Courts have recognized at least two exceptions to *Noerr-Pennington* immunity for antitrust liability: (1) where a party engages in a "sham" petition intended only to "interfere directly with the business relationships of a competitor," and (2) "[u]se of a patent obtained by fraud to exclude a competitor from the market[,]" as articulated in *Walker Process Equipment, Inc. v. Food Machinery & Chemical Corp., 382 U.S. 172, 175-77, 86 S. Ct. 347, 15 L. Ed. 2d 247 (1965)*. *California Motor Transp. Co. v. Trucking Unlimited, 404 U.S. 508, 512, 92 S. Ct. 609, 30 L. Ed. 2d 642 (1972)*; *see also* *TransWeb, LLC v. 3M Innovative Properties Co., 812 F.3d 1295, 1311 (Fed. Cir. 2016)*("[S]ham litigation and *Walker Process* are distinct avenues by which a party can lose *Noerr—Pennington* immunity.").

In *Professional Real Estate Investors*, the Supreme Court outlined a two-part test for defining "'sham" litigation:

> First, the lawsuit must be objectively baseless in the sense that no reasonable litigant could realistically expect success on the merits. If an objective litigant could conclude that the suit is reasonably **[*35]** calculated to elicit a favorable outcome, the suit is immunized under *Noerr*, and an antitrust claim premised on the sham exception must fail. Only if challenged litigation is objectively meritless may a court examine the litigant's subjective motivation. Under this second part of our definition of sham, the court should focus on whether the baseless lawsuit conceals "an attempt to interfere *directly* with the business relationships of a competitor," *Noerr, supra, 365 U.S. at 144, 81 S.Ct. at 533* (emphasis added), through the "use [of] the governmental *process*—as opposed to the *outcome* of that process—as an anticompetitive weapon," *Omni, 499 U.S. at 380, 111 S.Ct. at 1354* (emphasis in original).

508 U.S. at 60-61 (footnote omitted). The court explained that "[t]his two-tiered process requires the plaintiff to disprove the challenged lawsuit's *legal* viability before the court will entertain evidence of the suit's *economic* viability." *Id. at 61*.

For a *Walker Process* claim, "the antitrust-plaintiff must show two things: first, that the antitrust-defendant obtained the patent by knowing and willful fraud on the patent office and maintained and enforced the patent with knowledge of the fraudulent procurement; and second, all the other elements necessary to establish a Sherman Act monopolization claim." **[*36]** *TransWeb, 812 F.3d at 1306*.

2. Application

Avocent argues that ZPE cannot establish that Avocent's lawsuit is a sham, at least because its claims are not objectively baseless, as demonstrated by the prior order denying ZPE's motions to dismiss. MTD at 14. ZPE counters that surviving motions to dismiss on infringement and subject matter grounds is insufficient to establish the objective reasonableness of Avocent's suit, since those challenges are "wholly unrelated to the invalidity and unenforceability grounds that serve as the basis for ZPE's allegation that his lawsuit is objectively baseless." Opp'n at 17.

To determine the applicability of the sham litigation exception to *Noerr-Pennington* immunity, I must answer whether a "reasonable litigant could realistically expect success on the merits." *Prof'l Real Estate, 508 U.S. at 60*. Accepting ZPE's allegations as true, it would be a stretch to conclude that a *reasonable* litigant could realistically expect success knowing that its patents are invalid and unenforceable. But I need not answer this question since ZPE's challenges to Avocent's claims are based on invalidity and unenforceability, they are more appropriately analyzed under the *Walker Process* exception. *See* *TransWeb, LLC v. 3M Innovative Properties Co., 812 F.3d 1295, 1306 (Fed. Cir. 2016)*("In *Walker Process* ***[*37]*** , the Supreme Court held that a plaintiff could bring an action under *§ 2* of the Sherman Act based on the alleged maintenance and enforcement of a fraudulently-obtained patent."); *Ritz Camera & Image, LLC v. SanDisk Corp., 772 F. Supp. 2d 1100, 1110 (N.D. Cal. 2011)*(dodging the "sham" exception analysis "because Defendants' alleged conduct clearly comes within the second exception to the *Noerr—Pennington* doctrine.").

ZPE alleges that Avocent obtained the Asserted Patents through fraud on the PTO. "No assertion of a patent known to be fraudulently-obtained can be a proper use of legal process." *TransWeb, 812 F.3d at 1312*. ZPE set forth detailed allegations supporting its claim that Avocent obtained the Asserted Patents by fraud. *See* discussion above section III. Inequitable Conduct. Avocent attacks ZPE's recitation of the elements for a *Walker Process* claim, and emphasizes that the claim requires a "knowing and willful fraud" and "knowledge of the fraudulent procurement." *See* Reply at 10 (quoting *TransWeb, 812 F.3d at 1311*). But, as discussed above, ZPE has plausibly pleaded a claim of inequitable conduct, which supports the applicability of the *Walker Process* fraud exception to *Noerr-Pennington* immunity. *See* *Transweb, 812 F.3d at 1307* (explaining that "the showing required for proving inequitable conduct and the showing required for proving the fraud **[*38]** component of Walker Process liability may be nearly identical."); *Nobelpharma AB v. Implant Innovations, Inc., 141 F.3d 1059, 1070 (Fed. Cir. 1998)*(agreeing that a knowingly fraudulent omission before the PTO could expose a patentee to antirust liability because "a fraudulent omission can be just as reprehensible as a fraudulent misrepresentation."); *ESCO Corp. v. Cashman*

Equip. Co., 158 F. Supp. 3d 1051, 1074 (D. Nev. 2016)("Had Defendants' pleading of inequitable conduct satisfied the *Exergen* standard, the Court would be much more inclined to find plausibility as to fraud under the *Walker Process* claim.").

Accepting ZPE's allegations, Avocent is not entitled to *Noerr-Pennington* immunity.

B. Whether ZPE has stated a claim of monopolization

Even if an antritrust claimant has established that an entity is not entitled to *Noerr-Pennington* immunity, it must still establish the elements of a substantive antitrust violation. *Prof'l Real Estate, 508 U.S. at 61*. "There are three essential elements to a successful claim of *Section 2* monopolization: (a) the possession of monopoly power in the relevant market; (b) the willful acquisition or maintenance of that power; and (c) causal 'antitrust' injury." *Allied Orthopedic Appliances Inc. v. Tyco Health Care Grp. LP, 592 F.3d 991, 998 (9th Cir. 2010)*(quoting another source).

1. Relevant Market

Avocent labels as conclusory the relevant market identified by ZPE's allegations and argues that it lacks the specific factual detail necessary to **[*39]** state a claim under the *Sherman Act*. MTD at 17-18. The Ninth Circuit has held that a claim under the Sherman Act "survives a *Rule 12(b)(6)* motion unless it is apparent from the face of the complaint that the alleged market suffers a fatal legal defect." *Newcal Indus., Inc. v. Ikon Office Sol., 513 F.3d 1038, 1045 (9th Cir. 2008)*.[7] The *Newcal* court further noted "that the validity of the 'relevant market' is typically a factual element rather than a legal element," so the "alleged markets may survive scrutiny under *Rule 12(b)(6)* subject to factual testing by summary judgment or trial." *Id.* The court went on to enumerate "some legal principles that govern the definition of an antitrust 'relevant market[,]'" underscoring that "a complaint may be dismissed under *Rule 12(b)(6)* if the complaint's 'relevant market' definition is facially unsustainable." *Id.*

First, "the relevant market must be a *product* market." *Id.* "Second, the market must encompass the product at issue as well as all economic substitutes for the product." *Id.*; *see* *Brown Shoe Co. v. United States, 370 U.S. 294, 325, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)*("The outer boundaries of a product market are determined by the reasonable interchangeability of use or the cross-elasticity of demand between the product itself and substitutes for it."); *Thurman Indus., Inc. v. Pay 'N Pak Stores, Inc., 875 F.2d 1369, 1374 (9th Cir. 1989)*("For antitrust purposes, defining the product market involves identification of the field of competition: the **[*40]** group or groups of sellers or producers who have actual or potential ability to deprive each other of significant levels of business."). "Third, although the general market must include all economic substitutes, it is legally permissible to premise antitrust allegations on a submarket." *Newcal, 513 F.3d at 1045*; *see* *Brown Shoe, 370 U.S. at 325* ("The boundaries of such a submarket may be determined by examining such practical indicia as industry or public recognition of the submarket as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors.").

Avocent argues that ZPE fails to adequately allege a relevant antitrust market because it does not reference the rule of reasonable interchangeability and cross-elasticity of demand. MTD at 17 (citing *nSight, Inc. v. PeopleSoft, Inc., 296 F. App'x 555, 557-58 (9th Cir. 2008)* and *Chapman v. N.Y. State Div. for Youth, 546 F.3d 230, 238 (2d Cir. 2008))*. Rather, according to Avocent, ZPE alleges only the general market in which the parties compete, but says "nothing about what other types of servers may compete with serial console servers, or with all servers in general." MTD at 17.

---

[7] The Federal Circuit "applies the law of the regional circuit as to market definition." *TransWeb, 812 F.3d at 1307*.

Avocent, however, barely acknowledges ZPE's allegation that there are no substitutes for the serial console servers. *See id.* at 17 n.12; ACC ¶ **[*41]** 147 ("There are no reasonable substitutes for serial console servers for the purpose they serve of enabling IT managers to access and control network equipment, including remote computers and other devices."). And it neglects to recognize that it has previously represented the existence of a "serial console server market." *See, e.g.*, Avocent's Mot. for Prelim. Injunction at 2 ("ZPE recently won several large accounts, taking substantial business away from Avocent in the serial console server market.")(Dkt. No. 17). ZPE substantiates its allegations that there are no reasonable substitutes by citing Avocent's own representation in asserting that it is entitled to lost profits damages: "[a]t all relevant times, there was an absence of acceptable non-infringing alternatives to the patented products and the patented technology." Avocent's L-R 3-8 Damages Disclosure (Whitman Decl. ¶ 4, Ex. 3; Dkt. No. 120-4); *see LendingTree, LLC v. Zillow, Inc., No. 3:10-CV-439-FDW-DCK, 2011 WL 13222698, at *4 (W.D.N.C. Nov. 4, 2011)*("Counterclaimants are reasonable in their inference that Plaintiff's claim for lost profits presupposes the absence of non-infringing substitutes in the market.").

Next, Avocent attempts to distinguish between its use of "the term **[*42]** 'market' in a general or business sense" and "the stricter" use of the term for antitrust purposes, but its attacks lack substance. *See* Reply at 11. It relies on *Rick-Mik Enterprises, Inc. v. Equilon Enterprises LLC, 532 F.3d 963 (9th Cir. 2008)*, to argue that ZPE's allegations are inadequate, but *Rick-Mik* does not help it. Rick-Mick alleged violations of the Sherman Act for unlawful tying and unlawful price fixing based on Equilon's alleged market power in the gasoline franchise market. *Id. at 966-68*; *id. at 972*. The Ninth Circuit affirmed the district court's dismissal of the complaint, in part because "Rick—Mik's complaint [did] not allege that Equilon ha[d] market power in the relevant market, which is the market for the tying product—gasoline franchises." *Id. at 972*; *see id.* (noting that the complaint lacked specific allegations as to the franchise market, such as what percentage of gasoline franchises belong to Equilon, as well as the percentage of gasoline retail sales that are made through non-franchise outlets, and the amount of power or control that Equilon has over prospective franchisees, and the relative difficulty of a franchisee to switch brands). It found that Rick-Mik's allegations all "relate[d] to the *retail* gasoline market—a market where Rick—Mik is a seller—not the relevant **[*43]** market for franchises where it is a buyer." *Id. at 973*. It also noted that "the statistics alleged in the complaint do not distinguish between franchise-based sales and other potential types of sales[,]" and concluded that "the complaint fail[ed] to allege market power in the relevant market." *Id.*

Unlike the facts in *Rick-Mik*, ZPE alleges a relevant market based on a product for which there are no substitutes, Avocent's control of that market, and barriers to entering that market. Given "that the validity of the 'relevant market' is typically a factual element rather than a legal element," *Newcal, 513 F.3d at 1045*, these allegations are sufficient to survive an attack on the pleadings.

2. Injury

"Antitrust injury requires the plaintiff to have suffered an injury in the market where competition is being restrained." *American Ad Mgmt., Inc. v. General Telephone Co. of Cal., 190 F.3d 1051, 1057 (9th Cir. 1999)*. Avocent highlights ZPE's prior representations in opposition to Avocent's motion for preliminary injunction in which ZPE's co-founder expressly denied that ZPE is a competitor within the same market at Avocent. *See* Zimmerman Decl. ¶ 22 ("I disagree that Avocent is a competitor with ZPE within the same market. Avocent offers no product with the same features set as ZPE.")(Dkt. No. 32-21). ZPE attempts to brush **[*44]** off these assertions as meaning "nothing more than Avocent's products are inferior to ZPE's." Opp'n at 20 n.7. The statements do suggest that Zimmerman meant to infer that Avocent's products are inferior, but he also explicitly declared that he does not believe the two compete in the same market. This will be grist for cross-examination at trial but does not impact my analysis of the pleadings on a motion to dismiss.

Avocent also contends that ZPE only alleges injuries individual to it, and not on competition as a whole. But ZPE alleges competitive harm in Avocent's attempts to discourage customers from doing business with ZPE and deterring others from competing in the market. *See* ACC ¶¶ 154-59, 173, 175. In addition, ZPE argues that the cost of defending against a sham litigation constitutes an antitrust injury. Opp'n at 21. As the Federal Circuit recently held, when an antitrust defendant's unlawful act is "the bringing of suit based on a patent known to be fraudulently obtained[,]" attorney fees flow directly from the defendant's attempt to gain a monopoly and "are precisely 'the type of loss that the claimed violations would be likely to cause[.]'" *TransWeb, 812 F.3d at 1309-10*. In the particular circumstances **[*45]** of *Walker Process* antitrust claim where a patentee "attempt[s] to gain a monopoly based on [a] fraudulently-obtained patent[,]" *id. at 1309*, ZPE has adequately pleaded an antitrust injury. Avocent's motion to dismiss ZPE's antitrust claim is DENIED.

C. Whether ZPE has stated a claim for attempted monopolization

"A claim for attempted monopolization has three elements: 1) a specific intent to monopolize a relevant market; 2) predatory or anticompetitive conduct; and 3) a dangerous probability of success." *Alaska Airlines, Inc. v. United Airlines, Inc., 948 F.2d 536, 542 (9th Cir. 1991)*. Avocent argues that ZPE's attempted claim fails because it relies on conclusory allegations, fails to plead relevant market or anticompetitive conduct, fails to support a finding that Avocent has a dangerous probability of succeeding in its attempt to monopolize, and fails to allege an antitrust injury. MTD at 20-21. I have rejected three of these arguments above, and now briefly address the fourth (dangerous probability of success).

ZPE stresses its allegations that Avocent dominates the market and that dominance "is protected by significant barriers to entry, such as the high costs associated with developing serial console servers, Avocent's existing, anticompetitive exclusivity contracts, and Avocent's **[*46]** so-called 'vendor lock-in[,]'" so "Avocent's attempts to monopolize the relevant Market ... have had and now have a dangerous probability of success." ACC ¶¶ 186-88. ZPE further alleges that "if Avocent succeeded in its attempt to cause ZPE to exit from the relevant market because of fraudulently-obtained patents and sham litigation, Avocent would obtain a virtually complete monopoly in the relevant market." *Id.* ¶ 191. In reply, Avocent reiterates that ZPE provides no factual bases for its allegations regarding high costs, exclusivity contracts, and vendor lock-in tactics. Reply at 13.

At this stage, ZPE need not provide additional factual support to bolster its allegations. *See United States v. Microsoft Corp., 253 F.3d 34, 80, 346 U.S. App. D.C. 330 (D.C. Cir. 2001)*("The determination whether a dangerous probability of success exists is a particularly fact-intensive inquiry."); *Momento, Inc. v. Seccion Amarilla USA, No. C 09-1223 SBA, 2009 U.S. Dist. LEXIS 85295, 2009 WL 10696217, at *7 (N.D. Cal. Sept. 17, 2009)*("Courts typically should not resolve this question at the pleading stage."). Avocent's motion to dismiss this counterclaim is DENIED.

VI. COUNTERCLAIMS 9 & 10: NEGLIGENT AND INTENTIONAL INTERFERENCE WITH PROSPECTIVE ECONOMIC ADVANTAGE

The elements of intentional interference with prospective **[*47]** economic advantage are:

> (1) an economic relationship between the plaintiff and some third party, with the probability of future economic benefit to the plaintiff; (2) the defendant's knowledge of the relationship; (3) intentional acts on the part of the defendant designed to disrupt the relationship; (4) actual disruption of the relationship; and (5) economic harm to the plaintiff proximately caused by the acts of the defendant.

Westside Ctr. Assocs. v. Safeway Stores 23, Inc., 42 Cal. App. 4th 507, 521-22, 49 Cal. Rptr. 2d 793 (1996) (internal quotation marks omitted). "[T]he third element also requires a plaintiff to plead intentional *wrongful* acts on the part of the defendant designed to disrupt the relationship." *Korea Supply Co. v. Lockheed Martin Corp., 29 Cal. 4th 1134, 1154, 131 Cal. Rptr. 2d 29, 63 P.3d 937 (2003)* (emphasis in original). "The tort of negligent interference with prospective business advantage has many of the same elements[,]" *UMG Recordings, Inc. v. Glob. Eagle Entm't, Inc., 117 F. Supp. 3d 1092, 1118 (C.D. Cal. 2015)*, and "also requires an independent wrongful act," but it "need not be willful." *Integrated Storage Consulting Servs., Inc. v. Netapp, Inc., No. 5:12-CV-06209-EJD, 2016 U.S. Dist. LEXIS 88962, 2016 WL 3648716, at *8 (N.D. Cal. July 7, 2016)*.

Avocent argues that ZPE fails to plead an economic relationship with a probable future economic benefit, an independently wrongful act, actual disruption of the economic relationship, and that the disruption was proximately caused by Avocent. MTD at 21-24. ZPE highlights its allegations that Avocent attempted to **[*48]** disrupt its relationship with several prospective customers, including Google, Arista, Apple, Facebook, Visa, and Dell, by telling them that they should not purchase ZPE products given the current litigation, and serving them with subpoenas. ACC ¶¶ 196-98.

But ZPE does not indicate that any of those relationships were *actually* damaged. Rather, it includes that allegation in a general statement that it "has lost business and goodwill because of Avocent's intentional, malicious and tortious interference with its business, and ZPE expects to lose prospective business and goodwill because of Avocent's negligent, intentional and tortious interference with its business and economic advantage." ACC ¶ 199. Because it fails to adequately allege actual disruption of an economic relationship, these claims are DISMISSED. To the extent that ZPE intends to allege damage to relationships with prospective customers Google and Arista, it should make that clear on amendment. *See* ACC ¶¶ 196, 197, 208, 209. It should likewise allege that the damage was caused by Avocent's wrongful conduct.[8]

VII. COUNTERCLAIM 11: UNFAIR COMPETITION

"[A] plaintiff who claims to have suffered injury from a direct competitor's **[*49]** 'unfair' act or practice invokes *section 17200*, the word 'unfair' in that section means conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition." *Cel-Tech Commc'ns, Inc. v. Los Angeles Cellular Tel. Co., 20 Cal. 4th 163, 187, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999)*. ZPE's UCL claim survives based on my finding that it has adequately pleaded an antitrust claim, as well as its allegations that Avocent has engaged in unfair competition based on its practice of asserting fraudulent patents against ZPE.

VIII. AFFIRMATIVE DEFENSES

Under *Federal Rule of Civil Procedure 12(f)*, a court may strike an "insufficient defense." Avocent argues that ZPE's fourth through seventh (claim construction estoppel, prosecution history estoppel, disclaimer, no willful infringement), and eleventh through thirteenth (no injunctive relief, inventorship, failure to join necessary party) affirmative defenses should be stricken. All of these affirmative defenses, other than inventorship and failure to join a necessary party, are adequately pleaded and Avocent offers no argument of prejudice to support striking them.

As for the other two, Avocent points out that ZPE has not identified **[*50]** any purported missing inventor, nor has it identified any purported necessary party. These affirmative defenses are insufficiently pleaded and are struck. *See, e.g.*, *Finjan, Inc. v. Bitdefender Inc., No. 17-cv-04790-HSG, 2018 U.S. Dist. LEXIS 64765, at *10 (N.D. Cal. Apr. 17, 2018)*("This affirmative defense is entirely devoid of factual content. The Court therefore finds that it does not meet the *Twombly/Iqbal* standard.").

CONCLUSION

In accordance with the foregoing, Avocent's motion to dismiss ZPE's counterclaims and strike its affirmative defenses is GRANTED IN PART and DENIED IN PART with leave to amend. If ZPE chooses to amend, it must do so within 20 days of this Order.

IT IS SO ORDERED.

Dated: July 23, 2018

---

[8] The other elements are plausibly pleaded—ZPE identifies third parties as prospective customers, Avocent's knowledge of those relationships, and an independently wrongful act in the form of Avocent's attempted enforcement of patents it knew were invalid and procured through fraud.

Opinion

RULING AND ORDER

This matter is before the Court on four Motions to Dismiss pursuant to *Federal Rule of Civil Procedure 12(b)(6)*. The first was filed by Donald J. Rouse, Jr. ("Rouse, Jr."); Donald J. Rouse, Sr.; Thomas B. Rouse; Allison Rouse Royster; and Rouse's Enterprises, LLC ("Rouse's," and collectively "the Rouse Defendants"). (Doc. 148). Plaintiffs K&F Restaurant Holdings, Ltd. d/b/a Izzo's Illegal Burrito ("Izzo's"); K&F Restaurant Operations, LLC; G&O Pizza Holdings, Ltd., d/b/a LIT Pizza ("LIT Pizza"); G&O Restaurant Operations, LLC; Osvaldo Fernandez; and A. Gary Kovacs (collectively "Plaintiffs") oppose. (Doc. 164). The Rouse Defendants have filed a Reply in further support of their Motion. (Doc. 172).

The second Motion was filed by Victory Berryland, LLC ("Berryland"). (Doc. 139). Plaintiffs oppose, (Doc. 168), and Berryland has filed a Reply in further support of its Motion, (Doc. 170).

The third Motion was filed by Stephen Keller and Creekstone Juban **[*3]** I, LLC ("Creekstone," and collectively "the Creekstone Defendants"). (Doc. 140). Plaintiffs oppose. (Doc. 165).

The fourth Motion was filed by Russell Mosely and Mosely Holdings, LLC (collectively, "the Mosely Defendants"). (Doc. 143). Plaintiffs oppose, (Doc. 163), and the Mosely Defendants have filed a Reply in further support of their Motion, (Doc. 171).

For reasons discussed below, the Motions will be granted, and this case will be dismissed in its entirety.

I. BACKGROUND

A. Plaintiff's Allegations

In September 2011, Jack Trueting, Rouse's "Director of Perishables," called Fernandez to say that Rouse's was "very impressed with Izzo's products" and was interested in franchising Izzo's burrito restaurants in Rouse's grocery stores. (Doc. 138 at 3). Izzo's declined. (*Id.*). Rouse, Jr., who manages Rouse's, then allegedly formed a "scheme" to steal Izzo's burrito recipes. (*Id.*). Specifically, in 2011, Rouse, Jr. "directed" some of his store managers in Lafayette, Louisiana to make an offer, "essentially a bribe," to Patrick Dartez, manager of an Izzo's in Lafayette, to "defect to Rouse's with Izzo's recipes." (*Id.*). Dartez accepted. (*Id.*). Following the success of the "scheme," Rouse's began **[*4]** selling burritos that were "very similar, if not identical," to Izzo's burritos in some of its stores. (*Id.* at 4). Plaintiffs contend that this constitutes illegal use of Izzo's trade secrets. (*Id.* at 5-6). Plaintiffs also contend that Rouse's uses the phrase "build your own" in connection with its burritos and that this phrase is very similar to "roll your own," which Izzo's uses in connection with its burritos. (*Id.* at 9).

Additionally, in July 2011, Izzo's sought to "acquire a restaurant" at Juban Crossing, a commercial development in Livingston, Louisiana managed by Keller and developed by Creekstone. (*Id.* at 4). In 2012, Izzo's, Keller, and Creekstone signed a letter of intent pursuant to which Izzo's was to lease space at Juban Crossing. (*Id.*). However, in a lease agreement recorded in June 2013, Rouse's agreed to be the anchor tenant at Juban Crossing. (*Id.*; *see also* Doc. 138-5 at 1). One of the conditions of the agreement was that no portion of Juban Crossing would be leased or sold to Izzo's, "K&F Restaurant Management, LLC," or any affiliate of either. (Doc. 138 at 1; *see also* Doc. 138-5 at 4). According to Plaintiffs, Rouse, Jr. justified the condition in "interstate phone calls" occurring in 2012, stating **[*5]** that Izzo's sold "substandard" products and was "litigious." (Doc. 138 at 5). Creekstone refused to lease space to Izzo's, allegedly resulting in "millions of dollars" in lost profits to Izzo's. (*Id.*).

The operative Second Amended Complaint alleges seven "counts." (*Id.* at 6-20). Count I is against Rouse, Jr. for violating the conspiracy provision of the *Racketeer Influenced and Corrupt Organizations Act* ("RICO"), *18 U.S.C. § 1962(d)*. (*Id.* at 6). Plaintiffs contends that Rouse, Jr. "conspired to commit three RICO violations against Izzo's," *i.e.*, violating the Travel Act via the scheme to steal Izzo's recipes, committing wire fraud by stating in phone calls that Izzo's was litigious and sold substandard products, and illegally stealing and using trade secrets. (*Id.* at 6).

Count II is a claim for "Conspiracy To Violate *La. Civ. Code Arts. 2324, et seq.* as to all Defendants." (*Id.* at 6-7). Plaintiffs claim that their factual allegations "set forth a civil conspiracy set forth among the defendants to exclude and group boycott the plaintiffs from highly desirable developments." (*Id.* at 7). Plaintiffs also contend that "each of the defendants' name[d] herein are made in act of the furtherance of the conspiracy by rejecting Izzo's[,] Lit and any other development created by Fernandez and **[*6]** Kovacs." (*Id.*).

Count III alleges "Product Defamation and Disparagement against the Rouse's Defendants." (*Id.* at 7). Plaintiffs claim that "Rouse's" made false statements concerning the quality of Izzo's products and its litigiousness to "several third parties but for certain to each of the co-conspirators herein, Juban, Keller, Long Farms, Mosely, and Berryland." (*Id.* at 7-8). Plaintiffs assert that these statements were false, as evidenced by Rouse's desire to franchise Izzo's restaurants and Izzo's decision not to assert claims against Rouse's when an Izzo's recipe book was recovered from a Rouse's store. (*Id.* at 8).

Count IV[1] alleges "Tortious Interference and Business Relations as to all Defendants." (*Id.* at 8). Plaintiffs contend that "[t]he various aforementioned acts and practices by the Rouse Group and co-conspirators have tortiously interfered and continue to tortiously interfere with lawful business relations between Izzo's and its partners and other developers." (*Id.*). This count also concerns the statements about Izzo's alleged litigiousness and substandard products. (*Id.*).

Count V asserts trademark infringement under *La. Rev. Stat. 51:211 et seq.* "as to Rouse's Defendants" based on the use of the "trade name" "build your own." (*Id.* at 9).

Count **[*7]** VI asserts a "Conspiracy under *Sherman Act* and Restraint of Trade in Transportation Market[,] *15 U.S.C.A. § 1*, *35*, *36* as to All Defendants." (*Id.* at 9-10). Plaintiffs contend that "Defendants have monopolized the Market Area in that it has [sic] power to dictate tenants of its preference and exclude competition in some or all of the Market Area" and have "acquired, exercised, and maintained its monopoly power willfully and intentionally by way of the acts set forth above." (*Id.* at 10). Plaintiffs similarly allege that Defendants have attempted to monopolize or conspired to monopolize the "Market Area." (*Id.*). Count VI states that "unlawful agreements [among the Defendants] are evidenced by, among other things, the leases, the deed, the economic interests of Defendants Rouse's, Keller, Juban, Mosely, Long Farms, and Berryland; the close relationships among Defendants; Defendants' concerns about the competitive threat that Izzo's application posed to the Defendants; the history and anticompetitive practices of Rouse's; and the timing of various anticompetitive actions taken by Rouse's, Keller, Juban, Mosely, Long Farms, and Berryland." (*Id.* at 11). Plaintiffs further contend that "Defendants have engaged in per se anticompetitive **[*8]** behavior, or, alternatively, anticompetitive behavior without procompetitive justification, that has unreasonably retrained trade in violation of *Section 1* of the Sherman Act." (*Id.*). Plaintiffs contend that the product market for this "count" is the "retail food sale market," while the relevant geographic market is the state of Louisiana. (*Id.*).

Count VII asserts a "Complaint for Violation of Federal and Louisiana Antitrust Laws, Unfair Practices, and Unfair Competition *15 U.S.C.A. § 1*, *2*, and *13* as to All Defendants." (*Id.* at 14). Plaintiffs define the "many" product markets for "retail food" as "(i) sale of food for cooking; (ii) the sale of partially prepared food which simply requires heating; (iii) the sale of pre-cooked food, ready to eat; (iv) the sale of pre-cooked food concentration on one type of food; (v) the sale of pre-cooked food with a variety of types of food; and (vi) the combination of selling un-cooked food requiring preparation and cooking along with pre-cooked foods, ready to eat." (*Id.* at 15). Plaintiffs define the "relevant geographic markets for retail food sales" as "the entire United States" and "the states commonly known as the Southeastern United States, including, but not limited to, Louisiana, Mississippi, **[*9]** Alabama and Florida." (*Id.*). Plaintiffs claim that barriers to entry are high given "[t]he high concentration in the Market Area, the sophisticated technology, large expenses, high capital costs, [and] relationship[s] with farmers and wholesalers."

[1] The Second Amended Complaint contains two Count III's. This count and all subsequent counts are renumbered for clarity.

(*Id.* at 16). Plaintiffs contend that "Defendants" have engaged in refusal to deal and collusion with developers, constituting monopolization, attempt to monopolize, and conspiracy to monopolize; unreasonable restraint of trade; and "unfair competition." (*Id.* at 16-19).

Attached to the Second Amended Complaint are numerous exhibits, including, *inter alia*, an affidavit by Fernandez stating that, in a March 2016 meeting, Russell Mosely expressed regret that he could not include an Izzo's in a development, but Rouse, Jr. had told Mosely that there had been an "incident" between Izzo's and Rouse's "years ago" and Izzo's would "never make a dollar off of [him]!" (Doc. 138-6 at 1; *see also* Doc. 138-10 at 7 (Declaration of Covenants excluding "Any Izzo's" from a Mosely property)). Also attached to the Second Amended Complaint is a Notice of Lease between Berryland and Rouse's excluding "[a]ny Izzo's or similar burrito restaurant." (Doc. 138-12 at 6).

B. Procedural History [*10]

This case was filed in state court in April 2016 and removed shortly thereafter. (Doc. 1). The initial Petition for Damages named the Rouse Defendants and raised RICO claims and state law claims for violations of *Louisiana's Unfair Trade Practices and Consumer Protection Act* ("LUTPA"), tortious interference with a contract, product defamation, civil conversion, trademark infringement, and conspiracy. (Doc. 1-1 at 2, 8-13). The Rouse Defendants moved for dismissal of Plaintiffs' state law claims, while Plaintiffs moved to remand. (Docs. 5, 7). The Court denied the Motion to Remand and granted in part and denied in part the Motion to Dismiss. (Docs. 26, 31). Specifically, the Court ruled that the LUTPA claim was untimely and dismissed it with prejudice. (Doc. 31 at 5-7, 14). The Court denied the Motion to Dismiss as to the trademark infringement claim, ruling that Plaintiffs had adequately pled a "protectable right" in the trade name "roll your own" and Rouse's violation of that right. (*Id.* at 12, 14). The Court dismissed the remaining state law claims with leave to amend as inadequately pled. (*Id.* at 7-11, 12-14). Plaintiffs moved for reconsideration and to recuse the then-assigned district judge. (Docs. 38-41).

Plaintiffs **[*11]** later filed an "Amended and Restated Complaint." (Doc. 70). This pleading named all of the defendants currently named (along with one other person) and raised RICO claims, federal antitrust claims, and state law claims for "wrongful conversion of proprietary information," conspiracy, product defamation and disparagement, tortious interference with business relations, trademark infringement, and violation of state ***antitrust law***. (*Id.*). Several defendants moved to dismiss. (*See* Docs. 71, 78, 83).

The Court then denied the outstanding motions for reconsideration and to recuse. (Docs. 102, 117). Five days after reconsideration was denied, Plaintiffs again moved to disqualify the then-assigned district judge. (Doc. 118). Although that judge ruled that the basis upon which disqualification was sought, *i.e.*, a lawsuit brought by Plaintiffs' counsel, was "a transparent attempt to create bias and hostility in an effort to provoke disqualification," the Court granted the motion given that "the machinations to which Plaintiffs' counsel ha[d] resorted to poison and impugn the Court's impartiality" might cause a "thoughtful and objective observer" to question the Court's impartiality. (Doc. 133 **[*12]** at 8-9). The case was thereafter reassigned to this section of the Court.

Following the case's reassignment, the Court held a status conference and granted Plaintiffs' then-pending motion for leave to file a Second Amended Complaint. (Doc. 136; *see also* Doc. 95). The Court informed Plaintiffs' counsel that "this [was] the last amendment to the complaint that [would] be allowed by the Court." (Doc. 136 at 1). The outstanding Motions to Dismiss were denied without prejudice to renewal following the filing of the Second Amended Complaint. (*Id.* at 1-2). The Second Amended Complaint was filed on October 26, 2017.

II. GENERAL STANDARDS

In *Johnson v. City of Shelby, Miss., ___ U.S. ___, 135 S. Ct. 346, 190 L. Ed. 2d 309 (2014)*, the Supreme Court explained that "[f]ederal pleading rules call for a 'short and plain statement of the claim showing that the pleader is entitled to relief,' *Fed. R. Civ. P. 8(a)(2)*; they do not countenance dismissal of a complaint for imperfect statement of the legal theory supporting the claim asserted." *135 S.Ct. at 346-47* (citation omitted).

Interpreting *Rule 8(a)*, the Fifth Circuit has explained:

> The complaint (1) on its face (2) must contain enough factual matter (taken as true) (3) to raise a reasonable hope or expectation (4) that discovery will reveal relevant evidence of each element of a claim. **[*13]** "Asking for [such] plausible grounds to infer [the element of a claim] *does not impose a probability requirement* at the pleading stage; it simply calls for enough facts to raise a reasonable expectation that discovery will reveal [that the elements of the claim existed]."

Lormand v. U.S. Unwired, Inc., 565 F.3d 228, 257 (5th Cir. 2009) (quoting *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 556, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)* (emphasis in *Lormand*)).

Applying the above case law, the Western District of Louisiana has stated:

> Therefore, while the court is not to give the "assumption of truth" to conclusions, factual allegations remain so entitled. Once those factual allegations are identified, drawing on the court's judicial experience and common sense, the analysis is whether those facts, which need not be detailed or specific, allow "the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." [*Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)]*; *Twombly, [550] U.S. at 556, 127 S. Ct. at 1965*. This analysis is not substantively different from that set forth in *Lormand, supra*, nor does this jurisprudence foreclose the option that discovery must be undertaken in order to raise relevant information to support an element of the claim. The standard, under the specific language of *Fed. R. Civ. P. 8(a)(2)*, remains that the defendant be given adequate notice of the claim and the grounds upon which it is based. The standard **[*14]** is met by the "reasonable inference" the court must make that, with or without discovery, the facts set forth a plausible claim for relief under a particular theory of law provided that there is a "reasonable expectation" that "discovery will reveal relevant evidence of each element of the claim." *Lormand, 565 F.3d at 257*; *Twombly, [550] U.S. at 556, 127 S. Ct. at 1965*.

*Diamond Servs. Corp. v. Oceanografia, S.A. De C.V., No. 10-00177, 2011 U.S. Dist. LEXIS 27358, 2011 WL 938785, at *3 (W.D. La. Feb. 9, 2011)* (citation omitted).

More recently, in *Thompson v. City of Waco, Tex., 764 F.3d 500 (5th Cir. 2014)*, the Fifth Circuit summarized the standard for a *Rule 12(b)(6)* motion:

> We accept all well-pleaded facts as true and view all facts in the light most favorable to the plaintiff . . . To survive dismissal, a plaintiff must plead enough facts to state a claim for relief that is plausible on its face. A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged. Our task, then, is to determine whether the plaintiff state a legally cognizable claim that is plausible, not to evaluate the plaintiff's likelihood of success.

Id. at 502-03 (citations and internal quotations omitted).

III. THE MOTIONS TO DISMISS

A. The Rouse Defendants

1. The Motion

In support of their Motion to Dismiss, the Rouse Defendants first argue that Plaintiffs' claims for "product defamation **[*15]** and disparagement" fail as vaguely pled and because the challenged statements concerning Izzo's alleged "litigiousness" and "substandard product" are non-actionable matters of opinion. (Doc. 148-1 at 5-6). They also note that defamation claims, like other tort claims, are subject to a one-year prescriptive period. (*Id.* at 5). They similarly argue that Plaintiffs' claim for tortious interference with business relations is conclusorily pled, is prescribed, and does not allege that the Rouse Defendants "acted improperly or with actual malice." (*Id.* at 6-8). The Rouse Defendants then argue that Plaintiffs' trademark infringement claim fails, as "build your own" is a common, descriptive, generic phrase unlikely to cause confusion and not subject to trademark protection. (*Id.* at 8-10). Next, they argue that Plaintiffs' state law conspiracy claims fail because there is no "underlying tort" nor any non-conclusory allegations of a conspiratorial agreement as to a particular unlawful outcome or result. (*Id.* at 10-11). With respect to Plaintiffs' RICO claim, the Rouse Defendants claim that Plaintiffs have failed to plausibly plead the elements of each predicate act alleged or a "pattern" of racketeering activity. (*Id.* at 11-12).

The Rouse Defendants **[*16]** characterize Plaintiffs' antitrust claims as "facially ridiculous" and "lack[ing] each and every component of a plausible claim under either federal or state ***antitrust law***." (*Id.* at 13). First, they observe that Plaintiffs complain of being excluded from a few developments in Louisiana but define the relevant market as essentially all food sales throughout Louisiana, throughout the Southeastern United States, or throughout the whole of the United States. (*Id.* at 13-14). The Rouse Defendants also argue that Plaintiffs fail to adequately plead "antitrust injury," *i.e.*, an injury to competition, not just to Izzo's, particularly given that Plaintiffs' competitors were allowed at some of the developments. (*Id.* at 14-15).

The Rouse Defendants further argue that Plaintiffs' claims of a vertical price-fixing conspiracy or vertical concerted refusal to deal under *Section 1* of the Sherman Act fail for failure to plead market power, particularly given the size of the market. (*Id.* at 16-18). They also claim that any additional conspiracy claims under *15 U.S.C. §§ 1*, *35*, or *36* must be dismissed as duplicative or meritless. (*Id.* at 19). The Rouse Defendants likewise argue that Plaintiffs' claims of monopolization, attempt to monopolize, and conspiracy to monopolize under *Section 2* of **[*17]** the Sherman Act fail for failure to adequately allege market power or market share and specific intent to monopolize. (*Id.* at 19-22). The Rouse Defendants further argue that Plaintiffs fail to allege a "single element" of a claim under *15 U.S.C. § 13*. (*Id.* at 22). The Rouse Defendants also contend that there is no private right of action for "unfair competition" under the Federal Trade Commission Act, and Plaintiffs' LUTPA claims were previously dismissed with prejudice. (*Id.*). Finally, the Rouse Defendants argue that Plaintiffs' state law antitrust claims are interpreted consistent with federal law and fail for the same reasons. (*Id.* at 22-23).

2. The Opposition

Plaintiffs oppose, arguing throughout that a short, plain statement of their claims is all that is required to survive a *Rule 12(b)(6)* motion. (Doc. 164 at 3).

More specifically, Plaintiffs first represent that the Rouse Defendants have stated to co-conspirators that Izzo's "produced substandard product and was extremely litigious," giving rise to a claim for product defamation. (*Id.*). Plaintiffs contend that these statements are false, as Izzo's sole prior lawsuit concerning the recipe book was "100% correct," and Rouse's desire to put Izzo's in its stores belies any contention that **[*18]** Rouse's believed Izzo's product to be "substandard." (*Id.* at 3-4). Plaintiffs also argue that the same allegations give rise to a claim for product disparagement and resulted in Izzo's exclusion from Juban Crossing. (*Id.* at 4-5).

Next, Plaintiffs argues that they have pled malice sufficient to support a claim of tortious interference with a contract, given Rouse, Jr.'s statement that Izzo's would "never make a dollar off of [him]!" and the Rouse Defendants' acknowledgement in prior filings that "the incident" involving the recipe book was extremely embarrassing. (*Id.* at 5; *see also* Doc. 13 at 2). Plaintiffs argue that, as a result of this ill will, Rouse's "demanded that Juban and Keller cancel a signed Letter of Intent to facilitate Rouse's evil plan" and also "lied [to] and coerced other developers" like "Mosley, Long Farms, Victory Berryland, and others." (Doc. 164 at 5-6). Plaintiffs claim that Rouse's is able to dictate and demand restrictions due to its size. (*Id.* at 6).

Next, Plaintiffs argue that their trademark infringement claim is "alive" as law of the case and that arguments to the contrary should be rejected. (*Id.* at 7). Plaintiffs also contend that they have stated a claim for conspiracy based on the aforementioned **[*19]** "embarrassment" and statement of Rouse, Jr. (*Id.*).

Plaintiffs then turn to their RICO claim, arguing that the schemes to bribe an Izzo's employee to steal the recipe book, to exclude Izzo's from Juban Crossing, and to "illegally use Izzo's trade secrets," constitute racketeering activity under RICO. (*Id.* at 8). Plaintiffs contends that the scheme to steal the recipe book violated the *Travel Act* via Rouse, Jr.'s act of state law commercial bribery. (*Id.* at 8-9). The scheme involving Juban Crossing is alleged to have violated the wire fraud statute, as the scheme involved the making of false statements over interstate wires. (*Id.* at 9-10). Finally, Plaintiffs argue that the unlawful use of trade secrets affecting interstate commerce is racketeering activity under RICO. (*Id.* at 10-11). Plaintiffs argue that they have shown a pattern of activity that is "related and continuous," as the activity was all "conducted and carried out by Rouse[,] Jr. for the purpose of retaliating and harming the Plaintiffs after they refused to acquiesce to Rouse[,] Jr.'s request to franchise Izzo's in his grocery stores." (*Id.* at 11-12). Plaintiffs maintain that the pattern is "open-ended," as the trade secret violations "continue unabated." (*Id.* at 12). Plaintiffs also **[*20]** address several other of the Rouse Defendants' "scattershot" arguments. (*Id.* at 12-15).

With respect to an alleged wrongful conversion claim, Plaintiffs contend that the Rouse Defendants "wrongfully argue[]" that a trade secret and trademark cannot be wrongfully converted and that the "conversion continues until the conversion stops." (*Id.* at 15).

Plaintiffs then address their antitrust claims. They argue that the Court should consider the "aggregate effect of the multiple agreements that eliminate [Izzo's and LIT Pizza] from several developments, not just one" and the fact that, if these restaurants were "allowed in these 4 developments, that would create 8 more stores for consumers, and promote competition in the market." (*Id.* at 16). Plaintiffs argue that "Rouse's used its size and leverage to create both horizontal and vertical conspiracies in restraint of trade, which is exactly what the antitrust laws are created to prevent[.]" (*Id.* at 16-17). However, Plaintiffs later contend that, "[b]ecause the conspiracies and contracts are between Rouse's and the other defendants/developers, they are not on the same level, so the here the plaintiffs [sic] allege a vertical level conspiracy between Rouse's and the developers." (*Id.* at 17).

[*21] Plaintiffs maintain that Rouse's is the largest grocery store chain in Louisiana and possesses the largest market share "among grocers, second only to Walmart, (which sells much more than groceries)." (*Id.* at 18). Plaintiffs contend that this gives Rouse's monopoly power, permitting it to "set prices at its choosing," buy land for new stores, and lease from "anyone whom it wishes." (*Id.*). Plaintiffs also contend that Rouse's "has no barriers to entry," but "opening a grocery store has a high level of barriers to entry." (*Id.*).

Plaintiffs further argue that the conspiracies were "reduced to writing in leases and deed restrictions," and that such leases and restrictions "can be found across Louisiana barring Izzo's and its affiliates from entry while Rouse's enjoys all the growth it wants by virtue of its monopoly." (*Id.*). Plaintiffs also argue that the agreements are evidenced by "the economic interests" of Defendants, the "close relationships" among them, Defendants' "concerns about the competitive threat that Izzo's application posed to the Defendants"; the history and anticompetitive practices of Rouse's, and the timing of Defendants' "various anticompetitive actions." (*Id.* at 19). Plaintiffs contend that they have been harmed by Rouse's actions, and consumers are harmed "because customers cannot find Izzo's or Lit Pizza." (*Id.* at 18). Plaintiffs argue that Defendants' conduct is both *per se* anticompetitive and that it violates the rule of reason. (*Id.* at 19-20). Plaintiffs maintain that any benefits flowing from Defendants' "restraints **[*22]** of trade" can be accomplished by less harmful means. (*Id.* at 21).

3. The Reply

The Rouse Defendants' Reply generally reiterates arguments previously made. (Doc. 172 at 1-6). They contend that the Court is free to reconsider and reverse its prior ruling on "the trademark claim" "for any reason it deems sufficient." (*Id.* at 1 n.1). They also reiterate that statements that Izzo's produced "substandard product" or was "extremely litigious" are purely expressions of opinion and cannot support a claim of defamation. (*Id.* at 2). The Rouse Defendants further argue that the Second Amended Complaint contains no wrongful conversion claim and that any claim for misappropriation of trade secrets based on events in 2012 had prescribed when the instant action was filed in 2016. (*Id.* at 2-3 & n.7). The Rouse Defendants also argue that Plaintiffs have not alleged sufficient facts to plausibly suggest a RICO conspiracy, either with respect to an underlying agreement or predicate acts. (*Id.*

at 3-4). The Rouse Defendants further contend that several of the predicate acts undergirding the conspiracy had prescribed by the time this suit was filed. (*Id.* at 4).

B. Berryland

In its Motion, Berryland argues that the restrictive covenants in its lease agreements are common, **[*23]** lawful provisions and that the Second Amended Complaint makes virtually no allegations against Berryland. (Doc. 139-1 at 2-4). Berryland then addresses specific causes of action, contending first that Plaintiffs fail to allege that Berryland acted with "actual malice," as is necessary to support a tortious interference claim. (*Id.* at 5-6). Berryland next addresses Plaintiffs' antitrust claims, arguing that they have failed to adequately allege: (1) any facts in support of a *per se* unreasonable horizontal conspiracy among competitors at the same level; (2) that any vertical conspiracy had anticompetitive effects; (3) that Berryland had a significant share of the food sales market, a "dangerous probability" of achieving monopoly power in that market, or the specific intent to monopolize that market; and (4) any facts in support of a price discrimination claim. (*Id.* at 6-16). Next, Berryland claims that any "unfair competition" claim based on trademark violations does not involve Berryland. (*Id.* at 16). Finally, Berryland argues that, because Plaintiffs' underlying claims fail, there is no viable state law conspiracy claim. (*Id.* at 16-17).

Plaintiffs argue that Berryland's Motion is "absurd and completely lacking in any legitimate **[*24]** argument" and that Berryland was "well aware that Rouse'[s]" participated in a larger practice of excluding Izzo's and its affiliates from developments other than Berryland." (Doc. 168 at 1-2). Plaintiffs contend that Berryland has admitted to engaging in conspiracies in restraint of trade by executing lease provisions prohibiting Plaintiffs from leasing in "desired developments." (*Id.* at 2). Plaintiffs argue that Berryland is liable because Rouse's "could not have carried out their intent to abolish Izzo's without the necessary cooperation from developers, each and every one." (*Id.*).

Plaintiffs further maintain that "[t]he defendants, Rouse's and Berryland, acted with ill-will and ill-motive as they have admitted . . . that getting caught with the recipe book caused them great embarrassment and anger." (*Id.* at 6). Plaintiffs clarify, however, that they are not pursuing wrongful conversion, tortious interference, or product defamation claims against Berryland "except as co-conspirators." (*Id.*). Concerning their RICO claim, Plaintiffs reiterate arguments made in opposition to the Rouse Defendants' Motion. (*Id.* at 7-14).

Concerning their antitrust claims, Plaintiffs allege that, by entering into an agreement **[*25]** with Rouse's, which competes with Izzo's, Berryland created "both horizontal and vertical restraints," although Plaintiffs again acknowledges that, "[b]ecause the conspiracies and contracts are between Rouse's and the other defendants/developers, they are not on the same level, so the here the plaintiffs [sic] allege a vertical level conspiracy between Rouse's and the developers." (*Id.* at 16). Plaintiffs' argument concerning their antitrust claims also generally tracks arguments made in opposition to the Rouse Defendants' Motion. (*Id.* at 16-20).

In reply, Berryland contends that most of the allegations in this action concern the Rouse Defendants' conduct, and "[t]here is nothing talismanic about repeatedly labeling [Berryland] a co-conspirator without substantive supporting allegations, and Plaintiffs cannot survive a motion to dismiss on allegations directed solely against another party." (Doc. 170 at 1-3). Regarding the antirust and civil conspiracy claims, Berryland contends that Plaintiffs wholly fail to address the arguments made in Berryland's Motion. (*Id.* at 1-2). Berryland also argues that, by acknowledging that Izzo's and Berryland are not competitors, Plaintiffs have foreclosed any argument **[*26]** that a horizontal conspiracy exists. (*Id.* at 4).

C. The Creekstone Defendants

The briefing on the Creekstone Defendants' Motion is extremely similar to that on Berryland's Motion. The Creekstone Defendants argue that the lease between Rouse's and Creekstone contains "standard" leasing provisions and exclusions that are in no way improper. (Doc. 140-1 at 2-3). The Creekstone Defendants note that most, if not all, of the leases they execute with tenants exclude some competitive retailers by name. (*Id.* at 3-4). The Creekstone Defendants further argue that: (1) Plaintiffs fail to allege in support of their tortious interference claims that the Creekstone Defendants acted with "actual malice"; (2) the Second Amended Complaint contains no specific factual allegations that any Defendants engaged in anticompetitive activities, whether separately or as a group; (3) Plaintiffs fail to "detail" any "unfair competition" claim against the Creekstone Defendants; and (4) absent an underlying tort, Plaintiffs' state law conspiracy claims fail. (*Id.* at 8-11). Plaintiffs' Opposition largely tracks their opposition to Berryland's Motion; they again note that they are not pursuing wrongful conversion, tortious interference, or product **[*27]** defamation claims against the Creekstone Defendants "except as co-conspirators[.]" (Doc. 165 at 4).

D. The Mosely Defendants

The briefing on the Mosely Defendants' Motion is extremely similar to that on Berryland's and the Creekstone Defendants' Motions. The Mosely Defendants argue that Plaintiffs do not make "a single direct factual allegation of misconduct against the Mosely Defendants . . . and there are few, if any allegations that would actually link the purported conduct of Rouse's to the Mosely Defendants." (Doc. 143-1 at 2). The Mosely Defendants next observe that a state law civil conspiracy claim requires both a showing of "intentional" or "willful" conduct and an underlying tort. (*Id.* at 3-4). The Mosely Defendants argue that "entering into a contract — even a contract with a restrictive covenant — is not an independent basis for a cause of action by a third-party [sic]." (*Id.* at 4). The Mosely Defendants further maintain that Plaintiffs' RICO claim, claims for product defamation and disparagement, claims for tortious interference, and claims for trademark infringement are based solely on conduct by the Rouse Defendants. (*Id.* at 5-7). The Mosely Defendants further argue that there are no plausible allegations **[*28]** that they possess monopoly power in the relevant market and that any claim against them must be a claim of a vertical restraint. (*Id.* at 8-9).). Plaintiffs' Opposition largely tracks their opposition to the Motions by Berryland and the Creekstone Defendants; yet again, they state that they are not pursuing wrongful conversion, tortious interference, or product defamation claims against the Mosely Defendants "except as co-conspirators[.]" (Doc. 163 at 5). In reply, the Mosely Defendants reiterate arguments previously made. (*See generally* Doc. 171).

IV. ANALYSIS

Briefing in this case has revealed that Defendants can be divided into two groups. One consists of Berryland, the Creekstone Defendants, and the Mosely Defendants (collectively the "Developer Defendants"), while the second consists of the Rouse Defendants. Where appropriate, the Court will address the parties' arguments as they apply against a particular set of Defendants. The Court turns first to Plaintiffs' antitrust claims.

A. Antitrust Claims

The Second Amended Complaint raises against all Defendants claims for "conspiracy under [the] Sherman Act and restraint of trade in [the] transportation market" and "violation of federal and Louisiana **[*29]** antitrust laws, unfair practices, and unfair competition[.]" (Doc. 138 at 9, 14 (capitalization altered)). Although this section of the Second Amended Complaint is structured somewhat confusingly and is sometimes repetitive, Plaintiffs purport to state claims under *15 U.S.C. §§ 1*, *2*, *13*, *35*, and *36*. (*Id.*).

1. *15 U.S.C. § 1*

Section 1 of the Sherman Antitrust Act, 15 U.S.C. § 1, provides that "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal." To state a claim under this provision, a plaintiff must show that the defendants "(1) engaged in a conspiracy (2) that restrained trade (3) in a particular market." *Tunica Web Adver. v. Tunica Casino Operators Ass'n, 496 F.3d 403, 409 (5th Cir. 2007)*. A "necessary ingredient" of a *Section 1* conspiracy is "a showing of concerted action on the part of the defendants." *Id.* To establish concerted action, the plaintiff must show that the defendants had a conscious commitment to a common scheme designed to achieve an unlawful objective. *See id.*

Section 1 conspiracies are generally analyzed under the "rule of reason," which requires a court to analyze whether the particular agreement at issue in fact unreasonably restrains competition. *Id. at 411-12*. That is, under this rule, an agreement **[*30]** is only unlawful if the plaintiff shows that it actually had an adverse effect on competition. *Id. at 412*. However, some agreements among firms that compete with each other at the same level of the market (*i.e.*, "horizontal" agreements) are viewed as *per se* anticompetitive and generally do not require proof that the agreement was actually anticompetitive. *See id.*

Plaintiffs' stance on whether this case involves horizontal agreements is unclear but, regardless, the only agreements alleged with any specificity in the Second Amended Complaint are between Rouse's and individual Developer Defendants, who are not competitors at the same level of any market alleged. Plaintiffs' remaining allegations concerning "the close relationships among Defendants," their "economic interests," and the "timing" of their actions are vague and therefore unavailing. Therefore, the only agreements alleged with the necessary particularity are not "horizontal" agreements within the meaning of ***antitrust law***, notwithstanding that the agreements may have had "horizontal effects" on Plaintiffs. *See Business Electronics Corp. v. Sharp Electronics Corp., 485 U.S. 717, 730 n.4, 108 S. Ct. 1515, 99 L. Ed. 2d 808 (1988)* (stating that "a restraint is horizontal not because it has horizontal effects, but because it is the product of a horizontal **[*31]** agreement" and noting that "all anticompetitive effects are by definition horizontal effects"); *see also Spectators' Commc'n Network Inc. v. Colonial Country Club, 253 F.3d 215, 224 (5th Cir. 2001)* (evidence of sponsors making separate agreements with PGA, but not among themselves, was "hub and spoke sort of proof" insufficient to establish a horizontal conspiracy). This case will be analyzed under the rule of reason, and Plaintiffs will ultimately be required to show an adverse effect on competition. *See PSKS, Inc. v. Leegin Creative Leather Prods., Inc., 615 F.3d 412, 417 (5th Cir. 2010)*; *see also Marucci Sports, L.L.C. v. Nat'l Collegiate Athletic Ass'n, 751 F.3d 368, 374 (5th Cir. 2014)* (regardless of whether *per se* rule or rule of reason applies, "ultimate[] focus" of court's inquiry should be on the "competitive significance" of a restraint).

Here, the Court cannot conclude that Plaintiffs have adequately alleged that further proceedings will reveal meaningful evidence of anticompetitive effects. As Plaintiffs' multiple Oppositions make clear, their arguments of harm to competition are fundamentally that "customers cannot find Izzo's or Lit Pizza," depriving them of that option and causing them to pay higher prices. (Doc. 163 at 15; Doc. 164 at 18; Doc. 165 at 15; Doc. 168 at 17; *see also* Doc. 138 at 19 ("Consumers, who will all need food, have been deprived of food options as a direct result of Defendants' wrongful conduct.")). The Court doubts **[*32]** whether Plaintiffs' exclusion from a handful of developments would constitute a plausible showing of the alleged "destruction" of their own businesses within the relevant markets (alleged to include retail food sales throughout an area at least as large as Louisiana). (Doc. 138 at 11, 13-14). However, antitrust laws exist to protect competition, not individual competitors, and even the total elimination of a competitor does not make a restraint unreasonable as long as "sufficient competitors remain to ensure that competitive prices, quality, and service persist." *See Marucci Sports, L.L.C., 751 F.3d at 376-77*. Plaintiffs have made no non-conclusory, non-speculative allegations of anticompetitive effects within the relevant market, as Plaintiffs have chosen to broadly define it. Plaintiffs' claims under *Section 1* therefore fail.

2. *15 U.S.C. § 2*

Section 2 of the Sherman Act, *15 U.S.C. § 2*, prohibits monopolization, attempting to monopolize, or conspiring to monopolize "any part of the trade or commerce among the several States."

To prevail on a monopolization claim, a plaintiff must show that the defendant: (1) possesses monopoly power in the relevant market, and (2) willfully acquired or maintained that power. *Felder's Collision Parts, Inc. v. Gen. Motors Co., 960 F. Supp. 2d 617, 624 (M.D. La. 2013)*.

To prevail on an attempted monopolization claim, a plaintiff **[*33]** must show: (1) that the defendant has engaged in predatory or anticompetitive conduct with (2) a specific intent to monopolize and (3) a dangerous probability of achieving monopoly power. *Retractable Techs., Inc. v. Becton Dickinson & Co., 842 F.3d 883, 891 (5th Cir. 2016)*, *cert. denied*, *137 S. Ct. 1349, 197 L. Ed. 2d 522 (2017)*.

Finally, to state a claim for conspiracy to monopolize, the plaintiff must allege: (1) specific intent to monopolize, (2) the existence of a combination or conspiracy to monopolize, (3) an overt act in furtherance of the combination or conspiracy, and (4) an effect upon a substantial portion of interstate commerce. *Felder's Collision Parts, Inc., 960 F. Supp. 2d at 624*.

In connection with monopolization claims, a plaintiff must provide an adequate, plausible definition of the relevant product and geographic markets. *See* *Apani Southwest, Inc. v. Coca-Cola Enters., 300 F.3d 620, 628 (5th Cir. 2002)*; *see also* *id. at 633* (favorably citing *Endsley v. City of Chicago, 230 F.3d 276, 282 (7th Cir. 2000)*, for proposition that, to survive a motion to dismiss, antitrust plaintiff must set forth facts sufficient to create an inference that defendant "had enough market power to create a monopoly"). Monopoly power under *Section 2* requires "something greater" than market power under *Section 1*. *Eastman Kodak Co. v. Image Tech. Servs., Inc., 504 U.S. 451, 481, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)*.

None of the Developer Defendants are liable for monopolization or attempted monopolization of the retail food market, as there are no allegations that they participated in that market or came anywhere near achieving monopoly **[*34]** power in that market. Therefore, Plaintiffs' claims against them must be conspiracy claims. However, such conspiracy claims also require a showing of the "existence of a combination or conspiracy to monopolize" and that a defendant acted with "specific intent to monopolize." *Felder's Collision Parts, Inc., 960 F. Supp. 2d at 624*. There are simply no factual allegations that would permit an inference that any of the Developer Defendants' individual leases with Rouse's constituted the joining of such a conspiracy with such an intent. Restrictive covenants in shopping center leases do not violate antitrust laws in and of themselves, (*see, e.g.*, Doc. 143-1 at 10 (collecting cases)), and virtually no other actions taken by any of the Developer Defendants are identified with particularity in the Second Amended Complaint, much less any actions that evince an intent to monopolize. Indeed, Plaintiffs' own exhibits suggest that, after observing that Rouse's restrictive covenants prevented Izzo's from leasing a particular location, Mosely said that he would be "happy to put Izzo's in phase 3 across the street where the restrictions did not apply," (Doc. 138-6 at 1), while a Creekstone representative said that he would "send . . . info on Millerville" **[*35]** once it was "sketched," (Doc. 138-9 at 1). No claims under *Section 2* lie against the Developer Defendants.

With respect to the monopolization claims against the Rouse Defendants, there is similarly no non-conclusory allegation of specific intent or conspiracy to monopolize the retail food services market. Plaintiffs themselves suggest that Rouse's has "facilitated the placement of one of Izzo's competitors in the same location that Izzo's was supposed to be in[.]" (Doc. 164 at 6; *see also* Doc. 138-9 at 2 (email attached to Second Amended Complaint noting that there was a "Moe's" at Juban Crossing already)). There are simply no factual allegations that transform the Rouse Defendants' alleged ill will into an intent to monopolize the retail food market.

Moreover, with respect to the monopoly power required to undergird a claim of monopolization or attempted monopolization, Plaintiffs' Opposition confirms that its allegations of monopoly power are based on Rouse's position as the "largest grocer in Louisiana." (Doc. 164 at 18). As the Eastern District of Louisiana has set forth at some length:

> A nonconclusory allegation that a defendant holds a predominant share of the relevant market will usually **[*36]** satisfy the monopoly power element of a monopolization claim. [*United States v. Grinnell, 384 U.S. 563, 571, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*]; *U.S. Anchor Mfg. Inc. v. Rule Indus., Inc., 7 F.3d 986, 999 (11th Cir. 1993)* (principal measure of monopoly power is market share). The precise market share a defendant must control before it has monopoly power remains undefined, but, the case law supports the conclusion that a market share of more than 70 percent is generally sufficient to support an inference of monopoly power. *See, e.g.,* *Eastman Kodak Co. v. Image Technical Servs., 504 U.S. 451, 481, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)* (factfinder can infer monopoly power from an 80 percent market share); *Morgenstern v. Wilson, 29 F.3d 1291, 1296 n. 3 (8th Cir. 1994)* (share of more than 80 percent sufficient);

> *Heatransfer Corp. v. Volkswagenwerk, A.G., 553 F.2d 964, 981 (5th Cir. 1977)* (71-76 percent share sufficient); *Int'l Audiotext Network v. Am. Tel. & Tel. Co., 893 F.Supp. 1207, 1217-18 (S.D.N.Y. 1994)* (70 percent market share generally adequate at the pleading stage); *see also* ABA Section of ***Antitrust Law***, ***Antitrust Law*** Developments 230-31 (7th ed. 2012) (collecting cases).
>
> In contrast, courts almost never find monopoly power when market share is less than about 50 percent. *American Telephone & Telegraph Co. v. Delta Commc'ns Corp., 408 F. Supp. 1075, 1107 (S.D.Miss. 1976)*, *aff'd per curiam*, *579 F.2d 972 (5th Cir. 1978)* (adopting district court opinion), *modified on other grounds*, *590 F.2d 100 (5th Cir.1979)* (41% share of local prime time television market insufficient to subject television network to *Section 2* monopolization scrutiny); *Bailey v. Allgas, Inc., 284 F.3d 1237, 1250 (11th Cir. 2002)* ("market share at or less than 50% is inadequate as a matter of law to constitute monopoly power"); *Blue Cross & Blue Shield United of Wisconsin v. Marshfield Clinic, 65 F.3d 1406, 1411 (7th Cir.1995)* ("Fifty percent is below any accepted benchmark for inferring monopoly power from **[*37]** market share"). The Fifth Circuit adheres to Judge Learned Hand's widely accepted rule of thumb that "while a 90 percent market share definitely is enough to constitute monopolization, 'it is doubtful whether 60 or 64 percent would be enough; and certainly, 33 percent is not.' " *Domed Stadium Hotel, Inc. v. Holiday Inns, Inc., 732 F.2d 480, 489 (5th Cir. 1984)* (citing *United States v. Aluminum Co. of America, 148 F.2d 416 (2d Cir. 1945)*, *approved and adopted, American Tobacco Co. v. United States, 328 U.S. 781, 811-14, 66 S.Ct. 1125, 90 L.Ed. 1575 (1946))*.
> Leading scholars concur that "it would be rare indeed to find that a firm with half of a market could individually control price over any significant period." 3 Areeda & Hovenkamp ¶ 532c, at 250 (2007). The Department of Justice agrees that "as a practical matter, a market share of greater than fifty percent has been necessary for courts to find the existence of monopoly power." Department of Justice Guide/Report, COMPETITION AND MONOPOLY: SINGLE—FIRM CONDUCT UNDER SECTION 2 OF THE SHERMAN ACT 2008 WL 4606679 (D.O.J.), 24 (noting that the DOJ is not aware of any court that has found that a defendant possessed monopoly power when its market share was less than fifty percent).

In re Pool Prods. Distrib. Mkt. Antitrust Litig., 940 F. Supp. 2d 367, 382-83 (E.D. La. 2013) (Vance, J.) (complaint inadequate where it contained "no specific allegations of a dominant market share and no allegations that allow such an inference").

The Second Amended Complaint's allegations of monopoly power are inadequate to support a claim of monopolization or attempted monopolization. Plaintiffs variously allege that Rouse's is "the **[*38]** largest grocer in Louisiana," with "over 50 stores," (Doc. 138 at 3), that Rouse's market share "exceeds any other grocer in Louisiana," (*id.* at 10), that Rouse's is "one of the largest grocers in Louisiana," (*id.* at 15), and that the "Market Area, more so in Louisiana, are [sic] highly concentrated by [Rouse's]," which is "the primary grocer in Louisiana," (*id.* at 16). Plaintiffs' Opposition reiterates that Rouse's has monopoly power as "the largest grocery store chain in Louisiana[,] . . .possess[ing] the largest market share among grocers, second only to Walmart, (which sells much more than groceries)." (Doc. 164 at 18). The Second Amended Complaint also focuses on certain additional features of the "grocery" market. (*See, e.g.*, Doc. 138 at 17 (because demand for retail food services is inelastic, "it is easier for grocers and wholesalers to set prices collusively")).

Plaintiffs' allegations of market share are vague and often appear inconsistent. Moreover, the most specific numerical figure attached to Plaintiffs' allegations, *i.e.*, that Rouse's operates "over 50 stores," (Doc. 138 at 3), falls well short of plausibly suggesting monopoly power in a geographic market alleged to span at least the entire state **[*39]** of Louisiana.

Plaintiffs' focus on "grocers" as a yardstick for measuring Rouse's market power is also problematic. That is, the relevant product market ("retail food sales," including both grocers and restaurants and focusing in this case particularly on pre-cooked, ready-to-eat food, (*see* Doc. 138 at 14-15)), is defined to include Izzo's, which is a restaurant, not a grocer. Using "grocers" as the measure of monopoly power within this market omits restaurants like Izzo's and likely includes grocery stores lacking the "deli/food court" section that Rouse's has. (*Id.* at 15). As a result, Plaintiffs' allegations of market share, and accordingly of monopoly power or a "dangerous probability" of achieving monopoly power, are inadequate. *See* *Apani Sw., Inc., 300 F.3d at 628, 633*. Plaintiffs' *Section 2* claims fail.

3. *15 U.S.C. §§ 13*, *35*, and *36*

15 U.S.C. § 13(a), the only subprovision of *15 U.S.C. § 13* that might arguably apply in this case, prohibits any person engaged in commerce from discriminating in price "between different purchasers of commodities of like grade and quality" where the effect of that discrimination is to substantially lessen competition or tend to create a monopoly. The Second Amended Complaint does not allege price discrimination or any of the elements necessary to support **[*40]** such a claim. (*See* Doc. 139-1 at 15). To the extent that such a claim is made, it must be dismissed as inadequately pled.

15 U.S.C. §§ 35 and *36* concern the availability of damages and fees available from local government entities, and those acting at their direction, in actions under the *Clayton Act*. They do not give rise to a cause of action.

4. "Unfair Competition"

The section of the Second Amended Complaint concerning Plaintiffs' antitrust allegations ends with a section entitled "unfair competition," which alleges that, by engaging in acts described earlier in the Second Amended Complaint, "Defendants have engaged in unfair competition in violation of the Sherman Act, Clayton Act, RICO, civil conspiracies, theft of trade secrets and infringement of trademarks." (Doc. 138 at 19).

The underlying claims discussed in this "unfair competition" section have been addressed or will be addressed elsewhere in this Ruling and Order, but Plaintiffs provide no legal basis for a standalone "unfair competition" claim and do not identify with particularity the facts upon which it is based. This claim adds nothing to Plaintiffs' lawsuit and will accordingly be dismissed.

5. State Law Antitrust Claims

Louisiana's antitrust **[*41]** laws are "virtually identical" to *Sections 1* and *2* of the Sherman Act, and federal analysis of the Sherman Act is "persuasive, although not controlling." *HPC Biologicals, Inc. v. UnitedHealthcare of Louisiana, Inc., 2016-0585 (La. App. 1 Cir. 5/26/16), 194 So. 3d 784, 792-93*, *reh'g denied* (June 21, 2016). Plaintiffs' federal antitrust claims fail, and neither the Court nor any party has identified any basis upon which their state law antitrust claims should be resolved differently. Plaintiffs' state law antitrust claims therefore fail.

B. Civil Conspiracy Claims

The Court next considers Plaintiffs' state law conspiracy claims. Notably, according to the Second Amended Complaint as clarified by Plaintiffs' Oppositions, Plaintiffs' only remaining claims against the Developer Defendants are state law conspiracy claims. (Doc. 138 at 6-9; Doc. 138 at 6-9; Doc. 168 at 6; Doc. 165 at 4; Doc. 163 at 5).

Louisiana Civil Code article 2324 provides that anyone who conspires with another person to commit an intentional or willful act is answerable, in solido, with that person, for the damage caused by such act. If a conspiracy is conceived and executed and injury results, the injured person has a cause of action against all of the conspirators, who may be held civilly liable for damage to a third party resulting therefrom. *Butz v. Lynch, 97-2166 (La. App. 1 Cir. 4/8/98), 710 So. 2d 1171, 1174*, *writ denied*, *98-1247 (La. 6/19/98), 721 So. 2d 473*.

Article 2324 does not **[*42]** itself impose liability for a conspiracy: the "actionable element" is not the conspiracy, but rather the tort which the conspirators agree to perpetrate and "actually commit in whole or in part." *Id.* To demonstrate an Article 2324 conspiracy, a plaintiff must ultimately "provide evidence of the requisite agreement between the parties"; that is, the plaintiff must "establish a meeting of the minds or a collusion between the parties for the purpose of committing wrongdoing." *Thomas v. N. 40 Land Dev., Inc., 2004-0610 (La. App. 4 Cir. 1/26/05), 894 So. 2d 1160, 1174*. Though a conspiracy may be inferred from knowledge of the impropriety of actions taken by a co-conspirator, the plaintiff must prove "an unlawful act and assistance or encouragement that amounts to a conspiracy," and the assistance or encouragement must be "of such quality and character that a jury would be permitted to infer from it an underlying agreement and act[.]" *Id.* A conspiracy claim requires more than negligence: it requires either intentional or willful conduct. *Id. at 1177-78*.

The only specific allegations of agreement in this case concern lease agreements between Rouse's and the Developer Defendants. However, as each of the Developer Defendants correctly argue, restrictive covenants between a lessor and lessee are **[*43]** not themselves unlawful, tortious, or violative of ***antitrust law***. (*See* Doc. 139-1 at 3 n.3; Doc. 140-1 at 2-3; Doc. 143-1 at 10 (collecting cases)). *Winn-Dixie Stores, Inc. v. Dolgencorp, LLC* is not to the contrary, as that case considered whether, under Louisiana law, a restrictive covenant "ran with the land" even though it was not expressed in the land's "title documents," not the general appropriateness of such restrictions. *746 F.3d 1008, 1030-31 (11th Cir. 2014)*. Therefore, the parties' mere entry into leases containing restrictive covenants provides inadequate support for claims of a tortious conspiracy and does not constitute a sufficient "step" toward the completion of an underlying tort to support a plausible claim under Article 2324. Plaintiffs' remaining allegations of conspiracy are conclusory and do not rise to the level of "assistance or encouragement that amounts to a conspiracy[.]" *Thomas, 894 So. 2d at 1174*. Accordingly, Plaintiffs' state law conspiracy claims fail. The Court now turns to the remaining claims against the Rouse Defendants.

C. Product Defamation and Disparagement

In this case, this Court previously noted that, under Louisiana law, a defamation claim requires: "(1) a false and defamatory statement concerning another; **[*44]** (2) an unprivileged publication to a third party; (3) fault (negligence or greater) on the part of the publisher and (4) resulting injury." *K&F Rest. Holdings, Ltd. v. Rouse, 2017 U.S. Dist. LEXIS 14601, 2017 WL 465470, at *5 (M.D. La. Feb. 2, 2017)* (citing *Fitzgerald v. Tucker, 98-2313 (La. 6/29/99); 737 So.2d 706, 715)*. Opinions are generally not actionable as defamation. *See* *Thompson v. Lee, 38,930 (La. App. 2d Cir. 2004), 888 So. 2d 300, 304* (press release equating a doctor's behavior to "that found in the Soviet Union or third world countries" was non-actionable opinion). More specifically, an expression of opinion is actionable "only if it implies the existence of underlying facts ascertainable by a reasonable person with some degree of certainty, and the implied factual assertions are false, defamatory, made with actual malice, and concern another." *Fitzgerald v. Tucker, 98-2313 (La. 6/29/99), 737 So. 2d 706, 717*. Similarly, to prove a product disparagement claim, a plaintiff must plead "publication, with malice, of false allegations concerning the property or product, and the causing of pecuniary harm." *K&F Rest. Holdings, Ltd., 2017 U.S. Dist. LEXIS 14601, 2017 WL 465470, at *5* (citing *Taquino v. Teledyne Monarch Rubber, 893 F.2d 1488, 1501 (5th Cir. 1990))*.

In Louisiana, "delictual actions," including those raising defamation claims, are subject to a prescriptive period of one year that begins running when injury is sustained. *See* *Louisiana Civil Code article 3492*; *Alexander v. Times-Picayune L.L.C., 2016-1134 (La. App. 4 Cir. 5/31/17), 221 So. 3d 198, 203*, *reh'g denied* (June 27, 2017), *writ denied*, *2017-1322 (La. 11/6/17), 229 So. 3d 469*. The burden of proving prescription generally lies with the party asserting prescription, but, when a claim has prescribed on its face, the **[*45]** burden shifts to the plaintiff to prove that his claim has not prescribed. *Alexander, 221 So. 3d at 203*.

Plaintiffs allege that Rouse's told the Developer Defendants that Izzo's produced substandard product and was "litigious" or "extremely litigious." (Doc. 138 at 5, 7). Preliminarily, these statements are expressions of opinion in vague and general terms that would not permit a reasonable person to ascertain the existence of underlying facts "with some degree of certainty." *Fitzgerald, 737 So. 2d at 717*. Plaintiffs' own exhibits suggest that Izzo's exclusion from the Mosely Defendants' development did not result from such statements or the Mosely Defendants' understanding of any underlying facts derived from them. (*See* Doc. 138-6 at 1 (Fernandez's affidavit stating that, during a March 2016 meeting, Russell Mosely expressed regret that he could not include Izzo's in a development because of Rouse's demand for a restrictive covenant, but he did not "know the reason" for the restriction and repeatedly asked Fernandez "what happened" between Rouse's and Izzo's)).

Moreover, despite Plaintiffs' assertion that these false statements were made "for certain" to each of the Developer Defendants, (Doc. 138 at 8), the only instance of defamation or **[*46]** disparagement alleged with any particularity in the Second Amended Complaint is the statement by Rouse, Jr. to Creekstone in 2012, (Doc. 138 at 5), which, in or around June 2013, allegedly resulted in Creekstone and Rouse's signing a lease agreement excluding Plaintiffs, (Doc. 138-5 at 8). This lawsuit was filed in April 2016, (*see* Doc. 1-1), far more than a year after the harm arising from this statement occurred. Plaintiffs' defamation and disparagement claims arising from these facts are therefore prescribed on their face, and Plaintiffs have not provided facts or argument meaningfully undermining this conclusion.[2] Therefore, these claims fail.

D. Tortious Interference with Business Relations[3]

To prove tortious interference with business relations, a plaintiff must show that the defendant improperly and maliciously influenced others not to deal with the plaintiff. *See* *Muslow v. A.G. Edwards & Sons, Inc., 18708-Muslow (La. App. 2d Cir. 6/10/87), 509 So. 2d 1012, 1020*, *writ denied*, *512 So. 2d 1183 (La. 1987)*. Louisiana jurisprudence views this cause of action with "disfavor" and has limited it by requiring a plaintiff to show that the defendant acted with actual malice. *Brown v. Romero, 05-1016 (La. App. 3d Cir. 2/1/06), 922 So.2d 742, 747*, *writ denied*, *06-0480 (La. 5/5/06), 927 So.2d 315*; *JCD Marketing, Co. v. Bass Hotels and Resorts, Inc., 01-1096 (La. App. 4th Cir. 3/6/02), 812 So.2d 834, 841*; *see also* George Denegre, Jr., *et al., Tortious Interference* ***[*47]*** *and Unfair Trade Claims: Louisiana's Elusive Remedies for Business Interference*, *45 Loy. L. Rev. 395, 401 (1999)* ("[T]here appear to be no recorded cases in which anyone actually has been held liable for the tort [of tortious interference with business relations]."). Additionally, it is not enough to allege that a defendant's actions affected plaintiff's business interests; the plaintiff must allege that the defendant actually prevented the plaintiff from dealing with a third party. *Bogues v. Louisiana Energy Consultants, Inc., 46,434 (La. App. 2 Cir. 8/10/11), 71 So. 3d 1128, 1135* (claim failed for, *inter alia*, failure to describe "any conversation between a particular plaintiff/lessor and any particular entity with whom LEC was attempting to confect a business relationship").

According to the Second Amended Complaint and attached exhibits, in 2011 or 2012, Izzo's signed a letter of intent to lease space at Juban Crossing but Rouse's demanded that Izzo's be "kept out," claiming in 2012 that Izzo's is "litigious" and produces a "substandard product." (Doc. 138 at 4-5; Doc. 138-5 at 2). Plaintiffs' tortious interference claims appear to be based on this incident as well as unspecified, undescribed incidents involving other developers. (*Id.* at 8-9; *see also* Doc. 164 at 5-7 ("Likewise, Rouse's lied and coerced other developers **[*48]** to exclude Izzo's from their developments. The numerous contracts, leases and deeds entered into by Rouse's all include a provision to exclude Izzo's. . . . Rouse's has interfered with business relations with Juban, Keller, Mosley, Long Farms,

---

[2] Plaintiffs attach as an Exhibit to their Oppositions an April 2016 letter from the law firm representing the Rouse Defendants. (*See, e.g.*, Doc. 164-1). The letter states that Rouse's follows a "justifiable policy to locate only in shopping centers where it will not be at risk of baseless allegations from competing businesses." (*Id.*). The Court declines to consider this letter, which was not referenced in or attached to the Second Amended Complaint. In any event, the letter does not suggest that Rouse's made statements concerning this "policy" to any Developer Defendants during the events underlying this lawsuit. Plaintiffs also attempted to file a sur-reply arguing, in part, that all of their claims were "filed timely" and the Rouse Defendants failed to "mention or disprove . . . how these claims are continuing torts and have not prescribed." (Doc. 174-1 at 1). The Court denied leave to file a sur-reply, (Doc. 176), but it notes that the proposed sur-reply argued that the alleged torts were continuing "as you can purchase a burrito from Rouse's," which does not establish that individual instances of alleged defamation or disparagement constitute a continuing tort. *See, e.g., Scott v. Zaheri, 2014-0726 (La. App. 4 Cir. 12/3/14), 157 So. 3d 779, 787* (publication of four anonymous letters constituted four "separate and distinct acts" of defamation, with particular damages flowing from each act, and did not "rise to the level of a continuing tort").

[3] Plaintiffs' Opposition characterizes this claim as "Tortious Interference With a Contract." (Doc. 164 at 5). The Second Amended Complaint, however, describes how the Rouse Defendants "tortiously interfered and continue to tortiously interfere with lawful business relations." (Doc. 138 at 8).

Victory Berryland, and others. Furthermore, other developers have heard of the restrictions that Rouse's has imposed on all of its agreements to exclude Izzo's and made it more difficult for Izzo's to find developers willing to rent space to Izzo's, despite the fact that Izzo's has always been a good tenant and provided an excellent product.")). Plaintiffs' Opposition also argues that Rouse's "interfered with the contract that Izzo's had with its employee, Patrick Dartez[.]" (*Id.* at 5).

Plaintiffs' tortious interference claims fail. The only such claims pled with any specificity and with respect to a particular business relationship or negotiation (rather than Plaintiffs' general business interests) are their claims concerning Dartez and Juban Crossing.[4] However, these events occurred in or before 2012, far more than a year before this action was filed in April 2016. The Rouse Defendants accordingly raise a prescription defense. (Doc. 148-1 at 7-8). Plaintiffs' **[*49]** Opposition does not argue that the prescriptive period was suspended or started later than these dates; rather, it obliquely suggests that the Rouse Defendants' torts are ongoing. (*See* Doc. 164 at 5-7). However, Plaintiffs' allegations of ongoing harm are conclusory and appear to rely on injury to Plaintiffs' general business interests rather than particular business relations with a particular third party. Particularly given the "disfavored" status of tortious interference claims, the Court cannot find such a claim adequately pled.

E. Conversion

Plaintiffs' Opposition purports to address a "wrongful conversion" claim. (Doc. 164 at 15). As the Rouse Defendants correctly observe, however, no conversion claim is raised in the Second Amended Complaint. (Doc. 148-1 at 4 n.16; Doc. 172 at 2-3; *see generally* Doc. 138). The Court accordingly declines to consider any such claim.

F. Trade Name Infringement

The primary issues in a trade name infringement case are (1) whether the party seeking relief has a protectable proprietary right in the name it seeks to exclude others from using, and (2) if so, whether there has been an infringement of that right. *Gulf Coast Bank v. Gulf Coast Bank & Tr. Co., 94-2203 (La. 4/10/95), 652 So. 2d 1306, 1309*.

The Second Amended Complaint contends **[*50]** that Rouse's use of "build your own" in connection with its burrito bars infringes on Plaintiffs' trade name of "roll your own." (Doc. 138 at 9). The previously-assigned district judge ruled that a prior iteration of the Complaint adequately stated a claim concerning the use of "build your own," "declin[ing] to make a determination on the inherent or acquired distinctiveness of ['roll your own']" and finding adequate the Complaint's allegations that Rouse's used "build your own" to cause confusion or mistake and deceive consumers about the origin of "such goods or services." (Doc. 31 at 11-12).

The Rouse Defendants invite the Court to reconsider this ruling, arguing that the Court is generally free to reconsider prior rulings. (Doc. 172 at 1 n.1); *see also* *Stoffels ex rel. SBC Tel. Concession Plan v. SBC Commc'ns, Inc., 677 F.3d 720, 727 (5th Cir. 2012)* (under law of the case doctrine, courts show "deference to decisions already made" but are free to reconsider and reverse interlocutory orders for "any reason [they] deem[] sufficient"; when a successor judge replaces another judge, the successor judge has the same discretion to reconsider the first judge's order). The substance of the Rouse Defendants' argument is that it is implausible that a customer would enter a Rouse's burrito **[*51]** bar and be confused about the source of the burritos, and "build your own" (the term actually used by Rouse's) is a generic, descriptive term not amenable to trademark or trade name protection regardless of how used. (Doc. 148-1 at 8-10); *see also* *Gulf Coast Bank, 652 So. 2d at 1313* ("A generic term is the name of a particular genus or class of which an individual article, service or business is but a member.").

In *Gulf Coast Bank*, the Supreme Court of Louisiana opined that a generic term is not given trademark or trade name protection. *652 So. 2d at 1313*. However, a "descriptive term," which "identifies a characteristic or quality of

[4] The Court reiterates that, as discussed *supra*, a lease containing a restrictive covenant is not inherently tortious.

an article, service or business" and is not ordinarily protectable, may become protected "if it acquires a secondary meaning." *Id.* Among those generic terms listed as examples in the Restatement (Third) of Unfair Competition are "camera," "computer programming," "bank," "light" when used to describe beer, and "diet" when used to describe cola. *Restatement (Third) of Unfair Competition § 15* (1995); *see also* *CG Roxane LLC v. Fiji Water Co. LLC, 569 F. Supp. 2d 1019, 1026 (N.D. Cal. 2008)* (ruling that "bottled at the source" was generic when referring to bottled water because the primary importance of the "mark" was to describe "the product itself" rather than the company that bottled it; comparing "bottled at the source" to "disinfectable **[*52]** nail files," "light beer," and "brick oven pizza"); 2 McCarthy on Trademarks and Unfair Competition § 12:20 (5th ed.) ("The distinction between highly descriptive terms and generic names is difficult to state in the abstract. The best that can be done conceptually is to observe that descriptive terms describe a thing, while generic terms name the thing. But in applying this to actual words, one quickly realizes that there is only a fine line between describing and naming." (footnote omitted)).

The Court agrees with the Rouse Defendants. While the Court recognizes the importance of showing proper deference to the decision of the previously-assigned district judge, the Fifth Circuit has emphatically stated that a successor judge remains entitled to revise an interlocutory order for any "sufficient" reason. *Stoffels, 677 F.3d at 727*. The Court does not disagree with the prior ruling that "roll your own," the term that Plaintiffs seek to protect in this action, may be descriptive and therefore protected under certain circumstances. However, Plaintiffs must also make sufficient allegations of the infringement of their protected rights. *Gulf Coast Bank, 652 So. 2d at 1309*. Plaintiffs' allegations of infringement are that Rouse's use of "build your own" and **[*53]** Izzo's "proprietary information is intended to and is likely to cause confusion or mistake and is intended to and has deceived consumers as to the source of origin of such goods or services." (Doc. 138 at 9). Under *Rule 12(b)(6)*, such an "unadorned, the-defendant-unlawfully-harmed-me accusation" and "formulaic recitation of the elements of a cause of action" will not do. *Iqbal, 556 U.S. at 678*. As the Rouse Defendants persuasively argue, their infringement of any rights in "roll your own" is alleged to arise from their use of a common, generic phrase ("build your own") describing the product itself and distinct from the mark to be protected. *See also* *Urgent Care Inc. v. S. Mississippi Urgent Care Inc., 289 F. App'x 741, 742, 744-45 (5th Cir. 2008)* (reversing grant of preliminary injunctive relief that prevented defendants from using the mark "urgent care"; although "UrgiCare" mark was protectable, "urgent care" was a generic term, and plaintiffs could not "prevent use of the term by registering a similar-sounding, but differently spelled mark"). Thus, even assuming that "roll your own" may be entitled to protection, Plaintiffs have failed to adequately allege that the Rouse Defendants' use of the generic phrase "build your own" is infringing. Plaintiffs' claims of trade name infringement must be dismissed.

G. Civil [*54] RICO

RICO makes it illegal for any person "employed by or associated with any enterprise engaged in, or the activities of which affect, interstate or foreign commerce, to conduct or participate, directly or indirectly, in the conduct of such enterprise's affairs through a pattern of racketeering activity or collection of unlawful debt." *18 U.S.C. § 1962(c)*. RICO further prohibits conspiring to violate the aforementioned provision. *18 U.S.C. § 1962(d)*.

Civil RICO claims have three common elements: "'(1) a person who engages in (2) a pattern of racketeering activity, (3) connected to the acquisition, establishment, conduct, or control of an enterprise.'" *Snow Ingredients, Inc. v. SnoWizard, Inc., 833 F.3d 512, 523-24 (5th Cir. 2016)* (quoting *Abraham v. Singh, 480 F.3d 351, 355 (5th Cir. 2007))*. "'A pattern of racketeering activity consists of two or more predicate criminal acts that are (1) related and (2) amount to or pose a threat of continued criminal activity.'" *Id. at 524* (quoting *St. Germain v. Howard, 556 F.3d 261, 263 (5th Cir. 2009))*. The predicate criminal acts can be violations of either state or federal law. *Id.* (citing *St. Germain, 556 F.3d at 263*).

"'Predicate acts are "related" if they have the same or similar purposes, results, participants, victims, or methods of commission, or otherwise are interrelated by distinguishing characteristics and are not isolated events.'" *Bordelon v. Wells Fargo Fin. Louisiana, LLC, 2018 U.S. Dist. LEXIS 95065, 2018 WL 2717521, at *2 (E.D. La. June 6, 2018)* (citing *In re Burzynski, 989 F.2d 733, 742 (5th Cir. 1993))*. "To establish continuity, plaintiffs must prove 'continuity **[*55]** of racketeering activity, or its threat.'" *Word of Faith World Outreach Ctr. Church, Inc. v. Sawyer, 90*

F.3d 118, 122 (5th Cir. 1996) (quoting H.J. Inc. v. Nw. Bell Tel. Co., 492 U.S. 229, 241, 109 S. Ct. 2893, 106 L. Ed. 2d 195 (1989)). "This may be shown by either a closed period of repeated conduct, or an open-ended period of conduct that 'by its nature projects into the future with a threat of repetition.'" *Id.* (quoting H.J. Inc., 492 U.S. at 242). Where alleged RICO predicate acts are "part and parcel" of a single, otherwise lawful transaction, a "pattern of racketeering activity" has not been shown. Castrillo v. Am. Home Mortg. Servicing, Inc., 670 F. Supp. 2d 516, 530 (E.D. La. 2009) (Vance, J.) (citing Word of Faith, 90 F.3d at 123) (further ruling that it was immaterial to analyzing continuity that, had the defendants successfully "submitted their forgery," the "fraud would have continued until the note was satisfied"; RICO concerns long-term criminal conduct, not the long-term consequences of isolated or sporadic conduct).

The core of a civil RICO conspiracy claim under 18 U.S.C. § 1962(d) is "an agreement to commit predicate acts," and a complaint alleging such a claim, "at the very least, must allege specifically such an agreement." Crowe v. Henry, 43 F.3d 198, 206 (5th Cir. 1995) (affirming dismissal of civil RICO conspiracy claims where plaintiff had only conclusorily alleged that defendants had "conspired"); *see also* Snow Ingredients, Inc., 833 F.3d at 526 (affirming dismissal of civil RICO conspiracy claims where complaint alleged that attorney defendants should have known that their conduct **[*56]** was unlawful but failed to allege agreement between them).

The Second Amended Complaint raises a civil RICO conspiracy claim against Rouse, Jr. via Rouse's, which Plaintiffs claim is a RICO "enterprise." (Doc. 138 at 6). Specifically, Plaintiffs contend that Rouse, Jr. "agreed" to violate RICO on three separate occasions, in violation of 18 U.S.C. § 1962(d), as part of three separate "schemes": the scheme "to bribe an Izzo's employee to steal its recipe book," the scheme "to exclude Izzo's from the Juban Crossing shopping center," and the scheme to illegally use Izzo's trade secrets, *i.e.*, its recipes. (*Id.* at 4-6). The Rouse Defendants argue that Plaintiffs have failed to adequately allege a pattern of predicate acts or a criminal enterprise, the "continuing threat" posed by that enterprise, or the identity or roles of other participants in the enterprise. (Doc. 148-1 at 11-12).

Plaintiffs' RICO claim fails. Most significantly, the claim is expressly styled only as a conspiracy claim, but the Second Amended Complaint does not adequately allege the identities of Rouse, Jr.'s co-conspirators, the content or nature of the agreement they entered into, or the circumstances under which they entered into it. Crowe, 43 F.3d at 206; Snow Ingredients, Inc., 833 F.3d at 526. Plaintiffs' **[*57]** Opposition re-iterates that its RICO claim is brought under "§ 1962(d), the conspiracy provision," and it argues that "Rouse[,] Jr. conspired with his store managers to steal the burrito recipes." (Doc. 164 at 13 n.10). However, although the Second Amended Complaint refers to unnamed "employee conspirators," the most specific allegation concerning them is that Rouse, Jr. "directed some of his store managers" in Lafayette to approach Dartez with an offer to defect. (Doc. 138 at 3). This falls short of specifically and plausibly alleging agreement supporting a RICO conspiracy. Moreover, Plaintiffs' allegations of a conspiracy (between Rouse, Jr. and his managers or Dartez) are limited to a single alleged crime in 2011 or 2012; there is no meaningful suggestion that the managers or Dartez conspired "to violate any of the provisions of [18 U.S.C. § 1962(c)]," by "conduct[ing] or participat[ing], directly or indirectly, in the conduct of [the] enterprise's affairs through a pattern of racketeering activity." Crowe, 43 F.3d at 206; *see also* Tel-Phonic Servs., Inc. v. TBS Int'l, Inc., 975 F.2d 1134, 1140-41 (5th Cir. 1992) (complaint deficient for failure to allege facts "implying any agreement involving each of the Defendants to commit at least two predicate acts"; citing favorably similar standards of First, Second, **[*58]** and Third Circuits); Ellis v. Warner, 2017 U.S. Dist. LEXIS 22109, 2017 WL 634287, at *12 (S.D. Fla. Feb. 16, 2017) (in Eleventh Circuit, RICO conspiracy may be proved by showing defendant's agreement as to an "overall objective" or to commit two predicate acts). Especially damning is the lack of specific allegations that anyone other than Rouse, Jr. participated in or agreed to participate in the only "continuous" RICO violation alleged, *i.e.*, the continuing possession and use of Izzo's trade secrets. *See* Malvino v. Delluniversita, 840 F.3d 223, 231 (5th Cir. 2016) ("continuity" requirement keeps civil RICO "focused on the long term criminal conduct Congress intended it to address, and prevent RICO from becoming a surrogate for garden-variety fraud actions properly brought under state law" (citations and quotation marks omitted)). Moreover, as discussed *supra*, there are no non-conclusory allegations that any of the Developer Defendants conspired with any of the Rouse Defendants to engage in unlawful activity, much less an ongoing pattern of unlawful activity.

Some of the alleged predicate offenses are also insufficiently pled. For example, Plaintiffs contends that the circumstances of the "bribe" violate the Travel Act, *18 U.S.C. § 1952*, but the Rouse Defendants correctly observe that this crime requires travel in interstate or foreign commerce or **[*59]** the use of the mail or a "facility" in interstate commerce. This element is generally not difficult to prove. *See United States v. Rodriguez-Cruz, 681 F. App'x 312, 313 (5th Cir. 2017)* (cell phones are "facilities of interstate commerce," and even wholly intrastate use of a cell phone can satisfy jurisdictional "commerce" element of federal crimes); *BCCI Holdings (Luxembourg) Societe Anonyme v. Khalil, 56 F. Supp. 2d 14, 53 (D.D.C. 1999)*, *aff'd in part, rev'd in part on other grounds and remanded sub nom. BCCI Holdings (Luxembourg), S.A. v. Khalil, 214 F.3d 168, 341 U.S. App. D.C. 408 (D.C. Cir. 2000)* ("use of a facility in commerce" includes interstate wire transfers and use of mail, telephone, or telegrapy). However, Plaintiffs do not allege the use of such a facility in connection with this offense. Particularly, Plaintiffs appear to incorrectly believe that it suffices to allege that Rouse's purchases supplies from out of state, (Doc. 138 at 4; Doc. 164 at 9), without alleging that travel, mail, or a facility of interstate commerce was used in connection with this alleged crime. *Cf. United States v. Marek, 238 F.3d 310, 320 (5th Cir. 2001)* (to satisfy "commerce" element, "the *facility*, not its use, is what must be 'in interstate or foreign commerce.'").

Similarly, even if Rouse, Jr. claimed over interstate wires that Izzo's made "substandard" product and was "litigious," and even if one or more of these statements can be considered "false," *see supra*, the contours of any broader "scheme **[*60]** or artifice to defraud" in connection with Juban Crossing are only vaguely alleged. *See United States v. Brown, 459 F.3d 509, 518 (5th Cir. 2006)* (elements of wire fraud are "(1) the formation of a scheme or artifice to defraud, and (2) use of the wires in furtherance of the scheme"); *United States v. Bajoghli, 785 F.3d 957, 962-63 (4th Cir. 2015)* ("While fraud can be committed simply by engaging in an isolated transaction, a *scheme to defraud* requires a plot, plan, or arrangement that is executed by a fraudulent transaction. *See Black's Law Dictionary* 1546 (10th ed. 2014) (defining "scheme" as "[a] systemic plan; a connected or orderly arrangement"; or "[a]n artful plot or plan, [usually] to deceive others")." (emphasis in original)); *see also United States v. Locke, 643 F.3d 235, 247 (7th Cir. 2011)* ("We have previously noted that the crime comprehended by the mail and wire fraud statutes is the scheme to defraud, not just the isolated iterations of wire transmissions or mailings[.]").

In short, Plaintiffs' RICO conspiracy claim lacks sufficient non-conclusory allegations in support of the alleged agreements underlying it, of more than one of the continuing offenses that it is RICO's purpose to protect against, and indeed of any offense beyond Rouse's alleged continuing possession of trade secrets resulting from the theft of a recipe book. *See United States v. Case, 309 F. App'x 883, 886 & n.2 (5th Cir. 2009)* (suggesting **[*61]** that knowing possession of trade secrets without authorization and with the "inten[t] to convert" under *18 U.S.C. § 1832(a)* is a continuing offense). The civil RICO claim therefore fails.

H. Leave to Amend

"[A] court ordinarily should not dismiss the complaint except after affording every opportunity to the plaintiff to state a claim upon which relief might be granted." *Byrd v. Bates, 220 F.2d 480, 482 (5th Cir. 1955)*. The Fifth Circuit has further stated:

> In view of the consequences of dismissal on the complaint alone, and the pull to decide cases on the merits rather than on the sufficiency of pleadings, district courts often afford plaintiffs at least one opportunity to cure pleading deficiencies before dismissing a case, unless it is clear that the defects are incurable or the plaintiffs advise the court that they are unwilling or unable to amend in a manner that will avoid dismissal.

Great Plains Trust Co. v. Morgan Stanley Dean Witter & Co., 313 F.3d 305, 329 (5th Cir. 2002). Relying on *Great Plains* and other cases from this circuit, one district court in Texas articulated the standard as follows:

> When a complaint fails to state a claim, the court should generally give the plaintiff at least one chance to amend before dismissing the action with prejudice unless it is clear that the defects in the complaint are incurable. *See Great Plains Trust Co. v. Morgan Stanley Dean Witter & Co., 313 F.3d 305, 329 (5th Cir. 2002)*; *see also United States ex rel. Adrian v. Regents of the Univ. of Cal., 363 F.3d 398, 403 (5th Cir. 2004)* **[*62]**

> ("Leave to amend should be freely given, and outright refusal to grant leave to amend without a justification . . . is considered an abuse of discretion.") (internal citation omitted). However, a court may deny leave to amend a complaint if the court determines that "the proposed change clearly is frivolous or advances a claim or defense that is legally insufficient on its face." 6 Charles A. Wright, Arthur R. Miller & Mary Kay Kane, Federal Practice and Procedure § 1487 (2d ed.1990) (footnote omitted); *see also* Martin's Herend Imports, Inc. v. Diamond & Gem Trading United States of Am. Co., 195 F.3d 765, 771 (5th Cir. 1999) ("A district court acts within its discretion when dismissing a motion to amend that is frivolous or futile.") (footnote omitted).

Tow v. Amegy Bank N.A., 498 B.R. 757, 765 (S.D. Tex. 2013). Finally, one leading treatise explains:

> As [] numerous case[s] . . . make clear, dismissal under Rule 12(b)(6) generally is not immediately final or on the merits because the district court normally will give the plaintiff leave to file an amended complaint to see if the shortcomings of the original document can be corrected. The federal rule policy of deciding cases on the basis of the substantive rights involved rather than on technicalities requires that the plaintiff be given every opportunity to cure a formal defect in the pleading. This is true even when the district judge doubts that the plaintiff **[*63]** will be able to overcome the shortcomings in the initial pleading. Thus, the cases make it clear that leave to amend the complaint should be refused only if it appears to a certainty that the plaintiff cannot state a claim. A district court's refusal to allow leave to amend is reviewed for abuse of discretion by the court of appeals. A wise judicial practice (and one that is commonly followed) would be to allow at least one amendment regardless of how unpromising the initial pleading appears because except in unusual circumstances it is unlikely that the district court will be able to determine conclusively on the face of a defective pleading whether the plaintiff actually can state a claim for relief.

5B Charles A. Wright, Arthur R. Miller, *et al., Federal Practice and Procedure* § 1357 (3d ed. 2016).

Further leave to amend is unwarranted. Acting in accordance with "wise judicial practice," the Court previously afforded Plaintiffs multiple opportunities to amend their original Complaint. As a partial result, this case has been pending two years and has not advanced past the pleading stage. These multiple amendments strongly suggest that Plaintiffs have pled their best case. Moreover, the Court **[*64]** has expressly informed the parties that the Second Amended Complaint would be the final complaint in this case. (Doc. 136 at 1). Therefore, further leave to amend is unwarranted and will be denied.

V. CONCLUSION

Accordingly, the Motions, (Docs. 139, 140, 143, 148), are GRANTED, and Plaintiffs' claims are DISMISSED WITH PREJUDICE. The Court will enter judgment consistent with this Ruling and Order.

Signed in Baton Rouge, Louisiana, on July 24, 2018.

CIVIL MINUTES — GENERAL

Proceedings: (IN CHAMBERS) ORDER RE DEFENDANT OPERATION TECHNOLOGY, INC. D/B/A ETAP AND OSISOFT LLC'S MOTION TO DISMISS THIRD AMENDED COMPLAINT (DKT. 392); DEFENDANT SCHNEIDER ELECTRIC USA, INC.'S MOTION TO DISMISS THIRD AMENDED COMPLAINT (DKT. 394)

I. Introduction

Power Analytics Corporation ("Plaintiff") brought this action against Operation Technology, Inc. ("ETAP"), OSIsoft LLC ("OSI") and Schneider Electric USA, Inc. ("Schneider") (collectively, "Defendants"). Dkt. 1. On June 21, 2016, Plaintiff filed a First Amended Complaint ("FAC"). Dkt. 38. On June 20, 2017, Plaintiff filed a Second Amended Complaint ("SAC"). Dkt. 285. On January 11, 2018, Plaintiff filed a Third Amended Complaint ("TAC"). Dkt. 377. The TAC advances claims for antitrust violations under the Sherman Act, 15 U.S.C. §§ 1 and 2, violation of the Cartwright Act, Cal. Bus. & Prof. Code §§ 16700 et seq., violation of the North Carolina Unfair and Deceptive Trade

Practices Act, *N.C. Gen. Stat. §§ 75-1*, *75-1.1*, *75-2*, and *75-2.1*, conspiracy and the commission of several business torts.

On February 8, 2018, Schneider brought a Motion to Dismiss the TAC **[*2]** ("Schneider Motion"). Dkt. 394. Plaintiff opposed the Schneider Motion (Dkt. 415), and Schneider replied. Dkt. 428. ETAP and OSI brought a parallel Motion to Dismiss the TAC ("ETAP Motion"). Dkt. 392. Plaintiff opposed the ETAP Motion (Dkt. 416), and ETAP and OSI replied. Dkt. 429. On May 14, 2018, a hearing on the Schneider Motion and the ETAP Motion (collectively, "the Motions") was held, and the Motions were taken under submission.[1] Dkt. 445. For the reasons stated in this order, the Motions are **GRANTED**, without prejudice.

II. Factual Background

A. The Parties

Plaintiff is a Delaware corporation whose principal place of business is in North Carolina. TAC, Dkt. 377 ¶ 1. Plaintiff "is in the business of developing, selling and supporting software products which are used in the operation of electric power distribution systems." *Id.* "Power Analytics' line of products are employed in Power Grid design; control and safety management; the collection, storage and analysis of system data; and the modeling, simulation and visualization of grid operations." *Id.*

ETAP is a California corporation whose principal place of business is here. *Id.* ¶ 2. ETAP "develops and sells software products for use **[*3]** with Power Grids, many of which are similar in functionality to those developed and sold by Power Analytics." *Id.* ¶ 3. OSI is a Delaware corporation whose principal place of business is also in California. *Id.* ¶ 4. OSI "develops and sells Power Grid data collection and archiving software products for use with Power Grids." *Id.* ¶ 5. OSI sells these products and related services to customers located throughout North America. *Id.*

Schneider is a Delaware corporation whose principal place of business is in Massachusetts. *Id.* ¶ 6. "Among other things, Schneider makes and sells software products and a multitude of devices for use with Power Grids. Schneider sells these products and related services to customers 'together with products and services provided by other suppliers as a bundled or 'Platform' product to customers in North America.'" *Id.* ¶ 8.

B. Procedural History

This Order addresses the third set of motions to dismiss the operative complaints in this action. On July 22, 2016, Schneider moved to dismiss the non-patent claims in the FAC. Dkt. 42. On the same day, ETAP and OSI moved to dismiss the non-patent claims in the FAC. Dkt. 44. On October 26, 2016, this action was transferred **[*4]** to this District from the District of Delaware. Dkt. 73. On January 30, 2017, a hearing on both motions to dismiss was held and they were taken under submission. Dkt. 158. On May 10, 2017, both motions to dismiss were granted without prejudice as to all but one of the nonpatent claims advanced in the FAC ("FAC Order"). Dkt. 227.[2]

The FAC Order identified several shortcomings in the Sherman Act claims as alleged in the FAC. They included that the FAC failed plausibly to allege any of the following: (i) the existence of de facto exclusive dealing arrangements between or among any of the Defendants; (ii) foreclosure from competition in a relevant market as a result of the alleged exclusive dealing arrangements among the Defendants; (iii) harm to competition; and (iv) antitrust injury. FAC Order at 11-18. The FAC Order also identified deficiencies in the remaining causes of action.

---

[1] At the hearing, Plaintiff's counsel raised a refusal to deal as a new basis for certain claims. Defendants sought leave to brief this issue if it would be considered in connection with the present motions. Because this new theory has not been briefed by the parties, it is not addressed in this Order.

[2] The FAC Order dismissed the Clayton Act *Section 3* claim with prejudice. FAC Order at 22-23.

On July 17, 2017, Schneider brought a motion to dismiss the non-patent claims in the SAC. Dkt. 304. ETAP and OSI brought a parallel motion to dismiss. Dkt. 303. On October 2, 2017, a hearing on both motions to dismiss was held and they were taken under submission. Dkt. 345. On December 7, 2017, both motions to **[*5]** dismiss were granted without prejudice as to all claims advanced in the SAC ("SAC Order"). Dkt. 361. The SAC Order identified several of the same deficiencies as the FAC Order.

C. Overview of Technology

1. Power Grids and Microgrids

"Power Grids are networks that move and distribute electric power between generators and other sources for electricity consuming devices." TAC ¶ 14. "Microgrids are small-scale Power Grids used for safe and reliable movement and distribution of electrical power in specific physical facilities, applications, or defined geographic areas" and may operate in isolation while connected to "other Microgrids, or . . . a larger Power Grid." *Id.* ¶ 15. The TAC alleges that "Microgrids are often employed in power generation facilities, (like nuclear power plants), data centers and other commercial and industrial facilities that consume large volumes of electric power." *Id.* ¶ 16. It also alleges that Microgrids are comprised of "Grid Elements, i.e., devices and operational components physically connected to the Grid." *Id.* ¶ 17.

The TAC next alleges that Grid Design and Management Products and Services ("Grid D and M Products") "consist of software and hardware used in the **[*6]** design of, and the safe, stable and efficient operation and management of the Microgrids, that operate in facilities such as nuclear power plants, oil refineries, commercial and industrial buildings, data centers, military installations, and air traffic control centers." *Id.* ¶ 18. The TAC alleges that Grid D and M Products are a "critical and necessary infrastructure component for Power Grids and Microgrids." *Id.* ¶ 19. It alleges that the following three Grid D and M Products are relevant to the claims advanced in this action: (i) Grid Design Products, (ii) Real Time Products, and (iii) Historian Software. *Id.* ¶¶ 19-20.

a) Grid Design Products

The TAC alleges that Plaintiff makes and sells Grid Design Products, which "are software programs used in the engineering, design and subsequent management of Power Grids." *Id.* ¶¶ 22. It alleges that Grid Design Products "provide a functionality unique for use in Power Grids." *Id.* Plaintiff's Grid Design Products include DesignBase ™ and DesignBase Xi ™. *Id.* ¶ 23. The TAC alleges that "ETAP makes and sells Grid Design products that compete with" Plaintiff's Grid Design Products. *Id.* ¶ 24. It alleges that "[c]ertain Grid Design Products and Services **[*7]** offered and sold by" Plaintiff and ETAP are "distinguished by having been audited and certified for use in nuclear facilities, as required by federal law and/or regulation governing operation of such facilities." *Id.* ¶ 25.

b) Real Time Products

The TAC alleges that Plaintiff makes and sells Real Time Products, which "are software products that provide for additional functionality once the Power Grid is installed and deployed." *Id.* ¶¶ 27, 29. It alleges that such functionality "is unique for use in power grids," *id.* ¶ 28, and may include "the monitoring, modeling, simulation, and visualization, [of] the current and future operation of the Power Grid by collecting and utilizing current data in near real time" and the evaluation and tracking of "system failures." *Id.* ¶ 27. It then alleges that Real Time Products enable "Power Grids to run securely, safely, efficiently and without significant interruption" by "evaluat[ing] and track[ing] system failures and avoid[ing] future damaging events by analyzing trends and predicting potentially damaging events." *Id.* It alleges that Plaintiff's Real Time Products "achieve full functionality" only when they are paired with Plaintiff's Grid Design **[*8]** Products. *Id.* ¶ 114.

The TAC alleges that that ETAP and Schneider make and sell Real Time Products that "compete" with Plaintiff's Real Time Products. *Id.* ¶ 32. It alleges that in November 2013, Plaintiff issued a press release announcing its Real Time Product. *Id.* ¶ 84. It alleges that, after ETAP learned about the statements in the press release, it "immediately recognized that [Plaintiff] posed a competitive threat" that could not be tolerated. *Id.* ¶ 85. It alleges that an ETAP employee emailed colleagues regarding the announcement and stated: "Great!!!!! All of our USP [Unique Sales Proposition] will be now for EDSA. We need to kill such competition from these companies. (EDSA, Cyme, DigSilent, PSSE in particular)." *Id.* (alteration in original).

c) Historian Software

The TAC alleges that Real Time Products and Grid Design Products "must interact" with Historian Software if they are "audited and implemented in nuclear facilities . . . in order to meet legal and regulatory requirements." *Id.* ¶ 34. Thus, it alleges that "nuclear power generation facilities" are required by law or regulation "systematically [to] collect and retain time series information related to the operation of the **[*9]** facilities' Power Grid system, to store such information for extended periods of time as 'records' of system performance, and report certain prescribed incidents of system operation to other nuclear facilities using Grid D and M products." *Id.* ¶ 33. The TAC alleges that Historian Software performs this "essential information management function." *Id.*

The TAC alleges that Historian Software "may be sold separately or together with Grid Design and Real Time Products." *Id.* ¶ 35. Plaintiff sells Historian Software. *Id.* ¶ 35. Each of the Defendants sells unique Historian Software. *Id.* ¶¶ 35-38. The Real Time Products of Plaintiff and ETAP both allegedly interface with third-party Historian Software. *Id.*

2. <u>EMS Platforms</u>

The TAC alleges that the relevant products -- Grid Design Products, Real Time Products and Historian Software -- can be combined into "'bundles' of products and services" and "sold to facility owners and managers as a complete 'platform' or 'bundled' product utilized to operate the entire Microgrid." *Id.* ¶ 39. Thus, the TAC defines EMS Platforms as "a bundle of integrated components, specifically marketed and sold as a complete bundle, that optimize, supervise and control power, **[*10]** providing a turnkey to run the entire Power Grid." *Id.* ¶ 40.

D. Overview of the Alleged Relevant Product Markets

The TAC alleges that there are several relevant product markets: (i) the NUPIC Grid Design Market; (ii) the NUPIC Real Time Market and (iii) the EMS Platform Market. *Id.* ¶¶ 60, 61, 119. It alleges as alternatives to the EMS Platform Market the following four end-user EMS platform markets: (i) the Commercial Buildings EMS Platform Market; (ii) the Data Center EMS Platform Market; (iii) the Industrial EMS Platform Market and (iv) the Infrastructure/Grid EMS Platform Market. *Id.* ¶ 161.

1. <u>The Relevant NUPIC Markets</u>

a) In General

The TAC makes several allegations concerning the common elements of the NUPIC Grid Design Market and the NUPIC Real Time Market (collectively, the "NUPIC Markets"). It alleges that NUPIC stands for "the Nuclear Procurement Issues Committee." *Id.* ¶ 63. It alleges that NUPIC is "an industry partnership among nuclear power plants licensed by the Nuclear Regulatory Commission." *Id.* It alleges that both alleged relevant markets are comprised "almost entirely of nuclear power generation facilities, a small number of other facilities that use or employ nuclear **[*11]** power, and entities who provide design and other services to such nuclear power facilities." *Id.* ¶ 62.

The TAC alleges that "[a]ll North American nuclear facilities are members of NUPIC." *Id.* ¶ 63. It alleges that products used in nuclear facilities attain NUPIC certification through an audit by "at least five separate NUPIC members." *Id.* It alleges that "[o]nce the required number of NUPIC members are satisfied with the audit results, one utility is selected to conduct an audit every three years." *Id.*

The TAC alleges that the "NUPIC audit process makes products and services sold in the NUPIC Grid Design and NUPIC Real Time Markets economically and functionally distinct from other markets" that sell and service non-NUPIC certified versions of these products, including the EMS Platform Market. *Id.* ¶ 64. It alleges that this is the case for several reasons. *First*, products without NUPIC certification cannot, by law or regulation, be substituted for NUPIC-certified products and services. *Id. Second*, NUPIC-certified products "must be manufactured and must perform to meet specific safety and reliability standards" which are not required for non-NUPIC certified products. *Id. Third*, non-NUPIC **[*12]** certified products are not subject to additional operational and reporting requirements imposed on NUPIC-certified products. *Id.* It alleges that because of "these significant added features and recurring service requirements," NUPIC-certified products represent a "distinct relevant product market." *Id.* ¶ 65.

The TAC alleges that companies that seek to compete in the NUPIC Markets face "substantial" barriers to entry. *Id.* ¶ 76. This is allegedly due to two reasons. *First*, NUPIC Markets are "low growth market[s] in terms of new customers and new sites for existing customers." *Id.* ¶¶ 72, 76. *Second*, the NUPIC "audit, certification, product functionality, related personnel and record keeping, reporting, reauditing, Quality Assurance and Software Development standards all impose significant additional financial and operational burdens" on potential entrants into the NUPIC Markets. *Id.* ¶ 76.

b) NUPIC Grid Design Market

The TAC alleges that one relevant product market that is "unreasonably restrained by" ETAP and OSI is the NUPIC Grid Design Market. *Id.* ¶¶ 59-60. The TAC defines that market as one "for the sale and servicing of Grid Design Products to customers who, by law and or regulation **[*13]** may only purchase and deploy Grid Design Products that have been 'certified' by successfully completing a NUPIC audit within the prior three years." *Id.* ¶ 60. The relevant geographic market for the NUPIC Grid Design Market is North America. *Id.* ¶ 71.

The TAC alleges that Plaintiff and ETAP are the only entities that compete within the NUPIC Grid Design Market. *Id.* ¶ 66. It alleges that ETAP and Plaintiff each is authorized to sell its respective Grid Design Products to NUPIC customers. *Id.* ¶¶ 67-68. Further, it alleges that Plaintiff "has historically participated" in the NUPIC Grid Design Market. *Id.* ¶ 68. The TAC alleges that ETAP has made false representations to the public and to NUPIC customers that it "has the only Grid Design Product certified by NUPIC." *Id.* ¶ 67. The TAC alleges that Plaintiff's Grid Design Product "is lower priced than ETAP's competing product and offers additional functionality attractive to NUPIC market customers, such as direct current system design management." *Id.* It alleges that ETAP has a 97% market share in the NUPIC Grid Design Market and "at least 60 of 64 U.S. nuclear power facilities as customers." *Id.* ¶ 74. It alleges that ETAP also has "5 of the **[*14]** 6 Canadian nuclear power facilities and all 3 of the nuclear power facilities in Mexico." *Id.*

The TAC next alleges that there are "a significant number of" companies that manufacture Grid Design Products that have not sought NUPIC certification or completed a NUPIC audit. *Id.* ¶ 77. It alleges that these potential competitors include "SKM, DigSilent, Cyme (Eaton) and PSSE." *Id.* The TAC alleges that "the limited number of competitors" in the NUPIC Grid Design Market is "a direct result of the following" factors:

> the self-admitted market dominance of ETAP for NUPIC certified Grid Design products and the self-admitted market dominance of OSI in Historian Software in the NUPIC market; the high barriers to entry for additional competitors . . . and the illegal anticompetitive agreement . . . between ETAP and OSI to foreclose all others from the NUPIC market.

Id. ¶ 70.

c) NUPIC Real Time Market

The TAC alleges that a second relevant product market is the NUPIC Real Time Market. *Id.* ¶ 61. The TAC defines this market as one for "the sale and servicing of Real Time Products to customers who, by law and or regulation, may only purchase and deploy Real Time Products that have been 'certified' by successfully **[*15]** completing a NUPIC audit within the past three years." *Id.* The geographic market for the NUPIC Real Time Market is North America. *Id.* ¶ 71.

The TAC alleges that Plaintiff is the only company that competes with ETAP that is "capable of obtaining" NUPIC certification for its Real Time Products. *Id.* ¶ 96. It alleges that, based on Plaintiff's knowledge of the relevant markets, no companies have sought NUPIC certification for their Real Time Products, including ETAP. *Id.* ¶ 115. It alleges that Plaintiff has not undertaken a NUPIC audit for its Real Time Products because the alleged anticompetitive agreement between OSI and ETAP "has foreclosed virtually all sale opportunities, creating an insurmountable economic barrier to entry." *Id.* It alleges that this has occurred because Plaintiff's Real Time Products "achieve full functionality" only when they are used with Plaintiff's Grid Design Products. *Id.* ¶ 114. Thus, because the OSI—ETAP Agreement ensures that ETAP continues to enjoy a 97% market share in the NUPIC Grid Design Market, the costs Plaintiff would have to incur to obtain NUPIC certification for its Real Time Products outweigh the potential revenue Plaintiff could reasonably expect **[*16]** to generate if it occupied the remaining 3% of the market. *Id.* ¶ 115. The TAC then alleges that there is a "need and likely demand" for Real Time Products by NUPIC facilities. *Id.*

2. The EMS Relevant Markets

a) The EMS Platform Market

The TAC alleges that the market for the sale and servicing of Energy Management Systems platforms ("EMS Platform Market") is a separate, relevant antitrust product market. *Id.* ¶ 119. The TAC defines EMS Platforms as "the full bundle of automation, monitoring and control software, hardware and related equipment purchased by facility owner/operators for use as an 'EMS Platform.'" *Id.* ¶ 136. Thus, EMS Platforms consist of a bundle of numerous components, including Grid Design Products and Real Time Products. *Id.* ¶ 147. The alleged geographic market for the EMS Platform Market is North America. *Id.* ¶ 156.

The TAC alleges that customers in the EMS Platform Market share "common characteristics" including the following: (i) they operate in low or medium voltage environments, and (ii) they place a premium on the reliability of their electrical power systems and employ "more sophisticated monitoring systems" and "redundant equipment" to prevent power outages. *Id.* **[*17]** ¶¶ 121-22. It alleges that in the EMS Platform Market, "the demand for bundled sales is sufficiently strong so as to restrict competition to sales among firms that are able to provide a complete or nearly complete bundle or Platform," and that such firms include Schneider and certain other competitors. *Id.* ¶ 140. It alleges that "[s]uppliers of Platform components, such as ETAP and Power Analytics are entirely reliant upon platform suppliers such as Schneider to include their component products as choices for customers in constructing EMS Platforms." *Id.* It alleges that Schneider uses its own component parts in EMS Platforms, as well as those from "unaffiliated suppliers." *Id.* ¶ 148.

The TAC alleges that Schneider holds a share of more than 50% of the EMS Platform Market, which allegedly makes it a "critical bridge to a substantial share of the EMS Platform market for suppliers who provide Grid D and M Products." *Id.* ¶¶ 142, 151. It alleges that if component suppliers like Plaintiff do not have access to this critical bridge, they "lack a viable method for selling their Grid D and M Products in the EMS Platform Market." *Id.* ¶ 143. It alleges that, as a result of an alleged "exclusionary agreement" between Schneider and ETAP, ETAP is "the sole and exclusive supplier" of Grid Design Products and Real Time Products to Schneider for use in its EMS Platforms. *Id.* ¶ 149.

The TAC alleges that Schneider competes with others in the EMS Platform Market, including "Eaton, Siemens, GE, ABB, Honeywell and other additional smaller competitors." *Id.* ¶ 152. It alleges **[*18]** that, because the non-Schneider portion of the EMS Platform Market is fragmented, none of Schneider's competitors "represent[s] a viable alternative by which competitors to ETAP, like Power Analytics and others, could reach a meaningful share of EMS platform customers with their Grid D and M Products." *Id.* It alleges that Schneider and its parent company have a dominant share of the EMS Platform Market because they "possess the manufacturing capability for virtually all the equipment needed in EMS Platforms" and EMS platform suppliers that have worked with a customer in the past often work with that customer on new projects. *Id.* ¶¶ 154-55.

The TAC alleges as alternatives to the EMS Platform Market, the following four end-user EMS markets:

> (i) the sale and servicing of Energy Management Systems (EMS) platforms for Commercial Buildings (Commercial Buildings EMS Platform Market); (ii) the sale and servicing of Energy Management Systems (EMS) platforms for Data Centers (Data Center EMS Platform Market); (iii) the sale and servicing of Energy Management Systems (EMS) platforms for Industrial (Industrial EMS Platform Market); and (iv) the sale and servicing of Energy Management Systems (EMS) **[*19]** platforms for Infrastructure/Grid (Infrastructure/Grid EMS Platform Market).

Id. ¶ 161.

b) The End-User EMS Markets

North America is the alleged geographic market for the four end-user markets. *Id.* ¶ 172. The TAC alleges that these end-user markets are distinct "based on the configuration, integration and automation of select components" even though some components are used in more than one end-user platform. *Id.* ¶¶ 162, 165. It alleges that Schneider has publicly stated that it has a "dominant position" in each of the EMS end-user markets. *Id.* ¶ 164.

(1) <u>The Commercial Buildings EMS Platform Market</u>

The TAC alleges that facilities in the Commercial Buildings EMS Platform Market include healthcare, hotel, office and "other similar low and medium voltage power system facilities where the prohibitive costs of power failure and/or power-related accidents require high levels of redundancy and more sophisticated monitoring and modeling software." *Id.* ¶ 173. It alleges that, by having at least a 40% market share, Schneider is the largest EMS platform supplier in the Commercial Buildings EMS Platform Market. *Id.* ¶ 175.

(2) <u>The Data Center EMS Platform Market</u>

The TAC alleges that Data Centers are **[*20]** "low and medium voltage power system facilities where the prohibitive costs of power failure and/or power-related accidents require high levels of redundancy and more sophisticated monitoring and modeling software." *Id.* ¶ 177. It alleges that, by having at least a 50% market share, Schneider is the largest supplier in the Data Center EMS Platform Market. *Id.* ¶ 179. It alleges that this market is concentrated. *Id.*

(3) <u>The Industrial EMS Platform Market and the Infrastructure/Grid EMS Platform Market</u>

The TAC alleges that the Industrial EMS Platform Market includes "discrete and continuous process facilities, including Packaging, Machine Building, Food and Beverage, Mining, Metals, Minerals, Oil & Gas facilities, among other similar low and medium voltage power system facilities where the prohibitive costs of power failure and/or power-related accidents require high levels of redundancy and more sophisticated monitoring and modeling software." *Id.* ¶ 181. It alleges that, by having at least a 30% market share, Schneider is one of the two largest suppliers in the Industrial EMS Platform Market. *Id.* ¶ 183. It alleges that this market is concentrated. *Id.*

The TAC alleges that facilities in the **[*21]** Infrastructure/Grid EMS Platform Market include "Water & Wastewater plants, Transportation systems, Electric Generation and Transmission Utility facilities and other similar low and medium voltage power system facilities where the prohibitive costs of power failure and/or power-related accidents require high levels of redundancy and more sophisticated monitoring and modeling software." *Id.* ¶ 185. It alleges that, by having at least a 33% market share, Schneider is the largest supplier in the Infrastructure/Grid EMS Platform Market. *Id.* ¶ 187. It alleges that this market is concentrated. *Id.* It alleges that because many of the components used in industrial EMS platforms are also used in infrastructure EMS platforms, the Industrial EMS Platform Market and the Infrastructure/Grid EMS Platform Market constitute a single product market. *Id.* ¶ 189.

E. The Alleged Anticompetitive Arrangement between ETAP and OSI

The TAC alleges that OSI has a "dominant" share of Historian Software in the NUPIC Markets because 76% of "operating nuclear power generators" in the United States and 100% of such facilities in Canada use OSI products. *Id.* ¶ 75. It alleges that OSI is a "critical bridge" to potential **[*22]** customers in the NUPIC Markets as a result of its dominant market share. *Id.* ¶ 97.

The TAC alleges that ETAP and OSI entered an anti-competitive agreement to bundle their products (the "OSI—ETAP Agreement") in September 2014. *Id.* ¶¶ 86, 90. It alleges that the OSI—ETAP Agreement is "not a vertical agreement between a buyer and a seller, or a manufacturer and a retailer" but instead an agreement between "two sellers of independent, but necessarily interconnected products to foreclose and exclude existing and potential competitors from providing products which challenge each of their dominant monopoly positions in the market." *Id.* ¶ 79.[3]

The TAC alleges that, although ETAP and OSI have characterized this agreement "as a 'strategic partnership,'" it was actually "intended and operated . . . to further OSI's express business strategy to find 'partners' that will help it 'lock out competition.'" *Id.* ¶ 86. It alleges that in furtherance of this objective, the OSI—ETAP Agreement includes "unreasonable impediments and conditions intended to preclude and/or deter" existing customers from switching out OSI and ETAP's products with those of Plaintiff's and certain other "actual and potential **[*23]** competitors." *Id.* ¶ 91. It alleges that a 2013 Term Sheet documenting key provisions in the agreement stated that customers who purchase OSI products under the OSI—ETAP Agreement may only use those products in conjunction with ETAP products. *Id.* ¶ 92. Further, it alleges that a Memorandum of Understanding ("MOU") entered by ETAP and OSI requires that OSI exclusively "recommend and promote ETAP Products as a preferred power systems analysis and management platform to all prospective customers" and imposes a reciprocal requirement on ETAP. *Id.* ¶ 94. It alleges that this reciprocal arrangement amounts to an "exclusivity mechanism." *Id.* ¶ 95.

The TAC alleges that the OSI—ETAP Agreement has harmed potential and actual competitors, including Plaintiff. *Id.* ¶ 91. It makes several allegations regarding the business negotiations of Plaintiff and OSI between 2011 and 2014, which allegedly included "multiple meetings, discussions and joint sales efforts." *Id.* ¶ 98. As an example, it alleges that in 2011, Plaintiff approached OSI and proposed the entry of a non-exclusive cooperative relationship through which OSI would serve as the "critical bridge" for Plaintiff's Grid Design Products. *Id.* ¶ 97. **[*24]** It also alleges that Plaintiff and OSI first "worked together" in 2012 on a Microgrid project for the University of California at San Diego. *Id.* ¶ 101. The TAC alleges that at about this time, the CEO of OSI told Plaintiff's former CEO that Plaintiff's Real Time Products represented a growth opportunity in the NUPIC Markets. *Id.*

The TAC then alleges that Plaintiff's employees met with OSI's employees in 2012 to discuss the possibility of targeting OSI's NUPIC customers, which would have allowed Plaintiff "to seek and obtain NUPIC certification for its Real Time Products." *Id.* ¶ 102. It alleges that Plaintiff's employee who prepared the 2011 proposal joined ETAP in 2013, and that shortly thereafter, OSI terminated the aforementioned discussions with Plaintiff. *Id.* ¶ 99. It also alleges that, following the announcement of the OSI—ETAP Agreement, OSI "abruptly" ceased all marketing and joint sales efforts with Plaintiff to NUPIC customers. *Id.* ¶¶ 96, 105. It alleges that before the announcement, Plaintiff paid OSI to obtain access to its Historian Software code to ensure that Plaintiff's Grid Design Products "worked seamlessly with OSI's PI System Historian Software." *Id.* ¶ 100. The TAC **[*25]** alleges that the efforts Plaintiff has made since the OSI—ETAP Agreement was entered to partner with OSI have been "consistently rejected" even though the quality of Plaintiff's products has not changed. *Id.* ¶¶ 106, 108.

The TAC alleges that in "furtherance" of the OSI—ETAP Agreement, ETAP made certain false representations to several of Plaintiff's customers. *Id.* ¶ 109. For example, it alleges that ETAP falsely stated that it was the only NUPIC-certified supplier of Grid Design Products and that Plaintiff was "financially unstable," had "lost its NUPIC certification" and "would not be in the market for long." The TAC alleges that these false statements were made to push Plaintiff out of the NUPIC Markets. *Id.* The TAC then alleges that since the inception of the OSI—ETAP Agreement, Plaintiff has lost four of its NUPIC customers: Duke Energy, Enercon, Atomic Energy of Canada and Energy Northwest. *Id.* ¶ 112. It alleges that collectively these customers represented more than 35% of the business held by Plaintiff prior to the OSI—ETAP Agreement. *Id.* It alleges that, upon information and belief, all four customers "switched from" Plaintiff to ETAP as a result of the OSI—ETAP Agreement. ***[*26]*** *Id.*

The TAC alleges that Plaintiff has "been effectively driven out" of the NUPIC Grid Design Market as a result of the OSI—ETAP Agreement. *Id.* ¶ 110. It alleges that, upon information and belief, no supplier of Grid Design Products other than ETAP has made "a single sale to any nuclear facility" of Grid Design Products since the OSI—ETAP

---

[3] The TAC also alleges that, as early as 2013, OSI and ETAP agreed "to maintain and enhance their individual and collective monopoly positions in the NUPIC Market[s] by and through an exclusive arrangement whereby they would sell their products in conjunction with each other in order to foreclose competitors from challenging their market power and to maintain and increase their monopoly positions." *Id.* ¶ 80.

Agreement was entered. *Id.* ¶ 111. It also alleges that as a result of the agreement, Plaintiff has been "completely foreclosed from certifying and offering" its Real Time Products in the NUPIC Real Time Product Market. *Id.* ¶ 110.

The TAC alleges that the OSI—ETAP Agreement unreasonably restrains trade in the NUPIC Markets. *Id.* ¶¶ 105, 109, 117-18. In support of this contention, it is alleged that:

> ETAP's high market share of 97% in the NUPIC Grid Design Market confirms ETAP's monopoly power in the NUPIC Grid Design Market. The other party to the anticompetitive arrangement, OSI, has a monopoly market share for Historian software used by NUPIC customers in excess of 80%. This arrangement has operated to unreasonably constrain the availability of OSI's entrenched Historian products for use in conjunction with ETAP's competitors NUPIC Grid Design products, **[*27]** foreclosing actual and potential competition to ETAP in 80% of the NUPIC Grid Design Market.

Id. ¶ 116.

The TAC alleges that there are significant "financial and operational incentives that bind" OSI and ETAP to the OSI—ETAP Agreement. *Id.* ¶ 117. For example, it is alleged that the OSI—ETAP Agreement "protects" OSI because it "links OSI to the entrenched monopoly shareholder . . . ETAP." *Id.* ¶ 83.

F. The Alleged Anticompetitive Arrangement between ETAP and Schneider

As noted, the TAC alleges that Schneider is an EMS Platform supplier that has "control over which other suppliers' products will be offered to customers" in its EMS Platforms. *Id.* ¶¶ 136, 147. The TAC alleges that there is an "express" anticompetitive agreement between ETAP and Schneider (the "Schneider—ETAP Agreement") that is "not a vertical agreement between a buyer and seller, or a manufacturer and a retailer," but an agreement "between two sellers of components in a bundle offered to EMS Platform customers, where one of the two suppliers controls the contents of the bundle and has substantial market power." *Id.* ¶ 197.

The TAC alleges that the Schneider—ETAP Agreement arose from the December 2012 decision by Schneider and **[*28]** ETAP to enter a "cooperative agreement" to bundle their respective products. *Id.* ¶ 198. Its terms include the launch of a module that combined Schneider's electrical power analysis and simulation solution software with ETAP's Grid D and M Products. *Id.* ¶¶ 199-200. It is alleged that the Schneider—ETAP Agreement was "confirmed" as an "exclusive and sole-sourced arrangement with ETAP, excluding other competitive alternatives across all EMS Platforms . . . with the announcement in 2015 that Schneider had 'standardized' all of its EMS Platform Grid D and M Products components on ETAP products." *Id.* ¶ 203. It is also alleged that, based on Plaintiff's knowledge of the industry, "standardized" means that all EMS Platforms offered by Schneider "would only include ETAP Grid Design and Management and Real Time products as components." *Id.* ¶ 204. The TAC then alleges that as a byproduct of this standardization, Schneider's employees "would only have access to, be trained to use, and support ETAP Products" in terms of the maintenance, auditing and upgrading of EMS Platforms. *Id.*

The TAC includes an excerpt of the 2015 standardization announcement. It alleges that the excerpt describes the exclusive **[*29]** nature of the Schneider—ETAP Agreement. The announcement, which was called "Schneider Electric Standardizes on ETAP Across its Services Division," states, in relevant part:

> Schneider Electric, a global leader in energy management and engineering solutions has chosen ETAP . . . as its strategic platform for its engineering services business. Schneider Electric recently completed a significant purchase of ETAP suite of power system software which is currently being deployed within the company's Engineering Services business.
>
> Schneider Electric decided to standardize the use of ETAP for its projects in order to leverage the advanced, next-generation technology of the integrated ETAP software suite to further increase its productivity through greater efficiencies. . . .
>
> Our deployment is already reducing costs and improving productivity across our business. We look forward to expanding the use of ETAP across all our projects and enhanc[ing] our partnership with ETAP.

Id.

The TAC alleges that Schneider met with ETAP in April 2013 "to expand [the parties'] initial arrangement." *Id.* ¶¶ 201-02. It also alleges that Schneider has acknowledged the exclusive nature of the Schneider—ETAP Agreement **[*30]** several times. *Id.* ¶ 205-06. For example, it alleges that Schneider confirmed the exclusive nature of the agreement in a YouTube video in which the words "ETAP was the only choice" appear. *Id.* ¶ 206. Further, it alleges that internal ETAP correspondence from 2016 includes statements that "Both SEL and SE [Schneider Electric] will be only looking at ETAP for RT PSMS [Real Time Power System Monitoring Software] software and integration support of our software." *Id.* ¶ 216.

The TAC also alleges that the Schneider—ETAP Agreement has harmed competition by "substantially foreclosing and excluding lower cost, and more efficient and innovative Grid D and M products that would otherwise be available to EMS Platform customers from competing component suppliers," including Plaintiff. *Id.* ¶ 208. It also alleges that Plaintiff has been harmed for the following reasons:

> First, Power Analytics' competing products and, on information and belief, the competing products of other competitors to ETAP, have consistently been priced significantly below those of ETAP. Second, at least Power Analytics' competing products offer automated system auditing, automated system change testing and visualization, and **[*31]** automated safety auditing and similar functions that substantially reduce the need for, and high costs associated with, expensive manual studies that must be performed by Schneider engineering staff. These manual studies substantially raise the post-sale costs of ownership for Schneider EMS Platform customers and provide Schneider with substantial additional profits derived from such unnecessary, high cost Engineering Services.

Id. ¶ 209.

The TAC also alleges that through the Schneider—ETAP Agreement

> ETAP has effectively realized its stated goal, admitted in corporate documents in 2013, to focus on methods to "kill competition" in the market by foreclosing named competitors including Power Analytics, Cyme (Eaton), DigSilent, PSSE and others. Through its exclusive anticompetitive agreement with Schneider it has achieved that express goal and has eliminated all competition . . . in a substantial line of commerce -- more than 50% of the EMS platform market.

Id. ¶ 217.

The TAC alleges that before the Schneider—ETAP Agreement was entered, Schneider included Plaintiff's Grid Design Products and Real Time Products in several EMS platform bids. *Id.* ¶ 190. For example, it alleges that in 2010, Schneider **[*32]** "consider[ed] offering" Plaintiff's products in a bid to Bank of America. *Id.* ¶ 193. It also alleges that in 2010, Schneider included Plaintiff's products "in discussions regarding a potential, multiple location EMS Platform project for Citibank." *Id.* ¶ 194. It alleges that Plaintiff "continued its efforts" to partner with Schneider "up until the time of the public announcement of" the Schneider—ETAP Agreement and "thereafter" until the 2015 standardization announcement. *Id.* ¶ 195.

The TAC alleges that since the Schneider—ETAP Agreement was entered, Schneider "has refused to recommend or use" Plaintiff's component parts "in any EMS Platform that Schneider has bid on, sold or managed, even though certain project specification requirements could only be satisfied by using [Plaintiff's] technology and functionality." *Id.* ¶ 196. It alleges that Schneider repeatedly has rejected Plaintiff's requests to include its component parts in Schneider's EMS Platforms, which "confirm[s] the exclusive" nature of the Schneider—ETAP Agreement. *Id.* ¶ 195. The TAC also alleges that Schneider and ETAP have "powerful incentives" that bind them to the Schneider—ETAP Agreement. *Id.* ¶ 219. Thus, it alleges **[*33]** that this agreement "enables ETAP to capture for itself Schneider's dominant 50+% share of the EMS Platform Market." It also alleges that Schneider benefits from the exclusive nature of the agreement because it "eliminates any competitive alternative" that might drive prices down in the EMS Platform Market. *Id.*

G. Evidence Submitted by ETAP and OSI

In support of the ETAP Motion, ETAP and OSI submitted a declaration prepared by their counsel in this action. *See* Declaration of Trevor v. Stockinger ("Stockinger Decl."), Dkt. 392-1. Stockinger attaches to his declaration four documents that are referenced in the TAC. These include the OSI Umbrella Partnership Agreement (the "Umbrella Partnership Agreement") and the Partner Program OEM Addendum (the "Addendum"). Each is dated November 4, 2013 and was signed by OSI and ETAP. *Id.* ¶¶ 2-3; *see* Exs. A-B to Stockinger Decl., Dkt. 392-1. The other two documents are the Memorandum of Understanding ("MOU") and the OEM Term Sheet ("Term Sheet"). Stockinger Decl. ¶¶ 4-5; *see* Exs. CD to Stockinger Decl., Dkt. 392-1. The Court may consider these documents when evaluating the Motions. *Lazy Y Ranch Ltd. v. Behrens, 546 F.3d 580, 588 (9th Cir. 2008)* (a court "need not accept as true allegations contradicting documents **[*34]** that are referenced in the complaint").

Section 1.1 of the Addendum states that ETAP is a "nonexclusive" Original Equipment Manufacturer ("OEM") for OSI's products. Ex. B to Stockinger Decl. (Addendum) § 1.1. Section 1.2 of the Addendum states that OSI grants to ETAP a "non-exclusive, nontransferable license" to distribute OSI's products. *Id.* The remaining two documents, the MOU and the Term Sheet, reiterate these terms. *See* Ex. C to Stockinger Decl., Dkt. 392-1 at 30 ("OSIsoft agrees to grant ETAP a nonexclusive, non-transferrable license to distribute and license the OSIsoft Products only in combination with ETAP Products."); *see also* Ex. D to Stockinger Decl., Dkt. 392-1 at 39 (same).

H. Claims Asserted in the TAC

1. Federal Claims

The TAC alleges that Defendants violated *Sections 1* and *2* of the Sherman Act, *15 U.S.C. §§ 1*, *2*. TAC ¶¶ 246-74, 277-90.

a) Sherman Act *Section 1*

The TAC alleges that Defendants violated *Section 1* through the OSI—ETAP Agreement. *Id.* ¶ 257. It alleges that this agreement restrains trade in the NUPIC Grid Design Market and the NUPIC Real Time Market. *Id.* ¶ 249. It alleges that the agreement has had "a direct, substantial adverse effect on competition including (i) foreclosing competition from lower cost, higher quality products and **[*35]** services in those markets; (ii) reducing customer choice within those markets; . . . (iii) foreclosing innovation in those markets, and (iv) reducing consumer welfare . . . ." *Id.* ¶ 251.

The TAC also alleges that Defendants violated *Section 1* through the Schneider—ETAP Agreement. *Id.* ¶ 272. It alleges that this agreement illegally restrains trade in the EMS Platform Market, or, alternatively, in the four end-user markets. *Id.* ¶¶ 161, 263-64. Further, it alleges that this agreement has "harmed competition by denying end use[r] customers access to price competition and innovative products offered by Power Analytics and other competitors for the sale of Power Grid D and M Products to the EMS Platform Market." *Id.* ¶ 267.

The TAC alleges that both agreements have reduced Plaintiff's share of the relevant markets to levels "significantly lower" than they would be in the absence of these agreements. *Id.* ¶¶ 253, 269. It also alleges that Defendants "have no *bona fide* pro-competitive justifications for their anticompetitive agreements, and any business justifications for these agreements are decidedly outweighed by [their] adverse effect on competition in the relevant markets." *Id.* ¶¶ 252, 268.

b) Sherman **[*36]** Act *Section 2*

The TAC also alleges violations of *Section 2* through ETAP's monopolization and attempted monopolization of the NUPIC Grid Design Market. *Id.* ¶¶ 284, 286. It alleges that this conduct constitutes predatory conduct that violates *Section 2*. *Id.* ¶ 285.

The TAC alleges that, because ETAP has a 97% share in the NUPIC Grid Design Market, it has monopoly power there. *Id.* ¶¶ 278-79. It also alleges that ETAP has the power to control prices and exclude actual and potential competitors in the NUPIC Grid Design Market and potential entrants to the NUPIC Real Time Market. It is alleged that ETAP can do so because of its exclusive agreement with OSI and the high barriers to entry in the market due to the high cost of obtaining NUPIC certification. *Id.* ¶¶ 280-83. Further, it alleges that even if ETAP does not have monopoly power in the NUPIC Grid Design Market, "its anticompetitive conduct constitutes an attempt to monopolize." *Id.* ¶ 286. It also alleges that because of ETAP's high market share, there is a "dangerous likelihood" that it will achieve monopoly power in the NUPIC Grid Design Market. *Id.* ¶ 287.

The TAC alleges that the foregoing conduct has caused harm to Plaintiff and other competitors, as well as **[*37]** consumers and potential consumers, in the NUPIC Grid Design and NUPIC Real Time Markets. *Id.* ¶¶ 288-89.

2. State Law Claims

The TAC brings a Cartwright Act claim, *Cal. Bus. & Prof. Code §§ 16700 et seq.*, that parallels the ones brought under *Section 1* of the Sherman Act. *Id.* ¶¶ 275-76. It also alleges that the basis for liability under the Sherman Act gives rise to a claim against Defendants under the North Carolina Unfair and Deceptive Trade Practices Act (the "UDTPA"), *N.C. Gen. Stat. §§ 75-1*, *75-1.1*, *75-2*, and *75-2.1* (*id.* ¶¶ 224-45, 291-95), and California's Unfair Competition Law, *Cal. Bus. & Prof Code §§ 17200 et seq.* (*id.* ¶¶ 296-97). The TAC also restates certain allegations made as to its *Section 1* claim in support of its UDPTA claim. These include that ETAP entered into the OSI—ETAP Agreement for the purpose of "kill[ing] competition" and that OSI entered into the OSI—ETAP Agreement in order to stifle competition. *Id.* ¶ 234. The TAC next alleges that the "near total exclusion of competition effectuated by the agreement between OSI and ETAP is an unfair and deceptive trade practice" that violates the UDTPA. *Id.* ¶ 236. The TAC makes similar allegations as to the Schneider—ETAP Agreement. *Id.* ¶¶ 237-40.

