*

The Court finds that PEG's motion for summary judgment on its claim for declaratory relief should be granted and Texhoma Fiber is bound by the non-circumvention obligation until the expiration of the thirty-year Lease Agreement.

IV. Attorneys' Fees

Texhoma Fiber also moves for summary judgment on PEG's request for attorneys' fees, asserting that the Lease Agreement does not permit PEG to recover attorneys' fees and *Section 38.001 of the Texas Civil Practice and Remedies Code* restricts the proper target of reasonable attorneys' fees to an "individual" or a "corporation," but not other legal entities, such as limited liability companies. *Tex. Civ. Prac. & Rem. Code § 38.001(8)*. PEG concedes that "[a]s of now, the Texas Legislature still has not fixed the hole created by case law construing Texas statutory law so as not to allow recovery of attorney fees from a limited liability company in a breach of contract action." (Dkt. #38 at p. 5) (citing *See* *Vast Construction, LLC v. CTC Contractors, LLC, 526 S.W.3d 709, 728 n.16 (Tex. App.—Houston [14th Dist.] 2017, no pet. h.))*. Both PEG and Texhoma Fiber are limited liability companies and such a request for attorneys' fees is misplaced and PEG's claim for attorneys' fees should be dismissed. Summary judgment should be granted on this claim.

CONCLUSION

It is therefore **ORDERED** that Plaintiff's Motion for Partial Summary Judgment **[**27]** (Dkt. #37) is hereby **GRANTED** and the Court declares that Defendant is bound by the non-circumvention obligation until the expiration of the thirty-year Lease Agreement. Therefore, no material questions of fact exist with regard to whether Defendant is liable to Plaintiff for breach of the Lease Agreement. The only remaining issue to be decided by the trier of fact is the amount of damages.

It is further **ORDERED** that Defendant's Motion for Summary Judgment (Dkt. #36) is **GRANTED** in part and **DENIED** in part. Defendant's motion is granted only as to Plaintiff's claim for attorneys' fees and Plaintiff's claim for attorneys' fees is hereby dismissed.

IT IS SO ORDERED.

SIGNED this 7th day of March, 2018.

/s/ Amos L. Mazzant

AMOS L. MAZZANT

UNITED STATES DISTRICT JUDGE

Inline Packaging, LLC v. Graphic Packaging Int'l, LLC

United States District Court for the District of Minnesota

March 8, 2018, Decided; March 8, 2018, Filed

Court File No. 15-cv-3183 (ADM/LIB)

Reporter
2018 U.S. Dist. LEXIS 74102 *; 2018 WL 9919941

Inline Packaging, LLC, Plaintiff, v. Graphic Packaging International, LLC, Defendant.

Prior History: *Inline Packaging, LLC v. Graphic Packaging Int'l, Inc., 164 F. Supp. 3d 1117, 2016 U.S. Dist. LEXIS 22342, 2016 WL 727112 (D. Minn., Feb. 23, 2016)*

LexisNexis® Headnotes

Civil Procedure > Pleading & Practice > Pleadings > Amendment of Pleadings

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

HN1[] **Pleadings, Amendment of Pleadings**

Fed. R. Civ. P. 15(a)(2) provides that a party may amend its pleading only with the opposing party's consent or the court's leave. The court should freely give leave when justice so requires. *Rule 15(a)(2)*. Although *Rule 15* favors liberal allowance of amendment, it does not mean that the right to amend is absolute.

Civil Procedure > Remedies > Damages > Punitive Damages

HN2[] **Damages, Punitive Damages**

Minn. Stat. § 549.20, subd. 1(a) allows punitive damages in civil actions only upon clear and convincing evidence that the acts of the defendant show deliberate disregard for the rights or safety of others.

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > Erie Doctrine

Governments > Courts > Rule Application & Interpretation

HN3[] Federal & State Interrelationships, Erie Doctrine

The Erie Doctrine prohibits Congress from declaring substantive rules of common law applicable in a state. Except in matters governed by the Federal Constitution or by Acts of Congress, the law to be applied in any diversity jurisdiction case is the law of the State. Congress has enacted the *Rules Enabling Act*, which gives the United States Supreme Court the power to prescribe, by general rules, the practice and procedure in civil actions at law as long as such rules neither abridge, enlarge, nor modify the substantive rights of any litigant.

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

HN4[] Amendment of Pleadings, Leave of Court

The grant or denial of an opportunity to amend under *Fed. R. Civ. P. 15(a)* is within the discretion of the District Court, although outright refusal to grant the leave without any justifying reason appearing for the denial is not an exercise of discretion. Unlike *Fed. R. Civ. P. 23*, which vests discretion in the plaintiff and not the Court, *Rule 15* vests discretion in the Court to determine whether justice requires allowing the amendment sought by the moving party.

Civil Procedure > Pleading & Practice > Pleadings > Amendment of Pleadings

HN5[] Pleadings, Amendment of Pleadings

There is no direct conflict between *Fed. R. Civ. P. 15(a)* and *Minn. Stat. § 549.191*. The discretion allowed a Federal Court under *Rule 15(a)* does not preclude or even conflict with the consideration of whether a party has also complied with *§ 549.191*.

Civil Procedure > Remedies > Damages > Punitive Damages

Evidence > Burdens of Proof > Clear & Convincing Proof

HN6[] Damages, Punitive Damages

Minn. Stat. § 549.20, subd. 1(a), allows punitive damages in civil actions only upon clear and convincing evidence that the acts of the defendant show deliberate disregard for the rights or safety of others. The clear-and convincing standard is satisfied when the evidence is sufficient to permit the jury to conclude that it is highly probable that the defendant acted with deliberate disregard to the rights or safety of others.

Civil Procedure > Remedies > Damages > Punitive Damages

HN7[] Damages, Punitive Damages

Of essence in determining vicarious punitive damages is the role of the employee or agent, who must be a managerial employee vested with authority to make policy and planning level decisions for the principal in order for the punitive damages to properly be awarded against the principal.

Civil Procedure > Pleading & Practice > Pleadings > Amendment of Pleadings

Civil Procedure > Remedies > Damages > Punitive Damages

HN8[] **Pleadings, Amendment of Pleadings**

In order to show entitlement to plead punitive damages, a mere showing of negligence is not sufficient; instead, the conduct must be done with malicious, willful, or reckless disregard for the rights of others. Because a prima facie showing is one that prevails in the absence of evidence invalidating it, the court reviews the evidence in support of a motion to amend as the court would review a motion for judgment as a matter of law under the Federal Rules of Civil Procedure. In other words, in reaching the determination whether the plaintiff has established a prima facie case for punitive damages, the court makes no credibility rulings and does not consider any challenge, by cross-examination or otherwise, to the plaintiff's proof, but the court must carefully scrutinize the evidence presented by the moving party to make sure that it amounts to a prima facie showing that the substantive requirements for punitive damages have been met.

Civil Procedure > Pleading & Practice > Pleadings > Amendment of Pleadings

Civil Procedure > Remedies > Damages > Punitive Damages

HN9[] **Pleadings, Amendment of Pleadings**

A plaintiff is not required to demonstrate an entitlement to punitive damages per se, but only an entitlement to allege such damages. However, the court is to scrutinize the record to assure the required showing has been met, and it must do more than to merely "rubber stamp" the movant's allegations.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Civil Procedure > Remedies > Damages > Punitive Damages

HN10[] **Remedies, Damages**

Punitive damages beyond the statutory trebled damages cannot be awarded for an antitrust violation because to do so would at the very least become duplication.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Civil Procedure > Remedies > Damages > Punitive Damages

HN11[] **Remedies, Damages**

Under the law of Minnesota, antitrust claims brought under Minnesota state law may not also lead to an award of punitive damages.

Civil Procedure > Remedies > Damages > Punitive Damages

Torts > ... > Prospective Advantage > Intentional Interference > Remedies

HN12[] **Damages, Punitive Damages**

Interference with prospective contractual relations may support a claim for punitive damages.

Civil Procedure > Pleading & Practice > Pleadings > Amendment of Pleadings

Civil Procedure > Remedies > Damages > Punitive Damages

HN13[] **Pleadings, Amendment of Pleadings**

Where there is nothing more than argument dressed up as factual averment, an affidavit submitted in support of a motion to amend a complaint to assert punitive damages adds nothing to the prima facie showing required to succeed on such a motion.

Civil Procedure > Pleading & Practice > Pleadings > Amendment of Pleadings

Civil Procedure > Remedies > Damages > Punitive Damages

HN14[] **Pleadings, Amendment of Pleadings**

In considering a motion to amend the complaint to assert punitive damages, a court is entitled to look at the record as a whole—not to search for rebuttal or impeachment evidence, but to ensure that the evidence is presented in its proper context.

Judges: Leo I. Brisbois, UNITED STATES MAGISTRATE JUDGE.

Opinion by: Leo I. Brisbois

Opinion

ORDER

This matter came before the undersigned United States Magistrate Judge pursuant to a general assignment made in accordance with the provisions of *28 U.S.C. § 636(b)(1)(A)*, and upon Plaintiff Inline Packaging, LLC's Motion to Amend to Plead Punitive Damages, [Docket No. 504]. Plaintiff moves the Court for leave to further amend its Complaint, [Docket No. 1], to plead punitive damages on Counts I, II, and IV. (See, Motion, [Docket No. 504], 1). The Court held a Motion Hearing on January 30, 2018, and took Plaintiff's Motion under advisement as of that date. (Minute Entry, [Docket No. 513]). For the reasons discussed below, the Court **DENIES** Plaintiff's Motion to Amend to Plead Punitive Damages, [Docket No. 504].

I. BACKGROUND AND STATEMENT OF RELEVANT FACTS

The parties—and the Court—are familiar with the facts underlying this action. Therefore, only facts relevant to the Motion to Amend to Plead Punitive Damages presently before the Court will be set forth herein.

Plaintiff Inline Packaging, LLC ("Inline") and Defendant Graphic Packaging International, Inc. ("Graphic") compete in the microwave susceptor food packaging market; primarily with **[*3]** respect to microwave susceptor food packaging that crisps and browns the food product. (Order, [Docket No. 505], 1). In the present action, Inline brought claims against Graphic alleging tortious interference with prospective business relations; tortious interference with existing contractual relations; misappropriation of trade secrets; maintenance or misuse of monopoly power; and violations of *section 2 of the Sherman Act*, based upon assertions that Graphic engaged in predatory discount bundling, sham litigation, and misappropriation of intellectual property. (Id. at 1-2).

On April 6, 2017, the Court issued an Amended Pretrial Scheduling Order. [Docket No. 199]. On January 17, 2018, Inline timely filed the present Motion to Amend to Plead Punitive Damages. [Docket No. 504]. Inline seeks to amend its Complaint to plead punitive damages on three of its claims: Counts I and II, which are its Minnesota state law tortious interference with prospective business and existing contractual relationships claims, and Count IV, which is its Minnesota state law based antitrust claim. (See, Mem. in Supp., [Docket No. 381], 1). Additional facts, including a detailed description of the evidence Inline cites in support **[*4]** of its present Motion, are addressed in the Analysis section below.

On January 23, 2018, Graphic filed its Memorandum in Opposition to the present Motion to Amend to Plead Punitive Damages. [Docket No. 506]. Graphic argues that, as a matter of law, punitive damages are unavailable for Inline's Minnesota state law based antitrust claim. (Id. at 2). Graphic also contends that Inline's Motion must be denied because it fails to meet its burden to show that Graphic acted with a deliberate disregard for Inline's rights.[1] (Id.).

II. PLAINTIFF'S MOTION TO AMEND TO PLEAD PUNITIVE DAMAGES, [DOCKET NO. 504]

A. Standard of Review

HN1[] *Rule 15(a)(2)* provides: "[A] party may amend its pleading only with the opposing party's consent or the court's leave. The court should freely give leave when justice so requires." *Fed. R. Civ. P. 15(a)(2)*. Although *Rule*

---

[1] Graphic additionally contends that the Court should deny the present Motion to Amend to Plead Punitive Damages because "Inline fails to present sufficient evidence to establish a prima facie case of tortious interference with contract or prospective economic advantage . . . ." (Mem. in Opp., [Docket No. 506], 2). However, "when deciding whether punitive damages are available, courts do not need to examine the merits of the underlying claims or determine whether they were properly pleaded. Those questions are best considered in the context of dispositive motions." See, *Coy v. No Limits Education, No. 15-cv-93 (BRT), 2016 U.S. Dist. LEXIS 193954, 2016 WL 7888047, *2 (D. Minn. April 1, 2016)*. Therefore, the Court does not further address Graphic's arguments which are based upon a challenge to the sufficiency of the merits of the underlying claims in this case.

15 "'favor[s] liberal allowance of amendment,'" it "'does not mean that the right to amend is absolute.'" Kozlov v. Assoc. Wholesale Grocers, Inc., 818 F.3d 380, 394 (8th Cir. 2016) (quoting Thompson-El v. Jones, 876 F.2d 66, 67 (8th Cir. 1989)).

On the other hand, Minnesota Statute § 549.191 provides:

> After filing the suit a party may make a motion to amend the pleadings to claim punitive damages. The motion must allege the applicable legal basis under section 549.20 or other law for awarding punitive damages in the action and must be accompanied **[*5]** by one or more affidavits showing the factual basis for the claim. At the hearing on the motion, if the court finds prima facie evidence in support of the motion, the court shall grant the moving party permission to amend the pleadings to claim punitive damages.

HN2[] Minnesota Statute § 549.20, Subd. 1(a), allows punitive damages in civil actions "only upon clear and convincing evidence that the acts of the defendant show deliberate disregard for the rights or safety of others."

As an initial matter, Inline argues that in determining whether it is allowed to plead punitive damages, this Court should apply the more liberal standard for amending a complaint which is set forth in Federal Rule of Civil Procedure 15 rather than the stricter standard set forth in Minnesota Statutes §§ 549.191; 549.20, Subd. 1(a). (Mem in Supp., [Docket No. 381], 4 n.2; Jan. 30, 2018, Motion Hearing, Digital Record, 1:31-36). In support, Inline cites In re Bair Hugger Forced Air Warming Devices Products Liability Litigation, No. 15-cv-2666 (JNE/FLN), 2017 U.S. Dist. LEXIS 193938, 2017 WL 5187832 (D. Minn. July 27, 2017) ("In re Bair Hugger"), aff'd on other grounds on Oct. 19, 2017. (Mem. in Supp., [Docket No. 381], 4 n.2; Jan. 30, 2018, Motion Hearing, Digital Record, 1:31-36). To fully appreciate In re Bair Hugger, however, the Court must first examine the United States Supreme Court's preceding **[*6]** decision in Shady Grove Orthopedic Associates, P.A. v. Allstate Insurance Co., 559 U.S. 393, 130 S. Ct. 1431, 176 L. Ed. 2d 311 (2010) ("Shady Grove"), upon which the relevant holding in In re Bair Hugger was based. See, In re Bair Hugger, 2017 U.S. Dist. LEXIS 193938, 2017 WL 5187832, at *1.

Shady Grove was a putative class action suit filed in the United States District Court for the Eastern District of New York on behalf of plaintiffs to whom Allstate Insurance Company allegedly owed statutory interest on benefits which had been paid after a statutory deadline for payment. 559 U.S. at 397. The United States District Court for the Eastern District of New York dismissed the case for lack of jurisdiction on the grounds that N.Y. Civ. Prac. Law Ann. § 901(b), "which precludes a suit to recover a 'penalty' from proceeding as a class action," applies in cases brought in Federal Court under diversity jurisdiction, and the statutory interest sought was a "penalty." Id. The Court of Appeals for the Second Circuit affirmed, holding that Federal Rule of Civil Procedure 23, which states that "'[a] class action may be maintained'" if two specifically enumerated conditions are met (both of which were met in Shady Grove), did not conflict with N.Y. Civ. Prac. Law Ann. § 901(b). Id. at 398. The Second Circuit further held that because there was no federal rule addressing the legitimacy of class action suits seeking to recover a penalty and the New York state **[*7]** law was substantive, the New York state law applied in diversity cases such as Shady Grove and prohibited the class action suit initiated therein. Id.

On review, the United States Supreme Court reversed, holding that Rule 23 does directly conflict with N.Y. Civ. Prac. Law Ann. § 901(b) because Rule 23 "empowers a federal court 'to certify a class in each and every case where the Rule's criteria are met'" and, in fact, Federal Courts must do so; Federal Courts do not have the discretion to decline to certify a class if Rule 23's requirements are satisfied. Id. at 399-400. Therefore, the New York state law, which would prohibit a class action seeking a penalty even if Rule 23's requirements are met, directly conflicted with Rule 23. Id.

HN3[] The Erie Doctrine prohibits Congress from "declar[ing] substantive rules of common law applicable in a state." See, Erie R. Co. v. Tompkins, 304 U.S. 64, 78, 58 S. Ct. 817, 82 L. Ed. 1188 (1938). "Except in matters governed by the Federal Constitution or by Acts of Congress, the law to be applied in any [diversity jurisdiction] case is the law of the State." Id. at 78. Congress has enacted the Rules Enabling Act, which gives the United States Supreme Court "'the power to prescribe, by general rules, . . . the practice and procedure in civil actions at law'" as long as such rules "'neither abridge, **[*8]** enlarge, nor modify the substantive rights of any litigant.'" See, Sibbach v. Wilson & Co., 312 U.S. 1, 7-8, 61 S. Ct. 422, 85 L. Ed. 479 (1941) (citation omitted).

A plurality of the Court in Shady Grove concluded that Rule 23 was procedural in nature, it did not violate the Rules Enabling Act, and it operated in Shady Grove to allow the class action to proceed in Federal Court despite the New York state law. Id. at 406-416. Justice Stevens, however, departed from the plurality's rationale in part and would have held that "there are some state procedural rules that federal courts must apply in diversity cases because they function as a part of the State's definition of substantive rights and remedies," but Justice Stevens nonetheless joined in the ultimate holding reversing the Second Circuit and remanding the case for further proceedings. Id. at 416-17.

In re Bair Hugger was a multi-district product liability litigation in which the plaintiffs sought to add claims for punitive damages to each respective complaint. 2017 U.S. Dist. LEXIS 193938, 2017 WL 5187832, at *1. Applying the Shady Grove rationale, United States Magistrate Judge Franklin L. Noel first concluded that Rule 15 conflicts with Minnesota Statute § 549.191. Id. at *3. Magistrate Judge Noel explained:

> The Court concludes that Rule 15 and the Minnesota punitive damages statute both address the same subject matter, namely whether **[*9]** Plaintiffs may amend their Master Long Form and Short Form Complaints. Federal Rule 15 "answers the question in dispute," and is "sufficiently broad to control the issue before the court." The statutes conflict because the Minnesota procedural rule would not allow for the amendment absent affidavits establishing prima facie evidence of deliberate disregard for the rights and safety of others, where the federal rule has no such procedural requirement. This Court is required to apply Rule 15 provided that it is valid pursuant to the Rules Enabling Act.

2017 U.S. Dist. LEXIS 193938 , [WL] at *4 (quoting the syllabus and concurring opinion in Shady Grove). Magistrate Judge Noel then determined that Rule 15 does not violate the Rules Enabling Act and, thus, he concluded that it governs amendment to a pleading to seek punitive damages despite the stricter standard set forth in Minnesota Statute § 549.191. Id.

Inline now argues that, in keeping with In re Bair Hugger, this Court should apply Rule 15's more lenient standard—rather than Minnesota Statute § 549.191's stricter standard—to determine whether Inline may amend its Complaint to plead punitive damages. (Mem. in Supp., [Docket No. 381], 4 n.2; Jan. 30, 2018, Motion Hearing, Digital Record, 1:31-36).

However, with all due respect to the reasoning of *In re Bair **[*10]** Hugger*, the undersigned disagrees.

Although Shady Grove was a fractured opinion, containing plurality (with portions that reached a majority of the Court), concurring, and dissenting opinions, a majority of the United States Supreme Court agreed that N.Y. Civ. Prac. Law Ann. § 901(b) was in direct conflict with Rule 23. See, Shady Grove, 559 U.S. at 399-400. The Court explained:

> [Rule 23] says that if the prescribed preconditions are satisfied "[a] class action *may be maintained*" (emphasis added)—not "*a class action may be permitted*." Courts do not maintain actions; litigants do. The discretion suggested by Rule 23's "may" is discretion residing in the plaintiff: He may bring his claim in a class action if he wishes. And like the rest of the Federal Rules of Civil Procedure, Rule 23 *automatically* applies "in all civil actions and proceedings in the United States district courts."

Id. (emphasis in original). In other words, Rule 23 and N.Y. Civ. Prac. Law Ann. § 901(b) directly conflicted because Rule 23 mandated that a plaintiff can bring a class action if certain conditions are met, leaving Federal Courts no discretion to hold otherwise, while in contrast N.Y. Civ. Prac. Law Ann. § 901(b) required the dismissal of a class action if a plaintiff sought to seek to recover penalties even if the requirements of Rule 23 were **[*11]** met.

However, the type of direct conflict seen in Shady Grove is simply not present when this Court compares Rule 15 and Minnesota Statute § 549.191.

Rule 15 is by its very nature, and has long been recognized as being, discretionary. See, e.g., Foman v. Davis, 371 U.S. 178, 182, 83 S. Ct. 227, 9 L. Ed. 2d 222 (1962) (**HN4**[] "[T]he grant or denial of an opportunity to amend [under *Rule 15(a)*] is within the discretion of the District Court, [although] outright refusal to grant the leave without any justifying reason appearing for the denial is not an exercise of discretion."); *Pliscott v. Colvin, No. 13-cv-1390 (SRN/SER), 2014 U.S. Dist. LEXIS 112030, 2014 WL 3955229, *2 (D. Minn. Aug. 13, 2014)* ("The determination as to whether to grant leave [to amend under *Rule 15(a)(2)*] is entrusted entirely to the discretion of the Court.").

Unlike *Rule 23*, which vests discretion in the plaintiff and not the Court, *Rule 15* vests discretion in the Court to determine whether "justice . . . requires" allowing the amendment sought by the moving party.

Shady Grove does not rearticulate in detail the traditional test for determining whether there is a direct conflict between a Federal Rule and a state law, likely because (in the view of a majority of the Court) *Rule 23* and N.Y. Civ. Prac. Law Ann. § 901(b) so plainly conflicted. See, *559 U.S. at 399-400*. Rather, the plurality in Shady Grove articulated the first question as whether the Federal Rule and the state statute at **[*12]** issue "answer the same question." See, *Id. at 401*; *In re Bair Hugger, 2017 U.S. Dist. LEXIS 193938, 2017 WL 5187832, at *4*. However, in his Shady Grove concurrence, Justice Stevens worded the question as: "whether the scope of the federal rule is sufficiently broad to control the issue before the court, thereby leaving no room for the operation of seemingly conflicting state law." *Shady Grove, 559 U.S. at 421* (Stevens, J., concurring). These are different questions. See, *Unity Healthcare, Inc. v. Cty. of Hennepin, 308 F.R.D. 537, 546 n. 4 (D. Minn. 2015)* (noting this discrepancy and suggesting, without deciding, that Justice Stevens' narrower position may be controlling under *Marks v. United States, 430 U.S. 188, 193, 97 S. Ct. 990, 51 L. Ed. 2d 260 (1977))*.

In any event, in the view of the undersigned, Federal *Rule 15* and *Minnesota Statute § 549.191* do not conflict. As already set forth above, unlike the N.Y. state statute and Federal Rule at issue in *Shady Grove*, application of the M.N. state statute here does not preclude application of the Federal Rule. Moreover, at least one Minnesota United States District Court has already concluded that ***HN5***[] "[t]here is no direct conflict between Federal *Rule 15(a)* and *section 549.191*." See, *Security Sav. Bank v. Green Tree Acceptance, Inc., Civ. No. 3-89-28, 1990 U.S. Dist. LEXIS 20224, 1990 WL 36142, *2 (D. Minn. March 22, 1990)*. As United States Magistrate Judge Bernard P. Becker held in that case, *Rule 15* can "peacefully co-exist" with *Minnesota Statute § 549.191*. Id. (citations omitted). The Court agrees. The discretion allowed a Federal Court under *Rule 15(a)* does not preclude or even **[*13]** conflict with the consideration of whether a party has also complied with *Minnesota Statute § 549.191*.

Although a majority of the United States Supreme Court in Shady Grove agreed that the conflict between *Rule 23* and the New York state statute was clear, *559 U.S. at 401*, the dissenting opinion in Shady Grove provides guidance for the direction this Court should take when, as here, Federal *Rule 15* is not in conflict with the M.N. state statute at issue. Interestingly, in dissent, Justice Ginsburg concluded that the conflict between *Rule 23* and N.Y. Civ. Prac. Law Ann. § 901(b) was not "really necessary." *559 U.S. at 437* (Ginsburg, J., dissenting). She went on to state:

> If . . . no Federal Rule or statute governs the issue, the Rules of Decision Act, as interpreted in Erie, controls. That Act directs federal courts, in diversity cases, to apply state law when failure to do so would invite forum shopping and yield markedly disparate litigation outcomes.

Id. at 438-39.

In the case presently before this Court, the failure to apply *Minnesota Statute § 549.191* would invite forum shopping and yield markedly disparate litigation outcomes because it would greatly lower the standard by which Inline must show its entitlement to plead punitive damages on M.N. state law claims, despite this Court's long history of applying **[*14]** *Minnesota Statute § 549.191* in materially indistinguishable cases. See, e.g., *Sorin Group USA, Inc. v. St. Jude Medical, S.C., Inc., 176 F. Supp. 3d 814, 828 (D. Minn. 2016)* ("Because this case is in federal court due to diversity jurisdiction, in order to add punitive damages to its claim, [plaintiff] had to seek leave to amend under *Minn. Stat. § 549.191*."); *Rassier v. Sanner, No. 17-cv-938 (DWF/LIB), 2017 U.S. Dist. LEXIS 196939, 2017 WL 5956909, *7 (D. Minn. Nov. 30, 2017)* ("Courts in this district, however, have consistently applied *§§ 549.191*-.20 to state-law claims."); *Streambend Props. III, LLC, v. Sexton Lofts, LLC, 297 F.R.D. 349, 360-61 (D. Minn. 2014)* ("*Minnesota Statutes sections 549.191* and *549.20* govern the pleading of punitive damages claims based on

Minnesota law."); *Nat'l Union Fire Ins. Co. of Pittsburgh, PA, v. Donaldson Co., Inc., No. 10-cv-4948 (JRT/TNL), 2016 U.S. Dist. LEXIS 193977, 2016 WL 6902408, *3-7 (D. Minn. June 15, 2016)* (applying *Minn. Stat. § 549.191* to determine whether punitive damages could be pled); *Coy v. No Limits Education, No. 15-cv-93 (BRT), 2016 U.S. Dist. LEXIS 193954, 2016 WL 7888047, *2-6 (D. Minn. April 1, 2016)* (same).

The portions of *Shady Grove* which gained the approval of a majority of the United States Supreme Court do not dictate that *Rule 15* conflicts with *Minnesota Statute § 549.191*, nor do they indicate that Erie concerns mandate anything other than the application in the present case of *Minnesota Statute § 549.191*. Accordingly, in the absence of binding precedent to the contrary, the undersigned finds that *Minnesota Statute § 549.191* provides the relevant standard of proof for the present motion.

Minnesota Statute § 549.191 provides:

> After filing the suit a party may make a motion to amend the pleadings to claim punitive damages. The motion must allege the applicable legal basis under **[*15]** *section 549.20* or other law for awarding punitive damages in the action and must be accompanied by one or more affidavits showing the factual basis for the claim. At the hearing on the motion, if the court finds prima facie evidence in support of the motion, the court shall grant the moving party permission to amend the pleadings to claim punitive damages.

HN6[] *Minnesota Statute § 549.20, Subd. 1(a)*, allows punitive damages in civil actions "only upon clear and convincing evidence that the acts of the defendant show deliberate disregard for the rights or safety of others." "'The clear-and convincing standard is satisfied when "the evidence is sufficient to permit the Jury to conclude that it is highly probable that the defendant acted with deliberate disregard to the rights or safety of others."'" *Nat'l Union Fire Ins. Co. of Pittsburgh, PA v. Donaldson Co., Inc., No. 10-cv-4948 (JRT/TNL), 2016 U.S. Dist. LEXIS 193977, 2016 WL 6902408, *4 (D. Minn. June 15, 2016)* (citation omitted).

Minnesota Statute § 549.20 further explains:

> [**Subd. 1**](b) A defendant has acted with deliberate disregard for the rights or safety of others if the defendant has knowledge of facts or intentionally disregards facts that create a high probability of injury to the rights or safety of others and:
>
> (1) deliberately proceeds to act in conscious or intentional disregard of the **[*16]** high degree of probability of injury to the rights or safety of others; or
> (2) deliberately proceeds to act with indifference to the high probability of injury to the rights or safety of others.
>
> **Subd. 2. Master and principal**. Punitive damages can properly be awarded against a master or principal because of an act done by an agent only if:
> (1) the principal authorized the doing and the manner of the act;
> (2) the agent was unfit and the principal deliberately disregarded a high probability that the agent was unfit;
> (3) the agent was employed in a managerial capacity with authority to establish policy and make planning level decisions for the principal and was acting in the scope of that employment; or
> (4) the principal or a managerial agent of the principal, described in clause (3), ratified or approved the act while knowing of its character and probable consequences.

HN7[] Of essence in determining vicarious punitive damages is the role of the employee or agent, who must be a "managerial employee[] vested with authority to make policy and planning level decisions for [the principal]" in order for the punitive damages to properly be awarded against the principal.[2] See, *Doe YZ v. Shattuck-St. Mary's School, 214 F. Supp. 3d 763, 792-93 (D. Minn. 2016)*.

---

[2] Inline cites *Doe YZ v. Shattuck-St. Mary's School, 214 F. Supp. 3d 763 (D. Minn. 2016)*, for the contradictory proposition that "because 'a corporation is charged with constructive knowledge of all material facts of which its officer or agent acquires knowledge while acting in the course of employment within the scope of his or her authority,' knowledge on the part of those with

HN8[] In order to show entitlement to plead punitive damages, "'[a] mere showing of negligence is not sufficient; instead, the conduct must be done with malicious, willful, or reckless disregard for the rights of others.'" *Nat'l Union Fire Ins. Co., 2016 U.S. Dist. LEXIS 193977, 2016 WL 6902408, at *4* (citation omitted). Moreover,

> Because a prima facie showing is one "that prevails in the absence of evidence invalidating it," "the Court reviews the evidence in support of a Motion to Amend as the Court would review a . . . Motion for Judgment as a Matter of Law" under the Federal Rules of Civil Procedure. In other words, in reaching the determination whether the plaintiff has established a prima facie case for punitive damages, the Court makes no credibility rulings and does not consider any challenge, by cross-examination or otherwise, to the plaintiff's proof, but the Court must carefully scrutinize the evidence presented by the moving party to make sure that it amounts to a prima facie showing that the substantive requirements for punitive damages have been met.

Target Corp. v. LCH Pavement Consultants, LLC, 960 F. Supp. 2d 999, 1010 (D. Minn. 2013) (citations omitted). ***HN9***[] "At the present stage, the plaintiff 'is not required to demonstrate an entitlement to punitive damages *per se*, but only an entitlement to allege such **[*18]** damages.'" *Coy v. No Limits Education, No. 15-cv-93 (BRT), 2016 U.S. Dist. LEXIS 193954, 2016 WL 7888047, *3 (D. Minn. April 1 2016)* (citations omitted). However, the Court is to scrutinize the record to assure the required showing has been met, and it must do more than to merely "rubber stamp" the movant's allegations. *Ulrich v. City of Crosby, 848 F. Supp. 861, 868-69 (D. Minn. 1994)*; *Swanlund v. Shimano Indus. Corp., Ltd., 459 N.W.2d 151, 154 (Minn. Ct. App. 1990)*.

B. Analysis

(i) Minnesota-law-based Antitrust Claim

Before addressing whether Inline has shown its entitlement to seek punitive damages on its Minnesota state law based antitrust claim, the Court must first address the threshold question: whether, as a matter of law, punitive damages are even available on a Minnesota state law antitrust claim. Inline asserts that they are, while Graphic asserts the opposite. (Mem. in Supp., [Docket No. 381], 7-9; Mem. in Opp., [Docket No. 506], 9-10).

The Minnesota ***Antitrust Law*** of 1971, *Minn. Stat. § 325D.49, et seq.*, provides that "any person . . . injured directly or indirectly by a violation of [the Minnesota ***Antitrust Law*** of 1971], shall recover three times the actual damages sustained . . . ." *Minn. Stat. § 325D.57*. Inline's antitrust claim on which it now seeks punitive damages is Count IV of its Complaint, which alleges a violation of *Minn. Stat. § 325D.52*. (See, Compl., [Docket No. 1], 29).

Inline acknowledges that the Minnesota statute quoted above is similar to the Federal **[*19]** *Clayton Act*, which provides treble damages for *Sherman Act* violations. (Mem. in Supp., [Docket No. 381], 7). See, *15 U.S.C. § 15(a)*

---

managerial capacity will be imputed to the corporation." (Mem. in Supp., [Docket No. 381], 6). However, Doe YZ went on to point out the statutory language in *Minn. Stat. § 549.20, subd. 2(c)*, set forth above—which controls on questions of punitive damages under that statute—and it ultimately held that although the knowledge of employees who are not "managerial employees vested with authority to make policy and planning level decisions . . . is imputable to [the principal] for negligence purposes, it is not imputable to [the principal] for assessing punitive liability." *214 F. Supp. 3d at 792-93*. Therefore, contrary to Inline's assertion, the general principles of principal/agent liability do not expand the definitions set forth in *Minn. Stat. § 549.20, subd. 2*. Inline also argues that it "need not show managerial capacity for vicarious liability under *§ 549.20, subd. 2*, but nevertheless does so herein." (Mem. in Supp., [Docket No. 381], 6). In support, Inline cites ***[*17]*** *Nunn v. Noodles & Co., No. 9-cv-1286 (JNE/JJK), 2010 U.S. Dist. LEXIS 91544, 2010 WL 3170763, *8 n.1 (D. Minn. Aug. 6, 2010)*, which stated in dicta that the determination whether Plaintiff satisfied the required elements for vicarious liability for punitive damages was not required at the the pleading stage when plaintiff sought to amend her complaint to plead punitive damages. Rather, Nunn held that such a determination was more properly made in a summary judgment motion or at trial. Id. Nunn concluded, however that there was prima facie evidence that supported a finding of vicarious liability for punitive damages under *Minn. Stat. § 549.20, subd. 2*. Id. The portion of *Nunn* relied on by Inline is dicta and is not binding on this Court in any event, especially in light of the much more recent ruling in Doe YZ, which addressed the sufficiency of evidence to support vicarious liability on punitive damages in the context of a motion to amend the complaint such as the one presently before the Court. See, *214 F. Supp. 3d at 791-93*.

("any person who shall be injured . . . by reason of anything forbidden in the antitrust laws . . . shall recover threefold the damages by him sustained . . ."). Inline further concedes that some federal courts—including the Eighth Circuit—have held that punitive damages are not recoverable in addition to the treble damages authorized under the *Clayton Act*. (Mem. in Supp., [Docket No. 381], 7). See, *McDonald v. Johnson & Johnson, 722 F.2d 1370, 1384 (8th Cir. 1983)* (***HN10***[] "Punitive damages beyond the statutory trebled damages cannot be awarded for an antitrust violation [because to do so] would at the very least become duplication."). Nevertheless, Inline argues that applying such reasoning to the present case would conflict with the Minnesota Supreme Court's holding in *Phelps v. Commonwealth Land Title Ins. Co., 537 N.W.2d 271, 277 (Minn. 1995)*, that "multiple compensatory damages are not duplicative of punitive damages where at least one objective of multiple compensatory damages is nonpunitive." (Mem. in Supp., [Docket No. 381], 7).

As Graphic points out, however, Phelps did not address punitive damages sought in relation to a claim under the *Minnesota Antitrust Act*; rather, Phelps addressed punitive damages sought **[*20]** in relation to a claim under the *Minnesota Human Rights Act ("MHRA")*. (Mem. in Opp., [Docket No. 506], 10); see, *Phelps, 537 N.W.2d at 273-77*.

The Phelps holding that an "award of both punitive damages and double actual damages does not constitute an unfair double recovery for punitive damages" was based in large part upon the specific legislative history of the MHRA, legislative history which has no effect on the interpretation of the Minnesota Antitrust Act. See, Id. Moreover, as Graphic also points out, the MHRA specifically authorizes compensatory damages "in addition to punitive damages in an amount not more than $8,500"; the Minnesota Antitrust Act does not. See, *Phelps, 537 N.W.2d at 273-74*. Because of these material differences, *Phelps* is not binding on this Court's analysis of whether punitive damages are available in conjunction with Inline's claim under the Minnesota antitrust laws.

To the contrary, at least one Federal Court within the District of Minnesota has already rejected the idea that Minnesota state law antitrust claims may result in recovery of punitive damages. See, *Insignia Systems, Inc. v. News America Marketing In-Store, Inc., No. 4-cv-4213 (JRT/AJB), 2008 U.S. Dist. LEXIS 129807, 2008 WL 11349956, *2 (D. Minn. Nov. 7, 2008)* As the Court noted in Insignia Systems, Inc., "'[t]he Minnesota Supreme **[*21]** Court has consistently held that the Minnesota ***Antitrust Law*** should be construed with the federal courts' construction of the federal antitrust laws.'" *2008 U.S. Dist. LEXIS 129807, [WL] at *2* (quoting *Keating v. Philip Morris, Inc., 417 N.W.2d 132, 136 (Minn. 1987))*. And, as Inline itself concedes, the Eighth Circuit has long held that punitive damages may not be awarded for a federal antitrust claim. See, *McDonald, 722 F.2d at 1381*). Moreover, neither party identifies nor has this Court's independent research found any case from either the Minnesota Supreme Court or the Minnesota Intermediate Court of Appeals which directly addresses, much less allows, punitive damages under the Minnesota ***Antitrust Law***. Thus, there is no indication from the Minnesota Supreme Court or the Minnesota Court of Appeals that punitive damages are treated differently under the Minnesota ***Antitrust Law*** than they are under the *Clayton Act*.

Accordingly, the undersigned concludes that, ***HN11***[] under the law of Minnesota, antitrust claims brought under Minnesota state law may not also lead to an award of punitive damages. See, *Insignia Systems, Inc., 2008 U.S. Dist. LEXIS 129807, 2008 WL 11349956, at *2* (holding that "none of [the plaintiff's] claims allow an award for punitive damages" when the only remaining claims were brought under the federal *Lanham Act* and the *Minnesota Deceptive Trade Practice Act*"); *McDonald, 722 F.2d at 1381* (citing Minnesota **[*22]** punitive damages law in a case involving a violation of *section 2 of the Sherman Act* and noting that "[p]unitive damages beyond the statutory trebled damages cannot be awarded for an antitrust violation").

Therefore, to the extent that Inline seeks to amend Count IV of its Complaint to plead punitive damages in relation to its state claim under the Minnesota ***Antitrust Law***, Inline's Motion to Amend to Plead Punitive Damages, [Docket No. 504], is **DENIED**.

(ii) Tortious Interference with Business Claims

Inline also seeks to plead punitive damages on Count I of its Complaint—Tortious Interference with Prospective Business Relations—and Count II of its Complaint—Tortious Interference with Existing Contractual Relations. (See, Compl., [Docket No. 1], 26-27; Mem. in Supp., [Docket No. 381], 1, 40-42). Unlike claims under the Minnesota ***Antitrust Law***, punitive damages are available on tortious interference claims brought under Minnesota state law. See, Sorin Group USA, Inc. v. St. Jude Medical Center, S.C., Inc., No. 14-cv-4023 (JRT/JSM), Docket No. 114 (granting motion to amend complaint to plead punitive damages on tortious interference with existing contractual rights claim); *Loyalton Group, Inc. v. Burton Energy Group, Inc., No. 9-cv-58 (DSD/JJK), 2009 U.S. Dist. LEXIS 139842 , 2009 WL 10678552, *7 (D. Minn. Sept. 25, 2009)* **[*23]** (***HN12***[] "[I]nterference with prospective contractual relations may support a claim for punitive damages.").

Graphic does not argue that punitive damages are not available on these claims as a matter of law; rather, Graphic argues that Inline has failed to establish the requisite prima facie case to show its entitlement to now plead punitive damages as to these claims. (Mem. in Opp., [Docket No. 506], 9-41).

First, however, the Court must resolve some preliminary challenges Graphic raises with regards to the documents Inline has filed with the Court in support of its present Motion to Amend to Plead Punitive Damages.

a. Preliminary evidentiary questions

1) **Expert Reports**

Graphic argues that the Court should not consider the expert reports submitted by Inline in support of its present Motion to Amend its Complaint to add Punitive Damages. (Mem. in Opp., [Docket No. 506], 8-9). In support, Graphic cites to *Berczyk v. Emerson Tool Co., 291 F. Supp. 2d 1004 (D. Minn. 2003)*. (Mem. in Opp., [Docket No. 506], 8). In Berczyk, Magistrate Judge Raymond Erickson considered the plaintiffs' motion to amend their complaint in order to add punitive damages. *291 F. Supp. 2d at 1007*. After addressing the various affidavits the plaintiffs had filed in support **[*24]** of their motion, Judge Erickson turned to the "opinion evidence of [plaintiff's] expert," and he stated:

> At best, [the expert's] report is an unsworn letter, which carries little evidentiary weight. Even apart from its non-evidentiary status, the [expert's] report does not constitution "clear and convincing" evidence. We apply no Daubert gatekeeping function, here, for the Defendants have not challenged [the expert's] expertise. Rather, we simply abide by our obligation to assess [the expert's] opinions, consistent with the prohibition that we not "rubber stamp" the showings advanced by a moving party. [The expert's] opinion is rife with concessions that he had been "advised" of certain predicates to his opinion, or that he had an "understanding" as to certain predicate facts. . . .
>
> . . . .
>
> As best as we can discern [the expert's] report is predicated on many of the same documents that we found to be an inadequate basis on which to establish a claim of deliberate disregard. We find little to suggest that the inadequacies of those showings can be rectified by the expedient of passing them through a retained expert.

291 F. Supp. 2d at 1015.

In the present case, Graphic contends that the expert reports Inline offers **[*25]** are similarly based on the underlying documents that Inline has also submitted to the Court, which—if those underlying documents are inadequate to show punitive damages—renders the Expert Reports of little to no weight on whether Inline has made a sufficient showing of deliberate disregard to justify pleading punitive damages. (Mem. in Opp., [Docket No. 506], 8-9).

For its part, Inline argues that the Court may (and should) consider its Expert Reports, and Inline cites to *In re Levaquin Prod. Liab. Litig., No. No. 8-cv-5743 (JRT), 2010 U.S. Dist. LEXIS 140977, 2010 WL 7852346 (D. Minn. Nov. 9, 2010)*. (Mem. in Supp., [Docket No. 381], 4). In re Levaquin also addressed a motion to amend the complaint to assert a claim for punitive damages, and the defendants in that case argued that Berczyk categorically stood "for the proposition that an expert report cannot be considered evidence warranting a right to assert punitive damages." *2010 U.S. Dist. LEXIS 140977, 2010 WL 7852346, at *11*. Judge John R. Tunheim (now Chief Judge) rejected this argument, stating that Berczyk instead "reaffirms the principle that prima facie evidence of punitive damages cannot be based on conjecture and conclusion." Id. The plaintiffs in In re Levaquin had "included over 100 exhibits including medical research, deposition testimony, internal **[*26]** email communications, and expert reports," so Chief Judge Tunheim found that it was sufficiently different from Berczyk that the expert reports were not automatically excluded from the Court's consideration. Id.

The circumstances and arguments present in *In re Levaquin* are materially different than those before the Court in the present Motion. Graphic does not cite Berczyk for the proposition that all expert reports are per se improper for consideration on a motion to amend a complaint to add punitive damages. Rather, Graphic asserts that in the present case, the expert reports are cited only to the extent that they characterize and summarize facts which are ostensibly available in the underlying documents to which Inline has access and which have separately been submitted to the Court in support of the present Motion. (Mem. in Opp., [Docket No. 506], 8-9). Moreover, in light of additional prior case law from the United States District Court for the District of Minnesota, this Court finds Graphic's argument more persuasive.

In *Stepnes v. Ritschel, No. 8-cv-5296, 2010 U.S. Dist. LEXIS 143497, 2010 WL 7093500, *6 n. 3 (D. Minn. April 13, 2010)*, then Magistrate Judge Keyes noted that ***HN13***[] where there is "nothing more than argument dressed up as factual averment," an affidavit **[*27]** submitted in support of a motion to amend a complaint to assert punitive damages "add[s] nothing to the prima facie showing" required to succeed on such a motion. The affidavit to which Judge Keyes was referring did "not testify[] about a fact, but [it] characterize[ed] the other evidence in the record. . . . These characterizations of the evidence and conclusory statements persist[ed] through the" affidavit and "they [were] not evidence." Id. However, Judge Keyes nevertheless "considered the items in the . . . Affidavit that can be considered evidence in reaching its determination." (Emphasis added). *Id.* Similarly, in *Hofmann v. Enterprise Leasing Co. of Minn., No. 13-cv-255 (JNE/SER), 2014 U.S. Dist. LEXIS 199825, 2014 WL 12601037, *5 (D. Minn. June 26, 2014)*, Magistrate Judge Rau quoted Stepnes and came to a similar conclusion; he stated that expert reports which "are merely 'characterizations of evidence and conclusory statements" . . . do not add to a prima facie showing."

Many of Inline's citations to the Expert Report by Alan W. Kowalchyk, (Kroll Dec., Exh. 81, [Docket No. 463], 2-48), and the Rebuttal Expert Report by Alan W. Kowalchyk, (Kroll Dec., Exh. 82, [Docket No. 464], 2-29), simply cite to portions of those expert reports which merely recite facts Kowalchyk **[*28]** gleaned from underlying documents, characterizes evidence, or makes conclusions about what individuals related to Graphic "should have" known or done. (See, e.g. Mem. in Supp., [Docket No. 381], 27 n. 12, citing Expert Report of Kowalchyk, [Docket No. 81], 6-7, which asserts that Biddle "should have known" information and makes conclusions about whether Graphic's behavior supports a legal claim). Inline also cites to portions of Kowalchyk's Rebuttal Expert Report which are no more than Kowalchyk's personal opinions about whether the inventorship of the elements regarding a patent the ownership of which is a putative issue. (See, Mem. in Supp., [Docket No. 381], 32, citing a portion of Kowalchyk's Rebuttal Expert Report, [Docket No. 464], 16-17, which is entitled "Specific Opinions a) Fitzwater Did Not Invent The Allegedly Patentable Combination of Elements Claimed in the Graphic Patents" and details the reasons for this opinion).

At other points, Inline cites wholesale to its expert reports as a summary of and characterization for other evidence it wishes the Court to consider. (See, e.g., Mem. in Supp., [Docket No. 381], 33, citing generally to "Exh. 81, ¶¶ 37-99; Exh. 82, ¶¶ 27-61, **[*29]** which is a total of 32 pages, in support of the sentence: "Graphic applied for multiple patents from 2005 to 2013 that incorporate and claim the three major categories of concepts and ideas Brower and others at Nestle provided under Projects Quantum and Roxanne and the JDA"). Although the cited pages in the expert reports summarize the evidence as Kowalchyk sees it, this sort of summarization is not "evidence" which the Court ought to consider in support of Inline's present Motion to Amend to Plead Punitive Damages.[3]

---

[3] The section of this Order which sets forth the Court's analysis of the merits of the Motion to Amend to Plead Punitive Damages presently before the Court also includes, at times, Inline's citations to the expert reports when necessary to set forth alleged facts which are required to understand Inline's arguments. For example, as "evidence" of the relationship between the various patent

In light of the nature of the expert reports and the certain portions thereof to which Inline cites, the Court follows the collective rationale in *Berczyk*, *In re Levaquin*, *Stepnes*, and *Hoffman*, and the Court declines to consider those portions of the expert reports which contain no more than mere characterization of evidence, conclusory statements, or opinions as to the culpability, liability, or intent of Graphic. To the extent that Inline cites expert reports for evidence which should be considered, those portions of the expert reports are discussed below in the analysis of the sufficiency of Inline's argument that it is entitled to plead punitive damages in the present **[*30]** case.

2) **Consideration of "the record as a whole"**

Graphic also urges the Court to "consider the whole record to place Plaintiff's proffer in context." (Mem. in Opp., [Docket No. 506], 7). Essentially, Graphic asks the Court to consider "the full testimony" of witnesses for whom Inline has provided excerpts of deposition transcripts. (Id.). In support, Graphic cites to *Greer v. Walsh Construction Co., No. 15-cv-465 (PAM/JSM), 2016 U.S. Dist. LEXIS 194356, 2016 WL 6892109 (D. Minn. Feb. 23, 2016)*. (Id.). In Greer, Magistrate Judge Janie S. Mayeron ***HN14***[] considered a motion to amend the complaint to assert punitive damages, and she stated: "[T]he court is entitled to look at the record as a whole—not to search for rebuttal or impeachment evidence, but to ensure that the evidence is presented in its proper context." *2016 U.S. Dist. LEXIS 194356, 2016 WL 6892109, at *7* (citing *Stepnes, 2010 U.S. Dist. LEXIS 143497, 2010 WL 7093560, at *7 n.4*). In Stepnes, Magistrate Judge Jeffrey J. Keyes noted:

> To consider only those select portions of a deposition transcript a litigant chooses to place before the court on a motion to amend to add a claim of punitive damages and ignore other portions of that transcript because they are attached to the opposing party's opposition would only encourage plaintiffs to mischaracterize the evidentiary record by selective presentation. Just as the court in [*Olson v. Snap Products, Inc., 29 F. Supp. 2d 1027 (D. Minn. 1998)*] "seriously **[*31]** doubt[ed]" that its role could be "anything more than a rubber stamp were [it] to allow the Plaintiff to exclude his own personal testimony from [its] consideration, simply because he has chosen not to submit the evidence for [its] review," we cannot have a "fair appraisal" of Plaintiffs' prima facie case here without considering portions of [a] deposition that place [that] testimony in context.

*Stepnes, 2010 U.S. Dist. LEXIS 143497, 2010 WL 7093560, at *7 n.4*.

This reasoning is highly persuasive and applicable to the present Motion to Amend to Plead Punitive Damages. To the extent that Inline cites an excerpt of a deposition, the Court may review the surrounding portions of that deposition to place that excerpt in context; it need not constrain itself only to the particular, limited excerpt as cited by Inline. As needed to explain the Court's rationale below, this Order includes such context to clarify deposition testimony as necessary.

However, Graphic expands its argument in an effort to persuade the Court to consider additional depositions, declarations, and the like. (See, e.g., Mem. in Opp., [Docket No. 506], 12, 21-22, 37). Graphic describes this as providing "context" for the Court, but the Court's job in deciding the present Motion is not **[*32]** to weigh the evidence in support of Inline's argument against the evidence Graphic points to in an attempt to contradict that evidence. Graphic provides a citation to *Smith v. Morales, No. A07-2377, 2008 Minn. App. Unpub. LEXIS 1355, 2008 WL 4909630, *4 (Minn. Ct. App. Nov. 18, 2008)*, in which the Minnesota Court of Appeals (which is not a court of binding precedent, in any event) held in reviewing the denial of a motion to add a claim for punitive damages: "while appellant was entitled to have his evidence treated as unrebutted by the district court, meaning not subject to cross-examination or other challenge, the district court was permitted to weigh the evidence." (Mem. in Opp.,

---

applications and issued patents involved in the present litigation, Inline cites only to a portion of the expert report that summarizes the evidence from the record which was available to the author of that expert report; Inline does not indicate to the Court where in the submissions currently before it that same information is to be found; if at all. (See, Mem. in Supp., [Docket No. 381], 33 citing Kroll Dec., Exh. 81, [Docket No. 463], 19-62; Exh. 82, [Docket No. 464], 12-21). However, because those patent applications and issued patents are referenced as well in evidence which is properly before the Court in the context of the present Motion to Amend to Plead Punitive Damages, the Court has considered the facts alleged therein, not for their value in determining whether Inline has made a prima facie showing of entitlement to punitive damages, but merely as necessary to understand the facts underlying the present litigation.

[Docket No. 506], 5). Graphic interprets this to mean that this Court should similarly weigh all of the evidence of record, even that which it offers in direct rebuttal to Inline's submissions, to determine whether there is a prima facie case to support a claim for punitive damages. (Id.).

To do so as Graphic suggests, however, would run afoul of the long-established standard that in the context of a motion seeking to amend a complaint to add a claim for punitive damages, "the Court makes no credibility rulings and does not consider any challenge, by cross-examination or otherwise, to the **[*33]** plaintiff's proof." *Target Corp., 960 F. Supp. 2d at 1010 (D. Minn. 2013)* (citations omitted). Despite Graphic's argument, its presentation of directly contradictory evidence is a "challenge . . . to the plaintiff's proof" which the Court will not consider. The distinguishing difference between the present case and *Smith, supra*, is that in Smith, "appellant submitted both his version of the facts and the versions of the officers involved . . . [which] . . . differ greatly from the appellant's account." See, *Smith, 2008 Minn. App. Unpub. LEXIS 1355, 2008 WL 4909630, at *4*. The Minnesota Court of Appeals held that the district court had properly considered and weighed all of the evidence submitted by the moving party. Graphic asks the Court not to simply consider and weigh all evidence submitted by Inline; but instead to consider and weigh the directly contradictory evidence submitted by Graphic—the party opposing the motion. To do so here, even in light of Smith, would be improper.

b. Has Inline made the required prima facie showing?

As already set forth above, in order to be entitled to plead punitive damages, Inline must provide evidence which, if unrebutted, clearly and convincingly allows a conclusion that Graphic (1) was aware of or intentionally disregarded facts that created a high probability of injury **[*34]** to Inline's rights, and (2) deliberately proceeded to act in conscious disregard, intentional disregard, or with indifference to that high probability of injury to Inline's rights. See, *Minn. Stat. § 549.20, Subd. 1(a)-(b)*.

Inline's argument can be summarized as follows: Graphic knew or intentionally disregarded facts about the invalidity of certain patents, and Graphic nevertheless deliberately asserted those patents to Nestle and in litigation against Inline. Graphic knew that its assertion of those invalid patents created a high probability of injury to Inline's right to business relations without interference, and in asserting the patents anyway, Graphic deliberately acted in conscious disregard, intentional disregard, or indifference to that high probability of injury.

Evidence Presented to the Court

Inline relies on the following evidence, as more fully detailed below, to support its proposed punitive damages claim:

1. Testimony from the April 2017 and July 2017 depositions of Jeffrey Voyzey, Graphic's Director of Business Development.

2. Testimony from the April 2017 *Rule 30(b)(6)* deposition of Graphic through its 30(b)(6) representative, Jeffrey Sloat.

3. Testimony from the May 2017 deposition of Kelly Fitzwater, a structural designer **[*35]** at Graphic from 2003 to at least 2007.
4. Testimony from the July 2017 deposition and portions of the November 2017 Declaration of Corey Brower, who was Graphic's principal contact at customer companies Chef America and Nestle.
5. Testimony from the July 2017 deposition of John Best, Graphic's vice president of sales and commercial development.
6. Testimony from the July 2017 deposition of Jim Seefeldt, Graphic's Vice-President of Sales.
7. Testimony from the July 2017 deposition of William Sedlacek, former Vice President and General Manager of Graphic's Microwave Division and current Vice-President of Innovation and Business Development for Graphic.
8. Testimony from the August 2017 deposition of Barry Biddle, Graphic's assistant general counsel and chief intellectual property counsel.

9. Testimony from the September 2017 deposition of Jeffrey Watkins, President of Inline.
10. Portions of the December 2017 Declaration of Lou Judge, who has been involved with procurement at Nestle since 1982 and has been Nestlé's Group Manager of Strategic Procurement since 2010.
11. An unsigned, undated, one-page document entitled "PPD Sales Tactical Challenges."

12. Pages from what appear to be power point **[*36]** presentations created for Graphic.
13. An Interoffice Memo dated June 12, 2001, authored by Brower and distributed to Voyzey and others.
14. Electronic appointment requests sent by Voyzey.
15. A Development Agreement[4] entered into by Graphic and Nestle in March 2005.
16. An email dated September 30, 2005 between Brower, Fitzwater, and Voyzey.
17. An October 2, 2005, internal Graphic email.
18. A form entitled "Graphic Packaging Corporation Invention Disclosure," dated October 7, 2005, and signed by Fitzwater.
19. A May 25, 2007, email from Biddle regarding patent applications.
20. An unsigned "update" of events in October 2008 prepared by an unknown Graphic employee.
21. Graphic's "Monthly Report" for April 2009, which was prepared by Best.
22. June 2009 emails between Tim Klisares, Graphic Sales Manager; Seefeldt; Lou Judge, a Nestle employee who was involved with procurement at Nestle since 1982; and additional Graphic employees whose roles at Graphic are unknown.
23. Internal Graphic emails from October 2009.
24. A November 2011 "project summary" by Voyzey regarding microwave susceptor sleeve business at Nestle.
25. Internal Graphic emails from November and December 2011.

26. An April 13, 2012, **[*37]** email from Klisares to Judge, and another email exchange that day between Klisares and Seefeldt.
27. A series of internal Graphic emails dated June 20 through 22, 2012.
28. An August 28, 2012, email from Judge to Watkins.
29. Multiple internal Graphic emails from May, September, and December 2013.
30. Screenshots purporting to show bids from the January 2014 ARIBA bidding for Nestle business.
31. A February 7, 2014, internal Nestle email.
32. A February 13, 2014 email from Kathryn Carlson, a Nestle employee, to Judge and Seefeldt, among others.
33. Multiple internal Graphic emails dated February 16 and 17, 2014.
34. An indemnification agreement dated February 20, 2014, which Watkins signed on behalf of Inline at Nestle's request.
35. Internal Graphic emails from March and June 2014.
36. Internal Graphic emails from October and December 2015.
37. Internal Graphic emails from May, September, and November 2015.
38. A May 6, 2015, email from Seefeldt to Judge, with a copy of the cease-and-desist letter Graphic had served on Inline attached.
39. Internal Graphic emails from January and February 2016.
40. A March 11, 2016, email from Seefeldt to Carlson.

41. An internal Nestle email dated June 28, 2016. **[*38]**
42. Multiple internal Graphic "sample requests," also referred to as a "CAD Requests" or "drawing request forms," which served to request drawings from Graphic designers.
43. Drawings that resulted from such requests.
44. Excerpts from Graphic's internal "Code of Business Conduct and Ethics."

(Mem. in Supp., [Docket No. 381]; Exhibits 1 through 119, [Dockets No. 384-501] (all filed under seal)). The Court has carefully considered the large volume of Exhibits individually, as well as a whole, and it finds that Inline has failed to demonstrate a prima facie case to support amending their Complaint to assert a claim for punitive

[4] Inline refers to this as the "Joint Development Agreement," or the "JDA." (See, Mem. in Supp., [Docket No. 381], 29).

damages as to Counts I and II. The Court discusses each of Inline's asserted bases for punitive damages in more detail below.

Evidence Which Inline Asserts Shows that Graphic Knew the Patented Designs Were Not Invented Solely by Fitzwater

Jeffrey Voyzey testified that in 2000 or 2001, Graphic and the company Chef America began Project Quantum, which was aimed at designing new microwave susceptor sleeves for Hot Pockets. (Kroll Dec., Exh. 17, [Docket No. 399], 3). Voyzey was Graphic's project leader for Project Roxanne, and Corey Brower was his principal contact at Chef **[*39]** America. (Id. at 3-4). Voyzey agreed that it was correct to say that he "worked with Mr. Biddle[, Graphic's assistant general counsel and chief intellectual property counsel,] on patent-related issues that arose in connection with Project Roxanne," as well as "contract-related issues." (Id. at 10). Generally, Voyzey agreed with the assertion that he kept Biddle "in the loop on what was going on in Project Roxanne." (Kroll Dec., Exh. 17, [Docket No. 399], 26-27). (Id. at 11). More specifically, Voyzey agreed that he participated in quarterly patent review meetings with Biddle and he was kept apprised of patent developments, including designs or concepts for which patent protection was being applied or on which patents had been granted. (Id. at 15). He testified that "[i]t wouldn't be uncommon" for Biddle to participate in meetings regarding Project Roxanne. (Kroll Dec., Exh. 17, [Docket No. 399], 10).

Voyzey further agreed that in 2002 or 2003, Nestle acquired Chef America, and "at some point" Project Quantum "morphed into" Project Roxanne, but Brower remained Voyzey's principal contact at Nestle on Project Roxanne. (Id. at 3, 19). A slide from an internal, undated (but which appears to have been produced in 2004 or 2005) Graphic power **[*40]** point presentation lists one of the goals for Project Roxanne as "Multi[-]year protection in the market." (Kroll Dec., Exh. 88, [Docket No. 470], 2).

Nestle acquired Chef America in 2002. (Kroll Dec., Exh. 83, [Docket No. 465], 3). Brower was the person responsible for communicating changes and suggestions to Graphic on behalf of Chef America and, after its acquisition, on behalf of Nestle. (Id. at 6). Brower described the design and development as a collaborative process. (Id. at 12-13). Brower further testified that during both Project Quantum and Project Roxanne, he often had his own ideas and suggestions about what the packaging should include, and he commonly communicated to Graphic—typically through Voyzey—what particular features Nestle wanted in the sleeves. (Id. at 4, 6). Brower stated in his Declaration that after he communicated Nestlé's desired changes to Voyzey, Graphic would provide samples of the desired designs as requested. (Kroll Dec., Exh. 85, [Docket No. 467], 4-5).

In his testimony, Voyzey agreed that it was fair to say that he and Brower worked jointly on ideas and designs and that Brower provided feedback from Nestle on proposals or designs. (Kroll Dec., Exh. 17, [Docket No. 399], 4). Voyzey **[*41]** further agreed that Brower provided comments, feedback, and suggestions on drawings or samples from Graphic and, broadly speaking, Voyzey would incorporate Brower's comments into what Voyzey asked Graphic designers to draw. (Id. at 21). John Best, Graphic's vice president of sales and commercial development, also testified that Graphic worked with Brower similarly to how Graphic worked with all of its customers: Brower "provid[ed] feedback on performance from the samples [Graphic] had provided, and [gave] direction on what he needed to see improvement in." (Kroll Dec., Exh. 3, [Docket No. 387], 3, 5-6).

Brower authored an Interoffice Memo dated June 12, 2001 ("the June 2001 Memo"), which was distributed to Voyzey, among others, and which summarized design concepts and anticipated "next steps" as discussed during a June 11, 2001, Project Quantum meeting involving representatives from Chef America and Graphic. (Kroll Dec., Exh. 84, [Docket No. 466], 2-3). Brower testified that the June 2001, Memo indicated that at that time, Chef America had told Graphic that it was interested in pillow packs (also known as end closures), tear strips, and gussets, and that the Hot Pocket Sleeve Chef America used **[*42]** at the time already had gussets. (Kroll Dec., Exh. 83, [Docket No. 465], 5, 8). In his Declaration, Brower stated:

> "As reflected in [the June 2001Memo], Chef America specifically requested that Graphic provide microwave susceptor sleeves that included closable end panels, a tear strip, gussets, and apertures. Notably, the

> microwave susceptor sleeve being sold in 2001 already had gussets and apertures, so Chef America directed Graphic to add end panels and a tear strip to the design.

(Kroll Dec., Exh. 85, [Docket No. 467], 5).

Voyzey similarly testified that the Hot Pocket sleeve Graphic made for Chef America in 2001, had gussets and an aperture but did not have a tear strip or end closures. (Kroll Dec., Exh. 17, [Docket No. 399], 5, 18). Voyzey also testified that the meeting in June 2001, reflected that Chef America was considering tear strips, end closures, and a new bottom panel for the new Hot Pockets sleeve design. (Id. at 6). Voyzey further testified that in 2001, Deb Pair, a designer at Graphic at the time, prepared Drawing 50019D, which was the design for a Hot Pocket Sleeve with pillow packs. (Id. at 8).

In March 2005, Graphic and Nestle entered into a (Joint) Development Agreement[5] to develop **[*43]** "certain thermal insulating, hand held microwave sleeve packaging for hand held food products and/or new cost reducing processes for producing Nestlé's existing microwave sleeve for hand held products." (Kroll Dec., Exh. 87, [Docket No. 469], 2). Biddle and Voyzey were both involved, to some extent, in the negotiation and approval of the Joint Development Agreement. ((Kroll Dec., Exh. 17, [Docket No. 399], 10; Kroll Dec., Exh. 33, [Docket No. 415], 6, 9-10; Kroll Dec., Exh. 87, [Docket No. 469], 11). Best testified that although he was not directly involved in negotiating the Joint Development Agreement, he was "kept aware of the status of it through updates from [Biddle] and [Voyzey]." (Kroll Dec., Exh. 3, [Docket No. 387], 7).

According to Biddle's testimony, "[a]ny development work that was performed under Project Roxanne was pursuant to the [joint] development agreement." (Kroll Dec., Exh. 33, [Docket No. 415], 16). Among other things, in the Joint Development Agreement, Nestle agreed to "[f]urnish GPI [Graphic] written criteria and concepts for the Packaging." (Kroll Dec., Exh. 87, [Docket No. 469], 2). The Joint Development Agreement defined "Improvements" as "any modifications, **[*44]** alterations, changes, improvements, enhancements, adaptations or derivative works of or to the Packaging." (Id. at 2). The Joint Development Agreement further provided:

> Patentable inventions that are invented jointly by the parties hereto shall be owned jointly by the parties in accordance with the law governing such jointly owned patents, and subject to Section 5.1 above," but "[a]ny Improvements developed solely by one party shall be owned solely by that party, shall be incorporated into the Packaging, and shall be subject to the exclusivity provision contained in Section 5.1 above.

(Id. at 6).

Voyzey testified that he understood the Joint Development Agreement to state that if Graphic solely developed a concept, Graphic would own it, but if there was an invention or a concept developed by both Nestle and Graphic, it would be jointly owned by them. (Kroll Dec., Exh. 17, [Docket No. 399], 17). Specifically, Voyzey testified that he understood "solely" to mean "no one else had a hand in that development." (Id.).

Voyzey agreed in his testimony that one way for Graphic to have multi-year protection in the market, which was identified in the previously mentioned PowerPoint presentation as a goal of Project Roxanne, was to patent **[*45]** the sleeve design. (Kroll Dec., Exh. 17, [Docket No. 399], 12). Voyzey further testified that by March 2005 he was "considering patent protection as a means of [o]btaining multi[-]year protection for sleeves produced by Graphic for Nestle." (Id. at 17).

Graphic structural designer Kelly Fitzwater testified that she began working on Project Roxanne at the end of 2005, but she had not worked on Project Quantum; Voyzey agreed with this timing in his testimony. ((Kroll Dec., Exh. 17, [Docket No. 399], 20; Kroll Dec., Exh. 89, [Docket No. 471], 3-4). Fitzwater further testified that she had no role in preparing drawing 50019D, which was the sleeve design with pillow packs. (Kroll Dec., Exh. 89, [Docket No. 471], 10). However, Fitzwater's role in Project Roxanne "would have been to take concepts of others, including project leaders, and essentially put them to paper, create drawings." (Id. at 5). She testified that she did not create drawings or samples absent a specific request to do so. (Id.). Brower similarly testified that that he worked with

---

[5] See, fn. 4, supra.

Fitzwater and could not "recall any instances where [he] asked [Fitzwater] to come up with a new design without providing her some direction as to what [he] wanted **[*46]** in that design." (Kroll Dec., Exh. 83, [Docket No. 465], 7).

During her deposition, Fitzwater identified various drawings—Drawings 51616D, 51616E, and 51616F—and she noted the differences in the designs represented therein. (Kroll Dec., Exh. 89, [Docket No. 471], 11).

On September 30, 2005 ("the September 30, 2005, email"), Brower sent an email to Fitzwater—copied to Voyzey—that included suggestions on Drawings 51616D, 51616E, and 51616F. (Kroll Dec., Exh. 90, [Docket No. 472], 3). Brower testified that the September 30, 2005, email was "specifically advising [Fitzwater] that [Nestle] would like a new variation of the sleeve with a single tear strip located approximately halfway down the sleeve." (Kroll Dec., Exh. 83, [Docket No. 465], 9). Both Voyzey and Biddle testified that the September 30, 2005, email contained suggestions and feedback on Drawings 51616D, 51616E, and 51616F. ((Kroll Dec., Exh. 33, [Docket No. 415], 15-16); Kroll Dec., Exh. 39, [Docket No. 399], 23). Fitzwater confirmed that as of September 30, 2005, Brower communicated to her that he wanted one tab on the sleeve. (Kroll Dec., Exh. 89, [Docket No. 471], 11).

Voyzey testified that he had once referred to a "fourth" **[*47]** design—in addition to the three drawings referenced above--because of Brower's desire for a tear away panel that exposed approximately half of the sandwich at once. (Kroll Dec., Exh. 17, [Docket No. 399], 25). Biddle similarly testified that he understood the "fourth design" to be based upon the suggestion that Brower had made. (Kroll Dec., Exh. 33, [Docket No. 415], 17). Voyzey further testified that prior to Brower's suggestion, there was no drawing of a sleeve with a single tear-away portion that removed approximately half of the sleeve. (Id. at 24).

On October 2, 2005, Voyzey sent an internal Graphic "sample request" (also referred to as a "CAD Request" and a "drawing request form") requesting a change to Drawing 51616C "removing the top horizontal zipper. One zipper that removes the top 2 [inches] with one zipper." (Kroll Dec., Exh. 91, [Docket No. 473], 3). Voyzey testified that this sample request was intended to reflect the changes suggested by Brower in the September 30, 2005, email, and Fitzwater agreed that it appeared that the sample request was made to produce a design with the features Brower requested in the September 30, 2005, email. (Kroll Dec., Exh. 17, [Docket No. 399], 27-28; **[*48]** Kroll Dec., Exh. 89, [Docket No. 471], 12). Voyzey also testified that Drawing 51616G was completed on October 3, 2005, and was consistent with his October 2, 2005, sample request. (Id. at 28). Biddle similarly testified that Fitzwater's Drawing 51616G was the drawing that reflected Brower's suggestion in the September 30, 2005, email. (Kroll Dec., Exh. 33, [Docket No. 415], 18).

On October 2, 2005, Voyzey sent an email to Mark Sinclair (whose role at Graphic is not indicated in the record) and Biddle and copied it to Fitzwater, Best, Dan Keefe (whose role at Graphic is not known), Scott Middleton (whose role at Graphic is not known), and Terry Lafferty (whose role at Graphic is not known); that email referred to "3, soon to be 4, pillow pack designs we've shown to Nestle for project Roxanne." ((Kroll Dec., Exh. 33, [Docket No. 415], 14; Kroll Dec., Exh. 90, [Docket No. 472], 2). Voyzey further noted in the email that "Marketing was more excited about these than they have been about any concepts we've shown them to date. They seemed to forget that we had shown them pillow pack concepts 18 months ago." (Id.). Voyzey stated: "[Fitzwater] has submitted these designs to see if they are patentable. **[*49]** We need to move quickly to see if these are patentable concepts and if so to get them protected as soon as possible." (Id.). Attached to Voyzey's October 2, 2005, email was Brower's September 30, 2005 email, which explicitly stated that "these designs fall under our Exclusivity Agreement." (Id. at 3-4).

Biddle testified that he could not produce any documentation to show that he had inquired into the assertion in Voyzey's October 2, 2005, email that Graphic showed Nestle pillow pack concepts 18 months prior. (Kroll Dec., Exh. Exh. 33, [Docket No. 415], 17; Exh. 90, [Docket No. 472], 2).

On October 7, 2005, Fitzwater signed a form entitled "Graphic Packaging Corporation Invention Disclosure." (Kroll Dec., Exh. 95, [Docket No. 476], 2). The Invention Disclosure Form ("IDF") states: "This invention is a MW sleeve that contains a food product (a heat and serve sandwich, for example) which might be consumed by the user while 'on the go.' Consequently, it features tear-off portions which the person can remove as the product is 'eaten down.'" (Id.). The IDF refers to "GPI drawings #51616D, 51616G," and states that the invention "was first disclosed to another person" on September 23, 2005, when "[s]amples **[*50]** and drawing were submitted to Corey Brower @ Nestle." (Id.).[6] Fitzwater testified that if she had questions about an Invention Disclosure Form, she would "[p]robably" go to Graphic's patent attorneys, including Biddle. (Kroll Dec., Exh. 89, [Docket No. 471], 7). She further testified that her understanding was that an Invention Disclosure Form (IDF) would eventually go to Biddle or another individual involved with Graphic's patent attorneys. (Id. at 8, 13).

Graphic's *Rule 30(b)(6)* representative, Jeffrey Sloat, testified that once an IDF was completed, "[i]t goes through a witness process. Other people have to read through it, and then sign as witnesses, and then it gets sent to our internal Counsel, . . . Barry [Biddle] **[*51]** for approval. If he approves it, then it goes into [*sic*] our external Counsel for generation of an application." (Kroll Dec., Exh. 106, [Docket No. 487], at 3).

Biddle testified that his responsibilities at Graphic included managing Graphic's intellectual property portfolio and managing patent prosecution activities, including "sometimes" reviewing them, but he did not draft claims, applications, or responses to office actions. (Kroll Dec., Exh. 33, [Docket No. 415], 4).[7] Biddle was the primary contact person between Graphic and its outside patent counsel since at least 2005. (Id.). Biddle testified that he believed it was correct to say that "a sale of a purported invention . . . more than a year prior to the filing of application is a clear bar to patentability." (Id. at 22). He also testified that he was aware that the disclosure obligations required the disclosure of information on enablement, on possible prior public uses, sales, offers to sell, derived knowledge, prior invention by another, and inventorship conflicts. (Id. at 24).

Biddle further testified that he was "involved in pursuing patent [] protection on Kelly Fitzwater's inventions." (Kroll Dec., Exh. 33, [Docket No. 415], 11). He further **[*52]** testified that he is aware that Graphic "prepared and filed a

---

[6] Inline merely cites generally to Expert Kowalchyk's explanation and summary of the process by which "Graphic applied for multiple patents from 2005 to 2013 that incorporate and claim the three major categories of concepts and ideas Brower and others at Nestle provided under Projects Quantum and Roxanne and the JDA." (Mem. in Supp., [Docket No. 381], 33, citing generally to "Exh. 81, ¶¶ 37-99; Exh. 82, ¶¶ 27-61). Similarly, Inline cites only to its Expert Report and Rebuttal Report as the support for the following paragraph:

> Someone at Graphic . . . created invention disclosures on the Hot Pocket designs that incorporate the drawings made pursuant to Brower's instructions and claim Brower's contributions. Someone also revised the disclosures after Brower's September 30, 2005, email, so that one of the disclosures specifically referenced the new Drawing 51616G. But Fitzwater is the only person identified as the inventor in all of the disclosures. Fitzwater signed the disclosures and submitted them for patenting.

(Mem. in Supp., [Docket No. 381], 32-33). Inline also cites only to the Expert Report and Rebuttal Report for the following assertions: (1) "Graphic applied for an entire family of patents (the "Invalid Patents") that were all premised on Nestlé's contributions"; (2) "Although the Invalid Patents claim concepts provided by Brower, on behalf of Nestle, none of the applications or patents list him or anyone else at Nestle as an inventor"; (3) "But because Brower and others came up with the patentable concepts, the law required that they receive attribution. Since the patents do not list them as at least co-inventors and instead incorrectly list Fitzwater as the sole inventor, the patents are invalid." (See, Mem. in Supp., [Docket No. 381], 33). Because it is improper to consider an expert's characterization of facts or conclusory statements as evidence relevant to a plaintiff's burden to show a prima facie case for punitive damages in order to succeed on a motion to amend a complaint to add punitive damages, the Court, as already explained above, does not consider this as evidence. In light of its ability to consider the record as a whole, however, the Court may consider as general background that Inline intends to argue that the patents which Graphic asserted in its conversations with Nestle and in its patent litigation against Inline are invalid because Fitzwater is allegedly listed as the only inventor when Inline asserts that this is untrue.