The TAC also appears to ground the UDTPA claim in two other bases: (i) the misrepresentations ETAP allegedly **[*38]** made to NUPIC customers that Plaintiff had lost its NUPIC certification, was in financial turmoil and would soon withdraw from the NUPIC Markets; and (ii) Schneider's alleged concealment and withholding of information from customers in the EMS Platform Market regarding "the substantial cost benefits of alternative Grid D and M and Real Time Products." *Id.* ¶¶ 226, 229-31, 240.

The TAC also brings a claim for tortious interference with prospective economic advantage based on allegedly lost sales to four commercial entities with which Plaintiff had ongoing commercial relationships. *Id.* ¶¶ 298-302. Finally, the TAC advances a related claim for civil conspiracy. *Id.* ¶¶ 303-08.

III. Analysis

A. Legal Standards

Fed. R. Civ. P. 8(a) provides that a "pleading that states a claim for relief must contain . . . a short and plain statement of the claim showing that the pleader is entitled to relief . . . ." The complaint must state facts sufficient to show that a claim for relief is plausible on its face. *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. The complaint need not include detailed factual allegations, but must provide more than a "formulaic recitation of the elements of a cause of action." *Id. at 555*. "The plausibility standard is not akin to a 'probability requirement,' **[*39]** but it asks for more than a sheer possibility that a defendant has acted unlawfully. Where a complaint pleads facts that are 'merely consistent with' a defendant's liability, it stops short of the line between possibility and plausibility of entitlement to relief." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (internal quotation marks and citations omitted).

Pursuant to *Fed. R. Civ. P. 12(b)(6)*, a party may bring a motion to dismiss a cause of action that fails to state a claim. It is appropriate to grant such a motion only where the complaint lacks a cognizable legal theory or sufficient facts to support one. *Mendiondo v. Centinela Hosp. Med. Ctr., 521 F.3d 1097, 1104 (9th Cir. 2008)*. In considering a motion to dismiss, the allegations in the challenged complaint are deemed true and must be construed in the light most favorable to the non-moving party. *Cahill v. Liberty Mut. Ins. Co., 80 F.3d 336, 337-38 (9th Cir. 1996)*. However, a court need not "accept as true allegations that contradict matters properly subject to judicial notice or by exhibit. Nor is the court required to accept as true allegations that are merely conclusory, unwarranted deductions of fact, or unreasonable inferences." *In re Gilead Sciences Sec. Litig., 536 F.3d 1049, 1055 (9th Cir. 2008)* (citing *Sprewell v. Golden State Warriors, 266 F.3d 979, 988 (9th Cir. 2001))*.

The Supreme Court "has cautioned against permitting antitrust cases to proceed to discovery without a plaintiff demonstrating 'plausibility' because of the high cost of discovery in antitrust **[*40]** cases in particular." *Pro Search Plus, LLC v. VFM Leonardo, Inc., No. SACV 12-2102-JST ANx, 2013 U.S. Dist. LEXIS 107895, 2013 WL 3936394, at *1 (C.D. Cal. July 30, 2013)*; *see also* *Twombly, 550 U.S. at 558* ("It is one thing to be cautious before dismissing an antitrust complaint in advance of discovery, but quite another to forget that proceeding to antitrust discovery can be expensive.").

B. Application

1. Antitrust Claims

a) Sherman Act *Section 1*

(1) Statutory Standards and Relevant Allegations in the TAC

Section 1 of the Sherman Act, *15 U.S.C. § 1*, prohibits "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States." *Texaco Inc. v. Dagher, 547 U.S. 1, 5, 126 S. Ct. 1276, 164 L. Ed. 2d 1 (2006)* (quoting *15 U.S.C. § 1*). "Despite the breadth of the statutory language, the Supreme Court 'has long recognized that Congress intended to outlaw only unreasonable restraints.'" *Aerotec Int'l, Inc. v. Honeywell Int'l, Inc., 836 F.3d 1171, 1178 (9th Cir. 2016)* (quoting *State Oil Co. v. Khan, 522 U.S. 3, 10, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997))*. "To establish liability under *§ 1*, a plaintiff must prove (1) the existence of an agreement, and (2) that the agreement was in unreasonable restraint of trade." *Id.* (citing *Am. Needle, Inc. v. Nat'l Football League, 560 U.S. 183, 189-90, 130 S. Ct. 2201, 176 L. Ed. 2d 947 (2010))*.

"Exclusive dealing involves an agreement between a vendor and a buyer that prevents the buyer from purchasing a given good from any other vendor." *Allied Orthopedic Appliances Inc. v. Tyco Health Care Grp. LP, 592 F.3d 991, 996 (9th Cir. 2010)*. "The main antitrust objection to exclusive dealing is its tendency to 'foreclose' existing competitors or new entrants from competition in the **[*41]** covered portion of the relevant market during the term of the agreement." *Omega Envtl., Inc. v. Gilbarco, Inc., 127 F.3d 1157, 1162 (9th Cir. 1997)* (footnote omitted) (citing *Roland Mach. Co. v. Dresser Indus., Inc., 749 F.2d 380, 393 (7th Cir. 1984)* (Posner, J.)).

There are "well-recognized economic benefits to exclusive dealing arrangements, including the enhancement of interbrand competition." *Id.* "[A]n exclusive-dealing arrangement does not constitute a per se violation of *section 1*." *Twin City Sportservice, Inc. v. Charles O. Finley & Co., Inc., 676 F.2d 1291, 1303-04 (9th Cir. 1982)*. This is because "virtually *every* contract to buy 'forecloses' or 'excludes' alternative sellers from *some* portion of the market, namely the portion consisting of what was bought." *Barry Wright Corp. v. ITT Grinnell Corp., 724 F.2d 227, 236 (1st Cir. 1983)* (Breyer, J.); *see also* *ZF Meritor, LLC v. Eaton Corp., 696 F.3d 254, 270 (3d Cir. 2012)* ("Exclusive dealing agreements are often entered into for entirely procompetitive reasons, and generally pose little threat to competition."). Therefore, "the rule of reason rather than a per se analysis" is applied to exclusive dealing arrangements. *Aerotec Int'l, 836 F.3d at 1180 n.2*. "Under the antitrust rule of reason, an exclusive dealing arrangement violates *Section 1* only if its effect is to 'foreclose competition in a substantial share of the line of commerce affected.'" *Allied Orthopedic Appliances, 592 F.3d at 996* (quoting *Omega, 127 F.3d at 1162*); *see also* *Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 45, 104 S. Ct. 1551, 80 L. Ed. 2d 2 (1984)* (O'Connor, J., concurring) ("Exclusive dealing is an unreasonable restraint on trade only when a significant fraction of buyers or sellers are frozen out of a market by the exclusive deal."); *ZF Meritor, 696 F.3d at 271* ("[A]n **[*42]** exclusive dealing arrangement is unlawful only if the 'probable effect' of the arrangement is to substantially lessen competition.").

The TAC alleges that ETAP entered separate agreements with OSI and Schneider, and that each unreasonably restrains trade. TAC ¶¶ 116, 221. It alleges that the OSI—ETAP Agreement illegally restrains trade in the NUPIC Grid Design Market and the NUPIC Real Time Market because it "included unreasonable impediments and conditions intended to preclude and/or deter NUPIC Market customers from choosing to swap out OSI and ETAP's products for those of a number of actual and potential competitors." *Id.* ¶¶ 91, 249. It alleges that this agreement has had "a direct, substantial adverse effect on competition." *Id.* ¶ 251.

The TAC alleges that through the Schneider—ETAP Agreement, ETAP became the sole supplier of Grid Design and Real Time Products to Schneider for use in its EMS Platforms. *Id.* ¶ 198. As noted, it alleges that this agreement "was confirmed as . . . exclusive and sole-sourced" through Schneider's 2015 standardization announcement. *Id.* ¶ 203. The TAC alleges that, based on Plaintiff's knowledge of the industry, "standardization" means that "customers would **[*43]** be offered no other choice of competing products in the Schneider EMS Platform bundle." *Id.* ¶ 204. The TAC next alleges that the Schneider—ETAP Agreement has "harmed competition by denying end use[r] customers access to price competition and innovative products offered by Power Analytics and other competitors for the sale of Power Grid D and M Products to the EMS Platform Market." *Id.* ¶ 267.

Defendants contend that the TAC fails plausibly to allege the existence of exclusive dealing arrangements, relevant markets, harm to competition and antitrust injury.

(2) Exclusive Dealing Arrangements

"[A] prerequisite to any exclusive dealing claim is an agreement to deal exclusively." *ZF Meritor, 696 F.3d at 270*. Courts have recognized two types of exclusive dealing arrangements -- those that are expressly exclusive and those that are de facto exclusive. *See* *id. at 282 n.14* (an exclusive dealing claim "does not require a contract that imposes an express exclusivity obligation"). But to establish a de facto exclusive dealing claim, a plaintiff must still "show that [the] contracts that were induced were exclusive rather than run-of-the-mill contracts, which inevitably foreclose or exclude alternative sellers from *some* portion of the market, **[*44]** namely the portion consisting of what was bought." *Aerotec Int'l, 836 F.3d at 1182* (internal quotation marks and alterations omitted). Thus, to show a de facto exclusive dealing arrangement, a plaintiff must show that "implied contractual terms in fact substantially foreclosed dealing with a competitor for the same good or service." *Id.* The Ninth Circuit has "not explicitly recognized a 'de facto' exclusive dealing theory," but has not rejected it. *Id. at 1181*.

Courts generally focus on the terms of a challenged agreement to determine if it is a de facto exclusive arrangement. *See id.* (exclusive arrangements include those with "requirements terms, . . . volume or market share targets, or long-term contracts that prevent meaningful competition by taking potential purchasers off the market" (citations omitted)); *see also* *id. at 1182* ("In certain limited situations, discounts and rebates conditioned on a promise of exclusivity or on purchase of a specified quantity or market share of the seller's goods or services may be understood as 'de facto' exclusive dealing contracts because they coerce buyers into purchasing a substantial amount of their needs from the seller.").

The TAC alleges that the Schneider—ETAP Agreement is "an express anticompetitive **[*45]** agreement." TAC ¶ 197. The TAC does not specify whether the alleged exclusive dealing arrangement between OSI and ETAP is express or de facto. *See id.* ¶ 79. The TAC does not, however, plausibly allege the existence of either. Thus, for the reasons stated below, it does not plausibly allege that either agreement requires exclusivity.

(a) Schneider—ETAP Agreement

The TAC alleges that the Schneider—ETAP Agreement is not a vertical one, but an "express anticompetitive agreement between two sellers of components in a bundle offered to EMS Platform customers, where one of the two suppliers controls the contents of the bundle and has substantial market power." TAC ¶ 197. It alleges that this agreement was formed on December 11, 2012, when Schneider and Etap announced a cooperative agreement to bundle their respective products. *Id.* ¶ 199. It then alleges that the Schneider—ETAP Agreement "was confirmed as an exclusive and solesourced arrangement . . . with the announcement in 2015 that Schneider had 'standardized' all of its EMS Platform Grid D and M Products components on ETAP products." *Id.* ¶ 203. The TAC alleges that this agreement illegally restrains trade in the EMS Platform Market. *Id.* ***[*46]*** ¶ 119.

As noted, the TAC alleges that the exclusive nature of the Schneider—ETAP Agreement is "describe[d]" in the 2015 standardization announcement, which provides in relevant part:

> Schneider Electric, a global leader in energy management and engineering solutions has chosen ETAP . . . as its strategic platform for its engineering services business. Schneider Electric recently completed a significant purchase of ETAP suite of power system software which is currently being deployed within the company's Engineering Services business.

> . . . .
> Our deployment is already reducing costs and improving productivity across our business. We look forward to expanding the use of ETAP across all our projects and enhanc[ing] our partnership with ETAP.

Id. ¶ 204. The TAC alleges that the Schneider—ETAP Agreement ultimately extended across "all EMS Platform Markets in addition to data centers." *Id.* ¶ 205.

The TAC alleges that Schneider confirmed the exclusive nature of the agreement in a YouTube video which includes the statement "ETAP was the only choice." *Id.* ¶ 206. It also alleges that internal ETAP correspondence from 2016 includes statements that "[b]oth SEL and SE [Schneider Electric] will be only **[*47]** looking at ETAP for RT PSMS [Real Time Power System Monitoring Software] software and integration support of our software." *Id.* ¶ 216. It alleges that this "'standardization is . . . an exclusionary mechanism" that has excluded "actual and potential competitors capable of offering Grid D and M products as components of Schneider's EMS Platforms, including Power Analytics." *Id.* ¶ 207. It also alleges that, since entering into this agreement, Schneider has "refused to recommend or use" Plaintiff's component parts in any EMS Platform that Schneider has "bid on, sold or managed, even though certain project specification requirements could only be satisfied by using Power Analytics' technology and functionality." *Id.* ¶ 196. It alleges that Schneider's refusal to do so "confirm[s] the exclusive" nature of the Schneider—ETAP Agreement. *Id.* ¶ 195. Further, it alleges that Schneider and ETAP have "powerful incentives" that bind them to the Schneider—ETAP Agreement. *Id.* ¶ 219. Thus, the agreement provides ETAP access to Schneider's share of the EMS Platform Market and from Schneider's perspective "eliminates any competitive alternative to ETAP." *Id.*

Schneider argues that Plaintiff's exclusive **[*48]** dealing claim fails because the TAC does not plausibly allege that the Schneider—ETAP Agreement is exclusive. Thus, it contends that the TAC does not plausibly allege an exclusivity mechanism. Schneider contends that the allegations as to Schneider's 2015 standardization announcement are not sufficient because it only stated that Schneider standardized with ETAP's software within the company's own Engineering Services business. Schneider also emphasizes that the new allegations in the TAC do not cure the deficiencies identified in the FAC Order or the SAC Order. In response, Plaintiff argues that the TAC plausibly pleads the existence of an exclusive dealing arrangement because it alleges that, through the Schneider—ETAP Agreement, Schneider committed to use only ETAP's Grid D and M Products in its EMS Platform offerings.

The TAC does not plausibly allege the existence of an express dealing arrangement between Schneider and ETAP. As noted, it alleges that the Schneider—ETAP Agreement was "confirmed as an exclusive and sole-sourced arrangement . . . excluding other competitive alternatives" through the 2015 standardization announcement. *Id.* ¶ 203. It alleges that standardization constitutes **[*49]** an "exclusionary mechanism" because the term "standardized" in the industry generally means that a seller of a bundled product, such as Schneider, will only include a certain supplier's component parts in its product offerings. *Id.* ¶¶ 204, 207. The TAC does not, however, plausibly allege that the 2015 standardization announcement used the term "standardized" in this way, *i.e.*, to state that Schneider would only include ETAP's Grid Design and Real Time Products in its EMS Platform offerings. Indeed, applying that definition to "standardization" would be inconsistent with the excerpt of the announcement included in the TAC. *See id.* ¶ 204. The announcement does not mention Schneider's products offerings. Instead, it states, *inter alia*, that Schneider has deployed ETAP's "power system software . . . *within the company's Engineering Services business*" and that such deployment is "already reducing costs and improving productivity *across our business*." *Id.* (emphasis added). That the TAC alleges that following the announcement, Schneider expanded the use of ETAP "across all EMS Platform Markets," *id.* ¶ 205, does not warrant a different outcome. That allegation is conclusory.

Accordingly, the **[*50]** TAC does not plausibly allege that Schneider's decision regarding standardization results in exclusivity as to Schneider's product offerings in the EMS Platform Market. Thus, the standardization announcement does not show that the Schneider—ETAP Agreement prevents Schneider from bundling its products with those of ETAP's competitors in its product offerings to customers in that market. This conclusion is reinforced by the absence of any plausible allegations as to the benefits Schneider derives from the alleged exclusive arrangement. The TAC alleges that Schneider benefits from this arrangement because it "eliminates any competitive alternative to ETAP," but does not explain how the elimination of competition among suppliers of Grid

Design Products -- entities that sell their products to suppliers of EMS Platforms -- benefits Schneider. Indeed, the TAC alleges that Plaintiff and other suppliers of Grid Design Products offer products comparable and/or superior to ETAP's at lower prices. TAC ¶¶ 208-09.

The remaining allegations in the TAC are also insufficient. These include that, since the entry of the Schneider—ETAP Agreement, Schneider "has refused to recommend or use Power Analytics' **[*51]** Grid Design, Real Time and Arc Flash Products in any EMS Platform that Schneider has bid on, sold or managed, even though certain project specification requirements could only be satisfied by using Power Analytics' technology and functionality." *Id.* ¶ 196. It is also alleged that, prior to entering the agreement, Schneider included Plaintiff's Grid D and M Products in several EMS Platform bids and had discussions with Plaintiff in 2010 regarding specific potential business opportunities in the future. *Id.* ¶¶ 190-95. It alleges that Plaintiff engaged in further business discussions with Schneider "up until the time of the public announcement of the . . . agreement in 2012 and thereafter until the formal announcement of Schneider's exclusive standardization on ETAP in 2015 on numerous occasions." *Id.* ¶ 195.

These allegations are not sufficient plausibly to state that the Schneider—ETAP Agreement was exclusionary, *i.e.*, more than a commonplace agreement to bundle two complementary products. *Aerotec Int'l, 836 F.3d at 1181*. Thus, the TAC does not give rise to the plausible inference that Schneider has refused to do business with Plaintiff as a result of the Schneider—ETAP Agreement. Indeed, as noted, the TAC alleges **[*52]** that, for a period of approximately three years after the agreement was entered, Schneider explored the possibility of partnering with Plaintiff. TAC ¶ 195. That Schneider allegedly decided not to do so does not warrant a different outcome. A refusal to deal is not, without more, an antitrust violation. *See* *Aerotec Int'l, 836 F.3d at 1184* ("As the Supreme Court has repeatedly emphasized, there is 'no duty to deal under the terms and conditions preferred by [a competitor's] rivals.'" (quoting *Pac. Bell Tel. Co. v. Linkline Commc'ns, Inc., 555 U.S. 438, 457, 129 S. Ct. 1109, 172 L. Ed. 2d 836 (2009))*).

(b) OSI—ETAP Agreement

The TAC alleges that the OSI—ETAP Agreement is "not a vertical agreement between a buyer and a seller, or a manufacturer and a retailer" but instead one between "two sellers of independent, but necessarily interconnected products to foreclose and exclude existing and potential competitors from providing products which challenge each of their dominant monopoly positions in the market." *Id.* ¶ 79. It alleges that this agreement "illegally restrains trade" in the NUPIC Grid Design Market and the NUPIC Real Time Market. *Id.* ¶ 249.

The TAC alleges that the OSI—ETAP Agreement includes "unreasonable impediments and conditions intended to preclude and/or deter" existing customers from switching from OSI and ETAP's **[*53]** products to those of Plaintiffs and certain other "actual and potential competitors," including Honeywell and Aspen Tech. *Id.* ¶ 91. It also alleges that the Term Sheet documenting "key provisions" of the agreement required that ETAP include in its licensing agreement a provision requiring that customers only use OSI products purchased under the agreement in conjunction with ETAP products. *Id.* ¶ 92. Further, it alleges that the parties' MOU obligates them "exclusively [to] recommend and promote" each other's products as "preferred" to prospective customers. *Id.* ¶ 94. The TAC also alleges that there are significant "financial and operational incentives that bind" OSI and ETAP to the OSI—ETAP Agreement. *Id.* ¶ 117. It alleges, for example, that the OSI—ETAP Agreement "protects" OSI because it "links OSI to the entrenched monopoly shareholder . . . ETAP." *Id.* ¶ 83.

As noted, counsel for ETAP and OSI submitted copies of the Umbrella Partnership Agreement, the Addendum, the MOU and the Term Sheet in connection with the ETAP Motion. The MOU states that OSI "will recommend and promote ETAP Products as a preferred power systems analysis and management platform in customer installations" and that **[*54]** ETAP "will recommend and promote [OSI] as a preferred real-time historian/data infrastructure product in customer installations." Ex. C to Stockinger Decl., Dkt. 392-1 at 30. Thus, it states that ETAP and OSI will each promote and recommend the other's products as "preferred." It does not state that they have agreed to deal with one other on an exclusive basis, or exclusively to promote and/or recommend each other's products. Accordingly, the terms of the MOU do not plausibly allege an exclusivity mechanism.

ETAP and OSI contend that the Umbrella Partnership Agreement and the Addendum constitute what is alleged to be the OSI—ETAP Agreement in the TAC. ETAP's Motion at 19. As noted, the Addendum states that the partnership between ETAP and OSI is "nonexclusive." Addendum §§ 1.1-1.2. There are no conditions in either document that would "preclude and/or deter" existing customers from switching to non-ETAP products. These documents are inconsistent with the allegation that the agreement includes "unreasonable impediments and conditions intended to preclude and/or deter" NUPIC customers from substituting in Plaintiff's products for those of OSI and ETAP. This is not dispositive as to the present **[*55]** motions to dismiss. A complete factual record has not been presented, and the present one shows questions of fact as to whether the Umbrella Partnership Agreement and the Addendum represent the entirety of the business relationship between OSI and ETAP.

The TAC also alleges that a Term Sheet documenting "key provisions" of the agreement states that customers who purchased OSI Historian Software "under the ETAP/OSI arrangement" could only use that software in conjunction with ETAP products. *Id.* ¶ 92. Even assuming the truth of this allegation, it does not sufficiently state the existence of an agreement to deal exclusively. Thus, this allegation does not address whether the agreement prohibited OSI from partnering with other suppliers of Grid D and M Products or ETAP from partnering with other suppliers of Historian Software. Indeed, it anticipates that OSI might partner with competing suppliers, and that under such circumstances, OSI's customers would bear the burden of purchasing a second copy of its Historian Software. *See id.* ¶ 93 ("Any customer that wished to switch to a competitor's Grid D and M Products, having already made one payment for the use of OSI's Historian software, **[*56]** would . . . shoulder[] the additional cost of another duplicative license to the same OSI Historian Software . . . ."). Finally, this allegation is contradicted by the Term Sheet submitted by ETAP. *See* Ex. D to Stockinger Decl., Dkt. 392-1 at 38.

Consequently, the TAC does not plausibly allege that the strategic partnership entered by OSI and ETAP precluded OSI from entering into similar arrangements with Plaintiff and other suppliers of Grid D and M Products. That OSI is allegedly a "critical bridge" in the NUPIC Markets because more than 80% of existing NUPIC facilities use its Historian Software, TAC ¶ 82, is not sufficient to state this element of a *Section 1* claim, which is based on alleged de facto exclusive dealing.

* * *

For the foregoing reasons, the TAC does not plausibly allege the existence of express or de facto exclusive dealing arrangements between or among any of the Defendants. *Aerotec Int'l, 836 F.3d at 1183* ("Just as in any exclusive dealing claim, however, the court first had to be satisfied that specific features of the agreement required exclusivity.").

(3) Harm to Competition: Anticompetitive Effects

The "ultimate question" in an exclusive dealing case is "whether the defendant's conduct harmed competition." **[*57]** *McWane, Inc. v. F.T.C., 783 F.3d 814, 835 (11th Cir. 2015)*. "A restraint violates the rule of reason if the restraint's harm to competition outweighs its procompetitive effects." *Tanaka v. Univ. of S. Cal., 252 F.3d 1059, 1063 (9th Cir. 2001)*. "The plaintiff bears the initial burden of showing that the restraint produces significant anticompetitive effects within a relevant market." *Id.* Thus, "[p]roving injury to competition in a rule of reason case . . . requires a claimant to prove the relevant market and to show the effects upon competition within that market." *Oltz v. St. Peter's Comm. Hosp., 861 F.2d 1440, 1445 (9th Cir. 1988)*.

An exclusive dealing arrangement violates *Section 1* only where its effect is to foreclose competition "in a substantial share" of the relevant market. *McWane, 783 F.3d at 835*. Foreclosure occurs when "'the opportunities for other traders to enter or remain in [the] market [are] significantly limited' by the exclusive dealing arrangements." *Id.* (alterations in original) (quoting *United States v. Microsoft Corp., 253 F.3d 34, 69, 346 U.S. App. D.C. 330 (D.C. Cir. 2001))*. "'Substantial share' has been quantified as foreclosure of 40% to 50% of the relevant market." *Feitelson v. Google Inc., 80 F. Supp. 3d 1019, 1030 (N.D. Cal. 2015)* (citing *Microsoft Corp., 253 F.3d at 70*).

Therefore, to state a valid claim under the Sherman Act, a plaintiff must allege "both that a 'relevant market' exists and that the defendant has power within that market." *Newcal Indus. v. Ikon Office Solution, 513 F.3d 1038, 1044*

(9th Cir. 2008). "The term relevant market encompasses notions of geography as well as product use, quality, and description. The geographic **[*58]** market extends to the area of effective competition . . . where buyers can turn for alternate sources of supply." *Oltz, 861 F.2d at 1446* (internal quotation marks omitted). "The product market includes the pool of goods or services that enjoy reasonable interchangeability of use and cross-elasticity of demand." *Id.*; *see also* *Omega, 127 F.3d at 1162* (a relevant market "includes the full range of selling opportunities reasonably open to rivals, namely, all the product and geographic sales they may readily compete for, using easily convertible plants and marketing organizations") (quoting 2A Phillip E. Areeda et al., ***Antitrust Law*** ¶ 570b1 (1995))).

Although "[d]efining the relevant market is a factual inquiry ordinarily reserved for the jury," *Oltz, 861 F.2d at 1446*, "[f]ailure to identify a relevant market is a proper ground for dismissing a Sherman Act claim." *Tanaka, 252 F.2d at 1063*. A complaint may be dismissed under *Rule 12(b)(6)* if its "relevant market definition is facially unsustainable." *Newcal Indus., 513 F.3d at 1045*. Thus, "[f]irst and foremost, the relevant market must be a *product* market. The consumers do not define the boundaries of the market; the product or producers do." *Id.* (emphasis in original) (footnote omitted). "While a relevant product market can be limited to a portion of customers, such a limitation **[*59]** must be based on a distinction in the product sold to those customers." *T. Harris Young & Assocs., Inc. v. Marquette Elecs., Inc., 931 F.2d 816, 824 (11th Cir. 1991)*. Furthermore, antitrust allegations may be premised "on a submarket" only if it is "economically distinct from the general product market" in terms of "practical indicia" such as "industry or public recognition of the submarket as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors." *Newcal Indus., 513 F.3d at 1045* (quoting *Brown Shoe Co. v. United States, 370 U.S. 294, 325, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962))*.

Defendants argue that, even if the TAC plausibly alleged the existence of exclusive dealing arrangements, it does not allege that these arrangements harmed competition in a relevant market. They also argue that the TAC does not plausibly allege the existence of product markets that consist of distinct products. Defendants contend that the TAC continues to define the alleged relevant markets in terms of customers, rather than distinct products sold to them. ETAP Motion at 22; Schneider Motion at 23. ETAP and OSI also argue that the TAC does not plausibly allege that the alleged agreements create significant anticompetitive effects. ETAP Motion at 22-24.

(a) Schneider—ETAP Agreement **[*60]**

Schneider argues that the TAC does not adequately allege a relevant market for purposes of the alleged anticompetitive effects of the Schneider—ETAP Agreement. The TAC alleges that the Schneider—ETAP Agreement has unreasonably restrained competition in the market for the sale and servicing of EMS Platforms. TAC ¶ 119. The TAC defines EMS Platforms as "the full bundle of automation, monitoring and control software, hardware and related equipment purchased by facility owner/operators for use as an 'EMS Platform.'" *Id.* ¶ 136.

The TAC alleges that customers in the EMS Platform Market share "common characteristics," including: (i) they operate in "low or medium voltage environments," (ii) they "place a premium on the reliability of their electrical power systems" and (iii) they employ "more sophisticated monitoring systems" to prevent power outages. *Id.* ¶¶ 121-22; *see also id.* ¶ 123 ("The distinguishable demands of EMS Platform consumers is evidenced by the sophistication of the monitoring equipment and levels of redundancy included in their electric power grid systems.").

The TAC alleges as alternatives to the EMS Platform Market the following four end-user EMS platform markets: (i) the Commercial **[*61]** Buildings EMS Platform Market; (ii) the Data Center EMS Platform Market; (iii) the Industrial EMS Platform Market and (iv) the Infrastructure/Grid EMS Platform Market. *Id.* ¶ 161. It alleges that "[a]lthough each end-user EMS Platform provides many of the same functions, the four end-user EMS Platforms are distinguishable from one another based on the configuration, integration and automation of select components." *Id.* ¶ 162; *see also id.* ¶ 165 ("While some EMS Platform components are used in more than one end-user platform, the platforms themselves are not substitutable across the four groups of end-users."). The TAC then distinguishes the four end-user EMS platform markets based on customer type and/or industry. *See id.* ¶¶ 173, 177, 181, 185. The TAC also alleges that, because many of the components used in industrial EMS platforms are used in infrastructure EMS platforms, the Industrial EMS Platform Market and the Infrastructure/Grid EMS Platform Market should be deemed a single antitrust market. *Id.* ¶ 189.

Schneider contends that the EMS Platform Market and the four end-user markets are implausible. The premise for this position is that the TAC does not plausibly allege that that **[*62]** the products Plaintiff sells to customers in those markets are distinct. Schneider Motion at 23; ETAP Motion at 22. Schneider argues in the alternative that the TAC does not plausibly plead substantial foreclosure in any of the alleged relevant markets. In support of this position, Schneider notes that the TAC alleges that it competes with other companies in the EMS Platform Market. Schneider also contends that the alleged relevant markets are not sufficiently stated because Plaintiff is neither a buyer nor a seller in any of them. In response, Plaintiff contends that the EMS Platform Market and the four end-user markets constitute relevant product markets because they are not defined in terms of customers, but in terms of "a bundle of products/services." Opposition to Schneider Motion at 16.

It is not necessary to decide in this Order whether the TAC plausibly pleads that the EMS Platform Market is a relevant market. Even if the EMS Platform Market is plausibly pleaded, the TAC does not plausibly allege that competition has been substantially foreclosed in that market. The TAC alleges that Schneider has more than 50% of the EMS Platform Market, but competes there with several others, **[*63]** including Eaton, Siemens, GE, ABB, Honeywell and other "smaller competitors." *Id.* ¶ 152. The TAC does not allege how the Schneider—ETAP Agreement has affected Plaintiff's ability to partner with those competitors. Although it alleges that the "non-Schneider" portion of the EMS Platform Market is fragmented, it does not plausibly allege why Schneider's competitors do not "represent a viable alternative" for component suppliers like Plaintiff.[4] *Id.* ¶ 15; *cf. Stop & Shop Supermarket Co. v. Blue Cross & Blue Shield of R.I., 373 F.3d 57, 66 (1st Cir. 2004)* ("[H]arm does not mean a simple loss of business . . . but an impairment of the competitive structure of the market."); *Roland Mach. Co. v. Dresser Indus., Inc., 749 F.2d 380, 394 (7th Cir. 1984)* ("The exclusion of competitors is cause of antitrust concern only if it impairs the health of the competitive process itself."). Furthermore, for the reasons stated above, the TAC does not plausibly allege that the Schneider—ETAP Agreement has foreclosed Plaintiff from partnering with Schneider, *i.e.*, it does not plausibly plead exclusivity. Therefore, the allegations in the TAC are not sufficient as to substantial foreclosure from a relevant product market.

(b) OSI—ETAP Agreement

The TAC alleges that the OSI—ETAP Agreement unlawfully restrains trade in two distinct markets: the NUPIC Grid Design Market and **[*64]** the NUPIC Real Time Market. *Id.* ¶ 249. It defines the NUPIC Grid Design Market as one for "the sale and servicing of" Grid Design Products to customers who are required to use Grid Design Products that are NUPIC certified. *Id.* ¶ 60. It defines the NUPIC Real Time Market as one for "the sale and servicing of" Real Time Products to customers who are required to use Real Time Products that are NUPIC certified. *Id.* ¶ 61. ETAP and OSI contend that these allegations do not plausibly plead the existence of relevant markets because each is defined as a subset of customers. They also contend that the TAC fails plausibly to allege preclusion in those markets. ETAP Motion at 22.

The TAC plausibly alleges a NUPIC Grid Design Market, and that Plaintiff has been excluded from it. As noted, "[w]hile a relevant product market can be limited to a portion of customers, such a limitation must be based on a distinction in the product sold to those customers." *T. Harris Young & Assocs., 931 F.2d at 824*; *see* TAC ¶¶ 60-64. Earlier versions of the complaint in this action failed to identify a distinction between the Grid Design Products sold in the NUPIC Grid Design Market and those sold elsewhere. The TAC corrected this shortcoming. Thus, it alleges **[*65]** that NUPIC-certified Grid Design Products are manufactured with "additional operational components[,] including a Quality Assurance Plan and Software Development Standards." *Id.* ¶ 64. It also alleges that they must "be manufactured and . . . perform to meet specific safety and reliability standards" and "maintain specifically mandated historical and ongoing performance documentation and records." *Id.* It then alleges that these

---

[4] Eaton is an exception in this regard. Thus, the TAC alleges that Eaton "has its own captive suite" of Grid D and M Products. *Id.* ¶ 152. No similar allegations are made with respect to the remaining alleged competitors in the EMS Platform Market — Siemens, GE, ABB, Honeywell and the other "additional smaller competitors." *Id.*

additional features and service requirements result in a significantly higher "cost structure" for NUPICcertified Grid Design Products. *Id.* ¶ 65.

Although the TAC does not expressly allege that non-NUPIC customers would not purchase Grid Design Products with these characteristics, that is a plausible inference from its allegations. Thus, it can plausibly be inferred from the allegations that NUPIC-certified Grid Design Products are priced higher and offer more features than their non-certified counterparts. For these reasons, the TAC plausibly alleges that sales of NUPIC-certified Grid Design Products are restricted to the NUPIC Grid Design Market. Further, it alleges that ETAP has a 97% share and OSI has an 80% share of the NUPIC Grid Design Market. These allegations **[*66]** are sufficient plausibly to plead a relevant market comprised of distinct products and that ETAP and OSI have power within that market. The TAC also plausibly pleads substantial foreclosure in that market. Thus, it alleges that no sales of non-ETAP Grid D and M Products have been made to any nuclear facility since the OSI—ETAP Agreement was entered. *Id.* ¶ 111.

In contrast, the TAC does not plausibly allege that the OSI—ETAP Agreement has substantially foreclosed competition in the NUPIC Real Time Market. The TAC alleges that Plaintiff is the only company "capable of obtaining" NUPIC certification for its Real Time Products other than ETAP and that neither company has sought or obtained such certification. *Id.* ¶¶ 96, 115. It alleges that Plaintiff has not undertaken a NUPIC audit for its Real Time Products because the alleged anticompetitive agreement between OSI and ETAP "has foreclosed" Plaintiff from doing so. It alleges that this is because Plaintiff's Real Time Products "achieve full functionality" only when they are used with Plaintiff's Grid Design Products. *Id.* ¶ 114. These allegations are not sufficient to plead this element of a *Section 1* claim. Thus, the TAC expressly pleads that it **[*67]** is a characteristic of how Plaintiff's Real Time Products are designed and manufactured, *i.e.*, that they achieve full functionality only when they are paired with Plaintiff's Grid Design Products, that has caused Plaintiff's exclusion from the market. Nor does the TAC plausibly plead that ETAP has market power in the NUPIC Real Time Market. Indeed, the TAC alleges that ETAP has not certified its own Real Time Products.

* * *

For the foregoing reasons, the TAC fails plausibly to allege that competition has been substantially foreclosed in the EMS Platform Market and the NUPIC Real Time Market as a result of the alleged exclusive dealing arrangements between Schneider and OSI and OSI and ETAP. *Omega, 127 F.3d at 1163* ("If competitors can reach the ultimate consumers of the product by employing existing or potential alternative channels of distribution, it is unclear whether [exclusive dealing arrangements] foreclose from competition *any* part of the relevant market." (emphasis in original)). However, the TAC plausibly pleads substantial foreclosure in the NUPIC Grid Design Market. Nevertheless, for the reasons stated above, the TAC does not plausibly allege the existence of any mechanism that makes the OSI—ETAP **[*68]** Agreement exclusionary.

(4) Antitrust Injury and Antitrust Standing

Antitrust injury "is a substantive element of an antitrust claim, and the fact of injury or damage must be alleged at the pleading stage." *Somers v. Apple, Inc., 729 F.3d 953, 963 (9th Cir. 2013)*. Antitrust injury requires "(1) unlawful conduct, (2) causing an injury to the plaintiff, (3) that flows from that which makes the conduct unlawful, and (4) that is of the type the antitrust laws were intended to prevent." *Am. Ad Mgmt., Inc. v. Gen. Tel. Co., 190 F.3d 1051, 1055 (9th Cir. 1999)*. The injured party must also "'be a participant in the same market as the alleged malefactors,' meaning 'the party alleging the injury must be either a consumer of the alleged violator's goods or services or a competitor of the alleged violator in the restrained market.'" *Somers, 729 F.3d at 963* (quoting *Glen Holly Entm't, Inc. v. Tektronix, Inc., 343 F.3d 1000, 1008 (9th Cir. 2003))*.

"[C]ourts tend to be skeptical of [exclusive dealing] claims because it is not in the long-term interest of the company that grants the 'exclusive deal' to drive out of business competitors of the grantee." *Stop & Shop Supermarket, 373 F.3d at 66*. Exclusive dealing agreements will "generally only be unlawful where the market is highly concentrated, the defendant possesses significant market power, and there is some element of coercion present." *ZF Meritor, 696 F.3d at 284*. Courts generally require a showing of specific anticompetitive conduct, such **[*69]** as coercion, because "virtually *every* contract to buy 'forecloses' or 'excludes' alternative sellers from *some* portion of the market, namely the portion consisting of what was bought." *Barry Wright Corp., 724 F.2d at 236*. Without a showing that one of the parties was coerced to enter an agreement or that there was similar anticompetitive conduct, an exclusive dealing agreement may function simply as appropriate competition. *See* *PNY Techs., Inc. v. SanDisk Corp., 2014 U.S. Dist. LEXIS 90649, 2014 WL 2987322, at *6 (N.D. Cal. July 2, 2014)* ("PNY's assertion that SanDisk's agreements constitute exclusive dealing based on the fact that retailers have entered into and continually renew contracts with SanDisk is not plausible because PNY has not pleaded (beyond naked assertions) facts showing that it failed to win contracts despite offering better terms or that SanDisk somehow thwarted its efforts to secure business through conduct other than competition on the merits."). "That a manufacturer has a longstanding exclusive relationship with a retailer does not mean that their agreement constitutes actionable exclusive dealing." *Id.*; *see also id.* ("Absent allegations of predatory pricing or some other anticompetitive conduct, that is the essence of competition.").

Further, "the case law generally supports the contention that exclusive **[*70]** contracts of short duration that are readily terminable do not run afoul of the antitrust laws." *Pro Search Plus, 2013 U.S. Dist. LEXIS 107895, 2013 WL 3936394, at *2*. "[T]he short duration and easy terminability of . . . agreements negate substantially their potential to foreclose competition." *Omega, 127 F.3d at 1163* (footnote omitted). "If the contracts at issue are shortterm or easily terminated, 'a competing manufacturer need only offer a better product or a better deal' to get contracts of its own." *PNY Techs., 2014 U.S. Dist. LEXIS 90649, 2014 WL 2987322, at *4* (quoting *Omega, 127 F.3d at 1164*).

As the Third Circuit has explained:

> There is no set formula for evaluating the legality of an exclusive dealing agreement, but modern ***antitrust law*** generally requires a showing of significant market power by the defendant, substantial foreclosure, contracts of sufficient duration to prevent meaningful competition by rivals, and an analysis of likely or actual anticompetitive effects considered in light of any procompetitive effects. Courts will also consider whether there is evidence that the dominant firm engaged in coercive behavior, and the ability of customers to terminate the agreements. The use of exclusive dealing by competitors of the defendant is also sometimes considered.

ZF Meritor, 696 F.3d at 271-72 (internal citations omitted).

(a) Schneider—ETAP Agreement

The TAC alleges that the **[*71]** Schneider—ETAP Agreement has injured competition in the relevant markets by "substantially foreclosing and excluding competition from lower cost, and more efficient and innovative Grid D and M products that would otherwise be available to EMS Platform customers." *Id.* ¶ 208. It alleges that as a result, buyers have paid higher prices for EMS Platforms than they would have paid in the absence of the alleged anticompetitive agreement. *Id.* ¶ 210; *see also id.* ¶ 214 ("This has harmed competition by raising the total cost of ownership for EMS Platform purchasers, and blocking technological advancements that would improve efficiency and safety of end users' facility grids.").

Schneider contends that the TAC does not plausibly plead antitrust injury because it does not sufficiently allege that the Schneider—ETAP Agreement is unlawful. Schneider also contends that the TAC does not plausibly allege antitrust injury because the TAC alleges that Plaintiff competes "in the *upstream* market for the sale of *components* of EMS Platforms" but not in the EMS Platform Market itself. Schneider Motion at 24 (emphasis in original). In response, Plaintiff argues that there is no requirement that a plaintiff **[*72]** be the defendant's consumer or competitor in order to establish antitrust injury.

The TAC does not plausibly plead that the Schneider—ETAP Agreement is an unlawful exclusive dealing arrangement. For the reasons stated above, it does not plausibly plead an exclusivity mechanism. It also does not contain any allegations as to coercion, ease of termination, or duration. Thus, it does not allege that the agreement is the product of anticompetitive conduct, that ETAP compelled Schneider to enter into the agreement or that it is a long-term arrangement. Further, it does not plausibly allege that the agreement is not easily terminable.

The allegations in the TAC as to the significant financial incentives that Schneider derives from the challenged agreements do not plausibly show that the agreement is difficult to terminate. *See* TAC ¶ 219. Even if Schneider currently has a financial incentive to remain in the challenged agreement, the TAC does not plausibly allege why it would not have an equal incentive to terminate the agreement, if Plaintiff offered one with more attractive terms. *Cf. Allied Orthopedic Appliances, 592 F.3d at 997* ("The easy terminability of an exclusive dealing arrangement negate[s] substantially [its] potential to **[*73]** foreclose competition." (internal quotations omitted)); *see also Maxim Integrated Prods., Inc. v. Analog Devices, Inc., 79 F.3d 1153, 1996 WL 117425 (Table), at *2 (9th Cir., 1996)* (that an agreement alleged to be exclusive may be terminated "without penalty . .. strongly favors a finding of no unreasonable restraint on competition").

In sum, the allegations do not plausibly show that the Schneider—ETAP Agreement was entered for reasons other than to advance the business interests of Schneider. Therefore, the allegations are not sufficient to support the inference that the agreement is the result of unlawful, anticompetitive conduct. For all of these reasons, the TAC does not plausibly allege that Plaintiff has suffered an antitrust injury arising from the Schneider—ETAP Agreement.

(b) OSI—ETAP Agreement

OSI and ETAP contend that the allegations in the TAC as to antitrust injury and standing are insufficient because they are conclusory. In response, Plaintiff argues that all four elements of antitrust injury are plausibly alleged.

The TAC alleges that the OSI—ETAP Agreement is unlawful and has harmed competition. It alleges that no suppliers of Grid Design Products other than ETAP have made "a single sale to any nuclear facility" of Grid Design Products since the agreement was entered. *Id.* ¶ 111. It **[*74]** alleges that the OSI-ETAP Agreement has resulted in "reduced output in the form of new products and functionality, has stifled innovation and customer choice, and has de facto eliminated any source of price competition" in the NUPIC Grid Design Market. *Id.* ¶ 116. The TAC also alleges that since the OSI—ETAP Agreement was entered, Plaintiff has lost four NUPIC customers. *Id.* ¶ 112. It alleges that "Plaintiff "has been damaged by loss of past and future sales and profits, the inability to develop economies of scale to permit it to compete in the market, and inability to develop and offer new innovative products." *Id.* ¶ 273.

For the same reasons stated above with respect to the Schneider—ETAP Agreement, the TAC does not plausibly allege that the OSI—ETAP Agreement is the result of anticompetitive conduct. Thus, there are no allegations as to coercion, lack of ease of termination and/or duration of the OSI—ETAP Agreement. Therefore, because there are no plausible, specific allegations of unlawful conduct giving rise to antitrust injury, the TAC does not plausibly allege this element of Plaintiff's *Section 1* claim.

* * *

For the foregoing reasons, the TAC does not plausibly state a claim for violation **[*75]** of *Section 1* of the Sherman Act. Although the TAC remedies some of the deficiencies identified by the Court in the FAC Order and SAC Order, it still fails plausibly to allege that either of the challenged agreements constituted express or de facto exclusive dealing arrangements. Accordingly, the Motions are **GRANTED** as to the *Section 1* claim and it is **DISMISSED**, without prejudice.

b) Sherman Act *Section 2*

The TAC alleges that ETAP violated *Section 2* of the Sherman Act through acts of monopolization and attempted monopolization in the NUPIC Grid Design Market. TAC ¶¶ 277-90. *Section 2* applies to "[e]very person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations." *15 U.S.C. § 2*. "There are three essential elements to a successful claim of *Section 2* monopolization: (a) the possession of monopoly power in the relevant market; (b) the willful acquisition or maintenance of that power; and (c) causal antitrust injury." *Allied Orthopedic Appliances, 592 F.3d at 998* (internal quotation marks omitted). "To demonstrate attempted monopolization a plaintiff must prove '(1) that the defendant has engaged in predatory or anticompetitive conduct with (2) a specific **[*76]** intent to monopolize and (3) a dangerous probability of achieving monopoly power.'" *John Doe 1 v. Abbott Labs., 571 F.3d 930, 933 n.3 (9th Cir. 2009)* (quoting *Cascade Health Sols. v. PeaceHealth, 515 F.3d 883, 893 (9th Cir. 2008))*.

ETAP and OSI contend that the *Section 2* claim is deficient for the same reasons discussed above as to the *Section 1* claim. They also contend that Plaintiff has not sufficiently alleged that ETAP intended to monopolize the NUPIC Grid Design Market. ETAP Motion at 25. Plaintiff responds that the TAC plausibly states all elements of a *Section 2* claim because it alleges that ETAP has a 97% share of the NUPIC Grid Design Market, and that it attained and maintained such market power by entering into an exclusionary agreement with OSI for the express purpose of "kill[ing] competition." Opposition to ETAP Motion at 27-28. Plaintiff also contends that the TAC sufficiently alleges antitrust injury. Plaintiff further argues that the TAC plausibly alleges a claim for attempted monopolization because it alleges that ETAP acted with the specific intent to achieve the exclusion of Plaintiff.

For the same reasons discussed earlier with respect to the *Section 1* claim, the TAC fails plausibly to allege anticompetitive conduct that caused antitrust injury sufficient to state a claim under *Section 2*. The attempted monopolization claim is also deficient **[*77]** because it fails adequately to allege that ETAP willfully acquired monopoly power in the NUPIC Grid Design Market or had the specific intent to do so.

As part of its opposition to the ETAP Motion, Plaintiff relies on the allegation in the TAC that an ETAP employee sent an email to colleagues in which the employee stated: "We need to kill such competition from these companies. ([Plaintiff], Cyme, DigSilent, PSSE in particular)" after hearing Plaintiff's announcement regarding its Real Time Products. TAC ¶¶ 84-86. As noted, the market in which ETAP allegedly has market power is the NUPIC Grid Design Market, *i.e.*, the market for the sale and servicing of Grid Design Products to customers who require NUPIC certification. This statement does not show ETAP's willful acquisition or intent to acquire market power in the NUPIC Grid Design Market for two reasons. *First*, it refers to "kill[ing] competition" from entities that the TAC alleges do not compete in that market. TAC ¶ 66 (Plaintiff and ETAP are the only "competitors with audited 'certified' products in the NUPIC Grid Design Market"). *Second*, this statement followed Plaintiff's announcement regarding its Real Time Products -- not its **[*78]** Grid Design Products. The TAC does not allege that ETAP possesses market power in the NUPIC Real Time Market. Indeed, it alleges that there are currently no competitors in that market. *Id.* ¶ 115. This allegation therefore does not plausibly plead that ETAP acted with the specific intent to monopolize the NUPIC Grid Design Market.

For the foregoing reasons, the TAC fails plausibly to allege a violation of *Section 2* of the Sherman Act. Therefore, the Motions are **GRANTED** as to this claim and it is **DISMISSED**, without prejudice.

2. State Law Claims

a) The Cartwright Act

The Cartwright Act "generally outlaws any combinations or agreements which restrain trade or competition or which fix or control prices . . . and declares that, with certain exceptions, every trust is unlawful, against public policy and void." *In re Cipro Cases I & II, 61 Cal. 4th 116, 136, 187 Cal. Rptr. 3d 632, 348 P.3d 845 (2015)* (quoting *Pac. Gas & Elec. Co. v. Cty. of Stanislaus, 16 Cal. 4th 1143, 1147, 69 Cal. Rptr. 2d 329, 947 P.2d 291 (1997)* (internal citations omitted)). "The analysis under California's ***antitrust law*** mirrors the analysis under federal law because the Cartwright Act . . . was modeled after the Sherman Act." *County of Tuolumne v. Sonora Cmty. Hosp., 236 F.3d 1148, 1160 (9th Cir. 2001)*; *see also* *Nova Designs, Inc. v. Scuba Retailers Ass'n, 202 F.3d 1088, 1092 (9th Cir. 2000)* ("Our disposition of [the plaintiff's] Sherman Act claims disposes of its claims under the California Cartwright Act. The Cartwright Act is patterned after the Sherman Act, and 'federal cases **[*79]** interpreting the Sherman Act are applicable to problems arising under the Cartwright Act.'" (quoting *Marin Cty. Bd. of Realtors, Inc. v. Palsson, 16 Cal. 3d 920, 925, 130 Cal. Rptr. 1, 549 P.2d 833 (1976)* (en banc)).

Plaintiff acknowledges that its Cartwright Act claim is subject to the same limitations and requirements that apply to its claims under the Sherman Act. For the same reasons the TAC does not plausibly allege a claim against any Defendant under the Sherman Act, it does not plausibly allege a claim under the Cartwright Act.

Accordingly, the Motions are **GRANTED** as to this claim and it is **DISMISSED**, without prejudice.

b) North Carolina UDTPA Claim

"In order to state a claim under the UDTPA, a plaintiff must show (1) defendant committed an unfair or deceptive act or practice; (2) the action in question was in or affecting commerce; and (3) the act proximately caused injury to the plaintiff." *Ellis v. La.-Pac. Corp., 699 F.3d 778, 787 (4th Cir. 2012)* (internal quotation marks omitted). "Whether conduct is unfair or deceptive is a legal issue for the court to decide." *Id.*

Plaintiff's UDTPA claim appears to be premised on three broad categories of conduct: (i) the alleged bases for the violations of the Sherman Act, TAC ¶¶ 224-29, 231-39; (ii) the alleged false statements ETAP made to NUPIC customers about Plaintiff, *id.* ¶¶ 230-31, and (iii) **[*80]** Schneider's alleged "concealment" from EMS Platform customers "of the substantial cost benefits of alternative Grid D and M and Real Time products," such as those produced by Plaintiff, *id.* ¶ 240. Schneider acknowledges that anticompetitive conduct may be actionable under the UDTPA even if it does not violate the Sherman Act. However, it argues that the elements of such a cause of action are not plausibly pleaded as to any of the three aforementioned categories of conduct. Schneider Motion at 26-28. ETAP and OSI make similar arguments in the ETAP Motion. ETAP Motion at 26-27. Plaintiff responds that all elements of a UDTPA claim are plausibly pleaded. In support of this argument, it emphasizes that the UDTPA is broader than the Sherman Act. Thus, conduct may violate the UDTPA even if it does not rise to the level of a Sherman Act violation. Opposition to Schneider Motion at 27-28.

To the extent that Plaintiff's UDTPA claim is derivative of the conduct alleged to violate the Sherman Act, it is not plausibly pleaded. Thus, even if the UDTPA prohibits unfair and deceptive conduct that does not satisfy the elements of a claim under the Sherman Act, for the reasons stated above, the TAC **[*81]** does not plausibly plead that the challenged agreements were anticompetitive, exclusive dealing arrangements. *See R.J. Reynolds Tobacco Co. v. Philip Morris Inc., 199 F. Supp. 2d 362, 396 (M.D.N.C. 2002)* (courts have interpreted the UDTPA as prohibiting "commercial unfairness and deception beyond traditional antitrust concepts" but dismissing the plaintiffs' UDTPA cause of action because the complaint did not allege "any unfair and deceptive trade practices" apart from the deficient Sherman Act allegations).

Plaintiff's UDTPA claim is also not plausibly pleaded to the extent it is premised on Schneider's alleged concealment of lower-priced Grid D and M Products from EMS Platform customers. The essence of these allegations is that, in furtherance of the Schneider—ETAP Agreement, Schneider failed to inform its customers that other suppliers of Grid D and M and Real Time Products charge prices below those of ETAP. *See* TAC ¶ 240. Plaintiff has cited to no legal authority for the proposition that the alleged failure of a commercial entity to inform its customers that one of its competitors offers lower prices, constitutes an "unfair or deceptive act or practice" within the meaning of the UDTPA. Therefore, the TAC fails plausibly to plead a violation of the UDTPA based on this **[*82]** conduct.

The TAC also fails plausibly to allege a violation of the UDPTA based on the alleged false statements ETAP made to the public and certain of Plaintiff's customers about its financial viability. Thus, the TAC does not allege how such statements proximately caused any injury to Plaintiff. For example, the TAC does not allege that any of the customers to whom these alleged statements were made terminated relationships with Plaintiff or refused to partner with Plaintiff. *See* TAC ¶¶ 67, 109, 140, 230-31.

Because no acts of unfair or deceptive conduct are plausibly alleged in the TAC, the Motions are **GRANTED** as to this claim and it is **DISMISSED**, without prejudice.

c) California Unfair Competition Law

California's Unfair Competition Law ("UCL") prohibits unfair competition, which includes "any unlawful, unfair or fraudulent business act or practice . . . ." *Cal. Bus. & Prof. Code § 17200*. The purpose of the UCL "is to protect both consumers and competitors by promoting fair competition in commercial markets for goods and services." *McGill v. Citibank, NA, 2 Cal. 5th 945, 954, 216 Cal. Rptr. 3d 627, 393 P.3d 85 (2017)* (quoting *Kasky v. Nike, Inc., 27 Cal. 4th 939, 949, 119 Cal. Rptr. 2d 296, 45 P.3d 243 (2002)* (internal quotations omitted)).

Defendants argue that the TAC fails to state a claim under the UCL because this cause of action is derivative of the Sherman Act claims. Schneider **[*83]** Motion at 28. Plaintiff acknowledges that its UDTPA claim is derivative of its

Sherman Act claims. Opposition to Schneider Motion at 26. Therefore, for the same reasons the TAC does not plausibly allege a claim under *Section 1* or *Section 2* of the Sherman Act, it does not plausibly allege a claim under the UCL.

Accordingly, the Motions are **GRANTED** as to this claim and it is **DISMISSED**, without prejudice.

d) Tortious Interference with Prospective Economic Advantage

"In order to maintain an action for tortious interference with prospective advantage, Plaintiff must show that Defendants induced a third party to refrain from entering into a contract with Plaintiff without justification. Additionally, Plaintiff must show that the contract would have ensued but for Defendants' interference." *DaimlerChrysler Corp. v. Kirkhart, 148 N.C. App. 572, 585, 561 S.E.2d 276 (2002)*. "[E]ven where there is actual interference, a motion to dismiss should be granted where the interference is justified or privileged." *Cobra Capital, LLC v. RF Nitro Commc'ns, Inc., 266 F. Supp. 2d 432, 439 (M.D.N.C. 2003)*. Thus, to prevail on a tortious interference with prospective economic advantage claim, a plaintiff must demonstrate that the defendant "acted with malice and for a reason not reasonably related to the protection of a legitimate business interest." *Id.* (citations omitted).

Defendants argue **[*84]** that the TAC has not alleged facts that, if established, would show that Defendants acted with malice or without justification. Schneider also argues that the TAC does not identify particular contracts with which Schneider allegedly interfered and that the customers Plaintiff allegedly lost are in the NUPIC Market -- not the EMS Platform Market. Schneider Motion at 28-29. Plaintiff responds that the TAC states a plausible tortious interference claim because it alleges that the Schneider—ETAP Agreement is "an independently wrongful act" that interfered with Plaintiff's "opportunities to sell into the EMS Platform [M]arket." Opposition to Schneider Motion at 28.

The TAC alleges that Defendants "intentionally interfered" with Plaintiff's ability to "sell and service" its Grid D and M Products in the EMS Platform Market, the four end-user markets, the NUPIC Grid Design Market and the NUPIC Real Time Market. TAC ¶¶ 299-300. It then alleges that such interference caused Plaintiff "to lose sales to at least the following entities with whom [it] had pre-existing commercial relations: Duke Energy, Enercon, Atomic Energy of Canada and Energy Northwest." It also alleges that Defendants' conduct **[*85]** harmed Plaintiff "in the form of lost contracts, lost sales and profits, and lost opportunities to expand its business with purchasers and operators of Power Grids." *Id.* ¶¶ 300-02.

The TAC does not state a plausible tortious interference with prospective economic advantage claim against Schneider. The only specific business relations with which the challenged agreements allegedly interfered involved customers in the NUPIC Market. Schneider does not compete in that market. The TAC also does not state a plausible tortious interference claim against OSI or ETAP. Thus, it does not allege that either interfered with Plaintiff's pre-existing commercial relations with malice or for purposes unrelated to a legitimate business interest. *See Cobra Capital, 266 F. Supp. 2d at 439* (dismissing the plaintiff's complaint because it contained "no factual allegations that would raise an inference of malice or an illegitimate business interest on the part of [the defendant]" in determining that a business opportunity with the plaintiff was not in its economic interest). In sum, the TAC alleges only that these four customers "switched from" Plaintiff to ETAP "as a direct result of" the OSI—ETAP Agreement. TAC ¶ 112. This allegation is conclusory. **[*86]** Thus, it does not allege that these four customers terminated their respective relationships with Plaintiff as a result of the challenged agreement. Further, to the extent this claim is predicated on the allegations regarding the misrepresentations ETAP made to the public and certain unidentified customers, it is not sufficiently pleaded. Thus, the TAC does not plausibly allege that these claimed misrepresentations induced specific customers "to refrain from" contracting with Plaintiff. *DaimlerChrysler Corp., 148 N.C. App. at 585*.

For the foregoing reasons, the TAC does not plausibly state a claim for tortious interference with economic advantage. Therefore, the Motions are **GRANTED** as to this claim and it is **DISMISSED**, without prejudice.

e) Conspiracy Claim

The TAC does not plausibly allege a claim for civil conspiracy. The supporting allegations are conclusory. They state the elements of the tort, but with few factual predicates. *See* TAC ¶¶ 303-08. Further, to the extent that this claim is premised on the alleged violations of *Section 1* of the Sherman Act or the other claims addressed above, it fails for the same reasons stated as to those claims. Nor has Plaintiff remedied the deficiencies in the allegations pleaded in support of this **[*87]** claim that were identified in the SAC Order. *Compare* SAC ¶¶ 381-86 *with* TAC ¶¶ 303-08.

For the foregoing reasons, the Motions are **GRANTED** as to this claim and it is **DISMISSED**, without prejudice.

IV. Conclusion

For the reasons stated in this Order, the Motions are **GRANTED**, without prejudice. Any amended complaint shall be filed no later than July 31, 2018.

IT IS SO ORDERED.

Charych v. Siriusware, Inc.

United States District Court for the Eastern District of New York

Opinion

REPORT AND RECOMMENDATION

GARY R. BROWN, United States Magistrate Judge:

In this antitrust action, plaintiffs seek recovery based on allegations purporting to demonstrate that defendants acted unlawfully in connection with the distribution and marketing of automated ski resort validation systems. Defendants have moved to dismiss the fourth amended complaint pursuant to *Fed. R. Civ. P. 12(b)(2)*, *(5)* and *(6)* for lack of jurisdiction, failure of service and failure to state a claim, respectively, and said motions have been referred to the undersigned by the Honorable Joanna Seybert for Report and Recommendation. DE 80. For the reasons set forth herein, the undersigned respectfully recommends that defendants' motion be granted and the matter dismissed with prejudice.

ALLEGATIONS OF THE COMPLAINT

The fourth amended complaint ("Complaint") in this action, DE 67, alleges the following:

Many larger ski resorts utilize management software sold by Defendants Accesso Technology Group, PLC with its subsidiary Siriusware, Inc. (together "Accesso Technology") and defendant Active Network, LLC. ("Active Network"). Compl. ¶ 14. The solutions provided by these companies—which **[*3]** represent approximately 80% of the market—include production of ski lift tickets that include unique barcodes, which can be visually read by employees or scanned by mobile barcode readers. *Id.* Notwithstanding these safeguards, theft of services continues to present issues, including through improper lift ticket transfers among skiers. *Id.* ¶¶ 15-17.

To add additional security and greater efficiency, companies have developed automated ski lift access gates employing Radio Frequency Identification ("RFID") technology—essentially an EZ Pass for skiers. *Id.* ¶¶ 18-19. Active Network has partnered with the Skidata defendants to offer these products to its ski resort customers. *Id.* ¶¶ 22-24. Similarly, the Accesso Technology has made joint efforts with the Axess defendants to provide a unified RFID solution to their ski resort customers. *Id.* ¶¶ 25-28. The Complaint alleges, in a most conclusory manner, that all defendants have "significant contacts" with the State of New York, through, among other things, efforts to purchase or sell products to or from businesses in New York and attending trade shows and conferences. *Id.* ¶ 12. With respect to the three non-US defendants—Axess AG, Vista and **[*4]** Skidata AG (together, the "foreign defendants")—plaintiffs fail to articulate any particularized allegations as to these entities, relying instead upon broad legal theories. *See, e.g., id.* ¶¶ 284-87 (allegations against Axess AG suggesting that defendant "is *or may be liable* for the conduct of [Axess] under principles of *respondeat superior . . . and/or some other type of vicarious liability*") (emphasis added).

Plaintiffs developed, at a cost of $350,000, an RFID ski gate system that, they claim, offers superior features and a lower price point than the systems marketed by Axess and Skidata. *Id.* ¶¶ 31, 82. One technical difference of plaintiffs' system is the incorporation of ultra high frequency ("UHF") technology that purportedly offers a greater read range and more robust detection of RFID tickets. *Id.* ¶ 37. The complaint catalogs a series of features and advantages of plaintiffs' system that allegedly render it preferable to those produced by defendants. *Id.* ¶¶ 31-54. Following that description, plaintiffs describe testing their system at Loon Mountain in Lincoln, NH, Pico Mountain in Mendon, VT, and Sunday River in Newry, ME, and their unsuccessful efforts to market their system **[*5]** to Gore Mountain in North Creek, NY, Sunapee Mountain in Newbury, NH, and Wachusett Mountain Ski Area in Princeton, MA. *Id.* ¶¶ 56-79, 119-25. According to the allegations, the later, unsuccessful efforts to market their system turned on an unwillingness by Accesso Technology and Active Network to render their existing systems compatible for integration of plaintiffs' products or to provide interface information to allow plaintiffs to effect such integration. *Id.*

The complaint describes additional efforts by plaintiffs to sell their system to other ski resorts, including Boyne Resorts and Powdr Resorts, entities which own groups of ski facilities. *Id.* ¶¶ 84-100. According to the complaint, all of these efforts were waylaid by defendants by the exercise of market power generally and, more specifically, failure to provide the interface for defendants' systems. *Id.* In one particular instance, Active Network indicated to Boyne Resorts that the cost of providing such an interface would run several hundred thousand dollars. *Id.* ¶ 100; *id.* Ex. S. Similarly, in connection with the Gore Mountain project, plaintiffs received information from the customer that providing an interface to the Accesso **[*6]** software "would not be cheap." *Id.* ¶ 115. In several other instances, plaintiffs cite, in support of their claims of restraint of trade, communications from potential customers asking questions about the nature of plaintiffs' relationship with Accesso Technology and Active Networks, as well as allegedly abrupt decision-making on the part of customers rejecting plaintiffs' products. *See generally id.*

Based on these allegations, the Complaint purports to set forth the following correspondingly numbered causes of action:

Count(s)	**Defendants**	**Nature of Count**
I, III, V, VII, IX, XI, XIII, XV	Siriusware, Accesso, Axess, Axess AG, Active, Vista, Skidata, Skidata AG	Restraint of Trade (*Sherman Act*, *§ 1*)
II, IV, VI, VIII, XII, XIV, XVI	Siriusware, Accesso, Axess, Axess AG, Active, Skidata, Skidata AG	Agreement to Monopolize (*Sherman Act, § 2*)

In their *ad damnum* provision, plaintiffs seek actual damages exceeding $18 million (a figure drawn from income projections contained in plaintiffs' business plan), treble damages under the Sherman Act and other costs and fees. *Id.*

DISCUSSION

Lack of Personal Jurisdiction and Insufficient Service

As a threshold matter, the foreign defendants move to dismiss for lack of personal **[*7]** jurisdiction pursuant to *Fed. R. Civ. P. 12(b)(2)* and for insufficient service of process pursuant to *Fed. R. Civ. P. 12(b)(5)*. With respect to personal jurisdiction, the Second Circuit has held that:

> A plaintiff bears the burden of demonstrating personal jurisdiction over a person or entity against whom it seeks to bring suit. *In re Magnetic Audiotape Antitrust Litig., 334 F.3d 204, 206 (2d Cir. 2003)* (per curiam). "In order to survive a motion to dismiss for lack of personal jurisdiction, a plaintiff must make a *prima facie* showing that jurisdiction exists." *Thomas v. Ashcroft, 470 F.3d 491, 495 (2d Cir. 2006)*. Such a showing entails making "legally sufficient allegations of jurisdiction," including "an averment of facts that, if credited[,] would suffice to establish jurisdiction over the defendant." *In re Magnetic Audiotape, 334 F.3d at 206* (internal quotation marks and ellipsis omitted).

Penguin Grp. (USA) Inc. v. Am. Buddha, 609 F.3d 30, 34-35 (2d Cir. 2010), *certified question accepted*, *15 N.Y.3d 744, 933 N.E.2d 205, 906 N.Y.S.2d 807 (N.Y. 2010)*, *& certified question answered*, *16 N.Y.3d 295, 946 N.E.2d 159, 921 N.Y.S.2d 171 (N.Y. 2011)*. As noted above, with respect to the foreign defendants, plaintiffs make only conclusory allegations of "minimum contacts." Compl. ¶ 12. Furthermore, one defendant submitted a declaration which calls into question such conclusory assertions. *See* DE 74-3, ¶¶ 4-11 (declaring that Axess AG is an Austrian entity that is not registered to do business and does not maintain addresses, offices, telephone number or agents for services of process anywhere **[*8]** in the United States). In response, plaintiffs offer nothing but speculation on the question. DE 75 at 16 ("[T]here is bound to be a ski convention or conference in New York that the defendant attended . . . .").[1]

However, as to the foreign defendants, plaintiffs have run aground based upon the question of service. Plaintiffs have failed to provide any proof of service consistent with *Rule 4(l)(1)*. While that failure alone could form the basis for the instant motion, *Reyes v. N. Shore-Long Island Jewish Health Sys., No. 00 CIV 8968 BSJ AJP, 2001 U.S. Dist. LEXIS 4636, 2001 WL 395166, at *1 (S.D.N.Y. Apr. 16, 2001)* (report and recommendation) (recommending the district court dismiss the action where "no affidavit of service on file with the Clerk's Office"), the undersigned will overlook this technical objection and examine the propriety of the underlying efforts to serve the foreign defendants. Because plaintiff failed to file affidavits of service, the only evidence of record describing the method used to provide notice to the foreign defendants is a declaration by Axess AG indicating that the complaint was sent to Austria "via a Federal Express mail delivery" and with no translations of the documents so delivered. DE 74-3, ¶ 12.

Service of process must comport both with the statute under which service is effectuated as well as **[*9]** due process requirements, and, of course, *Fed. R. Civ. P. 12(b)(5)* permits motions to dismiss for insufficient service. In this case, the statutory authority for service is the Hague Convention on the Service Abroad of Judicial and Extrajudicial Documents in Civil or Commercial Matters ("Hague Convention"), as noted in *Fed. R. Civ. P. 4(f)(1)*. *See Ackermann v. Levine, 788 F.2d 830, 838 (2d Cir. 1986)*. "As a ratified treaty, the [Hague] Convention is of course 'the supreme law of the land.'" *Id.* (quoting *U.S. Const. art. VI, cl. 2*).

Article 10 of the Hague Convention states that "[p]rovided the State of destination does not object, the present Convention shall not interfere with the freedom to send judicial documents, by postal channels, directly to persons abroad." *Id. at 839* (internal quotation marks omitted). The Second Circuit has long held the view that where a country "has made no objection to the use of 'postal channels' under Article 10(a), service of process by registered mail remains an appropriate method of service." *Id.* Recently, the Supreme Court reaffirmed this interpretation:

> Article 10(a) simply provides that, as long as the receiving state does not object, the Convention does not "interfere with ... the freedom" to serve documents through postal channels. In other words, in cases governed by the Hague **[*10]** Service Convention, service by mail is permissible if two conditions are met: first, the receiving state has not objected to service by mail; and second, service by mail is authorized under otherwise-applicable law.

Water Splash, Inc. v. Menon, 137 S. Ct. 1504, 1513, 197 L. Ed. 2d 826 (2017) (citing *Brockmeyer v. May, 383 F.3d 798, 803-04 (9th Cir. 2004))*.

So the relevant inquiry is whether Austrian law permits service of process by mail. The Eleventh Circuit has upheld a lower court determination that such "service . . . was prohibited by the law of Austria." *Prewitt Enters., Inc. v. Org. of Petroleum Exporting Countries, 353 F.3d 916, 923 (11th Cir. 2003)* (further holding that actual notice did not cure the deficient service). Another court held that "[i]n Austria, like many other European civil law countries, the direct service of foreign legal documents by foreign authorities or by private individuals without the assistance or consent of Austrian authorities is regarded as an infringement of Austria's sovereignty." *In re Ski Train Fire in Kaprun, Austria on Nov. 11, 2000, No. 1428 (SAS), 01 CIV. 7342, 2003 U.S. Dist. LEXIS 5575, 2003 WL 1807148, at *7 (S.D.N.Y. Apr. 4, 2003)* (holding that the service of untranslated documents without consent is invalid under Austrian law). Additionally, on this motion, Axess AG presents a detailed, sworn declaration from an Austrian law professor which concludes as follows:

---

[1] Plaintiffs have, however, for the first time on this motion, *see* DE 75 at 16-17, made a "request for further discovery on the question of personal jurisdiction." *In re Magnetic Audiotape Antitrust Litig., 334 F.3d at 206*. Having done so, limited discovery on this issue would be permitted to proceed, provided plaintiffs' action should survive the balance of the motion. *Id.* As set forth below, it should not.

> Austrian law prohibits "direct" service of process via postal services, **[*11]** a private courier service or directly through the Plaintiff or Plaintiffs counsel. It demands that the foreign courts avail themselves of the legal assistance of Austrian authorities, *i.e.*, the Austrian Federal Ministry of Justice. On this basis, service of process will be performed by the competent Austrian courts and in accordance with the Austrian Federal Service Statutes.
>
> From an Austrian law perspective, "direct" service of court documents without the involvement of the competent Austrian authorities is both contrary to Austrian due process principles and an infringement of Austrian territorial sovereignty. It is therefore prohibited and does not qualify as due service of process under Austrian law.

DE 74-2 at ¶¶ 15-16. In response to this detailed showing, plaintiffs offer neither evidence nor argument.

Accordingly, it is the recommendation of the undersigned that the action be dismissed without prejudice as against the foreign defendants for insufficient service of process pursuant to *Fed. R. Civ. P. 12(b)(5)*.

Failure to State a Claim Under the Sherman Act

Standard of Review

Under *Fed. R. Civ. P. 12(b)(6)*, a defendant may move to dismiss the complaint for "failure to state a claim upon which relief can be granted." "In considering **[*12]** a motion to dismiss under *Rule 12(b)(6)*, a court must accept as true all factual allegations in the complaint and draw all reasonable inferences in the plaintiff's favor." *Henry v. Nannys for Grannys Inc., 86 F. Supp. 3d 155, 157 (E.D.N.Y. 2015)* (citing *Ruotolo v. City of New York, 514 F.3d 184, 188 (2d Cir. 2008))*. However, "the tenet that a court must accept as true all of the allegations contained in a complaint is inapplicable to legal conclusions. Threadbare recitals of the elements of a cause of action, supported by mere conclusory statements, do not suffice." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (citing *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))*.

To survive, a complaint must supply "sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" *Id.* (quoting *Twombly, 550 U.S. at 570*); *see* *Operating Local 649 Annuity Trust Fund v. Smith Barney Fund Mgmt., LLC, 595 F.3d 86, 91 (2d Cir. 2010)*. A claim is plausible when the plaintiff sets forth "factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Iqbal, 556 U.S. at 663*.

In applying this standard in the context of an antitrust conspiracy action brought under *§ 1* and *§ 2* of the Sherman Act, the Second Circuit observed:

> We affirm the district court's dismissal of the conspiracy claims because plaintiffs are unable to allege facts that would provide "plausible grounds to infer an agreement," *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 127 S.Ct. 1955, 1965, 167 L.Ed.2d 929 (2007)*. "Considerable uncertainty" surrounds the breadth of the Supreme Court's recent decision in *Twombly. Iqbal v. Hasty, 490 F.3d 143, 155 (2d Cir.2007)*. But we **[*13]** need not draw fine lines here; our precedents support application of *Twombly* to the conspiracy claims asserted under both *Section 1* and *Section 2*. To survive a motion to dismiss under *Twombly*, it is not enough to make allegations of an antitrust conspiracy that are consistent with an unlawful agreement; to be viable, a complaint must contain "enough factual matter (taken as true) to suggest that an agreement [to engage in anticompetitive conduct] was made." *Twombly, 127 S.Ct. at 1965* (citation and internal quotation marks omitted). While *Twombly* does not require heightened fact pleading of specifics, it does require enough facts to "nudge [plaintiffs'] claims across the line from conceivable to plausible." *Twombly, 127 S.Ct. at 1974*.

In re Elevator Antitrust Litig., 502 F.3d 47, 50 (2d Cir. 2007) (footnotes omitted) (affirming district court's dismissal under *Fed. R. Civ. P. 12(b)(6)*). Importantly, in reaching its decision, the Court in *Elevator Antitrust Litigation* was swayed neither by "conclusory allegations of agreement," nor allegations of "parallel conduct," elements which represent cornerstones of plaintiffs' complaint here. *Id.*

Twombly, a Sherman Act decision, provides that a *§ 1* claim "requires a complaint with enough factual matter (taken as true) to suggest that an agreement was made." *550 U.S. at 556*. Notably, *Twombly* held that "[w]ithout more, **[*14]** parallel conduct does not suggest conspiracy, and a conclusory allegation of agreement at some unidentified point does not supply facts adequate to show illegality. Hence, when allegations of parallel conduct are set out in order to make a *§ 1* claim, they must be placed in a context that raises a suggestion of a preceding agreement, not merely parallel conduct that could just as well be independent action." *Id. at 556-57*. The parties agree that to state a claim under *§ 2*, plaintiffs must allege "(1) concerted action, (2) overt acts in furtherance of the conspiracy, and (3) specific intent to monopolize." *Electronics Communs. Corp. v. Toshiba Am. Consumer Prods., 129 F.3d 240, 246 (2d Cir. 1997)* (internal quotation marks omitted) (quoting *Volvo N. Am. Corp. v. Men's Int'l Prof'l Tennis Council, 857 F.2d 55, 74 (2d Cir. 1988))*. Importantly, the Supreme Court cautioned that "[i]t is one thing to be cautious before dismissing an antitrust complaint in advance of discovery . . . but quite another to forget that proceeding to antitrust discovery can be expensive." *Twombly, 550 U.S. at 546* (internal citation omitted).

Fed. R. Civ. P. 12(b)(6) Analysis of the Sherman Act Claims

While defendants raise a laundry list of potential deficits with respect to the restraint of trade and agreements to monopolize claims, one factual issue dominates the analysis: plaintiffs' claims turn on the alleged failure of Accesso Techonology and Active **[*15]** Network to create and provide a software interface that would permit plaintiffs' products to function in IT environments run by those defendants' management software systems. The problem for plaintiffs, however, is that according to the allegations of the complaint and the documents annexed thereto, the cost of providing such an interface for the Active Network system was estimated in the hundreds of thousands of dollars. Compl. ¶ 100; *id.* Ex. S. Plaintiffs conclusorily allege that such an estimate constituted an "outlandish amount for a very small effort." *Id.* ¶ 101. Yet, in an entirely separate allegation relating to Accesso's system, the complaint provides that creating an interface "would not be cheap." *Id.* ¶ 115. Plaintiffs offer no allegations or exhibits refuting this notion. Moreover, despite their efforts to minimize the effort involved, plaintiffs concede, in the allegations of the complaint, that creating such an interface would take "several weeks." *Id.* ¶ 71. Therefore, assuming the truth of the matters alleged, the creation of interfaces for these systems would be, by any measure, a costly endeavor.

The issue of a business's right to refuse to deal with a competitor has **[*16]** been comprehensively addressed by the Supreme Court:

> Firms may acquire monopoly power by establishing an infrastructure that renders them uniquely suited to serve their customers. Compelling such firms to share the source of their advantage is in some tension with the underlying purpose of ***antitrust law***, since it may lessen the incentive for the monopolist, the rival, or both to invest in those economically beneficial facilities. Enforced sharing also requires antitrust courts to act as central planners, identifying the proper price, quantity, and other terms of dealing-a role for which they are ill suited. Moreover, compelling negotiation between competitors may facilitate the supreme evil of antitrust: collusion. Thus, as a general matter, the Sherman Act "does not restrict the long recognized right of [a] trader or manufacturer engaged in an entirely private business, freely to exercise his own independent discretion as to parties with whom he will deal." *United States v. Colgate & Co., 250 U.S. 300, 307, 39 S.Ct. 465, 63 L.Ed. 992, 1919 Dec. Comm'r Pat. 460 (1919)*.
>
> However, "[t]he high value that we have placed on the right to refuse to deal with other firms does not mean that the right is unqualified." *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 601, 105 S.Ct. 2847, 86 L.Ed.2d 467 (1985)*. Under certain circumstances, a refusal to cooperate with rivals can constitute anticompetitive **[*17]** conduct and violate *§ 2*. We have been very cautious in recognizing such exceptions, because of the uncertain virtue of forced sharing and the difficulty of identifying and remedying anticompetitive

conduct by a single firm. The question before us today is whether the allegations of respondent's complaint fit within existing exceptions or provide a basis, under traditional antitrust principles, for recognizing a new one.

The leading case for § 2 liability based on refusal to cooperate with a rival, and the case upon which respondent understandably places greatest reliance, is *Aspen Skiing, supra.* The Aspen ski area consisted of four mountain areas. The defendant, who owned three of those areas, and the plaintiff, who owned the fourth, had cooperated for years in the issuance of a joint, multiple-day, all-area ski ticket. After repeatedly demanding an increased share of the proceeds, the defendant canceled the joint ticket. The plaintiff, concerned that skiers would bypass its mountain without some joint offering, tried a variety of increasingly desperate measures to re-create the joint ticket, even to the point of in effect offering to buy the defendant's tickets at retail price. *Id. at 593-594, 105 S.Ct. 2847*. The defendant refused even **[*18]** that. We upheld a jury verdict for the plaintiff, reasoning that "[t]he jury may well have concluded that [the defendant] elected to forgo these short-run benefits because it was more interested in reducing competition . . . over the long run by harming its smaller competitor." *Id. at 608, 105 S.Ct. 2847*.

Aspen Skiing is at or near the outer boundary of § 2 liability. The Court there found significance in the defendant's decision to cease participation in a cooperative venture. *See id., at 608, 610-611, 105 S.Ct. 2847*. The unilateral termination of a voluntary (and thus presumably profitable) course of dealing suggested a willingness to forsake short-term profits to achieve an anticompetitive end. *Ibid.* Similarly, the defendant's unwillingness to renew the ticket even if compensated at retail price revealed a distinctly anticompetitive bent. [ ]

The refusal to deal alleged in the present case does not fit within the limited exception recognized in *Aspen Skiing*. The complaint does not allege that Verizon voluntarily engaged in a course of dealing with its rivals, or would ever have done so absent statutory compulsion. Here, therefore, the defendant's prior conduct sheds no light upon the motivation of its refusal to deal-upon whether its regulatory **[*19]** lapses were prompted not by competitive zeal but by anticompetitive malice. The contrast between the cases is heightened by the difference in pricing behavior. In *Aspen Skiing*, the defendant turned down a proposal to sell at its own retail price, suggesting a calculation that its future monopoly retail price would be higher. Verizon's reluctance to interconnect at the cost-based rate of compensation available under § 251(c)(3) tells us nothing about dreams of monopoly.

The specific nature of what the 1996 Act compels makes this case different from Aspen Skiing in a more fundamental way. In Aspen Skiing, what the defendant refused to provide to its competitor was a product that it already sold at retail-to oversimplify slightly, lift tickets representing a bundle of services to skiers. Similarly, in *Otter Tail Power Co. v. United States, 410 U.S. 366, 93 S.Ct. 1022, 35 L.Ed.2d 359 (1973)*, another case relied upon by respondent, the defendant was already in the business of providing a service to certain customers (power transmission over its network), and refused to provide the same service to certain other customers. *Id. at 370-371, 377-378, 93 S.Ct. 1022*. In the present case, by contrast, the services allegedly withheld are not otherwise marketed or available to the public. The sharing obligation imposed by the 1996 Act **[*20]** created "something brand new"-"the wholesale market for leasing network elements." *Verizon Communications Inc. v. FCC, 535 U.S., at 528, 122 S.Ct. 1646*. The unbundled elements offered pursuant to § 251(c)(3) exist only deep within the bowels of Verizon; they are brought out on compulsion of the 1996 Act and offered not to consumers but to rivals, and at considerable expense and effort. New systems must be designed and implemented simply to make that access possible-indeed, it is the failure of one of those systems that prompted the present complaint.

Verizon Commc'ns Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 407-10, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004) (footnote omitted).

Here, the allegations do not even give rise to a conclusion that defendants refused to provide the sought after interface; rather, defendants were simply unwilling to bear the costs of developing an interface without reimbursement. Compl. ¶¶ 100-15. Even assuming, *arguendo*, that the single conclusory allegation of an inflated estimate for developing an interface could be construed as a refusal to deal with plaintiffs, the conduct alleged cannot reasonably be construed as falling within the narrow exception to defendants' recognized right to such refusal. *See* *Int'l Bus. Machs. Corp. v. Platform Sols., Inc., 658 F. Supp. 2d 603, 613-14 (S.D.N.Y. 2009)* (holding that allegations that IBM cease supporting and licensing a particular operating system could not give rise to a Sherman Act claim). **[*21]** "A refusal to deal is generally not unlawful unless it is done for the purpose of monopolization," the Second Circuit has observed. *Port Dock & Stone Corp. v. Oldcastle Ne., Inc., 507 F.3d 117, 124 (2d Cir. 2007)* (citing *Colgate & Co., 250 U.S. at 307*). "The absence of a legitimate business purpose for the defendant's refusal to deal has been seen as circumstantial evidence of improper intent." *Id.* (citing *Aspen Highlands Skiing Corp., 472 U.S. at 608*). In this case, the legitimate business purposes of defendants' actions in seeking payment for the creation of a software interface, or even refusing to engage in such a significant undertaking, are self-evident from the allegations of the complaint. Thus, the complaint is facially deficient.

Equally important, the actions alleged do not exclude the possibility that the alleged actions by Accesso and Active represent independent (and, under the circumstances, seemingly reasonable) business actions rather than the demonstration of an anticompetitive agreement. *See, e.g., Vedder Software Grp. Ltd. v. Ins. Servs. Office, Inc., 545 F. App'x 30, 33 (2d Cir. 2013)* ("The insurers' alleged demand to require use of Xactimate fails to show an agreement because it does not 'tend[ ] to exclude the possibility of independent action.' *Twombly, 550 U.S. at 555*. Such a demand would assure an insurance company and its vendors utilize compatible software to achieve consistency in estimates and ease in sharing data. **[*22]** Thus, the alleged demand could be expected of an insurer acting independently from its competitors.") This is particularly true where, as here, plaintiffs rely on a theory of parallel conduct by two groups of competitors. "[A]llegations of parallel conduct must be placed in a context that raises a suggestion of a preceding agreement, not merely parallel conduct that could just as well be independent action." *Id. at 32* (alterations omitted). In this case, as in *Twombly*, "the complaint leaves no doubt that plaintiffs rest their *§ 1* claim on descriptions of parallel conduct and not on any independent allegation of actual agreement among the [defendants]." *550 U.S. at 564*.

Defendants raise several additional meritorious arguments, including the following: First, as plaintiffs' allegations describe only injuries to their efforts to enter the market, the complaint fails to set forth a cognizable injury under the Sherman Act. *Wellnx Life Scis. Inc. v. Iovate Health Scis. Research Inc., 516 F. Supp. 2d 270, 289 (S.D.N.Y. 2007)* (quoting *Geneva Pharms. Tech. Corp. v. Barr Labs., Inc., 386 F.3d 485, 507 (2d Cir. 2004)* ("'Because the antitrust laws protect competition as a whole, evidence that plaintiffs have been harmed as individual competitors will not suffice.'") Second, defendants correctly argue that the plaintiffs' claims are predicated upon a "shared monopoly" theory, which has been expressly **[*23]** rejected by the Second Circuit. *RxUSA Wholesale, Inc. v. Alcon Labs., Inc., 661 F. Supp. 2d 218, 235 (E.D.N.Y. 2009)* (citing *H.L. Hayden Co. of N.Y., Inc. v. Siemens Med. Sys., Inc., 879 F.2d 1005, 1018 (2d Cir.1989))* ("The Second Circuit has specifically rejected monopolization claims under *Section 2* based on a shared monopoly theory of liability"), *aff'd sub nom., RxUSA Wholesale Inc. v. Alcon Labs., 391 F. App'x 59 (2d Cir. 2010)*; *see* *Siemens Med. Sys., Inc., 879 F.2d at 1018* (stating that "the district court correctly concluded that the market shares of [defendants] could not be aggregated to establish an attempt to monopolize in violation of Sherman Act *section 2*, *15 U.S.C. § 2 (1982)*"). Finally, defendants raise several other issues that would otherwise require further consideration, including the failure to allege actionable anticompetitive behavior, a properly defined product market or market power. However, because the fundamental factual premise here, to wit: that the software providers were somehow compelled to design a software interface for plaintiffs either without charge or at a better cost, is so flawed, these arguments need not be reached.

It is clear, based on the foregoing, that plaintiffs have failed to allege either a *§ 1* or *§ 2* claim under the Sherman Act. As such, the Complaint should be dismissed.

CONCLUSION

Based on the foregoing, it is respectfully recommended that defendants' motions be granted in all respects, and the case be dismissed with prejudice.

OBJECTIONS

A copy of **[*24]** this Report and Recommendation is being provided to the parties via ECF, and defendant should serve a copy upon plaintiff, and file an appropriate affidavit of service. Any written objections to this Report and Recommendation must be filed with the Clerk of the Court within fourteen (14) days of service of this report. *28 U.S.C. § 636(b)(1) (2006 & Supp. V 2011)*; *Fed. R. Civ. P. 6(a)*, *72(b)*. Any requests for an extension of time for filing objections must be directed to the district judge assigned to this action prior to the expiration of the fourteen (14) day period for filing objections. **Failure to file objections within fourteen (14) days will preclude further review of this report and recommendation either by the District Court or Court of Appeals.** *Thomas v. Arn, 474 U.S. 140, 145, 106 S. Ct. 466, 88 L. Ed. 2d 435 (1985)* ("[A] party shall file objections with the district court or else waive right to appeal."); *Caidor v. Onondaga County, 517 F.3d 601, 604 (2d Cir. 2008)* ("[F]ailure to object timely to a magistrate's report operates as a waiver of any further judicial review of the magistrate's decision.").

Opinion

[*789] MEMORANDUM AND ORDER

REAGAN, Chief Judge:

Section 1 of the *Sherman Act* prohibits certain agreements that restrain trade. This class action asks whether franchisees of the national sandwich chain "Jimmy John's" violated *Section 1* by agreeing amongst themselves and with corporate headquarters not to hire employees that have worked at another Jimmy John's location within the preceding year. The defendants—Jimmy John's **[**2]** Franchise, LLC, Jimmy John's Enterprises, LLC, and Jimmy John's LLC (together, "Jimmy John's")—have now moved to dismiss the complaint under *Federal Rules of Civil Procedure 12(b)(1)* & *(6)* for a lack of standing and for failure to state a claim. (ECF No. 28.) For the following reasons, the Court **GRANTS IN PART** and **DENIES IN PART** the motion to dismiss.

I. BACKGROUND

Jimmy John's sells and delivers deli-style sandwiches. The chain has over 2,700 locations in more than 40 states plus the District of Columbia. (Compl. ¶ 36, ECF No. 1.) About 98% of these locations are franchisees that are independently owned and operated as separate entities from Jimmy John's corporate; the other two percent are owned and operated by Jimmy John's itself. (*Id.*) Basically, when a franchisee contracts with Jimmy John's, the franchisee signs a ten-year franchise agreement for a fee of $35,000. (*Id.* at ¶ 40.) Those agreements then allow the franchisee to utilize the Jimmy John's brand in the operation of an independently owned store. (*Id.* at ¶ 42.)

According to the plaintiff, these agreements give the franchisees significant amounts of independence. Not only do the contracts explicitly provide that the franchisees are independent of Jimmy John's, but the **[**3]** agreements also state that the franchisees (1) are responsible for developing the restaurant, including all obligations and liabilities of the business; (2) do not receive an exclusive territory; (3) and may **[*790]** face competition from other franchisees, including in the same delivery area. (*Id.* at ¶¶ 50, 61-63.) Moreover, a franchisee must identify itself as the owner of its specific store in all dealings with external entities, and it must place notices of independent ownership on any forms, business cards, advertising, or any other materials that Jimmy John's requires. (*Id.* at ¶ 52.) Most importantly, the franchise agreements outright disclaim that Jimmy John's and the franchisees are agents, joint venture partners, or employees of the other "for any purpose." (*Id.* at ¶ 51.) The President and CEO of Jimmy John's has testified under oath in another case that the franchisees "independently own[] and operate[] a franchise business that stands in an arm's length contractual relationship with Jimmy John's," and that franchisees and Jimmy John's are not agents or partners "for any purpose"—just as stated in the franchise agreements. (*Id.* at ¶ 54.)

This case arises from something that Jimmy John's **[**4]** *does* make the franchisees do. The franchise agreements order that the franchisee must not "solicit or initiate recruitment of any person then employed, or who was employed within the preceding twelve (12) months, by [Jimmy John's], any of [Jimmy John's] affiliates, or another Jimmy John's Restaurant franchisee." (*Id.* at ¶ 78) (hereinafter the "no-hire provision.") In plain language, this means that one Jimmy John's franchisee cannot hire the employee of another Jimmy John's franchisee, unless that employee has not worked at a Jimmy John's shop in over a year. If a franchisee violates the no-hire provision, Jimmy John's headquarters considers it a non-curable default of the franchise agreement that is grounds for termination of the entire contract. (*Id.* at ¶ 80.) Termination also subjects the franchisee to liquidated damages in the form of up to three years' worth of restaurant royalties, which the franchisee must pay within 15 days of termination. (*Id.* at ¶ 81.) The penalties are even higher if the employee in question is a manager. (*Id.* at ¶ 83.)

The franchise agreements have another common thread that is crucial to the theory of this case: The agreements state that all current and **[**5]** future franchisees are third-party beneficiaries" of the no-hire provision. (*Id.* at ¶ 85.) As a third-party beneficiary, each franchisee enjoys an independent right to enforce the no-hire provision against another franchisee, which could lead to a $50,000 fine against the at-fault franchisee. (*Id.* at ¶ 91.) And if a franchisee wants to avoid this whole affair, it is required to obtain written permission from the other franchisee before recruiting that franchisee's current or former employee. (*Id.* at ¶ 89.)

So in order to protect themselves, the franchisees made their employees sign non-compete agreements—designed by Jimmy John's—which set a few ground rules: (1) Employees could not work or have any interest in any other business that sells "submarine, hero-type, deli-style, pita, and/or wrapped or rolled sandwiches" within a few miles of any Jimmy John's franchisee in the United States, both during their employment and for two years afterwards; (2) employees must immediately notify the franchisee of any employment offers made by any competitor; and (3) an employee who violated the agreement would have to reimburse the franchisee and Jimmy John's for all costs and expenses—including **[**6]** attorney's fees—incurred to enforce the agreement against that employee. (*Id.* at ¶¶ 92-97.)

Plaintiff Sylas Butler used to work at a Jimmy John's franchise owned by Kidds Restaurant, Inc. (*Id.* at ¶ 145.) While at the store, Butler worked as both a delivery driver and as an in-store employee. (*Id.* at ¶ 147.) Over the course of about 17 months, **[*791]** Butler's supervisor reduced Butler's hours to about four hours of work per week, even though Butler wanted to work more. (*Id.* at ¶ 148.) But because Butler was subject to the non-compete agreement, he was unable to transfer to a competing Jimmy John's franchisee or to another sandwich store—so his only options were to (1) stay stagnant at his current Jimmy John's store; or (2) quit and start another entry-level job at a non-sandwich shop. (*Id.* at ¶¶ 146, 149.) Butler ended up quitting. (*Id.*)

Now, Butler brings this class action lawsuit on behalf of a nationwide class of persons who are current or former employees at a Jimmy John's franchise restaurant. (*Id.* at ¶ 156.) The complaint alleges that Jimmy John's utilized the employee no-hire agreements in violation of three statutes: (1) *Section 1* of the Sherman Antitrust Act, *15 U.S.C. § 1, et seq.*; (2) the **[**7]** *Illinois Antitrust Act, 740 ILCS 10/1, et seq.*; and (3) the *Illinois Consumer Fraud and Deceptive Business Practices Act, 815 ILCS 505/1, et seq.* Specifically, Butler alleges that Jimmy John's employees have "suffered reduced wages, reduced hours, reduced employment benefits, loss of professional growth opportunities, and worsened, illegal working conditions because of the express restraint of trade among Jimmy John's franchisees, as orchestrated by Jimmy John's itself." (*Id.* at ¶ 150.) Butler also points out that the no-hire agreement affects potentially tens of thousands of businesses in the United States that also sell sandwiches, as Jimmy John's employees are not allowed to go work at those other businesses either. (*Id.* at ¶ 154.)

II. LEGAL STANDARDS

A. *Federal Rule of Civil Procedure 12(b)(1)* & Article III Standing

A plaintiff must have standing under Article III of the United States Constitution in order to bring suit; otherwise, the Court does not have jurisdiction to hear the case. *Lujan v. Defs. of Wildlife, 504 U.S. 555, 559, 112 S. Ct. 2130, 119 L. Ed. 2d 351 (1992)*. For a plaintiff to state a case or controversy pursuant to Article III, he must "prove that he has suffered a concrete and particularized injury that is fairly traceable to the challenged conduct, and is likely to be redressed by a favorable judicial decision." *Remijas v. Neiman Marcus Grp., LLC, 794 F.3d 688, 691-92 (7th Cir. 2015)* (quoting *Hollingsworth v. Perry, 570 U.S. 693, 704, 133 S. Ct. 2652, 186 L. Ed. 2d 768 (2013))*. At the motion to dismiss stage, "general factual allegations of injury resulting **[**8]** from the defendant's conduct may suffice." *Lujan, 504 U.S. at 561*.

Antitrust cases have a more rigorous standing requirement. A plaintiff must show an "antitrust injury," which is an injury stemming from conduct that the antitrust laws are actually meant to prevent. *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*; *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 125, 89 S. Ct. 1562, 23 L. Ed. 2d 129 (1969)*. Antitrust injury can result from either the legal violation itself or anticompetitive actions made possible by the violation. *Kochert v. Greater Lafayette Health Servs., Inc., 463 F.3d 710, 716 (7th Cir. 2006)* (citing *Brunswick Corp., 429 U.S. at 489*).

With those ideas in mind, Federal Rule of Civil Procedure 12(b)(1) is the proper vehicle to challenge a plaintiff's standing. Silha v. ACT, Inc., 807 F.3d 169, 174 (7th Cir. 2015). That rule allows the Court to consider dismissing a case for lack of subject-matter jurisdiction; but when doing so, the Court treats all well-pleaded allegations in the complaint as true and draws all reasonable factual inferences **[*792]** in the plaintiff's favor. Bultasa Buddhist Temple of Chicago v. Nielsen, 878 F.3d 570, 573 (7th Cir. 2017). Conclusory allegations in the complaint, however, will not suffice—the allegations must be specific and give rise to a plausible right to relief. Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009) (quoting Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)); *see also* Silha, 807 F.3d 169 at 174 (holding that *Iqbal* and *Twombly* apply to Rule 12(b)(1)).

B. Federal Rule of Civil Procedure 12(b)(6)

Rule 12(b)(6) operates in a similar manner to Rule 12(b)(1). The rule allows the Court to dismiss a complaint when it fails "to state a claim upon which relief can be granted." FED. R. CIV. P. 12(b)(6). Just like with Rule 12(b)(1), the Court must construe "the complaint in the light most favorable to the plaintiff, **[**9]** accepting as true all well-pleaded facts alleged, and drawing all possible inferences in [the plaintiff's] favor." Hecker v. Deere & Co., 556 F.3d 575, 580 (7th Cir. 2009) (quoting Tamayo v. Blagojevich, 526 F.3d 1074, 1081 (7th Cir. 2008)). And as always, the complaint must provide specific allegations that give rise to a plausible right to relief—not one that is merely "conceivable" or "speculative." Twombly, 550 U.S. 544 at 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929; Iqbal, 556 U.S. at 678. Moreover, this heightened pleading standard becomes even more stringent in the antitrust context: Discovery in these cases can be incredibly expensive and thus "gives the plaintiff the opportunity to extort large settlements even where he does not have much of a case," especially when "bare allegations of conspiracy are almost impossible to defend against." Kendall v. Visa U.S.A., Inc., 518 F.3d 1042, 1047 (9th Cir. 2008).

C. The Sherman Act

Section 1 of the Sherman Act prohibits "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations." 15 U.S.C. § 1. To state a plausible violation of Section 1, a plaintiff must plead enough evidentiary facts to show a (1) "contract, combination, or conspiracy"; (2) by which those involved intend to unreasonably harm or restrain trade or commerce; and (3) which actually injures, harms, or restrains trade or commerce. 15 U.S.C. § 1; Denny's Marina, Inc. v. Renfro Productions, Inc., 8 F.3d 1217, 1220 (7th Cir. 1993). Section 4 of the Clayton Act—which provides **[**10]** that "any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws may sue...and shall recover threefold the damages by him sustained"—allows Butler to sue for a violation of the Sherman Act.

In order to determine whether the alleged collusion "unreasonably" restrains trade, a plaintiff must first distinguish whether the collusion is a horizontal agreement or a vertical agreement. Horizontal agreements—agreements made among direct competitors—are typically per se violations of Section 1 because they "always or almost always tend to restrict competition and decrease output." Broadcast Music, Inc. v. CBS, 441 U.S. 1, 19-20, 99 S. Ct. 1551, 60 L. Ed. 2d 1 (1979). Under the per se standard, an agreement is deemed unreasonable "without any inquiry into the market context in which the restraint operates." Agnew v. NCAA, 683 F.3d 328, 336 (7th Cir. 2012) (citing Nat'l Collegiate Athletic Ass'n v. Bd. of Regents of Univ. of Oklahoma, 468 U.S. 85, 100, 104 S. Ct. 2948, 82 L. Ed. 2d 70). Price fixing amongst **[*793]** horizontal competitors is the classic example of a per se violation of Section 1. *Id.*

Vertical agreements, however—those made up and down the supply chain—are generally subject to a more lenient "rule of reason" analysis, which focuses on "the facts peculiar to the business, the history of the restraint, and the reasons why it was imposed." National Society of Professional Engineers v. United States, 435 U.S. 679, 692, 98 S. Ct. 1355, 55 L. Ed. 2d 637 (1978). A plaintiff has a much higher burden here: He must show the existence **[**11]** of anticompetitive effects in the relevant product and geographical markets, in which the defendant must have market power. Agnew, 683 F.3d at 335-36 (citing Reifert v. S. Cent. Wis. MLS Corp., 450 F.3d 312, 321 (7th Cir. 2006).

The burden then shifts to the defendant to show procompetitive justifications for the restraint. *Id.* (citing Areeda, ***Antitrust Law***, ¶ 1507b, at 397 (1986)).

There is also a third, albeit rarely-used test: The quick-look approach. Courts will use this test where the per se framework is inappropriate—such as when the restraint is a vertical agreement—but where the anticompetitive effects of the agreement are so obvious, even "an observer with even a rudimentary understanding of economics could conclude that the arrangements in question would have an anticompetitive effect on customers and markets." *California Dental Ass'n v. F.T.C., 526 U.S. 756, 770, 119 S. Ct. 1604, 143 L. Ed. 2d 935 (1999)*. The quick-look approach may also be appropriate in scenarios where the per se rule would usually apply, but "a certain degree of cooperation is necessary if the [product at issue] is to be preserved." *Agnew, 683 F.3d at 636*. (citing *Bd. of Regents, 468 U.S. at 117*; Hovenkamp, ***Antitrust Law***, ¶ 1911c, at 274 (1998)). Under the quick-look approach, if the plaintiff can demonstrate that there are no legitimate justifications for the anticompetitive behavior, then the plaintiff is not required to explain the relevant **[**12]** markets and provide evidence of market power. *Agnew, 683 F.3d at 336* (citing *Bd. of Regents, 468 U.S. at 109*; *Chicago Prof'l Sports Ltd. P'ship v. Nat'l Basketball Ass'n, 961 F.2d 667, 674 (7th Cir. 1992))*. But if the defendant can then show that there are pro-competitive justifications for the restraint, then the burden shifts back to the plaintiff and a full rule-of-reason analysis may be necessary. *Id.* (citing *Chicago Professional Sports Ltd. Pshp. v. NBA, 95 F.3d 593, 600 (7th Cir. 1996))*.

III. ANALYSIS

A. Standing

To begin, Jimmy John's argument about standing is a non-starter. They first argue that Butler has not alleged an injury-in-fact because he "does not allege a single fact that demonstrates any connection between the challenged provision and any injury he claims to have suffered, much less facts that could ever establish causation," but that is far from the truth. Butler explicitly stated in his complaint that (1) his store required him to sign to employee non-competition agreement, which the franchisees force on their employees in order to enforce the no-hire provision between stores; (2) his store reduced his hours to about four per week, despite Butler's protests; and (3) because of the non-competition agreement—which is in place because of the no-hire provision—Butler could not transfer to another Jimmy John's store or even another sandwich shop in his area. (Compl. at ¶¶ 145-49.) And as described **[**13]** above, the third-party beneficiary provision would allow Butler's store to bring an action against any Jimmy John's store that Butler would have transferred to anyways.

[*794] Butler then describes in pages of extensive detail how these provisions suppress employee wages and mobility. For example, one paragraph of the complaint quotes the Attorney General of Illinois in a related case against Jimmy John's, where she stated: "By locking low-wage workers into their jobs and prohibiting them from seeking better paying jobs elsewhere, the companies have no reason to increase their wages or benefits." (*Id.* at ¶ 103.) Another paragraph explains that "[a] no-hire agreement like the agreement among Jimmy John's franchisees reduces workers' outside options and attempts to lower employee quit rate, thereby increasing the share of net-returns captured by employers. Further, a franchise-wide no-hire agreement increases the specificity of human capital investment, as training that is productive throughout the franchise chain can be used only by a single franchisee pursuant to the agreement." (*Id.* at ¶ 144.) And perhaps the best example is this paragraph:

> By adhering to the no-hire agreement, franchisees **[**14]** artificially restrict their own ability to hire other employees in a manner that is inconsistent with their own unilateral economic interests. By acting in concert, however, they also artificially protect themselves from having their own employees poached by other franchises that see additional value in those employees, such as the employees' training, experience and/or work ethic. This allows franchisees to retain their best employees without having to pay market wages to these employees or to compete in the marketplace relative to working conditions and promotion opportunities.

(*Id.* at ¶ 115.)

Just last year, the Seventh Circuit said that "concrete financial injuries, namely deprivation of wages...and financial injuries are prototypical of injuries for the purposes of Article III standing." *Milwaukee Police Ass'n v. Flynn, 863 F.3d 636, 639 (7th Cir. 2017)*, *reh'g denied* (Aug. 14, 2017) (citing *United States v. Kerner, 895 F.2d 1159, 1162 (7th Cir. 1990))*. And pursuant to the *Rule 12(b)(1)* standard, this Court treats all well-pleaded allegations in the complaint as true and draws all reasonable factual inferences in the Butler's favor. *Bultasa Buddhist Temple of Chicago, 878 F.3d at 573*. Accordingly, there should be no dispute at this stage that Butler has Article III standing in this case.

Jimmy John's also argues that Butler does not have antitrust standing because he **[**15]** quit because of "scheduling issues," rather than because the no-hire provision "precluded him from seeking employment from a third-party employer." (Defs.'s Mot. to Dismiss 7, ECF No. 28-1) (quoting *Eichorn v. AT & T Corp., 248 F.3d 131, 142 (3d Cir. 2001))*. But that is an impermissibly narrow reading of the complaint. As noted above, Butler described the allegations in this case in great detail, including how the no-hire provision led to the employee non-competition agreements and how those agreements harm the labor market for Butler and all other current and former Jimmy John's employees. And "[i]t is well settled that an agreement among employers to control a material term of employment harms competition in the labor market at issue." *Banks v. Nat'l Collegiate Athletic Ass'n, 977 F.2d 1081, 1095 (7th Cir. 1992)* (citing *Radovich v. National Football League, 352 U.S. 445, 77 S. Ct. 390, 1 L. Ed. 2d 456 (1957)*; *Nichols v. Spencer Int'l Press, Inc., 371 F.2d 332 (7th Cir. 1967)*) (further internal citations omitted). Moreover, antitrust laws are meant protect the labor market—among other markets—because "employer conspiracies controlling employment terms...tamper with the employment market and thereby **[*795]** impair the opportunities of those who sell their services there." *Eichorn, 248 F.3d at 141 (3d Cir. 2001)* (holding that employees have standing to litigate a *Section 1* claim when a no-hire agreement impeded their abilities to sell their labor to three other companies in the market) (quoting Phillip Areeda & Herbert Hovenkamp, **[**16]** ***Antitrust Law*** ¶ 377c (rev. ed. 1995)). So just like with the Article III issue, there should be no real dispute at this stage that Butler has properly alleged an antitrust injury.

B. The Sherman Act Claim

The next issue is whether Butler has stated a plausible-enough claim under the Sherman Act to survive a *Rule 12(b)(6)* motion. This question is much more complex than the standing issue. The first puzzle is how to define the agreements in question: Are they vertical, horizontal, or a combination of the two? Jimmy John's argues that the no-hire agreements are purely vertical: Jimmy John's corporate enters into franchise agreements—which contain the no-hire provision—directly with the franchisees, while the franchisees do not enter into any explicit agreements with each other. Butler, on the other hand, argues that he has pled a strictly horizontal agreement between the franchisees: His idea is that Jimmy John's headquarters orchestrated an agreement amongst the franchisees not to hire each other's employees, and while the contract in question may have been vertical, the *effects* are felt strictly at the horizontal level: Between the franchisees, not between any given franchisee and Jimmy John's corporate. **[**17]** (*See, e.g.*, Compl. ¶¶ 9, 109, 154, 167, 179, ECF No. 1.) Those horizontal effects are even more apparent, according to Butler, given the third-party beneficiary provision that allows franchisees to enforce the no-hire provision against other franchisees.

At this early stage, Butler has carried his burden and stated a plausible violation pursuant to his orchestration theory. Some circuits refer to this as a "hub-and-spoke" conspiracy, where the "hub" firm enters into a collection of vertical agreements with other firms—the "spokes"—and those spokes then enter into a collection of horizontal agreements that make up the "wheel." *In re Musical Instruments & Equip. Antitrust Litig., 798 F.3d 1186, 1192 (9th Cir. 2015)*. The idea here is that since the hub orchestrated the horizontal wheel, it can be held per se liable for that horizontal agreement—even though the hub did not enter into a horizontal agreement itself.

The Seventh Circuit has described that same pattern without explicitly using the phrase "hub-and-spoke." *See generally* *Toys "R" Us, Inc. v. F.T.C., 221 F.3d 928 (7th Cir. 2000)*. In *Toys "R" Us*, a dominant toy retailer—unsurprisingly, Toys "R" Us—was afraid of growing competition from discount clubs like Costco. *Id. at 932*. So Toys "R" Us flexed its muscles and basically forced a collection of vertical agreements on ten toy **[**18]** manufacturers—

including Hasbro and Mattel—that limited the ability of those manufacturers to sell toys to discount clubs, with the goal of cutting off the supply of toys to discount clubs over time. *Id. at 932-34*. The manufactures signed the agreements, but only on the condition that their competing manufacturers were doing the same thing—otherwise, those rogue competitors would become a dominant supplier of the discount clubs and climb in market share. *Id. at 932, 936*. So the Toys "R" Us President of Merchandising communicated this message to each toy manufacturer, and those manufacturers ended up signing the vertical agreements with that understanding—which resulted in a significant boycott of discount clubs by toy manufacturers. *Id. at 932-33*.

[*796] Following a Federal Trade Commission opinion on the matter, the Seventh Circuit was faced with determining whether Toys "R" Us could be held per se liable for a horizontal boycott by the toy manufacturers against the discount clubs. Toys "R" Us argued that their agreements with the toy manufacturers were simply a collection of vertical agreements, so a rule of reason analysis would govern. *Id. at 935*. But the Seventh Circuit disagreed: Since there was substantial evidence that the toy companies **[**19]** were afraid of Toys "R" Us and would only agree to the behemoth's demands if other competing manufacturers did the same thing—and then because Toys "R" Us went out, communicated those fears, and ensured that each competing manufacturer signed the agreement—Toys "R" Us was per se liable for facilitating the horizontal boycott of the discount clubs. *Id. at 936-37*.

The scheme in this case is similar to the scheme in *Toys "R" Us*. The franchisees are independently-owned horizontal competitors, just like the toy manufacturers. Jimmy John's corporate enters into a franchise agreement with each franchisee, which contains the no-hire provision. The franchisees tacitly agree amongst each other to enforce the no-hire provision through austere enforcement of the employee non-compete contracts. And most damningly, **the franchise agreements give the franchisees a contractual right to enforce the no-hire agreements directly against each other through the third-party beneficiary provision**. That is a horizontal agreement. *See United States v. Apple, Inc., 791 F.3d 290, 297 (2d Cir. 2015)* (holding that when determining whether an agreement is horizontal or vertical, courts should focus on the effects of the restraint rather than the characters who imposed it), *cert. denied*, **[**20]** *136 S. Ct. 1376, 194 L. Ed. 2d 360 (Mar. 7, 2016)*. And the effect of the scheme is two-fold: (1) a horizontal boycott of certain employees; and (2) a horizontal price-fixing scheme to suppress the price of labor for said employees—just as Butler has pled. *See United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 222-23, 60 S. Ct. 811, 84 L. Ed. 1129 (1940)* ("Under the Sherman Act[,] a combination formed for the purpose and with the effect of raising, depressing, fixing, pegging, or stabilizing the price of a commodity in interstate or foreign commerce is illegal per se," even where the fixing is not "fixed in the sense that [it was] uniform and inflexible...."); *F.T.C. v. Superior Court Trial Lawyers Ass'n, 493 U.S. 411, 422, 110 S. Ct. 768, 107 L. Ed. 2d 851 (1990)* (horizontal boycott among competing firms aimed at influencing pay rates is per se illegal); *Todd v. Exxon, 275 F.3d 191, 198 (2d Cir. 2001)* (wage-fixing by purchasers of labor can be per se illegal).

But there is one massive elephant in the room that distinguishes this case from *Toys "R" Us*. All of the firms in this case deal in the same brand: Jimmy John's sandwiches. That is quite different from Toys "R" Us going to manufacturers like Hasbro and Mattel in order to injure Costco, because as Jimmy John's points out, ***antitrust law*** is more concerned with *inter*brand restrains, not *intra*brand restraints. *See, e.g., Cont'l T. V., Inc. v. GTE Sylvania Inc., 433 U.S. 36, 54-56, 58, 97 S. Ct. 2549, 53 L. Ed. 2d 568 (1977)* (holding that an agreement restricting trade within one brand could not be per se illegal because the **[**21]** agreement achieved certain efficiencies within that brand, stimulating competition against competing brands in the market as a whole). But to complicate matters more, Butler has pled in the complaint that Jimmy John's franchisees enjoy very high levels of independence. The franchise agreements state that a particular franchisee may be subject to competition from other **[*797]** franchisees, and that franchisees are not agents, joint venture partners, or employees of the other "for any purpose." (Compl. at ¶ 51.) This level of independence may be much more than your typical franchise business may enjoy. And at this stage, the Court must accept all well-pleaded allegations in the complaint as true.

This dichotomy puts these proceedings in murky waters: Should the per se rule apply to a horizontal price fixing and group boycott scheme, even though the horizontal agreement is amongst firms dealing in the same brand? Butler recognizes this distinction, considering he pleads in the alternative that the Court should apply the quick-look rule rather than the per se rule. The Seventh Circuit has instructed that the quick-look rule applies in scenarios where the per se rule would usually apply, but "a **[**22]** certain degree of cooperation is necessary if the [product at issue] is to be preserved." *Agnew, 683 F.3d at 636*. (citing *Bd. of Regents, 468 U.S. at 117*; Hovenkamp, ***Antitrust Law***, ¶ 1911c, at 274 (1998). This case could prove to be a hornbook example of that rule: Although the franchisees are dealing in the same brand, they are still competitors, and anyone with a rudimentary understanding of economics would understand that the no-hire agreements have an anticompetitive effect on the labor market targeted by those firms. *California Dental Ass'n, 526 U.S. at 770*. And if the quick-look approach applies, Butler would not be required to go through the industry and market power analysis, and Jimmy John's would be able to argue the procompetitive intrabrand justifications for the agreements.

Ultimately, however, the Court cannot decide at this early stage in the proceedings which rule will apply. If the evidence in this case shows that the franchisees are truly as independent as Butler pleads, this case will likely result in a quick look analysis. If the evidence of franchisee independence is Herculean, then the per se rule might even apply. And if the evidence of franchisee independence is weak, or if Jimmy John's carries its burden under the quick look approach, then the rule **[**23]** of reason may rear its head and burn this case to the ground. But that is a matter for a later stage in these proceedings. At this point, for the foregoing reasons, Butler has stated a plausible claim for relief under *Section 1* of the Sherman Act.

C. The State Law Claims

The state law claims can be quickly disposed of. Jimmy John's first argues that the Illinois Antitrust Act claim fails because Butler pled that Jimmy John's violated the Act by harming competition "in the market for employee labor among Jimmy John's restaurants," even though the Illinois Antitrust Act expressly states that it does not apply to "labor which is performed by natural persons as employees of others." *740 ILCS 10/4*. Jimmy John's is correct: The Seventh Circuit has already said that the Illinois Antitrust Act specifically excludes claims "relate[d] to an alleged market for labor services." *O'Regan v. Arbitration Forums, Inc., 121 F.3d 1060, 1066 (7th Cir. 1997)*. That is exactly what Butler pleads, and thus his claim is barred. (*See* Compl. ¶¶ 178, 180.)

Second, Jimmy John's argues that Butler's claim under the Illinois Consumer Fraud and Deceptive Business Practices Act fails because (1) Butler has not alleged any conduct that deceives consumers; and (2) Butler cannot convert the statute into an enforcement **[**24]** mechanism for an antitrust claim that is already uncognizable under the Illinois Antitrust Act. Both of these arguments are correct. First of all, Butler and his proposed class are suppliers of labor—not consumers. *See, e.g., See* **[*798]** *Hess v. Kanoski & Assocs., 668 F.3d 446, 454 (7th Cir. 2012)*. Moreover, the Illinois Supreme Court has instructed that plaintiffs cannot use the Illinois Consumer Fraud and Deceptive Business Practices Act to get around the fact that their theory does not fly under the Illinois Antitrust Act: That "gamesmanship" would be "incongruous" with the state legislature's intent. *Laughlin v. Evanston Hosp., 133 Ill. 2d 374, 390-91, 550 N.E.2d 986, 140 Ill. Dec. 861 (1990)*; *see also* *Gaebler v. N.M. Potash Corp., 285 Ill. App. 3d 542, 544, 676 N.E.2d 228, 221 Ill. Dec. 707 (1996)*. Accordingly, this claim is barred as well.

There is one more matter to address: Butler asked the Court for leave to amend if the Court found any aspect of his complaint to be deficient. *See* *Foman v. Davis, 371 U.S. 178, 83 S. Ct. 227, 9 L. Ed. 2d 222 (1962)*. Both of Butler's state-law claims are deficient. Although the Court is dubious as to whether Butler will be able to plead around the issues in the case and save those state-law claims, the Court will nevertheless grant Butler 30 days to file an amended complaint—if he so chooses.

IV. **CONCLUSION**

For the foregoing reasons, the Court **GRANTS IN PART** and **DENIES IN PART** Jimmy John's motion to dismiss. (ECF No. 28.) The Court **DISMISSES WITHOUT PREJUIDCE** the **[**25]** state law claims -- Counts II and III. The Sherman Act claim will proceed.

IT IS SO ORDERED.

DATED JULY 31, 2018.

Opinion

OPINION AND ORDER GRANTING DEFENDANT'S RENEWED MOTION TO DISMISS (Dkt. 14)

I. Introduction

Saginaw County passed an ordinance in 2016 requiring anyone seeking to provide ambulance services in the county to first obtain the approval of the County Board of Commissioners. One ambulance company—licensed to provide ambulance services by the State of Michigan—went ahead and operated in the county without the Board's approval. Now the County ("Plaintiff" or "Saginaw") is suing that company, STAT Emergency Medical Services ("STAT" or "Defendant"), seeking a declaratory judgment that its ordinance is legal under state law and that enforcing it against Defendant would not violate the federal Sherman Antitrust Act (the "Sherman Act"). Saginaw County is a Michigan county organized as a municipal corporation under Michigan law. STAT is a forprofit **[*2]** corporation that operates ambulance services throughout the state of Michigan, including within Saginaw County. STAT moved to dismiss the County's complaint. The Court heard oral argument on the motion to dismiss on May 2, 2018. For the reasons set out in detail below, that motion will be **GRANTED**.

II. Background

At the heart of this dispute lies the question: through what means can Saginaw County prevent a company from providing emergency services within its borders when that company has obtained authorization from the State of Michigan to provide such services throughout the State as well as medical oversight from the Saginaw County Medical Control Authority?

Plaintiff alleges that as early as 2009, it established a primary ambulance provider system as reflected through contracts with Mobile Medical Response, Inc. ("MMR"), another ambulance company. *See* Dkt. 10, Pg. IDs 216-18. Plaintiff's Emergency Services Communication Ordinance (the "Ordinance"), Dkt. 1, Ex. H, "enforces the macro-ambulance system established by the County through the primary services contract with MMR and the 911 plan." Dkt. 10, Pg. ID 219. Plaintiff maintains that its exclusive ambulance service contract with MMR **[*3]** was most recently renewed for another five-year term in 2013. *Id; see also* Dkt. 1, Ex. C (2013 Renewal). The contract with MMR provides in relevant part that, "The COUNTY hereby designates [MMR] as the sole provider of mobile basic and advanced life support ambulance services for COUNTY during the term of this Agreement." Dkt. 1, Exhibit C, Pg. ID 29. According to Plaintiff, the County held public meetings prior to entering into the primary ambulance provider contract with MMR in 2009, and also before renewing the contract in 2013. Dkt. 10, Pg. ID 218. While STAT did not appear at the public meeting in 2009, Plaintiff alleges that STAT did appear at meetings held in September and October of 2013. *See id.*

According to Plaintiff, at the September 2013 meeting, counsel for STAT contended that the MMR contract would violate the *Sherman Antitrust Act* and the *Due Process clause of the 14th Amendment to the United States Constitution*. *Id.* Counsel for STAT also said it was prepared to initiate legal action against the County if it proceeded with the renewal, according to the Amended Complaint. Dkt. 10, Pg. ID 218. At another meeting in October 2013, Plaintiff claims that STAT's counsel and CEO appeared, "repeat[ing] their threats of Sherman Antitrust and *14th Amendment* Due process **[*4]** claims and resolve to take legal action if the contract were renewed." Dkt. 10, Pg. ID 218. The County ultimately approved the renewal of the MMR contract. *Id.*; *See* Dkt. 1, Ex. C. Plaintiff maintains that STAT is providing ambulatory services in Saginaw County in contravention of Plaintiff's contract with MMR and its Ordinance.

Plaintiff adopted the Ordinance on April 19, 2016, at least in part to protect its primary services contract with MMR. Dkt. 1, Ex. H, Pg. IDs 89-94. Plaintiff alleges that the Ordinance works to enforce the system established by the County through the 911 Plan, yet the record suggests the referenced 911 Plan was adopted by the County on the same day as the Ordinance itself—April 19, 2016. Dkt. 1, Ex. G. This lawsuit primarily concerns Section 5.5 of the Ordinance, which provides that "No Person shall request, operate or provide ambulance service within the County that has not been approved by the Board through contract or resolution." Dkt. 1 Exhibit H, Pg. ID 94.

At the hearing on Defendant's motion to dismiss, both parties acknowledged that STAT is currently providing emergency services within the County in contravention of the Ordinance. STAT maintains that the Ordinance **[*5]** as written requires that it be licensed by a body which has no authority to license and is therefore not authorized or enforceable, as it conflicts with Michigan law. *See, e.g.*, Dkt. 17 Ex. A, Pg. ID 496.

III. Legal Standards

Federal Rule of Civil Procedure 12(b)(6) allows the court to make an assessment as to whether the plaintiff has stated a claim upon which relief may be granted. *See* *Fed. R. Civ. P. 12(b)(6)*. "*Federal Rule of Civil Procedure*

8(a)(2) requires only 'a short and plain statement of the claim showing that the pleader is entitled to relief', in order to 'give the defendant fair notice of what the . . . claim is and the grounds upon which it rests'." *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)* (internal citations omitted). While a complaint need not contain "detailed" factual allegations, its "factual allegations must be enough to raise a right to relief above the speculative level on the assumption that all of the allegations in the complaint are true." *Ass'n of Cleveland Fire Fighters v. City of Cleveland, 502 F.3d 545, 548 (6th Cir. 2007)* (quoting *Twombly, 550 U.S. at 555*).

Challenges to subject-matter jurisdiction under *Federal Rule of Civil Procedure 12(b)(1)* "come in two varieties: a facial attack or a factual attack." *Gentek Bldg. Prods., Inc. v. Sherwin—Williams Co., 491 F.3d 320, 330 (6th Cir. 2007)*. Under a facial attack, all of the allegations in the complaint must be taken as true, much as with a *Rule 12(b)(6)* motion. *Id.*; *see also* *Lovely v. United States, 570 F.3d 778, 781 (6th Cir. 2009)*, *cert. denied*, *558 U.S. 1111, 130 S. Ct. 1054, 175 L. Ed. 2d 883 (2010)*. A factual attack, on the other hand, is not a challenge to the **[*6]** sufficiency of the pleadings' allegations, but a challenge to the factual existence of subject matter jurisdiction. On such a motion, "no presumptive truthfulness applies to the factual allegations" and "the court is free to weigh the evidence and satisfy itself as to the existence of its power to hear the case." *United States v. Ritchie, 15 F.3d 592, 598 (6th Cir. 1994)*; *see also* 2 James Wm. Moore, *Moore's Federal Practice § 12.30[4]* (3d ed. 2000) ("[W]hen a court reviews a complaint under a factual attack, the allegations have no presumptive truthfulness, and the court that must weigh the evidence has discretion to allow affidavits, documents, and even a limited evidentiary hearing to resolve disputed jurisdictional facts.").

IV. Analysis

Federal courts are not courts of general jurisdiction; rather, they have only the power that is authorized by Article III of the United States Constitution and statutes enacted by Congress. A plaintiff must have "constitutional standing" under Article III as well as statutory standing pursuant to a congressional grant in order to avail itself of a federal court's jurisdiction and power to adjudicate a particular case. These two sources together govern a federal court's subject matter jurisdiction. *See, e.g.,* *Bender v. Williamsport Area School Dist., 475 U.S. 534, 541, 106 S. Ct. 1326, 89 L. Ed. 2d 501 (1986)*.

Article III of the United States Constitution prescribes that federal courts may exercise jurisdiction only where an "actual **[*7]** case or controversy" exists. *See* *U.S. Const. art. III, § 2*. That federal courts are confined by Article III to adjudicate only actual "cases" and "controversies" represents a fundamental limit on the federal judiciary's power. Thus, "the threshold question in every federal case is whether the court has the judicial power to entertain the suit." *Parsons v. U.S. Dep't of Justice, 801 F.3d 701, 709 (6th Cir. 2015)* (quoting *Nat'l Rifle Ass'n of Am. v. Magaw, 132 F.3d 272, 279 (6th Cir.1997))*. Under Article III, courts are required to "avoid issuing advisory opinions based upon hypothetical situations." *Briggs v. Ohio Elections Comm'n, 61 F.3d 487, 493 (6th Cir. 1995)*. The case or controversy requirement works to ensure federal courts do not render advisory opinions or consider hypothetical or abstract questions.

Courts have explained the case or controversy requirement through a series of "justiciability doctrines," such as the standing doctrine. *See* *Nat'l Rifle Ass'n of Am. v. Magaw, 132 F.3d 272, 279 (6th Cir. 1997)*. Standing concerns a plaintiff's ability to sue, requiring that a litigant must have suffered an injury-in-fact that is fairly traceable to the defendant's allegedly unlawful conduct and likely to be redressed by the requested relief. *Lujan v. Defenders of Wildlife, 504 U.S. 555, 560-61, 112 S. Ct. 2130, 119 L. Ed. 2d 351 (1992)*.

Another doctrine which "cluster[s] about Article III" is ripeness. *Peoples Rights Org., Inc. v. City of Columbus, 152 F.3d 522, 527 (6th Cir. 1998)* (citing *Vander Jagt v. O'Neill, 699 F.2d 1166, 1178-79, 226 U.S. App. D.C. 14 (D.C. Cir. 1982)* (Bork, J., concurring.). Where standing concerns a plaintiff's *ability* to sue, ripeness focuses on the *timing* of the action. The ripeness doctrine buttresses **[*8]** Article III's case and controversy requirement by "prevent[ing] the courts, through premature adjudication, from entangling themselves in abstract disagreements." *Nat'l Rifle Ass'n, 132 F.3d at 284* (citing *Thomas v. Union Carbide Agric. Prod. Co., 473 U.S. 568, 580, 105 S. Ct. 3325, 87 L. Ed. 2d 409 (1985))*. Thus, the ripeness doctrine prevents courts from handling cases that have not yet matured into full-blown disputes, thereby ensuring federal courts do not issue opinions advising what the law would be upon a hypothetical set of facts.

In this action, Plaintiff seeks relief pursuant to the *Declaratory Judgment Act (the "Act")*. *See* Dkt. 10. The Act provides in relevant part: "[i]n a case of actual controversy within its jurisdiction . . . any court of the United States . . . may declare the rights and other legal relations of any interested party seeking such declaration, whether or not further relief is or could be sought." *28 U.S.C. § 2201(a)*. The Act's "actual controversy" requirement is coextensive with Article III's constitutional limits, and necessarily includes the standing and ripeness doctrines from Article III as well. *See* *Fieger v. Mich. Sup. Ct., 553 F.3d 955, 961 (6th Cir. 2009)*. Thus, the Act's "case of actual controversy" requirement refers to the type of cases and controversies that are justiciable under Article III of the U.S. Constitution. *See* *MedImmune, Inc. v. Genentech, Inc., 549 U.S. 118, 126, 127 S. Ct. 764, 166 L. Ed. 2d 604 (2007)* (citing *Aetna Life Ins. v. Haworth, 300 U.S. 227, 240, 57 S. Ct. 461, 81 L. Ed. 617 (1937))*.

To determine whether parties have an actual case or controversy **[*9]** as required under the Act (and Article III), courts must ask whether the facts alleged, under all the circumstances, show that there is a substantial controversy between parties having adverse legal interests, of sufficient immediacy and reality to warrant the issuance of a declaratory judgment. *See* *Commodities Export Co. v. Detroit Int'l Bridge Co., 695 F.3d 518, 525 (6th Cir. 2012)*; *MedImmune, 549 U.S. at 127*. Framed another way, the dispute between the parties must be "definite and concrete, touching on the legal relations of parties having adverse legal interests and be real and substantial and admit of specific relief through a decree of conclusive character, as distinguished from an opinion advising what the law would be upon a hypothetical set of facts." *See* *Kreinberg v. Dow Chemical Co., 2007 U.S. Dist. LEXIS 70359, 2007 WL 2782060 at *9 (E.D. Mich. Sept. 24, 2007)* (citing *Medimmune, Inc., 549 U.S. at 127*).

Critically, the Act only provides a procedural mechanism; it does not independently confer a federal court with subject matter jurisdiction. *See* *Skelly Oil Co. v. Phillips Petroleum, 339 U.S. 667, 671-72, 70 S. Ct. 876, 94 L. Ed. 1194 (1950)*. Thus, an action can be maintained under the Declaratory Judgment Act only if a plaintiff has an independent basis to invoke a federal court's subject matter jurisdiction. *Michigan Southern R.R. Co. v. Branch & St. Joseph Counties Rail Users Ass'n., Inc., 287 F.3d 568, 575 (6th Cir. 2002)* ("It is well-settled that the Declaratory Judgment Act cannot serve as an independent basis for federal subject matter jurisdiction.") (internal citations omitted). In this action, Plaintiff alleges federal **[*10]** question jurisdiction, federal antitrust jurisdiction, and supplemental jurisdiction under *28 U.S.C. §§ 1331*, *1337*, and *1367*, respectively.

The Court notes that Plaintiff's case presents somewhat of an atypical posture for a declaratory judgment action. Typically, a plaintiff that seeks declaratory relief surrounding the enforceability of a particular law or statute uses the declaratory judgment act as a shield, in an attempt to protect itself from injuries it has or will suffer if the challenged law is enforced against it.[1] In the present case, however, Plaintiff maintains that: 1) it has created a regulatory regime pursuant to the powers given to it by the Michigan legislature regarding the provision of emergency services within its County, 2) Defendant is engaging in activities in violation of that regime, and 3) Plaintiff has been harmed by Defendant's noncompliance. *See generally*, Dkt. 10. Plaintiff's Amended Complaint requests this court to:

1. Declare that the County's 911 Plan and primary services ambulance contract [with MMR] are legal and enforceable against STAT's unauthorized ambulance services originating within the County;

---

[1] For instance *Nat'l Rifle Ass'n* involved the pre-enforcement challenge to the constitutionality of ***Title XI of the Violent Crime Control and Law Enforcement Act of 1994, Pub.L. No. 103-22, 108 Stat. 1796 (1994)*** (the "Crime Control Act"). *Nat'l Rifle Ass'n, 132 F.3d at 272*. The Crime Control Act prohibited for a period of ten years the manufacture, transfer, or possession of semi-automatic weapons and the transfer or possession of large capacity ammunition feeding devices. *Id. at 277*. One group of Plaintiffs, manufacturers and dealers of firearms, alleged that the passage of the Crime Control Act had a significant impact on the way they conducted their businesses and that compliance with the legislation caused them immediate economic harm. The Sixth Circuit concluded that the declaratory judgment act provided a procedural mechanism for these Plaintiffs to bring their claim because "the federal court is not asked to decide a case involving conjectural or hypothetical injury, but one that creates substantial economic hardship, which is direct and immediate, and will be compounded by a refusal of the court to intervene prior to enforcement of the statute." *Nat'l Rifle Ass'n, 132 F.3d at 287*.

> 2. Declare that the Ordinance is legal and enforceable against STAT's unauthorized **[*11]** ambulance services originating within the County, and that STAT has violated that Ordinance;
>
> 3. Declare that the enforceability of the County's 911 Plan or Ordinance against STAT's unauthorized ambulance services originating within the County does not violate the Sherman Anti-Trust Act or the *Due Process clause of the 14th Amendment*; and
> 4. Enjoin STAT from providing ambulance services originating within the county without the authorization of the County Board of Commissioners through contract or resolution.

See Dkt 10, Pg. IDs 222-23.

Despite the atypical nature of Plaintiff's action, the Act nevertheless provides a mechanism for the pre-enforcement review of a statute; and, while the Act does not on its face differentiate between its use as a "sword" versus a "shield," Plaintiff faces different hurdles in satisfying the necessary Article III and statutory standing requirements to establish subject matter jurisdiction. The Court begins by addressing its power under Article III to hear this case.

A. Plaintiff's Alleged Injuries in Fact

The Court begins its analysis with "[p]erhaps the most important" of the justiciability doctrines: whether Plaintiff has standing to invoke the jurisdiction of the federal Courts. **[*12]** *See Nat'l Rifle Ass'n, 132 F.3d at 279*. Standing concerns a plaintiff's ability to sue, and turns on whether he or she has suffered a concrete injury inflicted by a defendant. The Supreme Court has enumerated the following elements necessary to establish standing:

> First, Plaintiff must have suffered an injury in fact—an invasion of a legally-protected interest which is (a) concrete and particularized; and (b) actual or imminent, not conjectural or hypothetical. Second, there must be a causal connection between the injury and the conduct complained of—the injury has to be fairly traceable to the challenged action of the defendant, and not the result of the independent action of some third party not before the court. Third, it must be likely, as opposed to merely speculative, that the injury will be redressed by a favorable decision.

Lujan v. Defenders of Wildlife, 504 U.S. 555, 560-61, 112 S. Ct. 2130, 119 L. Ed. 2d 351 (1992).

Plaintiff's Amended Complaint alleges that STAT's provision of emergency services in Saginaw County without authorization from the Board of Commissioners has injured Plaintiff because STAT's behavior violates the Plaintiff's 911 Plan and Ordinance, undermines the primary services contract it has with MMR, and "places public safety in jeopardy because the 911 Communications System is unaware **[*13]** of STAT's EMS activities and cannot coordinate other emergency services as well as hospital communications with first responders, including EMS providers." *See* Dkt. 10, Pg. ID 220-21. Plaintiff maintains its emergency services regime was created pursuant to the power conferred on it by Michigan law, and seeks declarations from this Court stating as much. *See id.* at 222-23. However, Plaintiff does not only seek declaratory relief concerning the validity of its emergency services regime under Michigan law. Plaintiff also requests declarations that the enforcement of the County's emergency services regime against STAT's alleged unauthorized ambulance services originating within the County would not violate the Sherman Act or the *Due Process Clause of the 14th Amendment to the United States Constitution*. *See* Dkt. 10, Pg. ID 222. As to this request for declaratory relief, however, Plaintiff does not allege any injuries arising from a failure to declare whether the enforcement of the Ordinance violates the *Due Process Clause of the 14th Amendment* or the Sherman Act.

Courts recognize that declaratory judgments are often sought before a completed injury-in-fact has occurred; this does not prevent a plaintiff from suing under the Declaratory Judgment Act. *Nat'l Rifle Ass'n, 132 F.3d at 279*. However, a federal court's power under Article III—and thus **[*14]** its subject matter jurisdiction to hear a case—is still limited to the resolution of "actual controversies" even when no injury-infact has yet occurred. *See id.* Thus, Plaintiff must show that the parties have an actual controversy as to its Sherman Act and *Due Process Clause* claims to establish that this Court has subject matter jurisdiction over those claims.

The Supreme Court has explained that while the difference between an abstract question and a case or controversy is one of degree, not discernable by any precise test, the basic inquiry is whether "the conflicting contentions of the parties . . . present a real, substantial controversy between the parties having adverse legal interests, a dispute definite and concrete, not hypothetical or abstract." *Babbitt v. United Farm Workers Nat'l Union, 442 U.S. 289, 297-98, 99 S. Ct. 2301, 60 L. Ed. 2d 895 (1979)*. Furthermore, to determine whether a plaintiff has *standing* to adjudicate an "actual controversy" requisite for relief under the Declaratory Judgment Act, a court must ask whether the parties have "adverse legal interests, of sufficient immediacy and reality to warrant the issuance of a declaratory judgment even though the injury-in-fact has not yet been completed." *See, e.g., Nat'l Rifle Ass'n, 132 F.3d at 280* (internal citations omitted). These principles guide this Court's analysis **[*15]** as to whether, with respect to Plaintiff's claims for relief under the Sherman Act and the *Due Process Clause of the 14th Amendment*, Plaintiff has sufficiently alleged an actual controversy.

As will be explained, the Court finds that Plaintiff has failed to satisfy its burden of establishing that the parties have an actual controversy surrounding Plaintiff's Sherman Act Claim, that Plaintiff's alleged Sherman Act claim is ripe for adjudication, and that Plaintiff has standing to pursue its alleged claim for relief under the *Due Process Clause of the 14th Amendment*. Accordingly, the Court cannot exercise jurisdiction over Plaintiff's case because all of Plaintiff's claims that could support this Court's subject matter jurisdiction must be dismissed pursuant to *Fed. R. Civ. P. 12(b)(1)*.

B. Plaintiff's Claim for Relief Pursuant to the Sherman Act

1. Whether An Actual Controversy Exists as to Plaintiff's Sherman Act Claim in the Absence of an Alleged Injury

Plaintiff makes three factual allegations in support of its argument that the parties have an actual controversy under the Sherman Act in this case:

a) at two meetings in 2013, STAT allegedly threatened federal litigation against Plaintiff for violation of antitrust laws;

b) on August 2, 2016, STAT's legal counsel sent a letter to MMR's legal **[*16]** counsel which Plaintiff maintains included an allegation by STAT that the County's primary services contract with MMR violates the Sherman Antitrust Act; and

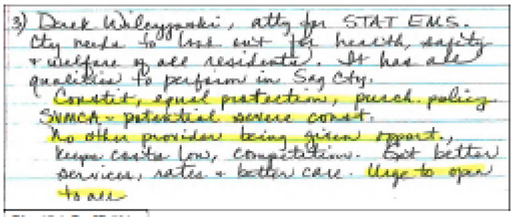
c) during the meet and confer process between counsel for this current lawsuit, STAT's counsel made representations that demonstrate the parties have an actual controversy under the Sherman Act;

See generally, Dkts. 10, 19. The Court will address each argument in turn below, weighing whether Plaintiff's allegations are sufficient to show the parties have an actual controversy surrounding its Sherman Act claim that would confer subject matter jurisdiction. *See, e.g., Ritchie, 15 F.3d at 598* (explaining that the Court may weigh the factual existence of subject matter jurisdiction when faced with a factual attack under *12(b)(1)*).

a) STAT's Alleged Threats at Board Meetings Held in 2013

First, Plaintiff alleges that in September 2013, counsel for STAT attended a Saginaw County Board of Commissioners meeting where the Board addressed whether to renew a "primary ambulance provider macro ambulance system contract" with MMR—essentially, a contract that provided MMR the exclusive right to perform certain emergency services within the county. *See* Dkt. 10, Pg. ID **[*17]** 218. Plaintiff insists that at the September 2013 meeting, STAT representatives asserted that the prospective exclusive contract between the County and MMR would violate the Sherman Antitrust Act and that STAT was prepared to initiate legal action against the County if it were to proceed with the contract. *See id.* According to Plaintiff, STAT's alleged threat amounted to "assert[ing] federal claims" against the County. *See* Dkt. 17, Pg. ID 483. Plaintiff also alleges that one month later, in October 2013, STAT's counsel and CEO appeared at a separate Board of Commissioners meeting and "repeated their threats of Sherman Anti-Trust and *14th Amendment* Due process claims and resolve to take legal action if the contract were renewed." Dkt. 10, Pg. ID 218. Plaintiff claims the aforementioned interactions reflect an actual controversy between the parties, and also one that "arises under" the Sherman Act for purposes of *28 U.S.C. § 1331*. *See* Dkt. 10, Pg. IDs 218-19.

Upon reviewing the factual bases for Plaintiff's claims, the Court finds that the materials submitted by Plaintiff are insufficient to support its allegations that STAT threatened antitrust action at the meetings held in September and October 2013. *See* *Ritchie, 15 F.3d at 598*. The **[*18]** clerical notes filed and cited to by Plaintiff do not record any statements by STAT threatening antitrust litigation at the September 2013 Board of Commissioners meeting. *See* Dkt 17-1, Pg. ID 501. Instead, the notes, partially reproduced below, show that Derek Wilczynski, counsel for STAT, referenced "Constit,[*sic*] equal protection" and "SVMCA [Saginaw Valley Medical Control Authority] — potential severe const." in connection with "no other [ambulance] provider being given [opportunity]" to work in Saginaw county. *See id.*



3) Derek Wilczynski, atty for STAT EMS.
Cty needs to look out for health, safety
+ welfare of all residents. It has all
qualities to perform in Sag Cty.
Constit, equal protection, purch. policy
SVMCA - potential severe const.
No other provider being given opport.,
keeps costs low, competition. Get better
services, rates + better care. Urge to open
to all

Dkt. 17-1, Pg. ID 501.

The official minutes and associated clerical notes from the September 2013 meeting suggest STAT's counsel raised issues expressly relating to potential Constitutional violations by the SVMCA, not Plaintiff Saginaw County. *Id.* Notably absent is evidence that STAT threatened to bring any antitrust claims, or directed any "threats" at the Plaintiff.[2]

The same is true for Plaintiff's allegations surrounding the October 2013 meeting before the Board of Commissioners. While Plaintiff insists that STAT's counsel "repeated" threats to bring a federal antitrust action, the clerical notes only show that counsel for STAT "spoke in opposition to the county entering **[*19]** into an Ambulance Service Agreement with Mobile Medical Response, Inc. (MMR). He appealed to the Board to open this matter to bidding to promote competition and create more access to healthcare. . . ." *See* Dkt. 14-6, Pg. ID 2.

Furthermore, it is significant that Plaintiff is seeking declaratory relief concerning the enforceability of an Ordinance that was adopted on April 19, *2016*—almost three years *after* the Board of Commissioners meetings that took place in September and October of 2013. *See* Dkt. 1 Ex. H, Pg. ID 89. The record also shows that the governing 911 Plan was adopted by the County on the same day as the Ordinance, April 19, 2016. *See* Dkt. 1, Ex. G. The considerable gap in time between the allegedly threatening statements by STAT's counsel at the 2013 meetings (which are not well supported) and the adoption of the 911 Plan and Ordinance in 2016 undermines the strength of any conclusion that: 1) the parties have a "definite and concrete" federal antitrust dispute sufficient to satisfy the actual controversy requirement under the Act, and 2) the parties have an actual controversy that is sufficiently immediate and real to confer Plaintiff with standing to seek relief under **[*20]** the Sherman Act against STAT. *See* *Commodities Exp., 695 F.3d at 525*. Thus, in weighing the above facts, the Court finds that the records of the September and October 2013 meetings (which took place almost 4 years before Plaintiff filed the instant case, no less) fail to demonstrate that the parties have a substantial Sherman Act controversy that is definite and concrete and of sufficient immediacy and reality to warrant the issuance of declaratory relief. *See id.*

[2] The Court notes that since *MedImmune*, a declaratory judgment plaintiff is not required to show that a defendant threatened litigation to establish an actual controversy under the Act. However, proof of such a threat is nevertheless evidence that weighs in favor of proving the existence of an actual controversy under the governing test, which asks whether the facts alleged, under all the circumstances, show that there is a substantial controversy, between parties having adverse legal interests, of sufficient immediacy and reality to warrant the issuance of a declaratory judgment. *See* *MedImmune, 549 U.S. at 127*.

b) STAT's Counsel's Letter to Mr. Van Essen

Second, Plaintiff alleges that STAT communicated to MMR and Saginaw County that their primary services contract violates the Sherman Antitrust Act. *See* Dkt. 10, Pg. ID 219, ¶ 24 (citing Dkt. 1, Ex. I); *see also* Dkt. 17, Pg. ID 485. Plaintiff points to a letter from STAT's counsel to Attorney Douglas Van Essen as proof of an actual controversy between the parties arising under the Sherman Act. *See id.* At the time the letter was sent, this case had not yet been brought, and Van Essen was at that time counsel for MMR.

The record shows that counsel for STAT sent the letter in question in connection with STAT's partial victory in *STAT v. SVMCA, Case No. 13-cv-14960, 2016 U.S. Dist. LEXIS 93591, 2016 WL 3902742 (July 19, 2016, E.D. Mich. 2016)*. *See Dkt.* 1 Ex. I, Pg. ID 96. Moreover, the letter was **[*21]** directed to Mr. Van Essen's then-client, MMR, and discussed issues related to the disposition of that previous case. *See id.* In the letter, STAT's counsel states that the letter serves as a follow-up to an earlier cease-and-desist letter sent to MMR. *Id.* Notably, the letter identifies certain activities undertaken *by MMR*—not the Plaintiff in this case—that STAT's counsel argued might fall within the ambit of the Sherman Act. For example, the letter states, "[MMR's] repeated and ongoing attempts to conspire not only with the SVMCA, but others, for the purpose of limiting competition in the Saginaw and Tuscola County area is precisely what is prohibited by the Sherman Anti-Trust Act." Dkt. 1 Ex. I, Pg. ID 98. But the letter does not state that Plaintiff in this action has violated the Sherman Act. Rather, the letter reflects one private company's perspective that another private company was engaged in anticompetitive conduct regarding the provision of emergency services in Saginaw County. Consequently, the August 2, 2016 letter fails to provide evidence sufficient to support a finding that STAT and Saginaw County have a dispute arising under the Sherman Act that is sufficiently definite **[*22]** and concrete to satisfy the "actual controversy" requirement under Article III and the Declaratory Judgment Act.

c) Meet and Confer Email Communications

Third, Plaintiff points to emails with Defense counsel exchanged as a part of their "meet and confer" obligations. Plaintiff argues that "STAT expressly asserted that if Saginaw County's purpose in enacting the Ordinance and then enforcing it in this lawsuit is to protect MMR's exclusive territorial rights as conferred in [the exclusive contract], then STAT believes the Ordinance violates the Sherman Antitrust Act." Dkt. 17, Pg. ID 475-76 (citing Dkt. 17-1, Pg. ID 495).

In the referenced emails, counsel for Plaintiff informed STAT's counsel that it would "stipulate to a dismissal if you agree in the stipulation that STAT is formally withdrawing its claim that the Ordinance is unenforceable because it interferes with STAT's rights under the Sherman Anti-Trust Act." Dkt. 17 Ex. A, Pg. ID 495. Plaintiff's position on the Sherman Act issue in this case is also reflected in its Amended Complaint, where it alleges that "STAT claims primary services ambulance contracts . . . violate[] the Sherman Anti-Trust Act" and that "[t]he County disputes **[*23]** [these] claims . . . and is resolved to enforce the [Ordinance]. Dkt. 10, Pg. ID 221.

Of course, as of yet STAT has not brought a lawsuit or filed any counterclaims against Plaintiff challenging Plaintiff's emergency services regime under the Sherman Antitrust Act. Nor does the evidence in the record support Plaintiff's allegation that STAT claims primary services ambulance contracts violate the Sherman Act. What the record shows is that STAT has stated that it believes the *enforcement* of the *Ordinance* in a certain way and for particular reasons might give rise to federal antitrust concerns. *See* Dkt. 17-1, Pg. ID 495. In its email exchange during the meet-and-confer process, counsel for STAT explained its position on the Ordinance and this pending lawsuit as follows: "[w]e are not alleging that the Ordinance itself violates the Sherman Antitrust Act. Enforcement of the ordinance, however, if done to protect MMR, to the exclusion of other ambulance providers, would violate the Sherman Antitrust Act . . ." *Id.* At the hearing on Defendant's motion to dismiss, Plaintiff acknowledged that it has not yet taken steps to enforce the Ordinance according to its terms.[3] While the Court acknowledges **[*24]** that the Declaratory Judgment Act serves as an alternative to a party committing arguably-illegal activity, a Plaintiff must still present the Court with a controversy that is definite and concrete—"as distinguished from [seeking] an opinion advising what the law would be upon a hypothetical state of facts." *See MedImmune, 549 U.S. at 127*.

Plaintiff's allegations in its Amended Complaint, its representations through the parties' meet-and-confer email exchanges, and its briefing before this Court show that Plaintiff believes STAT may challenge the County's emergency services regime through a federal antitrust lawsuit at some point in the future.[4] Plaintiff in this action seeks a determination as to whether the federal ***antitrust law*** would be violated *if* Plaintiff "enforced" its Ordinance against STAT and what the result would be if STAT challenged Plaintiff's enforcement on federal antitrust grounds. But neither of these events have occurred. The Court rejects Plaintiff argument that its mere bringing of this lawsuit, given the nature of the parties' relationship, presents an actual Sherman Act controversy because of the position articulated by STAT's counsel during their meet-and-confer communications. Dkt. **[*25]** 17, Pg. ID 476.

In sum, the Court finds that "all of the circumstances" surrounding Plaintiff's Sherman Act claim fail to show an "actual controversy" between the parties regarding this claim. *See MedImmune, 549 U.S. at 127*; *Nat'l Rifle Ass'n, 132 F.3d at 279-81*. Rather, the circumstances show that the parties have mere hypothetical and abstract questions surrounding the applicability of the Sherman Act to potential future conduct. Given this posture, the Court finds that, with respect to Plaintiff's Sherman Act claim, Plaintiff seeks from the Court "an opinion advising what the law would be upon a hypothetical state of facts"—relief that lies outside the scope of this Court's Article III powers.[5] *See id.* For these reasons, the Court finds that it lacks subject matter jurisdiction over Plaintiff's claims surrounding the Sherman Act.

2. Whether Plaintiff's Sherman Act Claim is Ripe for Adjudication

Defendant also argues that Plaintiff's case must be dismissed because the issues presented in the complaint are not ripe for review. *See* Dkt. 14, Pg. IDs 420-22. Courts apply the ripeness doctrine to evaluate whether it may exercise its judicial power over a dispute. The ripeness doctrine is a mixture of Article III concerns about actual cases and controversies and **[*26]** prudential concerns about the appropriate time for a court to adjudicate a matter. The "basic rationale of the ripeness doctrine is 'to prevent the courts, through premature adjudication, from entangling themselves in abstract disagreements.'" *Nat'l Rifle Ass'n, 132 F.3d at 284* (citing *Thomas v. Union Carbide Agric. Prod. Co., 473 U.S. 568, 580, 105 S. Ct. 3325, 87 L. Ed. 2d 409 (1985))*. While the record is sufficient to conclude that the parties do not have an "actual controversy" surrounding the Sherman Act, application

---

[3] Notably, the Ordinance itself contains enforcement provisions that allow the County to issue "appearance ticket[s]" as well as civil and criminal penalties. *See* Dkt. 1 Ex. H, § 4.5.2-4.5.3. While both parties recognize that STAT has and continues to provide emergency services in the County in violation of the Ordinance, no evidence suggests that the County or the County's agents have taken steps to enforce the Ordinance according to its terms. At the hearing on Defendant's motion to dismiss, counsel for Plaintiff acknowledged that the only "enforcement action" purportedly undertaken by Plaintiff involved the sending of a letter on January 18, 2017 to Defendant indicating that "STAT cannot continue to . . . violate the Ordinance and provide either intra-county transport or EMS ambulance services within Saginaw County in defiance of the Ordinance . . . ." *See* Dkt. 1 Ex. 1, Pg. ID 119.

[4] Plaintiff has made several arguments, statements, and references throughout this litigation to this effect. *See, e.g.*, Dkt. 17, Pg. ID 485 ("It is obvious that STAT is simply hoping to clear this case out of the way and initiate its own Sherman Antitrust and *14th Amendment* due process claims against the County with a preferred judge.").

[5] The Court notes that the parties' meet-and-confer emails show that the parties appear to have a definite and concrete controversy surrounding whether the Ordinance is authorized under Michigan law. Counsel for STAT states that "[t]he ambulance ordinance, as currently written, requires STAT to be 'licensed' by a body which has no authority to license," and expressed an opinion that "there is no way that the [Ordinance] is authorized or enforceable." Dkt. 17-1, Pg. ID 496. This issue presents purely questions of Michigan law, however, the answers of which may very well render superfluous the hypothetical antitrust issues that currently dwell on the fringes of obscurity between the parties.

of the ripeness doctrine also requires a finding that this Court lacks subject matter jurisdiction to adjudicate Plaintiff's claim regarding the Sherman Act.

The Sixth Circuit has stated that evaluating whether a suit is ripe requires courts to weigh: 1) the hardship to the parties if judicial relief is denied at the pre-enforcement stage in the proceedings; 2) the likelihood that the harm alleged by plaintiffs will ever come to pass; and 3) whether the factual record is sufficiently developed to produce a fair adjudication of the merits of the parties' respective claims. *See* *Nat'l Rifle Ass'n, 132 F.3d at 284*. All of these factors support a finding that Plaintiff's Sherman Act claim is not ripe for adjudication: STAT has not filed suit against Saginaw County, nor has it alleged that the Ordinance at issue violates federal antitrust **[*27]** laws. Plaintiff has not fined, ticketed or otherwise taken efforts to sanction STAT for violating the Ordinance, as permitted under the Ordinance. Nothing prevents Plaintiff from enforcing its Ordinance against STAT for its alleged unauthorized activities in the County, and Plaintiff has not sufficiently identified a hardship to the parties if judicial relief is denied at this stage, or that the likelihood of harm alleged by Plaintiffs by denying relief will ever come to pass.[6]

At the hearing on Defendant's motion to dismiss, Plaintiff highlighted the possibility that STAT will bring a federal antitrust case against it in response to its efforts to enforce the Ordinance, which could lead to prolonged federal antitrust litigation. This sentiment is echoed throughout Plaintiff's pleadings and briefing. As an initial matter, it is not clear that Plaintiff's efforts to enforce the Ordinance, whatever they might be, would lead to STAT initiating a federal antitrust lawsuit against Plaintiff. If confronted with sanctions, STAT could very well adapt its behavior; there is no way for the Court to know what might happen. Plaintiff's **[*28]** suit nevertheless seeks a declaration of what the law would be if the County were to undertake enforcement activity against STAT and STAT were to respond by filing an antitrust lawsuit against it. But, even assuming for a moment that such an enforcement action may take place in the future, to be ripe, a suit seeking a declaratory judgment must allege what harm the defendant would suffer from the denial of judicial relief right now. The prospect of protracted federal antitrust litigation is no more diminished if it is pursued in this litigation than through a subsequent action brought based on a ripe and actual controversy. For these reasons, the Court finds that parties will suffer little hardship if judicial relief is denied at this stage and further that, based on the record to date, it is unclear whether the harm alleged by Plaintiffs will ever come to pass.

Moreover, the Court also finds that the factual record is not sufficiently developed to produce a fair adjudication of the merits of Plaintiff's claims. The Court finds significant the fact that this case is one where Plaintiff seeks a judgment that prospective as-yet uncommitted conduct *would not* violate the Sherman Act, as **[*29]** opposed to one where a plaintiff advances an affirmative allegation that certain completed conduct amounts to a Sherman Act violation. The conduct that serves as the foundation for Plaintiff's desired relief under the Sherman Act—the enforcement of the ordinance—*has not yet occurred*. The Court would be required to speculate about the nature of Plaintiff's hypothetical enforcement actions and their impact.

Furthermore, if Plaintiff were able proceed with its suit for a declaratory judgment concerning the Sherman Act, STAT would be forced to either take the role of a putative antitrust plaintiff who filed an affirmative Sherman Act claim (thereby likely requiring STAT to *prove* that certain conduct reflects a Sherman Act violation, when it has not actually advanced such an allegation), or potentially be subject to a *res judicata* finding against it. Additionally, adjudicating Plaintiff's Sherman Act claim would require the Court to speculate on multiple issues of fact in the complex arena of is federal ***antitrust law***. But, given the Court's finding in this Order, this case lacks a definite and concrete dispute over whether an antitrust violation has occurred. The Court finds that "forcing" **[*30]** a defendant

---

[6] As noted above, the posture of Plaintiff's case in this action is vastly different from plaintiffs in declaratory judgment cases presenting ripe, actual controversies. *Nat'l Rifle Ass'n* and *MedImmune* are instructive. In *Nat'l Rifle Ass'n*, a set of plaintiffs alleged that the passage of a statute had a significant impact on the way they conducted their businesses and indicated that their compliance with the statute caused them immediate harm. *Nat'l Rifle Ass'n, 132 F.3d at 281*. Similarly, *MedImmune* considered a plaintiff that sought relief under the Act based on its desire to stop making royalty payments pursuant to a licensing agreement. *MedImmune, 549 U.S. at 121*. The plaintiff faced two choices: 1) continue to make the payments, even though plaintiff believed it had the right to stop making the payments, or 2) stop making the payments and face imminent civil litigation. *Id. at 122*. In *MedImmune*, the risk of a civil suit was certain and imminent because the Defendant expressed its intent to sue the plaintiff for violating the agreement if it stopped making the royalty payments. *Id.*

to take the role of a putative plaintiff in a federal antitrust lawsuit when it has not initiated such an action does not represent a "fair adjudication on the merits" of the parties' alleged antitrust disagreement.

Thus, for the reasons explained in detail above, the Court finds that Plaintiff's Sherman Act claim is not ripe for adjudication.

3. Alternatively, Plaintiff's Sherman Act Claim is Subject to Dismissal Pursuant to *Fed. R. Civ. P. 12(b)(6)*

While the record is sufficient to dismiss Plaintiff's Sherman Act claim for lack of subject matter jurisdiction, even if the Court had jurisdiction over Plaintiff's Sherman Act claim, it is subject to dismissal for its failure to sufficiently state a claim upon which relief may be granted. *Fed. R. Civ. P. 12(b)(6)*. Plaintiff in this action seeks, *inter alia*, a declaration that the County's 911 Plan, the Ordinance, and its primary services contract with MMR, if enforced against STAT, do not violate the Sherman Act. But Plaintiff's Amended Complaint alleges no factual content that would allow the Court to plausibly infer that it is entitled to such relief.

Section 1 of the Sherman Act makes unlawful "every contract, combination . . . or conspiracy, in restraint of trade or commerce among **[*31]** the several States." *15 U.S.C. § 1*. *Section 2* of the Act makes it unlawful to "monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States." *15 U.S.C. § 2*. Despite several references to its primary services contract with MMR, Plaintiff's Amended Complaint alleges no facts as to why its primary services contract does not reflect an unlawful restraint of trade, and therefore passes muster under *§ 1*. The same issue plagues Plaintiff's pleading vis-à-vis its 911 Plan and the Ordinance. While Plaintiff alleges that the 911 Plan and Ordinance were passed pursuant to state authority, (and that the Ordinance was passed in part to protect Plaintiff's contract with MMR) the Amended Complaint fails to allege any facts to show that the 911 Plan and the Ordinance do not violate the Sherman Act. For instance, Plaintiff alleges no facts to indicate its method of permitting primary emergency service providers does not amount to a contract or conspiracy that unlawfully restrains trade. Plaintiff's Amended Complaint similarly fails to allege any facts to plausibly show it is entitled to a declaration that its 911 Plan, the Ordinance, **[*32]** and the contract with MMR do not violate *Section 2* of the Sherman Act.

For these reasons, the Court finds that Plaintiff's Amended Complaint, Dkt. 10, fails to "contain sufficient factual matter, accepted as true, to state a claim to relief that" plausibly shows it is entitled to relief on its Sherman Act claim. *See* *Ashcroft v. Iqbal, 556 U.S. 662, 678 (2008)*. Thus, even if the Court had subject-matter jurisdiction over Plaintiff's Sherman Act claim, it would be subject to dismissal. *Fed. R. Civ. P. 12(b)(6)*; *Twombly, 550 U.S. at 555*.

C. Plaintiff's Claim for Relief Pursuant to the *Due Process Clause of the 14th Amendment*

Plaintiff also seeks relief pursuant to the *Due Process Clause of the 14th Amendment to the United States Constitution* (the "*Due Process Clause* claim"). Plaintiff requests a declaration that the enforcement of its 911 Plan or Ordinance against STAT's unauthorized ambulance services origination within the County would not violate the *Due Process Clause of the 14th Amendment*. Dkt. 10, Pg. ID 222. Plaintiff provides more clarity on this claim in its response to STAT's motion to dismiss. In its response, Plaintiff states that STAT's motion to dismiss, "demonstrates the existence of a federal case and controversy between the parties; namely whether the County's Ordinance violates STAT's federal constitutional rights." Dkt. 17, Pg. ID 475.

A brief history of the parties' pleadings in this matter provides helpful context to Plaintiff's *Due Process Clause* claim. **[*33]** Plaintiff filed its first Complaint in this case on February 1, 2017. Dkt. 1. Absent from Plaintiff's initial Complaint was a request for a declaration that its 911 Plan and Ordinance did not violate the *Due Process Clause of the Fourteenth Amendment*. *See* Dkt. 1. STAT filed its motion to dismiss Plaintiff's initial complaint on April 3, 2017. Dkt. 9. STAT argued that Plaintiff's case must be dismissed for lacking subject matter jurisdiction and, in the alternative, that the Complaint should be dismissed because the Ordinance violates the *Due Process Clause of the U.S. Constitution*. *See* Dkt. 9, Pg. IDs 175-78. Plaintiff filed its Amended Complaint less than two weeks later on

April 14, 2017 and included for the first time its request for a declaration that the 911 Plan and Ordinance do not violate the *Due Process Clause*. *See* Dkt. 10, Pg. ID 222.

Thus, it appears to the Court that Plaintiff reframed an argument advanced by Defendant in defense to Plaintiff's claims in its original Complaint, and subsequently pled an affirmative claim for relief on the same issue in its Amended Complaint. That is to say, where STAT argued that Plaintiff's ordinance violates its rights under the *Due Process Clause*, Plaintiff's Amended Complaint seeks a declaration that its 911 Plan and Ordinance, if enforced against STAT, would **[*34]** not violate rights guaranteed to STAT by, and protected under, the *Due Process Clause*. As described in further detail below, this Court lacks subject matter jurisdiction to adjudicate Plaintiff's claim on this issue.

1. **Plaintiff Lacks Standing to Bring its *Due Process Clause* Claim**

Plaintiff fails to allege and show the fundamental elements necessary to establish it has standing to bring its *Due Process Clause* claim. Article III standing requires a litigant to have suffered an injury-in-fact, fairly traceable to the defendant's allegedly unlawful conduct, and likely to be redressed by the requested relief. *Lujan v. Defenders of Wildlife, 504 U.S. 555, 560-61, 112 S. Ct. 2130, 119 L. Ed. 2d 351*. Plaintiff in this action has failed to identify any "injury in fact" to rights that is has which are protected under the *Due Process Clause*; it has not pointed to any behavior that is "fairly traceable" to STAT's conduct that led to the alleged violation of its rights protected under the *Due Process Clause*; and it fails to identify how the injury that it fails to allege vis-à-vis the *Due Process Clause* would be redressed by the requested relief. While Plaintiff is not prohibited from defending itself against a defense, counterclaim, or challenge by STAT that the enforcement of its Ordinance, as applied to STAT, violates STAT's rights as protected under the *Due Process Clause*, Plaintiff has not established **[*35]** that it has standing itself to seek relief as to this issue on an affirmative claim.

2. Alternatively, Plaintiff's *Due Process Clause* Claim Would be Subject to Dismissal Pursuant to *Fed. R. Civ. P. 12(b)(6)*

Even if Plaintiff had standing to raise the *Due Process Clause* claim alleged in its Amended Complaint, the claim would be subject to dismissal for failure to state a claim for relief pursuant to *Fed. R. Civ. P. 12(b)(6)*. While plaintiffs are required to only provide "a short and plain statement of the claim showing that it is entitled to relief, in order to give the defendant fair notice of what the . . . claim is and the grounds upon which it rests," *Twombly, 550 U.S. at 555*, Plaintiff fails to allege any facts plausibly showing it is entitled to relief under the *Due Process Clause of the 14th Amendment*. Thus, Plaintiff's Amended complaint fails to allege facts to plausibly show it is entitled to a declaration that the enforcement of its 911 Plan and Ordinance against STAT does not violate STAT's rights as protected under the *Due Process Clause of the U.S. Constitution*, and would therefore be subject to dismissal. *See Twombly, 550 U.S. at 555*.

D. The Court Lacks Subject Matter Jurisdiction Over this Action

As explained in detail above, in order to invoke this Court's subject matter jurisdiction, Plaintiff must establish it has constitutional standing pursuant to Article III as well as statutory **[*36]** standing through a congressional grant. *Bender, 475 U.S. at 541*. Plaintiff alleges federal question jurisdiction, federal antitrust jurisdiction, and supplemental jurisdiction under *28 U.S.C. §§ 1331*, *1337*, and *1367*, respectively.

Because Plaintiff's claim for relief under the Sherman Act must be dismissed for: 1) failing to raise a sufficient "actual controversy" for purposes of Article III and the Declaratory Judgment Act, and 2) lacking sufficient ripeness, the claim must be dismissed and cannot establish the Court's subject matter jurisdiction over this action. *See Loren v. Blue Cross & Blue Shield of Mich., 505 F.3d 598, 606 (6th Cir. 2007)* ("If Plaintiffs cannot establish constitutional standing, their claims must be dismissed for lack of subject matter jurisdiction."). The Court's subject matter jurisdiction, if it exists in this case, must lie elsewhere.

Plaintiff's claim for relief under the *Due Process Clause* similarly fails to establish this Court's subject matter jurisdiction because Plaintiff does not have standing to bring the claim. Plaintiff's *Due Process Clause* claim therefore *also* cannot establish this Court's subject matter jurisdiction pursuant to *28 U.S.C § 1331* because a federal question must be presented on the face of a plaintiff's well-pleaded complaint—not a defense or allegations in the complaint that anticipate a defense. *See* *Caterpillar v. Williams, 482 U.S. 386, 107 S. Ct. 2425, 96 L. Ed. 2d 318 (1987)*. **[*37]** Plaintiff's *Due Process Clause* claim represents the only remaining federal question arguably at issue in the Amended Complaint, but it cannot establish this Court's federal question jurisdiction because it "is interjected into this lawsuit solely as a defense to [defendant's] defense to [Plaintiff's] . . . claim." *See* *Michigan Southern R.R. Co. v. Branch & Joseph Counties Rail Users Ass'n., Inc., 287 F.3d 568, 575 (6th Cir. 2002)* (citing *Skelly Oil Co. v. Phillips Petroleum Co., 339 U.S. 667, 70 S. Ct. 876, 94 L. Ed. 1194*).

Moreover, federal jurisdiction in this action cannot be premised on *STAT's* argument or claim in its motion to dismiss that the Ordinance violates its rights as protected under the *Due Process Clause*. It is well-settled that *counterclaims* and *defenses* that arise under federal law are inadequate to confer federal question jurisdiction; the federal question must appear "on the face" of the plaintiff's well-pleaded complaint. *See, e.g.,* *Merrell Dow, 478 U.S. at 808 (1986)* ("A defense that raises a federal question is inadequate to confer federal [question] jurisdiction."); *Chase Manhattan Mortg. Corp. v. Smith, 507 F.3d 910, 914-15 (6th Cir. 2007)*. Thus, because federal question jurisdiction must exist on the face of Plaintiff's well-pleaded complaint in this action, the Court will not entertain arguments which seek to establish federal question jurisdiction based on Defendant's asserted defenses in this action. *See id.*

Plaintiff also alleges the Court has supplemental jurisdiction over its claims surrounding **[*38]** the validity of the 911 Plan, Ordinance and contract with MMR under Michigan law pursuant to *28 U.S.C. § 1367*. While *Section 1367* provides federal district courts supplemental jurisdiction over a plaintiff's state law claims in certain instances, the statute provides that:

> [the district courts may decline to exercise supplemental jurisdiction over a claim . . . if: [t]he claim raises a novel or complex issue of State law, (2) the claim substantially predominates over the claim or claims over which the district court has original jurisdiction, (3) the district court has dismissed all claims over which it has original jurisdiction, or (4) in exceptional circumstances, there are other compelling reasons for declining jurisdiction.

28 U.S.C. § 1367(c). Generally, district courts have "broad discretion in deciding whether to exercise supplemental jurisdiction over state law claims." *Musson Theatrical, Inc. v. Fed. Express Corp., 89 F.3d 1244, 1254 (6th Cir. 1996)*. However, when the court dismisses a plaintiff's federal claims for lack of subject-matter jurisdiction, supplemental jurisdiction can *never* exist. *Id. at 1255*; *Bigelow v. Michigan Dep't of Nat. Resources, 970 F.2d 154, 159 (6th Cir. 1992)* (dismissal for lack of ripeness equivalent to dismissal for lack of subject matter jurisdiction; state law claims cease to be properly supplemental). Moreover, even after a *Fed. R. Civ. P. 12(b)(6)* dismissal, "there is a strong presumption **[*39]** in favor of dismissing supplemental claims." *Musson, 89 F.3d at 1255*. Because the Court lacks subject matter jurisdiction over this action, Plaintiff's state law claim(s) are no longer properly supplemental, and the Court lacks jurisdiction to adjudicate those claims under *28 U.S.C. § 1367*.

E. Court Exercises its Broad Discretion to Decline Jurisdiction Under the Declaratory Judgment Act

In light of the above, the Court exercises its discretion not to grant any declaratory judgment. *Grand Trunk R. Co. v. Consolidated Rail Corp., 746 F.2d 323, 325 (6th Cir. 1984)* (the decision to grant "a declaratory judgment rests in the 'sound discretion' of the court[.]"). Although the Sixth Circuit has outlined a five-factor test for deciding whether to exercise jurisdiction in declaratory judgment cases, *Scottsdale Ins. Co. v. Flowers, 513 F.3d 546, 554 (6th Cir. 2008)*, there is no need to conduct this analysis where the Court lacks subject matter jurisdiction, as it does in this case. Such an analysis would not support the exercise of discretion in any event, but regardless, under these facts, the lack of subject matter jurisdiction forecloses the question so that the Court's discretion to make a declaratory judgment should not be exercised.

V. Conclusion

For the foregoing reasons, Defendants' motion to dismiss Plaintiffs' Complaint is **GRANTED**.

SO ORDERED.

Opinion

Order DENYING Motion to Dismiss (Dkt. No. 32)[1]

This is an antitrust lawsuit by musician Ozzy Osbourne,[2] individually and on behalf of a proposed class of similarly situated performers, against various Anschutz Entertainment Group companies (collectively "AEG").[3] The suit challenges AEG's alleged policy of allowing the O2 Arena in London **[*2]** to be booked by an artist only if the artist agrees to play at least one[4] of the artist's dates in Los Angeles (if any) at the Staples Center. AEG now brings this

---

[1] The Court deems this matter appropriate for decision without oral argument. See *Fed. R. Civ. P. 78*; *Local Rule 7-15*. The hearing set for July 30, 2018 is removed from the Court's calendar.

[2] The parties refer to Plaintiff simply as "Ozzy." The Court will do so as well.

[3] The Court notes that for more than a month one of AEG's lawyers has been listed on filings with the note "*pro hac vice* to be filed." Counsel should either file a *pro hac vice* application immediately or not be listed on filings.

motion to dismiss, claiming that Ozzy has not pleaded antitrust standing, that he was coerced, or that the alleged actions cause any anticompetitive effects in any relevant product market.

Several factors are typically used in deciding whether an antitrust plaintiff has standing:

(1) the nature of the plaintiff's alleged injury; that is, whether it was the type the antitrust laws were intended to forestall;
(2) the directness of the injury;
(3) the speculative measure of the harm;

(4) the risk of duplicative recovery; and

(5) the complexity in apportioning damages.

Am. Ad Mgmt., Inc. v. Gen. Tel. Co. of California, 190 F.3d 1051, 1054 (9th Cir. 1999).

Most of AEG's arguments are various ways of claiming that Ozzy is not the proper plaintiff here because he, personally, was not the target of any purported restraint. AEG claims that Ozzy's concert promoter, Live Nation, was the party required to book Ozzy at the Staples Center if Ozzy was to play the O2 Arena. From this, AEG argues that Ozzy was free to play anywhere he liked in Los Angeles as long as he did not use Live Nation as his promoter **[*3]** to do so. As Ozzy points out, this take on the allegations doesn't necessarily make AEG's actions less anticompetitive. But it is arguably *different* from what is pleaded in the complaint. However, the first amended complaint alleges that, to the degree that Live Nation sought to make agreements with AEG, it was doing so as Ozzy's representative. In any event, it is clear that the complaint alleges that Ozzy personally suffers damage in a fairly direct and non-speculative way by not being able to play in his preferred venues and that the damage stems from the kind of conduct that ***antitrust law*** is intended to prevent.[5] AEG is alleged to be using market power in one market to foreclose competition in another through a tying arrangement. That tie allegedly harms Ozzy by constricting his choices on where to play his concerts regardless of whether Ozzy's or his concert promoter's name is on the contract with the venue.

AEG's argument that the complaint does not adequately allege that Ozzy has been coerced is unpersuasive. The complaint alleges that because Ozzy's only reasonable choice of venue in London is the O2 Arena, he is explicitly coerced by a contract that says he must play the Staples **[*4]** Center in order to play the O2 Arena. FAC ¶¶ 41-48. The argument that the agreement in question might possibly leave open the ability for Ozzy to play a Los Angeles venue that is not the Staples Center if he promotes that show through someone other than Live Nation does not change the analysis. First, this is a motion to dismiss and the parties have a dispute over what the actual, full restraint on Ozzy was. Second, that Ozzy could possibly have dropped his promoter in order to avoid booking the Staples Center doesn't make the Staples Center requirement non-coercive. Presumably, Ozzy chose to promote his concerts through Live Nation for an economically valid reason, just as he has chosen to play London and Los Angeles for a reason. That Ozzy might have another possible way out of the tie besides not playing London or Los Angeles doesn't necessarily make AEG's conduct non-coercive. AEG's citation to *It's My Party, Inc. v. Live Nation, Inc., 811 F.3d 676 (4th Cir. 2016)*, does not help it. First, that case was decided on summary judgment where it was found that the plaintiff had no evidence of tying or coercion. See *id. at 685-87*. Second, the plaintiff in It's My Party apparently argued that tying occurs any time a seller with market power over product A merely offers **[*5]** that product for sale along with a product in market B. *Id. at 684-85*. This is very different than *requiring* purchase of the product in the tied market in order to get the monopolized tying product, as is alleged here.

The complaint's market definition allegations are also not defective. AEG claims Ozzy defines the tying market to be the O2 Arena. This is not correct. Ozzy alleges that large indoor arenas in Greater London — venues capable of hosting one of his shows — is the relevant tying market. See FAC ¶¶ 3, 41-43, 52. As it turns out, Ozzy believes

---

[4] Ozzy alleges that a requirement to play one show at the Staples Center is akin to requiring all shows to be played there due to high switching costs that typically make splitting dates among venues in the same city impractical. FAC ¶ 34.

[5] The last two factors are irrelevant because Ozzy does not seek monetary damages.

that the O2 Arena is the only venue that currently exists in that market, which is exactly why he believes that AEG can implement a coercive tie.

Finally, a plaintiff does not need to show anticompetitive effects in a *per se* tying case,[6] but Ozzy has nonetheless made numerous plausible allegations of how competition is harmed, most obviously through the restriction of competition in the tied market — indoor arena-sized venues in Los Angeles. FAC ¶¶ 54-59

The motion to dismiss is DENIED.

IT IS SO ORDERED.

Opinion

[*607] **FINDINGS OF FACT & CONCLUSIONS OF LAW**

Alarm Detections Systems, Inc. is a company that provides fire alarm services to commercial and multi-unit residential buildings. It alleges that the Orland Fire Protection District ("Orland FPD") and Tyco Integrated Security, LLC have conspired to restrain or monopolize trade **[**2]** in the market for fire alarm system monitoring in violation of the Sherman and Clayton Acts and the *Equal Protection* and *Due Process Clauses of the Fourteenth Amendments*. The case proceeded to a bench trial on May 22, 2017, and the Court received evidence through May 26, 2017. Initial post-trial briefing was completed on June 26, 2017, and the Court heard closing arguments on August 10, 2017. The parties submitted supplemental post-trial briefs on June 7, 2018, at the Court's request.

This opinion sets forth the Court's findings of fact and conclusions of law pursuant to *Federal Rule of Civil Procedure 52(a)*. These findings are based on the documentary evidence and trial testimony. They are also based on the Court's credibility determinations after observing the witnesses testify. This opinion also addresses Alarm Detection's motion to reconsider the Court's earlier dismissal of part of the *Fourteenth Amendment* claims. R. 488. For the following reasons, the Court finds in favor of Orland FPD and Tyco on the merits and will enter judgment against Alarm Detection.

Findings of Fact

Companies like Alarm Detection and Tyco install fire alarms (meaning the fire sensors and the transmitters that send alarm signals) in commercial and multi-unit residential buildings, and then monitor the transmitted **[**3]** signals for indications of fire or a need for maintenance of the alarms. Various technological systems can be used to monitor fire alarm signals. The systems relevant to this case are (1) central station and (2) direct connect. In a central station system, an alarm company establishes one facility to receive alarm signals indicating the presence of fire from multiple governmental jurisdictions and then relays those signals to the relevant jurisdiction's fire department 911 dispatch center. In a direct connect system, fire alarm transmitters send alarm signals directly to the relevant 911 dispatch center, without passing through a central station.

Some jurisdictions accommodate both direct connect and central station fire alarm **[*608]** monitoring. At issue in this case, however, are jurisdictions that have enacted ordinances requiring buildings to send fire alarm signals directly to the jurisdiction's 911 dispatch center. The Illinois appellate court has held that Illinois municipalities have statutory authority to mandate a direct connect fire alarm monitoring system. *See* *Alarm Detection Sys., Inc. v. Village of Hinsdale, 326 Ill. App. 3d 372, 761 N.E.2d 782, 785, 260 Ill. Dec. 599 (Ill. App. Ct. 2d Dist. 2001)*. Similarly, the Seventh Circuit has held that Illinois fire protection districts have statutory authority to mandate direct **[**4]** connect systems. *See* *ADT Sec. Servs., Inc. v. Lisle-Woodridge Fire Protection Dist., 672 F.3d 492, 501-02 (7th Cir. 2012)*.

Fire protection districts are governmental entities created pursuant to the Illinois Fire Protection District Act, *70 ILCS 705*, to "allow two or more local governments to consolidate fire protection and related services." *Lisle-Woodridge, 672 F.3d at 495*. A fire protection district is administered by an elected board of trustees. "The Board of Trustees of any fire protection district . . . may contract with any corporation organized to furnish fire protection service." *70 ILCS 705/11a*. The jurisdictional entities relevant to this case are Defendant Orland FPD and non-parties the Village of Orland Hills and the Village of Orland Park. The Villages of Orland Park and Orland Hills together constitute more than 98% of the geographic territory comprised by Orland FPD. *See* R. 501 at 1 n.1 (citing R. 472 at 278 (635:18-25)).

A governmental entity desiring to implement a "direct connect" system for receipt of fire alarm signals at its 911 dispatch center generally hires an alarm company to provide reception equipment, and sometimes staff, at the 911 dispatch center. Fire alarm companies must obtain a license from the FCC to use a certain signal frequency. *See* R. 472 at 345 (702:7-13). An alarm company's transmission and reception **[**5]** equipment will be calibrated to the frequency the alarm company has licensed. Thus, when a governmental entity hires an alarm company to establish a 911 dispatch center for a direct connect system, the alarm company must also provide the fire alarm transmitters to the commercial buildings, or sub-license other alarm companies to transmit on that frequency.

Fire alarm transmitters and receivers are generally built to transmit or receive only one signal frequency. *See* R. 475 at 147 (1363:12-21).[1] And in a direct connect system, the governmental entity requires that the signal transmit directly from the fire alarm to 911 dispatch. Thus, even if the other alarm companies not hired to provide the equipment for the 911 dispatch center are interested in reaching an agreement to use the transmission frequency of the company maintaining the 911 dispatch **[*609]** center, those companies do not have access to, and cannot monitor, the signals sent by the alarm transmitters, whether indicating the presence of fire in the building or that the alarm transmitters and sensors require maintenance. *See* R. 471 at 93 (93:2-8); R. 475 at 146-47 (1362:22-1363:4).

In 2006, Orland FPD adopted an ordinance **[**6]** requiring direct connection to its 911 dispatch center. *See* Ex. D-140. Orland FPD witnesses testified that they believe that direct connect is safer and more efficient. R. 472 at 218-19 (575:15-576:19); 230 (587:3-24); 253-54 (610:4-611:15).[2] As far back as 1991, Orland FPD hired Tyco's corporate predecessors to provide alarm monitoring services and equipment for Orland FPD's 911 dispatch center and commercial buildings in Orland FPD. *See* R. 472 at 250-52 (607:17-609:2).

In 2012 and 2013, the Seventh Circuit issued decisions questioning the authority of fire protection districts to engage in the business of fire alarm monitoring and transmission in a case against the Lisle-Woodridge Fire Protection District. *See* *Lisle-Woodridge, 672 F.3d 492*; *ADT Sec. Servs., Inc. v. Lisle-Woodridge Fire Protection Dist., 724 F.3d 854 (7th Cir. 2013)*. Unlike the defendant Lisle-Woodridge FPD, however, Orland FPD never directly sold or leased alarm transmitters to customers. Nevertheless, apparently in light of the *Lisle-Woodridge* decisions, and at the suggestion of Tyco, Orland FPD rescinded the direct connect requirement provision of its ordinance. *See* Ex. D-115. But because Orland FPD officials continued to prefer direct connect fire alarm monitoring to central station monitoring, they lobbied the Villages to enact ordinances **[**7]** mandating a direct connect system for fire alarms in the Villages. *See* R. 427 at 215-16 (572:14-573:5). Those new ordinances required that Orland FPD's 911 dispatch center be the direct connection reception facility. *See* Ex. D-143; P-053. Orland FPD also renewed its exclusive agreement with Tyco in 2014. *See* Ex. J-006.

Alarm Detection alleges that this arrangement between Orland FPD and Tyco illegally precludes Alarm Detection from competing in the fire alarm monitoring business in Orland FPD. *See* *Lisle-Woodridge, 724 F.3d at 865* (expressing in dicta "serious concerns about the anti-competitive effects" of a direct connect system).[3] Indeed, Tyco provides the transmitters for, and monitors the fire alarm signals from, nearly 100 percent of the customers in Orland FPD. *See* R. 475 at 23 (1239:10-13). Although this arrangement does not directly preclude Alarm Detection from installing and maintaining alarm transmitters, Alarm Detection must purchase the alarms it installs in Orland FPD from Tyco for $1580, *see* R. 472 at 342-43 (699:20-700:3), or the transceiver component of the transmitter for $200, *see* R. 472 at 346-47 (703:15-704:3); R. 473 at 23 (729:3-7), and then contract with Tyco to send signals

[1] The Court notes that the parties have assiduously avoided the question of whether dual-frequency transmitters are a potential solution to this dispute. When the Court specifically posed this question to Alarm Detection's counsel during his opening statement, the answer was long but non-responsive. *See* R. 471 at 30-32 (30:8-32:24). During trial there was testimony that some big-box stores utilize dual-frequency transmitters, *see* R. 474 at 134 (988:11-21), but the issue was not addressed in post-trial briefing. The Court's order requesting supplemental briefing highlighted this testimony and explained how the Court believed the apparent unavailability of dual-frequency transmitters affected the Court's understanding of the factual circumstances of the case. *See* R. 499 at 2. Only Orland FPD's supplemental brief noted its agreement that such technology is not available or economically feasible. *See* R. 501 at 6. Alarm Detection and Tyco did not address the issue. *See* R. 500; R. 502. The Court concludes from this agreement/silence that dual-frequency transmitters are generally unavailable due to some combination of technological and economic circumstances.

[2] This testimony from Orland witnesses is sufficient to prove their motivations. There was insufficient evidence presented at trial for the Court to determine the relative merits of the two systems, but such a finding is unnecessary for the Court to render a verdict in this case.

[3] The *Lisle-Woodridge* case was remanded for various reasons, including potential consideration of any antitrust violations, but the case settled after court decisions based on Illinois law. Although Alarm Detection has consistently argued that the *Lisle-Woodridge* decisions require a finding in its favor, the Seventh Circuit did not engage in an analysis of anticompetitive effect or address any of the legal doctrines on which this Court's verdict is based.

directly to the **[**8]** Orland FPD 911 dispatch center. As discussed, this means that even if Alarm Detection buys transmitters from **[*610]** Tyco and contracts with Tyco for monitoring at the Orland FPD 911 dispatch (as is required by ordinance), Alarm Detection cannot receive maintenance signals directly from the alarms, but is reliant on Tyco or Orland FPD to forward those signals to Alarm Detection. Alarm Detection argues that the cost of buying alarm transmitters from Tyco, and its inability to directly monitor alarm signals, means that its services cannot be competitive in Orland FPD, and that it and other alarm companies are effectively precluded from competing for the business of monitoring fire alarms in individual commercial buildings within the Orland FPD.

Alarm Detection also alleges that Tyco's effective monopoly over fire alarm monitoring in Orland FPD causes customers there to pay more for fire alarm monitoring services. Tyco charges $89 to customers in Orland FPD, *see* R. 472 at 102 (459:10-14), with $23.50 of that fee being remitted to Orland FPD for the right to be the exclusive fire alarm service provider in Orland FPD, *see* R. 473 at 63 (769:4-10). This means that Tyco **[**9]** receives $65.50 from each Orland FPD customer. Tyco charges an average of $68.98 for direct connection services in other jurisdictions in the northern Illinois region. *See* R. 474 at 304 (1158:13-23). The record does not reflect whether Tyco remits a fee to the relevant municipal entity in those jurisdictions. By contrast, Alarm Detection charges $55 or less for central station monitoring service. *See* R. 471 at 160 (160:6-13). It is undisputed that direct connect is typically more expensive because it requires creation of an alarm monitoring "board" for every 911 dispatch jurisdiction, whereas a central station's single board can monitor alarms from multiple jurisdictions. *See* R. 472 at 163-64 (163:22-164:8).

Alarm Detection argues that the exclusionary effects of the Orland FPD arrangement could be remedied by implementing certain technological or systematic adjustments. *See* R. 481 at 6; R. 502 at 10-11. Tyco and Orland FPD argue that none of these options complies with the Villages' ordinances mandating a direct connect system.

Conclusions of Law

Alarm Detection claims that its exclusion from the Orland FPD market violates the Sherman Act, the Clayton Act, and the *Fourteenth Amendment*, and unjustly enriches **[**10]** Defendants in violation of Illinois law. Alarm Detection also brings these claims against Defendants with respect to the services they provide in the Lemont Fire Protection District ("Lemont FPD," a former defendant in this case that settled the claims against it at the pleading stage, *see* R. 211). The Court addresses each claim to the extent necessary to render a verdict.

I. Lemont FPD and the Clayton Act

Before turning to the Orland FPD arrangement that is the primary focus of Alarm Detection's claims, the Court addresses several claims Alarm Detection has made regarding Defendants' conduct in the Lemont FPD. In addition to providing direct connect fire alarm monitoring and 911 dispatch services in Orland FPD, Tyco and Orland FPD provide these services to residents of the Lemont FPD, respectively. Alarm Detection claims that this arrangement with Lemont FPD also precludes Alarm Detection from providing fire alarm services there.

Very little evidence regarding the arrangement in Lemont FPD was presented at trial. But the evidence presented undermines Alarm Detection's claims. Alarm Detection's executive vice president testified that Lemont FPD does not have a direct connect mandate, **[**11]** customers in Lemont FPD may use central station fire **[*611]** alarm monitoring, Alarm Detection has 44 accounts in Lemont FPD, and Alarm Detection uses its own transmitters and does not have to buy or lease them from Tyco. R. 472 at 82-83 (439:5-440:6). Based on this evidence, the Court finds that Alarm Detection is not in fact precluded from competing in Lemont FPD. Therefore, the Court finds for Defendants on Alarm Detection's claims about Lemont FPD.

In addition to its claims about exclusion from Lemont FPD, Alarm Detection continues to claim injury based on Lemont FPD's allegedly illegal assignment of customer contracts to Tyco. R. 481 at 14 n.7; *id.* at 18. This is apparently Alarm Detection's only remaining basis for a Clayton Act claim. *See id.* at 14. n.7. But the Court rejected this claim earlier in the case and sees no basis to reconsider. *See* R. 237 at 19-24 (*Alarm Detection Sys., Inc. v. Orland Fire Protection Dist., 129 F. Supp. 3d 614, 626-28 (N.D. Ill. 2015))*.

Alarm Detection also claims a *Fourteenth Amendment* violation because Orland FPD is monitoring alarms in Lemont FPD, which is allegedly outside its jurisdiction, and beyond its statutory authority. R. 481 at 18. But the agreement between Orland FPD and Lemont FPD (an exhibit admitted at trial, *see* J-011) shows that Orland FPD provides 911 dispatch service to Lemont FPD **[**12]** customers, and Tyco uses the Orland FPD dispatch center to provide direct connect alarm services for customers in Lemont FPD who want that service. *See* R. 473 at 68-71 (774:4-777:11). Moreover, to the extent Orland FPD can be said to be monitoring fire alarms in Lemont FPD in violation of the District Act, this cannot form the basis of a *Fourteenth Amendment* claim because Alarm Detection has failed to show an injury—i.e., it has failed to show that it is excluded from the Lemont FPD market.

II. Sherman Act

A. Statute of Limitations

Turning to Alarm Detection's Sherman Act claims, Defendants argue that they are untimely, because Tyco has had an exclusive contract to service the Orland FPD district since at least 2003, *see* R. 478 at 6, and Alarm Detection did not file this case until 2014. Under the federal antitrust laws, a plaintiff must bring a lawsuit "within four years after the cause of action accrued." *15 U.S.C. § 15b*. An antitrust "cause of action accrues and the statute of limitations begins to run when a defendant commits an act that injures a plaintiff's business." *Zenith Radio Corp. v. Hazeltine Research, Inc., 401 U.S. 321, 338, 91 S. Ct. 795, 28 L. Ed. 2d 77 (1971)*; *see also* *In re Copper Antitrust Litig., 436 F.3d 782, 789 (7th Cir. 2006)*. Thus, the "period of limitations for antitrust litigation runs from the most recent injury caused by the defendants' activities rather **[**13]** than from the violation's inception." *Xechem, Inc. v. Bristol-Myers Squibb Co., 372 F.3d 899, 902 (7th Cir. 2004)*.

The Seventh Circuit has held that "exclusion from a market"—the type of injury Alarm Detection alleges here—"is a conventional form of antitrust injury that . . . [accrues] as soon as the exclusion occurs." *Brunswick Corp. v. Riegel Textile Corp., 752 F.2d 261, 271 (7th Cir. 1984)*. However, "[e]ach discrete act with fresh adverse consequences starts its own period of limitations." *Xechem, 372 F.3d at 902*. "New exclusionary acts" that "extend the period" of exclusion suffice to restart the statute of limitations. *Id.* By contrast, "acts that 'simply reflect or implement a prior refusal to deal or acts that are merely inertial consequences (of a single act) do not restart the statute of limitations.'" *Midwestern Machinery Co., Inc. v. Nw. Airlines, Inc., 392 F.3d 265, 270 (8th Cir. 2004)* **[*612]** (quoting *DXS Inc. v. Siemens Med. Sys., Inc., 100 F.3d 462, 467-68 (6th Cir. 1996))*; *see also* *In re Ciprofloxacin Hydrochloride Antitrust Litig., 261 F. Supp. 2d 188, 229 (E.D.N.Y. 2003)* (Mere "[p]erformance of the alleged anticompetitive contract[] during the limitations period . . . is not sufficient to restart the [limitations] period.").

Alarm Detection argues that the renewal of the contract between Orland FPD and Tyco in 2014, and the passage of the Villages' direct connect ordinances that same year, are new exclusionary acts that extended Alarm Detection's exclusion from the Orland FPD market. The Court agrees that these actions are more than mere inertial consequences of prior agreements and ordinances. **[**14]** Rather, they are evidence of a conscious effort to continue the arrangement that is the basis for Alarm Detection's claims. Therefore, Alarm Detection's antitrust claims are timely.

B. *Section 1*: Contract, Combination, or Conspiracy

Alarm Detection alleges that Defendants' actions violate *Section 1* of the Sherman Act. "The purpose of the Sherman Act is to protect consumers from injury that results from diminished competition." *Agnew v. Nat'l Collegiate Athletic Ass'n, 683 F.3d 328, 334-35 (7th Cir. 2012)*. To prevail on a *Section 1* claim, a plaintiff must prove: "(1) a contract, combination, or conspiracy; (2) a resultant unreasonable restraint of trade in [a] relevant market; and (3) an accompanying injury." *Id. at 335*. Alarm Detection contends that it proved these elements at trial by presenting, respectively, evidence of: (1) the "Orland FPD/Tyco agreements plus Village Ordinances passed at the urging of and for the benefit of Orland FPD"; (2) that Defendants have "virtually 100% control of the Business"; and (3) the "Commercial Accounts have no choice, pay higher prices, and [Alarm Detection] cannot actively compete for the Business." R. 481 at 7.

Although Alarm Detection alleges that the Villages' ordinances are part of the "arrangement" constituting the alleged "contract, combination, or conspiracy" **[**15]** satisfying the first element of its claims, Alarm Detection has not sued the Villages, and Alarm Detection does not argue that the Villages' ordinances are preempted by the Sherman Act. Rather, Alarm Detection's primary goal is to have the agreement between Orland FPD and Tyco invalidated. However, when a state statute or local ordinance is alleged to be an aspect of the defendants' alleged "contract, combination, or conspiracy," as Alarm Detection claims here, an analysis of the federal antitrust implications of such alleged concerted action must begin with the role played by the local law.

In *Fisher v. City of Berkeley*, the Supreme Court explained the standards for such an analysis. *475 U.S. 260, 106 S. Ct. 1045, 89 L. Ed. 2d 206 (1986)*. "A restraint imposed unilaterally by government does not become concerted-action within the meaning of the [Sherman Act] simply because it has a coercive effect upon parties who must obey the law. The ordinary relationship between the government and those who must obey its regulatory commands whether they wish to or not is not enough to establish a conspiracy." *Id. at 267*. Accordingly, legislation that is properly characterized as "unilateral" is "outside the purview of *§ 1 [of the Sherman Act]*." *Id.*

But, this is **[**16]** not true of "all restraints imposed upon private actors by government." *Id.* "Certain restraints may be characterized as 'hybrid,' in that nonmarket mechanisms merely enforce private **[*613]** marketing decisions." *Id. at 267-68*. "Where private actors are thus granted a degree of private regulatory power, the regulatory scheme may be attacked under *§ 1*." *Id. at 268*. At bottom, however, "a government restraint [does not] become concerted action because certain citizens benefit from it, or even have urged it." *Freedom Holdings, Inc. v. Cuomo, 624 F.3d 38, 53 (2d Cir. 2010)* (citing *City of Columbia v. Omni Outdoor Aderv., Inc., 499 U.S. 365, 375, 111 S. Ct. 1344, 113 L. Ed. 2d 382 (1991)* ("conspiracy" must "mean . . . more than an agreement to impose [a] regulation").

Fisher concerned an ordinance that kept residential rents artificially low in Berkeley, California. Property owners alleged that the ordinance was preempted by *Section 1* of the Sherman Act. The Supreme Court held that "[w]hile the Ordinance does give tenants—certainly a group of interested private parties—some power to trigger the enforcement of its provisions, it places complete control over maximum rent levels exclusively in the hands of the [city's] Rent Stabilization Board." *Fisher, 475 U.S. at 269*.

The Court distinguished the unilateral action by the City of Berkeley from state and local legislation the Court struck down in prior cases. In *Schwegmann Brothers* ***[**17]*** *v. Calvert Distillers*, a Louisiana statute authorized liquor distributors to enforce price fixing agreements (which were then legal pursuant to a since-repealed exception to the federal antitrust laws) against retailers who were not parties to the agreements. *341 U.S. 384, 387, 71 S. Ct. 745, 95 L. Ed. 1035, 60 Ohio Law Abs. 81 (1951)*. The Court held the state statute was preempted by the Sherman Act because "both the selection of minimum price levels and the exclusive power to enforce those levels were left to the discretion of distributors." *Fisher, 475 U.S. at 268* (citing *Schwegmann, 341 U.S. at 389*). Similarly, in *California Retail Liquor Dealers v. Midcal Aluminum*, a California statute required wine producers to post a retail price schedule, and gave wine wholesalers the power to set prices for a producer that failed to do so. *445 U.S. 97, 99, 100 S. Ct. 937, 63 L. Ed. 2d 233 (1980)*. The Court in *Fisher* explained that "the mere existence of legal compulsion" in *Midcal* "did not turn California's scheme into unilateral action by the State." *Fisher, 475 U.S. at 269* (citing *Midcal, 445 U.S. at 103*). Rather, under the statute, the "'State [had] no direct control over wine prices, and it does not review the reasonableness of the prices set by wine dealers.'" *Fisher, 475 U.S. at 269* (quoting *Midcal, 445 U.S. at 100*); *see also* *TFWS Inc. v. Schaefer, 242 F.3d 198, 209 (4th Cir. 2001)* (state statute requiring liquor wholesalers to post and maintain monthly prices, and banning volume sale discounts, was a hybrid **[**18]** restraint because it did not provide for state "review" of the "privately set prices for reasonableness"). Such "hybrid" statutes can be violations of the Sherman Act if the law's other elements are satisfied.

Since *Fisher* was issued more than 30 years ago, courts have had relatively infrequent occasion to apply its standard of unilateral versus hybrid restraint. Four cases are of particular relevance here.

In *Yakima Valley Memorial Hospital v. Washington State Department of Health*, the Washington State Department of Health refused to license a hospital to perform certain elective heart surgery procedures. *654 F.3d 919, 923 (9th Cir. 2011)*. The Department limited licenses for such procedures "to avoid private parties making socially inefficient investments in health-care resources they might make if left unregulated." *Id.* Additionally, **[*614]** the Department would "issue a [license] only if projected demand in an applicant's geographic market exceed[ed] the capacity of incumbent [license] holders by at least 300 procedures." *Id. at 924*. The Ninth Circuit disagreed with the plaintiff hospital's argument that the "regulations grant regulatory power to incumbent licensees by calculating the need for a new [license] based in part on the **[**19]** number of . . . procedures they perform, thereby allowing the incumbent licensees to manipulate the number of [procedures] they perform so as to exclude competing hospitals [from obtaining a license]." *Id. at 928*. The court explained that the plaintiff hospital's argument "mistakes the barrier to entry created by the licensing requirement, and its attendant anticompetitive effects, for a hybrid restraint." *Id. at 929*. The court reasoned that "a licensee meet[ing] the Department's expectation and suppl[ying] all demand is the logical and intended consequence of the . . . regulations, not a delegation of regulatory power to the incumbent. Entry is prohibited by the Department's decision to grant an unlimited license and then withhold additional licenses until the incumbent can no longer meet demand, not the incumbent's natural inclination to capitalize on the market power the licensing requirement creates." *Id.*

Three years before *Yakima*, the Ninth Circuit considered a case challenging the State of Washington's restrictions on sales of beer and wine. *See Costco Wholesale Corp. v. Maleng, 522 F.3d 874, 881 (9th Cir. 2008)*. One of the challenged state restrictions banned alcohol sales by retailers to other retailers, effectively forcing a business to decide whether to operate **[**20]** as a retailer or a wholesaler. *Id. at 889-90*. The court explained that the "ban removes from the market certain firms or persons who might otherwise compete; with fewer, and likely larger, horizontal competitors, prices for the consumer may be higher than they otherwise would be." *Id. at 890*. The court held, however, that "the potential anti-competitive effect is not the result of private pricing or marketing decisions, but the logical and intended result of the statute itself. No further action is necessary by the private parties because the anti-competitive nature of this restraint is complete upon enactment; the conclusion must follow, therefore, that the restraint is unilateral." *Id.*

In holding that the ban on retailer to retailer sales was a unilateral restriction on competition, the Ninth Circuit relied heavily on a decision from the First Circuit. In *Massachusetts Food Association v. Massachusetts Alcoholic Beverages Control Commission*, an association of alcoholic beverage sellers sued a state commission that limited the number of licenses to operate a retail liquor store to three per person or corporate entity. *197 F.3d 560, 562 (1st Cir. 1999)*. Of course, an agreement among retailers not to open more than three locations each would **[**21]** violate the Sherman Act. But the First Circuit held that the state regulation licensed no such agreement among private parties. *See* *id. at 565* ("What is centrally forbidden is state licensing of arrangements between private parties that suppress competition—not state directives that by themselves limit or reduce competition."). The court rejected the plaintiffs' claim because "the state has not ordered or authorized private parties to engage in conduct that, absent immunity, would even arguably violate the antitrust laws; there is no private agreement or arrangement between retailers as to the number of retail outlets and therefore no violation to be shielded. The state simply insists upon licensing retail liquor stores—as it does for many businesses or professions—and limits the number **[*615]** of licenses to three per owner." *Id. at 564*.

Ten years before *Massachusetts Food*, in a case closely analogous to Alarm Detection's claims, the Third Circuit upheld a municipality's choice of an exclusive electrical inspector to certify buildings for occupancy. *See* *Englert v. City of McKeesport, 872 F.2d 1144, 1146-47 (3d Cir. 1989)*. A single company had been providing nearly all the inspections in the municipality "for some time" without having been granted an exclusive right to do so by **[**22]** the city. *Id. at 1146*. When the company began facing competition from a former employee, the city passed a resolution banning such competition and making the company the exclusive provider of electrical inspections for certificates of occupancy. *Id.* The former employee sued for violation of the Sherman Act, but conceded that there was "little evidence which would support an inference that [the company] induced that passage of the . . . resolution." *Id. at*

1150 n.9. The Third Circuit held that the company's "acceptance . . . of the unilateral appointment by [the city]" did "not involve concerted action," and thus there could be no violation of the Sherman Act. Id. at 1151.

What Fisher and its progeny teach is that state and local governments may act as market makers and destroyers without running afoul of the federal antitrust laws. However, state and local government may not delegate that power to private parties. In other words, governments must not enable anticompetitive conduct. The government entity's decision to alter the market must be complete upon enactment of the government's decision, and require no further anticompetitive conduct to create the market conditions envisioned by government authorities.

Here, Alarm **[**23]** Detection has not sued the Villages and does not ask the Court to find that the Villages' ordinances are preempted. But the evidence shows that the Villages' direct connect ordinances require alarm signals to be sent directly from fire alarms to Orland FPD's 911 dispatch center. The parties have also implicitly conceded (*see* footnote 1 above) that dual monitoring technology, i.e., a fire alarm that can send a signal to both Orland FPD's 911 dispatch and a central station, is not available or economically feasible. This combination of municipal regulation and technological/economic limitation eliminates alarm monitoring by any private alarm company other than the company hired to maintain Orland FPD's 911 dispatch center. Granting an exclusive contract for maintenance of the dispatch center is a proper exercise of the Orland FPD's power to contract under the District Act. *See Active Disposal, Inc. v. City of Darien, 635 F.3d 883, 889 (7th Cir. 2011)* (exclusive contracts "are a foreseeable result of [the] authorization for municipalities to make contracts"). Thus, there is a direct causal connection between the Villages' requirement for direct connect alarm monitoring and the allegedly anticompetitive effect in this case—i.e., the need for an exclusive provider **[**24]** of fire alarm monitoring in Orland FPD. Although there are several steps in this causal chain, the Court finds that the causal connections are sufficiently direct that the effect of an exclusive fire alarm monitoring provider in Orland FPD is the "logical and intended result" of the Villages' ordinances.

The Court further finds that this restraint is "complete upon enactment." Orland FPD and Tyco of course have certain discretion to implement the ordinances, which is embodied in their contract. But the anticompetitive effect at issue—i.e., the existence of an exclusive contract (whether with Tyco or another alarm company)— is **[*616]** not within the discretion or control of Orland FPD or Tyco. The Villages require a direct connection to the Orland FPD 911 dispatch center, and an exclusive contract with a fire alarm provider is the only way to accomplish that goal. The Villages' ordinances, therefore, together constitute a "unilateral restraint" that involves no concerted action and therefore cannot be a violation of the Sherman Act. *See Alarm Det. Sys., Inc. v. Village of Schaumburg, 2017 U.S. Dist. LEXIS 141572, 2017 WL 3780279, at *12 (N.D. Ill. Aug. 31, 2017)* (denying a preliminary injunction motion because "[o]nly after the Village passed [a direct connect] [o]rdinance . . . did Tyco allegedly become the exclusive **[**25]** provider of fire alarm monitoring equipment in the Village" through an agreement with the municipal entity responsible for 911 dispatch).

Alarm Detection misses the mark with its argument that "the Supreme Court has classified arrangements that authorize private actors, like Tyco here, to set prices or participate in setting prices, as hybrid restraints." R. 502 at 4. The Sherman Act forbids price fixing *agreements*, not a single company's right to set the prices at which it will do business. In *Schwegmann* and *Midcal,* the Supreme Court found the statutes at issue preempted because they involved government consent for agreements among multiple private actors to set the price they would charge customers. That is not the situation in the fire alarm protection market in Orland FPD. Rather, as discussed, the Villages require direct connect to Orland FPD's dispatch, and Orland FPD has hired Tyco to maintain the dispatch center. Due to current technological and/or economic limitations that prevent the use of dual-frequency transmitters, these governmental decisions have the direct effect of making Tyco the exclusive provider of fire alarm services in Orland FPD. And like the defendants in ***[**26]*** *Yakima* and *Englert,* Tyco has a role in setting the prices it will charge for its services, which it exercises through negotiation with Orland FPD, a governmental entity. This is not the kind of price-fixing agreement among multiple private entities the Supreme Court struck down in *Schwegmann* and *Midcal*.

Alarm Detection attempts to distinguish *Englert* by noting that the ordinance in *Englert* expressly made the defendant company the exclusive electrical inspector, whereas the Villages ordinances do not make Tyco or any other alarm company the exclusive alarm company for Orland FPD. But as discussed, the evidence shows that the only way to comply with a direct connect requirement to a specific dispatch center—an option a village or fire protection district can indisputably mandate—is to enter into an exclusive contract with a single fire alarm company. The lack of an express choice by the Villages does not change the fact that some company must be given an exclusive contract under the circumstances.

Alarm Detection also argues that the exclusive nature of a direct connect mandate could be remedied by use of different technology. But Alarm Detection concedes that the purpose the Villages' **[**27]** ordinances is "to eliminate any intervening call from a central station operator." R. 502 at 9. The two alternatives Alarm Detection describes in its supplemental brief would not satisfy this goal.[4] Alarm Detection first asserts that it "and other alarm companies could use the same radio frequency as Tyco to send [s]ignals from their own transmitters to Orland Central Dispatch." R. 502 at 10. **[*617]** True, but neither Defendants nor the Villages prohibit this. The problem with this "solution," as Alarm Detection has pointed out, *see* R. 471 at 29-30 (29:17-30:7), is that even if it transmitted signals on Tyco's frequency, Alarm Detection would be subject to the costs of replacing or recalibrating its transmitters with Tyco's frequency. Further, if Alarm Detection sends signals directly to Orland FPD 911 dispatch, Alarm Detection cannot monitor those signals (since transmitters with dual transmission ability are apparently not available) and the exclusive monitoring aspect remains.

Alarm Detection's additional suggestion is that it could "automatically retransmit the [s]ignals to eliminate the need to have a central station operator process the [s]ignals before they were sent to Orland Central **[**28]** Dispatch." R. 502 at 10. But this is obviously not a direct connection to Orland FPD's 911 dispatch. Alarm Detection never explains why a midpoint "retransmission" of the signals would comply with ordinances that require "direct connection." Alarm Detection insists that the retransmission would be "instantaneous." *Id.* But the evidence presented at trial on this issue was at best inconclusive. Further, time is not necessarily the only concern. With an additional retransmission point there is additional potential for a breakdown in the system. Clearly, the Villages intended that one alarm company be responsible for the reception of alarm signals in Orland FPD—a decision squarely within the Villages authority. Adding a retransmission point undermines that goal.

For these reasons, the Court finds that Alarm Detection has not met its burden to prove concerted action that implicates *Section 1* of the Sherman Act. Therefore, the Court finds for Defendants on that claim.

C. *Section 2*: Monopoly

Only *Section 1* of the Sherman Act includes an explicit "concerted action" element. However, unilateral state action also undermines a claim for violation of Sherman Act *Section 2*, because that provision requires "the willful acquisition or **[**29]** maintenance of [monopoly] power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." *Endsley v. City of Chicago, 230 F.3d 276, 282 (7th Cir. 2000)*. As discussed, Orland FPD's and Tyco's agreement on an exclusive fire alarm monitoring contract was a necessary result of the Villages' requiring direct connect fire alarm monitoring in the context of the current technological environment as it pertains to alarm transmitters. In these circumstances, Tyco cannot be said to have "willfully" acquired a monopoly. It is unnecessary for the Court to decide whether Tyco's business in Orland FPD constitutes a monopoly for purpose of the Sherman Act. But to the extent that it is properly characterized as such, Tyco simply accepted a monopoly that was made available to it by governmental entities. Other courts have found similar conduct insufficient to satisfy the "willful acquisition" element of *Section 2*. *See* *Name.Space, Inc. v. Internet Corp. for Assigned Names & Numbers, 795 F.3d 1124, 1132 (9th Cir. 2015)* ("Even if [the defendant private association] competed in any of the relevant markets, *§ 2* liability could only arise if [the defendant] unlawfully acquired or maintained its monopoly. The district court correctly held that [the defendant's] authority was lawfully obtained through a contract **[**30]** with the [Department of Commerce]."); *Englert, 872 F.2d at 1150* ("To prove that [the defendant company] has 'willfuly acquired' monopoly power, [the plaintiff's] burden under *section 2* was

---

[4] The Court ordered supplemental briefing to address the *Fisher* line of cases as the parties had not addressed it in their trial briefs.

essentially the same as under *section 1*: he was required to prove that [the defendant **[*618]** municipality] did not unilaterally decide to grant and an exclusive franchise to [the defendant company], but that [the defendant company] contributed to the passage of the resolution, thus willfully obtained a monopoly."). Thus, the Court finds that the unilateral nature of the Villages' ordinances and their effects requires finding for Defendants on Alarm Detection's claim under *Section 2* of the Sherman Act.

D. Immunity

The Court has found that Defendants' conduct was not "concerted" or "willful" in the sense those terms are used by *Sections 1* and *2* of the Sherman Act. Alternatively, the Court finds Defendants are immune from liability for any anticompetitive effects caused by their conduct under the state immunity and *Noerr-Pennington* doctrines, holdings the Court explains presently.

1. Orland FPD: State Immunity

States have immunity for anticompetitive conduct "when acting in their sovereign capacity." *N.C. State Bd. of Dental Examiners v. F.T.C., 135 S. Ct. 1101, 1110, 191 L. Ed. 2d 35 (2015)*. However, when "a State delegates control over a market to a non-sovereign **[**31]** actor," such as a municipality, immunity is not always available. *Id.* For a municipality to have immunity from the federal antitrust laws, the state must have "articulated a clear policy to allow the anticompetitive conduct." *Id. at 1112*. This "requirement is satisfied where the displacement of competition is the inherent, logical, or ordinary result of the exercise of authority delegated by the state legislature." *Id.* In other words, although "a state legislature need not expressly state . . . that [it] intends for the delegated action to have anticompetitive effects," *F.T.C. v. Phoebe Putney Health Sys., Inc., 568 U.S. 216, 226, 133 S. Ct. 1003, 185 L. Ed. 2d 43 (2013)*, "the State must have foreseen and implicitly endorsed the anticompetitive effects as consistent with its policy goals." *Dental Examiners, 135 S. Ct. at 1112*. "All that matters is whether the anti-competitive effects would logically result from the authority to regulate." *Active Disposal, 635 F.3d at 889* (quoting *Campbell v. City of Chicago, 823 F.2d 1182, 1184 (7th Cir. 1987))*.

In addition to demonstrating that the state clearly articulated a policy to allow the anticompetitive conduct at issue, non-sovereign state-actors *other than municipalities* must show that the state "provides active supervision of the anticompetitive conduct." *Dental Examiners, 135 S. Ct. at 1112*. The Supreme Court has held that municipalities need not satisfy this additional requirement because "where the actor is a municipality, **[**32]** there is little or no danger that it is involved in a private price-fixing arrangement." *Id.* This is because "municipalities are electorally accountable and lack the kind of private incentives characteristic of active participants in the market." *Id.* Further, most municipalities "exercise[] a wide range of governmental powers across different economic spheres, substantially reducing the risk that [they] would pursue private interests while regulating any single field." *Id. at 1112-13*.

This case presents unusual circumstances for application of the state immunity doctrine because the actions of two different kinds of governmental entities are involved—the Villages and Orland FPD. Addressing the Villages first, it is likely that they would be immune from any antitrust liability that might arise from their ordinances. Municipalities in Illinois regulate fire alarm protection pursuant to *Article 11* of the municipal code, and the Illinois legislature has stated its "intention . . . that the 'State action exemption' to the **[*619]** application of federal antitrust statutes be fully available to all municipalities, and that agents, officers and employees of each to the extent that are exercising authority . . . **[**33]** [pursuant to] all of Divisions of *Articles 10* and *11* of the Illinois Municipal Code." *65 ILCS 5/1-1-10(b)*. Direct connect fire alarm monitoring has been mandated by some Illinois municipalities at least since 1999 when the ordinance at issue in *Hinsdale* was adopted. *761 N.E.2d at 786*. Although there is no express statutory permission for municipalities to take anticompetitive action in the realm of fire alarm monitoring, the fact that municipalities have been adopting direct connect ordinances for many years has made their effect apparent, not merely foreseeable. This apparent tolerance of such actions by the Illinois legislature, combined with its express intent to permit anticompetitive actions by municipalities generally, is sufficient to show that Illinois has "articulated a clear policy to allow the anticompetitive conduct" at issue here. *See* Village of Schaumburg, 2017 U.S. Dist. LEXIS 141572, 2017 WL 3780279, at *11 (denying preliminary injunction of defendant village's fire alarm ordinance because it was likely that the village was immune (citing Campbell, 823 F.2d at 1185 ("[T]he Illinois General Assembly's passage of [65 ILCS 5/1-1-10] supports the proposition that the state legislature intended reasonably foreseeable anticompetitive acts from its grant of power to municipalities.")).

The fact that the Villages are immune begs the question of whether **[**34]** the Villages' immunity suffices to immunize their sibling governmental entity, Orland FPD. In the *Fisher* analysis, the Villages' unilateral conduct served to demonstrate that further actions by Orland FPD were not part of a conspiracy implicating the Sherman Act. But the state immunity analysis usually applies only in a case were hybrid concerted action *is* present. *See* Fisher, 475 U.S. at 270 ("[U]nder settled principles of ***antitrust law***, the [ordinance] lack[s] the element of concerted action needed . . . [to find] that [it] is facially inconsistent with the federal antitrust laws. We therefore need not address whether, even if the controls were to mandate § 1 violations, they would be exempt under the state-action doctrine from antitrust scrutiny."); *Yakima Valley, 654 F.3d at 926 n.8* (since the court decided the case based on a *Fisher* analysis, the court did "not need to reach the question of state-action immunity"). And unlike unilateral state action, which serves to characterize a regulatory arrangement as a whole, the question of immunity is particular to each entity involved. Thus, in analyzing immunity, the Court must separately address the potential immunity of each party to the arrangement, and any immunity the Villages may have does **[**35]** not trickle down to Orland FPD.

The state statute granting municipalities antitrust immunity under Sections 10 and 11 of the Illinois Municipal Code does not apply to fire protection districts like Orland FPD. Instead, Orland FPD's authority is provided by the District Act. The District Act does not include an express grant of antitrust immunity. But under the District Act, a fire protection district has the authority to adopt an ordinance requiring direct connect fire alarm systems. The District Act also gives the "Board of Trustees of any fire protection district" the power to "contract with any corporation organized to furnish fire protection service." 70 ILCS 705/11a.

In *Active Disposal v. City of Darien* (a case not cited by the parties in their trial briefs), the Seventh Circuit applied the state-action immunity doctrine to a case like this. 635 F.3d at 888-89. In that case, certain Illinois municipalities gave exclusive contracts to certain companies to lease **[*620]** dumpsters to residents within the municipalities. Id. at 885. The court noted that "[w]hile these contracts often have a financial benefit for the municipality, they also impose a cost on consumers who would prefer a different, probably less expensive, trash hauler." *Id.* The court **[**36]** held these "anti-competitive effects are a foreseeable result of [the] authorization for municipalities to make contracts." Id. at 889; *see also id.* ("[W]hen the legislature provides that municipalities may contract for the collection and disposition of trash, those contracts will often be exclusive, a monopoly will be created, and anti-competitive effects will necessarily follow."); LaSalle Nat. Bank of Chi. v. DuPage County, 777 F.2d 377, 381-82 (7th Cir. 1985) (by granting municipalities the power to make contracts the state has granted them the power to make exclusive contracts). The Tenth Circuit followed similar logic in holdings that a municipality was immune under the state-action doctrine. *See* Southern Disposal, Inc. v. Texas Waste Mgmt., 161 F.3d 1259, 1263-64 (10th Cir. 1998) ("Even though the Solid Waste Management Act does not expressly authorize anti-competitive conduct or exclusive contracts, such arrangements are the foreseeable result of allowing municipalities to contract with 'one or more other . . . persons' for waste disposal services. We find the statute permits exactly the type of contract the City entered into with Texas Waste Management, and it clearly articulates and affirmatively expresses a state policy to displace competition with regulation.").

The statute at issue in *Active Disposal* contained a separate section providing that **[**37]** municipalities may adopt ordinances "notwithstanding the fact that competition may be displaced or that such ordinance may have an anti-competitive effect." 65 ILCS 5/11-19-5. But the Seventh Circuit held that the municipalities' authority to enter into the contracts at issue was not derived from the section concerning *ordinances*, but from the section expressly providing the power to *contract*. Nor did the court rely on the general grant of antitrust immunity to Illinois municipalities in 65 ILCS 5/1-1-10 discussed above. The court was clear that the mere authority to make contracts in a certain field (trash hauling in *Active Disposal*; fire protection in this case) is sufficient to establish that the making of exclusive contracts is foreseeable. The Tenth Circuit agreed in *Southern Disposal*. This Court finds this reasoning persuasive, if not (entirely) binding, and holds that Orland FPD's power to contract in the area of fire alarm protection made its exclusive contract with Tyco foreseeable.

Non-sovereign state actors other than municipalities must also show that they "provide active supervision of the anticompetitive conduct." *Dental Examiners, 135 S. Ct. at 1112*. Although Orland FPD is not a municipality per se, it is also not the type of non-sovereign **[**38]** state actor to which the Supreme Court has applied the "active supervision" requirement. That requirement is generally applied to state professional and industry review boards made up of appointed private individuals in the relevant profession or industry. By contrast, fire protection districts are governed by elected officials. That fire protection district officials are responsible to voters removes the basis for the Supreme Court's imposition of the "active supervision" requirement. For these reasons, the Court does not believe that requirement is relevant to whether Orland FPD is immune from antitrust liability.

However, even if that requirement is relevant, it is satisfied here. Tyco's discretion is completely circumscribed by its contract with Orland FPD. This agreement is for a set term and has been periodically adjusted according to Orland FPD's needs. **[*621]** Further, Orland FPD has a role in receiving fire alarm signals at its 911 dispatch center. This is not a case where Tyco has complete discretion over its activities in Orland FPD. Thus, Orland FPD provides active supervision of Tyco's conduct.

Therefore, the Court holds that Orland FPD is immune from any liability arising from **[**39]** its contract with Tyco.

2. Tyco: ***Noerr-Pennington*** Immunity

Tyco argues that it is entitled to immunity under the *Noerr-Pennington* doctrine. The *Noerr-Pennington* doctrine originated as protection for concerted action by private actors in petitioning the government. While "petitioning" is customarily understood as "legislative lobbying," the Supreme Court has interpreted that term to include additional types of interaction with government by private entities. *See* *VIBO Corp., Inc. v. Conway, 669 F.3d 675, 684 (6th Cir. 2012)* ("'petitioning' . . . encompass[es] activities other than legislative lobbying"). Particularly relevant here, the *Noerr-Pennington* doctrine "protects private actors when they . . . enter contracts with the government." *VIBO, 669 F.3d at 684* (citing *Sanders v. Brown, 504 F.3d 903, 912 (9th Cir. 2007)*, and *Greenwood Utils. Comm'n v. Miss. Power Co., 751 F.2d 1484, 1505 (5th Cir. 1985))*; *see also* *Campbell, 823 F.2d at 1186* (explaining that "the antitrust laws do not apply to efforts to persuade the government to organize or support a cartel," and holding that two defendant taxi cab companies were immune from liability for their agreement with Chicago to drop certain lawsuits in return for passage of an ordinance that gave the two taxi cab companies 80% of the taxi licenses in the city); *AmeriCare MedServices, Inc. v. City of Anaheim, 2017 U.S. Dist. LEXIS 220819, 2017 WL 5592892, at *4 (C.D. Cal. Apr. 21, 2017)* ("[A]ny conduct by [the defendant private entity] to petition the City Defendants to grant it an exclusive contract plainly **[**40]** falls within the scope of *Noerr-Pennington* immunity."); *Omega Homes, Inc. v. City of Buffalo, 4 F. Supp. 2d 187, 193-94 (W.D.N.Y. 1998)* (holding that successful lobbying efforts to secure an exclusive contract to build a low-income housing development were protected by *Noerr-Pennington*).

Here, Alarm Detection's claims against Tyco are predicated upon Tyco's actions to secure adoption of the Villages' direct connect ordinances and the exclusive agreement with Orland FPD. The cases cited above show that Tyco's actions are squarely within the realm of activity courts have found is protected by the *Noerr-Pennington* doctrine.

Alarm Detection's primary argument as to why these actions should not receive *Noerr-Pennington* immunity is that Orland FPD acted as a commercial entity. *See* R. 487 at 9 (citing *Wheeling-Pittsburgh Steel Corp. v. Allied Tube & Conduit Corp., 573 F. Supp. 833, 838 (N.D. Ill. 1983)* ("*Kurek* stands for the proposition that the *Noerr-Pennington* doctrine does not apply where the governmental body acted as a commercial entity (citing *Kurek v. Pleasure Driveway & Park Dist., 557 F.2d 580, 592 n.10 (7th Cir. 1977))*). But the Seventh Circuit has never denied *Noerr-Pennington* immunity based on a "commercial exception," and the authority for the existence of such an exception is weak, at best. The idea of a "commercial exception" originated with a First Circuit decision from 1970 holding that *Noerr-Pennington* immunity does not extend to **[**41]** efforts by private business to sell products to public officials acting under competitive bidding statutes. *See* *George R. Whitten, Jr., Inc. v. Paddock Pool Builders, Inc., 424 F.2d 25 (1st Cir. 1970)*. But the *Pennington* case itself immunized government coal purchases. *See* *United Mine Workers* of Am. v. Pennington, 381 U.S. 657, 671, **[*622]** 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965). On that basis, many courts have questioned the existence or viability of a "commercial exception." *See* Doron Precision Sys., Inc. v. FAAC, Inc., 423 F. Supp. 2d 173, 191 (S.D.N.Y. 2006) (citing cases); Santana Prods., Inc. v. Bobrick Washroom Equip., Inc., 249 F. Supp. 2d 463, 489-91 (M.D. Penn. Mar. 7, 2003) (citing cases).

Moreover, this case is not about the Villages or Orland FPD making purchases in the fire alarm monitoring market (as was true of the defendant fire protection district in *Lisle-Woodridge*). Rather, the effect of the Villages' ordinances is to define the market for fire alarm monitoring in Orland FPD in the first place. The evidence simply does not support Alarm Detection's contention that Orland FPD is acting as a commercial entity. Thus, to the extent there is a "commercial exception" to the federal antitrust laws, it does not apply in this case.

Alarm Detection also argues that the "sham exception" should apply because "Tyco has promoted outdated technology and supported the District's misunderstanding of response times and denial of alternative means of transmission [s]ignals, even though these positions were inconsistent with its own positions in *Lisle-Woodridge* ***[**42]*** ." R. 487 at 9-10. The Court finds Alarm Detection's contention that Orland FPD's fire safety professionals would or could be fooled by such allegedly false information to be questionable at best. But even if Alarm Detection's contentions were true, and could be characterized as a "sham," they are not the kind of sham that serves as a basis to deny *Noerr-Pennington* immunity. The sham exception to *Noerr-Pennington* prevents the application of immunity where a defendant's act of "petitioning" was "a mere sham to cover what is actually nothing more than an attempt to interfere directly with the business relationships of a competitor." *City of Columbia v. Omni Outdoor Advert., Inc., 499 U.S. 365, 380, 111 S. Ct. 1344, 113 L. Ed. 2d 382 (1991)*. This exception "encompasses situations in which persons use the governmental *process*—as opposed to the *outcome* of that process—as an anticompetitive weapon." *Id.* "A 'sham' situation involves a defendant whose activities are not genuinely aimed at procuring favorable government action at all, not one who genuinely seeks to achieve his governmental result, but does so through improper means." *Id.* One "classic" example of sham petitioning is where a defendant files "frivolous objections to the license application of a competitor, with no expectation of achieving **[**43]** denial of the license but simply in order to impose expense and delay." *Id.* For example, denying meaningful access to the "appropriate city administrative and legislative fora" may constitute improper or even unlawful lobbying, but it does not necessarily constitute a "sham." *Id. at 381*.

At most, Alarm Detection contends that Tyco has used false information in an attempt to secure an exclusive contract for the Orland FPD market. The evidence supporting this contention is inconclusive at best. But to the extent Tyco's tactics could be described as "improper," they still do not constitute a basis to deny immunity to Tyco, because there is no evidence that Tyco did not genuinely desire to achieve an exclusive contract for fire alarm monitoring in Orland FPD. And there is no evidence that Tyco sought to abuse the governmental process in order to impede Alarm Detection's business in particular, as opposed to seeking to gain a greater share of the market, no matter the competitor. Absent such evidence, the sham exception does not apply.

For these reasons, even if Tyco could be found to have engaged in concerted action **[*623]** in violation of *Section 1*, or willful acquisition of monopoly power in violation of *Section 2*, Tyco **[**44]** is immune from any such liability.

III. ***Fourteenth Amendment***

Alarm Detection also claims that Tyco's and Orland FPD's actions constitute violations of the *Equal Protection* and *Due Process clauses of the Fourteenth Amendment*. The Court previously held that these claims were time-barred. Alarm Detection has filed a motion to reconsider that holding. R. 488.

A. Statute of Limitations

In its previous decision, the Court held that Alarm Detection's pleadings demonstrated that it had been excluded from the Orland FPD market at least since 2003 when Orland FPD signed an exclusive agreement with Tyco.

Despite the age of this exclusion, Alarm Detection argued then, and argues again, that the 2014 contract constitutes a new and discrete act that is within the statute of limitations. R. 125 at 14. The Court held that "[e]ven if such acts constituted fresh injuries to Alarm Detection's constitutional rights . . . they are insufficient to trigger the application of the continuing violation doctrine, because the doctrine is reserved for only those cases where a plaintiff could not reasonably be expected to have perceived or known about the alleged violation." R. 237 at 50 (*Alarm Detection, 129 F. Supp. 3d at 641*).

The Court's holding would have been correct with respect to an attempt to make old injuries **[**45]** actionable. But the Court was incorrect that the notice provided by earlier conduct made actions for relief based on more recent injuries untimely. As the Court held with respect to the timeliness of Alarm Detection's antitrust claims, the 2014 ordinances and contract renewal are sufficiently overt actions to start a new statute of limitations. Since Alarm Detection brought this action in 2014, the Court reconsiders it earlier decision and finds that Alarm Detection's *Fourteenth Amendment* claims are timely.

B. Merits

Alarm Detection argues that Orland FPD does not have the authority under the District Act to make its agreement with Tyco. And since Orland FPD does not have the authority to make that agreement, Alarm Detection argues it is arbitrary conduct that cannot satisfy the rational basis test of the *Equal Protection Clause*. Specifically, Alarm Detection argues that "Orland FPD is not authorized by the District Act to [1] exclusively engage in fire alarm monitoring; [2] control the decision over transmission equipment; or [3] collect fees from its residents." R. 481 at 17-18.

As to the first two contentions, both the Villages and Orland FPD have statutory authority to require a direct connect fire alarm monitoring. Further, **[**46]** Orland FPD's power to contract under the District Act necessarily implies the authority to enter into exclusive contracts. Moreover, although a governmental entity's decision to enter into an exclusive contract "inherently involves a kind of discrimination," it does not violate the *Equal Protection Clause* when government actors merely exercise their discretion. *See* *Corey Airport Servs., Inc. v. Clear Channel Outdoor, Inc., 682 F.3d 1293, 1298 (11th Cir. 2012)*; *see also* *Higgins Elec., Inc. v. O'Fallon Fire Prot. Dist., 813 F.3d 1124, 1129 (8th Cir. 2016)* ("Furthermore, a class-of-one claim does not extend to cases where the rules are uniformly applicable and a state official exercises his discretionary authority based on subjective, individualized determinations."). Thus, the mere fact that Orland FPD entered into an agreement with one fire alarm services **[*624]** company rather than another does not demonstrate a violation of the *Equal Protection Clause*.

Additionally, to the extent the District Act prohibits Orland FPD itself from engaging in transmission of fire alarm signals and collecting fees from residents, Alarm Detection has not proven that Orland FPD engages in such activities. Rather, the evidence shows that Orland FPD contracts with Tyco to provide fire alarms transmission services to its residents. Alarm Detection also concedes that the $23.50 Tyco remits to Orland FPD for each commercial account is "consideration" **[**47]** for the right to the exclusive contract. *See* R. 481 at 3.

Alarm Detection also claims that Orland FPD "violated [its] due process rights because: (1) [Alarm Detection] is licensed under the Alarm Act and has a protected property interest in engaging in the Business; and (2) [Alarm Detection] was deprived of its property interest due to Defendants' arbitrary conduct." R. 481 at 17. This claim fails. First, Alarm Detection does not claim that it has lost its license under the Alarm Act. Second, Alarm Detection has cited no authority over the course of four years of litigating this case to demonstrate that it has a protected property right in the business of alarm monitoring in Orland FPD. Absent, such a property right, there can be no due process violation.

Therefore, the Court finds for Defendants on Alarm Detection's *Fourteenth Amendment* claims.

IV. Unjust Enrichment

The Court noted earlier in the case that Alarm Detection's claim for unjust enrichment would rise or fall with its other claims. *See* R. 316 at 36 (*Alarm Detection Sys., Inc. v. Orland Fire Prot. Dist., 194 F. Supp. 3d 706, 727 (N.D. Ill. 2016)* (citing *Cleary v. Philip Morris Inc., 656 F.3d 511, 517 (7th Cir. 2011))*). That holding stands, and the Court finds for Defendants on Alarm Detection's unjust enrichment claim.

Conclusion

For the foregoing reasons, the Court finds in favor of Defendants and against **[**48]** Alarm Detection on all counts.[5]

ENTERED:

/s/ Thomas M. Durkin

Honorable Thomas M. Durkin

United States District Judge

Dated: August 2, 2018

End of Document

[5] It has taken too long to reach a final judgment in this case. The case would have benefited from clearer thinking earlier in the proceedings about what facts, case law, and legal doctrine would ultimately prove to be dispositive—most notably the *Fisher* line of cases which the parties never addressed until ordered to do so in supplemental post-trial briefing.

In re Namenda Direct Purchaser Antitrust Litig.

United States District Court for the Southern District of New York

August 2, 2018, Decided; August 16, 2018, Filed

No. 15 Civ. 7488 (CM)

Reporter

331 F. Supp. 3d 152 *; 2018 U.S. Dist. LEXIS 140768 **; 107 Fed. R. Evid. Serv. (Callaghan) 215

LexisNexis® Headnotes

Civil Procedure > Judgments > Summary Judgment > Evidentiary Considerations

Evidence > Admissibility > Expert Witnesses

HN1[] **Summary Judgment, Evidentiary Considerations**

If the expert testimony is excluded as inadmissible, the court must make the summary judgment determination without that evidence.

Civil Procedure > Judicial Officers > Judges > Discretionary Powers

Evidence > Admissibility > Expert Witnesses

Civil Procedure > Judgments > Summary Judgment > Evidentiary Considerations

HN2[] **Judges, Discretionary Powers**

On a summary judgment motion, the district court properly considers only evidence that would be admissible at trial. Whether expert evidence should be admitted on a motion for summary judgment is a matter committed to the district court's broad discretion.

Evidence > Admissibility > Expert Witnesses > Daubert Standard

Evidence > Admissibility > Expert Witnesses > Helpfulness

Evidence > ... > Testimony > Expert Witnesses > Qualifications

HN3[] **Expert Witnesses, Daubert Standard**

Under *Fed. R. Evid. 702*, which codifies the standard for admissibility set forth, the court's role is to determine whether the expert is qualified to testify as an expert. *Rule 702* provides that a witness who is qualified as an expert by knowledge, skill, experience, training, or education may testify in the form of an opinion or otherwise if: (a) the expert's scientific, technical, or other specialized knowledge will help the trier of fact to understand the evidence or to determine a fact in issue; (b) the testimony is based on sufficient facts or data; (c) the testimony is the product of reliable principles and methods; and (d) the expert has reliably applied the principles and methods to the facts of the case. *Fed. R. Evid. 702*.

Evidence > Admissibility > Expert Witnesses > Daubert Standard

Evidence > Burdens of Proof > Initial Burden of Persuasion

HN4[] **Expert Witnesses, Daubert Standard**

The proponent of the expert testimony has the burden to establish the *Fed. R. Evid. 702* admissibility requirements, with the district court acting as a gatekeeper to ensure that the expert's testimony both rests on a reliable foundation and is relevant to the task at hand.

Evidence > Admissibility > Expert Witnesses > Daubert Standard

HN5[] **Expert Witnesses, Daubert Standard**

Though *Fed. R. Evid. 702* embodies a liberal standard of admissibility when an expert opinion is based on data, a methodology, or studies that are simply inadequate to support the conclusions reached, Daubert and *Rule 702* mandate the exclusion of that unreliable opinion testimony. In Daubert, the United States Supreme Court confirmed that trial courts should serve as sentries, preventing juries from being overwhelmed by unsupportable speculation cloaked as expertise.

Evidence > Admissibility > Expert Witnesses > Daubert Standard

HN6[] **Expert Witnesses, Daubert Standard**

The Second Circuit has held that to warrant admissibility, it is critical that an expert's analysis be reliable at every step. Of course, the district court must focus on the principles and methodology employed by the expert, without regard to the conclusions the expert has reached or the district court's belief as to the correctness of those conclusions. Nevertheless, as the U.S. Supreme Court has recognized, conclusions and methodology are not entirely distinct from one another Nothing in either Daubert or the Federal Rules of Evidence requires a district court to admit opinion evidence that is connected to existing data only by the ipse dixit of the expert. A court may conclude that there is simply too great an analytical gap between the data and the opinion proffered.

Evidence > Admissibility > Expert Witnesses > Daubert Standard

HN7[] Expert Witnesses, Daubert Standard

The standard to evaluate non-scientific expert testimony is whether the expert bases testimony upon professional studies or personal experience and employs in the courtroom the same level of intellectual rigor that characterizes the practice of an expert in the relevant field.

Evidence > Admissibility > Expert Witnesses > Daubert Standard

Evidence > ... > Testimony > Expert Witnesses > Qualifications

HN8[] Expert Witnesses, Daubert Standard

An expert's experience is no substitute for scientifically sound analysis.

Evidence > Admissibility > Expert Witnesses > Daubert Standard

HN9[] Expert Witnesses, Daubert Standard

The Court must exclude unsupported speculation cloaked as expertise.

Evidence > Types of Evidence > Testimony > Credibility of Witnesses

Evidence > Admissibility > Expert Witnesses > Daubert Standard

HN10[] Testimony, Credibility of Witnesses

The amended Rules of Evidence require that expert testimony be based on sufficient facts or data and on reliable principles and methods that the expert witness has applied reliably to the facts of the case. *Fed. R. Evid. 702*. Credibility of witnesses is not the province of an expert; indeed, it is an arrogation of the function of the trier of fact.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason

HN11[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

The U.S. Supreme Court has specifically declined to hold that reverse payment settlement agreements are presumptively unlawful. It instructed courts reviewing such agreements to proceed by applying a rule of reason analysis to reverse payment agreements. Under this analysis, courts have to assess the payment's size, its scale in relation to the payor's anticipated future litigation costs, its independence from other services for which it might represent payment, and the lack of any other convincing justification. Thus, only those reverse payments that are large and unjustified violate the antitrust laws.

Antitrust & Trade Law > Regulated Practices > Private Actions

HN12[] **Regulated Practices, Private Actions**

An antitrust claim has three elements: (1) a violation of ***antitrust law***; (2) injury and causation; and (3) damages. The second element of an antitrust claim - commonly referred to as antitrust injury - requires an antitrust plaintiff to prove that its injury was, in fact, caused by the defendant's violation of the antitrust laws.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Regulated Practices > Private Actions

HN13[] **Sherman Act, Claims**

A plaintiff is only required to show that alleged illegal conduct is a material cause of the antitrust injury; a plaintiff need not exhaust all possible alternative sources of injury in fulfilling his burden of proving compensable injury. To prove a causal connection between the defendant's unlawful conduct and the plaintiff's injury, the plaintiff need only demonstrate that the defendant's conduct was a substantial or materially contributing factor in producing that injury. Second Circuit precedent makes clear that in order to prove causation: Plaintiffs do not have to prove that the unlawful activity that the defendants allegedly engaged in was the sole cause of their injuries. The meet their burden if they show that the defendants' unlawful facts substantially contributed to their injuries, even though other facts may have contributed significantly. An antitrust plaintiff is not required to show that the defendants' acts were a greater cause of the injury than other factors. Plaintiffs need only show that their injury to some degree resulted from defendants' violation.

Antitrust & Trade Law > Regulated Practices > Private Actions > Remedies

HN14[] **Private Actions, Remedies**

The use of defendants' own forecasts to model a but-for world has been held to be a sound economic methodology. Indeed, it is commonly used in courts considering generic delay damages in the context of antitrust actions.

Evidence > Admissibility > Expert Witnesses > Helpfulness

HN15[] **Expert Witnesses, Helpfulness**

While the Second Circuit is in accord with other circuits in requiring exclusion of expert testimony that expresses a legal conclusion, expert testimony is viewed as helpful in cases involving complex statutes or issues outside of the general knowledge of the jury.

Evidence > Admissibility > Expert Witnesses > Ultimate Issue

HN16[] **Expert Witnesses, Ultimate Issue**

Unless a patent lawyer is also a qualified technical expert, his testimony on technical issues relating to issues of infringement or validity is improper and thus inadmissible. The federal circuit advises district courts to consider the perspective from which the relevant issue of patent law will be analyzed when the court determines whether an expert is qualified to testify as an expert on that issue.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Federal Food, Drug & Cosmetic Act

HN17[] **Agriculture & Food, Federal Food, Drug & Cosmetic Act**

Under the Federal Food, Drug, and Cosmetic Act (FDCA), *21 U.S.C.S. § 301 et seq.*, a pharmaceutical company must submit a New Drug Application (NDA) to the Food and Drug Administration (FDA) before it may bring a new drug to market. *21 U.S.C.S. § 355*. Because the NDA must provide the FDA with sufficient scientific data to demonstrate that the new drug is safe and effective, the testing and approval process is generally long, comprehensive, and costly. Once approved, though, a patented drug enjoys a period of market exclusivity. That period ends when the drug's patent expires and one or more low-cost generic versions of the drug enter the market and compete with the brand-name drug-what is referred to as going off the patent cliff.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Federal Food, Drug & Cosmetic Act

HN18[] **Agriculture & Food, Federal Food, Drug & Cosmetic Act**

The Drug Price Competition and Patent Term Restoration Act (the Hatch-Waxman Act), Pub. L. No. 98-417, 98 Stat. 1585, makes it easier for manufacturers of generic drugs to compete with brand-name drug producers. The Hatch-Waxman Act provides two methods by which a brand-name drug manufacturer can extend its period of market exclusivity. First, a manufacturer can seek an extension of its patent from the United States Patent and Trademark Office to account for the time the manufacturer spent obtaining approval from the Food and Drug Administration (FDA) for its brand-name drug. *35 U.S.C.S. § 156*. That extension can last no more than five years. *Section 156(g)(6)*. Second, a brand-name drug manufacturer can obtain a six-month period of "pediatric exclusivity" if it conducts certain pediatric studies and the FDA determines that use of the drug in children may produce health benefits. *21 U.S.C.S. § 355a*. A grant of pediatric exclusivity does not extend the length of the underlying patent, but can operate to exclude generic competition by delaying the date by which the FDA may approve generics for sale.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Federal Food, Drug & Cosmetic Act

HN19[] **Agriculture & Food, Federal Food, Drug & Cosmetic Act**

Under the Drug Price Competition and Patent Term Restoration Act (the Hatch-Waxman Act), Pub. L. No. 98-417, 98 Stat. 1585, the manufacturer of a generic version of an Food and Drug Administration (FDA)-approved drug may file an Abbreviated New Drug Application (ANDA), which allows the generic manufacturer to rely upon the studies submitted by the brand-name drug manufacturer in connection with the original New Drug Application (NDA) to prove that the generic version of the drug is safe and effective. The ANDA filer must certify that its generic drug, among other things, has the same active ingredient as, and is bioequivalent to, the previously-approved drug. *21 U.S.C.S. § 355(j)(2)(A)(ii)*, *(iv)*. A generic drug is bioequivalent to the brand-name drug if it has the same rate and extent of absorption of the active ingredient as that of the brand-name drug. *21 U.S.C.S. § 355(j)(8)(B)(i)*. In other words, two drugs are bio equivalent if they deliver the same amount of the same active ingredient content into a patient's blood stream over the same amount of time.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Appropriateness

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Legal Entitlement

HN20[] **Entitlement as Matter of Law, Appropriateness**

A party is entitled to summary judgment when there is no genuine issue of material fact and the undisputed facts warrant judgment for the moving party as a matter of law. *Fed. R. Civ. P. 56*. In addressing a motion for summary judgment, the court must view the evidence in the light most favorable to the party against whom summary judgment is sought and must draw all reasonable inferences in its favor. Whether any disputed issue of fact exists is for the court to determine. The moving party has the initial burden of demonstrating the absence of a disputed issue of material fact. Once such a showing has been made, the nonmoving party must present specific facts showing that there is a genuine issue for trial. The party opposing summary judgment may not rely on conclusory allegations or unsubstantiated speculation.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Materiality of Facts

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Nonmovant Persuasion & Proof

HN21[] **Entitlement as Matter of Law, Materiality of Facts**

Not every disputed factual issue is material in light of the substantive law that governs the case. Only disputes over facts that might affect the outcome of the suit under the governing law will properly preclude the entry of summary judgment. The nonmoving party must do more than simply show that there is some metaphysical doubt as to the material facts. To withstand a summary judgment motion, sufficient evidence must exist upon which a reasonable jury could return a verdict for the nonmovant.

Antitrust & Trade Law > Regulated Practices > Intellectual Property > Bad Faith, Fraud & Nonuse

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade

HN22[] **Intellectual Property, Bad Faith, Fraud & Nonuse**

The U.S. Supreme Court has held that a reverse payment settlement-that is, a payment by a patentee to a claimed infringer-is not presumptively either lawful or unlawful, but will be subject to antitrust scrutiny in certain circumstances. Reverse payments are of particular concern when they demonstrate that the patentee sought to induce the infringer to abandon its claim with a share of its monopoly profits that would otherwise be lost in the competitive market. To violate ***antitrust law***, a reverse payment must be both large and unjustified. A payment's size may indicate that the patentee likely possesses the power to bring an unjustified anticompetitive harm about in practice. In other words, a large reverse payment may signal that the patentee possessed the power to charge prices higher than the competitive level and may be using that power to keep others from entering its market. Such a payment may also indicate a patent holder's concern about the validity of its patent, such that the size of the payment may very well correspond with the magnitude of that concern.

Antitrust & Trade Law > Regulated Practices > Intellectual Property > Bad Faith, Fraud & Nonuse

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Nonmovant Persuasion & Proof

Evidence > Burdens of Proof > Burden Shifting

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade

HN23[] Intellectual Property, Bad Faith, Fraud & Nonuse

The U.S. Supreme Court has acknowledged that there also might be legitimate justifications for a reverse payment settlement, including, but not limited to, avoided litigation costs or fair value for services. The Court has directed district courts to apply the traditional rule of reason analysis when evaluating reverse payment settlements. First, the plaintiff bears the initial burden of showing that the defendant's conduct had an actual adverse effect on competition as a whole in the relevant market. If plaintiff satisfies this burden, the burden then shifts to defendant to offer evidence that its conduct had pro-competitive effects. If defendant is able to offer such proof, the burden shifts back to plaintiff, who must prove that any legitimate competitive effects could have been achieved through less restrictive alternatives. To survive summary judgment, the plaintiffs must present a genuinely disputed issue of material fact as to the elements of the rule of reason analysis; only then will the case go to a jury.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Regulated Practices > Private Actions

HN24[] Sherman Act, Claims

Causation in fact is, of course, a necessary element of any claim for relief. An antitrust plaintiff must show that a defendant's anticompetitive act was a material and but-for cause of plaintiffs injury, although not necessarily the sole cause. A plaintiff need not exhaust all possible alternative sources of injury in fulfilling his burden of proving compensable injury.

Civil Procedure > Trials > Jury Trials > Province of Court & Jury

HN25[] Jury Trials, Province of Court & Jury

It is up to the jury to weigh the evidence.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN26[] Class Actions, Certification of Classes

Fed. R. Civ. P. 23 governs class certification. The Second Circuit has emphasized that *Rule 23* should be given liberal rather than restrictive construction, and it seems beyond peradventure that the Second Circuit's general preference is for granting rather than denying class certification.

Civil Procedure > Special Proceedings > Class Actions > Prerequisites for Class Action

HN27[] Class Actions, Prerequisites for Class Action

A putative class must meet the four prerequisites set forth in *Fed. R. Civ. P. 23(a)* to be certified: numerosity, commonality, typicality, and adequacy of representation. If even one of the *Rule 23(a)* requirements is not met, certification must be denied. The requirements of *Rule 23*, by effectively confining the class claims to those fairly encompassed by the claims of the named plaintiffs, ensure that those plaintiffs are appropriate representatives of the class whose claims they wish to litigate.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Numerosity

HN28[] Prerequisites for Class Action, Numerosity

Numerosity requires that the class must be so numerous that joinder of all members is impracticable. *Fed. R. Civ. P. 23(a)(1)*. As certain presumptions attach depending on the sheer size of the class, the number of members in a putative class is the starting point of the *Rule 23(a)(1)* analysis. Classes with forty or more putative members raise a rebuttable presumption that joinder is impracticable. For classes with fewer than twenty members, however, joinder is generally deemed practical. Keeping in mind that the inquiry is not strictly mathematical, the district court must analyze each case separately to determine whether the numerosity requirement has been satisfied, considering the following factors: 1. judicial economy; 2. geographic dispersion of the proposed class members; 3. financial resources of the proposed class members; 4. the ability of proposed class members to file individual suits; 5. requests for relief that could affect future class members; 6. knowledge of the names and existence of potential class members; and 7. whether potential class members have already joined in other actions.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

HN29[] Prerequisites for Class Action, Commonality

Commonality requires that there exist questions of law or fact that are both common to the class and answerable through a class-wide proceeding. *Fed. R. Civ. P. 23(a)(2)*. The U.S. Supreme Court has clarified that this prong also requires the plaintiff to demonstrate that the class members have suffered the same injury. Where plaintiffs move to certify a class under *Rule 23(b)(3)*, the commonality requirement is subsumed under, or superseded by, the more demanding predominance requirement of *Rule 23(b)(3)*.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Typicality

HN30[] Prerequisites for Class Action, Typicality

Typicality is satisfied when each class member's claim arises from the same course of events, and each class member makes similar legal arguments to prove the defendant's liability. Similar considerations animate commonality and typicality such that the analyses under *Fed. R. Civ. P. 23(a)(2)* and *(3)* tend to merge.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Adequacy of Representation

HN31[] Prerequisites for Class Action, Adequacy of Representation

Adequacy requires that the representative parties fairly and adequately protect the interests of the class. *Fed. R. Civ. P. 23(a)(4)*. Class counsel must be qualified, experienced, and generally able to conduct the litigation. *Rule 23(a)(4)* requires that the class representative be aware of the basic facts underlying the lawsuit and not likely to abdicate his obligations to fellow class members. This requirement is a modest one-class representative status may be denied only where the class representatives have so little knowledge of and involvement in the class action that they would be unable or unwilling to protect the interests of the class against the possible competing interests of the attorneys. If certain members of the class are subject to unique defenses, the court must inquire as to whether those defenses threaten to become the focus of the litigation.

Civil Procedure > Special Proceedings > Class Actions > Class Members

Civil Procedure > Special Proceedings > Class Actions > Prerequisites for Class Action

HN32[] **Class Actions, Class Members**

In addition to the four factors enumerated in *Fed. R. Civ. P. 23(a)*, there is an implied requirement that the membership of the class is identifiable and ascertainable. A class is ascertainable if it is (1) sufficiently bounded so that it is feasible for the court to determine whether a particular individual is a member, and (2) defined by objective criteria that avoid a mini-hearing on the merits of each case.

Civil Procedure > Special Proceedings > Class Actions > Prerequisites for Class Action

HN33[] **Class Actions, Prerequisites for Class Action**

If the class proponent satisfies each of the *Fed. R. Civ. P. 23(a)* prerequisites, he must next demonstrate that at least one of the three requirements listed in subsection 23(b) is met. Subsection 23(b)(3) allows a claim for damages to proceed as a class if it is established that (1) common questions predominate over individual questions (the predominance requirement), and (2) the class action vehicle is superior to other possible methods of fairly and efficiently adjudicating the controversy (the superiority requirement). *Fed. R. Civ. P. 23(b)(3)*.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN34[] **Prerequisites for Class Action, Predominance**

The predominance requirement, as a general matter, tests whether proposed classes are sufficiently cohesive to warrant adjudication by representation. Even where *Fed. R. Civ. P. 23(a)*'s commonality requirement is satisfied, predominance under *Rule 23(b)(3)* is not necessarily met because the latter requires considerably more. More than their mere presence, *Rule 23(b)(3)* requires that questions common to the class predominate over individual ones. Determining whether a question is common or individual depends on the kind of proof that will be needed to resolve that question at trial. An individual question is one for which members of a proposed class will need to present evidence that varies from member to member, while a common question is one for which the same evidence will suffice for each member to make a prima facie showing or the issue is susceptible to generalized, class-wide proof. Plaintiffs are not, however, required to prove that these questions will be answered in their favor in order to certify a class under this provision. Moreover, individual questions need not be absent in order to certify a class under *Rule 23(b)(3)*; the text of *Rule 23(b)(3)* itself contemplates that such questions will be present. The rule requires only that those questions not predominate over the common questions affecting the class as a whole.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Superiority

HN35[] **Prerequisites for Class Action, Superiority**

A district court must determine that a class action is superior to other available methods for fairly and efficiently adjudicating the controversy. *Fed. R. Civ. P. 23(b)(3)*. While, structurally, the four factors set forth in *Rule 23(b)(3)* govern both predominance and superiority, the Second Circuit has held that they more clearly implicate the latter. Accordingly, in determining whether the class action is a superior method, courts consider: (A) the class members' interests in individually controlling the prosecution or defense of separate actions; (B) the extent and nature of any litigation concerning the controversy already begun by or against class members; (C) the desirability or undesirability of concentrating the litigation of the claims in the particular forum; and (D) the likely difficulties in managing a class action. *Fed. R. Civ. P. 23(b)(3)*. Manageability is, by far, the most critical factor in the superiority determination.

Civil Procedure > Special Proceedings > Class Actions > Class Members

HN36[] **Class Actions, Class Members**

The United States District Court for the Southern District of New York joins with other courts that have considered the issue and have ruled that where there is distinct and separate injury, a corporate relationship with another class member does not defeat individual member status.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN37[] **Class Actions, Certification of Classes**

It is well-established that a certifying court is not bound by the class definition proposed in the complaint. However, this principle is customarily cited as support for the court's ability to narrow a proposed class. Far fewer cases support the converse proposition that the court may approve the expansion of the class as it was defined in the complaint.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > Special Proceedings > Class Actions > Class Members

HN38[] **Class Actions, Certification of Classes**

A plaintiff's expansion of the class definition beyond that which was proposed in the complaint is not categorically improper. Rather, the court may consider whether the newly proposed class members satisfy the substantive requirements of *Fed. R. Civ. P. 23(a)*.

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

HN39[] **Purchasers, Indirect Purchasers**

Indirect purchasers are those who buy from the customers of a defendant-from people to whom the defendant sold product.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN40[] **Standing, Requirements**

Plaintiffs have standing to bring antitrust claims against defendants if they (1) have suffered an antitrust injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful, and (2) are proper plaintiffs in light of the four efficient enforcer factors.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN41[] **Standing, Requirements**

In the context of the "proper plaintiff prong" to assert an antitrust claim, plaintiffs may have standing if they satisfy the efficient enforcer criteria, which looks to the (1) directness of the asserted injury, or causation; (2) self-interest of the class of persons to vindicate the public interest, or motivation; (3) speculativeness of the alleged injury; and (4) difficulty of identifying and apportioning damages so as to avoid duplicative recoveries.

Civil Procedure > Special Proceedings > Class Actions > Prerequisites for Class Action

HN42[] **Class Actions, Prerequisites for Class Action**

The analyses of typicality, commonality, and predominance share a similar focus. They test whether the class is sufficiently cohesive to warrant adjudication by representation.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Regulated Practices > Private Actions

HN43[] **Sherman Act, Claims**

In the context of antitrust claims, plaintiffs must show that three elements are capable of proof at trial through evidence common to the class: (1) a violation of ***antitrust law***; (2) injury and causation; and (3) damages.

Antitrust & Trade Law > Regulated Practices > Private Actions > Remedies

HN44[] **Private Actions, Remedies**

It is not enough that plaintiffs supply a method to measure and quantify damages on a class-wide basis; the court must be satisfied that the methodology is a just and reasonable inference, and is not speculative.

Antitrust & Trade Law > ... > Private Actions > Purchasers > Direct Purchasers

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN45[] **Purchasers, Direct Purchasers**

The court rejects the argument that a class comprising direct purchasers must show that individual payment decisions were the result of the defendant's alleged conduct.

Civil Procedure > Trials > Jury Trials > Province of Court & Jury

Evidence > Types of Evidence > Testimony > Expert Witnesses

HN46[] **Jury Trials, Province of Court & Jury**

It is for the jury to decide whether the an expert's opinions are persuasive.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Superiority

HN47[] Prerequisites for Class Action, Superiority

In the context of superiority, the first consideration under *Fed. R. Civ. P. 23(b)(3)(A)* is whether the class members have an interest in controlling the prosecution of separate actions.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN48[] Class Actions, Certification of Classes

Class treatment is appropriate in such negative value cases, in which each class members' interest in the litigation is less than the cost to maintain an individual action. As the U.S. Supreme Court has said, *Fed. R. Civ. P. 23(b)(3)* class actions can be superior precisely because they facilitate the redress of claims where the costs of bringing individual actions outweigh the expected recovery.

Civil Procedure > Judicial Officers > Judges > Discretionary Powers

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Superiority

HN49[] Judges, Discretionary Powers

As to the most important consideration in the superiority analysis, the manageability of a particular class action is an issue peculiarly within a district court's discretion.

Opinion

[*167] MEMORANDUM DECISION AND ORDER DENYING DEFENDANTS' MOTION FOR SUMMARY JUDGMENT; GRANTING IN SUBSTANTIAL PART AND DENYING IN PART [4] DEFENDANTS' *DAUBERT MOTIONS* TO EXCLUDE OPINIONS AND TESTIMONY OF PLAINTIFFS' EXPERTS; AND GRANTING PLAINTIFFS' MOTION FOR CLASS CERTIFICATION**

McMahon, C.J.:

Plaintiffs J.M. Smith Corporation d/b/a Smith Drug Company ("Smith") and Rochester Drug Co-Operative, Inc. ("RDC") (collectively, "Direct Purchaser Plaintiffs" or "Plaintiffs") commenced this antitrust suit on behalf of themselves and a putative class of similarly situated purchasers of Namenda. Plaintiffs allege that Defendants - Actavis PLC (now known as Allergan PLC), Forest Laboratories, LLC, Forest Laboratories, Inc., and Forest Laboratories Holdings Ltd. (collectively, "Forest" or "Defendants") - schemed to delay entry of generic versions of an Alzheimer's disease treatment by entering into collusive settlements with various generic drug companies and attempting a hard switch in violation of *sections 1* and *2* of the *Sherman Act*, *15 U.S.C. §§ 1*, *2 (2016)*.

Namenda® ("Namenda") is a branded drug used to treat moderate to severe stages of Alzheimer's, a neurodegenerative brain disease that causes memory loss, among other symptoms. Forest had a license to market both Namenda IR (immediate release), a twice-daily drug, and Namenda XR (extended release), a **[**5]** once-daily drug, in the United States under U.S. Patent No. 5,061,703 (the "'703 Patent"). (Am. Compl. ¶ 2, Dkt. No. 29.)

Plaintiffs allege that Forest engaged in a two-part anticompetitive scheme to improperly block generic competition for Namenda IR by: (1) conspiring with manufacturers of generic versions of Namenda IR to drop their legal challenges to the '703 Patent and delay launch of generic versions of Namenda IR until an identical date three months after the expiration of the '703 Patent; and (2) using this improperly obtained period of additional exclusivity to launch the successor branded product, Namenda XR, in order to force the conversion of the market from Namenda IR to the clinically equivalent Namenda XR (hereinafter the "hard switch") before market entry of the generic versions of Namenda IR. (*See id.* at ¶ 5.) Here, Plaintiffs allege that Defendants' illegal hard switch strategy included prematurely removing Namenda IR from the market before its patent expiration such that only Namenda

XR would be available for purchase in the months before Forest faced generic competition for Namenda IR. Plaintiffs allege Defendants knew that, given the nature of Alzheimer's treatment, once a patient was on Namenda XR, there was a decreased **[**6]** likelihood that the patient would "reverse commute" back to a generic version of Namenda IR after cheaper generic versions of the drug became available.

Presently before the Court are two motions: Defendants' motion for summary judgment on all claims in Direct Purchaser Plaintiffs' First Amended Complaint (Dkt. No. 434) and Plaintiffs' motion to certify this as a class action. (Dkt. No. 400.) For the reasons set forth below, Defendants' motion for summary judgment is DENIED, and Plaintiffs' motion for class certification is GRANTED.

[*168] Additionally, Defendants have filed six separate motions to exclude the opinions and proposed testimony of Plaintiffs' experts (*see* Dkt. Nos. 437, 439, 441, 443, 445, 505), each of which is addressed below.

I. *DAUBERT* MOTIONS

Before I recount the facts, I must consider exactly what should and should not be part of the record on Defendants' motion for summary judgment. ***HN1***[] "If the expert testimony is excluded as inadmissible, the court must make the summary judgment determination without that evidence." *Water Pollution Control Auth. of City of Norwalk v. Flowserve US Inc., No. 3:14 Civ. 00549 (VLB), 2018 U.S. Dist. LEXIS 52168, 2018 WL 1525709, at *5 (D. Conn. Mar. 28, 2018)*.

Defendants have moved to exclude the opinions and proposed testimony **[**7]** of: (1) Janet K. DeLeon (Dkt. No. 437); (2) Professor Einer Elhauge (Dkt. No. 439); (3) Dr. Russell Lamb (Dkt. No. 445); (4) Dr. Ernest Berndt and Dr. Russell Lamb regarding their use of forecast averages (Dkt. No. 441); (5) John R. Thomas, Esq. (Dkt. No. 505); and (6) George W. Johnston, Esq. (Dkt. No. 443).

The Daubert Standard

HN2[] "On a summary judgment motion, the district court properly considers only evidence that would be admissible at trial." *Nora Beverages, Inc. v. Perrier Grp. of Am., Inc., 164 F.3d 736, 746 (2d Cir. 1998)* (citing *Raskin v. Wyatt Co., 125 F.3d 55, 66 (2d Cir. 1997))*. Whether expert evidence should be admitted on a motion for summary judgment is a matter committed to the district court's "broad discretion." *Yurman Design, Inc. v. PAJ, Inc., 29 F. App'x 46, 48 (2d Cir. 2002)* (internal citation and quotation marks omitted); *see also* *Nora Beverages, Inc., 164 F.3d at 746*.

HN3[] Under *Rule 702 of the Federal Rules of Evidence*, which codifies the standard for admissibility set forth by *Daubert v. Merrell Dow Pharmaceuticals, Inc., 509 U.S. 579, 113 S. Ct. 2786, 125 L. Ed. 2d 469 (1993)*, the court's role is to determine whether the "expert" is qualified to testify as an expert. *Rule 702* provides:

> A witness who is qualified as an expert by knowledge, skill, experience, training, or education may testify in the form of an opinion or otherwise if: (a) the expert's scientific, technical, or other specialized knowledge will help the trier of fact to understand the evidence or to determine a fact in issue; (b) the testimony is based on sufficient facts or data; (c) **[**8]** the testimony is the product of reliable principles and methods; and (d) the expert has reliably applied the principles and methods to the facts of the case.

Fed. R. Evid. 702.

HN4[] "The proponent of the expert testimony has the burden to establish the [*Rule 702*] admissibility requirements, with the district court acting as a gatekeeper to ensure that the expert's testimony both rests on a reliable foundation and is relevant to the task at hand." *Novick v. AXA Network LLC, 714 F. App'x 22, 25 (2d Cir. 2017)* (citing *In re Pfizer Inc. Sec. Litig., 819 F.3d 642, 658 (2d Cir. 2016))* (internal citation omitted); *see also*

United States v. Apple, Inc., 791 F.3d 290, 335 n.24 (2d Cir. 2015) (citing *United States v. Williams, 506 F.3d 151, 160 (2d Cir. 2007))*.

HN5[] Though the Rule "embodies a liberal standard of admissibility," *Nimely v. City of New York, 414 F.3d 381, 395 (2d Cir. 2005)*, "when an expert opinion is based on data, a methodology, or studies that are simply inadequate to support the conclusions reached, *Daubert* and *Rule 702* mandate the exclusion of that unreliable opinion testimony." *Cedar Petrochemicals, Inc. v. Dongbu Hannong Chem. Co., 769 F. Supp. 2d 269, 282 (S.D.N.Y. 2011)* (internal citations omitted). "In *Daubert*, the **[*169]** United States Supreme Court confirmed that trial courts should serve as sentries, preventing juries from being overwhelmed by unsupportable speculation cloaked as expertise." *Id. at 281* - 82.

HN6[] Furthermore, the Second Circuit has held that to "warrant admissibility . . . it is critical that an expert's analysis be reliable at every step." *United States v. Morgan, 675 F. App'x 53, 55 (2d Cir. 2017)*, *cert. denied*, *138 S. Ct. 176, 199 L. Ed. 2d 103 (2017)* (internal citation omitted). Of course, "the district court **[**9]** must focus on the principles and methodology employed by the expert, without regard to the conclusions the expert has reached or the district court's belief as to the correctness of those conclusions." *Amorgianos v. Nat'l R.R. Passenger Corp., 303 F.3d 256, 266 (2d Cir. 2002)* (internal citation omitted). Nevertheless, as the Supreme Court has recognized,

> conclusions and methodology are not entirely distinct from one another . . . [N]othing in either *Daubert* or the Federal Rules of Evidence requires a district court to admit opinion evidence that is connected to existing data only by the *ipse dixit* of the expert. A court may conclude that there is simply too great an analytical gap between the data and the opinion proffered.

Id. at 266 (citing *Gen. Elec. Co. v. Joiner, 522 U.S. 136, 146, 118 S. Ct. 512, 139 L. Ed. 2d 508 (1997))*.

HN7[] Moreover, "The standard to evaluate non-scientific expert testimony is whether the expert bases testimony upon professional studies or personal experience and employs in the courtroom the same level of intellectual rigor that characterizes the practice of an expert in the relevant field." *Louisiana Wholesale Drug Co. v. Sanofi-Aventis, No. 07 Civ. 7343 (HB), 2008 U.S. Dist. LEXIS 81328, 2008 WL 4580016, at *6 (S.D.N.Y. Oct. 14, 2008)* (citing *Kumho Tire Ltd. v. Carmichael, 526 U.S. 137, 119 S. Ct. 1167, 143 L. Ed. 2d 238 (1999))*.

1. Janet K. DeLeon

Defendants move to exclude the opinions and testimony of Plaintiffs' expert, Janet K. DeLeon. The motion is GRANTED.

Plaintiffs offer Ms. DeLeon as an expert in the process of developing and launching a generic drug. **[**10]** Plaintiffs offer two reports from Ms. DeLeon: (1) an initial report dated September 15, 2017 (Hamburger Decl. Ex. 10, Dkt. No. 438 ("DeLeon Rep.")); and (2) a supplemental report dated October 23, 2017 (*Id.* at Ex. 11 ("DeLeon Supp. Rep.").) Ms. DeLeon was asked to answer the following question: whether there were any supply, equipment or manufacturing challenges that would have prevented five generic competitors - Amneal Pharmaceuticals, Dr. Reddy's Laboratories, Inc., Lupin Pharmaceuticals, Inc., Mylan Pharmaceuticals, Inc. ("Mylan"), and Sun Pharmaceutical Industries, Inc. - or Forest itself from launching a generic version of Namenda IR prior to July 2015. (*See* DeLeon Rep. ¶ 6.) Her answer is that there were none. She rests her opinion on "[her] educational background, [her] professional experience, [her] knowledge and understanding of pharmaceutical industry practices, [U.S. Food and Drug Administration ("FDA")] regulations, guidelines, and enforcement policies, and publicly-available materials such as FDA MAPPs [Manual of Policies and Procedures] and Guidances." (*Id.* at ¶ 6.)

A. Qualifications

Ms. DeLeon's credentials certainly qualify her to offer an opinion on this question.

She **[**11]** has spent 30 years in the pharmaceutical industry, much of which was spent **[*170]** working on new drug launches, including specifically the launching of generics. She has sat on launch teams for 25 years. She has experience at Aventis as a liaison with external manufacturers of drug products and active ingredients, and she managed several applications to the FDA for approved products. At Beckloff, she helped companies develop new and generic drugs and get approval for them to go to market. Moreover, before starting her own pharmaceutical consultancy, Ms. DeLeon was Associate Director and then Director of Product Development at Cypress Pharmaceutical, Inc. and Hawthorn Pharmaceuticals, Inc. (together "Cypress") for seven years where she handled at least 12 separate drug launches. (*Id.* at ¶ 6.)

Her three decades of experience give her familiarity with both the drug launch process and with impediments to launch - including barriers to entry like supply, new technologies, or need for new equipment. In short, her credentials are impeccable.

B. Summary of Ms. DeLeon's Reports

Ms. DeLeon divides her analysis into three sections.

First, she explains, in considerable detail, the process for launching a **[**12]** new generic - a process with which she is intimately familiar - including the relevant regulatory and manufacturing background, and standard pharmaceutical industry practices employed in preparing for the launch of a new drug.

She then evaluates the extensive evidence derived during discovery about each generic's process leading up to the July 2015 launch of its generic Namenda IR. This revealed that each generic had followed precisely the launch process she outlined based on her own experience.

Finally, she opines - "based on her review of the evidence and [her] almost 30 years of pharmaceutical industry experience," - that nothing would have prevented the generic competitors from doing exactly the same thing as early as 2012. (*Id.* at ¶ 3.) She writes: "[I]n my opinion, there would have been no supply, equipment, or manufacturing challenges that would have prevented the Generics from launching their respective generic Namenda IR tablet products during that time period." (*Id.* at ¶ 23.) She continues, "I have seen no evidence in the record suggesting that Defendants could not have followed the same process and launched an authorized generic concurrently with the five Generics, if the **[**13]** Generics had a launch date any time between June 2012 and July 2015." (*Id.* at ¶ 28.)

In reaching her conclusions, Ms. DeLeon stressed that Namenda IR is categorized as a solid oral dose product, which is among the most common pharmaceutical products on the market; that immediate release tablets are among the easiest pharmaceutical products to manufacture; and that the supply of the active ingredient in Namenda IR (memantine hydrochloride) was readily available at all relevant times. (*See id.* at ¶ 3.)

Plaintiffs asked Ms. DeLeon to draft a supplemental report - in light of her review of additional documents and deposition testimony that became available after her initial report - in which her opinions and conclusions about the generics' and Forest's ability to launch generic Namenda IR in 2012 did not change. (*See generally* DeLeon Supp. Rep.)

C. Analysis: Motion to Exclude Ms. DeLeon's Reports

Defendants' principal argument is that Ms. DeLeon's conclusions are highly speculative. The Court agrees that her **[*171]** opinion is little more than expert "*ipse dixit.*" *Gen. Elec. Co. v. Joiner, 522 U.S. 136, 146, 118 S. Ct. 512, 139 L. Ed. 2d 508 (1997)*. As discussed below, the problem lies in the way Ms. DeLeon derived her opinion. It adds nothing to the direct evidence that cannot be **[**14]** elicited from fact witnesses - nothing other than the use of Ms. DeLeon's impressive credentials to bolster the credibility of those witnesses impermissibly.

Ms. DeLeon did not review in-house documents or deposition testimony from any of the generics or Forest to support her conclusion that the generics and Forest could have launched Namenda IR in 2012. Instead, she relies solely on her review of documents and testimony regarding the actual product launches by these parties in 2015. Defendants cite to several portions of Ms. DeLeon's deposition testimony in which she admitted as much. (*See* Hamburger Decl. Ex. 25, Dkt. No. 438 ("DeLeon Dep. Tr.") at 91:2 - 11; 143:24 - 144:8.)

Of course, Ms. DeLeon has a perfectly sensible and credible explanation for the lack of contemporaneous evidence; she specifically opines that drug companies place a low priority on tasks related to a drug that they cannot manufacture for a few years, so it was no surprise that they did not engage in pre-launch activity three years before they were permitted, by the terms of the settlements, to enter the generic market. (*See id.* at ¶ 36.)

Lacking the kind of evidence she was able to connect to the 2015 launches, **[**15]** Ms. DeLeon relied on three things in order to reach her conclusion about the lack of barriers to entry in 2012: the companies had been able to effectuate a normal launch, without experiencing any disruption or challenge arising from supply, equipment or manufacturing issues, in July 2015; the companies were all major drug manufacturers with the capacity to have done exactly the same thing in earlier years; and a representative of each generic, testifying pursuant to *Fed. R. Civ. P. 30(b)(6)*, had indicated under oath that his/her employer could in fact have undertaken the launch process for Namenda IR much sooner than it did.

According to Plaintiffs, Ms. DeLeon's conclusions are based on an application of her extensive experience in the pharmaceutical industry to the facts presented. However, ***HN8***[] Ms. DeLeon's experience is no substitute for "scientifically sound analysis." *United States v. Apple Inc., 952 F. Supp. 2d 638, 694 (S.D.N.Y. 2013)*, *aff'd*, *791 F.3d 290 (2d Cir. 2015)*.

Ms. DeLeon could have obtained data, from the generics or elsewhere, about matters that might have impacted the generics' ability to enter the market earlier: matters like whether there were any problems with the supply of drug ingredients in earlier years; whether there were equipment failures or manufacturing issues at any of the **[**16]** generics in 2011-12 (issues that apparently did not exist in 2014-15); whether the manufacturing capacity at those companies was already being used to manufacture other drugs such that it could not readily have been converted to Namenda at that time; and about whether Namenda IR would have been prioritized over those other drugs had there been a business reason to consider diverting manufacturing capacity to Namenda during earlier years.

Had Ms. DeLeon reviewed data of the above sort, and concluded, based on her substantial experience, that the generics (or some of them) could have launched as much as three years earlier, it would certainly have been within her expertise to so opine. But simply saying, "They could do it in 2015, so they could have done it in 2012," without any analysis of the market **[*172]** and corporate conditions that might have impacted the generics' ability to launch generic Namenda in 2012, is a conclusion tethered to nothing whatever. ***HN9***[] This Court must exclude "unsupport[ed] speculation cloaked as expertise." *Cedar Petrochemicals, Inc. v. Dongbu Hannong Chem. Co., 769 F. Supp. 2d 269, 281 - 82 (S.D.N.Y. 2011)*.

To the extent that Plaintiffs point to the testimony of the generics' 30(b)(6) witnesses - all of whom testified that they could have launched generic Namenda as **[**17]** early as 2013 (not 2012) - to undergird Ms. DeLeon's opinion, their reliance exposes another problem with Ms. DeLeon's proposed testimony. Those fact witnesses can be called to testify at trial. They can repeat their testimony that then respective employers could have entered the generic Namenda market earlier but for the settlement of the patent suit. And they can offer an explanation, grounded in the actual circumstances facing each individual generic, about why that was so. Plaintiffs can then argue that the patent settlements were anticompetitive, and the trier of fact can accept or reject that argument after evaluating the credibility of these witnesses.

HN10[] "[T]he amended Rules of Evidence require that expert testimony be based on 'sufficient facts or data' and on 'reliable principles and methods' that the expert 'witness has applied reliably to the facts of the case.'" *United States v. Dukagjini, 326 F.3d 45, 54 (2d Cir. 2003)* (citing *Fed. R. Evid. 702*). Here, the only thing that Ms. DeLeon's "expert" opinion does is bolster the credibility of the 30(b)(6) witnesses - misleading the trier of fact into thinking that, if an "expert" like Ms. DeLeon accepts the testimony of the 30(b)(6) witnesses, so should it. That is not the province of an expert; indeed, **[**18]** it is an arrogation of the function of the trier of fact. *See* *Amorgianos v. Nat'l R.R. Passenger Corp., 303 F.3d 256, 266 (2d Cir. 2002)*. While Ms. DeLeon's experience might make her capable of assessing Defendants' adherence to "standard pharmaceutical industry practice," that experience does not transform her into an oracle. (DeLeon Dep. Tr. at 109:1 - 4.) Her opinions and testimony are inadmissible and will not be considered on the motion for summary judgment.

2. Professor Einer Elhauge

Defendants move to exclude the opinions and testimony of Plaintiffs' expert, Professor Einer Elhauge, who opines in support of Plaintiffs' theory that the reverse payment from Forest to Mylan delayed generic entry. In the professor's opinion, without a reverse payment to generic competitors, the generic competitors would have entered the market on November 2, 2012, approximately 26.3 months earlier than they did.

Plaintiffs offer Revised Expert Report of Professor Einer Elhauge dated September 20, 2017 (Hamburger Decl. Ex. 1, Dkt. No. 438 ("Elhauge Rep.").) Plaintiffs retained Professor Elhauge to address, among other things, what economic analysis reveals about Forest and Mylan's settlement of the Namenda IR patent litigation. He was asked to opine on: (a) whether an alleged **[**19]** reverse payment from Forest to Mylan delayed generic entry into the market; (b) what the settlement entry date would have been in a no-payment settlement; (c) whether a reverse payment was reasonably necessary and the least restrictive means to achieve a settlement between Forest and Mylan; and (d) whether there were any procompetitive justifications for the reverse payment. (*See* Elhauge Rep. ¶ 1.) Professor Elhauge was asked to model a but-for world "with no payment." (Hamburger Decl. Ex. 14, Dkt. No. 438 ("Elhauge Dep. Tr") at 80:11 - 17.)

[*173] A. Qualifications

Professor Elhauge is the Petrie Professor of Law at Harvard Law School, where he teaches and writes about the economic analysis of ***antitrust law***, health policy, and various other subjects. (*See Elhauge Rep.* ¶ 3.) He has authored and co-authored several leading antitrust casebooks, and written articles on monopolization, bundled discounts, loyalty discounts, and reverse-payment settlements. (*See id.*) Professor Elhauge has served as an expert on antitrust economics before Congress, arbitration panels, and foreign competition agencies. He has also testified as an expert witness on antitrust economics in dozens of federal cases. (*See* ***[**20]*** *id.* at ¶ 4.)

B. Summary of Professor Elhauge's Reports

Professor Elhauge begins by summarizing the settlement agreement, signed on July 21, 2010, between Forest and Mylan, which resulted in Mylan dropping its challenge to the Namenda IR patent. (*See* Elhauge Rep. ¶¶ 6 - 11.) He then estimates the parties' actual bargaining strength based on the settlement terms. (*See id.* at ¶¶ 28 - 33.) He uses this estimate - along with other factors, such as the two companies' profit projections and their expectations regarding the pending patent litigation - to predict what the generic entry date would have been in a no-payment settlement. (*See id.*) Finally, Professor Elhauge considers how sensitive his analysis is to changes in the estimates of each parties' strengths (*e.g.*, patent strength, litigation costs, litigation end date, etc.). (*See id.* at ¶¶ 33 - 54.) He concludes that his finding - that the reverse payment caused a significant delay in entry of generic memantine hydrochloride into the market - is robust enough to hold true even given changes to these estimates. Finally, he posits that Defendants' risk aversion could not have justified the reverse payment. (*See id.* at ¶¶ 56 - 58.)

C. Analysis: [**21] Motion to Exclude Professor Elhauge's Reports

Defendants move to exclude the reports and testimony of Professor Elhauge's on three grounds.

First, Defendants argue that Professor Elhauge's opinions are at odds with the Supreme Court's decision in *F.T.C. v. Actavis, Inc., 570 U.S. 136, 133 S. Ct. 2223, 186 L. Ed. 2d 343 (2013)*, because Professor Elhauge presumes that *any* payment from a patentee to a prospective generic, regardless of its size or the reasons for making it, causes anticompetitive delay. That, however, is a mischaracterization of Professor Elhauge's analysis.

HN11[] The Supreme Court in *Actavis* specifically declined to hold that "reverse payment settlement agreements are presumptively unlawful." *Actavis, 570 U.S. at 158*. It instructed courts reviewing such agreements to proceed by applying a "rule of reason" analysis to reverse payment agreements. *Id. at 159*. Under this analysis, courts have to assess the payment's "size, its scale in relation to the payor's anticipated future litigation costs, its independence from other services for which it might represent payment, and the lack of any other convincing justification." *Id. at 159*. Thus, only those reverse payments that are "'large and unjustified'" violate the antitrust laws. *Sergeants Benevolent Ass'n Health & Welfare Fund v. Acta Vis, PLC, No. 15 Civ. 6549 (CM), 2016 U.S. Dist. LEXIS 128349, 2016 WL 4992690, at *13 (S.D.N.Y. Sept. 13, 2016)* (quoting *Actavis, 570 U.S. at 158*).

As an initial matter, Professor Elhauge explains in his report **[**22]** that "a reverse payment is large enough to anticompetitively **[*174]** delay entry whenever the payment amount exceeds the litigation costs the patent holder avoided by settling." (Elhauge Rep. ¶ 42.) He determines that the reverse payment from Forest to Mylan, which he estimates to be $30.9 million, was large enough to exceed Forest's avoided litigation costs (an estimated $3.5 million) and was thus potentially anticompetitive. (*Id.* at ¶ 11, 20.) Only after determining that the payment exceeded avoided litigation costs did Professor Elhauge proceed to use economic analysis to assess the degree of delay the reverse payment caused. This approach is fully consistent with *Actavis*.

Next, Defendants argue that Professor Elhauge's opinions are speculative, internally inconsistent, and contradicted by the evidence. The Court will not waste time on this, except to say that this part of their *Daubert* motion, "like so many such motions, is nothing more than a 'we do not agree with his opinion so it is junk science' motion, of the sort that causes this and many judges to view all *Daubert* motions with a certain degree of skepticism." *Bank of New York Mellon Tr. Co., Nat'l Ass'n for Registered Certificate Holders of Morgan Stanley Capital I Inc. v. Morgan Stanley Mortg. Capital, Inc., No. 11 Civ. 505 (CM), 2017 U.S. Dist. LEXIS 20715, 2017 WL 733225, at *1 (S.D.N.Y. Feb. 10, 2017)*. Here, Defendants' disagreements with Plaintiffs' expert are appropriate **[**23]** subjects for cross-examination.

Lastly, Defendants argue that Professor Elhauge's opinions about when entry "would have" occurred improperly attempt to usurp the role of the jury. Defendants cite *to* *United Food and Commercial Workers Local 1776 & Participating Employers Health and Welfare Fund v. Teikoku Pharma USA, 296 F. Supp. 3d 1142, 1149 (N.D. Cal. 2017)* (hereinafter "*Lidoderm*"), in support. In that case, which also involved an alleged reverse payment settlement, Professor Elhauge similarly opined in support of plaintiffs' alternate causation theory that in the hypothetical but-for world, even without a reverse payment, the defendants would have agreed to a settlement allowing a competitor into the market a year earlier than they did. The defendants in *Lidoderm* moved to exclude Professor Elhauge's economic model and but-for conclusions as unsound, difficult to understand, and not transparent. The court granted the motion in part, holding that "Elhauge may opine that in his view the parties would have been rationally motivated to agree to settlement allowing [a competitor] early entry by specific dates." *Id. at 1149*. The court then held that Elhauge could not "testify that the parties would have agreed to entry on a date certain, as that impinges on a determination left up to the jury." *Id.* So too here. **[**24]**

Professor Elhauge must qualify his opinions by testifying that "it would have been economically rational for both parties" to enter into a no-payment settlement in a but-for world by specific dates, not that they necessarily *would have*. (Opper Decl. Ex. 2, Dkt. No. 421 ("Elhauge Dep. Tr. II") at 225:18-227:18.) That ultimate issue is for the trier of fact to decide.

With that modification, Defendants' motion is DENIED.

3. Dr. Russell Lamb

Defendants move to exclude the opinions and testimony of Plaintiffs' expert, Dr. Russell Lamb, who opines on class certification and damages caused by Defendants' alleged anticompetitive conduct.

Plaintiffs offer Amended Expert Report of Dr. Russell Lamb dated September 20, 2017 (Hamburger Decl. Ex. 2, Dkt. No. 438 (("Lamb Rep.")); and an Amended Expert Reply Report dated November 9, **[*175]** 2017 (*Id.* at Ex. 3 ("Lamb Reply Rep.")) to correct for an error in his earlier reply report.

Dr. Lamb, an economist, was asked to analyze (1) whether the delay in generic entry impacted prices paid by proposed class members; (2) whether Defendants' allegedly unlawful hard switch impacted prices paid by proposed class members; (3) whether it is possible to establish, using economic **[**25]** analyses and evidence common to the proposed class as a whole, rather than specific to individual members, that proposed class members were injured by Defendants' alleged anticompetitive conduct under two separate but-for worlds (as described below); and (4) the amount of aggregate damages suffered by proposed class members as a result of the alleged misconduct under the two separate but-for worlds. (*See* Lamb Rep. ¶ 5.)

For the purposes of his report, Dr. Lamb conducted economic research on the market and prices paid for memantine hydrochloride by members of the proposed class and reviewed transaction-level data produced by Forest and several generic manufacturers. He also reviewed documents produced by various parties in this matter (including documents, expert reports and testimony from the previous action brought by the New York Attorney General), documents or filings presented before the FDA, as well as a variety of publicly-available documents including trade press and academic literature. (*Id.* at ¶ 12.)

A. Qualifications

Dr. Lamb, an expert in antitrust economics, has testified in U.S. district court on matters concerning antitrust liability, impact, and damages. For more than 20 **[**26]** years, Dr. Lamb has consulted on the economics of markets and prices. (*Id.* at ¶ 2.) Courts have relied upon his economic analyses of the market in certifying classes of direct purchasers and indirect purchasers in litigations involving allegations of anticompetitive conduct. (*Id.* at ¶ 3.) Additionally, he has been hired as an economic consultant to the World Bank and the Government of Peru, and has assisted on various economic consulting projects for private firms, government agencies, and law firms. (*Id.*)

He is the President of an economic consulting firm known as Monument Economics Group, based in Arlington, Virginia. The firm provides economic research and quantitative and statistical analysis to clients in the United States, Canada, and elsewhere internationally. (*Id.* at ¶ 1.) He also currently teaches "Law and Economics" at The George Washington University. (*Id.*)

B. Summary of Dr. Russell Lamb's Reports

Dr. Lamb's reports describe, in part, the relevant pharmaceutical regulatory framework, competitive effects of generic entry, background on the memantine hydrochloride market, and an analysis of the proposed class members. He emphasizes that "By September 2015, three months after **[**27]** generic entry, Forest had lost 89.9 [%] of Namenda IR sales to generic manufacturers" who were selling the drug at about a 95% price discount. (Lamb Rep. ¶ 81 - 82.) He notes that the "rapid substitution of generic memantine hydrochloride for branded Namenda IR, is consistent with the literature describing the effects of generic entry on prices and sales in pharmaceutical markets." (*Id.* at ¶ 83.)

By way of example, Dr. Lamb suggests that, as a result, proposed class members "who purchased Namenda IR at a price of $0.58 per tablet in July 2015, would have purchased the generic at a price below $0.58 in July 2015 had generic competition **[*176]** started in 2012, rather than July 2015, because had generic competition started in 2012, the decline in generic prices that actually occurred after July 2015 would have occurred much earlier." (*Id.* at ¶ 85.)

Dr. Lamb analyzes "two but-for scenarios that Plaintiffs allege would have occurred in a world free of the Defendants' alleged misconduct" - a No Reverse Payment But-For World and a No Hard Switch But-For World. (Lamb Rep. ¶ 7.)

No Reverse Payment But-For World. Under the first scenario, Dr. Lamb considers damages arising from Forest's alleged reverse **[**28]** payment to Mylan (the "No Reverse Payment But-For World"). He assumes that had "Defendants not entered into an allegedly illegal agreement with Mylan, they still would have settled, but without a large reverse payment and with an entry date [in 2012[1]] (rather than in 2015 as provided for in their . . . agreement)." (*Id.* at ¶ 8.) Using an economic model, Dr. Lamb compares the actual price purchasers paid for memantine hydrochloride to the prices that would have prevailed but for Defendants' conduct, and compares the actual volumes of brand Namenda purchased to the volumes of Namenda that would have been purchased but for Defendants' conduct. (*Id.* at ¶ 127 - 42.)

He concludes that "all or nearly all proposed [c]lass members were impacted by Defendants' allegedly anticompetitive agreement with Mylan, assuming that generic entry was delayed and would have occurred earlier otherwise, in that they paid higher prices for brand-name Namenda IR, Namenda XR, and/or generic memantine hydrochloride than they otherwise would have had generic competition started sooner, because they would have purchased (or purchased more) generic memantine hydrochloride at prices below branded Namenda and would have **[**29]** purchased the generic at lower prices." (*Id.* at ¶ 13(a).)

No Hard Switch But-For World. Under the second scenario, Dr. Lamb considers damages suffered by direct purchasers of Namenda products arising solely from Forest's announcement of a hard switch from Namenda IR to Namenda XR (the "No Hard Switch But-For World"). To confirm his hypothesis that Forest's February 2014 discontinuation announcement had an impact on the market, Dr. Lamb conducted a statistical analysis called a "structural break test" to analyze conversion to Namenda XR using market share data from NSP. (*See id.* at ¶ 119.) He concludes that "there is a structural break in the Namenda XR conversion rate at the time the Hard Switch strategy was implemented beginning in February 2014," (*id.*), which illustrates that the hard switch was effective in converting more Namenda IR prescriptions to Namenda XR than otherwise would have been the case. He goes on to analyze the case in which Defendants did not engage in their hard switch strategy (never announced that they would remove Namenda IR from the market) and no generic entry occurred prior to the actual date at which AB-rated generics for Namenda IR became available (*i.e.* ***[**30]*** , July 2015).