[7] On May 25, 2007, Biddle authored an email regarding a patent (unrelated to the patents currently at issue in this litigation) on which a third-party was claiming he should be listed as an inventor. (Kroll Dec., Exh. 108, [Docket No. 489], 2-3). In that email, Biddle states that he reviewed a patent application "as well as the development documents that have been forwarded to me by the listed inventors and I have had several conversations with GPI [Graphic] personnel that were involved in the development of the product." (Id.). The email continues on to communicate Biddle's thoughts on the validity of the third-party's claim to inventorship. (Id.). Inline cites this singular example in support of its broad assertion that "Biddle historically investigated inventorship issues relating to collaborative work between Graphic and other partners that involved less substantive concepts." (See, Mem. in Supp., [Docket No. 381], 37).

patent application on . . . the sleeve invention that she developed," and that while Biddle may or may not have reviewed or approved it, he would have worked with outside patent counsel and ultimately instructed outside patent counsel whether they were permitted to file the provisional patent application. (Id. at 5, 12, 23). But later, Biddle testified that he reviewed all of the Invention Disclosure Forms (IDFs) which were sent to outside patent counsel. (Id. at 28). Biddle testified that he would have seen Fitzwater's drawings "if they were attached to an [IDF] that was sent to [him]," and he "believe[d]" he eventually saw drawings for Fitzwater's IDF. (Id. at 14, 19). Biddle testified that he ultimately instructed outside patent counsel to file the nonprovisional patent application on Fitzwater's design, listing Fitzwater as the sole inventor. (Id. at 25).

Biddle testified that he did not ever ask for or review Voyzey's Project Roxanne file or interview him with regards to the IDF, he did not recommend to outside patent counsel that they interview Voyzey, and he could not recall whether he performed any due diligence[8] by looking through documents or interviewing people. **[*53]** (Kroll Dec., Exh. 33, [Docket No. 415], 20, 27, 29). Biddle also testified that he did not remember specifically talking to Fitzwater about "what it means to be an original, first and sole inventor" or discussing with her "the Corey Brower concept . . . at or about the time the [nonprovisional] patent application was filed." (Id. at 26).

Voyzey testified that he was aware that Fitzwater had submitted Invention Disclosure Forms claiming to be an inventor of the sleeve designs, and he agreed with the statement that he was "involved in the decision to seek patent protection on [the] designs drawn by Ms. Fitzwater." (Kroll Dec., Exh. 17, [Docket No. 399], 26-27). Voyzey's testified that during his employment at Graphic, he was never "questioned with regard to what is in the[] invention disclosure forms," nor did he recall anyone in connection with the patent-seeking process asking him for information "relating to the work that had been done prior to September 2005 in connection with Project Roxanne and Project Quantum." (Kroll Dec., Exh. 17, [Docket No. 399], 22, 27). Voyzey also testified that he did not recall ever being "asked to collect drawings, memos, materials with regard to the work that **[*54]** had been done on Project Quantum and Project Roxanne as part of patent prosecution efforts." (Id.at 30). Voyzey also testified that he did not talk to anyone at Graphic about whether it was permissible to file a patent solely in Graphic's name despite the joint work with Nestle on the Project Roxanne sleeve. (Kroll Dec., Exh. 17, [Docket No. 399], 14, 18).

Voyzey further testified that he did not recall ever having a conversation with Brower "telling him that the concept of a sleeve with a single tear away feature that exposes about half the sandwich with one tear was being submitted for patent protection by Graphic, and he did not recall ever telling anyone at Nestle that Brower was originally the person who suggested the single tear strip modification. (Kroll Dec., Exh. 17, [Docket No. 399], 29, 35).

Similarly, Fitzwater testified that she understood what it means to be the "sole inventor" of something. (Kroll Dec., Exh. 89, [Docket No. 471], 15). She also testified that "[i]f someone took part in the designing of whatever specifically is being claimed [on an "Invention Disclosure Form"], then they would be added to that invention disclosure. (Id. at 8). She specifically described "the type of information **[*55]** [she understood she] had an obligation to disclose" as "if I was taking somebody else's design and stealing it, I would have to disclose that. That would be wrong. Disclosing anything that I believe is unpatentable, I guess. . . . disclosing everything I know, that I believe has anything to do with what I created." (Id. at 16). Fitzwater further testified that she had "no role in preparing drawing 50019[D], and she created drawings of an already-existing but modified sleeve with added tear strips and a closed bottom. (Id. at 6, 10). She also testified, as related above, that Brower suggested modifications to the design, including the suggestions in the September 30, 2005, email. (Id. at 12). Yet, she testified that she didn't recall whether she "ever advise[d] Mr. Brower that [she] submitted an invention disclosure on the drawing that [she] did pursuant to his suggestion." (Id. at 14).

For his part, Brower testified that he did not recall anyone at Graphic ever advising him that they were seeking patent protection on the designs that resulted from his suggestions, and he did not recall ever being advised that Fitzwater had submitted invention disclosure forms claiming the resulting drawings as her own inventions. (Kroll Dec., **[*56]** Exh. 83, [Docket No. 465], 10-11).

---

[8] The deposition excerpt provided by Inline does not provide context as to what, exactly, Biddle or Inline were referring to that Biddle could have performed due diligence in regard to. (See, Kroll Dec., Exh. 33, [Docket No. 415], 21).

On December 20, 2005, Voyzey submitted another sample request to Fitzwater, and included the following notation: "One more change for the Roxanne Sleeve. They'd like to add a locking tab to the bottom flaps. Something like a cereal box top." (Kroll Dec., Exh. 93, [Docket No. 383-2, 2). Brower used this sample request in his Declaration as "[a]nother particular example of Nestle providing instructions to Graphic." (Kroll Dec., Exh. 85, [Docket No. 467], 6). On December 20, 2005, Fitzwater completed Drawing 51616M. (Kroll Dec., Exh. 94, [Docket No. 475], 2).

Voyzey testified that the Project Roxanne Hot Pocket sleeves were commercialized in or around 2007, and Nestle was required to purchase 100 percent of the Roxanne Hot Pocket sleeves from Graphic from 2007 to 2014. (Kroll Dec., Exh. 17, [Docket No. 399], 16). Biddle testified that he "believe[d it] is correct" to say that "the Roxanne sleeve ultimately procured by Nestle was developed pursuant to" the Joint Development Agreement. (Kroll Dec., Exh. 33, [Docket No. 415], 10). Similarly, Best agreed "that the Roxanne sleeve ultimately procured by Nestle was developed pursuant to" the Joint Development **[*57]** Agreement. (Kroll Dec., Exh. 3, [Docket No. 387], 9).

In addition to the evidence detailed above, Inline also submitted to the Court excerpts from Graphic's "Code of Business Conduct and Ethics." Best and Jim Seefeldt, Graphic's vice president of sales, both testified that they were aware of the Code of Business Ethics and Conduct and that they signed and acknowledged it annually. (Kroll Dec., Exh. 3, [Docket No. 387], 17; Kroll Dec., Exh. 9, [Docket No. 391], 5). Best further testified that he had never self-reported that he had violated that ethical code, and although he had contacted Graphic's legal department "on occasion" about his concerns, none of those contacts "in any way, directly or indirectly, involve[d] the allegations" asserted by Inline in this litigation. (Kroll Dec., Exh. 3, [Docket No. 387], 20).

Inline states that "Graphic's code of ethics prohibited employees from engaging in the kind of deceit continuously exhibited by Graphic's leadership." (Mem. in Supp., [Docket No. 381], 37). The Court first notes that the page cited to support this assertion is the introduction to the Code of Business Conduct and Ethics and states only the "Purpose of Our Code" and that it "applies **[*58]** to us all." (See, Kroll Dec., Exh. 25, [Docket No. 407], 6). Inline also directs the Court to excerpts from Graphic's Code of Business Conduct and Ethics that state that (1) managers must "uphold[] the highest standards of professional conduct"; (2) employees should "Never get involved in any discussion that may be interpreted as interfering with free and fair competition"; (3) employees should "not take unfair advantage of anyone through manipulation, concealment, abuse of privileged information, misrepresentation of material facts, or any other unfair dealing practice"; and (4) employees should "speak up" even if they "only suspect unethical behavior." (Kroll Dec., Exh. 25, [Docket No. 407], 9, 11, 30-31).

Inline now contends that the evidence detailed above establishes by clear and convincing evidence that "Graphic leadership knew that the patented concepts were not invented by Fitzwater because the Concepts were developed under the JDA and Projects Quantum and Roxanne." (Mem. in Supp., [Docket No. 381], 35). Inline also argues that "Graphic leadership on Project Roxanne, Biddle in particular . . . knew facts creating a high probability that Fitzwater was not the sole inventor of **[*59]** the Invalid Patents, but willfully turned a blind eye." (Id. at 37).[9]

The Court observes, however, that some of Inline's assertions in its argument on this point are entirely conclusory and are not supported by its citations to the evidence in the record now before the Court. For example, while asserting Graphic had knowledge that the patents were invalid, Inline states that "Graphic leadership even

---

[9] In their respective Memoranda in support of and in opposition to the present Motion to Amend to Plead Punitive Damages, both Inline and Graphic argue the ultimate merits of the underlying claims in this suit. Graphic does so extensively, as it argues that Inline "fails to establish a prima facie case of tortious interference with contractual relationship," that "Inline has failed to present a prima facie case . . . that Graphic's assertion of its patent rights was wrongful or unlawful," and that "Inline does not offer evidence of any specific intent to deceive the [United States Patent and Trademark Office." (Mem. in Opp., [Docket No. 506], 14, 22, 39). None of this is relevant to the present Motion to Amend to Plead Punitive Damages. See, *Coy v. No Limits Education, No. 15-cv-93 (BRT), 2016 U.S. Dist. LEXIS 193954, 2016 WL 7888047, *2 (D. Minn. April 1, 2016)* ("[W]hen deciding whether punitive damages are available, courts do not need to examine the merits of the underlying claims or determine whether they were properly pleaded. Those questions are best considered in the context of dispositive motions."). Therefore, the arguments of both parties which go to the merits of the underlying claims are not addressed in this Order.

acknowledged that there were 'valid concerns from past history regarding IP ownership.'" (Mem. in Supp., [Docket No. 381], 38). However, the email to which Inline cites in support of this specific contention is a February 11, 2016, email from Katie Kloth (whose role at Graphic is not known) to Seefeldt discussing a potential future project with Nestle that in fact has nothing to do with the issues in the present litigation. (See, Kroll Exh. 100, [Docket No. 481], 20.

Similarly, Inline states that "after the 2016 Nestle RFP process, Seefeldt noted that the Invalid Patents resulted from Nestlé's 'insight' and 'improvements' and acknowledged that it was Nestlé's design." (Mem. in Supp., [Docket No. 381], 38). The citation in support of this assertion, however, is actually **[*60]** to an October 28, 2015, email string with the subject line "Nestle Hot Pocket sleeve history" in which Kloth wrote to Seefeldt:

> We started the sleeve back in 1984 with a simply square sleeve designed for Nestle. Around 2005, they came back to us with some additional consumer insight wanting to make improvements. At that time we created 12† designs for them, which were tweaked a few times before they agreed to a final sleeve they are still using today. At that time, we patented the design, but had no exclusivity to Nestle - only an agreement and understanding that it was their "Nestle design". [*sic*]

(Kroll Dec., Exh. 112, [Docket No. 494], 2). In response, Seefeldt wrote only: "Thanks Katie[.]" (Id.).

In addition, some of Inline's other characterizations of the evidence in the record now before the Court are imprecise at best. For example, Inline asserts that "Best told the Graphic team to 'stay focused on . . . Inline' and to push for Nestle to license Graphic's patents via an 'economic move to incent this offer' and make 'the legal stuff go[] away." (Mem. in Supp., [Docket No. 381], 38). Inline cites here to Exhibit 113 to the Kroll Declaration, which includes an email from Best to various **[*61]** Graphic employees dated December 11, 2015, which stated, in relevant part:

> We are advancing a thought on how to get an extension on the Nestle Sleeve-Microwave business[.]
> He needs the following recap on all the Nestle Sleeve-Microwave business. Essentially, we are looking for you to go through the Nestle business and provide the following input.
>
> Lets [*sic*] stay focused on the Inline and GPI microwave business. I know that Westrock runs some patch items but believe this is a bit out of scope for this exercise.
>
> Item Supplier Sales Margin Is it Patented (y/N) [*sic*]
> If Yes, when expires How easy to get around the patent?
> Make sense?
>
> This is pretty hot...Bill, Jeff...we have the opportunity to talk with Mike U next week. Part of our conversation needs to checking [*sic*] his willingness to license Nestle on the Roxanne sleeve (provided we hold our volume-4 year deal) and all the legal stuff goes away. We would make an economic move to incent [*sic*] this offer and deliver some Stouffer [*sic*] carton growth.

(Kroll Dec., Exh. 113, [Docket No. 495], 2-3) (ellipses in original). When put into full context within the email, Best's language is not at all as Inline characterizes it.

Evidence Which Inline [*62] Asserts Shows that Graphic Asserted the Patents Despite Knowing that doing so had a High Probability of Injuring Inline's Right to Interference-Free Business Relations

Inline next argues that despite knowing or disregarding facts which showed that the implicated patents were invalid, Graphic nevertheless applied for the patents at issue because it sought "multi-year protection in the market" for Hot Pocket Sleeves, it was concerned about upcoming expirations of previously issued patents, increased competition from Inline motivated Graphic to seek the patents, and seeking patents based on others' ideas is common strategy for Graphic. (See, Mem. in Supp., [Docket No. 381], 34). Therefore, Inline claims, Graphic deliberately took actions which interfered with Inline's prospective and existing business relations despite knowing of a high probability that such actions would injure Inline's right to interference-free business relations. See, *Minn. Stat. § 549.20, Subd. 1(b)*.

The following is the evidence upon which Inline relies for this portion of its argument.

An unknown Graphic employee created an unsigned "update" regarding events in October 2008, stating:

> Inline Packaging is showing up within all groups within Nestle. **[*63]** They've made presentations to R&D, Stouffer's, HHFG in Denver and with Lou Judge [at Nestle] in St. Louis in the last 60 days. They have provided sample for 3 of the projects we are working on today . . . Project leaders report Inline being very aggressive and very innovative.

(Kroll Dec., Exh. 41, [Docket No. 423], 2; <u>see, also</u>, Kroll Dec., Exh. 52, [Docket No. 434], 1).

On May 13, 2009, Best issued Graphic's Monthly Report for April 2009, which reported: "Competitive activity from In Line [*sic*] packaging has risen to a troubling level. They have attacked in a number of our high profit, low end, and non protective structures at Nestle, Heinz, and Schwan's. It is obvious that our customers are using them to apply pressure to GPI." (Kroll Dec., Exh. 12, [Docket No. 394], 4).

In June 2009, a series of internal Graphic emails and an email to Lou Judge, Group Manager of Strategic Procurement at Nestle, from Tim Klisares, Sales Manager for Graphic, regarding Graphic's offer to reduce product pricing for Nestle in exchange for Graphic receiving 100% of Nestlé's business and Nestlé's rejection of that offer. (Kroll Dec., Exhs. 22-24, [Docket Nos. 404, 405, and 406).

In an internal Graphic email **[*64]** dated October 5, 2009, Larry Seaborg (whose role at Graphic is not known) informed Seefeldt, among others, that a third-party had "state[d] he would not give ideas to [Graphic] because they run out and get patents on his ideas." (Kroll Dec., Exh. 99, [Docket No. 480], 2).

Jeffrey Watkins, President of Inline, testified that Inline became a fully qualified Nestle supplier in 2011. (Kroll Dec., Exh. 5, [Docket No. 386], 4). (Kroll Dec., Exhs. 22-24, [Docket Nos. 404, 405, and 406; Kroll Dec., Exh. 52, [Docket No. 434], 1).

In November 2011, Voyzey prepared and issued an internal Graphic "project summary" that noted that Nestle had confirmed its intent to move the Kahiki sleeve business to Inline effective January 2012. (Kroll Dec., Exh. 9, [Docket No. 391], 22; Kroll Dec., Exh. 45, [Docket No. 427], 2). Voyzey testified that susceptor products that Graphic manufactured and sold generally have a higher margin when compared to folding carton products. (Kroll Dec., Exh. 17, [Docket No. 399], 33).

On November 30, 2011, Mike Vance (whose role at Graphic is not known) emailed Pete Lokar (whose role at Graphic is not known), Klisares, and Seefeldt, and he stated that in an open bid situation, **[*65]** Graphic could be forced to reduce its profitability margin on microwave sleeves by up to 20%. (Kroll Dec., Exh. 44, [Docket No. 426], 4). In the email, Vance also stated: "As you are aware the microwave business is under competitive pressure and will likely take a hit when our contract is up." (<u>Id.</u>).

William Sedlacek, former Vice President and General Manager of the Graphic's Microwave Division until 2011, when he became Vice-President of Innovation and Business Development for Graphic, testified that he had also received Vance's November 30, 2011, email. (Kroll Dec., Exh. 28, [Docket No. 410], 6; <u>Id.</u> at Exh. 44, [Docket No. 426], 4). Sedlacek further testified that at the time, he was willing to reduce the profitability margin on microwave sleeves provided that Graphic retained 100% of the paperboard production. (<u>Id.</u> at 7; <u>see, also</u>, Kroll Dec, Exh. 9, [Docket No. 391], 24).

In a related email on December 5, 2011, Seefeldt stated:

> I believe Nestle is committed to get a back[-]up source of supply on susceptor for leverage. Nestle believes — and has believed for some time that our prices on susceptor are very high because we are 'unchecked' in the market. . . . I think this is mostly about leverage **[*66]** and back up and the fact that Lou [Judge] has probably seen significant double digit saving opportunities via [I]nline.

(Kroll Dec., Exh 44, [Docket No. 426], 2). Seefeldt later testified that he learned in late 2011 that Nestle was awarding Inline—instead of Graphic—its Kahiki spring roll susceptor sleeve business. (Kroll Dec., Exh. 9, [Docket No. 391], 22).

Inline argues that "[i]ncreased competition from Inline put pressure on Graphic to obtain patents. (Mem. in Supp., [Docket No. 381], 34). However, the evidence Inline cites to support this extremely broad assertion is only Best's testimony that Graphic did "[n]ot necessarily" want a protectable design; "We wanted to solve the customer's issue." (See, Id.; see, also, Kroll Dec., Exh. 3, [Docket No. 387], 7). The deposition excerpt cited by Inline does not support its assertion that pressure from Inline motivated Graphic to obtain patents.

Similarly, at his deposition, Seefeldt was asked: "You would agree with me that patents on microwave susceptor technology are a party of Graphic's strategy for keeping its microwave susceptor business? Yes?" (Kroll Dec., Exh. 9, [Docket No. 391], 11). Seefeldt replied:

> I think that where we have worked **[*67]** and invested for patents and technology, that we want to use that to our advantage and the customer's advantage, and so does it ever tie into the strategy? It does. But again we've earned the patent and the customers found value in it. So . . . ."

(Id. (ellipses in original transcript)). Inline cites to this portion of Seefeldt's testimony to support its equally broad assertion that "patents are a part of Graphic's usual 'strategy' for keeping susceptor business." (See, Mem. in Supp., [Docket No. 381], 34). When considered in proper context, however, Inline's characterization of the cited deposition testimony is plainly imprecise.

In any event, on December 5, 2011, Klisares sent Judge (at Nestle) an emailed proposal offering a reduction in product price if Nestle would extend Graphic's Kahiki sleeve contract, extend other susceptor agreements with Graphic, and award additional business to Graphic. (Kroll Dec., Exh. 46, [Docket No. 428], 2-3). Sedlacek testified after becoming aware of the award of the Kahiki sleeve business to Inline, Graphic nevertheless sought to extend its right to sell Kahiki sleeves for another year, despite potential interference with the award to Inline. (Kroll **[*68]** Dec., Exh. 28, [Docket No. 410], 9).

In an April 4, 2012, email to Seefeldt, Klisares referred to an "applied-for patent" on the microwave sleeve and stated that the patent might not be issued "for months." (Kroll Dec., Exh. 9, [Docket No. 391], 25-26; Id. at Exh. 53, [Docket No. 435], 2). Yet in an April 13, 2012, email Klisares sent to Judge (at Nestle), Klisares purported to remind Judge of a conversation in November 2011, during which Klisares had informed Judge that the microwave sleeve in question was "a GPI patented structure" and so a licensing agreement might be necessary if Nestle awarded the sleeve production to another company. (Kroll Dec., Exh. 47, [Docket No. 429], 2-4). Judge stated in his Declaration: "Nestle takes allegations and threats relating to intellectual property infringement very seriously." (Kroll Dec., Exh. 52, [Docket No. 434], 3). Sedlacek testified that it was "likely" that Klisares made the statements to Judge regarding the GPI (Graphic) patent to create uncertainty about whether Inline could produce the sleeve without infringing on GPI's patent. (Kroll Dec., Exh. 28], 10).

In an email dated April 13, 2012, Klisares reported to Seefeldt that he had emailed **[*69]** Judge, and Seefeldt replied, "Well done." (Kroll Dec., Exh. 47, [Docket No. 429], 2). When Seefeldt was later asked if, at the time of those emails, he "understood that there had been no patent issued on the Kahiki sleeve," Seefeldt testified:

> I think that maybe the difference is if we applied for it, that that was, made it a valid. So if it's applied for, you know, it's almost like it's patented, you know, to laymen folks, maybe not in the legal sense of it. But if we have applied for it, we are protected for it and it's a protected structure from what I understand about patents, and I don't understand a lot, but that's what I thought to understand.

(Kroll Dec., Exh. 9, [Docket No. 391], 27).

Biddle testified that he "believe[d]" he had told Klisares—prior to Klisares' April 13, 2012, email to Judge—that they could not sue for patent infringement on a patent which is currently pending. (Kroll Dec., Exh. 33, [Docket No. 415], 30). What Inline doesn't acknowledge is that immediately following the deposition excerpt to which Inline cites, Biddle further testified that he felt that Klisares "had in particular at the time a poor understanding as to the difference between a patent and . . **[*70]** . a pending patent application", and Klisares "was ignorant" in "what you can and cannot do" with respect to each. (Kroll Dec., Exh. 33, [Docket No. 415], 30). In addition, although Biddle testified that he told Klisares that there was no patent at the time, Biddle further testified that he felt Klisares' statements to Judge were a mistake, rather than a lie. (Id. at 31).

On August 28, 2012, Judge (at Nestle) emailed Watkins (at Inline) an indemnification agreement Nestle planned to ask Inline to sign "concerning the sleeve currently packed at Kahiki Foods." (Kroll Dec., Exh. 48, [Docket No. 430], 2-3).

In a series of internal Graphic emails dated June 20 through June 22, 2012, Graphic employees discussed topics for an upcoming meeting between Graphic and Nestle regarding packaging safety and certificates of compliance. (Kroll Dec., Exh. 43, [Docket No. 436], 2-5). In one of the emails, Klisares stated that Sedlacek had:

> suggested we use this forum with [Nestlé's incoming Global Manager of Packaging Safety] to plant the seed of doubt with regards to the Microwave topic — that while GPI [Graphic] is a market leader in the field and can speak to our level of compliance, we can not [*sic*] vouch for **[*71]** lesser companies out there (Inline) that may not be as sophisticated or well resourced. Further — since he may not be aware that Nestle has recently moved some business to Inline — that he probe them in terms of [certificates of compliance] to make sure that they can, and will comply with the same level of scrutiny that GPI and other large suppliers are being asked to meet.

(Id. at 2). Pete Lokar (whose position at Graphic is not known) replied that he "like[d the] strategy of using this process as a way to highlight our resources . . . and also plant the seed of doubt in any upstart in this space (like InLine [*sic*]). We need to make sure that is an objective of this meeting." (Id.). Klisares agreed: "[I]t will be an objective of the meeting." (Id.).

Sedlacek himself testified that he "wanted to plant a seed of doubt" with Nestlé's incoming Global Manager of Packaging Safety, and that he did not have any evidence that Inline was not in compliance with safety requirements. (Kroll Dec., Exh. 28, [Docket No. 410], 11). Here again, what Inline does not acknowledge about the cited deposition testimony is that Sedlacek testified immediately thereafter that during the meeting he did not actually assert **[*72]** that Inline was not in safety compliance. (Id.).

In a May 30, 2013, internal Graphic email exchange, Warren Burn (whose role at Graphic is not known) asked, "Would In-Line [*sic*] make a good tuck under?" and Lokar responded, "Yes — just to get In-Line [*sic*] out of our way and from screwing up the market here." (Kroll Dec., Exh. 69, [Docket No. 451], 2).

On September 3 and 4, 2013, there were a series of internal Graphic emails including Sedlacek, Lokar, Klisares, and Seefeldt that identified two potential competitors—one of which was Inline—for microwave sleeve business which expired in June 2014, and later stated there was no data to suggest the other competitor was active in the microwave sleeve business. (Kroll Dec., Exh. 55, [Docket No. 437], 2-5).

On December 7, 2013, Jeff Martinez of Graphic (whose role there is not known) emailed Gregory Scharine of Nestle (whose role there is not known) and informed him that two sleeves they had been discussing were covered "at least" by two patents. (Kroll Dec., Exh. 58, [Docket No. 440], 2). Seefeldt later testified that he "believed" that Martinez had informed Nestle that there were Graphic patents which would be infringed if Nestle awarded **[*73]** Inline the sleeve business involved in anticipated January 2014, bidding for Nestle business. (Kroll Dec., Exh. 9, [Docket No. 391], 29). Voyzey also testified that "well in advance" of January 31, 2014, multiple people at Graphic—including Voyzey, Klisares, and possibly Martinez and/or Seefeldt—had informed Nestle that the Hot Pocket sleeves were patent-protected, and Voyzey believed that he himself had discussed the issue with Judge (at Nestle) in 2011 or 2012. (Kroll Dec., Exh. 51, [Docket No. 433], 9-10).

On January 8, 2014, Nestle accepted bids on multiple lots of business ("the ARIBA auction") that included provision of microwave susceptor sleeves. Watkins (at Inline) testified that even prior to the ARIBA auction, Inline and Nestle had communicated about possible Hot Pockets patent issues. (Kroll Dec., Exh. 5, [Docket No. 386], 9-10). Inline has provided screenshots from ARIBA Sourcing which it asserts shows that Inline's January 8, 2014, bids were the lowest bids for Nestlé's "Lot 1 — MEDFORD," Kahiki Spring Roll Wrappers, Hot Pocket, Croissant Pocket lots. (Kroll Dec., Exh. 59, [Docket No. 441], 2-4; Exh. 60, [Docket No. 442], 2-4). Inline has also provided screenshots from **[*74]** ARIBA Sourcing which Watkins later testified showed that bidding was completed and Inline had been awarded the Nestle lots. (Kroll Dec., Exh. 5, [Docket No. 386], 5-7); Kroll Dec., Exh. 62, [Docket No. 444], 2-9).

In a January 29, 2014, internal Graphic email string including Sedlacek, Seefeldt, Lokar, and various other Graphic employees, Sedlacek stated that Nestle had informed another Graphic employee that "they intend to move the entire sleeve business," that Graphic's bid was not the lowest, and that Graphic "might be able to salvage something (maybe up to 40$) with a bold move." (Kroll Dec., Exh. 61, [Docket No. 443], 2-3). Similarly, Voyzey testified that the feedback from Nestle after and regarding the ARIBA bids was that Nestle was "in a position to move 100 percent of the microwave susceptor sleeve business." (Kroll Dec., Exh. 51, [Docket No. 433], 7).

In an email dated February 7, 2014, Shannon Gavie (who appears to be a Nestle employee) informs Judge and Kathryn Carlson (who appears to be another Nestle employee) of an error that was discovered in one of the lots and an email dated February 9, 2014, in which Judge replies, in relevant part, "I do not think a rebid is in order **[*75]** as GPI [Graphic] will get all the business in a blocking strategy to keep Inline out." (Kroll Dec., Exh. 64, [Docket No. 446], 2).

In an internal Graphic email string dated February 16 and 17, 2014, Voyzey opined that it would be "[w]orth pointing out at this point that the croissant sleeve (drawing 51843) is covered by at least 2 patents (7,414,230 & 7,893,389) and 1 pending application. . . . We could remind [Nestle] of these patents now or let it slide for a while." (Kroll Dec., Exh. 65, [Docket No. 447], 2-3). In response, Sedlacek stated:

> Let's focus on getting the current proposal done and not overly complicate finalization of the negotiations. We can probably have greater impact later, rather than creating the turmoil now. While Nestle clearly is involved on the patent question, the legal issue ultimately would be with In Line [*sic*] as they would be the infringer on patents as the manufacturer. . . . My assessment is the patent issue will not force Nestle to give us any more share or prevent them from bringing In Line [*sic*] in with a simple die change. Let's use it with In Line [*sic*] where the legal issue would be anyway. The timing needs to be finalized, but one option would **[*76]** be to monitor In Line's [*sic*] qualifying activity with their limited award, presumptively on the current die cut. As the current contract end nears, play the patent card which should dictate that In Line [*sic*] is prevented from producing the current die cut. They presumably will then have to requalify a revised die cut, essentially starting over again, having wasted time and expense while they pursue the current die cut.

(Id. at 2).

On February 13, 2014, Kathryn Carlson at Nestle (whose role is not known) emailed Judge and Seefeldt, among others, confirming that Nestle was offering Graphic a 2-year extension for lots 3 and 4, which were the Hot Pocket lots. (Kroll Dec., Exh. 65, [Docket No. 447], 4-5).

On February 20, 2014, Watkins signed an indemnification agreement on behalf of Inline for Nestle. (Kroll Dec., Exh. 51, [Docket No. 432], 2). Watkins testified that Judge had informed him that Graphic had said that Inline supplying Hot Pockets would infringe upon Graphic patents. (Kroll Dec., Exh. 5, [Docket No. 386], 9).

In a March 12, 2014, email exchange with Lokar and Vance, Seefeldt noted that Inline had expanded an existing plant and hired additional employees. Seefeldt opined that this expansion **[*77]** was "[o]bviously part of Nestle strategy and probably others," and Lokar replied, "How did we not know this before? Did you share with Voyzey/Sedlacek?" (Kroll Dec., Exh. 66, [Docket No. 448], 2).

In an internal Graphic email dated March 26, 2014, Seefeldt identified topics to discuss during an upcoming internal Graphic phone conference. (Kroll Dec., Exh. 67, [Docket No. 449], 2). One of the 9 topics was: "with inline [*sic*] building new plant — it won't be long before they attack our susceptor margins. If more dollars are needed I suggest we consider reducing margins on susceptor piece to not further erode carton margins and to put us in a better position when inline [*sic*] comes after susceptor[.]" (Id.).

A June 30, 2014, internal Graphic email from Lokar to Best, Seefeldt, and Sedlacek, among other Graphic employees, stated:

> Guys, For preparation for Steve's CPD leadership meeting next Monday-Tuesday, please refer to the attached. Given recent events in the marketplace, we are going to be seriously challenged to find growth. Refer to Steve's email to me on Sunday as a reference. The spreadsheet that he has attached was a condensed version of the countermeasures lists we put together **[*78]** last month. It will serve as a starting point for building this target list. As per my team call last Friday, "gloves are off" gentlemen — what we didn't want to do/weren't willing to do are on the table. We need creative and aggressive ideas. [W]hat I will put together with your input is a starting point — and we will certainly discuss more at the staff meeting next week. See attached — we will discuss live this afternoon.

(Kroll Dec., Exh. 68, [Docket No. 450], 2). This email does not mention Inline in any way. (Id.).

Sedlacek later testified that in 2014, Graphic expressed interest in acquiring Inline. (Kroll Dec., Exh. 28, [Docket No. 410], 13-14). During a meeting with an Inline representative to discuss the acquisition, Sedlacek "didn't talk about the patents at all." (Id. at 13). When asked, "And the reason that you didn't raise those issues is if they weren't receptive to an acquisition, you wanted to be as disruptive to their business as possible. Isn't that correct?" Sedlacek answered, "Potentially, yes." (Id. at 14). Sedlacek further testified that Graphic sued Inline for patent infringement in 2015, and agreed with Inline's deposing counsel that thereby, "[t]he patent card [referred to in **[*79]** the February 2014, internal Graphic emails] was played." (Id.).

On May 5, 2015, Graphic sent Inline a cease-and-desist letter, informing Watkins that Graphic had filed a lawsuit for the alleged infringement by Inline of four patents. (Kroll Dec., Exh. 71, [Docket No. 453], 4). Biddle testified that he was involved in the decision to sue Inline. (Kroll Dec., Exh. 33, [Docket No. 415], 35-36). Inline also argues that "other Graphic leadership, such as Seefeldt" were also involved in the decision to sue Inline, but neither the portion of Biddle's deposition testimony nor the additional citation by Inline in support of this assertion demonstrate this to be the case. Seefeldt's only involvement—as supported by Inline through its citations to the present record—was that Biddle sent Seefeldt a copy of the complaint and cease-and-desist letter and stated: "Please let me know if you have any questions." (See, Id. at 35-36; Kroll Dec., Exh. 71, [Docket No. 453], 2-5). However, in a May 5, 2015, email from Biddle to Seefeldt identifying "talking points" for an anticipated conversation with Nestle, Biddle asked Seefeldt not to "answer any questions regarding strategy, intent, etc." (Kroll Dec., Exh. 72, [Docket **[*80]** No. 454], 2-3).

On May 6, 2015, Seefeldt sent an email to Judge (at Nestle) to which he attached a copy of the cease-and-desist letter meant for Inline. (Kroll Dec., Exh. 9, [Docket No. 391], 30; Kroll Dec., Exh. 70, [Docket No. 452]).

In November 2015,[10] a representative of another food supplier reached out to a Graphic employee seeking information on obtaining susceptor sleeves because it was "having issues with the current supplier on a couple issues." (Kroll Dec., Exh. 29, [Docket No. 411], 3). On November 6, 2015, Voyzey forwarded the email to Best and Sedlacek, among others, referring to it as "some background on Inline and issues they're having in the market." (Id.). Best replied, asking, "Do we know where Inline has business besides Nestle?" (Id. at 2). Voyzey responded, "I know a handful but let me poll the group and put together a comprehensive list of accounts, status, and $value." (Id.). Best replied, "Then put on your pirate hat and attack...Put your foot on their throat...no air[.]"(Id.). Voyzey responded: "Aye, Aye Captain!" (Id.)

On March 11, 2016, Seefeldt emailed Kathryn Carlson at Nestle (whose role is not known) and outlined a proposed agreement under which Nestle would award **[*81]** at least 90% of its microwaveable packaging products to Graphic and, in exchange, Graphic would provide a royalty-free license to Nestle, which it could then sublicense. (Kroll Dec., Exh. 74, [Docket No. 456], 3). The offer was also contingent on Inline dismissing its antitrust lawsuit; Inline's agreeing not to contest the validity of any patents licensed to Nestle; and Inline's agreement to cease any involvement in the inter partes review, other than efforts to assist Graphic in having the inter partes review

[10] The present case was filed in this Court on July 31, 2015.

dismissed. (Id.). In exchange, Graphic agreed to dismiss its infringement suit against Inline. (Id.). Seefeldt testified that Biddle had approved his reaching out to Nestle to discuss a patent license for Inline. (Kroll Dec., Exh. 9, [Docket No. 391], 31-32). Seefeldt further testified that he knew "that [Nestle] preferred [that the patent dispute between Graphic and Inline] wasn't there." (Kroll Dec., Exh. 9, [Docket No. 391], 33).

In an internal Inline email dated January 19, 2016, Jon Wolfe (whose role at Inline is not known) detailed for Watkins a draft of Inline's proposal for the Roxanne (Hot Pocket) susceptor sleeve business with Nestle. (Kroll Dec., Exh. 76, [Docket No. **[*82]** 458], 2-3).

An email dated February 11, 2016, from Kloth (at Graphic) to Seefeldt stated in part, "[E]veryone [at Nestle] really wants to work with Graphic on this [Lean Cuisine and Stouffer's] initiative and partner with us. They do have some valid concerns from past history regarding IP ownership and the recent issues with Inline." (Kroll Dec., Exh. 100, [Docket No. 481], 2). The email further detailed Nestlé's requests on the upcoming project: "[A]ny IP we already own, we keep and anything Nestle owns, they keep. Anything we work on together and create uniquely for Nestle during the session — Nestle would own the IP." (Emphasis in original). (Id.).

As part of an internal Nestle email string dated June 28, 2016, Andrew Leach (whose role at Nestle is not known) recommends keeping the Croissant Pocket business with Inline and keeping the Roxanne (Hot Pocket) sleeves with Graphic. (Kroll Dec., Exh. 77, [Docket No. 459], 2). Leach further noted: "Inline offered slightly higher savings although moving more volume away from GPI [Graphic] would increase the likelihood of GPI taking legal action on the perceived patent infringement." (Id.). The email string shows that ultimately Graphic and **[*83]** Nestle agreed to a 3-year contract extension—through June 30, 2019—with a minimum 85% share maintained by Graphic. (Id. at 2-3).

Based upon the evidence set forth above, Inline contends the record clearly establishes that Graphic perceived Inline to be a competitive threat at major food companies including Nestle. (Mem. in Supp., [Docket No. 381], 21). Inline further argues that after Graphic learned that Nestle had awarded Inline the Kahiki sleeve business in 2011, Graphic nevertheless attempted to extend its Kahiki sleeve business by offering price reductions in exchange for 100% of the business volume from Nestle. (Id.). When Nestle rejected this offer, Inline contends that Graphic asserted that it held patents which covered the Kahiki sleeves despite knowing that those patents had not yet been issued, were only applied-for, and therefore could not be sued upon. (Id. at 22). Inline also asserts that Graphic "attempted to convince Nestle in Summer 2012 that Inline did not comply with food packaging safety requirements" despite having no evidence of non-compliance by Inline. (Id. at 22-23).

Inline contends the record also clearly establishes that Graphic deliberately interfered with Inline's award of business from **[*84]** Nestle in the ARIBA Auction by deliberately asserting rights under patents it knew were invalid due to misrepresented inventorship both in communications to Nestle and in what Inline characterizes as "sham" patent litigation. (Id. at 23). Inline maintains that Graphic told Nestle that it held patents on the Hot Pocket and Croissant Pocket sleeves involved in the 2014, bidding process and there would be patent infringement if the business was awarded to Inline. (Id.). Inline only generally asserts that this communication occurred "[a]round the time of the [ARIBA] auction." (Id. at 24). Inline further argues that the assertion of the patent rights was done with intentional and deliberate disregard of Graphic's knowledge that the patents were invalid and that Graphic's assertion of patent rights "showed deliberate disregard for Inline's rights." (Id. at 37-38).

Inline asserts that although it had been awarded the business in the ARIBA auction because it had the lowest bid, Nestle took the patent threats by Graphic seriously such that it later transferred the Hot Pocket portion of the business back to Graphic, leaving Inline with the "much smaller Croissant Pocket and Kahiki sleeve business." (Id.). After a failed attempt **[*85]** to acquire Inline, Graphic then—according to Inline—decided to "play the patent card" and filed suit alleging infringement by Inline of four patents which Inline has responded to by maintaining Graphic knew the patents to be invalid. (Id. at 25). Inline conclusorily contends that Graphic sued only to "cause 'turmoil.'" (Id.). Inline also asserts that in the context of the business Nestle awarded in early 2016,[11] it awarded Graphic a

---

[11] See, fn. 10, supra.

contract extension in part because Nestle felt "moving more volume away from GPI would increase the likelihood of GPI taking legal action on the perceived patent infringement." (Id. at 26). Thus, Inline contends that "Graphic's intentional assertions of patent rights interfered with Inline's business relations with Nestle, causing Inline to lose the award of Hot Pockets susceptor sleeve business." (Id. at 26-27).

Inline argues that its submitted evidence shows "Graphic's explicit pattern and practice of attempting to interfere with Inline's contractual and prospective relations, Graphic's knowledge of Inline's inroads at Nestle[,] . . . of the invalidity of certain patents due to incorrect inventorship, Graphic's intentions in asserting its sham patents, and Graphic's eventual **[*86]** success in interfering with Inline's relations . . . [thus] demonstrate[ing] Graphic's deliberate disregard for Inline's right to business relations without interference." (Mem. in Supp., [Docket No. 381], 41-42).

The Court, on the basis of the present record, cannot agree.

A "deliberate disregard for [the] right to business relations without interference" is not the showing Inline must make in order to succeed on its Motion to Amend the Complaint to Add Punitive Damages, [Docket No. 504], presently before the Court. Rather, as already stated above, Inline must provide evidence which, if unrebutted, clearly and convincingly allows a conclusion that Graphic (1) was aware of or intentionally disregarded facts that created a high probability of injury to Inline's rights, and (2) deliberately proceeded to act in conscious disregard, intentional disregard, or with indifference to that high probability of injury to Inline's rights. See, *Minn. Stat. § 549.20, Subd. 1(a)-(b)*.

After a thorough review of the multitude of Exhibits now before the Court, both individually and as a whole, the Court concludes that the evidence submitted by Inline, even unrebutted, does not establish a prima facie case to allow Claims I and II to be amended **[*87]** to asserts a claim for punitive damages. Although the proffered evidence, unrebutted as it currently is, might arguably convince a jury that Graphic tortuously interfered with Inline's existing and prospective business relations with Nestle by asserting patent rights under patents Graphic knew or should have known to be invalid, Inline has presented no evidence that Graphic policy makers intentionally disregarded or were aware of the invalidity of its patents, and Inline has presented no evidence that Graphic had "deliberate disregard for the rights" of Inline to interference-free business relations.

Inline attempts to closely parse certain internal emails and other documents in order to characterize them as showing this deliberate disregard, but often those characterizations are not supported by the actual evidence to which Inline cites in support. In addition, although Inline has proffered evidence that Graphic asserted patent rights in its communications with Nestle, a mere assertion of patent rights by Graphic alone does not entitle Inline to seek punitive damages. See, *Virtue v. Creamery Package Mfg. Co., 123 Minn. 17, 142 N.W. 930, 936 (Minn. 1913)* ("It is true that the owner of a patent may lawfully warn others against infringement, and give notice of his **[*88]** intention to enforce his rights, if done in good faith."). Inline must also make a prima facie showing that Graphic asserted those patent rights while either being plainly aware that the implicated patents were invalid or being likewise aware of a high probability that the implicated patents were invalid and that Graphic's assertion of rights on those patents had a high probability of injuring Inline's rights to conduct its business without undue interference.

Inline contends that it has done so. (Mem. in Supp., [Docket No. 381], 42). In support, Inline cites to two cases, both of which factually are materially distinguishable from the present case. First, Inline cites to Sorin Group USA, Inc., a case in which Magistrate Judge Jeffrey J. Keyes granted the plaintiff's motion to amend to add punitive damages under *Minnesota Statue § 549.191*. (Mem. in Supp., [Docket No. 381], 42); see, also, *Sorin Group USA, Inc., 2015 U.S. Dist. LEXIS 192649, 2015 WL 12803583, *1*. Similar to the present case, the plaintiff in Sorin Group USA, Inc. sought to plead punitive damages in relation to a Minnesota state law claim of tortious interference with contractual rights. Id. The asserted interference in Sorin Group USA, Inc. occurred when the defendant engaged in certain conduct regarding plaintiff's **[*89]** employees and eventually hired away two of plaintiff's employees. Id. In its motion to amend its complaint to plead punitive damages, the plaintiff in Sorin asserted that it had entered into employment agreements with both of its former employees, that the defendant knew of those employment agreements, and despite that knowledge, the defendant induced the plaintiff's former employees to violate their obligations under those employment agreements, and that this was conduct that had a high probability of injuring the defendant's contractual rights under those employment agreements. 2015 U.S. Dist. LEXIS 192649, [WL] at *1-2.

In support of its motion, the plaintiff in Sorin Group USA, Inc. provided evidence—by way of testimony from the defendant's in-house counsel—showing that the defendant's in-house counsel had received a copy of the employment agreement, had discussed it with the plaintiff's former employee and with the defendant's senior management, and had specifically warned both the plaintiff's former employee and the defendant's management not to violate its terms. 2015 U.S. Dist. LEXIS 192649, [WL] at *2. The plaintiff also provided direct email evidence that, despite knowledge of a non-compete clause in the employment agreement, high-ranking managerial employees **[*90]** of the defendant had email communication with one of the plaintiff's employees regarding how much business he could "'bring over'" when he left the plaintiff's employment and began working for the defendant. 2015 U.S. Dist. LEXIS 192649, [WL] at *3.

Inline also cites to Northwest Airlines, Inc. v. American Airlines, Inc., 870 F. Supp. 1499 (D. Minn. 1994). (Mem. in Supp., [Docket No. 381], 42). In Northwest Airlines, Inc., the evidence submitted in support of the motion to plead punitive damages included evidence showing that the managing director at Northwest Airlines, who was formerly the manager of American Airlines' yield management operations, telephoned an American Airlines employee and obtained certain information that, as a former manager of American Airlines, he knew or should have known that the information was proprietary, would violate American Airlines' right to employee confidentiality, as well as, violate its right to be free from misappropriation of its proprietary information. Id. at 1503

Both of the cases relied on by Inline are materially distinguishable from the case presently before the Court.

Unlike the plaintiff in Sorin Group USA, Inc. and the defendant in Northwest Airlines, Inc., Inline has not provided sufficient prima facie evidence that Graphic's senior management employees knew or should have **[*91]** known that their actions on behalf of Graphic had a high probability of injuring Inline's rights and nevertheless took those actions. In short, the materials Inline has provided from various lower level employees do not show by clear and convincing evidence that Graphic senior managers knew or disregarded facts showing that the patents it asserted were invalid and that Graphic asserted those patents anyway, despite a high probability that doing so would injure Inline's rights vis-à-vis Nestle.

The case presently before the Court is much more similar to Select Comfort Corp. v. Tempur Sealy International, Inc., No. 13-cv-2451 (DWF/SER), 2015 WL 12803582 (D. Minn. Nov. 6, 2015). In that case, the party moving to seek punitive damages submitted evidence that "[did] not demonstrate that the employees knew the statements [at issue] were false, and deliberately made the statements regardless of their falsity." Id. at *6. "At best, [the] evidence [submitted in support of the motion for punitive damages] may show that [the defendant] was negligent . . ., but this is insufficient to establish a claim for punitive damages." Id. at *4. Similarly, in the present case, the evidence Inline has submitted may show that Graphic negligently or carelessly committed the **[*92]** torts pled by Inline in this lawsuit, and it may show that Graphic's employees did not have a deep understanding of patent law, but it does not show the deliberate nature required to establish a claim for punitive damages.

Inline points out that the Eighth Circuit has allowed evidence of anticompetitive intent in antitrust cases to be inferred; it does not need to be proven by direct evidence. (Mem. in Supp., [Docket No. 381], 18); see, Gen. Indus. Corp. v. Hartz Mountain Corp., 810 F.2d 795, 802 (8th Cir. 1987) ("Specific intent [in the context of an attempted monopoly claim] need not be proven by direct evidence, but can be inferred from the defendant's anticompetitive practices or other proof of unlawful conduct."). While that precept applies to Inline's burden of proof regarding ultimate liability on the underlying state law antitrust claim (or possibly even its state law tortious interference claims) in this case as presented to a jury or other fact-finder, it has long been held in this District that "circumstantial evidence suggesting that defendants acted in deliberate disregard" is insufficient to plead a claim for punitive damages. Best Buy Stores, L.P. v. Developers Diversified Realty Corp., No. 5-cv-2310 (DSD/JJG), 2008 U.S. Dist. LEXIS 5559, 2008 WL 227689, *2 (D. Minn. Jan. 25, 2008).

Even considering the evidence proffered **[*93]** by Inline as unrebutted, as the Court must for purposes of the present Motion to Amend to Plead Punitive Damages, [Docket No. 504], Inline has not satisfied its burden to establish a prima facie case that Graphic had knowledge or intentionally disregarded facts that created a high probability of injury to Inline's rights to conduct its business without interference and that Graphic deliberately proceeded to act in conscious disregard, with intentional disregard, or with indifference to the high probability of injury to those rights. See, *Minn. Stat. § 549.20, subd. 1(b)*.

Accordingly, Inline's Motion to Amend to Plead Punitive Damages, [Docket No. 504], is **DENIED**.

III. CONCLUSION

For the reasons set forth above, **IT IS ORDERED**:

1. That Plaintiff's Motion to Amend to Plead Punitive Damages, [Docket No. 504], is **DENIED**.

LexisNexis® Headnotes

Civil Procedure > Appeals > Standards of Review > De Novo Review

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > Jurisdiction Over Actions

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN1[] **Standards of Review, De Novo Review**

Appellate courts review de novo a district court's dismissal of an action for lack of subject matter jurisdiction. Motions to dismiss are generally viewed with disfavor. The purpose of a motion to dismiss is to test the law that governs the claim in litigation rather than to examine the underlying facts of that claim.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

HN2[] **Remedies, Damages**

The Antitrust Criminal Penalty Enhancement and Reform Act (ACPERA) applies in any civil action alleging a violation of *section 1* or 3 of the Sherman Act, or alleging a violation of any similar state law. *15 U.S.C.S. § 1*, note, at § 213(a). ACPERA thus clearly limits recovery of single damages in both federal law antitrust cases and state law antitrust cases against ACPERA participants.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Constitutional Law > Supremacy Clause > Federal Preemption

HN3[] **Remedies, Damages**

Federal ***antitrust law*** does not preempt the assertion of antitrust claims under parallel state ***antitrust law***. Indeed, it appears well-recognized that Congress has not preempted the field of ***antitrust law***, but rather intends the federal antitrust laws to supplement, not displace, state antitrust remedies. That said, however, where state law conflicts with federal law, and impairs or impedes the enforcement of federal law, federal law preempts the application of state law to the extent of the conflict. By enacting the Antitrust Criminal Penalty Enhancement and Reform Act (ACPERA), *15 U.S.C.S. § 1*, Congress has clearly extended amnesty from the joint and several, treble damages provisions of both federal ***antitrust law*** and state ***antitrust law*** to participants in ACPERA, and limited recoverable damages from ACPERA participants to "single" damages on claims under either federal ***antitrust law*** or state ***antitrust law***. *15 U.S.C.S. § 1*, note, at § 213(a).

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Constitutional Law > Supremacy Clause > Federal Preemption

HN4[] **Remedies, Damages**

To the extent the single damage limitation set forth in the Antitrust Criminal Penalty Enhancement and Reform Act (ACPERA) conflicts with the treble damage provision of the Oklahoma Anti-Trust Reform Act, *Okla. Stat. tit. 79, § 201*, the doctrine of conflict preemption clearly applies and proscribes the recovery of state antitrust treble damages from an ACPERA participant. However, given the complimentary provisions of federal ***antitrust law*** and state ***antitrust law***, the doctrine of conflict preemption does not divest the state courts of subject matter jurisdiction to determine state law antitrust claims against ACPERA participants.

Judges: Larry Joplin, Judge. BELL, P.J., dissents, and GOREE, V.C.J. (sitting by designation), concurs.

Opinion by: Larry Joplin

Opinion

[320]** Larry Joplin, Judge:

[*P1] Plaintiff/Appellant Harold Koppitz (Plaintiff) seeks review of the trial court's order granting the motion to dismiss of Defendants/Appellees Chesapeake Energy Corporation, and Chesapeake Exploration, L.L.C., As Successor By Merger to Chesapeake **[**321]** Exploration, L.P. (Defendants) on Plaintiff's claims to damages for the Defendants' violation of the *Oklahoma Anti-Trust Reform Act, 79 O.S. 201, et seq. (OARA)*, based on allegations of Defendants' "conspiracy to rig bids and depress the market for purchases of oil and natural gas leasehold interests located within the State of Oklahoma."

[*P2] Defendants filed a motion to dismiss for lack of subject matter jurisdiction "because the claim involves a unique issue under federal ***antitrust law***." Particularly, Defendants alleged they had confessed their violation of federal ***antitrust law*** and cooperated with the investigation **[***2]** conducted by the United States Department of Justice, Anti-Trust Division, which qualified them for leniency and limited any potential recovery of damages to "single" actual damages (as opposed to the joint and several treble damages ordinarily recoverable) under the *Antitrust Criminal Penalty Enhancement and Reform Act*, *15 U.S.C. §1*, note. So, said Defendants, to the extent the ACPERA federal law limited damages and conflicted with the treble damage provision of OARA, federal law preempted state law antitrust claims under the doctrine of conflict preemption.

[*P3] Plaintiff responded. Plaintiff first argued that the assertion of a federal defense -- the limitation on damages under ACPERA -- to his state law claim under OARA did not convert his state law claim under OARA into a federal claim within the exclusive domain of the federal courts. Plaintiff secondly argued that federal ***antitrust law*** did not, ipso facto, preempt state law antitrust claims. Plaintiff thirdly pointed out that ACPERA, by its own terms, applied to "any civil action alleging a violation of *section 1* or *3* of the Sherman Act, or alleging a violation of any similar State law." *15 U.S.C. §1*, note, at *§213(a)*. Plaintiff also pointed out that parallel federal and **[***3]** state law antitrust claims have been allowed to proceed against ACPERA participants.[1]

[*P4] On consideration of the parties' submissions and arguments, the trial court granted the motion to dismiss of Defendants:

> In his Petition, Plaintiff asserts claims against the Chesapeake Defendants arising under *Section 203(A) of the Oklahoma Antitrust Reform Act*, *79 Okla. Stat. §203(A)*. The Chesapeake Defendants argue in their motion that the federal Antitrust Criminal Penalty Enhancement and Reform Act ("ACPERA") divests the Court of subject matter jurisdiction and preempts Plaintiffs state law antitrust claims because Chesapeake participated in the Leniency Program of the United States Department of Justice, Antitrust Division. The Court agrees and GRANTS the Chesapeake Defendants' motion to dismiss on this basis.
>
> . . .
>
> > IT IS THEREFORE ORDERED, ADJUDGED, AND DECREED that the Chesapeake Defendants motion to dismiss is GRANTED based on lack of jurisdiction and federal preemption. Therefore, Plaintiffs claims against the Chesapeake Defendants are hereby DISMISSED.

Plaintiff appeals, and the matter stands submitted on the trial court record.[2]

[*P5] ***HN1***[] "Appellate courts review *de novo* a district court's dismissal of an action for lack of subject matter **[***4]** jurisdiction." *Beachner Const. Co., Inc. v. State ex rel. Office of State Finance, 2014 OK CIV APP 3, ¶10, 316 P.3d 229, 231*. (Citations omitted.) (Emphasis original.) "'Motions to dismiss are generally viewed with disfavor. The purpose of a motion to dismiss is to test the law that governs the claim in litigation rather than to examine the underlying facts of that claim.'" *Beachner Const. Co., Inc., 2014 OK CIV APP 3, ¶10, 316 P.3d at 231*. (Citations omitted.)

[*P6] The "unique" issue presented by this appeal is whether, by the adoption of ACPERA, **[**322]** *15 U.S.C. §1*, note, the Congress of the United States intended to preempt the prosecution of state law antitrust claims where a defendant has participated in ACPERA as to enjoy the ACPERA amnesty from treble damages.

[1] See, e.g., *In re Capacitors Antitrust Litigation, 106 F.Supp.3d 1051 (N.D. Cal. 2015)*; *In re Polyurethane Foam Antitrust Litigation, 314 F.R.D. 226 (N.D. Ohio 2014)*; *Oracle America, Inc. v. Micron Technology, Inc., 817 F.Supp.2d 1128 (N.D. Cal. 2011)*.

[2] *See*, Rule 4(m), Rules for District Courts, 12 O.S. 2011, Ch. 2, App., and Okla.Sup.Ct.R. 1.36, 12 O.S. 12 O.S. 2011, Ch. 15, App.

[*P7] We first observe that, by its express terms, ***HN2***[] ACPERA applies in "any civil action alleging a violation of *section 1* or *3 of the Sherman Act*, or alleging a violation of any similar State law." *15 U.S.C. §1*, note, at *§213(a)*. ACPERA thus clearly limits recovery of single damages in both federal law antitrust cases and state law antitrust cases against ACPERA participants. The question remains, however, whether, by ACPERA's single damages limitation in both federal and state ***antitrust law*** cases, Congress in ACPERA intended to preempt the assertion of a state law antitrust claim against an ACPERA participant.

[*P8] We think not. It is well established that ***HN3***[] federal ***antitrust law*** does not preempt the **[***5]** assertion of antitrust claims under parallel state ***antitrust law***. Indeed, it appears well-recognized that "Congress ha[s] not preempted the field of ***antitrust law***, but rather intend[s] the federal antitrust laws to supplement, not displace, state antitrust remedies." *Major v. Microsoft Corp., 2002 OK CIV APP 120, ¶6, 60 P.3d 511, 513*.

[*P9] That said, however, where state law conflicts with federal law, and impairs or impedes the enforcement of federal law, federal law preempts the application of state law to the extent of the conflict. *See, e.g.,* Smith Cogeneration Mgmt. Inc. v. Corp. Comm'n, 1993 OK 147, ¶18, 863 P.2d 1227, 1229.[3] By ACPERA, Congress has clearly extended amnesty from the joint and several, treble damages provisions of both federal ***antitrust law*** and state ***antitrust law*** to participants in ACPERA, and limited recoverable damages from ACPERA participants to "single" damages on claims under *either* federal ***antitrust law*** *or* state ***antitrust law***. *15 U.S.C. §1*, note, at *§213(a)*.

[*P10] We therefore hold that, ***HN4***[] to the extent the ACPERA single damage limitation conflicts with the treble damage provision of OARA, the doctrine of conflict preemption clearly applies and proscribes the recovery of state antitrust treble damages from an ACPERA participant. However, given the complimentary provisions of federal ***antitrust law*** and state ***antitrust law***, we **[***6]** further hold that the doctrine of conflict preemption does not divest the state courts of subject matter jurisdiction to determine state law antitrust claims against ACPERA participants.

[*P11] The order of the trial court granting the Defendants' motion to dismiss for lack of subject matter jurisdiction is REVERSED, and the cause REMANDED for further proceedings.

BELL, P.J., dissents, and GOREE, V.C.J. (sitting by designation), concurs.

End of Document

[3] "The pre-emption doctrine stems from the Supremacy Clause of the United States Constitution and it invalidates any state law which contradicts or interferes with an act of Congress." (Footnote omitted.)

Ne. Farm Sales & Serv. v. Krone, NA Inc.

United States District Court for the District of Vermont

Opinion

DECISION ON MOTION TO DISMISS

(Doc. 4)

This diversity action arises out of the termination of a dealership agreement. Plaintiff Northeast Farm Sales and Service, Inc. ("NEFS") sells and services farm equipment to retail customers. (Doc. 1-4 at 12). Defendant Krone NA, Inc. ("Krone") distributes agricultural equipment.

On December 17, 2001, the parties entered into a dealership agreement. (Doc. 1-4 at 12). By letter dated December 29, 2015, Krone terminated the agreement on the ground of "habitual late payments to Krone NA, Inc., and a recent Sold Out of Trust (SOT) situation."[1] (Doc. 1-4 at 18.)

---

[1] A sale out of trust occurs when a dealer sells inventory subject to a security interest without repaying the distributor.

The original complaint **[*2]** was filed in Orleans Superior Court. NEFS claimed that the reasons given for the termination were false pretexts and that Krone's real motivation was the execution of a new dealership agreement with Champlain Valley Equipment, which competes with NEFS from a location five miles away. (Doc. 1-4 at 6.) NFS alleged three causes of action: breach of contract, violation of the *Vermont Consumer Protection Act, 9 V.S.A. § 2453*, and violation of the *Machinery Dealership Protection Law, 9 V.S.A. § 4072*.

Krone removed the case to this court on the basis of the diversity of the parties. The parties agree that this court has jurisdiction.

On May 3, 2017, following removal, Krone filed a motion to dismiss (Doc. 4). In its motion, Krone makes the following arguments:

- The claim of breach of contract (Count One) fails because "the facts alleged in the Complaint establish that NEFS sold out of trust and habitually failed to make payments on obligations when due." (Doc. 4-1 at 6.)
- The claim of contractual bad faith embedded in Count One duplicates the claim of breach of an express term of the parties' contract. In Krone's view, NEFS may allege one or the other, but not both. (Doc. 4-1 at 7).
- The alleged violation of the Vermont Consumer Protection Act fails because NEFS was not a "consumer" within **[*3]** the meaning of that statute. (Doc. 4-1 at 9).
- The alleged violation of the *Machinery Dealership Protection Law, 9 V.S.A. § 4072*, fails because Krone was entitled to cancel the distribution agreement due to late payments and the sale out of trust. (Doc. 4-1 at 13.) Krone also defends a provision in the distribution agreement which limits NEFS to a single business location absent written permission from Krone. (Doc. 4-1 at 14.)

NEFS has filed a response to the motion to dismiss (Doc. 15). The parties appeared for oral argument on July 5, 2017. Both parties have filed additional documentation for the court's review. (Docs. 25 and 26.)

On August 7, 2017, NEFS filed an amended complaint, adding a claim for tortious interference with contractual relations. The amended complaint contains more specific factual allegations. It continues to assert the claims of breach of contract and statutory violations under Vermont law.

ANALYSIS

In ruling on a motion to dismiss, the court accepts as true the facts as they appear in the complaint and makes all reasonable inferences in favor of the non-moving party. *See* *Shultz v. Congregation Shearith Israel of City of New York, 867 F.3d 298, 302 (2d Cir. 2017)*.

I. Breach of Contract (Count One)

Krone argues that it was entitled to cancel the distribution agreement on November 29, 2015, because NEFS was **[*4]** habitually late in payments and because it had previously sold a piece of equipment out of trust. (Doc. 4-1 at 4, ¶ 7.) Krone asserts that, since this conduct violated the terms of the parties' distribution agreement and security agreement, Krone was justified in terminating the contract without regard to its motivation. Krone contends that, "[a]s a matter of law, NEFS cannot assert a claim for breach where the conduct at issue is expressly permitted by the contract, only where there is a failure to comply." (Doc. 4-1 at 5.)

NEFS responds that in the week prior to the termination of the distribution agreement, it had brought all accounts current. (Doc. 26 at 5.) It describes the "out of trust" transaction as "caused by Krone, when a representative from Krone told an NEFS employee to take the money NEFS was going to pay Krone for the sale and pay it to [NEFS' floor-plan finance company] Agricredit/DLL instead." (*Id.* at 3.)

The court is in no position to make a judgment about whose story is correct on a motion to dismiss. The dealership agreement contains no specific terms concerning timeliness of payments for product by NEFS. It states only that

"Krone NA shall ... sell and Dealer shall **[*5]** purchase the Products covered by the Order at the prices and on the terms established from time to time by Krone NA, Inc." (Doc. 1-4 at 12.) The agreement contemplates the extension of credit to NEFS by Krone. (*Id.*)

The parties' security agreement includes a similar promise to pay for inventory. "Dealer does hereby promise to pay to Krone NA, Inc. any and all amounts due and owing to Krone NA, Inc. for products[.]" (Doc. 1-4 at 15.) The events of default listed in the security agreement include "[f]ailure by Dealer to pay Krone NA, Inc. any obligations past, present, or future, when due." (Doc. 1-4 at 16.)

Based on this slim record, the court must infer, for the limited purpose of ruling on this motion to dismiss, that Krone had not demanded payment in full until December 2015 and that when it did so, NEFS paid up. This may or may not be true, but it is a reasonable inference based on the account of the parties' dispute which appears in the complaint, and the court must draw it. There is certainly no record on which the court could draw the contrary inference that NEFS was in a position of default on its payments.

Similarly, there is no record on which the court can determine that NEFS **[*6]** was in default on the "sale out of trust" incident. Paragraph 36 of the Amended Complaint (Doc. 24) describes NEFS's version of the dispute. NEFS states that the sale of the equipment was subject to its floor-plan financing with Agricredit/DLL. The equipment was sold for a combination of cash and a trade-in. A Krone employee directed NEFS to send the cash to Agricredit to maintain that relationship. The trade-in remained on the floor subject to a lien in favor of Krone. Krone did not take it back when it took back other collateral in December 2015. (Doc. 24 at 10-11.) In the case of the sale out of trust incident, NEFS has made allegations that contradict Krone's claim that collateral was sold in violation of the security agreement, or at least that Krone affirmatively assented to the sale. NEFS' allegations are sufficient to defeat a motion to dismiss, which is predicated on a claim that it is undisputed that NEFS was in violation of its dealership agreement and that the sale out of trust provided just cause for termination.

The court denies the motion to dismiss the breach of contract claim.

II. Bad Faith (Count One)

NEFS identifies two bases for its claim for breach of contract. One **[*7]** is the alleged violation of Vermont's machinery dealership law discussed below. The other is that "NEFS is claiming the violation of [9 V.S.A. § 1-304] means Krone failed to perform or enforce, in good faith, a specific duty or obligation under the contract, and that constitutes a breach of that contract." (Doc. 15 at 6-7.) The court understands NEFS to be arguing that it cannot point to breach of a particular term in the distribution agreement but that Krone's behavior violated the obligation of good faith in performance.

Krone relies upon *Monahan v. GMAC Mortg. Corp., 179 Vt. 167, 2005 VT 110, 893 A.2d 298*, to bar claims of breach of contract and breach of the implied covenant of good faith and fair dealing. Following *Monahan*, the Vermont Supreme Court has further defined the relationship between overlapping claims of breach of express contract terms and the implied covenant. Plaintiffs are permitted to plead in the alternative even if the theories of recovery arise from the same facts. *See* *Abatiell Assocs. P.C v. Nicholas, 187 Vt. 652, 997 A.2d 447, 2010 Vt. Unpub. LEXIS 67, 2010 WL 1265841, at *2 (Vt. Apr. 1, 2010)* (unpublished entry order) ("Under our liberal pleading rules, a party can present inconsistent claims and demand relief in the alternative or of several different types."). The practice is the same under the Federal Rules of Civil Procedure. *See* *Top Ridge Investments, LLC v. Anichini, Inc., 2017 U.S. Dist. LEXIS 109299, 2017 WL 3016787, at *9 (D. Vt. July 14, 2017)* (noting that *Fed. R. Civ. P. 8(d)(2)* authorizes the pleading **[*8]** of alternative theories of recovery).

The court will not dismiss the bad faith claim solely because NEFS has also made a claim for breach of contract. At some point in the case, it may become necessary for NEFS (or the jury) to choose one legal theory for awarding relief, but the time for that choice is not the initial pleading stage.

III. Consumer Fraud Claim (Count Two)

NEFS also seeks to bring a claim under the *Vermont Consumer Protection Act, 9 V.S.A. §§ 2451 et seq.* Krone moves to dismiss on the ground that NEFS is not a "consumer" entitled to bring an action for civil remedies under *9 V.S.A. § 2461(b)*. *See* *Foti Fuels, Inc. v. Kurrle Corp., 2013 VT 111, ¶ 23* (holding that the purpose of consumer protection act is to protect consumers in the general public). NEFS admits that *9 V.S.A. § 2461* permits only a "consumer" to bring suit for deceptive acts or practices prohibited by *§ 2453*. It contends that *9 V.S.A. § 2465* affords a less restrictive remedy to "any person," including parties who are not consumers. Krone responds that *§ 2465* was enacted for the limited purpose of opening state antitrust remedies, including the remedy provided by *9 V.S.A. § 2453*, to plaintiffs who are indirect buyers of products such as computer software which may be incorporated into many different consumer products.

9 V.SA. § 2465(a) provides:

> Any person who sustains damages or injury as a result of any **[*9]** violation of State antitrust laws, including *section 2453* of this title, may sue and recover from the violator the amount of his or her damage, or the consideration or the value of the consideration given by the aggrieved person, reasonable attorney's fees and exemplary damages, not exceeding three times the value of the consideration given or damages sustained by the aggrieved person.

Enacted in 1999, this provision closely follows *9 V.S.A. § 2461*, which permits suit by "any consumer who contracts for goods or services in reliance upon false or fraudulent representations or practices prohibited by *section 2453*[.]"

Section 2465(b) provides that in an action seeking damages for antitrust violations pursuant to *§ 2453*, the lack of contractual privity between the indirect purchaser and the seller shall not be a defense.

The language of *§ 2465(a)* could be read in two ways. As NEFS argues, it could mean that consumer status is unnecessary for state antitrust claims. "Any person" would replace the more limited class of "any consumer" authorized to sue by *§ 2461(b)*. Alternatively, *§ 2465* could be read more narrowly and in a manner consistent with the other provisions of the Vermont Consumer Protection Act to eliminate only the substantive privity defense and to create no new **[*10]** cause of action for parties previously prevented from making use of the act.

In construing *§ 2465*, the Vermont Supreme Court has followed the second course. In *Elkins v. Microsoft Corp., 174 Vt. 328, 817 A.2d 9, 20 (2002)*, the court described *§ 2465* as a clarification of the substantive ***antitrust law*** relating to indirect purchasers. The court relied upon the official Statement of Intent for the legislation, which stated "[t]his act clarifies the right of indirect as well as direct purchasers to recover from violations of state ***antitrust law***." The court also looked to two decisions from the Supreme Court of the United States: *Illinois Brick Co. v. Illinois, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*, which ruled out federal antitrust claims by indirect purchasers, and *California v. ARC America Corp., 490 U.S. 93, 109 S. Ct. 1661, 104 L. Ed. 2d 86 (1989)*, which recognized the right of state legislatures to permit such recoveries under state antitrust laws.

The *Elkins* decision did not consider whether persons other than consumers might sue under *§ 2465*. The plaintiff was an individual representative of a class of indirect purchasers of computer equipment. In identifying the specific purpose of the legislation, however, the *Elkins* decision strongly suggests that when asked, the Vermont Supreme Court will not read "all persons" as literally any individual or corporation regardless of their rights under the other provisions of the Vermont **[*11]** Consumer Protection Act. Instead, it is more likely that the two provisions which authorize lawsuits under the act will be construed in a manner consistent with one another and subject to the same overarching condition that the remedies provided in the act are for the benefit of consumers.

As Krone points out in its reply brief, parties have standing under *§ 2465* only for violations of *§ 2453*, and an element of a violation of *§ 2453* is that the prohibited conduct have occurred in commerce. The "consumer" requirement flows from the "in commerce" language. *See* *Foti Fuels, 2013 VT 111 at ¶ 21* (holding that "the 'in commerce' requirement narrows the [Vermont Consumer Protection Act's] application to prohibit only unfair or deceptive acts or practices that occur in the consumer marketplace"). NEFS urges the court to read *§ 2465* in way that would remove a substantive element of a claim under *§ 2453*, but *§ 2465* does not and was never meant to do so.

Accordingly, the court will dismiss NEFS's claims for violations of the Vermont Consumer Protection Act.

IV. Vermont Machinery Dealership Protection Law (Count Three)

The Vermont Machinery Dealership Protection Law, *9 V.S.A. § 4072*, provides protection against cancellation of machinery dealership agreements. The provision requires **[*12]** 120 days notice and provides an opportunity for the dealership to cure any deficiency. The notice and cure provisions do not apply under specific circumstances, including a default on a security agreement. Krone invokes the sale out of trust event as an event excusing compliance with the notice and cure provision.

The court rejects this argument for the same reason it rejected a similar argument in the case of the breach of contract claim. The parties do not agree that a violation of the security agreement occurred. NEFS states that its actions would violate the security agreement except that they were authorized by a Krone representative. (Doc. 24 at 11-12.) For the purposes of this motion to dismiss, the court must accept this allegation as true. Krone's claim that it was excused from the other provisions of *§ 4072* thus fails, and dismissal of NEFS's *§ 4072* claims is not appropriate.

Krone also argues that NEFS's claim that Krone violated *9 V.S.A. § 4082* fails as a matter of law. *Section 4082* prohibits suppliers of industrial equipment from "limit[ing] the geographic area in which a dealer may sell or deliver inventory." NEFS points to paragraph 9(b) of the Dealership Agreement, which states that "[w]ithout the written **[*13]** consent of [Krone], [NEFS] may not open any additional business location for the sale or service of [Krone] Products nor stock Products at any location other than [NEFS's Irasburg location]." NEFS argues that this clause limiting its ability to open additional business locations is a limitation on the geographic area in which it can sell or deliver inventory in violation of *§ 4082*. Whether this contractual clause violates the statute is a matter of pure law and is appropriate for disposition on a motion to dismiss.

By its plain terms, *§ 4082* is directed at geographical limitations on sale and delivery, not on business location. Paragraph 9(b) of the Dealership Agreement contains no restriction on the geographical area in which NEFS can sell or deliver Krone products. The terms of the dealership agreement impose no geographic restrictions on NEFS's sale or delivery of equipment. NEFS remains free to sell or deliver Krone products anywhere. To the extent that NEFS's sales and delivery are geographically limited for logistical reasons, those limitations cannot be attributed to any contractual clause or to Krone, and do not constitute a violation of *§ 4082*. NEFS's claim of a violation of *§ 4082* will therefore **[*14]** be dismissed.

CONCLUSION

Krone's Motion to Dismiss (Doc. 4) is **DENIED** with respect to the breach of contract and bad faith claims in Count One, **GRANTED** with respect to the Vermont Consumer Protection Act claims in Count Two, **DENIED** with respect to the claim of violation of *9 V.S.A. § 4072* in Count Three, and **GRANTED** with respect to the claim of violation of *9 V.S.A. § 4082* in Count Three.

Opinion

ORDER ON MOTION TO DISMISS

This matter is before the Court on defendants Pilgrim's Pride Corporation's, William W. Lovette's, and Fabio Sandri's Motion to Dismiss the Amended Class Action Complaint, ECF No. 34. For the reasons discussed below, the motion is GRANTED.

BACKGROUND

This is a securities class action claim brought by lead plaintiff George James Fuller[1] against defendants on **[*2]** behalf of a purported class of investors in Pilgrim's Pride Corporation ("Pilgrim's"). ECF No. 29 at 1. According to the second amended complaint, which I will refer to simply as "the complaint," Pilgrim's is one of the largest producers and sellers of chicken in the United States. *Id.* at 11. Pilgrim's focuses on the production and sale of broilers, which are chickens under the age of 13 weeks that make up 98% or more of the chicken sold in the United States. *Id.* Pilgrim's is vertically-integrated, meaning that it owns or controls nearly all aspects of broiler production, from breeding, hatching, rearing, and feeding, to processing and selling. *Id.* at 13. The market for broilers is characterized by inelastic demand, meaning that demand does not meaningfully change when the price of the good changes, although a change in supply will change the price of the good. *Id.* at 12. As a result of broiler market characteristics, the price and supply of broilers have historically followed a "boom and bust" cycle, in which rising prices for broilers would incentivize rising production to capitalize on higher prices—the "boom." *Id.* The resulting oversaturation in the market would lead to a decrease in prices, and thus a decrease **[*3]** in production—the "bust." *Id.*

Plaintiff's complaint alleges on information and belief that beginning in 2008, after "a particularly low trough in the ordinary business cycle" and following its emergence from a bankruptcy in 2009, Pilgrim's conspired with other major players in the United States broiler market to cut production, thereby limiting supply and ensuring prices would stay high. *Id.* at 22, 31-32, 138. According to the complaint, Pilgrim's and its co-conspirators conducted two coordinated production cuts, the first between 2008 and 2009 and the second between 2011 and 2012. *Id.* at 32. These production cuts were achieved through various means, including reducing eggs, reducing broiler breeder flocks, destroying chicks or eggs, temporarily or permanently shutting down facilities, and exporting eggs or chicks. *Id.* These coordinated cuts allegedly resulted in "an artificial stabilization in the industry even during a time of soaring feed costs." *Id.* at 33. The complaint additionally alleges that Pilgrim's and its co-conspirators continued to depress supply to the United States in the period from 2013 to 2016 by increasing broiler exports and cutting production overall. *Id.* at 35-37.

Plaintiff alleges that this broiler price-fixing **[*4]** conspiracy was facilitated through the conspirators' use of Agri Stats, a private reporting service that compiles detailed confidential data on nearly all aspects of broiler production including inventory, production, and pricing data. *Id.* at 23-25. According to plaintiff, Pilgrim's and its co-conspirators had the capacity to de-anonymize the Agri Stats data to determine which data corresponded to which industry member, thereby allowing the conspirators to track and coordinate their participation in the conspiracy. *Id.* at 26. Plaintiff also points to the "cliquish" nature of the industry and numerous industry conferences and events at which industry members may have associated to coordinate the production cuts at issue. *Id.* at 16-19.