[*177] He concludes that "all or nearly all proposed [c]lass members who purchased at least Namenda IR and XR, or XR, were impacted by Defendants' anticompetitive [h]ard [s]witch strategy in that they paid higher prices for Namenda XR than they otherwise would have for generic memantine hydrochloride, and they would have purchased the less expensive generic (or more of it) in place of the more expensive branded Namenda." (*Id.* at ¶ 13(b).)

For purposes of class certification, Dr. Lamb finds that aggregate overcharge damages can be proven through classwide economic models using formulas and methodologies that do not require individualized analysis. (*Id.* at ¶ 121 - 61.) Where available, he uses transaction-level data produced by Forest and some of the generic manufacturers to calculate damages. He calculates the "aggregate, class-wide damages arising from Defendants' alleged misconduct under the two separate but-for worlds." (*Id.* at ¶ 13.) He estimates that "Total damages suffered by Proposed Class members are between $6.09 billion and $6.93 billion under the No-Reverse Payment But-For World, and between $776 million and $814 million under the No Hard Switch But-For World." (*Id.*)

[**31] C. Analysis: Motion to Exclude Dr. Lamb's Reports

---

[1] For the purposes of calculating damages under this scenario, Dr. Lamb relies on an analysis conducted by Professor Einer Elhauge in which he determines that a payment-free settlement would have provided for an entry date of November 2, 2012. Dr. Lamb alternatively assumes a June 2012 generic entry date based on George Johnston's alternative theory that absent a settlement agreement, Mylan would have prevailed in the patent litigation brought against it, resulting in generic entry by it in June 2012, and by other generic competitors under the terms of their agreements with Forest.

HN12[] An antitrust claim has three elements: (1) a violation of ***antitrust law***; (2) injury and causation; and (3) damages. *In re Visa Check/Master Money Antitrust Litig.,280 F.3d 124, 136 (2d Cir. 2001)*. This portion of Defendants' motion centers on proof of the second element of an antitrust claim - commonly referred to as "antitrust injury" - which requires "an antitrust plaintiff [to] prove that its injury was, in fact, caused by the defendant's violation of the antitrust laws." *US Airways, Inc. v. Sabre Holdings Corp., No. 11 Civ. 2725 (LGS), 2017 U.S. Dist. LEXIS 40932, 2017 WL 1064709, at *16 (S.D.N.Y. Mar. 21, 2017)* (quoting *U.S. Football League v. NFL, 842 F.2d 1335, 1377 (2d Cir. 1988))*.

Defendants move to exclude the reports and testimony of Dr. Lamb on three grounds.

First, Defendants argue that Dr. Lamb's structural break test does not prove antitrust injury. Defendants claim that Dr. Lamb's test fails because it utilizes market-wide data rather than purchaser-specific information, which approach fails to isolate and measure those patients who switched from Namenda IR to XR *because of the February 2014 announcement* from those patients who switched for other reasons. Stated otherwise, Defendants claim that Dr. Lamb's analysis understates the degree to which Namenda XR could have captured the market even without the hard switch strategy.

This argument is unpersuasive.

Dr. Lamb's conclusion that the hard switch announcement **[**32]** increased conversion to Namenda XR was based on a number of observations that are consistent with Plaintiffs' allegations. Plaintiffs allege "that as a result of Forest's dissatisfaction with the extent of conversion to Namenda XR for several months after its launch, Forest began to consider an option where it would discontinue or dramatically restrict the supply of Namenda IR several months before the availability of generic memantine hydrochloride in order to accomplish a 'forced switch' whereby physicians and patients would have little choice but to switch to Namenda XR." (*Id.* at ¶ 89.) In support of this theory, Dr. Lamb reviewed Forest's internal documents and forecasts confirming the company's formation and implementation of their strategy to reduce the level of competition from generic memantine hydrochloride products. **[*178]** (*See id.* at ¶ 95.) Dr. Lamb relied on forecasts that contained both a "withdrawal" (or "hard switch") scenario and a "conventional" (or "soft switch") scenario, as well as internal high-level discussions of and reliance upon these forecasts to reach conclusions about what the conversion rate of Namenda IR to XR would have been absent initiation of the hard switch **[**33]** strategy. For example, Figure 6 entitled *Forest Namenda Forecasts*, is a copy of Forest's soft switch and hard switch projections which show that Namenda XR's share of the memantine hydrochloride market would be significantly higher under the hard switch strategy versus the soft switch strategy. (*Id.*) Dr. Lamb also notes that:

> In a May 2013 speech concerning the launch of Namenda XR, Mark Devlin of Forest stated: [T]he core of our brand strategy with XR is to convert our existing IR business to Namenda XR as fast as we can and also gain new starts for Namenda XR. We need to transition volume to XR to protect our Namenda revenue from generic penetration in 2015 when we lose IR patent exclusivity.' Mr. Devlin added that the 'better job we do moving business form IR to XR, the more Forest revenue we hopefully shelter from generic threats down the road.'

(*Id.* at ¶ 94.)

Furthermore, the evidence includes sworn statements from doctors stating that they stopped prescribing Namenda IR after the hard switch announcement. (*See id.* at ¶ 104.) Dr. Lamb concludes that the evidence demonstrates that Forest's intention to withdraw Namenda IR was to trigger wide-spread conversion to Namenda XR and that **[**34]** the February announcement was successful in starting to do so.

To confirm his hypothesis, Dr. Lamb conducted a regression analysis called a "structural break test" showing that Forest's implementation of its hard switch strategy would impact the market by increasing conversion to Namenda XR. He used actual sales data from IMS National Sales Perspectives ("NSP"). He concludes that "there is a structural break in the Namenda XR conversion rate at the time the Hard Switch strategy was implemented beginning in February 2014," (*id.* at ¶ 119), which illustrates that the hard switch was effective in converting more Namenda IR prescriptions to Namenda XR than otherwise would have been the case.

Defendants' complain that Dr. Lamb's structural break test fails because it does not isolate the cause of the February 2014 break. However, Dr. Lamb testified that the test was not designed to do so. He testified that "[the test] is not able to tease out where the source of the structural break comes from by itself. One has to implement it because one believes that there is some event which leads to a structural break. . . I had reason to believe that the hard switch strategy which began somewhat before **[**35]** February '14 and which included the announcement . . . would have an effect at that point. And that's why I chose that date." (Hamburger Decl. Ex. 19, Dkt. No. 438 ("Lamb Dep. Tr. I") at 96:2 - 19.)

In other words, Dr. Lamb's test demonstrates that there was a "structural break" in February 2014, which happened to be the date when the hard switch was announced. Correlation does not prove causation, but the coincidence in timing between the announcement and the structural break shown by the data is some evidence of causation in support of Plaintiffs' theory. Perhaps other things were happening in the market in February 2014, and Forest may go into them to undercut Dr. Lamb's data. Taken together with the other evidence analyzed by Dr. Lamb, the **[*179]** regression is designed to confirm a hypothesis that is itself based on other indicia. For the purposes of *Daubert*, Dr. Lamb's analysis passes muster. "At most, [Forest's] arguments concerning the assumptions in [Dr. Lamb's] analysis go to its weight, not admissibility of that testimony." *Dial Corp. v. News Corp., No. 13 Civ. 6802, 2016 U.S. Dist. LEXIS 20427, 2016 WL 690868, at *4 (S.D.N.Y. Feb. 17, 2016)*.

HN13[] Moreover, contrary to Defendants' argument, a plaintiff is only required to show that alleged illegal conduct is "*a* material cause of the [antitrust] injury; **[**36]** a plaintiff need not exhaust all possible alternative sources of injury in fulfilling his burden of proving compensable injury." *Id.* (quoting *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 114 n.9, 89 S. Ct. 1562, 23 L. Ed. 2d 129 (1969))* (emphasis added). "[T]o prove a 'causal connection' between the defendant's unlawful conduct and the plaintiff's injury, the plaintiff need only 'demonstrate that [the defendant's] conduct was a substantial or materially contributing factor' in producing that injury." *In re Publ'n Paper Antitrust Litig., 690 F.3d 51, 66 (2d Cir. 2012)* (quoting *Litton Sys., Inc. AT & T Co., 700 F.2d 785, 823 n.49 (2d Cir. 1983))*. Second Circuit precedent makes clear that in order to prove causation:

> [P]laintiffs do not have to prove that the unlawful activity that the defendants allegedly engaged in was the sole cause of their injuries. Plaintiffs meet their burden if they show that the defendants' unlawful facts substantially contributed to their injuries, even though other facts may have contributed significantly. An antitrust plaintiff is not required to show that the defendants' acts were a greater cause of the injury than other factors. Plaintiffs need only show that their injury to *some* degree resulted from defendants' violation.

NFL, 842 F.2d at 1377 (emphasis in original).

Second, Defendants argue that Dr. Lamb improperly expanded the time period of alleged injury to include data from before the February 2014 **[**37]** Namenda IR discontinuation announcement and after the injunction on Namenda XR conversion.

Specifically, Defendants claim that his methodology improperly includes alleged injury from before the February 2014 announcement, in violation of this Court's earlier conclusion about the proper damages period. *See Sergeants Benevolent Ass'n Health & Welfare Fund v. Actavis, PLC, Nos. 15 Civ. 6549, 15 Civ. 7488, 2016 U.S. Dist. LEXIS 128349, 2016 WL 4992690, at *11 (S.D.N.Y. Sept. 13, 2016)* ("According to the Second Circuit: The hard switch began on February 14, 2014 with the announcement of Defendants' intention to withdraw Namenda IR and was suspended in September 2014 when Defendants agreed to a "standstill" during the litigation proceedings.") (internal citation omitted)) In his report, Dr. Lamb cites documents demonstrating that, before the February 2014 announcement, Forest had already begun discussed its hard switch plan outside the company. (*See* Lamb Rep. ¶¶ 89, 102.)

Plaintiffs argue that Dr. Lamb included discussion of pre-February 2014 conduct in order to undercut Forest's theory — that increased conversion to Namenda XR after February 2014 was the result of better formulary placement for XR rather than the hard switch. (Lamb Reply Rep. ¶ 51; *see also* Lamb Rep. **[**38]** ¶¶ 89, 102; Berndt Rep. ¶ 56; Berndt Reply Rep. ¶ 29; PRSoF ¶ 373; PASoF ¶ 67 (collecting evidence of Forest's leveraging of withdrawal plan to achieve better formulary placement).) These opinions are admissible. Defendants' difference of opinion is fair ground for cross examination. Likewise are Dr. Lamb's opinions about any lasting impact **[*180]** the anticompetitive conduct had post-injunction.

Lastly, Defendants argue that the flaws in Dr. Lamb's "No Hard Switch" methodology make his No Reverse Payment methodology unreliable as well. For the reasons discussed above, this argument is without merit.

Defendants' motion is DENIED.

4. Forecast Averages from Dr. Russell Lamb and Dr. Ernst Berndt

Defendants move to exclude the opinions and testimony of Plaintiffs' experts, Dr. Russell Lamb and Dr. Ernst Berndt, regarding their use of forecast averages in their respective analyses. This motion is DENIED.

Dr. Berndt, a Professor in Applied Economics at the Sloan School of Management at the Massachusetts Institute of Technology, submitted: (1) an initial report dated September 15, 2017 (Hamburger Decl. Ex. 7, Dkt. No. 438 ("Berndt Rep.")); (2) a reply expert report dated October 25, 2017 (*Id.* at Ex. 8 **[**39]** ("Berndt Reply Rep.")); and an amended reply expert report dated November 8, 2017 (*Id.* at Ex. 9 ("Berndt Am. Reply. Rep.")).[2] In his initial report, Dr. Berndt opines on (1) "whether it is reasonable as a matter of economics to conduct a damages analysis of the impact of Forest's announcement and conduct of a 'hard switch' marketing campaign . . . based upon use of relevant Forest projections and forecasts" and if so, (2) "what objectively reasonable expected market share Namenda XR would have had if there had been no Hard Switch announcement and marketing campaign (as shown by Forest's reasonable forecasts)." (*See* Berndt Rep. ¶ 6.)

In his report, Dr. Lamb relies on Dr. Berndt's "opinion that these forecasts of the Namenda XR conversion rate are a reliable basis for an analysis of the incremental effect of the Hard Switch on the conversion from branded Namenda IR to branded Namenda XR." (Lamb Rep. ¶ 144.) Thus, Dr. Lamb factored Forest's forecasts into his damages analysis. Specifically, based on Forest's predictions of Namenda XR conversion absent the hard switch, he concluded that the "Namenda XR conversion rate would rate 30 percent in 18 months after Namenda XR entered the market **[**40]** absent the Hard Switch." (*Id.* at ¶ 150.) For purposes of his damages calculation, "The difference between the actual and but for Namenda XR conversion rates, multiplied by total market DOT [days of therapy] times the generic penetration rate, yields the amount of branded XR purchases that would have been generic Namenda IR purchases but for the Hard Switch. This volume multiplied by the difference in price between branded Namenda XR and generic Namenda IR then yields the amount of overcharges to the Hard Switch." (*Id.* at ¶ 13.)

A. Analysis: Motion to Exclude Dr. Berndt's and Dr. Lamb's Forecast Averages

Defendants' principal complaint is that the experts blindly adopt certain of Forest's forecasts without first scrutinizing them. However, a substantial portion of Dr. Lamb's report and the entirety of Dr. Berndt's report are dedicated to analyzing and evaluating Forest's forecasts for reliability. **[*181]** That hardly renders their conclusions inadmissible.

Defendants advance three reasons why this testimony should not be admitted.

First, Defendants argue that Dr. Berndt and Dr. Lamb did not perform any economic analysis to determine what the conversion rate would have been in the but-for world. **[**41]**

---

[2] Defendants ask the Court to strike Dr. Berndt's Amended Reply Report as an improper sur-rebuttal based on Dr. Berndt's treatment of issues and documents raised during his deposition about his initial report. The Court will do no such thing. *See* *Cedar Petrochemicals, Inc. v. Dongbu Hannong Chem, Co., 769 F. Supp. 2d 269, 277 - 79 (S.D.N.Y. 2011)*. Defendants are not unduly prejudiced by Dr. Berndt's review and informed response to their challenges raised at deposition.

Second, Defendants argue that neither of the doctors applied any expert methodology to average forecasts or to select which forecasts to include in their averages, and that as a result both doctors haphazardly selected forecasts for their averages.

Third, Defendants argue that neither doctor tested the forecasts to determine their reliability.

None of these arguments holds water.

In his report, Dr. Berndt undertook a robust analysis of the process by which Forest came to its forecasts and expectations for the conversion rate between Namenda IR and Namenda XR under a soft switch and a hard switch scenario. He closely studied the inputs into Forest's analysis, analyzed the evolution over time of that analysis, and Forest's internal and external use and reliance upon that analysis. In particular, Dr. Berndt considered that Forest had been in the market for many years, was very familiar with the dynamics between physicians, caregivers, patients, and the various health care entities involved in the treatment of Alzheimer's patients. (Berndt Rep. ¶ 40.)

Dr. Berndt considered that Forest had done a searching analysis of analogous situations in which pharmaceutical manufacturers had brought an **[**42]** extended release product into a market in which that company already had an immediate release product. (*Id.* at ¶ 41.)

Dr. Berndt considered that Forest surveyed physicians, caregivers, pharmacists and health care entities about the Namenda XR launch and conversion. (*Id.* at ¶ 26.)

Dr. Berndt considered that Forest specifically factored in the impact of a cost-conscious and critical segment of the market for Namenda Alzheimer's patients, Long Term Care. (*Id.* at ¶ 28.) Dr. Berndt considered that Forest's analysis evolved over time, including with the assistance of actual sales data after Namenda XR launched. (*Id.* at ¶ 51-55.)

Dr. Berndt also considered that Forest's executives valued these analyses as reliable and accurate as they used them when communicating their expectations about Namenda XR share in the soft switch scenario internally (including to Forest's Board of Directors) and externally to the investing community. (*Id.* at ¶ 32 - 38, 48 - 50.)

Thus, Dr. Berndt did not just assume, as Defendants argue, that Forest's estimates of a 30% conversion in a "soft switch" scenario were reliable (as found by Judge Sweet and adopted for purposes of the motion to dismiss by me). (*See* Dkt. No. **[**43]** 253 at 24 - 25 (citing *New York v. Actavis, PLC (Namenda I), No. 14 Civ. 7473, 2014 U.S. Dist. LEXIS 172918, 2014 WL 7015198, at *80, 109 - 11 (S.D.N.Y. Dec. 11, 2014))*. Instead, Dr. Berndt applied his scholarship, knowledge, and experience from his many decades of studying the pharmaceutical industry. He analyzed the work that Forest put into its forecasting, as well as the extent to which Forest relied upon those forecasts in making business decisions and communicating with the investor community. He endeavored to determine that the forecasting effort was robust and reliable.

Dr. Berndt concludes that "the [internal] forecasts reviewed by Dr. Lamb [were] reliable," as they were based on Forest's own study of the Namenda market and **[*182]** analogous experiences of other drugs. (*Id.* at ¶ 40; *see also* Berndt Reply Rep. ¶¶ 4 - 20.) He further concludes that "[t]he appropriate 'but for' analysis in this case is one in which Forest makes no hard switch announcement of any kind, executes no communications campaign of any kind aimed at alerting patients. . . and others of the impending withdrawal of Namenda IR, and makes no other effort of any kind to implement the hard switch." (Berndt Rep. ¶ 69.)

Likewise, Dr. Lamb independently reviewed and analyzed Forest's internal document and testimony regarding the soft-switch conversion rate. He did **[**44]** not blindly adopt Dr. Berndt's analysis. He factored in the fact that, "Forest used various analogues of drug franchises that had experienced conversion from an immediate release to an extended release product when forecasting the conversion rate from Namenda IR to XR." (*Id.* at ¶ 151.) He noted that Forest updated the Namenda XR conversion forecasts regularly, sometimes creating multiple forecasts in a few weeks. (*See id.*) Using the forecast documents that were created after Namenda XR had entered the market and before the hard switch was implemented, Dr. Lamb averaged the forecasted soft switch Namenda IR to XR conversion rate for November 2014, 18 months after Namenda XR entered the market, and found the but-for conversion rate to be approximately 30 percent. (*Id.* at ¶ 152; *see also id.* at Tbl. 3.) Contrary to Defendants' argument, Dr. Lamb did not "cherry-pick." He averaged multiple iterations of Forest's forecasts and came up with a 30% conversion rate. He then confirmed this number was reasonable based on its specific use in numerous company presentations, statements by company executives on earnings calls, and testimony by these executives. (*See id.* at ¶ 154.)

HN14[] The use of Defendants' **[**45]** own forecasts to model a but-for world has been held to be a sound economic methodology. Indeed, it is commonly used in courts considering generic delay damages. *See, e.g., King Drug Co. of Florence, Inc. v. Cephalon, Inc., 309 F.R.D. 195, 212 (E.D. Pa. 2015)*, *rev'd and remanded on other grounds, In re Modafinil Antitrust Litig., 837 F.3d 238 (3d Cir. 2016)*. Defendants may not hide behind the fact that forecasts are predictions, and by their very nature incorporate some uncertainty — particularly given the controlling legal rule that a defendant may not benefit from any uncertainty concerning damages its own wrongful conduct has caused.

Defendants' complaint that Drs. Berndt and Lamb did not consider all forecasts from the relevant period before the hard switch conduct is of no moment to the admissibility of their testimony. **This** is a matter for cross-examination. If Forest contends that important forecasts were omitted from the experts' analysis, it can introduce them at trial.

The motion is DENIED.

5. Professor John R. Thomas, Esq.

Defendants move to exclude the opinions and testimony of Plaintiffs' expert, Professor John R. Thomas, Esq. Plaintiffs substituted Professor Thomas in place of their proposed expert, Deborah Jaskot, after this Court granted Teva Pharmaceutical USA, Inc.'s nonparty motion to disqualify Ms. Jaskot from **[**46]** serving as Plaintiffs' regulatory expert due to her conflicts as a former Teva executive. (*See* Dkt. No. 355.)

Plaintiffs offer a report from Professor Thomas dated November 14, 2017 (Johnson Decl. Ex. 1, Dkt. No. 506 (Expert Report of Professor John R. Thomas, Esq. ("Thomas Rep.")).) Plaintiffs retained Professor Thomas to (1) provide testimony concerning the *Drug Price Competition and Patent Term Restoration Act (the "Hatch-Waxman Act"), Pub. L. No. 98-417, 98 Stat. 1585*, **[*183]** "and its 'grand bargain' between the competing interests of promoting the innovation of new drugs and promoting competition from generic drugs;" (2) "determine whether there would be any impediments to certain generic drug companies obtaining final approval from [the] FDA to sell their generic versions of Namenda at any point from April 17, 2011 through July 11, 2015;" and (3) "determine whether there would have been any impediments to Forest obtaining approval from [the] FDA to market an authorized generic version of Namenda from April 17, 2011 through July 11, 2015." (Thomas Rep. ¶¶ 3 - 5.)

A. Qualifications

Professor Thomas has taught courses on the Hatch-Waxman Act at Georgetown Law School since 2002, has written a textbook concerning the Hatch-Waxman **[**47]** Act, patent law, and pharmaceutical drugs, and has been qualified to opine on ANDAs in district court before. *See, e.g., Apotex, Inc. v. Cephalon, Inc., 06 Civ. 02768, 2011 U.S. Dist. LEXIS 154863 (E.D. Pa. Mar. 28, 2011)*. He possesses more than two decades of experience with respect to the Hatch-Waxman Act, including authoring and co-authoring numerous Congressional Research Service Reports. He was appointed and served as a Special Master in Hatch-Waxman litigation. (*Id.* at 15.)

He has taught hundreds of patent examiners principles of patent and evidence law as an instructor at the U.S. Patent and Trademark Office Patent Academy, and is admitted to both the patent bar (No. 40,389) and the bar of the state of Maryland. (*Id.* at ¶¶ 11 - 13.) Moreover, he has practiced patent law full-time as an associate attorney at Finnegan, Henderson, Farabow, Garrett & Dunner LLP in Washington, D.C. (*Id.* at ¶ 13.)

B. Summary of Professor John R. Thomas, Esq.'s Report

Professor Thomas divides his analysis into three sections.

First, he discusses the relevant regulatory background regarding drug approval under the Hatch-Waxman Act, including the FDA approval process for brand name and generic drugs generally, the FDA's orange book listing of approved drug products, **[**48]** along with the various marketing exclusivities made available by the Act.

Second, Professor Thomas gives background on the FDA approval of branded and generic Namenda, including the various generic challenges to Forest's Namenda patent, Forest's settlement of these challenges, and the generics' respective approval and launch timelines.

Third, Professor Thomas opines that based on his analysis of the available data, there were no regulatory impediments to the five generics seeking and obtaining final approval for their generic versions of Namenda on or after April 17, 2011.

C. Analysis: Motion to Exclude Professor John R. Thomas, Esq.'s Reports

Defendants move to exclude the reports and testimony of Professor Thomas on three grounds.

First, Defendants call certain portions of Professor Thomas's opinion irrelevant and prejudicial. For example, the professor writes, "When competitors within the pharmaceutical industry. . . choose to bypass or subvert the legislative framework, they potentially engage in strategic behavior that defies the policy goals embodied in the Hatch-Waxman Act." (Thomas Rep. ¶ 30.) They argue that Professor **[*184]** Thomas implies that *all* Hatch-Waxman patent settlements are **[**49]** "suspect" or "inherently 'subvert' Congressional intent to make low-cost generic pharmaceuticals broadly available to the public." (Defs.' Mem. of Law at 1.) This argument lacks even a scintilla of merit. Defendants cannot point to a single instance where Professor Thomas actually offers such an opinion. As for what Defendants believe he "implied," their beliefs are of no moment. This basis for the motion to exclude is DENIED.

Second, Defendants argue that Professor Thomas should not be allowed to explain the Hatch-Waxman statutory scheme, its regulations, and how they relate to the generics and potential authorized generics in this case. According to Defendants, those explanations would constitute improper legal opinions. They are wrong.

HN15[] While, "This circuit is in accord with other circuits in requiring exclusion of expert testimony that expresses a legal conclusion," *Hygh v. Jacobs, 961 F.2d 359, 363 (2d Cir. 1992)*, "expert testimony is viewed as helpful in cases, like this one, involving complex statutes or issues outside of the general knowledge of the jury." *United States v. Universal Rehab. Servs., Inc., No. 94 Cr. 147, 1996 U.S. Dist. LEXIS 7912, 1996 WL 297575, at *10 (RD. Pa. May 31, 1996)*, *aff'd sub nom.* *United States v. Universal Rehab. Servs. (PA), Inc., 205 F.3d 657 (3d Cir. 2000)*. In his report, Professor Thomas explains the procedures under the complex law governing approvals of generic drugs, which is subject matter that is foreign **[**50]** to the average person. He does not provide "legal conclusions" or opine on whether Defendants violated the Act, but simply explains the mechanics of drug approval, which provides context that is likely to "assist the trier of fact." *Fed. R. Evid. 702*. I will not preclude this testimony. If Thomas's testimony strays beyond that into matters that are irrelevant or otherwise inadmissible, I will be the first to disallow it.

Finally, Defendants claim that Professor Thomas is not qualified to opine on Abbreviated New Drug Application ("ANDA") approval, since he has neither personally prepared nor filed an ANDA, has never communicated with the FDA regarding an ANDA, and has never worked within the FDA or any pharmaceutical company. That all may be true, but it is of no moment. Professor Thomas has taught courses on the Hatch-Waxman Act at Georgetown Law School since 2002, has written a textbook concerning the Hatch-Waxman Act, patent law, and pharmaceutical drugs, and has been qualified to opine on ANDAs in district court before. *See, e.g.,* *Apotex, 2011 U.S. Dist. LEXIS*

154863. Defendants are free to argue to the jury that Dr. Thomas' lack of practical experience undermines his conclusions; the jury can evaluate that argument for what it is **[**51]** worth. I personally would find it unpersuasive.

6. George W. Johnston

Defendants move to exclude the opinions and testimony of Plaintiffs' expert, George W. Johnston, Esq.

Plaintiffs offer a report from George W. Jolmston, Esq., dated September 15, 2017 (Hamburger Decl. Ex. 12, Dkt. No. 438 ("Jolmston Rep.").) Plaintiffs retained Mr. Jolmston to assess what a reasonable and competent patent attorney would have advised the litigants at the time they settled the Namenda patent litigation in terms of 1) their likelihood of success in the litigation; 2) each of the parties' likely litigation costs; and 3) the likely litigation timing, if the parties had not settled, but rather had continued to litigate through a final, non- **[*185]** appealable judgment. (See Jolmston Rep. ¶ 15.)

A. Qualifications

Mr. Jolmston has spent his entire legal practice as a patent attorney, has over 40 years of experience, and has prosecuted hundreds of patent applications before the United States Patent and Trademark Office ("USPTO"). His experience with patents includes evaluating the patentability of inventions, the scope of patent claims, the validity and enforceability of patents, and the infringement of patents. (*Id.* at **[**52]** ¶ 2.)

He served for 17 years as Chief Patent Counsel for Hoffmarm-La Roche Inc. ("Roche") — a global pharmaceutical, bioteclmology, and diagnostic health care organization. (*Id.* at ¶¶ 3, 6.) During his tenure at Roche, Mr. Jolmston "advise[d] senior management on the likelihood that Roche would prevail in potential and actual patent litigations, the cost of the associated litigations, and the possible timing and duration of the litigations." (*Id.* at ¶ 5.)

Mr. Jolmston retired from Roche in 2013 as a Vice President and Chief Patent Counsel. (*Id.* at 10.) He continues to practice intellectual property law as Counsel at Gibbons P.C. (*Id.* at ¶ 11.)

Mr. Johnston has impressive credentials as a patent attorney and legal adviser to drug companies. He is certainly an expert in that capacity. The question is whether the opinions he offers in his report go beyond his area of expertise. I conclude that they do not.

B. Summary of George W. Johnston, Esq.'s Report

Mr. Johnston's detailed report begins with a brief description of the patenting process — clarifying that a "U.S. patent provides the patent holder with the right to seek to exclude others from making, using, selling, or importing the invention claimed **[**53]** in the patent for the period during which the patent is in force." (*Id.* at ¶ 19.) He also "discuss[es] the process for extending the term of a pharmaceutical patent under the Hatch-Waxman [and] the procedure under the Hatch-Waxman Act by which a generic manufacturer can challenge pharmaceutical patents listed in the Orange Book so it can enter the market before the patents expire." (*Id.* at ¶ 21.)

Then he provides summarized factual information about the Namenda patent ('703 patent) that would be known to a general counsel who was advising his client whether or not to settle a lawsuit — information about the patent's filing, its alleged inventive concept, and Forest's New Drug Application. (*Id.* at ¶ 26 - 35.) He notes that "The '703 patent relates generally to methods for the treatment or prevention of cerebral ischemia using adamantine derivatives, including memantine and amantadine. [It] recognizes that certain adamantine derivatives, including memantine, were already known and described in the art for the treatment of central nervous system disorders." (*Id.* at ¶ 31.) The '703 patent describes an alleged "new mode" of action of certain adamantine derivatives. As named inventor, Dr. Bormann, explained: "[t]he invented **[**54]** concept is that neurodegeneration is caused by calcium overload of the cells and that you can prevent neurodegeneration by memantine or by adamantine derivatives. That's the invention." (*Id.* at ¶ 32.) This summary of background information sets the stage for his opinion.

Mr. Johnston also recounts the prosecution history of the '703 patent, the USPTO's reexamination of the patent in 2004, and Forest's receipt of Paragraph IV challenges from 15 generic companies in 2007 **[*186]** and 2008. "In their Notice Letters, the Generic Companies argued a variety of defenses including noninfringement and invalidity of the '703 patent under *35 U.S.C. §§ 101*, *102*, *103*, *112*, *156*, and *305*." (*Id.* at ¶ 58.) "In response to the. . . Notice Letters, Forest and Merz instituted a number of Hatch-Waxman litigations in the United States District Court for the District of Delaware and elsewhere." (*Id.* at ¶ 59.) "In their Answers and Counterclaims in the Namenda Litigation, the Generic Companies asserted a number of defenses including: noninfringement; invalidity under *35 U.S.C. §§ 101*, *102*, *103*, *112*, *156*, and *305*; failure to state a claim; lack of subject matter jurisdiction; unclean hands; prosecution history estoppel; inequitable conduct; failure to comply with *35 U.S.C. § 156*; patent misuse; equitable intervening **[**55]** rights; as well as counterclaims seeking declaratory judgment of noninfringement and invalidity; an order to de-list the '703 patent from the Orange Book; and a declaratory judgment of invalidity of the patent term extension of the '703 patent." (*Id.* at ¶ 63.) A patent lawyer advising a client about the probability of success in an infringement lawsuit would of course have studied the file wrapper and become familiar with the patent's prosecution.

He then summarizes the history of all 15 of Forest's '703 patent litigations against the generic companies leading up to and including settlements in 2009-2010. That information is, of course, a matter of public record. He notes that "Mylan's case progressed the farthest," not settling until August 26, 2010.

He then examines other information that a reasonable patent counsel who was evaluating whether or not to settle a case would have taken into account. He explained data that showed the statistical likelihood that either a patentee or a challenger would win a Hatch-Waxman lawsuit — the actual track record in real litigations. He then evaluated, in the manner that a reasonable and competent patent attorney would, the information that was available to him about the merits **[**56]** of the Namenda litigation between Forest and Mylan. And as part of that analysis, he discussed in depth the legal claims and defenses raised. For example, he evaluates the strength of Mylan's invalidity defenses, including anticipation, obviousness, enablement and patent term extension. In doing so, he brought to bear his extensive knowledge of patent law and patent litigation. He reviews the evidence and expert opinions that Forest and Mylan planned to offer at trial. He analyzes them, and assesses the likelihood that a trier of fact would accept that evidence and those opinions. (*See id.* at ¶¶ 398 - 401.)

In short, he does exactly what he did time and again during his years as Chief Patent Attorney at Hoffman-LaRoche. And his conclusions are summarized in a table on page 94. (*See Id.* at ¶ 395.)

After conducting this thorough analysis, he offers the opinion on which Plaintiffs rely: "In my opinion, a reasonable and competent patent attorney at the time of the settlement of the Namenda Litigation likely would have concluded that overall Mylan had greater than a 60% chance of prevailing and that Forest Merz had less than [a] 40% chance of prevailing in this litigation through trial and **[**57]** appeal." (*Id.* at ¶ 16.)

Finally, he estimates the expected length and cost of the Namenda litigation, assuming Mylan and Forest had not settled and the case went to trial.

C. Analysis: Motion to Exclude George W. Johnston, Esq.'s Report

Defendants first argue the Mr. Johnston does not have the technical expertise required **[*187]** to opine on patent infringement and validity, because he is not one skilled in the art covered by the patent — he is a lawyer, not a chemist. They urge that allowing Johnston to offer his opinion would run counter to the Federal Circuit's holding in *Sundance, Inc. v. Demonte Fabricating Ltd., 550 F.3d 1356, 1363 (Fed. Cir. 2008)*.

Plaintiffs counter that Mr. Johnston is not offering independent technical expertise about whether the claims of the '703 patent were in fact valid or whether they were infringed by Mylan. They argue that he opines, from the perspective of a reasonable patent attorney with extensive experience in the area of patent law, about the likelihood that Mylan would succeed in its lawsuit against Forest. Plaintiffs note that Johnston relies on the conclusions of the parties' technical experts — persons who are "skilled in the art" — in reaching his own conclusions. (*See* Opper Decl. Ex. 8, Dkt. No. 421 ("Johnston Dep.") at 172:23 - 173:6 ("I **[**58]** had a different role than that of a technical expert. I had a very focused role in terms of what a reasonable patent attorney . . . say, a chief patent counsel, because we did it all the time, would have perceived as the likelihood of success at the time of settlement.").) Plaintiffs thus argue that his testimony does not run afoul of *Sundance*.

Sundance was a patent infringement case. In that case the district court had denied Sundance's motion *in limine* to exclude the testimony of an opposing expert, Bliss. Bliss was "a patent attorney with extensive experience in patent law and procedure." *Sundance, 550 F.3d at 1360*. He opined, on behalf of the alleged infringer, that the patent was invalid, and that if it were valid it was not infringed — even though Mr. Bliss had no technical expertise in the field of the patent. *See id.*

HN16[] The Federal Circuit reversed, concluding that the district court had abused its discretion by admitting Bliss' opinion evidence. The court emphasized that "Mr. Bliss is not qualified to testify as an expert witness on the issues of infringement or validity [as] Whese issues are analyzed in great part from the perspective of a *person of ordinaly skill in the art*" and Mr. Bliss lacked such **[**59]** skill. *Id. at 1361* (emphasis added). In other words, "Unless a patent lawyer is also a qualified technical expert, his testimony *on these kinds of technical issues* is improper and thus inadmissible." *Id. at 1362* (emphasis added).

"*Sundance* actually advises district courts to consider the perspective from which the relevant issue of patent law will be analyzed when the court determines whether an expert is qualified to testify as an expert on that issue." *Network-1 Techs., Inc. v. Alcatel-Lucent USA, Inc., No. 6:11 Civ. 492 (RWS), 2017 U.S. Dist. LEXIS 154434, 2017 WL 4173468, at *3 (ED. Tex. Sept. 21, 2017)* (citing *Aevoe Corp. v. AE Tech Co., No. 2:12 Civ. 0053 (GMN), 2014 U.S. Dist. LEXIS 117197, 2014 WL 4182343, at *2 (D. Nev. Aug. 20, 2014))*.

This case differs from *Sundance* in two important ways.

First and foremost, this is an antitrust case, not a patent infringement case; the Court's concern with the technical issues of patent infringement and validity is indirect.

Second, Mr. Johnston is not opining that the '703 is invalid, or that Mylan did not infringe the patent. Instead, he offers a "reasonable patent attorney's" assessment of the likelihood that Mylan would win its patent case — exactly the sort of assessment he would have offered his client during the nearly two decades when he served as Chief Patent Counsel of Hoffman-LaRoche.

[*188] Nonetheless, it would be naïve to **[**60]** conclude that Mr. Johnston's assessment of Mylan's likelihood of succeeding on its claims in the lawsuit does not include some tangential assessment on his part on the issues of the validity and infringement. True, he does not offer the sort of opinion that one skilled in the art would offer — a black-and-white, yes or no, opinion that the patent was or was not valid or infringed. But Johnson's assessment that Mylan's experts were more likely to be believed that Forest's, and his assignment of statistical likelihoods to those technical opinions necessarily depends on his lawyerly assessment of how the ultimate issues in that patent litigation would play out. His conclusion — that Mylan would more likely than not have managed to prove either invalidity or lack of infringement - had to rest on some assessment of the patent's validity and Mylan's defenses to Forest's charge of infringement.

That said, testimony by experienced lawyers about the likelihood that patent litigations will succeed or not succeed has been admitted in several *post-Actavis* reverse-payment cases. *See In re Solodyn (Minocycline Hydrochloride) Antitrust Litig., No. CV 14-MD-02503, 2018 U.S. Dist. LEXIS 11921, 2018 WL 563144, at *16 (D. Mass. Jan. 25, 2018)*; *In re Wellbutrin XL Antitrust Litig., 133 F. Supp. 3d 734 (E.D. Pa. 2015)*, *aff'd sub nom. In re Wellbutrin XL Antitrust Litig. Indirect Purchaser Class, 868 F.3d 132 (3d Cir. 2017)*, *judgment entered* ***[**61]*** *sub nom. In re Wellbutrin XL Antitrust Litig., 868 F.3d 132, 2017 WL 3529114 (3d Cir. 2017)*; *see also United Food & Commer. Workers Local 1776 v. Teikoku Pharma USA, 296 F. Supp. 3d 1142, 2017 U.S. Dist. LEXIS 182940, *117 (Nov. 3,* 2017 N.D. Cal.). Unfortunately, in none of those opinions does the court analyze the lawyer's credentials in any detail or so much as mention the issue identified by this Court in the preceding paragraph. But in every such case the issue was litigation risk and lawyers, not chemists, normally assess litigation risk for their clients.

Mr. Johnson unquestionably has the expertise to evaluate the things he assessed — from expert reports to patent file folders — and to draw conclusions about who is more likely to win a patent lawsuit. He has done it dozens of times for his employer; there is no reason why he should not be able to do it for Plaintiffs in this lawsuit. To the extent that his opinions rest on his evaluation of technical material — the opinions of the technical experts — he can be cross-examined about his knowledge of the underlying art, or the lack of the same. And of course Forest is offering the testimony of its own expert (*see* Hamburger Decl. Ex. 13, Dkt. No. 438 (Expert Report of Roderick McKelvie, Esq. ("McKelvie Rep."))) who will be testifying about his assessment of the merit or lack of merit to the Mylan patent case — the assessment that was actually made before **[**62]** the case settled.

As Judge Casper noted when she admitted "Johnston-like" expert testimony in *In re Solodyn*, "To the extent Defendants seek to challenge [an expert's] conclusions as to the likely outcome of the patent challenges, they may do so with their own expert testimony — as they have proposed to do." *2018 U.S. Dist. LEXIS 11921, 2018 WL 563144, at *16*.

Defendants also argue that Mr. Johnston's opinion is flawed because he opines on the likelihood of succeeding on issues that Forest and Mylan did not intend to raise at trial. Defendants point to a "301-page pretrial order, which includes 187 pages of proposed findings of fact and conclusions of law from both sides" in the '703 patent case that Forest and Mylan were prepared to try. (Defs. Mot. to Exclude at 8.) Defendants complain that many of Mr. Johnston's opinions raise issues and legal arguments that were either **[*189]** undeveloped or completely absent from the parties' pretrial order.

However, Defendants have failed to identify any issue raised by Mr. Johnston that cannot be traced back to documentary evidence related to at least one of the Mylan's defenses identified in its pretrial order. That specific cases or facts were not identified with sufficient granularity in the pretrial order does **[**63]** not justify tying Mr. Johnston's hands. As Defendants do not point to either facts or case law that would justify such a conservative approach, the Court refuses to accept this argument. That said, if Mr. Johnson really did go beyond the issues that were actually in the Mylan-Forest litigation, it should be an interesting cross-examination.

Defendants also protest that Mr. Johnston's opinions constitute impermissible legal opinions and conclusions. However, this is a complex antitrust case involving a secondary body of law — here, patent law — that is not directly at issue. Given the nature of what Mr. Johnston was asked to opine on — the likelihood of success in a patent suit — he necessarily incorporates patent law into his opinion. The Court will not exclude this analysis. As I held with respect to Professor John Thomas's legal testimony, if Mr. Johnston strays beyond into matters that are irrelevant or otherwise inadmissible, I will be the first to disallow it.

Finally, Defendants complain that Mr. Johnston is not allowed to provide opinions that undermine the statutory presumption of patent validity — a presumption, they argue, that can be overturned only by clear and convincing **[**64]** evidence. After a review of the challenged portions of Mr. Johnston's report, it is clear that his opinions do nothing of the sort. (*See* Johnston Rep. ¶ 76 - 86; 87 - 109; 112 - 20.) Again, Defendants are free to cross-examine Mr. Johnston and to argue that he gave insufficient weight to that hard-to-disprove presumption.

Defendants' motion is DENIED.

II. DEFENDANTS' SUMMARY JUDGMENT MOTION AND PLAINTIFFS' MOTION FOR CLASS CERTIFICATION

Factual Background

This case's factual background and relevant regulatory scheme have been recounted at length in the Honorable Judge Sweet's opinion granting a preliminary injunction to New York, New York v. Actavis, PLC (Namenda I), No. 14 Civ. 7473, 2014 U.S. Dist. LEXIS 172918, 2014 WL 7015198, at *1 (S.D.N.Y. Dec. 11, 2014), the Second Circuit's decision affirming Judge Sweet's opinion, New York ex rel. Schneiderman v. Actavis PLC (Namenda II), 787 F.3d 638 (2d Cir. 2015), *cert. dismissed*, *136 S. Ct. 581, 193 L. Ed. 2d 421 (2015)*, as well as in two prior decisions of this Court — the first denying Forest's motion to dismiss, Sergeants Benevolent Association Health & Welfare Fund v, Actavis, PLC (Namenda III), Nos. 15 Civ. 6549, 15 Civ. 7488, 2016 U.S. Dist. LEXIS 128349, 2016 WL 4992690, at *1-*8 (S.D.N.Y. Sept. 13, 2016)—and another granting in part and denying in part Plaintiff's motion for collateral estoppel and partial summary judgment, In re Namenda Direct Purchaser Antitrust Litigation (Namenda IV), No. 15 Civ. 7488 (CM), 2017 U.S. Dist. LEXIS 83446, 2017 WL 4358244, at *1 (S.D.N.Y. May 23, 2017).[3]

In light of these prior rulings, the Court will not recite all of the facts of this case, but instead addresses only the factual and **[*190]** procedural **[**65]** background relevant to the motions addressed herein. The summary of facts in the following pages is drawn from *Namenda I—IV*, as well as from Defendants' Rule 56.1 Corrected Statement of Undisputed Material Facts ("DSoF"), Plaintiffs' Responses and Objections to DSoF ("PRSoF"), Plaintiffs' Affirmative Statement of Material Facts ("PASoF"), and Defendants' Objections and Responses to PASoF ("DRASoF").

Unless otherwise noted, these facts are not in dispute.

Parties

Forest manufactures and sells brand name pharmaceutical products, including the prescription pharmaceutical memantine hydrochloride ("memantine"), which is sold in the United States under the trade names "Namenda" (referred to here as "Namenda IR" to distinguish from Namenda XR) and "Namenda XR. " Namenda IV, 2017 U.S. Dist. LEXIS 83446, 2017 WL 4358244, at *2. Memantine is a treatment for moderate-to-severe forms of Alzheimer's disease. Forest developed Namenda IR pursuant to an exclusive license and cooperation agreement with Merz GmbH & Co. KGaA, Merz Phauna GmbH & Co. KGaA, and Merz Pharmaceuticals GmbH (collectively, "Merz Entities"), which owned the relevant patent for a memantine-based drug.[4] *Id.*

Named Plaintiff Smith is a South Carolina corporation that purchased Namenda IR directly from **[**66]** Forest. Smith alleges that, during the class period, it paid prices higher than it would have absent Defendants' anticompetitive conduct. *Id.*

Named Plaintiff RDC is a New York corporation that also purchased Namenda IR directly from Forest which it alleges were at supracompetitive prices.[5] *Id.*

Regulatory Background

This case involves the rules set forth in (1) the Federal Food, Drug, and Cosmetic Act ("FDCA"), 21 U.S.C. § 301 et seq., which governs the manufacture, sale, and marketing of pharmaceuticals in the United States; and (2) the Drug

---

[3] Unless otherwise noted, all references to the *Namenda* opinions are to the public, redacted versions where applicable.

[4] The Merz Entities were originally named defendants to some of the counts in, the amended complaint. On April 20, 2017, the parties entered a stipulation naming Forest Laboratories, Inc. and Forest Laboratories Holdings Ltd. as defendants to Counts III, IV, and V, and dismissing the Merz Entities as defendants (*See* Did. No. 207.)

[5] On December 28, 2015, RDC filed an identical complaint against Forest and Merz. All parties stipulated to consolidation of the two duplicative actions, with the Smith Complaint serving as the operative complaint in the consolidated action (*see* Dkt. No. 12, Case No. 15 Civ. 10083), and an amended caption to reflect consolidation: *In Re Namenda Direct Purchaser Antirust Litigation. (See* Dkt. No. 22, Case No. 15 Civ. 10083.)

Price Competition and Patent Term Restoration Act (the "Hatch-Waxman Act"), *Pub. L. No. 98-417, 98 Stat. 1585*; *2017 U.S. Dist. LEXIS 83446, [WL] at *2 - *3*.

HN17[] Under the FDCA, a pharmaceutical company must submit a New Drug Application ("NDA") to the FDA before it may bring a new drug to market. *See generally* *21 U.S.C. § 355*; *Namenda IV, 2017 U.S. Dist. LEXIS 83446, 2017 WL 4358244, at *2*. Because the NDA must provide the FDA with sufficient scientific data to demonstrate that the new drug is safe and effective, the testing and approval process is generally "long, comprehensive, and costly." *FTC v. Actavis, Inc., 570 U.S. 136, 142, 133 S. Ct. 2223, 186 L. Ed. 2d 343 (2013)*; *Namenda IV, 2017 U.S. Dist. LEXIS 83446, 2017 WL 4358244, at *2*. Once approved, though, a patented drug enjoys a period of market exclusivity. *Namenda IV, 2017 U.S. Dist. LEXIS 83446, 2017 WL 4358244, at *2*. That period ends when the drug's patent expires and one or more low-cost generic versions of **[**67]** the drug enter the market and compete with the brand-name drug — what **[*191]** is referred to as going off the "patent cliff." *Namenda II, 787 F.3d at 643*.

HN18[] The Hatch-Waxman Act makes it easier for manufacturers of generic drugs to compete with brand-name drug producers. *Namenda IV, 2017 U.S. Dist. LEXIS 83446, 2017 WL 4358244, at *3*. As relevant here, the Hatch-Waxman Act provides two methods by which a brand-name drug manufacturer can extend its period of market exclusivity. *Id.*

First, a manufacturer can seek an extension of its patent from the USPTO to account for the time the manufacturer spent obtaining approval from the FDA for its brand-name drug. *35 U.S.C. § 156*. That extension can last no more than five years. *Id.* at *§ 156(g)(6)*; *Namenda IV, 2017 U.S. Dist. LEXIS 83446, 2017 WL 4358244, at *3*.

Second, a brand-name drug manufacturer can obtain a six-month period of "pediatric exclusivity" if it conducts certain pediatric studies and the FDA determines that use of the drug in children may produce health benefits. *21 U.S.C. § 355a*. A grant of pediatric exclusivity does not extend the length of the underlying patent, but can operate to exclude generic competition by delaying the date by which the FDA may approve generics for sale. *Namenda IV, 2017 U.S. Dist. LEXIS 83446, 2017 WL 4358244, at *3*.

HN19[] Under the Hatch-Waxman Act, the manufacturer of a generic version of an FDA-approved drug may file an Abbreviated New Drug Application ("ANDA"), which **[**68]** allows the generic manufacturer to rely upon the studies submitted by the brand-name drug manufacturer in connection with the original NDA to prove that the generic version of the drug is safe and effective. *Id.* The ANDA filer must certify that its generic drug, among other things, has the same active ingredient as, and is "bioequivalent" to, the previously-approved drug. *21 U.S.C. § 355(j)(2)(A)(ii)*, *(iv)*; *Namenda II, 787 F.3d at 644*. A generic drug is bioequivalent to the brand-name drug if it has the same "rate and extent of absorption" of the active ingredient as that of the brand-name drug. *21 U.S.C. § 355(j)(8)(B)(i)*; *Namenda IV, 2017 U.S. Dist. LEXIS 83446, 2017 WL 4358244, at *3*. "In other words, two drugs are bio equivalent if they deliver the same amount of the same active ingredient content into a patient's blood stream over the same amount of time." *Namenda II, 787 F.3d at 644*.

Facts of the Case

A. Settlement Agreements

Forest launched Namenda IR in the United States in January 2004, under the '703 Patent, which granted Forest the exclusive right to market a memantine-based drug in the United States. *Namenda IV, 2017 U.S. Dist. LEXIS 83446, 2017 WL 4358244, at *5*. Forest then applied for and received a five-year extension to the '703 Patent, which was set to expire in April 2010 (an extension permitted under *35 U.S.C. § 156* for the time Forest spent obtaining FDA approval). *Id.* Namenda IR was also approved for six months of pediatric exclusivity **[**69]** in June 2004. *2017 U.S. Dist. LEXIS 83446, [WL] at *6*.

At least 17 generic drug manufacturers filed ANDAs seeking to market generic versions of Namenda IR. *Id.* Defendants timely brought suits for patent infringement, but ultimately reached a number of settlement agreements. *Id* Each agreement contained a virtually identical provision that Plaintiffs assert was anticompetitive, which granted the competitors a license to begin selling a generic version of Namenda IR beginning three months prior to the later of: (1) the expiration of the '703 Patent or (2) the end of any pediatric exclusivity period attached to the '703 Patent. *Id*, With the six-month exclusivity period in place, this meant that the generic competitors could not begin selling generic versions of Namenda IR until July 11, 2015. *Id.*

[*192] B. The "Hard Switch"

Forest obtained FDA approval for Namenda XR in June 2010 and began marketing Namenda XR in July 2013. *2017 U.S. Dist. LEXIS 83446, [WL] at *7*. Namenda IR and Namenda XR contain the same active ingredient and have the same therapeutic effect, but Namenda IR is a tablet taken twice a day that releases directly into the bloodstream while Namenda XR is a capsule that is taken once a day and releases gradually. *Id.* They are not, therefore, "bioequivalents" under the FDA's definition **[**70]** of that term, and so cannot be substituted for one another under any drug substitution law that requires substitutes to be certified by the FDA as bioequivalents. Similarly, generic drugs that are bioequivalents of Namenda IR cannot be substituted for Namenda XR under the same standards.

The key non-pharmacological difference between Namenda IR and Namenda XR relates to their patent protection. Namenda XR's period of patent exclusivity does not expire until 2029, while Namenda IR's expired in 2015. *Namenda II, 787 F.3d at 647*.

When Forest brought Namenda XR to market in 2013, it engaged in a variety of "soft-switch" tactics to encourage patients and physicians to convert from Namenda IR to Namenda XR before Namenda IR lost its patent protection in 2015. *See id. at 647 - 48*. For example, it priced Namenda XR below Namenda IR; it stopped actively marketing Namenda IR; and it heavily promoted the benefits of Namenda XR, including its lower price and once-daily dosage. *Namenda IV, 2017 U.S. Dist. LEXIS 83446, 2017 WL 4358244, at *7*.

Judge Sweet concluded in *Namenda I* that Forest executives were concerned about the company's ability to convince a sufficient number of patients to convert to Namenda XR prior to generic entry, making a "hard switch" necessary. *Namenda I, 2014 U.S. Dist. LEXIS 172918, 2014 WL 7015198, at *18*. It is undisputed that, on February **[**71]** 14, 2014, Forest announced by press release, notice to the FDA, and letters to physicians and patients, that it was taking Namenda IR off the market on August 15, 2014. *Id.* Four months later, however, Forest announced that it would continue selling Namenda IR through the fall of 2014 due to manufacturing issues with Namenda XR. *2014 U.S. Dist. LEXIS 172918, [WL] at 22*.

C. The Mylan Reverse Payment Agreement

By 2002, Forest had a license to market a drug named Lexapro. (DSoF ¶ 180.) On October 3, 2005, Forest and Alphapharm (later acquired by Mylan), entered into a distribution and supply agreement for authorized generic Lexapro ("the Original Lexapro Agreement.") (*Id.* at ¶ 182.) By the tennis of the Original Lexapro Agreement, Forest would supply Alphapharm's requirements of generic Lexapro for sale and distribution, and Alphapharm would market, but not manufacture, an authorized generic version of Lexapro. (*Id.* at ¶ 184 - 87.)

Alphapharm agreed to pay Forest a 40% share of its "product profit," which the agreement defined as Alphapharm's net sales less Forest's manufacturing costs. (*Id.* at ¶ 189 - 90.)

The '712 Patent was set to expire on March 12, 2012, at which point Teva, the sole first-filing ANDA applicant, was permitted to launch **[**72]** its version of generic Lexapro on March 12, 2012 and was entitled to 180 days of exclusivity under the Hatch-Waxman Act, in that the FDA would not finally approve another ADNA during that time. (DSoF ¶ 194; PRSoF ¶ 194.) Under the Agreement, Alphapharm was allowed to launch its authorized generic two weeks before Teva's date of entry on February 27, 2012. (*Id.* at ¶¶ 188, 193; **[*193]** PRSoF ¶ 193.) The Original Lexapro Agreement had a five year term (starting with Lexapro patent expiry), with a one-year minimum. (PRSoF ¶ 218(e).) Mylan acquired Alphapharm in 2007. (DSoF ¶ 218.)

The Medicaid Drug Rebate Program ("MDRP"), which was established by Congress in 1990, required brand manufacturers to pay a rebate to the government on prescription drugs reimbursed by Medicaid. (DSoF ¶ 197.) The MDRP requires participating drug manufacturers to pay a rebate on those drugs for which a state's Medicaid agency has paid pharmacies to dispense the drug to Medicaid beneficiaries. (*Id.* at ¶ 198.) To determine the rebate amount owed by a manufacturer, the Centers for Medicare & Medicaid Services ("CMS") calculates a per-unit rebate amount ("URA") based on a statutory formula. (*Id.* at ¶ 199.)

The URA for a drug **[**73]** is tied to a product's "Best Price" or, "the lowest price available from the manufacturer during the rebate period to any wholesaler, retailer, provider, health maintenance organization, nonprofit entity, or governmental entity within the United States. . ." (*Id.* at ¶ 200.) The URA is calculated, in part, using a brand manufacturer's commercial sales and discount data. (*Id.* at ¶ 201.)

The *Deficit Reduction Act of 2005 ("DRA")*, in large part, became effective on January 1, 2007. (*Id.* at ¶ 202.) The Final Rule implementing the DRA (the "DRA Final Rule") became effective October 1, 2007. (*Id.* at ¶ 203.) The DRA amended the definition of Best Price to include, for the first time, the lowest price of an authorized generic drug. (*Id.* at ¶ 206.) On January 23, 2008, the CMS clarified that the DRA Final Rule "provides that the primary manufacturer include the best price of an authorized generic drug in its calculation of best price when the drug being sold by the primary manufacturer to the secondary manufacturer. In accordance with this provision, we expect that the primary manufacturer report a BP [best price] which incorporates the transfer price at the time of sale to the secondary manufacturer **[**74]** for the quarter in which the sale occurs, regardless of when the product is launched." (*Id.* at ¶ 207.) The transfer price is generally reflective of the cost to manufacture a drug. (*Id.* at ¶ 209.)

Under the Original Lexapro Agreement, Forest was a primary manufacturer, and Aiphapharm was a secondary manufacturer. (*Id.* at ¶ 208.) Generally, the lower a manufacturer's best price is, the higher its Medicaid Rebate liability will be. (*Id.* at ¶ 212.)

It is undisputed that the DRA exposed Forest to more Medicaid liability than it was exposed to when it entered the agreement in 2005, since under the new rule Forest would now have to include the best price of generic Lexapro in its calculation of best price. (*Id.* at ¶ 208 - 14; PRSoF ¶ 214.) It is also undisputed that the parties negotiated and amended its Lexapro Agreement ("the Lexapro Amendment"), which was executed on July 21, 2010. (DSoF ¶ 255.)

The parties dispute, however, the content and validity of Forest's cost-benefit analysis while it was negotiating the Lexapro Amendment.

According to Defendants, Forest performed three analyses to assess the potential benefits of amending the Original Lexapro Agreement: (1) a comparison of Forest's post-DRA Medicaid Liability under **[**75]** the Original Lexapro Agreement and Forest's liability pursuant to a potential amendment requiring Mylan to manufacture generic Lexapro ("Medicaid Liability Analysis"), (2) a forecast projecting Forest's profit share revenue under the Original **[*194]** Lexapro Agreement and a potential amendment to that agreement ("The Lexapro Sales Forecasts"), and (3) a projection of the potential costs of goods sold savings Mylan could achieve if it manufactured generic Lexapro ("COGS Summary"). (DSoF ¶ 215.)

According to Plaintiffs, the documents underlying Forest's analysis are unreliable. Plaintiffs point out that the final analyses were not created until after Forest and Mylan told the Namenda IR patent court that it had reached a settlement in principle; thus, they could not have been performed to assess the "potential benefits" of the transaction, which had already been agreed to. (PRSoF ¶ 214.)

D. The Other Reverse Payments

The parties do not provide the Court with the same level of detail about the other reverse payment agreements. Here is what we know: Forest settled with approximately eleven generic companies, with each settlement providing for up to a $2 million cash payment, and generic launch dates **[**76]** three months prior to Forest's statutory exclusivity, absent any extension for pediatric exclusivity or the triggering of the accelerated launch provisions if other generics came in early.

Procedural History

There have been two dispositive motions in this case.

On September 13, 2016, this Court denied Defendants' motion to dismiss — finding, in brief, that Plaintiffs stated a claim for product hopping (based on the planned "hard switch"), stated a claim based on the settlement agreements with generic manufacturers, and Plaintiff claims were not time-barred. (Dkt. No. 106.) This Court dismissed Plaintiffs' overarching scheme claim (Count II) as duplicative. (*See id.*)

A few months later, Plaintiffs moved for collateral estoppel and partial summary judgment on Count One (Dkt. No. 134) and for partial summary judgment on Count Five (Dkt. No. 138). Defendants cross-moved for partial summary judgment on Count Five (Dkt. No. 161). On May 23, 2017, this Court denied both motions for partial summary judgment on Count IV. This Court also granted Plaintiffs' motion for collateral estoppel, finding:

> Because all of the elements of collateral estoppel are met, Forest is precluded from relitigating the **[**77]** questions of (1) whether it possessed monopoly power over the U.S. memantine market up until the entry of generic competition; (2) whether its February 2014 announcement of the upcoming discontinuation of Namenda IR was coercive and anticompetitive; and (3) whether Forest had any non-pretextual procompetitive justification for its illegal conduct. Plaintiffs' motion for collateral estoppel on these issues of fact is GRANTED. They will be presented to the jury as already decided.

*Namenda IV, 2017 U.S. Dist. LEXIS 83446, 2017 WL 4358244, at *16*.

This Court, however, denied Plaintiffs' motion for partial summary judgment on Count One since outstanding questions of material fact remained regarding antitrust injury, which is a necessary element of Plaintiffs' *Section 2* claim.

Defendants now move for summary judgment dismissing all claims in Plaintiffs' First Amended Complaint. (Dkt. No. 434.)

Plaintiffs move to certify a class comprised of 62 direct purchasers of Namenda. (Dkt. No. 400.)

Discussion

Summary Judgment Standard

HN20[] A party is entitled to summary judgment when there is no "genuine issue **[*195]** of material fact" and the undisputed facts warrant judgment for the moving party as a matter of law. *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*; *see also* *Fed. R. Civ. P. 56*. In addressing a motion for summary judgment, "[t]he court must **[**78]** view the evidence in the light most favorable to the party against whom summary judgment is sought and must draw all reasonable inferences in [its] favor." *L.B. Foster Co. v. Am. Piles, Inc., 138 F.3d 81, 87 (2d Cir. 1998)*. Whether any disputed issue of fact exists is for the Court to determine. *See* *Balderman v. United States Veterans Admin., 870 F.2d 57, 60 (2d Cir. 1989)*. The moving party has the initial burden of demonstrating the absence of a disputed issue of material fact. *See* *Celotex v. Catrett, 477 U.S. 317, 323, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986)*. Once such a showing has been made, the nonmoving party must present "specific facts showing that there is a genuine issue for trial." *El-Nahal v. Yassky, 835 F.3d 248, 256 (2d Cir. 2016)*, *cert. denied*, *137 S. Ct. 2187, 198 L. Ed. 2d 255 (2017)* (internal quotation marks and citations omitted). The party opposing summary judgment "may not rely on conclusory allegations or unsubstantiated speculation." *Scotto v. Almenas, 143 F.3d 105, 114 (2d Cir. 1998)*.

HN21[] Moreover, not every disputed factual issue is material in light of the substantive law that governs the case. "Only disputes over facts that might affect the outcome of the suit under the governing law will properly preclude the entry of summary judgment." *Anderson, 477 U.S. at 248*. Finally, the nonmoving party "must do more than simply show that there is some metaphysical doubt as to the material facts." *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 586, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*. To withstand a summary judgment motion, sufficient evidence must exist upon which a reasonable jury could return a verdict for the nonmovant. With these **[**79]** principles in mind, I turn to the claims presented.

Analysis

Defendants move for summary judgment dismissing all claims.

All remaining claims assert that Defendants violated the Sherman Antitrust Act. Count I alleges unlawful maintenance of monopoly power under *Section 2* of the Sherman Act for forcing Namenda IR consumers to switch to Namenda XR. Count III alleges unlawful maintenance of monopoly power under *Section 2* of the Sherman Act for entering into agreements with generic manufacturers to delay generic entry for three months past the expiration of the '703 patent. And Counts IV and V allege restraint of trade under *Section 1* of the Sherman Act for entering into agreements with potential generic manufacturers to delay their entry into the market for three months beyond the expiration of the '703 patent term.

Defendants have moved for summary judgment on the following grounds: (1) there is no evidence in the summary judgment record that Forest's settlements with the generic manufacturers contained an unlawful reverse payment; (2) there is no triable issue of fact related to Plaintiffs' overarching conspiracy claim; (3) Plaintiffs have failed to make the requisite showings of causation; and (4) Plaintiffs have failed to establish **[**80]** that they have suffered antitrust injury as a result of Forest's February 2014 announcement.

A. Plaintiffs' Overarching Conspiracy Claim Was Dismissed

As an initial matter, Forest's motion for summary judgment on Plaintiffs' "overarching conspiracy claim," which was Count II of their complaint is moot. (*See* Am. Compl., Dkt. No. 26 at ¶¶ 244 - 50.) **[*196]** As mentioned above, this Court dismissed this count in its September 13, 2016 decision on Defendants' motions to dismiss. (*See* Dkt. No. 106 at 33.)

Moreover, Plaintiffs have abandoned their inter-generic conspiracy claim (Count IV). (*See* Pls.' Mem. of Law in Opp'n to Defs. Mot. for Summary Judgment at 1.)

There are genuine issues of material fact precluding summary judgment with respect to Forest's two other grounds for summary judgment, which I address in turn below.

B. Defendants' Motion for Summary Judgment on all Claims Arising from Forest's Alleged Reverse Payments to Generic Manufacturers is DENIED

Defendants move for summary judgment on all claims arising from Forest's patent settlement agreements with generics, arguing that Forest made no illegal reverse payments as part of their settling of the various Namenda patent challenges.

The Court **[**81]** concludes that Plaintiffs have offered sufficient evidence such that a reasonable juror could find that Forest's payments to generics did not merely compensate them for avoided litigation costs or fair value for services — and thus were large and unjustified reverse payment in violation of the antitrust laws.

1. Which Settlement Agreements Are at Issue

As an initial matter, Forest argues that discovery eliminated the vast majority of Plaintiffs' reverse payment claims. In their First Amended Class Action Complaint (Dkt. No. 29), Plaintiffs asserted that Forest entered into anticompetitive reverse payment settlement agreements with approximately eleven first filer generic manufacturers. (Am. Compl. at ¶ 113.) Forest contends that, after discovery failed to support their wide-ranging allegations, Plaintiffs functionally abandoned their challenges to all but one of these agreements — the Forest-Mylan Agreement.

The following discussion analyzes the Forest-Mylan Agreement only. The fact remains, however, that the anticompetitive conduct at issue in this case is premised on the alleged barriers to entry put in place by Forest to prevent *all* generic competition, not just Mylan's. Given that **[**82]** the Forest-Mylan settlement was the very last patent settlement agreement Forest entered into, all of the other settlements to keep generic companies from competing that were signed before the Forest-Mylan settlement undergird and compound the anticompetitive effect of the Forest-Mylan deal. This fact is well-illustrated by a February 11, 2010 Forest-Mylan settlement presentation, in which Forest explained that if Mylan would have won the Namenda patent litigation, there would have been "No Financial Upside" because Mylan's profits would have been "miniscule" due to the . . . prior settling Namenda generics having provisions in their agreements that provided for immediate and simultaneous market entry if Mylan won the patent dispute, [thereby] lowering Mylan's potential generic Namenda profits." PASoF ¶ 236 - 37.

Nonetheless, Forest argues that Plaintiffs have abandoned their claims relating to all but Mylan. As a result, in the papers supporting its motion, Forest does not make a particularized showing about why summary judgment should be granted with regard to any of the other agreements that were identified in the complaint as anticompetitive. It simply asserts that Plaintiffs have **[**83]** abandoned those claims, and offers evidence and argument about why the ForestMylan settlement does not violate the antitrust laws.

[*197] Plaintiffs have taken no affirmative steps to indicate that it has abandoned all claims related to its other eleven or so alleged reverse payments — that is simply an assertion by Forest. In its responsive papers, it neither agrees with Forest that those claims have been abandoned nor offers any evidence that would tend to show that the agreements were in fact anti-competitive. Of course, as the party opposing the motion for summary judgment, Plaintiffs had no obligation to discuss agreements that were not addressed on the merits by Forest. But they should have addressed Forest's contention that they were abandoning those claims.

I am going to address the Forest-Mylan agreement, as to which there are myriad genuine issues of material fact that preclude summary judgment. Plaintiffs have ten days from the date of this decision to advise the Court whether they are pursuing claims related to the other reverse payment agreements. If they are, we will simply take those claims to trial.

2. Legal Standards

HN22[] In *F.T.C. v. Actavis, Inc., 570 U.S. 136, 133 S. Ct. 2223, 186 L. Ed. 2d 343 (2013)*, the Supreme Court held that a reverse payment settlement **[**84]** — that is, a payment by a patentee to a claimed infringer — is not presumptively either lawful or unlawful, but will be subject to antitrust scrutiny in certain circumstances. Reverse payments are of particular concern when they demonstrate "that the patentee [sought] to induce the . . . [infringer] to abandon its claim with a share of its monopoly profits that would otherwise be lost in the competitive market." *Id. at 154*. To violate ***antitrust law***, a reverse payment must be both "large and unjustified." *Id. at 158*.

A payment's size may indicate that "the patentee likely possesses the power to bring [an unjustified anticompetitive] harm about in practice." *Id. at 157*. In other words, a large reverse payment may signal that the patentee possessed "the power to charge prices higher than the competitive level" and may be using that power to keep others from entering its market. *Id.* Such a payment may also indicate a patent holder's concern about the validity of its patent, such that "the size of the payment may very well correspond with the magnitude of that concern." *In re Lipitor Antitrust Litig., 868 F.3d 231, 251 (3d Cir. 2017)*, *cert. denied sub nom. Pfizer Inc. v. Rite Aid Corp., 138 S. Ct. 983, 200 L. Ed. 2d 300 (2018)*, and *cert. denied sub nom. Wyeth LLC v. Rite Aid Corp., 138 S. Ct. 984, 200 L. Ed. 2d 300 (2018)*.

HN23[] The Supreme Court in *Actavis*, however, acknowledged that there also might be "legitimate justification[s]" **[**85]** for a reverse payment settlement, including, but not limited to, "avoided litigation costs or fair value for services." *Actavis, 570 U.S. at 156*. The Court directed district courts to apply the traditional rule of reason analysis when evaluating reverse payment settlements. *See id.*

> Rule of reason analysis proceeds in three steps. First, the plaintiff bears the initial burden of showing that the defendant's conduct "had an actual adverse effect on competition as a whole in the relevant market." *Capital Imaging Assocs., P.C. v. Mohawk Valley Med. Assocs., Inc., 996 F.2d 537, 543 (2d Cir. 1993)* (emphasis in original). If plaintiff satisfies this burden, the burden then shifts to defendant to offer evidence that its conduct had pro-competitive effects. *Id.* If defendant is able to offer such proof, the burden shifts back to plaintiff, who must prove that any legitimate competitive effects could have been achieved through less restrictive alternatives. *Id.*

[*198] *Arkansas Carpenters Health & Welfare Fund v. Bayer AG, 604 F.3d 98, 104 (2d Cir. 2010)*, as corrected (June 17, 2010).

"To survive summary judgment, the plaintiffs must present a 'genuinely disputed issue of material fact' as to the elements of the rule of reason analysis; only then will the case go to a jury." *In re Wellbutrin XL Antitrust Litig., 133 F. Supp. 3d 734, 754 (E.D. Pa. 2015)*, *aff'd sub nom.* *In re Wellbutrin XL Antitrust Litig. Indirect Purchaser Class, 868 F.3d 132 (3d Cir. 2017)*, *judgment entered sub nom.* *In re Wellbutrin XL Antitrust Litig., 868 F.3d 132, 2017 WL 3529114 (3d Cir. 2017)*.

3. Reverse [86] Payment Analysis**

This Court predicted in *Namenda IV* that, "Whether the settlement agreements were anticompetitive or procompetitive will depend on several complex factual questions that cannot be decided on summary judgment." *2017 U.S. Dist. LEXIS 83446, 2017 WL 4358244, at *19*. As demonstrated by the host of genuine issues of material fact emanating from the papers filed in connection with this motion, I was correct.

In their briefing on the alleged unlawful reverse payment, the parties analyze several components of the Forest-Mylan agreement, including a cash payment from Forest to Mylan, an agreed early entry date with the possibility of acceleration, and the Lexapro Amendment. Since I am denying the motion, I will use the Lexapro Amendment to illustrate why.[6]

The Court finds that Plaintiffs have offered enough evidence to allow a reasonable finder of fact to conclude that Plaintiffs have established *a prima facie* case for imposing antitrust liability. Although Defendants have offered procompetitive justifications for the Lexapro Amendment — particularly evidence that may indicate that the Lexapro

[6] Because Plaintiffs have raised genuine issues of material fact regarding whether the Lexapro Amendment constituted an unlawful reverse payment, they have likewise raised genuine issues of material fact as to whether the deal, taken as a whole, constituted an unlawful reverse payment. The Court need not discuss each component. All claims related to Forest's settlement agreements with Mylan will go to trial.

Amendment was a fair market value deal — Plaintiffs have offered some evidence that the Amendment was not fair, but instead, constituted overcompensation for agreeing not to compete.

a. Lexapro Amendment

The initial burden of proof lies **[**87]** with Plaintiffs, who must show that Defendants' conduct had an actual adverse effect on competition.

As a threshold issue, the parties disagree about whether the Lexapro Amendment was even a part of the Forest-Mylan patent settlement.

Forest claims that its in-house counsel negotiated the Namenda patent settlement with Mylan and that a "largely separate team" of Forest business people negotiated the Lexapro Amendment with Mylan. Nonetheless, it is undisputed that both the settlement agreement and Lexapro Amendment were executed on the same day, July 21, 2010, and that there were certain personnel of whom were aware of both agreements. (PASoF ¶ 239.)

Plaintiffs, on the other hand, contend that the Lexapro Amendment was linked to the Namenda patent settlement. As evidence, they point to Mylan Deal Concept documents reflecting the "proposed structure" of the Namenda patent settlement, which featured the amendment to the Original Lexapro Agreement. (PASoF ¶ 229.) The January 20 document listed, as "Potential Transaction Benefits to Mylan," **[*199]** "at least $1.5MM in manufacturing cost savings gained through Mylan's control of drug product manufacturing and packaging[.]" (PASoF ¶ 232.) Plaintiffs also point to Forest's in-house and outside counsel repeatedly referring to the Lexapro Amendment as a "side-deal" **[**88]** to the Namenda patent dispute (PASoF ¶ 243), along with a February 11, 2010 Forest-Mylan meeting presentation that explicitly presents the Lexapro Amendment and Namenda patent settlement as a package. (PASoF ¶ 240.)

On this point, Plaintiffs have presented enough evidence to allow a rational juror to conclude that the Lexapro Agreement was a part of the Forest-Mylan patent settlement.

Plaintiffs have also presented sufficient evidence to allow a rational juror to conclude that the Lexapro Amendment had an anticompetitive effect that outweighed its procompetitive effects.

Forest contends that the Lexapro Amendment did not disguise a payment for delayed generic entry, but was instead a fair value business deal between Forest and Mylan, based on arm's length negotiations and reasonable business expectations at the time of agreement. Plaintiffs counter that the Lexapro Amendment was both large and unjustified. They claim that the Lexapro Amendment conferred $32.5 million to Mylan — ten times Forest's saved litigation costs of $3.5 million. (PRSoF ¶ 280.) Plaintiffs point again to Forest's 2011 settlement presentation, in which Forest points out that "the money it was proposing to pay to Mylan — including 'millions of dollars' from modifying the 'LEXAPRO authorized generic deal' — 'provides **[**89]** *more* value than Mylan's forecasted profits for generic memantine[.]" (PASoF ¶ 235-38 (emphasis added).)

This admission is enough to create a genuine issue of material fact. "A reasonable jury could find that a reverse payment to a generic manufacturer that comes close to or exceeds the expected profits to be earned by prevailing in the patent litigation could induce a generic manufacturer to forfeit its claim." *King Drug Co. of Florence v. Cephalon, Inc., 88 F. Supp. 3d 402, 417 (E.D. Pa. 2015)*.

Part of Forest's explanation for the $32.5 million reverse payment is that it compensated Mylan for accepting manufacturing responsibility for authorized generic Lexapro, thereby allowing Forest to avoid $26.5 million in Medicaid rebate liability.

Plaintiffs argue that this claimed reduction was both inflated and pretextual. Plaintiffs point out that the final analyses were not created until after Forest and Mylan told the Namenda IR patent court that it had reached a settlement in principle. (PRSoF ¶ 214.) Plaintiffs claim that Forest employees manipulated the rebate liability analyses to inflate the forecasted rebate savings to just about equal the reverse payment to Mylan. They point to convenientlt-timed changes to the royalty rate rates made in March 2010, which inflated **[**90]** the purported rebate savings. (PASoF at ¶¶ 265-67.)

Plaintiffs have presented enough evidence that rebuts Defendants' procompetitive justifications to get to trial.

Defendants' motion for summary judgment dismissing Plaintiffs' claims related to Forest's settlement agreements with generics is DENIED.

C. Defendants Are Not Entitled to Summary Judgment Because Plaintiffs Carry Their Burden on Causation

Defendants argue that they are entitled to summary judgment because Plaintiffs **[*200]** have not raised a genuine issue of material fact on the issue of causation.

HN24[] "Causation in fact is, of course, a necessary element of any claim for relief." *In re Actos End-Payor Antitrust Litig., 848 F.3d 89, 97 (2d Cir. 2017)* (quoting *Argus Inc. v. Eastman Kodak Co., 801 F.2d 38, 41 (2d Cir. 1986)*. "An antitrust plaintiff must show that a defendant's anticompetitive act was a "material" and "but-for" cause of plaintiffs injury, although not necessarily the sole cause." *In re Actos, 848 F.3d at 98* (quoting *In re Publ'n Paper Antitrust Litig., 690 F.3d 51, 65 - 66 (2d Cir. 2012))*. A plaintiff "need not exhaust all possible alternative sources of injury in fulfilling his burden of proving compensable injury." *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 114 n.9, 89 S. Ct. 1562, 23 L. Ed. 2d 129 (1969)*; *see also In re DDAVP Direct Purchaser Antitrust Litig., 585 F.3d 677, 695 (2d Cir. 2009)*.

Here, Plaintiffs offer two alternative causation theories: (1) but for Forest's reverse payment, Forest and Mylan would have entered a no-payment settlement with an earlier entry date based on the bargaining strength of the parties; **[**91]** and (2) absent a settlement Mylan would have prevailed in the patent litigation and entered earlier than the agreed-to entry date.

Defendants argue that both theories are based on insufficient evidence and are speculative. Against, the Court disagrees.

1. Early Entry Date But for Reverse Payment

Plaintiffs' first causation theory is that the parties would have agreed to an earlier generic entry date but for the alleged reverse payment. Plaintiffs rely primarily on expert opinions to support this causation theory.

As discussed in section 1.2, *supra*, Plaintiffs rely on a report from Professor Einer Elhauge addressing what economic analysis reveals about Forest and Mylan's settlement of the Namenda IR patent litigation, including whether an alleged reverse payment from Forest to Mylan delayed generic entry into the market and what the settlement entry date would have been in a no-payment settlement. (*See* Elhauge Rep. ¶ 1.) Professor Elhauge's report was admitted with the caveat that he cannot offer an opinion about when entry "would have" occurred, so as not to usurp the role of the factfinder. Professor Elhauge is, however, allowed to testify that by specific dates "it would have been economically **[**92]** rational for both parties" to enter into a no-payment settlement in a "but for" world (*e.g.*, November 2012). (Elhauge Dep. Tr. at 225:18 - 227:18.)

Forest attacks Professor Elhauge's assertions as speculative and largely repeats the arguments made in its motion to exclude. This Court has already held that it will not prevent Professor Elhauge from offering his opinion on this but-for scenario as a general matter. (*See* section 1.2., *supra*.)

Forest argues that the evidence suggests that it would not have agreed to a settlement allowing generic Namenda entry in November 2012. In support of this argument, Forest cites to *post hoc* testimony of its own employees. For example, Forest points to testimony from its Chief Intellectual Property Counsel, who was responsible for overseeing the Namenda patent litigation at the time of the settlement. He testified that a settlement agreement with Mylan allowing generic entry in 2012 would have been neither feasible nor acceptable to Forest. (*See* Hamburger

Decl. Ex. 18, Did. No. 438 ("Ryan Dep. Tr.") at 394:21 - 395:4.) "At most defendants criticize plaintiffs' experts for failing to consider or adequately consider certain points they believe are significant . **[**93]** . . disagreements **[*201]** of which] are the subject for cross-examination." *Teikoku Pharma USA, 296 F. Supp. 3d at 1164*. ***HN25***[] It is up to the jury to weigh the evidence.

The evidence raises a "genuine dispute of material fact on this causation theory." *In re Solodyn (Minocycline Hydrochloride) Antitrust Litig., No. CV 14-MD-02503, 2018 U.S. Dist. LEXIS 11921, 2018 WL 563144, at *16 (D. Mass. Jan. 25, 2018)*.

2. Early Entry Date After Mylan Won '703 Patent Litigation

Plaintiffs' second causation theory is that if Forest and Mylan had not settled, Mylan would have likely prevailed in the patent litigation through trial and appeal and entered the market earlier than it did.

While Defendants argue that Plaintiffs may not establish causation and antitrust injury by reference to a hypothetical patent trial between Forest and Mylan, this Court has already held that it could. *See* *Namenda IV, 2017 U.S. Dist. LEXIS 83446, 2017 WL 4358244, at *19* (The viability of Plaintiffs' *Section 1* claim "will depend on the presence of 'evidence suggesting that the settlement agreements did, in fact, delay generic entry,' which will presumably require proof that the '703 Patent would likely have been found invalid or not infringed by the Generic Competitors.")

Defendants point to the patent court's favorable *Markman* ruling and the subsequent settlements by Forest and the generics of the patent challenges as evidence that Forest's patent **[**94]** was unlikely to fail. Plaintiffs counter that the subsequent settlements had nothing to do with the patent merits, but are instead evidence — as Forest explained to Mylan during settlement discussions — that the generics recognized that there was "no financial upside to litigating." (PASoF ¶¶ 56 - 57.) In other words, they argue that the settlements were recognition that there were fourteen first filers who would share the 180-day exclusivity window and that sales and profits for generic memantine would be miniscule as a result. However, the Court need not resolve this issue for purposes of summary judgment.

As discussed in section I.6.C., *supra*, the court admits the opinions of Plaintiffs' expert George W. Johnson, Esq. Given this testimony, Plaintiffs have proffered evidence sufficient to raise a genuine dispute of material fact on this causation theory.

Defendants' summary judgment motion is DENIED.

D. Defendants are Not Entitled to Summary Judgment on Plaintiffs' Hard Switch Claims

Defendants move for summary judgment on Forest's hard switch claims arguing that Defendants cannot establish that the proposed class members suffered antitrust injury as a result of Forest's February 2014 announcement. **[**95]** In support of this motion, Defendants rely on the same arguments made in their motion to exclude the testimony of Plaintiffs' expert, Dr. Lamb, addressed in section 1.3., *supra*. (*See* Did. No. 445.)

For the reasons discussed therein, Defendants' motion is DENIED.

Plaintiffs' Motion for Class Certification is GRANTED

Class Certification Standard

HN26[] *Rule 23 of the Federal Rules of Civil Procedure* governs class certification. "The Second Circuit has emphasized that *Rule 23* should be given liberal rather than restrictive construction, and it seems beyond peradventure that the Second Circuit's general preference is for granting rather than denying class certification." Espinoza v. 953 Assocs. LLC, 280 F.R.D. 113, 2011 WL 5574895, at *6 (S.D.N.Y. 2011) (quoting Gortat v. **[*202]** Capala Bros., Inc., 257 F.R.D. 353, 361 (E.D.N.Y. 2009), *aff'd*, 568 F. App'x 78 (2d Cir. 2014)).

A. Rule 23(a)

HN27[] A putative class must meet the four prerequisites set forth in Rule 23(a) to be certified: numerosity, commonality, typicality, and adequacy of representation. Brown v. Kelly, 609 F.3d 467, 475 (2d Cir. 2010).

If even one of the Rule 23(a) requirements is not met, certification must be denied. Gomez v. Lace Entm't, Inc., No. 15 Civ. 3326 (CM), 2017 U.S. Dist. LEXIS 5770, 2017 WL 129130, at *4 (S.D.N.Y. Jan. 6, 2017). As the Supreme Court observed in Wal-Mart Stores, Inc. v. Dukes, 564 U.S. 338, 349, 131 S. Ct. 2541, 180 L. Ed. 2d 374 (2011), the requirements of Rule 23, by effectively confining the class claims to those "fairly encompassed" by the claims of the named plaintiffs, ensure that those plaintiffs are "appropriate representatives of the class whose claims they wish to litigate."

1. Numerosity — Rule 23(a)(1)

HN28[] Numerosity requires that the class must be "so numerous **[**96]** that joinder of all members is impracticable." Fed. R. Civ. P. 23(a)(1). As certain presumptions attach depending on the sheer size of the class, the number of members in a putative class is the starting point of the Rule 23(a)(1) analysis. Classes with forty or more putative members raise a rebuttable presumption that joinder is impracticable. *See* Sanchez v. New York Kimchi Catering, Corp., 320 F.R.D. 366, 375 (S.D.N.Y. 2017); Shayler v. Midtown Investigations, Ltd., No. 12 Civ. 4685 (KBF), 2013 U.S. Dist. LEXIS 29540, 2013 WL 772818, at *4 (S.D.N.Y. Feb. 27, 2013). For classes with fewer than twenty members, however, joinder is generally deemed practical. *See, e.g.,* Ansari v. New York Univ., 179 F.R.D. 112, 114 (S.D.N.Y. 1998) (twenty-one or fewer members suggests no class); *CL—*Alexanders Laing & Cruickshank v. Goldfeld, 127 F.R.D. 454, 455 (S.D.N.Y. 1985) (twenty-one members insufficient to certify class); *see also* Wilson v. Corelogic SafeRent, LLC, No. 14 Civ. 2477 (JPO), 2017 U.S. Dist. LEXIS 162928, 2017 WL 4357568, at *6 (S.D.N.Y. Sept. 29, 2017) (quoting William B. Rubenstein, *Newberg on Class Actions* § 3:11 (5th ed. 2017)).

Keeping in mind that the inquiry is not strictly mathematical, Pa. Pub. Sch. Empls. Pet Sys. v. Morgan Stanley & Co., Inc., 772 F.3d 111, 120 (2d Cir. 2014), the district court must analyze each case separately to determine whether the numerosity requirement has been satisfied, considering the following factors:

1. judicial economy;
2. geographic dispersion of the proposed class members;
3. financial resources of the proposed class members;
4. the ability of proposed class members to file individual suits;
5. requests for relief that could affect future class members;
6. knowledge of the names and existence of potential class members; and
7. whether potential class members have already **[**97]** joined in other actions.

See Robidoux, 987 F.2d at 935.

2. Commonality — Rule 23(a)(2)

HN29[] Commonality requires that there exist questions of law or fact that are both common to the class and answerable through a class-wide proceeding. Fed. R. Civ. P. 23(a)(2); Dial Corp. v. News Corp., 314 F.R.D. 108, 113 (S.D.N.Y. 2015). The Supreme Court has clarified that this prong also requires the plaintiff to "demonstrate that the class members have suffered the same injury.'" Wal—Mart, 564 U.S. at 350 (quoting Gen. Tel. Co. of Southwest v. Falcon, 457 U.S. 147, 157, **[*203]** 102 S. Ct. 2364, 72 L. Ed. 2d 740 (2011)). Where, as here, plaintiffs move to certify a class under Rule 23(b)(3), the commonality requirement is subsumed under, or superseded by, the more demanding predominance requirement of Rule 23(b)(3), discussed *infra. See* Dial, 314 F.R.D. at 113.

3. Typicality — Rule 23(a)(3)

HN30[] Typicality "is satisfied when each class member's claim arises from the same course of events, and each class member makes similar legal arguments to prove the defendant's liability." Marisol A. v. Giuliani, 126 F.3d 372, 376 (2d Cir. 1997) (internal quotation marks omitted) (quoting In re Drexel Burnham Lambert, 960 F.2d 285, 291 (2d Cir. 1992)). Similar considerations animate commonality and typicality such that the analyses under Rules 23(a)(2) and (3) tend to merge. *See* Marisol A., 126 F.3d at 376.

4. Adequacy — Rule 23(a)(4)

HN31[] Adequacy requires that "the representative parties fairly and adequately protect the interests of the class." Fed. R. Civ. P. 23(a)(4); *see also* Brown, 609 F.3d at 475. Class counsel must be "qualified, experienced, and generally able to conduct the litigation." Marisol A, 126 F.3d at 378 (internal quotation marks omitted) (quoting In re Drexel Burnham Lambert Grp, Inc., 960 F.2d at 291).

Rule 23(a)(4) also requires **[**98]** that the class representative "be aware of the basic facts underlying the lawsuit and not likely to abdicate his obligations to fellow class members." Gordon v. Sonar Capital Mgmt. LLC, 92 F. Supp. 3d 193, 200 (S.D.N.Y. 2015) (internal quotation marks omitted) (quoting In re Monster Worldwide, Inc. Sec. Litig., 251 F.R.D. 132, 135 (S.D.N.Y. 2008)). This requirement is a modest one — "class representative status may be denied only 'where the class representatives have so little knowledge of and involvement in the class action that they would be unable or unwilling to protect the interests of the class against the possible competing interests of the attorneys.'" *Id.* (quoting In re Monster Worldwide, 251 F.R.D. at 135).

Finally, if certain members of the class are subject to unique defenses, the court must inquire as to whether those defenses "threaten to become the focus of the litigation." Gordon v. Sonar Capital Mgmt. LLC, 92 F. Supp. 3d 193, 205 (S.D.N.Y. 2015) (internal quotation marks omitted) (quoting Romero v. Flaum Appetizing Corp., No. 07 Civ. 7222, 2011 U.S. Dist. LEXIS 23782, 2011 WL 812157, at *3 (S.D.NY. Mar. 1, 2011)).

5. Ascertainability

HN32[] In addition to the four factors enumerated in Rule 23(a), there is an "implied requirement that the membership of the class is identifiable and ascertainable." Jankowski v. Castaldi, No. 1 Civ. 0164 (SJF), 2006 U.S. Dist. LEXIS 4237, 2006 WL 118973, at *5 (E.D.N.Y. Jan. 13, 2006) (quoting In re Methyl Tertiary Butyl Ether Prods. Liab. Litig. (In re MTBE), 209 F.R.D. 323, 337 (S.D.N.Y. 2002)); Noble v. 93 Univ. Place Corp., 224 F.R.D. 330, 337 (S.D.N.Y. 2004). A class is ascertainable if it is (1) sufficiently bounded so that it is feasible for the court to determine whether a particular individual is a member, and (2) defined by objective criteria that avoid a "mini-hearing on the merits of each case." In re Petrobras Sec., 862 F.3d 250, 266 (2d Cir. 2017).

B. Rule 23(b)

HN33[] If the class **[**99]** proponent satisfies each of the Rule 23(a) prerequisites, he must next demonstrate that at least one of the three requirements listed in subsection 23(b) is met. Wal—Mart, 564 U.S. at 345. **[*204]** Here, Plaintiffs seek certification under subsection 23(b)(3), which allows a claim for damages to proceed as a class if it is established that (1) common questions predominate over individual questions (the predominance requirement), and (2) the class action vehicle is superior to other possible methods of "fairly and efficiently adjudicating the controversy" (the superiority requirement). *Fed. R. Civ. P. 23(b)(3)*.

1. Predominance

HN34[] The predominance requirement, as a general matter, "tests whether proposed classes are sufficiently cohesive to warrant adjudication by representation." *In re Nassau Cty. Strip Search Cases, 461 F.3d 219, 225 (2d Cir. 2006)* (internal quotation marks and citation omitted). Even where *Rule 23(a)*'s commonality requirement is satisfied, predominance under *Rule 23(b)(3)* is not necessarily met because the latter requires considerably more. *Comcast Corp. v. Behrend, 569 U.S. 27, 33, 133 S. Ct. 1426, 185 L. Ed. 2d 515 (2013)*. More than their mere presence, *Rule 23(b)(3)* requires that questions common to the class predominate over individual ones.

Determining whether a question is common or individual depends on the kind of proof that will be needed to resolve that question at trial. An individual question is one for which **[**100]** "members of a proposed class will need to present evidence that varies from member to member," while a common question is one for which "the same evidence will suffice for each member to make a prima facie showing [or] the issue is susceptible to generalized, class-wide proof." *Tyson Foods, Inc. v. Bouaphakeo, 136 S.Ct. 1036, 1045, 194 L. Ed. 2d 124 (2016)*. Plaintiffs are not, however, required to prove that these questions will be answered in their favor in order to certify a class under this provision. *See* *Amgen Inc. v. Conn. Ret. Plans & Tr. Funds, 568 U.S. 455, 468, 133 S. Ct. 1184, 185 L. Ed. 2d 308 (2013)*.

Moreover, "individual questions need not be absent" in order to certify a class under *Rule 23(b)(3)*; the text of *Rule 23(b)(3)* itself contemplates that such questions will be present. *Sykes, 780 F.3d at 81*. "The rule requires only that those questions not predominate over the common questions affecting the class as a whole." *Id.* (internal quotation marks omitted) (quoting *Messner v. Northshore Univ. HealthSystem, 669 F.3d 802, 815 (7th Cit. 2012))*. For example, if liability can be determined on a class-wide basis, common issues may predominate even in the face of some individualized damages issues. *Sykes, 780 F.3d at 81* (quoting *In re Visa Check, 280 F.3d at 139*).

2. Superiority

HN35[] Finally, the district court must determine that "a class action is superior to other available methods for fairly and efficiently adjudicating the controversy." *Fed. R. Civ. P. 23(b)(3)*. While, structurally, the four factors set forth in *Rule 23(b)(3)* govern both predominance and superiority, **[**101]** the Second Circuit has held that "they more clearly implicate" the latter. *Sykes, 780 F.3d at 82*. Accordingly, in determining whether the class action is a superior method, courts consider:

> (A) the class members' interests in individually controlling the prosecution or defense of separate actions;
> (B) the extent and nature of any litigation concerning the controversy already begun by or against class members;
> (C) the desirability or undesirability of concentrating the litigation of the claims in the particular forum; and
>
> **[*205]** (D) the likely difficulties in managing a class action.

Fed. R. Civ. P. 23(b)(3). Manageability is, by far, the most critical factor in the superiority determination. *Id.*

Analysis

Plaintiffs seek to certify a class comprising "All persons or entities in the United States and its territories who purchased branded Namenda IR 5 or 10 mg tablets, and/or generic Namenda IR 5 or 10 mg tablets (including an authorized generic), and/or branded Namenda XR capsules, directly from Forest or its successors in interest, Actavis and Allergan, and/or from any generic manufacturer at any time during the period from June 2012 until September 30, 2015." (Pls.' Mot. for Class Certification, Ex. 1, Dkt. No. 400 ("Class Cert. Mot.").)

The proposed class **[**102]** consists of 62 members. (Pls.' Reply Mem. of Law in Supp. of Direct Purchaser Class Pls.' Mot. for Class Certification at 2, Dkt. No. 421 ("Pls.' Reply")). All are major pharmacy retailers (like CVS or Walgreens) or wholesalers who sell to major pharmacy retailers. They purchase Namenda or Namenda-generics for resale to pharmacies and/or consumer patients. (Lamb Rep. ¶ 42.)

At the outset, I reject Defendants' argument that Smith and RDC are inadequate class representatives because they lack sufficient knowledge and involvement in the case, and have abdicated all control to counsel. (Defs.' Opp'n to Direct Purchaser Pls.' Mot. for Class Certification at 20, Dkt. No. 412 ("Defs.' Opp'n").) Both RDC and Smith have indicated their knowledge of and interest in pursuing the claims of the class. (Hamburger Decl. Ex. 14, Dkt. No. 410 ("Doud Dep. Tr.") at 10:25 - 11:21, 14:6 - 24, 155:20 - 23, 180:1 - 3; Hamburger Decl. Ex. 15, Dkt. No. 410 ("Benton Dep. Tr.") at 25:8 - 23, 46:15 - 17, 283:14 284:7, 295:9 - 24.)

Defendants' remaining inadequacy arguments pertaining to specific conflicts will be addressed in the discussions of the relevant subgroup.

The proposed class can be broken down into 5 **[**103]** subgroups: (1) Forest Direct Customers; (2) Generic Purchasers (with a sub-subgroup of Non-Forest Generic Purchasers); (3) Corporate Subsidiaries; and (4) allegedly uninjured entities. As Plaintiffs have removed DIK Drug, First Veterinary Supply, and H.D. Smith Wholesale from the revised list of proposed members, they are not included in the following discussion.

Forest Direct Customers. 19 entities (including named Plaintiffs Smith and RDC) are direct customers of Defendants ("Forest Direct Customers"). These entities purchased branded Namenda IR and XR from Defendants, and all also purchased the generic. (Did. No. 552.) The members of this subgroup assert both "reverse payment" and "hard switch" claims. They are Arnerisource Bergen; Anda; Capital Wholesale; Cardinal Health; Dakota Drag; Drogueria Betances; Drogueria Cesar Castillo; Frank W. Kerr Inc.; HD Smith LLC; Louisiana Wholesale Drug; McKesson; Miami Luken; Morris & Dickson; North Carolina Mutual Wholesale Drug; PBA Health; Prescription Supply Inc.; RDC; Smith; and Value Drug.

With respect to this subgroup, Defendants argue that Smith and RDC are inadequate representatives because 3 members are subject to a unique defense that **[**104]** other members have no interest in defending against. (Defs.' Opp'n at 21.) They argue that Amerisource Bergen, Cardinal, and McKesson ("the Big Three"), are subject to a "generic bypass" defense insofar as "they may have benefitted from Forest's conduct because of the tendency for generic **[*206]** companies to bypass wholesalers and sell directly to retailers." (*Id.* at 21.) The question here is whether the generic-bypass defense "threaten[s] to become the focus of the litigation." *Gordon, 92 F. Supp. 3d at 205* (internal quotation marks omitted) (quoting *Romero, 2011 U.S. Dist. LEXIS 23782, 2011 WL 812157, at *3)*.

These arguments aside, Defendants concede that these 19 entities would be properly included in any class that might be certified. They urge, however, that a class of 19 members is not sufficiently numerous to warrant certification.

As to the other 43 members of the proposed class, Forest objects, on multiple grounds, to their inclusion in a certified class.

Generic Purchaser Group. 31 entities purchased only generic memantine ("the Generic Purchaser Group"). They are Albertsons LLC, American Health Packaging, Associated Pharmacies, Auburn Pharmaceutical; Bloodworth Wholesale Drugs; Blupax Pharmaceuticals, LLC; CVS Caremark; Drugs Unlimited, Inc.; Express Scripts Inc.; Genetco Inc.; **[**105]** Hannaford Brothers; HC Pharmacy Central Inc.; Healthsource Distributors, LLC; Humana Inc.; Independent Pharmacy Cooperative; Kaiser Permanente; Keysource Medical, Inc.; Major Pharmaceuticals/Rugby Laboratories; Masters Pharmaceutical Inc.; Medco Health Solutions Inc.; Meijer, Inc; OptumRx Inc.; Peytons; Quest Pharmaceuticals, Inc.; Richie Pharmaceutical Company; Rx Outreach; Supervalu Inc.; Tel Drug of PA LLC; TopRx LLC; Walmart; and Winn Dixie Logistics Inc.

Defendants argue that the Generic Purchaser Group was not comprehended within the original class definition proposed in the complaint and that should not be added into the mix now. As to all thirty-one members, Defendants argue that these members' claims are not typical of the named Plaintiffs' claims (or of the claims of the Forest Direct Customers) and either lack common questions with the hard switch claims asserted by the Forest Direct Customers or any common claims do not meet the predominance standard of *Rule 23(b)(3)*; and that the named Plaintiffs have no incentive to represent the interests of this group as a result. (Defs.' Opp'n at 10 - 12.)

In addition to the objections described above, Defendants also argue that 30 members of the **[**106]** Generic Purchaser Group lack antitrust standing under *Illinois Brick, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*, because only one entity — Meijer, Inc. — purchased generic memantine directly from Forest. (Dk-t. No. 552.) All other entities purchased generics from entities other than Forest and Mylan during the last two and one half months of the class period. I will call them the "Non-Forest Generic Purchaser Group."

Corporate Subsidiaries. Defendants object to the inclusion of 4 entities on the basis that class membership should be limited to the common parent of corporate family members — Bellco, Burlington Drug, The Harvard Group, and Valley Wholesale. (Defs.' Opp'n at 13 - 14.)

Allegedly Uninjured Members. Defendants argue that 9 entities (including The Harvard Group from the previous list) must be excluded because they were not injured.

Publix, HE Butt, Kerr Drug, and Bartell allegedly suffered no injury from the purported scheme because they never bought Namenda IR and stopped buying Namenda XR before the hard switch announcement. (*Id.* at 12.)

DMS allegedly suffered no injury from the purported scheme because it purchased neither Namenda IR nor Namenda XR until after generic entry. (*Id.* at 12 - 13.)

[*207] Discount Drug Mart, Drogueria Central, and The Harvard **[**107]** Drug Group allegedly suffered no injury from the hard switch because they never purchased Namenda XR at all. (*Id.* at 13.)

Finally, Bartell, Drogueria Central, Kerr Drug, and Kroger allegedly were not injured by the scheme because they purchased only branded Namenda, even following generic entry. (*Id.* at 13.) (Bartell, Kerr Drug, and Drogueria Central were already included in the previous lists.)

I will deal with Forest's objections group by group.

A. Corporate Subsidiaries

Defendants argue that class membership should be limited to the common parent of corporate family members and object to the inclusion of four entities they claim are owned by other members in the class. They are Bellco, Burlington Drug, The Harvard Group, and Valley Wholesale. Defendants assert that Belleo is owned by Amerisource Bergen; that Burlington Drug is owned by JM Smith Corporation; that The Harvard Group is owned by Cardinal; and that Valley Wholesale is owned by H.D. Smith LLC. (*Id.* at 13 - 14.)

Plaintiffs' Exhibit 9 addresses the corporate status of these entities. (Pls.' Ex. 9, Corporate Status of Certain Entities Listed in Manufacturer Transactional Data.)

The record indicates that Bellco is the wholly owned subsidiary of Arnerisource **[**108]** Bergen Drug Corporation and has been incorporated in New York State since May 1960. (Pls.' Ex. 9-B.) Burlington Drug is a subsidiary of JM Smith Corporation, formed under the laws of Vermont in January 1998. (Pls.' Ex. 9-C.) The Harvard Group is a majority-owned subsidiary of Cardinal, incorporated under the laws of Michigan in June 1997. (Pls.' Ex. 9-D.) And Valley Wholesale is a wholly-owned subsidiary of H.D. Smith, formed under the laws of Delaware in October 2012. (Pls.' Ex. 9-E.)

Plaintiffs argue that these subsidiaries are each entitled to a presumption of separateness from their parent corporations because the companies are separately incorporated, separately listed in the manufacturers' transactional data, and, most importantly, separately purchased (and were overcharged for) the product. (Pls.' Reply at 6.) In other words, related or not, each Class member that bought Namenda "suffered independent injury." (*Id.*)

I agree. Defendants do not dispute the fact that these entities each independently purchased Namenda products. ***HN36***[] I join with other courts that have considered this issue and have ruled that where there is distinct and separate injury, a corporate relationship with another **[**109]** class member does not defeat individual member status. *See, e.g., In re Solodyn, 2017 U.S. Dist. LEXIS 170676, 2017 WL 4621777, at *4* (considering and rejecting this argument with respect to Valley Wholesale and H.D. Smith); *see also Am. Sales Co., LLC v. Pfizer, Inc., No. 14 Civ. 361, 2017 U.S. Dist. LEXIS 137222, at *25, 2017 WL 3669604, at *8 (ED. Va. July 28, 2017)* (allowing subsidiaries to vindicate their own antitrust injuries).

Plaintiffs provide sufficient evidence of separateness between these subsidiaries and their parent corporations. Any overcharges they paid for their own purchases of memantine are separately and distinctly applicable to them.

13. Miscellaneous Uninjured Members

Defendants' objections to the following entities are variations on a theme. At bottom, their arguments pertaining to Publix, HE Butt, Kerr Drug, Bartell, DMS, Drogueria **[*208]** Central, Kroger, Discount Drug Mart, and The Harvard Group come down to the claim that, for one reason or another, these entities were not injured by Forest's alleged misconduct.

To frame the following discussion, it is instructive to review the proposed class members' alleged injuries. All members of the class claim that they were overcharged for their memantine requirements due to Forest's allegedly anticompetitive conduct.

With respect to the reverse payment claim, Plaintiffs allege that "all or nearly all" members of the class were **[**110]** overcharged. (Lamb Rep. ¶ 13-a.) They allege that any member who purchased Namenda IR, Namenda XR, and/or generic memantine hydrochloride paid higher prices than they otherwise would have had generic competition started earlier, "because they would have purchased (or purchased more) generic memantine at prices below branded Namenda and would have purchased the generic at lower prices." (*Id.*) In other words, Plaintiffs claim that the reverse payment injured any member who purchased Namenda IR, any member who purchased Namenda XR, and any member who purchased a generic alternative once it became available (from Forest or from a generic competitor).

With respect to the hard switch claim, Plaintiffs allege that "all or nearly all proposed Class members who purchased at least Namenda IR and XR, or XR" were overcharged. (Lamb Rep. ¶ 13-b.) In other words, Plaintiffs allege that any entity that purchased Namenda XR paid a higher price than they otherwise would have for the generic memantine they would have purchased in place of the more expensive brand name drug, and that they would have purchased more of that generic. (*Id.*)

Plaintiffs allege that the aggregate overcharges break down into two **[**111]** categories: "Brand-Generic" and "Generic-Generic." (*Id.* at ¶ 125.) The former relates to Forest's alleged foreclosure of class members' switching to generic memantine via both the reverse payment and the hard switch strategy. Absent the reverse payment, Plaintiffs allege, a large volume of branded Namenda IR and Namenda XR purchases would have been replaced by generic memantine at a significantly reduced price. (*Id.*) "Brand-Generic" injuries thus include the higher prices paid by class members for the branded Namenda IR and XR they actually bought instead of the lower-priced generic alternative they would have bought absent the reverse payment and the hard switch strategy. (*Id.*)

"Generic-Generic" overcharges relate to the higher prices that class members paid for the generic alternatives they actually bought. (*Id.* at ¶ 126.) The reverse payment led to such overcharges because it delayed generic entry and "prices for generic drugs tend to decline over time as generic manufacturers compete against each other." (*Id.*) The hard switch strategy led to Generic-Generic overcharges because it shifted the Namenda IR prescription base to Namenda XR before generics had the chance to compete for **[**112]** Namenda IR business. (*Id.* at ¶ 65.) In light of the 89.9% substitution rate of generic memantine for brand Namenda IR over the three months following generic entry, Dr. Lamb concludes that generic entry would have affected a larger base of IR prescriptions absent the hard switch. (*Id.* at ¶ 81.) Plaintiffs submit that generic memantine purchasers paid higher prices because this suppressed generic sales and their attendant savings. (*Id.* at ¶ 65.) The Generic-Generic category would apply to any member who purchased generic memantine, whether they previously purchased branded Namenda products or not.

Moving to Defendants' specific objections, they first argue that Publix, HE **[*209]** Butt, Kerr Drug, and Bartell were not injured because they never bought Namenda IR and stopped buying Namenda XR before the hard switch announcement. (Defs.' Opp'n at 12.) These entities were injured under the Brand-Generic theory described above insofar as Plaintiffs allege that Namenda XR purchases would have been replaced by generic memantine at a significantly reduced price.

Publix and HE Butt were also injured to the extent they purchased generic memantine. The record indicates that Kerr Drug and Bartell never purchased **[**113]** generic memantine. (*See* Hamburger Decl. Ex. 13, Dkt. No. 410 (Expert Report of Pierre-Yves Cremieux ("Cremieux Rep.")), at ¶ 63 (Ex. 1.2, Summary of Findings: Reverse Payment))

Defendants argue that DMS could not have been injured by the alleged scheme because it did not make any purchases of Namenda IR or Namenda XR until after generic entry." (Defs.' Opp'n at 13.) To the extent Plaintiffs allege that DMS purchased generic memantine during the class period, DMS suffered injury in the form of Generic-Generic overcharges.

Defendants argue that Bartell, Drogueria Central, Kerr Drug, and Kroger should be excluded because they did not buy generic memantine, even after it became available following generic entry. They submit that there is no basis to assume that such brand-only purchasers "would have purchased generic Namenda IR in the but-for world." (*Id.* at 13.)

I understand Defendants' argument that the decision to continue buying branded Namenda products, even after generics entered the market, casts doubt on the fact that these entities would have purchased the generic earlier had it been available to them. But Defendants are not entitled to the benefit of that doubt when the very reason we cannot **[**114]** know the answer to that question is because of their alleged wrongdoing. *See* *In re DDAVP, 585 F.3d at 689*.

Defendants argue that Discount Drug Mart, Drogueria Central, and The Harvard Group "could not have been injured by the hard switch" because they never purchased Namenda XR or stopped purchasing Namenda XR before the February 2014 announcement, and should therefore be excluded with respect to the hard switch claim. (Defs.' Opp'n at 13.)

That these entities never purchased Namenda XR does not establish that they were uninjured by the hard switch. If the jury finds Forest liable on Plaintiffs' theory of liability, these members were injured insofar as the hard switch strategy shifted the Namenda IR prescription base, thereby suppressing generic sales and their attendant savings. In the case of Discount Drug Mart, the question of whether its purchases were "due to" the hard switch strategy is a question for the trier of fact, given the evidence of Defendants' pre-announcement communications with key stakeholders and customers regarding the launch of Namenda XR and withdrawal of Namenda IR.

***

That brings Plaintiffs to a total proposed class of 31 members, which is still below the commonly accepted threshold of **[**115]** 40 members needed to warrant class certification.

And so we turn to the largest and most complicated group of potential class members — the one as to which Forest levels the most objections. If they can be included in the class, it will easily exceed the 40 member threshold. If they cannot, certification becomes more problematic.

[*210] C. Generic Purchaser Group

This category includes members who purchased generic memantine hydrochloride. They are Albertsons LLC; American Health Packaging; Associated Pharmacies; Auburn Pharmaceutical; Bloodworth Wholesale Drugs; Blupax Pharmaceuticals, LLC; CVS Caremark; Drugs Unlimited, Inc.; Express Scripts Inc.; Genetco Inc.; Hannaford Brothers; HC Pharmacy Central Inc.; Healthsource Distributors, LLC; Humana, Inc.; Independent Pharmacy Cooperative; Kaiser Permanente; Keysource Medical, Inc.; Major Pharmaceuticals/Rugby Lab; Masters Pharmaceutical Inc.; Medco Health Solutions Inc.; Meijer Inc.; Optumrx Inc.; Peytons; Quest Pharmaceuticals, Inc.; Richie Pharmaceutical Company; RX Outreach; Supervalu Inc.; Tel Drug of PA LLC Joann Christens; Top RX LLC; Walmart; and Winn Dixie Logistics Inc.

Forest objects to the inclusion of the entire Generic Purchaser Group **[**116]** because generic purchasers were not included in the original class definition proposed in the complaint. It also argues that their claims are not typical of Forest Direct Customers, and that their claims either lack common questions with the Forest Direct Customers' hard switch claim, or any common issues do not predominate. Forest argues that named Plaintiffs' interests are not aligned with the Generic Purchaser Group as a result. (*Id.* at 10 - 11.)

Finally, because all but one Generic Purchaser — Meijer, Inc. — purchased memantine from Forest's generic competitors, not from Forest itself, Forest objects to the Non-Forest Generic Purchasers on the further ground that they lack antitrust standing under *Illinois Brick Co. v. Illinois, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*. (Defs.' Opp'n at 11 - 12.)

1. Expanded Class Definition

Defendants are correct that the inclusion of the Generic Purchaser Group expands upon the definition found in Plaintiffs' complaint, which proposed a class consisting only of members who purchased Namenda IR or XR *directly* from Forest. (*See* Am. Compl. ¶ 193.) They are wrong, however, when they argue Plaintiffs "were obligated to seek leave to amend the Complaint well before fact discovery closed." (Defs.' Opp'n at 11.)

HN37[] It is well-established **[**117]** that a certifying court "is not bound by the class definition proposed in the complaint." *Robidoux v. Celani, 987 F.2d 931, 937 (2d Cir. 1993)*. However, this principle is customarily cited as support for the court's ability to narrow a proposed class. *See, e.g., Lundquist v. Sec. Pac. Auto. Fin. Servs. Corp., 993 F.2d 11, 14 (2d Cir. 1993)*; *Madden v. Midland Funding, LLC, 237 F. Supp. 3d 130, 153 (S.D.N.Y. 2017)*; *Flores v. Anjost Corp., 284 F.R.D. 112, 125 (S.D.N.Y. 2012)*; *Poddar v. State Bank of India, 235 F.R.D. 592, 595 (S.D.N.Y. 2006)*. Far fewer cases support the converse proposition that the court may approve the expansion of the class as it was defined in the complaint. Plaintiffs cite three cases to this end, two of which are instructive here — *Menking ex rel. Menking v. Daines, 287 F.R.D. 174 (S.D.N.Y. 2012)* and *McCarthy v. Paine Webber Grp., Inc., 164 F.R.D. 309 (D. Conn. 1995)*.

In *Menking, 287 F.R.D. at 181*, even though the plaintiff originally sought certification of a *citywide* class in her complaint, the court approved a "new and expanded *statewide* definition for the proposed class," as requested by the plaintiff in her motion for class certification "based on evidence obtained in discovery." In *McCarthy, 164 F.R.D. at 311*, the plaintiff's motion for class certification proposed a class comprising all persons **[*211]** who owned limited partnership interests in a particular entity. This was broader than the definition found in the complaint, which confined the class to persons who owned a limited partnership interest *during a particular time period. Id.* The court certified the broader class proposed in the motion for certification, noting that it was "not bound by the class definition **[**118]** proposed in the complaint." *Id.* (citing *Robidoux, 987 F.2d at 937*).

Menking and *McCarthy* demonstrate that*HN38*[] a plaintiff's expansion of the class definition beyond that which was proposed in the complaint is not categorically improper. Rather, in both cases, the court went on to consider whether the newly proposed class members satisfied the substantive requirements of *Rule 23(a)*.

Forest argues that, under *In re Aluminum Warehousing Antitrust Litig., No. 13-md-2481 (KBF), 2016 U.S. Dist. LEXIS 54643, at *32-33 (S.D.N.Y. Apr. 25, 2016)*, Plaintiffs must establish that there is good cause for expanding the class at this juncture because the time to add new members "has long passed." (Defs.' Opp'n at 11.) I disagree. Defendants' reliance on the good cause standard discussed in *Aluminum Warehousing* is misplaced; there, the court was considering the plaintiffs' motion for leave to file a fifth amended complaint. *Aluminum Warehousing, 2016 U.S. Dist. LEXIS 54643, at *21*. This is a timely motion for class certification, not a belated motion for leave to file an amended complaint.

Moreover, Plaintiffs' proposed class definition does not raise the same notice and discovery issues present in *Aluminum Warehousing*. There, the proposed amendments would have added two new foreign defendants, "with respect to whom service would not be completed under the Hague Convention **[**119]** for at least several months," *id. at *13*; changed the plaintiffs' claims and proposed class definition "in the midst of class certification briefing in ways that could necessitate substantial new fact and expert discovery — including significant non-party and overseas discovery — that defendants could not have anticipated," *id. at * 13* - 14; and substantially broadened the scope of the proposed class and relevant transactions by including markets that the defendants had no "reason to address during the discovery period," *id. at * 14*.

Plaintiffs here are not attempting to add any new defendants, let alone foreign parties. Nor are they attempting to broaden the class definition "in the midst of class certification briefing — they included the expanded definition at the outset, in their initial motion for certification. (Class Cert. Mot., Ex. 1.)

Furthermore, Defendants had reason to anticipate during discovery any novel issues that the Generic Purchaser Group might introduce. While the Amended Complaint did not include the Generic Purchaser Group as members of the class, it specifically alleged that but for Defendants' anticompetitive conduct, members of the class would have paid less for memantine by "purchasing generic **[**120]** Namenda IR at lower prices sooner." (Am. Compl. ¶ 229.) It further alleged,

> Defendants' anticompetitive conduct, which delayed introduction into the United States marketplace of generic versions of Namenda IR, has caused plaintiff and the Class to pay more than they would have for memantine hydrochloride absent defendants' illegal conduct. . . . As more generic manufacturers enter the market, prices for generic versions of a drug predictably plunge **[*212]** even further due to competition among the generic manufacturers.

(*Id.* ¶¶ 226 - 27.) And indeed, Defendants' expert, Dr. Cremieux, addresses the claims of the Generic Purchaser Group throughout his report. (*See, e.g.*, Cremieux Rep. 163.)

Ultimately, consistent with the certifying court's broad discretion over class definition and obligation to reassess class rulings as the case develops, *Boucher v. Syracuse Univ., 164 F.3d 113, 118 (2d Cir. 1999)* (quoting *Barnes v. Am. Tobacco Co., 161 F.3d 127, 140 (3d Cir. 1998))*, I see no reason to disregard the class definition that Plaintiffs propose in their motion for class certification simply because it expands upon the definition found in the Amended Complaint.

2. Antitrust Standing

Defendants object to the inclusion of the Non-Forest Generic Purchasers in the class on the ground that they lack antitrust standing. Defendants **[**121]** rely on a line of cases beginning with *Illinois Brick*, to support their argument that "any purchases from a generic manufacturer (other than Mylan or Forest itself) could not form the basis of an antitrust claim." (Defs.' Opp'n at 12.)

However, these "direct-purchaser" cases are irrelevant because the Non-Forest Generic Purchasers are not *Illinois Brick* "indirect purchasers." ***HN39***[] Indirect purchasers are those who buy from the customers of a defendant — from people to whom the defendant sold product. *See* *Hanover Shoe v. United Shoe Mach. Corp., 392 U.S. 481, 492-94, 88 S. Ct. 2224, 20 L. Ed. 2d 1231 (1968)*; *see also* *California v. ARC Am. Corp., 490 U.S. 93, 97, 109 S. Ct. 1661, 104 L. Ed. 2d 86 (1989)*; *Illinois Brick, 431 U.S. at 724, 741*; *Associated Gen. Contractors of Cal., Inc. v. Cal. State Council of Carpenters, 459 U.S. 519, 550, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)*. The Non-Forest Generic Purchasers bought from Forest's competitors. Vis-à-vis Forest, they are neither direct nor indirect; vis-à-vis the generic manufacturers from whom they bought their memantine, they are direct purchasers.

HN40[] The Non-Forest Generic Purchasers have standing to bring antitrust claims against Forest if they (1) have suffered an antitrust injury "of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful," and (2) are proper plaintiffs in light of the four "efficient enforcer" factors. *In re DDAVP, 585 F.3d at 688* (internal citations and quotation marks omitted) (quoting *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*; *Volvo N. Am. Corp. v. Men's Int'l Prof'l Tennis Council, 857 F.2d 55, 66 (2d Cir. 1988))*.

As to the first prong, the Non-Forest Generic Purchasers **[**122]** claim that they were overcharged for their purchases of generic memantine as a result of Forest's "two-part, allegedly anticompetitive and 'unlawful scheme to maintain a monopoly and to allocate the United States market for branded and generic versions of memantine hydrochloride." (Lamb Rep. ¶ 5.) Monopolist overcharges are "the classic antitrust injury." *Savory Pie Guy, LLC v. Comtec Indus., Ltd., No. 14 Civ. 7527 (VB), 2016 U.S. Dist. LEXIS 179317, 2016 WL 7471340, at *12 (S.D.N.Y. Dec. 28, 2016)*; *see also* *Freeland v. AT&T Corp., 238 F.R.D. 130, 143 (S.D.N.Y. 2006)*. Paying higher prices for generic memantine is "inextricably intertwined" with the anticompetitive effects of Defendants' alleged conduct and thus "flows from that which makes [their] acts unlawful." *In re DDAVP, 585 F.3d at 688* (quoting *Blue Shield of Va. V. McCready, 457 U.S. 465, 484,* ***[*213]*** *102 S. Ct. 2540, 73 L. Ed. 2d 149 (1982))*.

HN41[] As to the proper plaintiff prong, the Non-Forest Generic Purchasers satisfy the efficient enforcer criteria, which look to the (1) directness of the asserted injury, or causation; (2) self-interest of the class of persons to vindicate the public interest, or motivation; (3) speculativeness of the alleged injury; and (4) difficulty of identifying and apportioning damages so as to avoid duplicative recoveries. *Id. at 688*.

The Non-Forest Generic Purchasers' purported injuries are the direct result of the asserted antitrust violation — they allege they paid higher prices for generic memantine because Defendants intentionally restricted **[**123]** and manipulated generic competition.

They are also sufficiently motivated and well-positioned to vindicate the antitrust interests at play in this case. *See* *id. at 689* (describing competitors as the most motivated antitrust plaintiffs); *see also* *In re Zinc Antitrust Litig., 155 F. Supp. 3d 337, 361 (S.D.N.Y. 2016)* (describing competitors as the traditional plaintiff in antitrust cases).

Their claims support non-speculative damages, as they define damages by the difference between the prices they paid for generic memantine in the actual world and "those they would have paid in a world free of the alleged misconduct." *In re Zinc, 155 F. Supp. 3d at 362* (finding injury sufficiently non-speculative for antitrust standing purposes where plaintiffs defined damages by the amount by which the price at issue was inflated). While it "may be difficult to account precisely for the likely effects of generic competition," the Court has "little doubt that those effects can be sufficiently estimated and measured here." *In re DDAVP, 585 F.3d at 689*. Plaintiffs have submitted expert reports and analysis that speak precisely and extensively to this issue.

For example, Dr. Lamb uses the nearly 95% discount of generic memantine and corresponding 89.9% adoption rate in the three months following generic entry to estimate the price a generic purchaser **[**124]** would have paid if generics had entered the market earlier. (Lamb Rep. at Fig. 3 (Brand and Generic Market Sales); Fig. 4 (Brand and Generic Namenda IR Average Price); Fig. 5 (Generic Namenda IR Average Price).)

Defendants' reliance on *In re Skelaxin (Metaxalone) Antitrust Litig., 2014 U.S. Dist. LEXIS 66707, at *29 - 41 (E.D. Tenn. May 15, 2014)*, is unpersuasive. While the alleged antitrust conspiracy in that case largely tracks the facts of the scheme alleged here, I disagree with the court's conclusion that the relationship between fewer generic manufacturers and higher generic prices is "too speculative" to estimate the alleged overcharge. *Id. at *36*.

And finally, the circumstances of this case do not raise the same concerns of duplicative recovery as was true in *Illinois Brick* and the other "direct-purchaser" rule cases.

3. Adequacy of Named Plaintiffs

Defendants claim that RDC and Smith (both Forest Direct Customers) are inadequate representatives of a class including the Generic Purchaser Group because the majority of that group faces a unique standing hurdle, and no member of that group has an interest in the product-hopping claim. (Defs.' Opp'n at 21.)

I have already addressed and rejected Defendants' argument regarding the Non-Forest Generic Purchasers' antitrust standing.

[*214] I disagree with Defendants **[**125]** that the Generic Purchaser Group has no interest in the "hard switch" claim. Plaintiffs allege that the Generic Purchaser Group was impacted by the hard switch strategy because it led to higher generic prices. Dr. Lamb concluded that absent the hard switch strategy, and given the 89.9% substitution of generic memantine for brand Namenda in the three months following generic entry, generic entry would have affected a larger base of IR prescriptions and led to increased generic memantine purchases and savings. (Lamb Rep. ¶ 81.)

***

With the Generic Purchaser Group included, the class comprises 62 members and the numerosity requirement is presumptively satisfied. *Ramirez v. Riverbay Corp., 39 F. Supp. 3d 354, 362 (S.D.N.Y. 2014)* (citing *Consol. Rail Corp. v. Town of Hyde Park, 47 F.3d 473, 483 (2d Cir. 1995))*.

The various other factors in the numerosity analysis also weigh in favor of certification. The class members in this case are spread across the country; a fair number are located on the East Coast, others on the West, and still others in Puerto Rico. (Lamb Reply Rep. at Fig. 2.) Their disparate locations constitutes both a significant and practical difficulty to joinder. Individual suits filed in each of these locations would also impose an unnecessary and substantial burden on the judicial system.

There is also evidence **[**126]** that a number of the potential class members are small wholesalers that lack the financial resources to bring individual actions. (Lamb Rep. ¶ 42.) While all members might have the same incentive to bring individual actions, they do not have the same ability to do so.

D. Typicality, Commonality, and Predominance

Defendants' objections to the various subgroups addressed above are, in reality, arguments about typicality, commonality, and predominance. ***HN42***[] These analyses share a similar focus — they test whether the class is "sufficiently cohesive to warrant adjudication by representation," *In re Nassau Cty. Strip Search Cases, 461 F.3d 219, 225 (2d Cir. 2006)* (internal quotation marks and citation omitted) (quoting *In re Visa Check, 280 F.3d at 136*).

Defendants argue that RDC and Smith's claims are not typical of a class that includes (1) three national wholesalers, AmerisourceBergen, McKesson, and Cardinal Health, or (2) the Generic Purchaser Group. (Defs.' Opp'n at 19 - 20.) As to the inclusion of AmerisourceBergen, McKesson, and Cardinal Health, Defendants argue that because "the Big Three" are large national wholesalers, they are in a fundamentally different position than RDC and Smith and enjoy significantly more negotiating power and leverage with suppliers like Forest. (*Id.* at 19.) The size of **[**127]** these entities, however, does not change the fact that their claims arise from the same course of conduct alleged by all class members — the reverse payment and the hard switch strategy. As members who purchased both branded Namenda products and the generic alternative, these entities advance legal arguments identical to members in the Forest Direct Customer subgroup.

It is a more complicated question whether common questions can be said to exist, and indeed, to predominate, when the class includes all subgroups. As commonality is subsumed under the more demanding predominance requirement, *Dial, 314 F.R.D. at 113*, I proceed directly to the *Rule 23(b)(3)* analysis, which imposes upon the **[*215]** court the "duty to take a 'close look' at whether common questions predominate over individual ones." *Comcast, 569 U.S. at 34*. That discussion also addresses the typicality argument Defendants raise with respect to the Generic Purchaser Group.

HN43[] The parties agree that Plaintiffs must show that three elements are capable of proof at trial through evidence common to the class: (1) a violation of ***antitrust law***; (2) injury and causation; and (3) damages. *See* *Fleischman v. Albany Med. Ctr., 639 F.3d 28, 29-30 (2d Cir. 2011)*.

Liability. Plaintiffs claim that "the proof necessary to establish Defendants' wrongdoing will not vary Class **[**128]** member-by-Class member." (Mem. in Support of Direct Purchaser Class Pls.' Mot. for Class Certification at 17.) They argue that the reverse payment with Mylan presents "solely" common issues, and that the product-hop theory presents "predominantly" common issues. (*Id.* at 17.)

As to liability, I agree that common questions predominate over the class, including the generic-only purchasers. If each Class members were to pursue this theory individually, "each would have to prove the same course of conduct, using the same documents and witnesses." (*Id.* at 17.) To establish the reverse payment claim, for example, all members will need to present evidence of the agreement and its terms. Similarly, to establish the hard switch claim, members have indicated that they will offer evidence of pre-announcement communications with key stakeholders and customers regarding the forthcoming launch of Namenda XR and withdrawal of Namenda IR; evidence of the announcement itself; evidence pertaining to Judge Sweet's December 15, 2014 order; and evidence related to the aftermath of that order, including Forest's communications regarding its intention to challenge Judge Sweet's order in the Court of Appeals.

Injury. Plaintiffs **[**129]** allege that 58 of the 62 members in the proposed class were impacted by the Brand-Generic and/or the Generic-Generic overcharge because they either switched from branded Namenda to the generic alternative once it became available, or just bought the generic. (PLs.' Reply at 2.) (Only 4 purchasers — Bartell, Drogueria Central, Kerr Drug, and Kroger — continued to buy branded Namenda following generic entry.) They claim that the brand-to-generic purchasers suffered Brand-Generic overcharges during the time they were purchasing branded Namenda products and also suffered Generic-Generic overcharges once they switched to the generic alternative. (Lamb Rep. ¶ 126.)

Common questions predominate as to injury. First and foremost, at trial, all but 4 members of the class would need to prove they were injured by the Generic-Generic overcharge — that, but for Defendants' conduct, "generic prices by July 2015 would have been lower." (Pls.' Reply at 4.) This is but one aspect of the injury suffered by the 27 customers who allege they also paid higher prices for the branded Namenda they actually purchased. For the remaining 31 members, the Generic Purchaser Group, this is the ultimate question with **[**130]** respect to injury. Therefore, 58 of the 62 members (just about 94% of the class) allege they were injured by paying higher prices for the generic memantine they actually purchased.

This issue is susceptible to generalized, class-wide proof. As Defendants point out, Plaintiffs' proof of injury will necessarily be intertwined with proof of damages. (Defs.' Opp'n at 23.) In other words, proving that they were injured will be bound up with proving the extent to which Plaintiffs were injured. *McLaughlin v. Am. Tobacco Co., 522 F.3d 215, 227 (2d Cir. 2008)*.

[*216] The 58 members claiming Generic-Generic damages all need to establish that the less expensive generics would have entered the market earlier; that generic prices would have continued to fall over time as more generic manufacturers competed; and that they would have paid less for their actual generic purchases. They will also need to show that the hard switch strategy further suppressed generic competition (and therefore savings) by shifting the Namenda IR prescription base to Namenda XR before generic entry.

All class members indicate that they plan to rely on Dr. Lamb's analysis of antitrust injury and damages, which, in turn, is based on three categories of proof that he states is "common to the proposed **[**131]** Class as a whole rather than specific to individual members." (Lamb Rep. 167.) His conclusions are based on: (1) peer-reviewed economic and government research showing that generics typically enter the market at lower prices than their brand name counterparts and capture a significant share of the total unit sales for that drug; (2) Forest's internal forecasts of the impact that generic competition would have on the memantine market; and (3) data on the actual sales volumes and prices of Namenda IR, Namenda XR, and generic memantine (which shows a 95% price discount for the generic and an 89.9% substitution rate by September 2015), derived from IMS Health's NSP database. (*Id.* at ¶¶ 68 - 85.)

They also intend to rely on his analysis of the impact that the hard switch had on generic competition. (*Id.* at ¶ 119.) For example, while Forest lost 96.5% of Namenda IR sales within six months of generic entry, it retained significant sales of branded Namenda because over 50% of existing Namenda patients had already switched to Namenda XR — "far more than the approximately 30 percent that [Forest's] own planning indicated would be possible in the absence of a hard switch." (*Id.* at ¶ 87; *see also* ***[**132]*** Pls.' Reply at 16.) This analysis again relies in part on internal forecasts, including Forest's comparison of its loss of exclusivity over Namenda IR with the Hard Switch strategy and without it. Other common evidence includes communications from Forest to various stakeholders (physicians, caregivers, pharmacies) and customers regarding Forest's "Namenda IR to XR Conversion Project" and informing them of the withdrawal of Namenda IR "immediately and for the next six months." (Pls.' Reply at 11; Lamb Rep. ¶ 98.) All members indicate they will rely on this evidence at trial to prove that, while Namenda IR was never fully removed from the market, due to Judge Sweet's December 15, 2014 order, "this communications strategy was successful for Forest in triggering widespread conversion to Namenda XR." (Lamb Rep. ¶ 63.)

While the Generic Purchaser Group will not (and could not) prove that they were injured by any Brand-Generic overcharges, determining Brand-Generic damages does not overwhelm the predominantly common issues that govern the class. To determine Brand-Generic damages, Plaintiffs indicate that they will rely on some of the same evidence discussed in connection with the Generic-Generic **[**133]** damages. To determine Brand-Generic damages, Dr. Lamb used the NSP database to calculate both "the price differential between the actual average Namenda IR and Namenda XR prices and *but-for average monthly generic memantine hydrochloride prices*" and "the price differential between the actual average Namenda XR monthly prices and *but-for average monthly generic memantine hydrochloride prices." (Id.* at ¶ 125 (emphasis added).) For both Brand-Generic and Generic-Generic damages, class members will need to establish the price of **[*217]** average monthly generic memantine but for Defendant's alleged misconduct. The additional factor in the Brand-Generic computation is the actual average monthly price of Namenda IR and Namenda XR, which is a far less complicated question. It does not overwhelm the predominating issues in this case.

Damages. Defendants argue that Dr. Lamb's models do not provide a sufficient method of measuring class-wide damages. ***HN44***[] It is not enough that Plaintiffs supply a method to measure and quantify damages on a class-wide basis; the court must be satisfied that "the methodology [is] a just and reasonable inference," and is not speculative. *Comcast Corp., 569 U.S. at 35*. Defendants argue that Plaintiffs cannot **[**134]** meet this burden.

Plaintiffs must demonstrate that Dr. Lamb's methodology identifies only damages that result from Defendants' wrong — *i. e.*, it must isolate damages that inhere from a valid theory of antitrust impact from those that do not. In *Comcast, 569 U.S. at 36*, the Supreme Court held that the plaintiffs' proposed methodology failed to do so where their expert's model assumed the validity of all four alleged theories of antitrust impact, but the district court credited only one of those theories. The expert's testimony confirmed that his model "calculated damages resulting from 'the alleged anticompetitive as a whole' and did not attribute damages to any one particular theory." *Id.*

Dr. Lamb's methodology in this case does not suffer from the same infirmity identified in *Comcast, 569 U.S. at 37*. Dr. Lamb's methodology would in fact be able "to bridge the differences between supra-competitive prices in general and supra-competitive prices attributable" to each step of the alleged two-part maneuver that Plaintiffs allege in this case. *Comcast, 569 U.S. at 38*. In *Comcast*, the plaintiffs' expert established a single "'but-for' baseline — a figure that would show what the competitive prices would have been if there had been *no* antitrust violations." **[**135]** *Id.* By contrast, Dr. Lamb has provided multiple models that account for different "but-for" scenarios. (Lamb Rep. ¶ 21 ("I have applied benchmark methodologies to measure damages associated with each of the two components of the alleged misconduct.").)

In his report, Dr. Lamb discusses the measurement of class-wide damages in both the "No Reverse-Payment But-For World," *id* at ¶¶ 139 - 42, and the "No Hard Switch But-For World." (*Id.* at ¶¶ 158 - 60.) These various models allowed Dr. Lamb to isolate and analyze damages arising from each aspect of Forest's alleged anticompetitive conduct. (*Id.* at ¶¶ 141, 158.); *see also In re Solodyn, 2017 U.S. Dist. LEXIS 170676, 2017 WL 4621777, at *10* (approving the plaintiffs' expert's model which provided for twelve but-for scenarios, "contemplating the different possible points of sustained generic entry absent the [alleged conduct] and the varying competitive conditions that would have followed").

Defendants challenge the ability of Dr. Lamb's hard switch and reverse payment models to measure classwide damages. Their overarching objection is that Dr. Lamb's models assume the injury that they purport to prove. To the extent I have addressed these objections in connection with Defendants' motion to exclude Dr. Lamb **[**136]** as an expert, I will not readdress them here.

1. Hard Switch Methodology

To calculate hard switch damages, Dr. Lamb started with actual Namenda XR sales volume over the class period. (Lamb Rep. ¶ 146.) He subtracted from that number the estimated sales volume of Namenda XR that Forest predicted would occur if **[*218]** it did not commence the hard switch (lawful conversion). (*Id.*) The difference between those figures, Dr. Lamb concludes, is attributable to the hard switch. (Pls.' Reply at 11; Lamb Rep. ¶ 146.) He performed a structural break / statistical significance test to confirm this conclusion. He then used this figure (the difference between actual and but-for Namenda XR sales) to calculate the price that class members who purchased Namenda XR would have paid for generic memantine instead of purchasing Namenda XR. (Lamb Rep. ¶ 147.)

Defendants argue that Dr. Lamb's hard switch model, including the structural break test that purports to confirm his conclusion, fail to prove causation. (Defs.' Opp'n at 31.) Without proving that proposed class members' Namenda XR purchases were made because of the hard switch, Defendants claim that Dr. Lamb's models fail to show that members were injured. This **[**137]** is more or less the same argument made in Defendants' motion to exclude Dr. Lamb's expert testimony. Defendants again argue that Dr. Lamb's hard switch methodology fails to show causation because it includes market-wide, rather than purchaser-specific information, and imposes a 30% threshold of lawful Namenda XR adoption. I remain unpersuaded.

In the class certification context, Defendants emphasize that market-wide data cannot establish causation because it does not account for patient and physician prescribing preferences, which would require individualized proof. I reiterate what I said in my discussion of Defendants' motion to exclude Dr. Lamb's expert testimony — Plaintiffs' allegation is that Forest worked to ensure a "'forced switch' whereby physicians and patients would have little choice but to switch to Namenda XR." (Lamb Rep. ¶ 89.) They allege that limiting patient and physician preferences was precisely the point of "discontinu[ing] or dramatically restrict[ing] the supply of Namenda IR several months before the availability of generic memantine." (*Id.*)

In this case, the idiosyncrasies of patient preferences do not require a degree of individualized proof that makes class **[**138]** certification inappropriate. Defendants' reliance on *McLaughlin* is undermined by the fact that the proposed members were not individual consumers — a fact of fundamental importance to the court's decision in that case. *See, e.g., McLaughlin, 522 F.3d at 224*; *id. at 229*; *id. at 225 n.7*. Here, proposed members are not patients; they are "wholesalers and other direct purchasers." (Pls.' Reply at 14.) Forest does not contest the fact that it "deals with wholesalers, not patients." (*Id.*) ***HN45***[] I agree with those courts that have rejected the argument that a class comprising direct purchasers must show that individual patient decisions were the result of the defendant's alleged conduct. *See In re Warfarin Sodium Antitrust Litig., 391 F.3d 516, 528-29 (3d Cir. 2004)* (plaintiffs' allegation of overpayment for drug was "purely an economic injury" supporting a finding of commonality and predominance); *In re Solodyn, 2017 U.S. Dist. LEXIS 170676, 2017 WL 4621777, at *10*; *Teva Pharms. USA, Inc. v. Abbott Labs., 252 F.R.D. 213, 229 (D. Del. 2008)*.

As to the 30% lawful adoption rate imposed in Dr. Lamb's model, I have already addressed the propriety of this figure in response to Defendants' motion to exclude Dr. Lamb and Dr. Berndt's use of forecast averages in their respective analyses. This threshold was derived from Forest's own documents and forecasts, which compared hard switch and soft switch scenarios, as well as internal high-level analysis of how these forecasts **[**139]** impacted potential Namenda XR conversion rates. These forecasts were not, as Defendants state, "cherry-picked." Dr. Lamb relied on forecasts that **[*219]** were (1) "closest in time to Forest's decision to enact the hard switch, after Forest had market experience with Namenda XR and predicted generic entry in July 2015 (when it actually occurred), and thus incorporated the best analysis Forest had at the time"; and (2) "consistent with Forest's actual conversion rate through January 2014, before the switch announcement." (Pls.' Reply at 18.)

In any event, disputes over which forecasts are the appropriate forecasts do not discredit Dr. Lamb's methodology at the class certification stage. ***HN46***[] It is for the jury to decide whether the his opinions are persuasive. *See In re Solodyn, 2017 U.S. Dist. LEXIS 170676, 2017 WL 4621777, at *10*.

It is also worth noting that, when estimating the adoption rate of Namenda XR absent the hard switch, it stands to reason that Forest took factors such as patient and physician prescribing preferences into account. As Dr. Lamb indicates, Forest's Namenda XR conversion rates were both thorough and kept up to date, with multiple forecasts being created in the space of a few weeks. (Lamb Rep. ¶ 151.)

Defendants raise the additional argument **[**140]** that Dr. Lamb dismisses the impact of Judge Sweet's injunction and Forest's "campaign to comply with it." (Defs.' Opp'n at 30.) Dr. Lamb considered this possibility at length. He concluded, however, that the injunction "was unlikely to have eliminated the anticompetitive effects of Forest's Hard Switch strategy." (Pls.' Reply at 12; Lamb Reply Rep. ¶ 69 - 75.) He reached this conclusion based on two categories of evidence.

First, when Forest informed customers of the injunction, it indicated that it was "appealing" the order and intended to "convince the higher court that, in fact, the lower court's decision was in error." (Opper Decl. Ex. 13, Dkt. No. 421 ("Cremieux Dep. Tr.") at 13:18 - 21.) After the Second Circuit upheld the injunction, Forest continued to challenge it through November 2015, and communicated this to its customers. (Pls.' Reply at 12; Lamb Rep. ¶ 114.) Plaintiffs' argue that the effects of the hard switch continued because, contrary to Forest's alleged campaign to comply with the injunction, Forest "intentionally sowed doubt" as to whether it would stand. (Pls.' Reply at 12.) This is supported by evidence cited in Dr. Lamb's report that "physicians were often hesitant **[**141]** to prescribe Namenda IR following the Court's injunction." (Lamb Rep. ¶ 116.)

Second, Dr. Lamb reviewed evidence indicating the difficulty of transitioning patients back to Namenda IR once they had switched to Namenda XR. This includes evidence that physicians were hesitant to prescribe, and pharmacies and health plans no longer covered, Namenda IR following the injunction. (*Id.* at ¶ 118.) Plaintiffs thus argue that, regardless of the injunction, "the marketplace, once shifted, would be slow to revert back to IR." (Pls.' Reply at 12.)

2. Reverse Payment Methodology

Because Dr. Lamb's reverse payment model incorporates hard switch damages, Defendants argue that it suffers from the same flaws described above. That discussion applies with respect to those objections.

Defendants claim that the reverse payment model suffers from additional flaws. They argue both that it is "premised on assumptions regarding generic pricing and penetration that are untethered from the actual world and sound economic theory," and that it allocates damages on the assumption that each member was injured by the reverse payment and the hard switch strategy. (Defs.' Opp'n at 31.)

The first objection is without merit. **[**142]** I disagree that Dr. Lamb's methodology in **[*220]** connection with the reverse payment model is divorced from sound economic theory. Dr. Lamb explains that he used a "benchmark analysis" to measure the overcharge resulting from the reverse payment, which "has been widely used for many years in calculating damages that arise from anticompetitive conduct of the sort alleged in this case." (Lamb Rep. ¶ 131.) I have reviewed Dr. Lamb's qualifications and the soundness of his expert testimony in the motion to exclude that testimony. To the extent that Forest disagrees with the generic entry date and number of generics that Dr. Lamb uses in his calculations, they are free to explore those issues on cross-examination.

The second part of Defendants' challenge to the reverse payment model speaks to their previous objections about which members were and were not injured. For example, they state, "Dr. Lamb's allocation awards damages for the hard switch to entities that never even purchased Namenda XR," and "allocates damages and assumes injury to entities that never purchased generic IR and thus could not have been injured by any of Forest's conduct." (Defs.' Opp'n at 32.) These are arguments about Plaintiffs' **[**143]** theory of injury, not about Dr. Lamb's methodology. I have already addressed these arguments in the discussion of which members could and could not be included in the class.

E. Superiority

Finally, a class action is superior to other available methods for fairly and efficiently adjudicating this controversy, as required under *Rule 23(b)(3)*.

HN47[] The first consideration under *Rule 23(b)(3)(A)* is whether the class members have an interest in controlling the prosecution of separate actions. There is no evidence that any of the direct purchasers would prefer to control the prosecution of their claims through separate lawsuits. On the contrary, Plaintiffs submit that many members of the class would forego their claims altogether rather than pursue them individually because, as small wholesalers, they "lack the resources to bring complex, expert-intensive antitrust suits on their own." (Class Cert. Mot. at 9.) The Court is not aware of any other litigation concerning this controversy by or against the direct purchaser class members. *See Fed. R. Civ. P. 23(b)(3)(B)*.

HN48[] Class treatment is appropriate in such "negative value cases," in which each class members' interest in the litigation is less than the cost to maintain an individual action. **[**144]** *Royal Park Invs. SA/NV v. Wells Fargo Bank, N.A., No. 14 Civ. 9764 (KPF), 2018 U.S. Dist. LEXIS 9087, 2018 WL 739580, *16 (S.D.N.Y. Jan. 10, 2018)* (citing *Noble, 224 F.R.D. at 346*). "As the Supreme Court has said, *Rule 23(b)(3)* class actions can be superior precisely because they facilitate the redress of claims where the costs of bringing individual actions outweigh the expected recovery." *In re U.S. Foodservice Inc. Pricing Litig., 729 F.3d 108, 130 (2d Cir. 2013)* (quoting *Amchem Prods., Inc. v. Windsor, 521 U.S. 591, 617, 117 S. Ct. 2231, 138 L. Ed. 2d 689 (1997))*.

Turning to *Rule 23(b)(3)(C)*, several considerations weigh in favor of concentrating the litigation in this particular forum. First, the current litigation has been before this Court for nearly three years, since September 2015. In that time, I have made a number of dispositive rulings that govern the claims of all direct purchasers. The parties have thus already litigated several issues that would surely arise in any new case. I also have before me the claims of the indirect purchasers in this case, which I have stayed pending the outcome of this litigation. (Dkt. No. 106.) **[*221]** These considerations make concentrating this litigation here particularly desirable.

HN49[] Turning to the fourth and most important consideration in the superiority analysis, the manageability of a particular class action is "an issue peculiarly within a district court's discretion." *Adkins v. Morgan Stanley, 307 F.R.D. 119, 147 (S.D.N.Y. 2015)*, *aff'd*, *656 F. App'x 555 (2d Cir. 2016)* (internal quotation marks omitted) (quoting *Seijas v. Repub. of Argentina, 606 F.3d 53, 58 (2d Cir. 2010))*. This class does not present any unique manageability issues that would preclude **[**145]** certification. As far as classes go, this class is relatively small.

Moreover, certification would promote uniformity of decision as to all direct purchasers, without sacrificing procedural fairness. *Id. at 141*.

For the reasons described above, Plaintiffs' motion for class certification is GRANTED.

I am certifying a direct purchaser plaintiff class including the 62 members proposed in Plaintiffs' revised list. These include Albertsons LLC; American Health Packaging; Amerisource Bergen; Anda; Associated Pharmacies; Auburn Pharmaceutical; Bellco; Bartell; Bloodworth Wholesale Drugs; Blupax Pharmaceuticals, LLC; Burlington Drug; Capital Wholesale; Cardinal Health; CVS Caremark; Dakota Drug; Discount Drug Mart; DMS; Drogueria Betances; Drogueria Central; Drogueria Cesar Castillo; Drugs Unlimited, Inc.; Express Scripts Inc.; Frank W. Kerr Inc.; Genetco Inc.; Hannaford Brothers; HC Pharmacy Central Inc.; Healthsource Distributors, LLC; HE Butt; HD Smith LLC; Humana, Inc.; Independent Pharmacy Cooperative; Kaiser Permanente; Kerr Drug; Keysource Medical, Inc.; Kroger; Louisiana Wholesale Drug; Major Pharmaceuticals/Rugby Lab; Masters Pharmaceutical Inc.; McKesson; Medco Health Solutions Inc.; Meijer **[**146]** Inc.; Miami Luken; Morris & Dickson; North Carolina Mutual Wholesale Drug; Optumrx Inc.; PBA Health; Peytons; Prescription Supply Inc.; Quest Pharmaceuticals, Inc.; Publix; Richie Pharmaceutical Company; RDC; RX Outreach; Smith; Supervalu Inc.; Tel Drug of PA LLC Joann Christens; The Harvard Group; Top RX LLC; Valley Wholesale; Value Drug; Walmart; Winn Dixie Logistics Inc.

CONCLUSION

This constitutes the decision and order of the Court.

Forest's motion for leave to file a letter of supplemental authority (Dkt. No. 561) is DENIED. The Clerk of the Court is directed to remove the motions at Dkt. Nos. 400, 434, 437, 439, 441, 443, 445, 505, and 561 from the Court's list of pending motions.

Civil Procedure > Appeals > Standards of Review > De Novo Review

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN1[] **Standards of Review, De Novo Review**

The standard of review of a ruling on an exception of no right of action, which presents a question of law, is de novo. Further, appellate review of a peremptory exception of no cause of action is de novo because an exception of no cause of action presents a question of law and the trial court's decision is based only on the sufficiency of the petition. Appellate review regarding questions of law is simply a review of whether the trial court was legally correct or legally incorrect.

Civil Procedure > Appeals > Appellate Jurisdiction > Final Judgment Rule

Civil Procedure > Appeals > Appellate Jurisdiction > Interlocutory Orders

HN2[] Appellate Jurisdiction, Final Judgment Rule

A judgment that determines the merits in whole or in part is a final judgment. *La. Code Civ. Proc. Ann. art. 1841*. A judgment that does not determine the merits but only preliminary matters in the course of the action is an interlocutory judgment. *Art. 1841*. An interlocutory judgment is appealable only when expressly provided by law. *La. Code Civ. Proc. Ann. art. 2083*.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > Appeals > Appellate Jurisdiction > Interlocutory Orders

HN3[] Motions to Dismiss, Failure to State Claim

The overruling of a peremptory exception of no right of action is an interlocutory judgment. Further, a trial court's decision overruling the peremptory exception raising the objection of no cause of action is an interlocutory judgment. Such an interlocutory judgment is only appealable if expressly provided by law. *La. Code Civ. Proc. Ann. art. 2083*.

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

Civil Procedure > Appeals > Appellate Jurisdiction > Interlocutory Orders

HN4[] Private Actions, State Regulation

Although interlocutory judgments are generally not appealable, *La. Rev. Stat. Ann. §§ 51:134* and *51:135* provide for an immediate appeal of interlocutory judgments related to antitrust claims.

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

Civil Procedure > Appeals > Appellate Jurisdiction > Interlocutory Orders

HN5[] Private Actions, State Regulation

La. Rev. Stat. Ann. §§ 51:134 and *51:135* provide for an immediate appeal of an interlocutory judgment related to antitrust claims.

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

Civil Procedure > Appeals > Appellate Jurisdiction > Interlocutory Orders

HN6[] **Private Actions, State Regulation**

An appeal may be taken as a matter of right from an interlocutory order or judgment relating to an antitrust claim. La. Rev. Stat. Ann. §§ 51:134 and 51:135. Furthermore, in the case of a restricted appeal, an appellant may also challenge interlocutory rulings involving the same or related issues.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > Preliminary Considerations > Justiciability > Standing

HN7[] **Motions to Dismiss, Failure to State Claim**

The function of an exception of no right of action is a determination of whether plaintiff belongs to the class of persons to whom the law grants the cause of action asserted in the petition. La. Code Civ. Proc. Ann. art. 927(A)(6). In examining an exception of no right of action, a court should focus on whether the particular plaintiff has a right to bring the suit, but assume that the petition states a valid cause of action for some person.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

Governments > State & Territorial Governments > Claims By & Against

HN8[] **State Regulation, Claims**

The State itself has a right of action under the Louisiana Unfair Trade Practices Act (LUTPA), La. Rev. Stat. Ann. § 51:1401 et seq., including a specific right to seek civil penalties and restitution. La. Rev. Stat. Ann. §§ 51:1407(B) and 51:1408(A)(5).

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

Governments > Legislation > Effect & Operation > Prospective Operation

HN9[] **State Regulation, Claims**

In 2006, several amendments were made to the Louisiana Unfair Trade Practices Act (LUTPA), La. Rev. Stat. Ann. § 51:1401 et seq., including provisions allowing for civil penalties and restitution against any person found to have committed a LUTPA violation. La. Rev. Stat. Ann. § 51:1407(B)-(E) and La. Rev. Stat. Ann. § 51:1408(A)(5). There are no provisions which expressly state that any of the 2006 amendments are retroactive. La. Rev. Stat. Ann. § 1:2. The Louisiana Supreme Court has found no clear expression of legislative intent as to the retroactive application of LUPTA. As such, the 2006 amendment to LUTPA, which allows for civil penalties and restitution, cannot be applied retroactively. Thus, only injunctive relief is available for LUTPA violations occurring prior to the 2006 amendment.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN10[] **Motions to Dismiss, Failure to State Claim**

An exception of no cause of action questions whether the law extends a remedy against the defendant to anyone under the factual allegations of the petition and is triable on the face of the petition. To determine the issues raised by the exception of no cause of action, each well-pleaded fact in the petition must be accepted as true. An exception of no cause of action should be granted only when it appears beyond doubt that the plaintiff can prove no set of facts in support of any claim that would entitle him to relief. Every reasonable interpretation must be accorded the language used in the petition in favor of maintaining its sufficiency and affording the plaintiff the opportunity of presenting evidence at trial. If the petition states a cause of action on any ground or portion of the demand, the exception should generally be overruled.

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN11[] **Regulated Practices, Monopolies & Monopolization**

The Louisiana Monopolies Act defines commerce as trade or commerce within the geographic boundaries of "this state." *La. Rev. Stat. Ann. § 51:121*. Further, the Louisiana Monopolies Act states that every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce in "this state" is illegal. *La. Rev. Stat. Ann. § 51:122(A)*.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Quasi Contracts

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

HN12[] **Types of Contracts, Quasi Contracts**

The root principle of unjust enrichment is that the plaintiff suffers an economic detriment for which he should not be responsible, while the defendant receives an economic benefit for which he has not paid. An action for unjust enrichment is allowed only when the plaintiff has no other remedy at law. However, where there is a rule of law directed to the issue, an action must not be allowed to defeat the purpose of said rule. Stated differently, unjust enrichment principles are only applicable to fill a gap in the law where no express remedy is provided.

Antitrust & Trade Law > Clayton Act > Claims

Antitrust & Trade Law > Clayton Act > Scope

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN13[] **Clayton Act, Claims**

The Louisiana Monopolies Act states that no person shall monopolize, or attempt to monopolize, or combine, or conspire with any person to monopolize any part of the trade or commerce within this state. *La. Rev. Stat. Ann. § 51:123*. Only a direct purchaser may bring an action under § 4 of the Clayton Act, or the federal antitrust provision (akin to the Louisiana Monopolies Act). Indirect purchasers are not entitled to recover under the Clayton Act, based on the unique nature of antitrust litigation, issues of multiple recovery, and the problem of allocating damages if indirect purchasers were allowed to bring suit. Federal antitrust laws do not, however, preempt states from enacting statutes that allow indirect purchasers to recover damages for their injuries.

Opinion

[*297] [Pg 3] **THERIOT, J.**

Abbott Laboratories and AbbVie Inc. appeal the judgment of the Nineteenth Judicial District Court overruling their peremptory exceptions of no right of action and no cause of action. Abbott Laboratories and AbbVie Inc. have also filed a supervisory writ **[**2]** application seeking review of the same judgment.[1] For the following reasons, we deny the supervisory writ application, reverse the trial court's judgment, and render judgment dismissing the State's petition for failure to state a cause of action.

FACTS AND PROCEDURAL HISTORY

On March 4, 2015, the State of Louisiana, by and through its Attorney General James D. "Buddy" Caldwell[2] ("the State"), **[*298]** filed suit against Fournier Industrie Et Sante and Laboratories Fournier, S.A., Abbott Laboratories, and AbbVie Inc. (collectively "Defendants"), all of whom allegedly marketed and sold the pharmaceutical product Tricor in and to the state of Louisiana.[3] In its petition, the State alleged that Defendants had employed an unlawful scheme to prevent or delay a less expensive generic version of Tricor from entering the market. According to the State, this scheme included conduct such as filing fraudulent patent applications with the United States Patent and Trademark Office, unlawfully listing unenforceable patents in the FDA's Orange Book, "product hopping," and filing sham litigation against would-be competitors. **[**3]** The State claimed that, through this scheme, Defendants illegally maintained monopoly power in the market for fenofibrate in the United States for at least a decade, [Pg 4] maintained the price of Tricor at *supra*-competitive levels, and overcharged the State millions of dollars by depriving it of the benefits of unrestricted competition and access to less expensive generic versions of fenofibrate. With regard to the overpayments, the State claimed that Defendants' alleged unlawful conduct caused the State, through the Louisiana Medicaid Program ("Medicaid"), to pay more for fenofibrate products than they otherwise would have paid. As a result, the State brought claims under the *Louisiana Monopolies Act, La. R.S. 51:121, et seq*, and *Louisiana's Unfair Trade Practices Act ("LUTPA"), La. R.S. 51:1401, et seq.* Alternatively, the State asserted that it had a claim for unjust enrichment. The State sought restitution, reimbursement for the overpayments, damages as permitted by law, reasonable attorney fees, and costs.

---

[1] The supervisory writ application filed by Abbott Laboratories and AbbVie Inc. was referred to this panel. See *State of Louisiana by and through its Attorney General, James Caldwell v. Fournier Industrie et Sante and Laboratories S.A., Abbott Laboratories, AbbVie, Inc., 2017-1218, 2017 La. App. LEXIS 2538 (La. App. 1 Cir. 12/28/17)* (unpublished writ action).

[2] On January 11, 2016, James D. "Buddy" Caldwell was succeeded in office as the Attorney General of Louisiana by Jeffrey "Jeff" Landry.

[3] Tricor is a drug used to treat high cholesterol and high triglyceride levels. The generic equivalent of Tricor is fenofibrate.

On May 8, 2015, AbbVie, Inc. and Abbott Laboratories (collectively "AbbVie") filed exceptions raising objections of prescription and peremption, no right of action, and no cause of action. On August 11, 2015, the trial court **[**4]** sustained AbbVie's objections of prescription and peremption and dismissed the State's claims for relief. In doing so, the trial court did not take up AbbVie's exceptions of no right of action or no cause of action, but held both exceptions in abeyance pending further proceedings.

The state subsequently appealed the trial court's judgment on AbbVie's exceptions. On December 22, 2016, this court found that the trial court erred in sustaining AbbVie's exception of prescription and peremption. *State by and Through Caldwell v. Fournier Industrie et Sante and Laboratories Fournier, S.A., 2015-1353 (La. App. 1 Cir. 12/22/16); 208 So.3d 1081, 1085-86*. Specifically, this court found that the trial court should have first considered whether the State was the proper party to bring its claims against AbbVie. *Id.* Thus, this court vacated the trial court's [Pg 5] judgment and remanded the case to the trial court for further proceedings. *Id. at 1086*.

Following this court's ruling, the trial court considered AbbVie's objections of no right of action and no cause of action. In a supplemental brief, Abb Vie argued that the only party vested with a right of action to recover for damages to Medicaid was the Louisiana Department of Health ("LDH"), meaning the Attorney General acting on behalf of the State did **[**5]** not have a right to recover Medicaid damages through litigation.[4] AbbVie also contended **[*299]** that the LUTPA claim was not viable because the State had not sought injunctive relief. As to whether the State had a cause of action, AbbVie argued that the State only asserted "indirect purchaser" claims and that Louisiana ***antitrust law*** did not provide a cause of action for indirect purchasers, nor did Louisiana ***antitrust law*** provide a cause of action for alleged antitrust violations that occurred entirely outside of Louisiana. Finally, AbbVie argued that the State had no right or cause of action to bring an unjust enrichment claim, in part because the State's damages were addressed by existing laws.

On July 17, 2017, the trial court held a hearing on these objections. On July 31, 2017, the trial court overruled AbbVie's objections of no right of action and no cause of action. AbbVie subsequently filed this appeal and a writ application, raising the same arguments as the appeal.

ASSIGNMENTS OF ERROR

Appellants assign the following as error:

(1) The trial court erred when it overruled Defendants-Appellants' exception of no right of action as to all of the Petition's claims, because the real party in **[**6]** interest to assert the claims in the Petition is not the State of Louisiana, but rather the Louisiana Department of Health.
[Pg 6] (2) The trial court erred when it denied Defendants-Appellants' exception of no cause of action as to the Petition's Monopolies Act claim, because the Monopolies Act does not reach the conduct alleged in the Petition.
(3) The trial court erred when it denied Defendants-Appellants' exceptions of no right or cause of action as to the Petition's unjust enrichment claim, because the Louisiana Department of Health is the only party in interest with the right of action to recover damages to Louisiana Medicaid on an unjust enrichment theory, and because an action for unjust enrichment cannot lie where express laws exist that address the complained-of conduct.
(4) The trial court erred when it overruled Defendants-Appellants' exception of no cause of action as to all of the Petition's claims, because Louisiana law does not provide a cause of action for indirect purchasers of a product.

STANDARD OF REVIEW

---

[4] The Louisiana Department of Health was formerly known as the Department of Health and Hospitals.

HN1[] The standard of review of a ruling on an exception of no right of action, which presents a question of law, is *de novo. LeCompte v. Continental Casualty Co., 2016-1359 (La. App. 1 Cir. 7/12/17); 224 So.3d 1005, 1009*, *writ denied*, *2017-1525 (La. App. 1 Cir. 12/15/17); 231 So.3d 635*. Further, appellate review **[**7]** of a peremptory exception of no cause of action is *de novo* because an exception of no cause of action presents a question of law and the trial court's decision is based only on the sufficiency of the petition. *CamSoft Data Systems, Inc. v. Southern Electronics Supply, Inc., 2015-1260 (La. App. 1 Cir. 9/23/15); 182 So.3d 1009, 1016*. Appellate review regarding questions of law is "simply a review of whether the trial court was legally correct or legally incorrect." *Id.*

DISCUSSION

We first address a pending rule to show cause regarding whether this court has appellate jurisdiction over this appeal and an existing writ application.

[Pg 7] Rule to Show Cause and Writ Application

This court, *ex proprio motu*, issued a rule to show cause on November 8, 2017, on the basis that the judgment appeared to be a non-appealable ruling. On December 28, 2017, a panel of this court referred the order to the appeal panel. Subsequently, **[*300]** the State argued in a show cause brief that the trial court's judgment overruling AbbVie's exceptions of no right of action and no cause of action was not appealable because it was an interlocutory judgment.

HN2[] A judgment that determines the merits in whole or in part is a final judgment. *La. Code Civ. P. art. 1841*. A judgment that does not determine the merits but only preliminary matters in the course of the action is **[**8]** an interlocutory judgment. *La. Code Civ. P. art. 1841*. An interlocutory judgment is appealable only when expressly provided by law. *La. Code Civ. P. art. 2083*.

HN3[] The overruling of a peremptory exception of no right of action is an interlocutory judgment. *Bennett v. Arkansas Blue Cross Blue Shield, 2005-1714 (La. App. 1 Cir. 9/15/06); 943 So.2d 1124, 1126*. Further, the trial court's decision overruling the peremptory exception raising the objection of no cause of action is an interlocutory judgment. *Reid v. Reid, 2010-2000 (La. App. 1 Cir. 2/11/11); 57 So. 3d 609, 2011 WL 2120057, at *1* (unreported). Accordingly, the trial court's judgment in the present case is an interlocutory judgment and is only appealable if expressly provided by law. *La. Code Civ. P. art. 2083*.

HN4[] Although interlocutory judgments are generally not appealable, *La. R.S. 51:134* and *51:135* provide for an immediate appeal of interlocutory judgments related to antitrust claims. *[Pg 8] HPC Biologicals, Inc. v. UnitedHealthcare of Louisiana, Inc., 2016-0585 (La. App. 1 Cir. 5/26/16); 194 So.3d 784, 792*.

Louisiana Revised Statutes 51:135 states:

> All interlocutory judgments in the cases affected by this Part, and not otherwise provided for, shall be appealable within five days and shall be heard and determined within twenty days after appeal is lodged, and any interlocutory judgments not appealed, except those rendered during the progress of the trial, shall be final, and shall not be reopened on final appeal. Such appeals shall be on the original papers, on the order of the district judge, if a transcript cannot be prepared **[**9]** in time.

Because the State asserts claims under the Louisiana Monopolies Act, which is contained in *La. R.S. 51:121, et seq.*, *La. R.S. 51:135* is applicable. This court's jurisprudence has consistently stated that *HN5*[] *La. R.S. 51:134* and *51:135* provide for an immediate appeal of such an interlocutory judgment related to antitrust claims. See *HPC Biologicals, Inc., 194 So.3d at 792*; see also *CamSoft Data Systems, Inc. v. Southern Electronics Supply, Inc., 2015-0881 (La. App. 1 Cir. 7/14/15); 180 So.3d 382, 383*; *Van Hoose v. Gravois, 2011-0976 (La. App. 1 Cir. 7/7/11); 70 So. 3d 1017, 1021-22*; *Plaquemine Marine, Inc. v. Mercury Marine, 2003-1036 (La. App. 1 Cir. 7/25/03); 859 So.2d 110, 114, n. 3*. Accordingly, as long as AbbVie appealed the interlocutory judgment within five days, AbbVie's appeal is proper under *La. R.S. 51:135*. The parties were notified of the judgment overruling AbbVie's exceptions of no right of action and no cause of action on Thursday, August 3, 2017. AbbVie submitted their motion for appeal on Thursday, August 10, 2017. Because legal holidays are not to be included in the computation of a period of time allowed or prescribed when that time period is less than seven days, AbbVie timely filed its appeal on the fifth day of the applicable time period. See La. Code Civ. P. art. 5059.

[Pg 9] As previously stated, AbbVie filed both an appeal and a writ application after the trial court's overruling of its objections. While there is no specific statutory provision providing for an immediate appeal **[*301]** of an interlocutory judgment related to LUTPA claims, some courts have addressed LUTPA claims along with **[**10]** antitrust claims on appeals authorized by R.S. 51:134 and 51:135. See Southern Tool & Supply, Inc. v. Beerman Precision, Inc., 2003-0960 (La. App. 4 Cir. 11/26/03); 862 So.2d 271, *writs denied*, *2003-3481, 2003-3518, & 2003-3536 (La. 3/12/04); 869 So.2d 821*, 825, & 826; see also Jefferson v. Chevron U.S.A. Inc., 97-2436, 98-0254 (La. App. 4 Cir. 5/20/98); 713 So.2d 785, *writ denied*, 98-1681 (La. 10/16/98); 727 So.2d 441.[5] Accordingly, because we find that this appeal is proper under the Louisiana Monopolies Act, we deny the writ application.

Assignment of Error #1

In its first assignment of error, AbbVie argues that the trial court erred in overruling AbbVie's exception of no right of action as to all of the petition's claims, because the real party in interest to assert the claims is LDH, not the State. As such, AbbVie argues that LDH is the only party that can seek reimbursement of the Medicaid funds at issue.

HN7[] The function of an exception of no right of action is a determination of whether plaintiff belongs to the class of persons to whom the law grants the cause of action asserted in the petition. La. Code Civ. P. art. 927(A)(6); Badeaux v. Southwest Computer Bureau, Inc., 2005-0612 (La. 3/17/06); 929 So.2d 1211, 1217. In examining an exception of no right of action, a court [Pg 10] should focus on whether the particular plaintiff has a right to bring the suit, but assume that the petition states a valid cause of action for some person. Turner v. Busby, 2003-3444 (La. 9/9/04); 883 So.2d 412, 415.

This court addressed the issue of whether the State has a right of action under LUTPA in State, by and through Caldwell v. AstraZeneca AB, 2016-1073 (La. App. 1 Cir. 4/11/18); ___ So.3d ___, 249 So. 3d 38, 2018 La. App. LEXIS 693, 2018 WL 1755535. Therein, this court **[**11]** found that***HN8***[] the State itself had a right of action under LUTPA, including a specific right to seek civil penalties and restitution. 2018 La. App. LEXIS 693, [WL] at *4-6 (citing State v. Abbott Laboratories, Inc., 2015-1626, 2015-1854 (La. App. 1 Cir. 10/21/16); 208 So.3d 384, 389, *writs denied*, *2017-0125, 2017-0149 (La. 3/13/17); 216 So.3d 802, 808*); see also La. R.S. 51:1407(B) and La. R.S. 51:1408(A)(5). Accordingly, the State has a right of action under LUTPA to bring claims against AbbVie. However, we must also decide whether the State has a cause of action under LUTPA.

In *Astra Zeneca AB*, this court noted that "LUTPA, by its terms, gives the State a cause of action, as well as a right of action[.]" AstraZeneca AB, 2018 La. App. LEXIS 693, [WL] *12-13. However, this court declined to address the issue of whether the State could seek the remedies available under La. R.S. 51:1407(B) without having sought injunctive relief pursuant to La. R.S. 51:1407(A). Astra Zeneca AB, 2018 La. App. LEXIS 693, [WL] *5 n.3. AbbVie also raises another issue not addressed **[*302]** in Astra Zeneca AB; namely, whether the State can seek civil penalties or restitution when the conduct alleged in the petition occurred prior to the 2006 amendment that added civil penalties and restitution as potential relief in LUTPA cases. AbbVie raised this issue with the trial court and with this court on appeal. As such, we must address this issue.

---

[5] ***HN6***[] An appeal may be taken as a matter of right from an interlocutory order or judgment relating to an antitrust claim. See La. R.S. 51:134 and 51:135. Furthermore, in the case of a restricted appeal, such as this, an appellant may also challenge interlocutory rulings involving the same or related issues. Roba, Inc. v. Courtney, 2009-0509 (La. App. 1 Cir. 8/10/10), 47 So.3d 509, 514 n.12; State ex rel. Div. of Admin., Office of Risk Management v. National Union Fire Ins. Co. of Louisiana, 2010-0689 (La. App. 1 Cir. 2/11/11); 56 So.3d 1236, 1242, *writ denied*, ***2011-0849 (La. 6/3/11); 63 So.3d 1023***. In this case, the issues relating to the antitrust claims are integral to the issues relating to the LUTPA claims. As such, the issues relating to the LUTPA claims are properly before us in this restricted appeal of a judgment relating to the antitrust claims.

HN9[] In 2006, several amendments were made to **[**12]** LUTPA, including provisions allowing for civil penalties and restitution against any person [Pg 11] found to have committed a LUTPA violation. *La. R.S. 51:1407(B)-(E)* and *La. R.S. 51:1408(A)(5)*. There are no provisions which expressly state that any of the 2006 amendments are retroactive. See *La. R.S. 1:2*. However, the retroactivity of the 2006 amendment was specifically addressed by the Louisiana Supreme Court in *State v. Foret, 2015-1298 (La. 1/27/16); 188 So.3d 154*. Therein, the Louisiana Attorney General filed a civil suit in 2013 against Dr. Foret under the Sledge Jeansonne *Louisiana Insurance Fraud Prevention Act* ("the Sledge Jeansonne Act"). *Foret, 188 So.3d at 155*. The Attorney General also sought civil monetary penalties under LUTPA for violations of *La. R.S. 51:1405*. *Id. at 156*. The Louisiana Supreme Court subsequently conducted a review of the legislative history of the Sledge Jeansonne Act and LUTPA, and found no clear expression of legislative intent as to the retroactive application of these laws. *Id. at 159-60*. The Louisiana Supreme Court concluded that it could not apply the provisions of LUTPA to Dr. Foret's acts of criminal misconduct that preceded the effective date of the relevant LUTPA amendment, which allowed the State Attorney General to seek penalties for unlawful, unfair methods of competition and unfair or deceptive acts **[**13]** or practices in the conduct of trade or commerce. *Id. at 162-63*. As such, the 2006 amendment to LUTPA, which allows for civil penalties and restitution, cannot be applied retroactively. Thus, only injunctive relief is available for LUTPA violations occurring prior to the 2006 amendment.

Herein, the State's petition alleges various acts of misconduct, all occurring between 2000 and 2005. Because we cannot retroactively apply the 2006 amendment to alleged violations occurring prior to the effective date of that amendment, we find that the State cannot state a cause of action for civil penalties or restitution under LUTPA. In deciding this issue, we do [Pg 12] not address whether the State could seek civil penalties or restitution without having sought injunctive relief pursuant to *La. R.S. 1407(A)*.

Assignment of Error #2

In its second assignment of error, AbbVie argues that the trial court erred in denying its exception of no cause of action as to the Monopolies Act claim because the alleged acts did not occur in Louisiana or have the purpose of affecting trade in Louisiana. ***HN10***[] An exception of no cause of action questions whether the law extends a remedy against the defendant to anyone under the factual allegations of **[**14]** the petition and is triable on the face of the petition. *Badeaux, 929 So.2d at 1217*. To determine the issues raised by the exception of no cause of action, each well-pleaded fact in the petition must be accepted as true. *Id.* An exception of no cause of action should be granted only when it appears beyond doubt that the plaintiff can prove no set of facts in support of any claim that would entitle him to relief. *Id.* Every reasonable interpretation must be accorded the language used in the petition in favor of maintaining its sufficiency and affording the plaintiff the opportunity of presenting evidence at trial. *Id.* If the petition states a cause of action on any ground or portion of **[*303]** the demand, the exception should generally be overruled. *Id.*

The State cannot state a cause of action for violations of the Louisiana Monopolies Act based on the operative facts (*i.e.* AbbVie's activities) that occurred outside of the geographic boundaries of Louisiana. ***HN11***[] The Louisiana Monopolies Act defines commerce as "trade or commerce within the geographic boundaries of this state." *La. R.S. 51:121* (emphasis added). Further, the Louisiana Monopolies Act states that "[e]very contract, combination in the form of trust or otherwise, or conspiracy, **[**15]** in restraint of trade or commerce in this state is illegal." *La. R.S. 51:122(A)* (emphasis [Pg 13] added). The alleged illegal acts in the State's petition include patent infringement actions filed in Illinois and Delaware. Although the State alleges that AbbVie's acts affected commerce within Louisiana and that AbbVie sold TriCor within Louisiana, the alleged wrongful acts occurred outside of the geographic boundaries of Louisiana. Accordingly, the State failed to state a cause of action under the Louisiana Monopolies Act.

Assignment of Error #3

In its third assignment of error, AbbVie argues that the trial court erred in denying its exceptions of no right and no cause of action as to the State's unjust enrichment claim. In its petition, the State alleges that AbbVie's acts resulted in financial benefit, *i.e.* profits resulting from unlawful overcharges and monopoly profits. The State argues that it is inequitable to allow AbbVie to retain those overcharges and profits and that AbbVie should be compelled to repay those profits.

HN12[] The root principle of unjust enrichment is that the plaintiff suffers an economic detriment for which he should not be responsible, while the defendant receives an economic benefit **[**16]** for which he has not paid. *Coastal Environmental Specialists, Inc. v. Chem-Lig Intern., Inc., 2000-1936 (La. App. 1 Cir. 11/9/01); 818 So.2d 12, 19*. An action for unjust enrichment is allowed only when the plaintiff has no other remedy at law. *Id.* However, where there is a rule of law directed to the issue, an action must not be allowed to defeat the purpose of said rule. *Id.* Stated differently, unjust enrichment principles are only applicable to fill a gap in the law where no express remedy is provided. *Id.* Because the State has no cause of action under LUTPA or the Louisiana Monopolies Act, it cannot employ a subsidiary unjust enrichment claim to circumvent this rule. *AstraZeneca AB, 2018 La. App. LEXIS 693, [WL] at *8* (Welch, J., dissenting); *[Pg 14]* see also *Coastal Environmental Specialists, Inc. v. Chem-Lig Intern., Inc., 2000-1936 (La. App. 1 Cir. 11/9/01); 818 So. 2d 12, 19*. Accordingly, the State failed to state a cause of action for unjust enrichment.

Assignment of Error #4

In its fourth assignment of error, AbbVie argues that the trial court erred in overruling AbbVie's exception of no cause of action as to the State's Louisiana Monopolies Act claim, because Louisiana law does not provide a cause of action to indirect purchasers of a product. AbbVie bases this argument on *Illinois Brick Co. v. Illinois, 431 U.S. 720, 97 S.Ct. 2061, 52 L.Ed.2d 707 (1977)*, in which the United States Supreme Court held that only a direct purchaser may bring an action under the federal antitrust provision.

HN13[] The Louisiana Monopolies Act states **[**17]** that "[n]o person shall monopolize, or attempt to monopolize, or combine, or conspire with any person to monopolize any part of the trade or commerce within this state." *La. R.S. 51:123*. In *Illinois Brick Co. v. Illinois, 431 U.S. 720, 728-29, 97 S.Ct. 2061, 2066, 52 L.Ed.2d 707 (1977)*, the United States Supreme Court held **[*304]** that only a direct purchaser may bring an action under *§ 4 of the Clayton Act*, or the federal antitrust provision (akin to the Louisiana Monopolies Act). The United States Supreme Court further held that indirect purchasers were not entitled to recover, citing the unique nature of antitrust litigation, issues of multiple recovery, and the problem of allocating damages if indirect purchasers were allowed to bring suit. *Illinois Brick Co., 431 U.S. at 730-35, 737-38*. In a later case, the United States Supreme Court held that federal antitrust laws do not, however, preempt states from enacting statutes that allow indirect purchasers to recover damages for their injuries. [Pg 15] See *California v. ARC America Corp., 490 U.S. 93, 101-02, 109 S.Ct. 1661, 1665-66, 104 L.Ed.2d 86 (1989)* (rejecting the argument that California's ***antitrust law***, which specifically allows indirect purchaser actions, was preempted by federal law).

AbbVie's argument regarding indirect purchasers is identical to AstraZeneca's argument in *Astra Zeneca AB*. This court previously discussed this argument, stating:

> AstraZeneca **[**18]** further contends that even if the State has a right of action, it cannot maintain a cause of action as an indirect purchaser of the prescription drug at issue. Although AstraZeneca couches this argument in terms of "no cause," the argument in essence is one of no right. In other words, AstraZeneca asserts that because the State is an indirect purchaser, it has no right to assert claims under LUTPA or the Monopolies Act. [. . .]
>
> Regardless of whether the State is an indirect purchaser . . . the State itself has a right of action under LUTPA, including a specific right of action to seek civil penalties and restitution. On this limited record based solely on the exceptions, we make no determination of whether Louisiana would follow *Illinois Brick* with regard to the indirect purchaser rule, as we need not decide this issue to determine whether the State has any right of action.

*Astra Zeneca AB, 2018 La. App. LEXIS 693, [WL] at *6*. Accordingly, this court declined to address whether Louisiana would follow *Illinois Brick*.

Like AstraZeneca's argument in *Astra Zeneca AB*, AbbVie's argument that indirect purchasers lack standing to assert claims and pursue damages for alleged antitrust violations is an argument of no right of action. However, because **[**19]** we find that the State fails to state a cause of action under both LUTPA and the Monopolies Act, and we find the State does not have a cause of action as to its unjust enrichment claim, we need not determine whether Louisiana would follow *Illinois Brick*. We must dismiss the State's petition for failure to state a cause of action. Therefore, we pretermit any discussion as to whether the State has a right of action.

DECREE

For the above and foregoing reasons, we deny Abbott Laboratories and AbbVie Inc.'s writ application. We reverse the judgment of the Nineteenth Judicial District Court overruling Abbott Laboratories and AbbVie Inc.'s peremptory exceptions of no cause of action as to the State's Louisiana Unfair Trade Practices Act claim, its Louisiana Monopolies Act claim, and its unjust enrichment claim. We render judgment dismissing the State's petition for failure to state a cause of action. Costs of this appeal in the amount of $4,020.00 are assessed to Appellee, the State of Louisiana, by and through its Attorney General James D. "Buddy" Caldwell.

[*305] WRIT DENIED; REVERSED AND RENDERED.

Concur by: McClendon

Concur

McClendon, J., concurring.

Given that the State fails to state a cause of action under the Louisiana **[**20]** Monopolies Act, I concur. The State has not alleged any violations occurring in intrastate commerce. Rather, all alleged antitrust acts occurred outside of the State of Louisiana even though the acts allegedly affected Louisiana interests. The policy decision of whether to expand Louisiana's ***antitrust law*** is reserved to our legislature.

I note that Louisiana's Monopolies Act utilizes language similar to Alabama's Monopolies Act. In reviewing its act, the Alabama Supreme Court stated: "Thus, [Alabama's antitrust statutes] regulate monopolistic activities that occur 'within this state—within the geographic boundaries of this state—even if such activities fall within the scope of the *Commerce Clause of the Constitution of the United States.* We leave to the Legislature the policy decision of whether to expand the reach of Alabama's antitrust statutes to activities that cross state boundaries." ***Abbott Laboratories v. Durrett****, 746 So.2d 316, 339 (Ala. 1999)*.

I recognize that some other states have amended their antitrust laws to also apply to interstate commerce in circumstances when antitrust acts occur solely outside of the state, but substantially affect the people of a state. See ***Olstad v. Microsoft Corp.****, 2005 WI 121, 284 Wis. 2d 224, 700 N.W.2d 139, 156 & 157 (Wis. 2005)* ("The Legislature deleted references to 'in this state' in the Little Sherman Act portion of the chapter. ... In Wisconsin, **[**21]** the interpretation of our statute has changed not only because of evolution in constitutional theory, but also because the legislature acted to repeal and recreate Chapter 133 in 1980, with altered language.")[1]

---

[1] For a detailed discussion of the history of federal ***antitrust law*** and its interplay with state ***antitrust law*** see **Olstad**. The **Olstad** court also recognized that while states can regulate interstate commerce in some circumstances, "[s]tate law is precluded from regulating interstate commerce only if it 'unduly burden[s]' interstate commerce." *700 N.W.2d at 143* (citing Von Kalinowski, Antitrust Laws & Trade Regulation § 100.03 (2d ed.2004)).

Because the Louisiana Legislature has not broadened the scope of Louisiana's antitrust laws, I concur with the result reached.

Opinion

MEMORANDUM-DECISION AND ORDER

I. INTRODUCTION

Plaintiff AngioDynamics, Inc. ("AngioDynamics") brings this antitrust action against Defendants C.R. Bard, Inc. and Bard Access Systems, Inc. (collectively, "Bard"), asserting a claim of illegal tying in violation of *section 1 of the Sherman Act* (codified at *15 U.S.C. § 1*) under "per se" and "rule of reason" theories of liability. (*See generally* Dkt. No. 1). AngioDynamics seeks treble damages, a permanent injunction, and declaratory relief. (*See id.* at 29). Bard now moves to dismiss the Complaint for failure to state a claim under *Rule 12(b)(6) of the Federal Rules of Civil Procedure*. (Dkt. No. 14). For the reasons set forth below, Bard's motion is denied.

II. FACTS[1]

A. Peripherally Inserted Central Catheters

AngioDynamics manufactures medical devices used for minimally invasive treatment of medical conditions requiring vascular access, peripheral **[*2]** vascular, oncology, or surgical interventions. (Dkt. No. ¶ 24). Similarly, Bard manufactures vascular access, oncological, urological, and surgical medical devices. (*Id.* ¶¶ 25, 26). More specifically, both AngioDynamics and Bard manufacture, market, and sell peripherally inserted central catheters ("PICCs"). (*Id.* ¶ 30). PICCs are long, thin catheters inserted into the body through a vein, most commonly the basilic vein in the upper arm, and passed to the distal superior vena cava, the large vein leading to the right atrium of the heart. (*Id.* ¶¶ 2, 31-32). PICCs are generally suited for patients requiring long-term intravenous medical treatment; clinicians use PICCs to deliver medications, fluids, and nutrients into the body, sample blood, and power-inject contrast media. (*Id.* ¶¶ 2, 31).

Nevertheless, PICC have associated risks, including infection, blood clotting, and catheter occlusion. (*Id.* ¶ 34). Blood clotting is a "serious, but common, complication arising from any PICC use." (*Id.*). It may cause life-threatening thromboembolic events, such as deep vein thrombosis ("DVT")—when a blood clot blocks a large, essential vein—or pulmonary embolism ("PE")—when a blood clot travels to and **[*3]** obstructs vessels in the lungs. (*Id.* ¶ 35). There is a strong association between PICC use and upper extremity deep vein thrombosis, as "PICCs are placed in the upper extremities and can occupy much of the cross-sectional diameter of peripheral veins of the arm." (*Id.* ¶ 37). A recent study indicated that "23% of patients who received a PICC during hospitalization experienced a thromboembolic event."[2] (*Id.* ¶ 38). Another common problem is "intra-luminal catheter occlusion, which is most often caused by the reflux of blood into the catheter shaft and the subsequent clotting of that blood." (*Id.* ¶ 4). A tissue plasminogen activator ("tPA") is commonly used to clear catheter occlusions, but a dose of tPA can cost approximately $124, and the administration of the drug has been tied to an "increase in the development of central line associated blood stream infections." (*Id.* ¶ 5).

AngioDynamics markets and sells PICCs that address both the problems of blood clots and catheter occlusions. (*Id.* ¶¶ 3, 4). In 2012, the company obtained FDA approval for its BioFlo PICC, which is made of a material containing Endexo Technology, "a permanent and non-eluting integral polymer." (*Id.* ¶¶ 3, 45-46, **[*4]** 48). Because the polymer is "blended with Carbothane thermoplastic polyurethane" as part of the manufacturing process, it is "present throughout the catheter material, including the outer surface, inner surface and even the cut catheter tip."

[1] The allegations are taken from the Complaint and assumed to be true for purposes of this motion. *Faber v. Metro. Life Ins. Co., 648 F.3d 98, 104 (2d Cir. 2011)*.

[2] According to the Complaint, reducing the incidence of DVT and PE cases has been a priority for national health authorities in recent years. (*See id.* ¶¶ 40-44).

(*Id.* ¶ 48). The combined material protects against blood clot formation "by creating passive surfaces" and thereby reduces the risk of life-threatening DVT and PE. (*Id.* ¶¶ 3, 48, 49). According to in-vitro tests, on average, BioFlo PICCs using Endexo Technology decrease blood clot accumulation by 87%, as measured by platelet count, compared to commonly used PICCs. (*Id.* ¶¶ 3, 50). BioFlo PICCs are "also available with [Pressure Activated Safety Valve ("PASV")] Technology, which is AngioDynamics' patented valve designed to automatically resist backflow and reduce blood reflux on the inside of the catheter." (*Id.* ¶ 52). PASV-equipped BioFlo PICCs can therefore lower the usage of tPA, with its attendant risks, to treat catheter occlusion. (*See id.* ¶ 5).

By contrast, Bard sells standard polyurethane PICCS that "do not contain any thrombo-resistant material," as "Bard has been unable to develop a thrombo-resistant material similar to the Endexo Technology **[*5]** . . . despite its efforts to do so."[3] (*Id.* ¶ 55; *see also id.* ¶¶ 57-61). Further, Bard's catheters have longer taper length, which increases the risk of complications from additional obstruction of blood flow. (*Id.* ¶ 55).

The market for PICCs in the United States amounts to approximately $400 million per year in annual sales, with Bard accounting for "the vast majority of sales in the PICC market." (*Id.* ¶ 115). Despite differing "in certain important respects," PICCs "all serve the same basic function"—they "administer fluids, medications and nutrients, sample blood, and power inject contrast media." (*Id.* ¶ 91). Other types of catheters or vascular access devices are generally not good substitutes for PICCs, except "in limited circumstances." (*Id.* ¶ 92). One distinguishing consideration is the treatment's duration; PICCs are for medium-term treatments (more than six days), whereas short peripheral intravenous venous catheters are for short-term treatments and implantable ports are for long-term treatments. (*Id.*).

B. Tip Location Systems

As catheter misplacement can cause serious complications, clinicians must ascertain a PICC's location within the patient's body. (*See id.* ¶ 7). Traditionally, **[*6]** medical personnel used a chest x-ray or fluoroscopy to confirm a PICC's final location, but clinicians now often rely on technologies known as tip location systems, which are less expensive, less time consuming, and more accurate. (*Id.* ¶¶ 7-8, 62-63). Many such technologies use a patient's electrocardiographic ("ECG") waveform to determine the final location of the PICC's tip in relation to the heart. (*Id.* ¶ 8). ECG technology, however, cannot convey information about the tip's location as it travels through the venous system before entering the superior vena cava. (*Id.* ¶ 64). Therefore, some tip location systems also provide navigation assistance, using magnetic tracking or Doppler technology, to help clinicians steer the PICC through the venous system. (*Id.* ¶¶ 7, 9, 65, 85).

Bard sells tip location systems under the brand names Sherlock 3CG Tip Confirmation System ("Sherlock 3CG") and Sherlock II Tip Location System ("Sherlock II"). (*Id.* ¶ 11). It was the first company to provide navigation technology, and its Sherlock 3CG system is the first and only tip location system to combine three technologies, (*id.* ¶ 11): (i) ultrasound technology to identify a suitable vein for inserting **[*7]** the PICC, (*id.* ¶¶ 32, 68); (ii) magnetic tracking navigation technology to monitor and guide the PICC through the venous system, using an external sensor and display device paired with a "proprietary stylet," (*id.* ¶¶ 68-70); and (iii) ECG technology to confirm the final location of the PICC's tip in the superior vena cava, (*id.* ¶ 64, 68). Thanks to these combined technologies, "Bard's Sherlock 3CG system is widely regarded as superior to other tip location systems," (*id.* ¶ 68), and "indisputably provides the highest quality in PICC placement, thus providing the greatest ease of use for clinicians," (*id.* ¶ 87). According to a recent survey, "approximately 75% of tip location purchasers would not buy a tip location system that lacked navigation." (*Id.* ¶ 87). Given its technological edge, Bard sells more than 70% of tip location systems in the United States. (*Id.* ¶¶ 28, 83, 88).

---

[3] The Complaint states that in January 2015 Bard announced its plan to launch "coated PICCs" but that Bard later dropped "any further reference to its efforts to develop a thrombo-resistant PICC family of products." (*Id.* ¶¶ 59, 61). Further, "thrombo-resistant coating" is allegedly inferior to AngioDynamics' integrated Endexo Technology in terms of "reduced thrombus results" and "protecting cut surfaces"; AngioDynamics also asserts that coatings "elute into the blood stream, exposing patients to chemicals unnecessarily." (*Id.* ¶¶ 59, 60).

AngioDynamics also sells a tip location system, marketed under the brand name Celerity and manufactured by Nostix, LLC. (*Id.* ¶¶ 78, 82). This system uses ECG technology to confirm PICC placement but does not include navigation or ultrasound technology. (*Id.* ¶ 78-79). Following Nostix's acquisition by another medical **[*8]** device company in 2016, AngioDynamics announced that it would stop selling the Celerity tip location system. (*Id.* ¶¶ 12, 82).

Although "tip location systems on the market differ in certain respects," they can "all be used reasonably interchangeably." (*Id.* ¶ 85). On the other hand, x-rays and fluoroscopy, which are comparatively more time consuming, more expensive, and less accurate, are "not good substitutes for tip location system." (*Id.* ¶ 86). Industry organizations have recommended using tip location systems over traditional methods of confirming PICC placement, thus making tip location systems "the industry standard of care in PICC placement." (*Id.* ¶¶ 86-87). The use of tip location systems has continued to grow and has now largely displaced the use of x-rays and fluoroscopy to confirm PICC placement. (*Id.* ¶ 86). According to the Complaint, "very few players have entered the tip location system market" because of high regulatory and technological barriers to entry, including the "significant research and development" effort required, the high level of investment needed, and the lengthy time to market. (*Id.* ¶ 89).

C. Bard's Selling Practices

Bard's Sherlock 3CG and Sherlock II tip **[*9]** location systems require Bard's proprietary stylets to operate, but Bard only sells the stylets preloaded in its own PICCs, despite having approval from the U.S. Food and Drug Administration (the "FDA") to sell its stylets separately from its PICCs—i.e., "single sterile." (*Id.* ¶¶ 16, 71, 74). In approving the sale of Bard's stylets single sterile, the FDA stated that Bard's stylets "may now be used with specific Bard catheters as well as any open-ended, non-valved, polyurethane peripherally inserted central catheter that meets the dimensional specifications of the stylet (0.020 in minimum lumen diameter)." (*Id.* ¶ 74). Bard's stylet is compatible with AngioDynamics' BioFlo PICC. (*Id.* ¶ 77). Bard has sold its stylets single sterile only once—to Cleveland Clinic, "one of the leading medical centers in the United States," which has "significant purchasing leverage." (*Id.* ¶¶ 16, 75). Having seen a significant reduction in upper-extremity DVT in patients using AngioDynamics' BioFlo PICCs, Cleveland Clinic "requested to purchase Bard's stylets single sterile specifically so that it could use AngioDynamics' BioFlo PICCs with the Bard Sherlock 3CG tip location system."[4] (*Id.* ¶ 75).

With the exception of Cleveland Clinic, however, "Bard refuses to sell the stylets separately from its PICCs." (*Id.* ¶ 97). "Other institutions have requested that Bard sell its stylets single sterile to them and Bard has refused their requests." (*Id.* ¶ 76). In contrast to Bard, AngioDynamics sells its Celerity-branded tip location system with the clip necessary to operate it separately from its BioFlo PICCs. (*Id.* ¶ 80). All sellers of tip location systems, except for Bard, allow their tip location systems to be sold separately from their PICCs.[5] (*Id.* ¶ 81).

D. Alleged Effects

---

[4] Bard notes in their motion that "Bard originally obtained FDA approval to sell its stylets preloaded in its PICCs and applied for FDA approval to sell the stylets separately *only in response* ***[*10]*** *to, and in order to accommodate, Cleveland Clinic's request*." (Dkt. No. 14-1, at 16 n.6). Bard also states that "Cleveland Clinic ultimately switched to purchasing [the stylets] together with PICCs as an integrated product." (*Id.* at 16 n.5). These factual assertions, however, are outside the pleadings and thus not properly considered on a *Rule 12(b)(6)* motion. *See* *Nakahata v. New York-Presbyterian Healthcare Sys., 723 F.3d 192, 202 (2d Cir. 2013)*.

[5] In their moving papers, Bard asserts that another seller of tip location systems, Teleflex, preloads its stylets in its PICCs. (Dkt. No. 14-1, at 10 n.2; *see also* Dkt. Nos. 14-2, 14-3). AngioDynamics responds that Teleflex also sells its stylets separately. (Dkt. No. 18, at 19 & n.5). The Court has not considered either party's factual assertions on this issue because they are outside of the pleadings. (*See supra* note 4). As AngioDynamics correctly notes, on a motion to dismiss, the Court cannot consider the contents of documents filed with the Securities and Exchange Commission for the truth asserted therein; instead, the Court must confine itself to the four corners of the Complaint. *See* *Staehr v. Hartford Fin. Serv. Grp., 547 F.3d 406, 425 (2d Cir. 2008)*.

By refusing to sell its tip location system stylet single sterile, Bard has "foreclosed purchasers who prefer AngioDynamics BioFlo PICCs from pairing Bard's tip location system with BioFlo PICCs," and instead Bard has forced purchasers who want a Bard tip location system to purchase Bard PICCs. (*Id.* ¶ 112). That conduct has caused three types of harm: (i) harm to competition, including price competition, (*id.* ¶ 119 (alleging that Bard "substantially lessened competition in the PICC market [by] financially coercing hospitals and other **[*11]** purchasers into buying all or nearly all of their PICCs from Bard and reducing price competition in the market for PICCs"); *see also id.* ¶¶ 112-113); (ii) harm to consumers and patients, (*id.* (alleging that Bard's conduct "stifles innovation and harms patient welfare, as well, preventing a large segment of the population from obtaining access to BioFlo PICCs")); and (iii) harm to AngioDynamics (*id.* (stating that Bard's selling practice "harms AngioDynamics' business, preventing it from selling BioFlo PICCs to a substantial portion of the PICC market")). As a result, Bard has been able to "capture and maintain a dominant position in the PICC market, exceeding 70% market share." (*Id.* ¶ 15). AngioDynamics, on the other hand, has lost "market share in the PICC market," (*id.*), and suffered a "substantial loss of sales," (*id.* ¶ 18), despite BioFlo PICCs being "a truly disruptive product offering," (*id.* ¶ 53). Although AngioDynamics "anticipated rapid adoption of the BioFlo technology," "actual adoption of BioFlo PICCs has been limited" due to Bard's practices. (*Id.* ¶ 54).

The Complaint asserts that there is no procompetitive reason (technological, business, or otherwise) for Bard's selling **[*12]** of its tip location systems exclusively with its PICCs. (*Id.* ¶¶ 16, 72, 101, 117). Bard has "acknowledged" as much, according to the Complaint, because it sought FDA approval for selling its stylets single sterile. (*Id.* ¶ 73). Even if there were a reason for selling tip location systems together with PICCs, the Complaint adds, "any justification Bard has for tying its tip location systems and PICCs together is far outweighed by the anti-competitive effects in the market for PICCs." (*Id.* ¶ 72).

III. STANDARD OF REVIEW

To survive a pre-answer motion to dismiss for failure to state a claim, "a complaint must provide 'enough facts to state a claim to relief that is plausible on its face.'" *Mayor & City Council of Balt. v. Citigroup, Inc., 709 F.3d 129, 135 (2d Cir. 2013)* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))*. "Although a complaint need not contain detailed factual allegations, it may not rest on mere labels, conclusions, or a formulaic recitation of the elements of the cause of action, and the factual allegations 'must be enough to raise a right to relief above the speculative level.'" *Lawtone-Bowles v. City of New York, No. 16-cv-4240, 2017 U.S. Dist. LEXIS 155140, at *5, 2017 WL 4250513, at *2 (S.D.N.Y. Sept. 22, 2017)* (quoting *Twombly, 550 U.S. at 555*). The Court must accept as true all factual allegations in the complaint and draw all reasonable inferences in the plaintiff's favor. *See EEOC v. Port Auth., 768 F.3d 247, 253 (2d Cir. 2014)* (citing *ATSI Commc'ns, Inc. v. Shaar Fund, Ltd., 493 F.3d 87, 98 (2d Cir. 2007))*.

When **[*13]** deciding a motion to dismiss, the Court's review is ordinarily limited to "the facts as asserted within the four corners of the complaint, the documents attached to the complaint as exhibits, and any documents incorporated in the complaint by reference." *See McCarthy v. Dun & Bradstreet Corp., 482 F.3d 184, 191 (2d Cir. 2007)*. The Court may also consider "any document not incorporated but that is, nevertheless, 'integral' to the complaint because the complaint 'relies heavily upon its terms and effect.'" *See Yung v. Lee, 432 F.3d 142, 146 (2d Cir. 2005)* (quoting *Chambers v. Time Warner, Inc., 282 F.3d 147, 152 (2d Cir. 2002))*. As is well established, "there is no heightened pleading standard in antitrust cases, and the facts alleged are subject to *Federal Rule of Civil Procedure 8(a)*'s general requirement of a 'short plain statement' of facts supporting a plausible claim." *Concord Assocs., L.P. v. Entm't Props. Tr., 817 F.3d 46, 52 (2d Cir. 2016)*.

IV. DISCUSSION

"A tying arrangement is 'an agreement by a party to sell one product but only on the condition that the buyer also purchases a different (or tied) product, or at least agrees that he will not purchase that product from any other supplier.'" *Smugglers Notch Homeowners' Ass'n, Inc. v. Smugglers' Notch Mgmt. Co., Ltd., 414 F. App'x 372, 374*

(2d Cir. 2011) (quoting Eastman Kodak Co. v. Image Tech. Servs., Inc., 504 U.S. 451, 464, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)). To state a tying claim under the Sherman Act, a plaintiff must allege facts plausibly showing that: (1) "the sale of one product (the tying product) is conditioned on the purchase of a separate product (the tied product)"; (2) "the seller uses actual coercion **[*14]** to force buyers to purchase the tied product"; (3) "the seller has sufficient economic power in the tying product market to coerce purchasers into buying the tied product"; (4) "the tie-in has anticompetitive effects in the tied market"; and (5) "a not insubstantial amount of interstate commerce is involved in the tied market." Kaufman v. Time Warner, 836 F.3d 137, 141 (2d Cir. 2016) (citing E&L Consulting, Ltd. v. Doman Indus. Ltd., 472 F.3d 23, 31 (2d Cir. 2006)).[6]

AngioDynamics alleges that Bard has violated section 1 of the Sherman Act by unlawfully tying the purchase of Bard tip location system stylets to the purchase of Bard PICCs. (Dkt. No. 1, ¶ 95). The "tying products"—the products over which Bard allegedly has market power—are Bard's tip location systems, and the "tied products"—the products that Bard allegedly coerces buyers to purchase—are Bard's PICCs. (*See id.* ¶¶ 96-96, 104). Bard moves to dismiss the Complaint under Rule 12(b)(6) on the grounds that AngioDynamics failed to sufficiently allege the elements of coercion, separate products, and anticompetitive effects. (*See generally* Dkt. No. 14-1). The Court considers **[*15]** the parties' arguments with regard to each of these three issues below.

A. Coercion

"Actual coercion by the seller that in fact forces the buyer to purchase the tied product is an indispensable element of a tying violation." Unijax, Inc. v. Champion Int'l, Inc., 683 F.2d 678, 685 (2d Cir. 1982). Indeed, "the essential characteristic of an invalid tying arrangement lies in the seller's exploitation of its control over the tying product to force the buyer into the purchase of a tied product that the buyer either did not want at all, or might have preferred to purchase elsewhere on different terms." Jefferson Par. Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 12, 104 S. Ct. 1551, 80 L. Ed. 2d 2 (1984), *abrogated on other grounds by* Ill. Tool Works Inc. v. Indep. Ink, Inc., 547 U.S. 28, 31, 126 S. Ct. 1281, 164 L. Ed. 2d 26 (2006). "When such 'forcing' is present, competition on the merits in the market for the tied item is restrained and the Sherman Act is violated." *Id.* A seller's "use of strong persuasion, encouragement, or cajolery to the point of obnoxiousness to induce [a buyer] to buy its full line of products does not . . . amount to actual coercion," which is present only if the seller "goes beyond persuasion and condition its [buyer's] purchase of one product on the purchase of another product." Unijax, 683 F.2d at 685 (internal quotation marks omitted).

Bard argues that AngioDynamics fails to sufficiently allege coercion because the Complaint merely describes permissible **[*16]** bundling of PICCs with tip location systems. (*See* Dkt. No. 14-1, at 12 ("AngioDynamics' *sole* basis for pleading 'coercion' is its allegation that Bard preloads its stylets in its PICCs . . . . That is insufficient, because neither the Supreme Court nor Second Circuit has ever held that mere bundling in and of itself constitutes 'coercion.'")). AngioDynamics objects to the characterization of Bard's conduct as mere "bundling," explaining that

---

[6] Citing *Kaufman* and *E&L Consulting*, Bard argues that "pleading anticompetitive effects is a requirement even when a plaintiff purports to allege a *per se* tying claim." (Dkt. No. 14-1, at 17 & n.8). AngioDynamics demurs, noting that the court in these two cases did "not state whether it [was] analyzing a *per se* or Rule of Reason claim." (Dkt. No. 18, at 21 n.6). Further, as AngioDynamics points out, (*id.* at 20-21), the Second Circuit in *Wal-Mart Stores, Inc. v. Visa U.S.A. Inc.* (*In re Visa Check/MasterMoney Antitrust Litigation*) did not include a required showing of anticompetitive effects when listing out the four "substantive elements of [an] illegal per se tying claim," as opposed to "tying claims under a rule of reason theory," which require proof that "the challenged action had an adverse effect on competition as a whole in the relevant market and, if the defendant shows a pro-competitive redeeming virtue of the action, that the same pro-competitive effect could be achieved though [sic] an alternative means that is less restrictive of competition." 280 F.3d 124, 134 n.5 (2d Cir. 2001), *overruled on other grounds by* Miles v. Merrill Lynch & Co., Inc. (In re Initial Pub. Offerings Sec. Litig.), 471 F.3d 24 (2d Cir. 2006), *and superseded by statute on other grounds as stated in* Attenborough v. Constr. & Gen. Bldg. Laborers' Local 79, 238 F.R.D. 82, 100 (S.D.N.Y. 2006). Here, AngioDynamics advances a single tying claim under both per se and rule-of-reason theories. Since Bard moves to dismiss the Complaint for failure to allege anticompetitive effects, the Court must review the anticompetitive effects allegations to determine, at the very least, whether AngioDynamics has stated a rule-of-reason tying claim.

"[u]nlike a tying arrangement, a bundling arrangement offers discounted prices or rebates for the purchase of multiple products, but the buyer is under no obligation to purchase more than one item," and the products "are also available for purchase separately." (Dkt. No. 18, at 12-13).

The distinction between tying and bundling is well established. *See* *Virgin Atl. Airways Ltd. v. British Airways PLC, 257 F.3d 256, 270 (2d Cir. 2001)* ("An invalid tying arrangement conditions the purchase of one product to the purchase of a second product that the buyer either does not want or would have preferred to purchase elsewhere. In contrast, a bundling arrangement offers discounted prices or rebates for the purchase of multiple products, although the buyer is under no obligation to purchase more than one item." (citation omitted)). Taking **[*17]** the allegations in the Complaint as true and drawing all reasonable inferences in AngioDynamics' favor, the Court reads the pleading as describing a tying, not a bundling, arrangement. AngioDynamics alleges that Bard only sells its tip location systems preloaded in its own PICCs, (Dkt. No. 1, ¶ 71), and that Bard made a one-time exception for Cleveland Clinic, given that institution's "significant purchasing leverage," (*id.* ¶ 75). The Complaint further states that Bard has refused to sell the stylets single sterile despite other institutions' requests. (*Id.* ¶ 76). Despite Bard's contention that it "sells the allegedly tied products separately as well as bundled," (Dkt. No. 14-1, at 13), these allegations instead make out a policy of selling the products together.

The cases on which Bard relies are factually distinguishable. In *In re Time Warner Inc. Set-Top Cable Television Box Antitrust Litigation*, cable television subscribers alleged that the cable company tied premium cable services to the rental of its cable box, but the subscribers acknowledged that premium cable services were also available through the use of a "CableCARD" sold or rented by a third party. *See* *No. 08-cv-7616, 2010 U.S. Dist. LEXIS 22369, at *6-7, 2010 WL 882989, at *1 (S.D.N.Y. Mar. 5, 2010)* **[*18]** . Because customers could choose not to lease the cable box and still receive premium cable services, even though the cable company's "promotion of cable boxes . . . may have persuaded most customers to choose to lease a cable box," the court determined that customers "were not actually coerced." *2010 U.S. Dist. LEXIS 22369, at *20, 2010 WL 882989, at *5-6*. In *Synergetics USA, Inc. v. Alcon Labs., Inc.*, a manufacturer of light sources and light pipes for eye surgery alleged that its competitor, Alcon, tied the sale of light pipes to the sale of cassettes used in Alcon's market-leading vitrectomy machines (which only Alcon could make). *See* *No. 08-cv-3669, 2009 U.S. Dist. LEXIS 13868, at *1-3, 2009 WL 435299, at *1 (S.D.N.Y. Feb. 23, 2009)*. Alcon sold the cassettes with the light pipes in one of the packages it marketed, but the plaintiff acknowledged that Alcon also sold the cassettes separately from the light pipes. *2009 U.S. Dist. LEXIS 13868, at *10, 2009 WL 435299, at *4*. The court concluded that the plaintiff had "fail[ed] to allege coercion." *Id.* Here, by contrast, AngioDynamics has alleged that Bard does not sell its tip location systems separately from its PICCs, and Bard has refused requests from purchasers, other than Cleveland Clinic, to do so. An "unremitting policy of tie-in, if accompanied by sufficient market power in the tying product to appreciably restrain competition in the market for the tied product constitutes the requisite coercion . . . given foreclosure of a not insubstantial volume of interstate commerce." *Hill v. A-T-O, Inc., 535 F.2d 1349, 1355 (2d Cir. 1976)*.

Bard also contends that the coercion allegations are insufficiently specific because AngioDynamics has not identified which purchasers requested to buy the tip location system stylets single sterile. (Dkt. No. 14-1, at 14-15; Dkt. No. 22, at 8). Plausibility generally requires that a plaintiff provide "some specificity" as to "the customers who would have purchased a product elsewhere but for the coercion." *E&L Consulting, 472 F.3d at 32*; *Synergetics, 2009 U.S. Dist. LEXIS 13868, at *10, 2009 WL 435299, at *4* ("Where the pleading recognizes that the defendant also sells the allegedly tied items separately, general claims that [the seller] has refused to sell two supposedly tied products individually do not allege actual coercion of the buyer."). But when the seller has "a policy of never offering the [tying product] separately from the [tied product]," *Hill, 535 F.2d at 1355*, allegations of individual coercion are unnecessary. **[*19]** *See* *Park v. Thomson Corp., No. 05-cv-2931, 2007 U.S. Dist. LEXIS 2001, at *11-12, 2007 WL 119461, at *4 (S.D.N.Y. Jan. 11, 2007)* ("When a policy of conditioned sales is demonstrated, proof of coercion on an individual basis is unnecessary."); *cf.* *Reisner v. Gen. Motors Corp., 511 F. Supp. 1167, 1177 n.21 (S.D.N.Y. 1981)* ("The 'unremitting policy of tie-in,' which under some circumstances can substitute for coercion, is appropriate only in a situation . . . where the policy was applied to all buyers." (citation omitted)), *aff'd*, *671 F.2d 91 (2d Cir. 1982)*. Here, AngioDynamics has alleged that all purchasers currently have to buy Bard PICCs and stylets together because Bard only sells these two items as a package. Given Bard's policy of selling the PICCs and stylets together—and since Bard does not challenge the allegations' sufficiency with regard to its market power or the amount of commerce affected—AngioDynamics need not identify customers who would have purchased a product elsewhere but for the coercion for coercion to be plausible under these circumstances. *See* Hill, 535 F.2d at 1355. Thus, the Court concludes that AngioDynamics has adequately alleged coercion.

B. Separate Products

Bard seeks dismissal on the ground that the Complaint fails to sufficiently allege that PICCs and tip location systems are two separate products. (Dkt. No. 14-1, at 15). "The 'separate product' element requires that the alleged tying product and tied **[*20]** product be separate, *i.e.*, they must exist in separate and distinct product markets." Kaufman, 836 F.3d at 141. "This is because if there is no separate market for the allegedly tied product, there can be no fear of leveraging a monopoly in one market to harm competition in a second market." Id. at 142. Courts apply a "consumer demand test" to determine whether two products are separate for ***antitrust law*** purposes. *Id.* Two products are separate only if "there is a sufficient demand for the purchase of [the tied product] separate from [the tying product] to identify a distinct product market in which it is efficient to offer [the former] separately from [the latter]." Jefferson Parish, 466 U.S. at 21-22. Separateness "turns not on the functional relation between [the products], but rather on the character of the demand for the two items." Id. at 19. Factors relevant to whether there is "separate and distinct consumer demand" for the two products include, among others, "the history of the products being, or not being, sold separately" and "the sale of the products separately in similar markets." Kaufman, 836 F.3d at 142.

According to Bard, the Complaint "alleges next to nothing" concerning the character of the demand for PICCs and tip location systems. (Dkt. No. 14-1, at 15). Bard characterizes **[*21]** the allegation that Cleveland Clinic requested to purchase the stylets separately as an "isolated example of one hospital . . . out of thousands in this country," and faults AngioDynamics for not including "any facts to support that customers *in general* actually wish to purchase PICCs and tip location systems separately." (*Id.* at 15-16). Further, Bard contends that the allegation that it applied for FDA approval to sell stylets single sterile is irrelevant because it goes to "supply-side considerations rather than the character of consumer demand." (*Id.* at 16 (quoting Kaufman, 836 F.3d at 144)). Lastly, Bard asserts that the allegation that other suppliers sell tip location systems separately is "not sufficiently specific" because the Complaint does not detail how many competitors there are and whether their products are similar to Bard's. (*Id.* at 16-17).

Bard, however, overlooks a number of allegations that, if assumed to be true and read together with the rest of the Complaint, make it plausible that PICCs and tip location systems are separate products. The Complaint describes the distinct characteristics of the market for PICCs and the market for tip location systems. (*Compare* Dkt. No. 1, ¶¶ 84-89, *with id.* ¶¶ 90-93). Additionally, AngioDynamics **[*22]** alleges that Cleveland Clinic and other institutions have asked to purchase Bard's stylets separately from its PICCs, and that customers can purchase its competitors' tip location systems single sterile. (Dkt. No. 1, ¶¶ 75, 76). Drawing all reasonable inferences in AngioDynamics' favor, the Court reads the Complaint as indicating that PICCs were historically sold on a standalone basis. (*Id.* ¶¶ 7, 62-63, 86). These allegations plausibly show that there is separate consumer demand for PICCs and tip location systems.

Likewise, the Complaint sufficiently describes Bard's competitors and their products. The Complaint provides a great deal of detail about the tip location systems offered by Bard and its competitors. (*Id.* ¶¶ 62-82). Although the Complaint describes Bard's Sherlock systems as superior to others on the market, it also states that all tip locations systems serve to locate a PICC's tip in relation to the heart—obviating the need for less accurate and more expensive x-rays or fluoroscopy. (*Id.* ¶¶ 63-64, 69). At this stage, these allegations suffice to show that other tip location systems compete on the same market as Bard's, and since Bard's competitors sell their tip location **[*23]** systems separately, "the sale of the [competing tip location systems] separately" plausibly suggests a "separate and distinct consumer demand" for tip location systems and PICCs. Kaufman, 836 F.3d at 142. Therefore, AngioDynamics has sufficiently pled the element of separate products.

C. Anticompetitive Effects

The third basis for dismissal asserted by Bard is that "AngioDynamics fails to plead 'some specificity' as to 'the anticompetitive effects in a specified market." (Dkt. No. 14-1, at 17 (quoting *E&L Consulting, 472 F.3d at 32*)). To plead anticompetitive effects, a plaintiff must allege that "competitors were foreclosed from selling to [buyers] because of [the defendant's] policies." *Yentsch v. Texaco, Inc., 630 F.2d 46, 57 (2d Cir. 1980)*. Bard argues that: (i) the Complaint's allegations of diminished competition, harm to patients, and harm to Plaintiffs are "generalized and conclusory"; (2) AngioDynamics' allegations that competitors lost market share to Bard are insufficient because ***antitrust law*** protects competition, not competitors; and (3) the Complaint merely alleges harm to AngioDynamics, not harm to competition or the competitive process. (Dkt. No. 14-1, at 18-19).

Bard's arguments do not stand up to scrutiny.[7] The Complaint alleges that, as a result of its selling practices, Bard **[*24]** has been able to "capture and maintain a dominant position in the PICC market, exceeding 70% market share," causing competitors to lose PICC sales and market share, despite the technological superiority of AngioDynamics' BioFlo PICCs (which allegedly reduces blood clotting and catheter obstruction), and reducing price competition. (Dkt. No. 1, ¶¶ 15, 18, 94, 100). These circumstances, if true, plausibly suggest substantial foreclosure of a specified market (the PICC product market) and resulting restraints on innovation by a dominant market player—i.e., not just harm to competitors but harm to the competitive environment itself. Furthermore, the Complaint states that Cleveland Clinic was able to buy Bard's stylets separately in order to combine them with AngioDynamics' BioFlo PICCs, but that Bard denied similar requests from other institutions. (*See id.* ¶ 77). If, as alleged, BioFlo PICCs are superior to Bard's PICCs, and BioFlo PICCs are unavailable to patients because of Bard's practices, then Bard's conduct will have harmed patients. In sum, AngioDynamics has stated enough factual allegations rendering its claim of anticompetitive effects plausible at this early stage of the case. **[*25]** Therefore, Bard's motion to dismiss must be denied.

V. CONCLUSION

For these reasons, it is hereby

ORDERED that Defendants' motion to dismiss (Dkt. No. 14) is **DENIED** in its entirety.

IT IS SO ORDERED.

Dated: August 6, 2018

Syracuse, New York

Judges: Before: GRABER and HURWITZ, Circuit Judges, and LEMELLE,[**] District Judge.

Opinion

[*828] MEMORANDUM and ORDER[*]

The plaintiffs in each of these actions are commercial and industrial purchasers of natural gas, who allege that the defendant natural gas traders conspired between 2000 and 2002 to manipulate prices. The original complaints were filed in various state courts between 2007 and 2010. The defendants removed each case to federal court, invoking diversity jurisdiction under the *Class Action Fairness Act*, *28 U.S.C. § 1332(d)(2)*. The cases were consolidated as Multidistrict Litigation (MDL) No. 1566 and transferred to the District of Nevada.

In 2007, this court reversed dismissals premised on the filed rate doctrine in various actions arising out of MDL No. 1566. *Sinclair Oil Corp. v. OneOK Energy Servs. Co., L.P., 377 F. App'x 622, 623 (9th Cir. 2010)* (unpublished). In 2013, we reversed summary judgment orders in several MDL **[**8]** No. 1566 actions, holding that the *Natural Gas Act, 15 U.S.C. § 717 et seq.*, did not preempt the plaintiffs' state law claims. *See In re W. States Wholesale Nat. Gas Antitr. Litig., 715 F.3d 716 (9th Cir. 2013)*, *aff'd sub nom. Oneok, Inc. v.* ***[*829]*** *Learjet, Inc., 135 S. Ct. 1591, 191 L. Ed. 2d 511 (2015)*. This third appeal is from the district court's order denying motions for class certification in four actions. We have appellate jurisdiction under *28 U.S.C. § 1292(e)*; we vacate and remand to the district court.

1. After citing and quoting caselaw, the district court's order denying class certification devoted only a few sentences to its analysis of why the predominance requirement of *Rule 23(b)(3)* was not satisfied in the Kansas *Learjet* action. The court then simply incorporated that discussion by reference—without more—into the portions of its order denying class certification in the other three actions. The centerpiece of the district court's brief rationale was that the "class members in these cases are not small consumers whose damages constitute a straightforward calculation" but rather are "sophisticated industrial and commercial consumers who used varying and complex strategies for purchasing natural gas such that it is difficult to calculate their damages in most cases." However, "the

---

[**] The Honorable Ivan L.R. Lemelle, United States District Judge for the Eastern District of Louisiana, sitting by designation.

[*] This disposition is not appropriate for publication and is not precedent except as provided by *Ninth Circuit Rule 36-3*.

amount of damages is invariably an individual question and does not defeat class action treatment." **[**9]** *Yokoyama v. Midland Nat'l Life Ins. Co., 594 F.3d 1087, 1094 (9th Cir. 2010)* (quoting *Blackie v. Barrack, 524 F.2d 891, 905 (9th Cir. 1975))*.

To the extent that the district court's order can be read as finding that common questions of law or fact did not predominate with respect to antitrust injury, it was similarly sparse. The court simply noted, without citation to the record or further explanation, that "Plaintiffs' own experts have used different methods to calculate injury resulting in disparate estimations of what percentage of class members were even harmed." The court then concluded by stating that "[a]lthough there are some common questions of law and fact, they simply do not predominate over individual issues," without clearly identifying either the common or the individual issues.

The court's terse order with respect to *Rule 23(b)(3)* predominance does not provide a sufficient analysis to permit us to engage in "[m]eaningful appellate review." *Narouz v. Charter Commc'ns, LLC, 591 F.3d 1261, 1266 (9th Cir. 2010)*. ***HN1***[] It is not enough for a district court to "paraphrase" the requirements of *Rule 23* and simply "indicate the court's conclusion that those provisions were not satisfied." *Loc. Joint Exec. Bd. of Culinary/Bartender Tr. Fund v. Las Vegas Sands, Inc., 244 F.3d 1152, 1161 (9th Cir. 2001)*. Although we review district court orders denying class certification for abuse of discretion, we cannot perform even that deferential review without determinations keyed to the particular facts and issues in these **[**10]** cases. *See id*. (vacating and remanding the district court's denial of class certification because the district court failed, in the "four operative sentences" of its order, to "explain why the court concluded that the provisions were not satisfied on the facts of this case").

The deficiencies in the district court's order concerning predominance are exacerbated by the failure to acknowledge, let alone discuss, the differences in the governing state laws in the four actions. Those differences are particularly acute with respect to the Wisconsin *Arandell* and *NewPage* actions. ***HN2***[] Under Wisconsin ***antitrust law***, both direct and indirect purchasers may seek remedies for antitrust injury, *Wis. Stat. § 133.18(1)(a)*, and direct purchasers may seek full disgorgement, *id*. *§ 133.14*. The district court, however, simply incorporated its brief discussion from the portion of its order dealing with the Kansas *Learjet* action when finding an absence of predominance in the Wisconsin action. The district court also failed to discuss differences in the number and nature **[*830]** of the plaintiffs and the defendants in each action, foregoing any analysis, for instance, of how classwide resolution of the issues in the *Breckenridge* action, in which only **[**11]** two defendants remained at the time of this appeal, would differ from the cases involving more defendants.[1]

The plaintiffs ask us to order class certification. We decline to do so. These cases are decades old, with extensive records, and the issue is better analyzed by the district court in the first instance. We therefore vacate the orders denying class certification and remand to the district court to conduct an appropriate analysis of the *Rule 23(b)(3)* issue in the first instance, with particular focus on the potential differences between each of the four actions.

2. At oral argument, the plaintiffs suggested that, because of differences in state antitrust laws in each of the four actions, the issue of class certification would be considered most appropriately by the transferor courts. The plaintiffs asked that we instruct the district court to request that the Judicial Panel on Multidistrict Litigation ("the Panel") remand the cases to their transferor courts.

There is some facial merit to the plaintiffs' suggestions. ***HN3***[] If determination of a motion "rests on application of the transferor court's conflicts-of-law and substantive law rules, the transferor judge may be able to decide the motions **[**12]** most efficiently." Manual for Complex Litig., Fourth § 22.36 at 372. We decline, however, to instruct the district judge to request a remand. The authority to order remand to the transferor court lies with the Panel, not with this court or the district court. *28 U.S.C. § 1407(a)*. The Panel's rules permit the parties to make a request for remand either to the transferee court (whose recommendation the Panel can then consider) or directly to the Panel. Rules of Procedure of the Judicial Panel on Multidist. Litig. 10.1(b). No direction or permission from this court is

---

[1] The district court's order is also inconsistent with respect to the typicality requirement of *Rule 23(a)*. The court initially concluded that the claims of the named plaintiffs in the *Learjet* action are "typical of the class members' claims," but later suggested that the typicality requirement was not met.

required for such motions. Indeed, the plaintiffs have previously filed several requests to recommend remand with the district court. *See* Order Denying Remand, *In re W. States Wholesale Nat. Gas Antitr. Litig (MDL 1566), No. 2:03-cv-01431-RCJ (PAL), 2015 U.S. Dist. LEXIS 164421 (D. Nev. Aug. 5, 2015)*, ECF No. 2142; Motion for Suggestion of Remand, *In re W. States Wholesale Nat. Gas Antitr. Litig (MDL 1566)*, No. 2:03-cv-01431-RCJ (PAL) (D. Nev. Jan. 13, 2017), ECF No. 2765; Motion for Suggestion of Remand, *In re W. States Wholesale Nat. Gas Antitr. Litig (MDL 1566)*, No. 2:03-cv-01431-RCJ (PAL) (D. Nev. Sept. 8, 2017), ECF No. 2961. In denying the most recent request, the district court expressly suggested renewal after the mandate issued in this **[**13]** appeal. *See* Order Denying Motion for Suggestion of Remand, *In re W. States Wholesale Nat. Gas Antitr. Litig (MDL 1566), No. 2:03-cv-01431-RCJ (PAL), 2017 U.S. Dist. LEXIS 191228 (D. Nev. Nov. 20, 2017)*, ECF No. 2987. We therefore remand without prejudice to the plaintiffs' pursuing, either before the district court or the Panel, their requests for remand to the transferor courts to decide the class certification motions.

VACATED and REMANDED. Costs on appeal awarded to Plaintiffs-Appellants.[2]

LexisNexis® Headnotes

Antitrust & Trade Law > Sherman Act > Scope

HN1[] **Antitrust & Trade Law, Sherman Act**

A parent and a wholly owned subsidiary always have a unity of purpose and thus act as a single enterprise whenever they engage in coordinated activity, for purposes of *§ 1 of the Sherman Act*., *15 U.S.C.S. § 1*.

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Nonmovant Persuasion & Proof

Civil Procedure > ... > Summary Judgment > Appellate Review > Standards of Review

***HN2*[]** **Burdens of Proof, Nonmovant Persuasion & Proof**

Appellate courts review the district court's grant of summary judgment de novo. The court's ultimate inquiry is to determine whether the specific facts set forth by the nonmoving party, coupled with undisputed background or contextual facts, are such that a rational or reasonable jury might return a verdict in its favor based on that evidence.

Antitrust & Trade Law > Sherman Act > Scope

***HN3*[]** **Antitrust & Trade Law, Sherman Act**

Wisconsin courts' interpretation of *Wis. Stat. § 133.03* is controlled by federal court decisions under the *Sherman Act*. *Section 1 of the Sherman Act* provides that every contract, combination, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal. *15 U.S.C.S. § 1*. A defendant may be held liable under *§ 1 of the Sherman Act* if that person acted either with the knowledge that the action would have unreasonable anticompetitive effects or with the purpose of producing those effects.

Antitrust & Trade Law > Sherman Act > Scope

***HN4*[]** **Antitrust & Trade Law, Sherman Act**

The coordinated activity of a parent and its wholly owned subsidiary must be viewed as that of a single enterprise for purposes of *15 U.S.C.S. § 1* because a parent and its wholly owned subsidiary have a complete unity of interest. Therefore, a parent company and its wholly owned subsidiary are incapable of conspiring with each other for purposes of *§ 1 of the Sherman Act*., *15 U.S.C.S. § 1*. The Copperweld doctrine establishes that where there is substantial common ownership, individual firms function as an economic unit and are generally treated as a single entity.

Governments > Courts > Judicial Precedent

***HN5*[]** **Courts, Judicial Precedent**

As a general rule, the principle of stare decisis directs courts to adhere not only to the holdings of prior cases, but also to their explications of the governing rules of law.

Antitrust & Trade Law > Sherman Act > Scope

***HN6*[]** **Antitrust & Trade Law, Sherman Act**

A wholly owned subsidiary that engages in coordinated activity in furtherance of the anticompetitive scheme of its parent and/or commonly owned affiliates is deemed to engage in such coordinated activity with the purposes of the single "economic unit" of which it is a part.

Business & Corporate Compliance > ... > Corporations > Corporate Governance > Directors & Officers

HN7[] **Corporations, Directors & Officers**

The general rule is well established that a corporation is charged with constructive knowledge, regardless of its actual knowledge, of all material facts of which its officer or agent receives notice or acquires knowledge while acting in the course of his employment within the scope of his authority, even though the officer or agent does not in fact communicate his knowledge to the corporation.

Antitrust & Trade Law > Sherman Act > Claims

HN8[] **Sherman Act, Claims**

To be liable on a *§ 1 of the Sherman Act*., *15 U.S.C.S. § 1*, claim, a defendant must have conspired (or agreed or combined, etc.) to restrain trade. It is not necessary to find an express agreement, either oral or written, in order to find a conspiracy, but it is sufficient that a concert of action be contemplated and that defendants conform to the arrangement. Any conformance to an agreed or contemplated pattern of conduct will warrant an inference of conspiracy.

Summary:

SUMMARY**

Antitrust Law

The panel reversed the district court's summary judgment in favor of CenterPoint Energy Services, Inc. ("CES"), a natural gas company, in a class action alleging that ten large natural gas companies colluded to fix retail natural gas prices in Wisconsin.

CES was a wholly owned subsidiary of Reliant Energy, Inc. The plaintiff class alleged that certain Reliant entities — including CES — conspired with other natural gas conglomerates to fix retail natural gas prices.

The panel held that *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)*, supported the following rule: a wholly-owned subsidiary that engaged in coordinated activity in furtherance of the anticompetitive scheme of its parent and/or commonly owned affiliates is deemed to engage in such coordinated activity with the purposes of the single "economic unit" of which it was a part.

The panel held that plaintiffs raised a triable issue of CES's anticompetitive intent. Specifically, the panel held that: plaintiffs submitted evidence that Reliant's "economic unit" had an anticompetitive purpose during the class **[**2]** period; such anticompetitive "purpose" could sustain liability under the federal Sherman Act with or without an additional finding of knowledge; and Reliant's alleged illegal purposes are imputed to CES's coordinated activities.

** This summary constitutes no part of the opinion of the court. It has been prepared by court staff for the convenience of the reader.

The panel held that plaintiffs' evidence was sufficient to raise a triable issue of whether CES knowingly acted to further the alleged price-fixing scheme. The panel further held that any knowledge of the alleged price-fixing scheme that CES's directors and officers acquired while concurrently acting as directors or officers of the other Reliant companies was imputable to CES as a matter of Wisconsin law.

The panel held that plaintiffs submitted sufficient evidence to raise a genuine issue under the *Sherman Act* — and *Wisconsin Statute § 133.03(1)* — as to whether CES participated in coordinated activity in furtherance of the alleged inter-enterprise price-fixing conspiracy.

Mark Russell Robeck (argued) and Travis G. Cushman, Kelley Drye & Warren LLP, Washington, D.C. for Defendants-Appellees.

Judges: Before: Carlos T. Bea and N. Randy Smith, **[**3]** Circuit Judges, and Robert S. Lasnik,* District Judge. Opinion by Judge Bea.

Opinion by: Carlos T. Bea

Opinion

[*625] BEA, Circuit Judge:

Here we have a wholly owned subsidiary company which sold natural gas to Plaintiffs. It asserts that it acted innocently and without knowledge of its parent company's price-fixing scheme, which had pumped up the price of that gas. Yes, the subsidiary company sold the gas at prices previously rigged by the parent, and yes, the subsidiary sent the profits back to the parent. But the subsidiary asserts there is no evidence that *it* knew the prices were inflated or that *it* had the purpose to carry out the price-fixing scheme. Under Wisconsin ***antitrust law***, can the subsidiary be liable to Plaintiffs? Because Supreme Court precedent establishes that ***HN1***[] "a parent and a wholly owned subsidiary *always* have a 'unity of purpose'" and thus act as a "single enterprise" whenever they engage in "coordinated activity," *Copperweld Corp. v. Indep. Tube Corp., 467 U.S. 752, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)* (emphasis added), we conclude that it can.

I. BACKGROUND

Most consumers of natural gas in North America are individuals or small businesses **[*626]** who buy their gas from local utility companies. However, some larger and more sophisticated businesses bypass their local utility and purchase **[**4]** gas directly from the companies that sell gas to the local utilities. These large commercial customers enter contracts to buy agreed-upon quantities of gas and take delivery via high-volume gas pipelines. While these contracts typically specify the quantity to be delivered, the price is typically left to be determined by reference to the market price at the time of delivery, as reported in the latest price index published by a designated trade publication. For example, a contract might provide that the price of a delivery of natural gas would be "the *Inside FERC* index plus $*x*." Such contracts to purchase gas on the cash market and take physical delivery of natural gas are referred to as "physical" contracts (as opposed to financial or "futures" contracts).[1]

* The Honorable Robert S. Lasnik, Senior District Judge for the Western District of Washington, sitting by designation.

[1] To protect against the risk that the price of natural gas will increase before the delivery date, many sophisticated gas purchasers seek to "hedge" by purchasing natural gas futures contracts—standardized contracts for the sale and purchase of natural gas at a specific price in the future—which are resolved financially (*i.e.*, by selling the contractual interest for cash or

In the early 2000s, natural gas prices rose dramatically, due in part to manipulative trading practices of some of the nation's largest natural gas conglomerates. In March 2003, the Federal Energy Regulatory Commission (FERC) published a report on "whether and, if so, the extent to which California and Western energy markets were manipulated during 2000 and 2001." *See* FERC, **[**5]** *Final Report on Price Manipulation in Western Markets: Fact-Finding Investigation of Potential Manipulation of Electric and Natural Gas Prices*, at ES-1 (Mar. 2003), available at https://www.ferc.gov/legal/maj-ord-reg/land-docs/PART-I-3-26-03.pdf ("FERC Final Report"). The report "found significant market manipulation" by gas marketing companies such as Enron, for example. *Id.* at ES-1—ES-2. In particular, FERC discovered widespread "efforts to manipulate price indices compiled by trade publications" primarily through "[r]eporting of false data" to the trade publications, "wash trading,"[2] and a trading activity known as "churning."[3] *Id.* at ES-1—ES-5. The report determined that energy trading companies had few, if any, internal controls in place to ensure the accuracy of the data reported **[*627]** to trade publications. *FERC Final Report* at III-3. Ultimately, the report found that price manipulation was a substantial cause of "[d]ysfunctions in the natural gas market" which led to "extraordinary" increases in gas prices in 2000 and 2001. *Id.* at ES-1.

Various plaintiff groups filed class-action lawsuits around the country, in both state and federal courts, and alleged that natural gas traders manipulated **[**6]** the price of natural gas by reporting false information to price indices published by trade publications and engaging in wash sales. *See* *In re W. States Wholesale Nat. Gas Antitrust Litig., 715 F.3d 716, 727 (9th Cir. 2013)*, *aff'd sub nom.* *Oneok, Inc. v. Learjet, Inc., 135 S. Ct. 1591, 191 L. Ed. 2d 511 (2015)*. These actions were eventually consolidated into a multi-district litigation proceeding in the District of Nevada, *In re W. States Wholesale Nat. Gas Antitrust Litig.*, MDL No. 1566 (the "MDL"); *see also* *In re W. States, 715 F.3d at 727*. The MDL includes the instant action.

Plaintiffs (collectively known in the MDL below as the "Arandell Plaintiffs") filed this action in Wisconsin state court on December 15, 2006, on behalf of a proposed class of "all industrial and commercial purchasers of natural gas" who purchased natural gas "for their own use or consumption . . . in Wisconsin" between January 1, 2000, and October 31, 2002 (the "Class Period"). The defendants are ten large natural gas companies, including certain of their subsidiaries and affiliates, who allegedly colluded to fix retail natural gas prices in Wisconsin. The action was removed on the basis of diversity jurisdiction to the Western District of Wisconsin on February 9, 2007. On June 29, 2007, the case was transferred to the MDL in the District of Nevada.

This appeal is from the district court's grant **[**7]** of summary judgment to one defendant in the Arandell case, CenterPoint Energy Services, Inc. ("CES").[4] CES sold natural gas and related services to commercial and industrial customers in Wisconsin during the Class Period. From January 1, 2000, to August 31, 2002 (33 of the 34 months in the Class Period), CES was a wholly owned subsidiary of Reliant Energy, Inc. ("Old Reliant").[5] Within the Reliant

---

otherwise liquidating the gas interest) rather than by taking delivery of gas. A properly executed hedging strategy negates any loss or gain on the physical purchase due to changes in the price of gas, as the physical gas customer stands in the position of a natural gas *seller* for purposes of the futures contract. Ideally, the "buy" position on the physical contract and the "sell" position on the futures contract counterbalance each other so that the physical gas purchaser is left with a net cost for natural gas equal to the price of natural gas *at the time it entered the physical gas contract*.

[2] A "wash trade" is "a prearranged pair of trades of the same good between the same parties, involving no economic risk and no net change in beneficial ownership. These trades expose the parties to no monetary risk and serve no legitimate business purpose." Such trades were alleged to have "exaggerated market demand for natural gas and thus manipulate[d] natural gas prices."

[3] "Churning" is "a pattern of natural gas purchases and sales" wherein (a) the gas marketing companies "both bought and sold during the trading interval, so that the trades largely offset each other," (b) "gross trading volume greatly exceeded net trading volume," and (c) the companies "made a relatively large number of consecutive purchases and/or sales in a short amount of time, often being the only buyer and/or seller during the burst of transactions." "Churning" allegedly enabled the companies to "artificially manipulate the day's average price by initially buying (which raised the prices), and then selling (which brought prices back down)."

[4] Like the parties' briefs, we refer to CenterPoint Energy Services by its current name. However, CES was known as Retail Energy Retail, Inc. during the Class Period.

family of companies, CES dealt primarily with Reliant Energy Services, Inc. ("RES" and together with Old Reliant and the other Reliant co-defendants collectively "Reliant"), a commonly owned affiliate during most of the Class Period.[6] Reliant has admitted to engaging in wash trades during the Class Period and has reached settlements with several government agencies **[*628]** regarding its manipulative trading practices during that time.

In this action, Plaintiffs alleged that certain Reliant entities—including CES, Old Reliant, and RES—conspired with other natural gas conglomerates to fix retail natural gas prices in Wisconsin. Plaintiffs further alleged that CES in particular sold natural gas in Wisconsin at prices that were artificially inflated as a result of the price-fixing conspiracy between Reliant **[**8]** and other, non-Reliant co-conspirators. Plaintiffs alleged two causes of action under Wisconsin's antitrust statutes, seeking (1) a declaratory judgment that certain natural gas contracts made during the Class period are void under *Wisconsin Statute § 133.14*, and (2) treble damages for violations of *Wisconsin Statute § 133.03*, which provides that "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce is illegal."

In the MDL, the district court granted CES's motion for summary judgment against the Plaintiffs' Third Amended Complaint ("TAC"). CES argued that it was entitled to summary judgment because it was "not alleged to have engaged in any anticompetitive activity or other wrongdoing in or directed to Wisconsin," but rather it was alleged only to have been affiliated with RES and to have sold gas to Wisconsin consumers. The district court agreed that Plaintiffs had not raised a genuine issue of material fact sufficient to support a verdict or judgment under *Wisconsin Statute § 133.03(1)* because there was "no evidence" that CES knowingly "participated in a conspiracy or direct acts in restraint of trade." In particular, the court ruled that there was no evidence that CES "knowingly" engaged in swaps "in conspiracy **[**9]** with RES" for "the purpose of increasing the price of natural gas," or that CES "knew that RES or others were engaged in such behavior."

On appeal, Plaintiffs summarized their case against CES as follows:

> CES (formerly a Reliant company) made an essential contribution to the Reliant companies' coordinated price-fixing efforts. Each Reliant company played a necessary role. The Reliant trading company (RES) inflated retail natural gas prices through manipulative trading and false reporting of sales data to publishers of benchmark price indices. RES then sold gas at inflated prices to CES, the Reliant sales subsidiary. CES resold the overpriced gas to Wisconsin businesses, collected millions of dollars in overcharges at the expense of the class members, and funneled the revenues from these sales to the Reliant parent. The officers and directors of the Reliant parent orchestrated this scheme, directing RES to manipulate retail prices and instructing CES to send its illegal profits to the Reliant parent.

Plaintiffs argue the district court erred in: (1) determining that Plaintiffs needed to produce evidence that CES intentionally conspired with RES to inflate gas prices in order to raise a **[**10]** triable issue, (2) failing to consider record evidence that CES purposely or knowingly furthered the alleged inter-enterprise conspiracy by selling gas at rigged prices and channeling the proceeds to Old Reliant, and (3) granting summary judgment without considering the Plaintiffs' *Rule 56(d)* motion for additional discovery.

II. DISCUSSION

---

[5] From January 1, 2000, to August 31, 2002, CES was a wholly owned subsidiary of Reliant Energy Resources Corp., which, in turn, was a wholly owned subsidiary of Old Reliant.

[6] During the Class Period, Old Reliant was in the process of restructuring its business pursuant to a plan filed with the Texas Public Utility Commission as required by Texas law. From January 1, 2000, to January 1, 2001 (the first year of the Class Period), CES and RES were both wholly owned subsidiaries of RERC, which was itself wholly owned by Old Reliant. The first phase of the restructuring was completed on January 1, 2001 (one year into the Class Period). After January 1, 2001, Old Reliant owned 83% of RES (through a new company, Reliant Resources Inc.), while CES remained wholly owned (through RERC). Reliant completed the restructuring one month before the end of the Class Period. As of September 30, 2002, the restructuring of Old Reliant resulted in two independent, publicly traded companies: Reliant Resources, Inc. ("New Reliant"), which owned RES, and CenterPoint Energy, Inc., which owned CES.

HN2[] We review the district court's grant of summary judgment *de novo.* *Kaiser Cement Corp. v. Fischbach & Moore, Inc., 793 F.2d 1100, 1103 (9th Cir. 1986)*. "[T]he court's ultimate inquiry is to determine whether the 'specific facts' set forth **[*629]** by the nonmoving party, coupled with undisputed background or contextual facts, are such that a rational or reasonable jury might return a verdict in its favor based on that evidence." *T.W. Elec. Serv., Inc. v. Pac. Elec. Contractors Ass'n, 809 F.2d 626, 631 (9th Cir. 1987)*. For purposes of summary judgment, CES does not contest the substance of Plaintiffs' evidence that one or more of the other Reliant entities successfully conspired with non-Reliant entities to manipulate gas prices during the Class Period, or that CES bought gas from RES and sold it to consumers in Wisconsin during the Class Period. Therefore, the question before the court is whether Plaintiffs submitted sufficient evidence to raise triable issues as to (1) whether CES had the requisite intent and purpose to restrain trade, **[**11]** and (2) whether CES did in fact act to further the alleged conspiracy. We address each in turn.

A. Anticompetitive Intent

HN3[] Wisconsin courts' interpretation of *Wisconsin Statute § 133.03* "is controlled by federal court decisions under the Sherman Act." *Ford Motor Co. v. Lyons, 137 Wis. 2d 397, 405 N.W.2d 354, 367 (Wis. Ct. App. 1987)*. *Section 1 of the Sherman Act* provides that "[e]very contract, combination . . . , or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal." *15 U.S.C. § 1*. A defendant may be held "liable under *§ 1 of the Sherman Act* if that person . . . [acted] either with the knowledge that the . . . [action] would have unreasonable anticompetitive effects or with the purpose of producing those effects." *United States v. Bailey, 444 U.S. 394, 404-05, 100 S. Ct. 624, 62 L. Ed. 2d 575 (1980)*. Plaintiffs argue that the evidence submitted below established that CES *purposely* participated in the price-fixing scheme because, as a wholly owned subsidiary of Reliant during the Class Period, CES is deemed to have shared the intent of the commonly owned Reliant conspirators. Plaintiffs also argue that they submitted evidence showing overlap among the directors and managers of CES, on one hand, and the alleged Reliant conspirators, on the other—creating a genuine issue of material fact as to whether CES *knowingly* participated in **[**12]** the price-fixing scheme.

1. Purpose

Plaintiffs argue that, contrary to the district court's decision, Wisconsin ***antitrust law*** did not require them to prove "that CES knowingly engaged 'in [a] conspiracy with RES . . . with the purpose of increasing the price of natural gas" to create a triable issue as to CES's liability. According to Plaintiffs, the "*Copperweld* doctrine"—named for the U.S. Supreme Court case *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)*—establishes that "the Reliant Defendants that participated in price-fixing (CES, RES, and REI) acted as a *single* enterprise, with a shared intent." *Copperweld*—like all federal antitrust precedents—is applicable to claims under *Wisconsin Statute § 133.03*. *Lyons, 405 N.W.2d at 367* (adopting and following *Copperweld* as a matter of Wisconsin law).

In *Copperweld*, the plaintiff alleged that Copperweld and its wholly owned subsidiary, Regal Tube Co. ("Regal"), conspired to prevent a former Regal employee from competing with Regal by threatening to sue prospective customers and financers of the former employee's new business. *Id. at 755-58*. A jury found that Copperweld and Regal violated *Section 1* of the Sherman Act, and the Seventh Circuit affirmed. *Id. at 758*. The Supreme Court reversed. *Id. at 777*. Rejecting "the so-called 'intra-enterprise conspiracy' **[*630]** doctrine," which permitted **[**13]** *Section 1* liability between commonly owned companies, *id. at 759*, the Court held that *HN4*[] "the coordinated activity of a parent and its wholly owned subsidiary must be viewed as that of a single enterprise for purposes of *§ 1*" because "[a] parent and its wholly owned subsidiary have a complete unity of interest," *id. at 771*. Therefore, a parent company and its wholly owned subsidiary "are incapable of conspiring with each other for purposes of *§ 1* of the Sherman Act." *Id. at 777*. As relevant here, the *Copperweld* doctrine establishes that "[w]here there is substantial common ownership, . . . individual firms function as an economic unit and are generally treated as a single entity." *Freeman v. San Diego Ass'n of Realtors, 322 F.3d 1133, 1147-48 (9th Cir. 2003)*.

The district court was correct that, for antitrust purposes, CES did not conspire with RES; under *Copperweld*, it was incapable of doing so as a matter of law. But Plaintiffs' theory of the case is that CES was part of a "single entity"—including both RES (a commonly owned company) and Old Reliant (its parent)—which "intentionally colluded with other, *non-Reliant* conspirators to manipulate natural gas prices and profit from this manipulation."[7] Therefore, they argue, the district court should have found that *as a matter of law* it was "not possible for CES **[**14]** to have a different reason than [Old Reliant] and RES for participating in these efforts."

Although the Plaintiffs' application of the principles laid out in *Copperweld* is novel, we must agree. The Supreme Court stated in *Copperweld* that a parent and its wholly owned subsidiary "*always* have a 'unity of purpose or a common design.' They share a common purpose *whether or not the parent keeps a tight rein over the subsidiary*." Copperweld, 467 U.S. at 771 (emphasis added); *see also* Freeman, 322 F.3d at 1147-48 ("Where there is substantial common ownership, . . . individual firms function as an economic unit and are generally treated as a single entity."). The Supreme Court could have hardly made this point more explicit:

> The coordinated activity of a parent and its wholly owned subsidiary *must* be viewed as that of a *single enterprise* for purposes of § 1 of the Sherman Act. A parent and its wholly owned subsidiary have a *complete unity of interest*. Their objectives are common, not disparate; their general corporate actions are guided or determined not by two separate corporate consciousnesses, but one. They are not unlike a multiple team of horses drawing a vehicle under the control of a single driver. With or without a formal "agreement," the subsidiary **[**15]** acts for the benefit of the parent, its sole shareholder.
>
> . . . [I]n reality a parent and a wholly owned subsidiary *always* have a "unity of purpose or a common design." They share a common purpose whether or not the parent keeps a tight rein over the subsidiary; the parent may assert full control at any moment if the subsidiary fails to act in the parent's best interests.

Copperweld, 467 U.S. at 771-72 (emphases added). This premise led the Supreme Court to conclude that a parent cannot conspire with its subsidiary, but it also leads inescapably to the corollary conclusion that, for antitrust purposes, it is legally impossible for firms within a single **[*631]** "economic unit" to act together in furtherance of the same price-fixing scheme for independent and distinct purposes. True, *Copperweld* decided only that a parent and its wholly owned subsidiary could not conspire with each other for purposes of Section 1 of the Sherman Act, but ***HN5***[] "[a]s a general rule, the principle of *stare decisis* directs us to adhere not only to the holdings of our prior cases, but also to their explications of the governing rules of law." Miller v. Gammie, 335 F.3d 889, 900 (9th Cir. 2003) (quoting Cty. of Allegheny v. ACLU Greater Pittsburgh Chapter, 492 U.S. 573, 668, 109 S. Ct. 3086, 106 L. Ed. 2d 472 (1989) (Kennedy, J., concurring in part and dissenting in part)). From the Supreme Court's "explications" in *Copperweld* ***[**16]*** , the corollary proposed by Plaintiffs necessarily follows: If "a parent and a wholly owned subsidiary *always* have a 'unity of purpose'" and act as a "single enterprise" whenever they engage in "coordinated activity," then a subsidiary such as CES as a matter of law *cannot* innocently advance an anticompetitive scheme (here, by selling gas at prices rigged by Reliant and distributing the profits to Reliant) for a legitimate business purpose, while its parent and sister companies purposely advance the very same scheme (here, by rigging the prices upstream) for an illegal, anticompetitive purpose.

The Tenth Circuit, so far the only Court of Appeals squarely to consider such an application of *Copperweld*, recently reached the same conclusion in Lenox MacLaren Surgical Corp. v. Medtronic, Inc., 847 F.3d 1221 (10th Cir. 2017). There, the district court had granted summary judgment to the defendant on claims under Section 2 of the Sherman Act.[8] Id. at 1229-30. The plaintiff in *Lenox* argued that "its burden of establishing any individual defendant's liability

---

[7] For purposes of summary judgment, CES does not contest the substance of the evidence that Reliant successfully conspired with the other (non-Reliant) defendants and co-conspirators to manipulate retail gas prices.

[8] *Lenox* dealt with a claim under Section 2 of the Sherman Act. 847 F.3d at 1229. Section 2 provides that "[e]very person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations, shall be deemed guilty of a felony." 15 U.S.C. § 2.

required showing only that the defendant's conduct played a 'role' in the overall anticompetitive scheme perpetrated by the enterprise as a whole." *Id. at 1230*. The Tenth Circuit panel agreed. It held that, under *Copperweld*, the plaintiff did not need to prove that **[**17]** "'*specific* Defendants' independently satisfied each necessary element of the claims," because "in a single-enterprise situation, it is the affiliated corporations' collective conduct—*i.e.*, the conduct of the *enterprise* they jointly compose—that matters; it is the *enterprise* which must be shown to satisfy the elements of a *[Section 2*] claim." *Id. at 1236* (emphasis in original). Therefore, the Tenth Circuit panel concluded that the plaintiff "advanced a viable, if somewhat unusual, antitrust theory." *Id. at 1230*. Ultimately, the court granted summary judgment to the defendants on the basis of claim preclusion. *Id. at 1239*. One of the companies in the "single entity" identified by the court had previously won a final judgment on the merits on claims based on the same underlying events. *See id. at 1239-40*. Applying the plaintiffs' *Copperweld* theory, claims against other defendants in the "single entity" were thus precluded. *Id. at 1239*.

Defendants cannot have the *Copperweld* doctrine both ways. It would be inconsistent to insist both (1) that two affiliates are incapable of conspiring with each other for purposes of *Section 1* of the Sherman Act because they "always" share **[*632]** a "unity of purpose," and (2) that one affiliate may escape liability for its **[**18]** own conduct—conduct necessary to accomplish the illegal goals of the scheme—by disavowing the anticompetitive intent of the other, even where the two acted together. *See id. at 1236* (finding that *Copperweld* "forecloses" a result that would allow sophisticated companies to evade *Section 2* liability by spreading anticompetitive schemes over multiple affiliates). In sum, *Copperweld* supports the following rule: ***HN6***[] A wholly owned subsidiary that engages in coordinated activity in furtherance of the anticompetitive scheme of its parent and/or commonly owned affiliates is deemed to engage in such coordinated activity with the purposes of the single "economic unit" of which it is a part.

Here, Plaintiffs submitted evidence that the Reliant "economic unit" had an anticompetitive purpose during the Class Period. Such anticompetitive "purpose" can sustain liability under the Sherman Act with or without an additional finding of "knowledge," *Bailey, 444 U.S. at 404-05*; *United States v. U.S. Gypsum Co., 438 U.S. 422, 446, 98 S. Ct. 2864, 57 L. Ed. 2d 854 (1978)* (stating that requiring proof of both knowledge and purpose for liability under *Section 1* of the Sherman Act would be "unnecessarily cumulative"). Therefore, because the Reliant enterprise's alleged illegal purposes are imputed to CES's coordinated activities, the district court erred in **[**19]** granting summary judgment on the basis that Plaintiffs failed to raise a triable issue of CES's intent.

2. Knowledge

Furthermore, Plaintiffs' evidence was sufficient to raise a triable issue of whether CES knowingly acted to further the alleged price-fixing scheme. Plaintiffs submitted evidence of substantial overlap, during the Class Period, between the directors and officers of CES, on one hand, and the directors and officers of Old Reliant, RES, and other commonly owned Reliant entities. For example, it is undisputed that (1) Marc Kilbride was the Treasurer for CES from 2000 to 2002, and also the Treasurer for RES in 2000 and for RERC from 2000 to 2003, (2) David M. McClanahan served as the Chairman of CES's board of directors in 2002, after having served as the President and sole director of RERC from 2001 to 2002, and (3) Hugh Rice Kelly was the Corporate Secretary for CES in 2000, General Counsel and Corporate Secretary to Old Reliant from 2000 to 2001, and then the Corporate Secretary for RES in 2002. Plaintiffs' evidence shows a network of fast-revolving doors connecting the boardrooms and executive offices of CES and the other Reliant companies.

Any knowledge of the alleged price-fixing **[**20]** scheme that CES's directors and officers acquired while concurrently acting as directors or officers of the other Reliant companies is imputable to CES as a matter of Wisconsin law. *Suburban Motors of Grafton, Inc. v. Forester, 134 Wis. 2d 183, 396 N.W.2d 351, 355 (Wis. Ct. App. 1986)* (***HN7***[]) "The general rule is well established that a corporation is charged with constructive knowledge, regardless of its actual knowledge, of all material facts of which its officer or agent receives notice or acquires

However, the Tenth Circuit panel based its holding on *Copperweld*, a *Section 1* case, which it held to apply equally to *Section 2* cases. *Id. at 1234*.

knowledge while acting in the course of his employment within the scope of his authority, even though the officer or agent does not in fact communicate his knowledge to the corporation." (quoting 3 W. Fletcher, Cyclopedia of the Law of Private Corporations § 790 (rev. perm. ed. 1975) (footnotes omitted and alteration in original))). Plaintiffs submitted evidence that Reliant traders engaged in manipulative trade practices at the direction of Reliant management. **[*633]** Plaintiffs also submitted evidence that such manipulative practices were a matter of common knowledge within Reliant. Drawing all rational inferences in favor of Plaintiffs, these facts permit a reasonable finding that CES's directors or officers acquired knowledge of Reliant's manipulative trading practices while concurrently serving as directors **[**21]** or officers of other Reliant companies. *T.W. Elec., 809 F.2d at 631* (holding that "[i]nferences must . . . be drawn in the light most favorable to the nonmoving party" so long as "it is 'rational' or 'reasonable' and otherwise permissible under the governing substantive law"). Because such knowledge would be imputed to CES as a matter of Wisconsin law, Plaintiffs raised a genuine issue of material fact as to CES's knowledge of the alleged price-fixing scheme.

B. Anticompetitive Acts

We next consider whether there was a genuine issue of material fact as to whether CES acted to further the alleged price-fixing conspiracy. As Plaintiffs admit, *Copperweld* speaks only of a "unity of *purpose*," *467 U.S. at 771* (emphasis added). It does not supply a theory of unbounded vicarious liability for the *acts* of legally distinct entities. Rather, *Copperweld* states that commonly-owned-but-legally-distinct entities are considered a "single entity" for antitrust purposes where they engage in "coordinated activity."[9] *See 467 U.S. at 771* ("The *coordinated activity* of a parent and its wholly owned subsidiary must be viewed as that of a single enterprise for purposes of *§ 1* of the Sherman Act." (emphasis added)). Thus, a subsidiary shares the purposes and intentions **[**22]** of the parent when it acts in coordination with the parent, but *Copperweld* does not support holding a subsidiary liable for the parent's independent conduct. *See Lenox, 847 F.3d at 1237* ("[A]lthough we agree that [the plaintiff] was entitled to pursue its *§ 2* claims against Defendants as a single enterprise, and to prove those claims based on the actions of the enterprise as a whole, [the plaintiff] was still required to come forward with evidence that each defendant independently participated in the enterprise's scheme, to justify holding that defendant liable as part of the enterprise."). As with any antitrust defendant, Plaintiffs must put forth evidence that CES engaged in anticompetitive conduct.[10]

[*634] ***HN8***[] To be liable on a *Section 1* claim, a defendant must have conspired (or agreed or combined, etc.) to restrain trade. "It is not necessary to find an express agreement, either oral or written, in order to find a conspiracy, but it is sufficient that a concert of action be contemplated and that defendants conform to the arrangement." *Esco Corp. v. United States, 340 F.2d 1000, 1008 (9th Cir. 1965)*. "[A]ny conformance **[**23]** to an

---

[9] This distinction provides a bright-line limit on an antitrust plaintiff's recovery from a particular defendant. While a "veil-piercing, alter ego, or *respondeat superior* theory" might render a defendant separately and individually liable for any conduct of its corporate affiliates, Plaintiffs' theory seeks to hold CES liable only for its own alleged anticompetitive acts. *See Lenox, 847 F.3d at 1237*. Therefore, any recovery from an affiliate under Plaintiffs' *Copperweld* corollary would be limited to damages caused by anticompetitive conduct attributable to that affiliate.

[10] The cases cited by CES merely apply this distinction, and thus they are not contrary to Plaintiffs' "single entity" theory. *See In re Ins. Brokerage Antitrust Litig., 618 F.3d 300, 341 n.44 (3d Cir. 2010)* (noting the defendant subsidiaries were not alleged to have actually participated in the alleged bid-rigging scheme); *Mitchael v. Intracorp, Inc., 179 F.3d 847, 857 (10th Cir. 1999)* (rejecting "single enterprise" theory "[i]n the absence of any specific evidence of coordinated activity" and distinguished on this basis in *Lenox, 847 F.3d at 1234*); *Acuity Optical Labs., LLC v. Davis Vision, Inc., No. 14-cv-03231, 2016 U.S. Dist. LEXIS 112423, 2016 WL 4467883, at *9 (C.D. Ill. Aug. 23, 2016)* (finding no "actual evidence" of "coordinated activity"); *Vollrath Co. v. Sammi Corp., No. CV 85-820 MRP, 1989 U.S. Dist. LEXIS 16902, 1989 WL 201632, at *20-21 (C.D. Cal. Dec. 20, 1989)* (finding no evidence of an *inter*-enterprise conspiracy and thus no actionable conspiracy under *Copperweld*); *cf. Am. Needle, Inc. v. Nat'l Football League, 560 U.S. 183, 195-96, 130 S. Ct. 2201, 176 L. Ed. 2d 947 (2010)* (holding that *separately owned* NFL teams were not a "single entity" under *Copperweld*). Cases addressing veil-piercing, alter-ego, and *respondeat-superior* theories are likewise inapposite.

agreed or contemplated pattern of conduct will warrant an inference of conspiracy." *Id.* Therefore, CES's alleged contributions to the conspiracy (selling gas to Wisconsin consumers at the inflated prices and disbursing the profits to Reliant), would be adequate circumstantial evidence of conspiracy, if proved, to permit a finding of liability.

This conclusion comports with ordinary conspiracy principles. "While particularly true of price-fixing conspiracies, it is well recognized law that any conspiracy can ordinarily only be proved by inferences drawn from relevant and competent circumstantial evidence, including the conduct of the defendants charged." *Id. at 1007*. Thus, even in the criminal context, the government "need show neither direct contact nor explicit agreement among all of the alleged conspirators." *United States v. Reese, 775 F.2d 1066, 1071 (9th Cir. 1985)*. Nor must the government show "that each defendant or all defendants must have participated in each act or transaction." *Esco, 340 F.2d at 1006*. Involvement "in but two of ten allegedly conspirational [sic] situations does not absolve [a defendant] from participation in the entire conspiracy if its involvement in the two was unlawful and knowingly and purposely performed." *Id. at 1008*. Nor can a single defendant **[**24]** "join a continuing conspiracy long after others have commenced it, or partially carried it out, and thereby claim immunity either for his actions, or for those of others taking place before or after his active participation, *as long as he remains an active participant*." *Id. at 1006* (emphasis added and citation omitted). In sum, CES may be held liable for its own acts in purposeful and knowing furtherance of the alleged inter-enterprise price-fixing conspiracy, if proven.

The remaining question is whether Plaintiffs submitted sufficient evidence to raise a genuine issue as to whether CES in fact participated in coordinated activity in furtherance of the alleged inter-enterprise price-fixing conspiracy.[11] Plaintiffs submitted evidence that, during the Class Period, CES sold gas at rigged prices and then distributed the proceeds up to its parent's coffers. CES does not deny that it sold gas it purchased from RES to consumers in Wisconsin.[12] Plaintiffs also submitted evidence that the profits from CES's natural gas sales "rolled up" to Reliant and its shareholders, and that Reliant would report those distributions as revenues in its consolidated financial reports.

This evidence suffices to create a triable issue of liability under the Sherman Act, and thus it suffices under *Wisconsin Statute § 133.03(1)* as well. Crediting Plaintiffs' evidence, CES's role was essential to **[*635]** securing the benefit of the other Reliant defendants' price-fixing (at least in Wisconsin), and CES's acts were the immediate cause of Plaintiffs' injuries. *T.W. Elec., 809 F.2d at 631* ("If the nonmoving party produces direct evidence of a material fact, the court may not assess the credibility of this evidence nor weigh against it any conflicting evidence presented by the moving party."). In selling gas at rigged prices and distributing the inflated profits to its parent, CES helped to carry out the inter-enterprise conspiracy with the other gas companies (just as Reliant allegedly carried out the conspiracy by reporting sham sales to the trade publications). CES's role was not only helpful to the conspirators, it was crucial: Until CES sold the gas to consumers, the rigged and inflated prices were not passed on to buyers *outside* of the Reliant economic unit and there was no gain to the Reliant enterprise. *Cf.* *United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 253, 60 S. Ct. 811, 84 L. Ed. 1129 (1940)* (noting that an alleged antitrust conspiracy "would fail" if the conspirators could not charge higher prices to **[**26]** the "jobbers and consumers"). "[T]he conspiracy contemplated and embraced, at least by clear implication, sales to . . . consumers . . . at the enhanced prices. The making of those sales supplied part of the 'continuous cooperation' necessary to keep the conspiracy alive." *Id.*

CES argues that "sales to Wisconsin customers were unnecessary for RES to profit from the alleged conspiracy" because "RES would accrue any purported benefit of increased prices once RES's sale occurred—whether to CES or any other customer." But this argument ignores *Copperweld*'s instruction to treat RES and CES as part of a "single entity." CES's and RES's respective balance sheets may have changed when CES bought gas from RES,

---

[11] Again, for purposes of summary judgment, CES does not contest the substance of Plaintiffs' evidence that one or more Reliant companies successfully conspired with non-Reliant defendants and co-conspirators to manipulate the prices of gas sold by CES during the Class Period. *See FERC Final Report* at ES-5 (describing churning by Reliant in 2000 and 2001).

[12] The parties dispute *how much* gas CES sold in Wisconsin, *how much* money CES received for that gas, and ***[**25]*** *how much* of that gas came from RES. These are issues for the trier of fact.

but the Reliant enterprise did not benefit until Reliant gas was sold to someone outside the enterprise. Reliant could not profit by moving cash from its right pocket to its left.

CES's critical contributions to the conspiracy, if proved, would permit a rational factfinder to find that CES joined the conspiracy. Because CES is deemed to have engaged in this coordinated activity with the alleged illegal purpose of its affiliates, Plaintiffs have raised a triable issue of CES's liability **[**27]** under Wisconsin ***antitrust law***. Accordingly, the district court's grant of summary judgment is reversed. Because we reverse the district court's grant of summary judgment, we need not and do not reach Plaintiffs' challenge to that order based on *Rule 56(d)*. *See* *Longoria v. Pinal Cty., 873 F.3d 699, 711 (9th Cir. 2017)*.

REVERSED and **REMANDED**. Appellee's motion to supplement the record on appeal, filed April 24, 2017, is **DENIED**.

HN1[] **Regulated Industries, Sports**

The appellate court reviews de novo the district court's grant of a motion to dismiss. The appellate court also reviews de novo the district court's determinations of immunity from antitrust liability.

Antitrust & Trade Law > Regulated Industries > Sports

HN2[] **Regulated Industries, Sports**

Implied antitrust immunity is not favored, and can be justified only by a convincing showing of clear repugnancy between the antitrust laws and the regulatory system.

Antitrust & Trade Law > Regulated Industries > Sports

HN3[] **Regulated Industries, Sports**

Under the *Amateur Sports Act* (ASA), the respective national governing body is authorized to organize, finance, and control the representation of the United States in the competitions and events of the Olympic Games, the Paralympic Games, and the Pan-American Games, and obtain, directly or by delegation to the appropriate national governing body, amateur representation for those games, *36 U.S.C.S. § 220505(c)(3)*. The ASA broadly grants national governing bodies exclusive rights in the name United States Olympic Committee, the symbol of the International Olympic Committee, the emblem of the corporation, as well as the words Olympic, Olympiad, Citius Altius Fortius, Paralympic, Paralympiad, Pan-American, America Espirito Sport Fraternite, or any combination of those words, *36 U.S.C.S. § 220506(a)*. In light of the broad authority bestowed upon national governing bodies to fund the Olympic Mission, the challenged advertising and logo restrictions precluding advertisers from impinging on this delegated authority falls within the mission to protect the value of corporate sponsorships and maximize sanctioned fundraising. To compel the Olympic Committee and USATF under the antitrust laws to permit any would-be advertiser to sponsor individual athletes without national governing body approval would unduly interfere with the operation of the ASA.

Antitrust & Trade Law > Regulated Industries > Sports

HN4[] **Regulated Industries, Sports**

Although *36 U.S.C.S. § 220505(c)(3)* does not explicitly bestow antitrust immunity, the *Amateur Sports Act* establishes funding for the Olympic mission as a central responsibility of the Olympic Committee and its national governing bodies.

Antitrust & Trade Law > Regulated Industries > Sports

HN5[] **Regulated Industries, Sports**

The *Amateur Sports Act* was enacted to correct the disorganization and the serious factional disputes that seemed to plague amateur sports in the United States. It was the intent of Congress that the Olympic Committee be provided with the means to raise money to support the Olympics, including the commercial and promotional value derived from the panache associated with the Olympics.

Summary:

SUMMARY[**]

Antitrust

[**] This summary constitutes no part of the opinion of the court. It has been prepared by court staff for the convenience of the reader.

The panel affirmed the district court's dismissal of a complaint alleging that USA Track & Field and the United States Olympics Committee engaged in an anticompetitive conspiracy in violation of ***antitrust law*** by imposing advertising restrictions during the Olympic Trials for track and field athletes.

Following the analysis of the Tenth and Eleventh Circuits, and distinguishing a decision of the Fifth Circuit, the panel held that the Olympics Committee and USATF were entitled to implied antitrust immunity on the basis that their advertising restrictions were integral to performance of their duties under the *Ted Stevens Olympic and Amateur Sports Act*.

Concurring in the result, Judge Nguyen disagreed with the majority's conclusion that the defendants were immune from the antitrust claim alleged in the complaint. Judge Nguyen wrote that the complaint nevertheless failed to state a claim under *§ 1* of the *Sherman Act* because, even if the plaintiff could allege a plausible conspiracy and a viable product market, it did not allege **[**2]** that the defendants received any economic benefit.

Counsel: Sathya S. Gosselin (argued), Swathi Bojedla, and Michael D. Hausfeld, Hausfeld LLP, Washington, D.C.; Timothy P. Landis, Timothy Landis P.C., Portland, Oregon; for Plaintiff-Appellant.

Derek Ludwin (argued) and Philip J. Levitz, Covington & Burling LLP, Washington, D.C.; Bruce L. Campbell, Miller Nash Graham & Dunn LLP, Portland, Oregon; Douglas N. Masters and Emily Stone, Loeb & Loeb LLP, Chicago, Illinois; Nathan J. Muyskens, Loeb & Loeb LLP, Washington, D.C.; Robert E. Sabido, Cosgrave Vergeer Kester LLP, Portland, Oregon; for Defendants-Appellees.

Judges: Before: Kim McLane Wardlaw[*], Johnnie B. Rawlinson, and Jacqueline H. Nguyen, Circuit Judges. Opinion by Judge Rawlinson; Concurrence by Judge Nguyen.

Opinion by: RAWLINSON

Opinion

[*713] RAWLINSON, Circuit Judge:

Appellant Gold Medal LLC d/b/a Run Gum (Run Gum) appeals the district court's order dismissing its complaint. Run Gum alleged that Appellees USA Track & Field (USATF) and the United States Olympic Committee (Olympic Committee) engaged in an anticompetitive conspiracy in violation of ***antitrust law*** by imposing advertising restrictions during the Olympic Trials for track and field athletes. According to Run Gum, **[**3]** the district court erroneously determined that the Olympic Committee and USATF should be afforded implied antitrust immunity on the basis that their advertising restrictions were integral to performance of their duties under the *Ted Stevens Olympic and Amateur Sports Act* (ASA). *See* *JES Props., Inc. v. USA Equestrian, Inc., 458 F.3d 1224, 1226* (describing the ASA) (Alarcon, C.J., authoring judge). Reviewing *de novo*, we affirm the judgment of the district court.

I. BACKGROUND

This appeal involves the statutory framework devised by Congress in support of the mission of national sports governing bodies to promote and finance the participation of American athletes in "international amateur athletic competition." *36 U.S.C. § 220503*. Under the auspices of the ASA, the Olympic Committee exercises exclusive jurisdiction over "all matters pertaining to United States participation in the Olympic Games, the Paralympic Games, and the Pan-American Games, including representation of the United States in the games," and "the organization of

---

[*] Judge Kim McLane Wardlaw was drawn to replace Judge Marvin Garbis, who retired after oral argument but before this opinion was published. Judge Wardlaw has read the briefs, reviewed the record, and listened to oral argument.

the Olympic Games, the Paralympic Games, and the Pan-American Games when held in the United States." *Id.* at *§ 220503(3)*. With respect to amateur athletics, the Olympic Committee may "organize, finance, and control the representation of the United States **[**4]** in the competitions and events of the Olympic Games, the Paralympic Games, and the Pan-American Games." *Id.* at *§ 220505(c)(3)*. The Olympic Committee may also "obtain, directly or by delegation to the appropriate national governing body, amateur representation for those games." *Id.*

In its complaint, Run Gum, a manufacturer of "compressed functional chewing gum" containing "a proprietary mix of caffeine, taurine, and b vitamins," averred that USATF, as the national governing body for the sport of track and field, "organizes and hosts the Olympic Trials, where the greatest track [and] field athletes in the United States compete to earn a position on the U.S. Olympic team." Run Gum asserted that "[g]iven the unique nature and infrequency of the Olympic Trials, the public interest is overwhelming," with "[i]n-person attendance typically exceed[ing] 20,000."

Run Gum alleged that, despite its interest in sponsoring athletes during the Olympic Trials, it was precluded from doing so due to logo and sponsorship restrictions imposed by the Olympic Committee **[*714]** and enforced by USATF. According to Run Gum, USATF "severely restrict[s] the type of *individual* sponsors that track [and] field athletes can display on their **[**5]** athletic apparel at the Olympic Trials, including their competition kit, which greatly diminishes sponsorship opportunities for the athletes and excludes various would-be sponsors." (internal quotation marks omitted) (emphasis in the original). Run Gum complained that USATF's advertising restrictions provide that "with the exception of standard manufacturers' equipment identification . . . the equipment, uniforms, and the bibs/numbers of the competitors and officials at the Trials may not bear any commercial identification or promotional material of any kind (whether commercial or noncommercial)." (alteration and footnote reference omitted). Run Gum asserted that the USATF regulation nonetheless allows athletes to wear apparel containing the logo and names of certain preapproved manufacturers, such as Nike.

Run Gum maintained that use of pre-approved manufacturers "exclude[d] scores of sponsors from the marketplace" in violation of *Section 1* of the Sherman Act. Run Gum posed a single cause of action premised on violations of the antitrust laws stemming from the challenged advertising restrictions. Run Gum contended that the regulation limiting sponsorships of athletes during the Olympic Trials **[**6]** was "an anticompetitive horizontal and vertical agreement among competitors to fix artificially—and unlawfully—the number of individual sponsors and the price paid to athletes for individual sponsorship." Run Gum further alleged that the advertising and logo restriction was "an unlawful group boycott of individual sponsors that do not manufacturer [sic] apparel or equipment, which are categorically excluded from sponsoring athletes at the Olympic Trials." In addition to damages, Run Gum sought to enjoin the Olympic Committee and USATF from "preventing Run Gum from sponsoring individual athletes at the 2016 Olympic Trials in exchange for sponsor identification on clothing at the Olympic Trials."

In a published opinion, the district court dismissed Run Gum's action based on implied antitrust immunity under the ASA. *See* *Gold Medal LLC v. USA Track & Field, 187 F. Supp. 3d 1219, 1222 (D. Or. 2016)*. While acknowledging that grants of implied antitrust immunity are generally disfavored, the district court nevertheless concluded that the advertising restrictions enabled the Olympic Committee and USATF to perform their statutory obligations under the ASA. *See* *id. at 1228-30*. The district court emphasized that "[a]s the only nation that does not provide its Olympic team with federal **[**7]** funding or subsidies, the United States instead relies on the [Olympic Committee] to raise the financial resources necessary to organize Team USA and to compete in the Olympic Games." *Id. at 1228* (citation omitted). According to the district court, the advertising restrictions "prevent a dilution of the Olympic brand," and "permit the [Olympic Committee] and USATF to play a gatekeeping function which preserves the exclusivity-and thus value-of the Olympic symbols and name." *Id. at 1230*. Due to the importance of the advertising restrictions in advancing the Olympic mission, the district court held that the Olympic Committee and USATF should be afforded implied antitrust immunity in enforcing the restrictions that were necessary to fulfillment of their statutory duties under the ASA. *See* *id. at 1230-31*.

Run Gum filed a timely notice of appeal.

II. STANDARDS OF REVIEW

HN1[] "We review de novo the district court's grant of a motion to dismiss." *Elmakhzoumi* ***[*715]*** *v. Sessions, 883 F.3d 1170, 1172 (9th Cir. 2018)* (citation omitted).

"We [also] review *de novo* . . . the district court's determinations of immunity from antitrust liability." *United Nat'l Maintenance, Inc. v. San Diego Convention Ctr., Inc., 766 F.3d 1002, 1006 (9th Cir. 2014)* (citation omitted).

III. DISCUSSION

HN2[] We have recognized that "implied antitrust immunity is not favored, and can be justified only by a convincing showing of clear repugnancy **[**8]** between the antitrust laws and the regulatory system." *Total TV v. Palmer Commc'ns, Inc., 69 F.3d 298, 302 n.6 (9th Cir. 1995)* (citation and alteration omitted). Although we have not directly addressed implied antitrust immunity under the ASA, other circuit courts have found the requisite "clear repugnancy" between the ASA and antitrust laws. *Id.*

In *JES Props., Inc. v. USA Equestrian, Inc., 458 F.3d 1224 (11th Cir. 2006)*, the Eleventh Circuit addressed a rule developed by the United States Equestrian Foundation (Equestrian Foundation) that imposed a mileage distance for equestrian competitions. *See id. at 1226-27*. The mileage rule generally required that any A-rated equestrian competitions on the same date be held a minimum of 250 miles apart. The Eleventh Circuit discerned the following two purposes for the rule: 1) "to concentrate elite riders into fewer competitions in order to yield the most competitive international equestrian team possible," and 2) "to promote equestrianism nationwide by forcing promoters to hold recognized competitions in more diverse locations." *Id. at 1227*. The Eleventh Circuit reasoned that, due to "the monolithic control" exercised by national governing bodies, "the question . . . is whether the application of the antitrust laws to the facts of this case would unduly interfere with the operation of the ASA." *Id. at 1231-32* (citation and internal **[**9]** quotation marks omitted). The Eleventh Circuit explained that it would "not substitute its own judgment for that of the [Equestrian Foundation] regarding the optimum way to fulfill its obligations," and concluded that "implied immunity [was] called for in [the] case." *Id. at 1232*. In reaching this conclusion, the Eleventh Circuit emphasized that, contrary to the plaintiffs' assertions, it was not required to "focus on whether the rule is an effective or wise way of implementing [the Equestrian Foundation's] powers," *id. at 1231*, or to "consider whether the *particular* eligibility rule was necessary or otherwise examine the wisdom of the rule." *Id. at 1232* (emphasis in the original).

The Eleventh Circuit held that "[b]ecause the ASA requires [a national governing body] to promulgate rules to minimize conflicts in schedules, the imposition of antitrust liability for the promulgation of such a rule is plainly repugnant to the ASA." *Id.* (alteration and internal quotation marks omitted). The Eleventh Circuit relied heavily on the Tenth Circuit's approach in *Behagen v. Amateur Basketball Ass'n of the United States, 884 F.2d 524 (10th Cir. 1989)*. *See JES Props., 458 F.3d at 1231-32*. In *Behagen*, the Tenth Circuit reversed a jury verdict in favor of a basketball player who challenged under the antitrust laws an eligibility rule developed by **[**10]** the national governing body for amateur basketball that prohibited a player from participating in amateur events if the player had participated in professional games. *See Behagen, 884 F.2d at 526-27*. The Tenth Circuit held that the antitrust issue should not have gone to the jury because the eligibility rule was exempt from the antitrust laws under the ASA. *See id. at 527*. The Tenth Circuit emphasized that "Behagen complains of exactly that action which the [ASA] directs— **[*716]** the monolithic control of an amateur sport by the [national governing body] for that sport." *Id. at 529*. The Tenth Circuit clarified that "the [Amateur Basketball Association of the United States of America] could not be authorized under the [ASA] unless it maintained exactly that degree of control over its sport that Behagen here alleges as an antitrust violation." *Id.* The Tenth Circuit emphasized that "[a]lthough [a national governing body] is a private actor, the monolithic control exerted by [a national governing body] over its amateur sport is a direct result of the congressional intent expressed in the *Amateur Sports Act*." *Id. at 528* (footnote reference omitted).

We are persuaded that we should follow the analysis reflected in the decisions of our sister circuits applying **[**11]** implied antitrust immunity under the ASA. We are not persuaded that the Fifth Circuit's decision in *Eleven Line, Inc. v. N. Tex. State Soccer Ass'n, Inc., 213 F.3d 198 (5th Cir. 2000)*, mandates a reversal in this case. In *Eleven Line*, the Fifth Circuit held that the exclusionary activities of nonprofit, volunteer-run soccer organizations should not be afforded implied antitrust immunity. *See id. at 199, 204-05*. The non-profit organization in that case promulgated and implemented a rule requiring soccer players, coaches, and referees to conduct soccer games only at "sanctioned" facilities, which did not include Eleven Line's for-profit soccer facility. *Id. at 199*. Notably, the national governing body for youth soccer did not issue the challenged rule or explicitly approve it. *See id. at 204* & n.1. For these reasons, *Eleven Line* is distinguishable from the present appeal, as well as from *JES Properties* and *Behagen*, because it involved a rule that was not sanctioned or approved by a national governing body, and the organization imposing the rule was the "only national state association to have such a rule." *Id.*

The Fifth Circuit recognized the propriety of applying implied antitrust immunity under the ASA when the rule, like the advertising and logo restriction before us in this case, is either developed **[**12]** or approved by a national governing body:

> Although the facts of this case do not support an implied exemption from the antitrust laws, an implied exemption would be appropriate in many other situations. For example, if national state associations all over the country had a similar rule, one could infer that the rule was necessary to the management of the sport. . . . If [the national governing body] had promulgated the rule or expressly approved [the] rule in such a way as to indicate an awareness of its consequences, it would be a player eligibility rule exempted under *Behagen*. . . . Any of these circumstances, and no doubt others not described here, would merit an implied exemption.

Id. at 204-05.

The Fifth Circuit expressed its belief that "*Behagen* was correctly decided," but recognized that *Behagen* did not cover the facts of *Eleven Line. Id. at 204*. Ultimately, in *Eleven Line*, the Fifth Circuit concluded that implied antitrust immunity was unavailable because the non-profit soccer organization "promulgated a rule that could be found nowhere else in the country, that was not explicitly approved by the [the national governing body], and for which it was unable to articulate a convincing rationale related to its management **[**13]** of amateur soccer in the area." *Id. at 205*.

We conclude that the decisions of the Tenth and Eleventh Circuits provide a sound basis for affirming the district court's application of implied antitrust immunity to the advertising and logo restrictions enforced by the USATF. ***HN3***[] Under the ASA, the respective national governing **[*717]** body is authorized to "organize, finance, and control the representation of the United States in the competitions and events of the Olympic Games, the Paralympic Games, and the Pan-American Games, and obtain, directly or by delegation to the appropriate national governing body, amateur representation for those games." *36 U.S.C. § 220505(c)(3)*. The ASA broadly grants national governing bodies exclusive rights in "the name United States Olympic Committee," "the symbol of the International Olympic Committee," "the emblem of the corporation," as well as "the words Olympic, Olympiad, Citius Altius Fortius, Paralympic, Paralympiad, Pan-American, America Espirito Sport Fraternite, or any combination of those words." *36 U.S.C. § 220506(a)* (internal quotation marks omitted). In light of the broad authority bestowed upon national governing bodies to fund the Olympic Mission, the challenged advertising and logo restrictions precluding **[**14]** advertisers from impinging on this delegated authority falls within the mission to protect the value of corporate sponsorships and maximize sanctioned fundraising. To compel the Olympic Committee and USATF under the antitrust laws to permit any would-be advertiser to sponsor individual athletes without national governing body approval "would unduly interfere with the operation of the ASA." *JES Props., 458 F.3d at 1231-32* (citation and internal quotation marks omitted). ***HN4***[] Although the statute does not explicitly bestow antitrust immunity, the ASA establishes funding for the Olympic mission as a central responsibility of the Olympic Committee and its national governing bodies. *See San Francisco Arts & Athletics, Inc. v. U.S. Olympic Comm., 483 U.S. 522, 538-39, 107 S. Ct. 2971, 97 L. Ed. 2d 427 (1987)* (recognizing that exclusive rights in the term "Olympics" "directly advances . . . governmental interests by supplying the [Olympic Committee] with the means to raise money to support the Olympics and encourages the [Olympic Committee's] activities by ensuring that it will receive the benefits of its efforts"); *see also Behagen, 884 F.2d at 529* ("Although the *Amateur Sports Act* does not contain an explicit statement exempting action taken under its direction from the federal antitrust laws, we find that the directives of the Act make the intent of Congress sufficiently **[**15]** clear. . . .") (citation and footnote reference omitted).

The analysis of our sister circuits that we now adopt is consistent with the express purpose of the ASA. As noted by the United States Supreme Court, ***HN5***[] the ASA was "enacted to correct the disorganization and the serious factional disputes that seemed to plague amateur sports in the United States." *San Francisco Arts & Athletics, 483 U.S. at 544* (quoting H.R. Rep. No. 95-1627, p. 9, U.S. Code Cong. & Admin. News 1978 p. 7482). As discussed, the Supreme Court has clarified that it was the intent of Congress that the Olympic Committee be provided "with the means to raise money to support the Olympics," including the "commercial and promotional value derived from the panache associated with the Olympics." *Id. at 532-33*. Similarly to the plaintiff in *Behagen*, Run Gum "complains of exactly that action which the [ASA] directs—the monolithic control of an amateur sport by the [national governing body] for that sport," *Behagen, 884 F.2d at 529*, as a "direct result of the congressional intent expressed in the [ASA]." *Id. at 528* (footnote reference omitted).

Finally, Run Gum contends that the district court engaged in improper fact-finding that the advertising and logo restrictions prevented dilution of the Olympic brand. Run Gum specifically **[**16]** maintains that the district court's factual findings contradicted its allegations that must be **[*718]** taken as true at the dismissal stage. However, the district court's analysis was not premised on any improper factual findings, as the district court merely made the obvious and common-sense observation that elimination of the advertising restrictions would dilute the Olympic brand. *See San Francisco Arts & Athletics, 483 U.S. at 532-33*; *see also Gold Medal, 187 F. Supp. 3d at 1230* (noting that Run Gum sought "to capitalize on the unique nature of the Olympic Brand" and that the national governing body sought to "prevent a dilution of the Olympic Brand").[1]

IV. CONCLUSION

Consistent with the purpose of the ASA, and the analytical framework reflected in *Behagen* and *JES Properties*, we conclude that the advertising and logo restrictions applied by the Olympic Committee and USATF to sponsorship of individual athletes during the Olympic Trials should be afforded implied antitrust immunity under the ASA. The district court properly applied implied antitrust immunity under the ASA in dismissing Run Gum's complaint based on the "convincing showing of clear repugnancy between the antitrust laws" and the provisions of the ASA to advance the Olympic Committee's mission to fund and administer **[**17]** Olympic events. *Total TV, 69 F.3d at 302 n.6* (citation omitted). As the district court observed, an injunction preventing enforcement of the advertisement regulation "would open the floodgates" to potential advertisers, some of which might enhance the Olympic brand and some of which might devalue the Olympic brand. *See Gold Medal LLC, 187 F. Supp. 3d at 1230*. The regulation avoids placing the Olympic Committee in the unenviable position of having to face this conundrum in fulfilling its mission to finance American Olympic athletes. We thus view the regulation as protected from antitrust challenge. *See Behagen, 884 F.2d at 529* (connecting implied antitrust immunity with Congressional intent for the ASA). As made evident by the *Eleven Line* decision, application of implied antitrust immunity is not limitless. However, we are persuaded that the facts of this case fall comfortably within the framework contemplated by Congress when it enacted the ASA. *See San Francisco Arts & Athletics, 483 U.S. at 538-39* (discussing Congressional intent to supply the Olympic Committee with "the means to raise money to support the Olympics" and "ensuring that the [Olympic Committee] will receive the benefit of its efforts").

AFFIRMED.

Concur

---

[1] Because we conclude that the Olympic Committee and USATF should be afforded implied antitrust immunity, we do not reach the alternative argument raised by the Olympic Committee and USATF that Run Gum failed to sufficiently allege the requisite relevant market for antitrust injury.

NGUYEN, Circuit Judge, concurring in the result:

Respectfully, I disagree with the majority's **[**18]** conclusion that defendants are immune from the antitrust claim alleged in the complaint. As the majority correctly recognizes, "[i]mplied antitrust immunity is not favored, and can be justified only by a convincing showing of clear repugnancy between the antitrust laws and the regulatory system." *United States v. Nat'l Ass'n of Sec. Dealers, Inc., 422 U.S. 694, 719, 95 S. Ct. 2427, 45 L. Ed. 2d 486 (1975)*. We therefore don't analyze conflict between antitrust and other laws at a high level of generality. *See Silver v. N.Y. Stock Exch., 373 U.S. 341, 357, 83 S. Ct. 1246, 10 L. Ed. 2d 389 (1963)* (rejecting approach in which an organization's "general power to **[*719]** adopt rules" renders "particular applications of such rules . . . outside the purview of the antitrust laws."). "[T]he proper approach . . . is an analysis which reconciles the operation of both statutory schemes with one another rather than holding one completely ousted." *Id. at 357*.

The antitrust claim here involves a narrow exception allowing athletes to wear apparel with the manufacturer's logo notwithstanding a general rule prohibiting sponsorship and advertising on their clothes. The purpose of this exception, according to defendants, is "to permit athletes to purchase and wear store-bought apparel they preferred and could afford." It has nothing to do with defendants' statutory right "to exercise exclusive jurisdiction" over **[**19]** "all matters pertaining to United States participation in the Olympic Games," *36 U.S.C. § 220503(3)(A)*, to "authorize contributors and suppliers of goods or services to use" Olympic marks, *id. § 220506(b)*, or to otherwise "finance . . . the Olympic Games," *id. § 220505(c)(3)*.

While the rule banning advertising on athletic apparel may serve a revenue-raising purpose by protecting the value of the Olympic brand, it is the exception—not the rule—at issue here. Run Gum's allegations don't suggest that defendants profit from the exception.[1] But neither do they establish a viable product market. *See Hicks v. PGA Tour, Inc., No. 16-15370, 897 F.3d 1109, 2018 U.S. App. LEXIS 20905, [slip op.] at 25-30 (9th Cir. July 27, 2018)*. Therefore, while implied antitrust immunity does not apply, Run Gum nevertheless has failed to allege an antitrust claim.

Run Gum normally would be entitled to amend its pleadings, *see 2018 U.S. App. LEXIS 20905, [silip op.] at 31-32*, but here any amendment would be futile. Even if Run Gum can allege a plausible conspiracy and a viable product market, its antitrust claim is still untenable. Either defendants received no economic benefit, in which case the apparel manufacturer exception is nonactionable, *see O'Bannon v. Nat'l Collegiate Athletic Ass'n, 802 F.3d 1049, 1065-66 (9th Cir. 2015)*, or they are exercising their statutory right to finance the Olympic Games with implied immunity from suit.

Therefore, I concur in the result **[**20]** affirming the district court's dismissal of Run Gum's complaint with prejudice.

End of Document

[1] The only entities alleged to profit from the exception are the apparel manufacturers, who compete for advertising space on athletes' apparel with fewer potential rivals, thus suppressing their advertising costs. While it is possible that defendants indirectly profit from the exception by conspiring with the apparel manufacturers, Run Gum's conclusory allegations do not plausibly show this or any other conspiracy. *See Bell Atl. Corp. v. Twombly, 550 U.S. 544, 569, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN3[] Clayton Act, Claims

Section 7 of the Clayton Act requires claimants to first establish a prima facie case that a merger is anticompetitive. In practical terms, this means adequately alleging facts that an acquisition creates an appreciable danger or a reasonable probability of anticompetitive effects in the relevant market.

Summary:

SUMMARY**

Antitrust

The panel affirmed the dismissal of an action brought under § 7 of the Clayton Act by consumers and purchasers of beer, seeking to enjoin Anheuser-Busch InBev, SA/NV, from acquiring SABMiller, plc.

As a condition of approving the transaction, the U.S. Department of Justice required SABMiller to divest entirely its domestic beer business. Because the divestiture left SABMiller without a presence in the U.S. beer market, the consumers did not and could not plausibly allege that ABI's acquisition of SABMiller would substantially lessen competition in that market. The panel held that the consumers therefore failed to state a claim under the Clayton Act.

Opinion by: M. Margaret McKeown

Opinion

[*760] McKEOWN, Circuit Judge:

This case features a bevy of beer aficionados trying to undo the acquisition of one brewing behemoth by another. James DeHoog and other consumers and purchasers of beer ("Consumers") appeal the district court's dismissal of their private antitrust action to enjoin Anheuser-Busch InBev, SA/NV ("ABI") from acquiring SABMiller, plc ("SAB"). Although the merger closed in October 2016 with the blessing of antitrust authorities, Consumers' private suit persists.