The final element of Pilgrim's price-fixing conspiracy, according to plaintiff, was the manipulation of the Georgia Department of Agriculture's ("GDA") Georgia Dock Broiler pricing index, one of the three primary indices that tracks broiler prices.[2] *Id.* at 37. The Georgia Dock index price was compiled by a weekly telephone call to the top broiler

---

[1] The case was originally filed on behalf of Patrick Hogan with his lawyers as proposed lead counsel for the purported class. A competing plaintiff, George James Fuller, then sought his designation as lead plaintiff and his lawyers as lead counsel. Thereafter the first filers withdrew their request for lead plaintiff/counsel designation, and Mr. Fuller and his lawyers were ultimately designated as lead plaintiff and counsel. *See* ECF No. 24 (granting George James Fuller's unopposed Motion for Appointment as lead plaintiff). Mr. Fuller claims to have sustained a loss by comparing the price he paid for his shares in 2015 to the "holding value" of the shares for the 90-day period beginning on October 7, 2016. *See* ECF No. 8-2.

producers in the state, who would report the price they offered to companies with whom they had contracts, such as grocery stores. *Id.* at 38. The Georgia Dock influenced **[*5]** "prices for roughly 25% of the entire U.S. Broiler market," but unlike the other two primary price indices, the Georgia Dock did not require verification of reported prices. *Id.* The Georgia Dock price was higher than the other two primary indices "nearly every day" between 2007 and 2016, and "diverge[d] sharply in 2011-2012 and during the class Period." *Id.* at 39. Plaintiff alleges that this divergence between the Georgia Dock price index and the other two major price indices is evidence that the broiler industry was manipulating the index as part of the price-fixing conspiracy.

According to the complaint, this multi-pronged conspiracy to cut production and raise broiler prices led to Pilgrim's ensuing financial stability and success and artificially increased the value of Pilgrim's securities. The crux of plaintiff's complaint is that during the Class Period between February 21, 2014 and November 17, 2016, defendants made untrue or misleading public statements by failing to disclose the price-fixing conspiracy and instead touting legitimate causes for Pilgrim's success. *See id.* at 51-106 (citing annual and quarterly Securities Exchange Commission filings, press releases, and earnings calls throughout the **[*6]** Class Period referring, for example, to the chicken industry as "highly competitive" when in fact Pilgrim's had been allegedly colluding to inflate the price of chicken). Plaintiff asserts that "[d]efendants falsely assured investors that this stabilization was attributable to the implementation of its legitimate business strategy over the previous years, but this was not true." *Id.* at 33. Plaintiff alleges that defendants' conspiracy came to light in a series of revelations in 2016, including a private antitrust class action complaint filed in the Northern District of Illinois containing evidence of collusion and price-fixing between 2008 and 2016. *Id.* at 21-22. Plaintiff also points to a subsequent analyst report about the case and two newspaper articles about the alleged conspiracy. *Id.* As a result of these revelations, according to plaintiff, the price of Pilgrim's securities dropped from $23.54 on September 2, 2016 to $18.61 on November 17, 2016 "and continued to slide" to the detriment of the company's investors. *Id.* at 107-10.

Plaintiff thus raises three claims in his securities class action complaint: two claims for violations of *§ 10(b) of the Securities and Exchange* Act (the "Exchange Act") and *Rule 10b-5* promulgated thereunder **[*7]** against all defendants, and one claim for violation of *§ 20(a)* of the Exchange Act against defendants Lovette (Pilgrim's Chief Executive Officer and President during the Class Period) and Sandri (Pilgrim's Chief Financial Officer during the Class Period). *Id.* at 142-44. "*Section 10(b)* of the Exchange Act prohibits the 'use or employ[ment], in connection with the purchase or sale of any security . . . [of] any manipulative or deceptive device or contrivance in contravention of such rules and regulations as the Commission may prescribe.'" *In re Gold Res. Corp. Sec. Litig., 776 F.3d 1103, 1108 (10th Cir. 2015)* (citing *15 U.S.C. § 78j(b)*). "*[R]ule 10b-5* implements *§ 10(b)* by making it unlawful to 'make any untrue statement of a material fact or to omit to state a material fact necessary in order to make the statements made . . . not misleading . . . in connection with the purchase or sale of any security.'" *Id.* (quoting *17 C.F.R. § 240.10b-5*)). *Section 20(a)* of the Exchange Act establishes liability for "[e]very person who . . . controls any person liable under any provision of this chapter or of any rule or regulation thereunder." *15 U.S.C. § 78t(a)*. To establish controlling person liability, a plaintiff must establish both a primary violation and the alleged controlling person's control over the primary violator. *Maher v. Durango Metals, Inc., 144 F.3d 1302, 1305 (10th Cir. 1998)*. Defendants move to dismiss all three claims. ECF **[*8]** No. 34. The motion has been fully briefed. ECF Nos. 35, 36.

STANDARD OF REVIEW

When "faced with a *Rule 12(b)(6)* motion to dismiss a *§ 10(b)* action, courts must, as with any motion to dismiss for failure to plead a claim on which relief can be granted, accept all factual allegations in the complaint as true." *Tellabs, Inc. v. Makor Issues & Rights, Ltd., 551 U.S. 308, 322, 127 S. Ct. 2499, 168 L. Ed. 2d 179 (2007)*. "[C]ourts must consider the complaint in its entirety, as well as other sources courts ordinarily examine when ruling on *Rule 12(b)(6)* motions to dismiss, in particular, documents incorporated into the complaint by reference, and matters of which a court may take judicial notice." *Id.*

---

[2] The Georgia Dock was dismantled in December 2016 after inquiries into the index's independence led to calls for additional price verification, prompting a decline in industry submissions to the index. *Id.* at 46-48.

Complaints in civil actions generally should contain "a short and plain statement of the claim showing that the pleader is entitled to relief." *Fed. R. Civ. P. (8)(a)(2)*. "A plaintiff suing under *Section 10(b)*, however, bears a heavy burden at the pleading stage." *In re Level 3 Communs. Sec. Litig., 667 F.3d 1331, 1333 (10th Cir. 2012)*. To state a securities fraud claim, a plaintiff's complaint must allege that:

> (1) the defendant made an untrue or misleading statement of material fact, or failed to state a material fact necessary to make statements not misleading; (2) the statement complained of was made in connection with the purchase or sale of securities; (3) the defendant acted with scienter, that is, **[*9]** with intent to defraud or recklessness; (4) the plaintiff relied on the misleading statements; and (5) the plaintiff suffered damages as a result of his reliance.

Id. (citing *Adams v. Kinder-Morgan, Inc., 340 F.3d 1083, 1095 (10th Cir. 2003))*.

Prior to the passage of the Private Securities Litigation Reform Act of 1995 (PSLRA), *Federal Rule of Civil Procedure Rule 9(b)* governed the pleading requirements for securities fraud actions. *City of Philadelphia v. Fleming Cos., 264 F.3d 1245, 1258 (10th Cir. 2001)*. Now, however, under the PSLRA, a heightened pleading standard applies to the first and third elements of securities fraud claims, also referred to as falsity and scienter, respectively. *Id.* Thus, with respect to falsity and scienter the PSLRA requires that:

> (1) [T]he complaint shall specify each statement alleged to have been misleading, the reason or reasons why the statement is misleading, and, if an allegation regarding the statement or omission is made on information and belief, the complaint shall state with particularity all facts on which that belief is formed.
>
> (2) [T]he complaint shall, with respect to each act or omission alleged to violate this chapter, state with particularity facts giving rise to a strong inference that the defendant acted with the required state of mind.

15 U.S.C. § 78u-4(b)(1)—(2). In this case, defendants seek to dismiss plaintiff's complaint on the grounds **[*10]** that it fails to adequately plead falsity, scienter, and loss causation. ECF No. 34 at 2-3. Because the failure to plead falsity is dispositive, I need not consider the parties' arguments with respect to either of the remaining two elements.

Although the parties agree that the PSLRA's heightened pleading standard applies to the element of falsity, they disagree about whether the heightened standard applies only to the allegedly misleading or untrue statements, or if it also applies to the facts that establish the alleged underlying price-fixing conspiracy. *Compare* ECF No. 34 at 7 (defendants arguing that '"if the complaint fails to allege facts [with particularity] which would establish such an illegal scheme, then the securities law claims premised on the *nondisclosure* of the alleged scheme are fatally flawed'") (quoting *In re Mirant Corp. Sec. Litig., No. 02-CV-1467-RWS, 2009 U.S. Dist. LEXIS 789, 2009 WL 48188, at *17 (N.D. Ga. Jan. 7, 2009)*) (alteration in original)) *with* ECF No. 35 at 9 (plaintiff asserting that "[t]he PSLRA's heightened pleading standards apply only to allegations of falsity and scienter"). As a result, I must determine the appropriate standard of review with respect to the underlying allegations of an antitrust conspiracy before proceeding **[*11]** to the parties' substantive arguments.

The District Court for the Western District of Arkansas recently answered this question in the context of the very same conspiracy alleged in this case. *See* *In re Tyson Foods, Inc. Secs. Litig., 275 F. Supp. 3d 970, 2017 WL 3185856, at *8 (W.D. Ark. July 26, 2017)*. As such, that court's resolution of the issue is instructive in this case. Like plaintiff in this case, the plaintiffs in *Tyson* argued that '"the PSLRA's heightened pleading standards apply only to allegations of falsity and scienter.'" *Tyson, 2017 U.S. Dist. LEXIS 116824, 2017 WL 3185856, at *10*. While noting that this was an "undoubtedly correct proposition," the *Tyson* court emphasized that it "misses the point: The question is whether the underlying allegations of wrongdoing fall within the 'falsity' category." *Id.* Thus, the key inquiry is whether the "underlying facts purporting to establish the allegation" that there was an antitrust conspiracy "must be pleaded with particularity," or if it is instead "sufficient to particularize only the allegation itself, with the underlying facts subjected to the less demanding general pleading standard?" *2017 U.S. Dist. LEXIS 116824, [WL] at *9—*10*.

After reviewing the parties' arguments, the *Tyson* court concluded that:

> *One*, it is clear that a plaintiff must satisfy the particularity requirement by setting forth the who, what, when, where, and how *of* ***[*12]*** *the statement itself* . . . . *Two*, to the extent that a plaintiff's allegations of underlying wrongdoing "regarding the statement or omission" rest "on information and belief," those allegations must be supported by particularized facts. *15 U.S.C. § 78u—4(b)(1)*.

Id. (emphasis in original). By way of example, the court explained that when the plaintiffs in that case alleged on information and belief that a chicken producer cut its production as part of an underlying conspiracy, the plaintiffs need not "supply evidence proving" their allegation in the initial complaint, but must provide "a statement of the grounds on which the pleader's belief rests." *Id.* (internal citation and quotation marks omitted).

I agree with the *Tyson* court's interpretation of the statute. Requiring that allegations of underlying wrongdoing that rest on information and belief be supported by particularized facts comports with the PSLRA's dictate that "if an allegation regarding the statement or omission is made on information and belief, the complaint shall state with particularity all facts on which that belief is made." *15 U.S.C. § 78u-4(b)(1)*. This interpretation is also bolstered by the cases cited by the *Tyson* defendants, two of which were also cited by **[*13]** defendants in the present case. *See* *In re Immucor, Inc. Sec. Litig., No. 09-CV-2351-TWT, 2011 WL 2619092, at *4—*5 (N.D. Ga. June 30, 2011)* (noting that "[w]here false or misleading statements are based on the failure to disclose illegal activity, the allegations about the underlying illegal activity must also be stated with particularity" and finding that the plaintiff had failed to do so where it did not "even attempt to allege facts showing an explicit agreement . . . to fix prices"); *In re Mirant Corp. Sec. Litig., No. 02-CV-1467-RWS, 2009 U.S. Dist. LEXIS 789, 2009 WL 48188, at *17 (N.D. Ga. Jan. 7, 2009)* ("[I]n cases alleging securities fraud based on the failure to disclose the existence of an underlying illegal scheme, the basis for the illegality must be pled with particularity."); *In re JP Morgan Chase Sec. Litig., 363 F. Supp. 2d 595, 632 (S.D.N.Y. 2005)* (plaintiffs' claim that defendant made material omissions by failing to disclose violations of statutes failed where plaintiffs "failed to allege with particularity that JPM Chase or its agents violated" the statutes at issue); *In re AXIS Capital Holdings Ltd. Sec. Litig., 456 F. Supp. 2d 576, 585 (S.D.N.Y. 2006)* (where plaintiffs' nondisclosure claims were dependent on predicate allegations of an anticompetitive scheme, "if the complaint fails to allege facts which would establish such an illegal scheme, then the securities law claims premised on the *nondisclosure* of the alleged scheme are fatally flawed.") **[*14]** (emphasis in original). Thus, in this case, where plaintiff's central allegation is that defendants' statements and omissions during the Class Period were misleading because, on information and belief, they failed to disclose an underlying antitrust conspiracy, plaintiff must plead with particularity the facts that establish the existence of the antitrust conspiracy.[3]

Having decided that the PSLRA's heightened pleading standard applies to the underlying allegation of an antitrust conspiracy, the remaining question is what standard to use to determine whether the complaint pleads such a conspiracy sufficiently. Helpfully, the Tenth Circuit interpreted the PSLRA's particularity requirement for allegations of misleading statements or omissions made on information and belief in *Adams v. Kinder-Morgan, Inc., 340 F.3d 1083, 1099 (10th Cir. 2003)*. The plaintiff's complaint in *Adams* alleged that the defendant company made false or misleading statements when it claimed that a particular branch of the company was contributing positively to company earnings, when in fact that branch was losing money. *340 F.3d at 1096*. The court outlined the following six-factor test to assess whether the complaint stated with particularity specific facts **[*15]** that "support a reasonable belief that the defendant's statements identified by the plaintiff were false or misleading":

> (1) the level of detail provided by the facts stated in a complaint;
> (2) the number of facts provided;
> (3) the coherence and plausibility of the facts when considered together;
> (4) whether the source of the plaintiff's knowledge about a stated fact is disclosed;

---

[3] The District Court for the Southern District of New York recently echoed this standard in a case "strikingly similar" to *Tyson* based on the same alleged conspiracy. *See* *Gamm v. Sanderson Farms, Inc., No. 16-CV-08420-RMB, 2018 U.S. Dist. LEXIS 9944, *5 (S.D.N.Y. Jan. 19, 2018)* (ECF No. 39-1) ("Where the '[p]laintiffs' underlying allegation [in a *Rule 10b-5* case is] that [a defendant] participated in an antitrust conspiracy' the '[p]laintiffs must plead the facts of the alleged conspiracy with particularity.'") (quoting *Tyson, 2017 U.S. Dist. LEXIS 116824, 2017 WL 3185856 at *9—*10))*. The *Gamm* court found that the plaintiffs had failed to explain the "who, what, when, where and how" of the scheme, and thus found the plaintiffs had failed to plead the underlying conspiracy with particularity. *2018 U.S. Dist. LEXIS 9944, [WL] at 6*.

(5) the reliability of the sources from which the facts were obtained; and
(6) any other indicia of how strongly the facts support the conclusion that a reasonable person would believe that the defendant's statements were misleading.

Id. at 1098-99 (citing *In re Cabletron Sys., Inc., 311 F.3d 11, 29-30 (1st Cir. 2002))*. The Tenth Circuit calls this "a common-sense, case-by-case approach" to determine whether a plaintiff has alleged securities fraud with the particularity required by *§ 78u-4(b)(1)*. *Id. at 1102*. Applying this approach to the facts alleged in that case, the *Adams* court found that the "level of detail about why [the branch] was unprofitable is significant," and it noted that the plaintiffs had used "objectively verifiable market data, sources who were inside the company, and statements made by industry observers made to a trade publication" to explain the branch's unprofitability. *Id. at 1104*. As a result, the **[*16]** court concluded that the plaintiffs had done far more than "rest[] on conclusory assertions," but instead had sufficiently pled with particularity the facts supporting their belief that the defendant's statements were false or misleading. *Id.*

In this case, therefore, in addition to assessing whether the allegedly false or misleading statements were pled with the requisite particularity, I will apply the *Adams* framework to assess the sufficiency of the facts pled in support of plaintiff's allegation of an underlying conspiracy.

ANALYSIS

A. Sufficiency of Allegations Regarding False or Misleading Statements.

As an initial matter, plaintiff has sufficiently satisfied the first PSLRA requirement for pleading false or misleading statements by "'specify[ing] each statement alleged to have been misleading [and] the reason or reasons why the statement is misleading.'" *Adams, 340 F.3d at 1096* (quoting *15 U.S.C. § 78u-4(b)(1)*). The complaint contains a detailed accounting of each allegedly misleading statement made during the Class Period, including press releases, SEC filings, and investor calls, and the complaint explains why each statement is alleged to have been misleading at the time it was made. ECF No. 29 at 51-106 (noting that the statements **[*17]** were misleading because, for example, they failed to disclose the underlying anticompetitive scheme or they falsely represented that Pilgrim's success was based on legitimate strategies, rather than the price-fixing scheme). The complaint thus satisfies the PSLRA's standard for pleading a false or misleading statement.

B. Sufficiency of Allegations Regarding Underlying Conspiracy.

However, with respect to the complaint's allegations about the underlying antitrust conspiracy, which are made on information and belief, I agree with defendants that the complaint fails to "state with particularity all facts on which that belief is formed." *Adams, 340 F.3d at 1096* (citing *15 U.S.C. § 78u-4(b)(1)*). In this vein, defendants contend that the complaint "offers none of the requisite particulars regarding the 'who, what, when, and where' of any purported antitrust conspiracy made by Pilgrim's with its competitors during the Class Period." ECF No. 34 at 2. Plaintiff counters that his complaint adequately pleads that Pilgrim's participated in a collusive scheme to fix broiler prices, citing the complaint's allegations that the co-conspirators "shared proprietary production data to monitor and enforce compliance with an anticompetitive agreement" **[*18]** and its details about the "two rounds of coordinated production cuts," the "particular industry meetings . . . attended to discuss production cuts, the specific means by which they cut production . . . and the impact of the production cuts on Broiler prices." ECF No. 35 at 10-11.

In support of his complaint's sufficiency, plaintiff cites Sherman Act antitrust cases in which such allegations of collusion were upheld. *Id.*; *see also* ECF No. 37 (citing *In re Broiler Chicken Antitrust Litig., No. 16-CV-8637, 290 F. Supp. 3d 772, 2017 U.S. Dist. LEXIS 191754 (N.D. Ill. Nov. 20, 2017)* (denying defendants' *Rule 12(b)(6)* motion to dismiss the case asserting antitrust violations for the same alleged conspiracy).[4] However, as the *Tyson* court

[4] The 92-page decision on the motion to dismiss in *In re Broiler Chicken Antitrust Litigation* was provided to the Court by means of a letter from plaintiff's counsel. ECF No. 37 and 37-1. It was issued after the (amended) complaint in the present case, so plaintiff Fuller obviously could not have factored that decision into the allegations of his securities law complaint. In any event,

notes, while the Sherman Act provides the appropriate framework for a court reviewing underlying allegations of an antitrust conspiracy, those antitrust allegations will be held to the heightened PSLRA pleading standard when, like here, they form the basis of a securities fraud claim. Tellingly, the court in *Tyson* cautioned that its finding that the underlying antitrust allegations in that case were insufficient was "not necessarily indicative of how it would have decided the case were it presented as a regular Sherman **[*19]** Act claim." *Tyson, 2017 U.S. Dist. LEXIS 116824, 2017 WL 3185856, at *15, *19*. Similarly in this case, I must apply the heightened pleading requirements described herein to the elements in the Sherman Act's antitrust framework.

A Sherman Act antitrust claim must satisfy a three-pronged test by demonstrating that (1) there was a conspiracy, *i.e.*, an agreement or concerted action toward a common goal; (2) the agreement unreasonably restrained trade; and (3) the restraint affected interstate commerce. *Id. at *15*. With respect to the first prong, because direct evidence of concerted action or an agreement is "'so rare,' the ***antitrust law*** has 'granted fact finders some latitude to find collusion or conspiracy from parallel conduct and inferences drawn from the circumstances.'" *Beltran v. InterExchange, Inc., 176 F. Supp. 3d 1066, 1072 (D. Colo. 2016)* (quoting *Oltz v. St. Peter's Cmty. Hosp., 861 F.2d 1440, 1450-51 (9th Cir. 1988))*. Allegations of parallel conduct alone are insufficient to satisfy the first prong, but "'must be placed in a context that raises a suggestion of a preceding agreement, not merely parallel conduct that could just as well be independent action.'" *Id. at 1073* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 557, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))*. Thus in this case, because there is no direct evidence of an agreement, plaintiff must allege both parallel conduct and "circumstantial evidence of a conspiracy." *Id.*

i. Facts **[*20]** Supporting Parallel Conduct.

I am persuaded by defendants' argument that plaintiff has failed to plead that the co-conspirators engaged in parallel conduct in the first place. *See* *In re Beef Indus. Antitrust Litig., 907 F.2d 510, 514 (5th Cir. 1990)* ("When an antitrust plaintiff relies on circumstantial evidence of conscious parallelism to prove a *§ 1* claim, he must first demonstrate that the defendants' actions were parallel."). Instead, because the complaint lacks facts about the means and amounts by which the alleged conspirators cut production or when those particular cuts occurred, it is difficult to determine whether the conspirators were acting in parallel. Using the common-sense approach provided in *Adams* to assess the sufficiency of the complaint's allegation of parallel conduct, I find that the facts provided here fall short. *Adams, 340 F.3d at 1099*.

Plaintiff's complaint alleges that "[t]he production cuts by Pilgrim and other Broiler producers took a number of different forms," including "[r]educing egg sets or egg placements . . . [r]educing the size of broiler breeder flocks . . . [p]ulling eggs . . . [d]estroying chicks . . . [r]educing chicks sent to contract farmers . . . [i]ncreasing pickup/delivery days between flocks . . . [c]hanges to facility production, **[*21]** such as temporary or permanent shut-downs; and . . . [e]xporting hatching eggs or chicks." ECF No. 29 at 32. This general list of methods used to cut production does little to establish what exactly Pilgrim's actually did to cut production and when, or how its actions compared with those of its co-conspirators as necessary to establish that there was a course of parallel conduct. The complaint does not provide numbers of eggs destroyed, for example, or what impact such reductions had on broiler production levels. *See, e.g., id.* at 32-33, 36 (alleging that superiors directed employees to break eggs without providing the dates or frequency of such instructions, how many eggs were to be broken, or whether other co-conspirators were acting in concert). Without more information about the particular cuts that occurred and how these compared to competitors' cuts, the complaint's allegations do not establish parallel conduct. *See, e.g., Gamms*, ECF No. 39-1 at 7 (finding the complaint in that case insufficient because it did not "provide particularized facts such as when and how Sanderson Farms and its co-conspirators destroyed eggs; how many eggs the co-conspirators destroyed; [and] whether and when Sanderson **[*22]** Farms or any of its co-conspirators revealed that they were destroying eggs"); *see also* *Burtch v. Milberg Factors, Inc., 662 F.3d 212, 228 (3rd Cir. 2011)* (noting that "allegations fall far short of demonstrating parallel behavior" where the alleged conduct occurred "at different time periods").

---

that case does not change my analysis of plaintiff's complaint. He must do more than piggyback on allegations in the antitrust case if he wishes to prosecute a securities suit. This is not to say that a compliant complaint could not be drafted when more facts become known.

Moreover, to the extent the complaint does provide some detail about particular actions co-conspirators took to cut production, those actions would have had such disparate effects that they do not represent a parallel course of conduct. The complaint notes, for example, that around the same time Pilgrim's was shutting down four of its processing plants between 2008 and 2009, another industry member was making adjustments to bird weights. ECF No. 29 at 120. Similarly in 2011, soon after Pilgrim's announced that it was closing a processing plant and laying off 1,000 employees, a competitor announced it would not "set any more eggs until we pick up a big account." *Id.* at 125-26. Along the same lines, in late 2015, Pilgrim's was allegedly breaking eggs while its competitor was closing a plant, eliminating a shift at another plant, and increasing purchases from competitors. *Id.* at 36-37. The disparate effect of a permanent plant closure as compared to a competitor's merely temporarily **[*23]** changing the weights of its broilers or the number of eggs it was setting indicates in my view that these are not parallel conduct. As defendants argue, and I agree, "it is facially implausible to assert an antitrust claim based on an allegation that a producer agreed to give up 10% of its sales, while its rivals gave up only 1%." ECF No. 34 at 13. Thus, even the somewhat more particularized information provided in the complaint fails to establish a course of parallel conduct between Pilgrim's and its co-conspirators.

Similarly, plaintiff's allegations concerning defendants' use of Agri Stats and manipulation of the Georgia Dock index fail to plead a parallel course of conduct. With respect to the use of Agri Stats, plaintiff's complaint merely alleges that Pilgrim's used the service and that it could have parsed the data to determine which data corresponded with specific competitors. ECF No. 29 at 24-30. However, there are no particularized allegations that Pilgrim's did in fact reverse-engineer the data in the way insinuated in the complaint. *See, e.g., id.* at 27 (explaining that a former Agri Stats employee who took a job at Pilgrim's "may have even taken the master list with him over to **[*24]** Pilgrim['s]"). Such non-particularized allegations of hypothetical actions do not suffice to establish that Pilgrim's conspired to use Agri Stats data for nefarious purposes. Similarly, with respect to the alleged manipulation of the Georgia Dock price index, though the complaint is replete with allegations about the index's inaccuracy and lack of verification, there are no particularized facts about Pilgrim's sending false or misleading information to the index on any particular occasion and no facts indicating that if it did, its conduct was in parallel to that of its co-conspirators. *Id.* at 38-46. I find that the complaint's allegations related to the use of Agri Stats and the Georgia Dock index manipulation fail to plead parallel conduct sufficient to meet the exacting standards of the PSLRA.

ii. Facts Supporting Circumstantial Evidence of a Conspiracy.

Even if plaintiff had pled particularized facts demonstrating parallel conduct, I agree with the *Tyson* court's finding that plaintiff has not provided circumstantial evidence of a conscious commitment to a common unlawful scheme.[5] "'Allegations of parallel conduct and a conclusory assertion of a conspiracy alone will not suffice to state a plausible **[*25]** conspiracy claim under *§ 1 of the Sherman Act*.'" *Tyson, 2017 U.S. Dist. LEXIS 116824, 2017 WL 3185856, at *16* (quoting *Precision Rx Compounding, LLC v. Express Scripts Holding Co., No. 16-CV-0069-CEJ, 2016 U.S. Dist. LEXIS 112851, 2016 WL 4446801, at *2 (E.D. Mo. Aug. 24, 2016)*). Instead, to be liable under the Sherman Act defendants must have had a "conscious commitment to a common scheme designed to achieve an unlawful objective." *Id.* Where there is no "smoking gun" to establish an agreement, courts assess whether complaints contain sufficient circumstantial evidence of an agreement.

Thus, in *Tyson*, under a very similar set of facts, the court found insufficient evidence of an agreement after assessing the defendants' motive to raise prices, indications that production cuts made pursuant to the conspiracy would otherwise be against defendants' interests absent a conspiracy, and other indicia of an agreement. *2017 U.S. Dist. LEXIS 116824, [WL] at *16*. In particular, Tyson's use of a "buy-versus-grow" strategy, in which it occasionally bought chicken from its competitors rather than growing its own, undercut its motive to keep prices high. *2017 U.S. Dist. LEXIS 116824, [WL] at *17*. Similarly, the 2008 recession was deemed a plausible alternative for the *Tyson* defendants' production cuts, undermining the conclusion that such cuts would be against the defendants' interest absent a conspiracy. *2017 U.S. Dist. LEXIS 116824, [WL] at *18*. Finally, **[*26]** with respect to other indicia of

---

[5] Because I find that the complaint fails to provide particularized facts indicating an underlying conspiracy, I need not reach the parties' debate over whether the Court should take judicial notice of the USDA data defendants provide to undermine plaintiff's allegations of a conspiracy. *See* ECF No. 34 at 12; *see also* ECF No. 35 at 2 n.3.

agreement, the court was unpersuaded that membership in industry associations, attendance at industry conferences, and the use of Agri Stats were enough to support the plaintiffs' "information-and-belief allegation that the industry's production cuts were coordinated." *2017 U.S. Dist. LEXIS 116824, [WL] at *19*. As a result, the court found that the plaintiffs in that case had not provided sufficient evidence of an underlying agreement under the exacting PSLRA standard for pleading the falsity element of securities fraud claim.

Using *Tyson*'s analysis of circumstantial evidence as a guide, I find there are insufficient facts pled to establish circumstantial evidence of an agreement in this case. First, the complaint does not support a conclusion that production cuts made pursuant to the conspiracy would otherwise be against Pilgrim's interest absent a conspiracy. Instead, there are strong indications that cutting broiler production was in Pilgrim's interest given the company's bankruptcy in 2008-2009. The complaint notes that immediately preceding and following Pilgrim's bankruptcy, the company cut production in rather permanent ways, including by closing four processing plants in 2008 and 2009 **[*27]** alone. ECF No. 29 at 119-20. According to the complaint, "[t]he production cuts were not enough to save Pilgrim['s] from its immediate financial crisis," indicating that the cuts were in fact made in an effort to avert crisis rather than to comply with a price-fixing conspiracy. *Id.* at 119. The complaint further notes that "bankruptcy allowed for Pilgrim['s] to close plants, and thus when the Company emerged from bankruptcy a year later . . . Pilgrim['s] emerged with substantially reduced production." *Id.* As a result, the facts pled in the complaint provide a possible explanation of why cuts in production were in Pilgrim's interest as it emerged from bankruptcy.

With respect to Pilgrim's motive to keep prices high, the company did not use a "buy-versus-grow" strategy like Tyson's that would undercut such a motive. However, in such a case where there is little other circumstantial evidence of a conspiracy, the motive to keep prices high can more aptly be said to describe the reality of an industry characterized by inelastic demand than to be an indicator that a party had a motive to conspire. Additionally, I agree with the *Tyson* court that defendants' membership in trade associations and social **[*28]** interactions with other industry members is insufficient "without significantly more in a *Rule 10b-5* case" to establish the existence of a conspiracy. *2017 U.S. Dist. LEXIS 116824, [WL] at *18*. Ultimately, I agree with defendants that it is inappropriate to plead "fraud by innuendo," which is essentially what plaintiff has done in this complaint. ECF No. 34 at 7.

C. Conclusion.

Because plaintiff did not plead the underlying antitrust conspiracy with sufficient particularity according to the PSLRA's requirements, his claims for *§ 10* violations fail to satisfy the falsity elements. As a result, his remaining *§ 20(a)* claim against defendants Lovette and Sandri must also necessarily fail.[6] The Court therefore GRANTS Pilgrim's motion to dismiss plaintiff's second amended complaint.

As a final note, plaintiff requested leave to amend his complaint in response to defendants' motion to dismiss. ECF No. 35 at 20 n.13. "[A] court need not grant leave to amend when a party fails to file a formal motion." *Harris v. Avant, No. 10-CV-00027-PAB-CBS, 2012 U.S. Dist. LEXIS 44458, 2012 WL 1079318, at *3 (D. Colo. March 29, 2012)*. I presume that if plaintiffs had additional facts to allege at this time, they would have done so. But I do not mean to foreclose the possibility that plaintiff might obtain facts (through the antitrust case or otherwise) **[*29]** that would enable him to assert a securities claim that would satisfy the requirements of the PSLRA. *See supra* n.4. His securities case is essentially premature but not necessarily hopeless. Accordingly, I dismiss this case without prejudice.

ORDER

For the reasons stated herein, defendants' motion to dismiss plaintiff's second amended complaint, ECF No. 34, is GRANTED. Plaintiff's second amended complaint is DISMISSED without prejudice.

---

[6] Where a complaint fails to state a *Rule 10b-5* claim, the related *Section 20(a)* claim for control person liability must also necessarily fail. *Adams, 340 F.3d at 1107-08*.

DATED this 14th day of March, 2018.

Opinion

MEMORANDUM AND ORDER

WILLIAMS, Magistrate Judge:

I. INTRODUCTION

Plaintiff Marion Healthcare ("MHC") brought the present antitrust action against Southern Illinois Healthcare ("SIH") pursuant to *sections 1* and *2 of the Sherman Act* (*15 U.S.C. §§ 1* & *2*), as well as, provisions of the *Illinois Antitrust Act (740 ILCS 10/1, et seq.*). MHC—an outpatient surgery center—alleges that SIH—a large hospital system in southern Illinois—illegally suppressed competition for outpatient surgical services in a specified market in southern Illinois through exclusionary agreements with certain commercial health insurers.

On October 22, 2012, MHC filed its First Amended Complaint, naming SIH and Health Care Service Corporation, d/b/a BlueCross and BlueShield of Illinois ("BCBS") as defendants. (Doc. 13). Some of the claims raised were dismissed with prejudice by Judge Herndon on August 26, 2013. (Doc. 57). Shortly thereafter, MHC filed its Second Amended Complaint, (Doc. 58), and this matter was subsequently transferred to Judge Yandle. In ruling on motions to dismiss filed by both defendants, Judge Yandle dismissed all claims against BCBS with prejudice, **[*3]** and denied SIH's motion. (Doc. 16). On February 17, 2016, MHC filed its Third Amended Complaint, which is the current, operative complaint, naming only SIH as a defendant. (Doc. 127). Subsequent to the filing of that complaint, the parties consented to the disposition of this matter before the undersigned.

This matter is before the Court on SIH's Motion for Partial Judgment on the Pleadings (Doc. 273). As the basis for the motion, SIH indicates that written contracts containing exclusivity provisions with BCBS and another payor named Health Alliance only existed during certain time periods. SIH argues that MHC cannot recover on its antitrust claims for the time periods in which SIH did not have in effect written contracts with exclusivity provisions. Among its arguments raised in response, MHC asserts that expert discovery has demonstrated evidence that SIH's exclusionary agreements continued on a "constructive" or de facto basis during times in which there were no explicit and written exclusionary agreements in effect. Since there appear to be issues of fact as to whether SIH continued to have de facto exclusionary agreements with BCBS and Health Alliance even when no such written **[*4]** agreements existed, and since the Third Amended Complaint adequately placed SIH on notice of such a claim, SIH's Motion for Partial Judgment on the Pleadings is **DENIED**.

II. BACKGROUND AND ALLEGATIONS

a. The Third Amended Complaint

According to the allegations raised in the Third Amended Complaint, MHC is a multi-specialty freestanding outpatient surgery center offering outpatient surgical services to residents of Williamson and Jackson Counties, as well as, the local surrounding area. SIH is a nonprofit hospital system which owns three hospitals in Jackson and Williamson Counties: Memorial Hospital of Carbondale, Herrin Hospital, and St. Joseph Memorial Hospital. MHC alleges that the geographic market relevant to its suit comprises Williamson and Jackson Counties, as well as, the surrounding area.

According to MHC, in this geographic market, SIH has approximately a 77% share of the market for inpatient hospital services reimbursed by commercial insurers and a greater than 85.3% share of the market for outpatient services reimbursed by commercial insurers. MHC also alleges that SIH has roughly a 72.3% share of the market for inpatient hospital admissions and 75% market share for inpatient **[*5]** days reimbursed by all payors. It has a greater than 77.2% share of the market for outpatient services reimbursed by all payors. According to MHC, most all health insurance payors in the relevant market consider SIH a "must-have" hospital system due to the fact that it is easily the largest hospital in the region and the only local provider of essential services.

MHC alleges that SIH has maintained a monopoly power in the relevant geographic market by entering into exclusionary contracts with commercial health insurers such as BCBS, Health Alliance, and others. MHC has attached some of the exclusivity agreements to the Third Amended Complaint. In referring to an Illinois Department of Insurance report, MHC alleges that in 2010, BCBS received 47.46% of all premiums for insurance companies selling group health insurance plans in the entire state, while the next closest insurer had a market share of 6.46%. MHC also alleges that Health Alliance is the largest health plan in downstate Illinois.

MHC alleges that the exclusionary contracts effectively prevent insurers from contracting with other health-care facilities competing with SIH, including MHC. In the fall of 2003, MHC applied to become **[*6]** a network provider for BCBS. The application, however, was denied. At various times between the fall of 2003 and October 2011, MHC made renewed requests to join BCBS's provider network; however, it was declined. Similar requests to join Health Alliance's network were also declined.

In October 2011, MHC first learned of SIH's exclusive contract with BCBS. Quoting from a contract provision attached to the Third Amended Complaint, MHC alleges that as early as 2003, SIH has entered into an exclusivity agreement with BCBS wherein

> Blue Cross agrees not to enter into a CPO [Community Participating Option] agreement...with another hospital in the Southern Illinois counties of Jackson, Williamson, Franklin, Saline, Johnson, Union, Pulaski, Alexander, or Perry without the express written consent of [SIH].

(Doc. 127, p. 29; Doc. 127-9, p. 2). According to MHC, SIH has also entered into an exclusivity agreement with Health Alliance dating back to 2003.

MHC alleges that due to SIH's exclusionary contracts, most patients must pay substantially more for its outpatient services as compared to having a procedure performed at an independent, non-SIH, outpatient facility. The exclusionary contracts, according **[*7]** to MHC, effectively prevent members of the public from accessing full service outpatient surgical services in a cost efficient manner. MHC alleges that SIH has (1) delayed and prevented the expansion and entry of SIH's competitors, which has likely lead to higher healthcare costs and higher insurance premiums; (2) limited price competition for price sensitive patients, likely leading to higher healthcare costs for such patients; and (3) reduced quality competition between SIH and its competitors.

MHC alleges SIH has violated both the Sherman Antitrust Act and Illinois state ***antitrust law***. First, MHC alleges that SIH has entered into exclusive dealing contracts that violate *section 1 of the Sherman Act, 15 U.S.C. § 1*, and the Illinois Antitrust Act, ***740 ILCS § 10/3***. Second, MHC alleges that SIH's exclusive contracts constitute illegal tying arrangements in violation of *section 1 of the Sherman Act* and the Illinois Antitrust Act. It alleges that SIH illegally coerced BCBS, Health Alliance, and other payors into entering into agreements that tied discounts for coverage of SIH's inpatient hospital services with exclusive contracting for in-network coverage of SIH's outpatient surgical services, which prohibited the payors from contracting **[*8]** for in-network coverage with competing independent outpatient surgery centers in the region.

Finally, SIH is also alleged to have violated *section 2* of the Sherman Act, ***15 U.S.C. § 2***. MHC alleges that SIH has a monopoly in the market for outpatient surgical services in the relevant geographic market, regardless of whether the market is defined as being reimbursed by any payors[1], or merely by commercial insurers. It is alleged that SIH acted to willfully maintain and extend its monopoly power in the market for outpatient surgical services by using its market power to coerce payors into accepting exclusivity provisions with respect to outpatient services in contracts, which were not wanted by the payors, in exchange for discounted inpatient services, which the payors required.

b. SIH's Motion for Judgment on the Pleadings

---

[1] Any and all payors, as opposed to merely commercial insurers, would constitute a market including government payor programs, such as Medicare and Medicaid, as well as, private commercial payors.

In the motion at-bar, SIH indicates that it did not have contracts containing the exclusivity provisions at issue for the entirety of the timeframe alleged in the Third Amended Complaint. According to SIH, there were no exclusivity provisions between it and BCBS prior to January 1, 2007, and there were no such provisions between it and Health Alliance between December 1, 2005 and May 31, 2007 **[*9]** and again from June 1, 2010 to the present. SIH argues that MHC cannot demonstrate antitrust injury, causation, or injury-in-fact during the time period which SIH did not have exclusivity contracts.

MHC raises multiple arguments in response. First, it argues that a *partial* judgment on the pleadings is procedurally improper under *Federal Rule of Civil Procedure 12(c)*. Next, generally, MHC argues that the effects of a contract can extend even beyond the time it is in existence, and that the question of damages is a factual issue to be determined by the trier of fact. Finally, MHC asserts that the issue of what agreements were in effect at what times is a question of disputed fact. MHC points to evidence that the exclusionary contracts continued on a de facto basis even when the written contracts were not in effect. The Court need not address all of these arguments, as MHC's final argument is dispositive.

III. Judgment on the Pleadings Standard

Rule 12(c) of the Federal Rules of Civil Procedure permits a party, "[a]fter the pleadings are closed—but early enough not to delay trial—[to] move for judgment on the pleadings." A motion for judgment on the pleadings is governed under the same standard as a motion to dismiss under *Rule 12(b)(6)*. ***Gill v. City of Milwaukee, 850 F.3d 335, 339 (7th Cir. 2017)***. To survive a motion governed under the *12(b)(6)* **[*10]** standard, the complaint must "'state a claim for relief that is plausible on its face.'" ***Katz-Crank v. Haskett, 843 F.3d 641, 646 (7th Cir. 2016)*** **(quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))***. The Court accepts as true the allegations raised by Plaintiff in its Complaint unless the allegations are "'threadbare recitals of a cause of action's elements, supported by mere conclusory statements.'" ***Katz-Crank, 843 F.3d at 646*** **(quoting *Ashcroft v. Iqbal, 556 U.S. 662, 663, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009))***. A court may grant a motion for judgment on the pleadings only where "the moving party clearly establishes that no material issue of fact remains to be resolved and that he or she is entitled to judgment as a matter of law." ***National Fidelity Life Ins. Co. v. Karaganis, 811 F.2d 357, 358 (7th Cir. 1987)***. If all of the factual disputes are not resolved by the pleadings, a trial, rather than judgment on the pleadings, is more appropriate. ***Roberts v. Robert V. Rohrman, Inc., 909 F.Supp. 545, 552 (N.D. Il. 1995)*** **(citing Wright & Miller, 5A Federal Practice and Procedure: Civil 2d § 1367 pp. 509 — 10 (1990))**.

Rule 12(d) provides that when ruling on a *12(c)* motion, if "matters outside the pleadings are presented to and not excluded by the court, the motion must be treated as one for summary judgment under *Rule 56*." ***Fed.R.Civ.P. 12(d)***. An exception exists, however, where the moving party attaches a document that is central to the plaintiff's claim and is referred to in the complaint. ***188 LLC v. Trinity Industries, Inc., 300 F.3d 730, 735 (7th Cir. 2002)*** **(quoting *Wright v. Assoc. Ins. Cos. Inc., 29 F.3d 1244, 1248 (7thCir. 1994))***. Where such a document is attached to a 12(c) motion, it may be considered **[*11]** by the Court without the motion being converted into a motion for summary judgment. ***See Tierney v. Vahle, 304 F.3d 734, 738 (7th Cir. 2002)***.

IV. Analysis

MHC first argues that a motion for *partial* judgment on the pleadings is procedurally improper. It is true that while summary judgment under *Rule 56* may be granted on "the part of each claim or defense," ***Fed.R.Civ.P. 56(a)*** **(emphasis added)**, *Rule 12(c)* makes no explicit mention of a partial judgment on the pleadings. Certainly, one could argue that if the drafters of the rules of civil procedure had wished for *Rule 12* to allow for partial judgments, then they would have explicitly indicated as such in the rule's text. *See e.g. Murphy v. Smith, 583 U.S. ___, 138 S. Ct. 784, 200 L. Ed. 2d 75, 79 (2018)* **("[R]espect for Congress's prerogatives as policymaker means carefully attending to the words it chose rather than replacing them with others of our own.")**. MHC, in fact, cites to a case wherein the Seventh Circuit suggested that a motion for partial judgment on the pleadings may not be proper.

See* *BBL, Inc. v. City of Angola, 809 F.3d 317, 325 (7th Cir. 2015). That court noted the difference in the language between *Rule 56* and *Rule 12(b)(6)*, which provides the governing standard for a motion brought under *Rule 12(c)*. ***Id.*** The court noted that a motion brought pursuant to *12(b)(6)* does not permit piecemeal dismissal of portions of claims. ***Id.*** The Seventh Circuit's rumination **[*12]** on this issue, however, in dicta, culminated in nothing more than a suggestion that a partial judgment may be improper, and the court expressly declined to resolve the issue, finding that the case before it could be resolved on other grounds. ***See id.*** While acknowledging the textual argument for the proscription of a partial judgment on the pleadings under *Rule 12(c)*, as other grounds demonstrate that SIH is not entitled to judgment on the pleadings, this Court refrains from deciding this specific question.

Turning to the merits of the issues before it, the Court next addresses MHC's contention that factual issues exist regarding the times at which the exclusive contracts were in effect. In support, MHC quotes from a portion of its expert report:[2]

> It makes no rational business sense to not contract with Marion HealthCare if Health Alliance was free to contract with any provider in the 7-County Market. If a provider is willing to offer better rates than competitors, a rational insurer would include that provider in a competitive market. Yet the decision not to negotiate a contract with Marion HealthCare resulted in significantly higher cost for outpatient surgical services paid by Health Alliance. **[*13]** This suggests that the exclusionary provisions continued even though they were not formally written into the contracts. It suggests the parties were engaging in a "constructive exclusive contract" throughout the timeframe.

(Doc. 282, p. 10).

The Court finds that it can consider this portion of MHC's expert's report without converting SIH's motion to a motion for summary judgment. In a footnote in ***Geinosky v. City of Chicago***, the Seventh Circuit indicated that a party opposing a motion under *Rule 12(b)(6)* may permissibly submit materials outside the pleadings in order to illustrate facts that the party expects to prove. ***675 F.3d 743, 746, n. 1 (7th Cir. 2012)*** **(citing *Thomas v. Guardsmark, Inc., 381 F.3d 701, 704 (7th Cir. 2004)*)**. There, the court stated that

> [i]n the turmoil concerning civil pleading standards stirred up by *Ashcroft v. Iqbal*...and *Bell Atlantic Corp v. Twombly*...a plaintiff who is opposing a *Rule 12(b)(6)* or *Rule 12(c)* motion and who can provide such illustration may find it prudent to do so. (It may also be prudent to explain to the district court that the materials are being submitted for illustrative purposes and should not be used to convert the motion into a *Rule 56* motion for summary judgment.)

Geinosky, 675 F.3d at 746, n. 1.

Indeed, MHC specifically states that it provides the portion of its expert report merely for the purpose of demonstrating **[*14]** that the issues raised in SIH's motion are disputed issues of fact. The Court accepts the provided portion of MHC's expert report, and considers it only for the purpose of determining whether factual issues exists, and the Court does not consider or attempt to ascertain the truth of the report or the weight to be given to it.

SIH contends in its Reply that even if the Court were to consider the expert report, because the gravamen of MHC's complaint is based on injury from the written contracts, the face of the contracts themselves make clear that MHC cannot state a claim for relief during the periods where the contracts did not contain exclusivity provisions. SIH also appears to attempt to cast doubt on the notion that the causes of action raised by MHC may include non-written agreements as a matter of law. If, however, the causes of action pleaded by MHC cover non-written agreements, and if MHC can be said to have adequately pleaded non-written agreements in its Third Amended Complaint, then MHC has likely demonstrated a question of fact. The Court takes each of these issues in turn.

---

[2] Because the Court relies only the quoted portion of the report for the proposition that an issue of fact exists, the Court will not require that any portion of the expert report be filed in the record at this time, either sealed or unsealed.

The Court first addresses MHC's exclusive dealing and tying claims. Though those claims are brought **[*15]** pursuant to both federal and state law, the same standard is used to govern both. "Illinois law provides that its courts should use the construction of federal ***antitrust law*** by federal courts to guide their construction of those state antitrust laws that are substantially similar to federal ***antitrust law***." ***Marion Healthcare, LLC v. Southern Illinois Healthcare, 2013 U.S. Dist. LEXIS 120722, 2013 WL 4510168, *14 (S.D. Il. Aug. 26, 2013)*** **(quoting *State of Ill., ex rel. Burris v. Panhandle Eastern Pipe Line Co., 935 F.2d 1469, 1480 (7th Cir. 1991))* (internal quotations omitted)**. In ruling on a prior motion to dismiss in this matter, the Court applied federal law to both federal and Illinois claims. ***Marion Healthcare, 2013 U.S. Dist. LEXIS 120722, 2013 WL 4510168 at *14***. In regards to the motion at-bar, neither party indicates that they are of the position that differing standards apply to MHC's federal versus state claims. The Court treats MHC's federal and Illinois claims as being governed under the same standard.

MHC's exclusive dealing and tying claims arise under *section 1* of the Sherman Act. That section provides that "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal." ***15 U.S.C. § 1***. Though the statute reads very broadly on its face in prohibiting "[e]very contract, combination...or conspiracy in restraint of trade," the Supreme Court has read the statute only **[*16]** to apply to "unreasonable" restraints of trade. ***See e.g.*** ***Leegin Creative Leather Products, Inc. v. PSKS, Inc., 551 U.S. 877, 885, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007)***.

An exclusive dealing arrangement exists where a supplier induces a buyer to purchase most or all of the suppliers' goods or services for a certain period of time. **ABA Section of *Antitrust Law*, *ANTITRUST LAW* DEVELOPMENTS p. 209 (7th ed. 2012)**. Such arrangements violate ***antitrust law*** "when they foreclose competition in a substantial share of the line of commerce at issue." ***Republic Tobacco Co. v. North Atlantic Trading Co., Inc., 381 F.3d 717, 737 - 38 (7th Cir. 2004)***. In addition, a tying arrangement exists when a sale of one product or service is conditioned on the buyer also taking a second product or service. **Herbert Hovenkamp, FEDERAL ANTITRUST POLICY § 10.1 p. 435 (4th ed. 2011)**. "'The principal evils of tying arrangements are the foreclosure of competitors in the tied product market and the denial to buyers of the advantages of marketplace shopping.'" ***Marion Healthcare, 2013 U.S. Dist. LEXIS 120722, 2013 WL 4510168 at *11*** **(quoting *Photovest Corp. v. Fotomat Corp., 606 F.2d 704, 724 (7th Cir. 1979))***.

Courts have found that implied or unwritten agreements may constitute both illegal exclusive dealing arrangements and illegal ties. In ***West Penn Allegheny Health System, Inc. v. UPMC***, the Third Circuit provided that to successfully plead a *section 1* claim, generally, a "plaintiff may plead an agreement by alleging direct or *circumstantial* evidence, or a combination of the **[*17]** two." ***627 F.3d 85, 99 (3d Cir. 2010)*** **(emphasis added)**. In regards to exclusive dealing arrangements specifically, the Third Circuit also has found, in an *en banc* opinion, that a plaintiff can recover on an antitrust claim regarding such arrangements even where the arrangements contained no express exclusivity provision.[3] ***LePage's, Inc. v. 3M, 324 F.3d 141, 157 - 58 (3d Cir. 2003)*** (***en banc***). In addition, circuit courts have also found that actionable illegal ties need not be explicit. For instance, the Sixth Circuit has stated:

> Unlawful ties need not be explicit contractual provisions preventing buyers from purchasing the tied product from third parties. The existence of a tying arrangement depends on..."the seller's exploitation of its control over the tying product to force the buyer into the purchase of a tied product that the buyer either did not want at all, or might have preferred to purchase elsewhere on different terms." [***Jefferson Parish Hosp. v. Dist. No. 2 v. Hyde****, 466 U.S. 2, 12, 104 S. Ct. 1551, 80 L. Ed. 2d 2 (1984)*.] When a defendant adopts a policy that makes

[3] SIH argues that *LePage*, a case involving rebates given by a manufacturer in order to induce exclusive dealing, is "irrelevant to determining if a plaintiff alleging exclusive dealing and tying based on written agreements can state a claim when those written agreements did not exist." (Doc. 291, p. 5, n. 4). SIH, however, assumes that the Third Amended Complaint is confined solely to express written agreements. As already discussed by the Court, whether MHC's causes of action may be maintained through de facto agreements and whether MHC adequately pleaded such agreements are two separate questions. The Court relies on *LePage* in deciding only the former question.

> it unreasonably difficult or costly to buy the tying product...without buying the tied product from the defendant, it 'forces' buyers to buy the tied product from the defendant and not from competitors.

Collins Inkjet Corp. v. Eastman Kodak Co.**, 781 F.3d 264, 272 (6th Cir. 2015)*. ***See also ***Aerotec International, Inc. v. Honeywell International, Inc.**, 836 F.3d 1171, 1179 (9th Cir. 2016)* ("We readily acknowledge that tying conditions **[*18]** need not be spelled out in express contractual terms to fall within the Sherman Act's prohibitions."). The Court adopts these previous circuit court findings and finds that MHC, as a matter of law, may plead illegal exclusive dealing and tying arrangements that are non-explicit.

In addition, illegal monopolization under *section 2* clearly need not be the product of explicit contractual provisions. The elements of a *section 2* claim make such a notion clear on their face. To prevail on a claim under *section 2*, a plaintiff must demonstrate that the defendant (1) possesses monopoly power in the relevant market; and (2) "'willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident.'" ***Verizon Communications, Inc. v. Law Offices of Curtis V. Trinko, LLP**, 540 U.S. 398, 407, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)* (quoting ***U.S. v. Grinell Corp.**, 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966))*. The first element merely requires a defendant to hold monopoly power, and the second element requires an exercise of that power—i.e. some form of anticompetitive conduct. ***See*** Hovenkamp, ***supra***, at §§ 6.2, 6.3, pp. 292, 296. Both exclusive dealing and tying arrangements can constitute anticompetitive conduct for purposes of *section 2*. ***See Ticketmaster Corp. v. Tickets.com Inc.**, 127 Fed.Appx. 346, 347 - 48 (9th Cir. 2005)* (exclusive dealing); ***Geneva Pharmaceuticals Technology Corp. v. Barr Laboratories, Inc.**, 386 F.3d 485, 501 - 02 (2d Cir. 2004)* (exclusive dealing); ***Multistate Legal Studies, Inc. v. Harcourt Brace Jovanovich Legal and Professional Publications, Inc.**, 63 F.3d 1540, 1550 (10th Cir. 1995)* ("Illegal tie-ins and predatory pricing under *section 1* may also **[*19]** qualify as anticompetitive conduct for *section 2* purposes.").

Since the causes of action raised by MHC may be pleaded through de facto agreements or arrangements, the question then turns to whether MHC sufficiently raised such agreements in its Third Amended Complaint. It is true that MHC's complaint generally references and relies on written agreements between SIH and BCBS and SIH and Health Alliance. The Federal Rules require only notice pleading, and the question is whether SIH was placed on notice of alleged violations arising from non-written agreements. ***See*** ***Erickson v. Pardus**, 551 U.S. 89, 93, 127 S. Ct. 2197, 167 L. Ed. 2d 1081 (2007)* ("[In a complaint,] [s]pecific facts are not necessary; the statement need only give the defendant fair notice of what the claim is and the grounds upon which it rests.") (quoting ***Twombly** 550 U.S. at 555*) (internal quotations omitted). Antitrust suits, though often complex, do not demand a more stringent pleading standard. ***See*** ***Midwest Gas Services, Inc. v. Indiana Gas Co., Inc.**, 317 F.3d 703, 710 (7th Cir. 2003)* ("[A]ntitrust plaintiffs need not plead to a heightened level of particularity.")

The Third Amended Complaint fairly placed SIH on notice of non-written agreements. Though MHC references the written agreements and relies heavily upon them, the Third Amended Complaint does not explicitly foreclose the existence of non-written agreements **[*20]** or arrangements. To the contrary, beginning on the first page of the complaint, MHC provides the following basic summation of its claims:

> In short, through exclusionary agreements and *ongoing related conduct*, including exclusive dealing, tying and monopolization, Defendant has substantially suppressed competition for outpatient surgical services in a specified, relevant market in southern Illinois.

(Doc. 127, p. 1 - 2) (emphasis added). As such, the Court finds that the Third Amended Complaint, though mainly addressing the written agreements, also encompasses unwritten continuing agreements or conduct. Upon reading the complaint, it simply would not be reasonable for SIH to argue that it was not fairly placed on notice of claims alleged to have arisen from ongoing conduct and/or unwritten agreements continuing after the expiration of the written contracts at issue.[4]

---

[4] Moreover, SIH, who had access to the same discovery as MHC, had the opportunity to rebut Plaintiff's expert's testimony regarding non-written agreements with its own expert's testimony, and, presumably, has done as much.

Given that it has adequately pleaded non-written agreements and/or ongoing conduct, MHC has also demonstrated a factual dispute as to the issues raised in SIH's motion. Simply put, while SIH contends that MHC cannot state a cause of action for the periods in which SIH did not have written exclusivity agreements with payors, **[*21]** MHC's expert opines that such agreements essentially continued on a constructive basis. Though SIH argues that the expert's opinion is speculative, such an argument is best reserved for an examination of the facts, and is not appropriate for a motion for judgment on the pleadings. The Court is satisfied that a factual issue exists, and that the issue raised by SIH is more appropriate for summary judgment or trial.

V. Conclusion

The Court finds that MHC has adequately pleaded causes of action arising, in part, from non-written agreements and/or ongoing conduct. As such, an issue of fact exists as to whether MHC can recover for the times in which SIH did not have in effect express written exclusive contracts. The Court notes that in making its ruling, it takes no position as to the ultimate merits of MHC's claims. Today, the Court merely finds that the issues raised by SIH in its motion are better left for trial or summary judgment. SIH's Motion for Partial Judgment on the Pleadings (Doc. 273) is **DENIED**.

IT IS SO ORDERED.

DATED: 3/14/2018

Judges: LORNA G. SCHOFIELD, UNITED STATES DISTRICT JUDGE.

Opinion by: LORNA G. SCHOFIELD

Opinion

LORNA G. SCHOFIELD, District Judge:

Plaintiffs,[1] a group of individuals and businesses that purchased foreign currency from retail foreign exchange dealers ("RFEDs"), bring this putative class action against eighteen banks and their affiliates[2] seeking injunctive

[1] The named plaintiffs are James Contant, Sandra Lavender, Victor Hernandez, Martin-Han Tran, FX Primus Ltd., Carlos Gonzalez, Ugnius Matkus, Charles G. Hitchcock III, Jerry Jacobson, Tina Porter and Paul Vermillion.

relief under the *Sherman Antitrust Act, 15 U.S.C. § 1 et seq.*, and damages under certain state antitrust and consumer protection laws. Plaintiffs allege that they paid inflated foreign currency exchange rates caused by Defendants' alleged conspiracy to fix prices in the foreign exchange ("FX") or foreign currency market. Defendants move to dismiss the Consolidated Class Action Complaint (the "Complaint") pursuant to *Federal Rule of Civil Procedure 12(b)(6)*. For the reasons stated below, Defendants' **[*6]** motion to dismiss is granted.

I. BACKGROUND

The following facts are taken from the Complaint and assumed to be true for the purposes of this motion. *See* *Littlejohn v. City of New York, 795 F.3d 297, 306 (2d Cir. 2015)*.

On May 20, 2015, the United States Department of Justice ("DOJ") announced that Defendants Citigroup, JPMorgan Chase, Barclays, RBS and UBS AG were pleading guilty to conspiring to manipulate the price of U.S. dollars and euros exchanged in the foreign currency exchange spot market. Traders at Defendant banks used chat rooms with names such as "The Cartel" "The Bandits' Club," "One Team, One Dream," "the 3 musketeers," "the A-team," "The players," "the Essex Express" and "The Mafia" to manipulate benchmark exchange rates. Those exchange rates are set, among other ways, through daily fixing rates or "fixes," the most important of which are the 1:15 P.M. European Central Bank fix and the 4:00 P.M. World Markets/Reuters fix. Third parties collect trading data at these times to calculate and publish a daily "fix rate," which in turn is used to price orders for many large customers. Defendants allegedly coordinated their FX trading to manipulate benchmark rates set at the fixes in an effort to increase their profits.

The traders also used **[*7]** these chat rooms to manipulate the exchange rates in other ways. For example, the traders agreed to fix the bid-ask spreads paid by customers for various currency pairs at artificially high levels. Bid-ask spreads are a primary source of revenue for FX dealers, and in a competitive market, a dealer would seek to gain customers and market share by offering narrower spreads than those offered by competitors. Customers want narrower spreads, allowing them to buy currency at lower prices and sell at higher prices.

Defendants entered into illegal price-fixing agreements to manipulate the foreign currency exchange rates to Plaintiffs' detriment by causing them to pay more for the currency they purchased than they otherwise would have paid. Plaintiffs claim that the price-fixing agreements are violations of *§ 1 of the Sherman Antitrust Act*; the state antitrust statutes of Arizona, California, Illinois, Minnesota, New York and North Carolina; and the consumer protection statutes of California, Florida and Massachusetts.

Plaintiffs claim to have purchased currency indirectly from Defendants by executing trades with non-conspiring RFEDs, who in turn executed covering trades with counterparties such **[*8]** as Defendants and charged Plaintiffs a markup. The RFEDs quoted Plaintiffs exchange rates based on the rates in the price-fixed spot market, thereby passing on to Plaintiffs the costs caused by Defendants' anticompetitive practices.

This class action was the result of consolidating two separate actions by indirect purchasers represented by the same counsel against the same defendants, *Contant, et al. v. Bank of America Corporation, et al.*, No. 17 Civ. 3139, and *Lavender, et al. v. Bank of America Corporation, et al.*, No. 17 Civ. 4392. Plaintiffs then filed the Consolidated Class Action Complaint. Defendants moved to dismiss under *Rule 12(b)(6)*.

---

[2] Defendants are Bank of America Corporation, Bank of America, N.A., Merrill Lynch, Pierce, Fenner & Smith Incorporated, The Bank of Tokyo-Mitsubishi UFJ, Ltd., Barclays Bank PLC, Barclays Capital Inc., BNP Paribas, BNP Paribas North America, Inc., BNP Paribas Securities Corp., BNP Paribas Prime Brokerage, Inc., Citigroup Inc., Citicorp, Citibank, N.A., Citigroup Global Markets Inc., Credit Suisse Group AG, Credit Suisse AG, Credit Suisse Securities (USA) LLC, Deutsche Bank AG, Deutsche Bank Securities Inc., The Goldman Sachs Group, Inc., Goldman, Sachs & Co., HSBC Holdings plc, HSBC Bank plc, HSBC North America Holdings, Inc., HSBC Bank USA, N.A., HSBC Securities (USA) Inc., JPMorgan Chase & Co., JPMorgan Chase Bank, N.A., Morgan Stanley, Morgan Stanley & Co., LLC, Morgan Stanley & Co. International PLC, RBC Capital Markets, LLC, The Royal Bank of Scotland Group plc, RBS Securities Inc., Société Générale, Standard Chartered PLC, UBS AG, UBS Group AG and UBS Securities, LLC.

II. STANDARD

On a motion to dismiss, a court accepts as true all well-pleaded factual allegations and draws all reasonable inferences in favor of the non-moving party, *Trs. of Upstate N.Y. Eng'rs Pension Fund v. Ivy Asset Mgmt., 843 F.3d 561, 566 (2d Cir. 2016)*, but gives "no effect to legal conclusions couched as factual allegations," *Stadnick v. Vivint Solar, Inc., 861 F.3d 31, 35 (2d Cir. 2017)* (quoting *Starr v. Sony BMG Music Entm't, 592 F.3d 314, 321 (2d Cir. 2010)*. To withstand a motion to dismiss, a pleading "must contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))*. "Threadbare recitals of the elements of a cause of action, supported by mere conclusory statements, do not suffice." *Id.*

In deciding **[*9]** a *Rule 12(b)(6)* motion, the court is limited to reviewing the complaint, any documents attached to that pleading or incorporated in it by reference, any documents heavily relied upon by the complaint as to their "terms and effect" and which are therefore integral to the plaintiff's allegations even if not explicitly incorporated by reference, and facts of which the court may take judicial notice. *Goel v. Bunge, Ltd., 820 F.3d 554, 559 (2d Cir. 2016)*.

II. DISCUSSION

The Complaint fails to plead facts sufficient to establish antitrust standing as to Plaintiffs' claims under the Sherman Act and the state ***antitrust law*** of California, Illinois and New York. The Complaint also fails to plead sufficient facts to establish proximate cause, which is required for each of Plaintiffs' claims. Plaintiffs' state law claims, including those under Arizona and North Carolina law, but excluding those under New York law, also fail under federal due process requirements for bringing state law claims. Finally, Plaintiffs' Sherman Act claim fails because the Complaint fails to establish the availability of injunctive relief. Defendants' motion to dismiss pursuant to *Rule 12(b)(6)* is thus granted.

A. Antitrust Standing

In addition to Article III standing, an antitrust plaintiff must demonstrate **[*10]** antitrust standing at the pleading stage. Although general "harm" to the plaintiff is sufficient to satisfy the constitutional standing requirement, "the court must make a further determination whether the plaintiff is a proper party to bring a private antitrust action." *In re Aluminum Warehousing Antitrust Litig., 833 F.3d 151, 157 (2d Cir. 2016)* ("*Aluminum Warehousing*") (quoting *Associated Gen. Contractors of Cal., Inc. v. Cal. State Council of Carpenters, 459 U.S. 519, 535 n.31, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983))*. "The limitation of antitrust standing to 'a proper party' arose because '***antitrust law*** has long recognized that defendants who may have violated a provision of the antitrust statutes are not liable to every person who can persuade a jury that he suffered a loss in some manner 'that might conceivably be traced' to the conduct of the defendants." *Id.* (quoting *Reading Indus., Inc. v. Kennecott Copper Corp., 631 F.2d 10, 12 (2d Cir. 1980))*.

These "antitrust standing" doctrines have arisen primarily under federal law. In *Illinois Brick Co. v. Illinois, 431 U.S. 720, 735, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*, the Supreme Court created a "direct purchaser" doctrine limiting treble damage actions under *§ 4 of the Clayton Act* to direct purchasers. In *Associated General Contractors of California, Inc. v. California State Council of Carpenters, 459 U.S. 519, 536-45, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)* ("*AGC*"), the Court created a multi-factor "efficient enforcer" doctrine to measure the link between the defendant's conduct and the plaintiff's injury in a federal antitrust action. Those factors include:

> (1) the "directness or indirectness of the asserted injury," which requires evaluation of the "chain of **[*11]** causation" linking [the plaintiffs'] asserted injury and the [defendants'] alleged price-fixing; (2) the "existence of

> more direct victims of the alleged conspiracy"; (3) the extent to which [the plaintiffs'] damages claim is "highly speculative"; and (4) the importance of avoiding "either the risk of duplicate recoveries on the one hand, or the danger of complex apportionment of damages on the other."

Gelboim v. Bank of Am. Corp., 823 F.3d 759, 778 (2d Cir. 2016) (quoting AGC, 459 U.S. at 540-45). The *Illinois Brick* direct-purchaser doctrine and the *AGC* efficient enforcer doctrine are "analytically distinct." Blue Shield of Va. v. McCready, 457 U.S. 465, 476, 102 S. Ct. 2540, 73 L. Ed. 2d 149 (1982); *see also* Laumann v. Nat'l Hockey League, 907 F. Supp. 2d 465, 484 n.105 (S.D.N.Y. 2012).

The direct purchaser doctrine and the efficient enforcer doctrine are the product of federal law. They do no preempt state ***antitrust law***. California v. ARC Am. Corp., 490 U.S. 93, 101, 109 S. Ct. 1661, 104 L. Ed. 2d 86 (1989) ("[T]he Court of Appeals erred in holding that the state indirect purchaser statutes are pre-empted."). [F]ederal antitrust laws serve "to supplement, not displace, state antitrust remedies." Id. at 102. States are therefore free to adopt or reject either or both of the federal antitrust standing doctrines.

1. State Applications of the AGC Test

While the highest courts of the states at issue have not considered whether the *AGC* factors apply to those states' respective antitrust statutes, Defendants claim that *AGC* should be **[*12]** applied to the state law antitrust claims except under Minnesota law. As explained below, the Court is persuaded that the AGC efficient enforcer doctrine applies under California, Illinois and New York law.

a. California

At least one California intermediate appellate court and the Ninth Circuit have applied the *AGC* factors to claims under the Cartwright Act, California's state antitrust statute. *See* Vinci v. Waste Mgmt., Inc., 36 Cal. App. 4th 1811, 43 Cal. Rptr. 2d 337, 338-39 (Cal. Ct. App. 1995); Knevelbaard Dairies v. Kraft Foods, Inc., 232 F.3d 979, 987-92 (9th Cir. 2000) (cited in In re Wholesale Elec. Antitrust Cases I & II, 147 Cal. App. 4th 1293, 55 Cal. Rptr. 3d 253, 265 (Cal. Ct. App. 2007). Several federal district courts have done the same. *See, e.g.,* Supreme Auto Transport LLC v. Arcelor Mittal, 238 F. Supp. 3d 1032, 1039 & n.4 (N.D. Ill. 2017) (holding that the *AGC* factors apply to a Cartwright Act claim); Salveson v. JP Morgan Chase & Co., 166 F. Supp. 3d 242, 257-59 & n.7 (E.D.N.Y. 2016), *aff'd*, 663 F. App'x 71 (2d Cir. 2016), *cert. denied*, *137 S. Ct. 1826, 197 L. Ed. 2d 760 (2017)*; In re Dairy Farmers of Am. Inc. Cheese Antitrust Litig., No. 09 Civ. 3690, 2015 U.S. Dist. LEXIS 84152, 2015 WL 3988488, at *7-8 (N.D. Ill. June 29, 2015); Sahagian v. Genera Corp., No. 08 Civ. 7613, 2009 U.S. Dist. LEXIS 132583, 2009 WL 9504039, at *6 (C.D. Cal. July 6, 2009); In re Dynamic Random Access Memory (DRAM) Antitrust Litig., 516 F. Supp. 2d 1072, 1088-89 (N.D. Cal. 2007). The Court is mindful that the Ninth Circuit has noted in the context of the Cartwright Act that "California law affords standing more liberally than does federal law." Knevelbaard Dairies, 232 F.3d at 987.

b. Illinois

The Illinois Appellate Court, the state's intermediate appellate court, cited *AGC* approvingly in dismissing state antitrust claims because the injury alleged was not sufficiently direct and the damages were too speculative. *See* County of Cook v. Philip Morris, Inc., 353 Ill. App. 3d 55, 817 N.E.2d 1039, 1045-47, 288 Ill. Dec. 389 (Ill. App. Ct. 2004). The Seventh Circuit held that federal antitrust standing rules apply under the Illinois Antitrust Act. O'Regan v. Arbitration Forums, Inc., 121 F.3d 1060, 1066 (7th Cir. 1997); *see also* United States ex rel. Blaum v. Triad Isotopes, Inc., 104 F. Supp. 3d 901, 930 (N.D. Ill. 2015) ("[T]he Court sees no reason why the Illinois Supreme Court would not follow *AGC*.").

c. New York

New **[*13]** York's Supreme Court, Appellate Division, its second-highest court, endorsed the lower court's application of the *AGC* factors in an indirect-purchaser case. *See Ho v. Visa USA, Inc., 16 A.D.3d 256, 793 N.Y.S.2d 8, 8-9 (N.Y. App. Div. 2005)* (affirming dismissal of plaintiffs' antitrust claims due to "the remoteness of their damages from the alleged injurious activity"), *aff'g 3 Misc. 3d 1105[A], 787 N.Y.S.2d 677, 2004 NY Slip Op 50415[U] [N.Y. Sup. Ct. 2004]* (applying the *AGC* factors in determining that "plaintiffs' alleged injury is far too remote to provide antitrust standing under the *Donnelly Act*"); *see also State ex rel. Spitzer v. Daicel Chem. Indus., Ltd., 42 A.D.3d 301, 840 N.Y.S.2d 8, 12 (N.Y. App. Div. 2007)* (affirming the dismissal of price-fixing claims under *N.Y. Gen. Bus. Law § 349* where the plaintiff's injury was "too remote" from the alleged wrongdoing), *aff'g in relevant part sub nom. State v. Daicel Chem. Indus., Ltd., 2005 N.Y. Misc. LEXIS 8435, 2005 WL 6056054 (Sup. Ct. Aug. 9, 2005)*; *Williams v. Citigroup, Inc., 36 Misc. 3d 1201[A], 954 N.Y.S.2d 762, 2012 NY Slip Op 51145[U], at *4 [N.Y. Sup. Ct. 2012]* (finding that plaintiffs "damages [we]re too remote 'from the alleged injurious activity' to confer standing") (citing *Ho, 793 N.Y.S.2d at 8*). Federal district courts have likewise found that New York's highest court would apply the *AGC* factors to determine antitrust standing under the state's Donnelly Act. *See, e.g., Nichols v. Mahoney, 608 F. Supp. 2d 526, 545 (S.D.N.Y. 2009)* ("[I]f the plaintiffs do not have standing to assert a federal antitrust claim, they do not have standing to bring a Donnelly Act claim."); *Supreme Auto Transp., 238 F. Supp. 3d at 1039 & n.4*; *Dairy Farmers, 2015 U.S. Dist. LEXIS 84152, 2015 WL 3988488, at *13-14*; *In re Refrigerant Compressors Antitrust Litig., No. 2:09 MD 2042, 2013 U.S. Dist. LEXIS 50737, 2013 WL 1431756, at *10 (E.D. Mich. Apr. 9, 2013)*; *Sahagian, 2009 U.S. Dist. LEXIS 132583, 2009 WL 9504039, at *6*. *But see In re Ductile Iron Pipe Fittings Indirect Purchaser Antitrust Litig., No. 12 Civ. 169, 2013 U.S. Dist. LEXIS 142466, 2013 WL 5503308, at *16 (D.N.J. 2013)* ("The Court is not persuaded that the *AGC* test applies **[*14]** to New York . . . ***antitrust law***. In reaching this conclusion, the Court notes that Defendants have not cited any state appellate cases to show that the highest court in [New York] would apply the *AGC* factors in that state[].").

d. Arizona

No Arizona appellate court has considered whether the *AGC* efficient enforcer doctrine applies to the *Arizona Antitrust Act* ("AAA"). The Arizona Supreme Court rejected *Illinois Brick* and concluded that an indirect-purchaser of goods and services has standing to sue under the AAA. *See Bunker's Glass Co. v. Pilkington PLC, 206 Ariz. 9, 75 P.3d 99, 102 (2003)* (noting that nothing in the AAA precludes indirect purchaser claims). There, the majority permitted claims by indirect purchasers of flat glass and tobacco based on allegations of passed on overcharges without discussing the *AGC* factors, although the dissent stated that *AGC* should apply. At least one Arizona trial court has since decided that *AGC* does apply to state ***antitrust law***. *See Luscher v. Bayer AG*, No. 04 Civ. 14835, 2005 WL 6959406, at *1-2 (Ariz. Super. Ct. Sept. 16, 2005) (applying *AGC* factors to dismiss Arizona state antitrust claims by indirect purchasers). Federal district courts are divided on the issue. *See Supreme Auto Transp., 238 F. Supp. 3d at 1039 & n.4* (dismissing AAA claims based on *AGC* analysis); *DRAM, 536 F. Supp. 2d at 1134-42* (same). *But see In re Pool Prods. Distrib. Mkt. Antitrust Litig., 946 F. Supp. 2d 554, 567 (E.D. La. 2013)* ("But given the Arizona Supreme Court's failure to apply *AGC* in *Bunker's Glass* ***[*15]*** , the trial court's *Luscher* decision is unpersuasive."); *In re Flash Memory Antitrust Litig., 643 F. Supp. 2d 1133, 1152 (N.D. Cal. 2009)* (declining to apply *AGC* to the AAA considering the lack of supporting appellate court authority); *D.R. Ward Constr. Co. v. Rohm and Haas Co., 470 F. Supp. 2d 485, 497 (E.D. Pa. 2006)* ("Notwithstanding the *Luscher* decision, this Court predicts that the Arizona Supreme Court would apply its traditional standing approach, rather than an *AGC* analysis."). The Court thus declines to decide whether *AGC* applies to the AAA and decides the motion to dismiss the Arizona Antitrust claim on other grounds.

e. North Carolina

An intermediate North Carolina state court declined to apply *AGC* and held that "the *AGC* factors do not apply in determining which indirect purchasers have standing to sue under the North Carolina antitrust statutes." *See*

Teague v. Bayer AG, 195 N.C. App. 18, 671 S.E.2d 550, 556-57 (N.C. Ct. App. 2009). *But see* *Crouch v. Crompton Corp., 2004 NCBC LEXIS 6, 2004 WL 2414027, at *18-19 (N.C. Super. Ct. 2004)* (applying modified *AGC* test to determine indirect purchaser standing under North Carolina law). Several federal district courts nonetheless have concluded that North Carolina's high court would apply *AGC* to determine antitrust standing. *See* *Dairy Farmers, 2015 U.S. Dist. LEXIS 84152, 2015 WL 3988488, at *15* (concluding that North Carolina's high court would apply *AGC* to assess antitrust standing, noting that "[d]espite its sometimes-dubious and often-difficult-to-follow analysis, *Teague* cannot be interpreted as a wholesale rejection of *AGC*"; **[*16]** following instead the "more persuasive" trial court decision in *Crouch*); *Sahagian, 2009 U.S. Dist. LEXIS 132583, 2009 WL 9504039, at *6*; *DRAM, 516 F. Supp. 2d at 1094*. The Court thus declines to decide whether *AGC* applies to North Carolina ***antitrust law***, and decides the motion to dismiss the North Carolina antitrust claim on other grounds.