Like the district court, we conclude that Consumers failed to state a claim under *Section 7* of the Clayton Act, *15 U.S.C. § 18*. As a condition of approving the transaction, the U.S. Department of Justice ("DOJ") required SAB to divest entirely its domestic beer business. Because the divestiture left SAB without a presence in the U.S. beer market, Consumers did not and could not plausibly allege that ABI's acquisition of SAB would substantially lessen competition in that market.

[*761] Background

ABI, whose brands include Budweiser, Stella Artois, and Michelob Ultra, is **[**3]** the largest producer and seller of beer in the United States, comprising roughly 46 percent of the U.S. market share. At the time of this suit, SAB was a multinational brewing company that operated in the United States exclusively through a joint venture with Molson Coors Brewing Company ("Molson").[1] The SAB/Molson joint venture, MillerCoors, LLC ("MillerCoors"), was the second-largest producer and seller of beer in the United States, controlling roughly 25 percent of the U.S. market share.[2]

In November 2015, ABI and SAB announced the terms of a $107 billion acquisition of SAB by ABI. As part of the transaction, ABI also announced a contingent agreement with Molson: upon completion of ABI's acquisition of SAB, SAB would completely divest its interest in MillerCoors. Per the terms of the agreement, Molson would acquire SAB's 50 percent voting interest and 58 percent economic interest in MillerCoors, making MillerCoors a wholly-owned subsidiary of Molson. Molson would maintain full control of the business operations and resulting economic benefits of MillerCoors. In short, ABI would acquire SAB but not before spinning off SAB's ownership in MillerCoors (i.e., SAB's U.S. interests) to Molson. **[**4]**

After reviewing the proposed transaction for its effect on competition, on July 20, 2016, the DOJ reached a settlement with ABI to allow the acquisition to move forward. ABI was required to divest SAB's entire U.S.

---

[*] The Honorable Cynthia A. Bashant, United States District Judge for the Southern District of California, sitting by designation.

[1] Molson, the world's third largest brewer, is not a defendant.

[2] SAB and Molson each held 50 percent of the governance rights in MillerCoors. The DOJ approved the MillerCoors joint venture in 2008. MillerCoors brands include Miller Lite, Coors Light, Blue Moon, and Zima.

business—including SAB's ownership in MillerCoors—such that the settlement would "prevent any increase in the concentration in the U.S. beer industry." The settlement also prohibited ABI from acquiring beer distributors or brewers without allowing for DOJ review of the acquisition's likely competitive effects and prevented ABI from engaging in certain anti-competitive practices. According to the DOJ, the settlement would "help preserve and promote competition" in the U.S. beer industry.

That same day, the DOJ Antitrust Division filed a civil lawsuit against ABI in the U.S. District Court for the District of Columbia to block the transaction, on the ground that the acquisition violated *Section 7* of the Clayton Act, along with the proposed settlement, which—if approved by the court—"would resolve the competitive harm alleged in the lawsuit."[3] The filings complied with the requirements of the *Antitrust Procedures and Penalties Act ("the Tunney Act")*, a part of the federal government's **[**5]** review of certain mergers and acquisitions. *15 U.S.C. § 16*. Pursuant to the *Tunney Act*, the DOJ published the terms of the settlement and a competitive impact statement in the Federal Register and gave the public 60 days to submit comments. *Id.* *§ 16(d)*.

After consideration of the public comments, the DOJ and several international competition authorities cleared the transaction, which closed on October 10, 2016. Molson then promptly announced that it had completed its acquisition of SAB's interest in MillerCoors. At the time of this opinion, one *Tunney Act* procedure remains outstanding: the U.S. District Court **[*762]** for the District of Columbia must determine whether entry of the settlement "is in the public interest." *Id.* *§ 16(e)*. In making that determination, the court may "take such other action in the public interest as the court may deem appropriate." *Id.* *§ 16(f)*.

Parallel to the government's antitrust enforcement efforts, on December 1, 2015, Consumers filed a private antitrust action against ABI and SAB in the District of Oregon, seeking to enjoin the acquisition.[4] Consumers likewise alleged that the proposed acquisition violated *Section 7* of the Clayton Act, "in that the effect of the proposed acquisition may be substantially **[**6]** to lessen competition, or to tend to create a monopoly in the production and sale of beer in the United States." More specifically, Consumers alleged that the acquisition threatened to cause them "loss and damage in the forms of higher prices, fewer services, fewer competitive choices, diminished product quality and product diversity, [and] suppression and destruction of smaller competitors through exclusive distribution arrangements . . ." Consumers further claimed that the acquisition would "increase ABI's buying power" globally. Although Molson was not a named defendant, Consumers made a corollary allegation regarding Molson's acquisition of SAB's interest in MillerCoors: "Given the resulting change in management and Molson's new increased size and scope in the United States market following the ABI-SAB acquisition, Molson's management is likely to have incentives to change its practices to match ABI's."

The district court dismissed the complaint for failure to state a claim. The court found that Consumers failed to allege that the acquisition would increase ABI's market power in the U.S. beer market; allegations regarding Molson's future conduct in the ownership of MillerCoors were **[**7]** too speculative to state a claim for relief against ABI; and allegations concerning ABI's buying power were too vague to state a plausible claim. In dismissing with prejudice, the court concluded that any amendment to the complaint would be futile because Consumers "cannot plausibly allege that the challenged transaction will increase either ABI's market share or the concentration of firms in the U.S. beer market." By securing the complete divestiture of MillerCoors, the DOJ had reached a settlement to prevent increased concentration in the U.S. beer industry.

ANALYSIS

This appeal centers on a longstanding ***antitrust law*** that empowers the public to sue to block allegedly anticompetitive mergers. ***HN1***[] *Section 7* of the Clayton Act generally prohibits business acquisitions whose

---

[4] Consumers are "twenty-three consumers and purchasers of beer in the United States" who reside in Oregon, California, and Washington.

effect "may be substantially to lessen competition, or tend to create a monopoly" in a relevant market. *15 U.S.C. § 18*. In addition, "[a]ny person" may "sue for and have injunctive relief . . . against threatened loss or damage by a violation of" *Section 7*, as long as the standard equitable principles for injunctive relief are met. *Id. § 26*.

I. CONSUMERS FAILED TO STATE A CLAIM UNDER THE *CLAYTON ACT*

HN2[] Our de novo review of a dismissal under *Federal Rule of Civil Procedure 12(b)(6)* is limited to the **[**8]** complaint, materials incorporated into the complaint by reference, and matters of which the court has taken judicial notice. *See Metzler Inv. GMBH v. Corinthian Coll., Inc., 540 F.3d 1049, 1061* ***[*763]*** *(9th Cir. 2008)*.[5] We benchmark Consumers' claims against the now-familiar standard of *Twombly* and *Iqbal*: "a complaint must contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))*. Those factual allegations "must be enough to raise a right to relief above the speculative level." *Twombly, 550 U.S. at 555*.

HN3[] *Section 7* of the Clayton Act requires Consumers to "first establish a prima facie case that a merger is anticompetitive." *Saint Alphonsus Med. Ctr.-Nampa Inc. v. St. Luke's Health Sys., Ltd., 778 F.3d 775, 783 (9th Cir. 2015)*. In practical terms, this means adequately alleging facts that an acquisition creates "an appreciable danger" or "a reasonable probability" of anticompetitive effects in the relevant market. *Id. at 788*; *FTC v. Warner Commc'ns Inc., 742 F.2d 1156, 1160 (9th Cir. 1984)*.[6] Consumers' allegations do not belly up to this bar.

A. BECAUSE OF THE DIVESTITURE, ABI DID NOT ACQUIRE AN ACTUAL COMPETITOR IN THE U.S. BEER MARKET

Consumers' frontline allegations are that the acquisition eliminated SAB as an "actual . . . competitor in the United States." But as the district court correctly found, ABI's acquisition of SAB did not create a reasonable probability of anticompetitive effects in the U.S. beer market **[**9]** because ABI did not acquire any business interests in the U.S. beer market. Pre-transaction, SAB operated in the United States exclusively through its joint venture MillerCoors. As a condition of closing the acquisition, SAB divested completely its interests in MillerCoors to Molson. By requiring full divestiture of SAB's U.S. interests, the DOJ ensured that the acquisition will not create "any increase in the concentration in the U.S. beer industry."

Faced with a similar ABI acquisition, we recently affirmed dismissal of a *Section 7* suit for failure to state a claim, albeit in an unpublished disposition. *See Edstrom v. Anheuser-Busch InBev SA/NV, 647 F. App'x 733 (9th Cir. 2016)*, *cert. denied*, *137 S. Ct. 258, 196 L. Ed. 2d 136 (2016)*.[7] In that case, beer purchasers sought to enjoin ABI and Constellation Brands, Inc. ("Constellation") from acquiring Grupo Modelo S.A.B. de C.V. ("Modelo"). Under the terms of that agreement, "ABI would purchase Modelo but grant Constellation an irrevocable, exclusive license to import Modelo brands into the United States." *Id. at 735*. ABI retained no right to sell Modelo beer in the United States. *Id.* Because "the challenged transaction d[id] not increase ABI's market share or the concentration of the U.S. beer market," we concluded that "Plaintiffs failed to plausibly allege a prima **[**10]** facie case that the challenged transaction is anticompetitive." *Id.* So too, here. The challenged transaction did not increase ABI's market share because ABI acquired no interests in the United States. The concentration of **[*764]** the U.S. beer market stayed precisely the same because MillerCoors remained in the market as a competitor (with SAB's share transferred fully to Molson).

---

[5] Consumers' motion to take judicial notice of government documents, court filings, press releases, and undisputed matters of public record concerning the ABI-SAB transaction (Dkt. No. 17) is granted.

[6] The parties agree that the relevant product market is the production and sale of beer, and the relevant geographic market is the United States.

[7] Although our decision in *Edstrom* is not precedential and we do not rely on it here, it is instructive as to the reality of a transaction where ABI acquired no interests in the U.S. market. *See Ninth Circuit Rule 36-3*.

Since SAB did not compete in the market before the transaction except *as* MillerCoors, and MillerCoors still competes in the market, Clayton Act cases addressing the elimination of an actual competitor in a relevant market—and a concomitant increase in market concentration—are inapposite.[8] Consumers argue that these cases "establish the illegality of any nontrivial acquisition of a competitor, whether or not the acquisition was likely either to bring about or shore up collusive or oligopoly pricing" in a highly concentrated market like the U.S. beer market. *See* Hospital Corp of America v. FTC, 807 F.2d 1381, 1386 (7th Cir. 1986). Yet with the exception of the potential competitor cases, discussed below, Consumers' cited cases involve the removal of an actual competitor *from the relevant market*. MillerCoors remains as a competitor in the market.

B. ABI DID NOT ACQUIRE [**11] A POTENTIAL COMPETITOR "POSITIONED AT THE EDGE OF THE MARKET, CONTINUALLY THREATENING TO ENTER"

Recognizing the reality that ABI did not acquire an actual competitor, Consumers claimed in summary fashion that the acquisition would eliminate SAB as a "*potential* competitor." (Emphasis added). The claim is doomed from the start because the potential competitor theory lacks factual allegations in the complaint. Indeed, by alleging that ABI and SAB were actual competitors, Consumers undermine their assertion that the brewers were potential competitors. Taking Consumers' factual allegations as true, as we must at this stage, SAB was not a potential competitor with ABI. *See* In re Tracht Gut, LLC, 836 F.3d 1146, 1150 (9th Cir. 2016) (we accept as true all factual allegations in the complaint, but "do[] not have to accept as true conclusory allegations in a complaint"). Instead, before the transaction and divestiture, SAB was an actual competitor through its joint venture MillerCoors.

Consumers' effort on appeal to recast SAB as a "potential competitor . . . so positioned on the edge of the market that it exerted beneficial influence on competitive conditions in the market" fails. United States v. Falstaff Brewing Corp., 410 U.S. 526, 532-33, 93 S. Ct. 1096, 35 L. Ed. 2d 475 (1973). SAB was not poised on the edge of the market "continually threatening **[**12]** to enter." United States v. Penn-Olin Chem. Co., 378 U.S. 158, 173, 84 S. Ct. 1710, 12 L. Ed. 2d 775 (1964). Nor was SAB "eager[] to enter that market." United States v. El Paso Nat. Gas Co., 376 U.S. 651, 660, 84 S. Ct. 1044, 12 L. Ed. 2d 12 (1964). SAB had already entered the market, through the MillerCoors joint venture. SAB's beneficial influence on competitive conditions in the market thus was *through* MillerCoors, an entity still competing in the market today.

Consumers did not allege in their complaint that SAB was a potential competitor because of "the ever-looming threat of the possible end of the [SAB-Molson] joint venture [MillerCoors] and the resulting re-entry of the parents." But such a claim also would be futile because allegations regarding the potential dissolution of MillerCoors **[*765]** and its competitive effects would be entirely speculative. *See* Twombly, 550 U.S. at 555.

C. ALLEGATIONS CONCERNING THE NEW MILLERCOORS' DISTRIBUTION PRACTICES ARE TOO SPECULATIVE TO STATE A CLAIM

Consumers make one last speculative argument: Post-transaction, MillerCoors—now a wholly-owned subsidiary of Molson—will adopt the distribution practices of ABI. Consumers provide no support for that assertion.[9] Merely

---

[8] *See, e.g.,* United States v. Pabst Brewing Co., 384 U.S. 546, 550, 86 S. Ct. 1665, 16 L. Ed. 2d 765 (1966) (merger of "two very large brewers competing against each other in 40 States"); United States v. Von's Grocery Co., 384 U.S. 270, 277, 86 S. Ct. 1478, 16 L. Ed. 2d 555 (1966) (merger of "two of the most successful and largest [grocery stores] in the area" to create the second largest grocery store in Los Angeles); United States v. Aluminum Co. of Am., 377 U.S. 271, 281, 84 S. Ct. 1283, 12 L. Ed. 2d 314 (1964) (acquisition of "an aggressive competitor" in the same market).

[9] After briefing on the motion to dismiss, Consumers filed a supplemental declaration with an attached letter written by the American Antitrust Institute regarding potential post-merger coordination in the U.S. beer market. That letter was not incorporated into the complaint. Regardless, the letter was addressed to the DOJ Antitrust Division to encourage the agency to order pro-competitive remedies if it approved the merger, some of which the DOJ adopted in its settlement agreement with ABI.

stating that "it is likely that a 100 percent Molson Coors-owned MillerCoors will follow ABI's lead in its dealings with distributors," without more, is insufficient. *See* Iqbal, 556 U.S. at 678 (emphasizing that "labels **[**13]** and conclusions" are not enough to survive a motion to dismiss). This allegation is a classic speculative conclusion. General allegations regarding past acquisitions in the market, which prompted distinct DOJ remedies, do not alter the equation. The bottom line is that the complaint offers only speculation as to how a MillerCoors operated solely by Molson, as opposed to by Molson and SAB, will do business.[10] Such speculation "stops short of the line between possibility and plausibility of entitlement to relief." Twombly, 550 U.S. at 557 (alteration and internal quotation marks omitted).[11]

In view of our conclusion that Consumers do not have a viable Clayton Act claim, we need not reach Consumers' claim for injunctive relief.

II. The District Court Did Not Abuse Its Discretion in Dismissing the Complaint with Prejudice

The only remaining question is whether Consumers' complaint could be "saved by amendment." Kendall v. Visa U.S.A., Inc., 518 F.3d 1042, 1051 (9th Cir. 2008). Ultimately, the district court did not abuse its discretion in concluding that Consumers could not plead around the elephant in the room. *See* Missouri ex rel. Koster v. Harris, 847 F.3d 646, 655-56 (9th Cir. 2017). Since SAB divested its interests in the U.S. beer market, the transaction could not increase ABI's market share or the concentration of that market. **[**14]** As the district court aptly observed, the DOJ reached a settlement to "prevent increased concentration" in the market. While Consumers contend that the settlement only partially remedies their alleged injuries, they curiously did not submit public comments opposing the settlement, as they were entitled to do. *See* 15 U.S.C. § 16(d).

Consumers' new arguments on appeal underscore that any amendment to their complaint would be futile. Consumers argue that they would add factual allegations regarding SAB's role in the relevant market **[*766]** managing MillerCoors as a joint venture, or (perhaps contradicting themselves), on the "edge of the market." Given the legal deficiencies in applying the "actual competitor" and "potential competitor" theories to the present facts, further allegations would not salvage the complaint.

Consumers also assert that they would add allegations regarding the closing of a MillerCoors brewery in Eden, North Carolina in September 2015. According to Consumers, the shuttered brewery once brewed on a contract basis for competitor Pabst and its closure "increased market concentration to presumptively illegal levels." However, Consumers do not explain why a brewery closed by MillerCoors months **[**15]** *before* ABI announced its proposed acquisition of SAB has anything to do with the merger, as opposed to being merely the product of MillerCoors' independent business judgment. The weakness of these proposed amendments underscores that the district court was within its discretion to dismiss the complaint with prejudice.

AFFIRMED.

End of Document

See Press Release, U.S. Dep't of Justice, Justice Department Requires Anheuser-Busch InBev to Divest Stake in MillerCoors and Alter Beer Distributor Practices as Part of SABMiller Acquisition (July 20, 2016), *available at* https://www.justice.gov/opa/pr/justice-department-requires-anheuser-busch-inbev-divest-stake-millercoors-and-alter-beer.

[10] Molson is not a defendant in this action. But if Molson conducts its MillerCoors business in the U.S. beer market in violation of the antitrust laws, it does so at the risk of private and public antitrust enforcement suits.

[11] Consumers do not appeal the district court's decision that allegations about ABI's buying power are too speculative.

Opinion by: J. CURTIS JOYNER

Opinion

[*496] **MEMORANDUM**

Joyner, J.

Before the Court are Defendants' Motion to Dismiss (Doc. No. 27) and Corrected Memorandum in Support thereof (Doc. No. 31), Plaintiff's Response in Opposition thereto (Doc. No. 42), Defendants' Reply in Support thereof (Doc. No. 48), and Plaintiff's Notice of Supplemental Authority (Doc. No. 54). We deny Defendants' Motion for the following reasons. **[**2]**

I. BACKGROUND

This case arises from an antitrust action brought by Pfizer, Inc. ("Pfizer") against Johnson & Johnson, along with its wholly **[*497]** owned subsidiary, Janssen Biotech, Inc. (collectively, "J&J"), for allegedly anticompetitive practices in the pharmaceutical market for infliximab products. The practices at issue are embodied by exclusive agreements and bundled rebates. Pfizer's principal claim is that J&J violated federal antitrust laws by engaging in anticompetitive behavior to shield Remicade from competition posed by Pfizer's biosimilar, Inflectra.

Under consideration is J&J's Motion to Dismiss Pfizer's Complaint for failure to state a claim under *Fed. R. Civ. P. 12(b)(6)*. This Motion is fully briefed and ripe for the Court's adjudication. The Court has considered the parties' submissions and decides this matter without oral argument. *Fed. R. Civ. P. 78*; *Loc. R. Civ. P. 7.1(f)*.

I. ALLEGED FACTS[1]

The subject medications in this litigation are J&J's Remicade and Pfizer's Inflectra. Both are branded forms of infliximab, which is a biologic drug used to treat a range of immune-mediated diseases. Compl. ¶35. Biologics are relatively new medications to the pharmaceutical market, and their unique qualities are relevant to our decision.

Biologic **[**3]** medications, such as infliximab, are complex mixtures derived from living systems. Id. ¶28. Biologics stand in contrast to more common drugs that are chemically synthesized and whose structure is known. Id. Therefore, the composition of biologics are not easily identified or characterized. Id. This makes biologic medications difficult to replicate and produce in generic form. Id.

The emergence of biologics prompted Congress to enact the Biologic Price Competition and Innovation Act ("BPCIA"). Id. ¶31. The BPCIA provides an abbreviated regulatory approval pathway for the introduction of drugs that are biosimilar to a biologic, similar to the abbreviated approval process for generic drugs under the Hatch-Waxman Act. Id. ¶33. To prove that an applicant drug is biosimilar to an originator product, the applicant must show that it is "highly similar to the [originator] notwithstanding minor differences in clinically inactive components" and that "there are no clinically meaningful differences between the [proposed biosimilar] and the [originator] in terms of safety, purity, and potency." Id. (quoting *42 U.S.C. §262(i)(2)*).

One important difference between biosimilars approved under the BPCIA and generic medications **[**4]** approved under the Hatch-Waxman Act is that biosimilars are not automatically substitutable with the originator biologic. Id. ¶34. While it appears there is a process in which a biosimilar can become automatically substitutable once achieves interchangeability status with the FDA, Pfizer claims that whether the biosimilar can be automatically substituted would ultimately depend on state law. Id. A key aspect to this distinction, according to Pfizer, is that "it enables biologic originator firms to leverage their monopolies over existing patients to extract anticompetitive commitments from insurers and providers." Id.

With this in mind, we turn to the competing products in this case. J&J introduced the first infliximab product under the brand name Remicade in the United States in 1999. Id. ¶38. The FDA has approved Remicade's indications for rheumatoid arthritis, psoriatic arthritis, ankylosing **[*498]** spondylitis, ulcerative colitis, Chron's disease, and plaque psoriasis. Id. ¶¶45, 83. Pfizer estimates that 475,000 patients in the United States receive at least one dose of Remicade annually. Id. ¶39. Because of its patients, J&J enjoyed a monopoly over the infliximab market in the United States **[**5]** until 2016. Id. ¶3.

---

[1] Unless otherwise noted, the following facts are taken from Pfizer's Complaint. On consideration of a *Rule 12(b)(6)* motion to dismiss, the allegations in the plaintiff's complaint are generally taken as true and all reasonable inferences are drawn in favor of the claimant. See *Phillips v. Cty. of Allegheny, 515 F.3d 224, 233 (3d Cir. 2008)*.

Pfizer brought Inflectra to market in 2016 after it received FDA approval as the first biosimilar to Remicade. Id. ¶5. The FDA approved Inflectra for the same indications as Remicade, except for pediatric ulcerative colitis, which accounts for a minimal amount of Remicade's sales. Id. ¶45.

Remicade and Inflectra are administered intravenously at an institutional setting, such as a clinic or hospital. Id. ¶49. They are "medical benefit" products, in contrast to "pharmacy benefit" products. Id. ¶¶49-50. As medical benefit products, Remicade and Inflectra are first purchased by the providers, who later seek reimbursement after administering it on patients. Id. Because the provider bears financial risk posed by the patient or patient's insurer not reimbursing them for the cost of medical benefit products, providers have an interest in utilizing drugs that are widely covered by insurers. Id. ¶50.

Within weeks of Inflectra's launch in 2016, J&J began to deploy its "Biosimilar Readiness Plan." Id. ¶6. Pfizer claims that the "core features of the plan are exclusionary contracts that foreclose Pfizer's access to an overwhelming share of consumers, coupled with anticompetitive **[**6]** bundling and coercive rebate policies designed to block both insurers from reimbursing, and hospitals and clinics from purchasing, Inflectra or other biosimilars of Remicade despite their lower pricing." Id. Pfizer alleges that J&J's anticompetitive scheme targeted both insurers and providers and involved exclusive contracts for Remicade, multi-product bundled rebates, rebates based on the bundling of existing (incontestable) and new (contestable) infliximab patients, and creating a "rebate trap" that prevented Pfizer and other competitors from competing with Remicade. Pfz. Resp. at 6 (citing Compl. ¶¶ 8, 9, 11, 55-79, 98) (Doc. No. 42).

Exclusive Contracts. A key component of J&J's scheme was to secure contractual commitments from commercial insurance companies to exclude biosimilars from coverage under their plans, thereby making Remicade the exclusive infliximab available to patients covered under those plans. Id. ¶58. A portion of these agreements contained express terms that would exclude biosimilars from their medical policies and drug formularies. Id. The remaining portion of these agreements contained a "fail first" provision, which would require a patient to first try and fail **[**7]** on Remicade before the insurance company would reimburse Inflectra or another biosimilar. Id. However, if a patient first fails on Remicade, it would "defy sound medical judgment" for a physician to switch to a therapeutic equivalent biosimilar, such as Inflectra, rather than try another therapy. Id. At least 70 percent of commercially insured patients in the United States fall under plans that have adopted these express or de facto agreements to exclude Inflectra and other biosimilars. Id. ¶59.

Bundled Rebates and Multi-Product Bundling. Pfizer also alleges that J&J has forced insurers into accepting exclusive contracts by introducing a rebate program that would provide savings off Remicade's increasing list price for all existing Remicade patients. Id. ¶¶9, 66. The threat of not qualifying for the rebate would result in significant costs for insurance companies because it would apply to both new and existing Remicade patients. Id.

Pfizer posits that the force of J&J's "all-or-nothing" rebate program is effective **[*499]** because it bundles the base of existing Remicade patients with new patients entering the infliximab market. Id. ¶¶9, 65. Pfizer asserts that the exiting Remicade patients represent **[**8]** inelastic demand, or incontestable patients, who are "highly unlikely" to stitch to a biosimilar regardless of price. Id. By premising rebates on this incontestable population, J&J is able to force insurance companies to exclude Inflectra from competing for new patients entering the infliximab market. Id. ¶¶9, 66. Pfizer refers to this as the "rebate trap." Id. ¶66.

Beyond bundling contestable and incontestable patients, J&J has also bundled rebates across multiple products. Id. ¶¶9, 67. In essence, if an insurer refuses to grant exclusivity to Remicade, the insurer would be forced to pay a higher price on other J&J products in addition to Remicade. Id. Pfizer identifies Simponi, Simponi Aria, and Stelara as other J&J products included in its multi-product bundled rebate program. Id. Pfizer also claims it could offer no competing drugs to these products. Id.

Pfizer claims that Inflectra's exclusion from coverage by most insurers results in an even greater foreclosure than just the patients covered by those insurers. Id. ¶¶10, 69, 70, 71. As an infusion product, infliximab is administered at a provider's facility. The provider therefore purchases and stocks infliximab products. According **[**9]** to Pfizer, the risk that Inflectra will not be reimbursed by a significant portion of patients' insurers causes physicians to only purchase, stock, and proscribe Remicade for nearly all of their infliximab patients. Id. ¶¶10, 69-71.

Pfizer claims that J&J's multi-faceted approach to control the infliximab market has foreclosed it from competing. Pfizer alleges that it continues to offer "a significantly lower price for Inflectra unit-for-unit." Id. ¶66. Despite a lower unit cost, insurance companies continue to enter into exclusive agreements with J&J to cover Remicade for all infliximab patients to avoid losing rebates on the substantial base of existing Remicade patients who are not likely to switch to Inflectra. Id. To overcome the "rebate trap," Pfizer claims that it would have to follow J&J's lead and price Inflectra below its own average variable cost. Id. ¶¶66, 77, 78. Pfizer states that it continues to negotiate with providers to make Inflectra the lower-priced infliximab option on a per-unit basis, even in the form of offering guarantees. Id. ¶77. Again, according to Pfizer, its efforts to compete on price have failed because of J&J's efforts to foreclose it from the market. **[**10]** Id.

As a result of J&J's exclusionary contracting scheme, and despite Pfizer's efforts to compete, Remicade's price continues to rise. Id. ¶¶8, 12, 47, 80-82, 100, 102; Pfizer's Not. of Supp. Auth. (Doc. No. 74). Pfizer alleges that both Pfizer's Wholesale Acquisition Price ("WAP") and "Average Sales Price" ("ASP"), which is a net price accounting for rebates and other discounts, continues to rise despite insurers and providers now having a lower-cost alternative that, according to Pfizer, differs in no meaningful way. Id. ¶¶13, 42, 45-47, 104; Pfz. Not. of Supp. Auth. at 2. According to Pfizer, J&J's ability to increase the price of Remicade quarter after quarter since Pfizer brought Inflectra to market "underscores the plausibility of [Pfizer's] allegations" that J&J's scheme has unlawfully restrained--and continues to unlawfully restrain--biosimilar competition to Remicade. Pfz. Not. of Supp. Auth. at 2.

As a result of J&J's anticompetitive conduct, Pfizer claims that it has been foreclosed from competing for at least 70 percent of all commercially insured patients in the United States. Compl. ¶8. The spillover effect that J&J's scheme **[*500]** causes on providers' purchasing decisions has led 90 percent of provider account stocking no Inflectra at all. Id. **[**11]** ¶12. As of September 2017, J&J maintained an over 96 percent marketshare of infliximab unit sales in the United States. Id. ¶102.

Pfizer points out that it is not the only one harmed as a result of J&J's exclusionary conduct. Id. ¶104. Since the FDA approved Inflectra, J&J has increased the price of Remicade by nearly 10 percent, which in turn increases the cost to private insurance companies, government payers, and consumers. Id. ¶¶13, 104.

II. LEGAL STANDARD

Fed. R. Civ. P. 8(a)(2) requires that a complaint contain "a short and plain statement of the claim showing that the pleader is entitled to relief." Plaintiffs are not required to provide detailed factual allegations in their complaint, though they must do more than merely state legal conclusions and formulaic recitations of the elements of the cause of action. *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*.

A party may move to dismiss a complaint for failure to state a claim upon which relief can be granted. *Fed. R. Civ. P. 12(b)(6)*. When considering a motion to dismiss under *Rule 12(b)(6)*, a district court must "accept as true the factual allegations in the complaint and all reasonable inferences that can be drawn therefrom." *Krantz v. Prudential Invs. Fund Mgmt. LLC, 305 F.3d 140, 142 (3d Cir. 2002)* (quoting *Nami v. Fauver, 82 F.3d 63, 65 (3d Cir. 1996))*. While a court generally cannot consider matters outside the pleadings, "a document integral to **[**12]** or explicitly relied upon in the complaint may be considered without converting the motion to dismiss into one for summary judgment." *In re Burlington Coat Factory Sec. Litig., 114 F.3d 1410, 1426 (3d Cir. 1997)* (internal quotation marks and alteration omitted).

"To survive a motion to dismiss, a complaint must contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))*. "A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." Id. (citation omitted). "The plausibility standard is not akin to a 'probability requirement,' but it asks for more than a sheer possibility that a defendant has acted unlawfully." *Id. at 678* (quoting *Twombly, 550 U.S. at 556*). A plaintiff is entitled to all reasonable inferences from the facts alleged, but a plaintiff's legal conclusions are not entitled to deference, and the Court is "not bound to accept as true a legal conclusion couched as a factual allegation." *Papasan v. Allain, 478 U.S. 265, 286, 106 S. Ct. 2932, 92 L. Ed. 2d 209 (1986)*.

The Court's analysis, below, applies this governing standard to J&J's *Rule 12(b)(6)* arguments for dismissal.

IV. DISCUSSION

Pfizer has asserted claims under *Section 1* and *Section 2 of the Sherman Act* and *Section 3 of the Clayton Act*. Compl. ¶¶110, 117, 125, **[**13]** 136. The law applicable to each claim is effectively the same as it applies to J&J's Motion to Dismiss. *Eisai, Inc. v. Sanofi Aventis U.S., LLC, 821 F.3d 394, 402 n.11 (3d Cir. 2016)*. Specifically, to sufficiently plead an actionable antitrust violation, Pfizer must plead facts showing that J&J engaged in anticompetitive conduct and that Pfizer suffered antitrust injury as a result. Id.

[*501] J&J raises three lines of attack against J&J's Complaint. First, J&J generally targets Pfizer's alleged pleadings, arguing that Pfizer has failed to plead facts that constitute an antitrust injury. Second, J&J argues that Pfizer has failed to plead specific allegations establishing antitrust injury with respect to the particular conduct that is the subject of Pfizer's Complaint. Lastly, J&J argues that the facts that Pfizer did plead lack sufficient basis to support its antitrust injury. We address each below.

A. General Antitrust Injury

"Competition is at the heart of the antitrust laws." *Philadelphia Taxi Ass'n, Inc. v. Uber Techs., Inc., 886 F.3d 332, 338 (3d Cir. 2018)* (internal quotation omitted). Antitrust laws are only aimed at curtailing anticompetitive conduct, "or a competition-reducing aspect or effect of the defendant's behavior." Id. In other words, the underlying principle of our antitrust laws is to protect competition, not competitors. Id.

The law **[**14]** therefore establishes antitrust injury as a common pleading requirement for antitrust plaintiffs. *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*; see also *W. Penn Allegheny Health Sys., Inc. v. UPMC, 627 F.3d 85, 101 (3d Cir. 2010)*; *Brader v. Allegheny Gen. Hosp., 64 F.3d 869, 875-76 (3d Cir. 1995)*. An antitrust injury is an "injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful." *Brunswick, 429 U.S. at 489*.

Under this requirement, Pfizer "must allege harm to competition, not just harm to its own business" to adequately plead antitrust injury. *In re EpePen (Epinephrine Injection, USP) Mktg., Sales Practices and Antitrust Litig., 2017 U.S. Dist. LEXIS 209710, at *64 (D. Kan. Dec. 21, 2017)*; see also *Philadelphia Taxi Ass'n, 886 F.3d at 338*. "This standard, on a motion to dismiss, requires an antitrust plaintiff to allege facts capable of supporting a finding or inference that the purported anticompetitive conduct produced increased prices, reduced output, or otherwise affected the quantity or quality of the product." *In re EpePen, 2017 U.S. Dist. LEXIS 209710, at *64-65* (citing *National Collegiate Athletic Ass'n v. Board of Regents, 468 U.S. 85, 113, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (1984)*; *Cohlmia v. St. John Medical Center, 693 F.3d 1269, 1281 (10th Cir. 2012)*; *Mathews v. Lancaster Gen. Hosp., 87 F.3d 624, 641 (3d Cir. 1996))*.

While an antitrust plaintiff must present plausible allegations establishing antitrust injury, "the adequacy of a [plaintiff's] contentions regarding the effect on competition is typically resolved after discovery, either on summary judgment or after trial." *Brader, 64 F.3d at 869*. Accordingly, "the existence of the antitrust injury is not typically resolved through motions to dismiss." *Schuylkill Energy Res., Inc. v. Pennsylvania Power & Light Co., 113 F.3d 405, 417-18 (3d Cir. 1997)* (citing *Brader, 64 F.3d at 876*). The distinction between these propositions is that a plaintiff must assert allegations making plausible **[**15]** the claim that it, and the competitive market, suffered as a result of defendant's anticompetitive conduct; however, on a motion to dismiss, we liberally analyze the adequacy of those allegations, and of course, we do not judge the validity of those claims.

For example, in Brader, the Third Circuit reversed the district court's dismissal of antitrust claims based on the antitrust injury pleading requirement. *64 F.3d at 875-76*. The Third Circuit noted that the plaintiff did in fact plead that the defendant **[*502]** hospital "prevented him and others from engaging in the practice of general vascular trauma surgery in the relevant market, and prevented other hospitals in the relevant market from employing or granting medical staff privileges to the [p]laintiff for the purpose of competing with defendants." *Id. at 876*. These allegations alone were sufficient to state a claim for antitrust injury. Id.

Pfizer's Complaint sufficiently alleges that it has suffered an antitrust injury as the result of J&J's anticompetitive conduct. J&J's efforts to foreclose Pfizer from the market, as Pfizer has alleged, have led to increased prices for consumers and limited competitive options for end payors, providers, and patients. Pfizer provides **[**16]** detailed allegations regarding J&J's exclusionary terms with many of the nation's largest insurers, the incentive structure that forces end payors and providers into accepting those terms, Pfizer's efforts to compete, including its guarantees that Inflectra would cost less than Remicade, and showed how market participants on many levels are injured from J&J's ability to sell Remicade without having to compete with Inflectra and other biosimilars.

Along a similar line of attack, J&J also takes aim at Pfizer's alleged antitrust injury by arguing that Pfizer's inability to gain market share is caused by reasons other than J&J's alleged anticompetitive conduct. For example, J&J argues that Inflectra's lack of competition is the result of providers' lack of comfort and awareness of biosimilars, Inflectra's lack of "interchangeability" status with Remicade, and Remicade's substantial rebates. J&J Corrected Mem. at 1, 14-15 (Doc. No. 31).

While these arguments may prove true after discovery, they are not grounds for dismissing Pfizer's Complaint. The existence of possible alternative causes of an antitrust injury is not a valid ground for dismissal. *In re EpePen, 2017 U.S. Dist. LEXIS 209710, at *76 (D. Kan. Dec. 21, 2017)*. In other words, an antitrust plaintiff **[**17]** is not required to disprove all other possible alterative causes to survive a motion dismiss.

This reasoning is illustrated in *In re EpePen*, in which Sanofi asserted antitrust claims against Mylan on the basis that Mylan prevented Sanofi's pharmaceutical from competing. *2017 U.S. Dist. LEXIS 209710, at *19-21*. On a motion to dismiss, Mylan argued that Sanofi's inability to compete was instead a result of its poor marketing decisions. *Id. at *76*. Mylan also argued Sanofi's lack of success was more likely attributable to Sanofi's product recall than Mylan's conduct. *Id. at *77*. Rejecting Mylan's arguments, the district court noted that "[t]hese arguments merely foreshadow factual disputes that the court cannot resolve on a motion to dismiss." Id. The court therefore "refuse[d] to dismiss Sanofi's claims at the pleading stage based on Mylan's arguments that alterative reasons caused the alleged injuries." *Id. at *76*.

While J&J may ultimately be correct that Inflectra's lack of success is the result of something other than J&J's conduct, its argument is misplaced at this stage in the litigation. In considering the sufficiency of Pfizer's alleged antitrust injury, "dispositive weight should not be given to lists of possible alternatives, which virtually any **[**18]** defendant can generate." Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law***: An Analysis of Antitrust Principles and Their Application ¶338 (4th Ed., 2018 Cum. Supp. 2010-2017). We therefore reject J&J's invitation to dismiss Pfizer's Complaint on the basis that Pfizer's own **[*503]** actions caused Inflectra's lack of success to date.

B. Conduct Specific Antitrust Injury

J&J next asks us to dismiss Pfizer's Complaint on the basis that Pfizer has failed to allege facts establishing antitrust injury resulting from J&J's particular conduct that is the subject to Pfizer's Complaint.

As noted above, Pfizer claims that J&J has engaged in a multifaceted scheme to prevent Inflectra and other biosimilars from competing with Remicade. Pfz. Resp. at 19. This scheme includes "secur[ing] contractual commitments from commercial insurance companies to exclude biosimilars from coverage under their plans."

Compl. ¶58. Such commitments, as Pfizer alleges, cause Remicade to be the exclusive infliximab available to new and current infliximab patients. Id. The alleged scheme also includes bundling, in the form of multi-product bundles and a theory based on bundling Remicade's existing and new patients. Id. ¶¶65-68. **[**19]**

Exclusive dealing arrangements arise when a buyer agrees to purchase certain goods or services only from a particular seller for a certain period of time. These agreements can be in the form of express or *de facto* terms--terms that naturally result in the buyer purchasing exclusively from the seller. *ZF Meritor, LLC v. Eaton Corp., 696 F.3d 254, 270 (3d Cir. 2012)*. In ZF Meritor, the Third Circuit noted there was sufficient evidence of a *de facto* exclusive dealing arrangement where no risk adverse purchaser would refuse the agreement out of caution for jeopardizing its relationship with the largest seller. *Id. at 283*.

On one hand, such agreements may benefit consumers because they can assure supply and price stability. On the other hand, such agreements can also deprive competitors access to a certain market. We therefore consider exclusive dealing arrangements under a rule of reason framework, in which we analyze "the likely or actual anticompetitive effects of the exclusive dealing arrangement, including whether there was reduced output, increased price, or reduced quality in goods or services." *Eisai, Inc. v. Sanofi Aventis U.S., LLC, 821 F.3d 394, 403 (3d. Cir. 2016)*.

Another form of potentially anticompetitive conduct is bundled rebates. Bundled rebates pose antitrust concern when a defendant forecloses competition from its **[**20]** product in a competitive market by linking it to a product on which it faces no competition. LePage's Inc. v. 3M, *324 F.3d 141, 156 (3d Cir. 2003)*; *SmithKline Corp. v. Eli Lilly & Co., 575 F.2d 1056, 1065 (3d Cir. 1978)*. In SmithKline, the Third Circuit affirmed as an antitrust violation the defendant's rebates based on the purchase of multiple products because the bundle, in effect, "insulated its product from true price competition." *575 F.2d at 1065*. The same was true in LePages's, where the defendant "used its monopoly in transparent tape, backed by its considerable catalog of products, to squeeze" its competitor from the market. *324 F.3d at 157*. Similar to exclusive dealing agreements, bundled rebate claims are analyzed under a rule of reason framework.

Focusing on Pfizer's alleged antitrust injury, J&J makes several arguments specific to each aspect of its alleged anticompetitive conduct.

First, J&J argues that Pfizer's alleged antitrust injury based on J&J's multi-product bundling should be dismissed because Pfizer failed to allege that it offered its own multi-product bundles. According to J&J, Pfizer was either required to plead facts establishing that it offered its own competing bundle or that it **[*504]** was incapable of doing so. J&J Resp. at 13.

J&J relies heavily on Eisai, where the Third Circuit stated it previously **[**21]** "limited the reasoning in LePage's to cases in which a single-product producer is excluded through a bundled rebate program offered by a producer of multiple products, which conditions the rebates on purchases across multiple different product lines." *821 F.3d at 405*. In Eisai, the Third Circuit reviewed the circuit's prior decisions in bundling cases and noted that bundling can be anticompetitive when it "forecloses portions of the market to a potential competitor who does not manufacture an equally diverse group of products and who therefore cannot make a comparable offer." Id.

Pfizer, of course, is not a single-product producer. It admits as much in its Complaint. Compl. ¶18. Moreover, Pfizer has not alleged any facts suggesting that J&J is hindering its ability to compete with J&J's multi-product bundles by offering their own multi-product bundles. J&J's multi-product bundles, on their own, therefore do not present antitrust concern.

Second, J&J cites Eisai for the proposition that bundling contestable and incontestable demand, for the same product, cannot constitute an antitrust violation. However, the Third Circuit did not completely shut the door on such a theory, as J&J argues. *Id. at 406*. Rather, it **[**22]** affirmed summary judgment with the factual support that "nothing in the record indicates that an equally efficient competitor was unable to compete." Id.

Bundling Remicade's incontestable demand could create anticompetitive consequences by foreclosing competition for new infliximab patients--thereby posing antitrust concern that was lacking in *Eisai*. Taking Pfizer's allegations as true, new infliximab patients are contestable because they have not yet been anchored to a specific infliximab product. If incontestable demand is truly inelastic, then this could fall into a traditional bundling case where J&J has bundled its power over existing Remicade patients to break the competitive mechanism and deprive new infliximab patients (and their insurers) of the ability to make a meaningful choice between Remicade and its biosimilars. See *Eisai, 821 F.3d at 404*. We therefore refuse to dismiss Pfizer's bundling claim as it relates to contestable and incontestable demand.

C. Allegations Supporting Pfizer's Efforts to Compete

Lastly, J&J argues that Pfizer's alleged antitrust injury based on J&J's exclusive contracts should be dismissed because Pfizer failed to plead adequate facts establishing that it attempted to compete. **[**23]** J&J supports this argument by claiming Pfizer's allegations regarding the price of Inflectra and Remicade lack sufficient accuracy to make plausible Pfizer's efforts to compete.

J&J mainly takes issue with Pfizer's reliance on Average Sales Price ("ASP") and Wholesale Acquisition Cost ("WAC"). According to J&J, Pfizer cannot rely on ASP and WAC to support its efforts to compete with J&J by offering lower prices because both metrics lack sufficient specificity. J&J Corrected Mem. at 17.

As noted above, WAC is essentially a metric reflecting list price, whereas ASP is based on an annual average that does account for rebates and discounts off list price. J&J argues that because WAC does not reflect the net price after discounts and rebates, it provides no indication about the price competition between Remicade and Inflectra. The problem with ASP, according to J&J, is that because Remicade's current ASP reflects a yearly net average, and because Inflectra has been on the market for less than a year at **[*505]** the time Pfizer filed its Complaint, Remicade's ASP reflects pricing data from months where Inflectra was not yet on the market. J&J Corrected Mem. at 3-4, 16-18.

At this stage, we find that **[**24]** Pfizer's allegations containing ASP data do support the plausibility of its claims. According to Pfizer, it has priced Inflectra lower than J&J's Remicade even accounting for incentives such as bundled discounts and rebates. Pfizer also alleges that Remicade's ASP continues to increase despite Inflectra's entrance to the market at a 24 percent lower per unit cost. Supp. Auth. at 2. These allegations lend plausibility to Pfizer's theory that J&J is engaging in anticompetitive behavior, which is foreclosing biosimilars from competing.

We agree with J&J that the WAC provides minimal support for the proposition that Inflectra costs less on a unit-for-unit basis than Remicade. Nevertheless, Pfizer's allegations regarding Remicade's increasing WAC does support Pfizer's theory that J&J's bundled rebate force purchasers into excluding Remicade's biosimilars from the market. Increasing Remicade's WAC in turn increases the penalties for not excluding Inflectra and other biosimilars in the form of lost incentives. Accepting as true Pfizer's allegations that existing Remicade patients will not switch to a biosimilar despite price competition, the increasing penalties that payors may face for exiting patients may **[**25]** effectively force payors into accepting J&J's exclusionary terms for all patients.

J&J's arguments against Pfizer's support for its pricing allegations are misplaced--or rather, mistimed. Discovery will reveal whether Pfizer has offered more competitive pricing for Inflectra, as alleged in its Complaint. If Pfizer's claims about pricing prove true, then the pricing data may indicate that J&J's conduct has prevented Pfizer from competing in violation of the antitrust laws. Ultimately, the legality of J&J's conduct will depend on whether it foreclosed a substantial share of the market such that competition has been harmed. *ZF Meritor, 696 F.3d at 283* (citing *Tampa Elec. Co. v. Nashville Coal Co., 365 U.S. 320, 326-28, 81 S. Ct. 623, 5 L. Ed. 2d 580 (1961))*.

V. CONCLUSION

For the foregoing reasons, J&J's Motion to Dismiss is denied. An appropriate Order will follow.

[EDITOR'S NOTE: The following court-provided text does not appear at this cite in F. Supp. 3d.]

[*none] **ORDER**

AND NOW, this 8th day of August, 2018, upon consideration of Defendants' Motion to Dismiss (Doc. No. 27) and Corrected Memorandum in Support thereof (Doc. No. 31), Plaintiff's Response in Opposition thereto (Doc. No. 42), Defendants' Reply in Support thereof (Doc. No. 48), and Plaintiff's Notice of Supplemental Authority (Doc. No. 54), it is hereby ORDERED that Defendants' Motion to Dismiss is DENIED.

It is further ORDERED that the Court's prior **[**26]** Order Staying Discovery (Doc. No. 50) is hereby LIFTED.

BY THE COURT:

Opinion

[*553] ORDER GRANTING MOTION FOR CLASS CERTIFICATION

This is an antitrust suit alleging that price-fixing harmed two *Rule 23(b)(3)* classes of transpacific airline passengers. The Court hereby GRANTS Plaintiffs' motion to certify both classes. See Mot. Class Cert. (dkt. 1118-5).

I. BACKGROUND

Plaintiffs filed this action in 2007, alleging that multiple international airlines fixed the prices of transpacific air travel in violation of the Sherman Antitrust Act. See generally Compl. (dkt. 1); First Am. Compl. (dkt. 493); Second Am. Compl. (dkt. 741). Since then, nearly all of the twenty-six defendants settled or were dismissed. Only All Nippon Airways ("ANA" or "Defendant") remains.

On November 22, 2013, Plaintiffs filed a Second Amended Complaint ("SAC"), alleging that ANA, JAL,[1] and other airlines conspired to "artificially fix, raise, maintain, and/or stabilize the prices of passenger air transportation, including surcharges, for flights between the United States and Asia . . . in violation of *Section 1* of the **[**13]** Sherman Act, *15 U.S.C. § 1*." SAC ¶ 405. This Court **[*554]** recently denied Defendant's motion for summary judgment. Order Den. Mot. Summ. J. (dkt. 1194).[2]

In the present motion, Plaintiffs propose two classes focusing on purported damages caused by price-fixing activities in two specific areas: (1) fuel surcharges and (2) special types of discounted tickets known as "satogaeri" fares. Compare Mot. Class Cert. at i with SAC ¶ 395.

II. LEGAL STANDARD

Plaintiffs bear the burden of proving, by a preponderance of the evidence, that class certification is appropriate. See *Hawkins v. Comparet-Cassani, 251 F.3d 1230, 1238 (9th Cir. 2001)*. Certification is a three-step process.

First, plaintiffs must "demonstrate that an identifiable and ascertainable class exists." *Mazur v. eBay Inc., 257 F.R.D. 563, 567 (N.D. Cal. 2009)*.[3]

Second, plaintiffs must meet the four explicit requirements of *Rule 23(a)*: numerosity, commonality, typicality, and adequacy. *Fed. R. Civ. P. 23(a)*. "Class certification is proper only if the trial court has concluded, after a 'rigorous analysis,' that *Rule 23(a)* has been satisfied." *Wang v. Chinese Daily News, Inc., 737 F.3d 538, 542-43 (9th Cir. 2013)* (quoting *Wal-Mart Stores, Inc. v. Dukes, 564 U.S. 338, 351, 131 S. Ct. 2541, 180 L. Ed. 2d 374 (2011))*.

Third, plaintiffs must show their proposed classes fulfill one of *Rule 23(b)*'s three requirements. In the present case, Plaintiffs seek to certify both of their proposed classes under *Rule 23(b)(3)*. A court may certify **[**14]** a class under

---

[1] JAL was originally a defendant in this suit, but settled in July, 2014. See Am. Settlement Agreement (dkt. 999-2). JAL remains relevant in this motion because a clause of its settlement reserved the right to hold other Defendants jointly and severally liable for JAL sales of passenger air transportation, "to the extent permitted and/or authorized by U.S. law." Id. ¶ 9.

[2] Plaintiffs also recently filed a motion to strike certain materials that ANA "submitted in connection with its memorandum in opposition to Plaintiffs' motion for class certification." Pls.' Mot. to Strike (dkt. 1188). It is not necessary to rely on any of the allegedly objectionable materials to answer the dispositive questions in the present motion. Therefore, the Court DENIES this motion as moot.

[3] This ascertainability requirement is not explicitly required by the Federal Rules of Civil Procedure, but courts in this district routinely require plaintiffs to demonstrate it as part of *Rule 23* class certification motions. See, e.g., *Astiana v. Ben & Jerry's Homemade, Inc., No. C 10-4387 PJH, 2014 U.S. Dist. LEXIS 1640, at *4 (N.D. Cal. Jan. 7, 2014)* ("[A]part from the explicit requirements of *Rule 23*, the party seeking class certification must also demonstrate that an identifiable and ascertainable class exists."); *Viet. Veterans of Am. v. C.I.A., 288 F.R.D. 192, 211 (N.D. Cal. 2012))* ("While it is not an enumerated requirement of *Rule 23*, courts have recognized that . . . 'to maintain a class action, the class sought to be represented must be adequately defined and clearly ascertainable.'" (quoting *DeBremaecker v. Short, 433 F.2d 733, 734 (5th Cir. 1970)))*.

In a recent opinion, the Ninth Circuit rejected instituting a "separate administrative feasibility prerequisite" for class certification. *Briseno v. Conagra Foods Inc., 844 F3d 1121, 1123-24 (9th Cir. 2017)*. However, this is distinct from requiring that classes be clearly or objectively defined. See *id. at 1124 n.3*.

Rule 23(b)(3) when (1) "questions of law or fact common to class members predominate over any questions affecting only individual members," and (2) "a class action is superior to other available methods for fairly and efficiently adjudicating the controversy." *Fed. R. Civ. P. 23(b)(3)*. These two requirements are often referred to as "predominance" and "superiority."

In analyzing a class certification motion, a court may consider merits questions "to the extent—but only to the extent—that they are relevant to determining whether the *Rule 23* prerequisites for class certification are satisfied." *Amgen Inc. v. Conn. Ret. Plans & Tr. Funds, 568 U.S. 455, 466, 133 S. Ct. 1184, 185 L. Ed. 2d 308 (2013)*. Although this certification inquiry may involve substantive analysis, "[t]he court may not go so far . . . as to judge the validity" of a plaintiff's claims. *Staton v. Boeing Co., 327 F.3d 938, 954 (9th Cir. 2003)*.

III. DISCUSSION

This order first reviews the certified class definitions, and then explains the Court's reasoning on whether Plaintiffs' proposed classes meet the ascertainability requirement, *Rule 23(a)*'s four requirements, and *Rule 23(b)(3)*'s two requirements in turn.

A. Class Definitions

At a hearing before this Court on August 3, 2018, the parties discussed and agreed to **[*555]** several modifications to the class definitions as proposed in Plaintiffs' motion. The class definitions below reflect **[**15]** these modifications.

> **Japan Class**. Adjusted definition as follows:
> All persons and entities that directly purchased tickets for passenger air transportation from Japan Airlines International Company, Ltd. ("JAL") or All Nippon Airways Corporation, Ltd. ("ANA"), or any predecessor, subsidiary or affiliate thereof, that originated in the United States and included at least one flight segment from the United States to Japan between the period beginning February 1, 2005 and ending December 31, 2007. Excluded from the class are any tickets that did not include a fuel surcharge. Excluded from the class are any antitrust immunized fares agreed upon at IATA 'Tariff Coordinating Conferences.' Excluded from the class are tickets exclusively acquired through award or reward travel or any tickets acquired for infant travel with a 90% discount. Also excluded from the class are purchases by government entities, Defendants, any parent subsidiary or affiliate thereof, and Defendants' or any other commercial airline's officers, directors, employees, agents, and immediate families ("Japan Class").
>
> **Satogaeri Class**. Adjusted definition as follows:
>
> All persons and entities that directly purchased satogaeri **[**16]** fares from JAL or ANA or any predecessor, subsidiary or affiliate thereof that originated in the United States and included at least one flight segment to Japan and does not include travel to countries other than the United States and Japan between the period beginning January 1, 2000 and ending April 1, 2006. Excluded from the class are purchases by government entities, Defendants, any parent subsidiary or affiliate thereof, and Defendants' officers, directors, employees and immediate families. Also excluded are purchases of "Satogaeri Special" and maerui satogaeri fares ("Satogaeri Class," and collectively with the Japan Class, the "Classes").

Concurrent Classes. These two classes are not mutually exclusive. Between February 2005 and March 2006, all satogaeri fares sold would have also included a fuel surcharge. Tr. Proceedings (dkt. 1192) at 9. Therefore all Satogaeri Class members purchasing a ticket during this period are also members of the proposed Japan Class, barring unusual circumstances in individual cases.

B. Ascertainability

A class is not ascertainable unless membership can be established by means of objective, verifiable criteria. *Xavier v. Philip Morris USA, Inc., 787 F. Supp. 2d 1075, 1088-90 (N.D. Cal. 2011)*. "Without an objective, reliable way to ascertain class membership, **[**17]** the class quickly would become unmanageable, and the preclusive effect of final judgment would be easy to evade." *Id. at 1089*. Nonetheless, "not all class members need to be ascertained prior to class certification." *Mauto v. Gen. Motors Corp., No. 07-892, 2008 U.S. Dist. LEXIS 93897, 2008 WL 2775004, at *4 (E.D. Cal. July 15, 2008)* (citation omitted).

In this case, Plaintiffs can fulfill the ascertainability requirement for both of their proposed classes.

Japan Class. The proposed class is defined by objective, verifiable criteria: people who directly bought price-fixed tickets, and suffered as a result. Plaintiffs' expert showed that class members can be verified with the transaction data that ANA and JAL have already produced. See Mangum Rpt. (dkt. 1119-2) ¶ 19.

Defendant argues that the Japan Class is not ascertainable because Plaintiffs have not offered a method for separating class members who are direct purchasers from those who are indirect purchasers under Illinois Brick.[4] This Court's recent order forecloses this argument. See Order Den. Mot. Summ. J.

[*556] **Satogaeri Class**. Similarly, Plaintiffs' expert demonstrated that Satogaeri Class members can be verified with the transaction data that ANA and JAL have already produced. See Mangum Rpt. ¶ 19.

Defendant does not dispute the ascertainability of the Satogaeri **[**18]** Class.

C. *Rule 23(a)* Factors

1. Numerosity

The class must be "so numerous that joinder of all members is impracticable." See *Fed. R. Civ. P. 23(a)(1)*. "Although there is no exact number, some courts have held that numerosity may be presumed when the class comprises forty or more members." *Krzesniak v.Cendant Corp., No. C 05-05156 MEJ, 2007 U.S. Dist. LEXIS 47518, at *19 (N.D. Cal. June 20, 2007)*. The plaintiff does not need to allege a precise number of class members, but may make a reasonable estimate. See *Whiteway v. FedEx Kinko's Office & Print Servs., No. C 05-2320 SBA, 2006 U.S. Dist. LEXIS 69193, at *11 (N.D. Cal. Sept. 13, 2006)*.

Plaintiffs' proposed classes have well over the required number of members, and they make reasonable estimates based on the transactional data produced by JAL and ANA. See Mot. Class Cert. at 14. Plaintiffs' proposed classes both satisfy the numerosity requirement.

Japan Class. Plaintiffs demonstrate that there are approximately 1.1 million itineraries in the transactional data that meet the definition of the Japan Class. See id.; Mangum Rpt. ¶ 8. Defendant does not dispute the numerosity of the Japan Class.

Satogaeri Class. Plaintiffs assert there are more than 147,000 itineraries in the transactional data that meet the definition of the Satogaeri class. See **[**19]** Mot. Class Cert. at 14; Mangum Rpt. ¶ 8.

Defendant maintains that all purchasers in the Satogaeri Class are "indirect purchasers" under Illinois Brick, and therefore Plaintiffs have "defined a class that has zero members." Opp'n (dkt. 1157) at 16. This argument is foreclosed by this Court's recent order. See Order Den. Mot. Summ. J.

Accordingly, Plaintiffs' proposed classes meet the numerosity requirement.

---

[4] *Illinois Brick Co. v. Illinois, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)* (barring indirect purchasers from recovering treble damages for overcharges resulting from a price-fixing conspiracy).

2. Commonality

The commonality requirement demands that there be "questions of law or fact common to the class." *Fed. R. Civ. P. 23(a)(2)*. Commonality is satisfied where "claims . . . depend upon a common contention . . . . of such a nature that it is capable of classwide resolution—which means that determination of its truth or falsity will resolve an issue that is central to the validity of each one of the claims in one stroke." *Dukes, 564 U.S. at 350*.

Both of Plaintiffs' proposed classes easily satisfy this requirement. "Where an antitrust conspiracy has been alleged, courts have consistently held that 'the very nature of a conspiracy antitrust action compels a finding that common questions of law and fact exist.'" *In re Dynamic Random Access Memory (DRAM) Antitrust Litig., No. M 02-1486 PJH, 2006 U.S. Dist. LEXIS 39841, 2006 WL 1530166, at *3 (N.D. Cal. June 5, 2006)* **[**20]** (quoting *In re Rubber Chem. Antitrust Litig., 232 F.R.D. 346, 351 (N.D. Cal. 2005))*. That is the case here: both of the proposed classes allege harm resulting from an antitrust price-fixing conspiracy. Additionally, Defendant does not dispute the commonality of either proposed class. The commonality requirement is met.

3. Typicality

The typicality requirement is met if "the claims or defenses of the representative parties are typical of the claims or defenses of the class." *Fed. R. Civ. P. 23(a)(3)*. Representative claims need only be "reasonably co-extensive with those of absent class members; they need not be substantially identical." See *Hanlon v. Chrysler Corp., 150 F.3d 1011, 1020 (9th Cir. 1998)*.

Like commonality, "there is substantial legal authority holding in favor of a finding of typicality in price fixing conspiracy cases, even where differences exist between plaintiffs and absent class members with respect to pricing, products, and/or methods of purchasing products." See *DRAM, 2006 U.S. Dist. LEXIS 39841, 2006 WL 1530166, at *5*.

[*557] In this case, Defendant's price-fixing conspiracy is the underlying course of conduct allegedly causing damages to both of Plaintiffs' proposed classes. Because the named Plaintiffs and all absent class members share these claims and this liability theory, these classes satisfy the typicality requirement.

Japan Class. The record expressly states that **[**21]** three of the four named Plaintiffs paid the fuel surcharge. See Mangum Rpt. ¶ 19. The record does not indicate if the remaining named Plaintiff (Della Ewing Chow) paid the surcharge,[5] but even if this Plaintiff is omitted, the class would survive. See id.

Defendant disputes typicality on the grounds that the named Plaintiffs purchased their tickets through travel agents, and are therefore not representative of "direct purchasers." Opp'n at vii. This argument is no longer valid after this Court's recent order. See Order Den. Mot. Summ. J.

Satogaeri Class. The record explicitly shows that the three named Satogaeri Class Plaintiffs purchased satogaeri fares during the class period. See Mangum Rpt. ¶ 19.

Defendant does not dispute the typicality of Satogaeri Class representatives. Accordingly, the typicality requirement is met for both classes.

4. Adequacy

[5] Even without express evidence, it is likely that Della Chow did pay the surcharge: Plaintiffs note that that "ANA and JAL's fuel surcharge was applied to all passengers, in all booking classes, for all routes originating in the United States" during the proposed class period. Mot. Class Cert. at 3.

The adequacy requirement asks whether the class representatives "will fairly and adequately protect the interests of the class." See *Fed. R. Civ. P. 23(a)(4)*. Courts determine whether the named plaintiffs and counsel will (1) have any conflicts of interest with other class members and (2) prosecute the action vigorously on behalf of the class. See *Hanlon, 150 F.3d at 1020*.

Plaintiffs' proposed **[**22]** classes satisfy this requirement. The named Plaintiffs and counsel have no discernable conflicts of interest with absent class members, as they seek the same relief and share an identical interest in proving Defendant's liability. See Mot. Class Cert. at 15. Each named Plaintiff has actively participated in the litigation, and Plaintiffs' counsel has vigorously pursued this litigation since 2007. See id. at 15-16; Compl. (filed Nov. 6, 2007).

Japan Class. Defendant argues that the named Plaintiffs for the Japan Class are inadequate, again based on their indirect-purchaser theory. Opp'n at 20-22. Defendant asserts that since all the named Plaintiffs for the Japan Class purchased their tickets through travel agents, none of them are adequate representatives of class members who "directly purchased" their tickets. Mot. Class Cert. at i (emphasis added). This argument also fails in light of this Court's recent order. See Order Den. Mot. Summ. J.

Satogaeri Class. Defendant does not dispute the adequacy of the proposed Satogaeri Class representatives.

Accordingly, the adequacy requirement is met for both classes.

C. *Rule 23(b)(3)*

Plaintiffs seek to certify both of their proposed classes under *Rule 23(b)(3)*. To do so, Plaintiffs must **[**23]** satisfy *Rule 23(b)(3)*'s predominance and superiority requirements by showing that "[c]ommon questions . . . predominate over any questions only individual members; and class resolution is superior to other available methods for the fair the efficient adjudication of the controversy." See *Amchem Prods. v. Windsor, 521 U.S. 591, 615, 117 S. Ct. 2231, 138 L. Ed. 2d 689 (1997)*.

1. Predominance

Rule 23(b)(3)'s first test, predominance, itself consists of two parts. First, a plaintiff must show that common questions of law and fact predominate over individual questions. Second, a plaintiff must present a model of damages that (1) identifies damages that stem from the defendant's alleged wrongdoing and (2) is "susceptible of measurement across the entire class." **[*558]** *Comcast Corp. v. Behrend, 569 U.S. 27, 133 S. Ct. 1426, 1433-34, 185 L. Ed. 2d 515 (2013)*.

a. Individual Determinations

Rule 23(b)(3)'s predominance requirement is more stringent than *Rule 23(a)(2)*'s commonality requirement, and "tests whether the proposed classes are sufficiently cohesive to warrant adjudication by representation." *Amchen, 521 U.S. at 623*.

Plaintiffs satisfy this part of the predominance inquiry due to the nature of Defendant's alleged antitrust violation. See, e.g., *Amchen, 521 U.S. at 625* (showing this part of the predominance test is "readily met in certain cases alleging . . . violations of the antitrust laws."); *DRAM, 2006 U.S. Dist. LEXIS 39841, 2006 WL 1530166, at *3* ("Where an antitrust conspiracy has been alleged, courts have consistently **[**24]** held that 'the very nature of a conspiracy antitrust action compels a finding that common questions of law and fact exist.'" (quoting *Rubber Chem., 232 F.R.D. at 351*)); *Thomas & Thomas Rodmakers, Inc. v. Newport Adhesives & Composites, Inc., 209 F.R.D. 159, 167 (C.D. Cal. 2002)* ("In price-fixing cases, 'courts repeatedly have held that the existence of the conspiracy is the predominant issue and warrants certification even where significant individual issues are present.'" (quoting *In* re NASDAQ Market-Makers Antitrust Litig., 169 F.R.D. 493, 518 (S.D.N.Y. 1996))). Plaintiffs' proposed classes will "prevail or fail in unison" based on the common question of the Defendant's guilt. See Amgen, 568 U.S. at 460.

Plaintiffs present extensive evidence of Defendant's participation in collusive behavior, but even if they had not, certification would still be proper. Proof is not a prerequisite for class certification. See id. at 459 ("Rule 23(b)(3) requires a showing that questions common to the class predominate, not that those questions will be answered, on the merits, in favor of the class.").

b. Damages

To satisfy the second part of the predominance inquiry, a plaintiff must present a damages model that identifies damages that stem from the defendant's alleged wrongdoing and that is "susceptible of measurement across the entire class." Comcast, 133 S. Ct. at 1433-34. In antitrust cases, this requirement will be met "if the plaintiffs can prove . . . that there has been an antitrust **[**25]** violation and that each class member has suffered an antitrust injury." 6 Newberg on Class Actions § 20:52 (5th ed. 2018). "At class certification, plaintiff must present 'a likely method for determining class damages,' though it is not necessary to show that his method will work with certainty at this time." Chavez v. Blue Sky Natural Beverage Co., 268 F.R.D. 365, 379 (2010) (quoting In re Tableware Antitrust Litig., 241 F.R.D. 644, 652 (N.D. Cal. 2007)). The need for individualized damage calculations alone cannot defeat class certification. See Leyva v. Medline Indus., Inc., 716 F.3d 510, 513 (9th Cir. 2013) (citing *Yokoyama v. Midland Nat'l Life Ins. Co., 594 F.3d 1087, 1094 (9th Cir. 2010))*.

This Order will first summarize Plaintiffs' proposed damage model for each class, and then briefly address Defendant's objections.

(1) Plaintiffs' Proposed Damage Models

Japan Class. Plaintiffs' expert created an econometric model using data produced by JAL and ANA demonstrating the class-wide impact of the Defendant's alleged conspiracy. Mot. Class Cert. at 19. This model aggregates the ticket pricing information during the alleged conspiracy period, and compares it with ticket pricing information from before the alleged conspiracy began. See id.; Mangum Rpt. ¶¶ 157-59. By comparing this information, Plaintiffs assert that their model can determine a "but for" price—i.e., the price that Japan Class members would have paid for their tickets "but for" the alleged conspiracy. **[**26]** Mot. Class Cert. at 20. Their expert uses the model to estimate an average overcharge of 8.33% for itineraries purchased by the Japan Class. See id. This calculation applies to the total cost of the itinerary, not solely the fuel surcharge component of the itinerary. When applied class-wide, the model estimates that Japan Class members paid an aggregate of $94 million in overcharges. See id. at 21.

[*559] Plaintiffs calculate individual damages by comparing economic damages with the fuel surcharge paid by the passenger. The passenger would be eligible to recover either the amount of the fuel surcharge or the economic damages, whichever is lower. See Mangum Rpt. ¶ 183.

Satogaeri Class. Plaintiffs use a different methodology to estimate Satogaeri Class damages: instead of comparing pricing information to a different time period, they compare pricing information with the "closest alternative to Satogaeri fares."[6] Plaintiffs' expert uses this method to estimate that class members paid between 7.1% and 9.1% more for their base fares as a result of Defendant's collusion. Mangum Rpt. ¶¶ 207-09. This estimate applies to the

---

[6] Plaintiffs' expert selects two alternatives: a "Super Value Fare" and a maerui satogaeri fare. See Mangum Rpt. ¶¶ 203-11. Plaintiffs chose this method due to a lack of data, which prevented the use of same type of benchmark model used in the Japan Class analysis. See id. ¶ 203 ("The econometric methodology that I implement above to measure the overcharge for Japan class members cannot be used for the Satogaeri Class because the misconduct started as early as 1997 and I have no information based on the prices that were being charged for Satogaeri fares prior to the start of the alleged cartel behavior.").

base fare, not the total cost of the ticket. When applied class-wide, this model estimates **[**27]** that Satogaeri class members suffered aggregate damages of $22.5 million to $28.9 million in overcharges. Id. ¶ 211.

Individual damages would be calculated by multiplying the overcharge estimate (i.e., 7.1%-9.1%) to the base fare component of the overall ticket price.

(2) Defendant's Challenges to "Predominance" Requirement

Arguing that Plaintiffs cannot demonstrate predominance, Defendant submits various theories, which fall into two overlapping categories: (1) challenges to Plaintiffs' method of calculating aggregate damages, and (2) challenges to Plaintiffs' ability to prove that individual class members suffered damages.

(a) Challenges to Plaintiffs' Aggregate Damages Model

Defendants assert that there are various deficiencies with Plaintiffs' expert's damages model, including: (1) failure to account for "yield-management" software systems; (2) exclusion of certain Japan Class itineraries; (3) the presence of "false positives;" (4) failure to account for individual consumer preferences, which may induce customers to make purchasing decisions based on factors other than price; and (5) the use of averages to mask variability among the proposed class members, **[**28]** "many of which . . . did not suffer harm." Opp'n at v, 3, 10.[7]

Some of these asserted deficiencies may be valid. However, "the issue at class certification is not which expert is the most credible, or the most accurate modeler, but rather have the plaintiffs demonstrated that there is a way to prove a class-wide measure of [impact] through generalized proof." *In re TFT-LCD (Flat Panel) Antitrust Litig., 267 F.R.D. 583, 604 (N.D. Cal. 2010)*, amended in part, *No. M 07-1827 SI, 2011 U.S. Dist. LEXIS 84476, 2011 WL 3268649 (N.D. Cal. July 28, 2011)*; see also *In re Optical Disk Drive Antitrust Litig., No. 3:10-MD-2143 RS, 2016 U.S. Dist. LEXIS 15899, 2016 WL 467444, at *7 (N.D. Cal. Feb. 8, 2016)* (certifying antitrust class even though "Defendants and their expert advance a litany of supposed defects in [the plaintiff's expert's] analysis" of antitrust impact). Merits questions can be resolved at trial. See *Comcast, 133 S. Ct. at 1433* (noting that "any model supporting a plaintiff's damages case must be consistent with its liability case," but "[c]alculations need not be exact" at the class certification stage); **[*560]** *Amgen, 568 U.S. at 460* (noting that forcing plaintiffs to prove the merits of their case at the class certification stages would be "put[ting] the cart before the horse.").

Plaintiffs' proposed aggregate damages models are plausible **[**29]** and consistent with their theory of liability. Accordingly, they are sufficient to pass the class certification stage. Plaintiffs will have to prove the merits of their models at trial, when this Court will scrutinize them closely with the benefit of additional evidence and testimony.

(b) Challenges to Proof of Individual Impact

Defendant next asserts that Plaintiffs fail to demonstrate that each proposed class member has suffered an antitrust injury. Defendant relies on three lines of argument. First, Defendant argues that Plaintiffs present no proof that class members who purchased their tickets from travel agents[8] suffered damages. Second, Defendant asserts that

---

[7] Defendant also moves to strike the testimony of Plaintiffs' expert as inadmissible under *Federal Rule of Evidence 702* and *Daubert v. Merrill Dow Pharmaceuticals, Inc., 509 U.S. 579, 113 S. Ct. 2786, 125 L. Ed. 2d 469 (1993)*. Def.'s Mot. to Strike (dkt. 1206). Defendant's motion is based on objections to the expert's methodology similar to those made in its Opposition brief. See Opp'n at v, 3, 10. Daubert requires courts to "ensure the reliability and relevancy of expert testimony." *Kumho Tire Co. v. Carmichael, 526 U.S. 137, 151-52, 119 S. Ct. 1167, 143 L. Ed. 2d 238 (1999)*. This requirement is met here: Plaintiffs' expert employs widely-recognized and reliable methodologies. See 2A Phillip E. Areeda et al., ***Antitrust Law***: An Analysis of Antitrust Principles and Their Application ¶¶ 398-99 (4th ed. 2014). Accordingly, this Court DENIES Defendant's motion to strike.

Plaintiffs have not shown that higher fuel surcharges would necessarily result in higher ticket prices for Japan Class members. Third, Defendant argues that large segments of the Japan Class members paid lower prices as a result of the price-fixing conspiracy, and therefore did not suffer an antitrust injury.

Defendant's first line of argument is foreclosed by this Court's earlier order. See Order Den. Mot. Summ. J. Plaintiffs are not indirect purchasers under *Illinois Brick*, and therefore they suffered direct antitrust **[**30]** injury.

Defendant's second and third lines of argument both assert that large percentages of particular subsets of the Japan Class did not suffer an antitrust injury. Therefore, Defendant argues, the class should not be certified due to Plaintiffs' "failure to demonstrate that 'all or virtually all' class members were injured." Opp'n at 5 (quoting *In re Rail Freight Fuel Surcharge Antitrust Litig., 292 F. Supp. 3d 14, 2017 WL 5311533, at *87 (D.D.C. Nov. 13, 2018))*.

Plaintiffs assert that fuel surcharge increases represent price increases to passengers. See Mangum Rpt. ¶ 37. This is partially based on a common-sense theory that "there would be no reason to collude on fuel surcharges if [ANA and JAL] were going to continue to compete on base fares." Id. ¶ 182. Plaintiffs also rebut Defendant's theoretical assertion with a practical examination of the data. Plaintiffs' expert purportedly found "no decline in base fares when fuel surcharges were implemented, indicating that there was no base fare offset for fuel surcharges." Mot. Class Cert. at 3; see also Mangum Rpt. ¶ 95. He ultimately determined that "95.7% of the Japan Class itineraries were impacted by ANA's allegedly anticompetitive conduct." Reply (dkt. 1190) at 5.

Plaintiffs proposed **[**31]** classes meet the predominance requirements. Even if a small number of customers of Japan Class members received discounted fares, it is not an obstacle to class certification. See *Tyson Foods, Inc. v. Bouaphakeo, 136 S. Ct. 1036, 1043, 194 L. Ed. 2d 124 (2016)* (affirming district court certification of a class of 3,344 members even though it was "undisputed that hundreds of class members suffered no injury in the case."); *Ruiz Torres v. Mercer Canyons Inc., 835 F.3d 1125, 1137 (9th Cir. 2016)* (concluding that in cases where the defendant asserts "the potential for unlawful conduct in the absence of harm," the "fortuitous non-injury to a subset of class members does not necessarily defeat certification of the entire class."); *In re Rail Freight, 292 F. Supp. 3d 14, 2017 WL 5311533, at *87* (suggesting that if more than 5% or 6% of class members are uninjured, the class is un-certifiable).

Defendant will have the opportunity to present evidence on the merits of Plaintiffs' approach during the trial. And the Court reserves the right, upon presentation of further evidence and testimony subject to cross-examination, to de-certify either or both classes. But for now, Plaintiffs have adequately demonstrated that "all or virtually all" of their proposed classes suffered an injury. See *In re Rail Freight, 292 F. Supp. 3d 14, 2017 WL 5311533, at *87*. Accordingly, Plaintiffs' proposed **[*561]** classes satisfy the predominance requirement.

2. Superiority

To fulfill *Rule 23(b)(3)*'s superiority **[**32]** requirement, Plaintiffs must show "that a class action is superior to other available methods for fairly and efficiently adjudicating the controversy." A court must consider *Rule 23(b)(3)*'s four factors.[9] See *Zinser v. Accufix Research Institute, Inc., 253 F3d 1180, 1190 (9th Cir. 2001)*.

Plaintiffs' proposed classes meet the superiority requirement. It would be inefficient and cost prohibitive to litigate hundreds of thousands of individual proceedings, rather than on a class-wide basis. Plaintiffs also correctly point

---

[8] This includes all Satogaeri Class members, and some subset of Japan Class members who purchased their transpacific airfare from travel agents. Defendant estimates this subset to be at least 37.5% of the Japan Class. See Opp'n at 10.

[9] These factors are: "(a) the class members' interests in individually controlling the prosecution or defense of separate actions; (b) the extent and nature of any litigation concerning the controversy already begun by or against class members; (c) the desirability or undesirability of concentrating the litigation of the claims in the particular forum; and (d) the likely difficulties in managing a class action." *Fed. R. Civ. P. 23(b)(3)(A-D)*.

out that "[t]he prosecution of separate actions by individual class members would . . . create the risk of inconsistent rulings, and could result in prejudice to the Plaintiffs and absent class members." See Mot. Class Cert. at 22.

It is administratively feasible to identify class members. See *Briseno, 844 F.3d at 1128*. Though the airline transaction data JAL and ANA have already produced in discovery does not allow one to match passenger names to the itineraries, Reply at 6, Plaintiffs demonstrate they are able to use this information to verify proposed class members' claims, Mangum Rpt. ¶ 19. Moreover, it should not be hard for class members to self-identify. International airline travel is a major expense, and potential class members would likely recall their purchase.[10] Many class **[**33]** members may have a record of their purchases, particularly if they paid by credit card. See Stone Decl. ¶ 38 (showing that since 2000, over 98% of airline ticket sales are paid by credit card). In the event that class members do not produce sufficient proof of their purchase, Defendant will have an opportunity to "individually challenge the claims of absent class members if and when they file claims for damages." *Briseno, 844 F.3d at 1131*; see also *Marcus v. BMW of N. Am., LLC, 687 F.3d 583, 594 (3rd Cir. 2012)* (stating that forcing the defendants to "accept as true absent persons' declarations that they are members of the class, without further indicia of reliability, would have serious due process implications.").

Defendant does not dispute the superiority requirement of either proposed class.

Japan Class. As stated in the 'numerosity' discussion, Plaintiffs assert that there are already 1.1 million itineraries within the transaction data produced by ANA and JAL. Mot. Class Cert. at 14. Under Plaintiffs' expert's proposed damages model, no single member of the Japan Class would be awarded more than $113. See Mangum Rpt. at ¶¶ 52, 183. This is clearly not a large enough sum to sustain individual proceedings, nor is the federal court system equipped to adjudicate **[**34]** hundreds of thousands of separate actions.

Satogaeri Class. Plaintiffs estimate that there are more than 147,000 itineraries that meet the definition of the Satogaeri Class. Mot. Class Cert. at 14. Plaintiffs' expert estimates that class-wide damages range between $22.5 and $28.9 million. Id. at 21. Even assuming the highest damages proposed by Plaintiffs' model, class members would still receive less than $200 on average. Again, this is clearly not a large enough sum to sustain individual proceedings, nor could the court system efficiently adjudicate 147,000 individual claims.

IV. CONCLUSION

Plaintiffs' proposed classes meet the requirements for class certification. Merit **[*562]** questions will be resolved at the upcoming trial.

The Court hereby GRANTS Plaintiffs' class certification motion.

IT IS SO ORDERED.

Dated: August 8, 2018

Judges: JOSE L. LINARES, Chief United States District Judge.

Opinion by: JOSE L. LINARES

Opinion

LINARES, Chief District Judge.

This matter comes before the Court by way of Defendants Delta Chemical Corporation ("Delta Chemical"), John D. Besson, and Rebecca L. Besson's Motion to Dismiss Plaintiffs Washington Suburban Sanitary **[*30]** Commission ("WSSC"), Mayor and City Council of Baltimore ("Baltimore City"), and City of Richmond ("Richmond")'s Amended Complaints (ECF Nos. 555, 652, and 653) pursuant to *Rule 12(b)(6) of the Federal Rules of Civil Procedure* and Strike Certain Allegations pursuant to *Rule 12(f) of the Federal Rules of Civil Procedure*. (ECF No. 901). Plaintiffs have submitted Opposition (ECF No. 902),[1] to which the Defendants have replied. (ECF No. 904). The Court decides this matter without oral argument pursuant to *Rule 78 of the Federal Rules of Civil Procedure*. For the reasons set forth below, the Court denies Defendants' Motion to Dismiss and Strike Certain Allegations.

I. BACKGROUND[2]

---

[1] An additional copy of Plaintiffs' Opposition was filed at a later time. (ECF No. 1002). Said Opposition is identical to the originally filed brief. Accordingly, the Court will rely on the arguments set forth by Plaintiff in their original Opposition. (ECF No. 902).

[2] For purposes of brevity, the Court will only cite to the WSSC Amended Complaint whenever the WSSC, Baltimore City, and/or Richmond Amended Complaints allege similar facts. Hence, this background is generally derived from Plaintiff WSSC's Amended Complaint ("Compl."), which was originally docketed in Civ. Action No. 17-11416. (ECF No. 1). The Court must accept

The Court has set forth, at length, the factual and procedural background as it pertains to this Multidistrict Litigation in its Opinion dated July 20, 2017. (ECF No. 405 at 1-24). Accordingly, the Court need not restate, and hereby incorporates, same herein. Thus, the Court will only set forth the relevant factual and procedural background as it pertains to these specific Defendants and their motions.

Plaintiffs brought this action seeking to recover monetary damages and injunctive relief against Delta Defendants for conspiring to suppress and eliminate competition in the sale and marketing of aluminum sulfate ("Alum"), pursuant to the Sherman Antitrust Act, **[*31]** *15 U.S.C. § 1, et seq.*, the Clayton Antitrust Act, *15 U.S.C. §§ 12-17* & *29 U.S.C. §§ 52-53*, and the laws of the State of Maryland. (Compl. ¶ 1). Plaintiffs contend that Delta Defendants agreed to "rig bids and allocate customers for, and to fix, stabilize, inflate, and maintain the price of, Alum sold to companies, municipal authorities, and governmental subdivisions in the United States from January 1, 1997 through at least February 2011 . . . ." (Id. ¶ 1). Specifically, Plaintiffs allege that Delta Defendants met to "discuss their respective Alum businesses," agreed to "'stay away' from each other's historical customers," submitted "intentionally high," or "throw away" bids, and withdrew winning bids "in cases where a bid was inadvertently submitted." (Id. ¶ 4).

Defendant John D. Besson is presently a resident of Miami Beach, Florida. (Id. ¶ 20). He was the president of Delta Chemical and "oversaw its sale and marketing of water treatment chemicals, including Alum," in addition to "effectuating attempts" to sell or merge Delta Chemical with another company. (Id. ¶ 20). Plaintiffs allege that Defendant John Besson "joined, participated in, and benefitted from the unlawful [Alum] conspiracy." (Id. ¶ 20). Defendant Rebecca L. Besson is presently **[*32]** a resident of Miami Beach, Florida and was the chairperson of Delta Chemical's board of directors. (Id. ¶ 21). Plaintiffs aver that Defendant Rebecca Besson "knew or should have known about the unlawful [Alum] conspiracy ..., but allowed it continue and profited substantially from it." (Id. ¶ 21). After Delta Chemical combined with USALCO in November 2011, Defendants John and Rebecca Besson became USALCO consultants. (Id. 1121).

Defendant Delta Chemical is a Maryland corporation which sold Alum throughout the United States with a principal place of business in Baltimore. (Id. ¶ 51). Plaintiffs allege that "[f]rom the beginning of the Conspiracy Period to the date USALCO combined with Delta Chemical on November 17, 2011, Delta Chemical was an active participant in, and benefitted from, the conspiracy." (Id. ¶ 51). Moreover, "[a]s a result of [Defendant] Delta Chemical's combination with USALCO, [Defendant] Delta Chemical ceased to be a potential competitor in the sale and marketing of Alum." (Id. ¶ 51). Plaintiffs contend that the combination "was made in furtherance of, and intended to reinforce, the Defendant's unlawful conspiracy .. . by increasing USALCO's market power and eliminating the **[*33]** possibility of competition emerging . . . ." (Id. ¶ 52). Plaintiffs also argue that Defendants John and Rebecca Besson "profited handsomely" from the combination. (Id. ¶ 53).

Prior to the combination, Defendant Delta Chemical sold Alum to Plaintiffs WSSC and Baltimore directly as well as indirectly through C&E Services, Inc. ("C&E Services"), located in Washington, D.C. (Id. ¶ 54). Plaintiffs assert that, Defendant Delta Chemical, C&E Services, or USALCO would always be the "winning" bidder despite solicitation of bids from outside Alum providers. (Id. ¶ 54). Additionally, Plaintiffs allege that Defendant Delta Chemical's contracts for polyaluminum chloride ("PAC") "raise similar concerns [of conspiratorial conduct]." (Id. 131). Specifically, Delta Chemical submitted the winning bid in a 2004 PAC contract with Plaintiff WSSC at a rate of $1,376.00 per ton. (Id. 1-131). In 2009, Defendant Delta Chemical again submitted a winning bid for a PAC with Plaintiff WSSC at a price of $2,380.00 per ton, a ***more than 72% increase***. (Id. ¶ 131) (emphasis in original). The next lowest bid was submitted for $7,250.00 per ton (three times Defendant Delta Chemical's winning bid) by Intercoastal Trading, Inc. (Id. ¶ **[*34]** 131).[3]

the allegations therein as true at this stage of the proceedings. *See* *Alston v. Countrywide Fin. Corp., 585 F.3d 753, 758 (3d Cir. 2009)*.

[3] Plaintiffs' contention that Delta Defendants' use of PAC contracts in furtherance of the conspiracy alleged herein is found solely in the WSSC Amended Complaint. (ECF No. 555 at ¶ 131).

Plaintiff's WSSC and Baltimore City purchased Alum from Defendant Delta Chemical via "requirement contracts" at an as-needed basis from 1997 through early-2005. (Id. ¶ 246). "For example, WSSC solicited bids for new Alum contracts to begin in 2003 and 2004." (Id. ¶ 246). In both instances, Plaintiff WSSC received bids from Defendant Delta Chemical and General Chemical Corporation. (Id. ¶ 246). In 2004, Plaintiff WSSC "solicited bids for a new Alum contract" and C&E Services was the only bidder. (Id. ¶ 247). Plaintiff WSSC alleges that, "as part of and in furtherance of the conspiracy," C&E Services consistently raised the price it charged Plaintiff WSSC for Alum via the 2005 contract and, "[a]s a result, the price per ton of Alum increased by approximately 60%" from "$185.85 per ton to $314.00 per ton." (Id. ¶ 248). On December 23, 2008, C&E Services submitted a notification from Defendant Delta Chemical justifying an increase in Alum prices because of the "sulfuric acid market," a necessary component for making Alum. (Id. ¶ 249). However, Plaintiff WSSC contends that this justification stood in contrast to a decline in the price of sulfuric acid "***by more than a third***" from its **[*35]** October 2008 index price by December 2008. (Id. ¶ 249) (emphasis in original). In 2009, Plaintiff WSSC solicited bids for a new Alum contract through "BidBridge, an online solicitation and bidding platform," but only received three bids. (Id. ¶ 251). Defendant Delta Chemical submitted the winning bid at $304.00 per ton and C & S Chemicals, Inc. allegedly submitted a "throw away" bid of $537.00 per ton. (Id. ¶ 251).

After USALCO combined with Defendant Delta Chemical, USALCO raised the price it charged Plaintiff WSSC for Alum through the 2009 contract from $304.00 per ton to $311.50 per ton. (Id. ¶ 252). Plaintiff WSSC argues that the prices which USALCO charged for Alum were substantially similar to those charged by Defendant Delta Chemical prior to the combination and further demonstrate that "both [Defendant] Delta Chemical and USALCO were members of the conspiracy." (Id. ¶ 253). In April 2014, Plaintiff WSSC received a bid for a new Alum contract from USALCO for $314.19 per ton and a bid from Chemtrade, General Chemical's "successor-in-interest," for $422.00 per ton. (Id. ¶ 254). Plaintiff WSSC contends that "Chemtrade's bid, which was $107.81 (34.3%) more than USALCO's bid, was **[*36]** a 'throw away' bid made in furtherance of the conspiracy." (Id. ¶ 254).

Plaintiff Baltimore City makes similar allegations against Delta Defendants regarding Alum contract bidding. In 2006, Plaintiff Baltimore City received two bids and Defendant Delta Chemical submitted the winning bid. (ECF No. 652 at ¶ 153). In 2008, Defendant Delta Chemical submitted "***the only bid***" for a new Alum contract with Plaintiff Baltimore City and provided a price of $280.97 per ton. (Id. ¶ 155-156) (emphasis in original). In 2009, Defendant Delta Chemical attempted to raise the price of Alum for Plaintiff Baltimore City by 29.7% due to an "increase in price of the raw materials used to make Alum." (Id. ¶ 157-158). After negotiation, Defendant Delta Chemical agreed to increase the price by 23.1% and charge $345.97 per ton of Alum for 2009. (Id. ¶ 159-160). In 2012, Plaintiff Baltimore City received bids from USALCO and General Chemical Corporation for a contract and USALCO was the winning bidder. (Id. ¶ 164).

Plaintiffs contend that, "[i]n addition to the lack of competition and resultant inflated prices demonstrated above," Delta Defendants' "bidding history over the Conspiracy Period" with respect to Alum **[*37]** contracts was not "freight-logical." (Compl. ¶ 255). Specifically, Plaintiffs allege that GEO Specialty Chemicals, Inc. had a water treatment chemical plant located in Baltimore, Maryland but never submitted a bid to supply Alum to Plaintiff WSSC. (Id. ¶ 255). Similarly, USALCO was headquartered in Maryland but never submitted a bid to Plaintiff WSSC prior to combining with Defendant Delta Chemical. (Id. ¶ 256). Additionally, Southern Ionics had a water treatment chemical plant in Williamsport, Maryland and also never submitted a bid to Plaintiff Baltimore City. (ECF No. 652 at ¶ 168).

"As a result of the conspiracy among [Delta] Defendants," Plaintiffs were allegedly "forced to pay supra-competitive prices for Alum" which they purchased from Defendant Delta Chemical and USALCO. (Compl. ¶ 257, 260). Plaintiff WSSC saw its cost for Alum "quadruple over a decade, rising from $82.10 per ton in 2000 to $314.00 per ton by 2010 . . . ." (Id. 260). Plaintiffs argue that Delta Defendants "used non-public means of communication . . . to eliminate competition by, *inter alia*, fixing prices, rigging bids, and allocating customers for Alum in the United States." (Id. ¶ 262). Plaintiffs further allege that **[*38]** Defendant John Besson made false representations regarding price increases in Alum due to increases in prices of raw materials. (Id. 271-276). Moreover, Delta Defendants allegedly "took additional affirmative acts of concealment, including ensuring that there were few written communications regarding their conspiracy and agreement." (Id. ¶ 279).

Accordingly, Plaintiffs assert the following claims: Count I — Conspiracy in Restraint of Trade in violation of the Sherman Act against all Defendants except Defendant Rebecca Besson; Count II — Conspiracy in Restraint of Trade in violation of the Maryland Antitrust Act against all Defendants except Defendant Rebecca Besson; Count III — Common Law Fraud against all Defendants except Defendant Rebecca Besson; Count IV — Breach of Contract against Defendant Delta Chemical; Count V — Breach of Contract against Defendant Delta Chemical; and, Count VI — Restitution, Disgorgement, and Unjust Enrichment against Delta Defendants.[4] Defendants seek to dismiss Plaintiffs' Amended Complaints for failure to state a claim upon which relief can be granted under *Federal Rules of Civil Procedure 12(b)(6)* ad/or to strike certain allegations from Plaintiffs' Amended Complaints under *Federal Rules of Civil Procedure 12(f)*. (ECF No. 901).

II. LEGAL STANDARD [*39]

A. *Rule 12(b)(6)* Failure to State a Claim

To withstand a motion to dismiss for failure to state a claim, a "complaint must contain sufficient factual matter, accepted as true, to "'state a claim to relief that is plausible on its face.'" *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))*. "A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Id., 556 U.S. at 678* (citing *Twombly, 550 U.S. at 556*). "The plausibility standard is not akin to a 'probability requirement,' but it asks for more than a sheer possibility that a defendant has acted unlawfully." *Id.* (quoting *Twombly, 550 U.S. at 556*).

To determine the sufficiency of a complaint under *Twombly* and *Iqbal* in the Third Circuit, the Court must take three steps. "First, it must 'tak[e] note of the elements a plaintiff must plead to state a claim.' Second, it should identify allegations that, 'because they are no more than conclusions, are not entitled to the assumption of truth.' Finally, '[w]hen there are well-pleaded factual allegations, a court should assume their veracity and then determine whether they plausibly give rise to an entitlement for relief." *See* *Connelly v. Lane Constr. Corp., 809 F.3d 780, 787 (3d Cir. 2016)* (quoting *Iqbal, 556 U.S. at 675, 679)* (citations omitted). "In deciding a *Rule 12(b)(6)* motion, a court **[*40]** must consider only the complaint, exhibits attached to the complaint, matters of public record, as well as undisputedly authentic documents if the complainant's claims are based upon these documents." *Mayer v. Belichick, 605 F.3d 223, 230 (3d Cir. 2010)*. The Third Circuit has held that the Court can review the record of prior actions between the parties and take judicial notice of the same in considering a motion to dismiss. *See* *Toscano v. Conn. Gen. Life Ins. Co., 288 F. App'x 36, 38 (3d Cir. 2008)*.

B. 12(1) Motion to Strike Certain Allegations

Under *Rule 12(f) of the Federal Rules of Civil Procedure*, "[t]he Court may strike from a pleading an insufficient defense or any redundant, immaterial, impertinent, or scandalous matter." *Fed. R. Civ. P. 12(f)*. The Court may act

---

[4] Plaintiff Baltimore City asserts the following claims in its complaint against Delta Defendants: Claim I — Conspiracy in Restraint of Trade in violation of the Sherman Act against all Defendants; Claim II — Conspiracy in Restraint of Trade in violation of the Maryland Antitrust Act against all Defendants; Claim III — Common Law Fraud against Defendant Delta Chemical; Claim IV — Breach of Contract against Defendant Delta Chemical; Claim V — Breach of Contract against Defendant Delta Chemical; and, Claim VI — Restitution, Disgorgement, and Unjust Enrichment against Defendant Delta Chemical. (ECF No. 652). Additionally, Plaintiff Richmond asserts the following claims in its complaint against Delta Defendants: Count I — Conspiracy in Restraint of Trade in violation of the Sherman Act against all Defendants except Defendant Rebecca Besson; Count II — Conspiracy in Restraint of Trade in violation of the Virginia Antitrust Act, *Va. Code Ann. § 59.1-9.5* against all Defendants except Defendant Rebecca Besson; and, Count V — Restitution, Disgorgement, and Unjust Enrichment against all Defendants. (ECF No. 653). As will be further explained herein, the analysis for all these claims is nearly identical. Thus, the Court will analyze all claims jointly unless there is a substantive reason for a separate analysis.

either "on its own" or on a motion by a party. *Id.* at *12(f)(1)-(2)*. "The purpose of a motion to strike is to simplify the pleadings and save time and expense by excising from a plaintiffs complaint any redundant, immaterial, impertinent, or scandalous matter which will not have any possible bearing on the outcome of the litigation." *Corradetti v. Sanitary Landfill, Inc., 912 F. Supp. 2d 156 (D.N.J 2012)* (quoting *Garlanger v. Verbeke, 223 F. Supp. 2d 596, 609 (D.N.J. 2002))*. "[M]otions to strike are usually 'viewed with disfavor' and will generally 'be denied unless the allegations have no possible relation to the controversy and may cause prejudice to one of the parties, or if the allegations confuse the issues.'" *Gray v. Bayer Corp., 2010 U.S. Dist. LEXIS 33040, 2010 WL 1375329, at *2 (D.N.J. Mar. 31, 2010)* (citing *Garlanger, 223 F. Supp. 2d at 609*). In fact, "*Rule 12(f)* should be **[*41]** construed strictly against striking portions of the pleading on grounds of immateriality and if the motion is granted at all, the complaint should be pruned with care." *Morgan Home Fashions, Inc. v. UTI, U.S. Inc., 2004 U.S. Dist. LEXIS 13412, 2004 WL 1950370, at *8 (D.N.J. Feb. 9, 2004)*.

III. ANALYSIS

A. Motion to Dismiss

For the following reasons, Delta Defendants' Motion to Dismiss Plaintiffs' Consolidated Complaint is denied.

a. Conspiracy in Restraint of Trade in Violation of the Sherman Act

To survive a motion to dismiss, Plaintiffs must prove two essential elements for a claim of conspiracy in restraint of trade in violation of the Sherman Act. Plaintiffs must show that (1) a "contract, combination, or conspiracy" existed and that (2) such contract, combination, or conspiracy "imposed an unreasonable restraint of trade." *Dickson v. Microsoft Corp., 309 F.3d 193, 202 (4th Cir. 2002)*.

Preliminarily, this Court has already found that, at least at the pleading stage, a conspiracy existed. (ECF No. 405 at 45-65). Additionally, in their Amended Complaints, Plaintiffs allege that Delta Defendants conspired to suppress and eliminate competition in the sale and marketing of Alum. (Compl. ¶ 1). Specifically, Plaintiffs allege that Delta Defendants agreed to "rig bids and allocate customers for, and to fix, stabilize, inflate, and maintain the price of Alum sold to companies, **[*42]** municipal authorities, and governmental subdivisions in the United States from January 1, 1997 through at least February 2011 . . . ." (Id. ¶ 1). Furthermore, Plaintiffs allege Delta Defendants met to "discuss their respective Alum businesses," agreed to "'stay away' from each other's historical customers," submitted "intentionally high," or "throw away" bids, and withdrew winning bids "in cases where a bid was inadvertently submitted." (Id. ¶ 4). These allegations are sufficient to support a *prima facie* claim Delta Defendants engaged in a conspiracy which imposed an unreasonable restraint on the trade of Alum in violation of the Sherman Act. Hence, the claim must survive Delta Defendants' Motion to Dismiss.

b. Conspiracy in Restraint of Trade in Violation of the Maryland Antitrust Act and the Virginia Antitrust Act

"*Section 11-204(a)(1)* of the Maryland Antitrust Act is the state law analogue of *Section 1* of the Sherman Act." *Merck-Medco Managed Care, Inc. v. Rite Aid Corp. 22 F. Supp. 2d 447, 450 n.4 (D. Md. 1998)*. The purpose of the Maryland Antitrust Act is "to complement the body of the federal law governing restraints of trade." *Nat. Design, Inc. v. Rouse Co., 302 Md. 47, 485 A.2d 663 (1983)* (quoting *Md. Code Ann. § 11-202(a)* (2005)). In construing the Act, "the courts [are to] be guided by the interpretation given by the federal courts to the various federal statutes **[*43]** dealing with the same or similar matters." *Nat. Design, Inc., 485 A.2d at 666*; *see also* *Berlyn Inc v. The Gazette Newspapers, 73 F. App'x 576, 582 (4th Cir. 2003)*.

Similarly, "[t]he Virginia Antitrust Act, with the exception of an interstate commerce component, shares common elements with sections one and two of the Sherman Act." *Oksanen v. Page Mem'l Hosp., 945 F.2d 696, 710 (4th

Cir. 1991). The Virginia Antitrust Act prohibits "[e]very contract, combination or conspiracy in restraint of trade or commerce," *Va. Code Ann. § 59.1-9.5* (1998), and "[e]very conspiracy combination, or attempt to monopolize, or monopolization of, trade or commerce." *Id.* at *§ 59.1-9.6*. In fact, the Virginia Act specifically provides that it is to be "interpreted and applied in harmony with federal ***antitrust law***." *Oksanen, 945 F.2d at 710*. Therefore, Plaintiffs' claims under the Virginia Antitrust Act are "governed by the same standard as their claims under the Sherman Antitrust Act." *Va. Vermiculite, Ltd. v. W.R. Grace & Co.-Conn., 108 F. Supp. 2d 549, 605 (W.D. Va. 2000)* (citing *Satellite Television & Associated Res., Inc. v. Cont'l Cablevision of Va., Inc., 714 F.2d 351, 358 n.13 (4th Cir. 1983))*. Consistent with the above guidance provided by the Fourth Circuit, this Court's analysis for Plaintiffs' claims under the Sherman Act must be applied to Plaintiffs' antitrust claims under both Maryland and Virginia law. Because Plaintiff's claims pursuant to the Sherman Act are sufficient to survive Delta Defendants' Motion to Dismiss, Plaintiffs' claims under Maryland and Virginia state antitrust claims must also survive.

c. Common Law Fraud [*44]

Maryland's Court of Appeals has summarized the elements of a cause of action for fraud or deceit, "[i]n order to recover damages in an action for fraud or deceit, a plaintiff must prove (1) that the defendant made a false representation to the plaintiff, (2) that its falsity was either known to the defendant or that the representation was made with reckless indifference as to its truth, (3) that the misrepresentation was made for the purpose of defrauding the plaintiff, (4) that the plaintiff relied on the misrepresentation and had the right to rely on it, and (5) that the plaintiff suffered compensable injury resulting from the misrepresentation." *Nails v. S & R, Inc., 334 Md. 398, 639 A.2d 660, 668 (Md. 1994)* (internal citations omitted). Similarly, to establish a claim of actual fraud under Virginia law, a plaintiff must prove that: (1) the defendant "falsely represented or deliberately did not disclose (when it had a duty to disclose); (2) a material fact; (3) intentionally and knowingly; (4) with intent to mislead; (5) on which the [Plaintiff] reasonably relied; and (6) which caused damage to party misled." *Arnlund v. Deloitte & Touche LLP, 199 F. Supp. 2d 461, 486 (E.D. Va. 2002)* (citing *Evaluation Research Corp. v. Alequin, 247 Va. 143, 439 S.E.2d 387, 10 Va. Law Rep. 779 (Va. 1994))*.

Plaintiffs allege in their Amended Complaints that Delta Defendants "used deception," "made a misrepresentation," and "concealed, **[*45]** suppressed or omitted material facts in connection with the sale" of Alum. (Compl. ¶ 317). Specifically, Defendants allegedly "represented" that Alum prices were offered based on a "competitive market" while participating in an unlawful conspiracy to "inflict monetary harm" on Plaintiffs. (Id. ¶ 318, 322). For example, on December 23, 2008, "[Defendant] John Besson, then-President of [Defendant] Delta Chemical represented that [it] would need to raise the price of Alum by $36.33 per ton" due to the "sulfuric acid market." (Id. ¶ 249, 272). Similarly, on December 29, 2008, [Defendant] John Besson emailed the Engineer Supervisor of Plaintiff Baltimore City and "represented that [Defendant] Delta Chemical would need to raise the price of Alum due to 'a substantial increase in one of the raw materials that are used to make the aluminum sulfate.'" (Id. ¶ 273). However, Plaintiffs contends that these changes were misrepresentations which stood in contrast to a decline in the price of sulfuric acid "***by more than a third***" from its October 2008 index price by December 2008. (Id. ¶ 249) (emphasis in original).

Plaintiffs' allegations, when taken as true, support the claims that Delta Defendants **[*46]** knowingly misrepresented the price of Alum to Plaintiffs with the purpose of defrauding Plaintiffs and Plaintiffs reasonably relied upon Delta Defendants' representation and suffered a resulting compensable injury. *Nails, 639 A.2d at 668* (internal citations omitted). Similarly, Plaintiffs' allegations support Plaintiffs' claims that Delta Defendants falsely and knowingly represented a material fact regarding price increases of Alum with intent to mislead Plaintiffs from the ongoing conspiracy and Plaintiffs reasonably relied on the representation which caused damages to Plaintiffs. Therefore, at this juncture, Plaintiffs' claims of common law fraud must survive Delta Defendants' Motion to Dismiss.

d. Breach of Contract against Defendant Delta Chemical

Under Maryland law, the elements of a claim for breach of contract are "contractual obligation, breach, and damages." *Tucker v. Specialized Loan Servicing, LLC, 83 F. Supp. 3d 635, 655 (D. Md. 2015)* (quoting *Kumar v. Dhanda, 198 Md. App. 337, 17 A.3d 744, 749 (Md. Ct. Spec. App. 2011))*. "In order to survive a motion to dismiss, a complaint for breach of contract [in Maryland] must allege facts showing a contractual obligation owed by the defendant to the plaintiff and a breach of that obligation by the defendant." *Swedish Civil Aviation Admin. v. Project Mgmt. Enters., Inc., 190 F. Supp. 2d 785, 791 (D. Md. 2002)* (citing *Cont'l Masonry Co., Inc. v. Verdel Constr. Co., Inc., 279 Md. 476, 369 A.2d 566 (1977))*. Likewise, "[f]or a breach of contract to be actionable [in Virginia], a party must establish **[*47]** a material breach." *Vienna Metro LLC v. Pulte Home Corp., 786 F. Supp. 2d 1076, 1081 (E.D. Va. 2011)* (citing *Horton v. Horton, 254 Va. 111, 487 S.E.2d 200, (Va. 1997))*.

The central dispute in this case with respect to the first breach of contract claim is whether Delta Chemical breached its contractual obligation to "only submit price increases that were based on changes in the contractor's cost of services and materials." (Compl. ¶ 328). Plaintiffs allege that Delta Defendants falsely represented increases in market prices of raw materials used to make aluminum sulfate as a justification for increasing contract prices for Alum. (Id. ¶ 272 -273). These price increases allegedly stood in stark contrast to a "crash" in the market for sulfuric acid, a raw material used to create Alum. (Id. ¶ 275). Moreover, prices for other raw materials used to make Alum had allegedly declined at the time of the price increase. (Id. ¶ 276). Plaintiffs assert that Delta Defendants made affirmative representations to prevent Plaintiffs from "discovering the actual reason for the artificially-inflated prices." (Id. ¶ 277). Thus, at this juncture in the proceedings, the Court finds that Plaintiffs have alleged sufficient facts to sustain their first set breach of contract claims under both Maryland and Virginia law.

With respect to the second **[*48]** breach of contract claim, the major point of contention is whether Defendant Delta Chemical "breached their contractual agreements that they had not agreed, connived, or colluded to produce a deceptive show of competition and had not colluded with any other person, firm or corporation in the bid on the Alum contracts." (Id. ¶ 333). "Beginning at least as early as 2010, Plaintiff WSSC's Alum supply contracts incorporated terms specifying that the Bidder/Offeror[, *i.e.*, Delta Defendants,] had not agreed, connived or colluded to produce a deceptive show of competition, and had not colluded with any other person, firm or corporation in the bid on the Alum contracts." (Id. ¶ 332). Plaintiffs assert that "[a]fter USALCO and [Defendant] Delta Chemical combined in November 2011, USALCO was always the 'winning' bidder, having either combined or colluded with all viable competitors." (Id. ¶ 244). Additional examples provided by Plaintiffs of the alleged collusion include substantial similarity between Defendant Delta Chemical and USALCO's bid prices for Alum after their combination and alleged "throw away" bids by Chemtrade. (Id. ¶ 252, 254). Plaintiffs also cite a lack of bids from "freight-logical" **[*49]** chemical plants such as GEO and Southern Ionics. (ECF No. 652 at ¶ 168). Hence, Plaintiffs have sufficiently alleged that there was a non-collusion component to their contract with Delta Defendants which was breached, such that their second set of breach of contract claims, under both Maryland and Virginia law, may proceed.

e. Restitution, Disgorgement, and Unjust Enrichment

In Maryland, to support a claim for unjust enrichment, "a plaintiff must establish: (1) a benefit [was] conferred upon the defendant by the plaintiff; (2) an appreciation or knowledge by the defendant of the benefit; and (3) the acceptance or retention by the defendant of the benefit under such circumstances as to make it inequitable for the defendant to retain the benefit without the payment of its value." *Swedish Civil Aviation Admin., 190 F. Supp. 2d at 792-93*. In Virginia, "[The] elements of a breach of contract action are (1) a legally enforceable obligation of a defendant to a plaintiff; (2) the defendant's violation or breach of that obligation; and (3) injury or damage to the plaintiff caused by the breach of obligation.'" *Navar, Inc. v. Fed. Bus. Council, 291 Va. 338, 784 S.E.2d 296, 299 (Va. 2016)* (quoting *Ulloa v. QSP, Inc., 271 Va. 72, 624 S.E.2d 43, 48 (Va. 2006))*.

Plaintiffs assert that it would be "inequitable" for Delta Defendants "to be allowed to retain the benefits" they "obtained from **[*50]** their illegal agreements, manipulative acts, and other unlawful conduct" at the expense of Plaintiffs. (Compl. ¶ 337). Moreover, Plaintiffs aver that it would be equally inequitable for Defendants John Besson and Rebecca Besson to be "allowed to retain the millions of dollars that each personally received . . . in connection with [Defendant] Delta Chemical's combination with USALCO" because of its alleged connection to the aforementioned conspiracy. (Id. ¶ 338). As discussed above, Plaintiffs have sufficiently alleged facts pertaining to the contracts which they had made with Delta Defendants regarding agreed terms on non-collusion. (Id. ¶ 332). Moreover, Plaintiffs have set forth sufficient allegations and examples of Delta Defendants' breach of these non-collusion contracts to show a violation. (Id. ¶ 333). Finally, Plaintiffs have shown that Delta Defendants' alleged breach of these contracts, if true, would cause Plaintiffs significant economic injury. (Id. ¶ 341d). Therefore, the Court concludes that Plaintiffs' claims for unjust enrichment must survive Delta Defendants' Motion to Dismiss.

B. Motion to Strike Certain Allegations

Delta Defendants ask the Court to strike the allegations **[*51]** contained in paragraph 131 of Plaintiff WSSC's Amended Complaint regarding its purchase of PAC, on the basis that such allegations are "irrelevant to an Alum price fixing conspiracy" and "unsupported by the requisite factual allegations." (ECF No. 901-1, at 27). Delta Defendants maintain that because "PAC is not the subject of this litigation, and no prior price fixing scheme has been pled regarding PAC." (Id. at 27). In sum, Delta Defendants argue that there is no basis of allegations of conspiracy regarding PAC and, "in any event," these allegations are "not probative to the issues in this case relating to liquid Alum." (ECF No. 904, at 11).

On the other hand, Plaintiffs allege in their Amended Complaints that bids received for PAC raise "similar concerns" to the conspiracy regarding liquid Alum. (Compl. ¶ 131). Plaintiffs provide examples of Delta Chemical "winning" PAC contracts in 2004 and 2009 at prices which increased by seventy-two percent over five years and explain that the next-lowest bid submitted on the 2009 contract was "***more than three times***" Defendant Delta Chemical's winning bid. (Id. ¶ 131) (emphasis in original). Plaintiffs further argue that their allegations regarding PAC **[*52]** are "relevant to the [Defendants'] ability to conspire, and the history of conspiracy, in the water treatment chemical industry." (ECF No. 902, at 28). Plaintiffs note that USALCO "explicitly linked non-competition agreements with [Defendant] Delta on Alum and PAC." (Id. at 28).

"[M]otions to strike are usually 'viewed with disfavor' and will generally 'be denied unless the allegations have no possible relation to the controversy and may cause prejudice to one of the parties, or if the allegations confuse the issues.'" *Gray, 2010 U.S. Dist. LEXIS 33040, 2010 WL 1375329, at *2*. In fact, "*Rule 12(f)* should be construed strictly against striking portions of the pleading on grounds of immateriality and if the motion is granted at all, the complaint should be pruned with care." *Morgan Home Fashions, Inc., 2004 U.S. Dist. LEXIS 13412, 2004 WL 1950370, at *8*. When accepting Plaintiffs' allegations as true, a possible relation can be drawn between USALCO's use of non-competition agreements with Defendant Delta Chemical on PAC in negotiations leading up to their combination and Delta Chemical's participation in the general liquid Alum conspiracy. (ECF No. 902 at 28).

Moreover, even if the allegations "may ultimately prove to be immaterial," they are not "so wholly impertinent or scandalous as to presently warrant the 'drastic remedy' authorized **[*53]** by *Rule 12(f)*. Once discovery is complete and the record more fully developed, [Delta] Defendants will have the opportunity to renew any challenges they may have to the Plaintiff[s] allegations and/or evidence by way of an appropriate *Rule 12(b)(6)* motion, motion for summary judgment, or motion in *Limine*." *Adams v. County of Erie, Pa., 2009 U.S. Dist. LEXIS 108090, 2009 WL 4016636, at *1 (W.D. Pa. 2009)*. Thus, at this stage in the litigation, the Court must deny Delta Defendants' Motion to Strike Certain Allegations.

IV. <u>CONCLUSION</u>

For the aforementioned reasons, Delta Defendants' Motion to Dismiss and Strike Certain allegations is denied. An appropriate Order accompanies this Opinion.

Date: August 14, 2018

/s/ Jose L. Linares

JOSE L. LINARES

Chief Judge, United States District Court

ORDER

This matter comes before the Court by way of Defendants Delta Chemical Corporation, John D. Besson, and Rebecca L. Besson's (collectively "Delta Defendants") Motion to Dismiss Plaintiffs Washington Suburban Sanitary Commission, Mayor and City Council of Baltimore, and City of Richmond's Amended Complaints pursuant to *Rule 12(b)(6) of the Federal Rules of Civil Procedure* and Strike Certain Allegations pursuant to *Rule 12(f) of the Federal Rules of Civil Procedure*. (ECF No. 901). For the reasons set forth in the Court's corresponding Opinion.

IT IS on this 14th day of August, 2018,

ORDERED that Delta Defendants' Motion to Dismiss **[*54]** and Strike Certain Allegations (ECF No. 901) is hereby DENIED.

SO ORDERED.

Opinion

MEMORANDUM OPINION AND ORDER

MARVIN E. ASPEN, District Judge:

Plaintiff International Equipment Trading, Ltd. ("IET") alleges Defendant Illumina, Inc. ("Illumina") engaged in predatory and anticompetitive behavior that violated federal antitrust and Illinois law. (2d Am. Compl. (Dkt. No. 54) ¶ 1.) We previously dismissed Counts I-V of IET's first amended complaint without prejudice. (Order (Dkt. No. 44) at 17.) Presently before us is Illumina's motion to dismiss Counts I-V of IET's second amended complaint with prejudice. (Mot. (Dkt. No. 55).) For the following reasons, we deny Illumina's motion.

In addition, Illumina **[*2]** shall file its answer to IET's second amended complaint on or before September 12, 2018. The principal attorneys for Illumina and IET shall appear before the Court with an agreed written discovery plan at the Court's status call on October 18, 2018 at 10:30 a.m.

BACKGROUND

For the purposes of a motion to dismiss, "we accept the well-pleaded facts in the complaint as true." *McCauley v. City of Chi., 671 F.3d 611, 616 (7th Cir. 2011)*. IET, an Illinois corporation with its principal place of business in Mundelein, Illinois, sells, rents, trades, and leases laboratory equipment to laboratories, hospitals, universities, and research institutions across the United States and internationally. (2d Am. Compl. ¶¶ 2, 13.) As part of its business, IET sources various models of used or refurbished genome sequencing unit systems ("sequencing units") and required accessory instruments manufactured by Illumina. (*Id.* ¶¶ 2.) Illumina, a Delaware corporation with its principal place of business in San Diego, California, manufactures and markets "integrated systems" that "serve the sequencing, genotyping and gene expression markets" and sells its used sequencing units[1] in competition with IET. (*Id.* ¶¶ 3-4.) While IET "regularly brokers service contracts between **[*3]** Illumina and IET's customers," Illumina is the only company that services its equipment. (*Id.* ¶ 4.)

IET alleges that since around 2007, once Illumina learns of a possible sale or lease by IET and other third-party resellers of a refurbished Illumina sequencing unit, Illumina engages in "scare tactics" that are "intended to kill the sale or lease between the customer and IET." (*Id.* ¶¶ 5, 7, 9.) Specifically, IET alleges Illumina has a practice of informing IET's potential customers that unless they buy or lease a new or used Illumina sequencing unit from Illumina, they must pay a significant "site licensing fee" for operation and data collection software needed to operate a used Illumina sequencing unit. (*Id.* ¶¶ 5-6.) IET alleges this fee ranges from $6,000.00 to $90,000.00 depending on the model. (*Id.*) IET claims Illumina's sales representatives and servicing engineers have discretion in charging the fee, and only threaten the fee to interfere with sales from third-party resellers like IET. (*Id.* ¶¶ 7-9.) IET further alleges Illumina sometimes charges the fee for machines exempt from site licensing fees based on a preexisting contract between Illumina and De Lage Landen Financial **[*4]** Services, Inc. ("DLL").[2]. (*Id.* ¶ 21-22.)

IET further alleges that when the purchasers do not pay Illumina the site licensing fee, Illumina sometimes refuses to service sequencing units purchased from IET, deeming these customers as unauthorized users. (*Id.* ¶ 8.) Illumina also allegedly either refuses to provide needed services, parts, and software for preowned Illumina systems they did not sell, or charges "exorbitant markups" to do so. (*Id.* ¶¶ 8, 10, 22, 32.) IET claims customers who need replacement parts "have no choice but to give in to Illumina's threats" because only Illumina's replacement parts are compatible with Illumina machines, and only Illumina services Illumina units. (*Id.* ¶¶ 4, 8.) Specifically, IET states that Illumina announced in March 2018 that it will no longer support any HiSeq X sequencing units resold by third-parties to customers in the United States, including servicing, repairing, or selling "related consumables" to customers with these preowned systems. (*Id.* ¶ 10.) IET claims that if enforced, Illumina's policy will "eliminat[e] the secondary market" for HiSeq X units completely. (*Id.*)

Based on these allegedly anticompetitive tactics, IET alleges Illumina "has **[*5]** unlawfully attempted to create a monopoly within the secondary sequencing unit market, or alternatively, within the sub-market consisting of [Illumina] sequencing units." (*Id.* ¶ 11.) As a result, IET claims it has lost sales, including the sale of sequencing units to: (1) the University of Central Florida, (2) the University of Chicago, (3) Tempus, (4) Argon National Laboratory, and (4) ACGT Inc. (*Id.* ¶¶ 23, 45.)

---

[1] Based on IET's complaint, it appears Illumina sells used sequencing units that are made by Illumina in addition to used units made by other manufacturers. (*See* 2d Am. Compl. ¶ 20 (alleging Illumina's market share is higher in the market of Illumina used sequencing units as compared to its market share in the refurbished sequencing unit market generally).)

[2] DLL allegedly leases and finances Illumina equipment, and often Illumina sells the instruments and systems to DLL directly. (2d Am. Compl. ¶ 21.)

IET's second amended complaint mirrors the seven counts of its first amended complaint. IET alleges Illumina violated various antitrust laws, and asserts attempted monopolization claims under *§ 2 of the Sherman Act*, *15 U.S.C. § 2* (Count I); *§§ 4* and *16 of the Clayton Act*, *15 U.S.C. §§ 15(a)*, *26* (Count II); and the *Illinois Antitrust Act ("IAA"), 740 ILCS 10/1 et seq.* (Count V). (*Id.* ¶¶ 25-35, 36-39, 50-52.) IET claims Illumina's "predatory and anticompetitive conduct" in charging site licensing fees has been an attempt to "drive IET and other third-party resellers from the . . . sequencing unit markets and thereby strengthen its dominant position within these markets." (*Id.* ¶ 32.)

IET's second amended complaint also includes claims under the *Illinois Consumer Fraud and Deceptive Business Practices Act, 815 ILCS 505/1 et seq.* ("ICFA") (Count III) and Illinois **[*6]** *Uniform Deceptive Trade Practices Act, 815 ILCS 510/1 et seq.* ("UDTPA") (Count IV) based on Illumina's alleged willful engagement in "deceptive and unfair conduct." (*Id.* ¶¶ 40-49.) Finally, IET alleges Illumina intentionally interfered with a prospective economic advantage (Count VI) and seeks a declaratory judgment pursuant to the *Declaratory Judgment Act, 28 U.S.C. § 2201(a)* deciding whether Illumina "may charge or threaten to charge" a site licensing fee to customers purchasing Illumina sequencing units from IET (Count VII). On February 28, 2018, we dismissed without prejudice the same Counts I through V of IET's first amended complaint and denied Illumina's motion to dismiss Counts VI and VII pursuant to *Federal Rule of Civil Procedure 12(b)(6)*.

On April 16, 2018, Illumina filed a motion to dismiss Counts I through V of IET's second amended complaint pursuant to *Federal Rule of Civil Procedure 12(b)(6)*. (Mot. at 1.) Illumina argues "IET's attempt to resuscitate these claims in the Second Amended Complaint . . . falls short." (Def.'s Mem. in Support of Mot. To Dismiss ("Mem.") (Dkt. No. 56) at 1.) Illumina contends IET's attempted monopolization claims should be dismissed because Illumina has failed to adequately plead any of the requisite elements. (*Id.* at 3-12.) Furthermore, Illumina argues IET failed to state **[*7]** a claim under the ICFA and UDTPA "because (1) IET still does not allege that it lost a sale to any Illinois customers and (2) none of the alleged misrepresentations falls within the purview of the UDTPA." (*Id.* at 13.)

LEGAL STANDARD

Federal Rule of Civil Procedure 12(b)(6) governs Illumina's motion to dismiss. "The purpose of a motion to dismiss is to test the sufficiency of the complaint, not to decide the merits." *Gibson v. City of Chi., 910 F.2d 1510, 1520 (7th Cir. 1990)* (internal citation omitted). When considering a motion to dismiss under *Rule 12(b)(6)*, we accept as true all well-pleaded facts alleged in the complaint and view them in the light most favorable to the plaintiff. *Santiago v. Walls, 599 F.3d 749, 756 (7th Cir. 2010)*. While "detailed factual allegations" are not required to survive a motion to dismiss, the complaint must "state a claim [for] relief that is plausible on its face." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 1949-50, 173 L. Ed. 2d 868 (2009)* (internal quotation marks omitted) (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 1974, 167 L. Ed. 2d 929 (2007))*. The plausibility standard "is not akin to a 'probability requirement,' but it asks for more than a sheer possibility that a defendant has acted unlawfully." *Ashcroft, 556 U.S. at 678, 129 S. Ct. at 1949* (quoting *Twombly, 550 U.S. at 556, 127 S. Ct. at 1965*). While the plaintiff need not plead "detailed factual allegations," the complaint must allege facts sufficient "to raise a right to relief above the speculative level." *Twombly, 550 U.S. at 555, 127 S. Ct. at 1964-65*. However, to protect defendants from expensive discovery in antitrust cases, **[*8]** a plaintiff's claim must have a "reasonably founded hope that the [discovery] process will reveal relevant evidence" to support a claim. *Twombly, 550 U.S. at 558-59, 127 S. Ct. at 1966-67*.

ANALYSIS

I. ATTEMPTED MONOPOLIZATION CLAIMS (COUNTS I, II, & V)

We first consider whether IET sufficiently pled its antitrust claims to survive a *Rule 12(b)(6)* motion to dismiss. Our analysis focuses on the requirements of *§ 2* of the Sherman Act, as IET's Clayton Act and IAA claims "stand or fall with the *Sherman Act* Claim."[3] *Int'l Equip. Trading, Ltd. v. AB SCIEX LLC, No. 13 C 1129, 2013 U.S. Dist. LEXIS 123109, 2013 WL 4599903, at *3 n.3 (N.D. Ill. Aug. 29, 2013)*; *Hon Hai Precision Indus. Co. v. Molex, Inc., No. 08 C 5582, 2009 U.S. Dist. LEXIS 9165, 2009 WL 310890, at *3 (N.D. Ill. Feb. 9, 2009)*. At the pleading stage of an attempted monopolization claim under *Section 2* of the Sherman Act, the plaintiff must preliminarily establish the "relevant market that the defendant has purportedly attempted to monopolize." *Attempted Monopolization*, William Holmes & Melissa Mangiaracina, ***Antitrust Law*** Handbook § 3:6; *see* *Nucap Indus., Inc. v. Robert Bosch LLC, 273 F. Supp. 3d 986, 1011 (N.D. Ill. 2017)* ("[F]ailure to offer a plausible relevant market is a proper ground for dismissing an antitrust claim at the *Rule 12(b)(6)* stage.") (internal citation omitted). The plaintiff must also adequately plead that a defendant (1) engaged in predatory or anticompetitive conduct, (2) specifically intended to acquire monopoly power, and (3) reached a stage based on defendant's actions and market position where there is a dangerous probability defendant will achieve **[*9]** an actual monopoly. *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 456, 113 S. Ct. 884, 890-91, 122 L. Ed. 2d 247 (1993)*; *Lektro-Vend Corp. v. Vendo, Co., 660 F.2d 255, 270 (7th Cir. 1981)*; *Hon Hai Precision Indus., 2009 U.S. Dist. LEXIS 9165, 2009 WL 310890, at *2*. Illumina argues that IET has failed to sufficiently plead any of these elements, which we consider in turn. (Mem. at 3.)

A. Market Definition

Illumina first argues that IET's antitrust claims should be dismissed because IET has failed to plead a "legally cognizable" market. (*Id.* at 3.) To successfully prove an attempted monopolization claim, the plaintiff must define the relevant market in terms of relevant geographic area and product. *Spectrum Sports, Inc, 506 U.S. at 456, 113 S. Ct. at 890-91* (finding the issue generally necessary to plead the monopoly power element); *Right Field Rooftops, LLC v. Chi. Baseball Holdings, LLC, 87 F. Supp. 3d 874, 886 (N.D. Ill. 2015)*. Accordingly, "failure to offer a plausible relevant market is a proper ground for dismissing an antitrust claim." *Right Field Rooftops, 87 F. Supp. 3d at 886*; *see also* *Ploss v. Kraft Foods Grp., Inc., 197 F. Supp. 3d 1037, 1070 (N.D. Ill. 2016)* (considering the identification of a relevant market on a motion to dismiss a *§ 2* claim). Market definition, however, is very fact-intensive and we hesitate to grant motions to dismiss for failure to plead a relevant market, unless "the alleged relevant market clearly does not encompass all interchangeable substitute products or when a plaintiff fail[s] even to attempt a plausible explanation as to why a market should be limited in a particular way." *Ploss, 197 F. Supp. 3d at 1071-72* (citing *In re Dairy Farmers of Am., Inc. Cheese Antitrust Litig., 767 F. Supp. 2d 880, 901 (N.D. Ill. 2011))*.

Under "*§ 2* of the Sherman Act, a market is defined by reasonable interchangeability **[*10]** of products and the cross-elasticity of demand for those products. In other words, the products in a market must have unique attributes that allow them to be substituted for one another, but make them difficult to replace with substitute products from outside the market." *In re Dairy Farmers, 767 F. Supp. 2d at 901* (citing *United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 394-95, 76 S. Ct. 994, 1007, 100 L. Ed. 1264 (1956))*. IET proposes two alternative markets: (1) the market for used genome sequencing units ("used unit market"), and (2) the market for used Illumina genome sequencing units ("used Illumina unit market"). (2d Am. Compl. ¶¶ 28-29.) Illumina argues neither market is legally cognizable.

Illumina first challenges both markets for "improperly exclude[ing] *new* genome sequencing systems," and argues new units are substitutes to used units. (Mem. at 4.) IET alleges used sequencing units are not substitutes for new units because of a substantial price differential, up to $500,000.00 between new and used units.[4] (2d Am. Compl.

---

[3] IET's *Clayton Act* claim depends on the survival of its Sherman Act claim because *Sections 4* and *16 of the Clayton Act* merely establish a private right of action for any person injured by a violation of the Sherman Act. *15 U.S.C. § 15*.

[4] Illumina also alleges IET concedes new and used sequencing units are substitutes in use based on language in the Second Amended Complaint. (Mem. at 4 (citing 2d Am. Compl. ¶ 5).) We agree with IET that this interpretation of IET's second amended complaint misconstrues its language. (Resp. at 6.) Instead of conceding a customer seeking a used unit "may instead purchase a 'new or used sequencing unit' directly from Illumina" (Mem. at 4), this paragraph merely describes Illumina's alleged sales behavior, including threatening the imposition of a site licensing fee "unless the customer buys or leases a new or used sequencing unit directly from Illumina" (2d Am. Compl. ¶ 5).

¶¶ 16, 28-29.) Considering the difference in price, IET describes new units to be so expensive they are cost-prohibitive for many customers. (*Id.*) Illumina asserts that mere price differential does not mean new and used units are not in the same markets. (Mem. at 4.) Considering the highly factual **[*11]** nature of market definition, making inferences in IET's favor, we find IET has sufficiently pled that used units could constitute a separate sub-market from new units, especially considering the significant price differential IET alleges exists between the two types of units. *See* Beatrice Foods Co. v. F.T.C., 540 F.2d 303, 309 (7th Cir. 1976) (finding price distinctions can lead to separate market definitions when the products "are sold in clearly separate price groupings"); Avnet, Inc. v. F.T.C., 511 F.2d 70, 77 (7th Cir. 1975) (finding variance in price between new and used products sufficiently varied to support finding that new and used products constitute different submarkets).

Illumina also challenges the used Illumina unit market specifically, arguing the proposed single-brand market fails as a matter of law. (Mem. at 5-6.) In "rare circumstances," a single brand of a product can constitute its own market. In re Dealer Mgmt. Sys. Antitrust Litig., No. 18 C 864, 313 F. Supp. 3d 931, 2018 U.S. Dist. LEXIS 80937, 2018 WL 2193236, at *21 (N.D. Ill. May 14, 2018) (slip op.); *see also* Eastman Kodak Co. v. Image Tech. Servs., Inc., 504 U.S. 451, 481-82, 112 S. Ct. 2072, 2090, 119 L. Ed. 2d 265 (1992) (establishing possibility of single-brand markets). A market composed of a single brand can be viable if a plaintiff can prove the product cannot be substituted by any other brand's products. AB SCIEX LLC, 2013 U.S. Dist. LEXIS 123109, 2013 WL 4599903, at *4.

Here, IET offers multiple reasons why used Illumina sequencing units are not interchangeable with another brand. For example, preexisting Illumina sequencing unit customers allegedly **[*12]** cannot easily switch to a different manufacturer because the processes of "platform validation and development of methodology involve steep learning curves," especially when the customer has other Illumina sequencing units or has developed protocols on Illumina platforms. (2d Am. Compl. ¶ 18.) IET also avers some research institutions can only use Illumina sequencing units "due in large part to their sensitivity." (*Id.*) Based on these specific allegations, we find IET has pled conceivable explanations why Illumina units are not replaceable with other brands for some customers. *Cf.* AB SCIEX LLC, 2013 U.S. Dist. LEXIS 123109, 2013 WL 4599903, at *4 (dismissing proposed single-brand market where plaintiff failed to plead any facts demonstrating the product is "unique and cannot be substituted with other manufacturer's [products]"). Furthermore, whether used sequencing unit customers are truly locked in to Illumina's brand is a question of fact not properly determined at this stage. Eastman Kodak, 504 U.S. at 482, 112 S. Ct. at 2090 ("The proper market definition in this case can be determined only after a factual inquiry into the commercial realities faced by consumers.") (internal citation omitted). We accordingly find that IET has sufficiently pled both proposed markets.

A. Predatory or Anticompetitive [*13] Conduct

Next, Illumina argues IET has failed to plead it engaged in any predatory or anticompetitive conduct. (Mem. at 10.) "Predatory conduct may be broadly defined as conduct that is in itself an independent violation of the antitrust laws or that has no legitimate business justification other than to destroy or damage competition." Great Escape, Inc. v. Union City Body Co., 791 F.2d 532, 541 (7th Cir. 1986); *see also* Endsley v. City of Chi., 230 F.3d 276, 283 (7th Cir. 2000) ("Under § 2, intent to obtain a monopoly is unlawful only where an entity seeks to maintain or achieve monopoly power by anticompetitive means.").

IET alleges Illumina engaged in a number of anticompetitive behaviors, primarily threatening to charge customers who do not purchase used Illumina sequencing units from Illumina directly a site licensing fee; selectively imposing the site licensing fee to interfere with sales from third-party resellers; and refusing, or charging "exorbitant markups," to service or sell replacement parts for sequencing units sold by third-parties. (2d Am. Compl. ¶¶ 5-7, 32, 34 (alleging the total cost of the software transfer fee, health check, installation, and service contracts of used Illumina sequencing units totals between $180,000.00 and $210,000.00).)

We first consider IET's allegations regarding Illumina's statements **[*14]** about its ability to impose site licensing fees. IET claims that since 2007, once Illumina learns of a potential sale or lease by IET of a used Illumina sequencing unit, with the intent to "kill" the sale or lease with IET, Illumina would contact the potential customer and threaten to impose a site licensing fee for the used unit's operation and data collection software needed to operate the unit. (2d Am. Compl. ¶ 5.) Among other complaints about these threats, IET argues Illumina does not have the ability to charge site licensing fees for purchasers of used Illumina sequencing units, and that these statements constitute misrepresentations. (Resp. at 10-11.)

Generally, false statements accompanied with an "enforcement mechanism" can constitute predative conduct under ***antitrust law***. *See* *Mercatus Grp., LLC v. Lake Forest Hosp., 641 F.3d 834, 851 (7th Cir. 2011)* (noting that an anticompetitive threat is not actionable anticompetitive action without "some sort of 'enforcement mechanism' designed somehow to coerce or compel the competitor to head the admonition") (internal citation omitted); *AB SCIEX LLC, 2013 U.S. Dist. LEXIS 123109, 2013 WL 4599903, at *8* ("For a misrepresentation to be actionable under the Sherman Act it must be combined with a coercive enforcement mechanism."). We first consider whether IET has pled Illumina **[*15]** made false statements, then consider whether IET alleges Illumina had enforcement mechanisms to restrain trade as a result of the misstatements.

IET argues Illumina did not have the right to impose any licensing fees for operating software on its used sequencing units, as the first sale doctrine dictates that "Illumina does not actually own the license that it threatens to charge a fee for." (Resp. at 10.) The first sale doctrine allows the purchaser of copyrighted material to transfer the work without the copyright owner's permission. *17 U.S.C. § 109(a)* ("[T]he owner of a particular copy . . . lawfully made under this title . . . is entitled, without the authority of the copyright owner, to sell or otherwise dispose of the possession of that copy . . . ."). The first sale doctrine, however, does not apply when the copyright holder merely licenses instead of sells copyrighted software. *Id.* ¶ *109(d)*; *see* *AB SCIEX LLC, 2013 U.S. Dist. LEXIS 123109, 2013 WL 4599903, at *6* (finding first sale doctrine did not apply because plaintiff admitted defendant only licensed the operating software of its machines to purchasers) (citing *Apple Inc. v. Psystar Corp., 658 F.3d 1150, 1155 (9th Cir. 2011)* ("[T]he first sale doctrine does not apply to a licensee.")).

Accordingly, at the heart of whether Illumina could legally charge licensing fees at **[*16]** all is whether Illumina licensed or sold the operating software for its sequencing units: if Illumina sold the software, the first sale doctrine applies, and any representations Illumina made about the right to impose a site licensing fee for purchasers of used Illumina sequencing units would be necessarily false and misleading. Whether a software user is a licensee instead of an owner of a copy of the software requires a fact-intensive inquiry into the terms of the original transfer from the copyright owner to the first user, including whether the transfer specified that the user was only granted a license, whether the transfer had significant use restrictions, and whether the transfer restricted the user's ability to transfer the software in the future. *See* *Vernor v. Autodesk, Inc., 621 F.3d 1102, 1111-12 (9th Cir. 2010)*. Viewing the pleadings in IET's favor, we find Illumina could have sold the software subject to the first use doctrine to purchasers of new Illumina sequencing units, and that any threats to charge a licensing fees to purchasers of used units could constitute misrepresentations.

Furthermore, IET sufficiently pled that Illumina made false statements about its ability to charge licensing fees for specific units that were allegedly **[*17]** subject to a licensing fee waiver. Specifically, IET alleges Illumina previously entered into an agreement with DLL that any Illumina equipment owned or leased by DLL would not be subject to a relicensing fee from Illumina if a DLL unit is resold to a new customer. (*Id.* ¶ 21.) IET claims that Illumina has "repeatedly" threatened IET's customers with the site licensing fee (and will threaten to withhold service equipment if the fee is unpaid) even though the used Illumina sequencing units at issue were subject to the DLL agreement. (*Id.* ¶¶ 21-22; 32 (calling Illumina's threats "false" in these instances).)

Having established that Illumina's statements about the ability to charge licensing fees could be false, we also find IET has alleged sufficient "enforcement mechanisms" to make these falsehoods actionable in ***antitrust law***. *Sanderson v. Culligan Int'l Co., 415 F.3d 620, 623 (7th Cir. 2005)*. IET avers Illumina refuses to service, sell related consumables, or sell replacement parts for its used sequencing units if they were sold or leased by IET or another third-party. (*Id.* ¶¶ 8, 10.) Specifically, IET claims Illumina deems these customers to be unauthorized users without a "'proper' software license." (*Id.*) In the instances Illumina is willing to **[*18]** service or sell needed parts or equipment to unauthorized users, IET avers Illumina charges "exorbitant markups." (*Id.* ¶ 32.) According to IET, Illumina's refusals are particularly powerful considering no other manufacturer's replacement parts are compatible with used Illumina sequencing units, and "Illumina is the only company that services Illumina equipment." (*Id.* ¶¶ 4, 8.) Finally, IET claims that since March 2018, Illumina has adopted a policy that it will not support or in some cases relicense software for used Illumina equipment sold by IET or other third-parties, which "is making sales of those units by resellers impossible." (*Id.* ¶ 10.)

Considering these allegations, we find IET has pled Illumina possesses sufficient enforcement mechanisms to harm competition in the relevant markets. *See* *Nexstar Broad., Inc. v. Granite Broad. Corp., No. 1:11 C 249 RM, 2012 U.S. Dist. LEXIS 95024, 2012 WL 2838547, at *7 (N.D. Ind. July 9, 2012)* ("Whether [defendant]'s alleged derogatory or disparaging statements are actionable in antitrust depends on the nature of the speech (who it made the statements to and what it said), and whether there was an 'enforcement mechanism' in place—whether [defendant]'s statements were backed **[*19]** by any sort of coercive conduct or threat (*i.e.*, the ability to boycott, to enter into agreements not to advertise certain products, or an inherent authority that it could leverage to compel advertisers to deal exclusively with [defendant]."); *cf.* *Sanderson, 415 F.3d at 623* (finding no unfair tactics under the Sherman Act for defendant's false statements made about plaintiff, noting the lack of an "enforcement mechanism" paired with the alleged falsehoods). Specifically, Illumina can threaten to never service a used Illumina sequencing unit purchased from IET or another reseller if the customer does not pay the threatened licensing fee, or refuse to sell the consumer sequencing unit consumables or replacement parts needed to keep the machine operational. These threats combined with the alleged misrepresentations about Illumina's ability to charge site licensing fees could drive all customers to Illumina and result in IET's exclusion from the marketplace of used sequencing units. (Resp. at 12 (noting Illumina's statements about licensing will ultimately limit the available resellers of used sequencing units and allow Illumina to increase prices).) *Cf.* *Briggs & Stratton Corp. v. Kohler Co., 405 F. Supp. 2d 986, 990 (W.D. Wis. 2005)* (finding misstatements alone without further mechanisms that **[*20]** did not "otherwise exclude [the party] from the market" and were thus insufficient to establish predatory conduct under the Sherman Act). We find IET's pleadings about Illumina's allegedly false statements are sufficient to survive a motion to dismiss, and need not consider IET's other claims about Illumina's allegedly predatory behavior.

B. Specific Intent to Monopolize

Next, Illumina argues IET has failed to allege an intent to achieve a monopoly. (Mem. at 9-10.) In attempted monopolization claims, "[s]pecific intent may be inferred from predatory conduct." *Great Escape, Inc. v. Union City Body Co., 791 F.2d 532, 541 (7th Cir. 1986)* (analyzing appeal of an order granting defendants summary judgment); *see also* *Viamedia, Inc. v. Comcast Corp., 218 F. Supp. 3d 674, 687 n.6 (N.D. Ill. 2016)* (noting that courts often infer intent from predatory behavior for purposes of a *Rule 12(b)(6)* motion to dismiss monopolization and attempted monopolization claims); *DSM Desotech Inc. v. 3D Sys. Corp., No. 08 C 1531, 2009 U.S. Dist. LEXIS 5980, 2009 WL 174989, at *10 (N.D. Ill. Jan. 26, 2009)* ("Although the specific intent requirement is consistently listed in the Seventh Circuit as a separate inquiry from the predatory conduct element, the same evidence that is used to prove predatory conduct often establishes specific intent as well."). As established above, IET has sufficiently alleged anticompetitive conduct; accordingly, we infer specific intent from the same **[*21]** allegations for the purposes of this motion.

C. Dangerous Probability of Achieving Monopoly Power

Next, Illumina argues IET has not alleged a dangerous probability of achieving a monopoly in the two alleged markets. A dangerous probability of establishing a monopoly in a market requires more than allegations of mere "unfair or predatory conduct"; instead, "the antitrust plaintiff must also prove the defendant has market power in a relevant market" and that the "market power will tend to approach monopoly power if the alleged unlawful conduct remains unchecked." *Walter Kidde Portable Equip., Inc. v. Universal Sec. Instruments, Inc., 669 F. Supp. 2d 895, 900-01 (N.D. Ill. 2009)* (citing *Spectrum Sports, 506 U.S. at 457, 113 S. Ct. at 891*; *DSM Desotech Inc. v. 3D Sys. Corp., No. 08 C 1531, 2009 U.S. Dist. LEXIS 5980, 2009 WL 174989, at *7 (N.D. Ill. Jan. 26, 2009))*. Courts regularly find pleading the defendant's share of the relevant market sufficient to allege this element at the pleading stage. *Walter Kidde, 669 F. Supp. 2d at 901*; *see also* *Avnet, Inc. v. Motio, Inc., No. 12 C 2100, 2015 U.S. Dist.*

*LEXIS 10799, 2015 WL 425442, at *6 (N.D. Ill. Jan. 30, 2015)* (finding an allegation that defendant controlled ninety-five percent of a market sufficient to survive a motion to dismiss); *Hon Hai Precision Indus., 2009 U.S. Dist. LEXIS 9165, 2009 WL 310890, at *3* (dismissing attempted monopolization claim under the Sherman Act for failure to plead dangerous probability of achieving a monopoly, noting that "the extent of [defendant]'s worldwide share in the relevant market . . . would allow the Court to infer that [defendant] threatens or even has the capacity to obtain monopoly power"). **[*22]** Lack of "competition in the relevant market" also suggests a dangerous probability of establishing a monopoly. *Hon Hai Precision Indus, 2009 U.S. Dist. LEXIS 9165, 2009 WL 310890, at *3*.

We previously dismissed IET's attempted monopolization claims after finding IET had failed to identify any non-conclusory facts demonstrating Illumina's market power in the relevant markets. (Order at 6.) Illumina presently argues the new statistics IET included in its second amended complaint still fail to establish Illumina's power in the relevant markets. (Mem. at 7.) IET states that based on figures from 2016, Illumina maintains a market share between sixty-three and sixty-seven percent in the secondary resale market of refurbished sequencing units. (2d Am. Compl. ¶¶ 20, 33.) IET alleges Illumina has an even higher market share in the used Illumina unit market, and that fewer than five companies in the United States and Canada sell used Illumina units. (*Id.* ¶ 11.) Specifically, IET claims Illumina's market share in the used Illumina unit market is higher because Thermo Fisher Scientific, which has a twenty-four percent market share in the used unit market generally, does not resell Illumina sequencing units. (*Id.* ¶ 20.) We find the pleading of specific percentage of market **[*23]** share of sixty-three and sixty-seven percent, which is allegedly even higher for the used Illumina sequencing unit market, sufficiently establishes probability of achieving monopoly power at this stage. (*Id.* ¶ 20.) *See, e.g., Walter Kidde, 669 F. Supp. 2d at 902* (finding plaintiff's allegations defendant controlled sixty-five percent of the market to be "sufficient" at pleading stage to establish market share); *Am. Tobacco Co. v. United States, 328 U.S. 781, 797, 66 S. Ct. 1125, 1133, 90 L. Ed. 1575 (1945)* (describing a company's control of over two-thirds of the cigarette market to constitute a substantial monopoly); *see also Endsley v. City of Chi., 230 F.3d 276, 282 (7th Cir. 2000)* (explaining that "frequently, questions of whether the defendant possessed the requisite market power to establish a monopoly are addressed on a motion for summary judgment or [at] trial").

Illumina seemingly misconstrues IET's statistics, arguing "IET does not allege that Illumina *sold* 63% of the genome sequencing systems in this putative relevant market," but "[i]nstead, this alleged 63% figure apparently reflects the share of resold genome sequencing systems *manufactured* by Illumina." (Mem. at 7.) While we agree this would be an important distinction, the relevant language of the second amended complaint discusses percentages of revenue from the sale of used sequencing units, not unit **[*24]** manufacturers. For example, IET pulls the sixty-three to sixty-seven percent figures from the "2016 total global" and "U.S. market share" of "market revenue for refurbished genome sequencing systems." (2d Am. Compl. ¶ 20.) IET clearly is referring to each company's percentage of total revenue from the sale of refurbished sequencing units, not the manufacturer of the units themselves.

Finally, Illumina argues that IET's acknowledgment of the existence of competitors in the used sequencing unit market "suggests Illumina does not have a dangerous proximity of monopoly power." (Mem. at 8 (citing Order at 7).) As mentioned above, IET states that other third parties resell Illumina's used sequencing units, including Certified Gene Tool, Carmet Scientific, and some sellers on E-Bay. (2d Am. Compl. ¶ 33.) However, especially when paired with Illumina's alleged market share, the mere existence of a small number of competitors in the relevant markets is not "fatal" to IET on this element. (Mem. at 8.) *See Walter Kidde, 669 F. Supp. 2d at 902* (finding the existence of three "main competitors" in the relevant market combined with defendant's alleged sixty-five percent market share to be sufficient to state a claim at the pleading **[*25]** stage).

Accordingly, based on the pleadings, IET has sufficiently alleged that Illumina "had sufficient market power to have been able to create a monopoly." *Endsley, 230 F.3d at 282* (citing *Hennessy Indus. Inc. v. FMC Corp., 779 F.2d 402, 405 (7th Cir. 1985))*.

D. Antitrust Injury

Finally, Illumina argues IET's antitrust claims must be dismissed because IET has failed to plead an alleged antitrust injury. (Mem. at 9; Reply (Dkt. No. 61) at 7-8.) Antitrust injury is a threshold requirement for private antitrust plaintiffs; the parties do not dispute that IET must plead an antitrust injury. (Reply at 7-8; Resp. at 13-14.) *See* *United States ex rel. Blaum v. Triad Isotopes, Inc., 104 F. Supp. 3d 901, 925 (N.D. Ill. 2015)* (discussing the "amorphous presence" of antitrust injury in "antitrust jurisprudence"). Antitrust injury is also a requisite element of a claim pursuant to *§§ 4* and *16 of the Clayton Act*. *15 U.S.C. § 15(a)* ("[A]ny person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws may sue therefor . . . ."); *Atl. Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 334, 110 S. Ct. 1884, 1889, 109 L. Ed. 2d 333 (1990)*. To prove an antitrust injury, plaintiff must show the injury is "the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful." *Atl. Richfield Co., 495 U.S. at 334, 110 S. Ct. at 1889* (internal citation omitted). In other words, "a private plaintiff must show antitrust injury—which is to say, injury by reason of those things that **[*26]** make the practice unlawful, such as reduced output and higher price." *U.S. Gypsum Co. v. Ind. Gas Co., 350 F.3d 623, 626-27 (7th Cir. 2003)*.

IET alleges it has suffered a number of injuries as the result of Illumina's alleged anticompetitive behavior, namely lost "actual and potential" sales of used sequencing units. (2d Am. Compl. ¶¶ 9, 11, 23-24, 45.) We agree with IET that its losses could "stem from the 'competition-reducing aspect' of Illumina's behavior." (Resp. at 14 (citing *Atl. Richfield Co., 495 U.S. at 344, 110 S. Ct. at 1894*) (emphasis removed).) This is because IET is not merely complaining about lost sales due to competition. Instead, IET alleges that Illumina's alleged predatory behavior is driving all third-party sequencing unit resellers out of the relevant markets, and as competition is eliminated, Illumina will raise prices, which will harm the consumer. (Resp. at 13-14.) *Cf.* *Ehredt Underground, Inc. v. Commonwealth Edison Co., 90 F.3d 238, 240 (7th Cir. 1996)* ("[W]e stress that antitrust is designed to protect consumers from producers, not to protect producers from each other or to ensure that one firm gets more of the business."); *Stamatakis Indus., Inc. v. King, 965 F.2d 469, 471 (7th Cir. 1992)* ("[T]he plaintiff's complaint is too much competition (injuring producers) rather than too little (injuring consumers). Entertaining claims of excessive competition would undermine the functions of the antitrust laws."). Accordingly, IET has **[*27]** sufficiently pled an antitrust injury as it claims its lost sales are due to Illumina's attempt to establish market power.

* * *

As IET has sufficiently plead the required elements to support an attempted monopolization claim under the Sherman Act, we deny Illumina's motion to dismiss IET's attempted monopolization claims (Counts I, II, and V).

II. ICFA AND UDTPA CLAIMS (COUNTS III & IV)

Finally, we consider IET's state law fraud claims. Illumina argues we must dismiss these claims because (1) IET did not allege it lost sales to Illinois customers and (2) none of Illumina's alleged misrepresentations "fall[] within the purview of the UDTPA." (Mem. at 13.)

A. Geographic Nexus to Illinois

As established in our previous order, both the ICFA and UDTPA have a limited reach outside of Illinois. (Order at 9.) *See* *Avery v. State Farm Mut. Auto. Ins. Co., 216 Ill. 2d 100, 185, 835 N.E.2d 801, 853, 296 Ill. Dec. 448 (Ill. 2005)* (holding the ICFA does not "apply to fraudulent transactions which take place outside of Illinois"); *see also* *LG Elecs. U.S.A., Inc. v. Whirlpool Corp., 809 F. Supp. 2d 857, 859 (N.D. Ill. 2011)* ("The Court concludes that the rule in *Avery* applies to the []UDTPA.").

To qualify as sufficiently "within Illinois" to bring a claim under the ICFA or UDTPA, a plaintiff must allege "circumstances that relate to the disputed transaction occur primarily and substantially in Illinois." **[*28]** *Avery, 216 Ill. 2d at 187, 835 N.E.2d at 853*. "[T]here is no single formula or bright-line test for determining whether a transaction occurs within [Illinois]"; instead, "each case must be decided on its own facts." *Id.* Relevant factors include "(1) the claimant's residence; (2) the defendant's place of business; (3) the location of the relevant item that is the subject of the disputed transaction; (4) the location of the claimant's contacts with the defendant; (5) where the contracts at issue were executed; (6) the contract's choice of law provisions . . . ; (7) where the allegedly deceptive statements were made; (8) where payments for services were to be sent; and (9) where complaints about the goods or services were to be directed." *Haught v. Motorola Mobility, Inc., No. 12 C 2515, 2012 U.S. Dist. LEXIS 119575, 2012 WL 3643831, at *3 (N.D. Ill. Aug. 23, 2012)*.

We previously dismissed IET's state fraud claims because we found IET failed to plead facts sufficiently connecting Illumina's actions to the state of Illinois. (Order at 10 (finding IET maintaining its principal place of business in Illinois to be an insufficient connection to Illinois).) In its second amended complaint, IET adds a list of four potential customers in Illinois that IET allegedly lost because of Illumina's conduct.[5] (2d Am. Compl. ¶ 45.) Illumina argues we should again find IET **[*29]** failed to sufficiently allege the requisite nexus to Illinois to proceed under the ICFA or UDTPA. (Mem. at 13.)

IET pleads two essential factors that create a connection to Illinois: IET being an Illinois corporation with its principal place of business in Mundelein, Illinois, and five sales IET alleges it lost from four potential customers in Illinois. (2d Am. Compl. ¶¶ 13, 45.) A plaintiff's injury in Illinois combined with specifically-identified lost sales to customers in the state sufficiently establishes a nexus to Illinois at the pleading stage. *AB SCIEX, LLC, 2013 U.S. Dist. LEXIS 123109, 2013 WL 4599903, at *11* (finding plaintiff sufficiently pled a nexus to Illinois on ICFA and UDTPA claims based on plaintiff's incorporation and primary place of business in Illinois combined with lost sales to three customers in Illinois); *cf.* *Walker v. S.W.I.F.T. SCRL, 491 F. Supp. 2d 781, 795 (N.D. Ill. 2007)* (finding no substantial connection to Illinois when only tie is plaintiff's residence in Illinois, noting specifically that none of the parties' interactions or transactions occurred in Illinois).

B. Scope of the UDTPA

Finally, Illumina argues IET's UDTPA claim should be dismissed because none of Illumina's alleged actions fall under the scope of the Illinois statute. (Mem. at 14-15.) To succeed on a UDTPA claim, IET **[*30]** must show Illumina "engaged in one of the types of deceptive conduct enumerated in the statute." *Patel v. Zillow, Inc., No. 17 C 4008, 2018 U.S. Dist. LEXIS 76245, 2018 WL 2096453, at *4 (N.D. Ill. May 7, 2018)* (slip op.), *appeal filed*, No. 18-21330 (7th Cir. May 21, 2018). IET claims Illumina's alleged behavior falls under two categories of prohibited activities listed in *§ 2 of the UDTPA*. (2d Am. Compl. ¶¶ 40-46.) *Section 2* defines "deceptive trade practice[s]" to include a person who "in the course of his or her business, vocation, or occupation . . . (11) makes false or misleading statements of fact concerning the reasons for, existence of, or amounts of price reductions; [or] (12) engages in any other conduct which similarly creates a likelihood of confusion or misunderstanding." *815 ILCS 510/2(a)(11)-(12)*. Illumina argues that its alleged behavior falls outside the scope of these subsections.

Illumina argues none of IET's allegations could fall under *subsection 12* because none of its alleged behaviors involve confusion related to the use of a "deceptive trade name, trademark, or other distinctive symbol." (Mem. at 14-15 (citing *ATC Healthcare Servs., Inc. v. RCM Techs., Inc., 192 F. Supp. 3d 943, 953 (N.D. Ill. 2016)*.) IET correctly observes in response that *subsection 12* is given broad interpretation. *Chi.'s Pizza, Inc. v. Chi.'s Pizza Franchise Ltd. USA, 384 Ill. App. 3d 849, 868, 893 N.E.2d 981, 998, 323 Ill. Dec. 507 (1st. Dist. 2008)*. However, The Seventh Circuit has clarified that "likelihood of confusion" under the UDTPA has the same meaning as in "traditional **[*31]** infringement cases." *McGraw-Edison Co. v. Walt Disney Prods., 787 F.2d 1163, 1174 (7th Cir. 1986)*. In trademark infringement law, "'likelihood of confusion' exists when the defendant's use of a deceptive trade name, trademark, or other distinctive symbol is likely to confuse or mislead consumers as to the source or origin of the product or service." *ATC Healthcare Servs., 192 F. Supp. 3d at 953*.

---

[5] IET alleges "Illumina's conduct has resulted in lost sales of preowned Illumina equipment to the following Illinois customers dating back to 2010": (1) the University of Chicago in Chicago, Illinois; (2) Tempus in Chicago, Illinois; (3) Argon National Laboratory in Argon, Illinois; and (4) ACGT Inc. in Wheeling, Illinois. (2d Am. Compl. ¶ 45.) IET alleges it lost two separate sales of Illumina GA2X systems to the University of Chicago. (*Id.*)

Here, IET has not alleged any behavior by Illumina that suggests Illumina used any sort of trademark or trade symbol of IET, and IET does not claim Illumina ever misled customers about the source of relevant sequencing units. We thus agree that IET has failed to meet the requirement of *subsection 12*. *Id.* (dismissing claim under *UDTPA subsection 12* because plaintiff did not allege defendant "tried to pass of its services as those of [plaintiff]," and because there was no confusion which company was contacting customers); *Lorillard Tobacco Co. v. Elston Self Serv. Wholesale Groceries, Inc., No. 03 C 4753, 2009 U.S. Dist. LEXIS 48615, 2009 WL 1635735, at *5 (N.D. Ill. June 9, 2009)* ("The concern over 'a likelihood of confusion or misunderstanding' in the Deceptive Practices Act is the same as that in trademark infringement cases. The focus is whether there is a likelihood of confusion over the *origin* of the product.") (internal citation omitted).

We do find, however, that IET's allegations could fit *subsection 11*. There is scant case law interpreting "price reduction" under **[*32]** the UDTPA; however, Illinois courts have directed the UDTPA is to be given broad interpretation. *Duhl v. Nash Realty Inc., 102 Ill. App. 3d 483, 495, 429 N.E.2d 1267, 1277, 57 Ill. Dec. 904 (1st Dist. 1981)* ("There is a clear mandate from the Illinois legislature that the courts of this State utilize the Act to the utmost degree in eradicating all forms of deceptive and unfair business practices and grant appropriate remedies to injured parties."). Illumina argues that IET does not plead any behavior of Illumina that falls under *subsection 11* because IET claims Illumina made false statements regarding "Illumina's ability to charge software relicensing fees," statements Illumina claims are not related to "price reductions." (Mem. at 14.)

However, we agree with IET that Illumina's alleged behaviors could fall within the scope of *subsection 11* if we consider the total price of a used Illumina unit to include both its price and the cost of its operating software. IET argues Illumina made false or misleading statements about Illumina's ability to charge software licensing fees for used Illumina sequencing units, and that a customer would not be subject to this fee should they purchase a used Illumina unit directly from Illumina. (2d Am. Compl. ¶¶ 5-6.) When considering the total price of a unit, **[*33]** the result of Illumina's threatened licensing fee is a lower total cost of a used Illumina sequencing unit if purchased from Illumina instead of IET. If Illumina did not have the right to charge this software licensing fee, this could constitute a false or misleading statement about its ability to offer a reduced price for the same equipment. Accordingly, making all inferences in IET's favor, we find IET's allegations could state a violation of *subsection 11*, and accordingly deny Illumina's motion to dismiss Count IV.

CONCLUSION

For the aforementioned reasons, we hereby deny Illumina's motion to dismiss. Illumina shall file its answer to IET's second amended complaint on or before September 12, 2018. The principal attorneys for Illumina and IET shall appear before the Court with an agreed written discovery plan at the Court's status call on October 18, 2018 at 10:30 a.m. It is so ordered.

Opinion

[*1042] **MEMORANDUM OPINION AND ORDER**

AMY J. ST. EVE, Circuit Judge*:

This antitrust suit was born when a monopolist in one market decided not to do business with a competitor from a related market. The monopolist, Comcast Corporation, denied its competitor, Viamedia, Inc., access (or access on terms Viamedia considered reasonable) to much-needed sales platforms called interconnects. Hurting as it lost

* Sitting by designation (R. 346).

revenue and customers turned to Comcast, Viamedia sued under Section 2 of the Sherman Act and various state antitrust laws. *See* Compl., R. 1; Am. Compl., R. 40.

At the motion-to-dismiss stage, the Court ruled that Comcast had no **[**2]** antitrust duty to deal with Viamedia and thus its refusal to deal was not cognizably anticompetitive under Verizon Commc'ns Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004), and its progeny. Viamedia, Inc. v. Comcast Corp., 218 F. Supp. 3d 674, 698-99 (N.D. Ill. 2016); Viamedia, Inc. v. Comcast Corp., No. 16-CV-5486, 2017 U.S. Dist. LEXIS 24213, 2017 WL 698681, at *3-6 (N.D. Ill. Feb. 22, 2017). Now, at the summary-judgment stage, the question is whether Comcast's conduct can be characterized as something more—tying, exclusive dealing, or another form of anticompetitive conduct. It cannot. Undisputed facts reveal that Viamedia's alternative theories are lacking as a matter of law. Undisputed facts demonstrate that Comcast's refusal to deal with Viamedia—not coercive conduct directed at their mutual customers—is what caused Viamedia's injuries and damages.

Before the Court are Comcast's motion for summary judgment (R. 264), motion to exclude opinions proffered by Viamedia, Inc.'s damages expert, Thomas Lys, Ph.D. (R. 212), and motion to exclude certain opinions proffered by Viamedia's liability expert, Harold Furchtgott-Roth (R. 208). For the reasons explained below, the Court grants Comcast's motion for summary judgment, grants in part Comcast's motion to exclude Dr. Furchtgott-Roth's opinions and denies the remainder as moot, grants Comcast's motion to exclude Dr. Lys's opinions, and enters judgment in Comcast's favor.

[*1043] BACKGROUND

I. Factual Background [**3]

Northern District of Illinois Local Rule 56.1 frames how district courts receive facts at the summary-judgment stage. *See* Delapaz v. Richardson, 634 F.3d 895, 899 (7th Cir. 2011). Local Rule 56.1(a)(3) requires the movant to provide "a statement of material facts as to which the moving party contends there is no genuine issue and that entitle the moving party to a judgment as a matter of law." L.R. 56.1(a)(3); Curtis v. Costco Wholesale Corp., 807 F.3d 215, 219 (7th Cir. 2015). The nonmovant must then file "a response to each numbered paragraph in the moving party's statement, including, in the case of any disagreement, specific references to the affidavits, parts of the record, and other supporting materials relied upon." L.R. 56.1(b)(3)(B); Petty v. Chicago, 754 F.3d 416, 420 (7th Cir. 2014). The nonmovant may also submit a separate statement of additional facts that require the denial of summary judgment, including references to the affidavits, parts of the record, and other materials relied upon to support those facts. L.R. 56.1 (b)(3)(C); *see also* Ciomber v. Coop. Plus, Inc., 527 F.3d 635, 643-44 (7th Cir. 2008).

The purpose of Local Rule 56.1 statements and responses is to identify the relevant admissible evidence supporting the material facts, not to make factual or legal arguments. Cady v. Sheahan, 467 F.3d 1057, 1060 (7th Cir. 2006); *see also* United States v. 5443 Suffield Terrace, Skokie, Ill., 607 F.3d 504, 510 (7th Cir. 2010) ("[S]ummary judgment may only be defeated by pointing to admissible evidence in the summary judgment record that creates a genuine issue of material fact, and it was not the district court's job to sift through the record **[**4]** and make [a claimant's] case for him"). Unresponsive, argumentative, evasive, and unsupported denials are improper, *e.g.,* Morrill v. Nielsen, 2018 U.S. Dist. LEXIS 106950, Phillips v. Quality Terminal Servs., LLC, 855 F. Supp. 2d 764, 771 (N.D. Ill. 2012), and district courts may disregard improper denials and deem the opponent's facts admitted, *e.g.,* Aberman v. Bd. of Educ. of Chi., 242 F. Supp. 3d 672, 677 (N.D. Ill. 2017). *See also* Boss v. Castro, 816 F.3d 910, 914 (7th Cir. 2016) ("The district court's discretion to require strict compliance with Local Rule 56.1 has been upheld time and again."). Moreover, "[w]hen reviewing a summary judgment motion, courts may only consider admissible evidence." FED. R. CIV. P. 56(c); McGreal v. Vill. of Orland Park, 850 F.3d 308, 312-14 (7th Cir. 2017). "To be considered on summary judgment, evidence must be admissible at trial, though 'the form produced at summary judgment need not be admissible.'" Cairel v. Alderden, 821 F.3d 823, 830 (7th Cir. 2016) (quoting Wragg v. Village of Thornton, 604 F.3d 464, 466 (7th Cir. 2010)). With those principles and the Rule 56 standard in mind, the parties' respective Local Rule 56.1 statements and responses describe the following backdrop to this lawsuit.[1]

A. The Spot Cable Business and Interconnects

Cable networks, like ESPN or CNN, typically allocate small windows of air **[*1044]** time—two to three minutes per hour—to the multichannel video programming distributors ("MVPDs") that show their programming. CSF ¶ 7.[2] These windows, according to industry parlance, are called "availabilities," "avails," or "spot cable ads." *Id.* ¶¶ 7, 9. About a quarter of the time, MVPDs retain those avails to advertise **[**5]** their or their affiliates' services. VSF ¶ 5. MVPDs sell the remainder to outside advertisers—and how they choose to do so is the focus of this case. *See* CSF ¶ 9.

There are many MVPDs nationwide, including Comcast, RCN Corporation, Wide Open West ("WOW!"), Charter Communications, Inc., Atlantic Broadband, and Verizon Communications. MVPDs come in different forms—cable operators, like Comcast or Charter; telecom providers, like Verizon and AT&T; overbuilders, like WOW! and RCN; and satellite providers, like DISH or DirectTV. *Id.* ¶ 8. Most MVPDs offer their services in one or more metropolitan regions, called designated market areas ("DMAs"). *Id.* ¶ 5. There are typically four or more MVPDs in a DMA. Comcast Ex. 2, Furchtgott-Roth Report ¶ 17 (R. 273-5).

In any given DMA, there are different ways in which MVPDs sell avails to advertisers. Some MVPDs sell directly through their own sales force. CSF ¶ 10. Others hire advertising-representation firms that specialize in spot cable advertising ("Ad Reps"). *Id.* ¶ 11. Viamedia is such an Ad Rep, and it has no corporate affiliation with any MVPD. *Id.* ¶ 13. Viamedia, in fact, is the only independent Ad Rep with significant market presence. VSF ¶ **[**6]** 9.[3] Comcast, under the trade name Comcast Spotlight, also does business as an Ad Rep, both on its own behalf and on behalf of other MVPDs.[4] CSF ¶ 5.

When an MVPD hires an Ad Rep, the two typically enter into an "advertising purchase and sale" agreement. *Id.* ¶ 11. Under these agreements, an Ad Rep is responsible for managing and selling an MVPDs' avail inventory (or some portion of it) to advertisers. *Id.* ¶¶ 11-12; VSF ¶ 1. Ad Reps can represent their MVPD customers: (1) locally, selling only a part of an MVPD's avails in a DMA to local advertisers; (2) regionally, selling all of the MVPD's avails in a DMA; or (3) nationally. Furchtgott-Roth Report ¶ 21. In any event, Ad Reps' sales responsibilities entail ancillary responsibilities, too, including: marketing and pricing the avails; maintaining the software and hardware needed to run, insert, traffic, monitor and advertise spot cable ads; organizing inventory into schedules and ensuring each ad runs correctly during those schedules; and performing financial services, like accounting, billing, and collection. VSF

---

[1] Comcast argues that Viamedia's Statement of Additional Facts exceeds the court-ordered limit of 75 facts (*see* R. 315) by compounding multiple facts into single paragraphs, and asks the Court to strike the stated facts exceeding that limit. R. 339 at 25. Although Comcast has a point—Viamedia's fact-packing borders on gamesmanship—the Court, in its discretion, will not strike any of Viamedia's stated facts. *See* Benuzzi v. Bd. of Educ. of Chi., 647 F.3d 652, 655 (7th Cir. 2011) (courts have "broad discretion" in enforcing local rules). Comcast is (though less so) guilty of the same tactic, and the additional facts Viamedia offers do not impact the Court's analysis.

[2] The Court will refer to Comcast's Rule 56.1 Statement of Undisputed Facts with Viamedia's responses (R. 327) as "CSF," and Viamedia's Rule 56.1 Statement of Additional Facts with Comcast's responses (R. 341) as "VSF." Unless otherwise noted—specifically, with a "Resp. to ¶"—a citation to a paragraph refers to the paragraph itself and not to the opposing party's response.

[3] Comcast challenges this fact, proffered by Viamedia's expert Dr. Furchtgott-Roth, as unsupported because Dr. Furchtgott-Roth's opinions are inadmissible. *See* Furchtgott-Roth Report ¶ 44. Comcast, however, did not move to exclude this opinion from Dr. Furchtgott-Roth's report. *See* R. 211.

[4] Comcast Cable Communications Management, LLC is a successor to Comcast Spotlight, and it is a wholly owned subsidiary of Comcast Corporation. CSF ¶ 5. Both parties nevertheless refer to Comcast's spot cable ad rep business as Spotlight, and so will the Court.

¶ 1. Ad Reps are also responsible for working with interconnects to sell avails. *Id.* These services make up "Ad Rep Services," **[**7]** according **[*1045]** to Viamedia. *Id.; see also* Furchtgott-Roth Report ¶¶ 22-29.

An interconnect is a "one stop shop" where advertisers can purchase spot cable ads on a DMA-wide basis. CSF ¶ 16. Developed by MVPDs in the 1990s, interconnects solve a market inefficiency. Before interconnects, an advertiser wanting to reach television audiences with commercials running at the same time on the same channel across the DMA had to either rely on over-the-air broadcast stations exclusively or negotiate separately with each MVPD. CSF ¶¶ 14-15, Resp. to ¶ 14. An interconnect—of which there is one per DMA—fixes that problem by pooling together avails among the DMAs' MVPDs, scheduling allocations, selling and coordinating the sale of those avails, and billing the parties. *Id.* ¶ 17, Resp. to ¶ 17. These collective services make up "Interconnect Services," according to Viamedia. *Id.; see also* Furchtgott-Roth Report ¶¶ 30-42.

Over the last decade or so, the largest MVPD in a DMA has come to operate that DMA's interconnect. *Id.* ¶ 18; *see also* Am. Compl. ¶¶ 13, 44. In operating the interconnect, the controlling MVPD makes investments to support and maintain the platform. The degree and nature of those investments **[**8]** are disputed, but, at a minimum, MVPDs invest in and maintain a sales infrastructure for the interconnects. CSF ¶ 20, Resp. to ¶ 20; *see also* Comcast Ex. 14 at 147:11-14 (David Solomon, Viamedia's Chief Revenue Officer, testifying that, "I'm sure [Comcast] ha[s] over the past 18 years . . . spent significant [sic] to establish support, build and maintain their infrastructure" over the interconnects").

Ad Reps, pursuant to the purchase and sale agreements, profit from the sale of MVPDs' avails based on an agreed revenue share, or split, with the MVPD. CSF ¶ 38. The split is the percentage division of the revenue generated from the avails' sales, with a share going to the Ad Rep and the remainder to the MVPD. *Id.* A higher split share for the Ad Rep means a worse price for the Ad Rep's services to the MVPD, and vice versa. *Id.* ¶ 39. Also important, of course, is the amount of revenue generated—an MVPD could concede a less favorable split if it thought that the Ad Rep would be able to generate more revenue. *Id.*, Resp. to ¶¶ 38, 39. Ad Reps also sometimes provide MVPDs with minimum-revenue guarantees. *Id.* ¶ 40. Revenue splits and guarantees are "critical points of competition" between Ad **[**9]** Rep firms vying for MVPD business. *Id.* ¶ 41.

As to other terms of Ad Rep-MVPD agreements, the industry standard is exclusive, region-wide, full-turnkey representation. CSF ¶¶ 25-27. In a full-turnkey representation, the MVPD sells all of its avails in one or more DMA (absent the portion it wants to retain for self-advertising) to a single Ad Rep. *Id.* The Ad Rep then enjoys the "exclusive right to manage and sell" the avails. *Id.* ¶ 27; VSF ¶ 2. This arrangement offers "one stop shopping" for both MVDPs and Ad Reps. CSF ¶ 28. Full-turnkey representation comes with other services, too; Viamedia, for example, assists MVPDs with their branding efforts, product promotions, and technical problems. VSF ¶ 6.

Though the most prominent, full-turnkey is not the only form of Ad Rep Services. Some MVPD customers hire Ad Reps to represent them locally, and sign over only a portion of their avails in a DMA. *E.g.*, Furchtgott-Roth Report ¶¶ 24-25; *see also id.* ¶ 53 ("Spot Cable Ad Rep Services and Interconnect Services are separate products regardless of whether Spot Cable Ad Rep Services are provided on a full turnkey basis"). Other MVPDs may self-provide Ad Rep Services. Furchtgott-Roth Report ¶¶ 24-25. **[**10]**

[*1046] Interconnect operators can also work directly with an MVPD customer to sell a portion of the MVPD's avails without a third-party Ad Rep. *See id.* ¶ 53; CSF ¶ 29. This arrangement is called an "interconnect-only" agreement. CSF ¶ 30. In such an agreement, the MVPD sells a portion of its avails to the interconnect operator for sale on a DMA-wide basis. *Id.* ¶ 29. Interconnect-only agreements allow interconnect operators to provide Interconnect Services directly to MVPDs. VSF ¶ 67. To sell the remaining avails on a local (*i.e.*, not regional or DMA-wide) basis, MVPDs with an interconnect-only agreement may sell their own avails or hire an Ad Rep for "local-only" agreements. CSF ¶¶ 29, 31, 33, 126; *see also* VSF ¶ 67. Verizon and Frontier, Verizon's successor in certain DMAs, have previously opted for this arrangement in some DMAs. CSF ¶¶ 32-37. For its part, Comcast has been willing to enter into interconnect-only agreements; since December 2011, 14 percent of Comcast's agreements with MVPDs have been interconnect-only. *Id.* ¶ 129. Comcast entered into its most recent interconnect-only deal in September 2016. *Id.* ¶ 125; Comcast Ex. 58.

B. Comcast's Competition with Viamedia and Control of the [11] Interconnects**

Viamedia and Comcast compete as Ad Reps for business from MVPD clients in many DMAs. VSF ¶ 9. The record reflects that both have respective advantages. Comcast, as a large MVPD, and in some DMAs the largest (and therefore the operator of the interconnect), requires less incremental operation expenses to represent fellow MVPDs. CSF ¶ 115; Comcast Ex. 96 at 16 (internal Viamedia presentation stating "Viamedia can not [sic] compete economically within the footprint of a major cable company"); *see also* Comcast Ex. 18 at 93:5-19. Particularly relevant here, Comcast operates the interconnects in Chicago, Detroit, and Hartford, Connecticut. *Id.* ¶ 10. At the same time, some MVPDs have expressed that "all things being equal" they would prefer that a competitor, like Comcast, not represent them. VSF ¶ 7; Viamedia Ex. 69 at 8 ("RCN is not comfortable having its largest and most formidable rival as its representative in the spot cable market"). This benefits an unaffiliated Ad Rep, like Viamedia. *Id.* Viamedia's former Chief Financial Officer, Christopher Black, has also testified that Viamedia had "[l]ong term relationships with . . . certain MVPDs" and provided strong customer service. **[**12]** *Id.* ¶¶ 6, 8; Viamedia Ex. 8. Both Viamedia and Comcast pursue full-turnkey relationships with their MVPD clients, *Id.* ¶ 55; VSF ¶ 7, although, as noted, Comcast has entered into interconnect-only agreements with some frequency.

Ad Reps require interconnect "access" to compete effectively for MVPDs' business because of the substantial amount of advertising revenue interconnects generate. Am. Compl. ¶ 73; CSF ¶ 111; VSF ¶ 20. The parties engage in a semantic debate about whether Ad Reps access interconnects "on behalf" of their MVPD clients, and whether the MVPD clients "feel" as though they participate in the interconnects, but the economic facts of the transaction are straightforward. For an Ad Rep to obtain access, the interconnect operator contracts with the Ad Rep to acquire a portion of ad inventory from the Ad Rep, which the Ad Rep has already acquired responsibility for selling from its MVPD-client. *See* CSF ¶ 42; Comcast Ex. 34. The interconnect operator then arranges for the sale of those avails on the interconnect, and distributes proceeds to the Ad Rep accordingly. *Id.*

This was the agreement Comcast and Viamedia entered into in 2003. *Id.* ¶¶ 42- **[*1047]** 43. Pursuant to that agreement, **[**13]** Comcast had the exclusive right to sell through its Chicago and Detroit interconnects a portion of an ad inventory for which Viamedia had acquired responsibility from two of its clients, RCN and WOW!. *Id.* ¶ 43. Viamedia's representations of RCN and WOW! were, as is typical, exclusive and full-turnkey, meaning that RCN and WOW! could not resell their avails through another third party in the Chicago and Detroit DMAs. *Id.* ¶¶ 44, 49. Viamedia's exclusive relationship with RCN was to expire at the end of 2015, and its exclusive relationship with WOW! was to expire at the end of 2014. CSF ¶¶ 88, 96; VSF ¶¶ 26, 32. Further, the 2003 agreement contained a non-solicitation clause, which prohibited Comcast from contacting RCN or WOW! for certain periods. CSF ¶ 45. The 2003 agreement between Comcast and Viamedia contemplated an expiration date of May 31, 2012. *Id.* ¶ 46.

Months before that expiration date, in December 2011, Comcast notified Viamedia that it would not be renewing the agreement. VSF ¶ 15; CSF ¶ 47. As a result, from June 2012 until the expiration of Viamedia's exclusive contracts with RCN and WOW!, Viamedia, RCN, and WOW! lost out on revenue they may have made if Viamedia could **[**14]** have continued to use Comcast's interconnects. *See* VSF ¶ 17.

Comcast did not renew its contract with Viamedia so that it could pursue full-turnkey relationships with RCN and WOW!. *Id.* ¶ 15. According to Comcast, it "prefers to do direct deals with MVPDs rather than intermediaries like Viamedia." CSF ¶ 48. Put another way, Comcast's strategy, starting in 2011, was "to get" MVPDs to employ Comcast on a full-turnkey basis. VSF ¶ 15; Viamedia Ex. 57; *see also, e.g.*, Viamedia Ex. 53 (citing Comcast's "[r]ealigned business strategy for 2012 and beyond with non-renewal of Viamedia contract for allowing for full turnkey opportunities into the future."). To that end, Comcast stopped contracting "with 'middlemen' media firms, such a Viamedia." Viamedia Ex. 69 at 9. One Comcast executive explained: "Working through a middleman, intermediary, like Viamedia really brought no value to the table other than their contract with their respective MVPDs," and so the company looked to deal directly with the MVPDs. Viamedia Ex. 21 at 167.

Whatever Comcast's motivations, its strategy and Viamedia's resultant inability to access the interconnects in Chicago and Detroit cost Viamedia, RCN, and WOW! "millions **[**15]** of dollars in revenue" between June 2012 and 2015. VSF ¶ 23. This came as no surprise to Comcast. In 2011, it knew that Viamedia had the exclusive right to sell all of WOW! and RCN's avails in Chicago and Detroit "for several years into the future," VSF ¶ 14, and it conducted an internal analysis that projected that its decision to not renew with Viamedia would negatively impact Comcast Spotlight, Viamedia, RCN, and WOW! in 2012, *id.* ¶ 16. In addition to Chicago and Detroit, Comcast has denied Viamedia's request to enter into an interconnect agreement with it in the Hartford DMA, where Viamedia represents Frontier. *Id.* ¶ 18.

In 2014, however, Comcast and Viamedia began negotiating a contract to permit Viamedia access to the Chicago, Detroit, and Hartford interconnects. *Id.*, Resp. to ¶ 18. WOW! even got involved, and directly requested that Comcast allow its avails (still contracted to Viamedia) to be sold on the interconnects "immediately." *See* VSF ¶ 19.[5] Yet Comcast and Viamedia failed to **[*1048]** reach terms. Viamedia's Chief Executive Officer, Mark Lieberman, called Comcast's offer "neither fair nor reasonable." Comcast Ex. 116.

C. Viamedia's Subsequent Lost Business

From 2011, when **[**16]** Comcast notified Viamedia that it would not renew their interconnect agreement in Chicago and Detroit, until 2016, when Viamedia filed this lawsuit, Viamedia operated in 90 DMAs representing at least nine MVPDs. CSF ¶¶ 54, 57. In that period, Viamedia bid for and lost several MVPD clients—and it attributes many of those losses, and others, to Comcast's conduct in Chicago, Detroit, and Hartford.

1. RCN

Up until 2015, Viamedia was RCN's only Ad Rep nationwide. VSF ¶ 32. In 2014, RCN and Viamedia began to negotiate renewing their full-turnkey agreements. CSF ¶ 96. During negotiations, Viamedia "stepped back its guarantees" and gave a "less favorable" offer in November of that year, which caused RCN to react negatively. CSF ¶ 97. RCN then, and for apparently the first time in its relationship with Viamedia, requested Viamedia's financials, which showed that the company was suffering. VSF ¶ 33. According to Viamedia, without interconnect access in Chicago and Detroit, it was "unable to make a competitive financial offer." *Id.* ¶ 33. RCN requested a bid for exclusive, full-turnkey services from Comcast in 2015. CSF ¶ 99. It never sought from Comcast an interconnect-only agreement. *See id.* Comcast **[**17]** ultimately offered superior terms, which, as a former RCN executive testified, made the offers "nowhere near equal" and a "not [ ] very difficult decision" for RCN to make. *Id.* ¶ 100. It selected Comcast as its full-turnkey Ad Rep, knowing that its decision could result in Viamedia exiting the Chicago DMA market. *Id.* ¶ 103.

RCN understood that it could not have its avails sold on Comcast-operated interconnects if it sought to do so through a third-party Ad Rep, like Viamedia. *Id.*, Resp. to ¶ 104; *see also* VSF ¶ 19. RCN wrote to the Federal Communications Commission during Comcast's proposed merger with Times Warner Cable ("TWC"), and explained that Comcast "limit[s] access to the interconnects to those firms [*i.e.*, MVPDs] that eschew the use of Viamedia and other third party representatives." Viamedia Ex. 69. It cited Comcast's policy, that it "does not typically contract with 'middlemen' media firms, such as Viamedia." *Id.*

2. WOW!

WOW! and Viamedia's relationship began in 2001. VSF ¶ 26. As of 2015, and after several contract renewals, Viamedia represented WOW! in 12 DMAs. *Id.* Expecting its contract with WOW! to expire at the end of 2014, WOW!

---

[5] Viamedia paints these requests by WOW! as "directly solicited proposals." VSF ¶ 19. To the extent Viamedia means that WOW! sought a direct, interconnect-only deal with Comcast, it is mistaken. The record makes clear that WOW! in 2014 was still under contract with Viamedia (and so could not "directly" engage Comcast for anything, even an interconnect-only deal), and that WOW!'s 2014 request sought "to get *Viamedia* back into the Chicago and Detroit interconnects." Viamedia Ex. 14 at 108:25-109:4; *id.* at 105:16-19 (emphasis added).

solicited bids from Viamedia and Comcast **[**18]** in October 2013. CSF ¶ 88. WOW! selected Viamedia, but only for a year—to the end of 2015. *Id.* ¶ 89. In 2015, WOW! issued another bid to Comcast and Viamedia seeking proposals for exclusive, full-turnkey representation in eight DMAs, including Chicago and Detroit. *Id.* ¶ 90. WOW!, like RCN, never requested an interconnect-only deal from Comcast. *See id.* By the 2015 request for **[*1049]** bids, WOW! was "very unhappy" that Viamedia had not been able to sell its avails on the Chicago and Detroit interconnects. VSF ¶ 27. Comcast again offered better financial terms to represent WOW! in the Chicago and Detroit DMAs, and WOW! selected Comcast in those regions. CSF ¶¶ 91, 92. In so doing, WOW! recognized that its decision could force Viamedia out of the Chicago and Detroit regions. *Id.* ¶ 94. WOW!, however, selected Viamedia to represent it in other DMAs, like Columbus, Cleveland, and Tampa. VSF ¶ 29.

WOW! valued having its avails sold on the interconnects and the resulting substantial revenue. *Id.* ¶ 28. WOW!, like RCN, understood that if it wanted its avails sold on the Comcast-operated interconnects in Chicago and Detroit, it would need to directly contract with Comcast—it could not do so through Viamedia. **[**19]** *Id.* In weighing Viamedia and Comcast, for example, WOW! listed Comcast's interconnect access as a "pro" and Viamedia's lack thereof as a "con." Viamedia Ex. 68. Internal WOW! emails similarly reflect that the company believed it needed to have a "rep agreement" with Comcast to have its avails sold on the interconnects. CSF ¶ 95, Resp. to ¶ 95.

3. Verizon

In 2006, Viamedia and Verizon entered into a full-turnkey representation agreement for nine DMAs. CSF ¶ 58. In 2009, the parties extended the agreement through December 2013, but contracted to allow for Verizon to "negotiate for the sale of regional and/or national Commercial Advertising in any Other Market by means of an 'interconnect' in such DMA," including Dallas, Los Angeles, and New York. *Id.* ¶ 59. In May 2010, Verizon and TWC entered into an agreement, pursuant to which TWC purchased 40 percent of Verizon's avails in Dallas, Los Angeles, and New York—where TWC operated the interconnects—for sale on TWC's interconnects. *Id.* ¶ 60. That agreement contained a "Local Business Option." If TWC met certain performance metrics in 2011 and 2012, it could "elect to present Verizon's local advertising sales business" beginning in 2014. *Id.* ***[**20]*** ¶ 61.

In January 2013, pursuant to the Verizon-TWC contract, TWC notified Verizon that it was contemplating exercising the Local Business Option and attached its performance-metric calculations. *Id.* ¶ 62. Verizon responded on February 15, 2015, with a metrics report. Under the original TWC-Verizon contract, TWC had until March 15, 2013, or 30 days after receipt of the metrics report to exercise its Local Business Option. VSF ¶ 50. On March 15, 2013, however, the parties amended the agreement and extended the date by which TWC could exercise the Local Business Option to April 5, 2013. VSF ¶ 50, Resp. to ¶ 50. TWC exercised the Local Business Option on that day. *Id.* ¶ 50. Verizon then replaced Viamedia with TWC in those DMAs. *See* CSF ¶ 65. Further, and also in 2013, Verizon informed Viamedia that it had selected other Ad Reps—including Bright House, Cox, and Comcast—to represent it in several respective DMAs. VSF ¶ 47, Resp. to ¶ 47.

Before then, Verizon and Viamedia had started to negotiate for Viamedia's continued representation after 2013. *Id.* ¶ 50. During those negotiations, Verizon expressed concerns about Viamedia's fiscal health. *Id.* ¶ 50. In each DMA that Viamedia lost Verizon's **[**21]** business, it failed to match the terms offered by the competing Ad Reps. CSF ¶ 69.

4. Frontier

Viamedia has been an Ad Rep for Frontier since 2010. VSF ¶ 37. In 2014, Frontier acquired AT&T's MVPD system in Hartford. CSF ¶ 71. Comcast, which operates the Hartford interconnect, had previously **[*1050]** represented AT&T on a full-turnkey basis, and, under that agreement, any successor (like Frontier) had the right to assume Comcast's Ad Rep agreement. *Id.* ¶ 72. Frontier instead entered into an exclusive, full-turnkey agreement with Viamedia for the Hartford DMA, set to expire at the end of 2018. *Id.* ¶ 73; VSF ¶ 37. Comcast, however, has refused to enter into an agreement with Viamedia to allow for the sale of Frontier's avails on the Hartford interconnect. *Id.* ¶ 39. As a result, Viamedia and Frontier have not benefited from those potential sales, and Frontier's revenues fell below the baselines guaranteed by Viamedia in 2015 and 2016. *Id.* ¶ 41.

Outside of Hartford, Viamedia bid for Frontier's business in Los Angeles and Dallas (where Comcast does not run the interconnects). CSF ¶ 77. Frontier rejected Viamedia's offer because it fell "significantly below market value." *Id.* ¶ 78. Viamedia also lost **[**22]** Frontier's business in Tampa (where Comcast also does not control the interconnects) to Bright House. *Id.* ¶ 79.

5. Atlantic Broadband

In 2014, Atlantic Broadband sought bids from Comcast and Viamedia for exclusive, fullturnkey representation in seven DMAs (none of which was Chicago, Detroit, or Hartford). *Id.* ¶ 82. At the time, Comcast already represented Atlantic Broadband in each DMA; Viamedia had never represented Broadband. *Id.* ¶¶ 84?85. Comcast offered Atlantic Broadband terms "superior" to Viamedia. *Id.* ¶ 86. Atlantic Broadband chose Comcast. *Id.* ¶ 87. Viamedia, however, believes that it was "well positioned" to compete for Atlantic Broadband's business, and could have offered better terms and a more substantial guarantee if it had been allowed access to Comcast-controlled interconnects. VSF ¶¶ 51, 53.

6. Other Claimed Losses

Viamedia also claims that Comcast's refusal to allow its acquired avails to be sold on the Chicago, Detroit, and Hartford interconnects has harmed it in a bevy of ways. The refusal, according to Viamedia, has forced it to negotiate debt amendments, and incur bank and legal fees. *Id.* ¶ 54. In addition, it has had to pay certain personnel expenses, like "retention **[**23]** bonuses and severance payments," as well as wasteful fixed expenses, like "rent on unused office space in Chicago." *Id.* In 2012, Viamedia generated $212 million in revenue and had $23.5 million in EBITA annually, plus 460 employees who worked for 32 MVPD partners covering 4.7 million subscribers in 57 DMAs. *Id.* ¶ 56. Since 2012, however, Viamedia claims to have lost millions of investment dollars, its good reputation, talented employees, and the ability to renew or obtain new contracts with MVPD partners. *Id.* ¶ 57.

II. Procedural Background

Out of that factual backdrop, Viamedia filed this lawsuit on May 23, 2016. Viamedia brings claims of monopolization and attempted monopolization by Comcast in markets where it operates the interconnects in violation of *Section 2 of the Sherman Ac*t, *15 U.S.C. § 2*. Viamedia additionally raises state-law antitrust claims under the *Illinois Antitrust Act, 740 ILCS 10/3*, *Michigan Antitrust Reform Act, Mich. Comp. Laws § 445.771*, and *Connecticut Antitrust Act, Title 35, § 35-27*.[6] (Viamedia also brought a claim for tortious interference **[*1051]** with business expectancy, which it has since abandoned. *See* R. 326 at 14 n.2.) For Comcast's supposed antitrust wrongs, Viamedia seeks damages and asks the Court to "[e]njoin[ ] Comcast from **[**24]** engaging in the anticompetitive . . . conduct alleged, including any effort to exclude Viamedia or its MVPD clients from participating on a fair and open basis in the Interconnects." Compl. at 46; Am Compl. at 50.

A. The Motion-to-Dismiss Decisions

Comcast moved to dismiss the first complaint. R. 22, 23. As every claim of monopolization or attempted monopolization requires anticompetitive conduct, Viamedia proffered three in response to Comcast's motion to

---

[6] Comcast and Viamedia agree that there is no material difference between the federal antitrust claims and their state-law claims. R. 271 at 11 n.3; R. 23 at 15; R. 28 at 15. For the same reasons why Viamedia's federal ***antitrust law*** claims fail (as explained below), so too does its state-law claims.

dismiss: tying, of Comcast's Interconnect Services to its Ad Rep Services; exclusive dealing, in that Comcast's contracts with MVPDs were exclusive; and a refusal to deal, by denying interconnect agreements with Viamedia or offering commercially unacceptable terms.[7] Viamedia, via a surreply, made clear that it was pursuing only "straightforward tying and exclusive dealing theories," plus refusal to deal or essential facilities claims; it was not pursuing a "free-standing" monopolization claim. R. 32. The Court held that Viamedia sufficiently pled tying and exclusive dealing so as to permit discovery on those claims, but dismissed the refusal to deal claim without prejudice because it did not meet the high bar set by *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 105 S. Ct. 2847, 86 L. Ed. 2d 467 (1985)*, and *Verizon Commc'ns Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)*.[8] Namely, **[**25]** Viamedia did not plead that Comcast's exclusion of it from the interconnects was irrational but for an anticompetitive purpose. *See* *Viamedia, Inc. v. Comcast Corp., 218 F. Supp. 3d 674, 698-99 (N.D. Ill. 2016) (Viamedia I)*.

Viamedia amended its complaint, realleging its refusal to deal claim. Comcast moved to dismiss this part of the amended complaint, R. 45, 46, which the Court granted. Again, the Court ruled, Viamedia did not plead that Comcast's decision to exclude it from the interconnects was an independently anticompetitive act. *Viamedia, Inc. v. Comcast Corp., No. 16-CV-5486, 2017 U.S. Dist. LEXIS 24213, 2017 WL 698681, at *4-6 (N.D. Ill. Feb. 22, 2017) (Viamedia II)*. As such, this case proceeded to discovery on Viamedia's tying and exclusive dealing claims.

B. Comcast's Liability and Damages Experts

During discovery, and in support of its case, Viamedia identified and proffered two expert witnesses: Dr. Furchtgott-Roth, to opine on Comcast's liability; and Dr. Lys, to opine on damages.

1. Dr. Furchtgott-Roth's Opinions

Dr. Furchtgott-Roth's opinions touch on "the nature and extent of Comcast's monopoly power," the distinction between Ad Rep Services and Interconnect Services, and the "exclusionary nature" of Comcast's actions and their impact on the Ad Rep Services market. According to Dr. Furchtgott-Roth, Ad Rep Services and Interconnect **[*1052]** Services are "separate products" **[**26]** because there is a "sufficient demand to purchase" those services separately. Furchtgott-Roth Report ¶ 47. He cites "substantial evidence" in support, including Viamedia's own "business model" and the MVPDs that receive "unbundled" Ad Rep and Interconnect Services. By a "conservative" estimate, he submits, 21.5% of cable subscribers use an MVPD that relies on unbundled services, once subscribers to MVPDs that self-provide Ad Rep Services are removed from the mix. *Id.* ¶ 50. He includes in that group MVPDs that enter into fullturnkey agreements with third-party Ad Reps, which in turn contract with the interconnect operator to have a portion of the avails sold on the interconnects. *Id.* Dr. Furchtgott-Roth further notes that, although Interconnect Services also entail the selling of avails to advertisers, Ad Rep Services include additional "back office" services, unlike Interconnect Services, which entail "creating and maintaining schedules of advertising, inserting advertising, negotiating with and monitoring Interconnect operators, and allocating advertising inventory among multiple sales channels." *Id.* ¶ 51. In further support of his separate-products opinion, Dr. Furchtgott-Roth states **[**27]** that "some MVPDs unbundle" services by entering into interconnect-only agreements and "self-providing" Ad Rep Services. *Id.* ¶ 53.

Having defined separate products, Dr. Furchtgott-Roth explains his tying opinion. Interconnect Services are the tying product, and Ad Rep Services are the tied product. *Id.* ¶ 63. Evidence of Comcast's tying policy, according to

---

[7] Viamedia also raised a monopoly-leveraging theory, but that claim is predicated on underlying anticompetitive activity. *See* *Schor v. Abbott Labs., 457 F.3d 608, 611-13 (7th Cir. 2006)*.

[8] At the pleading stage, Viamedia also complained that Comcast had threatened to "shut Viamedia and its MVPD clients out" of using National Cable Communications LLC ("NCC"), a multi-DMA exchange. *See* Compl. ¶ 59. Viamedia appears to no longer pursue that theory, as "NCC" is mentioned in neither its response brief nor its Statement of Additional Facts.

Dr. Furchtgott-Roth, is found in testimony in which a Comcast executive—who worked in the Chicago and Detroit DMAs—agreed with the proposition that "if an MVPD wants to get access to Comcast [Spotlight] controlled Interconnect, it has to hire Comcast [Spotlight] as its ad sales representative." *Id.* ¶ 64. Dr. Furchtgott-Roth also cites testimony and documents suggesting that WOW! and RCN "understood" that they had to purchase Ad Rep Services from Comcast Spotlight to obtain access to the interconnects in 2014 and 2015. *Id.* Dr. Furchtgott-Roth reasons further that Comcast had to "exclude" Viamedia from Comcast-controlled interconnects as a "necessary" part of this tying policy, as it ostensibly made clear in 2011 when it "announced" that it was not going to renew its Interconnect agreement with Viamedia as a "continuation of a strategy **[**28]** to have full turnkey direct relationships with the MVPDs." *Id.* ¶ 65. Similarly, Comcast Spotlight's chief operating officer testified that non-renewal with Viamedia "freed [Comcast Spotlight] up" to "have the opportunity to present and have a direct relationship with WOW and RCN." *Id.* That tying practice has "manifested" in at least ten other DMAs as well, according to Dr. Furchtgott-Roth, as Comcast has also declined Viamedia interconnect access in those DMAs. *Id.* ¶ 69. Dr. Furchtgott-Roth opines further that the same conduct "that amounts to tying also amounts to exclusive dealing." *Id.* ¶ 72.

These practices lead Dr. Furchtgott-Roth to conclude that Comcast has foreclosed competition in the market for Ad Rep Services. *Id.* ¶ 90. That is, "by tying Spot Cable Ad Rep Services to Interconnect Services and entering into multi-year, exclusive contracts to provide both services as a bundle, Comcast Spotlight has created a formidable competitive advantage for itself over Viamedia." *Id.* ¶ 87. There is additional market foreclosure, Dr. Furchtgott-Roth opines, because MVPDs recognize that interconnect access is necessary to maximize their profits on avails, and Comcast has cut off Viamedia's **[**29]** access to Comcast-controlled interconnects. *Id.* ¶ 89-90.

[*1053] 2. Dr. Lys's Opinions

Dr. Lys's Amended Report calculates the damages Viamedia has purportedly suffered as a result of Comcast's conduct. He opines, ultimately, that Comcast has caused Viamedia $158 million in damages. Comcast Ex. 6, Lys Am. Report ¶ 37 (R. 273-9). Dr. Lys's opinions assume Comcast's liability for committing anticompetitive conduct. *Id.* ¶ 16. His opinions make the additional assumptions—albeit phrased as "understanding[s]" in his Amended Report—that Comcast's anticompetitive behavior resulted in the loss of several MVPD contracts. *Id.* ¶¶ 57-59. Specifically, Dr. Lys predicates his opinions on the "understanding" that "Comcast's anticompetitive conduct" caused Viamedia to lose the RCN and WOW! agreements in 2015, had a "material adverse effect on" Viamedia's retention of an agreement with Verizon in 2013, and caused Viamedia to fail to obtain an agreement with Atlantic Broadband in 2014. *Id.* His opinions also assume that Comcast's exclusion of Viamedia from the interconnects in Chicago, Detroit, and Hartford caused Viamedia to lose interconnect-related revenues, *id.* ¶ 56, and that Viamedia lost "out of pocket expenses" **[**30]** from Comcast's conduct. *Id.* ¶ 60. Dr. Lys divides his damages opinions into seven categories. His ultimate conclusion analyzes Viamedia's damages relating to: (1) interconnect-revenue losses in Chicago and Detroit; (2) interconnect-revenue losses in Hartford; (3) lost future agreements with WOW! for two DMAs; (4) lost agreements with RCN for five DMAs; (5) lost agreements with Verizon for nine DMAs; (6) lost agreements with Atlantic Broadband for six DMAs; and (7) out-of-pocket expenses.

On April 4, 2018, the Court held an evidentiary hearing regarding Dr. Lys's opinions pursuant to *Daubert v. Merrell Dow Pharms., Inc., 509 U.S. 579, 113 S. Ct. 2786, 125 L. Ed. 2d 469 (1993)*, and *Federal Rule of Evidence 702*. At the hearing, Dr. Lys explained his Amended Report in greater detail. In addition, he confirmed that his Amended Report assumed causation. The facts supporting his causation assumptions had been provided by Viamedia's management, although Dr. Lys noted that he "poked" their assertions to ensure that they had some sound basis. Dr. Lys elaborated that he did not think causation in this case could be demonstrated with economic analysis, because the market is one for services, not commodities. At the hearing, Viamedia's counsel, too, confirmed that Dr. Lys was not offered as an expert on causation. **[**31]** [9]

---

[9] Belatedly, and despite not designating Dr. Lys as causation expert, Viamedia submitted additional opinions from Dr. Lys, including opinions regarding causation. The Court granted Comcast's motion to strike those opinions. R. 283.

LEGAL STANDARDS

I. Summary Judgment Standard

Summary judgment is appropriate "if the movant shows that there is no genuine dispute as to any material fact and the movant is entitled to judgment as a matter of law." *Fed. R. Civ. P. 56(a)*. A genuine dispute as to any material fact exists if "the evidence is such that a reasonable jury could return a verdict for the nonmoving party." *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 248, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*. In deciding summary-judgment motions, "facts must be viewed in the light most favorable to the nonmoving party"—but "only if there is a 'genuine' dispute as to those facts." *Scott v. Harris, 550 U.S. 372, 380, 127 S. Ct. 1769, 167 L. Ed. 2d 686 (2007)*.

The party seeking summary judgment has the burden of establishing that there is no genuine dispute as to any material fact. **[*1054]** *See Celotex Corp. v. Catrett, 477 U.S. 317, 323, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986)*. After "a properly supported motion for summary judgment is made, the adverse party 'must set forth specific facts showing that there is a genuine issue for trial.'" *Anderson, 477 U.S. at 255* (quotations omitted). That is, the nonmovant "must point to specific facts showing that there is a genuine issue for trial, and inferences relying on mere speculation or conjecture will not suffice." *DiPerna v. Chicago Sch. of Prof'l Psychology, 893 F.3d 1001, 1006 (7th Cir. 2018)* (citation omitted); *see also Bunch v. United States, 880 F.3d 938, 941 (7th Cir. 2018)* ("The party that bears the burden of proof for an issue at trial must 'cite the facts which it believes [would] satisf[y]' that burden and **[**32]** 'demonstrate why the record is so one-sided as to rule out the prospect of a finding in favor of the non-movant.'") (quoting *Hotel 71 Mezz Lender LLC v. Nat'l Ret. Fund, 778 F.3d 593, 601 (7th Cir. 2015))*. If the nonmovant "fails to make a showing sufficient to establish the existence of an element essential to that party's case, and on which that party will bear the burden of proof at trial, summary judgment must be granted." *Blow v. Bijora, Inc., 855 F.3d 793, 797-98 (7th Cir. 2017)* (citation and quotations omitted). "When ruling on a motion for summary judgment, '[t]he court should neither look the other way to ignore genuine issues of material fact, nor strain to find material fact issues where there are none.'" *Simpkins v. DuPage Hous. Auth., 893 F.3d 962, 964 (7th Cir. 2018)* (quoting *Sec'y of Labor, U.S. Dep't of Labor v. Lauritzen, 835 F.2d 1529, 1534 (7th Cir. 1987))*.

"In the field of ***antitrust law***, summary judgment serves a vital function—it avoids wasteful trials and prevents lengthy litigation that may have a chilling effect on pro-competitive market forces." *Anderson News, L.L.C. v. Am. Media, Inc., 899 F.3d. 87 , 2018 U.S. App. LEXIS 21735, 2018 WL 3716083, at *7 (2d Cir. July 19, 2018)* (citation, modifications, and quotations omitted); *see also Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 594, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*. Indeed, "the very nature of antitrust litigation encourages summary disposition of such cases when permissible." *Collins v. Associated Pathologists, Ltd., 844 F.2d 473, 476 (7th Cir. 1988)*. That is not to say that there is heightened summary-judgment standard in antitrust cases—there is not. Nevertheless, at summary judgment, an antitrust claimant must "present evidence that tends to exclude the possibility that **[**33]** the [defendant's] conduct was as consistent with competition as with illegal conduct." *Mercatus Grp., LLC v. Lake Forest Hosp., 641 F.3d 834, 856 (7th Cir. 2011)* (quoting *Nelson v. Monroe Reg'l Med. Center, 925 F.2d 1555, 1578 (7th Cir. 1991))*; *see also Matsushita, 475 U.S. at 594*; *It's My Party, Inc. v. Live Nation, Inc., 811 F.3d 676, 685 (4th Cir. 2016)*; *Indiana Grocery, Inc. v. Super Valu Stores, Inc., 864 F.2d 1409, 1412 (7th Cir. 1989)*.

II. *Rule 702* and *Daubert* Standard

Courts may decide the admissibility of an expert witness's testimony in the context of a summary-judgment motion and when deciding whether the case presents a genuine issue of material fact warranting trial. *See, e.g., Manpower, Inc. v. Ins. Co. of Pa., 732 F.3d 796, 806 (7th Cir. 2013)*; *Lewis v. CITGO Petroleum Corp., 561 F.3d 698, 704 (7th Cir. 2009)*; *see also Porter v. Whitehall Labs., Inc., 9 F.3d 607, 612 (7th Cir. 1993)* (expert testimony must be admissible to be considered in a motion for summary judgment). "Any assessment of the admissibility of expert witness testimony begins with *Federal Rule of Evidence 702* and the Supreme Court's opinion in *Daubert*, as together they govern **[*1055]** the admissibility of expert witness testimony." *Krik v. Exxon Mobil Corp., 870 F.3d 669, 673 (7th Cir. 2017)*; *see also* *Owens v. Auxilium Pharms., Inc., 895 F.3d 971, 972 (7th Cir. 2018)*. *Rule 702* states:

> A witness who is qualified as an expert by knowledge, skill, experience, training, or education may testify in the form of an opinion or otherwise if:
> (a) the expert's scientific, technical, or other specialized knowledge will help the trier of fact to understand the evidence or to determine a fact in issue;
> (b) the testimony is based on sufficient facts or data;
> (c) the testimony is the product of reliable principles and methods; and
> (d) the expert has reliably applied the principles and methods to the facts of the case.

Fed. R. Evid. 702. **[**34]** In *Daubert v. Merrell Dow Pharms., Inc., 509 U.S. 579, 113 S. Ct. 2786, 125 L. Ed. 2d 469 (1993)*, "the Supreme Court interpreted *Rule 702* to require the district court to act as an evidentiary gatekeeper, ensuring that an expert's testimony rests on a reliable foundation and is relevant to the task at hand." *Gopalratnam v. Hewlett-Packard Co., 877 F.3d 771, 778, 732 Fed. Appx. 484 (7th Cir. 2017)*.

In deciding whether to admit expert testimony under *Rule 702* and *Daubert*, "the district court must evaluate: (1) the proffered expert's *qualifications*; (2) the *reliability* of the expert's methodology; and (3) the *relevance* of the expert's testimony." *Gopalratnam, 877 F.3d at 779* (emphases in original). A district court's evaluation of expert testimony under *Daubert* does not "take the place of the jury to decide ultimate issues of credibility and accuracy." *Lapsley v. Xtek, Inc., 689 F.3d 802, 805 (7th Cir. 2012)*; *see also* *Ortiz v. City of Chicago, 656 F.3d 523, 536 (7th Cir. 2011)* ("The admissibility determination is not intended to supplant the adversarial process, and so even 'shaky' testimony may be admissible."). Once a court determines that "the proposed expert testimony meets the *Daubert* threshold of relevance and reliability, the accuracy of the actual evidence is to be tested before the jury with the familiar tools of 'vigorous cross-examination, presentation of contrary evidence, and careful instruction on the burden of proof.'" *Lapsley, 689 F.3d at 805* (quoting *Daubert, 509 U.S. at 596*); *see also* *Manpower, 732 F.3d at 806*. The "proponent of the expert bears the burden of demonstrating **[**35]** that the expert's testimony would satisfy the *Daubert* standard" by a preponderance of the evidence. *Lewis, 561 F.3d at 705*; *see also* *United States v. Saunders, 826 F.3d 363, 368 (7th Cir. 2016)* ("[F]or expert testimony to be admissible, the proponent of the evidence must establish that the expert's testimony is reliable (and relevant) by a preponderance of the evidence").

ANALYSIS

Comcast argues that summary judgment is appropriate for numerous reasons: Viamedia cannot establish anticompetitive conduct; Viamedia cannot establish causation, in the antitrust sense or for damages purposes; and Viamedia cannot otherwise establish harm to competition. The first two matters are dispositive, and so the Court will address only them. Along the way, the Court will address Comcast's motions to exclude Viamedia's expert opinions where relevant to the analysis.

I. Viamedia Cannot Establish Anticompetitive Conduct

Under *Section 2* of the Sherman Act, "[e]very person who shall monopolize, or attempt to monopolize" is subject to antitrust liability. *15 U.S.C. § 2*; **[*1056]** *see also* *15 U.S.C. § 15* (providing individual right of action). But like its fraternal twin, *Section 1*, *Section 2* bans less than its literal reading suggests. "Simply possessing monopoly power and charging monopoly prices does not violate" *Section 2*. *Pac. Bell Tel. Co. v. Linkline Commc'ns, Inc., 555 U.S. 438, 447-48, 129 S. Ct. 1109, 172 L. Ed. 2d 836 (2009)* (citing *United States v. Grinnell Corp., 384 U.S. 563, 570-571, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966))*. Instead, liability under **[**36]** *Section 2*, whether for monopolization or the attempt at it, requires "anticompetitive conduct." *Mercatus Grp., 641 F.3d at 854*; *Endsley v. City of Chicago, 230 F.3d 276, 282 (7th Cir. 2000)* ("The offense of monopoly under *§ 2*" requires "the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident"); *American Acad. Suppliers, Inc. v. Beckley-Cardy, Inc., 922 F.2d 1317,* 1320 (7th Cir. 1991) ("The offense of monopolization is the acquisition of monopoly by improper methods or, more commonly . . . the abuse of monopoly"); State of Ill. ex rel. Burris v. Panhandle E. Pipe Line Co., 935 F.2d 1469, 1481 (7th Cir. 1991) ("Section 2 forbids not the intentional pursuit of monopoly power but the employment of unjustifiable means to gain that power."). Such conduct, or "exclusionary practices," comes in many forms—"tie-in sales . . ., group boycotts, exclusive dealing . . ., or predatory pricing." Schor, 457 F.3d at 610.

Not usually counted among the traditional anticompetitive practices is a refusal to deal. Under well-rooted antitrust principles, firms generally have the right to determine with whom they will do business. United States v. Colgate & Co., 250 U.S. 300, 307, 39 S. Ct. 465, 63 L. Ed. 992, 1919 Dec. Comm'r Pat. 460 (1919). That right extends to monopolists, as "***antitrust law*** does not require monopolists to cooperate with rivals by selling them products that would help the rivals to compete." Schor, 457 F.3d at 610; *see also* Authenticom, Inc. v. CDK Glob., LLC, 874 F.3d 1019, 1025 (7th Cir. 2017) ("Even monopolists are almost never required to assist their competitors"); Goldwasser v. Ameritech Corp., 222 F.3d 390, 400 (7th Cir. 2000); Olympia Equip. Leasing Co. v. W. Union Tel. Co., 797 F.2d 370, 375 (7th Cir. 1986).

In the flagship **[**37]** case of *Trinko*, the Supreme Court held that a telecommunications monopolist had no antitrust duty to deal with a rival, let alone a duty to deal on favorable terms. 540 U.S. 409-10. *Trinko* teaches:

> Firms may acquire monopoly power by establishing an infrastructure that renders them uniquely suited to serve their customers. Compelling such firms to share the source of their advantage is in some tension with the underlying purpose of ***antitrust law***, since it may lessen the incentive for the monopolist, the rival, or both to invest in those economically beneficial facilities. Enforced sharing also requires antitrust courts to act as central planners, identifying the proper price, quantity, and other terms of dealing—a role for which they are ill suited. Moreover, compelling negotiation between competitors may facilitate the supreme evil of antitrust: collusion.

Id. at 407-08. A few years later, the Supreme Court echoed these principles. In *Linkline*, it held that another telecommunications monopolist had no duty to deal, let alone a duty to deal on favorable terms, in selling services to its competitors in the retail market. 555 U.S. at 450. *Linkline* confirmed that a monopolist can generally wield its "upstream" power "to prevent **[**38]** rival firms from competing effectively" in a downstream market. *Id.*; *see also* Novell, Inc. v. Microsoft Corp., 731 F.3d 1064, 1074 (10th **[*1057]** Cir. 2013) ("Even a monopolist generally has no duty to share (or continue to share) its intellectual or physical property with a rival.").

Indisputably, Comcast refused to deal with Viamedia by disallowing it access (or refusing it "reasonable" access) to the Chicago, Detroit, and Hartford interconnects. *See, e.g.*, CSF ¶ 48, VSF ¶ 15. That was its right under Trinko and the law of this case. *See* Viamedia I, 218 F. Supp. 3d at 697-99; Viamedia II, 2017 U.S. Dist. LEXIS 24213, 2017 WL 698681 at *4-6. As *Linkline* explains, the fact that Comcast may have refused to deal (or refused to deal on certain terms) to "prevent" Viamedia from "competing effectively" is largely irrelevant in the absence of a duty to deal. 555 U.S. at 450; *cf*. Furchtgott-Roth Report ¶¶ 97-120 (opining on whether Comcast's "proposed justifications" for "excluding Viamedia from the Chicago and Detroit Interconnects" are "persuasive"); Comcast Ex. 1.1, Report of Dennis W. Carlton (R. 273-2) (opining of the economic efficiencies of Comcast's conduct).

Viamedia, however, submits that Comcast's conduct constitutes more than a "mere" refusal to deal. R. 326 at 26. It argues that Comcast, in excluding Viamedia (and by extension, Viamedia's customers) from the interconnects **[**39]** and later taking RCN's and WOW!'s business, has engaged in the "distinct" practices of tying, exclusive dealing, or general exclusionary conduct. *See* Viamedia I, 218 F. Supp. 3d at 699. Yet discovery has demonstrated otherwise. The record leaves no genuine issue of material fact regarding the viability of Viamedia's alternative theories.

A. There Is Insufficient Evidence that Comcast Engaged in Anticompetitive Tying

Viamedia claims that Comcast tied access to the interconnects, or Interconnect Services (the tying product), to Comcast's Ad Rep Services (the tied product). "A tying arrangement is 'an agreement by a party to sell one product but only on the condition that the buyer also purchases a different (or tied) product, or at least agrees that he will not purchase that product from any other supplier.'" Eastman Kodak Co. v. Image Tech. Servs., Inc., 504 U.S. 451, 461-62, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992) (quoting N. Pac. Ry. Co. v. United States, 356 U.S. 1, 5-6, 78 S. Ct. 514, 2 L. Ed. 2d 545 (1958)). The Supreme Court has emphasized that the "essential characteristic of an invalid tying arrangement lies in the seller's exploitation of its control over the tying product to force the buyer into the purchase of a tied product that the buyer either did not want at all, or might have preferred to purchase elsewhere on different terms." Jefferson Par. Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 12, 104 S. Ct. 1551, 80 L. Ed. 2d 2 (1984); *see also* Sheridan v. Marathon Petroleum Co. LLC, 530 F.3d 590, 592 (7th Cir. 2008) ("The traditional antitrust concern with such an agreement **[**40]** is that if the seller of the tying product is a monopolist, the tie-in will force anyone who wants the monopolized product to buy the tied product from him as well, and the result will be a second monopoly."). Accordingly, a tie, whether expressly instituted or effectively applied, exists only where "the defendant improperly imposes conditions that explicitly or practically require buyers to take the second product if they want the first one." Phillip E. Areeda and Herbert Hovenkamp, ***ANTITRUST LAW***: AN ANALYSIS OF ANTITRUST PRINCIPLES AND THEIR APPLICATION ¶ 1752b (3d ed. 2018).

1. No Evidence Tends to Exclude the Likelihood That Comcast, Rather Than Tying Services, Simply Refused to Deal with Viamedia

Viamedia has not identified a genuine issue of fact as to whether Comcast tied **[*1058]** the sale of Interconnect Services and Ad Rep services.[10] A fundamental element of a tying claim—conditioning—is absent from Viamedia's construct. *See* Sheridan v. Marathon Petroleum Co. LLC, 530 F.3d 590, 592 (7th Cir. 2008); Carl Sandburg Vill. Condo. Ass'n No. 1 v. First Condo. Dev. Co., 758 F.2d 203, 207 (7th Cir. 1985).

No evidence shows that Comcast told MVPDs, expressly or impliedly, that they could only purchase Interconnect Services on the condition that they also purchase Ad Rep Services. *See* Photovest Corp. v. Fotomat Corp., 606 F.2d 704, 722 (7th Cir. 1979) ("we are reluctant to find a tying arrangement without some evidence that **[**41]** [the defendant]" created applied a "de facto tying clause"); Areeda & Hovenkamp, ***Antitrust Law*** ¶ 1700i ("products are not tied unless the supplier refuses to accommodate those who prefer one without the other"). To the contrary, it is undisputed that 14 percent of Comcast's agreements with MVPDs are interconnect-only. CSF ¶¶ 123-24. With an interconnect-only agreement, an MVPD is free to: forego employing any Ad Rep Services; hire another Ad Rep to sell a portion of their remaining avails on a non-full-turnkey basis[11]; and/or self-provide Ad Rep Services by selling its own avails. *See* CSF ¶¶ 29, 32-36, 126. In antitrust terms, the customer (an MVPD) can purchase the tying product (Interconnect Services) without purchasing the tied product (Ad Rep Services). *Accord* Datagate, Inc. v. Hewlett-Packard Co., 60 F.3d 1421, 1427 (9th Cir. 1995) ("The harm from tying arrangements is the forced sale of the *tied* product, not the withholding of the tying product.") (emphasis in original). That Comcast has so often entered into such standalone sales of the tying product belies any inference that Comcast tied its services. *See* Live Nation, 811 F.3d at 685 (14 percent of non-tied sales "exceed [ ] sufficiently" whatever baseline is required "to cast doubt on any allegation of tying"); Areeda & Hovenkamp, ***ANTITRUST LAW*** ¶ 1756b2 **[**42]** (suggesting that "10 percent unbundling" rebuts "an otherwise established or presumed inference of a tying condition").

Viamedia tries to do away with this inconvenient fact in two ways. First, it argues that Comcast did not sell interconnect-only deals in Chicago, Detroit, and Hartford, where Comcast denied Viamedia use of the interconnects. This case, however, is not limited to those markets—Viamedia challenges Comcast's conduct in the markets in which it operates the interconnects generally. Am. Compl. ¶¶ 1, 180; *see also* Furchtgott-Roth Report ¶¶ 63-73. Second, Viamedia contends that substantial evidence of unbundled sales does little to defeat a tying claim in cases where there is an "announced condition," "rebuffed request for separate provision," or "publicized policy" of

---

[10] The Court assumes that Interconnect Services and Ad Rep services are distinct services for tying purposes, and that MVPDs "consider" themselves as receiving Interconnect Services from interconnect operators (like Comcast) even when they have hired a unaffiliated Ad Rep (like Viamedia) on a full-turnkey basis. *See, e.g.*, R. 326 at 27.

[11] As noted, Viamedia does not define Ad Rep Services as exclusive, full-turnkey representation. *See, e.g.*, Furchtgott-Roth Report ¶¶ 24-25; R. 326 at 7. Doing so would necessarily defeat its tying claim, for reasons discussed below.

tying. *See* Areeda & Hovenkamp, ***Antitrust Law*** ¶¶ 1756a, 1756b. True enough, but this is no such case. The record lacks evidence showing that Comcast told customers that they could not receive an interconnect-only deal—that is, Interconnect Services—standing alone.[12]

[*1059] Even focusing exclusively on Chicago, Detroit, and Hartford, there is insufficient evidence **[**43]** of conditioning. "A high percentage, even 100 percent, of unbundled sales does not itself indicate that two products may have been tied together" because "buyers may have all bought the products bundled because they preferred them together." *Id.* ¶ 1756b2. Viewing the record in the light most favorable to Viamedia, this is precisely what it reflects. It is undisputed that both RCN and WOW! *wanted* full-turnkey representation, and whichever company they hired had to have the ability to make available to them both Interconnect Services and Ad Rep Services. CSF ¶¶ 90, 99. When "a consumer wants to purchase a bundle of the alleged tying and tied products, the seller is simply satisfying consumer demand and monopolization concerns are irrelevant." *Kaufman v. Time Warner, 836 F.3d 137, 142 (2d Cir. 2016)*.

Viamedia responds by pointing out that Comcast never *offered* RCN or WOW! an interconnect-only deal. VSF ¶ 19. But why would it-Firms soliciting business have no reason to offer potential customers a less substantial (and presumably less profitable and less efficient) deal than the one those customers seek. Areeda & Hovenkamp, ***Antitrust Law*** ¶ 1700i ("[F]inding two products does not mean that they are tied together. The franchisee may have preferred **[**44]** a 'turnkey' franchise and never asked for the" tying product "separately"); *see also Kaufman, 836 F.3d at 142*. RCN and WOW! sought both Interconnect Services and Ad Rep Services made available through a single full-turnkey relationship, and the "voluntary purchase of two products together" is "not a tie at all." *Will v. Comprehensive Accounting Corp., 776 F.2d 665, 669 (7th Cir. 1985)*.

Viamedia thus cannot show that Comcast ever withheld the tying product *from customers* unless they also purchase the tied product. *Live Nation, 811 F.3d at 684* (if "the buyer is free to decline the tied product or to purchase the two products separately, then by definition there is no unlawful tying"). The real rub of Viamedia's tying claim is, instead, that Comcast withheld the tying product *from its rival Viamedia*. The consequence: customers that contracted with Viamedia could not obtain Comcast's Interconnect Services through their Viamedia representation, and customers wanting a full-turnkey deal that made available to them both Interconnect Services and Ad Rep Services could not get such a deal through Viamedia. In Viamedia's words, Comcast withholds Interconnect Services from "*Viamedia's MVPD partners*"—not MVPDs, period—and therefore "constrains improperly [MVPDs'] choice" by "excluding Viamedia" as a competitor. R. 326 **[**45]** at 19.

Viamedia's theory extends tying beyond the law's recognition. The constraining of consumer choice is of course a feature of a tying arrangement, Areeda & Hovenkamp, ***Antitrust Law*** ¶ 1756b2, but there must still be an actual "tie" of products or services, *Reifert v. S. Cent. Wisconsin MLS Corp., 450 F.3d 312, 317 (7th* **[*1060]** *Cir. 2006)*; *Photovest, 606 F.2d at 722*. Viewing the record in Viamedia's favor, it shows none.

Aerotec Int'l, Inc. v. Honeywell Int'l, Inc., 836 F.3d 1171 (9th Cir. 2016), illustrates the point. In *Aerotec*, a manufacturer, Honeywell, operated in two related markets. *Id. at 1175*. It was a monopolist in the replacement parts market, and a competitor in the repair services market. *Id. at 1175-76*. Honeywell had long dealt on prioritized and better terms with itself and its affiliated servicers than with independent ones, like Aerotec. *Id. at 1176-77*. But when a parts shortage hit, Honeywell's supply of parts to Aerotec came to a halt. This was ruinous for Aerotec; it could not live up to certain contracts and lost future work, including work that went to Honeywell. *Id. at 1177*. Aerotec

---

[12] Viamedia does not claim a "negative tie." *See In re Dealer Mgmt. Sys. Antitrust Litig., 313 F. Supp. 3d 931, 2018 U.S. Dist. LEXIS 80937, 2018 WL 2193236, at *20 (N.D. Ill. May 14, 2018)*. Even if it did, the record would not support it. There is no evidence suggesting that Comcast conditioned the sale of Interconnect Services *to MVPDs* on them agreeing not to purchase Viamedia's Ad Rep Services. *Cf. Eastman Kodak, 504 U.S. 463 n. 8* ("Assuming, *arguendo*, that Kodak's refusal to sell parts to any company providing service can be characterized as a unilateral refusal to deal, its alleged sale of parts to third parties on condition that they buy service from Kodak is not."). As discussed further below, RCN and WOW! wanted full-turnkey representation and at least a portion of their avails sold on the Interconnects; because of Comcast's refusal to deal with Viamedia, a full-turnkey agreement with Viamedia could not offer that bundle.

sued alleging, among other things, anticompetitive tying of replacement parts to repair services (it called the parts shortage pretextual). The district court granted Honeywell summary judgment, and the Ninth Circuit affirmed. Regarding the tying claim, the Ninth Circuit reasoned that there was no evidence that **[**46]** Honeywell "explicitly or implicitly ties or conditions the *sale* of APU parts *to APU owners* on a requirement that the owners" use Honeywell services. *Id. at 1179* (emphases in original). It did not matter if Honeywell had refused to deal fairly with Aerotec, which made it more difficult for Aerotec to compete and owners to receive Honeywell parts without Honeywell repair services. *Id. at 1179-80*. The Ninth Circuit "decline[d] to stretch the tying construct to accommodate the claim that . . . conduct toward third party servicers . . . acts as an effective, or 'de facto,'" tying condition. *Id. at 1178*.[13]

A similar story unfolded in *Serv. & Training, Inc. v. Data Gen. Corp., 963 F.2d 680 (4th Cir. 1992)*. In that case, Data General manufactured computer systems and offered a diagnostic tool that was critical to servicing those systems. Data General used the diagnostic tool in servicing its systems for customers, but it refused to license the diagnostic tool to competing third-party maintenance servicers. *Data Gen., 963 F.2d at 682-83*. One servicer sued, alleging that Data General effectively tied the provision of its diagnostic tool to the sale of its services. *Id. at 683*. The district court granted Data General summary judgment and the Fourth **[**47]** Circuit affirmed. The Fourth Circuit held that, even if the diagnostic tool and maintenance services could be tied together, the plaintiff-servicer had not produced sufficient evidence of such a tie. *Id. at 687-88*. Evidence showed that customers demanded that their servicers be able to use the diagnostic tool, and, as the result of Data General's refusal to license, third-party servicers simply could not compete for that **[*1061]** business. *See id. at 687*. This was not a tying condition, according to the court. *See id. at 687-688*; *see also id. at 686* ("The fact that Data General has selectively licensed [the diagnostic tool] is not evidence of an illegal tying arrangement. Data General may lawfully license [the tool] to whomever it chooses.").

Like the third-party competitors in *Aerotec* and *Data General*, Viamedia has shown "no direct condition" of a tie. *Aerotec, 836 F.3d at 1179*; *see Data Gen., 963 F.2d at 687-88*. It admits that Comcast has been willing to deal with MVPDs on an interconnect-only basis, and no evidence shows that a sales condition—as opposed to prevailing MVPD preference combined with Comcast's refusal to deal—is what kept RCN and WOW! from purchasing Viamedia's Ad Rep Services. *See Data Gen., 963 F.2d at 687-88*. Rather than show a direct tying condition on MVPD customers, Viamedia takes issue with how **[**48]** Comcast has chosen (not) to deal with *it* and the consequences that choice has had on *its* ability to compete. But "tactics imposed on a third-party competitor" are insufficient "to create a tie with respect to a separate buyer simply because they make it less desirable to purchase from the third party." *Aerotec, 836 F.3d at 1180*; *accord Linkline, 555 U.S. at 450* (a monopolist can generally wield its "upstream" power "to prevent rival firms from competing effectively" in a downstream market).[14]

---

[13] Viamedia's attempt to distinguish *Aerotec* is meritless. It argues that, "unlike the plaintiff in *Aerotec*, Viamedia does not purchase Interconnect Services for its own account, but rather purchases them on behalf of MVPDs." R. 326 at 28. How one could read *Aerotec* and conclude that the plaintiff (a repair servicer) purchased replacement airplane parts "for its own account"—as opposed to "on behalf of" its airplane-owning customers—is questionable. Like Viamedia, it was precisely because the plaintiff could not make available the supposedly tying product (replacement parts) to its customers that its business suffered. *Aerotec, 836 F.3d at 1177*; *see also Aerotec Int'l, Inc. v. Honeywell Int'l, Inc., 4 F. Supp. 3d 1123, 1133 (D. Ariz. 2014)* ("Aerotec asserts that Honeywell's practices amount to per se illegal tying, claiming that Honeywell uses its dominant position in the market for Honeywell APU parts to coerce APU owners, *who need Honeywell APU component parts for APU repairs*, to purchase MRO services from Honeywell.") (emphasis added). Whatever Viamedia means by "on its own account," it is an economically meaningless distinction in comparing *Aerotec* to this case.

[14] The Court recognizes that commentators and courts have remarked on the fact that a refusal to deal with related-market competitors—and vertical integration generally—can appear to have a tying effect in certain markets. *MCI Communications Corp. v. American Tel. & Tel. Co., 708 F.2d 1081, 1144 & n. 96 (7th Cir. 1983)* (noting the similarity in the plaintiffs' claims but not "imply[ing] that a tying violation will always flow from any denial of an essential facility by a dominant firm"); *Live Nation, 811 F.3d at 689* ("it is no surprise that vertical integration has generally been permitted despite its apparent similarity to tying"); Glen O. Robinson, *On Refusing to Deal with Rivals*, *87 Cornell L. Rev. 1177, 1178 (2002)*. Professor Hovenkamp, for example, has noted that "in dominated, path-dependent networks," refusals to deal with competitors can resemble "tying arrangements." *See* Herbert Hovenkamp, *The Obama Administration and Section 2 of the Sherman Act*, *90 B.U. L. Rev. 1611, 1642-43 (2010)*; Areeda & Hovenkamp, ***ANTITRUST LAW*** ¶ 772. Here, however, there is no tying effect, as no evidence shows that MVPDs cannot obtain (from Comcast at least) the tying product alone—they just cannot obtain it through Viamedia's representation. That

Viamedia's insistence that comments made by RCN, WOW!, and Comcast create a genuine issue of fact as to whether there was tying is misplaced. RCN and WOW! stated that they understood that they could not have their avails sold on Comcast-operated interconnects without hiring Comcast as their "representative." VSF ¶ 18. A Comcast executive, moreover, answered "yes" when asked by the Department of Justice whether it was Comcast's "business practice" that if "an MVPD wants to get access to a Comcast controlled Interconnect, it has to hire Comcast as its ad sales representative." *See id.* ¶¶ 13, 18, 19. None of these statements, however, "tend[ ] to exclude **[**49]** the possibility" that Comcast's conduct "was as consistent" with a legal refusal to deal as an illegal tying of its services. *Mercatus Grp., 641 F.3d at 856*; *see also* *Authenticom, 874 F.3d 1019* (after a preliminary-injunction hearing, expressing "dubious[ness] in the extreme" that a dealers' supposed tying of two related products "amounts to tying, rather than simply participation at two levels of the market, as in *Linkline*").

The undisputed context of those statements matters. *See* *Matsushita, 475 U.S. **[*1062]** at 586*. Only two companies competed for RCN's and WOW!'s Chicago and Detroit business in 2015, Viamedia and Comcast. They did so, at RCN's and WOW!'s invitations, on a full-turnkey basis. CSF ¶¶ 90, 99. RCN and WOW! knew that they could not have their avails sold on the interconnects if they contracted with Viamedia; Comcast, as interconnect operator, had made clear that it did not want to do business with Viamedia. Thus, to have their avails sold on the interconnects, RCN and WOW! had to deal directly with Comcast, the only source who made could make both services available in a single full-turnkey deal. This does not mean that the MVPDs could not have received an interconnect-only deal if they had requested one—that is, that they could have received the tying product **[**50]** without the tied product—but the record indisputably shows they did not want that service alone, instead opting for the full-turnkey bundle. *See* *Will, 776 F.2d at 669*.

Data General is again instructive. There, the plaintiff-servicer presented evidence that in pitching its maintenance service Data General had "stated to potential customers that *only* Data General" could use the diagnostic tool—the implication being, of course, that customers had to hire Data General services to receive the benefit of the diagnostic tool. *Data Gen., 963 F.2d at 687* (emphasis added). But this evidence did not tend to exclude legal conduct. *Id.* Other servicers had no right to use the diagnostic tool, and so Data General's statements were "entirely consistent" with it "lawfully extolling the superiority of its repair services." *Id.* Similarly, in *Data General* the "customers as a matter of fact have demanded that any" servicers "be able" to use the diagnostic tool, and thus the evidence that they choose Data General over other servicers suggested simply that customers "preferred Data General services using [the diagnostic tool] over [third-party servicers] that do not." *Id. at 687*. The same is true here. Viewing the record in Viamedia's favor, Comcast said that its **[**51]** "practice"—in an industry dominated by full-turnkey business, where MVPDs generally prefer not to do interconnect-only deals—is that an MVPD must employ Comcast to have its avails sold on the interconnects. *See* VSF ¶ 13. Likewise, RCN and WOW! did not complain that were unable to receive Interconnect Services from Comcast on a standalone basis. The record shows they complained, at most, that they could not receive Interconnect Services *through* Viamedia, and had to work with Comcast directly because they wanted full-turnkey representation that could make available Interconnect Services. *See, e.g.*, VSF ¶ 18. This evidence is, at a minimum, equally consistent with Comcast's refusal to deal with Viamedia as it is a tying arrangement.

None of this is to say that, as a matter of law, for a tying condition to be cognizably anticompetitive it must be applied directly and only to the end user, not its representative. *Cf.* *COPECA, Inc. v. Western Aviation Servs. Corp., 653 F. Supp. 2d 141, 147 (D.P.R. 2009)* (not seeing "the relevance" that a defendant applied an alleged tie "via an intermediary" because the defendant could still "impose its condition"). It is to say, however, that at summary judgment the claimant must present evidence tending to exclude the possibility that the **[**52]** defendant engaged in legitimate conduct. Viamedia lacks any evidence that Comcast withheld Interconnect Services from customers (as opposed to Viamedia) unless they also purchased Ad Rep Services, and it has not otherwise pointed to evidence suggesting that Comcast's conduct was anything more than a refusal to deal with Viamedia.

MVPDs typically choose not to obtain the tying product alone underscores the fact that this dispute should be resolved by the market, not the courts.

[*1063] Another wrinkle of Viamedia's claim is worth addressing. Although Viamedia does not define Ad Rep Services as only full-turnkey services, *see* Furchtgott-Roth Report ¶¶ 22-29, it occasionally refers to Comcast's tie as one of Interconnect Services to full-turnkey Ad Rep Services, *see* VSF ¶ 18, CSF, Resp. to ¶ 48. That changes little. For one, the record is devoid of evidence that customers could not receive Comcast's Interconnect Services standing alone (only that they could not receive those services through Viamedia's representation). Equally important, in a full-turnkey relationship with a third-party Ad Rep the MVPD does not directly contract for Interconnect Services. It relies on its Ad Rep—to which it has assigned all of its avails in a DMA—to make sure that a portion of those avails are sold on the interconnects. *See, e.g.*, VSF ¶¶ 1-3. Focusing on that **[**53]** scenario, there can be no anticompetitive tie.

Professors Areeda and Hovenkamp explain why. Suppose an ingot manufacturer "refuses to sell separately but rather fabricates into products like building wall sections, which it sells directly to builders." Areeda & Hovenkamp, ***ANTITRUST LAW*** ¶ 1748a. A rival fabricator demands ingot separately "so that it too can bundle it with fabrication services in order to make and sell walls. When the defendant refuses, [the rival] claims the defendant is tying ingot to fabrication services." *Id.* The claim fails as a matter of law:

> [T]he gravamen of the complaint is not that the defendant's bundled sales have foreclosed rivals from selling unbundled fabrication to the defendant's customers. Rather, the gravamen is that the defendant's refusal to sell unbundled ingot to the defendant's rival has prevented the rival from selling the very same ingot/fabrication bundle sold by the defendant. . . . For example, the plaintiff does not want the defendant to offer ingot separately to builders; nor would doing so eliminate any relevant "foreclosure" when builders do not want "un-tied" ingot in order to arrange separately for its fabrication. Rather, the plaintiff **[**54]** seeks to hold the defendant liable for not selling the plaintiff ingot so that it can fabricate ingot into wall sections too.

Id. ¶ 1748b. The antitrust laws do not favor such attacks on vertical integration, which are resolvable only by enforcing a duty to deal with a rival. *Id.*; *see also id.* ¶ 1700j1.

Viamedia submits that this principle applies only "to situations where the only separate demand for the tying product comes from the defendant's rivals." R. 326 at 31; *see also* R. 235 at 10. Not so. "Even if the separate provision of ingot [the tying product] and fabrication [the tied product] is common in competitive analogues," there is no liability for tying "when the plaintiff's theory of injury is not that customers of the defendant's bundle would buy the items unbundled if they could, but rather that a rival could sell the *same bundle* if only the defendant would sell it a particular input." Areeda & Hovenkamp, ***ANTITRUST LAW*** ¶ 1748b; *see also id.* ¶ 1748b n.2 (a finished-product exists even where the claimant meets the "threshold requirement of showing buyer interest because we can find some buyers desiring the items unbundled").

This is the "gravamen" of Viamedia's tying claim—that **[**55]** Comcast's refusal to provide it interconnect access prevents it from selling the kind of full-turnkey Ad Rep Services that WOW! and RCN desire. Although MVPDs in a full-turnkey relationship with a third-party Ad Rep may consider themselves to receive Interconnect Services from the interconnect operator, *see* VSF ¶ 3, it is undisputed that those MVPDs have one agreement with one Ad Rep that makes those Interconnect Services available to them without having to **[*1064]** have a direct relationship with the interconnect operator. (That is, of course, Viamedia's business model.) *See, e.g., id.* ¶¶ 1, 3; *see also* Furchtgott-Roth Report ¶ 53 (describing arrangements, unlike Viamedia's practice, in which MVPDs contract separately for Ad Rep Services and Interconnect Services as "unbundle[d]" transactions). Viamedia has no antitrust right to force Comcast to help it sell such a bundle to their mutual customers. *See* Areeda & Hovenkamp, ***ANTITRUST LAW*** ¶¶ 1748a, 1748b; *accord* *Linkline, 555 U.S. at 450*.

Viamedia further argues that deciding Comcast did not tie services would "conflict[ ] with sound antitrust policy." R. 326 at 29. It provides no authority for its perspective on what antitrust policy should be, and understandably. Viamedia's **[**56]** view "demand[s] that holders of market power cooperate with rivals"—a view that "bit the dust" with *Trinko*. Frank H. Easterbrook, *The Chicago School & Exclusionary Conduct*, *31 HARV. J.L. & PUB. POL'Y 439, 441-42 (2008)*. Courts routinely tout the procompetitive benefits of integration, even if middlemen suffer. *See, e.g., It's My Party, 811 F.3d at 689* ("A single firm incorporating separate but closely related production processes can often be far more efficient than various independent entities transacting to produce the same good or bundle of goods."). Viamedia's contrary claim "echoes a plea for relief on behalf of a competitor, not for the sake of competition itself." *Aerotec, 836 F.3d at 1180*.[15]

2. Dr. Furchtgott-Roth's Opinions Regarding Comcast's Supposed Tying Are Inadmissible

Dr. Furchtgott-Roth also opines that Comcast had an effective tying policy. He asserts that Comcast's own admissions and MVPDs' statements demonstrate that Comcast had a practice of tying, and that excluding Viamedia from the interconnects was a "necessary aspect" of that tying strategy. Furchtgott-Roth Report ¶ 3.e.; *see also id.* ¶¶ 63-71. These opinions, however, are inadmissible. They would not assist the trier of fact and are contrary to the law.

Rule 702(a) and *Daubert* provide that "[a]n expert's opinion is **[**57]** helpful only to the extent the expert draws on some special skill, knowledge, or experience to formulate that opinion"—in other words, "the opinion must be an *expert* opinion." *United States v. Benson, 941 F.2d 598, 604 (7th Cir. 1991)*, *amended on other grounds* *957 F.2d 301 (7th Cir. 1992)*; *see also* *FED. R. EVID. 702(a)*; *Owens, 895 F.3d at 972* (the expert's testimony must "assist the trier of fact"). "Expert testimony does not assist the trier of fact when the jury is able to evaluate the same evidence and is capable of drawing its own conclusions without the introduction of a proffered expert's testimony." *Matter of the Complaint of Ingram Barge Co., No. 13 C 3453, 2016 U.S. Dist. LEXIS 91408, 2016 WL 3763450, at *10 (N.D. Ill. July 14, 2016)*; *see also* *Dhillon v. Crown Controls Corp., 269 F.3d 865, 871 (7th Cir. 2001)* ("An expert must testify to something more than what is 'obvious to the layperson' in order to be of any particular assistance to the jury."); *Taylor v. Ill. Cent. R.R. Co., 8 F.3d 584, 585-86 (7th Cir. 1993)* (affirming the exclusion of expert testimony where "any lay juror could understand th[e] issue without the assistance of expert testimony"). As such, expert testimony **[*1065]** "cannot be presented to the jury solely for the purpose of constructing a factual narrative based upon record evidence." *Newman ex rel. Newman v. McNeil Consumer Healthcare, No. 10 C 1541, 2013 U.S. Dist. LEXIS 113438, 2013 WL 9936293, at *6 (N.D. Ill. Mar. 29, 2013)*; *United States v. Hall, 93 F.3d 1337, 1343 (7th Cir. 1996)* ("Unless the expertise adds something, the expert is at best offering a gratuitous opinion, and at worst is exerting undue influence on the jury."). Expert testimony, further, must be consistent with the law; otherwise it is necessarily unhelpful and risks confusing **[**58]** and misleading the jury. *Loeffel Steel Prods. v. Delta Brands, Inc., 387 F. Supp. 2d 794, 806 (N.D. Ill. 2005)* ("Expert opinions that are contrary to law are inadmissible. They cannot be said to be scientific, to be reliable, or to be helpful to the trier of fact.") (citations omitted).

Dr. Furchtgott-Roth's tying opinions fail these requirements. Furchtgott-Roth Report ¶¶ 63-71. His opinion that Comcast had a tying policy rests exclusively on a lay interpretation of evidence that this Opinion has already discussed. *Id.* ¶¶ 64-66. Quoting the Comcast testimony provided to the DOJ cited above, *supra at 34-35*, for example, he matter-of-factly asserts that "Comcast has admitted that it ties Spot Cable Ad Rep Services to Interconnect Services." *Id.* ¶ 64. He also relies on the MVPDs' statements to conclude that the MVPDs "understood" that they had to deal with Comcast to obtain Interconnect Services. *Id.* ¶ 64. Although Dr. Furchtgott-Roth later adopts his interpretation of those documents "[a]s a matter of economics," *id.* ¶ 68, he does not undertake any expert assessment in arriving at that conclusion. *Elorac, Inc. v. Sanofi-Aventis Canada Inc., No. 14 C 1859, 2017 U.S. Dist. LEXIS 133449, 2017 WL 3592775, at *27 (N.D. Ill. Aug. 21, 2017)* (excluding expert because "[n]o expert economic analysis is necessary on [a] basic point, nor, in truth, did [the expert] perform any; his opinion appears to be based simply on his review **[**59]** of [evidence], not a scientific analysis"); *In re Live Concert Antitrust Litig., 863 F. Supp. 2d 966, 993 (C.D. Cal. 2012)* (excluding expert opinions because a "key ingredient missing" was "*economic analysis* (be it quantitative or qualitative) tying these statements by [witnesses and observers] to" the "ultimate conclusion") (emphasis in original). All he cites is the undisputed and unremarkable fact that Comcast and Viamedia were the only two full-turnkey Ad Reps in certain DMAs, like Chicago and Detroit. *Id.* ¶ 67.

---

[15] Viamedia makes no argument that Comcast effectively and anticompetitively ties Interconnect Services to Ad Rep Services through discounted bundling. Nor could it, as no evidence shows that Comcast ever predatorily priced—or even sold below cost—its services. *See* *Midwest Gas Servs., Inc. v. Indiana Gas Co., 317 F.3d 703, 713 (7th Cir. 2003)*.

So unhelpful are Dr. Furchtgott-Roth's tying opinions that Viamedia, in arguing that there is an issue of fact as to whether Comcast engaged in tying, does not rely on them (either directly or via its Statement of Additional Facts). *See* R. 326 at 18-22, 26-30. Viamedia, instead, simply cites directly to many of the same pieces of evidence that Dr. Furchtgott-Roth does. Indeed, no expertise is needed to interpret, contextualize, or synthesize that evidence. *See* *Davis v. Duran, 276 F.R.D. 227, 231 (N.D. Ill. 2011)* ("expert testimony is helpful to the jury if it concerns a matter beyond the understanding of the average person"). But this betrays that Viamedia simply seeks to use Dr. Furchtgott-Roth's tying opinion to give an expert mouthpiece to its preferred (and unreasonable) narrative of the evidence. **[**60]** *See, e.g.,* *McNeil Consumer, 2013 U.S. Dist. LEXIS 113438, 2013 WL 9936293, at *6*; *Sullivan v. Alcatel-Lucent USA Inc., No. 12 C 07528, 2014 U.S. Dist. LEXIS 97011, 2014 WL 3558690, at *5 (N.D. Ill. July 17, 2014)* (excluding expert who "simply reads and interprets documents" without drawing "on any expert qualifications or experience").

Dr. Furchtgott-Roth's narrative, moreover, is contrary to the law for reasons already explained. His opinions seek to **[*1066]** hold Comcast liable for the mere withholding of the tying product, not the forced sale of a tied product, and not even to a customer, but to a competitor. *See* Furchtgott-Roth Report ¶¶ 67, 69-71; *see* *Aerotec, 836 F.3d at 1178-80*. Those opinions are "inconsistent with the definitions of tying and coercion in the context of tying claims," and thus inadmissible. *Gumwood HP Shopping Ptrs., L.P. v. Simon Prop. Grp., Inc., No. 3:11-CV-268 JD, 2016 U.S. Dist. LEXIS 144712, 2016 WL 6091244, at *4 (N.D. Ind. Oct. 19, 2016)*; *accord* *Norwest Bank v. KMart Corp., No. 3:94-CV-78RM, 1997 U.S. Dist. LEXIS 3426, 1997 WL 33479072, at *3 (N.D. Ind. Jan. 29, 1997)* (excluding opinions "close enough to this case's legal issues" so as to "create a risk of jury confusion"). The Court, accordingly, excludes Dr. Furchtgott-Roth's opinions on whether Comcast had a tying practice. *See* Report ¶¶ 3.e. 64-71.

B. There Is Insufficient Evidence that Comcast Engaged in Anticompetitive Exclusive Dealing

Viamedia next contends that Comcast engaged in exclusive dealing. Generally, "[a]n exclusive dealing **[**61]** contract obliges a firm to obtain its inputs from a single source." *Paddock Publ'ns, Inc. v. Chicago Tribune Co., 103 F.3d 42, 46 (7th Cir. 1996)*; *see also* Areeda & Hovenkamp, ***Antitrust Law*** ¶ 1800a; *Methodist Health Servs. Corp. v. OSF Healthcare Sys., 859 F.3d 408, 410 (7th Cir. 2017)*. "The objection to exclusive-dealing agreements is that they deny outlets to a competitor during the term of the agreement." *Roland Mach. Co. v. Dresser Indus., Inc., 749 F.2d 380, 393 (7th Cir. 1984)*; *see also, e.g.,* *Methodist Health Servs. Corp. v. OSF Healthcare Sys., No. 13-CV-01054, 2016 U.S. Dist. LEXIS 136478, 2016 WL 5817176, at *8 (C.D. Ill. Sept. 30, 2016)* ("Exclusive dealing claims brought under *§ 2* are analyzed in much the same way as *§ 1* claims"). As the Court has recognized, however, the law "'often approve[s]' of exclusive dealing because of its 'procompetitive benefits.'" *Viamedia I, 218 F. Supp. 3d at 696 (N.D. Ill. 2016)* (quoting *Republic Tobacco Co. v. N. Atl. Trading Co., 381 F.3d 717, 736 (7th Cir. 2004))*. These benefits include "increasing allocative efficiency, reducing adverse selection and moral hazard barriers to deals, and preventing free-riding." *VBR Tours, LLC v. Nat'l R.R. Passenger Corp., No. 14-CV-00804, 2015 U.S. Dist. LEXIS 130455, 2015 WL 5693735, at *12 (N.D. Ill. Sept. 28, 2015)* (citing *Republic Tobacco, 381 F.3d at 736*).

Viamedia does not explain its exclusive dealing claim.[16] It is not clear if Viamedia takes issue with the exclusive and full-turnkey representations that are the undisputed industry norm, the fact that Comcast deals exclusively with MVPDs that work directly with it, or some combination of the two. In any event, Viamedia's claim fails.

"The exclusion of competitors is cause for antitrust concern only if it impairs the health of the competitive process itself." *Roland Mach., 749 F.2d at 394*. "Hence" a plaintiff must be able to "prove that the probable (not certain) **[**62]** effect of the exclusion will be to raise prices above (and therefore reduce output below) the competitive level, or otherwise injure competition." *Id.* Viamedia has not produced any such evidence. It does not meaningfully argue that Comcast's exclusive dealings have harmed *competition*; it cites only is exclusion as a

---

[16] Viamedia's defense of its exclusive dealing claim is near perfunctory. It devotes just a page and a half to this claim in its 46-page brief, and in the course of that page and a half neither cites a single fact nor raises a single case save for *Viamedia I*.

competitor. *See* R. 326 at 22-23. Indeed, the record lacks any evidence showing that Comcast has **[*1067]** raised, plans to raise, or even has the ability to raise prices. *Accord* Schor, 457 F.3d at 612 ("The monopolist can take its profit just once; an effort to do more makes it worse off and is self-deterring."); *see also, e.g.,* Ohio v. Am. Express Co., 138 S. Ct. 2274, 2288, 201 L. Ed. 2d 678 (2018) (claim of anticompetitive conduct failed, in part, because it "did not offer any evidence that the [defendant's] price . . . was higher than the price one would expect to find in a competitive market"). Nor does the record contain any evidence showing that Comcast has reduced or plans to reduce output. *See* Methodist Health, 859 F.3d at 410 (affirming summary judgment because plaintiff had not shown evidence of the "dire consequences" required to deem exclusive contracting illegal).

To the contrary, Viamedia's own expert, Dr. Furchtgott-Roth, explains the procompetitive benefits of Comcast's deals. By bundling **[**63]** Interconnect Services and Ad Rep Services and selling them on an exclusive basis, Comcast is "able to offer financial terms to MVPDs that are much more generous than any terms Viamedia could feasibly (much less profitably) offer." Furchtgott-Roth Report ¶ 87.[17] Elsewhere in its brief, Viamedia cites the fact that MVPDs "consider" Viamedia's lack of MVPD-affiliation in weighing Ad Rep Services. But Viamedia provides no support for the notion that the fact that MVPDs deal with a fellow MVPD for the terms of their Ad Rep Services contracts constitutes a cognizable harm to competition. MVPDs themselves made clear that such a concern matters only when "all else [is] equal"—meaning they, like any rational consumer, value price and quality foremost. *See* R. 326 at 42; VSF ¶ 7; *see also* CSF ¶ 100 (RCN representative saying that Comcast's and Viamedia's offers were "nowhere near equal" and it was "not [ ] very difficult decision" for RCN to choose Comcast). Viamedia, further, has presented no expert evidence showing that it could have offered terms "equal" to Comcast's. *See id.* ¶¶ 116-122 (Comcast, on average, offered better revenue shares to MVPDs than Viamedia).

That Comcast's exclusive deals **[**64]** do not harm competition is further established by the fact that they are the very deals that MVPD-consumers seek. To be sure, the law can prohibit monopolists from engaging in conduct generally permitted to those without market power. Eastman Kodak, 504 U.S. at 488 (Scalia, J., dissenting); E.I. du Pont de Nemours & Co. v. Kolon Indus., Inc., 637 F.3d 435, 441 (4th Cir. 2011); United States v. Dentsply Int'l, Inc., 399 F.3d 181, 187 (3d Cir. 2005). But here it is undisputed that both RCN and WOW! *requested* "exclusive, full turnkey representation," CSF ¶¶ 90, 99, and only for a fixed period in limited geographic markets. *See* Methodist Health, 859 F.3d at 410; Areeda & Hovenkamp, ***ANTITRUST LAW*** 1802g2. Frontier wanted the same in Hartford, a deal which Viamedia won and assented to. *Id.* ¶ 73. MVPDs' desire for exclusive, full-turnkey deals is, moreover, economically sound. It is undisputed that such Ad Rep Services provide both MVPDs and advertisers a "one stop shop" for the sale and purchase of avails. CSF ¶ 28. Thus, doing as Viamedia requests—requiring a monopolist to rebuff **[*1068]** customers' requested, and mutually beneficial, terms in order to assist competitors—would itself "impair[ ] the health of the competitive process." Roland Mach., 749 F.2d at 394.

Viamedia does not dispute these facts. It admits that "full turnkey Spot Cable Ad Rep Services agreements have benefits." R. 326 at 23. It complains, instead, that it lacks "a fair **[**65]** playing field" on which to compete for such agreements, because of "Comcast's use of its conceded monopoly power over the Interconnects." *Id.* That is not a complaint about exclusive dealing, *see, e.g.,* Roland Mach., 749 F.2d at 394, but about Comcast's refusal to deal with Viamedia. As such, Viamedia has presented evidence neither showing exclusive dealing that harms competition nor evidence tending to exclude Comcast's legal conduct.[18]

---

[17] To the extent Dr. Furchtgott-Roth opines that Comcast has foreclosed Viamedia from the market as a result of its tying or exclusive dealing practices, *see* Furchtgott-Roth Report ¶ 90, those opinions are inadmissible because, for the reasons discussed in the text, his predicate opinions regarding the alleged tying and exclusive dealing are inadmissible as they are unhelpful to the jury and contrary to the law. In any event, Viamedia's response does not rely on Dr. Furchtgott-Roth's foreclosure opinions.

[18] Viamedia's response does not rely on Dr. Furchtgott-Roth's opinion about exclusive dealing. This opinion, in any event, is inadmissible. *See* Furchtgott-Roth Report ¶¶ 72-73. Constituting just two paragraphs, Dr. Furchtgott-Roth's opinion conflates tying and exclusive dealing. He asserts, "the same conduct by Comcast Spotlight that amounts to tying also amounts to exclusive dealing." *Id.* ¶ 72. Dr. Furchtgott-Roth, again, applies no expertise, analysis, or study in reaching that conclusion. *See*

C. Viamedia's Claim for Otherwise Anticompetitive Conduct is Procedurally Barred and Meritless

Viamedia also invokes a catchall exclusionary conduct claim, arguing that "however" Comcast's conduct is described it is anticompetitive. As Viamedia notes, the law precludes exclusionary conduct for *Section 2*'s purposes even if that conduct does not neatly fall into one of the traditional forms of anticompetitive conduct under *Section 1*. *See, e.g.*, Areeda & Hovenkamp, ***ANTITRUST LAW*** ¶ 777a ("While the standard for a *§ 2* violation is significantly stricter in its power assessment, it is broader and less categorial in its definition of proscribed conduct.").

Viamedia, however, is procedurally barred from raising this claim. Despite extensive motion to dismiss briefing and numerous hearings in court, **[**66]** Viamedia has never raised this claim before. "It is well settled that a plaintiff may not advance a new argument in response to a summary judgment motion." *Abuelyaman v. Illinois State Univ., 667 F.3d 800, 814 (7th Cir. 2011)*; *see also, e.g., Anderson v. Donahoe, 699 F.3d 989, 998 (7th Cir. 2012)*; *Midco Int'l, Inc. v. Metro. Life Ins. Co., No. 14 CV 9470, 2017 U.S. Dist. LEXIS 103296, 2017 WL 2868949, at *4 n.1 (N.D. Ill. July 5, 2017)* ("a new theory" of liability "raised for the first time in response to the motion for summary judgment" that "was not plaintiff's theory at the motion-to-dismiss stage" is "waived"). Viamedia, in fact, was not just silent in failing to advance this theory earlier. It affirmatively disavowed any "free-standing" monopolization claim "unaccompanied by . . . 'any of the normal exclusionary practices.'" R. 32 at 7 (quoting *Schor, 457 F.3d at 610-11*).

The Court relied on that assertion in *Viamedia I*, concluding that Viamedia's claim was not "'free standing' because it alleges particular types of anticompetitive conduct." *Viamedia I, 218 F. Supp. 3d at 695*; *see also id.* ("Viamedia's success turns on whether it states a claim based on those three classes of anticompetitive conduct [tying, exclusive dealing, and a refusal to deal], not whether a free-standing leveraging theory is independently viable."). Now accepting Viamedia's claim—about which **[*1069]** Viamedia's liability expert did not clearly opine—would add a new dimension to this two-year-old litigation after the close of all **[**67]** fact and expert discovery and allow Viamedia to circumvent motion to dismiss procedures. *See, e.g., Shuffle Tech Int'l LLC v. Sci. Games Corp., No. 15 CV 3702, 2017 U.S. Dist. LEXIS 141445, 2017 WL 3838096, at *8 (N.D. Ill. Sept. 1, 2017)* (judicial estoppel "requires that the court accepted the earlier position such that its acceptance of the new position would lead to inconsistent determinations"). It would, moreover, prejudice Comcast by forcing it to defend a claim that Viamedia indicated at the motion to dismiss stage that it was not pursuing. *See The Medicines Co. v. Mylan Inc., No. 11-CV-1285, 2014 U.S. Dist. LEXIS 66601, 2014 WL 1979261, at *3-4 (N.D. Ill. May 15, 2014)*.

Setting waiver and estoppel aside, Viamedia's claim fails.[19] It hits the same roadblock Viamedia's tying claim did: viewing the record in light most favorable to Viamedia, no evidence tends to exclude the fact that Comcast's conduct was merely a refusal to deal, rather than anticompetitive conduct. *See Mercatus Grp., 641 F.3d at 856*. The claim is just a "recast" of the refusal to deal, complaining, again, about Comcast's refusal to allow Viamedia to resell MVPDs' avails on the Interconnects and the impact that conduct has had on its ability to compete. *Novell, 731 F.3d at 1079*; *see* R. 326 at 25 (complaining that "Comcast has used its control over the Interconnects to squeeze its only competitor"). The "refusal to deal doctrine is not so easily evaded." *Novell, 731 F.3d at 1079*. Viamedia may have been rendered unable to "compete effectively," *Linkline, 555 U.S. at 450*, *see* ***[**68]*** *also* Furchtgott-Roth Report ¶¶ 86-92, but even *Section 2* does not concern itself with the welfare of a competitor; it asks whether the monopolist's actions were cognizably anticompetitive. *Id. at 448-450*; *Trinko, 540 U.S. at 407-08*; *see also Schor, 457 F.3d at 611-14* (rejecting monopoly claims not tied to "normal exclusionary practices"); *Ball Mem'l Hosp., Inc. v. Mut. Hosp. Ins., Inc., 784 F.2d 1325, 1338 (7th Cir. 1986)* ("Action that injures rivals *may* ultimately injure consumers, but it is also perfectly consistent with competition, and to deter aggressive conduct is to deter

---

Fed. R. Evid. 702. He merely posits the broad assertion. Further, because his predicate tying opinions are inadmissible, so too is his one-in-the-same exclusive dealing opinion. The Court therefore excludes it. *Id.* ¶¶ 71-72.

[19] Viamedia appears to use its catchall theory as protection in case the Court found that Interconnect Services and Ad Rep Services are not separate products for tying purposes. *See* R. 326 at 25 ("In particular, unlike *Section 1* tying claims, *Section 2* doctrine does not require Viamedia to establish the existence of separate products"). As noted earlier, the Court has assumed that the products are separate.

competition. Thus the plaintiff faces a stiff burden in any *§ 2* litigation."). For reasons explained above, and in *Viamedia I* and *Viamedia II*, Comcast's refusal to permit Viamedia to participate in the interconnects does not violate the Sherman Act.

II. Even If Comcast Had Engaged in Anticompetitive Conduct, Viamedia Cannot Show that It Caused Viamedia's Antitrust Injury or Damages

Even if Viamedia had presented a question of fact as to whether Comcast engaged in tying, exclusive dealing, or other anticompetitive conduct, its case still fails. At summary judgment, a plaintiff must demonstrate an issue of fact with respect to each element of its claim—including causation. *See* *Dalton v. Teva N. Am., 891 F.3d 687, 691 (7th Cir. 2018)*; *O.K. Sand & Gravel, Inc. v. Martin Marietta Techs., Inc., 36 F.3d 565, 573 (7th Cir. 1994)*. Viewing the record in the light most favorable to Viamedia, there is no issue of fact **[**69]** for the jury to decide regarding whether Comcast's anticompetitive conduct caused: (1) Viamedia's antitrust injury, or (2) its damages.

[*1070] A. Viamedia Cannot Show Antitrust Injury

To establish an antitrust injury, a plaintiff must show that the anticompetitive conduct complained of was "the cause-in-fact of the injury"—that is, "'but for' the violation, the injury would not have occurred." *Kochert v. Greater Lafayette Health Servs., Inc., 463 F.3d 710, 718 (7th Cir. 2006)* (antitrust injury must "reflect the anticompetitive effect of either the violation or of anticompetitive acts made possible by the violation"); *see also* *O.K. Sand & Gravel, 36 F.3d at 573* (holding that antitrust injury requires "not only that the injury is of the type intended to be protected by the antitrust laws, but that the violation was 'the cause-in-fact of the injury: that but for the violation, the injury would not have occurred'") (citing *Greater Rockford Energy & Tech. Corp. v. Shell Oil Co., 998 F.2d 391, 395 (7th Cir. 1993))*; *see also, e.g.,* *In re Publ'n Paper Antitrust Litig., 690 F.3d 51, 66 (2d Cir. 2012)* ("to prevail on an antitrust claim, a plaintiff must establish that 'the injuries alleged would not have occurred *but for* [the defendant's] antitrust violation' . . . adding necessity to the materiality requirement of our antitrust causation analysis.") (emphasis in original, internal citation omitted). A plaintiff, thus, must be able to distinguish between "financial loss **[**70]** from the *lawful* activities of a competitor" from loss "caused by the *unlawful* acts of the defendant." *MCI Communications Corp. v. American Tel. & Tel. Co., 708 F.2d 1081, 1161 (7th Cir. 1983)* (citing *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977))*. In other words, if lawful competition "fully accounts for" a plaintiff's "claimed injury," the law will "deny any injury" because "the plaintiff's situation would be the same with or without the challenged restraint." Areeda & Hovenkamp, ***Antitrust Law*** ¶ 338b-c.

In assessing whether a defendant's anticompetitive conduct caused a plaintiff's antitrust injury, courts assume that the defendant acted anticompetitively. *Id.* ¶ 338. Here, that means assuming that Comcast engaged in tying, exclusive dealing, or other exclusionary and cognizably anticompetitive conduct. So doing, Viamedia is nevertheless unable to present an issue of fact as to whether its alleged antitrust injuries resulted from that anticompetitive conduct as opposed to Comcast's undisputed and legal refusal to deal.

Without exception, each injury Viamedia identifies—the lost revenue from the Chicago and Detroit interconnects after Comcast refused to renew the 2003 agreement in 2012; lost contracts with MVPDs; the lost revenue from the Hartford interconnect; and the attendant business expenses and talent loss—is fully **[**71]** attributable to Comcast's decision to deny Viamedia interconnect access. Dr. Furchtgott-Roth, for example, asserts that Viamedia's foreclosure from the market "flows *directly* from Viamedia's inability to access" the interconnects. Furchtgott-Roth Report ¶ 90 (emphasis added). Dr. Lys, likewise, premises all of his damages opinions on the assumption that absent Comcast's anticompetitive conduct Viamedia would have had reasonable access to the interconnects. *E.g.*, Lys Report ¶ 34(1)-(7). He even testified that his "entire damages estimate is based directly or indirectly on Viamedia's lack of access to Comcast Spotlight's interconnect in Chicago, Detroit, and Hartford." Comcast Ex. 7 at 235:18-236:20. Mark Lieberman, Viamedia's CEO, similarly complains that "Viamedia lost business and revenues as a consequence of being excluded from Comcast-operated Interconnects." Viamedia Ex.

5 at 5. By all accounts, Viamedia's refusal to deal with Comcast explains entirely Viamedia's injuries. **[*1071]** *See* MCI Commc'ns Corp., 708 F.2d at 1161.

Novell is on point. In that case, a software-providing competitor of Microsoft's, Novell, filed suit under Section 2. Novell, 731 F.3d at 1065 (Gorsuch, J.). In rolling out Windows 95, Microsoft had initially decided to share certain intellectual property—like **[**72]** namespace extensions, which allow users to search for and open documents outside of a particular application—with independent software providers. Id. at 1067-68. It later changed course, after concluding that not sharing the intellectual property would maximize its profits. Id. at 1068. This conduct impeded Novell's ability to build (and sell) software around the extensions, and its "business suffered" because it was delayed in launching its new software. Id. at 1069. Unable to sustain a refusal to deal case under *Aspen Skiing* and *Trinko*, Novell argued at summary judgment that Microsoft's conduct was not merely a refusal to deal but an act of business deception that sufficed independently for Section 2 purposes. Id. at 1079-1080. The Tenth Circuit disagreed, concluding that Novell lacked antitrust injury to bring such a claim. Id. at 1080. It reasoned that even if Microsoft had been upfront about its competitive decisions, and engaged in nothing nearing a business tort, "Novell and consumers *still* would have suffered the same alleged harm"—the delayed release of products caused by Microsoft's refusal to deal. *Id.* (emphasis in original). So too here. Viamedia's own evidence decisively establishes that Comcast's refusal to deal was sufficient unto itself **[**73]** to cause Viamedia's injuries.

Viamedia offers no meaningful rejoinder to this plain fact. At most, Viamedia submits that as long as it has established the type of injuries with which the antitrust laws are concerned, the Court should "presume that such an injury . . . was caused by" an anticompetitive act. R. 326 at 35 (citing Publ'n Paper, 690 F.3d at 66). Even if that were true, Viamedia's own evidence shows that tying and exclusive dealing were not "but for" causes of Viamedia's injuries. Publ'n Paper, 690 F.3d at 67 (the presumption is rebuttable). Those injuries, which Viamedia concedes stem from Comcast's decision to deny Viamedia interconnect access in Chicago, Detroit, and Hartford, would have occurred with or without attendant tying and exclusive dealing. *Supra* at 50; *infra* at 53-55; Furchtgott-Roth Report ¶ 91; *see generally* Lys Am. Report. No evidence suggests otherwise. Apart from that argument, Viamedia offers little to explain how it can demonstrate that anticompetitive conduct, not an independent and already-deemed legal refusal to deal, caused its antitrust injury.[20]

It is black-letter law that Viamedia must show that it would have suffered antitrust injury but for Viamedia's anticompetitive conduct. *E.g.,* Kochert, 463 F.3d at 718; MCI Commc'ns Corp., 708 F.2d at 1161. Critically, Viamedia does not argue or **[**74]** present any evidence showing that absent tying or exclusive dealing practices, Comcast would have felt any differently about excluding Viamedia from the interconnects. To the contrary, the record presents ample evidence of Comcast's decision to stop dealing with middlemen and go after full-turnkey relationships with more MVPDs. As such, in the but-for world, Comcast still would have refused to deal with Viamedia; it just could not further condition services or engage in anticompetitive exclusive dealing. Viamedia makes no effort to account for that but-for world, and that is the fundamental flaw in its case.

[*1072] B. Viamedia Cannot Show Damages Resulting from Supposedly Anticompetitive Conduct

Viamedia's asserted damages suffer the same problem. Despite the complicated nature of proving damages causation in an antitrust case, *see* J. Truett Payne Co. v. Chrysler Motors Corp., 451 U.S. 557, 566, 101 S. Ct. 1923, 68 L. Ed. 2d 442 (1981), Viamedia elected not to employ an expert to opine on causation. Instead, Viamedia submits affidavits signed by three executives: CEO Lieberman (Viamedia Ex. 5), co-founder and former president Jeff Carter (Viamedia Ex. 3), and co-founder and former CEO Todd Donnelly (Viamedia Ex. 4). Viamedia rests primarily on these affidavits (most often, Lieberman's), "Viamedia **[**75]** management project[ions]," and its "track record with its partners" to support its notion of what profits Viamedia would have made but for Comcast's anticompetitive conduct. R. 326 at 36.

---

[20] In fact, Viamedia's short shrift of the issue prompts Comcast to argue that Viamedia has waived any argument about causation and antitrust injury. R. 339 at 4 n.3.

1. Viamedia's Evidence of Causation Does Not Distinguish Between Damages Caused by Competitive and Anticompetitive Conduct and Thus Fails

"When a plaintiff improperly attributes all losses to a defendant's illegal acts, despite the presence of significant other factors"—like lawful competition—"the evidence does not permit a jury to make a reasonable and principled estimate of the amount of damage." *MCI Commc'ns Corp., 708 F.2d at 1162*; Areeda & Hovenkamp, ***ANTITRUST LAW*** ¶ 675b; *see also* *Comcast Corp. v. Behrend, 569 U.S. 27, 35, 133 S. Ct. 1426, 185 L. Ed. 2d 515 (2013)* (it is an "unremarkable premise" that a claimant is "entitled only to damages resulting from" to the claimed anticompetitive conduct).

That it is precisely what Viamedia has done. Its evidence fails to disaggregate the damages caused by Comcast's lawful refusal to deal from Comcast's supposed tying, exclusive dealing, and other exclusionary conduct. Lieberman's affidavit is exemplary. He attests that "Viamedia's exclusion from" the Chicago and Detroit "Interconnects has caused Viamedia and its MVPD partners to lose revenues they otherwise would have earned **[**76]** from Interconnect sales, which has, in turn, reduced Viamedia's cash flows and financial stability," causing in turn "MVPD partners to switch to other ad representation firms." Viamedia Ex. 5 at 6. It repeats similar claims for pages. *See id.* at 7 ("Due to loss of access to the Chicago and Detroit Interconnects, Viamedia was ultimately unable to make a competitive financial offer" to RCN), 11 (complaining of the purported results of Comcast's decision to "deny[ ] Viamedia the ability to continue purchasing Interconnect Services on behalf of [its] MVPD clients), 13 ("If Viamedia had never been excluded from the Interconnects Chicago, Detroit, and Hartford, I am confident that the momentum Viamedia had in the marketplace prior to 2012 . . ."). Dr. Lys's damages opinion likewise conflates the financial consequences of Comcast's refusal to deal with the results of Comcast's supposedly anticompetitive conduct. *See generally* Lys Am. Report. He, again, admitted that his "entire damages estimate is based directly or indirectly on Viamedia's lack of access" to the interconnects in Chicago, Detroit, and Hartford. Comcast Ex. 7 at 236:10-20. All of this evidence (to the extent it is admissible) attributes **[**77]** Viamedia's damages to Comcast's decision not to permit Viamedia interconnect access—its refusal to deal.

Under the law, Viamedia must be able to segregate the damages (to a reasonable degree, at least) caused by lawful competition from those caused by anticompetitive acts. *See* *MCI Commc'ns Corp., 708 F.2d at 1162*; *see also* ABA Section of **[*1073]** ***Antitrust Law***, *Proving Antitrust Damages: Legal and Economic Issues* 13-14 (3d ed. 2017) ("courts require that the antitrust violation be the sole cause of the plaintiff's damages, by insisting on a but-for world that eliminates only the defendant's unlawful conduct separately from all other sources that may also have caused the plaintiff's damages"). Considering them to be one in the same, Viamedia fails to do so.[21] It therefore seeks to "force" Comcast "to pay treble damages for conduct that was determined to be entirely lawful." *MCI Comm'ns, 708 F.2d at 1162-63*.

[21] Even assuming *arguendo* that the but-for world is a place where Comcast decides to permit Viamedia on the interconnects on friendly terms, the Court is dubious that Viamedia's lay evidence of causation regarding the loss of future business (the largest part of its damages claim) would suffice. Despite Viamedia's pronouncements about its management team's work (*e.g.*, R. 326 at 40), "Viamedia's projections" are not based on any economic price or terms analyses (at least as far as the record is concerned). Viamedia's refrain that it need not examine prices because the Ad Rep market is a "relationship business" is convenient; there is in fact no specific evidence showing that Viamedia could have competed with Comcast on price. *See* CSF ¶¶ 116-122 (Comcast, on average, offered better revenue shares to MVPDs than Viamedia). Further, not a single MVPD testified that it would have selected Viamedia but for its lack of interconnect access. Viamedia did not hire an expert to opine on causation, and lay persons are generally forbidden from doing precisely as Viamedia's management does here—testify regarding "hypotheticals or assumptions" about what might have happened in the future. *Gumwood HP Shopping Ptrs. L.P. v. Simon Prop. Grp., Inc., 2017 U.S. Dist. LEXIS 110070, 2017 WL 3016385, at *4 (N.D. Ind. July 17, 2017)*. In short, this multimillion-dollar antitrust case is "far removed from situations in which a causation issue is so obvious that a plaintiff may forgo expert testimony." *Dalton, 891 F.3d at 691*. The Court, however, need not ultimately decide whether Comcast has presented sufficient evidence with respect to this part of its damages case because Viamedia has failed to meet its threshold burden to show an issue of fact as to whether the any of the damages it seeks stem from unlawful conduct.

2. Dr. Lys's Damages Opinions Are Inadmissible

As Dr. Lys's Report and testimony, plus Viamedia's representations at the *Daubert* hearing, make clear, the entirety of his opinion assumes that but for Comcast's supposed anticompetitive practices, Viamedia would have been able to access the interconnects and compete as it had before 2011. *See, e.g.,* ***[**78]*** *Daubert* Hr'g Tr., R. 354, at 153:24-154:5 (Viamedia's counsel indicating that Dr. Ly's "assume[d] causation" and that the question of whether those assumptions are permissible is "a question about summary judgment"). An expert's testimony is inadmissible, however, if it does not fit "the facts of the case." *Owens, 895 F.3d at 971*.

Dr. Lys's opinions are inadmissible, as they rest on the unfounded assumption that Viamedia could have accessed the interconnects but for Comcast's anticompetitive conduct. *See, e.g., Buscaglia v. United States, 25 F.3d 530, 533 (7th Cir. 1994)* (expert testimony may not be based on "unsupported assumptions"); *see also, e.g., Craftsmen Limousine, Inc. v. Ford Motor Co., 363 F.3d 761, 777 (8th Cir. 2004)*; *Concord Boat Corp. v. Brunswick Corp., 207 F.3d 1039, 1055-1057 (8th Cir. 2000)*; *Rickman v. Deere & Co., 36 F.3d 1093 (4th Cir. 1994)*; *accord Brooke Group Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 242, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993)* ("When an expert opinion is not supported by sufficient facts to validate it in the eyes of the law, or when indisputable record facts contradict or otherwise render the opinion unreasonable, it cannot support a jury's verdict."); Areeda & Hovenkamp, ***ANTITRUST LAW*** ¶ 657b ("If the **[*1074]** plaintiff's expert's damages study cannot segregate lawful from unlawful practices, then no damages may be awarded on the basis of that study.").

3. Viamedia's Claim for Injunctive Relief Fails

On a final note, Viamedia also requests injunctive relief from Comcast's conduct. R. 40 at 50. As an initial and obvious matter, Viamedia **[**79]** is not entitled to this relief because it has not shown an issue of fact as to whether Comcast engaged in anticompetitive conduct or that any such conduct caused it injury or damages. But the Court addresses Viamedia's request—that it enjoin Comcast from "any effort to exclude Viamedia or its MVPD clients from participating on a fair and open basis in the Interconnects"—because it, too, betrays the fundamental flaw in its case.

Antitrust law does not allow the injunctive relief Viamedia seeks. *See* Areeda & Hovenkamp, ***ANTITRUST LAW*** ¶ 774c. *Trinko* and *Linkline* prohibit enforced sharing absent a duty to deal, and for good reason. Forced sharing "lessen[s] the incentive for the monopolist, the rival, or both to invest," it requires courts to act as "central planners" over the proper terms of such sharing, and it can compel the "supreme evil of antitrust: collusion." *Trinko, 540 U.S. at 407-08*; *see also* Easterbrook, *The Chicago School & Exclusionary Conduct, at 441-42*; Richard A. Posner, ***ANTITRUST LAW*** 242 (2d ed. 2001) ("Where the refusal to deal is unilateral, the only effective remedy is an order that defendant do business with the victim of the refusal to deal. The antitrust court becomes charged with the supervision of an ongoing commercial relationship, a function **[**80]** that courts are not equipped to perform effectively."). Indeed, while examining claims similar to the ones Viamedia brings, the Seventh Circuit recently warned about "fail[ing] to adhere to the lessons of" *Trinko* and *Linkline. Authenticom, 874 F.3d at 1021*. In doing so, it vacated a preliminary injunction that forced two firms that dominated upstream markets to allow their downstream competitors access to their systems. The Seventh Circuit noted that if there is a tie, "the proper remedy would be to enjoin the tie"—not, as Viamedia requests, "to create a duty to deal." *Id. at 1026*.

Viamedia brought this case in an attempt to force—under Court order—Comcast to provide it access to the interconnects on favorable terms. ***Antitrust law*** does not oblige.

CONCLUSION

For the foregoing reasons, the Court grants Comcast's motion for summary judgment, grants in part Comcast's motion to exclude Dr. Furchtgott-Roth's opinions and denies the remainder as moot, grants Comcast's motion to exclude Dr. Lys's opinions, and enters judgment in Comcast's favor.

HN1[ ] **Depositions, Oral Depositions**

The Louisiana Board of Examiners of Certified Shorthand Reporters enforces Louisiana law regarding the relationship of court reporters to litigants. This law provides, in part, that depositions shall be taken before an officer authorized to administer oaths, who is not an employee or attorney of any of the parties or otherwise interested in the outcome of the case. La. Code Civ. Proc. Ann. art. 1434(A)(1). The law further provides that an employee includes a person who has a contractual relationship with a party litigant to provide shorthand reporting or other court reporting services and also includes a person employed part or full time under contract or otherwise by a person who has a contractual relationship with a party litigant to provide shorthand reporting or other court reporting services. La. Code Civ. Proc. Ann. art. 1434(A)(2).

Constitutional Law > Equal Protection > Judicial Review > Standards of Review

HN2[] **Judicial Review, Standards of Review**

A statutory classification does not fail rational-basis review because it is not made with mathematical nicety or because in practice it results in some inequality. This is an expansive standard.

Constitutional Law > The Judiciary > Case or Controversy > Constitutionality of Legislation

Governments > Legislation > Interpretation

Constitutional Law > Congressional Duties & Powers > Commerce Clause > Dormant Commerce Clause

HN3[] **Case or Controversy, Constitutionality of Legislation**

When a statute has only indirect effects on interstate commerce and regulates evenhandedly, courts consider whether the State's interest is legitimate and whether the burden on interstate commerce clearly exceeds the local benefits.

Antitrust & Trade Law > Sherman Act > Claims

HN4[] **Sherman Act, Claims**

To prevail under the Sherman Act, a plaintiff must show a contract, combination, or conspiracy that imposed an unreasonable restraint on trade.

Civil Procedure > ... > Summary Judgment > Appellate Review > Standards of Review

HN5[] **Appellate Review, Standards of Review**

When reviewing a summary judgment, an appellate court construes all facts and inferences in favor of the nonmoving party.

Antitrust & Trade Law > Sherman Act > Defenses

Governments > State & Territorial Governments > Claims By & Against

HN6[] **Sherman Act, Defenses**

Anti-competitive conduct by a state is generally immune from federal ***antitrust law***. The *Sherman Act* makes no mention of the state as such, and gives no hint that it was intended to restrain state action or official action directed by a state. However, this immunity is not absolute. For a state agency to enjoy Parker immunity under the *Sherman Act*, it must satisfy two requirements: first that the challenged restraint be one clearly articulated and affirmatively expressed as state policy, and second that policy be actively supervised by the State.

Antitrust & Trade Law > Sherman Act > Defenses

Governments > State & Territorial Governments > Claims By & Against

HN7[] **Sherman Act, Defenses**

The active state supervision requirement for state immunity from a suit under the *Sherman Act* is necessary to prevent a State from circumventing the *Sherman Act's* proscriptions by casting a gauzy cloak of state involvement over what is essentially a private price-fixing arrangement. Active supervision might include establishing prices and reviewing the reasonableness of the price schedules, regulating the terms of fair trade contracts, monitoring market conditions, and engaging in pointed reexamination of the program. And while any such inquiry will necessarily turn on the circumstances of a particular case, active supervision must entail review of the substance of the anticompetitive decision, not merely the procedures followed to produce it, and the power to veto or modify particular decisions to ensure they accord with state policy.

Antitrust & Trade Law > Sherman Act > Defenses

Governments > State & Territorial Governments > Claims By & Against

Governments > State & Territorial Governments > Legislatures

HN8[] **Sherman Act, Defenses**

State legislatures always possess the power to change the law. "Active supervision" for purposes of Parker immunity under the *Sherman Act* requires more than the bare possibility that controlling law might be changed—the mere potential for state supervision is insufficient.

Governments > State & Territorial Governments > Employees & Officials

Governments > State & Territorial Governments > Licenses

HN9[] **State & Territorial Governments, Employees & Officials**

Louisiana law requires that six of the nine members of the Louisiana Board of Examiners of Certified Shorthand Reporters be certified shorthand reporters. *La. Rev. Stat. Ann. § 37:2551(B)(1)*.

Opinion by: JAMES C. HO

Opinion

[*290] JAMES C. HO, Circuit Judge:

HN1[] The Louisiana Board of Examiners of Certified Shorthand Reporters enforces Louisiana law regarding the relationship of court reporters to litigants. This law provides, in relevant part, that "deposition[s] shall be taken before an officer authorized to administer oaths, who is not an employee or attorney of any of the parties or otherwise interested in the outcome of the case." *La. Code Civ. Proc. Ann. art. 1434(A)(1)*. The law further provides that "an employee includes a person who has a contractual relationship with a party litigant to provide shorthand reporting or other court reporting services and also includes a person employed part or full time under contract or otherwise by a person who has a contractual relationship **[**3]** with a party litigant to provide shorthand reporting or other court reporting services." *La. Code Civ. Proc. Ann. art. 1434(A)(2)*.

In 2012, the Board began enforcing *Article 1434* more aggressively, declaring that the law prohibits all contracts between court reporters and party litigants, including volume-based discounts and concessions to frequent customers. Veritext, a national private court reporting service regulated by the Board and doing business in Louisiana, filed suit.

Veritext alleges, in sum, that these regulatory efforts reflect nothing more than rent-seeking. As Veritext sees it, local providers are simply harnessing the regulatory power of the state to prevent competition from national and regional court reporting firms, and thereby increase business opportunities and raise prices for freelance court reporters.

To vindicate its concerns, Veritext brought a variety of constitutional claims—substantive due process, equal protection, and the Dormant *Commerce Clause*—as well as a claim under the *Sherman Act*. **[*291]** The district court dismissed the constitutional claims, and subsequently dismissed the *Sherman Act* claim on reconsideration. *Veritext Corp. v. Bonin, 259 F. Supp. 3d 484, 488 (E.D. La. 2017)*, *on reconsideration*, *2017 U.S. Dist. LEXIS 121488, 2017 WL 3279464 (E.D. La. Aug. 2, 2017)*. Veritext appeals on all these grounds.

We conclude that none of the constitutional **[**4]** claims presented by Veritext have merit, but that the *Sherman Act* claim should proceed on remand.

I.

The district court was correct to dismiss all of the constitutional claims brought by Veritext as a matter of Supreme Court precedent.

Veritext argues that the Board's 2012 decision to ban volume-based discounts and concessions to frequent customers lacks a rational basis, and thereby violates both substantive due process and equal protection under established precedent. The Board responds that these regulatory efforts further the State's legitimate government interest in ensuring and protecting the integrity of legal proceedings. As the Board explains, "[c]ommon sense dictates that court reporters might be more inclined to alter a deposition transcript in favor of party litigants that provide them with long-term financial benefits."

This rationale may find a skeptical audience in certain quarters. But it is legally sufficient to support the Board's action under rational basis review. As the Supreme Court has long recognized, ***HN2***[] "[a] classification does not fail rational-basis review because it is not made with mathematical nicety or because in practice it results in some inequality." *Heller v. Doe by Doe, 509 U.S. 312, 319, 113 S. Ct. 2637, 125 L. Ed. 2d 257 (1993)* (citation **[**5]** and quotations omitted). This is an expansive standard, and the Board's stated goal of protecting against "any appearance of impropriety or bias on the court reporter's behalf" meets it. *Veritext Corp., 259 F. Supp. 3d at 490*.

A similar analysis applies to Veritext's Dormant *Commerce Clause* argument. ***HN3***[] "When . . . a statute has only indirect effects on interstate commerce and regulates evenhandedly," we consider "whether the State's interest is legitimate and whether the burden on interstate commerce clearly exceeds the local benefits." *Brown-Forman Distillers Corp. v. New York State Liquor Auth., 476 U.S. 573, 579, 106 S. Ct. 2080, 90 L. Ed. 2d 552 (1986)*. Here, as previously stated, Louisiana's interest in the integrity of its court reporting system is legally sufficient. And Veritext has failed to clearly identify a burden on interstate commerce imposed by the Board's enforcement of *Article 1434* that exceeds its local benefits. Veritext's Dormant *Commerce Clause* claim therefore fails as well.

II.

Although we agree that the constitutional claims lack merit, we remand this case so that Veritext can proceed on its *Sherman Act* claim.

HN4[] To prevail under the *Sherman Act*, Veritext must show a contract, combination, or conspiracy that imposed an unreasonable restraint on trade. *Am. Needle, Inc. v. Nat'l Football League, 560 U.S. 183, 189, 130 S. Ct. 2201, 176 L. Ed. 2d 947 (2010)*. ***HN5***[] "When reviewing a summary judgment, we construe all facts and inferences in favor of the nonmoving party." **[**6]** *Deshotel v. Wal-Mart Louisiana, LLC, 850 F.3d 742, 745 (5th Cir. 2017)*.

[*292] Veritext pled facts sufficient to support a finding that the Board's conduct does indeed restrain trade. Among other allegations, Veritext argued that the Board is composed of active market participants who "are highly engaged in setting the agenda of the Board and its committees and in directing the Board's business," who actively sought to "discourage a perceived trend of freelance court reporters leaving the profession," and who took regulatory actions calculated to "deter[] and delay[] entry by national and regional court reporting firms." On the record before us, we agree with the district court that Veritext has alleged facts sufficient to make out a prima facie *Sherman Act* claim.

This raises the question of immunity. As the district court noted, ***HN6***[] "anti-competitive conduct by a state is generally immune from federal ***antitrust law***." *Veritext Corp., 259 F. Supp. 3d at 492*. *See also* *Parker v. Brown, 317 U.S. 341, 351, 63 S. Ct. 307, 87 L. Ed. 315 (1943)* ("The *Sherman Act* makes no mention of the state as such, and gives no hint that it was intended to restrain state action or official action directed by a state.").

However, this immunity is not absolute. For the Board to enjoy *Parker* immunity under the *Sherman Act*, it must satisfy "two requirements: first that 'the challenged restraint . **[**7]** . . be one clearly articulated and affirmatively expressed as state policy,' and second that 'the policy . . . be actively supervised by the State.'" *N. Carolina State Bd. of Dental Examiners v. FTC, 135 S. Ct. 1101, 1110, 191 L. Ed. 2d 35 (2015)* (citation omitted).

The Board satisfies the first requirement: Its ban on private court reporting arrangements is clearly articulated, as *Article 1434* does indeed bar contracts between private court reporting services and party litigants. But the Board fails under the second requirement of active state supervision.

HN7[] "[T]he active state supervision requirement [is] necessary to prevent a State from circumventing the *Sherman Act's* proscriptions 'by casting . . . a gauzy cloak of state involvement over what is essentially a private price-fixing arrangement.'" *Town of Hallie v. City of Eau Claire, 471 U.S. 34, 46-47, 105 S. Ct. 1713, 85 L. Ed. 2d 24 (1985)* (quoting *California Retail Liquor Dealers Ass'n v. Midcal Aluminum, Inc., 445 U.S. 97, 106, 100 S. Ct. 937,* *63 L. Ed. 2d 233 (1980))*. Active supervision might include "establish[ing] prices [and] review[ing] the reasonableness of the price schedules," "regulat[ing] the terms of fair trade contracts," "monitor[ing] market conditions," and "engag[ing] in 'pointed reexamination' of the program." *Midcal, 445 U.S. at 105-06* (citation omitted). And while any such inquiry will necessarily turn on the circumstances of a particular case, *Dental Examiners* made clear that "active supervision" must entail "review [of] the substance of the anticompetitive **[**8]** decision, not merely the procedures followed to produce it," and "the power to veto or modify particular decisions to ensure they accord with state policy." *135 S. Ct. at 1116*.

We find that Veritext has pled facts sufficient to support a finding that the active supervision requirement is not met in this case. Nothing in the record indicates that elected or appointed officials oversaw or reviewed the Board's decisions or modified the Board's enforcement priorities. And the Board's argument on this point—that the legislature can amend the law in this area or veto proposed rules under *Louisiana's Administrative Procedure Act*—is unconvincing. ***HN8***[] State legislatures *always* possess the power to change the law. Active supervision requires more **[*293]** than the bare possibility that controlling law might be changed—the "mere potential for state supervision" that *Dental Examiners* expressly identified as insufficient. *135 S. Ct. at 1116*. Adoption of the Board's logic would effectively nullify the requirement of active state supervision under *Dental Examiners*.

The Board alternatively contends that the active supervision requirement does not apply here for two reasons: first, because Veritext has not pled sufficient facts to show that the Board's **[**9]** members are active market participants; and second, because the Board does not advance private interests by enforcing the terms of state law.

These arguments are unavailing. To begin with, ***HN9***[] Louisiana law requires that six of the Board's nine members be "certified shorthand reporter[s]"—the very individuals most likely to be impacted by Veritext's involvement in the market. *La. Rev. Stat. § 37:2551(B)(1)*. The Board attempts to differentiate "freelance" and "official" court reporters, but the boundary between these categories is porous: an individual serving as an official court reporter may readily go freelance if he so chooses. It is sufficiently clear from the record that the members of the Board qualify as active market participants. And it strains credulity to regard the Board's conduct as strictly public-minded, in light of its decision to convene a meeting that included "How to increase rates?" as one of its agenda items. *Veritext Corp., 259 F. Supp. 3d at 492*.