2. Antitrust Standing Analysis

To summarize, the Court concludes that the highest courts in three of the states at issue -- California, Illinois and New York -- would apply some version of the *AGC* factors in determining whether Plaintiffs have antitrust standing to assert their claims under the respective state antitrust laws. With regard to these claims (Counts V, VII and II), the Complaint fails adequately to allege antitrust standing.

The Supreme Court recently discussed the *AGC* factors in the context of the *Lanham Act*, noting that the first factor "must be met in every case" but the third and fourth factors (as enumerated in *Gelboim, 823 F.3d at 778*) are "problematic," and the "potential difficulty in ascertaining and apportioning damages is not . . . an *independent* basis for denying standing where it is adequately alleged that a defendant's conduct has proximately injured an interest of the plaintiff's that the statute protects." *Lexmark Int'l, Inc. v. Static Control Components, Inc., 572 U.S. 118, 134 S. Ct. 1377, 1392, 188 L. Ed. 2d 392 (2014)*; *see also* *In re London Silver Fixing, Ltd., Antitrust Litig., 213 F. Supp. 3d 530, 552 (S.D.N.Y. 2016)* (citing *Lexmark* ***[*17]*** in connection with claims under the Sherman Antitrust Act); *DNAML Pty, Ltd. v. Apple Inc., 25 F. Supp. 3d 422, 430 (S.D.N.Y. 2014)* (same).

As to the first factor, the Complaint fails to show that Plaintiffs' injury has a sufficiently direct relationship to the alleged conspiracy. "Directness in the antitrust context means close in the chain of causation." *Gatt Commc'ns, Inc. v. PMC Assocs., L.L.C., 711 F.3d 68, 78 (2d Cir. 2013)*. The Complaint does not allege facts showing a sufficiently direct connection between the FX spot market, where Defendants allegedly manipulated prices, and the retail trading market, where Plaintiffs purchased foreign currency.

The Complaint alleges that Plaintiffs executed FX trades with non-conspiring RFEDs, who in turn executed covering trades with Defendants, among other counterparties. According to the Complaint, Defendants set supracompetitive prices for their trades with the RFEDs, who passed these markups on to Plaintiffs. The Complaint fails to explain the RFEDs' presumably independent and various pricing and execution strategies, which may well have broken the chain of causation.

As stated in the Complaint:

> To purchase an FX instrument from an FX broker, *a customer* sends an order electronically or by phone to the FX broker for an FX Instrument with a specific currency pair, *exchange rate*, and **[*18]** volume. If the FX broker accepts the trade, the customer pays the agreed-upon rate, often with an additional fee or commission determined by the broker, and the broker places the FX Instrument in the customer's account. Upon receipt of an order from a customer, in order to hedge or cover its exposure on the resulting FX Instrument, the FX broker concurrently executes an FX Instrument with an FX dealer such as a Defendant with the same volume and currency pair as the FX Instrument that the broker sells to the customer. . . .
>
> FX brokers generally receive quotes from several liquidity providers for each currency pair that they offer to their customers. The liquidity providers provide bid-ask quotes for FX spot transactions to the FX brokers, and the FX brokers offer those quotes to their customers, often with some additional markup determined by the brokers.

(emphasis added). According to this description, for any given trade the customer, rather than the RFED, proposes an exchange rate, which the RFED may then accept or decline. The exchange rate may or may not come with an additional fee, commission or markup. The Complaint contains no allegations as to how any such additional fee, commission **[*19]** or markup is computed. The Complaint further alleges that the liquidity providers such as Defendants provide quotes to the RFEDs, which the RFEDs provide to customers, "often" with a markup. But the Complaint provides no explanation as to how these quotes from various sources relate to the exchange rates customers propose to the RFEDs, and how the RFEDs then determine whether to accept the proposed trades. Thus, as alleged, for each transaction there are two independent actors -- the RFEDs and the customers themselves -- who influence the exchange rate of the trades at issue in this case after Defendants' alleged overpricing. In particular, it is unclear from the non-conclusory allegations in the Complaint whether and to what extent the RFEDs absorbed the alleged price increases or passed them on to Plaintiffs.

The Complaint therefore does not support a reasonable inference that Plaintiffs are direct victims of the alleged conspiracy. *See* AGC, 459 U.S. at 540 (finding the directness factor not pleaded where "the chain of causation between the Union's injury and the alleged restraint in the market . . . contains several somewhat vaguely defined links"); In re Dig. Music Antitrust Litig., 812 F. Supp. 2d 390, 402 (S.D.N.Y. 2011) (finding that CD purchasers did not plead a sufficiently **[*20]** direct relationship between prices in the CD market and alleged misconduct in the Internet Music market because they failed to allege "how the pricing of Internet Music affected CD pricing, how the CD market operated generally . . . or any kind of tie . . . between CD pricing and Internet Music pricing").

The second factor -- whether there are more direct victims of the alleged conspiracy -- weighs against finding that Plaintiffs are efficient enforcers based on the allegations in the Complaint. As participants in the FX spot market, the plaintiffs in In re Foreign Exchange Benchmark Rates Antitrust Litigation, No. 13 Civ. 7789, 2016 U.S. Dist. LEXIS 128237, 2016 WL 5108131, at *9 (S.D.N.Y. Sept. 20, 2016) ("*FOREX*") are more direct victims of the alleged conspiracy to manipulate prices in that market than Plaintiffs in this case. *See id.* (holding that Exchange Plaintiffs, in addition to Over-the-Counter Plaintiffs, are efficient enforcers with respect to the alleged conspiracy in the FX spot market).

The third and fourth factors also weigh against Plaintiffs. Regarding the third factor, the Complaint's failure to allege how prices in the retail trading market are determined and the relationship between the FX spot market and the retail trading market means that Plaintiffs' alleged "damages would necessarily be 'highly speculative.'" Gelboim, 823 F.3d at 780 (quoting **[*21]** AGC, 459 U.S. at 542). Under the fourth factor, the Complaint's failure to allege facts showing a direct relationship between the alleged conspiracy and Plaintiffs' injuries raises the risk that Plaintiffs' damages are derivative of the *FOREX* plaintiffs' damages, and therefore would be duplicative and excessive of any judgment in *FOREX*. *See* id. at 780 (noting that existence of other actions seeking damages on behalf of victims raises issue of duplicate recovery). Based on the allegations in the Complaint, none of the efficient enforcer factors weigh in Plaintiffs' favor. Plaintiffs lack antitrust standing to bring their claims under federal ***antitrust law*** as well as California, Illinois and New York ***antitrust law***.

B. Proximate Cause

To succeed on any of their claims, Plaintiffs must prove that Defendants' conspiracy in the FX spot market proximately caused Plaintiffs' injuries in the FX retail investor market. Courts "generally presume that a statutory cause of action is limited to plaintiffs whose injuries are proximately caused by violations of the statute. For centuries, it has been a well established principle of the common law, that in all cases of loss, [courts] are to attribute it to the proximate cause, and **[*22]** not to any remote cause." Lexmark, 134 S. Ct. at 1390. The proximate cause inquiry is meant to determine "whether the harm alleged has a sufficiently close connection to the conduct the statute prohibits." *Id.* In determining proximate cause, courts ask:

> whether the injury that resulted was within the scope of the risk created by the defendant's [wrongful] act; whether the injury was a natural or probable consequence of the [conduct]; whether there was a superseding or intervening cause; whether the [conduct] was anything more than an antecedent event without which the harm would not have occurred.

Lotes Co. v. Hon Hai Precision Indus. Co., 753 F.3d 395, 412 (2d Cir. 2014) (alterations in original) (quoting CSX Transp., Inc. v. McBride, 564 U.S. 685, 717, 131 S. Ct. 2630, 180 L. Ed. 2d 637 (2011) (Roberts, C.J., dissenting)).

Directness, the first *AGC* factor discussed above, is in essence a proximate cause requirement. Lexmark, 134 S. Ct. at 1392. Although "[a]n antitrust violation may be expected to cause ripples of harm to flow through the Nation's economy . . . there is a point beyond which the wrongdoer should not be held liable." AGC, 459 U.S. at 534. For the same reasons that Plaintiffs are unable to show directness of injury under *AGC*, they are likewise unable to show that their injuries were proximately caused by Defendants' conduct.

Proximate cause is required to bring an antitrust action under Minnesota, Arizona **[*23]** and North Carolina law. Although the Court has declined to apply the *AGC* analysis to antitrust claims under Minnesota law, Minnesota imposes at least a proximate cause requirement for bringing an antitrust claim. *See, e.g.,* Lorix v. Crompton Corp., 736 N.W.2d 619, 631 (Minn. 2007) ("Standing under Minnesota ***antitrust law*** must be defined by some prudential limits informed by foreseeability, proximate cause, remoteness, and relation of the injury to the purposes of the ***antitrust law***; otherwise, almost any antitrust violation would provide almost any citizen with a cause of action arising from the resulting ripples of harm throughout the state's economy."). Similarly, the Arizona Supreme Court opinion declining to follow *Illinois Brick* acknowledges that plaintiffs should not be able to bring an antitrust action if they "have sustained injuries [that are] too remote." Bunker's Glass, 75 P.3d at 110. The North Carolina Supreme Court has likewise held that proximate cause is required to recover under the state's ***antitrust law***. Lewis v. Archbell, 199 N.C. 205, 154 S.E. 11, 12 (N.C. 1930); *see also* Mayton v. Hiatt's Used Cars, Inc., 45 N.C. App. 206, 262 S.E.2d 860, 863 (N.C. Ct. App. 1980) (quoting Lewis, 154 S.E. at 12). The Fourth Circuit affirmed the dismissal of a claim under the North Carolina Unfair Trade Practices Act, which governs both antitrust and general consumer protection claims, explaining that under the statute, "a plaintiff must **[*24]** show . . . the act proximately caused injury to the plaintiff." Ellis v. Louisiana-Pac. Corp., 699 F.3d 778, 787 (4th Cir. 2012) (citation omitted). *But see* Dicesare v. Charlotte-Mecklenburg Hosp. Auth., 2017 NCBC LEXIS 33, 2017 WL 1359599, at *8 (N.C. Super. Ct. 2017) ("Plaintiffs are not required at the pleading stage to prove a causal chain between the . . . challenged [anticompetitive] conduct and Plaintiffs' alleged injury."), *cert. denied*, *370 N.C. 215, 804 S.E.2d 541 (N.C. 2017)*.

Each of Plaintiffs' state consumer protection claims also requires allegations plausibly showing proximate cause to survive a motion to dismiss. *See, e.g.,* Jane Doe No. 1 v. Backpage.com, LLC, 817 F.3d 12, 24 (1st Cir. 2016) (Under Massachusetts's consumer protection law, "the plaintiff must lay the groundwork for findings of both actual and proximate causation. If an examination of the claim leads to the conclusion that it fails plausibly to allege a causal chain sufficient to ground an entitlement to relief, that claim is susceptible to dismissal under Rule 12(b)(6)."), *cert. denied*, *137 S. Ct. 622, 196 L. Ed. 2d 579 (2017)*; In re Fla. Cement & Concrete Antitrust Litig., 746 F. Supp. 2d 1291, 1321-22 (S.D. Fla. 2010) (dismissing indirect purchasers' Florida consumer protection claim for failure to adequately plead proximate causation); Lorenzo v. Qualcomm Inc., No. 08 Civ. 2124, 2009 U.S. Dist. LEXIS 69843, 2009 WL 2448375, at *6 (S.D. Cal. Aug. 10, 2009) (dismissing California consumer protection claim because, aside from conclusory allegations as to proximate cause, the complaint "does not allege[] facts to demonstrate how Qualcomm . . . proximately caused Plaintiff's alleged injury.").

For the same reasons that the Complaint fails to satisfy **[*25]** the AGC efficient enforcer factors, it also fails to allege proximate cause. All of Plaintiffs' claims are dismissed for failure to allege facts plausibly showing proximate cause.

C. Due Process Requirements to Bring State Law Claims

Plaintiffs' state law claims, other than those under New York law, also fail because the Complaint fails to allege any nexus between those states and the parties and events in this case, apart from a plaintiff's domicile. Under the Due Process Clause of the Fourteenth Amendment, a state law may not be applied unless that state has "a significant contact or significant aggregation of contacts, creating state interests, such that choice of its law is neither arbitrary nor fundamentally unfair." Phillips Petroleum Co. v. Shutts, 472 U.S. 797, 818, 105 S. Ct. 2965, 86 L. Ed. 2d 628 (1985) (citing Allstate Ins. Co. v. Hague, 449 U.S. 302, 312-13, 101 S. Ct. 633, 66 L. Ed. 2d 521 (1981)). The Due

Process Clause requires a court to invalidate the application of a state's law where the state has "no significant contact or significant aggregation of contacts, creating state interests, with the parties and the occurrence or transaction." *Allstate, 449 U.S. at 308*. The Court's decision in *Allstate* places "modest restrictions on the application of forum law." *Shutts, 472 U.S. at 818*.

Plaintiffs' state law claims fail to clear even these "modest restrictions." "[A]n action alleging violations of the antitrust laws is a claim for injuries sustained, and therefore **[*26]** in the nature of a tort." *Fashion Two Twenty, Inc. v. Steinberg, 339 F. Supp. 836, 841 (E.D.N.Y. 1971)* (analyzing antitrust actions for purposes of the New York long-arm statute); *see also Daniel v. Am. Bd. of Emergency Med., 988 F. Supp. 127, 231-32 (W.D.N.Y. 1997)* (same); *Saratoga Harness Racing Inc. v. Veneglia, 897 F. Supp. 38, 44 n.8 (N.D.N.Y. 1995)* (same). For tort claims, the factors relevant to determining a state's interest are: "(a) the place where the injury occurred, (b) the place where the conduct causing the injury occurred, (c) the domicile, residence, nationality, place of incorporation and place of business of the parties, and (d) the place where the relationship, if any, between the parties is centered." *Johnson v. Nextel Commc'ns Inc., 780 F.3d 128, 142 (2d Cir. 2015)* (citing *Restatement (Second) of Conflict of Laws § 145(2)* (1971)).

As to Plaintiffs' state law claims (except those brought under New York law), the Complaint alleges facts relevant only to factor (c) -- that at least one plaintiff is domiciled in each of the relevant states. The Complaint fails to allege that Plaintiffs transacted and thus were injured in their home states (factor (a)), or that the alleged conspiratorial activity took place in any of those states (factor (b)). Factor (d) confers no interest in this case because, as alleged, Plaintiffs did not transact with Defendants and thus had no relationship with them. Plaintiffs' domicile alone creates an insufficient state interest to justify applying a particular state's law under the **[*27]** *Due Process Clause*. *See Allstate, 449 U.S. at 308, 320*. Plaintiffs' state law claims, except those under New York law, are dismissed for failing to meet due process requirements.

D. Standing to Bring a Sherman Act Claim

Plaintiff's Sherman Act claim fails additionally because the Complaint fails to allege Article III standing as to that claim. "[T]he irreducible constitutional minimum of standing contains three elements." *Lujan v. Defenders of Wildlife, 504 U.S. 555, 560, 112 S. Ct. 2130, 119 L. Ed. 2d 351 (1992)*. "The plaintiff must have (1) suffered an injury in fact, (2) that is fairly traceable to the challenged conduct of the defendant, and (3) that is likely to be redressed by a favorable judicial decision." *Spokeo, Inc. v Robins, 136 S. Ct. 1540, 1547, 194 L. Ed. 2d 635 (2016)* (citation omitted).

As to their Sherman Act claims, Plaintiffs seek only injunctive relief, presumably because they may not seek damages under *Illinois Brick. 431 U.S. at 735*. But Plaintiffs are ineligible for injunctive relief because they fail to allege any ongoing misconduct. *15 U.S.C. § 26*; *see also Cargill, Inc. v. Monfort of Colorado, Inc., 479 U.S. 104, 113, 107 S. Ct. 484, 93 L. Ed. 2d 427 (1986)*; *Nicosia v. Amazon.com, Inc., 834 F.3d 220, 239 (2d Cir. 2016)* (affirming dismissal of injunctive claim because past injuries "do not confer standing . . . unless the plaintiff can demonstrate that she is likely to be harmed again in the future in a similar way").

The Complaint alleges no threat of ongoing or recurring violations. Rather, the Complaint alleges a Class Period ending on December 31, 2013, suggesting an **[*28]** end to the alleged violations in 2013. The Complaint further alleges that following government investigations, guilty pleas and fines, "Defendants terminated and suspended traders, forced traders to resign and implemented internal safeguards after the class period," supporting an inference that Defendants have changed their practices, and the threat of recurring violations has passed. Plaintiffs are thus not entitled to injunctive relief.

Because Plaintiffs may obtain neither damages nor injunctive relief under the Sherman Act, their alleged injury under the act is not "likely to be redressed by a favorable judicial decision." *Spokeo, 136 S.Ct. at 1547*. Plaintiffs lack Article III standing to bring their Sherman Act claim.

E. Leave to Replead

Plaintiffs ask, in the event of dismissal, for leave to file a Third Amended Complaint. Leave to amend should be freely given when justice so requires. *Fed. R. Civ. P. 15(a)*. "However, where the plaintiff is unable to demonstrate that he would be able to amend his complaint in a manner which would survive dismissal, opportunity to replead is rightfully denied." *Hayden v. Cty. of Nassau, 180 F.3d 42, 53 (2d Cir. 1999)*. Leave to amend also may be denied where the plaintiff "fails to specify either to the district court or to the court of appeals how **[*29]** amendment would cure the pleading deficiencies in its complaint." *TechnoMarine SA v. Giftports, Inc., 758 F.3d 493, 505 (2d Cir. 2014)*. Any motion for leave to replead must be consistent with this Opinion and shall be filed as provided below.

CONCLUSION

For the foregoing reasons, Defendants' motion to dismiss the Complaint pursuant to *Rule 12(b)(6)* for failure to state a claim is GRANTED. Should Plaintiffs choose to attempt to replead, they must file a motion to do so, a supporting memorandum of law and proposed Third Amended Consolidated Class Action Complaint, together with a redline showing how it differs from the Consolidated Class Action Complaint dismissed here, within 21 days.

Defendants The Bank of Tokyo-Mitsubishi UFJ, Ltd., Barclays PLC, HSBC Holdings plc, HSBC Bank plc, The Royal Bank of Scotland Group plc, Société Générale S.A., Standard Chartered Bank and UBS AG's separate motion to dismiss the claims against them pursuant to *Federal Rule of Civil Procedure 12(b)(2)* for lack of personal jurisdiction is denied as moot. The Clerk of Court is respectfully directed to close the motion at Docket Nos. 103, 105 and 120.

Opinion

[*225] **MEMORANDUM & ORDER**

GORTON, J.

This is an antitrust case in which plaintiffs Amphastar Pharmaceuticals, Inc. ("Amphastar Pharmaceuticals") and International Medication Systems, Ltd. ("IMS")(collectively, "Amphastar" or "plaintiffs") allege that defendants Momenta Pharmaceuticals, Inc. ("Momenta Pharmaceuticals") and Sandoz Inc. ("Sandoz")(collectively, "Momenta" or "defendants") restricted trade and prevented competition in the manufacture and sales of the generic drug enoxaparin.

Pending before the Court is Momenta's motion to dismiss the complaint (Docket No. 17), which will be treated as **[**3]** a motion to dismiss the amended complaint pursuant to the parties' stipulation. For the following reasons, the motion to dismiss will be denied.

I. Background and Procedural History

A. The Parties

Plaintiff Amphastar Pharmaceuticals is a pharmaceutical company located in California which develops, manufactures and sells pharmaceutical products including generic enoxaparin throughout the United States. Enoxaparin is an anti-coagulant used to prevent blood clots.

Plaintiff IMS is a wholly-owned subsidiary of Amphastar Pharmaceuticals with a principal place of business in California. It manufactures the active pharmaceutical ingredient in Amphastar's generic enoxaparin.

Defendant Momenta Pharmaceuticals is the assignee of United States Patent No. 7,575,886 ("the '886 patent") which concerns a testing process used in manufacturing enoxaparin. Momenta Pharmaceuticals acts as the contract laboratory for defendant Sandoz and is a Delaware corporation with its principal place of business in Massachusetts.

Defendant Sandoz distributes, markets and sells generic enoxaparin products throughout the United States. It is a Colorado corporation with its principal place of business in New Jersey. It allegedly entered into a profit-sharing, contractual relationship **[**4]** with Momenta which rendered it the exclusive licensee of the '886 patent.

B. The Alleged Conduct

In November, 2003, defendants entered into a Collaboration and License Agreement ("Collaboration Agreement") to develop, market and sell "enoxaparin sodium injection" in the United States. The Collaboration Agreement granted an exclusive license of the '886 patent, which had not yet issued, to Sandoz. Plaintiffs claim that the agreement "heavily" incentivized anti-competitive behavior by requiring Sandoz to make "milestone payments", profit sharing payments and royalty payments to Momenta Pharmaceuticals for the privilege of remaining the sole source of generic enoxaparin in the United States.

In or before February, 2007, the United States Pharmacopeial Convention ("USP") commenced the process for establishing a drug standard to test enoxaparin products. The USP is a scientific and impartial nonprofit organization which sets uniform standards for the identity, strength, quality and purity of medicines, food ingredients and dietary supplements. USP policy prohibits it from favoring one manufacturer over another during the standard-setting process and requires its committee members to disclose any conflicts of interest. **[**5]** A member with a conflict cannot attend the final discussion, deliberation or vote on the conflicted issues.

Sanofi-Aventis ("Aventis") proposed the standard known as USP Method <207> ("the 207 Method") to the USP. Dr. Zachary Shriver ("Dr. Shriver"), an employee and director of Momenta Pharmaceuticals **[*226]** who would later be named as an inventor on the '886 patent, served as Momenta's representative on the USP panel tasked with developing and approving the USP standard for enoxaparin. Sandoz also participated in the panel discussions.

The amended complaint alleges that Dr. Shriver and defendants learned, during the USP's consideration of the 207 Method, that Aventis had a pending patent application containing claims which would read on the 207 Method. Defendants purportedly demanded that Aventis abandon its patent application so that any member of the public could practice the enoxaparin standard adopted by the USP. Plaintiffs proffer that demand as evidence that defendants were "very familiar" with the 207 Method and the USP policy on conflicts of interest.

In November, 2008, the USP convened a panel meeting which commenced with a review of the USP policy on conflicts. Momenta Pharmaceuticals presented **[**6]** the 207 Method in a "detailed" presentation to the USP. USP staff reported that it was "not aware of any patent issue that may cover the test". Plaintiffs allege that neither Dr. Shriver, who was present at the meeting, nor any other representative of the defendants disclosed to the USP the conflicts posed by their own pending application for the '886 patent and the Collaboration Agreement. Plaintiffs assert that no other USP panel member knew that the '886 patent, which eventually issued in August, 2009, would cover the use of the 207 Method.

In December, 2009, the USP approved and adopted the 207 Method as its enoxaparin standard after Aventis agreed to abandon its patent application. The USP convened two more panel meetings in March and April of 2011. Plaintiffs claim that Dr. Shriver and another Momenta representative participated in the meetings and continued to violate their duty to disclose their and the defendants' conflicts of interest to the USP.

Sandoz was the first entity to receive approval from the United States Food and Drug Administration ("FDA") to sell generic enoxaparin in the United States in July, 2010. Defendants thus became the sole source of generic enoxaparin until Amphastar also **[**7]** received FDA approval to sell enoxaparin September, 2011. Plaintiffs allege that 1) the FDA required them to comply with the 207 Method as a condition of approval, 2) the 207 Method included steps protected by the patented method, 3) the '886 patent excluded unlicensed competitors from receiving FDA approval and thus 4) the '886 patent excluded new entrants from the market.

Two days after Amphastar received FDA approval, Momenta commenced an action in this Court alleging that Amphastar infringed the '886 patent. Amphastar claims that the lawsuit prevented it from selling generic enoxaparin in the relevant market.

C. Procedural History

Amphastar initiated this antitrust action by filing a complaint in the Central District of California in September, 2015. The complaint alleges violations of 1) federal ***antitrust law***, i.e., the *Sherman Act*, 2) California ***antitrust law***, i.e., the *Cartwright Act* and 3) California state law on unfair business practices. Amphastar amended the complaint in December, 2015 to replace "Sandoz, Pharmaceuticals, Inc." with "Sandoz Inc." as a named defendant.

The amended complaint asserts that Momenta engaged in anti-competitive conduct by executing the Collaboration Agreement, failing to disclose **[**8]** conflicts to the USP and commencing a patent infringement suit against Amphastar for using the 207 Method selected by the USP and required by the FDA. The amended complaint alleges **[*227]** that the anti-competitive conduct kept the price of generic enoxaparin artificially high which, in turn, cost consumers "billions of dollars in overcharges".

Under Amphastar's theory of antitrust liability, 1) the relevant product market is defined as the United States market for generic enoxaparin or, alternatively, enoxaparin, 2) generic entry into the market results in substantial reductions in price, 3) price-sensitive consumers of generic enoxaparin treat different brands of generic enoxaparin as reasonable substitutes and 4) generic manufacturers consider the prices set by other generic manufacturers as directly affecting their own prices.

In December, 2015, Momenta filed a motion to dismiss this action and a separate motion to transfer it from the Central District of California to the District of Massachusetts based upon the "substantial overlap" of issues, claims, witnesses and evidence between the instant case and the prior patent case pending in this Court. The California court allowed the motion **[**9]** to transfer. The case was transferred to the District of Massachusetts and assigned to this Session in January, 2016 but Amphastar filed a writ of mandamus to the Ninth Circuit Court of Appeals ("the Ninth Circuit") to appeal that transfer on personal jurisdictional grounds. That petition was denied in May, 2016.

In July, 2016, this Court allowed Momenta's motion to dismiss, reasoning that Amphastar's claims were precluded by the Noerr-Pennington doctrine. Amphastar appealed that order to the First Circuit Court of Appeals which reversed and remanded the case in March, 2017, directing this Court to consider defendants' alternative arguments for dismissal. The parties submitted supplemental memoranda in that regard in April and May, 2017.

II. Momenta's Motion to Dismiss

A. Legal Standard

To survive a motion to dismiss for failure to state a claim under *Fed. R. Civ. P. 12(b)(6)*, a complaint must contain "sufficient factual matter" to state a claim for relief that is actionable as a matter of law and "plausible on its face." *Ashcroft v. Iqbal, 556 U.S. 662, 667, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))*. A claim is facially plausible if, after accepting as true all non-conclusory factual allegations, the court can draw the reasonable inference that the defendant is liable for the **[**10]** misconduct alleged. *Ocasio-Hernandez v. Fortuño-Burset, 640 F.3d 1, 12 (1st Cir. 2011)*. A court may not disregard properly pled factual allegations even if actual proof of those facts is improbable. Id. Rather, the relevant inquiry focuses on the reasonableness of the inference of liability that the plaintiff is asking the court to draw. *Id. at 13*.

When rendering that determination, a court may not look beyond the facts alleged in the complaint, documents incorporated by reference therein and facts susceptible to judicial notice. *Haley v. City of Boston, 657 F.3d 39, 46 (1st Cir. 2011)*.

B. Sherman Act Violations

Amphastar alleges that defendants violated the Sherman Act by (1) entering into an agreement in restraint of trade which blocked it from selling generic enoxaparin and (2) wrongfully acquiring monopoly power by deceiving the USP into adopting a standard which they later claimed was covered by defendants' patent. Defendants respond that Amphastar has failed to plead facts establishing that their conduct caused Amphastar's injury. Furthermore, defendants suggest that Amphastar does not sufficiently allege a restraint of trade because (1) the 207 **[*228]** Method is not mandatory and (2) there are no plausible allegations that Momenta intended to induce the USP into approving the 207 Method.

1. Causation

First, defendants **[**11]** contend that the Amphastar has failed to plead facts sufficient to demonstrate that it suffered an antitrust injury as a result of defendants' conduct. They claim that Amphastar has not adequately alleged a causal connection between the USP proceedings and Amphastar's decision to adopt the 207 Method because Amphastar first filed its Abbreviated New Drug Application ("ANDA") in 2003 in which it was required to describe the quality control procedures it would use to confirm that its generic enoxaparin had the appropriate structural characteristics. Defendants note that Amphastar adopted the 207 Method before it was approved by the USP and did not amend its ANDA after the USP approved the 207 Method.

Amphastar emphasizes in its response that, although it submitted the ANDA in 2003, that initial application was "inconsequential" because the FDA did not approve the application until 2011. In the intervening years between the application and the approval, the USP adopted the 207 Method. As a result of that adoption, Amphastar suggests, the FDA conditioned its 2011 approval on Amphastar's compliance with the 207 Method. By contrast, had the USP not adopted Method 207, Amphastar would not **[**12]** have been required to comply with it for FDA approval and defendants would not have had the market power to exclude Amphastar.

A plaintiff in an antitrust case must demonstrate that there is a causal connection between the defendant's illegal practice and the antitrust injury. *Sullivan v. Nat'l Football League, 34 F.3d 1091, 1103 (1st Cir. 1994)*. A plaintiff need not prove that the antitrust violation was the "sole cause of their injury, but only that it was a material cause". Id. (citing *Engine Specialties, Inc. v. Bombardier Ltd., 605 F.2d 1, 13 (1st Cir. 1979))*. An antitrust violation can constitute a material cause even where an injury has additional independent causes. See e.g., *In re Nexium (Esomeprazole) Antitrust Litig., 42 F. Supp. 3d 231 (D. Mass. 2014)* (internal citation omitted) (noting that the material cause condition has been interpreted as a proximate cause requirement). The First Circuit has noted that causation questions are "peculiarly within the competence of the factfinder" and should be left for the jury. *Peckham v. Cont'l Cas. Ins. Co., 895 F.2d 830, 837 (1st Cir. 1990)* ("Causation questions of this sort are normally grist for the jury's mill.").

Amphastar has sufficiently alleged that defendants' actions before the USP while that organization was considering the proposed standards for enoxaparin were a material cause of Amphastar's antitrust injury. Momenta's focus on the ANDA is misplaced. While defendants suggest that Amphastar must allege facts **[**13]** supporting an inference that Amphastar adopted the accused procedures as a result of the USP proceedings, the alleged antitrust injury need not have been caused by Amphastar's adoption of the 207 Method but rather by the FDA's approval made contingent on Amphastar's adoption of the USP's official test method to test for its enoxaparin.

Amphastar alleges that Momenta's deceptive conduct in front of the USP led to the approval of the 207 Method and the subsequent exclusion of Amphastar from the marketplace. The adoption of the 207 Method by the USP made the FDA's approval of the sale of enoxaparin by Amphastar conditional on its use of an infringing procedure. Accordingly, Amphastar has adequately pled that the defendants' conduct at the USP was a material cause of the antitrust injury.

[*229] 2. Restraint of Trade

Defendants contend that Amphastar fails to allege a restraint of trade sufficient to support an antitrust claim because the 207 Method is not mandatory and defendants do not demonstrate that Momenta intentionally deceived the USP. According to defendants, while all manufacturers of generic enoxaparin must use a process that assures that the drug has the structural characteristics in **[**14]** the Enoxaparin Monograph, the 207 Method was not included in that monograph and was therefore not mandatory. Defendants request that the Court take judicial notice of eight documents that purportedly show that the method was not mandatory.

As a preliminary matter, Amphastar quibbles with the introduction of extrinsic documents and contends that the Court cannot take judicial notice of the documents for the purpose of establishing the truth of the statements therein. As the Court stated in its July, 2016 Memorandum and Order in this case, it construes defendants' request as pertaining to the existence of the documents and the statements therein but not to acceptance of the truth of such statements.[1] The Court will take judicial notice of the existence of the documents identified by defendants.

[1] The First Circuit Court of Appeals did not address in its opinion this Court's ruling on defendants' request to take judicial notice. *Amphastar Pharms., Inc. v. Momenta Pharms., Inc., 850 F.3d 52 (1st Cir. 2017)*.

See e.g., *Torrens v. Lockheed Martin Servs. Grp., Inc., 396 F.3d 468, 473 (1st Cir. 2005)* (taking judicial notice of the existence of a document but not for the truth of the statements made therein).

> *Section 2 of the Sherman Act* makes it illegal to monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations.

15 U.S.C. § 2. To state a monopolization claim under *§ 2*, a plaintiff **[**15]** must adequately allege that defendant (1) has monopoly power in the relevant market and (2) has engaged in illicit "exclusionary practices" with "the design or effect of protecting or enhancing its monopoly position". *Sterling Merch., Inc. v. Nestlé, S.A., 656 F.3d 112, 125 (1st Cir. 2011)* (quoting *Coastal Fuels of P.R., Inc. v. Caribbean Petroleum Corp., 79 F.3d 182, 195 (1st Cir. 1996)* (internal citation omitted)).

Amphastar has articulated a cognizable claim that defendants wrongfully acquired monopoly power by deceiving the USP into adopting the 207 Method that defendants later asserted was covered by the '886 patent. The complaint contains allegations establishing that the USP adopts standards that are enforced by the FDA and plausibly alleges that the 207 Method is mandatory.

While defendants contend that the USP and the FDA made clear that some unspecified alternative to the 207 Method would be permitted, there remain fact-intensive questions about the feasibility, availability and even existence of such alternatives. See e.g., *Hosp. Auth. of Metro. Gov't of Nashville v. Momenta Pharms., Inc., 244 F. Supp. 3d 705, 716 (M.D. Tenn. 2017)* (finding that "the effect of the testing requirement on the market for enoxaparin depends on the relative feasibility of those other tests [and] the likelihood that they would be considered adequate alternatives to Method <207> under the USP standards"). Amphastar has plausibly alleged that it was required to use the 207 **[**16]** Method to obtain and maintain its generic enoxaparin approval from the FDA. The existence of alternatives is a factual question inappropriate for resolution on a motion to dismiss.

[*230] Defendants also suggest that Amphastar has failed to state an antitrust claim because Momenta opposed the adoption of the 207 Method and, therefore, Amphastar cannot demonstrate that Momenta intentionally deceived the USP. In the complaint, Amphastar alleges that defendants intentionally failed to disclose the '886 patent to the USP thereby contravening the conflict rules put in place by the USP. Those allegations are sufficient, if proven, to establish that defendants misrepresented their interest at the USP in order to secure market power.

Intentional misrepresentations designed to deceive a standard-setting organization can constitute an antitrust violation. See *Broadcom Corp. v. Qualcomm, Inc., 501 F.3d 297, 314 (3d Cir. 2007)*. The Third Circuit Court of Appeals outlined the contours of such a violation, holding that

> [d]eception in a consensus-driven private standard-setting environment harms the competitive process by obscuring the costs of including proprietary technology in a standard and increasing the likelihood that patent rights will confer monopoly power on the patent holder. **[**17]**

Id. By incorporating patented technology into a standard, the patent-holder obtains market power because adoption of the standard eliminates alternatives to the patented techonolgy. Id. (citing *Am. Society of Mech. Eng'rs, Inc. v. Hydrolevel Corp., 456 U.S. 556, 559, 102 S. Ct. 1935, 72 L. Ed. 2d 330 (1982))*. Amphastar has alleged facts sufficient to support its claim that Momenta intentionally deceived the USP to obtain market power.

C. Compulsory Counterclaim

Momenta contends that Amphastar's antitrust claims are compulsory counterclaims that Amphastar was required to raise in the patent infringement suit between the parties, Momenta Pharm., Inc. et al. v. Amphastar Pharm., Inc. et al., 11-cv-11681 (D. Mass.) ("the patent case"). Momenta suggests that because Amphastar's antitrust claims are predicated on Momenta's assertion of the '886 patent and its prosecution of the patent case, Amphastar was required to raise them in that action.

Under *Fed. R. Civ. P. 13*,

> [a] pleading must state as a counterclaim any claim that—at the time of its service—the pleader has against an opposing party if the claim: (A) arises out of the transaction or occurrence that is the subject matter of the opposing party's claim; and (B) does not require adding another party over whom the court cannot acquire jurisdiction.

Fed. R. Civ. P. 13(a). In *Mercoid Corp. v. Mid-Continent Inv. Co., 320 U.S. 661, 671, 64 S. Ct. 268, 88 L. Ed. 376, 1944 Dec. Comm'r Pat. 641 (1944)*, the Supreme Court held that **[**18]** a claim for antitrust damages was a permissive, rather than a compulsory, counterclaim to a prior claim of patent infringement. The Court determined that although the antitrust claim could have been asserted in the patent suit under *Fed. R. Civ. P. 13(b)*, it did not follow "that the failure to do so renders the prior judgment res judicata as respects it". Id. The First Circuit, applying Mercoid, has held that

> a counterclaim for treble damages is permissible in nature so that failure by a defendant to plead it in a prior patent suit does not bar a subsequent independent suit by him under the anti-trust laws.

Fowler v. Sponge Prods. Corp., 246 F.2d 223, 227 (1st Cir. 1957).

Momenta urges this Court to limit Mercoid to its facts and adopt methods of distinguishing its holding endorsed by two other circuit courts. The Second Circuit Court of Appeals has drawn a distinction between antitrust claims that rely on misuse of a valid patent as opposed to antitrust **[*231]** claims based on patent invalidity. *Critical-Vac Filtration Corp. v. Minuteman Intern., Inc., 233 F.3d 697, 703 (2d Cir. 2000)*. Because invalidity defenses in patent cases are generally related to the underlying patent infringement claims, the Court determined that the Mercoid exception to Fed. R. Civ. 13(a) did not apply because Mercoid involved an antitrust claim based on misuse of a valid patent. *Id. at 703-04*.

Amphastar's **[**19]** antitrust claims do not implicate the validity of the '886 patent. Instead, Amphastar claims that defendants conspired to deceive the USP and relies on a theory of misuse of a valid patent. Momenta's insistence that the patent misuse/patent validity distinction applies is, therefore, tenuous. But cf. *Eon Labs., Inc. v. Smithkline Beecham Corp., 298 F. Supp. 2d 175, 181 (D. Mass. 2003)* (finding that where an antitrust claim was based on patent invalidity the patent misuse/patent validity distinction from Critial-Vac applied). Although Momenta is correct that the facts underlying Amphastar's equitable defenses in the patent case are entwined in the antitrust claims in this case, the Court is bound by Fowler and, accordingly, the patent case does not bar a subsequent independent suit under the antitrust laws. *Fowler, 246 F.2d at 227*.

D. Conspiracy

Defendants contend that Counts 1 and 3 of the complaint must be dismissed because Amphastar fails to plead facts supporting a plausible inference that Sandoz joined an antitrust conspiracy. Instead, defendants suggest, Amphastar makes a conclusory statement that Sandoz entered into a collaboration agreement with Momenta and acted in concert during the USP proceedings. Amphastar responds by stressing that the complaint sufficiently alleges an unlawful conspiracy **[**20]** by describing the terms of a collaboration and license agreement which would provide financial incentive for defendants to remain the sole providers of generic enoxaparin in the market.

Section 1 of the Sherman Act prohibits, in relevant part, "contract[s], combination[s] in the form of trust or otherwise, or conspirac[ies] in restraint of trade or commerce". *15 U.S.C. § 1*. To state a claim under *Section 1*, an antitrust plaintiff must present either direct or circumstantial evidence of defendants' "conscious commitment to a common scheme designed to achieve an unlawful objective". *Evergreen Partnering Grp., Inc. v. Pactiv Corp., 720 F.3d 33, 43 (1st Cir. 2013)* (citing *Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 764, 104 S. Ct. 1464, 79 L. Ed. 2d 775 (1984)*).

Amphastar plausibly alleges that the collaboration agreement between Sandoz and Momenta created financial incentives for the companies to exclude other producers of generic enoxaparin from the marketplace. It purportedly documented specific milestone payments for maintaining their status as the sole providers and Sandoz's participation in the USP meetings concerning the 207 Method. See e.g., *Coalition for ICANN Transparency, Inc. v. VeriSign, Inc., 611 F.3d 495, 503 (9th Cir. 2010)* (finding that the plaintiff adequately pled the existence of a conspiracy by demonstrating that defendant had the intent to restrain trade by entering into a contract). Accordingly, Amphastar has alleged facts sufficient to support their **[**21]** claims under *Section 1* of the Sherman Act.

ORDER

For the foregoing reasons, defendants' motion to dismiss (Docket No. 17) is **DENIED**.

So ordered.

HN1[] **Sherman Act, Claims**

When a complaint alleges a violation of the Sherman Act as the basis for unfair methods of competition or unfair acts under § 337(a)(1)(A) of the Tariff Act of 1930, *19 U.S.C.S. § 1337(a)(1)(A)*, the complaint must also allege antitrust injury.

International Trade Law > US International Trade Commission Proceedings > Investigations

International Trade Law > US International Trade Commission Proceedings > Judicial Review

HN2[] **US International Trade Commission Proceedings, Investigations**

The U.S. International Trade Commission is a creature of statute, and must find authority for its actions in its enabling statute.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Business & Corporate Compliance > ... > International Commerce & Trade > Exports & Imports > Tariff Act

HN3[] Scope, Monopolization Offenses

On the face of the statute, a violation of *19 U.S.C.S. § 1337(a)(1)(A)* requires that there be unfair methods of competition or unfair acts in the importation of articles. It also requires that the threat or effect of the unfair method of competition or unfair act be to destroy, substantially injure, or prevent the establishment of a domestic industry, or to restrain or monopolize trade and commerce in the United States. *19 U.S.C.S. § 1337(a)(1)(A)(i)*-1337(a)(1)(A)(iii).

Business & Corporate Compliance > ... > International Commerce & Trade > Exports & Imports > Tariff Act

HN4[] Exports & Imports, Tariff Act

With certain narrow exceptions, *19 U.S.C.S. § 1337(c)* entitles respondents to present the same defenses in a *§ 1337* proceeding that are available in district court.

Business & Corporate Compliance > ... > International Commerce & Trade > Exports & Imports > Tariff Act

International Trade Law > US International Trade Commission Proceedings > Investigations

HN5[] Exports & Imports, Tariff Act

Over the years, the U.S. International Trade Commission has interpreted unfair methods of competition or unfair acts under *19 U.S.C.S. § 1337* to apply to a broad range of substantive law, such as trade secret misappropriation, common law trademark infringement, Lanham Act violations, and ***antitrust law***. Consistent with the recognition that any determination of unfair acts is dependent upon the private rights between parties, when the Commission is asked to look to a body of established federal statutory law for defining an unfair act, the Commission is guided by the express congressional limitations on the scope of that federal law as applied in district court.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > Sherman Act > Remedies > Damages

HN6[] Sherman Act, Claims

A private party seeking to establish an antitrust violation must also show that it has suffered an injury cognizable under the antitrust laws and this antitrust injury must be a result of the alleged anti-competitive conduct.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN7[] **Sherman Act, Claims**

On its face, the language of the Sherman Act is very broad and could be interpreted to proscribe all contracts in restraint of trade. The Supreme Court has never taken such a literal approach to its language. Rather, in interpreting *15 U.S.C.S. § 1*, the Supreme Court has been guided by the principle that the antitrust laws were enacted for the protection of competition, not competitors, and that the Sherman Act should be applied consistent with its purpose of protecting competition. Thus, the Court has held that *§ 1* only addresses unreasonable restraints, i.e., whether its anticompetitive effects outweigh its pro-competitive effects.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Sherman Act

HN8[] **Per Se Rule Tests, Manifestly Anticompetitive Effects**

Per se and rule-of-reason analysis are two methods of determining whether a restraint is unreasonable. The rule of reason is the accepted standard for testing whether a practice restrains trade in violation of *15 U.S.C.S. § 1* of the Sherman Act. Under this rule, the factfinder weighs all of the circumstances of a case in deciding whether a restrictive practice should be prohibited as imposing an unreasonable restraint on competition. The per se rule, on the other hand, eliminates the need to study the reasonableness of an individual restraint in light of courts having considerable experience with the restraint at issue and knowing it to have manifestly anticompetitive effects. The per se rule is a presumption of unreasonableness based on business certainty and litigation efficiency. Restraints that are per se unlawful include horizontal agreements among competitors to fix prices or to divide markets.

Antitrust & Trade Law > Clayton Act > Remedies > Damages

HN9[] **Standing, Clayton Act**

Sections 4 (damages) and 16 (injunctive relief) of the Clayton Act provide the vehicle for private enforcement of the Sherman Act and other antitrust laws in district court. Section 4 provides a cause of action to any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws. *15 U.S.C.S. § 15*. It thus requires a plaintiff to allege that the unlawful antitrust conduct caused the plaintiff 's injury. *15 U.S.C.S. § 15*.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Antitrust & Trade Law > ... > Private Actions > Standing > Sherman Act

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN10[] **Sherman Act, Claims**

The injury a private litigant seeking to enforce the Sherman Act must demonstrate cannot simply be harm to its business but must instead be an antitrust injury. Antitrust injury is injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. Actions that are per se unlawful under the Sherman Act may nonetheless have some pro-competitive effects, even though the actions may disadvantage particular private parties. Therefore, consistent with ***antitrust law***'s statutory purpose of protecting competition, in order for a private party to have standing to bring an antitrust claim under the Sherman Act in district court, the plaintiff must allege that its injury stems from a competition-reducing aspect or effect of the defendant's behavior. This antitrust injury requirement ensures that harm claimed by the plaintiff corresponds to the rationale for finding a violation of the antitrust laws in the first place, and prevents losses that stem from competition from supporting suits by private plaintiffs for either damages or equitable relief. Pro-competitive or efficiency-enhancing aspects of practices that nominally violate antitrust laws should play no role with respect to providing relief based on that violation. Thus, antitrust injury is an essential substantive element to ensuring proper enforcement of antitrust laws.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN11[] **Attempts to Monopolize, Elements**

In the context of pricing practices, only predatory pricing has the requisite anticompetitive effect to satisfy the antitrust injury requirement. The Supreme Court has articulated a two-prong test for predatory pricing: first, a plaintiff must prove that the prices complained of are below an appropriate measure of its rival's costs (below-cost pricing); and the second prerequisite is a demonstration that the competitor had a dangerous probability, of recouping its investment in below-cost prices (recoupment).

Antitrust & Trade Law > ... > Private Actions > Standing > Sherman Act

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN12[] Sherman Act, Claims

Given that antitrust injury is a requirement of an antitrust claim brought by a private plaintiff in district court, the U.S. International Trade Commission finds that for a Sherman Act claim to constitute "unfair methods of competition and unfair acts" under *19 U.S.C.S. § 1337(a)(1)(A)*, the private complainant must allege antitrust injury. As in district court, this requirement serves to ensure that a plaintiff can recover only if the loss stems from a competition-reducing aspect or effect of the defendant's behavior since it is inimical to the antitrust laws to award damages—or in the case of a *§ 1337* violation, receive an exclusion order or cease and desist order—for losses stemming from continued competition.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Business & Corporate Compliance > ... > International Commerce & Trade > Exports & Imports > Tariff Act

HN13[] Scope, Monopolization Offenses

19 U.S.C.S. § 1337(a)(1)(A) is not merely a statute to protect competitors but also a statute to preserve competition. The "threat or effect" prong of *§ 1337(a)(1)(A)(i)*, *1337(a)(1)(A)(ii)*, *1337(a)(1)(A)(iii)* may be satisfied by either injury to the domestic industry or by a showing of restraint or monopolization of trade. *Section 1337* directs the imposition of an exclusion order in a case where an unfair method or act has the effect or tendency to restrain or monopolize trade and commerce in the United States irrespective of whether a domestic industry is experiencing injury.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Private Actions > Standing > Sherman Act

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN14[] Sherman Act, Claims

The protectionist focus of *19 U.S.C.S. § 1337* is protection from the harm of an "unfair act" in the importation of goods, here an alleged antitrust violation. When that alleged act does not cause the type of harm required for a private party to establish an antitrust violation, the complaining party has not demonstrated that the act is an unfair act required to invoke *§ 1337*. Congress and courts have defined the elements necessary for a plaintiff to show an antitrust claim in district court under the Sherman Act.

Business & Corporate Compliance > ... > International Commerce & Trade > Exports & Imports > Tariff Act

HN15[] Exports & Imports, Tariff Act

"Unfair acts" and the "threat or effect" language are separate elements for showing a violation of *19 U.S.C.S. § 1337(a)(1)(A)*.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > Federal Trade Commission Act

International Trade Law > US International Trade Commission Proceedings > Investigations

Antitrust & Trade Law > Federal Trade Commission Act > US Federal Trade Commission

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > Federal Trade Commission Act

International Trade Law > US International Trade Commission Proceedings > Judicial Review

***HN16*[] Deceptive & Unfair Trade Practices, Federal Trade Commission Act**

It is true that the U.S. International Trade Commission, like the Federal Trade Commission (FTC), has independent authority to institute and litigate investigations under *19 U.S.C.S. § 1337*. *19 U.S.C.S. § 1337(b)(1)*. However, unlike the FTC and the Department of Justice, which can exercise judgment akin to prosecutorial discretion (taking into consideration the effects on competition of the actions at issue), the Commission's discretion regarding whether to institute investigations based on properly-filed complaints is not unlimited. It is correct that a *§ 1337* proceeding is not purely private litigation between the parties but rather is an investigation by the Government into unfair methods of competition or unfair acts in the importation of articles into the United States. Significantly, however, any determination of unfair acts is dependent upon the private rights between parties in the position of complainant and respondent. The 1975 amendment of the statute which added the provision in *§ 1337(c)*, "All legal and equitable defenses may be presented in all cases" was a major change which reflects a recognition that essentially private rights are being enforced in the proceeding.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

International Trade Law > US International Trade Commission Proceedings > Investigations

International Trade Law > US International Trade Commission Proceedings > Judicial Review

***HN17*[] Standing, Requirements**

19 U.S.C.S. § 1337 bifurcates the violation and remedy phases of an investigation. After a violation is found and as part of the remedy phase of the investigation, *§ 1337* requires the International Trade Commission to consider the effect of any exclusion order and/or cease and desist order upon the competitive conditions in the United States economy, and United States consumers. *19 U.S.C.S. § 1337(d)(1)*, *1337(e)(1)*. This "public interest" analysis addresses a different question from the antitrust injury requirement. In the case of an exclusion order, it asks the Commission to consider the effect of excluding the violative products from the United States on competition and U.S. consumers (along with the other public interest factors). On the other hand, the antitrust injury requirement asks a tribunal to assess what effect on competition the accused products are having while they are in the market. Thus, the statutory public interest factors considered during the remedy portion of the investigation do not substitute for the requirement of antitrust injury.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN18[] Sherman Act, Claims

As the federal courts have recognized, antitrust injury is a requirement for a private party to bring a claim under the Sherman Act, consistent with the statutory purpose of protecting competition.

Antitrust & Trade Law > Sherman Act > Claims

International Trade Law > US International Trade Commission Proceedings > Investigations

International Trade Law > US International Trade Commission Proceedings > Judicial Review

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN19[] Sherman Act, Claims

The antitrust injury requirement is not a bar to antitrust actions at the International Trade Commission. Rather, it ensures that antitrust claims asserted in *19 U.S.C.S. § 1337* are adjudicated in a manner that is not inconsistent with existing, clear federal ***antitrust law***.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN20[] Sherman Act, Claims

In federal district courts, every private antitrust plaintiff, including those challenging an agreement as unlawful under *15 U.S.C.S. § 1*, must include in its complaint allegations of antitrust injury.

Business & Corporate Compliance > ... > Types of Commercial Transactions > Negotiable Instruments > Recoupment

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN21[] Negotiable Instruments, Recoupment

To survive a motion to dismiss, a complaint must state a plausible claim for relief, which requires that the complaint show that the pleader is entitled to relief, *Fed. R. Civ. P. 8(a)(2)*. If proof of recoupment is required to succeed on the claim, allegations of recoupment must appear in the complaint to show an entitlement to relief. During discovery, the plaintiff must show that there is factual support for each component of the claim or it will be rejected as a matter of law on summary judgment.

International Trade Law > US International Trade Commission Proceedings > Judicial Review

HN22[] **US International Trade Commission Proceedings, Investigations**

Under the International Trade Commission's jurisprudence, complainants are typically allowed to amend the complaint for good cause. *19 C.F.R. § 210.14(b)(1)*.

Judges: [*1] Lisa R. Barton, Secretary to the Commission. DISSENTING OPINION OF COMMISSIONER MEREDITH M. BROADBENT.

Opinion by: Lisa R. Barton

Opinion

COMMISSION OPINION

On November 14, 2016, the presiding Administrative Law Judge ("ALJ") in the above-identified investigation issued Order No. 38, an initial determination ("ID") granting Respondents' motion to terminate Complainant's antitrust claim under *19 C.F.R. § 210.21* and, in the alternative, under *19 C.F.R. § 210.18*. The Commission has determined to affirm in part, as modified by our reasoning below, and reverse in part the ID (Order No. 38). Specifically, the Commission has determined that antitrust injury standing is required for antitrust claims before the Commission. Complainant does not argue that it meets this requirement and, to the contrary, represents on review that it will not amend the complaint to plead or prove antitrust injury as Complainant contends that it is unable to prove antitrust injury. Accordingly, for the reasons discussed below, we affirm the dismissal of Complainant's sole remaining claim, the antitrust claim. Commissioner Broadbent dissents and has filed a dissenting opinion.

I. BACKGROUND

By publication in the Federal Register on June 2, 2016, the Commission instituted this **[*2]** investigation based on a complaint filed by Complainant United States Steel Corporation of Pittsburgh, Pennsylvania ("U.S. Steel" or "Complainant"), alleging a violation of *section 337 of the Tariff Act of 1930*, as amended, *19 U.S.C. § 1337* ("section 337").[1] *See* *81 Fed. Reg. 35381*-2 (June 2, 2016). Specifically, the Notice of Investigation states that the Commission will determine whether there is a violation of *section 337(a)(1)(A)* in the importation, the sale for importation, or the sale after importation into the United States of certain carbon and alloy steel products by reason of: (1) a conspiracy to fix prices and control output and export volumes under *section 1 of the Sherman Act*, the threat or effect of which is to restrain or monopolize trade and commerce in the United States; (2) misappropriation and use of trade secrets, the threat or effect of which is to destroy or substantially injure an industry in the United States; or (3) false designation of origin or manufacturer, the threat or effect of which is to destroy or substantially injure an industry in the United States. *Id.* The Commission later terminated the investigation with respect to U.S. Steel's trade secret misappropriation allegations based on Complainant's withdrawal of those allegations. *See Certain **[*3]** Carbon and Alloy Steel Products*, Comm'n Notice (Mar. 24, 2017). The Commission also terminated the investigation with respect to the false designation of origin allegations against non-defaulting Respondents based on motions for summary determination by those Respondents. The ALJ granted the motions and neither

[1] U.S. Steel filed an amended complaint on September 22, 2016. EDIS Doc. No. 591156. U.S. Steel's amended complaint alleges, *inter alia*, a *section 337* violation through "a conspiracy to fix prices and control output and export volumes, in violation of *Section 1* of the Sherman Act, *15 U.S.C. § 1*." Amended Complaint at ¶ 2.

Complainant nor any other party petitioned for review of her order. *See Certain Carbon and Alloy Steel Products*, Comm'n Notice (Nov. 1, 2017).

The notice of investigation identified forty (40) respondents who are Chinese steel manufacturers or distributors, as well as some of their Hong Kong and/or United States affiliates. *See* *81 Fed. Reg. 35381*-2 (June 2, 2016). The Commission found several of the distributor respondents to be in default.[2] *See* *Certain Carbon and Alloy Steel Products, Inv. No. 337-TA-1002, Comm'n Notice, 2016 ITC LEXIS 1539 (Oct. 14, 2016)*, *Comm'n Notice, 2016 ITC LEXIS 1250 (Oct. 18, 2016)*, *Comm'n Notice, 2016 ITC LEXIS 1365 (Nov. 18, 2016).* The notice of investigation also names the Office of Unfair Import Investigations as a party in this investigation. *See* *81 Fed. Reg. 35381*-2 (June 2, 2016).

A. Summary of ID (Order No. 38)

On August 26, 2016, the manufacturing respondents[3] (referred to, hereinafter, as "Respondents") filed a motion to terminate **[*4]** U.S. Steel's *Sherman Act* claim under *19 C.F.R. § 210.21*. Respondents argued that U.S. Steel's amended complaint does not satisfy antitrust pleading requirements and must therefore be dismissed. U.S. Steel and the Commission Investigative Attorney ("IA") each filed a response in opposition to the motion to terminate.[4]

On November 14, 2016, the ALJ issued the subject ID (Order No. 38), granting Respondents' motion under *19 C.F.R. § 210.21* and, in the alternative, under *19 C.F.R. § 210.18*. The ALJ reasoned that U.S. Steel is required to show antitrust standing in order to state an antitrust claim under *section 337(a)(1)(A)*. *See* Order No. 38 at 10. The ALJ found that "[b]y claiming an illegal restraint of trade . . . U.S. Steel merely satisfie[d] the pleading requirements under the threat or effect prong of *section 337(a)(1)(A)(iii)*, but it has not properly alleged that the practices complained of constitute an unfair method of competition or unfair act under *section 337(a)(1)(A)*." *Id.* at 10-11. The ALJ explained that "the limitations on private antitrust litigants must apply under *section 337* as they do in federal courts." *Id.* at 10 (citing *Tianrui Group Co. Ltd. v. Intl Trade Comm'n, 661 F.3d 1322, 1333 (Fed. Cir. 2011)* ("*Tianrui*")). The ALJ further explained that "[u]nder federal ***antitrust law***, it is firmly established that a private complainant must show antitrust standing." *Id.*

Having found that **[*5]** a showing of antitrust injury was required, the ALJ held that "[i]n the context of pricing practices challenged by rivals as depressing their profits, 'only predatory pricing has the requisite anticompetitive effect.'" *Id.* at 21 (citing *Atl. Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 339, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)* ("ARCO")). The All concluded that because "U.S. Steel's complaint does not allege predatory pricing or the facts necessary to show predatory pricing[,] . . . [t]he complaint therefore is fatally deficient as a matter of law."

---

[2] In light of these defaults, and as it relates to the false designation of origin claim only, the issue of remedy remains. Simultaneously with this opinion, the Commission is issuing a notice requesting briefing on the public interest, remedy, and bonding in connection with the false designation of origin claim.

[3] The manufacturing respondents are: Baosteel America, Inc.; Shanghai Baosteel Group Corporation; Baoshan Iron & Steel Co., Ltd.; China Shougang International Trade & Engineering Corporation; Hebei Iron and Steel Group Co., Ltd.; Hebei Iron & Steel Group Hengshui Strip Rolling Co., Ltd.; Hebei Iron & Steel (Hong Kong) International Trade Co., Ltd.; Masteel Iron and Steel Co. Ltd.; Magang (Group) Holding Co. Ltd.; Anshan Iron and Steel Group; Angang Group International Trade Corporation; Angang Group Hong Kong Co. Ltd.; Wuhan Iron and Steel Group Corp.; Wuhan Iron and Steel Co., Ltd.; WISCO America Co., Ltd.; Jiangsu Shagang Group; and Jiangsu Shagang International Trade Co., Ltd. *See* Respondents' motion to terminate at 1 n.1, filed August 26, 2016, EDIS Doc. No. 589182.

[4] Although the IA agreed that antitrust injury should be required, the IA argued before the ALI that dismissal was not warranted as "U.S. Steel could allege facts that would establish predatory pricing and/or recoupment 'in the future.'" *See* Order No. 38 at 8 (citation omitted). In light of Complainant's representations to the Commission on review that it would not plead or prove antitrust injury, the IA ultimately took the position that no remand was necessary. *See, e.g.*, Transcript of Oral Argument (as corrected on May 5, 2017, EDIS Doc. No. 610791) at 224-25 (hereinafter, referred to as "Tr.").

Id. at 23. The ALJ found that "failure to plead antitrust injury is grounds for dismissal at the earliest possible stage of litigation." *Id.* at 28. The All concluded that "dismissal with prejudice is appropriate." *Id.* at 30.

B. Proceedings before the Commission Related to Review of the ID

On November 23. 2016, Complainant and the IA filed petitions for review of the ID. Complainant U.S. Steel also requested oral argument before the Commission. On December 1, 2016, Respondents filed a combined response to the petitions for review. Also on December 1, 2016, Complainant filed a response to the IA's petition for review.

On December 19, 2016, the Commission issued a Notice determining to review the ID and requesting written submissions in response to certain questions from **[*6]** the Commission. *See* 81 Fed. Reg. 94416-7 (Dec. 23, 2016). The parties filed initial written submissions and responsive submissions in response to the Commission's questions. On the same day that responsive submissions were filed, the International Center for Law & Economics, a non-party, filed comments regarding the Commission's determination to review the ID. On February 24, 2017, the Commission issued a notice setting the date for an oral argument to March 14, 2017. *See Certain Carbon and Alloy Steel Products, Inv. No. 337-TA-1002, Comm'n Notice, 2017 ITC LEXIS 289 (Feb. 24, 2017)*.

On March 3, 2017, the Commission decided to seek further written submissions from the public and to reschedule the oral argument for April 20, 2017. *See* 82 Fed. Reg. 13133-4 (Mar. 9, 2017). Four non-parties filed written submissions in response to the Commission's March 3, 2017, Notice, namely, Maxell Corporation of America and Hitachi Maxell, Ltd. (collectively, "Maxell"); AK Steel Corporation ("AK Steel"); United Steel, Paper and Forestry, Rubber, Manufacturing, Energy, Allied Industrial and Service Workers International Union, AFL-CIO-CLC ("USW"); and former Commissioner Daniel R. Pearson, then with the Cato Institute. The parties filed responses to the non-party **[*7]** submissions.

On April 20, 2017, the Commission heard oral arguments from the parties on the antitrust injury issue.

C. Summary of Party Arguments

As noted above, the Commission has received extensive briefing and oral argument on the issues under review.[5] U.S. Steel argues the ALJ eared because a complaint alleging a violation of *section 337* based on *section 1* of the Sherman Act does not need to allege antitrust injury. It argues that *section 337* is a protectionist statute and that "[t]he statutory history, Commission determinations, case law, and other authority show that the policy underlying *Section 337(a)(1)(A)(iii)* is to protect American companies and workers from any threatened or actual restrain of their trade and commerce in the United States caused by unfairly traded imports." U.S. Steel's Jan. 17, 2017 Br. at 3-4 (EDIS Doc. No. 601088); *id.* at 13, 20. It contends that antitrust injury is about harm to consumers; it is fundamentally different from *Section 337(a)(1)(A)* injury, which addresses harm to American companies and workers." *Id.* at 27. It further posits that any impact of an exclusion order on competitive conditions and consumers should be considered by the Commission "***after*** a violation is found," as part of the Commission's public interest analysis. *Id.* at 4 (emphasis in **[*8]** original); *id.* at 8-9, 37-38.

Respondents and the IA, on the other hand, argue that U.S. Steel's complaint must allege antitrust injury. Respondents argue that antitrust injury is required as a matter of law under Supreme Court precedent and that predatory pricing is required both to establish standing and to prove the substantive antitrust claim. Respondents assert that *section 337(a)(1)(A)(iii)* is "not merely a statute to protect competitors," *i.e.*, a trade statute, "but also a statute to preserve competition,'" *i.e.*, an antitrust statute. Respondents' Feb. 1, 2017 Resp. Br. at 2-3 (EDIS Doc. No. 602530) (citing *Certain Welded Stainless Steel Pipe and Tube, Inv. No. 337-TA-29, 1978 ITC LEXIS 63, 1978 WL 50692, *1, 17 (Feb. 22, 1978)* ("*Steel Pipe*")[6]). Respondents assert that "*Section 337*, when used as an

---

[5] Although the Commission briefly summarizes the party arguments here, as it does in all investigations, the Commission has fully considered all of the arguments in reaching its determination.

antitrust law, must not be allowed to be used by competitors to undermine the antitrust laws' fundamental purpose." Respondents' Jan. 17, 2017 Br. at 30 (EDIS Doc. No. 601087). Respondents further assert that antitrust injury standing is a substantive element of a private antitrust claim, not a public interest factor. Respondents' Feb. 1, 2017 Resp. Br. at 5 (EDIS Doc. No. 602530).

The IA asserts that Commission authority and the legislative history show that *section 337* "embodied the goal of promoting **[*9]** fair trade, as well as that of protecting American industry." IA's Jan. 17, 2017 Br. at 3-4 (EDIS Doc. No. 601084) (citations omitted). The IA asserts that antitrust injury is required in cases based on a complaint by a private party (such as U.S. Steel) but would not be a required element for an investigation self-initiated by the Commission. *Id.* at 28-29.

II. DISCUSSION

The central issue presented is whether Complainant must plead and establish antitrust injury in a *section 337* investigation predicated on *section 1* of the Sherman Act. As explained below, the Commission determines, as did the ALJ, that ***HN1***[] when a complaint alleges a violation of the *Sherman Act* as the basis for "[u]nfair methods of competition [or] unfair acts" under *section 337(a)(1)(A)*, the complaint must also allege antitrust injury.

A. Unfair Methods of Competition and Unfair Acts Under *Section 337(a)(1)(A)*

HN2[] Our analysis must begin with the language of *section 337* as our reviewing Court has held that the Commission "is a creature of statute, and must find authority for its actions in its enabling statute." *Kyocera Wireless Corp. v. Int'l Trade Comm'n, 545 F.3d 1340, 1355 (Fed. Cir. 2008)*. *Section 337(a)(1)(A)* provides:

> (a)(1) . . . [T]he following are unlawful, and when found by the Commission to exist shall be dealt with, in addition to any other provision of law, as provided in this section:
>
>> (A) Unfair **[*10]** methods of competition and unfair acts in the importation of articles . . . into the United States, or in the sale of such articles by the owner, importer, or consignee, the threat or effect of which is-
>>
>> (i) to destroy or substantially injure an industry in the United States;
>>
>> (ii) to prevent the establishment of such an industry; or
>>
>> (iii) to restrain or monopolize trade and commerce in the United States.

19 U.S.C. § 1337(a)(1)(A). ***HN3***[] On the face of the statute, a violation of *section 337(a)(1)(A)* requires that there be "[u]nfair methods of competition [or] unfair acts in the importation of articles." It also requires that the "threat or effect" of the unfair method of competition or unfair act be to destroy, substantially injure, or prevent the establishment of a domestic industry, or to restrain or monopolize trade and commerce in the United States. *See 19 U.S.C. § 1337(a)(1)(A)(i)-(iii)*.

In this investigation, U.S. Steel alleges a violation of *section 337(a)(1)(A)* based on importation and sale of carbon alloy steel involving an unlawful conspiracy to fix prices and control output and exports between the respondents in breach of *section 1* of the Sherman Act. *See* Amended Complaint at ¶¶ 71-99. U.S. Steel's complaint identifies violation of the *Sherman Act* as the "[u]nfair methods of competition **[*11]** [or] unfair acts" under *section 337*. *See, e.g., id.* at ¶ ¶ 2, 71. Accordingly, the starting point of our analysis is the interpretation of "[u]nfair methods of competition [or] unfair acts," a term which is not defined in the statute.

What is now *section 337(a)(1)(A)* dates back to section 316 of the Tariff Act of 1922. Similar to current statutory language at issue, section 316 declared "unfair methods of competition and unfair acts in the importation of articles

---

[6] President Carter disapproved the Commission's issuance of remedial orders on policy grounds. *See Steel Pipe, 43 Fed. Reg. 17789 (Apr. 26, 1978)*.

into the United States" to be unlawful. *19 U.S.C. § 174* (repealed 1930); *Pub. L. 67-318, 42 Stat. 943 (Sept. 21, 1922)*. The legislative history indicates that Congress did not explicitly prescribe what conduct qualifies as "unfair methods of competition and unfair acts" under the newly enacted provision. Instead, "Congress intended to allow [the Commission] wide discretion in determining what practices are to be regarded as unfair." *In re Von Clemm, 229 F.2d 441, 444, 43 C.C.P.A. 56 (C.C.P.A. 1955)*. Specifically, in describing this provision, the Senate Committee Report on the 1922 Act stated that, "[t]he provision relating to unfair methods of competition in the importation of goods is broad enough to prevent every type and form of unfair practice and is, therefore, a more adequate protection to American industry than any antidumping statute the country has ever had." S. Rep. No. 67-595, at 3 (1922); **[*12]** *see also* H.R. Conf. Rep. No. 67-1223 at 146 (1922). Senator Reed Smoot, the 1922 Act's primary sponsor, explained that section 316 was intended to be "an antidumping law with teeth in it—one which will reach all forms of unfair competition in importation." 62 Cong. Rec. 5874, 5879 (1922). When Congress subsequently enacted the Tariff Act of 1930, section 316 of the 1922 Act became *section 337* of the new Act. While the legislative history of the 1922 Act reveals that "[u]nfair methods of competition [or] unfair acts" was intended to be a broad term, it does not resolve the issue currently before the Commission.[7]

Section 337 has been amended several times since 1930 but has maintained the "unfair methods of competition and unfair acts" language. Notably, "[p]rior to 1974 the Commission was barred, by judicial decision starting at least as early as 1930, from reviewing the validity of patents brought before it under *section 337*." *Lannom Mfg. CO. v. Int'l Trade Comm'n, 799 F.2d 1572, 1576 (Fed. Cir. 1986)*. The *Trade Act of 1974, Pub. L. No. 93-618, 88 Stat. 1978 (1975)*, removed this bar, and expressly authorized the Commission to consider "[a]ll legal and equitable defenses . . . in all cases." *19 U.S.C. § 1337(c)*. ***HN4***[] With certain narrow exceptions not relevant here, this provision entitles respondents to present the same defenses in a section 337 proceeding that are available in **[*13]** district court. *See* *Lannom, 799 F.2d at 1577-78*; *Kinik Co. v. Int'l Trade Comm'n, 362 F.3d 1359, 1362-63 (Fed. Cir. 2004)*. In *Young Engineers*, the Federal Circuit observed that the 1974 amendment of *section 337* permitting the presentation of all legal and equitable defenses in an instituted investigation reflected recognition by Congress that "essentially private rights are being enforced in the proceeding" and "any determination of unfair acts is dependent upon the private rights between parties in the position of complainant and respondent." *See* *Young Eng'rs Inc. v. Int'l Trade Comm'n, 721 F.2d 1305, 1315 (Fed. Cir. 1983)*.

HN5[] Over the years, the Commission has interpreted "[u]nfair methods of competition [or] unfair acts" under *section 337* to apply to a broad range of substantive law, such as trade secret misappropriation, common law trademark infringement, *Lanham Act* violations, and ***antitrust law***.[8] Consistent with the recognition noted above that "any determination of unfair acts is dependent upon the private rights between parties," when the Commission is asked to look to a body of established federal statutory law for defining an unfair act, the Commission is guided

---

[7] Counsel for both Complainant and Respondents described the legislative history for *section 337* on this issue as "sparse." Tr. at 48 (Mr. Glass), 130 (Ms. Aranoff); *see also* Office of Unfair Import Investigations' Jan. 17, 2017 Br. at 11 (EDIS Doc. No. 601084) (noting that legislative history "does not shed much light" on the issue).

[8] The Commission has considered *section 337* in the context of antitrust allegations. The Commission has issued opinions in several cases. *See, e.g., Watches, Watch Movements, and Watch Parts*, Inv. No. 337-19, TC Pub. 177 (June 1966); Tractor Parts, Inv. No. 337-22, TC Pub. 443 (June 1971); *Electronic Audio and Related Equipment*, Inv. No. 337-TA-7, USITC Pub. 768 (Apr. 1976); *Chicory Root-Crude and Prepared*, Inv. No. 337-TA-27, 1977 WL 52340 (Mar. 30, 1977); *Steel Pipe, 1978 ITC LEXIS 63, 1978 WL 50692 (Feb. 22, 1978)*; *Certain Airtight Cast-Iron Stoves, Inv. No. 337-TA-69, USITC Pub. 1126, 1981 ITC LEXIS 228 (Jan. 1981)*; *Certain Electrically Resistive Monocomponent Toner, Inv. No. 337-TA-253, USITC Pub. 2069, 1988 ITC LEXIS 14 (Mar. 1988)*. The Commission has also declined to review (thereby adopting) ALJ decisions. *See, e.g.,* *Certain Rare-Earth Magnets and Magnetic Materials and Articles Containing Same, Inv. No. 337-TA-413, USITC Pub. 3307, 2000 ITC LEXIS 490 (May 2000)*. At least three investigations were terminated pursuant to a consent order or settlement agreements between the parties. *Angolan Robusta Coffee*, Inv. No. 337-TA-16, ***41 Fed. Reg. 13418 (Mar. 30, 1976)***; *Color Television Receiving Sets*, Inv. No. 337-TA-23, ***42 Fed. Reg. 39492 (Aug. 4, 1977)***; *Certain Precision Resistor Chips*, Inv. No. 337-TA-63, *45 Fed. Reg. 16360 (Mar. 13, 1980)*. A finding of violation on an antitrust claim was made in one investigation and the recommended remedy was rejected by the President. *Steel Pipe*, Inv. No. 337-TA-29, *43 Fed. Reg. 17789 (Apr. 26, 1978)*. A violation finding was made in a second case but was rescinded upon reconsideration. ***Tractor Paris, Inv. No. 337-22, 36 Fed. Reg. 15077 (Aug. 12, 1971)***.

by the express congressional limitations on the scope of that federal law as applied in district court. *See* *Tianrui, 661 F.3d at 1333*. For example, when the Commission is asked to address an allegation of patent infringement in the importation **[*14]** of goods under *section 337*, the Commission follows substantive U.S. patent law.[9] *See Certain Crawler Cranes and Components Thereof*, Investigation No. 337-TA-887, Comm'n Op. at 17-18 (May 6, 2015) (public version).

In *Crawler Cranes*, the complainant asserted a violation of section 337 based on the future infringement of patent claims covering methods of operating a mobile lift crane. Although the accused cranes were imported into the United States, the complainant conceded that the record contained no proof that the steps of the asserted method claims were yet performed in the United States as required to find infringement under the Patent Act. Nonetheless, the complainant argued that the Commission has broad authority under section 337 to address unfair acts including unfair acts in their incipiency and therefore is not bound to follow the same limits on patent infringement as exist in district court. The Commission **[*15]** declined the invitation to create a right under section 337 not recognized under U.S. patent law. The Commission explained that "Congress in enacting section 337 of the Tariff Act of 1930 (*19 USCA § 1337*) [did not intend] to broaden the field of substantive patent rights." *Id.* at 17 (citation omitted). The Commission therefore found no violation of *section 337* based on the undisputed fact that there was no patent infringement under *35 U.S.C. § 271*.

Similar to the example with patent law, the Commission has been guided by the express congressional limitations on federal law in other substantive areas when determining the scope of unfair acts under *section 337(a)(1)(A)*. *In Certain Carbon Spine Board*, the Commission dismissed a *section 337(a)(1)(A)* claim predicated on trade dress infringement because the complaint failed to allege all necessary elements for trade dress infringement under the *Lanham Act*. *See* *Certain Carbon Spine Board, Cervical Collar, CPR Masks, and Various Medical Training Manikin Devices, and Trademarks, Copyrights of Product Catalogues, Product Inserts and Components Thereof, Inv. No. 337-TA-1008, Comm'n Op. at 10-11, 2017 ITC LEXIS 823 (June 14, 2017)*. In *Certain Hydroxyprogesterone Caproate*, the Commission declined to institute an investigation based on the Food, Drug and Cosmetic Act and stated **[*16]** that the "complaint does not allege an unfair method of competition or an unfair act cognizable under *19 U.S.C. § 1337(a)(1)(A)*." The Commission explained that "the Food and Drug Administration ('FDA') is charged with the administration of the Food, Drug and Cosmetic Act." *See Certain Hydroxyprogesterone Caproate and Products Containing the Same*, Docket No. 2919, Comm'n Correspondence (Dec. 21, 2012). And in *Certain Universal Transmitters for Garage Door Openers*, the Commission applied the statutory limitations of the *Digital Millennium Copyright Act (DMCA)* to a *section 337(a)(1)(A)* claim predicated on that Act. *See* *Certain Universal Transmitters for Garage Door Openers, Inv. No. 337-TA-497, Initial Determination, 2003 ITC LEXIS 673, 2003 WL 22811119, *12-13 (Nov. 4, 2003)*, *aff'd*, Comm'n Notice (Nov. 24, 2003). The Commission determined under *section 337(a)(1)(A)* that it had jurisdiction over a claim for an alleged violation of the *DMCA* but rejected the requested temporary relief because it was unlikely Complainant would succeed on the merits of its *DMCA* claim. *See Certain Universal Transmitters for Garage Door Openers*, Inv. No. 337-TA-497, Comm'n Order at 3-4 (Nov. 24, 2003).