In sum, the district court was correct the first time when it observed that Veritext alleged sufficient facts that "the board's actions do not resemble a municipality under active supervision but instead represent an unbridled regulatory environment." *Veritext Corp., 259 F. Supp. 3d at 493*. Because Veritext has pled facts sufficient **[**10]** to support a finding that the active supervision requirement of *Midcal* and *Dental Examiners* is not satisfied here, the district court erred in granting summary judgment to the Board on Veritext's *Sherman Act* claim.

III.

We affirm the district court's dismissal of Veritext's constitutional claims. We reverse the district court's dismissal of Veritext's *Sherman Act* claim and remand for further proceedings.

ORDER

THIS CAUSE comes before the Court for consideration of the Plaintiff's Motion for Summary Judgment, (Dkt. 114); Defendants' Response in opposition thereto, (Dkt. 126); Plaintiff's Reply, (Dkt. 134); Defendants' Motion for Summary Judgment, (Dkt. 116); Plaintiff's Response in opposition thereto, (Dkt. 121); Defendants' Reply, (Dkt. 127); and Defendants' Motion to Exclude Expert Testimony of Professor Cornelius K. Hurley.[1] (Dkt. 115) Upon

[1] Plaintiff filed no response to Defendants' Motion to Exclude Expert Testimony of Professor Cornelius K. Hurley.

consideration **[*2]** of all relevant filings, case law, and being otherwise fully advised, the Court **DENIES** Plaintiff's Motion for Summary Judgment, (Dkt. 114), **GRANTS** Defendants' Motion for Summary Judgment, (Dkt. 116), and **DENIES AS MOOT** Defendants' Motion to Exclude Expert Testimony of Professor Cornelius K. Hurley. (Dkt. 115)

I. BACKGROUND

Plaintiff Patrick Ryan Bray ("Bray") initiated this action against Defendants Bank of America Corp. ("BAC") and Bank of America, N.A. ("BANA") on October 27, 2015. (Dkt. 1) On February 26, 2016, Bray filed an Amended Complaint. (Dkt. 26) In the Amended Complaint, Bray alleges that BANA committed violations of the Sherman Act, *15 U.S.C. § 1, et seq.*, the Clayton Act, *15 U.S.C. § 12, et seq.*, and the Florida Antitrust Act, *Fla. Stat. § 542.15, et seq.* (Id.) Bray's antitrust claims are expressly premised on BANA's alleged violation of the Bank Holding Company Act ("BHCA"), *12 U.S.C. § 1972*, which prohibits banks from engaging in the "tying" of certain bank services. (Id.) Bray alleges that he was damaged by BANA's purported unlawful "tying" arrangement that required Maritz Holdings, Inc. ("Maritz")—which had secured a syndicated loan from BANA and five other lenders—to move its assets, called the General Public Account ("GPA"), to Merrill Lynch. (Id. at ¶ **[*3]** 59) Bray had previously managed the GPA through bonds and bond mutual funds; however, he was no longer able to do so after resigning from Merrill Lynch in October 2011 because the GPA remained at Merrill Lynch, an affiliate of BANA, as required by the loan agreement. (Id. at ¶¶ 20, 30-31, 59, 68) Thus, Bray contends, the tying arrangement prohibited him from being able to independently manage the GPA. (Id. at ¶ 59)

This is Bray's third of four legal actions based on the same operative facts in the Complaint. The Court reincorporates the factual and procedural background in Bray v. Bank of Am., N.A., (Case No. 8:17-cv-75-MSS-AAS ("Bray IV"), Docket No. 38).

Bray moves for summary judgment, arguing that no genuine issue of material facts exists related to BANA's alleged violations, and that BAC, as the parent company of BANA, sets "all policies and procedures for its subsidiaries to follow." (Dkt. 114 at 26) Bray contends that he is entitled to judgment as a matter of law. Defendants move for summary judgment, contending that Bray's claims are barred by *res judicata* and time-barred by the statute of limitations. (Dkt. 116 at 2) Additionally, Defendants argue that Bray lacks standing to **[*4]** bring his claims, and that, in any case, the claims fail because Bray cannot demonstrate the essential elements of the antitrust tying claims. (Id. at 2-3)

II. STANDARD OF REVIEW

Summary judgment is appropriate when the movant can show there is no genuine issue of material fact and that the movant is entitled to judgment as a matter of law. *Fennell v. Gilstrap, 559 F.3d 1212, 1216 (11th Cir. 2009)* (citing *Welding Servs., Inc. v. Forman, 509 F.3d 1351, 1356 (11th Cir. 2007))*. Which facts are material depends on the substantive law applicable to the case. *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 248, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*. The moving party bears the burden of showing that no genuine issue of material fact exists. *Clark v. Coats & Clark, Inc., 929 F.2d 604, 608 (11th Cir. 1991)*.

Evidence is reviewed in the light most favorable to the non-moving party. *Fennell, 559 F.3d at 1216* (citing *Welding Servs., Inc., 509 F.3d at 1356*). A moving party discharges its burden on a motion for summary judgment by showing or pointing out to the Court that there is an absence of evidence to support the non-moving party's case. *Denney v. City of Albany, 247 F.3d 1172, 1181 (11th Cir. 2001)* (citation omitted).

When a moving party has discharged its burden, the non-moving party must then designate specific facts (by its own affidavits, depositions, answers to interrogatories, or admissions on file) that demonstrate there is a genuine issue for trial. *Porter v. Ray, 461 F.3d 1315, 1320-1321 (11th Cir. 2006)* (citation omitted). The party opposing a motion for summary judgment must rely on more than conclusory statements or allegations unsupported by facts. **[*5]** *Evers v. Gen. Motors Corp., 770 F.2d 984, 986 (11th Cir. 1985)* ("[C]onclusory allegations without specific supporting facts have no probative value."). "If a party fails to properly support an assertion of fact or fails to properly address another party's assertion of fact . . . the court may grant summary judgment if the motion and supporting materials . . . show that the movant is entitled to it." *Fed. R. Civ. P. 56(e)*.

"The standard of review for cross-motions for summary judgment does not differ from the standard applied when only one party files a motion, but simply requires a determination of whether either of the parties deserves judgment as a matter of law on the facts that are not disputed." *S. Pilot Ins. Co. v. CECS, Inc., 52 F. Supp. 3d 1240, 1242-43 (N.D. Ga. 2014)* (citing *Am. Bankers Ins. Group v. United States, 408 F.3d 1328, 1331 (11th Cir. 2005))*. "Cross-motions may, however, be probative of the absence of a factual dispute where they reflect general agreement by the parties as to the controlling legal theories and material facts." *Id. at 1243* (citing *United States v. Oakley, 744 F.2d 1553, 1555-56 (11th Cir. 1984))*.

III. DISCUSSION

A. Bray's claims are barred by *res judicata*

Defendants argue that Bray's claims are barred by *res judicata*, as they are based on the same set of facts as those in *Bray v. Bank of Am., N.A., 2014 U.S. Dist. LEXIS 157339, 2014 WL 5783039 (E.D. Mo. Nov. 6, 2014)*, ("Bray II"). (Dkt. 116)

"The doctrine of *res judicata*, or claim preclusion, bars the parties to an action from litigating claims that were or could have been litigated in a prior action between **[*6]** the same parties." *Lobo v. Celebrity Cruises, Inc., 704 F.3d 882, 892 (11th Cir. 2013)*. To invoke *res judicata*, a party must establish that: "(1) the prior judgment was rendered by a court of competent jurisdiction; (2) the judgment was final and on the merits; (3) both cases involve the same parties or those in privity with them; and (4) 'both cases . . . involve the same causes of action.'" *Borrero v. United Healthcare of N.Y., Inc., 610 F.3d 1296,1306 (11th Cir. 2010)* (quoting *In re Piper Aircraft Corp., 244 F.3d 1289, 1296 (11th Cir. 2001))*.

The Court finds that Bray's claims are barred by *res judicata*. First, this Court is a court of competent jurisdiction that rendered a prior judgment of Bray's claims. Second, the Court ruled, in relevant part in Bray IV, that Bray's BHCA claim was barred by the statute of limitations and dismissed the claim with prejudice. (Bray IV, Dkt. 38 at 10, 14) Thus, the judgment was final and on the merits. Third, there is no dispute that Bray and BANA are the same parties that were involved in Bray IV. (Id.; Dkt. 22) Although Bray added BAC as a defendant in the instant litigation, there is no dispute that BAC is in privity with BANA, as BAC is a parent corporation of BANA. (Dkt. 54 at 9; Dkt. 26 at ¶¶ 23-24) See *United States v. Avatar Holdings, Inc., 93-281-CIV-FTM-21, 1995 U.S. Dist. LEXIS 20450, 1995 WL 871260, at *21 (M.D. Fla. Nov. 22, 1995)* (finding that claims against parent company were barred by *res judicata* and noting that **[*7]** the plaintiff cannot argue that a parent company is liable for its subsidiary's actions "under a theory of parent control of its subsidiary and, at the same time, assert that although it is a parent corporation, it is not in privity with the subsidiary for the purpose of res judicata.").

Last, Bray's antitrust claims in the instant litigation are expressly premised on BANA's alleged violation of the BHCA, which was asserted in Bray IV. In the Complaint, Bray states that he "brings this action for violations of the Sherman Act, Clayton Act, [and] Florida's ***Antitrust Law***, pursuant to *Section 542.15 et seq.*, of the Florida Statutes, via violations of 106 of the Bank Holding Company Act *§ 1972*." (Dkt. 26 at 1) Bray's new antitrust claims are predicated on the same cause of action that was previously dismissed. The presence of a new legal theory will not preclude the applicability of *res judicata* because the claims in the "new" litigation are based on the same operative facts as Bray IV. Any claims based on the same "nucleus of operative facts," even when different legal theories are asserted, "are barred by *res judicata* because they are considered the same claim or cause of action."

De Souza v. JPMorgan Chase Home Lending Div., 608 F. App'x 776, 781 (11th Cir. 2015)[2] (citing *Griswold v. Cnty. of Hillsborough, 598 F.3d 1289, 1293 (11th Cir. 2010))*.

Moreover, Plaintiff's **[*8]** argument that the subsequent filing of Bray IV bars *res judicata* is unavailing. The filing date of the actions is not determinative of *res judicata*. Rather, when two actions are proceeding simultaneously, the "final judgment in one action preclude[s] further litigation" in another action. *Shurick v. Boeing Co., 623 F.3d 1114, 1118 (11th Cir. 2010)*[3]

B. Bray's claims are time-barred

Defendants also argue that Bray's claims are time-barred. The statute of limitations of Bray's claims under the Sherman Act, the Clayton Act, and Florida's antitrust statute is four years. *15 U.S.C. § 15(b)*; *Fla. Stat. § 542.26*. Bray filed this action on October 27, 2015. To be timely, the alleged violations must have occurred on or after October 27, 2011. The statute of limitations began to run for the alleged violations either in November 2009, when the *third amendment* to the loan agreement was signed, or at the latest, in March 2010, when the assets were moved to Merrill Lynch. Bray does not dispute that the limitations period initially began to run either in 2009 or in 2010. (Dkt. 34 at 12)

Instead, he claims that the limitations period began anew when he resigned from Merrill Lynch on October 28, 2011. On that same day, Bray alleges that BANA threatened Maritz that it would place the syndicated loan **[*9]** into immediate default if Maritz moved the GPA with Bray. (Dkt. 26 at ¶ 68) Bray alleges that but for the illegal tying of the syndicated loan and the alleged threat, Maritz would have authorized that the GPA move with Bray. (Id.) However, the evidence in the record shows that BANA merely affirmed the provisions of the terms of the loan agreement.[4] (Dkt. 117 at ¶ 43) In an email dated October 28, 2011, BANA employee Stephen Bode ("Bode") wrote to his colleagues that "[t]hese assets cannot move or they will be immediately in default." (Dkt. 116-17 at 2; Dkt. 116-18 at 2) Bode then notified Maritz officials of Bray's departure. (Dkt. 116-19 at 2) Bode also told Maritz officials that he had assured his colleagues that the assets would not move so there would be no default under the credit agreement. (Dkt. 116-19 at 2) There is no evidence in the record that demonstrates, or even suggests, that BANA reconsidered whether it should continue to enforce the loan provision or whether it might grant a modification of the loan agreement such that any purported violation continued or a new overt act occurred. The mere affirmation of an existing agreement is insufficient to constitute an overt act. **[*10]** See *Z. Techs Corp. v. Lubrizol Corp., 753 F.3d 594, 604 (6th Cir. 2014)* (affirming the dismissal of a Sherman Act claim based on a statute of limitations violation, noting that "the implementation of the [contractual] clause, which was originally entered into at the time of the [contract], does not constitute a 'new and independent' act" and that reaffirmations of existing policy are not overt acts).

---

[2] The Court notes that "[a]lthough an unpublished opinion is not binding on this court, it is persuasive authority. See *11th Cir. R. 36-2*." *United States v. Futrell, 209 F.3d 1286, 1289 (11th Cir. 2000)*.

[3] Because the Court finds that Bray's claims are barred by Bray IV, it need not address Defendants' contention that the claims are barred by Bray II.

[4] Maritz was the majority shareholder of American Express Incentive Solutions ("AEIS") and had requested that the lenders permit it to acquire the minority shares of AEIS. (Dkt. 116 at 4) The lenders required additional collateral for the purchase of the AEIS shares, and in 2009, the loan agreement was amended. (Id.; Dkt. 26 at ¶ 30). Provision 7.16 of the loan agreement states:

> Within forty-five (45) days after the date AEIS becomes a Subsidiary, AEIS shall open, maintain and otherwise have all investment accounts that contain bond mutual funds at Bank of America (or its Affiliates) and shall have entered into a control agreement with, or have agreed to other arrangements granting "control" (within the meaning of Article 9 of the applicable Uniform Commercial Code) to, the Administrative Agent, in each case, in form and substance reasonably satisfactory to the Administrative Agent.

(Dkt. 129 at ¶ 10)

Moreover, Bray makes a conclusory allegation that "[c]ertainly if the terms imposed by Defendants through Section 7.16 of the Loan [were] illegal in 2009, Section 7.16 would still be illegal on October 28, 2011," when Bray resigned from Merrill Lynch. (Dkt. 121 at 17; Dkt. 26 at ¶ 68) As stated above, the party opposing a motion for summary judgment must rely on more than **[*11]** conclusory statements or allegations unsupported by facts. *Evers, 770 F.2d at 986* ("[C]onclusory allegations without specific supporting facts have no probative value."). Again, mere reaffirmations of existing policy are not overt acts sufficient to trigger a new limitations period.

Bray does not assert any facts to support an exception to the statute of limitations, such as a continuing violation or an overt act that occurred on or after October 27, 2011. Therefore, Bray's claims, which were brought on October 27, 2015, were not filed within four years of the alleged injury. As such, even if the claims were not barred by *res judicata*, they would be time-barred. Defendants are also entitled to summary judgment on this basis.

Because the Court GRANTS Defendants' motion for summary judgment finding that Bray's claims are barred by *res judicata*, Bray's motion for summary judgment is **DENIED AS MOOT**.

IV. CONCLUSION

Upon consideration of the foregoing, it is hereby **ORDERED** as follows:

1. Defendants' Motion for Summary Judgment, (Dkt. 116), is **GRANTED**.

2. Plaintiff's Motion for Summary Judgment, (Dkt. 114), is **DENIED AS MOOT**.

3. Defendants' Motion to Exclude Expert Testimony of Professor Cornelius K. Hurley, (Dkt. 115), **[*12]** is **DENIED AS MOOT**.

4. The Clerk is directed to enter **FINAL JUDGMENT** in favor of Defendants.

5. After entry of final judgment, the Clerk shall terminate any pending motions and **CLOSE** this case.

DONE and **ORDERED** in Tampa, Florida, this 20th day of August, 2018.

LexisNexis® Headnotes

Civil Procedure > Special Proceedings > Class Actions

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN1[] **Special Proceedings, Class Actions**

In the context of a motion to dismiss, the court accepts the facts asserted in a Class Complaint as true and views them in the light most favorable to the class plaintiffs.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN2[] **Motions to Dismiss, Failure to State Claim**

Fed. R. Civ. P. 8(a)(2) provides that a complaint must contain a short and plain statement of the claim showing that the pleader is entitled to relief. Although this Rule does not require detailed factual allegations, it demands more than a pleading that offers labels and conclusions' or a formulaic recitation of the elements of a cause of action which, will the Supreme Court explained, will not do. When considering a motion to dismiss under *Fed. R. Civ. P. 12(b)(6)*, the court must assume that the factual allegations in the complaint are true. But the court is not bound to accept as true a legal conclusion couched as a factual allegation. Threadbare recitals of the elements of a cause of action, supported by mere conclusory statements, do not suffice to state a claim for relief. Also, the complaint's factual allegations must be enough to raise a right to relief above the speculative level.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN3[] **Motions to Dismiss, Failure to State Claim**

For a complaint to survive a motion to dismiss under *Fed. R. Civ. P. 12(b)(6)*, the pleading must contain sufficient factual matter, accepted as true, to state a claim for relief that is plausible on its face. A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged. The plausibility standard is not akin to a probability requirement, but it asks for more than a sheer possibility that a defendant has acted unlawfully. The question is whether, if the allegations are true, it is plausible and not merely possible that the plaintiff is entitled to relief under the relevant law.

Antitrust & Trade Law > Procedural Matters

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN4[] **Antitrust & Trade Law, Procedural Matters**

In the antitrust context, the U.S. Supreme Court has observed that proceeding to antitrust discovery can be expensive. So, courts must insist upon some specificity in pleading before allowing a potentially massive factual controversy to proceed. But still, antitrust cases are not subject to a standard requiring heightened fact pleading of specifics. Instead, an antitrust complaint must allege only enough facts to state a claim to relief that is plausible on its face sufficient to nudge the claims across the line from conceivable to plausible. On a *Fed. R. Civ. P. 12(b)(6)* motion to dismiss antitrust claims, the court must ensure that plaintiffs have alleged facts to support those elements sufficient to provide the heft to show an entitlement to relief and to nudge plaintiffs' claims over the line from mere possibility or speculation to plausibility.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Tying Arrangements

HN5[] **Price Fixing & Restraints of Trade, Tying Arrangements**

Tying is an arrangement involving the sale of two distinct products or services as a package. The essential characteristic of an invalid tying arrangement lies in the seller's exploitation of its control over the tying product to force the buyer into the purchase of a tied product that the buyer either did not want at all, or might have preferred to purchase elsewhere on different terms. But a tying arrangement cannot exist unless two separate product markets have been linked. And the question whether one or two products are involved turns not on the functional relation between them, but rather on the character of the demand for the two items. To be considered two distinct products, there must be sufficient consumer demand so that it is efficient for a firm to provide one separately from the other.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Tying Arrangements

HN6[] Price Fixing & Restraints of Trade, Tying Arrangements

In the context of a tying relationship claim, the Tenth Circuit has defined the relevant product market in any given case as one composed of products that have reasonable interchangeability for the purposes for which they are produced-price, use and qualities considered.

Antitrust & Trade Law > Sherman Act > Scope > Exemptions

HN7[] Scope, Exemptions

The Noerr-Pennington doctrine exempts from antitrust liability any legitimate use of the political process by private individuals, even if their intent is to eliminate competition. The scope of the Noerr-Pennington doctrine depends on the source, context, and nature of the anticompetitive restraint at issue. Noerr-Pennington immunity does not apply if the purported effort to influence or obtain government action is in fact only an attempt to interfere with the business relationships of a competitor. This is the so-called sham exception to the Noerr-Pennington doctrine. The sham exception applies when persons use the governmental process-as opposed to the outcome of that process-as an anticompetitive weapon. The exception thus involves a defendant whose activities are not genuinely aimed at procuring favorable government action at all, such as a defendant who files frivolous objections to the license application of a competitor, with no expectation of achieving denial of the license but simply in order to impose expense and delay.

Antitrust & Trade Law > Sherman Act > Scope > Exemptions

HN8[] Scope, Exemptions

In the context of the Noerr-Pennington doctrine, not every fraudulent misrepresentation during an adjudicative or administrative proceeding can give rise to antitrust liability. A misrepresentation renders an adjudicative proceeding a sham only if the misrepresentation (1) was intentionally made, with knowledge of its falsity; and (2) was material, in the sense that it actually altered the outcome of the proceeding.

Antitrust & Trade Law > Clayton Act > Claims

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > Exclusive Dealing

HN9[] Clayton Act, Claims

To assert a plausible exclusive dealing claim, a plaintiff must plead facts capable of supporting a finding or inference that the probable effect of performance of the contract will foreclose competition in a substantial share of the line of commerce affected.

Antitrust & Trade Law > Clayton Act > Claims

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > Exclusive Dealing

HN10[] Clayton Act, Claims

In the context of an exclusive dealing claim, the U.S. Supreme Court has instructed lower courts to determine substantiality in a given case by weighing the probable effect of the contract on the relevant area of effective competition, taking into account the relative strength of the parties, the proportionate volume of commerce involved in relation to the total volume of commerce in the relevant market area, and the probable immediate and future effects which pre-emption of that share of the market might have on effective competition therein. When considering whether a contract at issue tends to foreclose a substantial volume of competition, the Supreme Court has considered several things. They include the relative dominance of a seller's position in the market, whether the market has myriad outlets with substantial sales volume, the prevalence in the industry of exclusive contracts, the duration of the contract, and the existence of any pro-competitive justifications for the contract.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN11[] **Standing, Requirements**

To establish antitrust standing, a plaintiff must allege (1) an antitrust injury; and (2) a direct causal connection between that injury and a defendant's violation of the antitrust laws.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

HN12[] **Noerr-Pennington Doctrine, Sham Exception**

In the context of an antitrust claim based on a reverse payment settlement, the United States Supreme Court has explained that it is normally not necessary to litigate patent validity to answer the antitrust question (unless, perhaps, to determine whether the patent litigation is a sham) because an unexplained large reverse payment itself would normally suggest that the patentee has some serious doubts about the patent's survival. Also, the court recognized as a general matter, it is well established that the burden of proving infringement generally rests upon the patentee. On summary judgment, the standard requiring Plaintiffs to produce some evidence of invalidity or noninfringement does not require Plaintiffs to prove that the generic defendant would have won, only that it could have.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN13[] **Sherman Act, Claims**

To state a claim under Sherman Act § 1, a complaint must allege enough factual matter (taken as true) to suggest that an agreement was made. To state a claim for a violation of § 1, the plaintiff must allege facts which show: the defendant entered a contract, combination or conspiracy that unreasonably restrains trade in the relevant market. An agreement or conspiracy under federal antitrust laws is said to exist when there is a unity of purpose, a common design and understanding, a meeting of the minds, or a conscious commitment to a common scheme. A plaintiff may plead an agreement by alleging direct or circumstantial evidence, or a combination of the two, but allegations of direct evidence, that are adequately detailed, are sufficient alone. However, bare bones accusations of a conspiracy without any supporting facts are insufficient to state an antitrust claim.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade

HN14[] **Sherman Act, Claims**

When allegations of parallel conduct are set out in order to make a claim under § 1 of the Sherman Act, they must be placed in a context that raises a suggestion of preceding agreement, not merely parallel conduct that could just as well be independent action. This is so because lawful parallel conduct fails to bespeak unlawful agreement. While consciously parallel behavior may contribute to a finding of antitrust conspiracy, it is insufficient, standing alone, to prove conspiracy. Conscious parallel business behavior, standing alone, is insufficient to prove conspiracy. Thus, an allegation of parallel conduct and a bare assertion of conspiracy will not suffice. Without more, parallel conduct does not suggest conspiracy, and a conclusory allegation of agreement at some unidentified point does not supply facts adequate to show illegality. Instead, a plaintiff must allege conspiracy evidence that tends to rule out the possibility that the defendants were acting independently.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN15[] **Sherman Act, Claims**

The Tenth Circuit has held that parallel behavior may, however, support the existence of an illegal agreement when augmented by additional evidence from which an understanding among the parties may be inferred. Such evidence may include a showing that the parties are acting against their own individual business interests, or that there is motivation to enter into an agreement requiring parallel behavior. Some courts have denominated these additional facts, the presence of which may indicate the existence of an actionable agreement, as plus factors and identified at least three such plus factors: (1) evidence that the defendant had a motive to enter into a price fixing conspiracy; (2) evidence that the defendant acted contrary to its interests; and (3) evidence implying a traditional conspiracy.

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > Conspiracy to Monopolize

HN16[] **Monopolies & Monopolization, Conspiracy to Monopolize**

The U.S. Supreme Court has not held that a patent holder and licensee never can conspire to violate the antitrust laws. Indeed, as other courts have recognized, a patent holder and its licensee can conspire in violation of the antitrust laws only if the conspiracy deprives the marketplace of independent actors.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

HN17[] **Noerr-Pennington Doctrine, Sham Exception**

The U.S. Supreme Court has held that reverse payment settlements can sometimes violate the antitrust laws. A reverse payment settlement refers to an agreement by a brand-name manufacturer and patent holder to compensate a generic manufacturer and alleged patent infringer in exchange for settling patent infringement litigation, thus delaying the generic's market entry. When a brand-name manufacturer pays to delay the first filer's generic launch, that reverse payment postpones not only the first filer's product but also those of all other generic manufacturers, who must wait out the 180-day exclusivity period before going to market. Because a reverse payment settlement effectively delays generic competition in the market, the U.S. Supreme Court has recognized that a reverse payment, where large and unjustified, can bring with it the risk of significant anticompetitive effects.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN18[] **Per Se Rule Tests, Manifestly Anticompetitive Effects**

To determine whether a reverse payment settlement has anticompetitive effects, the United States Supreme Court has instructed that a detailed exploration of the validity of the patent itself is not necessary. Instead, the anticompetitive effects of a reverse payment depend on its size, its scale in relation to the payor's anticipated future litigation costs, its independence from other services for which it might represent payment, and the lack of any other convincing justification. The Supreme Court also recognized that the existence and degree of any anticompetitive consequence may also vary as among industries. Because of these complexities, the Supreme Court has held that courts must analyze alleged unlawful reverse payment settlements under the rule of reason.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN19[] **Motions to Dismiss, Failure to State Claim**

Consideration of disputed factual allegations is not proper on a *Fed. R. Civ. P. 12(b)(6)* motion to dismiss.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

HN20[] **Noerr-Pennington Doctrine, Sham Exception**

The Noerr-Pennington doctrine exempts from antitrust liability any legitimate use of the political process by private individuals, even if their intent is to eliminate competition. But Noerr-Pennington immunity does not apply to sham activities. Petitioning the government is a sham activity if: (1) it is objectively baseless in the sense that no reasonable litigant could realistically expect success on the merits, and (2) it uses the governmental process-as opposed to the outcome of that process-as an anticompetitive weapon.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

HN21[] **Noerr-Pennington Doctrine, Sham Exception**

Some courts have found that the question whether petitioning activity is a sham is generally one for the jury. But a court may decide probable cause as a matter of law where there is no dispute over the predicate facts of the underlying proceeding.

Antitrust & Trade Law > Sherman Act > Claims

Torts > Intentional Torts > Defamation > Procedural Matters

HN22[] Sherman Act, Claims

Deceptive speech can support Sherman Act claims because in some cases, such defamation, which plainly is not competition on the merits, can give rise to antitrust liability, especially when it is combined with other anticompetitive acts.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Evidence > Inferences & Presumptions > Presumptions > Rebuttal of Presumptions

Antitrust & Trade Law > Consumer Protection > False Advertising

HN23[] Actual Monopolization, Claims

The Tenth Circuit presumes that allegedly false speech bears only a de minimis effect on competition. A plaintiff asserting a monopolization claim based on misleading advertising must overcome a presumption that the effect on competition of such a practice was de minimis. An antitrust plaintiff may rebut this presumption by satisfying a six-factor test, showing that the disparagement was: (1) clearly false, (2) clearly material, (3) clearly likely to induce reasonable reliance, (4) made to buyers without knowledge of the subject matter, (5) continued for prolonged periods, and (6) not readily susceptible to neutralization or other offset by rivals. The Tenth Circuit has not decided whether a plaintiff must satisfy all six factors to overcome the de minimis presumption.

Civil Procedure > Special Proceedings > Class Actions > Class Members

HN24[] Class Actions, Class Members

Several courts, including other district courts in the Tenth Circuit, have determined that the plaintiffs in a putative class action may only assert a state law claim if a named plaintiff resides in, does business in, or has some other connection to that state.

Civil Procedure > Preliminary Considerations > Justiciability > Case & Controversy Requirements

Civil Procedure > Special Proceedings > Class Actions > Class Members

HN25[] Justiciability, Case & Controversy Requirements

Prior to class certification, the named plaintiffs' failure to maintain a live case or controversy is fatal to the case as a whole. That unnamed plaintiffs might have a case or controversy is irrelevant.

Antitrust & Trade Law > ... > Private Actions > Purchasers > Direct Purchasers

HN26[] Purchasers, Direct Purchasers

The U.S. Supreme Court held that only direct purchasers may bring claims for damages under the federal antitrust laws. To avoid the Illinois Brick rule, some states have passed repealer statutes allowing indirect purchasers to recover under state antitrust laws.

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

Civil Procedure > Special Proceedings > Class Actions

HN27[] **Private Actions, State Regulation**

Several courts have concluded that the class action prohibition in the Illinois Antitrust Act is procedural in nature and that *Fed. R. Civ. P. 23* applies to determine whether a claim may be brought as a class action. So, because the availability of the class action procedure does not change the substantive rights or remedies available to plaintiffs under Illinois law, courts have refused to dismiss Illinois Antitrust Act claims on the basis of the Illinois's class action bar.

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

HN28[] **Purchasers, Indirect Purchasers**

The West Virginia Antitrust Act permits indirect purchaser claims.

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

HN29[] **Purchasers, Indirect Purchasers**

Indirect purchasers may not bring a cause of action under the antitrust laws of Arkansas, Massachusetts, and Missouri.

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN30[] **Private Actions, State Regulation**

The Kansas Monopolies and Unfair Trade Act by its terms prohibits combinations and conspiracies only.

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN31[] **Private Actions, State Regulation**

The Tennessee Trade Practices Act, *Tenn. Code Ann. § 47-25-101*, declares that certain anticompetitive conduct is against public policy, unlawful, and void. *Tenn. Code Ann. § 47-25-101*. Such conduct includes all arrangements, contracts, agreements, trusts, or combinations between persons or corporations designed, or which tend, to advance, reduce, or control the price or the cost to the producer or the consumer of any such product or article. As one court has explained, none of these terms appears to include unilateral conduct. Likewise, at least two other courts have held that the Tennessee Trade Practices Act does not cover unilateral conduct claims.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

HN32[] Private Actions, Racketeer Influenced & Corrupt Organizations

Subsection 1962(c) of RICO makes it: unlawful for any person employed by or associated with any enterprise engaged in, or the activities of which affect, interstate or foreign commerce, to conduct or participate, directly or indirectly, in the conduct of such enterprise's affairs through a pattern of racketeering activity or collection of unlawful debt. *18 U.S.C. § 1962(c)*. Subsection (d) makes it unlawful for any person to conspire to violate subsection (c). *18 U.S.C. § 1962(d)* RICO also provides a private civil cause of action for those who are injured by violations of *§ 1962* and allows recovery of treble damages, costs, and attorney fees. *18 U.S.C. § 1964(c)*.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Claims

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

HN33[] Racketeer Influenced & Corrupt Organizations, Claims

RICO is to be read broadly. To successfully state a RICO claim, a plaintiff must allege four elements: (1) conduct (2) of an enterprise (3) through a pattern (4) of racketeering activity. And, to have standing to assert a RICO claim, the plaintiff must allege that the RICO violation proximately caused plaintiff's injuries.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Claims

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

HN34[] Racketeer Influenced & Corrupt Organizations, Claims

RICO prohibits a person who is associated with an enterprise to conduct its affairs through a pattern of racketeering activity. *18 U.S.C.S. § 1962(c)*. RICO broadly defines enterprise as any individual, partnership, corporation, association, or other legal entity, and any union or group of individuals associated in fact although not a legal entity. *18 U.S.C.S. § 1961(4)*.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Claims

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

HN35[] Racketeer Influenced & Corrupt Organizations, Claims

The U.S. Supreme Court has explained that an enterprise includes any union or group of individuals associated in fact, and that RICO reaches a group of persons associated together for a common purpose of engaging in a course of conduct. An association-in-fact enterprise requires: (1) a purpose, (2) relationships among those associated with the enterprise, and (3) longevity sufficient to permit these associates to pursue the enterprise's purpose.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Claims

HN36[] Racketeer Influenced & Corrupt Organizations, Claims

RICO liability depends on showing that the defendants conducted or participated in the conduct of the enterprise's affairs, not just their own affairs.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Claims

HN37[] Racketeer Influenced & Corrupt Organizations, Claims

The Tenth Circuit has described operation and management test as a standard requiring the defendant to have some part in directing the enterprise's affairs. But importantly, the defendant need not have primary responsibility for the enterprise's affairs, a formal position in the enterprise, or significant control over or within an enterprise. This test requires less. Instead, even lower rung participants in the enterprise who are under the direction of upper management may be liable under RICO if they have some part in operating or managing the enterprise's affairs. Yet, allegations that simply describe a defendant's conduct through its regular course of business, goods and services that ultimately benefit the enterprise do not suffice to state a RICO claim.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Claims

HN38[] Racketeer Influenced & Corrupt Organizations, Claims

The RICO statute defines a pattern of racketeering as at least two acts of racketeering activity, which occurred within ten years of one another. *18 U.S.C.S. § 1961(5)*. But proof of two or more predicate acts is not sufficient to prove a pattern unless there is a relationship between the predicate acts and a threat of continuing activity. Continuity of threat requires both proof of a series of related predicates extending over a substantial period of time, as well as a showing that the predicates themselves involve a distinct threat of long-term racketeering activity or that the predicates are a regular way of conducting the defendant's ongoing legitimate business or the RICO enterprise.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Claims

Civil Procedure > Trials > Jury Trials > Province of Court & Jury

HN39[] Racketeer Influenced & Corrupt Organizations, Claims

The Tenth Circuit recognizes that whether a pattern of racketeering activity exists is a question of fact for the jury to determine.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Claims

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

HN40[] Racketeer Influenced & Corrupt Organizations, Claims

To state a plausible RICO claim, a plaintiff must allege that he was a person injured in his business or property by reason of a violation of *18 U.S.C.S. § 1964*. *18 U.S.C.S. § 1964(c)*. The U.S. Supreme Court has interpreted this provision as one requiring a RICO plaintiff's damages to flow from the commission of the predicate acts. The *§ 1964(c)* causation requirement requires a RICO plaintiff to allege that the defendant's violation not only was a but for cause of his injury, but was the proximate cause as well. The Supreme Court has defined RICO proximate causation as a flexible concept that does not lend itself to a black-letter rule that will dictate the result in every case.

Instead, proximate cause provides a label generically for the judicial tools used to limit a person's responsibility for the consequences of that person's own acts. And it includes a particular emphasis on the demand for some direct relation between the injury asserted and the injurious conduct alleged.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Claims

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

HN41[] **Racketeer Influenced & Corrupt Organizations, Claims**

When a court evaluates a RICO claim for proximate causation, the central question it must ask is whether the alleged violation led directly to the plaintiff's injuries. The U.S. Supreme Court has instructed that no need exists to broaden the universe of actionable harms to permit RICO suits by parties who have been injured only indirectly. But, in the context of RICO claims premised on predicate acts of mail fraud, the Supreme Court has held that a plaintiff is not required to plead that he is a victim of the defendant's underlying crime to establish a direct injury. Rather, a plaintiff may establish proximate causation by plausibly pleading that his business or property has been directly injured as a result of the defendants' *§ 1962* violation.

Antitrust & Trade Law > ... > Racketeer Influenced & Corrupt Organizations > Claims > Fraud

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN42[] **Claims, Fraud**

To state a plausible RICO claim, the class plaintiffs need not plead that they relied on the alleged false statements when purchasing the product.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Claims

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

HN43[] **Racketeer Influenced & Corrupt Organizations, Claims**

RICO is founded on the concept of racketeering activity. This statute defines racketeering activity to encompass dozens of state and federal offenses, known in RICO parlance as predicates. These predicates include any act indictable under specified federal statutes. *18 U.S.C.S. § 1961(1)*. Such predicates include those indictable under *18 U.S.C.S. § 1341* (relating to mail fraud), § 1343 (relating to wire fraud), and *§1512* (relating to tampering with a witness, victim, or an informant). *18 U.S.C.S. § 1961(1)(B)*.

Antitrust & Trade Law > ... > Racketeer Influenced & Corrupt Organizations > Claims > Fraud

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

HN44[] **Claims, Fraud**

To support mail and wire fraud allegations in RICO claims, the plaintiffs must plausibly allege the existence of a scheme or artifice to defraud or obtain money or property by false pretenses, representations or promises, and that defendants communicated, or caused communications to occur, through the U.S. mail or interstate wires to execute that fraudulent scheme. And because *Fed. R. Civ. P. 9(b)* requires a plaintiff to plead mail and wire fraud with particularity, the plaintiffs must set forth the time, place and contents of the false representation, the identity of the party making the false statements and the consequences thereof.

Criminal Law & Procedure > Criminal Offenses > Obstruction of Administration of Justice > Elements

Criminal Law & Procedure > Criminal Offenses > Obstruction of Administration of Justice > Penalties

HN45[] **Obstruction of Administration of Justice, Elements**

18 U.S.C. § 1512(c)(2) makes it unlawful to obstruct, influence, or impede any official proceeding, or attempt to do so, and imposes a fine under this title or imprisonment not more than 20 years, or both. *18 U.S.C.S. § 1512(c)(2)*.

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

HN46[] **Purchasers, Indirect Purchasers**

The Tenth Circuit has recognized, albeit in the antitrust context, that only the direct purchaser, and no other person in the distribution chain, is the party injured who may sue for and recover the full amount of the illegal overcharge.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Claims

HN47[] **Racketeer Influenced & Corrupt Organizations, Claims**

The U.S. Supreme Court has recognized in the RICO context that its requirements for antitrust injury have no analogue in the RICO setting. And, the Supreme Court has cautioned that is use of the term "direct" should merely be understood as a reference to the proximate-cause inquiry that is informed by the concerns set out in the text.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Claims

Torts > ... > Multiple Defendants > Concerted Action > Civil Conspiracy

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

HN48[] **Racketeer Influenced & Corrupt Organizations, Claims**

18 U.S.C.S. § 1962(d) makes it unlawful for any person to conspire to violate subsection 1962(c). *18 U.S.C.S. § 1962(d)*.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

HN49[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

The U.S. Supreme Court has held that an employee who conducts the affairs of a corporation through illegal acts comes within the terms of the RICO statute that forbids any person unlawfully to conduct an enterprise, particularly when the statute explicitly defines person to include any individual capable of holding a legal or beneficial interest in property, and defines enterprise to include a corporation. *18 U.S.C.S. § 1961(3)*, *(4)*. An individual and his wholly owned corporation are sufficiently distinct for RICO purposes.

Antitrust & Trade Law > Sherman Act > Defenses

Governments > Legislation > Statute of Limitations > Time Limitations

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Statute of Limitations

Governments > Legislation > Statute of Limitations > Tolling

HN50[] **Sherman Act, Defenses**

The U.S. Supreme Court has described the continuing violation doctrine in the antitrust context in this fashion: ***Antitrust law*** provides that, in the case of a "continuing violation," say, a pricefixing conspiracy that brings about a series of unlawfully high priced sales over a period of years, each overt act that is part of the violation and that injures the plaintiff, e.g., each sale to the plaintiff, starts the statutory period running again, regardless of the plaintiff's knowledge of the alleged illegality at much earlier times.

Antitrust & Trade Law > Sherman Act > Defenses

Governments > Legislation > Statute of Limitations > Time Limitations

Antitrust & Trade Law > Regulated Practices > Private Actions > Purchasers

HN51[] **Sherman Act, Defenses**

Every court to have considered the consumer's harm in the pay-for-delay context has held that a new cause of action accrues to purchasers upon each overpriced sale of the drug.

Antitrust & Trade Law > Sherman Act > Defenses

Governments > Legislation > Statute of Limitations > Time Limitations

Antitrust & Trade Law > Regulated Practices > Private Actions > Purchasers

HN52[] **Sherman Act, Defenses**

Although the Tenth Circuit has not considered the question in the pay-for-delay context, it has applied the continuing violation doctrine to antitrust claims. The Circuit recognized that in the context of a continuing conspiracy to violate the antitrust laws, each time a plaintiff is injured by an act of the defendants a cause of action accrues to him to recover the damages caused by that act and as to those damages, the statute of limitations runs from the commission of the act. The Circuit has held that an overt act will restart the statute of limitations under the continuing conspiracy exception when the act is (1) a new and independent act that is not merely a reaffirmation of a previous act; and (2) the act inflicts new and accumulating injury on the plaintiff.

Civil Procedure > ... > Affirmative Defenses > Statute of Limitations > Tolling of Statute of Limitations

Governments > Legislation > Statute of Limitations > Tolling

HN53[] **Statute of Limitations, Tolling of Statute of Limitations**

The question of whether a plaintiff should have discovered the basis of his suit under the doctrine of equitable tolling does not lend itself to determination as a matter of law.

Civil Procedure > Preliminary Considerations > Justiciability > Standing

Constitutional Law > ... > Case or Controversy > Standing > Elements

HN54[] **Justiciability, Standing**

U.S. Const. art. III limits federal courts' jurisdiction to cases and controversies. To present a case or controversy under Article III, a plaintiff must establish that he has standing to sue. Article III standing requires a plaintiff to establish (1) that he or she has suffered an injury in fact; (2) that the injury is fairly traceable to the challenged action of the defendant; and, (3) that it is likely that the injury will be redressed by a favorable decision. At bottom, the gist of the question of standing is whether petitioners have such a personal stake in the outcome of the controversy as to assure that concrete adverseness which sharpens the presentation of issues upon which the court so largely depends for illumination.

Civil Procedure > ... > Justiciability > Standing > Injury in Fact

Evidence > ... > Presumptions > Particular Presumptions > Regularity

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN55[] **Standing, Injury in Fact**

A injury in fact is an invasion of a legally protected interest which is (a) concrete and particularized, and (b) actual or imminent, not conjectural or hypothetical. The U.S. Supreme Court has explained the requirement of pleading injury in fact this way: At the pleading stage, general factual allegations of injury resulting from the defendant's conduct may suffice, for on a motion to dismiss the court presume that general allegations embrace those specific facts that are necessary to support the claim.

Civil Procedure > ... > Justiciability > Standing > Injury in Fact

HN56[] **Standing, Injury in Fact**

Generally, economic injury is a paradigmatic form of injury in fact. Benefit of the bargain damages are sufficient to demonstrate an injury in fact.

Civil Procedure > ... > Justiciability > Standing > Burdens of Proof

Constitutional Law > ... > Case or Controversy > Standing > Elements

Civil Procedure > ... > Justiciability > Standing > Injury in Fact

HN57[] Standing, Burdens of Proof

To satisfy the standing requirement of traceability, the defendants' conduct must have caused the injury. The traceability of a plaintiff's harm to the defendant's actions need not rise to the level of proximate causation. But U.S. Const. art. III does require proof of a substantial likelihood that the defendant's conduct caused plaintiff's injury in fact.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices

Civil Procedure > Trials > Jury Trials > Province of Court & Jury

HN58[] Consumer Protection, Deceptive & Unfair Trade Practices

The question whether an act is deceptive is a factual one for the jury to decide.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN59[] Deceptive & Unfair Trade Practices, State Regulation

States apply different standards to determine what constitutes unfair or unconscionable conduct capable of violating state consumer protection laws. Some states employ the cigarette test, examining whether the alleged unfair practice: (1) offends established public policy; (2) is immoral, unethical, oppressive, unscrupulous; and (3) causes substantial injury to consumers. Other states apply a substantial injury test, considering whether the alleged unfair practice: (1) produces substantial injury to consumers; (2) is not the type of injury that a consumer reasonably could avoid; and (3) is not outweighed by countervailing benefits to consumers or competition.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

HN60[] Heightened Pleading Requirements, Fraud Claims

In the context of a fraud claim, the court has held that a plaintiff - to satisfy *Fed. R. Civ. P. 9(b)* s heightened pleading standard - need only allege that it relied on an alleged misrepresentation. Such allegations need not assert details concerning its reliance because the Tenth Circuit's standard does not require more.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

Torts > ... > Fraud & Misrepresentation > Actual Fraud > Elements

HN61[] Deceptive & Unfair Trade Practices, State Regulation

Many state consumer protection law claims do not require plaintiffs to plead reliance in asserting fraud claims. And, in certain other states, the plaintiffs need not plead reliance when they allege misrepresentations by concealment or omission.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

HN62[] Heightened Pleading Requirements, Fraud Claims

The Tenth Circuit requires a complaint alleging fraud to set forth the time, place and contents of the false representation, the identity of the party making the false statements and the consequences thereof.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

HN63[] Heightened Pleading Requirements, Fraud Claims

The Tenth Circuit's standard requires only particular information about the representation itself. A plaintiff need not plead every fact that supports its claim of fraud, and such facts concerning a plaintiff's receipt of the statements are readily obtained in discovery.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN64[] Deceptive & Unfair Trade Practices, State Regulation

The Colorado Consumer Protection Act does not permit a plaintiff to seek injunctive relief on behalf of either himself or a class.

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

HN65[] Equitable Relief, Quantum Meruit

Although the elements of an unjust enrichment claim differ among various state laws, generally, an unjust enrichment claim requires a plaintiff to allege that: (1) he or she conferred a benefit on defendant, and (2) defendant's retention of the benefit under the circumstances is unjust. Kansas state courts have held that the theory of unjust enrichment rests upon three elements: (1) a benefit conferred; (2) an appreciation or knowledge of the benefit by the one receiving the benefit; and (3) the acceptance or retention of the benefit under such circumstances as to make it inequitable to retain the benefit without payment of its value.

For Traci Brannon, (Plaintiff in Related Case #17-2497-DCCGLR), Lindsey Rizzo, (Plaintiff in Related Case #17-2497-DCCGLR), Jamie Herr, (Plaintiff in Related Case #17-2497-DCCGLR), Miscellaneous: Rex A. Sharp, Ryan C. Hudson, LEAD ATTORNEYS, Rex A. Sharp, PA, Prairie Village, KS.

For Express Scripts Holding Company, (Defendant in Related Case #17-2497-DCCGLR), Express Scripts, Inc., (Defendant in Related Case #17-2497-DCCGLR), Miscellaneous: William D. Beil, LEAD ATTORNEY, German May PC, Kansas City, MO.

For UnitedHealth Group, Inc., (Defendant in Related Case #17-2497-DCC-GLR), OptumRx, Inc., (Defendant in Related Case #17-2497-DCCGLR), Miscellaneous: Bradley Joseph Schlozman, **[**16]** Mitchell L. Herren, LEAD ATTORNEYS, Hinkle Law Firm LLC - East Wichita Office, Wichita, KS.

For Judicial Panel on Multidistrict Litigation, Interested Party: Jeffrey N. Luthi, LEAD ATTORNEY, Clerk of the MDL Panel, One Columbus Circle NE, Washington, DC.

Judges: Daniel D. Crabtree, United States District Judge.

Opinion by: Daniel D. Crabtree

Opinion

[*1275] **MEMORANDUM AND ORDER**

This Order addresses the pending Motions to Dismiss in one of the two separate tracks of this MDL—the consumer class cases track. The consumer class track consists of cases filed by individual consumers or third-party payors who allege they purchased EpiPens for consumption by themselves, their families, or their members, employees, insureds, participants, or beneficiaries. After the Judicial Panel on Multidistrict Litigation **[*1276]** transferred five consumer class cases and one other filed by Sanofi-Aventis U.S. LLC ("Sanofi") to our court for coordinated and consolidated proceedings (Docs. 1, 5, & 9), the consumer class plaintiffs filed a Consolidated Class Action Complaint ("Class Complaint") (Doc. 60). The Class Complaint asserts federal and state antitrust claims, federal *RICO Act* violations, various state consumer protection law violations, and unjust **[**17]** enrichment claims. The Class Complaint also seeks class action certification.

The Class Complaint asserts its claims against two groups of defendants who are either sellers or manufacturers of the EpiPen. One group consists of defendants Mylan N.V., Mylan Specialty L.P., Mylan Pharmaceuticals, Inc., and Mylan's CEO Heather Bresch (collectively "the Mylan Defendants"). The other group of defendants consists of Pfizer, Inc., King Pharmaceuticals, Inc., and Meridian Medical Technologies, Inc. (collectively "the Pfizer Defendants"). When referring to both sets of defendants, this Order simply calls them, collectively, "defendants."

Defendants have filed separate motions asking the court to dismiss the Class Complaint. Doc. 92 (Pfizer Defendants' Motion to Dismiss Plaintiffs' Consolidated Class Action Complaint); Doc. 94 (Mylan Defendants' Motion to Dismiss Plaintiffs' Consolidated Class Action Complaint). The class plaintiffs have submitted an Omnibus Response to the Motions to Dismiss. Doc. 123. And both sets of defendants have filed Replies. Doc. 216 (Pfizer Defendants' Reply); Doc. 219 (Mylan Defendants' Reply). Also, on March 14, 2018, the Mylan Defendants submitted a Notice of Supplemental **[**18]** Authority under D. Kan. *Rule 7.1(f)*. Doc. 394. The class plaintiffs filed a response, objecting to the supplemental submission. Doc. 403. Then, on July 6, 2018, the class plaintiffs filed a Notice of Supplemental Authority (Doc. 765), and the Mylan Defendants submitted a response to their submission (Doc. 785). On July 11, 2018, the class plaintiffs filed another Notice of Supplemental Authority (Doc. 781), and the Mylan Defendants filed a response to that submission as well (Doc. 803). Finally, on August 12, 2018, the class plaintiffs filed another Notice of Supplemental Authority (Doc. 874), and the Mylan Defendants filed a response to that submission (Doc. 889).

Thus, to say the least, the Motions to Dismiss are now thoroughly and fully briefed. After carefully considering the arguments presented by the parties' filings, the court is prepared to rule.[1] For the reasons explained below, the court grants defendants' motions in part and denies them in part.

I. Factual Background

The following facts come from the Class Complaint. ***HN1***[] The court accepts the facts asserted in the Class Complaint as true and views them in the light most favorable to the class plaintiffs. *Mayfield v. Bethards, 826 F.3d 1252, 1255 (10th Cir. 2016)* (citation omitted).

The EpiPen[2] is **[**19]** a disposable, prefilled automatic injection device that delivers epinephrine **[*1277]** (also known as adrenaline) to treat severe allergic reactions known as anaphylaxis. Anaphylaxis is a life-threatening allergic reaction that can occur rapidly after exposure to an allergen. Anaphylaxis manifests in a variety of symptoms, including swelling of the tongue and throat, vomiting, reduced blood pressure, difficulty breathing, and, if untreated, death. Most commonly, anaphylaxis is caused by food allergens, but medications, latex, insect bites, and other unknown substances also can cause anaphylaxis. About 15 million people have food allergies in the United States. One of every 13 children in the United States has serious food allergies. And, each year, allergic reactions account for some 200,000 emergency room visits. Anaphylaxis is always considered a life-threatening medical emergency.

Epinephrine is used to treat anaphylaxis and is available only by prescription. To treat anaphylaxis effectively, one must administer epinephrine immediately. As little as a thirty minute delay in applying epinephrine can cause death. As a result, patients prone to anaphylaxis are advised to carry an epinephrine **[**20]** auto-injector ("EAI") at all

---

[1] Mylan has filed a Request for Oral Argument on their Motion to Dismiss under D. Kan. *Rule 7.2*. Doc. 220. D. Kan. *Rule 7.2* provides: "The court may set any motion for oral argument or hearing at the request of a party or on its own initiative." After reviewing the parties' written submissions, the court finds that they explain the parties' positions quite effectively. The court concludes that oral argument will not assist its work and thus, to grant it, would contradict *Fed. R. Civ. P. 1*. It is, simply, unnecessary. Exercising its discretion, the court denies Mylan's request.

[2] The Class Complaint uses the term "EpiPen" to refer to the EpiPen®, EpiPen 2-Pak®, EpiPen Jr.®, EpiPen Jr. 2-Pak®, My EpiPen®, LIFE HAPPENS®, EpiPen4Schools®, Never-See-Needle®, and Be Prepared®. Like the Class Complaint, the court refers to these devices collectively as the "EpiPen" and omits the ® for readability.

times. By doing so, a patient can use the EAI in an emergency when a risk of a severe allergic reaction presents itself.

In 2007, Mylan acquired the right to market and distribute the EpiPen. Pfizer is the exclusive supplier of EpiPens to Mylan. Pfizer provides Mylan with 100% of its EpiPen supply through two of its wholly owned subsidiaries—King Pharmaceuticals, Inc., and Meridian Medical Technologies, Inc.—who manufacture the epinephrine and hold the EpiPen patents. Since at least 2009, Mylan's market share of EAI devices in the United States EAI market has remained above 80%. Since 2009, Mylan's market share consistently has exceeded 90%, and, in 2012, its share was almost 100%. During the same time—and while the cost of the EpiPen's dose of epinephrine has remained about $1—Mylan has increased the EpiPen's price by more than 600%. In 2007, Mylan priced the EpiPen at $100. By 2016, Mylan was charging more than $600. In 2015, Mylan announced that the EpiPen had reached $1 billion in annual sales for the second consecutive year—up from $200 million in 2007.

The Class Complaint alleges that the Mylan and Pfizer Defendants have maintained a monopoly over the **[**21]** EpiPen market and its profitable revenues by devising an illegal scheme to monopolize the market for EAI devices. The Class Complaint asserts that defendants carried out their illegal scheme through several different avenues. The following paragraphs briefly summarize each one, as the Class Complaint describes them.

The Mylan Defendants Paid Pharmacy Benefit Managers (PBMs) to Exclude Competition

Pharmacy Benefit Managers ("PBMs") are third-party administrators of prescription drug programs for commercial health plans, self-insured employer plans, Medicare Part D plans, the Federal Employees Health Benefits Program, and state government employee plans. More specifically, PBMs administer a health coverage provider's prescription benefit program by developing the coverage provider's formulary (the list of prescription benefits included in the coverage at various pricing "tiers"), processing claims, creating a network of retail pharmacies who provide discounts in exchange for access to a provider's plan participants, and negotiating with manufacturers. The significant majority of patients with prescription drug insurance coverage receive their benefits through a **[*1278]** third-party payor whose **[**22]** drug formulary is determined by a PBM. From 2013 to 2015, commercial third-party payors accounted for about 71% of the EAI drug device market in the United States. So, for a competitor to enter and compete vigorously in the EAI drug device market, it is imperative that it access these third-party payors' drug formularies.

Between 2013 and 2015, the Mylan Defendants took advantage of their monopoly power by imposing significant increases in the EpiPen's price. Mylan then used the additional profit margins to offer PBMs significantly higher rebates and percentage discounts conditioned upon exclusive or preferred placement on the PBMs' drug formularies. For example, when Sanofi launched a rival EAI device—Auvi-Q—in 2013, Mylan began taking steps to block Auvi-Q from drug formularies. It did so by offering large rebates to the PBMs who controlled the formularies for third-party payors—30% or higher—and expressly conditioning those rebates on: (a) granting the EpiPen exclusive position on the formulary; and (b) removing (or severely restricting) access to Auvi-Q. Mylan also targeted another rival EAI device—Adrenaclick—with the exclusionary rebate program. Adrenaclick's market share has **[**23]** ranged from only 2% in 2013 to 8% in 2016. Mylan knew that Adrenaclick—as well as Auvi-Q—could not raise prices to inflate their margins sufficiently to offer rebates or discounts similar to those that Mylan was offering to PBMs. In 2014, CVS Caremark added Adrenaclick to its Formulary Drug Removals List, effectively removing a consumer or other end-payor's opportunity to purchase Adrenaclick as an alternative to the EpiPen.

The class plaintiffs allege that the Mylan Defendants' exclusionary rebate scheme deprives patients of a fair price for EAI devices—the price that would result from normal market forces. Instead of lowering its prices to gain market share, Mylan bargains for its market share by providing ever-larger rebates and other kickbacks to PBMs, conditioned on exclusive relationships with those PBMs. Mylan can position itself on the drug formularies by using its monopoly power to charge consumers higher prices for its product. It then can share these revenues with the PBMs (the ones who create the formularies) through substantially enhanced rebates conditioned on excluding insurance coverage for rival products. This conduct, in turn, inflates the prices that consumers pay **[**24]** for the

EpiPens so that Mylan can preserve its net realized price and sales volumes. The class plaintiffs contend that the net effect of this scheme harms both consumers and competitors alike.

The Mylan Defendants Entered into an Exclusive School Access Scheme

The class plaintiffs next assert that the Mylan Defendants leveraged the EpiPen's dominant market position to foreclose competition in an EAI submarket—*i.e.*, American public schools. They did so by offering to supply a portion of each school's need for EAI devices on a free or discounted basis but conditioning those discounts on the school entering an exclusive dealing contract. The Mylan Defendants created this important submarket by increasing federal lobbying efforts to gain access to parents, educators, and medical professionals in public schools. As part of the lobbying effort, Mylan spent a reported $4 million specifically lobbying to pass the *School Access to Emergency Epinephrine Act*. The law was enacted in 2013. It gives federal funding priority to schools who stockpile EAIs. Mylan's lobbying efforts proved enormously successful. Now, a majority of states permit their public schools to stockpile EAIs while eleven states **[**25]** *require* EAI stockpiling. Given the EpiPen's dominant market position, the Act not only **[*1279]** has provided EpiPen access to schools, but also it has mandated some schools to stockpile the product.

After securing the EAI stockpiling requirement, Mylan acted quickly to exclude competing EAIs from this valuable school submarket. As part of the Mylan Defendants' scheme, Mylan launched the "EpiPen4Schools" program. The program gives away free and discounted EpiPens to school districts—ones subject to the new law now requiring (or strongly encouraging) them to stockpile the devices. But Mylan conditioned the free and discounted EpiPens on the schools entering exclusive dealing agreements with Mylan. The purpose of these exclusive dealing agreements was to exclude competitors—like Auvi-Q and Adrenaclick—from the public school submarket. In the fall of 2016, the New York Attorney General and members of the United States Senate announced investigations into the anticompetitive terms of Mylan's EpiPen4Schools program. Later, Mylan eliminated the EpiPen4Schools program's exclusivity requirement.

Defendants, Working Together, Used the Judicial and Regulatory Processes to Protect their Monopoly

The Class **[**26]** Complaint next asserts that the Mylan and Pfizer Defendants worked "hand-inhand," using patent litigation and the Food and Drug Administration ("FDA") regulatory process to erect barriers to market entry and delay EAI competition. Class Compl. ¶ 314. The Pfizer Defendants own the patents protecting the EpiPen and serve as the contract supplier of the product. The Mylan Defendants own the trademarked brand names and control the worldwide marketing and sale of the product. Together, defendants have a unified interest in protecting the EpiPen monopoly. So, the class plaintiffs allege, defendants collaborated to enhance the EpiPen's sales volume and profitability, fend off competitors, and protect the EpiPen patents by using the judicial and regulatory process to restrain competition.

Defendants did so by adding several more patents to the already-patented EpiPen to prevent the launch of competing generics. Defendants have four patents on the EpiPen. According to the class plaintiffs, none of them are designed to enhance the product. Instead, the patents' purposes are to stop generic competitors. Indeed, Mylan CEO Heather Bresch announced during a public earnings call in 2009 that Mylan **[**27]** was adding another patent to the already-patented EpiPen device that "will also put in another barrier to entry because . . . now that market preferential would be the needle protected device and drug of which we have IP and stuff around. So I just think it is a very, very difficult hurdle to get through, and so feel confident that EpiPen is in good shape." Class Compl. ¶ 238. On September 14, 2010, Meridian secured U.S. Patent No. 7,794,432—less than three weeks before Intelliject (the inventor of Auvi-Q) submitted its New Drug Application ("NDA") to the FDA.

Defendants also worked together to stop generic competition to the EpiPen by filing patent infringement lawsuits. They filed such lawsuits against three generic EpiPen rivals—Sandoz, Teva, and Intelliject—and then entered into anticompetitive settlements with impending generic manufacturers.

Teva Settlement

In December 2008, Teva filed an Abbreviated New Drug Application ("ANDA") seeking FDA approval to market a generic EpiPen. In August 2009, Pfizer's subsidiaries—King and Meridian—sued Teva for infringing U.S. Patent No. 7,449,012 ("the Teva Litigation"). In November 2010, King and Meridian filed a First Amended Complaint that included a claim for infringing the newly secured **[**28]** '432 patent. Later, King **[*1280]** and Meridian dropped their claims based on infringing the '012 patent, leaving only the claims for infringing the '432 patent.

After discovery and a bench trial in March 2012, the parties settled the Teva Litigation on April 27, 2012. According to the class plaintiffs, defendants and Teva entered an unlawful settlement agreement that required Teva to delay launching its generic EAI for three years—until June 22, 2015—in exchange for defendants providing significant consideration, incentives, and benefits to Teva. The Class Complaint lists several facts about the Teva settlement that, the class plaintiffs contend, show defendants made a substantial "reverse payment" to Teva to convince it to delay bringing its competing product to market. These facts include:

- The court's Markman rulings interpreting the terms of the '432 patent were favorable to Teva.
- The parties settled the litigation after completing a full bench trial, meaning that the parties likely would incur marginal litigation expenses going forward, as compared to the expenses already incurred at settlement.

- No rational economic actor with a viable product (and who had spent millions of dollars developing it) would refrain from entering a lucrative **[**29]** market for 36 months unless it received monetary compensation in exchange for non-entry.
- In 2012, the Federal Trade Commission reported seeing "a record number of settlements involv[ing] potential pay-for-delay agreements," and that, in patent settlements involving a "first-filer" like Teva, the majority of the settlements involved explicit compensation in return for delayed entry (Class Compl. ¶¶ 267-68).
- On the same day of the Teva settlement, Mylan issued a joint press release announcing the settlement on its own behalf and for Pfizer.
- Four days after announcing the Teva settlement, Teva and Mylan settled another lawsuit where Teva had asserted patent infringement claims against Mylan based on Mylan's application to market a generic version of Teva's drug, Nuvigil. With the Nuvigil settlement, Mylan agreed to delay market entry until June 2016. Like the EpiPen, Nuvigil had annual sales hovering near $1 billion. So, procuring delayed entry of generics for both Nuvigil and the EpiPen was valuable to all parties involved.
- The Teva settlement has come under congressional scrutiny as a "pay-for-delay" agreement.

During the same time period, the Teva settlement also prevented competition **[**30]** from any other generic EAI device. Defendants knew that their agreement with Teva would delay market entry because Teva was subject to the *Hatch-Waxman Act*'s 180-day exclusivity award. This provision grants a six-month exclusivity period to the first generic to challenge a brand firm's patent, claiming it is invalid or not infringed. The exclusivity period begins when the first-filing generic enters the market. Here, Teva was the first filer. So, with Teva delaying its market entry under the parties' settlement, Teva's exclusivity period could not begin running until at least three years in the future. As a result, defendants delayed all generics seeking ANDA applications based on the EpiPen.

In a public earnings call, Mylan's CEO Heather Bresch described how the Teva settlement had delayed market competition. Also, she appeared to concede that Mylan had participated in the Teva settlement. In July 2012, she stated publicly: "So we certainly have seen a benefit [to growing the EpiPen market] and obviously, **[*1281]** now with the runway absolutely clear for us through 2015, through *our* settlement with Teva, I can assure you, we are going to continue as we see [the] response continue to invest **[**31]** in EpiPen as a franchise." Class Compl. ¶ 277 (emphasis added).

Intelliject Settlement

Defendants initiated another patent lawsuit against Intelliject—the inventor of Auvi-Q—when Intelliject sought FDA approval for its competing EAI. In 2009, Sanofi announced it had acquired the rights to Intelliject's EAI and that under its license, Sanofi would manufacture and commercialize the product while Intelliject would continue developing the product and work to secure regulatory approval. On January 11, 2011, defendants—through King—filed a patent infringement lawsuit against Intelliject seeking to block FDA approval of its NDA for its product—one that later became known as Auvi-Q. King's lawsuit alleged that Intelliject's EAI infringed the '432 patent—a patent that Meridian secured more than a year after Intelliject began developing its product and less than three weeks before Intelliject filed its NDA.

On August 1, 2011—less than eight months after King filed its lawsuit—the FDA announced that it was giving Intelliject's EAI tentative final approval, pending resolution of the patent litigation that King filed. Six months later, the parties announced that they had settled the Intelliject litigation. Again, **[**32]** Mylan announced the settlement jointly for itself and Pfizer. Although the parties did not make public the specific terms of the agreement, they announced that the agreement prevented Intelliject and Sanofi from launching their EAI product for another nine months—until November 15, 2012. Intelliject and Sanofi made the agreement not to enter the market until November 15, 2012, in exchange for valuable consideration. Through the Intelliject litigation, defendants effectively blocked competition from Intelliject's competing device for almost two years.

Sandoz Settlement

In 2010, another EAI competitor—Sandoz, Inc. ("Sandoz")—attempted to enter the EAI market by filing an ANDA for its own generic EpiPen alternative. Similar to the other lawsuits against Teva and Intelliject, defendants—through King—filed a patent infringement suit against Sandoz. According to the class plaintiffs, defendants' approach to Sandoz was to stall its ANDA by staying the action. The court administratively terminated the Sandoz litigation, giving the parties the ability to reopen the case by letter request. No party has reopened the case. So, to date, Sandoz's FDA approval and any definitive ruling on the EpiPen **[**33]** patents are stayed indefinitely. The class plaintiffs allege that defendants entered an agreement with Sandoz to stay the case in exchange for valuable consideration paid to Sandoz.

FDA Citizen Petition

The Class Complaint next alleges that, with Teva's generic EAI entry into the market looming, defendants took another step to block generic competition from the market by filing an FDA Citizen Petition. An FDA Citizen Petition provides the public with an avenue to present safety concerns to the FDA. But here, the class plaintiffs allege, defendants used the FDA Citizen Petition process to delay—further—Teva's entry into the market and to prevent Teva's product from competing with the EpiPen.

On January 16, 2015, Mylan filed a Citizen Petition "a mere six months before Teva was scheduled (pursuant to the settlement) to enter the market." Class Compl. ¶ 311. Antitrust scholar Michael Carrier of Rutgers Law School described Mylan's Petition in this fashion:

> **[*1282]** In its petition, Mylan contended that Teva should be required to demonstrate that its product was the "same as" Mylan's EpiPen. In other words, even though the parties had already agreed through settlement to delay Teva's generic entry **[**34]** for more than three years, Mylan sought to further delay the entry of Teva's generic through its citizen petition.
>
> In addition to its January 2015 petition, the company waited almost five months after filing and only weeks before the FDA was required to respond, until May 2015, to supplement its petition with a 48-page independent study purportedly showing that patients would not use Teva's generic product correctly.
>
> Given that Teva's generic product had been in development for at least six years before the petition's filing, this late-filing of a supplemental study implicates significant timing questions. Why would such a study be submitted only weeks before the FDA was required to respond under the FDA's 150-day clock?

Id. (quoting Michael A. Carrier & Daryl Wander, *Citizen Petitions: An Empirical Study*, *34 Cardozo L. Rev. 249, 279 (2012)*). According to the class plaintiffs, Mylan's submissions to the FDA rested on fundamentally flawed studies and the medical opinions of a doctor whom Mylan had paid some $95,000 in fees.

According to the class plaintiffs, without defendants' use of the FDA Citizen Petition process, Teva would have entered the market much sooner after addressing any FDA concerns and securing FDA approval. **[**35]** The class plaintiffs also assert that, from 2009 to present, defendants' actions deterred not only Teva, but also many more potential generics companies from developing and launching competing products.

Defendants Implement a Pricing Scheme

The Class Complaint next alleges that the Mylan Defendants implemented a pricing scheme that defrauded U.S. consumers into paying an inflated price for the EpiPen—one that climbed by more than 500%. The Mylan Defendants allegedly implemented this pricing scheme working alongside PBMs. Mylan is a generics company that typically makes low margins on drug sales. But the EpiPen—a specialty branded drug—represented a unique and highly profitable revenue stream for Mylan. Recognizing this opportunity, Mylan CEO Heather Bresch and other executives decided to exploit the EpiPen to generate billions of dollars in revenue for Mylan. According to the class plaintiffs, the Mylan Defendants and the PBMs distracted consumers and regulators from the reality that defendants were raising the price of the EpiPen from $100 to $600 by launching a campaign of false and misleading statements and actions.

One of the ways that the Mylan Defendants allegedly implemented their **[**36]** pricing scheme was changing the way Mylan sold the EpiPen. On August 24, 2011, Mylan announced that it no longer would sell individual EpiPens in the U.S. Instead, Mylan forced U.S. consumers to purchase EpiPens in pairs with the EpiPen 2-Pak. The class plaintiffs refer to this change as the "hard switch." And the class plaintiffs allege that the "hard switch" forced consumers and third-party payors to overpay for the EpiPen 2-Pak because the switch, in effect, doubled the EpiPen's price.

From 1987 to 2011, Mylan and others had sold the EpiPen one at a time in the U.S. without incident. Nothing changed in 2011 that required Mylan to sell the EpiPen as a 2-Pak. The EpiPen 2-Pak is just two individual EpiPens connected by a grey piece of plastic. The class plaintiffs **[*1283]** allege that no medical reason exists to force customers to purchase a 2-Pak instead of a single EpiPen. Instead, Mylan deceptively suggested that the 2-Pak was medically required even though EpiPens are sold individually in every other country besides the United States. Also, Mylan's packaging offers no medical instructions or guidelines for patients to know whether, or when, to administer the second back-up EpiPen.

Beginning **[**37]** in 2011, Mylan began raising the price of the EpiPen while forcing customers to buy EpiPens in the 2-Pak. In October 2011, Mylan increased the price of an EpiPen 2-Pak to $181. And by May 2016, the price of an EpiPen 2-Pak jumped to $608.

The Mylan Defendants Have Made Various Misrepresentations and Omissions in an Effort to Conceal Their Anticompetitive Conduct

Finally, the Class Complaint alleges that the Mylan Defendants have spread false and misleading information and omitted material information as part of their scheme to monopolize the EAI market. They spread, the Class Complaint alleges, four broad categories of false and misleading information.

First, the class plaintiffs allege, Mylan created and spread misinformation about a competing EAI device—Auvi-Q. Although the FDA had determined that the epinephrine in Auvi-Q is a bioequivalent to the epinephrine in the EpiPen, Mylan funded and promoted a study entitled, "Auvi-Q versus EpiPen Auto-Injectors: Failure to Demonstrate Bioequivalence of Epinephrine Delivery Based on Partial Area Under the Curve." Class Compl. ¶ 229. Mylan intended the study to undermine the FDA's conclusion that Auvi-Q had demonstrated bioequivalence to the **[**38]** epinephrine in the EpiPen—in direct contradiction to the FDA's conclusion.

The class plaintiffs also allege that Mylan made false and misleading statements about Auvi-Q's formulary status. According to the class plaintiffs, Mylan's anticompetitive conduct caused major health plans either to limit their coverage of Auvi-Q or to exclude Auvi-Q from coverage altogether. Mylan did so by paying formularies to exclude Auvi-Q from coverage. But then, Mylan marketed to physicians the fact that Auvi-Q was not covered by formularies and suggested that the decision to exclude Auvi-Q from coverage was based on clinical recommendations—and not Mylan's large, conditional rebate offers.

Second, the class plaintiffs allege that Mylan made false and misleading statements about the "hard switch" to the EpiPen 2-Pak. On August 24, 2011, Mylan issued a news release entitled "Dey Pharma to Offer EpiPen 2-Pak and EpiPen Jr 2-Pak Exclusively." Class Compl. ¶ 336. The press release's subheadline provided: "Decision aligns with recent clinical guidelines for patients at risk for or who have experienced anaphylaxis to have immediate access to two doses of epinephrine." *Id.* The Class Complaint alleges that the **[**39]** press release was fraudulent and misleading for several reasons. They include:

- The press release cited a National Institute of Allergy and Infectious Diseases ("NIAID") study that did not apply to the general population. Instead, it applied only to a narrow subset: allergy sufferers who had already (1) been hospitalized for (2) a food allergy.

- Mylan purported to rely on the World Allergy Organization ("WAO") global standard in making the switch, but Mylan did not require sale of the EpiPen 2-Pak globally. Indeed, the press release states that the single EpiPen Auto-Injector **[*1284]** package configuration will remain available outside of the U.S.
- The switch to the 2-Pak did not change patient access to two doses of epinephrine. Doctors could write, and often did write, prescriptions for two EpiPens. So, no need existed for Mylan to mandate something patients could purchase already.
- The medical guidelines recited did not state that providers must sell two doses of epinephrine. Instead, Mylan used the WAO's vague statement as a false pretext for selling only the 2-Pak.
- No mandates required Mylan to sell the EpiPen exclusively as a 2-Pak, or not at all.

- No medical studies support the decision **[**40]** to sell the EpiPen exclusively as a 2-Pak.
- From 1987 until 2011, the EpiPen was sold individually without incident. Nothing changed suddenly in 2011 that required Mylan to sell only the 2-Pak.
- When Mylan switched to the 2-Pak in 2011, it did not order a recall or insist that all U.S. EpiPen patients immediately go buy a second EpiPen.
- Although the press release relies on the WAO, the U.S. is the only country where Mylan required customers to purchase a 2-Pak of the EpiPen.

- According to a study conducted by the American Academy of Allergy, Asthma & Immunology, only a small number of patients require a second dose. The reason for selling the device solely in packs of two is to account for user error due to the imperfect product design, *i.e.*, 14% of parents accidently stick the needle in their own thumb instead of in their child's leg.
- Mylan offers no medical guidelines or instructions to EpiPen 2-Pak consumers in its packaging or on the device to explain how or when to use (or even how to store) the second EpiPen in the 2-Pak.

- Mylan states that between 1-20% of patients might need a second device. But, according to class plaintiffs, the margin of 1-20% is so wide that it is meaningless **[**41]** and provides a false justification for the "hard switch" to the 2-Pak.

Class Compl. ¶ 339. The class plaintiffs also allege that the NIAID panel Mylan relied on to justify the change to the 2-Pak was influenced and tainted by Mylan's financial contributions. The August 24, 2011, press release quotes Dr. Phillip Lieberman, a member of the NIAID panel, as stating that up to 20% of patients will require more than one dose of epinephrine to relieve symptoms. According to the class plaintiffs, Dr. Lieberman's statement does not explain why a 2-Pak is necessary for 100% of patients when only "up to 20%" require more than one dose. Also, his statement never explains why all patients must purchase two EpiPens instead of having a prescription that allows two doses. The class plaintiffs allege that Dr. Lieberman made his statement justifying the switch to the 2-Pak because Mylan paid him to do so.

Third, the class plaintiffs allege, Mylan made false statements about coupons, rebates, and generics. Mylan has stated publicly on its website and to the media throughout at least 2016 that 80% of consumers with insurance pay nothing for the EpiPen. According to the class plaintiffs, this statement is **[**42]** false because third-party payors end up paying the bulk of the cost for the EpiPen and, in turn, the third-party payors pass on the costs to patients with increased premiums. Mylan also announced **[*1285]** recently that it will begin offering a $300 generic version of the EpiPen. The class plaintiffs assert that Mylan's admission that it can make a $300 generic using the same factories and components used to make the $600 EpiPen shows that Mylan is price gouging consumers with its current list price for the EpiPen.

Finally, the Class Complaint alleges that Mylan made false statements to Congress under oath to help cover up its fraud and to deceive the public about the EpiPen price increases. The Class Complaint asserts that CEO Heather Bresch falsely testified to Congress on September 21, 2016, when she: (1) misrepresented Mylan's profit on the EpiPen as $50 per device, but, according to a *Wall Street Journal* article, Mylan's profits were 60% higher than that amount; (2) misrepresented that Mylan had invested more than $1 billion in the EpiPen when, in fact, Mylan acquired the EpiPen in 2007 without incurring any research and development expenses; (3) misrepresented that Mylan had provided free **[**43]** EpiPens to more than 66,000 U.S. schools with "no strings attached," but Mylan, in fact, did attach strings to the free EpiPens by requiring the schools to sign a contract agreeing not to purchase any products from Mylan's competitors for a twelve-month period; (4) misrepresented that Mylan had reduced U.S. healthcare costs by about $180 billion; and (5) mispresented that 85% of EpiPen patients pay less than $100 for a 2-Pak and a majority pay less than $50.

II. Legal Standard

HN2[] *Fed. R. Civ. P. 8(a)(2)* provides that a complaint must contain "a short and plain statement of the claim showing that the pleader is entitled to relief." Although this Rule "does not require 'detailed factual allegations,'" it demands more than "[a] pleading that offers 'labels and conclusions' or 'a formulaic recitation of the elements of a cause of action'" which, as the Supreme Court explained, "will not do." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))*.

When considering a motion to dismiss under *Federal Rule of Civil Procedure 12(b)(6)*, the court must assume that the factual allegations in the complaint are true. *Id.* (citing *Twombly, 550 U.S. at 555*). But the court is "'not bound to accept as true a legal conclusion couched as a factual allegation.'" *Id.* (quoting *Twombly, 550 U.S. at 555*). "'Threadbare recitals of the elements of a cause of action, supported **[**44]** by mere conclusory statements, do not suffice'" to state a claim for relief. *Bixler v. Foster, 596 F.3d 751, 756 (10th Cir. 2010)* (quoting *Iqbal, 556 U.S. at 678*). Also, the complaint's "[f]actual allegations must be enough to raise a right to relief above the speculative level." *Twombly, 550 U.S. at 555* (citations omitted).

HN3[] For a complaint to survive a motion to dismiss under *Rule 12(b)(6)*, the pleading "must contain sufficient factual matter, accepted as true, to 'state a claim for relief that is plausible on its face.'" *Iqbal, 556 U.S. at 679* (quoting *Twombly, 550 U.S. at 570*). "A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Id. at 678* (citing *Twombly, 550 U.S. at 556*). "The plausibility standard is not akin to a 'probability requirement,' but it asks for more than a sheer possibility that a defendant has acted unlawfully." *Id.* (quoting *Twombly, 550 U.S. at 556*); *see also* *Christy Sports, LLC v. Deer Valley Resort Co., Ltd., 555 F.3d 1188, 1192 (10th Cir. 2009)* **[*1286]** ("The question is whether, if the allegations are true, it is plausible and not merely possible that the plaintiff is entitled to relief under the relevant law." (citation omitted)).

HN4[] In the antitrust context, the Supreme Court observed in *Twombly* that "proceeding to antitrust discovery can be expensive." *Twombly, 550 U.S. at 558* (applying the plausibility pleading standard to Sherman Act claims).

So, courts must **[**45]** "'insist upon some specificity in pleading before allowing a potentially massive factual controversy to proceed.'" *Id.* (quoting *Associated Gen. Contractors of Cal., Inc. v. Cal. State Council of Carpenters, 459 U.S. 519, 528 n.17, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983))*. But still, antitrust cases are not subject to a standard requiring "heightened fact pleading of specifics." *Id. at 570*. Instead, an antitrust Complaint must allege "only enough facts to state a claim to relief that is plausible on its face" sufficient to "nudge[ ] the[ ] claims across the line from conceivable to plausible." *Id.; see also In re Urethane Antitrust Litig., 663 F. Supp. 2d 1067, 1074 (D. Kan. 2009)* (explaining on a *Rule 12(b)(6)* motion to dismiss antitrust claims that "the Court must ensure that plaintiffs have alleged facts to support those elements sufficient to provide the 'heft' to show an entitlement to relief and to 'nudge' plaintiffs' claims over the line from mere[ ] possibility or speculation to plausibility" (quoting *Twombly, 550 U.S. at 557, 570))*.

The court's analysis, below, applies this governing standard to defendants' *Rule 12(b)(6)* dismissal arguments.

III. Analysis

The Class Complaint asserts nine claims against the Mylan Defendants: (1) *Sherman Act §§ 1* and *2* violations (Count I); (2) *Clayton Act § 3* violations (Count II); (3) conspiracy violating state antitrust statutes (Count III); (4) monopolization violating state antitrust statutes (Count IV); (5) attempted monopolization **[**46]** violating state antitrust statutes (Count V); (6) tying violating state antitrust statutes (Count VI); (7) RICO Act violations (Count VII); (8) violation of state consumer protection laws (Count VIII); and (9) unjust enrichment (Count IX). The Class Complaint asserts just Counts I-V and VII jointly against the Mylan and Pfizer Defendants.

Both the Mylan and Pfizer Defendants move the court to dismiss each claim asserted in the Class Complaint. The court addresses each of defendants' arguments in the subsections, below. The first section addresses whether the Class Complaint states plausible claims of federal and state antitrust violations. The second section discusses whether the class plaintiffs have alleged viable RICO claims. The third section addresses whether the Class Complaint states plausible claims for relief under state consumer protection laws. Finally, the fourth section considers whether the class plaintiffs have stated a claim for unjust enrichment.

A. Antitrust Claims

Defendants assert eight different arguments why the class plaintiffs' factual allegations never state a plausible antitrust claim under either federal or state law. The court addresses each one of the eight **[**47]** arguments, in turn, below.

1. Have the class plaintiffs alleged a plausible tying claim based on the EpiPen 2-Pak?

The Mylan Defendants[3] argue that the Class Complaint fails to allege a plausible **[*1287]** tying claim because it never alleges the existence of two distinct products. Instead, the Mylan Defendants contend, the class plaintiffs premise their tying claim on the EpiPen 2-Pak, *i.e.* selling two EpiPen devices in one package. Defendants assert that this practice—because it involves selling two identical products—is not an unlawful tying arrangement.

HN5[] Tying is an arrangement involving the sale of "two distinct products or services as a package." *Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 33, 104 S. Ct. 1551, 80 L. Ed. 2d 2 (1984)* (Brennan, J., concurring), *abrogated on other grounds by Ill. Tool Works Inc. v. Indep. Ink, Inc., 547 U.S. 28, 126 S. Ct. 1281, 164 L. Ed. 2d 26 (2006)* (further citation omitted). "[T]he essential characteristic of an invalid tying arrangement lies in the seller's exploitation of its control over the tying product to force the buyer into the purchase of a tied product that the buyer either did not want at all, or might have preferred to purchase elsewhere on different terms." *Id. at 12*. But "a tying

[3] The class plaintiffs assert their tying claim just against the Mylan Defendants—not the Pfizer Defendants.

arrangement cannot exist unless two separate product markets have been linked." *Id. at 21*. And "the question whether one or two products are involved turns not **[**48]** on the functional relation between them, but rather on the character of the demand for the two items." *Id. at 19*; *see also* *Eastman Kodak Co. v. Image Tech. Servs., Inc., 504 U.S. 451, 456, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)* ("[T]o be considered two distinct products, there must be sufficient consumer demand so that it is efficient for a firm to provide [one] separately from [the other].").

The class plaintiffs respond that they have alleged a tying arrangement involving two separate product markets—one for the primary EAI device, and the other for a "spare" (or "backup") EAI device. Class Compl. ¶¶ 575-79. The Class Complaint describes how Mylan and others sold the EpiPen individually in the U.S. from 1987 to 2011 without incident. But, in 2011, Mylan imposed the "hard switch," requiring patients to purchase EpiPens in pairs in the EpiPen 2-Pak. The class plaintiffs allege that, before the "hard switch," "[t]here was sufficient independent demand for some patients to either not purchase a second EpiPen at all or to purchase an EpiPen and a cheaper, alternative back-up." *Id.* ¶ 577. But, after the hard switch, Mylan forced patients to buy two separate devices—the primary EAI device and back-up EAI device—even though "each EpiPen expires annually and the vast majority of EpiPens expire before **[**49]** they can be used." *Id.* ¶ 577. As the Class Complaint describes: "Consumers no longer had the choice or ability to purchase a back-up or spare device from another manufacturer, or to decline to purchase a second EpiPen based on whether they needed it, chose to purchase it, or were prescribed it by a doctor." *Id.* ¶ 579.

Viewing these allegations in the class plaintiffs' favor, the Class Complaint alleges a "sufficient consumer demand" in the U.S. to purchase a primary EAI device separately from a back-up device or none at all "so that it is efficient for a firm to provide [one] separately from [the other]." *Eastman Kodak Co., 504 U.S. at 456*; *see also* *Multi-State Legal Studies, Inc. v. Harcourt Brace Jovanovich Legal & Prof'l Pubs., Inc., 63 F.3d 1540, 1547-48 (10th Cir. 1995)* (holding that the case's summary judgment facts presented a factual dispute whether "enough consumer demand [existed] in Colorado" for one product such that it was efficient to sell the two products separately).

The court recognizes that the class plaintiffs have alleged a tying relationship based on two products that are functionally identical. The Mylan Defendants assert **[*1288]** that the two products thus are interchangeable. For example, a patient could use either one of the two EpiPens in a 2-Pak as the primary device and the other one as the back-up device. The Mylan Defendants **[**50]** thus argue that it is not plausible that the primary EAI device and backup EAI device belong to separate markets. ***HN6***[🡅] Indeed, the Tenth Circuit has defined the "relevant product market in any given case" as one "'composed of products that have reasonable *interchangeability* for the purposes for which they are produced—price, use and qualities considered.'" *Buccaneer Energy (USA) Inc. v. Gunnison Energy Corp., 846 F.3d 1297, 1313 (10th Cir. 2017)* (quoting *SCFC ILC, Inc. v. Visa USA, Inc., 36 F.3d 958, 966 (10th Cir. 1994))* (emphasis added). Although the two products here have the same qualities, the Class Complaint defines how patients *use* them in a functional sense as two separate products. A patient uses one EpiPen as the primary EAI device and the other as the back-up device.

The parties do not cite, and the court's research has not revealed, any tying cases involving identical products with different and distinct uses—what the class plaintiffs allege here. The Mylan Defendants cite two cases where courts refused to find two separate products to support a tying claim, but those cases involved preliminary injunction motions where the factual record failed to demonstrate the existence of two separate product markets. *See* *Metromedia Broad. Corp. v. MGM/UA Entm't Co., 611 F. Supp. 415, 422-24 (C.D. Cal. 1985)* (recognizing that questions existed whether "the demand for first runs [of TV series] is separate from that for reruns," but **[**51]** refusing to "carve up" a copyright for the purposes of licensing "a single intellectual property" because both the first runs and reruns shared the "same copyright and uniqueness," which "was the product from which market power derives"); *Paul v. Pulitzer Publ'g Co., No 74-327C(A), 1974 U.S. Dist. LEXIS 8362, 1974 WL 887, at *5 (E.D. Mo. May 24, 1974)* (holding that "different issues of the same newspaper are not separate products" but never discussing whether consumer demand existed for selling weekday editions separately from the Saturday edition).

In contrast here, the Class Complaint asserts facts that plausibly allege two separate product markets—one for EAI primary devices and the other for back-up devices. These allegations are sufficient to state a claim at this stage of the litigation. Ultimately, to prevail on their tying claim, the class plaintiffs must adduce admissible evidence to support a reasonable finding that two separate product markets exist. But, to survive the Motions to Dismiss, plaintiffs need only make plausible factual allegations of two different product markets. They have satisfied that requirement.

2. Have the class plaintiffs alleged plausible exclusive dealing claims based on Mylan's exclusive dealing contracts with PBMs and schools [52]** ?

The Mylan Defendants assert that the class plaintiffs have failed to allege plausible antitrust claims based on Mylan's exclusive dealing contracts with PBMs and schools. Defendants offer five arguments to support their assertion.

First, the Mylan Defendants argue, the Class Complaint never alleges that Mylan's rebates and discount offers resulted in EpiPen prices below the cost of their production. Six days after the Mylan Defendants filed their Motions to Dismiss the Class Complaint, the court issued a Memorandum and Order in the other of the two separate tracks in this MDL—the Sanofi track. The court's Order granted Mylan's Motion to Dismiss the *Sanofi* Complaint in part, and denied that motion in part ("the *Sanofi* Order"). Doc. 98. In the *Sanofi* Order, the court rejected the same argument asserted here—*i.e.*, that Sanofi's exclusive dealing claims fail as a matter of **[*1289]** law because the *Sanofi* Complaint never alleges that Mylan's rebate offers resulted in prices that were below its costs to produce the EpiPen. *See* *id. at 10-15*. The court recognized that the price-cost test does not apply to bar exclusive dealing claims when price itself is not the clearly predominant mechanism of exclusion. *Id. at 12-13* (citing **[**53]** *ZF Meritor, LLC v. Eaton Corp., 696 F.3d 254, 277 (3d Cir. 2012)* (further citations omitted)). And, viewing the allegations in Sanofi's favor, the court concluded that the *Sanofi* Complaint "does not rely 'solely on the exclusionary effect of [Mylan's] prices' to support its exclusive dealing claim based on Mylan's rebate program." *Id. at 13* (quoting *ZF Meritor, 696 F.3d at 277*).

The same is true of the Class Complaint.[4] The Class Complaint alleges that Mylan leveraged its greater-than-90% market share by offering large rebates to PBMs to exclude Auvi-Q from the formularies. Class Compl. ¶ 177. The Class Complaint asserts that no legitimate business reason existed for Mylan's deep conditional rebates except blocking Auvi-Q from the market. *Id.* ¶ 178. Also, it asserts that Mylan's rebates effectively prevented competitors from accessing formularies of the two largest PBMs—Express Scripts and CVS Caremark—that combine to cover more than 50% of the PBM market in the United States. *Id.* ¶¶ 162, 168. The Class Complaint alleges that Mylan's conditional rebates unlawfully increased Sanofi's cost to enter the market if it wanted to match Mylan's rebates. *Id.* ¶ 182. And, the Class Complaint alleges, after Mylan successfully excluded Auvi-Q from coverage, it sent misleading marketing materials **[**54]** to physicians asserting that EpiPen was the "preferred" EAI device for 99% of patients while Auvi-Q was "preferred" for only 2% of patients. According to the class plaintiffs, the marketing materials suggested that the reason for Auvi-Q's exclusion was based on clinical recommendations—and not the large, conditional rebate offers. *Id.* ¶¶ 232-35. These allegations assert that Mylan's rebate program involved anticompetitive conduct—beyond pricing itself—that was designed to exclude competition in the EAI drug market.

Second, the Mylan Defendants contend that the Class Complaint never alleges that Mylan's rebates harmed the class plaintiffs by excluding Auvi-Q from the market because Sanofi's decision not to compete with the EpiPen was based on other factors, all unrelated to Mylan's conduct. The Mylan Defendants cite a paragraph from the *Sanofi* Complaint asserting that Sanofi voluntarily recalled Auvi-Q in October 2015 following reports of manufacturing issues. Doc. 95 at 44. But, as the court concluded in the *Sanofi* Order, the *Sanofi* Complaint plausibly alleges that Mylan's conduct forced Sanofi to exit the EAI drug market. Doc. 98 at 40. The Class Complaint contains similar **[**55]** allegations. As the court already has held, Mylan's arguments that the voluntary recall—and not Mylan's alleged anticompetitive conduct—caused Sanofi's injuries present a factual dispute that the court cannot resolve on a motion to dismiss. *Id.* For the same reasons as the *Sanofi* Order discussed, the court declines to

---

[4] Mylan's Reply—filed after the court issued its *Sanofi* Order—concedes that the *Sanofi* Order decided against this argument and states that Mylan is not relitigating the issue. Doc. 219 at 18 n.5. But Mylan's Reply incorporates the arguments made in its opening brief and preserves the issue for further review. *Id.*

dismiss the class plaintiffs' exclusive dealing claims based on Mylan's argument that Sanofi's decision to exit the EAI market was based on factors other than Mylan's anticompetitive conduct.

[*1290] *Third*, the Mylan Defendants assert that the Class Complaint never alleges that Mylan's exclusive dealing contracts harmed competition. The court rejected this same argument in the *Sanofi* Order. It rejects it again here for the same reasons. The Class Complaint, construed in favor of the class plaintiffs, plausibly alleges that Mylan's anticompetitive conduct harmed competition. The Class Complaint alleges that defendants implemented a pricing scheme that raised the price of the EpiPen from a little over $100 for two EpiPens in 2007 to more than $600 for the same two EpiPens in 2016. Class Compl. ¶¶ 349-60. According to the class plaintiffs, the price increases allowed Mylan to share **[**56]** its monopoly profits with PBMs through larger rebates for excluding competing products. *Id.* ¶¶ 165-66. Mylan's exclusionary contracts then prevented consumers in a substantial share of the market from accessing or choosing competing EAI devices such as the Auvi-Q and others. *Id.* at ¶¶ 168, 491. These allegations, if true, are capable of supporting a finding or inference of harm to competition, and thus, they state a plausible antitrust claim.

Fourth, the Mylan Defendants assert that the class plaintiffs' claims based on discounts or rebates Mylan offered to states or state agencies are barred by the *Noerr-Pennington* doctrine. ***HN7***[] The *Noerr-Pennington* doctrine "'exempts from antitrust liability any legitimate use of the political process by private individuals, even if their intent is to eliminate competition.'" *Tal v. Hogan, 453 F.3d 1244, 1257 n.13, 1259-60 (10th Cir. 2006)* (quoting *Zimomra v. Alamo Rent-A-Car, Inc., 111 F.3d 1495, 1503 (10th Cir. 1997))*. The scope of the *Noerr-Pennington* doctrine depends "on the source, context, and nature of the anticompetitive restraint at issue." *Allied Tube & Conduit Corp. v. Indian Head, Inc., 486 U.S. 492, 499, 108 S. Ct. 1931, 100 L. Ed. 2d 497 (1988)*.

But "*Noerr-Pennington* immunity does not apply if the purported effort to influence or obtain government action is in fact only an attempt to interfere with the business relationships of a competitor." *Classic Commc'ns, Inc. v. Rural Tel. Serv. Co., 956 F. Supp. 910, 917 (D. Kan. 1997)* (first citing *E. R.R. Presidents Conference v. Noerr Motor Freight, Inc., 365 U.S. 127, 144, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961)*; then citing *Cal. Motor Transp. Co. v. Trucking Unlimited, 404 U.S. 508, 511, 92 S. Ct. 609, 30 L. Ed. 2d 642 (1972))*. "This **[**57]** is the so-called 'sham' exception to the *Noerr-Pennington* doctrine." *Id.* The sham exception applies "when 'persons use the governmental *process*—as opposed to the *outcome* of that process—as an anticompetitive weapon.'" *GF Gaming Corp. v. City of Black Hawk, 405 F.3d 876, 884 (10th Cir. 2005)* (quoting *City of Columbia v. Omni Outdoor Advert., Inc., 499 U.S. 365, 380, 111 S. Ct. 1344, 113 L. Ed. 2d 382 (1991))*. "The exception thus 'involves a defendant whose activities are not genuinely aimed at procuring favorable government action at all,' such as a defendant who files 'frivolous objections to the license application of a competitor, with no expectation of achieving denial of the license but simply in order to impose expense and delay.'" *Id.* (quoting *City of Columbia, 499 U.S. at 380*).

In the *Sanofi* Order, the court held that the *Noerr-Pennington* doctrine barred Sanofi's exclusive dealing claims based on Mylan's discounts or rebates to state-based Medicaid agencies. Doc. 98 at 22-24. The court reasoned that Sanofi's allegations accused Mylan of using the *outcome* of the government process—*i.e.*, exclusion of Auvi-Q from the drug formularies—*not the process itself*, to harm a competitor. *Id. at 22*. Thus, the court concluded, *Noerr-Pennington* immunity applied to Sanofi's claims based on discounts or rebates offered to state-based Medicaid agencies. *Id.*

[*1291] The class plaintiffs argue the court should reach a different **[**58]** result here because, they contend, the Class Complaint's allegations differ from Sanofi's. First, the class plaintiffs contend that their antitrust claims are premised on Mylan's misclassification of the EpiPen and that this misclassification influenced decisions by state-based Medicaid agencies to exclude Auvi-Q. The Class Complaint alleges that Mylan's misclassification of the EpiPen allowed it to "amass millions of dollars each year in unpaid rebates to cash-strapped state Medicaid agencies." Class Compl. ¶ 187. And, according to the Class Complaint, these "outstanding underpaid rebates led benefit managers to continue favoring the EpiPen over competitors in the expectation of receiving a large make-up payment if and when Mylan was forced to classify the EpiPen as a brand." *Id.* ¶ 188. The class plaintiffs assert that the *Noerr-Pennington* doctrine does not shield Mylan's misrepresentations about the EpiPen's classification from antitrust liability because "[m]isrepresentations, condoned in the political arena, are not immunized when used in the adjudicatory process." *Cal. Motor Transp., 404 U.S. at 513*.

The court disagrees that the class plaintiffs' allegation about the EpiPen's misclassification—in this one paragraph **[**59]** of their 1,429 paragraph Class Complaint—places the claim outside of *Noerr-Pennington* immunity. ***HN8***[] Indeed, "[n]ot every fraudulent misrepresentation during an adjudicative or administrative proceeding can give rise to antitrust liability." *Mercatus Grp., LLC v. Lake Forest Hosp., 641 F.3d 834, 843 (7th Cir. 2011)*. "[A] misrepresentation renders an adjudicative proceeding a sham only if the misrepresentation (1) was intentionally made, with knowledge of its falsity; and (2) was material, in the sense that it actually altered the outcome of the proceeding." *Id. at 843*; *see also* *Cheminor Drugs, Ltd. v. Ethyl Corp., 168 F.3d 119, 123 (3d Cir. 1999)* ("While we do not condone misrepresentations in a judicial setting, neither will we deprive litigants of immunity derived from the *First Amendment's* right to petition the government if the alleged misrepresentations do not affect the core of the litigant's . . . case.").

Here, the class plaintiffs' allegation never asserts explicitly that the misclassification caused any state-based Medicaid agencies to exclude EpiPen rivals from the formularies. Instead, the allegation refers generally to "benefit managers." And it recites that these benefit managers continued to "favor" the EpiPen over competitors. Also, the allegation asserts that the benefit managers knew about the misclassification and thus anticipated a large **[**60]** make-up payment when Mylan was forced to reclassify the EpiPen. Thus, according to the allegation, the benefit managers never made their decisions based on any false representations that Mylan made to them. To the contrary, the allegation asserts that the benefit managers understood that Mylan had misclassified the EpiPen. So, nothing about the misclassification affected the decision-making abilities of benefit managers when they chose which EAI devices to include in the formularies. Construed in the class plaintiffs' favor, the exclusive dealing allegations based on Mylan's discounts or rebates to state-based Medicaid agencies assert that Mylan's conduct violated the antitrust laws by offering the rebates in exchange for exclusivity. The *Noerr*-*Pennington* doctrine precludes liability for this type of conduct, even if the intent was to exclude competition. Thus, the Class Complaint fails to allege a plausible antitrust claim based on Mylan's discounts or rebates to state-based Medicaid agencies.

[*1292] *Finally*, the Mylan Defendants argue that the Class Complaint never alleges that Mylan's EpiPen4Schools program foreclosed competitors from a substantial share of the relevant market.[5] ***HN9***[] To assert **[**61]** a plausible exclusive dealing claim, a plaintiff must plead facts capable of supporting a finding or inference that the "probable effect" of "performance of the contract will foreclose competition in a substantial share of the line of commerce affected." *Tampa Elec. Co. v. Nashville Coal Co., 365 U.S. 320, 327, 81 S. Ct. 623, 5 L. Ed. 2d 580 (1961)*; *see also* *Perington Wholesale, Inc. v. Burger King Corp., 631 F.2d 1369, 1374 (10th Cir. 1979)* ("Thus, a complaining trader must allege and prove that a particular arrangement unreasonably restricts the opportunities of the seller's competitors to market their product.").

HN10[] The Supreme Court has instructed lower courts "[t]o determine substantiality in a given case" by "weigh[ing] the probable effect of the contract on the relevant area of effective competition, taking into account the relative strength of the parties, the proportionate volume of commerce involved in relation to the total volume of commerce in the relevant market area, and the probable immediate and future effects which pre-emption of that share of the market might have on effective competition therein." *Tampa Elec., 365 U.S. at 329*. When considering whether the contract at issue in *Tampa Electric* tended to foreclose a substantial volume of competition, the Supreme Court considered several things. *Id. at 334-35*. They include the relative dominance of a seller's **[**62]** position in the market, whether the market has "myriad outlets with substantial sales volume," the prevalence in the

[5] The Mylan Defendants also assert that "[a]t best, Plaintiffs allege that Mylan engaged in legitimate state and federal lobbying efforts to allow schools to participate in the program" and that the *Noerr-Pennington* doctrine shields such conduct from antitrust liability. Doc. 95 at 46. But the class plaintiffs do not base their antitrust claims on Mylan's lobbying activities. Instead, the claims are premised on Mylan's alleged anticompetitive conduct in offering free and discounted EpiPens to school districts but making those offers contingent on the school districts entering into illegal exclusive dealing agreements with Mylan. The Mylan Defendants never argue that the *Noerr-Pennington* doctrine immunizes that alleged anticompetitive conduct—*i.e.*, the conduct on which the class plaintiffs base their antitrust claims for the EpiPen4Schools program.

industry of exclusive contracts, the duration of the contract, and the existence of any pro-competitive justifications for the contract. *Id.*

The class plaintiffs assert that the Class Complaint plausibly alleges facts capable of supporting a finding or inference of substantial market foreclosure. The Class Complaint alleges that Mylan's exclusionary contracts with PBMs prevented competitors from accessing formularies covering more than 50% of the PBM market in the U.S. Also, the Class Complaint alleges that Mylan created a substantial, additional need for EpiPens by adding school districts to the market for EAI devices. Class Compl. ¶ 208. More than 67,000 school districts now purchase EpiPens, and the districts usually are "bulk" purchasers. *Id.* For example, the public schools in Fairfax County, Virginia, order about 1,100 EpiPen 2-Paks annually to have them on hand for their 180,000 students. *Id.* The Class Complaint also alleges that Mylan gained another advantage by opening up the school market—gaining access to nursing staff and creating familiarity with the EpiPen **[**63]** among parents. *Id.* ¶ 209.

Although these allegations never assert definitively that the EpiPen4Schools program's exclusionary contracts foreclosed a substantial share of the market, the court declines to conclude at the motion to dismiss **[*1293]** stage that these facts fail to plead adequate foreclosure. Indeed, our court has recognized that *Tampa Electric* provides a "number of other factors which may be relevant to a rule of reason analysis in an exclusive dealing claim," and thus it has refused to "decide at the pleading stage that plaintiff had failed to plead adequate foreclosure levels" to state an exclusive dealing claim. *Suture Express, Inc. v. Cardinal Health 200, LLC, 963 F. Supp. 2d 1212, 1229 (D. Kan. 2013)* (Rogers, J.). The court comes to the same conclusion here. To determine whether the EpiPen4Schools program's exclusionary contracts foreclosed a substantial share of the market, the court must weigh the various factors outlined in *Tampa Electric*. The court cannot engage in such an analysis at the pleading stage. Instead, the court considers the Class Complaint's allegations in the light most favorable to the class plaintiffs. And it concludes that the class plaintiffs plausibly have alleged facts supporting a finding or inference that the probable effect of Mylan's exclusionary **[**64]** contracts in the EpiPen4Schools program substantially foreclosed competition. The court thus concludes that the class plaintiffs have stated a plausible exclusive dealing claim based on Mylan's EpiPen4Schools program.

3. Have the class plaintiffs alleged causation to support their antitrust claims based on the patent litigation settlements?

Next, defendants argue that the class plaintiffs lack standing to assert their antitrust claims based on the patent litigation settlements with potential competitors. This argument asserts that the class plaintiffs have alleged no facts capable of supporting a finding or inference of causation. ***HN11***[] To establish antitrust standing, a plaintiff must allege "(1) an 'antitrust injury'; and (2) a direct causal connection between that injury and a defendant's violation of the antitrust laws." *Tal v. Hogan, 453 F.3d 1244, 1253 (10th Cir. 2006)* (citations and internal quotation marks omitted); *see also* Sharp v. United Airlines, Inc., 967 F.2d 404, 406 (10th Cir. 1992) (explaining that antitrust standing requires "the causal connection between the antitrust violation and the plaintiff's injury").

Defendants contend that the class plaintiffs have not alleged plausibly that they caused any delay in the sale of potential competitors' EAI devices by initiating the patent lawsuits **[**65]** and entering into settlement agreements with potential competitors.[6] Instead, defendants provide two reasons—unrelated to the patent litigation and settlements—that prevented potential competitors Teva, Intelliject, and Sandoz from entering the EAI market. First, defendants assert, Teva and Sandoz never entered the market because they never secured FDA approval for their

[6] The Mylan Defendants also argue that the Class Complaint never alleges that Mylan was a party to or participated in the patent litigation with Teva, Intelliject, or Sandoz. Thus, the Mylan Defendants argue, the Class Complaint fails to state a claim against them based on the patent litigation and settlements. As explained in the following subsection (*see infra* Part III.A.4.), the court concludes that plaintiffs have alleged a plausible conspiracy between Mylan and Pfizer that included their coordinated scheme to initiate patent litigation against potential competitors in the EAI market, and then, to settle those lawsuits by agreeing to pay those potential competitors to postpone entry into the market. The court thus rejects the Mylan Defendants' argument that the Class Complaint never alleges that they participated in the patent litigation and settlements.

EAI devices. Second, defendants contend, these potential competitors could not enter the market lawfully without infringing Pfizer's EpiPen device patents—ones that don't expire until 2025. The class plaintiffs respond, asserting that both arguments require **[*1294]** the court to make factual determinations—something it cannot do on a motion to dismiss. Instead, the class plaintiffs argue, the Class Complaint alleges facts from which one could infer plausibly that defendants' conduct prevented potential competitors from entering the EAI market. The court agrees with them, for reasons explained below.

In response to defendants' first argument, the class plaintiffs concede that the Class Complaint recites that Teva and Sandoz never secured FDA approval for their competing EAI devices. Class Compl. ¶¶ 302, 319. But it also **[**66]** alleges that Teva and Sandoz were anticipating imminent launches into the EAI market and taking the steps to gain FDA approval of their generic, competing products so that they could enter the market. *See id.* ¶¶ 251-52 (reciting that defendants' alleged "pay-for-delay" settlements were designed "to stop Teva's imminent generic competition" after Teva had filed an ANDA in December 2008 seeking approval to market a generic EpiPen); *see also id*. ¶ 302 (reciting that "[i]n 2010, Sandoz . . . made a similar attempt to enter the market through a generic alternative to EpiPen" by filing an ANDA). And, the Class Complaint alleges, defendants' unlawful conduct—*i.e.*, filing the lawsuits and entering into reverse payment settlements for purposes of delaying these potential competitors' entry into the market—caused Teva and Sandoz's failure to secure FDA approval.

Indeed, the Class Complaint recognizes that the "FDA ultimately rejected Teva's generic product when it was under review." *Id.* ¶ 319. But it also alleges that "it is likely that Teva may have been able to fix those problems if the patent lawsuit had not delayed its ability to enter the market." *Id.* (citation and internal quotation marks **[**67]** omitted). The Class Complaint also alleges: "But for Mylan's anti-competitive assault campaign, Teva would have entered the market much sooner and fixed the deficiencies that led to the FDA's rejection of Teva's generic." *Id.* ¶ 322. And it contends: "By sidelining Teva from 2012 to 2015, Mylan, King, and Meridian disrupted Teva's trajectory toward FDA approval and also gained a three-year guaranteed monopoly period in which Mylan could raise prices on consumers without any fear of generic competition from Teva." *Id.*

Also, the Class Complaint alleges that Sandoz never secured FDA approval because defendants' litigation has resulted in "the court entering an order staying the FDA process and administratively terminating the action, to be reopened upon letter request by any of the parties." *Id.* ¶ 302. And, to date, "[n]o party has reopened the case." *Id.*

The class plaintiffs argue that these allegations plausibly assert causation because the delay for potential competitors entering the market "was a foreseeable consequence of the original antitrust violation." *In re Flonase Antitrust Litig., 798 F. Supp. 2d 619, 630 (E.D. Pa. 2011)*; *see also* *id. at 629-33* (denying summary judgment against antitrust claims because, among other things, plaintiffs presented sufficient evidence **[**68]** to raise genuine issues of material fact whether the FDA's deficiency notices sent to a potential competing generic "was indeed proximately caused by, or was the foreseeable consequences of, [defendant's] alleged antitrust violations"). The court agrees with this argument. Viewing the allegations in the class plaintiffs' favor, the Class Complaint asserts that defendants' alleged unlawful reverse payment settlements caused both the potential competitors' delay in entering the EAI device market and their delay in securing FDA approval.

Defendants cite several cases where district courts have dismissed antitrust claims **[*1295]** based on reverse payment settlements for lack of causation because, those courts held, the absence of FDA approval had caused the generic's delay in entering the market—not defendants' alleged conduct. Defendants urge the court to apply the same reasoning here. But these cases differ from this one because the complaints in those cases never alleged that defendants had *caused* the delay to secure FDA approval. *See, e.g.,* *In re Asacol Antitrust Litig., No. 15-cv-12730-DJC, 2016 U.S. Dist. LEXIS 94605, 2016 WL 4083333, at *7 (D. Mass. July 20, 2016)* (dismissing antitrust claim based on alleged reverse payment settlements because "the amended complaint contains **[**69]** no plausible allegation that [defendants] sought to delay or sabotage FDA approval" and, instead, "the lack of FDA approval today remains 'the limiting factor' in [the generic's] ability to bring its generic drug to market"); *In re Solodyn (Minocycline Hydrochloride) Antitrust Litig., No. 14-md-02503-DJC, 2015 U.S. Dist. LEXIS 125999, 2015 WL 5458570, at *9 (D. Mass. Aug. 16, 2015)* (holding that plaintiffs' allegations that a reverse payment settlement delayed entry of a competing product never asserted a "plausible allegation of delay by defendants" because the competing product never received FDA approval to launch its product before the parties' agreed entry date under the settlement); *Brotech Corp. v. White Eagle Int'l Tech. Grp., Inc., No. Civ.A.03-232, 2004 U.S. Dist. LEXIS 11552, 2004 WL 1427136, at *6 (E.D. Pa. June 21, 2004)* (holding that a counterclaim alleged no antitrust injury when it "[did] not allege facts establishing [a competitor's] intent and preparedness to enter the market for its [competing] product, that it would be prepared to enter the market for said product in the absence of the instant lawsuit, or that FDA approval of said products is probable). The facts alleged here differ. The class plaintiffs have alleged that defendants' reverse payment settlements delayed competing products—not only from entering the market but from securing FDA approval. *See* Class Compl. ¶¶ 302, 319, 322. **[**70]** These allegations suffice to state a claim for relief at the pleading stage.

In response to defendants' second argument—that a generic competitor could not enter the market lawfully without infringing Pfizer's patents—the class plaintiffs assert the Class Complaint plausibly alleges that Pfizer's patent rights were not sufficient to preclude generic competition (even though the patents did not expire until 2025). The class plaintiffs contend that, without defendants' alleged unlawful settlements, defendants faced a high probability of generic competition because it was likely that the courts would find the patents invalid or conclude that the generic competing devices were non-infringing. Indeed, the Class Complaint alleges that "given the trial court's previous rulings [in the Teva Litigation] it requires no great leap to infer that, had the parties waited for a decision, the '432 patent would have been found invalid." *Id.* ¶ 284. It goes on to allege: "That, in turn, would have removed the most significant barrier to entry for Teva—or any other putative generic manufacturer, making it more likely that at least one would have entered or attempted to enter the market." *Id.* The Class Complaint also **[**71]** alleges facts about the trial court proceedings that allow a plausible finding or inference of invalidity or non-infringement. These alleged facts include: (1) the trial court issued Markman rulings interpreting the '432 patent favorable to Teva; (2) the parties settled after the trial court had held a full bench trial, meaning that the parties' additional litigation expenses were minimal compared to the expenses they already had incurred when they settled; and (3) "[n]o rational economic actor with a viable product (and who had spent millions of dollars developing it) would refrain from entering a lucrative 'blockbuster' market for 36 months unless **[*1296]** it received monetary compensation in exchange for non-entry." *Id.* ¶ 265.

Defendants assert that these allegations fail to state a plausible claim because they merely speculate that a generic would have proved invalidity or non-infringement in a patent lawsuit. For support, defendants cite two cases where district courts dismissed antitrust claims based on alleged unlawful reverse payments because the plaintiffs never asserted plausible allegations about a generic's ability to prevail in patent litigation with the patent holders. *See, e.g., FTC v. AbbVie, Inc., 107 F. Supp. 3d 428, 437 (E.D. Pa. 2015)* (holding **[**72]** that plaintiff's allegations that the patent litigation was a sham "is merely speculation" because "[n]o judicial determination of the sham issue had been made when the parties settled the case"); *In re Ciprofloxacin Hydrochloride Antitrust Litig., 261 F. Supp. 2d 188, 201-02 (E.D.N.Y. 2003)* (holding that plaintiff's allegations that a generic would have prevailed in patent litigation were too speculative, especially because of judicially noticed facts about "post-settlement affirmations of the . . . [p]atent's validity").

The court disagrees that the class plaintiffs' allegations here are merely speculative. In contrast to defendants' cited cases, the class plaintiffs here allege facts capable of supporting a finding or inference that a potential generic competitor could have shown that Pfizer's patents were invalid, or that its competing device did not infringe the patents. These factual allegations include ones about what transpired in the Teva Litigation—*i.e.*, that the trial court issued a Markman ruling that was allegedly favorable to Teva and that the timing of the parties' settlement suggests the patent holders recognized the risk of the trial court finding the patents invalid or the competing product non-infringing.

Recently, the Massachusetts federal district court denied **[**73]** summary judgment against an antitrust claim based on a reverse payment settlement. ***HN12***[] Analyzing the causation issue, that court noted, "the Supreme Court [has] explained that 'it is normally not necessary to litigate patent validity to answer the antitrust question (unless, perhaps, to determine whether the patent litigation is a sham)' because '[a]n unexplained large reverse payment itself would normally suggest that the patentee has some serious doubts about the patent's survival.'" *In re Solodyn (Minocycline Hydrochloride) Antitrust Litig., No. 14-md-02503-DJC, 2018 U.S. Dist. LEXIS 11921, 2018 WL 563144, at *14 (D. Mass. Jan. 25, 2018)* (quoting *FTC v. Actavis, Inc., 570 U.S. 136, 157, 133 S. Ct. 2223, 186 L.*

Ed. 2d 343 (2013)). Also, the court recognized "as a general matter, '[i]t is well established that the burden of proving infringement generally rests upon the patentee.'" *Id.* (quoting Medtronic, Inc. v. Mirowski Family Ventures, LLC, 571 U.S. 191, 198, 134 S. Ct. 843, 187 L. Ed. 2d 703 (2014)). The Massachusetts court thus concluded that, on summary judgment, "the standard requiring Plaintiffs to produce 'some evidence' of invalidity or noninfringement does not require Plaintiffs 'to prove that the generic defendant would have won, only that it could have.'" Id. (quoting United Food & Commercial Workers Local 1776 v. Teikoku Pharma USA, 296 F. Supp. 3d 1142, 1155 (N.D. Cal. 2017)).

Applying that reasoning here,[7] the class plaintiffs need not allege that Teva *would* have prevailed in the patent litigation—it merely needs to allege that it *could* have. **[*1297]** The Class **[**74]** Complaint's allegations assert plausibly that Teva could have prevailed in the patent litigation if the parties has not resolved the case through an alleged reverse payment settlement. These allegations thus sufficiently assert that Pfizer's patents did not bar a generic competitor from entering the market. And the class plaintiffs have stated a plausible antitrust claim based on the alleged unlawful reverse payment settlements. *See* In re Niaspan Antitrust Litig., 42 F. Supp. 3d 735, 755 (E.D. Pa. 2014) (denying motion to dismiss antitrust claim for lack of an injury caused by a patent litigation settlement because, the court concluded, plaintiffs "plausibly alleged that, but for the anticompetitive settlement agreements, [the generic] would have prevailed in the underlying patent litigation against [the patent holder]").

4. Have the class plaintiffs alleged a plausible conspiracy between Mylan and Pfizer?

Defendants next assert that the class plaintiffs have failed to allege a plausible conspiracy between the Mylan and Pfizer Defendants under the antitrust laws. Defendants concede that the Class Complaint alleges that "[b]eginning in 2012 with the settlement of the Teva Litigation, Defendants [Mylan, King, Meridian] engaged in a continuing **[**75]** illegal contract, combination, and conspiracy in restraint of trade, the purpose and effect of which was to prevent the sale of a generic version of the EpiPen in the United States . . . ." Class Compl. ¶ 543 (Count III alleging state law antitrust violations); *see also id.* ¶ 530 ("By their agreement, Defendants intentionally and wrongfully conspired and combined in an unreasonable restraint of trade in a per se violation of § 1 of the Sherman Act . . . ." (Count I, alleging violations of federal ***antitrust law***)). But, defendants contend, the Class Complaint alleges no facts capable of supporting a finding or inference of an agreement or conspiracy to exclude competing devices in the EAI market.[8]

---

[7] The parties do not cite, and the court's research has not located, any Tenth Circuit cases discussing the viability of antitrust claims based on reverse payment settlements. The court predicts that the Tenth Circuit, if presented with this issue, would find *In re Sologyn* persuasive and apply its reasoning to the facts alleged here.

[8] The Mylan Defendants' opening brief asserts that the class plaintiffs' claims—premised on alleged reverse payment settlements—are evaluated under a rule of reason analysis—not the per se rule. Doc. 52 at 106-07; *see also* FTC v. Actavis, Inc., 570 U.S. 136, 159, 133 S. Ct. 2223, 186 L. Ed. 2d 343 (2013) (holding that courts must apply a rule of reason analysis to reverse payment settlement agreements alleged to violate the antitrust laws). The class plaintiffs' response concedes that an individual reverse payment settlement is analyzed under a rule of reason analysis. Doc. 64 at 151 n.203. But, the class plaintiffs assert, their conspiracy claims are not based just on the reverse payment settlements. *Id.* Instead, they argue, that the court must look to the totality of the conduct allegedly supporting the conspiracy claims. *Id.* But they never cite any case law showing that the per se rule applies to that other conduct that, they contend, supports their conspiracy claim. *Id.*

Nevertheless, at this stage of the litigation, the court need not decide what rule to apply to analyze the reasonableness of the alleged restraints of trade supporting the class plaintiffs' conspiracy claims. *See* CSR Ltd. v. Fed. Ins. Co., 40 F. Supp. 2d 559, 564 (D.N.J. 1998) ("At this early [motion to dismiss] stage of the proceeding, the court does not find it necessary to determine which mode of analysis [per se or rule of reason] it will ultimately employ in evaluating the defendants' activities."); *see also* ***Swarthmore Radiation Oncology, Inc. v. Lapes, 812 F. Supp. 517, 520 (E.D. Pa. 1992)*** ("[The court] need not decide, at this stage of the proceedings, whether a per se rule or a 'rule of reason' applies."). In ruling the pending motion, the court just needs to determine whether the class plaintiffs have alleged a plausible conspiracy under the antitrust laws. The class plaintiffs have shouldered that burden here.

HN13[] To state a claim under Sherman Act § 1, a complaint must allege "enough factual matter (taken as true) to suggest that an agreement was made." Bell Atl. Corp. v. Twombly, 550 U.S. 544, 556, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007); *see* ***[*1298]*** *also* TV Commc'ns Network, Inc. v. Turner Network Television, Inc., 964 F.2d 1022, 1027 (10th Cir. 1992) ("To state a claim for a violation of section one [of the Sherman Act] the plaintiff must allege facts which show: the defendant entered a contract, combination or conspiracy that unreasonably restrains trade in the relevant market.").

"An agreement or conspiracy under federal antitrust laws is said to exist when 'there **[**76]** is a unity of purpose, a common design and understanding, a meeting of the minds, or a conscious commitment to a common scheme.'" Suture Express, Inc. v. Cardinal Health 200, LLC, 963 F. Supp. 2d 1212, 1223 (D. Kan. 2013) (quoting W. Penn Allegheny Health Sys. v. UPMC, 627 F.3d 85, 99 (3d Cir. 2010)). "'A plaintiff may plead an agreement by alleging direct or circumstantial evidence, or a combination of the two,' but allegations of direct evidence, that are adequately detailed, are sufficient alone." *Id.* (quoting W. Penn Allegheny, 627 F.3d at 99). However, "[b]are bones accusations of a conspiracy without any supporting facts are insufficient to state an antitrust claim." Tal v. Hogan, 453 F.3d 1244, 1261 (2006) (citation omitted).

Here, the class plaintiffs contend that they have alleged facts which one can use to infer plausibly that defendants conspired to exclude competing EAI devices from the market. The Class Complaint asserts that defendants engaged in a "multi-faceted, fraudulent scheme to obtain and maintain a monopoly" in the EAI market. Class Compl. ¶ 6. The Class Complaint alleges that defendants effectuated their scheme by combining and conspiring to: assert and prosecute invalid patents to dissuade competitors from entering the EAI market; intervene in regulatory proceedings to delay competitors' entry in the EAI market; and enter into unlawful "pay-fordelay" settlement agreements with competitors **[**77]** to maintain Mylan's power. *Id.*[9]

The Class Complaint alleges that the Mylan and Pfizer Defendants engaged in this scheme to fend off EpiPen competitors because they had a "unified interest" to protect their monopoly. *Id.* ¶ 241. It asserts that the Pfizer Defendants (as the EpiPen patent holders and suppliers) and the Mylan Defendants (as the EpiPen sellers) worked collaboratively to enhance the EpiPen's sales volume and profitability because their related revenues rise and fall together. *Id.* ¶ 241.

The Class Complaint, construed in the class plaintiffs' favor, also alleges that defendants worked together to secure patents solely for the purpose of preventing generic competition. *Id.* ¶¶ 236-39. It describes how Mylan CEO Heather Bresch announced during a public earnings call in 2009, that *Mylan* was adding another patent to the already-patented EpiPen device that "will also put in [place] another barrier to entry . . . ." *Id.* ¶ 238 (emphasis added). Shortly afterward, Meridian—not Mylan—secured the '432 patent. Also, the Class Complaint alleges that Mylan Specialty **[*1299]** LP took over as sponsor of the EpiPen patents in the Orange Book[10] from Meridian. *Id.* ¶ 247. The Class Complaint asserts **[**78]** that this sponsorship change shows "concerted action by Mylan and Pfizer to share the burdens and rewards of their EpiPen monopoly." *Id.* ¶¶ 247, 314.

---

[9] This paragraph of the Class Complaint asserts other alleged unlawful conduct supported the alleged conspiracy—such as the EpiPen misclassification, the exclusivity contracts offered through the EpiPen4Schools Program, deceptive marketing practices, the "hard switch" to the EpiPen 2-Pak, and false testimony to Congress. But the Pfizer Defendants argue that the Class Complaint makes no factual allegations capable of supporting a finding or inference that Pfizer *participated* in any of this other alleged conspiratorial conduct. The court agrees. The court thus confines its discussion to the factual allegations supporting Pfizer's alleged involvement in an antitrust conspiracy to exclude EpiPen competitors—*i.e.*, the Class Complaint's allegations about Pfizer's involvement in securing patents, initiating patent infringement litigation, and entering into unlawful reverse payment settlements.

[10] The Orange Book is the common name for the FDA's publication, *Approved Drug Products with Therapeutic Equivalence Evaluations. See Approved Drug Products with Therapeutic Equivalence Evaluations (Orange Book)*, U.S. Food & Drug Administration, (2018), https://www.fda.gov/drugs/informationondrugs/ucm129662.htm. According to the FDA, the Orange Book "identifies drug products approved on the basis of safety and effectiveness by the [FDA] under the Federal Food, Drug, and Cosmetic Act (the Act) and related patent and exclusivity information." *Id.*

The Class Complaint also alleges that the Mylan Defendants and Pfizer Defendants worked together to prevent competitors from entering the market by filing patent infringement lawsuits and entering into "pay-for-delay" settlement agreements. *Id.* ¶¶ 236-303. While Mylan was not a party to the patent litigation lawsuits, one can infer plausibly from the Class Complaint's allegations that Mylan was participating in the concerted action. Indeed, the class plaintiffs allege that Mylan CEO Heather Bresch appeared to concede that Mylan participated in the Teva settlement by publicly referring to it as "*our* settlement with Teva." *Id.* ¶ 277 (emphasis added). Mylan also issued joint press releases with Pfizer announcing the Teva and Intelliject settlements. *Id.* ¶¶ 270, 298. The Class Complaint also quotes an antitrust scholar who has concluded "[a]t the time (and to this day), Mylan was working hand-in-hand **[**79]** with Meridian/King, with the former taking over Orange Book sponsorship of the drug application and the latter targeting rivals in litigation." *Id.* ¶ 314. The Class Complaint also describes that Congress has questioned whether the Teva settlement is an unlawful "pay-for-delay" settlement. *Id.* ¶ 280. In the inquiry, Congress directed questions about the settlement to Mylan, even though Mylan was not a party to the lawsuit. *Id.*

Defendants assert that all of class plaintiffs' allegations merely amount to "loosely parallel conduct" that cannot state a plausible conspiracy claim. Doc. 95 at 53 (citing *Twombly, 550 U.S. at 556* ("[A]n allegation of parallel conduct and a bare assertion of conspiracy will not suffice.")). Defendants assert that the allegations about patent infringement lawsuits and settlements involve different cases with different patents and different parties—and sometimes different products. Defendants contend that one cannot infer plausibly from these allegations that defendants agreed to join a conspiracy. Instead, defendants assert, these allegations just show unilateral and independent conduct—not a horizontal agreement—and thus, defendants argue, the allegations do not suffice to state a conspiracy **[**80]** claim.

HN14[] Indeed, the Supreme Court requires: "[W]hen allegations of parallel conduct are set out in order to make a *§ 1* claim, they must be placed in a context that raises a suggestion of preceding agreement, not merely parallel conduct that could just as well be independent action." *Twombly, 550 U.S. at 557*. This is so because "lawful parallel conduct fails to bespeak unlawful agreement." *Id. at 556*. *See also Mitchael v. Intracorp, Inc., 179 F.3d 847, 859 (10th Cir. 1999)* ("While consciously parallel behavior may contribute to a finding of antitrust conspiracy, it is insufficient, standing alone, to prove conspiracy."); *Cayman Express Corp. v. United Gas Pipe Line Co., 873 F.2d 1357, 1361 (10th Cir. 1989)* ("[C]onscious parallel business behavior, standing alone, is insufficient **[*1300]** to prove conspiracy."). Thus, "an allegation of parallel conduct and a bare assertion of conspiracy will not suffice. Without more, parallel conduct does not suggest conspiracy, and a conclusory allegation of agreement at some unidentified point does not supply facts adequate to show illegality." *Twombly, 550 U.S. at 556*. Instead, a plaintiff must allege "conspiracy evidence [that] tend[s] to rule out the possibility that the defendants were acting independently." *Id. at 554*.

HN15[] The Tenth Circuit has held that "parallel behavior may, however, support the existence of an illegal agreement 'when augmented by additional evidence from **[**81]** which an understanding among the parties may be inferred.'" *Mitchael, 179 F.3d at 859* (quoting *Monument Builders of Greater Kansas City, Inc. v. Am. Cemetery Ass'n, 891 F.2d 1473, 1481 (10th Cir. 1989)* (further citation and internal quotation marks omitted)). "'Such evidence may include a showing that the parties are acting against their own individual business interests, or that there is motivation to enter into an agreement requiring parallel behavior.'" *Id.* (quoting *Monument Builders, 891 F.2d at 1481* (further citation and internal quotation marks omitted)); *see also In re Ins. Brokerage Antitrust Litig., 618 F.3d 300, 321-22 (3d Cir. 2010)* (explaining that "[s]ome courts have denominated these [additional] facts, the presence of which may indicate the existence of an actionable agreement, as 'plus factors'" and identifying "at least three such plus factors: (1) evidence that the defendant had a motive to enter into a price fixing conspiracy; (2) evidence that the defendant acted contrary to its interests; and (3) evidence implying a traditional conspiracy" (citations and internal quotation marks omitted)).

Here, the Class Complaint alleges parallel conduct by asserting, plausibly, that both the Mylan and Pfizer Defendants participated in a scheme to secure invalid EpiPen patents, initiate patent infringement litigation, and then settle those lawsuits with reverse payment settlements. The court also concludes that **[**82]** the Class Complaint, construed in the class plaintiffs' favor, alleges sufficient "plus factors" and thus allows one to infer plausibly that an actionable agreement existed. The class plaintiffs allege facts supporting a plausible inference that defendants were motivated to enter an agreement to exclude competitors from entering the EAI market. *See* Class Compl. ¶¶ 241 (alleging that defendants' EpiPen-related revenues rise and fall together), 244 (alleging that, when Pfizer acquired King and Meridian, "Mylan was rightly concerned that Pfizer might try to compete with Mylan by marketing the same device to consumers under a different trade name. But rather than compete with Mylan, Pfizer agreed to continue supplying the device to Mylan under terms that are not publicly available."). The class plaintiffs also allege that defendants worked together to effectuate this scheme by securing patents, litigating patent infringement lawsuits, and entering into reverse payment settlements. *Id.* ¶¶ 238-39, 247, 270, 277, 298, 314, 632. The court recognizes that "each of [these] allegations of circumstantial agreement standing alone may not be sufficient to imply agreement," but, "taken together, **[**83]** they provide a sufficient basis to plausibly contextualize the agreement necessary for pleading a *§ 1* claim." *Evergreen Partnering Grp., Inc. v. Pactiv Corp., 720 F.3d 33, 47 (1st Cir. 2013)*.

Defendants argue that the Class Complaint asserts no allegations supporting at least one of the plus factors—*i.e.*, that defendants acted against their own economic interest. Defendants assert that the Class Complaint alleges that the Mylan and Pfizer Defendants had a "unified interest" **[*1301]** in protecting the EpiPen monopoly and "work[ed] collaboratively to enhance the product['s] sales volume and profitability." Class Compl. ¶ 241. According to defendants, these allegations allow only an inference of lawful parallel conduct—not an unlawful agreement. But the class plaintiffs respond that the Class Complaint alleges that Pfizer also participates in the EAI market through its generic division Greenstone's distribution of the Adrenaclick generic EAI. *Id.* ¶ 101 n.16. So, the class plaintiffs contend, Pfizer was able to control a portion of the small amount of the EpiPen's competition. From these allegations, one could reasonably infer that Pfizer acted against its own interests by conspiring with Mylan to exclude EpiPen competition—competition that includes the generic Adrenaclick that **[**84]** Pfizer also distributes through its Greenstone division.

The court thus concludes that the Class Complaint sufficiently alleges facts capable of supporting a finding or inference of requisite "plus factors." Combined with defendants' alleged parallel business behavior, they state a plausible antitrust claim. The court thus denies defendants' Motions to Dismiss on this basis.

Finally, in a footnote, defendants assert that the *Copperweld* doctrine bars the class plaintiffs' conspiracy claims because the Mylan and Pfizer Defendants are parties with a unified interest and thus incapable of conspiring with each other for purposes of Sherman Act *§ 1*. *See* *Copperweld Corp. v. Indep. Tube Corp., 467 U.S. 752, 777, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)* (holding that a parent and its wholly owned subsidiary are incapable of conspiring with each other under the Sherman Act); *see also* *Shionogi Pharma, Inc. v. Mylan, Inc., No. 10-1077, 2011 U.S. Dist. LEXIS 58774, 2011 WL 2174499, at *5 (D. Del. May 26, 2011)* (recognizing that "district courts have held that other parties with unified interests, such as a patent holder and licensee, are incapable of conspiring"). ***HN16***[] But *Copperweld* does not hold that a patent holder and licensee never can conspire to violate the antitrust laws. Indeed, as other courts have recognized, a patent holder and its licensee can conspire in violation of the antitrust laws "only if [the conspiracy] **[**85]** deprives the marketplace of independent actors." *Levi Case Co., Inc. v. ATS Prods., Inc., 788 F. Supp. 428, 431 (N.D. Cal. 1992)*; *see also* *In re Suboxone (Buprenorphine Hydrochloride & Naloxone) Antitrust Litig., No. 13-MD-2445, 2017 U.S. Dist. LEXIS 179101, 2017 WL 4910673, at *8-9 (E.D. Pa. Oct. 30, 2017)* (rejecting argument that alleged co-conspirators were "a single economic entity as patent licensor and licensee" and refusing to apply the *Copperweld* doctrine because the complaint alleged "two separate entities that engaged in concerted action to jointly advance their economic interests"); *Townshend v. Rockwell Int'l Corp., No. C99-0400SBA, 2000 U.S. Dist. LEXIS 5070, 2000 WL 433505, at *6 (N.D. Cal. Mar. 28, 2000)* (denying *Rule 12(b)(6)* motion to dismiss conspiracy claims because the case law did not establish that patent holder and licensee are "legally incapable of entering into a conspiracy" and concluding that defendants' capability of entering a conspiracy was a "question of fact" that the court could not resolve on a motion to dismiss).

Likewise, here, the court finds that the Class Complaint sufficiently alleges facts capable of supporting a finding or inference that the Mylan and Pfizer Defendants are "two separate entities that engaged in concerted action to jointly advance their economic interests." *In re Suboxone, 2017 U.S. Dist. LEXIS 179101, 2017 WL 4910673, at *9*. Although the Class Complaint alleges that the Mylan and Pfizer Defendants shared a "unified interest" in protecting the **[**86]** EpiPen monopoly (Class Compl. ¶ 241), it also alleges that defendants had separate interests—Mylan through its sale of the EpiPen and **[*1302]** Pfizer with its control of a portion of the small amount of the EpiPen's competition through its Greenstone division's distribution of the generic Adrenaclick. Indeed, the Class Complaint alleges that both compete in the EAI market. The Class Complaint also alleges "anticompetitive conduct at the heart of the alleged conspiracy"—*i.e.*, the concerted effort to procure patents, initiate patent infringement litigation, and enter into reverse payment settlements in an effort to prevent EpiPen competitors from entering the EAI market—that is "ancillary" to the patentee/licensee relationship. *In re Suboxone, 2017 U.S. Dist. LEXIS 179101, 2017 WL 4910673, at *9*. For these reasons, the court refuses to apply the *Copperweld* doctrine here.

5. Have the class plaintiffs alleged a viable antitrust claim based on the "reverse" patent litigation settlements?

Next, defendants argue that the class plaintiffs have failed to allege plausible antitrust claims based on alleged reverse payment settlements. ***HN17***[] The Supreme Court has held that reverse payment settlements "can sometimes violate the antitrust laws." *FTC v. Actavis, Inc., 570 U.S. 136, 141, 133 S. Ct. 2223, 186 L. Ed. 2d 343 (2013)*. A reverse payment settlement refers **[**87]** to an agreement by a brand-name manufacturer and patent holder to compensate a generic manufacturer and alleged patent infringer in exchange for settling patent infringement litigation, thus delaying the generic's market entry. *In re Nexium (Esomeprazole) Antitrust Litig., 842 F.3d 34, 41 (1st Cir. 2016)* (citing *Actavis, 570 U.S. at 145*). "When a brand-name manufacturer pays to delay the first filer's generic launch, that reverse payment postpones not only the first filer's product but also those of all other generic manufacturers, who must wait out the 180-day exclusivity period before going to market." *Id.* Because a reverse payment settlement effectively delays generic competition in the market, *Actavis* recognized that "a reverse payment, where large and unjustified, can bring with it the risk of significant anticompetitive effects." *Actavis, 570 U.S. at 158*.

HN18[] To determine whether a reverse payment settlement has anticompetitive effects, the Supreme Court has instructed that "a detailed exploration of the validity of the patent itself" is not necessary. *Id. at 158*. Instead, the anticompetitive effects of a reverse payment depend on "its size, its scale in relation to the payor's anticipated future litigation costs, its independence from other services for which it might represent payment, and the lack of any other **[**88]** convincing justification." *Id. at 159*. The Supreme Court also recognized that "[t]he existence and degree of any anticompetitive consequence may also vary as among industries." *Id.* Because of "[t]hese complexities," the Supreme Court has held that courts must analyze alleged unlawful reverse payment settlements under the rule of reason. *Id.*

Here, defendants assert that the Class Complaint fails to plead facts showing that defendants actually made any payments in the patent litigation settlements with Teva, Intelliject, and Sandoz. Thus, defendants contend, the class plaintiffs fail to state a plausible claim based on any of these settlements. The court addresses each of the three settlements separately, below.

a. Teva Settlement

The class plaintiffs assert that one plausibly can infer from the Class Complaint's allegations that defendants made a large and unjustified reverse payment settlement in the Teva Litigation. The Class Complaint alleges that one reasonably can infer "[f]rom the facts surrounding the settlement" that "King and Meridian made a **[*1303]** substantial 'reverse payment' to Teva to convince it to delay bringing its competing generic auto-injector to market." Class Compl. ¶ 265. According **[**89]** to the Class Complaint, these facts include: (1) the district court in the Teva Litigation had issued a Markman ruling interpreting the '432 patent favorable to Teva; (2) the parties settled after a full bench trial, meaning that the parties already had expended significant litigation expenses compared to the marginal ones they would incur going forward; and (3) it makes little sense that a "rational economic actor with a viable product (and who had spent millions of dollars developing it) would refrain from entering a lucrative 'blockbuster' market for 36 months unless it received monetary compensation in exchange for non-entry." *Id.*

The Class Complaint never alleges the amount of the alleged settlement payment, but it explains that the terms of the Teva settlement are confidential and not publicly available. *Id.* ¶ 264. At least one court has held that a plaintiff need not plead a precise monetary settlement amount, recognizing that "very precise and particularized estimates of fair value and anticipated litigation costs may require evidence in the exclusive possession of the defendants, as well as expert analysis, and that these issues are sufficiently factual to require discovery." *In re Aggrenox Antitrust Litig., 94 F. Supp. 3d 224, 244 (D. Conn. 2015)*. Instead, **[**90]** to plead that a large and unjustified reverse payment occurred, a plaintiff must assert "specific allegations about the terms of the settlement and their relative value that are plausible on their face." *Id.; see also King Drug Co. of Florence, Inc. v. Smithkline Beecham Corp., 791 F.3d 388, 410 (3d Cir. 2015)* (reversing a district court's *Rule 12(b)(6)* dismissal of antitrust claims because "plaintiffs' allegations, and the plausible inferences that can be drawn from them, are sufficient to state a rule-of-reason claim under *Twombly* and *Iqbal* for violation of the Sherman Act on the ground that [defendant] sought to induce [a generic] to delay its entry into the lamotrigine tablet market by way of an unjustified no-AG agreement"); *In re Loestrin 24 Fe Antitrust Litig., 814 F.3d 538, 552 (1st Cir. 2016)* (declining to "require heightened fact pleading of specifics" such as "precise figures and calculations at the pleading stage" but holding that "the plaintiffs must allege facts sufficient to support the legal conclusion that the settlement at issue involves a large and unjustified reverse payment under *Actavis*").

Defendants assert that the class plaintiffs' allegations here fall short of this pleading standard. For support, defendants rely on *FTC v. AbbVie, Inc., 107 F. Supp. 3d 428 (E.D. Pa. 2015)*, where the court held that plaintiff had failed to state a plausible antitrust claim because the patentees **[**91]** "did not make any payment, reverse or otherwise, to the claimed infringer . . . ." *Id. at 436*. *AbbVie*'s facts differ significantly from the ones alleged here. The class plaintiffs specifically allege that defendants "provided significant consideration, incentives, and benefits to Teva to delay bringing their competing product to market." Class Compl. ¶ 263. And, the court concludes, the allegations assert specific facts—described above—that are capable of supporting a reasonable inference that the consideration provided as part of the Teva settlement constituted a substantial reverse payment. *Id.* ¶ 265.

Defendants disagree. They argue that the asserted facts cannot support a plausible inference of a reverse payment settlement. But their arguments invite the court to weigh the Class Complaint's factual allegations—something it cannot do on a motion to dismiss. For example, defendants assert that the Teva settlement was not the product of an unlawful reverse payment **[*1304]** but, instead, a settlement that the trial court expressly encouraged. Doc. 93 at 14. Defendants also disagree with the class plaintiffs' assertion that the parties settled after they had already incurred the most significant attorney's **[**92]** fees through a bench trial. Defendants argue that the Teva Litigation was "subject to the uncertainty, expense, and burden of protracted appeals and possible remands." *Id. at 15*. And, defendants contend, the Markman ruling was not favorable to Teva but instead was more of a "mixed conclusion," with the court rejecting two of Teva's proposed constructions. *Id.* (citations and internal quotations omitted).

All these arguments require the court to consider disputed factual allegations. ***HN19***[] And that function is not a proper one on a *Rule 12(b)(6)* motion to dismiss. *See In re Cardizem CD Antitrust Litig., 332 F.3d 896, 900 (6th Cir. 2003)* (affirming district court's denial of a motion to dismiss because "[t]he defendants' claim that [the generic manufacturer's] decision to stay off the market was motivated not by the [reverse payment], but by its fear of damages in the pending patent infringement litigation, merely raise[d] a disputed issue of fact that cannot be resolved on a motion to dismiss"). Instead, viewing the allegations in the class plaintiffs' favor, the court concludes that the Class Complaint alleges "enough facts" to allow a reasonable inference that the Teva settlement constituted an unlawful reverse payment and thus is sufficient to "nudge[ ] the[ ] claims across the **[**93]** line from conceivable to plausible." *Twombly, 550 U.S. at 570*.

b. Intelliject Settlement

Defendants next argue that the class plaintiffs assert conclusory allegations to support their theory that the Intelliject settlement constitutes an unlawful reverse payment settlement. Thus, defendants contend, the class plaintiffs fail to state a plausible claim for relief based on it. For the same reasons already discussed, the court rejects defendants' argument.

Viewing the Class Complaint's allegations in the class plaintiffs' favor, one can infer plausibly that defendants made a reverse payment in the Intelliject settlement. The Class Complaint alleges that, in February 2012, Mylan and Pfizer jointly announced settlement of the Intelliject litigation. Class Compl. ¶ 298. Like the Teva settlement, the terms of the Intelliject settlement are confidential. *Id.* But Mylan and Pfizer publicly stated that "the agreement prevented Intelliject and Sanofi from launching their e-cue device for another nine months, until November 15, 2012." *Id.* The Class Complaint asserts that "[t]he relatively short duration of delay before entry of the e-cue likely indicates the strength of Intelliject's defenses to the patent litigation." ***[**94]*** *Id.* The Class Complaint also contends, "on information and belief, Intelliject and Sanofi agreed not to enter the market until November 15, 2012[,] in exchange for valuable consideration." *Id.* ¶ 299. These allegations can support a plausible inference that defendants settled the Intelliject litigation by making a reverse payment.

Defendants contend that these facts won't allow such an inference because the settlement granted Intelliject a market entry date that was 13 years before the EpiPen patents expire. Defendants argue that this allegation shows just that the Intelliject settlement is a traditional settlement agreement involving a negotiated *early* entry date. And that type of settlement agreement is not subject to antitrust scrutiny. *Actavis, 570 U.S. at 158*. With this argument, defendants again ask the court to weigh disputed factual allegations. The court cannot engage in such fact-finding on a motion to dismiss. For these reasons, the court finds that the Class Complaint plausibly asserts that the **[*1305]** Intelliject settlement constituted a large and unjustified reverse payment settlement sufficient to support an antitrust claim.

c. Sandoz Settlement

Finally, defendants assert that the Class Complaint fails **[**95]** to allege that the Sandoz settlement involved a large and unjustified reverse payment settlement. The Class Complaint alleges that, in 2010, Sandoz attempted to enter the EAI market with a generic alternative to the EpiPen. Class Compl. ¶ 302. The Class Complaint asserts that "defendants conspired to have King file a patent infringement suit against Sandoz in response to its ANDA filing." *Id.* Pfizer filed a Form 10-Q with the SEC in 2016. *