The Federal Circuit has approved of the Commission's understanding of "[u]nfair methods of competition [or] unfair acts" as it relates to predicate federal **[*17]** substantive law. In *Tianrui*, the respondents argued on appeal that the Commission erred in finding that cognizable trade secret misappropriation under *section 337(a)(1)(A)* could take place overseas. *Tianrui, 661 F.3d at 1333*. The respondents argued against extraterritoriality by analogizing trade secret misappropriation to the domestic application of patent infringement under the Patent Act. The Federal Circuit rejected the analogy. The Court recognized that "the Commission's broad and flexible authority to exclude from entry articles produced using 'unfair methods of competition' cannot be used to circumvent express congressional limitations on the scope of substantive U.S. patent law." *Id.* But because there was "no parallel federal civil statute regulating trade secret protection," the Federal Circuit explained that "there is no statutory basis for limiting the Commission's flexible authority under *section 337(a)(1)(A)* with respect to trade secret misappropriation." *Id.* The

---

[9] *19 U.S.C. § 1337(a)(1)(B)* expressly identifies the importation of "articles that . . . infringe" a valid U.S. patent as an unlawful act. This provision was added to section 337 in 1988. Prior to 1988, patent infringement was addressed under the general "[u]nfair methods of competition [or] unfair acts" language of the statute.

Court's discussion is consistent with our declining to interpret *section 337(a)(1)(A)* in a manner contrary to express proscriptions of federal ***antitrust law***.

The Commission has addressed the issue of antitrust injury in a *section 337* proceeding, albeit in a slightly different context. Specifically, the Commission **[*18]** has found antitrust injury to be a required element of a *Sherman Act* allegation raised by a respondent. In *Certain Rare-Earth Magnets*, the Commission found that ***HN6***[] "a private party seeking to establish an antitrust violation must also show . . . . that it has suffered an injury cognizable under the antitrust laws . . . [and this] 'antitrust injury' must be a result of the alleged anti-competitive conduct." *Certain Rare-Earth Magnets and Magnetic Materials and Articles Containing Same, Inv. No. 337-TA-413, Final Initial Determination at 128, 132, 1999 ITC LEXIS 342, *194, *200 (Sept. 8, 1999) (Judge Luckem)*, *unreviewed*, Comm'n Notice (Oct. 25, 1999). Judge Luckem cited as support a Federal Circuit decision that "rejected an antitrust claim on the ground that any injury the antitrust claimant may have suffered was the result of . . . legitimate [activities] and not the result of conduct that violated the antitrust laws." *Id. at 132, 1999 ITC LEXIS 342 at *200* (citing *Eastman Kodak Co. v. Goodyear Tire & Rubber Co., 114 F.3d 1547, 1557 (Fed. Cir. 1997))*.[10]

The approach in *Rare-Earth Magnets* of looking to federal ***antitrust law*** in determining whether there is an antitrust violation is consistent with the Commission's general approach in prior investigations involving antitrust claims. *See, e.g., Chicory Root-Crude and Prepared*, 1977 WL 52340 at *4 ("The Commission has in previous investigations, both **[*19]** under the prior *section 337* and under *section 337* as it exists today, used the antitrust laws and the practice thereunder as a standard for 'unfair methods of competition and unfair acts.' [Footnote omitted.] The presiding officer recommends this in the instant investigation and we adopt such recommendation.").

In the current investigation, the predicate for U.S. Steel's claim under *section 337* is ***antitrust law***. Consistent with our approach in prior cases, we are guided by the express congressional limitations on the scope of that federal law as interpreted by federal courts. As explained below, we interpret "[u]nfair methods of competition and unfair acts" under *section 337(a)(1)(A)*, when predicated on the *Sherman Act*, to require antitrust injury.

B. The *Sherman Act* and Antitrust Injury

---

[10] The only other Commission investigation in which antitrust injury doctrine was addressed was *Certain Electrically Resistive Monocomponent Toner, Inv. No. 337-TA-253, USITC Pub. 2069, 1988 ITC LEXIS 14 (Mar. 1988)*. In that case, the Commission found no *section 337* violation based on an antitrust claim. Writing separately, two Commissioners suggested the doctrine's applicability under *section 337* but did not decide whether the requirement was met on the record presented. *See id.*, *Additional Views of Vice Chairman Anne E. Brunsdale and Commissioner Ronald A. Cass at 16, 1988 ITC LEXIS 14 at *48* ("A second concern [with the final ID] is the possible absence of the sort of antitrust injury necessary to support an action under the antitrust laws."). The Commission views did not address this point -- for, against, or otherwise -- under the circumstances.

Complainant contends that the Commission implicitly decided that antitrust injury does not apply to *section 337* when it found a violation of *section 337* in the 1978 *Steel Pipe* investigation without mentioning antitrust injury. U.S. Steel's Jan. 17, 2017 Br. at 15 (EDIS Doc. No. 601088). This reading of the *Steel Pipe* decision strikes us as unreasonable. The Commission did not address antitrust injury in *Steel Pipe*, and there is no indication that the issue was even raised, which is not surprising given that the doctrine was still developing. The Supreme Court's *Brunswick* decision was handed down before *Steel Pipe* but *Brunswick* itself did not decide whether antitrust injury applied in district court to claims for injunctive relief (as opposed to damages actions) or to other substantive theories of antitrust violation. *Brunswick Corp. v Pueblo Bowl-O-Mat Inc., 429 U.S. 477, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*. Subsequent decisions confirmed its importance to damages claims irrespective of the theory of liability. *See, e.g., J. Truett Payne Co. v. Chrysler Motors Corp., 451 U.S. 557, 101 S. Ct. 1923, 68 L. Ed. 2d 442 (1981)* (*Robinson-Patman Act*); *Blue Shield of Virginia v. McCready, 457 U.S. 465, 102 S. Ct. 2540, 73 L. Ed. 2d 149 (1982)* (*Sherman Act*); *Associated Gen. Contractors of California, Inc. v. California State Council of Carpenters, 459 U.S. 519, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)* (*Sherman Act*). However, the Court did not address until nine years later whether the antitrust injury requirement applied in a district court action seeking injunctive relief. *Cargill, Inc. v. Monfort of Colo., Inc., 479 U.S. 104, 109-10, 107 S. Ct. 484, 93 L. Ed. 2d 427 (1986)*. *ARCO* in 1990 subsequently held that the antitrust injury requirement applied to per se violations of the *Sherman Act*. *ARCO, 495 U.S. at 341-45*. We are unpersuaded that the Commission's 1978 *Steel Pipe* decision, by not addressing antitrust injury, ruled on the issue before us.

As mentioned above, U.S. Steel alleges a violation of *section 337* predicated on *section 1* of the Sherman Act. *Section 1* of the Sherman Act, as amended, provides that:

> Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal. Every person who shall make any contract or engage in any combination or conspiracy hereby declared to be illegal shall be deemed **[*20]** guilty of a felony, and, on conviction thereof, shall be punished by fine not exceeding $100,000,000 if a corporation, or, if any other person, $1,000,000, or by imprisonment not exceeding 10 years, or by both said punishments, in the discretion of the court.

15 U.S.C. § 1. ***HN7***[↑] On its face, the language of the *Sherman Act* is very broad and could be interpreted to proscribe all contracts in restraint of trade. *See* *Leegin Creative Leather Products, Inc. v. PSKS, Inc., 551 U.S. 877, 885, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007)*; *Arizona v. Maricopa Cty. Med. Soc'y, 457 U.S. 332, 342-43, 102 S. Ct. 2466, 73 L. Ed. 2d 48 (1982)*. The Supreme Court has never taken such a literal approach to its language. Rather, in interpreting *Section 1*, the Supreme Court has been guided by the principle that "[t]he antitrust laws were enacted for 'the protection of *competition*, not *competitors*,'" *see* *ARCO, 495 U.S. at 338* (quoting *Brown Shoe Co. v. United States, 370 U.S. 294, 320, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)* (emphasis in original)), and that the *Sherman Act* should be applied consistent with its purpose of protecting competition. *See* *Leegin, 551 U.S. at 885-86*; *Arizona, 457 U.S. at 342-43*. Thus, the Court has held that *section 1* only addresses "unreasonable" restraints, *i.e.*, whether its anticompetitive effects outweigh its pro-competitive effects. *Id.*

HN8[↑] *Per se* and rule-of-reason analysis are two methods of determining whether a restraint is "unreasonable." "The rule of reason is the accepted standard for testing whether a practice restrains trade in violation of *§ 1* [of the *Sherman Act*]." *Leegin, 551 U.S. at 885* (citation omitted). **[*21]** "Under this rule, the factfinder weighs all of the circumstances of a case in deciding whether a restrictive practice should be prohibited as imposing an unreasonable restraint on competition." *Id.* (citation omitted). The *per se* rule, on the other hand, eliminates the need to study the reasonableness of an individual restraint in light of courts having considerable experience with the restraint at issue and knowing it to have "manifestly anticompetitive effects." *Id. at 886*. "The *per se* rule is a presumption of unreasonableness based on 'business certainty and litigation efficiency.'" *ARCO, 495 U.S. at 342*. For example, the Supreme Court stated, "[r]estraints that are *per se* unlawful include horizontal agreements among competitors to fix prices or to divide markets." *See* *Leegin, 551 U.S. at 886* (citations omitted); *see also* *United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 223, 60 S. Ct. 811, 84 L. Ed. 1129 (1940)*.

HN9[↑] *Sections 4* (damages) and *16* (injunctive relief) of the *Clayton Act* provide the vehicle for private enforcement of the *Sherman Act* and other antitrust laws in district court. *Section 4* provides a cause of action to "any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws." *15 U.S.C. § 15*. It thus requires a plaintiff to allege that the unlawful antitrust conduct caused the plaintiff 's injury. **[*22]** [11]*See* *15 U.S.C. § 15*.

HN10[↑] The Supreme Court has held that the injury a private litigant seeking to enforce the *Sherman Act* must demonstrate cannot simply be harm to its business but must instead be an "antitrust injury." Antitrust injury is "injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful." *Brunswick, 429 U.S. at 489*. More specifically, the Supreme Court has explained that actions that are *per se* unlawful under the *Sherman Act* may nonetheless have *some* pro-competitive effects, even though the actions may disadvantage particular private parties. *ARCO, 495 U.S. at 342-43*. Therefore, consistent with ***antitrust law***'s statutory purpose of protecting competition, the Supreme Court has required that in order for a private party to have standing to bring an antitrust claim under the *Sherman Act* in district court, the plaintiff must allege that its injury "stems from a competition-*reducing* aspect or effect of the defendant's behavior." *Id. at 344* (emphasis in original). This "antitrust injury" requirement "ensures that the harm claimed by the plaintiff corresponds to the rationale for

[11] A private plaintiff can seek an injunction under *section 16* of the Clayton Act "against threatened loss or damage by a violation of the antitrust laws." *15 U.S.C. § 26*. Antitrust injury is required in a private action seeking injunctive relief under *section 16* of the Clayton Act. *See* *Cargill, 479 U.S. at 116-18*.

finding a violation of the antitrust laws in the first place, and it prevents losses that stem from competition **[*23]** from supporting suits by private plaintiffs for either damages or equitable relief" *Id. at 342*. "Pro-competitive or efficiency-enhancing aspects of practices that nominally violate the antitrust laws . . . should play no role" with respect to providing relief based on that violation. *Id. at 344* (citation omitted). Antitrust injury, therefore, is an essential substantive element to ensuring the proper enforcement of the antitrust laws.[12] *See, e.g., ARCO, 495 U.S. at 339-40*; *Cargill, 479 U.S. at 109-12, 110 n.5*; *In re Aluminum Warehousing Antitrust Litig., 833 F.3d 151, 157 (2d Cir. 2016)*; *Somers v. Apple, Inc., 729 F.3d 953, 963 (9th Cir. 2013)*; *see generally*, IIA Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** ¶ 337 (4th ed. 2014).

HN11[] The Supreme Court has explained that in the context of pricing practices, "only predatory pricing has the requisite anticompetitive effect" to satisfy the antitrust injury requirement. *ARCO, 495 U.S. at 339* (citation omitted). The Supreme Court has articulated a two-prong test for "predatory pricing": "[f]irst, a plaintiff . . . must prove that the prices complained of are below an appropriate measure of its rival's costs" ("below-cost pricing"); and "[t]he second prerequisite . . . is a demonstration that the competitor had . . . a dangerous probability, of recouping its investment in below-cost prices" ("recoupment"). *See Brooke Grp., Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 222-24, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993)* (citations omitted). ***HN12***[] Given that antitrust injury **[*24]** is a requirement of an antitrust claim brought by a private plaintiff in district court, the Commission finds that for a *Sherman Act* claim to constitute "[u]nfair methods of competition and unfair acts" under *section 337(a)(1)(A)*, the private complainant must allege antitrust injury. As in district court, this requirement serves to "ensure[] that a plaintiff can recover only if the loss stems from a competition-*reducing* aspect or effect of the defendant's behavior . . since it is inimical to the antitrust laws to award damages"—or in the case of a *section 337* violation, receive an exclusion order or cease and desist order—for losses stemming from continued competition." *See ARCO, 495 U.S. at 334, 344* (citations omitted). Without a need to show antitrust injury, complainants could use *section 337* to pursue results that are at cross purposes with the preservation of competition.

U.S. Steel argues that *section 337* is a "trade statute" with "a protectionist focus" and therefore antitrust injury required in district court should not be applied at the Commission. *See* U.S. Steel's Jan. 17, 2017 Br. at 3, 13, 20 (EDIS Doc. No. 601088). ***HN13***[] Contrary to U.S. Steel's argument, *section 337(a)(1)(A)* is "not merely a statute to protect competitors but also a statute to preserve competition." *See Steel Pipe, 1978 ITC LEXIS 63 , 1978 WL 50692, *17* **[*25]** . The "threat or effect" prong of *section 337(a)(1)(A)(i)*, *(ii)*, *(iii)* may be satisfied by either injury to the domestic industry *or* by a showing of restraint or monopolization of trade. For example, the Commission has explained that "[s]ection 337 directs the imposition of an exclusion order in a case where an unfair method or act has the effect or tendency 'to restrain or monopolize trade and commerce in the United States' *irrespective of whether a domestic industry is experiencing injury." Certain Tractor Parts, Inv. No. 337-22, USITC Pub. No. 443, A-45, 1971 ITC LEXIS 2 (Dec. 1971)* (emphasis added). Additionally, ***HN14***[] the protectionist focus of *section 337* to which U.S. Steel alludes is protection from the harm of an "unfair act" in the importation of goods, here an alleged antitrust violation. When that alleged act does not cause the type of harm required for a private party to establish an antitrust violation, the complaining party has not demonstrated that the act is an "unfair act" required to invoke *section 337*. Congress and courts have defined the elements necessary for a plaintiff to show an antitrust claim in district court under the *Sherman Act*. As explained herein, in this case we do not interpret *section 337* to exclude the limitations of the substantive law passed by Congress and/or interpreted by the courts.

Similarly, U.S. Steel suggests that because *section 337(a)(1)(A)* includes domestic industry injury language under *subsections (i)* and *(ii)* of the "threat or effect" prong there is no need to require a separate antitrust injury requirement for complaints based on ***antitrust law***. *See, e.g.*, U.S. Steel's Pet. at 16 (Nov. 23, 2016) (EDIS Doc. No. 595868); U.S. Steel's Jan. 17, 2017 Br. at 20-21 (EDIS Doc. No. 601088) (citing *Spansion Inc. v. Int'l Trade Comm'n, 629 F.3d 1331 (Fed. Cir. 2010))*. We do not agree. ***HN15***[] "Unfair acts" and the "threat or effect" language are separate elements for showing a violation of *section 337(a)(1)(A)*. Nor do we find that the omission of

[12] The Supreme Court also noted that "[t]he need for . . . showing [antitrust injury] is at least as great" in the context of *per se* violations. *ARCO, 495 U.S. at 344*. The Supreme Court explained that "insofar as the *per se* rule permits the prohibition of efficient practices in the name of simplicity, the need for the antitrust injury requirement is underscored." *Id.*

the domestic industry injury language in subsection (iii) of the "threat or effect" prong reflects a choice by Congress that antitrust injury is not applicable to antitrust claims under section 337.[13] On the contrary, it would be "inimical to the antitrust laws" to award an exclusion order and/or cease and desist order for trade practices where the complainant's losses resulted from behavior that constituted continued competition rather than a reduction **[*26]** in competition. *See* ARCO, 495 U.S. at 334. U.S. Steel's approach would have the Commission create a new version of ***antitrust law*** for disputes between private parties that conflicts with established federal precedent and runs the risk of undermining the antitrust laws' fundamental purpose.

Without the requirement of antitrust injury, the risk of providing relief against the pro-competitive effects or efficiency enhancing behavior of particular respondents is more acute in the context of section 337 because the Commission does not possess as much enforcement discretion as is available to other federal agencies. ***HN16***[] It is true that the Commission, like the Federal Trade Commission (FTC), has independent authority to institute and litigate investigations under section 337. *See* 19 U.S.C. § 1337(b)(1); *see, e.g.,* Certain Apparatus for Flow Injection Analysis and Components Thereof, Inv. No. 337-TA-151, 1984 ITC LEXIS 158, 1984 WL 63180, *1 (Nov. 1, 1984).[14] However, unlike the FTC and the Department of Justice, which can exercise judgment akin to prosecutorial discretion (taking into consideration the effects on competition of the actions at issue), the Commission's discretion regarding whether to institute investigations based on properly-filed complaints is not unlimited. The Federal Circuit **[*27]** has noted the way in which private rights are at issue under section 337:

> It is correct that a § 1337 proceeding is not purely private litigation "between the parties" but rather is an "investigation" by the Government into unfair methods of competition or unfair acts in the importation of articles into the United States. Significantly, however, any determination of unfair acts is dependent upon the private rights between parties in the position of complainant and respondent. The 1975 amendment of the statute which added the provision in § 1337(c), "All legal and equitable defenses may be presented in all cases" was a major change which reflects a recognition that essentially private rights are being enforced in the proceeding.

Young Eng'rs, 721 F.2d at 1315. Thus, we find the practices followed in the federal courts regarding antitrust injury to be a closer analogue to the current proceeding, rather than FTC practice as U.S. Steel has claimed.

U.S. Steel argues that the explicit requirement for the Commission to consider the effects on competition that is found in the public interest factors of section 337(d) means that the Commission should not also consider competitive effects under the rubric of antitrust injury. *See* U.S. Steel's Pet. at 16-17 (Nov. **[*28]** 23, 2016) (EDIS Doc. No. 595868). We do not agree. ***HN17***[] Section 337 bifurcates the violation and remedy phases of an investigation. Bally/Midway Mfg. Co. v. U.S. Int'l Trade Comm'n, 714 F.2d 1117, 1122-23 (Fed. Cir. 1983).[15] After a

---

[13] On review, Complainant argues that under subsection (iii), "U.S. Steel must prove that the unfair act threatens to restrain or actually restrains U.S. Steel's trade or commerce." U.S. Steel's Jan. 17, 2017 Br. at 24 (EDIS Doc. No. 601088). In other words, U.S. Steel reads the restraint of trade and commerce in the United States to refer to the restraint of *U.S. Steel's* trade or commerce. But the plain language of subsection (iii) does not support this interpretation. It says nothing about injury either to a domestic industry or to a specific domestic company. The language of subsection (iii), which echoes that of the Sherman Act, further conveys an intention to protect competition and not simply competitors. *See* Steel Pipe, 1978 ITC LEXIS 63, 1978 WL 50692, *17.

More generally, we note the arguments in the parties' briefs and oral presentations on whether investigations based on the Sherman Act must be brought under subsection (iii), rather than subsections (i) or (ii), of section 337(a)(1)(A). Because we ground our decision in the meaning of "unfair methods of competition and unfair acts" in section 337(a)(1)(A), rather than the subsections thereof, we find it unnecessary to reach this question and therefore express no opinion on it.

[14] We do not here address the standards that would apply in a self-initiated investigation.

[15] We note that under Rule 210.50 (b)(1) the Commission may order the presiding ALJ to take evidence with respect to the public interest factors during the violation phase of a 337 investigation. *See* 19 C.F.R. § 210.50(b)(1). When the Commission has ordered the presiding ALJ to take evidence with respect to the public interest factors, the ALJ must issue a recommended determination containing findings of fact concerning the public interest. *See* 19 C.F.R. § 210.42(a)(1)(ii)(C).

violation is found and as part of the remedy phase of the investigation, section 337 requires the Commission to "consider[] the effect of [any] exclusion [order and/or cease and desist order] upon the . . . competitive conditions in the United States economy, . . . and United States consumers." *See* 19 U.S.C. §§ 1337(d)(1), (e)(1). This "public interest" analysis addresses a different question from the antitrust injury requirement. In the case of an exclusion order, it asks the Commission to consider the effect of excluding the violative products *from* the United States on competition and U.S. consumers (along with the other public interest factors). On the other hand, the antitrust injury requirement asks a tribunal to assess what effect on competition the accused products are having while they are *in* the market. Thus, the statutory public interest factors considered during the remedy portion of the investigation do not substitute for the requirement of antitrust injury.

We disagree that the Federal Circuit's decision in *Spansion* precludes the Commission from considering the effect on consumers **[*29]** and competition in the United States in the context of an antitrust injury inquiry, as U.S. Steel suggests. *See* Tr. at 32:25-33:14. Rather, *Spansion* provides that the Commission is not required to apply the *eBay* factors during the remedy phase of an investigation before issuing an exclusion order "[Oven the different statutory underpinnings for relief before the Commission in Section 337 actions and before the district courts in suits for patent infringement." Spansion, 629 F.3d at 1359 (citing eBay Inc. v. MercExchange, L.L.C., 547 U.S. 388, 391, 126 S. Ct. 1837, 164 L. Ed. 2d 641 (2006)). *Spansion* says nothing about standing or the substantive law required to establish "[u]nfair methods of competition and unfair acts" under section 337(a)(1)(A) during the violation phase of the investigation.

We are not persuaded by the argument that antitrust injury is inapplicable to U.S. Steel's claim because antitrust injury arises in federal court actions under the Clayton Act and not the Sherman Act itself. *See, e.g.*, U.S. Steel Pet. at 15 (Nov. 23, 2016) (EDIS Doc. No. 595868); U.S. Steel's Jan. 17, 2017 Br. at 16-18, 41-42 (EDIS Doc. No. 601088); Order No. 38 at 6-7, 24; Tr. at 9:16-19, 31:1-19. As explained above, the Commission addresses in this opinion what is required to establish an unfair trade practice under section 337(a)(1)(A). We further note that **[*30]** section 7 of the Sherman Act[16] originally included similar "injury" language to section 4 of the Clayton Act. Specifically, section 7 of the Sherman Act formerly provided a private cause of action for persons injured by violations of the Sherman Act; whereas section 4 of the Clayton Act more broadly provides a private cause of action for persons injured by anything forbidden in the antitrust laws. *See* State of New Mexico v. Am. Petrofina, Inc., 501 F.2d 363, 364 n.3 (9th Cir. 1974). Section 7 of the Sherman Act was repealed in 1955 because it was deemed "redundant" and thus unnecessary in view of the broader provision of section 4 of the Clayton Act. *See* Pfizer, Inc. v. Gov't of India, 434 U.S. 308, 311 n.8, 98 S. Ct. 584, 54 L. Ed. 2d 563 (1978). Section 7 was not removed because Congress intended to abolish an injury requirement for private causes of action under the Sherman Act. **HN18**[] As the federal courts have recognized, antitrust injury is a requirement for a private party to bring a claim under the Sherman Act, consistent with the statutory purpose of protecting competition. Therefore, for purposes of deciding what is required to establish an unfair trade practice under section 337(a)(1)(A), the fact that the Clayton Act provides the vehicle for private parties to bring suit under the Sherman Act does not alter our conclusion. There is also nothing in the text of the private right of action language in the Clayton Act and section 337 that leads **[*31]** us to understand that Congress did not want the Commission to apply antitrust injury standing to a section 337 claim predicated on the Sherman Act. If Congress intended to create a forum for private parties to litigate an antitrust claim at the Commission, whose prosecution would be barred in federal district court as inimical to the antitrust laws, we would expect a clarity of expression that is missing in our statute. Such congressional intent is not expressed in our statute.

Moreover, requiring antitrust injury standing comports with the Commission's approach in intellectual property cases under section 337. For example, in patent investigations, the Commission follows the patent standing requirement imposed by courts rather than create its own, inconsistent standing requirement. *See* 19 C.F.R. § 210.12(a)(7); SiRF Technology, Inc. v. Int'l Trade Comm'n, 601 F.3d 1319, 1326 n.4 (Fed. Cir. 2010) (affirming violation finding in patent infringement investigation; noting that the "Commission 'strictly reads the federal standing precedent' into its rules") (citation omitted). We agree with the. ID that "[t]here is no reason why showing standing would be excused

---

[16] *See* Act of July 2, 1890, ch. 647, § 7, 26 Stat. 210 (repealed 1955).

with respect to alleged antitrust violations when it is required with respect to other types of unfair practices subject to *section 337*." Order No. 38 at 15.

Finally, **[*32]** Complainant contends that other remedies are not available if the antitrust injury requirement applies in this context. U.S. Steel's Jan. 17, 2017 Br. at 1-2 (EDIS Doc. No. 601088). ***HN19***[] However, the antitrust injury requirement is not a bar to antitrust actions at the Commission. Rather, it ensures that antitrust claims asserted in *section 337* are adjudicated in a manner that is not inconsistent with existing, clear federal ***antitrust law***.

For the foregoing reasons, the Commission has determined to affirm the ALP's finding that "antitrust injury" is required for *section 337* investigations in which the alleged unfair method of competition or unfair act is based on a violation of the *Sherman Act*.[17]

C. Sufficiency of the Complaint

Having determined that U.S. Steel is required to show "antitrust injury," we find that U.S. Steel is also required to plead such "antitrust injury" in its complaint.[18]

HN20[] In federal district courts, "[e]very private antitrust plaintiff, including those challenging an agreement as unlawful under *[Sherman] § 1*, must include in its complaint allegations of 'antitrust injury.'" *Energy Conversion Devices, 833 F.3d at 689* (affirming dismissal under *Rule 12(b)(6) of the Federal Rules of Civil Procedure* for failure to allege antitrust injury) **[*33]** (citations omitted). *See also* *In re Aluminum Warehousing Antitrust Litig., 833 F.3d at 157* ("[A]ntitrust standing is a threshold, pleading-stage inquiry and when a complaint by its terms fails to establish this requirement[,] [it] must [be] dismiss[ed] [] as a matter of law. . . . To satisfy the antitrust standing requirement, a private antitrust plaintiff must plausibly allege that [] it suffered an antitrust injury.") (citation omitted). In *Energy Conversion*, the Sixth Circuit found that plaintiff failed to allege recoupment (one of the elements of predatory pricing), which was necessary to satisfy the antitrust injury requirement. *Energy Conversion, 833 F.3d at 689-91*. ***HN21***[] The Sixth Circuit explained that:

> To survive a motion to dismiss, a complaint must "state[] a plausible claim for relief," *Ashcroft v. Iqbal, 556 U.S. 662, 679, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*, which requires that the complaint "show[ ] that the pleader is entitled to relief," *Fed. R. Civ. P. 8(a)(2)*. If proof of recoupment is required to succeed on the claim, allegations of recoupment must appear in the complaint to show an entitlement to relief. During discovery, the plaintiff must show that there is factual support for each component of the claim or it will be rejected as a matter of law on summary judgment.

Energy Conversion, 833 F.3d at 688. The district court did not allow the plaintiff to amend its complaint to allege recoupment. **[*34]** *Id. at 690-91*. In affirming the district court's denial of leave to amend, the Sixth Circuit reasoned that "plaintiff had ample notice of the issue"; "[i]ts lawyers were the same ones that pursued parallel litigation in the

---

[17] U.S. Steel's claim that is has been harmed by a conspiracy to fix prices and control output and export volumes in violation of the *Sherman Act* is tied to underpricing by Chinese-produced carbon and alloy steel and to the impact it has had on U.S. Steel's trade, production, and financial performance. Amended Complaint ¶¶ 71-99, 223-241. The relevant antitrust injury U.S. Steel would need to allege and show is predatory pricing, as described above. *See, e.g.,* *Brooke, 509 U.S. at 222-26*; *ARCO, 495 U.S. 337-41*; *Energy Conversion Devices Liquidation Trust v. Trina Solar Ltd., 833 F.3d 680, 688-91 (6th Cir. 2016)*. U.S. Steel does not appear to contest this point, and in any event, represents that it will not amend its complaint to plead or prove antitrust injury. *See, e.g.*, Tr. at 42, 68-69 (Mr. Glass); U.S. Steel Feb. 1, 2017 Resp. Br. at 21. We do not opine on the form of antitrust injury that might be required if other types of claims are asserted under the antitrust laws.

[18] Consistent with the recent Commission Opinion relating to Complainant's false designation of origin claim, "we agree with the ID that the Commission's decision to institute an investigation does not preclude an ALJ from reexamining the sufficiency of a complaint," but "we do not adopt the ID's discussion of the ALJ's authority under the APA in the context of Commission *Rules 210.21(a)* and *210.18*." *See Certain Carbon and Alloy Steel Products*, Inv. No. 337-TA-1002, Comm'n Op. at 7 (Mar. 6, 2017) (citations omitted).

Northern District of California"; "[i]n that case, they filed a complaint that initially alleged recoupment"; and "[f]or reasons of their own, they amended the complaint and removed the allegation." *See* *id. at 691*.

Thus, the Commission holds that Complainant is required to plead, in the complaint, allegations of "antitrust injury" standing. ***HN22***[] Under the Commission's jurisprudence, complainants are typically allowed to amend the complaint for good cause. *19 C.F.R. § 210.14(b)(1)* ("After an investigation has been instituted, the complaint or notice of investigation may be amended only by leave of the Commission for good cause shown and upon such conditions as are necessary to avoid prejudicing the public interest and the rights of the parties to the investigation."). We would normally find that good cause exists under Commission *Rule 210.14(b)* to allow Complainant to amend its complaint. *See also* *Fed. R. Civ. Proc. 15* ("The court should freely give leave when justice so requires."). However, on review before the Commission, U.S. Steel has indicated **[*35]** that even if afforded the opportunity to amend its complaint to plead antitrust injury, it would not plead allegations of antitrust injury. Specifically, asked whether it would amend its complaint if the Commission applied the standard for antitrust injury required in federal court, U.S. Steel's counsel responded unequivocally, "No" twice. Tr. at 68. Elaborating, counsel stated that the "standard is virtually impossible to satisfy in Federal Court. ... And the reality is that we couldn't." Tr. at 69. Accordingly, we affirm the ALJ's dismissal of Complainant's antitrust claim as modified by our reasoning above.

Finally, the Commission has determined to reverse the ALJ's dismissal of Complainant's antitrust claim with prejudice (see Order No. 38 at 30). Specifically, we dismiss Complainant's antitrust claim for failure to allege a necessary element — antitrust injury — and without a determination of the merits of a properly pled claim. Accordingly, we dismiss without prejudice.

III. CONCLUSION

For the foregoing reasons, the Commission has determined to affirm in part, as modified by our reasoning, and reverse in part the ID (Order No. 38). The antitrust claim is dismissed.

By order of the **[*36]** Commission.

Dissent

DISSENTING OPINION OF COMMISSIONER MEREDITH M. BROADBENT WITH RESPECT TO ORDER NO. 38

The Commission instituted this investigation based on a complaint filed by Complainant United States Steel Corporation ("U.S. Steel") to determine whether there is a violation of *Section 337(a)(1)(A)*, *19 U.S.C. § 1337(a)(1)(A)*, in the importation, the sale for importation, or the sale within the United States after importation of certain carbon and alloy steel products by reason of, *inter alia*, a conspiracy to fix prices and control output and export volumes, the threat or effect of which is to restrain or monopolize trade and commerce in the United States. *See* *81 Fed. Reg. 35381*-82 (June 2, 2016). U.S. Steel's complaint, as amended, alleges that the conspiracy to fix prices and control output and export volumes is an unfair method of competition or unfair act that violates *section 1* of the Sherman Act, *15 U.S.C. § 1* ("antitrust claim"). Compl. ¶ 71 (Sept. 22, 2016).

On November 14, 2016, the presiding Administrative Law Judge ("ALP) issued Order No. 38, an initial determination ("ID") granting Respondents' motion to terminate U.S. Steel's antitrust claim. The ID held that **[*37]** U.S. Steel's failure to plead antitrust injury as an element of its antitrust claim in its *Section 337* complaint required the Commission, as a matter of law, to terminate the antitrust claim under *Section 337(a)(1)(A)*. ID at 28-30. The Commission determined to review the ID on December 19, 2016. *See* Comm'n Notice (Dec. 19, 2016). Having considered the ID, the written submissions of the parties and non-parties, and the views of the parties expressed at the Commission oral argument, I have determined that the ID incorrectly holds that U.S. Steel was required, as a matter of law, to plead antitrust injury in its complaint with respect to its antitrust claim asserted in this *Section 337* investigation. Consequently, the ID should be reversed and vacated, and the antitrust claim remanded to the AU for further proceedings.

The ID noted two separate and independent requirements of *Section 337(a)(1)(A)* that are necessary to prove a violation, which were raised by Respondents' motion: (1) the unfair trade practice, *i.e.*, "unfair methods of competition and unfair acts in the importation of articles"; and (2) the "threat or effect" of that unfair trade practice under *subsection 337(a)(1)(A)(iii)*, *i.e.*, "the threat or effect of [the unfair trade practice] is ... to restrain **[*38]** or monopolize trade or commerce in the United States." ID at 8-9. As to the latter requirement, the ID found that U.S. Steel's allegation of an illegal restraint of trade was sufficient to satisfy "the pleading requirements under the threat or effect prong of *section 337(a)(1)(A)(iii)*...." *Id.* at 10-11. As to the former, however, the ID found U.S. Steel "has not properly alleged that the practices complained of constitute an unfair method of competition or unfair act under *section 337(a)(1)(A)*." *Id.* at 11. The ALJ stated that "[t]he unfair trade practice prong requires standing to sue." *Id.* Simply put, even if U.S. Steel's complaint sets forth unfair trade practice allegations that sufficiently plead all elements of a *per se* *Sherman Act* violation under controlling Supreme Court precedent, the ID nevertheless holds that such unfair trade practices cannot fall within the scope of the statutory term "unfair methods of competition and unfair acts" of *Section 337(a)(1)(A)*.

The ID reasoned that "the limitations on private antitrust litigants must apply under *section 337* as they do in federal courts." *Id.* at 10 (citing *TianRui Grp. Co. Ltd. v. Int'l Trade Comm'n, 661 F.3d 1322, 1333 (Fed. Cir. 2011)* ("*Tianrui*")). The ID further stated that "[u]nder federal ***antitrust law***, it is firmly established that a private complainant must show antitrust standing." *Id.* Thus, the ID held that "U.S. **[*39]** Steel must plead and prove (1) injury in fact to its business or property; (2) that the injury is proximate, *i.e.*, not too remote, and (3) that such injury is the kind that the antitrust laws were intended to prevent and 'flows from that which makes defendants' acts unlawful.'" *Id.* at 20 (citing 2A Areeda, ¶ 335a, at 76-77 (quoting *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)))*.[1] Because "U.S. Steel's complaint does not allege predatory pricing or the facts necessary to show predatory pricing[,] . . . [t]he complaint therefore is fatally deficient as a matter of law." *Id.* at 23.

The ID rejected U.S. Steel's assertion that "the antitrust injury requirement 'does not come from *Section 1* of the Sherman Act, but from the private cause of action in *Section 4* of the Clayton Act.'" *Id.* at 24 (citation omitted). Instead, the ID found that "[f]or purposes of the standing requirement, it does not matter whether a complaint is brought under *section 1* or *2* of the Sherman Act or *section 4* of the Clayton Act." *Id.* The ID also rejected U.S. Steel's argument that "because horizontal price-fixing is a *per se* violation of *section 1*. of the *Sherman Act*,

---

[1] Specifically, the ID found that "[a]ntitrust injury requires that the plaintiff be 'adversely affected by an *anticompetitive* aspect of the defendant's conduct," and that the context of pricing practices challenged by rivals as depressing their profits, 'only predatory pricing has the requisite anticompetitive effect.'" *Id.* at 20-21 (citing *Atl. Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 339, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)* ("*ARCO*") (emphasis in original)). "To prove predatory pricing." the ID continued, "a plaintiff must show that (1) the defendant's prices are below its costs and (2) there is a 'dangerous probability' that the defendants will 'recoup' their investment in 'below-cost prices' once they have succeeded in forcing competitors from the market." *Id.* at 22 (citing *Brooke Group, Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 222-25, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993))*.

standing to sue is not required." *Id.* at 25. The ID reasoned that "[w]hile a *per se* rule 'relieves plaintiff of the burden of demonstrating an anticompetitive **[*40]** effect, which is assumed, it does not excuse a plaintiff from showing that his injury was caused by the anticompetitive acts.'" *Id.* at 26-27 (citing *Newman v. Universal Pictures, 813 F.2d 1519, 1522-23 (9th Cir. 1987)*, *cert. denied*, *486 U.S. 1059, 108 S. Ct. 2831, 100 L. Ed. 2d 931 (1988))*. The ID further stated that "[t]he Supreme Court in *ARCO* specifically rejected the contention that standing need not be alleged in a case involving a *per se* violation of the *Sherman Act*." *Id.* at 27. Rather, the ID continued, "insofar as the *per se* rule permits the prohibition of efficient practices in the name of simplicity, the need for the antitrust injury requirement is underscored." *Id.* at 28 (citing *ARCO, 495 U.S. at 344*). The ID therefore concluded that "U.S. Steel's complaint must be dismissed without further proceedings, as a matter of established ***antitrust law***." *Id.* at 19.

DISCUSSION

To resolve the question of whether U.S. Steel is required to plead antitrust injury as a matter of law in order to state a *Sherman Act § 1* claim constituting "unfair methods of competition and unfair acts" under *Section 337(a)(1)(A)*, it is necessary to focus on the controlling language of the relevant statutes and how the courts have interpreted these statutes. Statutes pertinent to the ID's holding are: *Section 337(a)(1)(A)* of the Tariff Act of 1930, *Section 1* of the Sherman Act, and *Sections 4* and *16* of the Clayton Act.

The Commission's authority to investigate **[*41]** and address unfairly traded imports stems from its enabling statute, Section 337 of the Tariff Act of 1930, as amended, *19 U.S.C. § 1337*. *Vastfame Camera, Ltd. v. Int'l Trade Comm'n, 386 F.3d 1108, 1112 (Fed. Cir. 2010)*; *Sealed Air Corp. v. U.S. Int'l Trade Comm'n, 645 F.2d 976, 987, 68 C.C.P.A. 93 (C.C.P.A. 1981)*. *Section 337(a)(1)(A)* declares unlawful "unfair methods of competition and unfair acts" in the importation or sale of articles, the threat or effect of which is, *inter alia*, to restrain or monopolize trade and commerce in the United States:

> **(a) Unlawful activities; covered industries; definitions**
>
> (1) Subject to *paragraph (2)*, the following are unlawful, and when found by the Commission to exist shall be dealt with, in addition to any other provision of law, as provided in this section:
>
> (A) Unfair methods of competition and unfair acts in the importation of articles (other than articles provided for in subparagraphs (B), (C), (D), and (E)) into the United States, or in the sale of such articles by the owner, importer, or consignee, the threat or effect of which is-
> (i) to destroy or substantially injure an industry in the United States;
> (ii) to prevent the establishment of such an industry; or
> (iii) to restrain or monopolize trade and commerce in the United States.

19 U.S.C. § 1337(a)(1)(A). As is clear from the language of this provision, a violation of *Section 337(a)(1)(A)* comprises two separate and independent elements: (1) "unfair methods of competition **[*42]** and unfair acts" in the importation or sale of articles; and (2) a "threat or effect" prong (also known as the injury requirement). *See 19 U.S.C. § 1337(a)(1)(A)(i)-(iii)*; *Akzo NV v. Int'l Trade Comm'n, 808 F.2d 1471, 1486 (Fed. Cir. 1986)* ("[T]o prove a violation of *§ 337*, the complainant must show both an unfair act and a resulting detrimental effect or tendency."); *Textron, Inc. v. Int'l Trade Comm'n, 753 F.2d 1019, 1028 (Fed. Cir. 1985)* ("*[S]ection 337* has consistently been interpreted to contain a distinct injury requirement of independent proof'). I agree with the AU, that the first element governs the issue of whether the statutory term "unfair methods of competition and unfair acts" requires that antitrust injury must be separately and specifically pleaded, in addition to U.S. Steel's substantive allegations of a violation of *Sherman Act § 1*, in order to state an actionable claim under *Section 337(a)(1)(A)*.

Courts have held that the language of this provision - "unfair methods of competition and unfair acts" -- is broad and flexible. For example, soon after the passage of the *Tariff Act of 1930*, the Court of Customs and Patent Appeals confronted the issue of whether this statutory phrase required a showing of two separate elements before injurious imports could be stopped: an "unfair method of competition" as defined by the courts to require passing off, as well as an "unfair **[*43]** act in importation." The Court rejected this construction stating:

> We are of the opinion that when Congress used the phrase, in section 337(a) of the Tariff Act of 1930, 19 USCA 1337(a), "unfair methods of competition and unfair acts in the importation of articles into the United States," it did not intend that before such methods or acts could be stopped, the act had to fall within the technical definition of unfair methods of competition as it has been defined in some of the decisions, but we think that if unfair methods of competition or unfair acts in the importation of articles into the United States are being practiced or performed by any one, they are to be regarded as unlawful, and this section was intended to prevent them.

In re N. Pigment Co., 71 F.2d 447, 455, 22 C.C.P.A. 166, Treas. Dec. 47124, T.D. 47124 (C.C.P.A. 1934). *See also* *In re Von Clemm, 229 F.2d 441, 443-44, 43 C.C.P.A. 56 (C.C.P.A. 1955)* ("As was noted in our decision in *In re Northern Pigment Co.*, . . . the quoted language ['unfair methods of competition and unfair acts in the importation of articles'] is broad and inclusive and should not be held to be limited to acts coming within the technical definition of unfair methods of competition as applied in some decisions.").

The *Northern Pigment* Court quoted extensively from its prior decision in *Frischer*, which examined the legislative history of Section 316 of the Tariff **[*44]** Act of 1922, the predecessor to *Section 337*, in finding that "it was the purpose of the law to give to industries of the United States, not only the benefit of the favorable laws and conditions to be found in this country, but also to protect such industries from being unfairly deprived of the advantage of the same and permit them to grow and develop." *N. Pigment, 71 F.2d at 454* (quoting *Frischer & Co. v. Bakelite Corp., 39 F.2d 247, 17 C.C.P.A. 494, T.D. 43964 (C.C.P.A. 1930))*. Given both the "broad and inclusive term," the context of the provision, and the purposes for which the statute was enacted, the Court concluded that the acts of the respondents in importing iron pigment manufactured abroad using a patented method clearly fell within the term.[2] *Id. at 455*. *See also* *Tianrui, 661 F.3d at 1331-32* (noting the "broad and flexible meaning" of the statutory term "unfair methods of competition" consistent with the purpose and legislative background of the statute supports the Commission's interpretation of the scope of *Section 337* to reach trade secret misappropriation occurring abroad); *Von Clemm, 229 F.2d at 443-44* (citing *N. Pigment, 71 F.2d. at 447*)). The *Northern Pigment* Court observed that "[o]bviously one of the purposes of the enactment of the section, as well as the whole act, was for the encouragement of American industry. The proper application of the legislation here in controversy certainly would encourage **[*45]** and help a great many American industries." *N. Pigment, 71 F.2d at 456*.

In construing the scope of the "unfair methods of competition and unfair acts" language, the Court relied upon the oft-cited 1922 Senate Report concerning the Commission's newly conferred authority to investigate unfair methods of competition and unfair acts in the importation and sale of articles in the United States. The Court stated that "[t]he provision relating to unfair methods of competition in the importation of goods is broad enough to prevent every type and form of unfair practice and is, therefore, a more adequate protection to American industry than any antidumping statute the country has ever had." *N. Pigment, 71 F.2d at 454* (quoting *Frischer, 39 F.2d at 259*) (quoting S. Rep. No. 67-595 at 3 (1922))).

The broad scope of the unfair acts covered by the provision is also supported by statements of Senator Smoot, the 1922 Act's primary sponsor, who explained that section 316 was intended to be "an antidumping law with teeth in

---

[2] As discussed in *Tianrui*, the Court of Customs and Patent Appeals later held in *In re Amtorg* that the use and sale of a product made by a patented process did not constitute infringement of a process patent because *section 337* did not enlarge the substantive scope of U.S. patent law. *Tianrui, 661 F.3d at 1333-34* (citing *In re Amtorg Trading Corp., 75 F.2d 826, 22 C.C.P.A. 558, T.D. 47583 (C.C.P.A. 1935))*. The *Amtorg* decision had the effect of reversing *Frischer, Orion*, and *Northern Pigment* only with respect to infringement of the process patents involved therein. However, the *Tianrui* Court noted that "[t]o the extent Amtorg construed the scope of the Commission's jurisdiction over unfair methods of competition, Congress has subsequently rejected that construction in response to criticism by the Tariff Commission. . . . *Amtorg* thus has no effect on the scope of the Commission's authority to regulate trade secret misappropriation relating to the production of goods imported into this country." *Tianrui, 661 F.3d at 1334*.

itone which will reach all forms of unfair competition in importation." 62 Cong. Rec. 5874, 5879 (1922). He stated that section 316 "not only prohibits dumping in the ordinary accepted meaning of that word; that **[*46]** is, the sale of merchandise in the United States for less than its foreign market value or cost of production; but also bribery, espionage, misrepresentation of goods, full-line forcing, and other similar practices frequently more injurious to trade than price cutting." *Id.*

Courts have recognized that the broad and inclusive scope of "unfair methods of competition and unfair acts" was intended by Congress to combat the myriad unfair practices in international trade that may involve materially different questions than those arising in domestic competition:

> The importation of articles may involve questions which differ materially from any arising in purely domestic competition, and it is evident from the language used that Congress intended to allow wide discretion in determining what practices are to be regarded as unfair.

Von Clemm, 229 F.2d at 444. *See also* Frischer, 39 F.2d at 259-60 (noting that the conditions complainants face in combatting unfairly traded imports may be quite different from domestic competition); In re Orion, 71 F.2d 458, 466-67, 22 C.C.P.A. 149, Treas. Dec. 47123, T.D. 47123 (C.C.P.A. 1934).

Modern court decisions continue to recognize that Congress vested the Commission with "broad enforcement authority" to "prevent a diverse array of unfair methods of competition in the importation of goods." Suprema, Inc. v. Int'l Trade Comm'n, 796 F.3d 1338, 1350 (Fed. Cir. 2015 **[*47]** (*en banc*). "Recognizing the challenges posed by the wide array of unfair methods of competition, Congress emphasized the broad scope of the enforcement powers granted to the Tariff Commission when it passed the 1922 Tariff Act." *Id.* Tracing the history of Congress's vigilance to encourage and protect U.S. domestic interests from unfairly traded imports since 1789, the Federal Circuit observed that Congress has addressed the menace of unfairly traded imports in a unique enforcement statute in Section 337 that is distinct from the statutory schemes designed to address domestic commercial unfair practices:

> While Congress has addressed domestic commercial practices under various statutory regimes, such as antitrust (15 U.S.C. §§ 1-38), patent (35 U.S.C. §§ 1-390), and copyright 19 U.S.C. §§1-1332), it has established a distinct legal regime in Section 337 aimed at curbing unfair trade practices that involve the entry of goods into the U.S. market via importation. In sum, Section 337 is an enforcement statute enacted by Congress to stop at the border the entry of goods, *i.e.*, articles, that are involved in unfair trade practices.

Suprema, 796 F.3d at 1344-45.

The Federal Circuit in *Tianrui* further explained that although the scope of the Commission's authority to remedy unfair acts in the importation **[*48]** of articles is "broad and flexible," that authority must respect "express congressional limitations" when a federal statute forms the legal basis for the unfair acts under Section 337, such as substantive U.S. patent law applied under Section 337(a)(1)(B). 661 F.3d at 1333. In *Tianrui*, however, because there was no federal civil statute regulating trade secret misappropriation at the time of the decision, "there [was] no statutory basis for limiting the Commission's flexible authority under section 337(a)(1)(A) with respect to trade secret misappropriation." *Id.* Thus, *Tianrui* teaches that when a substantive statute is relied upon to establish the "unfair methods of competition and unfair acts" at issue, the scope of Section 337(a)(1)(A) cannot circumvent an "express congressional limitation" set forth in that substantive statute. Absent such express Congressional limitation, restricting the Commission's consideration of unfair methods of competition and unfair acts in international trade "would be inconsistent with the congressional purpose of protecting domestic commerce from unfair competition in importation such as trade secret misappropriation." Id. at 1335. *See also* Suprema, 796 F.3d at 1352 ("Congress enacted a legal regime for enforcement against unfair trade acts by directing the Commission to **[*49]** base Section 337 relief on goods and the issuance of exclusion orders to bar their importation. Absent unconstitutionality, we must defer to that regime.") (citing Beck v. Sec 'y ofDep't of Health & Human Servs., 924 F.2d 1029, 1034 (Fed. Cir. 1991) ("Our duty is limited to interpreting the statute as it was enacted . . . .")).

The language of the statute, legislative history, and court decisions, inform my view that Section 337 is a broad and flexible international unfair competition statute designed to provide American industries with a powerful tool to combat a broad array of international unfair practices and schemes in the importation of articles that harm domestic commerce. Congress employed the broad and inclusive language of "unfair methods of competition and unfair acts" in *Section 337(a)(1)(A)*, without providing a limiting definition, in order. to capture within its scope any nefarious practices that distort domestic competition, whether or not such unfair practices are familiar to domestic courts, as for example involving state-owned enterprises or government-driven non-market economies. In the case at bar, U.S. Steel's complaint alleges a massive and complex conspiracy among Chinese producers, orchestrated by the Chinese government, to control prices and regulate production **[*50]** of carbon and alloy steel in the Chinese steel industry through the China Iron and Steel Association, including coordinated enterprise restructuring, standard-setting, oversight and coordination of pricing and production, information-sharing concerning competitively-sensitive data such as production schedules, raw material costs and other financial data, and invoking the power of the Chinese government to discipline and enforce compliance. Compl. ¶¶ 72-99. U.S. Steel's allegations reflect what the Administration has identified as a "statist economic model with a large and growing government role" and that "China has appeared to be moving further away from market principles in recent years."[3] The Chinese economy is heavily distorted by the close relationship between government and business, which has persisted even as the country has become more globally oriented. In many Chinese markets, the quantity of goods sold and price levels are affected as much by changes in central and regional government policy as by the supply and demand dynamics For this reason, industries in China frequently behave in ways that may seem to defy common sense from a U.S. perspective. As U.S. Steel explained **[*51]** at the oral argument, "when you have a state sponsored industry the costs [of production] can be zero." Oral Arg. Tr. at 242 (as corrected on May 5, 2017, EDIS Doc. No. 610791). As these complaint allegations illustrate, international competition can be much more complex than domestic commerce. In the rapidly evolving world of international trade, it is particularly important that *Section 337*, through its prohibition against "unfair methods of competition and unfair acts" in importation and sale, remain a powerful and flexible tool to protect American industries and workers as Congress intended, unless the federal statute establishing the unfair trade practice contains "express Congressional limitations" that restrict Commission action. Where, as here, no such express limitation in the *Sherman Act* has been shown, I find no legal justification for imposing the insurmountable hurdle of demonstrating antitrust injury upon a typical U.S. company that is grappling with imports that benefit from the international unfair methods of competition that have been alleged in this case.[4]

I find that none of the authorities cited by the ID or in the submissions of the parties and non-parties compel the conclusion **[*52]** that the statutory term "unfair methods of competition and unfair acts" in *Section 337(a)(1)(A)* is restricted, as a matter of law, to a complaint that pleads "antitrust injury" where the "unfair methods of competition and unfair acts" alleged by U.S. Steel are prohibited by *section 1* of the Sherman Act.[5] Nor have the parties, or the ID, identified any "express congressional limitation" contained in *section 1* of the Sherman Act that constrains Commission action on U.S. Steel's complaint.

In this investigation, because U.S. Steel's complaint alleges that the unfair acts of the Chinese respondents violate *section 1* of the Sherman Act, the language of *section 1* of the Sherman Act, and federal case law interpreting the

---

[3] USTR, 2018 Trade Policy Agenda and 2017 Annual Report of the President of the United States on the Trade Agreements Program, at 4 (March 2018).

[4] U.S. Steel explained at the hearing that in this state sponsored industry, where "costs can be zero," it is difficult if not impossible for "an American company to prove that they are pricing below zero and it may be negative" and therefore no member of the U.S. steel industry, the United Steelworkers, or consumers could have standing to challenge these unfair practices. Oral Arg. Tr. at 241-43.

[5] To be sure, Section 337 expressly provides for the Commission's consideration of public interest concerns, including the public health and welfare, competitive conditions in the United States economy, production of like or directly competitive articles in the United States and U.S. consumers, after a violation is found in the context of the Commission's determination of an appropriate remedy to prevent further unfair acts in connection with subject imports. *19 U.S.C. § 1337(d)*, *(f)*, *(g)*. However, the statutory scheme shows that these public interest considerations do not play a role in the determination of the elements of "unfair methods of competition and unfair acts" underlying a violation of *Section 337(a)(1)(A)*. Moreover, the statutory framework provides that policy considerations relating to Commission action in Section 337 investigations are within the province of the President. *19 U.S.C. § 1337(j)(2)*.

text of this statute, provide the substantive legal standard for determining what constitutes "a conspiracy, in restraint of trade or commerce" sufficient to establish an "unfair method of competition" or "unfair act" under Section 337. *Section 1* of the Sherman Act, as amended, declares illegal agreements in restraint of trade or commerce, and imposes criminal penalties for violations:

> *Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is* ***[*53]*** *declared to be illegal*. Every person who shall make any contract or engage in any combination or conspiracy hereby declared to be illegal shall be deemed guilty of a felony, and, on conviction thereof, shall be punished by fine not exceeding $100,000,000 if a corporation, or, if any other person, $1,000,000, or by imprisonment not exceeding 10 years, or by both said punishments, in the discretion of the court.

See *15 U.S.C. § 1* (emphasis added). Horizontal price-fixing trade practices, as alleged here by U.S. Steel, are *per se* illegal under *Section 1* of the Sherman Act. *See, e.g.*, *Leegin Creative Leather Prods., Inc. v. PSKS, Inc., 551 U.S. 877, 886, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007)* ("Restraints that are *per se* unlawful include horizontal agreements among competitors to fix prices or to divide markets.") (citations omitted); *United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 223, 60 S. Ct. 811, 84 L. Ed. 1129 (1940)* ("Under the *Sherman Act* a combination formed for the purpose and with the effect of raising, depressing, fixing, pegging, or stabilizing the price of a commodity in interstate or foreign commerce is illegal *per se*.").

Pertinent to the ID's determination that "antitrust injury" is required as a matter of law to sustain U.S. Steel's antitrust claim, is the *Clayton Act*. Specifically, *Sections 4* and *16* of the Clayton Act are remedial statutes that authorize private parties to sue in federal court for **[*54]** treble damages or an injunction when they have been harmed by a violation of the antitrust laws, such as conduct that violates the *Sherman Act* or other sections of the *Clayton Act*. *See, e.g.*, *15 U.S.C. §§ 15*, *26*; *ARCO, 495 U.S. at 331-32* (action brought under *§ 4* of the Clayton Act, *15 U.S.C. § 15*, and complaint alleged an unlawful maximum price-fixing scheme in violation of *§ 1* of the Sherman Act); *Cargill, Inc. v. Monfort of Colorado, Inc., 479 U.S. 104, 107, 107 S. Ct. 484, 93 L. Ed. 2d 427 (1986)* (action brought under *§ 16* of the Clayton Act, *15 U.S.C. § 26*, and complaint alleged an unlawful merger in violation of *Section 7* of the Clayton Act, *15 U.S.C. § 18*). Under *section 4* of the Clayton Act, "any person who shall be *injured in his business or property* by reason of *anything forbidden in the antitrust laws* may sue therefor . . . and shall recover *threefold the damages* by him sustained, and the cost of suit, including a reasonable attorney's fee." *15 U.S.C. § 15* (emphasis added). Under *section 16* of the Clayton Act, "[a]ny person, firm, corporation, or association shall be entitled to sue for and have *injunctive relief* . . . against *threatened loss or damage by a violation of the antitrust laws* . . . ." *15 U.S.C. § 26* (emphasis added).[6]

The "antitrust injury" standing requirement stems, not from the substantive antitrust statutes like the *Sherman Act*, but rather from the Supreme Court's interpretation of the injury elements **[*55]** that must be proven under *sections 4* and *16* of the Clayton Act. *See* *ARCO, 495 U.S. at 334* ("A private plaintiff may not recover damages under *§ 4* of the Clayton Act merely by showing 'injury causally linked to an illegal presence in the market.' Instead, a plaintiff must prove the existence of 'antitrust injury, which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful.") (citing *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977))*; *Cargill, 479 U.S. at 117-18* (requiring antitrust injury in a private action seeking injunctive relief under *section 16* of the Clayton Act); *id. at 110 n.5* ("A showing of antitrust injury is necessary, but not always sufficient, to establish standing under *§ 4* [of the *Clayton Act*] . . . ."); *Brunswick, 429 U.S. at 489, 489 n.14* (requiring antitrust injury in a private action seeking treble damages under *section 4* of the Clayton Act). The Supreme Court further explained that "[t]he antitrust laws were enacted for the protection of *competition*, not *competitors*" and that "[t]he antitrust injury requirement ensures that a plaintiff can recover only if the loss stems from a competition-reducing aspect or effect of the defendant's behavior." *ARCO, 495 U.S. at 338, 344* (citations omitted) (emphasis in original).

---

[6] The definition of "antitrust laws" appears in *15 U.S.C. § 12(a)*, and does not include *Section 337* of the Tariff Act of 1930, as amended.

Importantly, the Supreme Court has explained the critical distinction between **[*56]** antitrust injury, which derives from the injury language in the private remedy provisions of *sections 4* and *16* of the Clayton Act, and the substantive antitrust statutory prohibitions (such as the unfair acts alleged in U.S. Steel's complaint, *i.e.*, a horizontal price-fixing conspiracy among Chinese competitors, and enforced by the Chinese government in violation of *section 1* of the Sherman Act). *See* *ARCO, 495 U.S. at 344* ("[P]roof of [an antitrust] violation and of antitrust injury are distinct matters that must be shown independently.") (citation omitted); *see also* *In re Nexium (Esomeprazole) Antitrust Litig., 842 F.3d 34, 59 (1st Cir. 2016)* ("[T]he FTC's amicus brief highlights the importance of straightening out the conflation of antitrust violation and antitrust injury that crept into the district court's post-trial opinion and into some of the parties' arguments on appeal."); *Energy Conversion Devices Liquidation Trust v. Trina Solar Ltd., 833 F.3d 680, 689 (6th Cir. 2016)* ("Th[e] [antitrust injury] requirement is not an element of a specific substantive prohibition such as *[Sherman] § 1*, but instead derives from the general antitrust damages right of action in *§ 4* of the Clayton Act.") (citations omitted); *id.* ("The requirement ensures that private plaintiffs bring claims 'of the type the antitrust laws were intended to prevent and that flow from that which makes defendants' acts unlawful.' And **[*57]** it ensures the plaintiff is a 'proper' enforcer of those laws.") (citations omitted).

To recover treble damages or to obtain injunctive relief under *section 4* or *16* of the Clayton Act, respectively, in Article III federal courts, a private litigant must prove both antitrust injury, as a separate standing requirement under Clayton Act *Sections 4* and *16*, as well as the requisite elements of the underlying substantive antitrust statute. *See, e.g., ARCO, 495 U.S. at 339-40* (antitrust injury under *Section 4* of the Clayton Act is a separate requirement from the antitrust claim involved); *Cargill, 479 U.S. 107-113* (extending antitrust injury requirement of *Section 4* of the Clayton Act, which is the source of this requirement, to *Section 16* of the Clayton Act); *Blue Shield of Virginia v. McCready, 457 U.S. 465, 482, 102 S. Ct. 2540, 73 L. Ed. 2d 149 (1982)* (requiring antitrust injury to establish standing to maintain an action under *section 4* of the Clayton Act for defendants' alleged violation of *Sherman Act*); *Garshman v. Universal Res. Holding Inc., 824 F.2d 223, 234 (3d Cir. 1987)* ("If the complaint fails to allege violations of the underlying substantive prohibitions—in this case *sections 1* and *2* of the Sherman Act—standing under *sections 4* and *12* [*sic*, *16*] of the *Clayton Act* is irrelevant."); *Eastman Kodak Co. v. Goodyear Tire & Rubber Co., 114 F.3d 1547, 1557-58 (Fed. Cir. 1997)*, *abrogated on other grounds,* *Cybor Corp. v. FAS Techs., Inc., 138 F.3d 1448 (Fed. Cir. 1998)* (affirming district court's grant of summary judgment on antitrust claims where Goodyear failed to allege sufficient antitrust injury under **[*58]** *sections 4* and *16* of the Clayton Act).

For example, in *ARCO*, the complaint was brought under *section 4* of the Clayton Act but also alleged the existence of a "vertical, maximum price-fixing scheme" in violation of *section 1* of the Sherman Act. *See* *ARCO, 495 U.S. at 332*. The Supreme Court noted that "*[s]ection 4 of the Clayton Act* is a remedial provision that makes available treble damages to 'any person who shall be injured in his business or property by reason of *anything forbidden in the antitrust laws*.'" *Id. at 331 n.1* (emphasis added); *see also* *Brunswick, 429 U.S. at 485* ("*Section 4*, in contrast, is in essence a remedial provision."). The Supreme Court distinguished the antitrust violation from the requisite showing of antitrust injury, explaining that "a firm . . . [that] loses sales to a competitor charging nonpredatory prices pursuant to a vertical, maximum-price-fixing scheme . . . does not suffer an 'antitrust injury' and that it therefore cannot bring suit under *§ 4* of the Clayton Act [], as amended, *15 U.S.C. § 15*." *See* *ARCO, 495 U.S. at 332*.

Thus, while *sections 4* and *16* of the Clayton Act provide private remedies for antitrust violations in Article III federal courts, they do not limit or define the substantive elements of a violation of an antitrust statute. Rather, those private remedy provisions encompass "anything **[*59]** forbidden in the antitrust laws" or any "violation of the antitrust laws." *See* *15 U.S.C. §§ 15*, *26* (*i.e.*, *sections 4* and *16* of the Clayton Act). Similarly, *Section 337(a)(1)(A)* requires underlying "unfair methods of competition" or "unfair acts," for example, an antitrust violation. Under the *Section 337(a)(1)(A)* statutory scheme, a violation of *section 1* of the Sherman Act for horizontal price-fixing among competitors that is orchestrated by the Chinese government, as alleged in this investigation, can alone qualify as the underlying "unfair method of competition" or "unfair act."[7]

---

[7] The ID notes that the alleged horizontal price-fixing among competitors is *per se* illegal under *section 1* of the Sherman Act. *See* ID at 26 ("For the purpose of deciding this motion, I assume that the *Socony-Vacuum per se* rule is in effect and that the conduct alleged in the complaint constitutes an unreasonable restraint of trade that would be actionable under *section 337* if

Further, *Section 337(a)(1)(A)* does not include the language of *section 4* or *16* of the Clayton Act which forms the basis for the Supreme Court's jurisprudence with respect to the "antitrust injury" requirement, i.e., "injury 'by reason of anything *forbidden* in the antitrust laws' (under *section 4*) or "threatened loss or damage by a violation of the antitrust laws" (under *section 16*). *See* *Cargill, 479 U.S. at 112*. As explained in *Cargill*:

> Like *§ 16*, *§ 4* provides a vehicle for private enforcement of the antitrust laws. Under *§ 4*, "any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws may sue therefor in any district court of the United States, and shall recover threefold **[*60]** the damages by him sustained, and the cost of suit, including a reasonable attorney's fee." *15 U.S.C. § 15*. In [*Brunswick*], *supra*, we held that plaintiffs seeking treble damages under *§ 4* must show more than simply an "injury causally linked" to a particular merger; instead, "plaintiffs must prove *antitrust* injury, which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes the defendants' acts unlawful." *Id., 429 U.S., at 489*.
> . . .
>
> The wording concerning the relationship of the injury to the violation of the antitrust laws in each section is comparable. *Section 4* requires proof of injury "by reason of anything forbidden in the antitrust laws"; *§ 16* requires proof of "threatened loss or damage by a violation of the antitrust laws." It would be anomalous, we think, to read the *Clayton Act* to authorize a private plaintiff to secure an injunction against a threatened injury for which he would not be entitled to compensation if the injury actually occurred.

Cargill, 479 U.S. at 109, 112 (emphasis in original). Thus, while the "antitrust injury" standing requirement is directly tethered to the express language of *Sections 4* and *16* of the Clayton Act regarding injury to business or property (*Section 4*) or threatened loss or damage (*Section 16* **[*61]**), there is no parallel or similar language set forth in *Section 337(a)(1)(A)*. Respondents failed to cite any statutory authority or controlling precedent linking or tracking the injury language of *Sections 4* and *16* of the Clayton Act to the substantive violation language of *Section 337(a)(1)(A)*, *i.e.*, "unfair methods of competition and unfair acts."[8] Thus, respondents' argument for an antitrust

---

U.S. Steel could demonstrate standing."); *see also* *Socony-Vacuum, 310 U.S. at 223* ("Under the *Sherman Act* a combination formed for the purpose and with the effect of raising, depressing, fixing, pegging, or stabilizing the price of a commodity in interstate or foreign commerce is illegal *per se*.").

[8] Respondents have likewise failed to cite any Commission precedent construing the scope of "unfair methods of competition and unfair acts" of *Section 337(a)(1)(A)* to mandate engrafting the injury language of *Sections 4* and *16* of the Clayton Act onto this statutory term as a matter of law. In their opening brief on review of the ID, Respondents mention only one Commission decision that was issued after the Supreme Court's decisions in *Brunswick* and *Cargill* in which the Court construed the injury language of *Sections 4* and *16* of the Clayton Act. *See, e.g.*, Respondent's Opening Br. on Review of Order 38 Terminating Complainant's Antitrust Claim, at 21-23 (Jan. 17, 2016) ("Resp. Opening Br.") (noting the Commission's only decision post-*Cargill* is *Electrically Resistive Monocomponent Toner*, 0088 WL 1572171, where the Commission "resolved the investigation in the respondents' favor without addressing antitrust injury" and two Commissioners provided additional views in which they raise a concern that the ID did not address the issue of antitrust injury). The Views of the Commission in the *Toner* investigation, however, did not address this point. In their reply submission, Respondents note that "[i]n the context of an affirmative defense, one ALJ has recognized that a party must demonstrate antitrust injury to prove a violation of the *Sherman Act*." Respondents' Response on Review of Order 38 Terminating Complainant's Antitrust Claim, at 9 n.1 (Feb. 1, 2017) (Resp. Reply Br.") (citing ***Certain Rare-Earth Magnets and Magnetic Materials and Articles Containing the Same, Inv. No. 337-TA-413, Final ID, 1999 ITC LEXIS 342, 1999 WL 961281, at *67, 69 (Sept. 8, 1999)*** ("*Certain Rare Earth Magnets*")). The record of the *Magnets* case, however, shows that the ALJ misunderstood the respondents' equitable defense. At closing argument, in response to the ALJ's questions, counsel for the NEOCO respondents tried to clear up the AU's misconception of their affirmative defense stating that "this is not a case in which NEOCO has affirmatively asserted, either privately, through an Attorney General or the Department of Justice, that they have suffered an antitrust injury such that they would be entitled to prevail under the antitrust laws. This is the context of antitrust and patent misuse being asserted as an affirmative defense, which, as a principle of equity, should prohibit this court from enforcing the rights of the Complainants." Closing Arg. Tr. at 2183 (July 27, 1999) (EDIS Doc. No. 49537). The NEOCO Respondents' attempt to clarify their equitable defense was not successful, inasmuch as the ALT mistakenly treated it as an antitrust counterclaim, finding that NEOCO had not established a *Section 1* Sherman Act violation (*see* ***Certain Rare-Earth Magnets, 1999 ITC LEXIS 342, 1999 WL 961281, at *69)***, contrary to the mandatory removal

injury requirement in *Section 337(a)(1)(A)*, severed from its statutory moorings in *Sections 4* and *16* of the Clayton Act, is unsupported. As such, in my view, respondents have failed to establish, as a matter of law, that the *Clayton Act's* "antitrust injury" standing requirement must be engrafted onto the "unfair methods of competition and unfair acts" language of *Section 337(a)(1)(A)*.

The "antitrust injury" standing requirement is also distinct from prudential standing which was essentially undermined by the Supreme Court's *Lexmark* decision. *See* *Lexmark Intl, Inc. v. Static Control Components, Inc., 572 U.S. 118, 134 S. Ct. 1377, 188 L. Ed. 2d 392 (Mar. 25, 2014)*. As stated in *Lexmark*, standing under *section 4* of the Clayton Act, *i.e.*, antitrust injury, "rest[s] on statutory, not 'prudential,' considerations." *Id. at 1386*. The Supreme Court explained that:

> [In *Associated General Contractors*,] we sought to "ascertain," as a matter of statutory interpretation, the "scope of the private remedy created by" Congress in *§ 4* of the Clayton Act, and the "class of persons who [could] maintain a private damages action under" that legislatively conferred cause of action. We held that the statute limited the class to plaintiffs whose injuries were proximately caused by a defendant's antitrust violations. Later decisions confirm that *Associated General Contractors* rested on statutory, not "prudential," considerations.

Id. (quoting *Associated Gen. Contractors of California, Inc. v. California State Council of Carpenters, 459 U.S. 519, 529, 532, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983))*.

The Supreme Court further explained that the proper inquiry to ascertain the class of plaintiffs whom Congress has authorized to sue is "to determine the meaning **[*62]** of the congressionally enacted provision creating a cause of action" and "Nil doing so, [the Court] appl [ies] traditional principles of statutory interpretation." *Lexmark, 134 S. Ct. at 1387-88*.[9] Thus, "antitrust injury," *i.e.*, the specific standing requirement as articulated by the Supreme Court, is distinct from the injury requirement under *Section 337(a)(1)(A)(i)-(iii)* that is applicable to "unfair methods of competition and unfair acts" under *section 337(a)(1)(A)*. For private actions in federal district courts under *Sections 4* and *16* of the Clayton Act alleging antitrust violations, the Supreme Court's interpretation of the nature and extent of injury required in *sections 4* and *16* of the Clayton Act controls the class of plaintiffs authorized to sue in federal courts. In contrast, for complaints filed in the USITC under *Section 337(a)(1)(A)*, the "threat or effect" standard delineated in *subsections (i) through (iii)* of this provision controls the nature and extent of injury or restraint of trade and commerce in the United States that complainants must show in order to pursue a *Section 337(a)(1)(A)* claim alleging "unfair methods of competition and unfair acts," such as a *Sherman Act* claim. *See* *Textron, 753 F.2d at 1028-29* (*Section 337* contains "a distinct injury requirement of independent proof' albeit there is "no precise and all-inclusive definition of 'injury' under *section 337*," which "stems **[*63]** in large part from the diversity of practices covered by the statute.").[10]

Furthermore, the "antitrust injury" requirement is an additional standing requirement for private plaintiffs asserting antitrust claims in federal courts under *sections 4* or *16* of the Clayton Act; it is separate and distinct from "injury-in-fact" or Article III constitutional standing.[11]*See* *Associated Gen. Contractors, 459 U.S. at 535 n. 31* ("[T]he focus of

---

provision applicable to counterclaims under *19 U.S.C. § 1337(c)*. No party petitioned for review of these errors, and the Commission did not address them in its notice of non-review. *See* Comm'n Notice (Oct. 25, 1999).

[9] The *Lexmark* Court clarified that "[they] have on occasion referred to this inquiry as 'statutory standing' and treated it as effectively jurisdictional." *Lexmark, 134 S. Ct. at 1387 n.4* (citations omitted). But while "[the statutory standing] label is an improvement over the language of 'prudential standing,' since it correctly places the focus on the statute . . . it, too, is misleading, since 'the absence of a valid (as opposed to arguable) cause of action does not implicate subject-matter jurisdiction. . . . '" *Id.* (citations omitted).

[10] Because antitrust injury standing is a separate requirement that is distinct from the substantive "unfair methods of competition and unfair acts" itself, neither Tianrui nor Young Engineers would mandate reading "antitrust injury" into the substantive violation under *section 337(a)(1)(A)* as the ID finds.

the doctrine of 'antitrust standing'[12] is somewhat different from that of standing as a constitutional doctrine. Harm to the antitrust plaintiff is sufficient to satisfy the constitutional standing requirement of injury in fact, but the court must make a further determination whether the plaintiff is a proper party to bring a private antitrust action.") (citations omitted); *ARCO, 495 U.S. at 339 n.8* (distinguishing injury in fact from antitrust injury); *Port Dock & Stone Corp. v. Oldcastle Ne., Inc., 507 F.3d 117, 121 (2d Cir. 2007)* ("Antitrust standing is distinct from constitutional standing, in which a mere showing of harm in fact will establish the necessary injury.") (citation omitted); In re Cardizem CD Antitrust *Litig., 332 F.3d 896, 909 (6th Cir. 2003)* ("A private antitrust plaintiff, in addition to having to show injury-in-fact and proximate cause, must allege, and eventually prove, 'antitrust injury.") (citation omitted).

Typically, the Commission **[*64]** is not constrained by the standing requirements of Article III district courts.[13]*See* *Envirocare of Utah, Inc. v. Nuclear Regulatory Comm'n, 194 F.3d 72, 74, 338 U.S. App. D.C. 282 (DC Cir. 1999)* ("Agencies . . . are not constrained by Article III of the Constitution; nor are they governed by judicially-created standing doctrines restricting access to the federal courts.") (citation omitted); *Ecee, Inc. v. Fed. Energy Regulatory Comm'n, 645 F.2d 339, 349 (5th Cir. 1981)* ("Administrative adjudications, however, are not an article III proceeding to which either the 'case or controversy' or prudential standing requirements apply; within their legislative mandates, agencies are free to hear actions brought by parties who might be without standing if the same issues happened to be before a federal court.") (citations omitted). Thus, while "antitrust injury" is necessary to demonstrate "injury" or "damage" under *section 4* or *16* of the Clayton Act (separate from a substantive antitrust violation), as indicated by *Lexmark*, those statutory provisions are not at issue in this investigation. Rather, the statutory authority for the Commission to hear U.S. Steel's antitrust claim stems from *Section 337(a)(1)(A)* and Complainant's alleged antitrust claim or unfair act is based on *section 1* of the Sherman Act.[14]*See* *Ritchie v. Simpson, 170 F.3d 1092, 1095 (Fed. Cir. 1999)* ("[T]he starting point for a standing determination for a litigant before an administrative agency is not Article III, but is the statute that **[*65]** confers standing before that agency.").

Moreover, that the "antitrust injury" standing requirement for private antitrust actions in district court under *sections 4* and *16* of the Clayton Act is not required as a matter of law in *Section 337* investigations is also consistent with the distinction, as recognized by the Federal Circuit, between the remedies available at the Commission and district courts.[15]*See, e.g.,* *Spansion Inc. v. Int'l Trade Comm'n, 629 F.3d 1331, 1359 (Fed. Cir. 2010)* (holding that the

---

[11] "'Standing to sue is a doctrine rooted in the traditional understanding of a case or controversy' required by Article III. [T]he irreducible constitutional minimum of standing' consists of 'three elements.' An appellant 'must have (1) suffered an injury in fact, (2) that is fairly traceable to the challenged conduct of the [appellee], (3) that is likely to be redressed by a favorable judicial decision.'" *Phigenix, Inc. v. Immunogen Inc., 845 F.3d 1168, 1171 (Fed. Cir. 2017)* (quoting *Spokeo, Inc. v. Robins, 136 S. Ct. 1540, 1547, 194 L. Ed. 2d 635 (2016)*; *Hollingsworth v. Perry, 570 U.S. 693, 133 S. Ct. 2652, 2661, 186 L. Ed. 2d 768 (2013)*; *Lujan v. Deft. of Wildlife, 504 U.S. 555, 560, 112 S. Ct. 2130, 119 L. Ed. 2d 351 (1992))* (alteration in original).

[12] Antitrust injury and antitrust standing are closely related but not identical. "[A]ntitrust injury [is] a 'necessary, but not always sufficient,' component of antitrust standing." *CBC Cos., Inc. v. Equifax, Inc., 561 F.3d 569, 571 (6th Cir. 2009)* (quoting *Cargill, 479 U.S. at 110 n.5*); *see also* *Barton & Pittinos, Inc. v. SmithKline Beecham Corp., 118 F.3d 178, 182 (3d Cir. 1997)* ("Antitrust injury is a necessary but insufficient condition of antitrust standing.") (citation omitted).

[13] On appeal before a federal court, however, a party seeking review of an agency's final action must always supply the requisite proof of the "injury-in-fact" to establish standing, but other requirements of standing, including immediacy and redressability, may be relaxed. *See* *Phigenix, 845 F.3d at 1171, 1172 n.2*.

[14] No party has argued, nor does the ID hold, that U.S. Steel's antitrust claim under *Section 337(a)(1)(A)* must be brought under *Section 4* or *16* of the Clayton Act. *See, e.g.*, Oral Arg. Tr. at 47-48 (noting that *Clayton Act* does not apply to U.S. Steel's complaint); *Id.* at 119 (agreeing that U.S. Steel's substantive claim that the antitrust laws have been violated is a *Sherman Act* claim, not *Section 4* or *16* of the Clayton Act). Nor has any party argued that there is any textual basis in Sherman Act *Section 1* for requiring antitrust injury. *See, e.g.*, Oral Arg. Tr. at 47 (noting that no party has made any argument that there is a textual basis in *Section 1* of the Sherman Act for antitrust injury).

[15] Respondents acknowledge important distinctions regarding the treatment of imports in *Section 337* investigations compared to district court actions that pertain to a *Sherman Act* antitrust claim. Namely, *Section 337* "creates a different potential remedy"

Commission is not required to apply the eBay factors before issuing an exclusion order "[g]ven the different statutory underpinnings for relief before the Commission in Section 337 actions and before the district courts in suits for patent infringement") (citing eBay Inc. v. MercExchange, L.L.C., 547 U.S. 388, 391, 126 S. Ct. 1837, 164 L. Ed. 2d 641 (2006)). As noted *supra*, section 4 of the Clayton Act is a remedial provision that makes treble damages available to private litigants in district courts. *See* ARCO, 495 U.S. at 331 n.1; *see also* Brunswick, 429 U.S. at 485 ("Section 4, in contrast, is in essence a remedial provision."). Respondents have cited no authority for the proposition that the Commission is legally constrained to import the antitrust injury requirement derived from the Clayton Act's remedial statutory provisions (section 4 and 16) into the Commission's substantive violation determination or to displace the existing standing **[*66]** requirement of Section 337(a)(1)(A).[16]

In sum, I find that the ID incorrectly imports the "antitrust injury" standing requirement for private causes of action in district courts, under section 4 and section 16 of the Clayton Act, into the Section 337 (a)(1)(A) unfair trade practices provision, *i.e.*, "unfair methods of competition and unfair acts," of Section 337(a)(1)(A). *See* ID at 10-11, 23. Antitrust injury is a separate and distinct standing requirement derived from, and restricted as a matter of statutory interpretation to, section 4 or 16 of the Clayton Act in Article III district courts. It is not a required element of a Sherman Act section 1 violation alleged in U.S. Steel's complaint to constitute "unfair methods of competition and unfair acts" under the **[*67]** Section 337(a)(1)(A) as the ID finds. *See* ID at 9, 19. Inasmuch as antitrust injury standing is not required as a matter of law in this section 337 investigation, the ID's findings that hold otherwise should be reversed and vacated and the matter remanded to the ALI for further proceedings.

End of Document

---

and in district court "you would have to get personal jurisdiction over the parties, as well, which may not be possible" whereas in the ITC there is *in rem* jurisdiction and personal jurisdiction is not required. While these would not "create a new sort of cause of action in a new substantive area of law, ... what it does do is create a different way of getting at a violation that might be more attractive in certain circumstances than going into district court." Oral Arg. Tr. at 166. A further distinction, as noted at the oral argument, is that a government attorney from the USITC Office of Unfair Import Investigations participates in the investigation as a neutral third party to assist the AU and the Commission to fully develop the record, including serving discovery, filing motions, appearing at trial, questioning witnesses, and filing briefs before the AU and the Commission. *Id.* at 194.

[16] I find unpersuasive respondents' policy argument that antitrust injury required by Sections 4 and 16 of the Clayton Act should be adopted for the same reasons that in patent-based investigations, the Commission, as a policy matter, looks to fedeial law regarding patent standing to determine patent ownership required by Commission Rule 210.12(a)(7). Resp. Opening Br. at 9 (citing *Certain Catalyst Components and Catalysts for the Polymerization of Olefins*, Inv. No. 337-TA-307, Views of the Commission, 1990 WL 710614, at *15) (June 7, 1990) ("*Catalyst Components*"). In *Catalyst Components*, the Commission noted that its Rules of Practice and Procedure require that every intellectual property complaint must show that at least one complainant is the owner or exclusive licensee of the subject property and determined that there was no reason for the Commission to interpret this rule in a way contrary to judicial precedent governing patent ownership. *See* 1990 WL 710614, at *14. The Federal Circuit has approved the Commission's practice of reading federal patent standing requirements into this rule. *See* SiRF Tech., Inc. v. Int'l Trade Comm'n, 601 F.3d 1319, 1326 n.4 (Fed. Cir. 2010). Respondents, however, fail to cite any Commission procedural rule governing complaint requirements for Sherman Act Section 1 antitrust claims that would require the Commission to read into such rule the antitrust injury requirement of the Clayton Act Sections 4 and 16. *See* Resp. Opening Br. at 9-10. Moreover, respondents have failed to cite any unfair act investigations in which the Commission was required to, or chose to, adopt the same standing requirements as in federal district courts, apart from the Commission's interpretation of its own procedural rule in the patent context. *See* Resp. Opening Br. at 9-10; Oral Arg. Tr. at 117-18.

Opinion

[*639] MEMORANDUM OPINION

(Granting Defendants' Motions to Dismiss; Denying Motion to Transfer as Moot)

This matter is before the Court on three Motions to Dismiss pursuant to *Federal Rule of Civil Procedure 12(b)(6)* and a Motion to Transfer Venue in accordance with *28 U.S.C. § 1404*.[1] The Complaint contains one count alleging a violation of the *Sherman Act* and several counts alleging violations of state law.

All parties have filed memoranda supporting their respective positions. The Court will dispense with oral argument because the facts and legal contentions are adequately presented in the materials before the Court, and oral argument would not aid in the decisional process. E.D. Va. *Local Civ. R. 7(J)*.

For the reasons stated herein, the Court will grant the Motions to Dismiss. Count One will be dismissed with prejudice. The remaining state law counts will be dismissed without prejudice. The Motion to Transfer Venue will be denied as moot.

I. Background

As required by *Rule 12(b)(6) of the Federal Rules of Civil Procedure*, the Court assumes Plaintiff's well-pleaded allegations to be true **[**3]** and views all facts in the light most favorable to him. *T.G. Slater & Son **[*640]** v. Donald P. & Patricia A. Brennan LLC, 385 F.3d 836, 841 (4th Cir. 2004)* (citing *Mylan Labs, Inc. v. Matkari, 7 F.3d 1130, 1134 (4th Cir. 1993))*. Viewed through this lens, the facts are as follows.

Plaintiff Dr. Mark G. Turner, DDS[2] ("Plaintiff") was a dentist in the Roanoke, Virginia area during the period relevant to the Complaint. (Compl. ¶ 1.) From 2008 to 2014, Plaintiff treated Medicaid patients in the Smiles for Children ("SFC") program pursuant to an agreement with Defendant Dentaquest, LLC.[3] (*Id.* ¶¶ 2-3.)

Defendant DMAS is the Virginia agency tasked with overseeing the SFC program and contracted Defendant Dentaquest to administer and supervise the program. (*Id.* ¶ 6.) DMAS is managed by the Secretary of Human Resources and a Director of Medical Assistance Services, who is appointed by the Governor and subject to confirmation by the General Assembly. *Va. Code Ann. § 32.1-323*. Additionally, DMAS has an eleven-member board ("DMAS Board"), which is comprised of five members who are health care providers and six members who are not health care providers. *Va. Code Ann. § 32.1-324(A)*. The DMAS Board formulates and submits a plan for the provision of medical assistance services to the U.S. Secretary of Health and Human Services in accordance with *Title XIX of the Social Security Act*. *Va. Code Ann. § 32.1-325(A)*. The Director of Medical Assistance **[**4]** Services is empowered to administer this plan and to "enter into all contracts necessary or incidental to the

[1] Defendants Virginia Department of Medical Assistance Services ("DMAS") and Dr. Tonya Parris-Wilkins, DDS ("Parris-Wilkins") filed a joint motion on August 25, 2017. (DMAS, Parris-Wilkins Mot. to Dismiss, ECF No. 11.) Defendants Dr. David Black, DDS ("Black") and Dr. Terry Dickinson, DDS ("Dickinson") also filed a joint motion on August 25, 2017. (Black, Dickinson Mot. to Dismiss, ECF No. 9.) Defendant Dr. Greg Harvey, DDS ("Harvey") filed a Motion to Dismiss and a Motion to Transfer Venue on September 6, 2017. (Harvey, Mot. to Dismiss, ECF No. 17; Harvey, Mot. to Transfer, ECF No. 19.)

[2] This action is brought by Plaintiff "both in his individual capacity and through his corporation that he did business" with. (Compl. ¶ 20.)

[3] Defendant Dentaquest is the successor of Doral Dental USA, LLC, which is the party with whom Plaintiff originally entered into an agreement. Defendant Dentaquest is not a party to the motions presently before the Court.

performance of the Department's duties and execution of its powers as provided by law." *Va. Code Ann. § 32.1-325(D)(1)*.

The SFC program is split into two parts: one component of the program is dedicated to treating patients up to the age of twenty one and the other component focuses on treating patients that are over the age of twenty one. (*Id.* ¶ 4.) Plaintiff "worked exclusively with the Over 21 portion" of the SFC program. (*Id.*) During his involvement with the SFC program, Plaintiff operated what was likely "the largest safety net adult Medicaid practice in Virginia" and "was treating at least 75% of the eligible Medicaid adults receiving treatment in the Roanoke Valley." (*Id.* ¶ 10.) The patients Plaintiff treated under the SFC program formed the entirety of his practice. (*Id.* ¶ 3.)

The Roanoke-based Mission of Mercy Clinic ("MOM") was a project of the Virginia Dental Association ("VDA") that provided "free, volunteer traveling dental" services to the same segment of the population as Plaintiff. (*Id.* ¶¶ 13-14.) Defendant Dickinson, the Executive Director of the VDA, and Defendant Black, a VDA board member, **[**5]** are Founders of MOM, and Defendant Black serves as its Dental Director. (*Id.* ¶¶ 13, 27.) Plaintiff claims that competition with the MOM was detrimental to his practice, but he also credits his dental practice as a "contributing factor [to] the Roanoke Mission of Mercy going out of business." (*Id.* ¶ 42.) The MOM's financial model proved unworkable, and, sometime after September 2012, the program was reorganized into a Mini-MOM concept, which was "fully endorsed" by the VDA. (*Id.* ¶¶ 14, 42, 44.)

In January 2014, Defendant Dentaquest ended Plaintiff's eligibility under the SFC program by terminating Plaintiff's contract **[*641]** "without cause." (*Id.* ¶¶ 21, 45.) Starting in 2014, Commonwealth Dental Clinic ("CDC"), which is owned by Defendant Harvey, became the only "provider[] for Adult (Over 21) Medicaid dental services in Western Virginia." (*Id.* ¶ 66.)

Plaintiff alleges that the "defendant dentists exercised their market power to push the Plaintiff out of his dental market niche, and out of business" and that DMAS and Dentaquest "knew there was antitrust activity" and took action that led to "further cover up and concealment of Defendants' actions against [Plaintiff]." (*Id.* ¶¶ 18, 54-55.) Specifically, **[**6]** Plaintiff claims that, in downsizing from the financially inviable MOM, Defendants agreed to provide treatment to non-Medicaid-eligible patients at the Mini-MOMs and funnel all Medicaid-eligible patients to Defendant Harvey's CDC. (*Id.* ¶¶ 14, 18, 43.) Plaintiff further alleges that "Defendant Greg Harvey agreed to absorb the Over 21 Medicaid practice of Plaintiff on the condition that he would not have to compete directly with Plaintiff." (*Id.* ¶ 48.) As such, Plaintiff alleges that Defendants Dickinson, Black and Harvey "joined together . . . to put [Plaintiff] out of business in the Medicaid [SFC] program." (*Id.* ¶ 18.)

As mentioned above, Defendant Dentaquest terminated Plaintiff's contract, ending his eligibility under the SFC program. (*Id.* ¶¶ 21, 45.) Plaintiff does not contend that Defendant Dentaquest lacked the contractual right to terminate his contract.[4] Instead, Plaintiff alleges that Defendant Dentaquest "did not act independently," that "DMAS sought the Plaintiff's termination based upon the advice of Defendants Terry Dickinson, David Black and/or Greg Harvey," and that Defendant Dentaquest notified Plaintiff's patients of his termination before the deadline for his appeal **[**7]** had passed. (*Id.* ¶¶ 45 , 46, 61.)

Plaintiff alleges that Defendant Dickinson communicated the progress of Plaintiff's termination to Defendant Black; that Defendants Black and Harvey purchased a building to house CDC prior to Plaintiff's termination "***with the knowledge and intent*** . . . that one of their main competitors ([Plaintiff]) would be eliminated by Defendant Dentaquest;" and that the VDA, led by Defendant Dickinson, supported the CDC despite "not support[ing] the Over 21 Benefit in the past." (*Id.* ¶¶ 24, 35, 47.)

In January 2015, Plaintiff filed an ethics complaint ("2015 complaint") against Defendants Harvey and Black with the VDA Ethics Committee regarding ethics violations surrounding the naming and advertising of CDC. (*Id.* ¶ 27; Exhibit D, ECF No. 1-4.) Plaintiff states that the VDA "likely did not conduct a review of [Plaintiff]'s Ethics Complaint, as, if they did, David Black would have been found blatantly guilty." (Compl. ¶ 27.) Further, Plaintiff alleges that

---

[4] Plaintiff's asserted cause of action in the fifth count of the Complaint indicates that Plaintiff's contract with Defendant Dentaquest was "terminable at will." (Compl. 31.)

Defendant Parris-Wilkins, a member of the VDA and the VDA Ethics Committee, "presumably" ruled against this complaint. (*Id.* ¶ 31.)

In April 2016, Plaintiff was the subject of an inquiry by the Virginia Board of Dentistry **[**8]** ("BOD") and was ultimately sanctioned for violations stemming from the closure of his dental practice in 2014. (*Id.* ¶ 31; Exhibit N, ECF No. 1-17.) Defendant Parris-Wilkins was on the BOD panel that ruled against Plaintiff. (Compl. ¶ 31.) Plaintiff contends that Defendant Parris-Wilkins' service on this panel was a clear conflict of interest, due to her "close relationship" with Defendant Dickinson and her role in ruling against the 2015 complaint. (*Id.* ¶ 33.) In sum, Plaintiff claims that "Defendant Parris-Wilkins was involved in the Defendants' attempts to **[*642]** cover up their actions against Plaintiff." (*Id.*)

Plaintiff asserts a cause of action under *Section One* of the Sherman Act and alleges that the relevant service market is:

> (1) adult (over 21) dental services recognized under the Medicaid approved *Smiles For Children* program; (2) tooth extractions and related services, as identified under Medicaid approved Over 21 *Smiles For Children* program; and (3) Medicaid approved services for the Over 21 members of the *Smiles For Children* program in Western Virginia, and within a two hour drive of Roanoke, Virginia.

(*Id.* ¶ 56.) Plaintiff claims that, as a result of Defendants' anticompetitive actions, **[**9]** dentists have been deterred from entering the market and there has been a significant reduction in the availability of dental services. (*Id.* ¶ 64.) Further, CDC will continue to exercise its "influence" to maintain a "monopoly" over the market. (*Id.*) Plaintiff also claims that he has been "directly harmed" by Defendants' anticompetitive conduct and continues to suffer "significant economic and financial loss." (*Id.* ¶ 67.)

Plaintiff previously brought a nearly identical action against a nearly identical cast of defendants in the United States District Court for the Western District of Virginia. *See* *Turner v. Va. Dep't of Med. Assistance Servs., 230 F. Supp.3d. 498 (W.D. Va. 2017)* (hereinafter "Western District Case"). After considering Plaintiff's arguments, the Honorable Judge Jackson L. Kiser granted the defendants motions to dismiss and dismissed the action without prejudice.

II. Standard of Review

Generally, a court considering a motion to dismiss is both informed and constrained by the four corners of a complaint. The court, however, may properly consider documents that are attached to the complaint, *Fed. R. Civ. P. 10(c)*, and take judicial notice of matters of public record, *Sec'y of State for Defence v. Trimble Navigation Ltd., 484 F.3d 700, 705 (4th Cir. 2007)*. The task at hand is to determine the sufficiency of the Complaint, "not resolve contests surrounding the **[**10]** facts, the merits of a claim, or the applicability of defenses." *Republican Party of N.C. v. Martin, 980 F.2d 943, 952 (4th Cir. 1992)*. In considering a motion to dismiss, plaintiff's well-pleaded allegations are taken as true and the complaint must be viewed in the light most favorable to the plaintiff. *T.G. Slater & Son, Inc., 385 F.3d at 841*.

Nevertheless, "in the event of conflict between the bare allegations of the complaint and any exhibit attached . . . the exhibit prevails." *Fayetteville Inv'rs v. Commercial Builders, Inc., 936 F.2d 1462, 1465 (4th Cir. 1991)*. The so-called exhibit-prevails rule is only applicable when a plaintiff relies on an exhibit to form part of its claim, such that a court can presume plaintiff "has adopted as true the contents of the document." *Goines v. Valley Cmty. Servs. Bd., 822 F.3d 159, 166-67 (4th Cir. 2016)*.

A court "need not accept the legal conclusions drawn from the facts," nor must the court "accept as true unwarranted inferences, unreasonable conclusions or arguments." *Eastern Shore Mkts., Inc. v. J.D. Assocs. Ltd. P'ship, 213 F.3d 175, 180 (4th Cir. 2000)*. To survive *Rule 12(b)(6)* scrutiny, a plaintiff must provide more than merely "labels and conclusions" or a "formulaic recitation of the elements of a cause of action." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)* (citations omitted). Instead, a plaintiff must allege facts sufficient "to raise a right to relief above the speculative level," stating a claim that is "plausible on its face," rather than merely "conceivable." *Id. at 555, 570* (citations omitted). "A claim has facial plausibility when the plaintiff **[**11]** pleads factual **[*643]** content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (citing *Twombly, 550 U.S. at 556*).

III. Discussion

Each of the Defendants that are parties to the Motions presently before the Court have challenged the sufficiency of the factual allegations made in Plaintiff's Complaint under the *Twombly* and *Iqbal* standard. In addition, Defendant DMAS argues that the doctrine of issue preclusion bars re-litigating Judge Kiser's determination that it is immune from liability for violations of the Sherman Act. Alternatively, Defendant DMAS argues that it is immune from liability under the Sherman Act for the same reasons enunciated in the Western District Case. Because the immunity determination would preclude liability regardless of the sufficiency of the factual allegations to state a claim under the Sherman Act, the Court will address the issue preclusion and state action immunity arguments first.

1. Issue Preclusion

First and foremost, the Court may properly consider whether the doctrine of issue preclusion bars re-litigation of the immunity issue at this stage of litigation. The doctrine of issue preclusion, also known as collateral estoppel, **[**12]** is an affirmative defense. It is well-settled in the Fourth Circuit that a court ruling on a motion to dismiss may properly consider affirmative defenses when such defenses "clearly appear on the face of the complaint." *Richmond, Fredericksburg & Potomac R.R. Co. v. Forst, 4 F.3d 244, 250 (4th Cir. 1993)*. Further, "a district court may properly 'take judicial notice of facts from a prior judicial proceeding when the [collateral estoppel] defense raises no disputed issue of fact.'" *Ashe v. PNC Fin. Servs. Grp., 652 F. App'x 155, 157 (4th Cir. 2016)* (quoting *Andrews v. Daw, 201 F.3d 521, 524 n.1 (4th Cir. 2000))*.

Plaintiff contends that "DMAS . . . may not invoke state-action immunity." (Compl. ¶ 70.) As discussed below, in making this claim, Plaintiff is attempting to re-litigate the determination in the Western District Case that DMAS is immune from this action. Because the question of issue preclusion clearly appears on the face of the Complaint, the Court can appropriately consider the preclusive effects of Judge Kiser's opinion in the present case.

The burden is on the party seeking the preclusive effect of a determination to show that issue preclusion is applicable. Issue preclusion is only appropriate when the proponent demonstrates:

> (1) the issue or fact is identical to the one previously litigated; (2) the issue or fact was actually resolved in the prior proceeding; (3) the issue **[**13]** or fact was critical and necessary to the judgment in the prior proceeding; (4) the judgment in the prior proceeding is final and valid; and (5) the party to be foreclosed by the prior resolution of the issue or fact had a full and fair opportunity to litigate the issue or fact in the prior proceeding.

Kloth v. Microsoft Corp., 355 F.3d 322, 326 (4th Cir. 2004). Plaintiff does not address the issue preclusion argument in his memorandum opposing DMAS's Motion. For the reasons below, the Court finds that issue preclusion does not apply.

The first, second, fourth and fifth elements are satisfied in the present case. The state action immunity issue presently before the Court is identical to the one decided by Judge Kiser in the Western District Case. *Turner, 230 F. Supp.3d. at 505-07*. Judge Kiser resolved the immunity issue, and his dismissal of Plaintiff's action against DMAS was based in part on that immunity determination. *Id. at 507*. Moreover, **[*644]** Plaintiff clearly had a full and fair opportunity to be heard, as the dismissal came after the court heard arguments from both parties. *Id. at 505-07*. Lastly, the dismissal operates as a final and valid order.

With regard to the third element, the Court must consider whether the determination that state action immunity applied to DMAS was critical and necessary **[**14]** to the dismissal of the complaint against DMAS. In *Ritter v. Mount St. Mary's College*, the Fourth Circuit found that "where the court in the prior suit has determined two issues, either of which could independently support the result, then neither determination is considered essential to the judgment. Thus, collateral estoppel will not obtain as to either determination." *814 F.2d 986, 993 (4th Cir. 1987)*; *see also* *Kloth, 355 F.3d at 328*. In pertinent part, Judge Kiser's opinion states: "Because DMAS has immunity against claims under the Sherman Act, Plaintiff has failed to state a claim against DMAS." *Turner, 230 F. Supp. 3d at 507*. While clearly relying on DMAS's immunity as one basis for his dismissal of Plaintiff's action against it, Judge Kiser went on to determine that dismissal was also warranted because Plaintiff failed to meet the plausibility standard under *Twombly* and *Iqbal*. *Turner, 230 F. Supp. 3d at 508-09*.

Because two independent reasons for dismissal of the claim against DMAS exist, collateral estoppel will not attach to the immunity determination from the Western District Case.

2. State Action Immunity

Defendant DMAS contends that the doctrine of state action immunity bars Plaintiff's claim against it for alleged violations of *Section One* of the Sherman Act. State action immunity, or *Parker* Immunity, makes **[**15]** clear that states are not bound by the strictures of the Sherman Act regime when operating in their sovereign capacity. *See* *Parker v. Brown, 317 U.S. 341,350-51, 63 S. Ct. 307, 87 L. Ed. 315 (1943)*. As described below, the state action immunity doctrine is applicable to DMAS, and therefore DMAS is exempt from liability under the Sherman Act.

In *Parker*, the Supreme Court found "nothing in the language of the Sherman Act or in its history which suggests that its purpose was to restrain a state or its officers or agents from activities directed by the legislature." *Id. at 351*. Subsequently, the Court adopted a two-part test to better establish the boundaries of this immunity. *See* *Cal. Retail Liquor Dealers Ass'n v. Midcal Aluminum, 445 U.S. 97, 100 S. Ct. 937, 63 L. Ed. 2d 233 (1980)*. The Court clarified in *Midcal* that "a challenged restraint" is only immune from suit if it is "clearly articulated and affirmatively expressed as state policy . . . [and that] policy must be actively supervised by the State itself." *Midcal, 445 U.S. at 105*. Importantly, however, the Court has carved out an exception to the active supervision component of the *Midcal* test. *See* *Hallie v. Eau Claire, 471 U.S. 34, 105 S. Ct. 1713, 85 L. Ed. 2d 24 (1985)*. In *Hallie*, the Court held that municipalities are exempt from the active supervision requirement and suggested in dicta that state agencies are as well. *471 U.S. at 47*. The Court explained that the motivation for this exemption is the limited concern that **[**16]** a municipality will engage in anticompetitive conduct based upon purely private interests. *Id.*

Most recently, the Court addressed the applicability of the active supervision requirement to state agencies in *North Carolina State Board of Dental Examiners v. FTC, 135 S. Ct. 1101, 191 L. Ed. 2d 35 (2015)*. The State of North Carolina entrusted the regulation of the practice of dentistry to the North Carolina **[*645]** State Board of Dental Examiners (the "Board"), and a majority of the Board's members were actively engaged in the practice of dentistry. *Id. at 1107-08*. The Board was sued after it sought to prevent non-dentists from providing teeth-whitening services. *Id.* The Court downplayed the significance of the names or labels supplied by the State and instead focused on the composition of the entity that allegedly engaged in anticompetitive conduct. *Id. at 1114*. Specifically, the Court held that an entity is subject to the active supervision requirement when "a controlling number of decisionmakers are active market participants in the occupation the board regulates." *Id.*

In order for DMAS to be protected by *Parker* Immunity, its actions must have been based upon a clearly articulated state policy and either actively supervised by the state or exempted from the active supervision requirement.

DMAS was acting pursuant **[**17]** to a clearly articulated state policy when it directed Dentaquest to terminate its contract with Plaintiff. The clearly articulated policy standard is satisfied when "the displacement of competition is the inherent, logical, or ordinary result of the exercise of authority delegated by the state legislature." *N.C. State Bd. of Dental Exam'rs, 135 S. Ct. at 1112* (internal citations omitted). The Code of Virginia authorizes DMAS to develop a plan for administering medical assistance services and further entrusts the Director of DMAS with the authority to enter into contracts that are "necessary or incidental" to DMAS performing the duties and executing the power it is invested with by law. *Va. Code. Ann. § 32.1-325(A)*, *(D)(1)*. Implicit in the authority to enter into contracts is the power to terminate them. Further, the displacement of some competition is the natural consequence of DMAS exercising its administrative authority.

Plaintiff does not appear to contest that the Commonwealth of Virginia has conferred this specific authority to DMAS or that the exercise of this authority would necessarily have an impact on the competitive market. Instead, he contends that Virginia has not articulated a clear policy allowing DMAS to engage in anticompetitive conduct. (*See* Compl. **[**18]** ¶¶ 52-54, 70.) As detailed above, however, there is no requirement that a state explicitly endorse the anticompetitive effects of a clearly articulated policy. Rather, those effects need only be the inherent, logical, or ordinary result of exercising the delegated authority. In this case, the exclusion or inclusion of various service providers is the obvious and foreseeable result of the exercise of the administrative authority that the Virginia General Assembly delegated to DMAS.

For these reasons, DMAS has satisfied the clearly articulated policy prong of the *Parker* Immunity analysis.

DMAS is not subject to the active supervision requirement. The primary mission of DMAS is the provision of medical assistance services and not the regulation or licensure of members of the dental profession. *See* *Va. Code Ann. §§ 32.1-323, et seq.* Moreover, DMAS is politically accountable. It is overseen by the Secretary of Human Resources and the Director of DMAS, who is appointed by the Governor and subject to confirmation by the General Assembly. To the extent the DMAS Board is relevant to the actions underlying this case, only a minority of its members are health care providers. *Cf.* *N.C. State Bd. of Dental Exam'rs, 135 S. Ct. at 1114*. Plainly put, the concern animating the Court's **[**19]** active supervision line of cases—that private actors cloaked in the authority of the state will subvert public priorities to private self-interest—is not present with DMAS, which functions as a prototypical state agency.

[*646] Plaintiff's arguments that DMAS requires active supervision are unavailing. Plaintiff essentially contends that in making its decision to terminate him DMAS relied on the opinions and suggestions of active market participants and therefore "ceased to maintain an objective approach to Plaintiff." (Compl. ¶ 55.) Conspicuously absent from the Complaint is any allegation that DMAS—the entity which ultimately made the decision to terminate Plaintiff—is controlled by market participants. Plaintiff instead alleges that DMAS "conspired" or "agreed" with the other Defendants to exclude him from the Medicaid market. (*See* Compl. ¶¶ 29, 59.) However, even if the Court were to accept these conclusory allegations as true, "[t]here is no such conspiracy exception" to *Parker* Immunity. *City of Columbia v. Omni Outdoor Advert., 499 U.S. 365, 374-79, 111 S. Ct. 1344, 113 L. Ed. 2d 382 (1991)*; *see also* *N.C. State Bd. of Dental Exam'rs, 135 S. Ct. at 1114*.

DMAS operates as a prototypical state agency and is not controlled by active market participants, and therefore the active supervision component of the *Midcal* test is inapplicable. For these reasons, DMAS **[**20]** is immune from suit under the Sherman Act. Therefore, Plaintiff's claim against DMAS for violating *Section 1* of the Sherman Act will be dismissed.

3. Failure to State a Claim for Violation of the Sherman Act

Section 1 of the Sherman Act provides that "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is hereby declared to be illegal." *15 U.S.C. § 1*. "To establish a *§ 1* antitrust violation, a plaintiff must prove '(1) a contract, combination, or conspiracy; (2) that imposed an unreasonable restraint on trade.'" *N.C. State Bd. of Dental Exam'rs v. FTC, 717 F.3d 359, 371 (4th Cir. 2013)* (quoting *Dickson v. Microsoft Corp., 309 F.3d 193, 202 (4th Cir. 2002))*. Additionally, once a plaintiff demonstrates a violation of *§ 1*, he must prove that he suffered an antitrust injury: the type of injury that "the anti-trust laws were intended to prevent and that flows from that which makes defendants' acts unlawful." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*.

At the outset, the Court notes that it is unclear how any of the individuals named as Defendants could have possibly excluded Plaintiff from the Over 21 SFC program. Plaintiff essentially contends that DMAS ordered Dentaquest to terminate its contract with Plaintiff only after agreeing with Defendants Dickinson, Parris-Wilkins, Black and Harvey **[**21]** that Defendant Harvey would fill the gap created by Plaintiff's termination. It is undisputed, however, that Plaintiff's contract allowed for termination without cause. It is also undisputed that DMAS and Dentaquest were the only entity with the authority to terminate Plaintiff's contract. That the individual Defendants may have lobbied for Plaintiff's termination or even agreed with DMAS that Plaintiff should be removed from the Smiles for Children program does not change the fact that the power to exclude Plaintiff from the program rested with DMAS and Dentaquest. As the Court stated in *Omni*, "it is both inevitable and desirable that public officials [will] agree to do what one or another group of private citizens urges upon them." *499 U.S. at 374*.

Also noticeably absent from the Complaint is any explanation as to how the individual Defendants could have conceivably excluded Plaintiff from the SFC program market wielding powers that they did not have. Plaintiff broadly claims that "[DMAS], Dentaquest . . . and the [i]ndividual **[*647]** Defendants have exercised the power to exclude dentists from competing in the relevant service markets. These Defendants have the power and perceived power to provide contracts, **[**22]** issue finds, and order dentists to take or refrain from certain conduct." (Compl. ¶ 58.) Plaintiff, however, provides no indication as to how or when the private individual Defendants exercised this authority. Further, the only allegation of misconduct against Defendant Parris-Wilkins occurred in April of 2016, more than two years after Plaintiff's contract with Dentaquest was terminated.

A. Plaintiff Fails to Plausibly Allege a Contract, Combination or Conspiracy

Because *§ 1* of the Sherman Act only restricts contracts, combinations and conspiracies that restrain trade, the relevant inquiry "is whether the challenged anticompetitive conduct "stem[s] from independent decisions or from an agreement, tacit or express." *Twombly, 550 U.S. at 553* (quoting *Theatre Enters., Inc. v. Paramount Film Distrib. Corp., 346 U.S. 537, 540, 74 S. Ct. 257, 98 L. Ed. 273 (1954))*. In *Twombly*, the Court clarified that mere conclusory claims of an agreement, even when paired with allegations of parallel conduct, are insufficient to satisfy the contract, combination or conspiracy aspect of a *§ 1* antitrust claim. *550 U.S. at 553-55*. "Without *more*, parallel conduct does not suggest conspiracy, and a conclusory allegation of agreement at some unidentified point does not supply facts adequate to show illegality." *Id. at 556-57* (emphasis added).

The Fourth Circuit has found that "[a]ntitrust **[**23]** complaints . . . 'that include detailed factual allegations as to the who, what, when and where of the claimed antitrust misconduct not surprisingly survive dismissal.'" *SD3, LLC v. Black & Decker (U.S.) Inc., 801 F.3d 412, 430 (4th Cir. 2015)* (quoting William Holmes & Melissa Mangiaracina, ***Antitrust Law*** Handbook § 9:14 (2014 supp.). Communications between alleged conspirators can help raise an inference of agreement, as they afford the "means and opportunity to conspire." *Id. at 432*. In essence, additional details that indicate a meeting of the minds are required to "allay[] suspicion that the plaintiff is merely speculating a conspiracy into existence from coincidentally similar action." *Id. at 430*.

Plaintiff falls well short of alleging the requisite meeting of the minds. The Complaint contains nothing more than conclusory allegations of an agreement between the Defendants. Moreover, those allegations are directly controverted by several other statements in the Complaint that allege DMAS sought the advice of the Defendants. (*Compare* Compl. ¶ 29 ("Defendant Dr. Greg Harvey, DDS formed and funded CDC after agreeing with Defendants DMAS, Dickinson and Black that Plaintiff would be terminated from the Virginia Medicaid program."), *with* Compl. ¶ 55 ("DMAS sought the opinion of **[**24]** Defendant Dickinson in regard to the decision to terminate Plaintiff, and discussed this decision with Defendants Dickinson, Black and Harvey . . . [t]hus, DMAS ceased to maintain an objective approach to Plaintiff.").)[5] **[*648]** One party seeking the advice, opinion or consultation of another party as

---

[5] As evidence of the communication amongst the Defendants with regard to Plaintiff's termination, Plaintiff attaches Exhibit T. ("Ex. T," ECF No. 1-23.) This exhibit shows that Defendant Dickinson was in an email thread in which he was informed of Plaintiff's impending termination; however, the thread does not show him advising, encouraging, agreeing or otherwise ordering

to a decision does not imply that the two entered into an agreement. This is no less true when the party seeking advice ultimately follows that advice.

Even if the Court were willing to disregard this glaring inconsistency in Plaintiff's Complaint, the remaining allegations do not provide the "more" necessary to satisfactorily allege a *§ 1* antitrust violation. The fact that Defendant Dickinson communicated with Defendant Black on the progress of Plaintiff's termination does not suggest that the two were working together to bring the termination about. The fact that Defendant Harvey had advanced knowledge of Plaintiff's termination and took steps to fill the gap created by his termination does not suggest that he was active in causing the termination. These examples at best represent parallel conduct which alone is not actionable.

In its best light, the Complaint contains conclusory allegations **[**25]** of an agreement and a few instances of parallel conduct. Under *Twombly*, additional factual allegations are necessary in order to plausibly claim that an agreement was reached. Therefore, Plaintiff has failed to sufficiently allege a meeting of the minds.

B. Plaintiff Fails to Allege that He Suffered an Antitrust Injury

The requirement of demonstrating an antitrust injury stems from the enduring principle that antitrust laws were enacted for "the protection of *competition*, not *competitors*." *Brown Shoe Co. v. United States, 370 U.S. 294, 320, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)*. As such, a plaintiff's injuries must be "of the type that the antitrust statute was intended to forestall." *Assoc. Gen. Contractors v. Cal. State Council of Carpenters, 459 U.S. 519, 540, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)*. Not all harms that flow from an antitrust violation are compensable under the antitrust laws.

Though an injury may be "causally related to an antitrust violation, [it] nevertheless will not qualify as antitrust injury unless it is attributable to an anticompetitive aspect of the practice under scrutiny." *Atl. Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 334, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)* (internal quotations omitted). In essence, "a plaintiff must show that the net effect of a challenged restraint is harmful to competition." *Cont'l Airlines, Inc. v. United Airlines, Inc., 277 F.3d 499, 508 (4th Cir. 2002)*. Identifying an antitrust injury is a necessary component of demonstrating standing to bring an antitrust action. *Kloth v. Microsoft Corp., 444 F.3d 312, 323 (4th Cir. 2006)*.

Plaintiff's antitrust claim founders **[**26]** at the starting gate because he fails to allege an antitrust injury. Plaintiff's loss of his "niche" practice due to the decision by DMAS to terminate his contact and to contract with a replacement service provider is not the type of injury that the antitrust laws were designed to prevent. The Complaint contains no plausible allegations that this decision by DMAS will produce anticompetitive results in the relevant market. Plaintiff's contention that his termination will serve as a deterrent to others seeking to enter the market is a conclusion that is not tethered to any specific factual allegations. Moreover, while DMAS's decision to remove Plaintiff as a service provider may have had the effect of **[*649]** shutting him out of the Medicaid market, that is the natural consequence of substituting one contractor for another. *Drs. Steuer & Latham, P.A. v. Nat'l Med. Enters., 672 F. Supp. 1489, 1502 (D.S.C. 1987)*. "Merely changing exclusive contractors, however, cannot constitute a violation of the antitrust laws." *Id.* The core of Plaintiff's alleged injury is that he was previously able to provide service to the vast majority of Medicaid eligible patients through his contract with Dentaquest; "he may not now complain that someone else enjoys a similar position." *Shafi v. St. Francis Hosp., Nos. 90-3107, 90-3117, 1991 U.S. App. LEXIS 15232, *10 (4th Cir. July 16, 1991)*.

---

that the termination occur. Additionally, another email in the thread from a DMAS official reveals that Plaintiff was terminated due to concern that Plaintiff presented a "liability given his staffing situation, [and] 17 complaints in 5 years." (Ex. T at 5.) In accordance with the exhibit-prevails rule, it is likely that this statement can be relied on for its truth to the detriment of any contrary allegations in the Complaint. *See* *Goines, 822 F.3d at 166-67*. That said, given the clear deficiencies of Plaintiff's Sherman Act claims, the Court need not rely on this statement in its analysis.

Additionally, **[**27]** in *Brunswick* the Court made clear that a plaintiff cannot claim an antitrust injury if his alleged loss would have resulted even without an antitrust violation. *429 U.S. 477, 488-89, 97 S. Ct. 690, 50 L. Ed. 2d 701*. In this case, Plaintiff's contract was terminable by either party without cause. Plaintiff's alleged injury stems from the termination of his contract and Defendant Harvey's practice filling the coverage gap created by his termination. According to Plaintiff, this has had the effect of shutting him out of the relevant market. But, because Plaintiff narrowly defines the relevant market as participation in the Over 21 SFC program, any termination by Dentaquest would have resulted in Plaintiff's exclusion from the relevant market. In essence, he is attempting to use the Sherman Act to make an end-run around his at-will contract. The antitrust laws were not created to protect against this type of injury.

Plaintiff failed to allege the requisite agreement to restrain trade and failed to demonstrate that he suffered an antitrust injury. As such, the Sherman Act claim will be dismissed with prejudice

4. State Law Claims

In addition to his claim under the Sherman Act, Plaintiff alleges five counts under various state laws. The Court's **[**28]** original jurisdiction over this action stems from the presence of a federal question based upon the Sherman Act count. *28 U.S.C. § 1331*. Now that the sole federal question presented in this case has been dismissed, the Court will decline to exercise its supplemental jurisdiction pursuant to *28 U.S.C. § 1367(c)*. As such, the remaining state law counts will be dismissed without prejudice.

IV. Conclusion

For the foregoing reasons, the Complaint will be dismissed. Consequently, Defendant Harvey's Motion to Transfer Venue will be denied as moot.

The Court additionally notes that it gave serious consideration to imposing sanctions in this case. The protracted history of this litigation reveals that Plaintiff has had ample opportunity to have his Sherman Act claims heard. Rather than address the deficiencies identified with particularity by Judge Kiser, Plaintiff re-filed a nearly identical Complaint in this District. The most substantive change by Plaintiff was the addition of Defendant Parris-Wilkins, whom he alleges engaged in a conspiracy that occurred more than two years before he alleges any conduct on her part.

Plaintiff's filings in Opposition to the Motions to Dismiss are similarly, if not more egregiously, inadequate. **[**29]** Plaintiff quite apparently copied wholesale from filings he made in the Western District Case, often with limited applicability. For instance, the second page of his Opposition to Defendants DMAS and Parris-Wilkins's Motion contains a paragraph that references a "First Amended Complaint" and the "Blue Ridge Defendants." Plaintiff has not defined any group of Defendants by **[*650]** that term in this case and the Complaint in this case has not been amended. Instead, this paragraph appears verbatim in a Response in Opposition to a Motion to Dismiss filed by Plaintiff in the Western District Case. (*See* Civil Case No. 4:16-cv-43 (W.D. Va. 2017), ECF No. 52.) Additionally, Defendants DMAS and Parris-Wilkins point out that several of the arguments advanced by Plaintiff's Opposition appear to stem from an entirely different case. (*See* Defendants DMAS and Parris-Wilkins Reply 3, n. 1, ECF No. 22.) And Plaintiff generally failed to address several of the points raised by all the Defendants.

In spite of these questionable tactics, the Court does not feel that imposing sanctions is appropriate at this time. However, subsequent filings by Plaintiff attempting to rehash this same claim against these same **[**30]** Defendants will be viewed by this Court as an attempt to harass and will not engender a favorable response. Plainly put, if Plaintiff again charts the same course he has in this case, his path will likely include penalties under *Rule 11 of the Federal Rules of Civil Procedure*.

An appropriate Order will accompany this Memorandum Opinion.

discovery, premiums, discovery request, costs, purchaser, insureds, products

Judges: **[*1]** JAN E. DuBOIS, J.

Opinion by: JAN E. DuBOIS

Opinion

ORDER

AND NOW, this 20th day of March, 2018, upon consideration of the joint letter brief of the parties related to a discovery dispute concerning defendants' efforts to obtain discovery from Kaiser Health Foundation ("Kaiser"), University of Pittsburg Medical Center ("UPMC"), UnitedHealth Group ("United"), the United States Department of Veterans Affairs ("VA"), and BCBS Michigan (Doc. No. 508, filed February 28, 2018), following a telephone conference with the parties, through counsel, on March 16, 2018, **IT IS ORDERED** that the requested discovery is appropriate, and that, as a consequence, plaintiffs' request for entry of a protective order with respect to Kaiser, UPMC, United, the VA, and BCBS Michigan is **DENIED**. The parties shall proceed in accordance with the guidelines provided by the Court during the telephone conference.

IT IS FURTHER ORDERED that defendants' request to amend the First Amended Scheduling Order (Doc. No. 251, filed August 21, 2015) to permit defendants to take up to twenty-eight (28) depositions is **GRANTED**.

The decision of the Court is based on the following:

Defendants seek discovery from two groups of entities; End Payor Plaintiffs **[*2]** ("EPPs") ask the Court to enter a protective order barring discovery from both groups. First, defendants seek discovery from Kaiser, UPMC, United, and the VA regarding the interchangeability of other products with Niaspan. Jt. Letter, Doc. No 508 at 2-3, exs. 7-9. Defendants contend that this discovery is relevant to the issue of the interchangeability of other products with Niaspan and, thus, to market definition. *Id.* at 3. In response, the End Payor Plaintiffs ("EPPs") argue the "relevant market [is] based on practical indicia of the presence or absence of cross-price elasticity of demand" and that "stray documents produced by absent class members" are therefore irrelevant. *Id.* at 12. The Court agrees with defendants.

The Third Circuit has relied on similar evidence of the interchangeability of products to establish market definition. In *Mylan Pharms. Inc. v. Warner Chilcott Pub. Ltd. Co., 838 F.3d 421, 436 (3d Cir. 2016)*, that court affirmed the district court's finding of interchangeability for various acne products based on evidence that:

> Managed care organizations have sought to constrain patients to substitute Doryx with other, less costly tetracyclines to treat acne. Some organizations have removed Doryx as a reimbursable medication; others have limited any reimbursement. A number **[*3]** of managed care organizations sent notices to healthcare providers urging them to substitute other oral tetracyclines for Doryx.

Defendants in this case now seek these same types of documents from Kaiser, UPMC, United, and the VA.

Second, defendants seek documents from BCBS Michigan related to the "effect of prescription drug costs, including the costs of Niaspan, on the premiums charged by BCBS Michigan for its insurance plans." Doc. No. 508 at 5. Defendants argue that, unlike federal law, the *Michigan Antitrust Reform Act ("MARA")* permits a "pass on" defense.[1] Under a "pass on" defense, a defendant argues that an antitrust plaintiff has recouped damages by passing overcharges on to its customers through higher prices — or, in this case, to its insureds through higher premiums. *See* *In re Niaspan Antitrust Litig., No. 13-md-2460, 2015 U.S. Dist. LEXIS 92534, at *3 n.4 (E.D. Pa. July 9, 2015)* (DuBois, J.). According to defendants, the MARA permits the "pass on" defense because it requires indirect purchasers such as EPPs to make a showing of "actual damages" and Michigan courts have interpreted this provision as requiring a "rigorous analysis" of the damages suffered by a plaintiff. *A & M Supply Co. v. Microsoft Corp., 252 Mich. App. 580, 654 N.W.2d 572, 603 (Mich. Ct. App. 2002)*.

EPPs respond with two contentions. First, they argue that this **[*4]** Court already concluded by Order dated July 9, 2015, that defendants cannot obtain discovery from the EPPs related to the "pass on" defense. Order, Doc. No. 233 at 4. Second, EPPs contend that even if the MARA permitted defendants to raise a "pass on" defense, the raising of premiums would not constitute a "pass on." To the contrary, they argue that the raising of premiums "is a forward-looking projection of future costs based on countless variables and actuarial projections." Jt. Letter at 11; *see, e.g.,* *United Wis. Servs. v. Abbott Labs., 220 F.R.D. 672, 690 (S.D. Fla. 2004)*.

The Court agrees with defendants on this issue. In applying the "rigorous analysis" required by the MARA's "actual damages" provision, Michigan courts have conducted detailed factual assessments that consider factors such as the number of products involved, the rate of overcharge for each product, the rate of overcharge to each indirect purchaser, and variations in the overcharges over time. *A & M, 654 N.W.2d at 600, 603*. Two federal courts have concluded that Michigan law permits defendants to raise the "pass on" defense "in order to give proper effect to the term 'actual damages' under the MARA." *In re Vitamins Antitrust Litig., 259 F. Supp. 2d 1, 8-9 (D.D.C. 2003)*; *accord* *In re TFT-LCD (Flat Panel) Antitrust Litig., No. 07-md-1827, 2012 U.S. Dist. LEXIS 182373, at *1 (N.D. Cal. Dec. 26, 2012)* (citing *In re Vitamins Antitrust Litig., 259 F. Supp. 2d 1*). This Court agrees.

EPPs' two arguments are unavailing. **[*5]** First, in its July 9, 2015, Order, this Court denied defendants' request for discovery related to the "pass on" defense on the assumption that "the state laws involved in this case follow federal ***antitrust law***," expressly stating that it was not ruling "on the propriety of the requested discovery in the event that applicable state law does not follow federal ***antitrust law***."[2] *In re Niaspan Antitrust Litig., 2015 U.S. Dist. LEXIS 92534, at *6-7*. According to Michigan courts, however, the assessment of actual damages required by the MARA in indirect purchaser suits differs from "the presumptions or inferences that might otherwise prevail in direct

---

[1] Federal law generally does not permit defendants to raise the "pass on" defense. *Hanover Shoe v. United Shoe Mach. Corp., 392 U.S. 481, 88 S. Ct. 2224, 20 L. Ed. 2d 1231 (1968)*.

[2] This caveat was required because the parties did not brief the law of the numerous states at issue in the case. *In re Niaspan Antitrust Litig., 2015 U.S. Dist. LEXIS 92534, at *6*.

purchaser federal antitrust cases." *Ren v. Philip Morris Inc., No. 00-004035-CZ, 2002 Mich. Cir. LEXIS 1, 2002 WL 1839983, at *5 (Mich. Ct. App. June 11, 2002)*. Because the MARA requires a showing of actual damages suffered by indirect purchasers that has no analog in federal cases, this Court concludes that Michigan law differs from federal law and its July 9, 2015, Order is no bar to defendant's requested discovery.

Likewise, on the present state of the record, the Court rejects EPPs' second contention that the raising of premiums does not constitute a "pass on" for purposes of the "pass on" defense. EPPs' argument does not adequately account for the fact that insurance companies' decisions **[*6]** to raise premiums are based on actuarial analyses to "enable[e] the insurer to collect [the costs of coverage] in advance from insureds." *Int'l Bhd. of Teamsters v. Philip Morris, 196 F.3d 818, 824 (7th Cir. 1999)*. Based on this rationale, two courts of appeals have concluded that insurance companies did not have standing to bring antirust claims, in part because they may pass on higher medical costs through higher premiums. *Id. at 825*; *accord* *SEIU Health & Welfare Fund v. Philip Morris Inc., 249 F.3d 1068, 1074, 346 U.S. App. D.C. 74 (D.C. Cir. 2001)*. The Seventh Circuit, for example, concluded that because insurance companies may raise premiums to cover higher costs, insurers "are just financial intermediaries. They collect the premiums and spend them to provide the contracted-for care; their books balance whether the costs of care are high or low." *Int'l Bhd. of Teamsters, 196 F.3d at 824*. Similarly, in this case, the discovery requested by defendants is relevant to the question whether the insurer members of the putative EPP class recouped their losses by charging higher premiums.

Finally, EPPs argue with respect Kaiser, UPMC, United, and BCBS Michigan that defendants may not obtain discovery from absent members of the putative EPP class.[3] The Court disagrees. Discovery may be obtained from absent class members "(1) where the information requested is relevant to the decision of common questions, (2) when the **[*7]** discovery requests are tendered in good faith and are not unduly burdensome and (3) when the information is not available from the class representative." *Kline v. First W. Gov't Secs., No. 83-1076, 1996 U.S. Dist. LEXIS 3329, at *9 (E.D. Pa. Mar. 11, 1996)*. As noted above, defendant's requested discovery is relevant to market definition and the "pass on" defense, questions common to the class. Further, the requests are targeted at four major "market player[s]," as opposed to the entire putative class, and are not unduly burdensome. Finally, as defendants argue, the information is not available from the named plaintiffs because they are not managed care organizations and do not analyze costs and benefits of prescription drugs. Jt. Letter at 4.

The Court thus denies EPPs' request for a protective order with respect to Kaiser, UPMC, United, the VA, and BCBS Michigan. With respect to these entities, the requested discovery is appropriate. Plaintiffs have not shown good cause for entry of a protective order.

BY THE COURT:

/s/ **Hon. Jan E. DuBois**

DuBOIS, JAN E., J.

---

[3] The EPPs' proposed definition of the putative EPP class in their Class Complaint expressly excludes "[a]ll federal or state government entities other than cities, towns or municipalities with self-funded drug plans." Doc. No. 46, ¶ 148. The VA is thus not an absent member of the putative EPP class. Defendants also dispute whether UMPC is a member of the putative EPP class, but the Court concludes that it is not necessary to reach that issue at this time.

[*1082] ORDER DENYING IN PART AND GRANTING IN PART DEFENDANTS' MOTIONS TO DISMISS [Doc. Nos. 32, 37]

INTRODUCTION

Plaintiff, Jason Toranto, originally filed a complaint on July 1, 2016, and filed a First **[**2]** Amended complaint ("FAC") on August 15, 2016, for conspiracy in restraint of trade (claim 1), monopoly (claim 2), bad faith professional review (claim 3), retaliation (claims 4 and 5), defamation (claim 6), violation of the Labor Code (claim 7), tortious interference with prospective economic advantage (claim 8), and unfair competition (claim 9). He names Daniel Jaffurs, Amanda Gosman, The Regents of the University of California, Rady Children's Hospital-San Diego, Rady Children's Specialists, Rady Children's Medical Staff, Children's Hospital of Orange County ("CHOC") and CHOC Medical Staff as defendants. Plaintiff alleges Defendants conspired to engage in and engaged in illegal, retaliatory, defamatory and anti-competitive conduct against Plaintiff, a pediatric plastic and craniofacial surgeon. See Doc. No. 21. Defendant CHOC and CHOC Medial Staff ("CHOC Defendants") filed an answer to the FAC on August 31, 2016. See Doc. 29. Rady Children's Hospital-San Diego, Rady Children's Specialist of San Diego, Rady Children's Medical Staff and Gosman ("Rady Defendants") filed a motion to dismiss the FAC on September 1, 2016. See Doc. No. 32. On September 13, 2016, The Regents filed a motion **[**3]** to dismiss the FAC and a joinder in the co-defendants' motions to dismiss, and Jaffurs filed a motion to dismiss the FAC. See Doc. Nos. 36, 37. On October 14, 2016, the Rady Defendants and Defendant Jaffurs filed separate motions to strike ("anti-SLAPP motions"). See Doc. No. 41, 42. Thereafter, Defendant The Regents filed a notice of joinder in the motions to strike and Defendant Jaffurs filed a notice of joinder in the Rady Defendants' motion to dismiss. See Doc. Nos. 43, 45. On October 24, 2016, Plaintiff voluntarily dismissed The Regents from the action without prejudice. See Doc. No. 48.

On October 28, 2016, Plaintiff filed an application seeking leave to conduct discovery relevant to Defendants' anti-SLAPP motions and to continue the hearing and dates to file his opposition. See Doc. No. 49. In light of the application, the Court vacated the hearing date and briefing schedule. See Doc. No. 51. Plaintiff's application for leave to conduct discovery was referred to the Honorable Nita L. Stormes, United States Magistrate Judge.

[*1083] Plaintiff filed a response to Defendant Jaffurs' motion to dismiss and the Rady Defendants' motion to dismiss on November 2, 2016. See Doc. Nos. 58, 59. Defendants **[**4]** filed replies in support of their motions. See Doc. No. 61, 62. Thereafter, the Court vacated the hearing date on the motions to dismiss. See Doc. No. 63.

On November 23, 2016, Judge Stormes issued an order denying Plaintiff's request not to stay general discovery and granting his request to conduct limited, specific discovery with respect to the claims raised in the anti-SLAPP motions. See Doc. No. 64. On January 23, 2017, Defendant filed an application seeking an order setting the motions to dismiss and anti-SLAPP motions for hearing which Plaintiff opposed. See Doc. Nos. 65, 66. The Court denied the motion. See Doc. No. 67.

On February 3, 2017, Judge Stormes held a status conference regarding discovery and issued an order, following the conference, lifting the stay on discovery and setting a scheduling order for discovery relating to the anti-SLAPP motions. See Doc. No. 71. Plaintiff filed a motion to compel which Judge Stormes granted. See Doc. No. Judge Stormes also set a briefing schedule on the pending motions to dismiss and anti-SLAPP motions. See Doc. No. 77. Defendant Jaffurs and the Rady Defendants objected to Judge Stormes' order granting the motion to compel and requested **[**5]** this Court reverse Judge Stormes' order. See Doc. Nos. 81. The parties briefed the issue upon order of the Court. See Doc. Nos. 84, 85, 86, 87.

On May 2, 2017, Plaintiff filed an application seeking an order vacating the briefing schedule and hearing date on the anti-SLAPP motions pending the resolution of Defendant's objections. See Doc. No. 88. The Rady Defendants opposed the application. See Doc. No. 89. This Court granted Plaintiff's application and vacated the briefing schedule and hearing date for Defendants' anti-SLAPP motions. Thereafter, the Court vacated the hearing on Defendants' motion to dismiss and took the motions under submission without oral argument. See Doc. No. 97.

LEGAL STANDARD

The Rady Defendants and Defendant Jaffurs seek dismissal of the FAC pursuant to *Federal Rule of Civil Procedure 12(b)(6)*. *Rule 12(b)(6)* tests the sufficiency of the complaint. *Navarro v. Block, 250 F.3d 729, 732 (9th Cir. 2001)*. Dismissal is warranted under *Rule 12(b)(6)* where the complaint lacks a cognizable legal theory. *Robertson v. Dean Witter Reynolds, Inc., 749 F.2d 530, 534 (9th Cir. 1984)*; see *Neitzke v. Williams, 490 U.S. 319, 326, 109 S. Ct. 1827, 104 L. Ed. 2d 338 (1989)* ("*Rule 12(b)(6)* authorizes a court to dismiss a claim on the basis of a dispositive issue of law."). Alternatively, a complaint may be dismissed where it presents a cognizable legal theory yet fails to plead essential facts under that theory. *Robertson, 749 F.2d at 534*. While a plaintiff need not give "detailed factual **[**6]** allegations," he must plead sufficient facts that, if true, "raise a right to relief above the speculative level." *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 545, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*.

"To survive a motion to dismiss, a complaint must contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Twombly, 550 U.S. at 547*). A claim is facially plausible when the factual allegations permit "the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." Id. In other words, "the non-conclusory 'factual content,' and reasonable inferences from that content, must be **[*1084]** plausibly suggestive of a claim entitling the plaintiff to relief. *Moss v. U.S. Secret Service, 572 F.3d 962, 969 (9th Cir. 2009)*. "Determining whether a complaint states a plausible claim for relief will ... be a context-specific task that requires the reviewing court to draw on its judicial experience and common sense." *Iqbal, 556 U.S. at 679*.

In reviewing a motion to dismiss under *Rule 12(b)(6)*, the court must assume the truth of all factual allegations and must construe all inferences from them in the light most favorable to the nonmoving party. *Thompson v. Davis, 295 F.3d 890, 895 (9th Cir. 2002)*; *Cahill v. Liberty Mut. Ins. Co., 80 F.3d 336, 337-38 (9th Cir. 1996)*. However, legal conclusions need not be taken as true merely because they are cast in the form of factual allegations. *Ileto v. Glock, Inc., 349 F.3d 1191, 1200 (9th Cir. 2003)*; *Western Mining Council v. Watt, 643 F.2d 618, 624 (9th Cir. 1981)*. When ruling on a motion to dismiss, the Court **[**7]** may consider the facts alleged in the complaint, documents attached to the complaint, documents relied upon but not attached to the complaint when authenticity is not contested, and matters of which the Court takes judicial notice. *Lee v. City of Los Angeles, 250 F.3d 668, 688-89 (9th Cir. 2001)*. If a court determines that a complaint fails to state a claim, the court should grant leave to amend unless it determines that the pleading could not possibly be cured by the allegation of other facts. See *Doe v. United States, 58 F.3d 494, 497 (9th Cir. 1995)*.

DISCUSSION

I. Rady Defendants' Motion to Dismiss

Defendants move to dismiss all causes of action asserted against them, namely, the first, second, third, sixth, eighth and ninth claims. Defendants argue (A) the state law causes of action are premature, (B) Plaintiff fails to allege sufficient facts to support a claim for conspiracy in restraint of trade, (C) Plaintiff fails to allege sufficient facts to support a claim for monopoly, (D) the cause of action for bad faith professional review is not viable, (E) Plaintiff fails to allege sufficient facts to support a claim for defamation, (F) Plaintiff fails to allege sufficient facts to support a claim for tortious interference with prospective economic relations, and (G) Plaintiff fails to allege sufficient **[**8]** facts to support a claim for unfair competition.

A. Premature

Doctors must exhaust available administrative remedies and succeed in setting aside the decision denying or withdrawing privileges in a *mandamus* action prior to initiating suit against the hospital and individuals involved in the decision. See *Mir v. Little Co. of Mary Hosp., 844 F.2d 646 (9th Cir. 1988)*; *Westlake Community Hospital v. Superior Court of Los Angeles County, 17 Cal.3d 465, 131 Cal. Rptr. 90, 551 P.2d 410 (1976)*.

Defendants argue Plaintiff's state law causes of action are premature because he failed to exhaust administrative remedies. Defendants contend Plaintiff only alleges his application for privileges has been presumptively denied. They maintain, if the application is ultimately denied, Plaintiff must seek relief through an administrative hearing, and after the administrative process is completed, he must successfully have the decision set aside in a *mandamus* action before bringing a tort action for damages. Because he does not allege any facts to show a final decision was reached or that he complied with the administrative process, they argue, the state law causes of action, bad faith professional review, defamation, tortious interference with prospective economic relations and unfair competition, are premature and must be dismissed.

[*1085] In opposition, Plaintiff contends he is not required **[**9]** to exhaust his administrative remedies because he was not provided a reason for his rejection or an opportunity to respond and, thereby, was denied basic procedural protections to which he was entitled when his application was presumptively denied. Even if he were required to exhaust administrative remedies, Plaintiff argues, he is excused from doing so because any pursuit would be inadequate and futile. He maintains, at the time his opposition was filed, over a year had passed since his application and nine months since it was presumptively denied, and he has received no adequate explanation for the presumptive denial and no opportunity to respond. Any further attempts to exhaust the remedies would, therefore, be futile. Additionally, he maintains pursuit of administrative remedies would result in irreparable harm because complex pediatric craniofacial plastic surgery procedures must be performed regularly for a surgeon to maintain qualifications to perform them, and Defendants' administrative process has harmed the health and safety of patients with longer wait times and higher costs.

In reply, Defendants argue Plaintiff's claims do not fall under any exception to the exhaustion requirement. **[**10]** Defendants contend Plaintiff cannot allege his application was denied because his application is still pending. They maintain the presumptive denial demonstrates the peer review process has begun and he has not been denied a fair procedure. Even if Plaintiff could allege presumptive denial entitled him to relief, he is still required to bring a writ of mandate to challenge the decision. Additionally, Defendants argue the administrative remedies available are not inadequate or futile because he has not received a final disposition and could possibly receive privileges. They also argue he has adequate remedies after a decision is made and he could provide services to children at other hospitals at which he has privileges.

Plaintiff alleges he received a call from the chair of Rady Children's department of surgery, and was told his application for admitting privileges would presumptively be denied and Rady Children's failed to grant him an interview or hearing despite repeated requests. FAC ¶¶ 33, 87, 88, 94. He further alleges he was advised he would be presumptively reported to the California Medical Board if he did not withdraw his application. Id. ¶ 87. Plaintiff did not withdraw his **[**11]** application and, instead, supplemented it in March and July 2016. Id. ¶¶ 90, 91, 93. Defendants contends the peer review process is ongoing and, therefore, Plaintiff has failed to exhaust his administrative remedies, and, can only do so when he receives a denial and is successful in a *mandamus* action. Plaintiff maintains he is not required to exhaust prior to bringing a tort action pursuant to the exception in Westlake. The court in Westlake held that a hospital that denies a doctor privileges without basic procedural protection to which he is entitled can be immediately sued in a tort action. *17 Cal.3d at 478*. Plaintiff's allegations that Defendants denied him a hearing or interview after being informed his application was "presumptively denied" and threats to report him to the Medical Board if he does not withdraw his application demonstrate he was denied basic procedural protections. As such, Plaintiff is not required to exhaust the administrative remedies prior to filing suit. Additionally, the court in Westlake specifically rejected the same argument raised by Defendants here, that, under these circumstances, Plaintiff must still obtain *mandamus* relief prior to filing suit. While the court determined **[**12]** that a doctor must initially succeed in a *mandamus* action when a hospital excludes or **[*1086]** dismisses a doctor pursuant to quasi-judicial proceedings, it found the hospital's conduct in dismissing the doctor without basic procedural protections was not "undertaken pursuant to a quasi-judicial proceeding." Id.

This Court finds Plaintiff's action is not barred for failure to exhaust administrative remedies. As such, Defendants' motion to dismiss the state law claims as premature is denied.

B. Conspiracy in Restraint of Trade

Plaintiff's first claim for relief asserts a violation of *Section 1* of the Sherman Act. *Section 1* prohibits "[e]very contract, combination. . .or conspiracy, in restraint of trade or commerce among the several States, or with foreign nationals." *15 U.S.C. § 1*. To state a claim under *Section 1* of the Sherman Act, a plaintiff must allege "not just ultimate facts but evidentiary facts which, if true, will prove: (1) a contract, combination or conspiracy among two or more persons or distinct business entities; (2) by which the persons or entities intended to harm or restrain trade or commerce among the several States, or with foreign nations; (3) which actually injures competition." *Kendall v. Visa U.S.A., Inc., 518 F.3d 1042, 1047 (9th Cir. 2008)*.

Defendants argue Plaintiff fails **[**13]** to allege a conspiracy in restraint of trade because the FAC does not properly allege a conspiracy or agreement, Plaintiff fails to allege facts to support an unreasonable restraint of trade, they have the unilateral right to deny Plaintiff privileges and Plaintiff fails to state facts to support an antitrust injury.

1. Conspiracy

Defendants argue Plaintiff fails to properly allege a conspiracy because *Section 1* of the Sherman Act requires a contract, combination or conspiracy between two or more legally distinct persons. They maintain the relationships between the Rady Defendants demonstrate they are a single entity, and, thus, legally incapable of concerted action. They further maintain the allegations of the FAC make clear the Rady Defendants acted as agents of each other. Defendants further argue Dr. Gosman cannot conspire with the Rady Defendants because she is an employee of

Rady Children's Specialists of San Diego and an employee cannot conspire with her employer. They also contend the FAC alleges she and the Rady Defendants acted as agents of each other.

Additionally, Defendants argue the FAC contains no allegations that support any specific discussion between Gosman and any other person **[**14]** related to the Rady Defendants, and there are no specific facts supporting the content of the conspiratorial exchanges between Defendants Gosman and Jaffurs.

In opposition, Plaintiff argues he sufficiently alleges a conspiracy. Plaintiff contends the FAC makes clear that each of the Rady entities is a separate and distinct corporate entity and the Rady foundation is Gosman's only employer. Plaintiff further argues the issue of whether the various Rady Defendants are a single entity is fact specific and cannot be decided in a *Rule 12(b)(6)* motion. Even if the Rady Defendants and Gosman cannot conspire among themselves, Plaintiff contends the FAC clearly alleges the conspirators include Jaffurs, who is not affiliated with the Rady Defendants. Plaintiff maintains the FAC contains numerous specific facts creating a reasonable inference that Defendants engaged in a conspiracy to deny him privileges at Rady Children's.

In the FAC, Plaintiff alleges Defendant Jaffurs, the chief of plastic surgery of the CHOC medical staff and an employee of University of California, Irvine ("UCI"), **[*1087]** made false and defamatory statements about Plaintiff to the Rady Defendants and in concert with Gosman, "who was eager to conspire. **[**15]** . .because in 2015 she became the sole pediatric craniofacial plastic surgeon at Rady Children's" and she viewed Plaintiff as a competitive threat. FAC ¶¶ 5, 38, 39. He also alleges Gosman is a surgeon and chief of plastic surgery at Rady Children's Hospital, and chief of the Rady Medical Staff and an employee of Rady Children's Specialists. Id. ¶¶ 40-42. Additionally, Plaintiff alleges Defendant Rady Children's Hospital is a California corporation that grants privileges for the performance of medical services through the Rady Children's Medical Staff, a separate unincorporated association composed of physicians and other healthcare providers whom provide medical services to Rady Children's Hospital; Rady Children's Specialists is an unincorporated medical practice foundation closely affiliated with Rady Children's and UCSD who jointly employ the majority of the physicians who have privileges at Rady Children's Hospital; The Regents is a California corporation that governs the University of California systems and jointly with Rady Children's Specialists employs the majority of physicians who have admitting privileges at Rady Children's Hospital. Id. ¶¶ 11-15, 40. The FAC also alleges **[**16]** "[a]ll of the Rady Children's Defendants acted as the agent of each other. Id. ¶ 43.

Additionally, Plaintiff alleges Defendant Jaffurs "commenced an outrageous and vicious campaign against [Plaintiff]" when Plaintiff sought employment at CHOC, including making false and defamatory statements to multiple persons, telling several physicians Plaintiff refused to accept Hispanic and low-income patients, taunting Plaintiff with hostile emails, attempting to prohibit Plaintiff from seeking patients at outpatient clinics, and entering an operating room several times to harass Plaintiff as Plaintiff was performing surgeries. Id. ¶ 70. The FAC also alleges Jaffurs wrote to Plaintiff telling him Plaintiff was not hired by CHOC at Jaffurs' request. Id. ¶ 72. Further, Plaintiff alleges Jaffurs and Gosman made contact, and combined and conspired to prevent him from obtaining privileges at Rady Children's. Id. ¶ 80. The FAC specifically alleges Gosman improperly shared information contained in Plaintiff's confidential application with Jaffurs including the names of physicians whom Plaintiff listed as references and Jaffurs submitted a letter to Rady Children's that disparaged and attacked those physicians. **[**17]** Id. ¶ 82. The FAC also alleges Gosman used her influence to prevent Plaintiff from receiving fair consideration, and both Gosman and Jaffurs made defamatory statements with the intent to professionally harm Plaintiff and prevent him from obtaining employment and privileges. Id. ¶¶ 83, 84, 85.

While the allegations surrounding the relationships between the various Rady Defendants and Gosman suggest an agency relationship which supports Defendants arguments of a single entity, considering the facts in the light most favorable to Plaintiff, Plaintiff clearly alleges an agreement and conspiracy between Gosman and Jaffurs, two distinct individuals. Accordingly, Plaintiff sufficiently alleges a conspiracy to support his claim for conspiracy in restraint of trade claim.

2. Unreasonable Restraint of Trade

Section 1 of the Sherman Act prohibits agreements that unreasonably restrain trade. *Thurman Industries, Inc. v. Pay 'N Pak Stores, Inc., 875 F.2d 1369, 1373 (9th Cir. 1989)*. Reasonableness is evaluated under either *per se* analysis or the rule of reason. Id. The *per se* rule applies to a practice that "facially appears to be one that would always or almost always tend to restrict competition and **[*1088]** decrease output." *National Collegiate Athletic Association v. Board of Regents of Univ. of Oklahoma, 468 U.S. 85, 100, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (1984)*. Restraint is presumed unreasonable for practices **[**18]** subject to the *per se* rule. Id. Other practices are subject to a rule of reason analysis which requires injury to competition in the relevant market. *Alliance Shippers, Inc. v. Southern Pacific Trasp. Co., 858 F.2d 567, 570 (9th Cir. 1988)*.

Defendants contend there is no plainly anti-competitive agreement restraining trade here, so Plaintiff is required, under the rule of reason, to demonstrate anti-competitive harms of the alleged agreement do not outweigh the pro-competitive benefits. Defendant maintains Plaintiff attempts to circumvent this burden by alleging Defendants engaged in a conspiracy to exclude him from Rady Children's Hospital. Even if a conspiracy existed, they argue, it does not restrain trade and Plaintiff's narrow identification of competition and conclusory allegations of wait times and costs leave out other competitive markets in Southern California. They contend Plaintiff fails to allege any agreement that would restrain trade of pediatric craniofacial plastic surgery in Southern California.

Citing *Summit Health, Ltd v. Pinhas, 500 U.S. 322, 111 S. Ct. 1842, 114 L. Ed. 2d 366 (1991)*, Plaintiff maintains a conspiracy to exclude a physician from a hospital through misuse of the peer review process is an illegal agreement in restraint of trade. Plaintiff further contends the definition of the relevant market is a question of fact that should **[**19]** not be decided in a 12(b)(6) motion. Plaintiff contends the geographic market defined in the FAC, which spans two large Counties is not facially unsustainable, particularly when the Ninth Circuit has recognized far smaller relevant geographic markets.

To the extent Plaintiff asserts Summit Health holds the misuse of the peer process is subject to the *per se* rule, the Court disagrees. The Court in *Summit Health* addressed whether a claim alleging a conspiracy among members of a peer review committee to abuse the process and deny the plaintiff access to the relevant market has a sufficient nexus to interstate commerce to support federal jurisdiction. *500 U.S. at 333*. Plaintiff's allegations do not suggest Defendants engaged in "manifestly anticompetive" conduct to support a *per se* analysis. *Leegin Creative Leather Products, Inc. v. PSKS, Inc., 551 U.S. 877, 886, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007)*. As such, the rule of reason analysis is appropriate and requires Plaintiff to allege the "relevant market." See *Newcal Industrics, Inc. v. Ikon Office Solution, 513 F.3d 1038, 1044 (9th Cir. 2008)*. The "relevant market" need not be alleged with specificity and will survive a 12(b)(6) motion to dismiss unless it is facially unsustainable. *Id. at 1045*.

In the FAC, Plaintiff alleges the anti-competitive conduct has harmed patients in the relevant market and the plastic surgery department at Rady Children's Hospital **[**20]** is among the worse for patient wait times. FAC ¶ 8, 29. He further alleges presumptively denying him privileges wrongly deprives children, babies and their families of physician choice and also prolongs their waits in San Diego and Imperial Counties. Id. Additionally, he asserts Defendants conspired to deny him entry into the market for pediatric craniofacial plastic surgery services in San Diego and Imperial Counties, and, are preventing highly complex pediatric craniofacial plastic surgery from being available to all children in San Diego and Imperial Counties. Id. ¶¶ 100, 102. He alleges his skills and techniques could reduce postoperative stays, and thereby reduce medical costs. Id. ¶ 101.

[*1089] The Court finds no facial or other defect in Plaintiff's relevant market. Therefore, the FAC's allegations surrounding the relevant market survives the motion to dismiss.

3. Unilateral Right to Deny Plaintiff Privileges

Citing Leegin, Defendants argue they have the unilateral right to decide with whom to do business, and the terms and conditions of its business arrangements without violating *Section 1*.

In opposition, Plaintiff argues Defendants do not have a right to unilaterally deny him privileges. He contends **[**21]** the case cited by Defendants involved retail pricing policies by manufacturers for their retailers. Relying on *Sadeghi*

v. Sharp Memorial Medical Center Chula Vista, 221 Cal.App.4th 598, 164 Cal. Rptr. 3d 420 (2013), Plaintiff maintains the peer review process for physicians seeking admitting privileges exists to protect the health and welfare of the people of California and competent practitioners from being barred for arbitrary or discriminatory reasons, and the unwarranted denial of privileges denies a physician a property interest connected to his livelihood.

The only case cited by Defendants in support of their contention addresses manufacturer's ability to set suggested resale prices and to refuse to deal with retailers that do not follow those prices. They cite to no case suggesting a plaintiff may not assert a claim against a defendant for the allegedly arbitrary denial of privileges that results in a restraint of trade. Accordingly, Defendant's motion to dismiss based upon its unilateral power to deny privileges is denied.

4. Antitrust Injury

To state a claim under *section 1* of the Sherman Act, a plaintiff must allege facts showing he was "harmed by the defendant's anti-competitive contract, combination or conspiracy, and that this harm flowed from an 'anti-competitive aspect of the practice **[**22]** under scrutiny.'" *Brantley v. NBC Universal, Inc., 675 F.3d 1192, 1197 (9th Cir. 2012)* (quoting *Atlantic Richfield Company v. USA Petroleum Co., 495 U.S. 328, 334, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)*.

Defendants contend because Plaintiff fails to plead sufficient facts to support a plausible claim under *Section 1*, none of Plaintiff's alleged injuries flow from *Section 1*.

Plaintiff argues the facts in the FAC sufficiently demonstrate an antirust injury. He maintains he alleges Defendants' unlawful conduct caused him to be denied procedurally fair consideration of his application for admitting privileges, thus causing him to be restrained from practicing his medical specialty anywhere in San Diego or Imperial Counties. Additionally, Plaintiff maintains he also alleges Defendants' exclusionary conduct resulted in longer patient wait times and higher costs, and prevented certain "highly complex pediatric craniofacial surgery procedures from being available at all" in San Diego and Imperial Counties because Plaintiff is an expert in certain procedures that Gosman does not perform. Pla's Opp. at 13 (citing FAC ¶ 102).

In reply, Defendants argue Plaintiff presents no facts to support his own injury let alone an injury to competition. They contend he cites no case law to support the position that staffing decisions affecting a single hospital can result in antitrust injury. Instead, they contend **[**23]** Plaintiff merely states excluding him from the market has prevented highly complex pediatric craniofacial surgery procedures from being available at all and Defendants' conduct has resulted in longer patient wait times and higher costs. They maintain the allegations **[*1090]** are conclusory, and only opinions of Plaintiff. They further maintain the allegations are based upon Plaintiff's incorrect description of the relevant market. Defendants further argue the FAC contains no allegations that other competing hospitals in the alleged geographic market have been prevented from establishing facilities to serve patients.

In the FAC, Plaintiff alleges Defendants Jaffurs and Gosman conspired to prevent him from obtaining privileges to suppress competition to Gosman's professional and economic benefit. FAC ¶ 96. He further alleges the Rady Defendants agreed to support Defendant Gosman because the revenue Defendant Gosman would otherwise generate for them would be diverted to Plaintiff if he were granted privileges. Id. ¶ 97. He further alleges, as a result of the conspiracy, "the public has been deprived of free and open competition in pediatric craniofacial plastic surgery services at Rady Children's **[**24]** and in San Diego and Imperial Counties, and there are longer patient wait times and longer postoperative patient hospital stays and higher payer costs. Id. ¶¶ 100, 101. Plaintiff also alleges his skills and techniques as a pediatric craniofacial plastic surgeon could potentially reduce post-operative length of hospital stays, resulting in reduced medical costs. Id. ¶ 102. Additionally, Plaintiff alleges the conspiracy prevents highly complex pediatric craniofacial plastic surgery procedures from being available to all children of San Diego and Imperial Counties. Id. ¶ 102.

Contrary to Defendants' contention, Plaintiff does more than merely recite bare legal conclusions. He includes factual allegations demonstrating injury to competition sufficient to "raise a reasonable expectation that discovery will reveal evidence of an injury to competition." *Brantley, 675 F.3d at 1198* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. at 556*). Plaintiff sufficiently alleges antitrust injury.

C. Monopoly

Plaintiff seeks relief for violation of *Section 2* of the Sherman Act in his second claim for relief. To state a claim for monopolization in violation of *Section 2* of the Sherman Act, a plaintiff must allege facts showing the defendants "(1) possessed monopoly power in the relevant market, **[**25]** (2) willfully acquired or maintained that power through exclusionary conduct and (3) caused antitrust injury." *MetroNet Services Corp. v. Quest Corp., 383 F.3d 1124, 1130 (9th Cir. 2004)*.

Defendants argue Plaintiff fails to state a claim for monopolization because he fails to allege a relevant market, monopoly power, exclusionary conduct and facts to support antitrust injury.

1. Relevant Market

Claims under *Section 2* of the Sherman Act require a definition of the relevant market. *Thurman Industries, Inc. v. Pay'N Pak Stores, Inc., 875 F.2d 1369, 1373 (9th Cir. 1989)*. Failure to identify a relevant market is a proper ground for dismissing a Sherman Act claim. *Tanaka v. University of Southern California, 252 F.3d 1059, 1063 (9th Cir. 2001)*. "The term 'relevant market' encompasses notions of geography as well as product use, quality, and description." *Ortiz v. S. Peter's Community Hosp., 861 F.2d 1440, 1446 (9th Cir. 1988)* (Citing *Moore v. James H. Matthews & Co., 550 F.2d 1207, 1218 (9th Cir. 1977))*. Determination of the relevant market is generally a factual inquiry. Id. However, a claim may be dismissed if the relevant market definition is facially unsustainable. *Newcal, 513 F.3d at 1045*.

Defendants contend Plaintiff identifies the relevant product/service market as pediatric plastic and craniofacial surgery, and **[*1091]** identifies the relevant geographic market as San Diego and Imperial counties. Assuming the relevant product/service market is appropriate, Defendants argue Plaintiff fails to allege a relevant geographic market. Specifically, Defendants argue Plaintiff does not plead any facts to support **[**26]** the conclusion that San Diego and Imperial Counties are the only areas where buyers of pediatric plastic and craniofacial surgery would travel to obtain such specialized services. They maintain nothing in the FAC supports the notion that Los Angeles County, Orange County, Riverside County and San Bernardino County should not be included in the geographic market.

Plaintiff maintains the question of the relevant geographic market does not turn on whether a patient would either obtain the surgery in San Diego and Imperial Counties or go without, as suggested by Defendants, but whether patients in San Diego and Imperial Counties would tolerate a small but significant nontransitory increase in price by the Rady pediatric craniofacial plastic surgery group. Plaintiff maintains this is a question of fact that implicates complicated issues of insurance coverage and in-network benefits versus out-of-network benefits, and cannot be resolved at the pleading stage. He contends the question before the Court is whether a geographic market of San Diego and Imperial Counties is "facially" sustainable, and argues the relevant market defined in the FAC clears this low threshold.

Plaintiff defines the **[**27]** relevant market as pediatric and craniofacial surgery medical services in San Diego and Imperial Counties. FAC ¶¶ 110, 113. For purposes of the motion to dismiss, Defendants do not challenge the product market. They argue Plaintiff fails to plead facts to support the identified geographic market. "The relevant geographic market is the 'area of effective competition' defined in terms of where buyers can turn for alternative sources of supply." *Moore, 550 F.2d at 1218*. It must "correspond to the commercial realities of the industry and be economically significant" and may be limited to a single metropolitan area. *Brown Shoe Co. v. United States, 370 U.S. 294, 366, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)*. These determinations are factual in nature and are better tested by a summary judgment motion or at trial. *Newcal, 513 F.3d at 1045*. At this stage, the Court need only determine whether the market is facially sustainable. The Court finds no fatal legal defect in Plaintiff's alleged market of San Diego and Imperial Counties.

2. Monopoly Power

Defendants argue Plaintiff suggests the Rady Defendants have 100% of the market power by artificially narrowing the geographic market. They further argue the FAC is silent as to any barriers to entry erected by the Rady Defendants to prevent the practice of pediatric plastic and craniofacial **[**28]** surgery throughout San Diego and Imperial Counties.

Plaintiff contends, pursuant to the direction of Newcal, the Court should look to the geographic market actually alleged in the FAC for purposes of a 12(b)(6) motion. He argues Defendants do not dispute their monopoly power in the geographic market as defined in the FAC. Plaintiff also alleges the practice of pediatric craniofacial plastic surgery is viable only for medical facilities dedicated to pediatric patients and Rady Children's is the only hospital serving San Diego and Imperial Counties that offers the practice environment necessary for pediatric craniofacial plastic surgery. Additionally, he maintains, all three major hospital systems in San Diego refer all pediatric craniofacial plastic surgery candidates to Rady Children's.

[*1092] Monopoly power is "the power to control prices or exclude competition." *United States v. Grinnell Corp., 384 U.S. 563, 571, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)* (quoting *United States v. E. I. Du Pont de Nemours & Co., 351 U.S. 377, 399, 76 S. Ct. 994, 100 L. Ed. 1264 (1956))*. Defendants' challenge to Plaintiff's allegations of monopoly power are based upon their argument that the alleged geographic market is improper. As discussed above, Plaintiff's identified market is facially sustainable, and Plaintiff clearly alleges Defendants have 100% of the market within San Diego and Imperial counties. **[**29]** Accordingly, Plaintiff sufficiently alleges monopoly power to state a claim for monopolization.

3. Exclusionary Conduct

"Anticompetitive conduct is behavior that lends to impair the opportunities of rivals and either does not further competition on the merits or does so in an unnecessarily restrictive way." *Cascade Health Solutions v. PeaceHealth, 515 F.3d 883, 894 (9th Cir. 2008)*.

Defendants contend Plaintiff appears to allege Defendants used a conspiracy as the exclusionary device to monopolize the relevant market. Defendants maintain the conspiracy theory fails for many of the same reasons it argues the conspiracy claim fails under *Section 1* including: (1) the Rady Defendants are part of a single entity, incapable of conspiring with one another under antitrust laws; (2) Dr. Gosman was an employee and/or agent of the Rady Defendants, and therefore, cannot conspire with the Rady Defendants for antitrust purposes; and (3) there are no factual allegations to support any conspiratorial communications between Dr. Gosman and the Rady Defendants. Defendants also maintain Plaintiff alleges different participants for the conspiracy of the *Section 2* claim and Defendant Jaffurs had no involvement in the *Section 2* claim. Defendants argue this difference calls into question the plausibility of **[**30]** both conspiracy theories.

Plaintiff argues the FAC contains numerous factual allegations that, taken as true, sufficiently allege a conspiracy among Jaffurs, Gosman, and the Rady defendants to deny Plaintiff procedurally fair consideration of his application for privileges at Rady Children's and alleges that Gosman and the Rady defendants acted with the specific intent to monopolize, and sets forth their economic rationale for doing so. Plaintiff further argues Defendants misread the FAC and/or misapprehend the Sherman Act. He maintains he alleges a single conspiracy among all Defendants who assisted with Defendants Jaffurs' and Gosman's coordinated efforts to have his application for privileges denied. He contends all Defendants are included in the first claim for relief because *Section 1* of the Sherman Act prohibits restraint of trade. Additionally, he contends the second claim for relief details how Gosman and the Rady defendants conspired to maintain their monopoly on pediatric craniofacial plastic surgery in the relevant market. He maintains Defendant Jaffurs is not named in that claim because, athough he is one of the primary actors behind the conspiracy, he is not the monopolist. Plaintiff **[**31]** argues the first and second claims do not allege two separate and independent conspiracies, but rather set forth separate causes of action arising from the same conspiracy.

A review of the FAC supports Plaintiffs contention that he seeks two separate causes of action, restraint of trade and monopoly, against different defendants based upon the same conspiracy. As discussed above in section I.B.1., Plaintiff sufficiently alleges a conspiracy amongst the various defendants.

[*1093] 4. Antitrust Injury

Defendants contend Plaintiff has not alleged any facts to show consumer welfare has been harmed. Additionally, they contend, Plaintiff fails to plead facts supporting a plausible claim under *Section 2* and, therefore, none of his alleged injuries flow directly from that provision of the antitrust laws. Thus, Defendants argue, Plaintiff has not suffered antitrust injury under *Section 2* and the second claim for relief must be dismissed.

Plaintiff maintains he alleges Defendants' exclusionary conduct prevents certain highly complex pediatric craniofacial surgery procedures from being available at all in San Diego and Imperial Counties because he is an expert in certain procedures that Gosman does not perform, and their **[**32]** exclusionary conduct has resulted in longer patient wait times and higher costs. Taken as true, he argues, these factual allegations show harm to competition.

In reply, Defendants argue Plaintiff's mere frustration to gain access to a hospital does not amount to an antitrust injury. Defendants also argue Plaintiff's allegations of longer patient wait times and higher costs are nothing more than conclusory allegations without any factual support and are based on Plaintiff's incorrect description of the relevant market.

As discussed in section I.B.4. above, Plaintiff's factual allegations sufficiently plead antitrust injury.

D. Bad Faith Professional Review

Defendants seek dismissal of Plaintiff's claim for the alleged violation of *California Business & Professions Code 809.05* arguing there is no separate right for civil remedies. They further contend, even if a viable cause of action did exist, any attempt to invoke this section is premature because Plaintiff only alleges his privileges have presumptively been denied.

Plaintiff argues Defendants provide no authority for their contention that a physician cannot bring a civil claim to enforce rights included in *section 809*. Plaintiff contends *section 809* expressly recognizes that physicians are harmed by **[**33]** peer review that is not conducted fairly, and provides the right to a review process that is not arbitrary or capricious and a specific procedure to safeguard the rights of physicians. He maintains the legislation provides for administrative remedies but does not provide a means to enforce the rights contained therein. Citing *Jacobellis v. State Farm Fire & Cas. Co., 120 F.3d 171, (9th Cir. 1997)*, he argues, a private right of action may be implied because it is needed to protect the purpose and assure the effectiveness of *section 809*. Plaintiff contends he alleges sufficient facts to support a claim for relief for violation of *section 809*.

In reply, Defendants argue Plaintiff misrepresents Jacobellis and the Restatement test to artificially create an implied private right of action. They contend there is no support for a private right of action under *section 809*, and plaintiff has provided no authority to show otherwise. They also contend the legislative history confirms the intent of the statute was to provide minimum statutory procedural rights and protections to physicians subject to adverse action in a peer review system.

In Jacobellis, the Ninth Circuit found that "California courts have implied a private right of action where such a right was necessary to enforce a statute that **[**34]** was intended to protect the aggrieved party." *120 F.3d at 174* (citing *Faria v. San Jacinto United School Dist., 50 Cal.App.4th 1939, 59 Cal. Rptr. 2d 72 (1996)*. The court determined that the Restatement test for deciding whether a private right of action could be implied is useful in cases where the statute evidences a legislative intent to **[*1094]** provide a right to a class of persons and "in the absence of the concerns avoided by the *Moradi-Shalal* court." *Id. at 175*. According to the court, the California Supreme Court in *Moradi-Shalal v. Fireman's Fund Ins. Cos., 46 Cal.3d 287, 250 Cal. Rptr. 116, 758 P.2d 58 (1988)*, looked to the text of the statute, legislative analyst and counsel reports, alternative methods of enforcement, adverse consequences of implying a private cause of action and analytical difficulties defining the scope of the cause of action when finding the statute provided no private right of action. *Id. at 174*. In determining the Earthquake Insurance Act had a private cause of action in Jacobellis, the Ninth Circuit noted that the Earthquake Insurance Act differed from the statute addressed in Moradi-Shalal, the Unfair Practices Act, in that the text of the Unfair Practices Act provided for administrative enforcement while the Earthquake Insurance Act did not provide any administrative remedies. See Id.

Section 809 is the statutory scheme providing a peer review system to preserve high standards for **[**35]** the practice of medicine. *Cal. Bus. & Prof. Code § 809(a)(2)-(3)*. It recognizes "[p]eer review that is not conducted fairly results in harm to both patients and healing arts practitioners by limiting access to care" and defines the minimum due process requirements of the process. *§ 809(a)(4)*; *Unnamed Physician v Board of Trustees of Saint Agnes Medical Center, 93 Cal.App.4th 607, 622, 113 Cal. Rptr. 2d 309 (2001)*. The legislation provides administrative remedies. Accordingly, a private right of action is not necessary to enforce the statute. Looking to the guidance provided by the Ninth Circuit in *Jacobellis*, the Court finds no implied private right of action in *section 809*.

E. Defamation

Defendants argue plaintiff's allegations supporting his claim for defamation are devoid of the requisite specificity and are privileged.

1. Specificity

To state a claim for defamation, a plaintiff must allege "intentional publication of a statement of fact that is false, unprivileged, and has natural tendency to injure or which causes special damage." *Smith v. Maldonado, 72 Cal. App. 4th 637, 645, 85 Cal. Rptr. 2d 397 (1999)*. "Publication means communication to some third person who understands the defamatory meaning of the statement and its application to the person to whom reference is made." Id.

Defendants argue Plaintiff alleges Defendants forwarded, conveyed, or repeated Defendant Jaffurs' false and defamatory statements but fails to identify which **[**36]** of Jaffurs' statements were forwarded, conveyed, or repeated, which Defendant allegedly made the statements, to whom these statements were made, when these statements were made, and the context of the statements. Thus, they argue, the allegations lack the specificity required to support a defamation cause of action.

Plaintiff argues Defendants contention that he must plead defamation with a high degree of specificity is wrong. He maintains a plaintiff need only allege the substance of the defamatory statement. He further maintains he alleges both libel and slander with sufficient specificity. He contends he identifies the alleged statement, a publication, and defamatory meaning and that each Defendant repeated the statements to others. Plaintiff also maintains he need not identify the specific third person to whom the allegedly defamatory statement was directed and he sufficiently alleges Defendants' wrongful conduct began in approximately July 2015, and continued at least into early 2016.

[*1095] In reply, Defendants argue Plaintiff fails to identify which false statements were repeated by Defendants and to whom the statements were repeated. They contend he alleges no facts showing they were **[**37]** responsible for any publication to other healthcare providers.

The FAC contains numerous conclusory allegations that Dr. Jaffurs made false oral and written statements to Defendant Gosman and other Rady Defendants "relating to [Plaintiff's] profession, to [Plaintiff's] detriment" which he maintains constitute libel and slander *per se*. FAC ¶¶ 153-157, 160-161. However, Plaintiff also alleges Defendant Jaffurs made false written statements to Defendant Gosman relating to Plaintiff's profession, including that Plaintiff "is not fit to operate on children." Id. ¶ 152. He further alleges Defendants "forwarded, conveyed, or repeated" Jaffur's allegedly false and defamatory statements to others and knew the statements were false and failed to take reasonable care to determine the truth or falsity of the statements. Id. ¶¶ 162, 163.

While libel requires pleading the exact words, slander may be alleged by asserting the substance of the defamatory statement. *Okun v. Superior Court, 29 Cal.3d 442, 458, 175 Cal. Rptr. 157, 629 P.2d 1369 (1981)*. The alleged defamatory statement that Plaintiff was not fit to operate on children is sufficiently specific to state a claim. Plaintiff also alleges Defendant Jaffurs, in concert with Defendant Gosman, made defamatory statements from October **[**38]** 2015 through January 2016. FAC ¶ 84. He further alleges, Defendants Jaffurs and Gosman conspired to spread false information to various physicians. Id. ¶ 85. While Plaintiff fails to allege specifics as to the time and the third parties to whom Defendants repeated the statements, he provides a timeframe and alleges the statements were repeated to other physicians. "Less particularity is required when it appears that defendant has superior knowledge of the facts, so long as the pleading gives notice of the issues sufficient to enable preparation of a defense." *Okun, 29 Cal.3d at 458*. Plaintiff's allegations give sufficient notice of the claim for slander to permit the Rady Defendants to prepare a defense. Plaintiff, however, fails to sufficiently allege libel against the Rady Defendants. As such, the motion is granted as to Plaintiff's claims for libel and denied as to his claims for slander.

2. Privilege

Defendants argue the statements are privileged under *California Civil Code section 47(b)*. *43.8* and *47(c)*.

a. *Section 47(b)*

According to *section 47(b)*, a publication or broadcast made "[i]n any (1) legislative proceedings, (2) judicial proceedings, (3) in any other official proceeding authorized by law, or (4) in the initiation or course of any other proceedings authorized **[**39]** by law and reviewable pursuant to Chapter 2 (commencing with *Section 1084*) of Title 1 of Part 3 of the Code of Civil Procedure" is privileged. "[T]he privilege applies to any communication (1) made in judicial or quasi-judicial proceedings; (2) by litigants or other participants authorized by law; (3) to achieve the objects of the litigation; and (4) that have some connection or logical relations to the action." *Silberg v. Anderson, 50 Cal.3d 205, 212, 266 Cal. Rptr. 638, 786 P.2d 365 (1990)*.

Defendants argue the alleged statements are privileged under *California Civil Code section 47(b)* because the California legislature has accorded hospital peer review decisions a status comparable to that of quasi-judicial public agencies whose decisions likewise are reviewable by administrative mandate. They contend the entirety **[*1096]** of Plaintiff's lawsuit involves the alleged presumptive denial of privileges at Rady Children's, and therefore, any alleged statements were made as part of the peer review process used to evaluate Plaintiff's application for privileges. They maintain this peer review process must be considered a judicial proceeding, and therefore, any alleged defamatory statements by Defendant Gosman or anyone representing the Rady Defendants during the evaluation of Plaintiff's application for privileges are absolutely **[**40]** privileged under *section 47(b)*.

Plaintiff argues, as a threshold matter, determining whether a defendant is entitled to immunity under *Section 47(b)* is generally a question of fact. He further argues, even if the Court considers Defendants' fact-based argument now, Defendants are not entitled to immunity under *Section 47(b)*, because defendants have not engaged in the kind of quasi-judicial proceeding that courts have recognized as subject to *Section 47(b)*, and because Gosman's statements were not made in connection with a legitimate peer review process. Plaintiff maintains there was no administrative hearing, much less one conducted in a manner similar to a judicial proceeding, including notice, informal pleading and hearing. Instead, he maintains his application was "screened out." Pla's Opp. at 19. He argues Defendants' cursory screening out of his application, without any legitimate peer review, is not protected activity. He further argues, even if Defendants' conduct could be considered a quasi-judicial process subject to *section 47(b)*, Gosman's unlawful conduct was not entirely related to or connected with that process. He maintains Defendant Gosman's conduct preceded any colorable peer review by several months.

In reply, Defendants argue Plaintiff too narrowly **[**41]** limits the scope and purpose of the litigation privilege. They maintain *section 47(b)* applies to statements made in the course of, and preparatory to, official proceedings authorized by law. Defendants contend Plaintiff's email inquiring about employment and privileges at Rady Children's, alone, effectively triggers the start of the peer review process. They argue the allegedly defamatory statements are absolutely protected by the litigation privilege of *section 47(b)*, because they were made in connection with an official proceeding that started when Plaintiff emailed Gosman in July 2015.

As discussed above, Plaintiff's allegations demonstrate there have been no quasi-judicial proceedings. It is clear the privilege is not limited to statements made during judicial or quasi-judicial proceedings, and "may extend to steps taken prior thereto, or afterwards." *Rusheen v. Cohen, 37 Cal.4th 1048, 1057, 39 Cal. Rptr. 3d 516, 128 P.3d 713 (2006)*. However, "[a] prelitigation communication is privileged only when it relates to litigation that is contemplated in good faith and under serious consideration." *Action Apartment Association, Inc. v. City of Santa Monica, 41 Cal.4th 1232, 1251, 63 Cal. Rptr. 3d 398, 163 P.3d 89 (2007)*. Plaintiff's allegations support the inference his application was "screened out."

The determination of whether the statements were made to achieve the objects of the quasi-judicial proceedings and **[**42]** have a logical relation to the action is a question of fact not suitable for disposition on a motion to dismiss.

b. *Sections 43.8* and *47(c)*

Section 43.8 provides immunity for communications made "to aid in the evaluation of the qualifications, fitness, character, or insurability of a practitioner of the healing or veterinary arts." The privilege is qualified and "may be defeated by proof that the person or entity asserting **[*1097]** the privilege, when it made the communication, knew the information was false or otherwise lacked a good faith intent to assist in the medical practitioner's evaluation." *Hassan v. Mercy American River Hosp., 31 Cal.4th 709, 724, 3 Cal. Rptr. 3d 623, 74 P.3d 726 (2003)*.

Under *section 47(c)*, "a communication, without malice, to a person interested therein, (1) by one who is also interested, or (2) by one who stands in such a relation to the person interested as to afford a reasonable ground for supposing the motive for the communication to be innocent, or (3) who is requested by the person interested to give the information" is privileged.

Defendants argue the statements are privileged under *California Civil Code section 43.8*, because the statements directly concern Plaintiff's qualification for his application for privileges at Rady Children's. They contend Plaintiff has not and cannot show they lacked a good faith intent to aid in Plaintiff's **[**43]** evaluation. Additionally, they contend the allegation that Plaintiff received a call from Dr. Carvalho who told Plaintiff his application was being presumptively denied shows the Rady Defendants and Defendant Gosman were in the process of reviewing Plaintiff's application, and, thus, the alleged defamatory statements fall within the protections of *section 43.8*.

Defendants also argue the alleged statements are privileged under *California Civil Code section 47(c)* because the statements were made in the interest of the operation of Rady Children's. Defendants maintain the Rady Defendants and Defendant Gosman, as the Chief of Plastic Surgery at Rady Children's, have a common interest in Plaintiff's application for privileges as a craniofacial plastic surgeon at Rady Children's. Additionally, they contend Plaintiff failed to plead any facts alleging they acted with malice. Instead, they maintain, Plaintiff merely speculates Defendants acted with malice, and, they argue, Plaintiff's conclusory speculation is not supported by any facts. They maintain, if they did make or repeat a statement regarding Plaintiff's job performance with a former employer, it would fall squarely within the scope of common interest under *section 47(c)*.

Plaintiff argues Defendants **[**44]** are not immune under *section 43.8* and *47(c)* because Defendants' statements were not intended to aid in his evaluation and were made with malice. He maintains *section 43.8* provides no immunity if the person asserting the privilege lacked a good faith intent to assist in the evaluation. Plaintiff asserts he extensively pleads Defendants' true intent by alleging Defendant Jaffurs harbored malice toward Plaintiff and viewed Plaintiff as an economic threat to his pediatric plastic and craniofacial surgery practice in Orange County, and Defendant Gosman viewed Plaintiff's arrival as a competitive threat to her status as the sole practicing pediatric craniofacial plastic surgeon at Rady Children's. Thus, he argues, in making the defamatory statements alleged, neither Jaffurs nor Gosman acted with the subjective purpose or goal to assist in Plaintiff's evaluation. Rather, he maintains. Defendant Gosman acted with the purpose of denying him fair consideration of his application for admitting privileges at Rady Children's, and preserving her position as the sole pediatric craniofacial plastic surgeon at Rady Children's. Additionally, the other Rady Defendants similarly acted with the purpose of preventing Plaintiff from **[**45]** obtaining privileges at Rady Children's, to further their economic incentive to exclude physicians who are not employed by the Rady Foundation. Thus, he argues, no defendant acted with the purpose protected by *section 43.8*.

Plaintiff further maintains *sections 43.8* and *47(c)* provide only qualified immunities. **[*1098]** He contends Defendants are not entitled to immunity under either *section 43.8* or *47(c)*, because they acted with malice, and without reasonable grounds for belief in the truth of their statements. Plaintiff maintains he alleges all Defendants, including the Rady defendants, knew the statements were false, and the evidence available to them proved the statements were false, and he specifically alleges the Rady defendants failed to take reasonable care to determine the truth or falsity of the statements at issue, as they did not contact Plaintiff or the numerous physicians who sent letters to Rady Children's refuting Defendant Jaffurs' statements and offering support to Plaintiff's application for admitting privileges. He argues Defendants' defamatory and anti-competitive purposes, combined with their deliberate falsehoods and false statements made without reasonable grounds to believe them true, take their conduct outside the **[**46]** scope of the qualified protections otherwise provided by *sections 43.8* and *47(c)*.

In reply, Defendants argue the alleged statements are privileged because they were made in order to evaluate Plaintiff for staff privileges and Defendants would have a strong interest in receiving such information. They further argue there is nothing in the FAC setting forth facts that the alleged statements were motivated by hatred or ill will towards Plaintiff.

In the FAC, Plaintiff alleges

> Defendants knew the statements to be false, and the evidence available to defendants proved the statements false. Defendants Dr. Gosman, Rady Children's, Rady Foundation, UCSD and Rady Children's Medical Staff failed to take reasonable care to determine the truth or falsity of the statements, as they did not, for example, contact Dr. Toranto or the numerous physicians who sent letters to Rady Children's refuting Dr. Jaffur's statements and offering unconditional support to Dr. Toranto's application for admitting privileges.

FAC ¶ 163.

Plaintiff also alleges Defendant Gosman viewed Plaintiff as a competitive threat to her status as the sole practicing pediatric craniofacial plastic surgeon at Rady Children's and was motivated by her desire **[**47]** to suppress competition in her local market to her benefit. Id. ¶¶ 5, 96, 116. Assuming the truth of Plaintiff's allegations, Defendants knew the statements were false or lacked the intent to assist in the evaluation, and acted with malice. Accordingly, the statements are not privileged under *sections 43.8* or *47(c)*.

F. Tortious Interference with Prospective Economic Relations

To state a claim for tortious interference with prospective economic advantage, Plaintiff must allege

> (1) an economic relationship between the plaintiff and some third party, with the probability of future economic benefit to the plaintiff; (2) the defendant's knowledge of the relationship; (3) intentional acts on the part of the defendant designed to disrupt the relationship; (4) actual disruption of the relationship; and (5) economic harm to the plaintiff proximately caused by the acts of the defendant.

Korea Supply Co. v. Lockheed Martin Corp., 29 Cal.4th 1134, 1153, 131 Cal. Rptr. 2d 29, 63 P.3d 937 (2003) (quoting *Westside Center Associates v. Safeway Stores 23, Inc., 42 Cal.App.4th 507, 521-22, 49 Cal. Rptr. 2d 793 (1996))*.

Defendants argue Plaintiff fails to state a claim for tortious interference with prospective economic relations because Plaintiff did not have a known economic relationship with an identifiable third party, and the Rady Defendants did not engage in any intentional acts designed to disrupt the relationship. Specifically, **[**48]** they argue **[*1099]** Plaintiff makes conclusory allegations that an economic relationship was established between Plaintiff and the Rady Defendants or Plaintiff and Dr. Gosman based on speculation. They maintain Plaintiff's allegation that Defendant Gosman's response to his email that there was enough craniofacial coverage at Rady Children's regarding his interest in potentially relocating to San Diego shows that a relationship was not established or intended to be established between Plaintiff and Dr. Gosman or the Rady Defendants. They further maintain Defendant Gosman as an alleged employee or agent of the Rady Defendants, represents the interests of the Rady Defendants and it is nonsensical that the Rady Defendants can engage in an action to disrupt an economic relationship with itself.

Defendants also argue Plaintiff fails to sufficiently allege defamatory statements to support an intentional wrongful act, and without an underlying independent wrongful act this cause of action fails.

Plaintiff fails to address these arguments.

In the FAC, Plaintiff asserts a relationship with Rady Children's that "was likely to have resulted in economic benefit to [Plaintiff]." FAC ¶ 193. However, the other **[**49]** allegations of the FAC contradict the existence of such a relationship. Furthermore, given the allegations that the Rady Defendants were agents of each other, Plaintiff's allegations suggest Defendants interfered with a relationship with itself. Accordingly, Plaintiff fails to allege a relationship with a third party that the Rady Defendants disrupted. The motion is granted as to this claim.

G. Unfair Competition Business and Professions Code *Section 17200* Claim

"The UCL prohibits, and provides civil remedies for, unfair competition, which it defines as 'any unlawful, unfair or fraudulent business act or practice and unfair, deceptive, untrue or misleading advertising.'" *Kwikset Corp. v. Superior Court, 51 Cal.4th 310, 320, 120 Cal. Rptr. 3d 741, 246 P.3d 877 (2011)* (quoting *Cal. Bus. & Prof. Code § 17200*). To state a claim under the "fraudulent" prong, a plaintiff must allege "members of the public are likely to be deceived" by the defendant's business practice. *Schnall v. Hertz Corp., 78 Cal.App.4th 1144, 1167, 93 Cal. Rptr. 2d 439 (2000)*. The "unlawful" prong "borrows" violations of other laws and makes them independently actionable under the UCL. *Cel-Tech Commc'ns, Inc. v. Los Angeles Cellular Telephone Co., 20 Cal.4th 163, 180, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999)*. An "unfair" business practice is one that "threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws, or otherwise significantly threatens or harms competition." *Id. at 187*.

Defendants argue Plaintiff fails to **[**50]** allege an unlawful, unfair or fraudulent business practice because the alleged violations involve one individual, and does not include any violations affecting anyone other than Plaintiff. Therefore, they argue, Plaintiff fails to allege a business practice that amounts to unfair competition under the UCL. They further argue without a claim upon which to base the UCL claim, the UCL cause of action fails. Additionally, they argue alleged conduct is privileged under *sections 47(b)* and *43.8* of the California Civil code, and the claim is premature for failure to exhaust administrative remedies.

Plaintiff argues Defendants' contention that he does not sufficiently allege a UCL claim by asserting harm only to him fails because an act may violate *section 17200* even if the unlawful practice **[*1100]** affects only an individual. Even if he was required to allege harm more broadly, Plaintiff argues, he has done so by alleging Defendants' unlawful actions "injure competition to the detriment of seriously disabled infants and children, and the insurers and government sources of funding that pay for their medical care." Opp. at 23 (quoting FAC ¶¶ 8, 29). He also argues *section 47(b)* does not apply to his claims because it is preempted by federal statutes, it **[**51]** only protects communicative acts not non communicative conduct alleged by Plaintiff and the "screening out" of his application takes the conduct outside the protections of *section 47(b)*. He further argues he has no obligation to exhaust administrative remedies as to his antitrust claims and he is excused from exhausting administrative remedies as to his state law claims.

In reply, Defendants argues because Plaintiffs' Sherman Act, defamation and *section 809* claims fails, he fails to allege a predicate business act or practice that is forbidden by law.

As noted by Plaintiff, an unlawful practice that affects only one victim may still violate the UCL. See *Blanks v. Shaw, 171 Cal.App.4th 336, 364, 89 Cal. Rptr. 3d 710 (2009)*. To the extent Defendant is asserting Plaintiff fails to sufficiently allege a claim under the "unfair" prong, the Court finds Plaintiff sufficiently alleges harm to competition. The Court further finds Plaintiff's alleges a predicate act in support of his UCL claim for an unlawful business practice. As discussed above, Plaintiff sufficiently alleges claims under the Sherman Act and for defamation. Additionally, as discussed in section E.2.a., Defendant fails to demonstrate the privilege of *section 47(b)* applies. Defendant's contention that the UCL claim must be dismissed **[**52]** for failure to exhaust fails as Plaintiff is excused from exhaustion of administrative remedies as discussed above.

II. Defendant Jaffurs' Motion to Dismiss

Defendant Jaffurs moves to dismiss the FAC arguing (A) Plaintiff's claims are premature, (B) he is immune from liability as to all the state law claims, (C) the Sherman Act claims are barred and fail to state a claim, (D) the fourth and seventh causes of action have no private right of action, (E) individuals are not liable under Labor Code *section 1102.5*, (F) the UCL claim is insufficiently pled, and (G) the tortious interference claim fails as a matter of law.

A. Premature

Defendant argues Plaintiff's claims for conspiracy, defamation, tortious interference with prospective economic relations and unfair competition are not ripe because his application is still pending and he has failed to exhaust his administrative remedies. For the reasons discussed in detail above, this Court finds Plaintiff's action is not barred for failure to exhaust administrative remedies. As such, Defendant's motion to dismiss the state law claims as premature is denied.

B. Immunity Under State Law

Defendant contends he is immune from suit pursuant to *California Civil Code sections 43.8*, *47(b)*, *47(c)*, and *California Government Code sections 821.6* and *822.2*.

1. *Sections 43.8*, *47(c)* [53] and *822.2***

The immunity provided by *sections 43.8* and *47(c)* are laid out in section I.E.2.b. above and are incorporated by this reference. Under *California Government Code section 822.2*, "[a] public employee acting in the scope of his employment is not liable for an injury caused by his misrepresentation, whether or not such misrepresentation be negligent or intentional, unless he is guilty of actual fraud, corruption or actual malice."

[*1101] Defendant argues he is entitled to the immunity provided by *section 43.8* because his statements were made with the intent to aid Rady and CHOC in evaluating Plaintiff's qualifications. Additionally, he argues he is entitled to immunity provided by *section 47(c)* because his statements were made in the context of employment and peer review credentialing decisions. Defendant contends Plaintiff presents only vague allegations of ill will and malice.

Plaintiff argues the statements at issue were not intended to aid in his evaluation. Plaintiff maintains he pleads Defendant's true intent by alleging Defendant Jaffurs viewed Plaintiff as an economic threat to his practice, and acted out of a deep-seated animosity for Plaintiff with the goal of denying him employment. He further contends he alleges Defendant made false written and oral statements **[**54]** relating to Plaintiff's profession, including that Plaintiff is not fit to operate on children. Plaintiff maintains Defendant acted with malice, and without reasonable grounds for belief in the truth of the statements at issue.

In the FAC, Plaintiff alleges Defendant perceived him as competitive threat, began making false and defamatory statements to potential employers about Plaintiff, and boasted about destroying Plaintiff's employment opportunity. FAC ¶¶ 2, 3. He further alleges Defendant "continued on his vendetta" by making false and defamatory statements to Rady Children's and The Regents. Id. ¶ 4. The FAC also alleges Defendant developed a deep-seated personal animosity towards Plaintiff when Plaintiff refused to act as an accomplice to Defendant's personal vendettas against other surgeons. Id. ¶¶ 65-66. Additionally, the Plaintiff alleges Defendant made defamatory statements he knew to be untrue to Rady Children's with the intent to professionally harm Plaintiff and Plaintiff obtained letters from other physicians which described Defendant's allegations against Plaintiff as false, unprofessional and having no basis in fact. Id. ¶¶ 84, 92.

Assuming the truth of Plaintiff's non-conclusory **[**55]** allegations, Defendant's statements were knowingly false, made with malice and lacked the intent to assist the peer review or credentialing decisions. As such, the statements are not privileged under *sections 43.8*, *47(c)*, and *822.2*.

2. *Sections 47(b)* and *821.6*

The immunity provided by *section 47(b)* is laid out in section I.E.2.a. Under *section 821.6*, "a public employee is not liable for injury caused by his instituting or prosecuting any judicial or administrative proceeding within the scope of his employment, even if he acts maliciously or without probable cause."

Defendant argues he is entitled to immunity under *section 47(b)* and *section 821.6* because the alleged statements arose during a medical peer review process.

Plaintiff contends Defendant's arguments in support of immunity under *sections 47(b)* and *821.6* are not appropriate at this stage of the proceedings because entitlement to immunity under these sections is usually a question of fact. Even if the Court considers the arguments, Plaintiff contends Defendant is not protected by *section 821.6* because he did not institute or prosecute anything, and his statements were made to serve his own purposes and out of deep-seated personal animosity towards Plaintiff. He further contends Defendant is not entitled to immunity under these sections because the defamatory **[**56]** statements were made outside the context of a peer review process and long before peer review began. Additionally, he argues Defendant continued his wrongful conduct by making false statements to the Rady Defendants after Plaintiff submitted his application outside the kind of formal or quasi-judicial proceeding that courts have **[*1102]** recognized as protected. Plaintiff maintains there has been no such formal or quasi-judicial proceeding, but, instead, the Rady Defendants conducted a cursory screening out of his application.

Defendant argues, in reply, the statements were made in anticipation of or during the peer review process, and therefore, are absolutely protected. He further argues he acted in his professional capacity as an employee of UCI, so Plaintiff's claim that he was acting to serve his own purposes is not plausible. Defendant also argues Plaintiff's application has not been screened out because it has not yet been denied.

As discussed above, Plaintiff's allegations demonstrate there have been no quasi-judicial proceedings and the question of whether the statements were made to achieve the objects of a quasi-judicial proceeding is a question of fact not suitable for disposition **[**57]** on a motion to dismiss.

C. Sherman Act Claim

Defendant argues Plaintiff's Sherman Act Claim fails because he is entitled to *Eleventh Amendment* immunity and Plaintiff fails to allege evidentiary facts to support his claim.

1. *Eleventh Amendment* Immunity

"The *Eleventh Amendment* has been authoritatively construed to deprive federal courts of jurisdiction over suits by private parties against unconsenting States." *Seven Up Pete Venture v. Schweitzer, 523 F.3d 948, 952 (9th Cir. 2008)* (citing *Seminole Tribe of Florida v. Florida, 517 U.S. 44, 54, 116 S. Ct. 1114, 134 L. Ed. 2d 252 (1996)*). An unconsenting state is also immune from suits brought against a state by its own citizens. See *Tennessee Student Assistance Corp. v. Hood, 541 U.S. 440, 446, 124 S. Ct. 1905, 158 L. Ed. 2d 764 (2004)*. State officials acting in their official capacity enjoy similar immunity under the *Eleventh Amendment*. *Hafer v. Melo, 502 U.S. 21, 25, 112 S. Ct. 358, 116 L. Ed. 2d 301 (1991)*. However, a suit seeking damages against a state official in his individual capacity is not barred by the *Eleventh Amendment*. See id.; *Blaylock v. Schwinden, 862 F.2d 1352, 1353-54 (9th Cir. 1988)*.

Defendant maintains Plaintiff alleges he was acting as an employee of The Regents, and, as a public employee, he is entitled to immunity.

Plaintiff argues he sued Defendant Jaffurs in his personal capacity and the allegations show Defendant engaged in vindictive and abusive behavior, and made false and defamatory statements about Plaintiff in the service of both a personal vendetta and an anti-competitive campaign. He maintains his allegations that Defendant is an employee of The Regents, for purposes of pleading the predicate **[**58]** for *respondeat superior*, does not preclude his claim for damages against Defendant in his personal capacity.

In reply, Defendant argues the allegations show he was acting, at all times, within the course and scope of his employment as a Regents employee, and as such, all claims against him should be dismissed under *Eleventh Amendment* immunity.

Plaintiff alleges Defendant engaged in personal vendettas against surgeons, including Plaintiff. FAC ¶¶ 2, 4, 65, 70. He further alleges Defendant's actions were conducted in his professional capacity as an employee. Id. ¶ 37. The allegations of the complaint demonstrate Plaintiff seeks relief against Defendant in both his official and individual capacities. Defendant is entitled to immunity to the extent the claim is asserted against him in his official capacity. However, the *Eleventh Amendment* does not bar the claim to the extent it is asserted against Defendant in his individual capacity.

[*1103] 2. Failure to State a Claim

Defendant argues Plaintiff fails to allege sufficient facts to demonstrate a conspiracy, antitrust injury, and a plausible market. He further argues the state action doctrine bars the claim.

a. Insufficient Facts

The Court thoroughly reviewed the allegations of the FAC **[**59]** and, as discussed in detail above, finds Plaintiff sets forth sufficient allegations demonstrating a conspiracy, antitrust injury and a plausible market to support a claim for violation of the Sherman Act.

b. State Action Doctrine

Defendant argues the state action immunity from antitrust liability under *Parker v. Brown, 317 U.S. 341, 63 S. Ct. 307, 87 L. Ed. 315 (1943)* applies to the Sherman Act claims against The Regents and its employees. Under the state action doctrine, federal antitrust laws do not apply to anticompetitive restraints imposed by the States 'as an act of government.'" *City of Columbia v. Omni Outdoor Advertising, Inc., 499 U.S. 365, 370, 111 S. Ct. 1344, 113 L. Ed. 2d 382 (1991)* (quoting *Parker, 317 U.S. at 352*). Immunity under Parker applies if (1) "the challenged restraint is 'clearly articulated and affirmatively expressed as state policy'" and (2) the policy is "'actively supervised by the State itself." *California Retail Liquor Dealers Association v. Midcal Aluminum, Inc., 445 U.S. 97, 105, 100 S. Ct. 937, 63 L. Ed. 2d 233 (1980)* (quoting *City of Lafayette v. Louisiana Power & Light Co., 435 U.S. 389, 410, 98 S. Ct. 1123, 55 L. Ed. 2d 364 (1978))*.

Defendant sets forth no argument in his motion and instead joins in The Regents' argument set forth in its motion to dismiss.[5] In its motion, The Regents cited to a case out of the Western District of New York in which it found The Regents exempt from federal antitrust laws under the state action doctrine.

Plaintiff contends the state action doctrine does not bar his claims because Defendants' action were not the product of state regulation and the **[**60]** state action doctrine does not protect peer review proceedings from application of antitrust laws. Specifically, Plaintiff argues Defendants' conduct was not a product of state regulation in that they conducted a sham peer review. Citing *Pinhas v. Summit Health, Ltd, 894 F.2d 1024 (1989)*, he further argues the Ninth Circuit has specifically found the judiciary does not actively supervise the peer review process.[6]

In Pinhas, the plaintiff asserted claims under the Sherman Act for the removal of staff privileges at Midway Hospital Medical Center. Id. He appealed the district court's dismissal of his antitrust claim pursuant to the state action doctrine. *Id. at 1028*. The court concluded the California judiciary does not actively supervise peer review, and, therefore, the state action doctrine did not apply to peer review proceedings. *Id. at 1030*.

Applying the reasoning and holding of *Pinhas*, the Court finds the state action doctrine does not bar the Sherman Act claim against Defendant Jaffurs.

D. Fourth and Seventh Causes of Action

Defendant argues Plaintiff's claim for retaliation under *California Business and Professions Code sections 510-512*, and **[*1104]** *2056*, and claim for violation of the *California Labor Code section 1050* fail because there is no private right of action.

Plaintiff contends the language of *section 1050* authorizes civil actions for treble damages. **[**61]** He further argues there is an implied private right of action under *510 et. seq.* because the statute's express purpose is to provide protection against retaliation for health care practitioners who advocate for appropriate health care for their patients. It specifically provides that the penalizing of a health care practitioner for advocating for appropriate care violates that policy and it does not expressly provide a means to enforce the right of those health care practitioners. Plaintiff also contends courts have recognized claims brought under *section 510* by aggrieved physicians.

In reply, Defendant contends Plaintiff abandons his claim under *section 2056*. He further argues the cases relied upon by Plaintiff in support of his contention that courts recognize claims brought under *section 510* merely assumed, without analysis, that *section 510* could support a private right of action. Even if there is a private right of action, Defendant contends, Plaintiff fails to allege he advocated for medical care to support such a claim.

Defendant appears to abandon his argument that *section 1050* does not provide for a private right of action, as he does not address it in his reply. As noted by Plaintiff, *California Labor Code section 1054* clearly states, in addition to the criminal **[**62]** penalty provide, "any person or agent or officer thereof, who violates any provisions of *section*

---

[5] Because The Regents was dismissed from this action, the motion is no longer pending.

[6] In his reply, Defendant states Plaintiff does not address the state action doctrine argument and offers no reply to Plaintiff's arguments.

1050 and *1052*, inclusive, is liable to the party aggrieved, in a civil action, for treble damages." *Cal. Labor Code § 1054*.

Plaintiff fails to address *section 2056* in his opposition. Accordingly, the court finds Plaintiff abandons the claim. See *Jenkins v. County of Riverside, 398 F.3d 1093, 1095 n.4 (9th Cir. 2005)* (dismissing causes of action as abandoned where plaintiff did not oppose dismissal in her opposition); *Shull v. Ocwen Loan Servicing, LLC, 2014 U.S. Dist. LEXIS 50686, 2014 WL 1404877, *2 (S.D.Cal. 2014)* ("Where a party fails to address arguments against a claim raised in a motion to dismiss, the claims are abandoned and dismissal is appropriate."); *Walsh v. Nev. Dep't of Human Res., 471 F.3d 1033, 1037 (9th Cir. 2006)* (Holding that plaintiff forfeited his right to raise an issue on appeal where his opposition to a motion to dismiss failed to address the arguments because plaintiff failed to suggest a continuing interest in pursuing the claim and "effectively abandoned" it.).

Section 510 et. seq. provides protection against retaliation for physicians who advocate for medically appropriate health care for their patients. *Cal. Bus. & Prof. Code § 510(a)*. "Advocating for medically appropriate health care" is defined as:

> to appeal a payor's decision to deny payment for a service pursuant to the reasonable grievance or appeal procedure established by a medical group, independent practice association, preferred provider **[**63]** organization, foundation, hospital medical staff and governing body, or payer, or to protest a decision, policy, or practice that the physician, consistent with that degree of learning and skill ordinarily possessed by reputable physicians practicing according to the applicable legal standard of care, reasonably believes impairs the physician's ability to provide medically appropriate health care to his or her patients.

Cal. Bus. & Prof. Code § 510(b). The statute evidences an intent to provide a right to physicians who advocate for medically appropriate health care for their patients and does not provide administrative remedies or other means to enforce the rights recognized therein. The Court further **[*1105]** finds Plaintiff sufficiently alleges he advocated for medically appropriate health care by protesting Defendant's "decision and attempts to discredit two competent physicians" that Plaintiff believed "would impair CHOC's ability to provide appropriate health care to its patients." FAC ¶¶ 135, 134.

Accordingly, Defendant's motion to dismiss is granted as to *section 2056* and denied as to *section 510 et. seq.* and *1050*.

E. Labor Code *Section 1102.5*

Defendant seeks dismissal of Plaintiff's claim for relief under Labor Code *section 1102.5*. He argues, as an individual, he cannot be liable **[**64]** under *section 1102.5* as a matter of law.

In opposition, Plaintiff argues his claim under *section 1102.5* is viable because the plain language of the statute imposes individual liability. He maintains no California court has addressed the issue of individual liability since the language of the statute was amended in 2014 to state "any person acting on behalf of [an] employer" may not retaliate. Pla's Opp. at 22. Prior to the amendment, the language of the statute read, an "employer may not retaliate against an employee for refusing to participate in an activity that would result in a violation [of law]." Id. (citing *Cal. Labor Code § 1102.5* (effective Jan. 1, 2004 to Dec. 31, 2013)). He contends at least one district court found the statute ambiguous.

Defendant argues, in reply, Plaintiff admits no court has found individual liability in a civil action under *section 1102.5*.

No California court has addressed the issue of individual liability since the amendment to the language. All district courts, but one, that have addressed the issue have found no individual liability. See *Tillery v. Lollis, 2015 U.S. Dist. LEXIS 106845, 2015 WL 4873111 (E.D.Cal. 2015* (Looking to California Supreme Court discussion of language similar to the language of *section 1102.5* and finding no individual liability.); *Vera v. Con-way Freight, Inc., 2015*

U.S. Dist. LEXIS 45424, 2015 WL 1546178 (C.D.Cal. 2015) (Finding the "statutory text, structure and legislative **[**65]** history all indicate that only employers-no individual employees-are liable for violations of the statute.") *Conner v. Aviation Services of Chevron, U.S.A., 2014 U.S. Dist. LEXIS 156662, 2014 WL 5768727 (N.D.Cal. 2014)* (Finding the plaintiff failed to point to any language establishing individual liability and that *section 1104* of the Labor Code expressly stated, in all prosecutions under the pertinent chapter, employers are responsible for acts of its manager, officers, agents and employees.). While the court in *De La Torre v. Progress Rail Servs. Corp., 2015 U.S. Dist. LEXIS 100784, 2015 WL 4607730 (C.D.Cal. 2015)* found the language ambiguous, it made no determination as to whether the statute permitted individual liability when it remanded the action to state court. This Court is persuaded by the district courts' distillation of the statutory language and, similarly, finds no individual liability under *section 1102.5*. As such, Defendant's motion is granted as to the claim for retaliation under *section 1102.5*.

F. Unfair Competition Claim

Defendant argues Plaintiff's claim under the UCL is insufficiently pled and fatally vague. Specifically, he argues Plaintiff fails to allege a claim under the unfair prong because he does not allege harm to the victim outweighs any benefit, and he fails to allege a claim under the fraudulent prong because he does not allege conduct that is likely to deceive members of the public. He further argues **[**66]** Plaintiff fails to state a claim under the unlawful prong because he has not identified a pattern or practice of specific unlawful conduct and only asserts harm to himself.

Plaintiff argues he alleges Defendant engaged in unlawful and unfair conduct by violating the Sherman Act, retaliating **[*1106]** against Plaintiff, engaging in defamation, violating *section 1050* and interfering with Plaintiff's prospective economic relations. Plaintiff also contends an act may violate the UCL even if the practice only affects one victim. Additionally, he contends he alleges Defendant's conduct injured competition to the detriment of seriously disabled infants and children. Plaintiff also maintains he alleges Defendant acted for anti-competitive purposes.

In reply, Defendant argues Plaintiff fails to allege how Defendant's conduct in Orange County impacted children in San Diego and fails to allege Defendant worked in San Diego/Imperial counties to permit an inference of anticompetitive motive to keep Plaintiff off Rady Children's staff.

Plaintiff does not address Defendant's contention that he does not assert a claim under the fraudulent prong. Furthermore, there are no allegations the Defendant's conduct is likely to deceive **[**67]** members of the public. See *Schnall, 78 Cal.App.4th at 1167*.

As stated above, an unlawful practice that affects only one victim may still violate the UCL. *Blanks, 171 Cal.App.4th at 364*. Additionally, as discussed above, Plaintiff sufficiently asserts violations of the Sherman Act, defamation and retaliation to support a claim under the unlawful prong. The Court also finds Plaintiff alleges Defendant's conduct in making defamatory statements harmed competition. FAC ¶¶ 8, 29. Accordingly, the motion is denied as to the UCL claim under the unfair and unlawful prongs, and is granted under the fraudulent prong.

G. Tortious Interference with Prospective Economic Relations Claim

Defendant argues Plaintiff's tortious interference with economic relations claim fails because Defendant engaged in protected speech not actionable as defamation. He further argues he fails to state sufficient facts showing a relationship with CHOC or Rady Children's that was harmed by the alleged wrongful conduct. Additionally, Defendant argues Plaintiff sets forth conclusory assumptions to support his claim that he was not hired as a result of Defendant's statements. Defendant also contends Plaintiff fails to allege harm because he resigned from UCI and he still treats patients **[**68]** at CHOC, and Plaintiff's application is still pending at Rady Children's.

In opposition, Plaintiff argues he sufficiently alleges a claim for tortious interference with prospective economic relations. He maintains the FAC alleges he joined the medical staff at CHOC, and thus, had an existing relationship with it when he sought employment with the CHOC Foundation, and, given his relationship with CHOC, he had a reasonable expectation that his relationship with the CHOC Foundation would develop into an employment relationship. He further maintains he alleges Defendant made false and defamatory statements to the CHOC Foundation in order to prevent his employment. Additionally, he maintains he establishes harm by alleging the CHOC Foundation did not hire him.

In reply, Defendant argues his statements to the CHOC Foundation were protected as part of its employment application process and Plaintiff fails to allege Defendant caused the denial of his application. He also contends Plaintiff's presumption that he had some economic relationship with the CHOC Foundation is not plausible.

In support of his claim for tortious interference with prospective economic relations, Plaintiff alleges he was **[**69]** in a relationship with the CHOC Foundation, an entity closely affiliated with CHOC, with whom Plaintiff worked during his employment at UCI. FAC ¶ 183. He further alleges the **[*1107]** CHOC Foundation employed many physicians who had admitting privileges at CHOC. Id. Additionally, Plaintiff alleges he entered into employment discussions with the CHOC Foundation in 2015, and Defendant intended to disrupt the relationship between Plaintiff and the CHOC Foundation and made false and defamatory statements to the CHOC Foundation about Plaintiff. Id. ¶¶ 185-187. Plaintiff alleges Defendant disrupted the relationship and Plaintiff was not hired by the CHOC Foundation. Id. ¶¶ 70, 71, 72, 188. He alleges he was harmed because he was unable to continue his medical practice at UCI/CHOC outside the administrative purview of Defendant. Id. ¶ 189.

The Court finds Plaintiff sufficiently alleges a claim for tortious interference with prospective economic advantage against Defendant Jaffurs based upon the relationship with the CHOC Foundation. As discussed above, Plaintiff's allegations based upon economic relations with Rady Children's does not support a claim.

CONCLUSION AND ORDER

Based on the foregoing, IT IS **[**70]** HEREBY ORDERED:

1. The Rady Defendant's motion to dismiss is GRANTED IN PART AND DENIED IN PART.

    a. The motion is GRANTED as to Bad Faith Professional Review (Third Claim); Defamation for libel (Sixth Claim); and Tortious Interference with Prospective Economic Relations (Eighth Claim).

    b. The motion is DENIED as to Conspiracy in Restraint of Trade (First Claim); Monopoly (Second Claim); Defamation for slander (Sixth Claim); and Unfair Competition (Ninth Claim).

2. Defendant Jaffur's motion to dismiss is GRANTED IN PART AND DENIED IN PART.

    a. The motion is GRANTED as to Conspiracy in Restraint of Trade (First Claim) only to the extent it is asserted against him in his official capacity; Retaliation under *section 2056* only (Fourth Claim); Retaliation (Fifth Claim); Tortious Interference with Prospective Economic Relations (Eighth Claim) only to the extent it seeks relief based upon a relationship with Rady Children's.

    b. The motion is DENIED as to Conspiracy in Restraint of Trade (First Claim) to the extent it is asserted against him in his personal capacity; Retaliation under *section 510 et. seq.* (Fourth Claim); Defamation (Sixth Claim); *California Labor Code section 1050* (Seventh Claim); Tortious Interference with Prospective Economic Relations (Eighth **[**71]** Claim) to the extent it seeks relief based upon a relationship with CHOC; and Unfair Competition (Ninth Claim).

DATED: March 20, 2018

For Defendants: THOMAS R. CURTIN, GEORGE C. JONES, GRAHAM CURTIN, MORRISTOWN, NEW JERSEY.

Judges: NOEL L. HILLMAN, UNITED STATES DISTRICT JUDGE.

Opinion by: NOEL L. HILLMAN

Opinion

[*500] HILLMAN, District Judge

This is a Walker Process action related to other patent infringement litigation pending in the District of New Jersey. This Opinion addresses two separate but partially overlapping motions: Defendant National Express, Inc.'s Motion to Dismiss for Failure to State a Claim and Defendants Michael Berardi ("Mr. Berardi") and Cheryl Berardi ("Mrs. Berardi") (collectively the "Berardi Defendants")'s Motion to Dismiss for Lack of Personal Jurisdiction, Improper Venue, and Failure to State a Claim. For the reasons that follow, the Court will grant both motions. The Court will dismiss the claims against Defendants without prejudice and with leave to amend. The Court will dismiss Mrs. Berardi as a party defendant for lack of personal jurisdiction.

I. Relevant Facts

The following facts come from Plaintiffs' April 29, 2016 Second Amended Complaint.[1] On September 25, 2005, U.S. Patent No. 6,948,527 ("the '527 patent") entitled "Pressure-Actuated Linearly Retractable and Extendible Hose" **[**2]** was issued to Gary Dean Ragner and Robert Daniel deRochemont, Jr. On June 23, 2009, U.S. Patent No. 7,549,448 ("the '448 patent") entitled "Linearly Retractable Pressure Hose" was issued to Ragner. Ragner Technology is the owner and assignee of all rights to the '527 and '448 patents, subject only to exclusive licenses granted to Tristar Products.

In May 2011, Ragner Technology was introduced to Greg Janson, who appeared to be interested in investing in Ragner Technology or bringing Ragner Technology to the attention of potential investors. Janson was hired as a broker to recruit investors for Ragner Technology's patented products.

Janson informed Defendants that Ragner Technology was seeking to meet with investors. Janson scheduled a meeting between Ragner Technology and Defendants for August 23, 2011. On August 23, 2011, Ragner, deRochemont, and Margaret Combs, CEO of Ragner Technology, arrived in Jupiter, Florida for the scheduled meeting. At that time, they learned they were at the home of the Berardi Defendants. Also at the meeting was Edward Kelly, CEO of Defendant National Express. Janson and Vince Simonelli, a business broker, were also present at the meeting. The Berardi Defendants were introduced as Kelly's producers for his television **[**3]** commercials.[2]

At the start of the meeting, Ragner Technology made clear it was seeking investors and not licensing opportunities. Prior to disclosing any confidential information, Combs informed the Berardi Defendants and Kelly that non-disclosure agreements had not been prepared because they had been unaware of whom they were meeting with. Nonetheless, Combs insisted on a non-disclosure agreement before commencing the meeting. The Berardi Defendants and Kelly verbally agreed to terms of confidentiality and non-disclosure for the meeting. They also agreed to execute written non-disclosure agreements to be sent by Combs following the meeting.

After the oral agreement, Ragner Technology "disclosed information relating to **[*501]** Ragner Technology, the scope of its patents, product specifications, and target market of the Microhose product." They further disclosed

> specific engineering diagrams, ideas, materials of manufacture, including but not limited to, prior iterations of prototype hoses and prototype hoses constructed of more than one layer, more than one material, at least one fabric layer, various materials of manufacture including but not limited to, vinyl, nylon, rubber, polyester, and/or **[**4]** polypropylene, at least one layer with cord reinforcement including a hose wherein the biasing was performed by elastic material such as polymers made of thermoplastic polyurethane to provide retracting force, manufacture know-how, concepts, etc. related to its prototypes of the Microhose product.

Ragner Technology also demonstrated one of the patented prototypes of the Microhose product. Mr. Berardi was able to use one of the patented prototypes and saw it expand and retract.

During the meeting, National Express articulated its interest in licensing the patented technology and an intent for the product to be manufactured in Taiwan. Ragner Technology reiterated its request was solely for investors, but also conveyed its hesitancy to use a foreign manufacturer. After reassuring Ragner Technology of the capabilities of its foreign manufacturing contact, Kelly requested permission to contact the foreign manufacturer to address its ability to manufacture the product using the patented technology, subject to the terms of the non-disclosure agreement. Ragner Technology agreed to that limited disclosure. Kelly indicated he would contact the manufacturer as discussed.

The morning following the **[**5]** meeting, August 24, 2011, Combs prepared the non-disclosure agreements, all dated August 23, 2011. The non-disclosure agreements were never executed by Defendants. Ragner Technology was similarly never contacted regarding Kelly's communications with the manufacturer in Taiwan.

---

[1] This Court has subject matter jurisdiction pursuant to *28 U.S.C. § 1337* and *28 U.S.C. § 1331*.

[2] The Second Amended Complaint states the Berardi Defendants own Berardi Productions, a video production company. Berardi Productions has an exclusive agreement to produce television and online advertisements for National Express's Xhose product.

A little over two months later, on November 4, 2011, Mr. Berardi filed a patent application entitled "Expandable and contractible hose," which Plaintiffs allege "claim[ed] novel features of the prototypes of the Microhose product demonstrated by Ragner Technology at the August 23, 2011 meeting." Mr. Berardi obtained U.S. Patent No. 8,291,941 ("the '941 patent"), entitled "Expandable and contractible hose," U.S. Patent No. 8,291,942 ("the '942 patent") entitled "Expandable hose assembly," and U.S. Patent No. 8,479,776 ("the '776 patent").[3]

Blue Gentian, LLC is the owner of all the rights in the '941, '942, and '776 patents. Mr. Berardi is a managing member of Blue Gentian. Blue Gentian, in turn, granted National Express the exclusive right under the '941, '942, and **[**6]** '776 patents to market and sell the expandable hose product.

Plaintiffs filed their initial complaint on May 30, 2014 in the United States District Court for the Southern District of Florida, which was set before the Honorable William **[*502]** P. Dimitrouleas, U.S.D.J. On June 11, 2015, the Southern District of Florida granted Defendants' Motion for Judgment on the Pleadings and granted leave to file an amended complaint. This Order was followed by a First Amended Complaint on June 25, 2015. This matter was then transferred, sua sponte, from the Southern District of Florida to the District of New Jersey on October 28, 2015. This case was originally assigned to the Honorable Kevin McNulty, U.S.D.J. before being reassigned to the undersigned on December 2, 2016 because of the pendency of related matters.

Plaintiffs' April 29, 2016 Second Amended Complaint brings three counts against Defendants: conspiracy to monopolize (in the alternative, attempt to monopolize) (Count I); common law fraud (Count II); and breach of contract (Count III).

This Court's Opinion proceeds as follows. The Court first addresses the arguments made that this Court lacks personal jurisdiction over the Berardi Defendants and that venue **[**7]** is improper in the District of New Jersey. The Court then addresses the different jurisdictions' laws it is required to apply in considering these motions, of which there are several. The Court then addresses Count I of the Second Amended Complaint, asserting conspiracy to monopolize and, alternatively, attempt to monopolize. This requires consideration, first, of whether Plaintiffs have antitrust standing and, second, whether Defendants are immune from antitrust liability. The antitrust immunity issue requires consideration of whether there was fraud on the PTO and, if so, the merits of whether Plaintiffs have a monopolization claim. As the Court finds it must dismiss Count I, the Court chooses not to exercise supplemental jurisdiction over Plaintiffs' state law claims for common law fraud and breach of contract. Lastly, the Court considers Plaintiffs' request for leave to amend.

II. Personal Jurisdiction and Venue

In its February 7, 2018 Opinion, this Court extensively considered whether it had personal jurisdiction over the Berardi Defendants. The Court determined it had personal jurisdiction over Mr. Berardi but lacked personal jurisdiction over Mrs. Berardi. The Court asked for **[**8]** supplemental briefing on the personal jurisdiction issue, which the Court timely received on March 9, 2018. The Court summarizes its February 7, 2018 personal jurisdiction analysis here, incorporating the input of the parties from the supplemental briefing before reaching its ultimate decision.

As this case was transferred from the Southern District of Florida, the Court began by considering any decisions made by that court with regard to personal jurisdiction. In its order transferring this case to the District of New Jersey, the Southern District of Florida did not specifically address whether this Court has personal jurisdiction over Defendants. Its order found transfer "would serve the interest of justice . . . as the claims in this action may be

---

[3] The Second Amended Complaint further alleges that, on August 3, 2012, the Patent Office issued an Office Action with regard to the applications for what eventually issued as the '941 and '942 patents. The Second Amended Complaint pleads:

> The Office Actions demonstrate[d] that the patent examiner (1) rejected a subset of pending claims as anticipated by the '527 patent, (2) rejected various subsets of pending claims as obvious in light of the '527 patent, and (3) rejected various subsets of pending claims as obvious in light of a combination of the '527 patent and other references.

affected by, and are intricately related to, several pending actions in the District of New Jersey." The court acknowledged that, while Plaintiffs and National Express consented to transfer (and National Express to jurisdiction in the District of New Jersey), the Berardi Defendants contended that the District of New Jersey did not have personal jurisdiction over them. The court concluded: "Plaintiffs acknowledge that Michael Berardi and **[**9]** Cheryl Berardi may attempt to challenge personal jurisdiction in the District of New Jersey. Nonetheless, Plaintiffs are willing to face that potentiality and request that the Court transfer the action to the District of New Jersey pursuant to *§ 1404(a)*."

Noting that "[a]n action can be brought only where the court has personal jurisdiction **[*503]** over defendants" and that "a court does not have authority to transfer a case to a court that lacks personal jurisdiction," *Hunt v. Global Incentive & Meeting Mgmt., No. 09-4921, 2010 U.S. Dist. LEXIS 98828, 2010 WL 3740808, at *8 (D.N.J. Sept. 20, 2010)* (citing *Sunbelt Corp. v. Noble Denton & Assocs., Inc., 5 F.3d 28, 31-33 (3d Cir. 1993))*, the Court found the Southern District of Florida necessarily and implicitly concluded that the District of New Jersey had personal jurisdiction over all Defendants in determining it was appropriate to transfer the case to the District of New Jersey. Thus, this Court concluded that the law of the case was that this Court has personal jurisdiction over Defendants.

Noting that "[a] district court may reconsider a previous decision that has become law of the case . . . where the decision was clearly erroneous and would work a manifest injustice," *Ulferts v. Franklin Resources, Inc. (In re Alexander), Nos. 07-848, 07-1309, 2007 U.S. Dist. LEXIS 49289, 2007 WL 2021787, at *2 (D.N.J. July 9, 2007)*, the Court visited the issue of personal jurisdiction solely to determine whether the decision was clearly erroneous and would work a manifest injustice.

After concluding that the Berardi **[**10]** Defendants did not waive their argument that this Court does not have personal jurisdiction, the Court considered whether the Berardi Defendants "have certain minimum contacts" with New Jersey "such that the maintenance of the suit does not offend 'traditional notions of fair play and substantial justice.'" *Int'l Shoe Co. v. Washington, 326 U.S. 310, 316, 66 S. Ct. 154, 90 L. Ed. 95 (1945)* (quoting *Milliken v. Meyer, 311 U.S. 457, 463, 61 S. Ct. 339, 85 L. Ed. 278 (1940))*.

The Court determined that nearly all of the allegations asserted in Plaintiffs' Second Amended Complaint regarding Mr. Berardi's contacts with the forum state relate to his contacts in his capacity as Managing Member of Blue Gentian and as an officer of Berardi Productions. Similarly, Mrs. Berardi's contacts with the forum state relate solely to her contacts in her capacity as an officer of Berardi Productions. Accordingly, this Court turned to whether it was proper for the Court to consider the Berardi Defendants' contacts with the forum state while acting on behalf of either Blue Gentian or Berardi Productions. The Court determined that, if the Second Amended Complaint sufficiently alleged the Berardi Defendants could be subject to individual liability, it was proper to consider actions taken by the Berardi Defendants in their corporate capacities in its personal jurisdiction **[**11]** analysis to the extent those actions were done within New Jersey.

The Second Amended Complaint alleges Mr. Berardi, "as the sole managing member of Blue Gentian," "direct[ed] Blue Gentian, LLC to restrain competition in part in the State of New Jersey by suing competitors claiming infringement and threatening their customers." The complaint specifically pinpoints two 2013 law suits filed in the District of New Jersey: dockets 13-481 and 13-7099. As to both Berardi Defendants, the Second Amended Complaint states the Berardi Defendants direct Berardi Productions to produce anticompetitive commercials "which air in the State of New Jersey." It further states the Berardi Defendants "write, produce, direct, and edit" the anticompetitive advertisements that air in New Jersey.

At this point, the parties' supplemental briefing becomes relevant. The Court's February 7, 2018 Opinion found the Second Amended Complaint sufficiently supported personal jurisdiction over Mr. Berardi based on his contacts through Blue Gentian. The Court based this decision on the 13-481 action and the 13-7099 action, of which Blue Gentian and National Express are both Plaintiffs. The Court found **[*504]** the filing of these **[**12]** actions constituted the minimum contacts necessary for this Court to assert personal jurisdiction over Mr. Berardi, finding Mr. Berardi took specific action and directed the filing of these lawsuits in his capacity as managing member. The Court found that in using the federal court system in New Jersey to allegedly conspire or attempt to monopolize a market with fraudulently obtained patents, Mr. Berardi purposefully availed himself of the privilege of conducting activities in the State of New Jersey. Mr. Berardi was invoking the benefits and protections of the District of New Jersey, located in the forum state. If such use was fraudulent or constituted a conspiracy or attempt to monopolize, Mr. Berardi could reasonably expect to be haled into court in the state in which he filed the lawsuits. The Court also found exercising personal jurisdiction over Mr. Berardi comported with fair play and substantial justice.

In its supplemental briefing, Defendants informed the Court that the 13-481 action was originally filed in the Southern District of Florida before it was transferred to the District of New Jersey on Defendant Telebrands Corp.'s Motion to Transfer. The Court thus will not base **[**13]** a finding of personal jurisdiction on the filing of the 13-481 action. However, the Court finds the filing of the 13-7099 action supports a finding of personal jurisdiction. Defendants' supplemental briefing provides as follows on this issue:

> The 13-7099 action was filed by Blue Gentian and National Express in the District of New Jersey, alleging infringement of U.S. Patent No. 8,479,776 ("the '776 patent"), and to add a retail defendant to infringement allegations already pending in the 13-1758 action. The 13-7099 action was filed as, and was identified as, related to the 13-1758 action that was pending in the district. The 13-1758 action alleged Tristar's infringement of the '941, '942, and '213 patents — the '776 patent is a continuation-in-part of those patents. . . . Because many of the same issues from the 13-7099 action were already pending in the 13-1758 action, 13-7099 action needed to be filed in the district where the 13-1758 action was pending. The 13-1758 action, however, was not directed to New Jersey by Blue Gentian and Mr. Berardi, but rather by Defendants Tristar Products, Inc. . . .
>
> Blue Gentian filed the lawsuit that became the 13-1758 action in the Southern District of Florida on October 23, 2012. . . . On March 19, 2013, however, Judge Seitz **[**14]** granted Tristar's Motion and transferred the action to New Jersey, where it was reassigned to District Judge Hochberg and Magistrate Judge Shwartz as the 13-1758 action. . . .
>
> The 13-1758 action had been transferred to New Jersey based on Tristar's motion, and was pending for just over six (6) months when the 13-7099 action was filed. Because the issues under *28 U.S.C. § 1404(a)* had been litigated and ruled upon with respect to the 13-1758 action, and because the 13-7099 action had the same issues for a court to address, it was not a decision by Blue Gentian and Mr. Berardi that directed the 13-7099 action to New Jersey, but plaintiffs abiding by the Florida court's prior ruling. Having already ruled on the issue relating to where the infringement issues should be heard, it would have been improper for Blue Gentian to then file a new action with substantially the same claims in the Southern District of Florida.[4]

[*505] The Court confirms the following. On November 21, 2013, Blue Gentian and National Express filed a complaint in the District of New Jersey, bringing claims for direct patent infringement and indirect patent infringement against Tristar Products. This was docketed as the 13-7099 matter. In the Complaint's **[**15]** *Local Civil Rule 11.2* Certification,[5] the 13-7099 Complaint stated:

---

[4] In Plaintiffs' Motion for Leave to File Reply, Plaintiffs request the Court ignore Defendants' supplemental briefing, arguing that it "amounts to re-argument of the issues already briefed and decided" and "is improper in the absence of a Motion for Reconsideration." The Court notes that the supplemental briefing contains arguments that might have been more appropriate for a motion for reconsideration, considering that the Court determined in its February 7, 2018 Opinion the personal jurisdiction issue and was merely asking for briefing on how to proceed. However, given that the arguments do not change this Court's analysis, and given the unique question this Court presented the parties with for supplemental briefing, the Court finds it proper to address Defendants' concerns here.

Plaintiffs also ask for the opportunity to oppose Defendants' supplemental briefing if the Court chooses to consider it. Given that the Court is not persuaded by Defendants' briefing, the Court denies that request.

[5] *Local Civil Rule 11.2* requires, in pertinent part, as follows: "The initial pleading . . . in any case in this Court . . . shall be accompanied by a certification . . . as to whether the matter in controversy is the subject of any other action pending in any court . . . and, if so, the certification . . . shall identify each such action . . . ."

> Plaintiffs, by their undersigned counsel, hereby certify pursuant to *L.Civ.R. 11.2* that the matters in controversy are not the subject of any other action pending in any court or of any pending arbitration or administrative proceeding, with the exception of the following:
>
> (1) Telebrands Corp. v. National Express, Inc., et al., Civil Action No. 12-cv-06671-FSH-JBC;
>
> (2) Blue Gentian, LLC v. Telebrands Corp., Civil Action No. 13-00481-FSH-JBC;
>
> (3) Blue Gentian, LLC, et al. v. Tristar Prods., Inc., Civil Action No. 13-cv-01758-FSH-JBC; and
>
> (4) Blue Gentian, LLC, et al. v. Telebrands Corp., et al, Civil Action No. 13-cv-04627-FSH-JBC.
>
> On November 15, 2013, counsel for the parties participated in a scheduling and status conference with United States Magistrate Judge James B. Clark for the above-indicated related actions. During the conference undersigned advised the Court of the impending filing of the present Complaint. Judge Clark specifically instructed undersigned to file this action as a related case to the actions indicated above, to facilitate the Court's consolidation thereof for pretrial scheduling.

(emphasis added).

The Court understands Blue Gentian's **[**16]** rationale in filing the 13-7099 action in the District of New Jersey. Plaintiffs' perception that the same transfer analysis and action would occur if the 13-7099 action were filed in the Southern District of Florida is both understandable and logical. Nonetheless, the Court does not find it shields Mr. Berardi from personal jurisdiction in New Jersey. The Court sees no indication from Defendants' briefing that is was required or instructed, either by this Court or the Southern District of Florida, to file the 13-7099 action in the District of New Jersey. Even understanding that Blue Gentian interpreted its prior interactions with the Southern District of Florida and the District of New Jersey to indicate that the 13-7099 action "needed to be filed" in New Jersey or "it would have been improper for Blue Gentian to . . . file a new action with substantially the same claims [as the 13-1758 action] in the Southern District of Florida," the Court still finds Mr. Berardi, through Blue Gentian, invoked the benefits and protections of the District of New Jersey and thus purposefully **[*506]** availed himself of the privilege of conducting business in New Jersey. The Court thus finds Mr. Berardi is **[**17]** subject to personal jurisdiction in this state.

As to Mrs. Berardi, all parties agreed the claims against her should be severed and dismissed. As this Court explained in its February 7, 2018 Opinion, Berardi Productions' advertisements are insufficient to satisfy the minimum contacts necessary for this Court to assert personal jurisdiction over her. As the content disseminated through Berardi Productions is the only contact Mrs. Berardi is alleged to have with the forum state, the Court found it could not assert personal jurisdiction over Mrs. Berardi. The Court found the Southern District of Florida's implicit conclusion that this Court has personal jurisdiction over Mrs. Berardi clearly erroneous. The Court further found asserting personal jurisdiction over Mrs. Berardi simply to comply with the law of the case would result in manifest injustice. It is fundamentally unfair to require a defendant to litigate a matter in a district in which the defendant lacks sufficient contacts. Further, the Court found that upon "conclud[ing] that the prior decision was 'clearly erroneous,'" this Court is "oblig[ated] to decline jurisdiction." *Christianson v. Colt Indus. Operating Corp., 486 U.S. 800, 817, 108 S. Ct. 2166, 100 L. Ed. 2d 811 (1988)*. Accordingly, the Court will dismiss the claims against **[**18]** Mrs. Berardi without prejudice. The Court will now consider the merits of the claims against Mr. Berardi and National Express.[6]

---

[6] The Court similarly considered whether the Southern District of Florida's implicit conclusion that venue was proper in the District of New Jersey was clear error. The Court found sufficient allegations in the Second Amended Complaint regarding "events or omissions giving rise to the claim" occurring in New Jersey that it could not conclude the Southern District of Florida's implicit decision that venue was proper constituted clear error.

The Court focused on the conspiracy to monopolize count, as that is what allows this case to proceed in federal court. The Court thus considered the nature of the dispute to be a conspiracy to monopolize or an attempt to monopolize. As noted above, at least one lawsuit was brought by Mr. Berardi in the State of New Jersey, which is part of Plaintiffs' monopolization claim. While there were other significant events occurring in the State of Florida as well, the Court found there were enough contacts in New

III. Governing Law

Having determined that the Court has subject matter jurisdiction and personal jurisdiction over the remaining defendants, and that venue is proper in the District of New Jersey, the Court now briefly addresses the law it applies in considering the various issues before it on these motions to dismiss. In addressing whether Defendants are immune from antitrust liability, "the requirement that the patent be obtained through actual fraud upon the PTO . . . is governed by Federal Circuit law." *Dippin' Dots, Inc. v. Mosey, 476 F.3d 1337, 1346 (Fed. Cir. 2007)* (citing *Nobelpharma AB v. Implant Innovations, Inc., 141 F.3d 1059, 1068 (Fed. Cir. 1998))*. The second element, satisfying "the basic elements of an antitrust violation," is governed "by the regional circuit's law." *Id. at 1348*. This Court will thus apply relevant circuit law in determining whether there was an antitrust violation, id., and to all other questions of federal law. See *In re Korean Air Lines Disaster, 829 F.2d 1171, 265 U.S. App. D.C. 39 (D.C. Cir. 1987)*; see also *In re Donald J. Trump Casino Sec. Litig., 7 F.3d 357, 368 n.8 (3d Cir. 1993)*. This Court will apply Third Circuit law, not Eleventh Circuit law. See *Desiano v. Warner-Lambert & Co., 467 F.3d 85, 91 (2d Cir. 2006)* ("[E]ven **[*507]** in the transfer context, a court of appeals must develop its own circuit law on federal questions; it cannot mechanically adopt the reasoning and conclusions of its sister circuits **[**19]** . . . ."); accord *Szulik v. Tagliaferri, 966 F. Supp. 2d 339, 361 n.16 (S.D.N.Y. 2013)*; *In re Gawker Media LLC, 571 B.R. 612, 626-27 (S.D.N.Y. Bankr. 2017)* ("Second Circuit law governs the interpretations of federal law even when the case is transferred from a court sitting in another circuit.").[7]

This Court applies Florida law to the state law claims. "Van Dusen v. Barrack, established that when a civil action is transferred from one district court to another pursuant to *§ 1404(a)* on motion of the defendant, the transferee forum must apply the law of the initial forum." *Amica Mut. Ins. Co. v. Fogel, 656 F.3d 167, 171 (3d Cir. 2011)* (citing *Van Dusen v. Barrack, 376 U.S. 612, 639, 84 S. Ct. 805, 11 L. Ed. 2d 945 (1964))*. "Ferens v. John Deere Co. . . . makes plain that the Van Dusen rule applies to sua sponte transfers . . . ." Id.

IV. Standard of Review

When considering a motion to dismiss a complaint for failure to state a claim upon which relief can be granted pursuant to *Federal Rule of Civil Procedure 12(b)(6)*, a court must accept all well-pleaded allegations in the complaint as true and view them in the light most favorable to the plaintiff. *Evancho v. Fisher, 423 F.3d 347, 351 (3d Cir. 2005)*. It is well settled that a pleading is sufficient if it contains "a short and plain statement of the claim showing that the pleader is entitled to relief." *Fed. R. Civ. P. 8(a)(2)*.

Under the liberal federal pleading rules, it is not necessary to plead evidence, and it is not necessary to plead all the facts that serve as a basis for the claim. *Bogosian v. Gulf Oil Corp., 561 F.2d 434, 446 (3d Cir. 1977)*. However, "the Federal Rules of Civil Procedure **[**20]** . . . do require that the pleadings 'give the defendant fair notice of what the plaintiff's claim is and the grounds upon which it rests.'" *Baldwin Cty. Welcome Ctr. v. Brown, 466 U.S. 147, 149-50 n.3, 104 S. Ct. 1723, 80 L. Ed. 2d 196 (1984)* (quoting *Conley v. Gibson, 355 U.S. 41, 47, 78 S. Ct. 99, 2 L. Ed. 2d 80 (1957))*.

A district court, in weighing a motion to dismiss, asks "not whether a plaintiff will ultimately prevail but whether the claimant is entitled to offer evidence to support the claim." *Bell Atl. v. Twombly, 550 U.S. 544, 563 n.8, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)* (quoting *Scheuer v. Rhodes, 416 U.S. 232, 236, 94 S. Ct. 1683, 40 L. Ed. 2d 90 (1974))*; see also *Ashcroft v. Iqbal, 556 U.S. 662, 684, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* ("Our decision in Twombly expounded the pleading standard for 'all civil actions' . . . ."); *Fowler v. UPMC Shadyside, 578 F.3d 203,*

Jersey that prevented this Court from concluding that it was clear error to determine venue was proper in the District of New Jersey. This Court stands by that ruling.

[7] The parties in their briefing largely apply Third Circuit law in addressing antitrust standing and conspiracy and attempt to monopolize.

210 (3d Cir. 2009) ("Iqbal. . . provides the final nail in the coffin for the 'no set of facts' standard that applied to federal complaints before Twombly.").

V. Antitrust Standing

The Court first addresses whether Plaintiffs have antitrust standing. Both motions allege lack of standing as a basis for dismissing this action.

"Article III constitutional standing, a principal moored in the notion 'that the judiciary's power only extends to cases or controversies,' constitutes a threshold requirement in all actions in federal court." Otsuka Pharm. Co. v. Torrent Pharms. Ltd., 118 F. Supp. 3d 646, 652 (D.N.J. 2015) **[*508]** (quoting Ethypharm S.A. Fr. v. Abbott Labs., 707 F.3d 223, 232 (3d Cir. 2013)). "The principles of constitutional standing are, however, 'augmented' by prudential considerations aimed at preserving the effective enforcement of the antitrust laws." Id. "[T]he Supreme Court has specifically recognized that **[**21]** 'Congress did not intend to allow every person tangentially affected by an antitrust violation to maintain an action to recover threefold damages for the injury to his business or property.'" Id. (quoting Associated Gen. Contractors of Cal., Inc. v. Cal. State Council of Carpenters, 459 U.S. 519, 535, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)). Accordingly, where a plaintiff brings suit under federal antitrust laws, the plaintiff must meet the prudential requirement of antitrust standing.

The following factors "are relevant in an antitrust standing challenge":

> (1) the causal connection between the antitrust violation and the harm to the plaintiff and the intent by the defendant to cause that harm, with neither factor alone conferring standing; (2) whether the plaintiff's alleged injury is of the type for which the antitrust laws were intended to provide redress; (3) the directness of the injury, which addresses the concerns that liberal application of standing principles might produce speculative claims; (4) the existence of more direct victims of the alleged antitrust violations; and (5) the potential for duplicative recovery or complex apportionment of damages.

Barton & Pittinos v. Smithkline Beecham Corp., 118 F.3d 178, 181 (3d Cir. 1997) (quoting In re Lower Lake Erie Iron Ore Antitrust Litig., 998 F.2d 1144, 1165-66 (3d Cir. 1993)). "The second factor, antitrust injury, 'is a necessary but insufficient condition of antitrust standing.'" Ethypharm, 707 F.3d at 233 (quoting Barton & Pittinos, 118 F.3d at 182). "If it is lacking [the court] **[**22]** need not address the remaining . . . factors." Id. (emphasis omitted). Accordingly, this Court begins by considering whether Plaintiffs have sufficiently pleaded an antitrust injury.

> Generally, antitrust injury - that is, "injury of the type the antitrust laws were intended to prevent and that flows from that which makes [the] defendants' acts unlawful," "is limited to consumers and competitors in the restrained market and to those whose injuries are the means by which the defendants seek to achieve their anticompetitive ends."

Id. (alteration in original) (first quoting Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977); and then quoting W. Penn Allegheny Health Sys., Inc. v. UPMC, 627 F.3d 85, 102 (3d Cir. 2010)); accord Otsuka, 118 F. Supp. 3d at 652-53 ("[I]n order to plead an antitrust injury, the party must allege facts showing (1) that it suffered an injury of the type the antitrust laws seek to prevent, e.g., anticompetitive behavior, and (2) that the injury resulted from the adversary's unlawful or anti-competitive acts.").

Further, "a plaintiff must generally show that he is a competitor or a consumer in the relevant product and geographic markets in which competition was adversely impacted." Novak v. Somerset Hosp., 625 F. App'x 65, 67 (3d Cir. 2015); Bocobo v. Radiology Consultants of S. Jersey, P.A., 305 F. Supp. 2d 422, 425 (D.N.J. 2004) ("To determine if Plaintiff has suffered an antitrust injury, the Court must determine if competition in the relevant market has been impermissibly **[**23]** affected, which, of course, requires the Court to define the relevant market or markets."). The Court thus begins its assessment of whether an antitrust injury, and consequently whether antitrust standing, has been pleaded adequately by considering **[*509]** the relevant product market and geographic market.

A. Relevant Product Market

Plaintiffs plead the relevant product market is the "expandable hose market." The Court finds the relevant product market has not been sufficiently defined, as explained below, and is grounds for dismissal.

"The outer boundaries of a product market are determined by the reasonable interchangeability of use or the cross-elasticity of demand between the product itself and substitutes for it." *Queen City Pizza v. Domino's Pizza, 124 F.3d 430, 436 (3d Cir. 1997)* (quoting *Brown Shoe Co. v. United States, 370 U.S. 294, 325, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962))*; accord *Novak, 625 F. App'x at 67* ("The relevant 'product market' is comprised of 'commodities reasonably interchangeable by consumers for the same purposes.'" (quoting *United States v. E.I. Du Pont de Nemours & Co., 351 U.S. 377, 394, 76 S. Ct. 994, 100 L. Ed. 1264 (1956)))*. "Interchangeability 'implies that one product is roughly equivalent to another . . . [and] while there might be some degree of preference for the one over the other, either would work effectively.'" Id. (alteration in original) (quoting *Allen-Myland, Inc. v. Int'l Bus. Machs. Corp., 33 F.3d 194, 206 (3d Cir. 1994))*.

"[I]n most cases, proper market definition can be determined only after a factual inquiry **[**24]** into the commercial realities faced by consumers." *Queen City Pizza, 124 F.3d at 436*. However,

> [w]here the plaintiff fails to define its proposed market with reference to the rule of reasonable interchangeability and cross-elasticity of demand, or alleges a proposed relevant market that clearly does not encompass all interchangeable substitute products even when all factual inferences are granted in plaintiff's favor, the relevant market is legally insufficient and a motion to dismiss may be granted.

Id.

Plaintiffs' Second Amended Complaint did not "define its proposed market with reference to the rule of reasonable interchangeability or cross-elasticity of demand." Id. The Court thus finds the relevant market as pleaded to be legally insufficient.[8]

The Court recognizes that this conclusion differs from the Southern District of Florida's decision. The Southern District **[*510]** of Florida found the allegations in the initial complaint "adequately define[d] the relevant market at this stage in the litigation" as the expandable hose market. The court stated that, "[a]t the pleading stage, Plaintiffs are not required to plead facts regarding the level of product interchangeability, or the cross-elasticity of demand pertaining to **[**25]** the expandable hose market." The Southern District of Florida cited a case from that district for that proposition. This Court, however, applies Third Circuit law. The Third Circuit has explicitly rejected the argument that a plaintiff is not required to plead the relevant market with reference to product interchangeability or cross-elasticity in pleading the relevant product market. Id. ("Where the plaintiff fails to define its proposed relevant market with reference to the rule of reasonable interchangeability and cross-elasticity of demand, or alleges a proposed relevant market that clearly does not encompass all interchangeable substitute products even when all

---

[8] This Court questions whether the relevant product market pleaded in the Second Amended Complaint is defined too narrowly. "The test for a relevant market is not commodities reasonably interchangeable by a particular plaintiff, but 'commodities reasonably interchangeable by consumers for the same purposes.'" *Queen City Pizza, 124 F.3d at 438* (quoting *E.I. Du Pont de Nemours & Co., 351 U.S. at 395*). "A court making a relevant market determination looks not to the contractual restraints assumed by a particular plaintiff when determining whether a product is interchangeable, but to the uses to which the product is put by consumers in general." Id. ("Interchangeability implies that one product is roughly equivalent to another for the use to which it is put; while there may be some degree of preference for the one over the other, either would work effectively. A person needing transportation to work could accordingly buy a Ford or a Chevrolet automobile, or could elect to ride a horse or bicycle, assuming those options were feasible." (quoting *Allen-Myland, Inc, 33 F.3d at 206*)). "The key test for determining whether one product is a substitute for another is whether there is a cross-elasticity of demand between them: in other words, whether the demand for the second good would respond to changes in the price of the first." *Allen-Myland, 33 F.3d at 206*. Plaintiffs' have not pleaded or explained why a regular, non-expandable hose, is not included in the relevant product market.

factual inferences are granted in plaintiff's favor, the relevant market is legally insufficient and a motion to dismiss may be granted.").

B. Relevant Geographic Market

As for the relevant geographic market, Plaintiff's Second Amended Complaint alleges "Defendants are engaged in interstate commerce in the United States, and the vast majority of their past, present, and future sales in the relevant market has and will occur in such commerce." "The relevant geographic market is the area in which a potential buyer may rationally **[**26]** look for the goods or services he or she seeks." *Novak, 625 F. App'x at 68* (quoting *Pa. Dental Ass'n v. Med. Serv. Ass'n of Pa., 745 F.2d 248, 260 (3d Cir. 1984))*.

Plaintiffs plead the relevant geographic market in terms of where Defendants are engaged in interstate commerce. "The law is clear that the relevant geographic market is not defined by the market in which the defendant conducts its business, or even where the injury is felt." *Synthes, Inc. v. Emerge Med., Inc., No. 11-1566, 2012 U.S. Dist. LEXIS 140251, 2012 WL 4473228, at *7 (E.D. Pa. Sept. 28, 2012)*. "Rather, the relevant geographic market is where customers would rationally look for the goods or services he or she seeks." *2012 U.S. Dist. LEXIS 140251, [WL] at *22*. "The mere delineation of a geographical area, without reference to a market as perceived by consumers and suppliers, fails to meet the legal standard necessary for the relevant geographic market." *Tunis Bros. Co. v. Ford Motor Co., 952 F.2d 715, 727 (3d Cir. 1991)*. The Second Amended Complaint fails to properly plead the relevant geographic market. Simply pleading where Defendants are engaged in commerce is completely insufficient to establish the relevant geographic market, even at the pleading stage.

Further, earlier in the Second Amended Complaint, Plaintiffs plead that "Defendant National Express and Blue Gentian, LLC have used the fraudulently obtained '941, '942, and '776 patents to fraudulently obtain international patents to further restrain competition internationally in part by suing Plaintiff Tristar **[**27]** Products and other competitors claiming infringement and threatening their customers in various international jurisdictions." This statement of the possible international scope of Defendants complicates the analysis. "The relevant geographic market may be local, regional, national or international in origin." *Syncsort Inc. v. Sequential Software, Inc., 50 F. Supp. 2d 318, 331 n.10 (D.N.J. 1999)*. However, "the boundaries of the relevant market must be drawn with sufficient breadth to . . . recognize competition where, in fact, competition exists." *Brown Shoe, 370 U.S. at 326*. The Second Amended Complaint alludes to an international presence and **[*511]** international competition but does not include it in the relevant market or explain its absence from the relevant market. See generally *Synthes, 2012 U.S. Dist. LEXIS 140251, 2012 WL 4473228, at *7* ("Emerge has made no effort to explain why the relevant market is limited to the United States, particularly where Synthes is alleged to be a 'multi-national corporation.'"); *Dicar, Inc. v. Stafford Corrugated Prods., No. 05-5426, 2010 U.S. Dist. LEXIS 23667, at *33 (D.N.J. Mar. 12, 2010)* ("Where . . . there is no indication that a consumer would be unable to purchase a product abroad, the Court will not arbitrarily limit the geographical market to the U.S.").

Given these deficiencies in pleading the relevant product and geographic markets, the Court will grant both motions to dismiss. However, as the Court will be granting leave to **[**28]** amend the Second Amended Complaint, the Court continues its analysis in the interest of completeness and guiding Plaintiffs in amending their complaint.

C. Antitrust Injury

The Court finds the injury alleged is of the type the antitrust laws were intended to prevent. Plaintiffs plead Defendants have used the fraudulently obtained '941, '942, and '776 patents to restrain competition in part by suing Plaintiff Tristar Products and other competitors claiming infringement and threatening their customers.

National Express argues "Plaintiffs' factual allegations only address injury to the Plaintiffs," when "[t]he injury alleged must be to competition in general, and not to the specific competitor." National Express argues *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)* stands for this proposition.

The Supreme Court in that case stated: "The antitrust laws . . . were enacted for 'the protection of competition, not competitors.'" *Id. at 488* (quoting *Brown Shoe, 370 U.S. at 320*); *Otsuka, 118 F. Supp. 3d at 653* ("[T]he pleaded facts must show 'that "the challenged action has had an actual adverse effect on competition as a whole in the relevant market,"' rather than just an adverse effect on the particular competitor." (quoting *Irish v. Ferguson, 970 F. Supp. 2d 317, 365 (M.D. Pa. 2013))*).

The Court finds the injury complained of here is directly tied to the anticompetitive conduct alleged **[**29]** and is of the type the antitrust laws intended to prevent. The allegation that Defendants are using a fraudulently obtained patent to bring lawsuits against those with valid patents is, to this Court, an attempt to drive out competition. While it also would inflict a direct injury against Plaintiffs, as they have been the subject of some of these lawsuits, the scope of the alleged injury is broader in that, if Plaintiffs' allegations are true, all competition in the relevant market is impacted.

For instance, in Otsuka, the District of New Jersey found an allegation of the initiation of "meritless infringement actions in order to 'stifle and eliminate competition and competitors,' to exclude or prevent competitors' entry in the . . . market, and to maintain its exclusive monopoly over the . . . market" plausibly alleged an antitrust injury. *118 F. Supp. 3d at 653*. The court found "the pursuit of litigation that forestalls entry into the generic market . . . constitutes 'anti-competitive behavior' of the type the antitrust laws seek to prevent." *Id. at 654*.[9]

[*512] The Court finds these allegations sufficient to satisfy the "antitrust injury" factor in the factor test for antitrust standing.

D. Other Antitrust Standing Factors

As for the other factors - causal connection and intent to cause harm, directness of the injury, the existence of more direct victims, and the potential for duplicative recovery or complex apportionment of damages - the Court finds these elements satisfied by the Second Amended Complaint.

The causal connection factor requires us to consider whether the antitrust violation was a but-for cause. *Allegheny Gen. Hosp. v. Philip Morris, 228 F.3d 429, 439 (3d Cir. 2000)*. There is clearly a causal connection alleged between the antitrust violation and the harm to competition and Plaintiffs as market participants. As to intent, this factor, along with causation, is "not . . . dispositive on the issues of antitrust standing." *Steamfitters Local Union No. 420 Welfare Fund v. Philip Morris, 171 F.3d 912, 925 (3d Cir. 1999)*. Nonetheless, the Court finds sufficient allegations that the injury alleged is the predictable, direct, and intended result of the anticompetitive conduct.[10]

As to the directness of the injury **[**31]** and whether there exist "more direct victims of the alleged antitrust violations," this "involves two inquiries: (1) the appropriate party, and (2) remoteness." *Allegheny Gen. Hosp., 228 F.3d at 440*. "Subsumed in the 'directness' factor is also the issue of whether other, more directly injured parties could vindicate the policies underlying the antitrust laws . . . ." *Steamfitters Local Union, 171 F.3d at 927*.

---

[9] Other courts have found similarly.

> In [*Handgards, Inc. v. Ethicon, Inc., 601 F.2d 986 (9th Cir. 1979)*] and [*Novo Nordisk of N. Am., Inc. v. Genentech, Inc., 885 F. Supp. 522 (S.D.N.Y. 1995)*], the courts held that the enforcement of a patent obtained by fraud may constitute a violation of the *Sherman Act*, provided the other elements of a claim **[**30]** are established.
>
> This Court reads these cases as conferring antitrust standing upon those who sufficiently plead an antitrust injury based upon the prosecution of a fraudulently obtained patent.

Amgen, Inc. v. F. Hoffmann-La Roche, Ltd., 480 F. Supp. 2d 462, 469 (D. Mass. 2007) (citations omitted).

[10] Plaintiffs' Second Amended Complaint also highlights information disseminated into the marketplace which allegedly "evinces the anticompetitive nature of the fraudulently obtained patents," which the Court finds circumstantial evidence of intent.

The Court finds that while other entities exist in the expandable hose market, and while others have been subject to patent infringement suits by Defendants (such as Telebrands), Plaintiffs' injury is sufficiently direct. While the Second Amended Complaint seems to suggest that Telebrands could be a more "directly injured" party, the Court's focus in determining violations of ***antitrust law*** is in harm to the competition, not to a specific competitor. At the pleading stage, the Court finds this factor sufficiently pleaded. Finally, the Court cannot identify a substantial potential for duplicative recovery or complex apportionment of damages at this stage of the litigation.

VI. Antitrust Immunity

The Court next addresses whether Defendants are immune from antitrust liability. Both motions claim Defendants are immune from an antitrust claim as a basis for dismissal. **[**32]** "As a general rule, behavior conforming to the patent laws oriented towards procuring or enforcing a patent enjoys immunity from the antitrust laws." *Unitherm Food Sys. v. Swift-Eckrich, Inc., 375 F.3d 1341, 1356 (Fed. Cir. 2004)*, rev'd on other grounds, *546 U.S. 394, 126 S. Ct. 980, 163 L. Ed. 2d 974 (2006)*. "But this immunity is [not] absolute." Id. In *Walker Process Equipment, Inc. v. Food Machinery & Chemical Corp., 382 U.S. 172, 86 S. Ct. 347, 15 L. Ed. 2d 247* ***[*513]*** *(1965)*, "[t]he Supreme Court recognized that an inventor who obtains a patent by defrauding the patent office deserves no immunity." *Unitherm Food, 375 F.3d at 1356*.

"In Walker Process, the Supreme Court held that a plaintiff could bring an action under *§ 2 of the Sherman Act* based on the alleged maintenance and enforcement of a fraudulently-obtained patent." *Transweb, LLC v. 3M Innovative Props. Co., 812 F.3d 1295, 1306 (Fed. Cir. 2016)* (citing *Walker Process, 382 U.S. at 173-74*). "In order to prevail on a Walker Process claim, the antitrust-plaintiff must show two things: first, that the antitrust-defendant obtained the patent by knowing and willful fraud on the patent office and maintained and enforced the patent with knowledge of the fraudulent procurement; and second, all the other elements necessary to establish a Sherman Act monopolization claim." Id. (citing *Ritz Camera & Image v. SanDisk Corp., 700 F.3d 503, 506 (Fed. Cir. 2012))*.[11]

A. First Prong of Walker Process: Knowing and Willful Fraud

"[A] finding of Walker Process fraud . . . must be based on independent and clear evidence of deceptive intent together with a clear showing of reliance, i.e., that the patent **[**33]** would not have issued but for the misrepresentation or omission." *Nobelpharma, 141 F.3d at 1071*. The following elemental test has been provided by the Federal Circuit to govern the finding of Walker Process fraud: "(1) that a false representation of a material fact was made, (2) with the intent to deceive, (3) which induced the deceived party to act in justifiable reliance on the misrepresentation, and (4) which caused injury that would not otherwise have occurred." *C.R. Bard, Inc. v. M3 Sys., 157 F.3d 1340, 1364 (Fed. Cir. 1998)*; accord *In re Thalomid & Revlimid Antitrust Litig., No. 14-6997, 2015 U.S. Dist. LEXIS 177541, 2015 WL 9589217, at *11 (D.N.J. Oct. 29, 2015)*.

The Southern District of Florida found the original complaint in this case did not state a plausible Walker Process fraud claim. The court found as follows:

> Here, in the Complaint, Plaintiffs allege generally that Defendant Mr. Berardi failed to disclose to the PTO "proper identification of inventorship and key prior art" when it was known that the "claimed features were from the prototypes presented by Ragner Technology." However, as plainly indicated on the face of the '941, '942, and '776 patents issued to Defendant Mr. Berardi, Plaintiff Ragner's '527 and '448 patents were considered during the prosecution of Defendant Mr. Berardi's patents. As such, Plaintiffs cannot establish that had the PTO been aware of Ragner's patents, Defendant Mr. Berardi's **[**34]** patents would not have issued.
> Further, Plaintiffs do not identify with particularity what other "key prior art" Defendant Mr. Berardi omitted. Although Plaintiffs allege that Plaintiff Ragner disclosed to Defendants "specific engineering diagrams, ideas . . . manufacture knowhow, concepts related to its prototypes of Microhose product," Plaintiffs do not identify what

[11] As stated above, the Court applies Federal Circuit law to the fraud prong and Third Circuit law to the monopolization prong.

> those concepts were or which, if any, were withheld from the PTO. Likewise, Plaintiffs have not presented particularized allegations that but for omission of these unidentified ideas, the PTO would not have granted the patents to Defendant Mr. Berardi.

[*514] (citations omitted). The Court finds the Second Amended Complaint cured those defects highlighted by the Southern District of Florida. The Court will address each element of a Walker Fraud claim in turn.

1. False Representation of a Material Fact

The Court finds Plaintiffs sufficiently alleged a false representation of a material fact. Plaintiffs' Second Amended Complaint alleges Mr. Berardi failed to disclose the proper identification of inventorship and key prior art. Plaintiffs highlight the following specific misrepresentations in the Second Amended Complaint:

- "Mr. Berardi **[**35]** filed an Oath and Declaration with the United States Patent and Trademark Office on November 4, 2011 representing that he was the inventor of the expandable and retractable hose that is the subject of the '941 patent, despite knowing that Mr. Ragner was the inventor of the subject of the '941 patent."
- "Mr. Berardi filed an Oath and Declaration with the United States Patent and Trademark Office on June 6, 2012 representing that he was the inventor of the expandable and retractable hose that is the subject of the '942 patent, despite knowing that Mr. Ragner was the inventor of the subject of the '942 patent."
- "On August 15, 2012, Mr. Berardi, during an in-person conference, 'presented a video showing how Mr. Berardi initially manufactured the hose' without informing the examiner that he obtained such information from Mr. Ragner regarding creation of the hose under terms of non-disclosure."

- "Mr. Berardi further 'pointed [to] differences between the [pending claims] and the Ragner et al. reference, mainly the fact that the inner and outer layers of the Ragner et al. hose are bonded together and that the outer layer is plastic material, wherein the [pending claims'] outer layer is formed of a fabric material.'" (alterations in **[**36]** original).
- "Mr. Berardi failed to inform the patent examiner that Mr. Ragner explained, under terms of non-disclosure, that the outer cover of the '527 invention could include a fabric cover, and that the inner and outer layer need not be bonded."

The Court finds these allegations sufficient to show a false representation of a material fact. It is also obvious to the Court that such false representations were with regard to a material fact, i.e., the proper identification of inventorship and prior art, which is clearly a predominant concern in approving a patent. See, e.g., *PerSeptive Biosystems, Inc. v. Pharmacia Biotech, Inc., 225 F.3d 1315, 1322-23 (Fed. Cir. 2000)* (finding a district court did not abuse its discretion in finding inequitable conduct based on "falsehoods, misrepresentations and omissions . . . directed towards a central issue - whether the named inventors were the sole inventors" and based on the inventorship being material).

2. Intent to Deceive

"Walker Process intent may be inferred from the facts and circumstances of a case . . . ." *Dippin' Dots, 476 F.3d at 1347*. "[A] misrepresentation or omission must evidence a clear intent to deceive the examiner and thereby cause the PTO to grant an invalid patent." *Nobelpharma, 141 F.3d at 1070*.

The Court finds the allegations contained in Plaintiffs' Second Amended Complaint **[**37]** make a plausible showing of Defendants' intent to deceive. Assuming Plaintiffs' allegations regarding the content of the August 23, 2011 meeting and **[*515]** the above allegations to be true, as this Court must in considering a motion to dismiss, the Court finds sufficient circumstantial evidence of intent, as Defendants, from their attendance at the August 23, 2011 meeting, could not claim ignorance of the disclosures made by Plaintiffs at the August 23, 2011 meeting.

3. Reliance and Injury

The Court similarly finds Plaintiffs have made a plausible showing of both reliance by the Patent Office and that the injury would not have otherwise occurred but for Defendants' fraudulent actions. Plaintiffs' Second Amended Complaint alleges "[t]he USPTO relied on Defendant Mr. Berardi's material false statements and omission as a principal reason for allowing Defendant Mr. Berardi's patent claims to issue." It further alleges that, "[b]ut for these material misrepresentations regarding the scope of the invention disclosed in the '527 patent . . . the '941 and '942 patents would not have issued."

Specifically, Plaintiffs focus on the Office Action initially rejecting the claims based on consideration of the '527 patent. Plaintiffs indicate that, **[**38]** after this initial rejection, Defendants made their alleged fraudulent representations, which resulted in the issuance of the patents to Mr. Berardi. The Court finds these allegations sufficient at this pleading stage.

B. Second Prong of Walker Process: Sherman Act Monopolization Claim

1. Conspiracy to Monopolize

Plaintiffs' monopolization claim arises under *§ 2 of the Sherman Act* as a "conspiracy to monopolize."[12] Both motions argue Plaintiffs fail to state a claim for conspiracy to monopolize.

"A *Section 2* conspiracy claim has four elements: (1) an agreement to monopolize; (2) an overt act in furtherance of the conspiracy; (3) a specific intent to monopolize; and (4) a causal connection between the conspiracy and the injury alleged." *Howard Hess Dental Labs. Inc. v. Dentsply Int'l, Inc., 602 F.3d 237, 253 (3d Cir. 2010)*.

The Court starts with the first prong - an agreement to monopolize. "[A] plaintiff must establish the existence of an agreement, sometimes also referred to as a 'conspiracy' or 'concerted action.'" *W. Penn Allegheny Health Sys., 627 F.3d at 99*. "An agreement exists when there is a unity of purpose, a common design and understanding, a meeting of the minds, or a conscious commitment to a common scheme." Id. "A plaintiff may plead an agreement by alleging direct or circumstantial evidence, or a combination of the **[**39]** two." Id.

The Court finds Plaintiffs pleaded sufficient circumstantial evidence of an agreement to monopolize. Defendants were all present at the August 23, 2011 meeting - National Express by way of Kelly. All Defendants failed to execute written non-disclosure agreements, despite all agreeing to execute such agreements at the August 23, 2011 meeting. Mr. Berardi allegedly obtained the '941, '942, and '776 patents and then Blue Gentian, of which Mr. Berardi is a managing member, granted National Express the exclusive license to market and sell the '941, '942, and '776 patents. The Court finds this sufficient, non-conclusory, circumstantial evidence of an agreement between Defendants. The Court finds these events also satisfy the second prong, as they similarly show an overt act - in fact, several overt acts - in **[*516]** furtherance of the conspiracy on the part of all Defendants.

The Court now turns to the specific intent prong. "Specific intent is an essential element of a conspiracy to monopolize claim." *Howard Hess Dental Labs., 602 F.3d at 257* (citing *Bonjorno v. Kaiser Aluminum & Chem. Corp., 752 F.2d 802, 807 (3d Cir. 1984))*. "It means 'an intent which goes beyond the mere intent to do the act.'" Id. (quoting *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 602, 105 S. Ct. 2847, 86 L. Ed. 2d 467 (1985))*. "In other words, the defendant must have 'intended to achieve an illegal monopoly.'" Id. (quoting Joseph P. Bauer & William H. Page, **[**40]** II, Kintner's Federal ***Antitrust Law*** § 14.40, at 423 (2002)). "Specific intent in the antitrust context may be inferred from a defendant's unlawful conduct." Id.

---

[12] Alternatively, Plaintiffs' Second Amended Complaint brings a claim for attempt to monopolize, which this Court also addresses below.

Plaintiffs' Second Amended Complaint pleads that

> Defendants have conspired to monopolize the expandable hose market . . . with specific intent to monopolize by knowingly and willfully omitting and misrepresenting facts in contradiction of the terms of confidentiality and non-disclosure and in connection with the filing and prosecution of the patent applications which ultimately issued as the '941, '942, and '776 patents.

The Court finds specific intent can be inferred from Defendants' alleged unlawful conduct. The filing of these lawsuits, which Plaintiffs' contend are fraudulent and consequently meritless, evinces an intent to drive others out of the marketplace.

The Court similarly finds the third prong - a causal connection between the conspiracy and the injury alleged - has been satisfied for the same reasons identified with regard to antitrust standing.[13]

2. Attempt to Monopolize

The Court also addresses Plaintiffs' alternative claim for attempt to monopolize. "To prevail on an attempted monopolization claim under *§ 2 of the Sherman Act*, 'a plaintiff must **[**41]** prove that the defendant (1) engaged in predatory or anticompetitive conduct with (2) specific intent to monopolize and with (3) a dangerous probability of achieving monopoly power.'" *Queen City Pizza, 124 F.3d at 442* (quoting *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 456, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993))*.

The Court finds the first prong - engagement in predatory or anticompetitive conduct - satisfied by the Second Amended Complaint's allegation that Defendants "have used the fraudulently obtained '941, '942, and '776 patents to restrain competition in part by suing Plaintiff Tristar Products and other competitors claiming infringement and threatening their customers." As for the second prong of specific intent, the Court adopts the same conclusion as under the conspiracy to monopolize claim.

[*517] Finally, the Court addresses the third prong - a dangerous probability of achieving monopoly power. "[P]rov[ing] a dangerous probability of actual monopolization . . . has generally required a definition of the relevant market and examination of market power." *Spectrum Sports, 506 U.S. at 456*; accord *Barr Labs., Inc. v. Abbott Labs., 978 F.2d 98, 112 (3d Cir. 1992)* ("[A] dangerous probability of monopoly may exist where the defendant firm possesses a significant market share when it undertakes the challenged anticompetitive conduct." (quoting *Int'l Distrib. Ctrs., Inc. v. Walsh Trucking Co., 812 F.2d 786, 790 (2d Cir. 1987)))*. While "[d]emonstrating a particular market share alone is not the only yardstick **[**42]** by which courts measure a dangerous probability of success, . . . courts have found that a demonstration of 35 % market share is sufficient to demonstrate a dangerous probability of success." *Kellam Energy, Inc. v. Duncan, 668 F. Supp. 861, 891 (D. Del. 1987)* (citing *Outboard Marine Corp. v. Pezetel, 461 F. Supp. 384, 404-406 (D. Del. 1978))*.

Without properly pleading the relevant market, the Court is unable to determine whether there is a dangerous probability of success. However, the Court addresses its concerns regarding the current allegations to guide Plaintiffs in a possible amendment of their complaint.

The following allegations in the Second Amended Complaint are relevant to this analysis:

---

[13] The Southern District of Florida found the initial complaint did not allege a plausible conspiracy claim "because Plaintiffs have not alleged sufficient facts showing an 'anticompetitive effect' in the relevant market." The court found only "conclusory allegation[s] that competition ha[d] been harmed." However, this decision was reached by a court in the Eleventh Circuit, which applies the following test: (1) an agreement to restrain trade, (2) deliberately entered into with the specific intent of achieving a monopoly rather than a legitimate business purpose, (3) which could have had an anticompetitive effect, and (4) the commission of at least one overt act in furtherance of the conspiracy. As stated above, the Court applies its own Circuit's interpretation of the governing law.

The Southern District of Florida did, however, find "Plaintiffs ha[d] sufficiently alleged an agreement to conspire, overt acts, and Defendants' intent," as this Court finds here.

> Defendant National Express and Defendant Berardi (through Blue Gentian, LLC, an entity of which Defendant Berardi is the sole member) have used the fraudulently obtained '941, '942, and '776 patents to restrain competition in part by suing Plaintiff Tristar Products and other competitors claiming infringement and threatening their customers. . . . Indeed, various New Jersey cases between Telebrands, Inc. and Blue Gentian, LLC over the fraudulently obtained patents have settled, which evinces an additional restraint on competition, as, upon information and belief, Telebrands, Inc. currently occupies over 70% of the relevant expandable and contractible **[**43]** hose marketshare. Defendant National Express and Blue Gentian, LLC have used the fraudulently obtained '941, '942, and '776 patents to fraudulently obtain international patents to further restrain competition internationally in part by suing Plaintiff Tristar Products and other competitors claiming infringement and threatening their customers in various international jurisdictions.
> . . . . In addition, by purporting to license the fraudulently obtained patents to Telebrands, Inc., Defendants have committed another anticompetitive act which, due to Telebrands, Inc. substantial position in the marketplace, carries a dangerous probability that Defendants will succeed in their attempt to achieve "monopoly power."

Plaintiffs argue in their opposition brief that the Second Amended Complaint pleads that, "with the settlement announced by Defendants, Defendants control in excess of 70% of the marketplace, with additional lawsuits pending to control the remaining market share. Indeed, according to Defendants, Telebrands claimed to occupy 90% of the marketplace, perhaps securing a monopoly when added to Defendants' own market share."

In its reading of the Second Amended Complaint, the Court finds no indication that **[**44]** Defendants control seventy percent of the marketplace. The Court fails to see how pleading Telebrands' marketshare as seventy percent is equivalent with pleading that Defendants' marketshare is seventy percent. That a settlement exists in a related patent infringement suit says very **[*518]** little, if anything, about Defendants' market power and resulting ability to injure competition. Even with the allegation that these cases with Telebrands have settled, this alone does not tell us the effect such settlements had on Defendants' marketshare.

This failure to sufficiently plead marketshare is significant, but not necessarily fatal to the claim.

> In a determination of dangerous probability - and remembering that we are only considering "the face of the complaint" - factors such as significant market share coupled with anticompetitive practices, barriers to entry, the strength of competition, the probable development of the industry, and the elasticity of consumer demand may be considered.

Broadcom Corp. v. Qualcomm Inc., 501 F.3d 297, 318 (3d Cir. 2007). "No single factor is dispositive." Id. This is a "fact-sensitive inquiry, in which market share is simply one factor." *Id. at 319*.

The Court does not find the Second Amended Complaint sufficiently pleads these other factors. **[**45]** "Courts typically should not resolve this question at the pleading stage 'unless it is clear on the face of the complaint that the "dangerous probability" standard cannot be met as a matter of law.'" *Id. at 318* (quoting *Brader v. Allegheny Gen. Hosp., 64 F.3d 869, 877 (3d Cir. 1995))*. While the Court already finds this claim must be dismissed due to failure to sufficiently plead the relevant market, these additional concerns should be addressed in any amended complaint.[14]

VII. Conclusion

In light of the Court's dismissal of the antitrust claim, the Court declines at this time to address the arguments for dismissal of the state law claims. Defendants will be granted leave to seek the dismissal of those claims in the event Plaintiffs adequately plead a federal claim.

---

[14] The Southern District of Florida found Plaintiffs did not allege harm to competition sufficiently: "Here, Plaintiffs allege harm to themselves by having to defend against allegedly baseless infringement suits, but there are no factual allegations addressing how this conduct has harmed competition in the market or could lead to monopolization of the market." The Court further found Plaintiffs "failed to allege sufficient facts to demonstrate a dangerous probability that Defendants might have succeeded in their attempt to achieve monopoly power."

In their opposition briefs, Plaintiffs request that, if the Court finds dismissal of any of the claims appropriate, that the Court grant leave to file an Amended Complaint.[15] The Court will grant that request.

Unless amending as a matter of course, *Federal Rule of Civil Procedure 15* provides "a party may amend its pleading only with the opposing party's written consent or the court's leave," which the court should "freely give . . . when justice so requires." *Fed. R. Civ. P. 15(a)(2)*. The Third Circuit dictates that amendments should "be granted freely," stating **[**46]** a preference for decisions made "on the merits rather than on technicalities." *Dole v. Arco Chem. Co., 921 F.2d 484, 486-87 (3d Cir. 1990)*.

"[A] refusal of a motion for leave to amend must be justified. Permissible justifications include: (1) undue delay; (2) bad faith or dilatory motive; (3) undue prejudice to the opposition; (4) repeated failures to correct deficiencies with previous amendments; and (5) futility of the amendment." *Riley v. Taylor, 62 F.3d 86, 90 (3d Cir. 1995)* (citation omitted).

[*519] The Court will grant Plaintiffs leave to amend to attempt to cure the pleading deficiencies identified above. The Court does not find undue delay or bad faith by Plaintiffs. The Court further does not find undue prejudice will befall Defendants in allowing another amendment. While Plaintiffs have twice amended their complaint in this matter already, the first amendment was under Eleventh Circuit ***antitrust law***, and the second amendment was for the purpose of pleading personal jurisdiction in New Jersey.[16] The Court further does not find amendment futile. Plaintiffs will be granted leave to amend.[17]

An appropriate Order will be entered.

Date: March 22, 2018

---

[15] Alternatively, Plaintiffs request that the Court dismiss the cause of action without prejudice, arguing that "[t]he causes of action listed necessarily involve secrecy and intent to deceive, and therefore finding specific facts of such causes of action has proven difficult."

[16] This Court's conclusions differed from the Southern District of Florida's in many respects due to the different law being applied. While the parties are expected to apply and understand how Third Circuit law applies to these facts, the unique procedural posture of this case could have left Plaintiffs unaware of the importance of re-pleading certain elements of their claims such that allowing leave to amend is appropriate.

[17] In the event Plaintiffs refile their amended complaint with their state law claims and a similar motion to dismiss is filed, the parties are directed to brief the issues of Florida law's treatment of a breach of contract claim concerning an oral contract and whether, under Florida law, an implicit representation based on a party's actions is sufficient for common law fraud, as opposed to an explicit statement.

Additionally, the Court notes there is a split of authority as to whether a Walker Process claim is a compulsory counterclaim which must be pled in a patent infringement suit. See *Critical-Vac Filtration Corp. v. Minuteman Int'l Inc., 233 F.3d 697 (2d Cir. 2000)* (compulsory counterclaim); *FilmTec Corp. v. Hydranautics, 67 F.3d 931 (Fed. Cir. 1995)* (compulsory counterclaim); *Med. Mut. of Ohio, Inc. v. Braintree Labs., 2011 U.S. Dist. LEXIS 74996 (D. Del. July 12, 2011)* (compulsory counterclaim); *Am. Packaging Corp. v. Golden Valley Microwave Foods, 1995 U.S. Dist. LEXIS 5918 (E.D. Pa. Apr. 28, 1995)* (compulsory counterclaim) aff'd without opinion by *1996 U.S. App. LEXIS 12061 (3d Cir. 1996)*. But see *Tank Insulation Int'l, Inc. v. Insultherm, Inc., 104 F.3d 83 (5th Cir. 1997)* (permissive counterclaim); *Hydranautics v. FilmTec Corp., 70 F.3d 533 (9th Cir. 1995)* (permissive counterclaim). The Court need not resolve the split but observes that if, consistent with the rulings of other districts within this Circuit, the Court were to hold that the Walker Process claim is a compulsory counterclaim, such holding would further support dismissal of the claim. If the complaint is amended, the parties are further directed to brief this issue in any motions to dismiss that might follow.

[EDITOR'S NOTE: The following court-provided text does not appear at this cite in F. Supp. 3d.]

[*none] ORDER

HILLMAN, District Judge

For the reasons expressed **[**47]** in the Court's Opinion filed today,

IT IS on this 22nd day of March, 2018

ORDERED that Defendants Cheryl Berardi and Michael Berardi's Motion to Dismiss [74] is hereby **GRANTED** pursuant to *Federal Rule of Civil Procedure 12(b)(6)*; and it is further

ORDERED that Mrs. Berardi is dismissed as a party defendant and the claims against her are dismissed without prejudice for lack of personal jurisdiction; and it is further

ORDERED that Defendant National Express, Inc.'s Motion to Dismiss [75] is hereby **GRANTED** pursuant to *Federal Rule of Civil Procedure 12(b)(6)*; and it is further

ORDERED that Plaintiffs' Motion for Leave to File Reply [132] is **GRANTED**; and it is further

ORDERED that Plaintiffs' claims are dismissed without prejudice and Plaintiffs are granted leave to file an amended complaint within thirty days of this Order; and it is further

ORDERED that failure to file an amended complaint within thirty days of this Order will result in the dismissal of the claims with prejudice.

Counsel: **[*1]** For Innovation Marine Protein, LLC, an Oregon limited liability company, Front St. Marine LLC, an Oregon limited liability company, Plaintiffs: Michael E. Haglund, LEAD ATTORNEY, Eric J. Brickenstein, Haglund Kelley LLP, Portland, OR; Michael K. Kelley, Haglund Kelley, LLP, Portland, OR.

For Frank Dulcich, Pacific Seafood Group, Dulcich, Inc., an Oregon corporation, TNMP Properties, LLC, a Delaware limited liability company, CS Properties Holding Company, LLC, a Delaware limited liability company, Defendants: Rachel C. Lee, Randolph C. Foster, Timothy W. Snider, Stoel Rives LLP, Portland, OR.

For Trident Seafoods Corporation, a Washington corporation, Defendant: Brian P. Samuelson, Thomas R. Johnson, LEAD ATTORNEYS, Perkins Coie, LLP, Portland, OR; David J. Burman, LEAD ATTORNEY, PRO HAC VICE, Perkins Coie, LLP (Seattle), Seattle, WA.

For California Shellfish Company, Inc., a California corporation, Defendant: Nicholas H. Pyle, LEAD ATTORNEY, Dennis P. Rawlinson, Miller Nash Graham & Dunn LLP, Portland, OR.

Judges: Michael McShane, United States District Judge.

Opinion by: Michael McShane

Opinion

OPINION AND ORDER

MCSHANE, Judge:

Plaintiffs Innovation Marine Protein, LLC, an Oregon limited liability company (Innovation **[*2]** Marine), and Front St. Marine LLC, an Oregon limited liability company (Front Street) bring this antitrust action under *Sections 1* and *2* of the Sherman Act against defendants Pacific Seafood Group (Pacific Seafood)[1], California Shellfish Company (Cal-Shell), and Trident Seafoods Corporation (Trident). Defendants move to dismiss for, among other reasons, lack of standing. ECF No. 21, 24-25. Because Innovation Marine and Front Street lack standing, and because leave to amend would be futile, this action is DISMISSED, with prejudice.

BACKGROUND[2]

Plaintiff Front Street is owned by Stephen and Janet Webster, two long-term residents of Newport, Oregon. "The corporate mission of Front St. Marine, LLC is to *acquire and develop* Newport waterfront industrial property *for the express purpose of building the infrastructure* that will diversify the seafood processing sector on the central Oregon Coast, thus bringing the benefits of robust competition in the form of value-added seafood processing, increased ex vessel prices paid to fishermen and more family wage jobs to Lincoln County." FAC ¶ 18 (emphasis added). "On December 21, 2013, in an effort to secure adequate industrial property on Yaquina Bay in Newport **[*3]** *to build seafood processing infrastructure*, Stephen Webster of plaintiff Front St. Marine LLC forwarded an offer to purchase two parcels owned by [Cal-Shell]." FAC ¶ 49 (emphasis added). Webster made a cash offer of $900,000 for either parcel or $1.8 million for both parcels. FAC ¶49. Included with the offer was "a proposed form of purchase and sale agreement to facilitate a speedy closing of the transaction." FAC ¶ 49. On February 24, 2014, Cal-Shell informed Webster that "'We currently are not interested in the sale' of the two properties." FAC ¶ 50.

15 months later, without contacting Webster, "Cal-Shell sold its former seafood processing facility and operational ice plant to [Pacific Seafood] for just $1,037,500, a 42% discount to the December 2013 offer from Front St. Marine." FAC ¶ 52. "Cal-Shell and Pacific Seafood Group conspired to avoid selling the property to Front St. Marine in order to eliminate the potential for new seafood processor competition at the site." FAC ¶ 52.

For its claim under *Section 1* of the Sherman Act, plaintiffs allege:

> As part of the Pacific Seafood Group led conspiracy to acquire all available seafood processing facilities from its existing competitors on the West **[*4]** Coast when any particular competitor is interested in disposing of such assets, [Pacific Seafood and Cal-Shell] conspired to deprive [Front Street] *of the opportunity to develop seafood processing infrastructure in Newport* in 2014-15.

FAC 81 (emphasis added).

"But for the illegal conspiracy to restrain trade implemented by [defendants, Front Street] would have acquired the Cal-Shell waterfront property in Newport *and successfully created the infrastructure for new seafood processor competition* in Newport by the end of 2015." FAC ¶ 87 (emphasis added).

For its claim under *Section 2* of the Sherman Act, plaintiffs allege that defendants "conspired to monopolize the Newport seafood input markets for trawl caught groundfish, onshore whiting and pink shrimp by conspiring to transfer Trident and Cal-Shell's seafood processing assets in Newport to Pacific Seafood." FAC ¶ 91.

Front Street neither alleges nor seeks any economic damages. Instead, on both claims:

> Plaintiff Front St. Marine seeks an order from this Court requiring Pacific Seafood Group to divest itself of the Cal-Shell property that it acquired pursuant to an illegal conspiracy and to transfer that property to plaintiff for the same price paid **[*5]** by [Pacific Seafood] to Cal-Shell. Plaintiff Front St. Marine further seeks interim injunctive relief prohibiting Pacific Seafood from altering the Cal-Shell property during the pendency of this case.

FAC ¶¶ 88, 98.

---

[1] Pacific Seafood, engaged in seafood processing, sales, and distribution, consists of more than 55 entities owned by defendants Frank Dulcich and Dulcich, Inc. First Am. Comp (or "FAC"). ¶ 19.

[2] In resolving the pending motions, I assume the truth of all factual allegations in the complaint and FAC.

Turning to the other plaintiff:

> Plaintiff Innovation Marine Protein, LLC is an Oregon limited liability company formed for the purpose of acquiring and operating Trident's seafood processing assets in Newport, Oregon including a fishmeal plant and seafood processing facility. Innovation Marine Protein is owned by Richard Carroll and Edward Backus. Prior to organizing Innovation Marine Protein in 2017, Richard Carrol and Edward Backus formed a partnership in 2016 for the purpose of acquiring a fishmeal plant and associated seafood processing facilities. It was always contemplated by Mr. Carroll and Mr. Backus that their partnership would be converted into a limited liability company which would own and operate the fishmeal plant and seafood processing facilities.

FAC ¶ 13.

Carrol and Backus have extensive experience in the fishing industry. "Richard Carroll has over 40 years of experience in the design, construction and operation of whiting and surimi processing plants and fishmeal **[*6]** plants." FAC ¶ 14.[3] "Edward Backus has 20 years of experience in fisheries policy and conservation, economic development, and community fisheries finance." FAC ¶ 16.[4]

Trident "*refused to negotiate* with a principal of plaintiff Innovation Marine Protein, LLC to sell its Newport seafood processing facilities and then conspired with Pacific Seafood to develop a two-step scheme to transfer those assets to Pacific Seafood." FAC ¶ 3 (emphasis added). The FAC proceeds to outline Innovation Marine's attempt to enter the Newport seafood processing market in order to potentially compete with Pacific Seafood:

> 32. On two occasions in November 2016, Richard Carroll met with Trident COO Mike Luchino *to express interest in and pursue the potential purchase of Trident's Seafood processing assets* in Newport including both the meal plant and the surimi processing plant. These discussions continued into December 2016 and were of such a serious nature that Mr. Carroll disclosed that he had experience with an advanced technology that would dramatically increase the profitability of the meal plant by enabling it to produce food grade or nutraceutical protein rather than being limited to fishmeal products used **[*7]** in aquaculture.
>
> 33. In January 2017, Mr. Carroll told Mr. Luchino that he was *interested in discussing a price for the trident assets in Newport and negotiating a final deal as soon as possible*. Mr. Luchino promised to contact Trident's [President] and CEO, Joe Bundrant to determine whether Trident was seriously interested in selling these assets. In an email dated January 9, 2017, Mr. Luchino advised Mr. Carroll that he had talked with Mr. Bundrant, who is defendant Frank Dulcich's brother-in-law, that Trident was not interested in selling its assets and "things are at status quo for now."
>
> 34. The "status quo" did not last long. Shortly after rebuffing Mr. Carroll, *who would have formed plaintiff Innovation Marine Protein at that time if Trident had been willing to negotiate a deal*, Trident and Pacific Seafood Group conspired to develop a two-step plan to transfer Trident's assets to Pacific Seafood Group in a manner that was designed to evade antitrust scrutiny. First, Trident secretly sold its meal plant to Pacific Seafood Group and the co-conspirators concocted the theory that this transaction was necessary for PSG to support its seafood processing operations in Newport and therefore **[*8]** did not raise antitrust concerns. In fact, with the acquisition of Trident's fishmeal plant, Pacific Seafood Group increased its share of the fishmeal plant processing capacity on the West Coast to over 90%. Second, the co-conspirators developed a plan under which PSG would acquire the surimi processing plant under ***antitrust law***'s "failing business exception."

FAC (emphasis added).

---

[3] One could read the FAC as portraying Carroll as perhaps having more experience in the design and construction of seafood processing plants as opposed to experience actually operating such plants. For the purpose of this opinion, I assume Carroll has extensive experience actually operating seafood processing plants.

[4] The FAC is silent as to any experience Backus has in operating seafood processing plants. One assumes Backus' role was to secure financing. However, as discussed below, there are no allegations Backus secured any financing for either the partnership or Innovation Marine.

Plaintiffs allege Trident sold the fishmeal plant to Pacific Seafood in a secret sale on April 10, 2017, FAC ¶ 3, at price below market value, FAC ¶ 38. Pacific Seafood and Trident then used the May 15, 2017 start of the pacific whiting season (and the 100 or so seasonal jobs that go with it), "to pressure fishermen, the local community, Oregon legislators and regulators into approving an obviously anti-competitive takeover of the surimi plant by monopolist Pacific Seafood." FAC ¶ 3. A shell company owned by Pacific Seafood "either holds an option to acquire the Trident surimi processing plant assets or has already closed on that deal and owns those assets outright." FAC ¶ 2. After Pacific Seafood closed the transactions with Cal-Shell and Trident, it held over 95% of the seafood markets for trawl caught groundfish, **[*9]** onshore whiting and pink shrimp in the Newport market. FAC ¶ 8.

On its Sherman Act *Section 1* claim, Innovation Marine alleges:

> 80. As part of the Pacific Seafood Group led conspiracy to acquire all available seafood processing facilities from its existing competitors on the West Coast when any particular competitor was interested in disposing of such assets, defendants Pacific Seafood Group and Trident Seafoods Corporation conspired to deprive plaintiff Innovation Marine Protein, LLC of the opportunity to enter the seafood processing and meal plant business in Newport in time to commence operations during the 2017 whiting season.
>
> * * * *
>
> 83. But for the illegal conspiracy to restrain trade implemented by PSG and Trident, and Cal-Shell, plaintiff Innovation Marine Protein LLC would have acquired the Trident processing plant and meal plant assets and successfully entered the seafood processing business in Newport prior to the beginning of the 2017 whiting season. The loss of that opportunity has caused damages to plaintiff Innovation Marine Protein estimated at $2 million in lost net profits in 2017.
>
> 84. Plaintiff Innovation Marine Protein seeks an order from this Court requiring Pacific Seafood Group **[*10]** to divest itself of the Trident property that it acquired pursuant to an illegal conspiracy and to transfer that property to plaintiff for the same price paid by PSG to Trident. Plaintiff Innovative Marine Protein further seeks interim injunctive relief prohibiting Pacific Seafood from altering the Trident property during the pendency of this case.

FAC.

Plaintiffs allege the relevant product markets are the west coast seafood markets for groundfish, pacific onshore whiting and pacific coldwater shrimp. FAC § IV. Plaintiffs describe Pacific Seafood's expansion of monopoly power over the past decade through numerous anti-competitive acquisitions and vertical integrations. FAC ¶¶ 29-30. As relevant here:

> In early 2014, Pacific Seafood Group established a conspiracy designed to facilitate the acquisition by Pacific Seafood Group of any available seafood processing facility from its existing competitors on the West Coast when any particular competitor was interested in disposing of such assets. Pacific Seafood Group promoted this conspiracy as advancing the common interests of the seafood processing plant seller and Pacific Seafood Group by avoiding the potential for a new market entrant that **[*11]** would disrupt the highly concentrated West Coast markets for trawl-caught groundfish, shoreside-delivered whiting and pink shrimp. During the period of 2014-2017, this conspiracy included at least Ocean Gold Seafoods, Inc. and its affiliates in the Westport Market, California Shellfish Company in the Newport market and Trident Seafoods in the Newport market.

FAC ¶ 31.

As noted, defendants moved to dismiss the complaint on multiple grounds. In response, plaintiffs sought leave to file the FAC.[5] As all antitrust plaintiffs must establish antitrust standing, I turn first to the question of whether Front Street and Innovation Marine have standing to bring these claims.

STANDARD OF REVIEW

---

[5] Plaintiffs originally alleged the two transactions were separate conspiracies, each involving Pacific Seafood. In the FAC, plaintiffs allege each transaction is one part of a single conspiracy between all three defendants to transfer all available seafood processing facilities of Trident and Cal-Shell to Pacific Seafood. FAC ¶ 31.

To survive a motion to dismiss under *Fed. R. Civ. P. 12(b)(6)*, a complaint must contain sufficient factual matter that "state[s] a claim to relief that is plausible on its face." *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. A claim is plausible on its face when the factual allegations allow the court to infer the defendant's liability based on the alleged conduct. *Ashcroft v. Iqbal, 556 U.S. 662, 663, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*. The factual allegations must present more than "the mere possibility of misconduct." *Id. at 678*.

When considering a motion to dismiss, the court must accept all allegations of material fact as true and construe those facts **[*12]** in the light most favorable to the non-movant, *Burgert v. Lokelani Bernice Pauahi Bishop Trust, 200 F.3d 661, 663 (9th Cir. 2000)*, but the court is "not bound to accept as true a legal conclusion couched as a factual allegation," *Twombly, 550 U.S. at 555*. If the complaint is dismissed, leave to amend should be granted unless the court "determines that the pleading could not possibly be cured by the allegation of other facts." *Doe v. United States, 58 F.3d 494, 497 (9th Cir. 1995)*.

DISCUSSION

Section 4 of the Clayton Act provides for a seemingly broad entitlement to damages, allowing treble damages to "any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws . . . ." *15 U.S.C § 15*.[6] Analyzing the legislative history of the Act, however, the Supreme Court concluded Congress did not intend to cast as wide a net as that implied by *Section 4*'s plain language. *Associated Gen. Contractors of California, Inc. v. California State Council of Carpenters, 459 U.S. 519, 535, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)* (citing *Blue Shield of Virginia v. McCready, 457 U.S. 465, 467-77, 102 S. Ct. 2540, 73 L. Ed. 2d 149 (1982))*. "Therefore, courts have constructed the concept of antitrust standing, under which they 'evaluate the plaintiff's harm, the alleged wrongdoing by the defendants, and the relationship between them,' to determine whether a plaintiff is a proper party to bring an antitrust claim." *American Ad Mgmt., Inc. v. Gen. Tel. Co. of California, 190 F.3d 1051, 1054 (9th Cir. 1999)* (quoting *Associated Gen., 459 U.S. at 535*).

In evaluating whether a plaintiff has antitrust standing, courts examine: (1) the nature of the plaintiff's alleged injury; that is, whether it was the type the antitrust **[*13]** laws were intended to forestall; (2) the directness of the injury; (3) the speculative measure of the harm; (4) the risk of duplicative recovery; and (5) the complexity in apportioning damages. *American Ad, 190 F.3d at 1054*. Although this determination involves a balancing of all the factors, the first factor, i.e., the nature of the plaintiff's alleged injury, is generally given the greatest weight. *Id. at 1055*.

I. Front Street is not a Market Participant

Defendants argue that because Front Street is not a participant in the markets for groundfish, pacific whiting, or pacific shrimp, it lacks antitrust standing. I agree. Nowhere does the FAC allege Front Street is engaged in seafood processing. Instead, the FAC reveals Front Street merely seeks waterfront property it can develop and lease to an actual seafood processor. Even read liberally, the FAC makes clear that Front Street is merely a potential landlord seeking a tenant who will compete in the relevant market.

The alleged conspiracy "prevented [Front Street] from *redeveloping a partially blighted property* with a working ice plant *into modern seafood processing facilities operated by new entrants*." FAC ¶ 2 (emphasis added). Front Street's "corporate mission" is not to **[*14]** process seafood or compete itself in the relevant market, but "to *acquire and develop* Newport waterfront industrial property *for the express purpose of building the infrastructure* that will diversify the seafood processing sector[.]" FAC ¶ 18 (emphasis added). Front Street sought Cal-Shell's waterfront parcels because those parcels provided an opportunity "to secure adequate industrial property on Yaquina Bay in Newport *to build seafood processing infrastructure*[.]" FAC ¶ 49 (emphasis added). Nowhere does Front Street allege defendants prohibited Front Street from processing seafood. Rather, defendants deprived Front Street only

---

[6] As discussed below, plaintiffs also seek injunctive relief under *Section 16*.

"*of the opportunity to develop seafood processing infrastructure* in Newport in 2014-15." FAC ¶ 81 (emphasis added). In fact, the FAC clearly states that Front Street does not process seafood on two other waterfront lots it owns. Instead, it leases those lots to Seawater Seafoods Company, a seafood processor. FAC ¶¶ 67-68. Front Street is not a market participant in the relevant markets.

Therefore, the question is whether a potential landlord or developer such as Front Street, who does not participate in the relevant market, has antitrust standing to bring claims **[*15]** challenging a conspiracy to exclude potential new entrants into the relevant market. Another Ninth Circuit case involving fishermen and seafood processors provides helpful guidance. *Eagle v. Star-Kist Foods, Inc., 812 F.2d 538 (9th Cir. 1987)*. In *Eagle*, crewmembers on vessels fishing for tuna brought antitrust claims against the canneries that purchased the tuna caught by the fishermen. "The central argument is that the canneries conspired to set tuna prices at artificially low levels resulting in a reduction of the wages paid to crewmembers and a loss of employment opportunities by them." *Id. at 539*. In looking at the nature of the alleged injury, the court noted "The requirement that the alleged injury be related to anticompetitive behavior requires, as a corollary, that the injured party be a participant in the same market as the alleged malefactors." *Id. at 540* (quoting *Bhan v. NME Hospitals, Inc., 772 F.2d 1467, 1470 (9th Cir. 1985))*.

> In the present case, in order to be a participant in the relevant market, the class members must have been either buyers or sellers of raw tuna. Both sides agree that the class members were not buyers. The alleged malefactors (the canneries) were the buyers. Thus, in order for the alleged injury to be of the type that antitrust laws were intended to forestall, the class members must prove **[*16]** that they were sellers in the raw tuna market. The district court held that the crewmembers were neither consumers nor competitors in the relevant market because they did not directly sell or purchase the tuna. Instead, they were employees of the vessel owners who negotiated and set the prices for the fish. The crewmembers argue that the method by which they were compensated made them sellers. They contend that "share" crewmembers actually own a percentage of the fish caught on a fishing voyage and are thereby sellers along with the vessel owners. Furthermore, the method by which "per tonnage" crewmembers' wages and the union's dues were calculated was so intertwined with the selling process that they, too, should be considered at least "indirect" sellers.
> The district court pointed out, however, after examining the union contract agreements between the union and fishing vessel owners, that:
>
> > "[n]either the crew of any such vessel nor the union have any rights to control or direct the operation of said vessel or the selling price of fish caught by said vessel. The owner shall have the sole and exclusive authority to determine where and at what price and under what terms and conditions **[*17]** fish caught by said vessel shall be sold and where catches shall be delivered."
>
> The crewmembers did not negotiate the prices with the canneries, the vessel owners did. The vessel owners are the requisite "sellers" in the relevant market, not the crewmembers or the union. Thus, the class members have not alleged the type of injury antitrust laws were intended to forestall, because the alleged anticompetitive conduct was directed at the vessel owners, not the crewmembers or the union.

Id. at 540-41 (alterations in original).

Front Street's relationship to the markets for groundfish, pacific whiting, or pacific shrimp is much more tenuous and indirect than that of the fishermen in *Eagle* to the tuna market. Front Street merely seeks to own the land (and future infrastructure) on which its prospective tenant will someday potentially compete with Pacific Seafood in the Newport markets for groundfish, pacific whiting, or pacific shrimp. Relevant markets are, of course, at the heart of any antitrust claim. After all, "the Sherman Act was enacted to assure customers the benefits of price competition, and our prior cases have emphasized the central interest in protecting the economic freedom of participants **[*18]** in the relevant market." *Associated Gen. Contractors, 459 U.S. at 538*.

Here, plaintiffs allege that defendants "conspired to monopolize the Newport seafood input markets for trawl caught groundfish, onshore whiting and Pacific shrimp by conspiring to transfer Trident and Cal-Shell's seafood processing assets in Newport to Pacific Seafood." FAC ¶ 91. The fishermen selling into those "input markets," forced to sell to Pacific Seafood, are the "customers" the Sherman Act was enacted to protect. *Associated Gen. Contractors, 459*

U.S. at 538. The other market participants are the processors who purchase that fish, i.e., Pacific Seafood and Front Street's future tenant. In its role as developer and future landlord to a seafood processor, however, Front Street will neither buy nor sell any fish.

Plaintiffs argue, "The nut of this case is that Plaintiffs' lost business opportunity was a consequence of defendants' illegal conspiracy." ECF No. 33 at 20. While that may be true, it is largely irrelevant to whether Front Street suffered any antitrust injury. *See* Eagle, 812 F.2d at 540 (noting the entire point behind the antitrust standing evaluation is "to determine whether a plaintiff, *who has suffered an injury which bears a causal connection to the alleged antitrust violation*, also satisfies the more demanding **[*19]** antitrust standing standard."). Plaintiffs appear to confuse the requirements for Article III standing with the "more demanding standard for antitrust standing." Lucas Automotive Eng'g v. Bridgestone/Firestone, Inc., 140 F.3d 1228, 1232 (9th Cir. 1998) (quoting Amarel v. Connell, 102 F.3d 1494, 1507 (9th Cir. 1997) (emphasis omitted)). But no one disputes that Front Street has Article III standing. Plaintiffs continue, "Put another way, unlike in *Lucas*, but for defendants' conspiracy to violate the antitrust laws, plaintiffs would not have been injured." ECF No. 33 at 20. In addition to flowing from defendants' conduct, however, Front Street's injury must be "of the type the antitrust laws were intended to prevent." American Ad, 190 F.3d at 1057.

> The Supreme Court's cases have also "emphasized the central interest [of the Sherman Act] in protecting the economic freedom of participants in the relevant market." Associated General, 459 U.S. at 538, 103 S.Ct. 897. We have derived from this principle the "corollary" that the injured party be a participant in the same market as the alleged malefactors." Bhan v. NME Hospitals, Inc., 772 F.2d 1467, 1470 (9th Cir. 1985). Antitrust injury requires the plaintiff to have suffered its injury in the market where competition is being restrained. Parties whose injuries, though flowing from that which makes the defendants' conduct unlawful, are experienced in another market do not suffer antitrust injury.

American Ad, 190 F.3d at 1057 (alterations in original). **[*20]**

Front Street's injury, if any, occurred in the Newport waterfront real estate market. *See* FAC ¶ 87 (But for conspiracy, Front Street "would have acquired the Cal-Shell waterfront property in Newport and successfully created the infrastructure for new seafood processor competition"). But Front Street would have suffered an identical alleged injury had Cal-Shell simply moth-balled the blighted plant, "redevelop[ed its own] partially blighted property . . . into a modern seafood processing facility[y]," FAC ¶ 2, or sold the property to a bowling alley developer. Because Front Street would have suffered the same alleged injury in those instances, its injury is not "of the type antitrust laws were intended to prevent." American Ad, 190 F.3d at 1057.

Front Street argues that even if it is not a market participant, it has standing because its injury is "'inextricably intertwined' with the injury defendants sought to inflict through their conspiracy, and it therefore falls 'within the area of congressional concern.' McCready, 457 U.S. at 484." ECF No. 33 at 25. I disagree. McCready had standing because that conspiracy targeted psychologists and McCready was "a consumer of psychotherapy services entitled to financial benefits under" her health plan **[*21]** and therefore "within the area of the economy . . . endangered by [that] breakdown of competitive conditions' resulting from" her health plan's refusal to reimburse. McCready, 457 U.S. at 480-81. Unlike cases finding a plaintiff's injury "inextricably intertwined" with an antitrust injury sought to be inflicted upon market participants, Front Street is not "a customer [] directly damaged by an act alleged to be in violation of the antitrust laws." Glen Holly Entm't Inc. v. Tektronix Inc., 352 F3d 367, 376 (9th Cir. 2003). No matter Front Street's "corporate mission," its lost opportunity to develop waterfront property it hoped to lease to a market participant is not "inextricably intertwined" with the harm defendants sought to impose on the west coast seafood markets for groundfish, pacific onshore whiting and pacific coldwater shrimp.[7]

[7] "While [landlords] have standing to challenge illegal restraints in *their* licensing or renting market, they generally lack standing to challenge restraints in other markets, including that served by their licensees or tenants." Phillip E. Areeda, Herbert Hovenkamp, et al., Anitrust Law, Vol. IIA, ¶ 351a (4th ed. 2013).

The second factor in evaluating a plaintiff's antitrust standing requires the court "to examine the directness or indirectness of the causal connection between the alleged injury and the alleged violation." *Eagle, 812 F.2d at 541*. "The chain of causation between the injury and the alleged restraint in the market should lead directly to the 'immediate victims of any alleged violation.'" *Id.* In *Eagle*, the court concluded that because the vessel owners control the negotiations **[*22]** with the canneries over the price of the tuna, the crewmembers were ordinary employees and any loss of wages of the crewmembers "is derived from any injury suffered by the vessel owners during the sale of the fish." *Id.* Although Front Street does not allege any economic damages—likely because any such damages would be far too speculative and derivative to recover—the policy considerations behind the antitrust laws demonstrates Front Street's injury, in antitrust terms, is indirect.

"[T]he existence of an identifiable class of persons whose self interest would normally motivate them to vindicate the public interest in antitrust enforcement diminishes the justification for allowing a more remote party such as the [plaintiffs] to perform the office of a private attorney general." *Id.* (quoting *Associated Gen. Contractors, 459 U.S. at 542*) (second alteration in original). The vessel owners who suffered the direct antitrust injury in *Eagle* pursued their own antitrust action against the canneries "alleging the same antitrust violations alleged" by the crew members. *Id. at 542 n.2*. Here, the fishermen forced to sell into Pacific Seafood's alleged monopoly in Newport are the direct victims of the alleged conspiracy and could bring their own antitrust **[*23]** action against these defendants. Therefore, declining to allow a more remote party such as Front Street standing to challenge this alleged conspiracy "is not likely to leave a significant antitrust violation undetected or unremedied." *Id.* (quoting *Lucas Automotive, 800 F.2d at 846*).

Finally, Front Street argues that because it seeks only injunctive relief in the form of divestiture, and because antitrust standing requirements are relaxed for those seeking injunctive relief, it may proceed here. This argument is meritless. While Front Street is correct that certain standing requirements—such as the remoteness or speculative nature of the plaintiff's injury[8]—are relaxed for a plaintiff seeking divestiture, "threatened antitrust injury [is] a prerequisite to equitable relief." *Lucas Automotive, 140 F.3d at 1234* (citing *Cargill, Inc. v. Monfort of Colorado, Inc., 479 U.S. 104, 113, 107 S. Ct. 484, 93 L. Ed. 2d 427 (1986))*. Because Front Street did not suffer any antitrust injury, it may not seek divestiture. *See* *Cargill, 479 U.S. at 112* ("*Section 16* affords plaintiffs injunctive relief only for those injuries cognizable under *Section 4*.").

II. Innovation Marine did not take Substantial Steps to Enter Relevant Market

Unlike Front Street, there is no dispute that Innovation Marine was a prospective participant in the relevant market. The dispute instead centers on whether Innovation Marine took "substantial **[*24]** steps" to enter that market. A "potential competitor" such as Innovation Marine "has standing if he can show a genuine intent to enter the market and a preparedness to do so." *Bubar v. AMPCO Foods, Inc., 752 F.2d 445, 450 (9th Cir. 1995)*. When considering a potential competitor's preparedness to enter a market, courts consider:

1. The background and experience of plaintiff in his prospective business;
2. Affirmative action on the part of plaintiff to engage in the prospective business;
3. The ability of plaintiff to finance the business and the purchase of equipment and facilities necessary to engage in the business; and

4. The consummation of contracts by plaintiff.

Id. at 451-52.

---

[8] Because Front Street seeks only injunctive relief, I need not examine other antitrust standing factors such as the speculative nature of the harm, the risk of duplicative recovery, or the complexity in apportioning damages. That said, the specific remedy of divestiture in favor of each relative plaintiff (while excluding any other potential bidders) at a price admittedly below market value would seemingly violate the main goal of antitrust laws, i.e., increased competition.

Other than the fact that the plaintiffs in *Bubar* were much more prepared (when compared to Mr. Carrol and Mr. Backus) to enter that intended market, the facts of *Bubar* are remarkably similar to the facts here. Plaintiffs there were former top management employees of a wholly-owned potato, garlic, and onion processing subsidiary of A & B. A & B wanted to sell the subsidiary and eventually sold to Ampco foods, a competitor of the subsidiary. Plaintiffs brought antitrust claims under *Sections 1* and *2* of the Sherman Act, alleging Ampco, A & B, and the subsidiary conspired to prevent plaintiffs from **[*25]** purchasing the subsidiary.

Over the course of several months, plaintiffs and Ampco made several "proposals" to purchase the subsidiary. Plaintiffs proposed buying the subsidiary for $10 million. A & B countered with $15 million and plaintiffs responded with a proposal for $12.5 million. Ampco then offered $10 million for only the potato processing portion, at which point A & B proposed a sale of $13.5 million to plaintiffs for the entire subsidiary. "At this time, all of the proposals were preliminary negotiations, with no firm offers having been made." *Id. at 446*. The *Bubar* plaintiffs took several preliminary steps any prospective purchaser would make:

> During this period of negotiations, the management group had held discussions with several venture capital organizations, seeking their participation as equity investors, and also had held discussions with several banks concerning a line of credit for operating expenses. No firm commitments had been made.

Id. at 447.

The management group met with several banks to secure an $8 million line of credit, and despite interest from the banks, no commitments had been made. The group held discussions with multiple venture capital groups, who determined a new corporation **[*26]** would have to be formed to acquire the subsidiary. The management group never finalized the different financial commitments, stock interests, or voting rights of the new corporation. *Id. at 447-48*. The leaders of the management group, along with the lead equity group, met with A & B and proposed buying the subsidiary for $13.5 million and ultimately requested six weeks to complete the financial package. A & B's representative stated he would speak to the president of the company and respond to the plaintiffs, but refused to end discussions with other potential buyers. "No written agreements or letters of intent were signed and no oral commitments to buy or to sell were made." *Id. at 448*. A & B met with Ampco later that day and, over the course of the next few days, agreed to sell the potato division to Ampco for $11,350,000. Like Innovation Marine, the management group alleged their yet-to-be-formed corporation was "frozen out" of the market by defendants' concerted failure to deal. The court concluded:

> Plaintiffs were potential minority stockholders in a corporation yet to be formed, which sought to enter the processed potato market. The venture capital groups who were to be the seventy-five to ninety percent **[*27]** stockholders had not determined whether they were going to invest in the project. Even with the prospective participation of the venture capital groups, another $500,000 to $800,000 would yet have to be raised, either by debt or additional equity financing, and there were no commitments for such financing. The plaintiffs never had a binding contract or commitment or option to acquire the assets necessary to enter the market. We agree with the district court that the plaintiffs in this posture did not have standing to bring this private treble damage antitrust action.

Bubar, 752 F.2d at 454.

As the full extent of the negotiations between Mr. Carroll and Trident are outlined in two brief paragraphs of the FAC, and because those paragraphs reveal the stark contrast between steps taken by the partnership and the plaintiffs in *Bubar*, I include Innovation Marine's entire description of these "serious" discussions:
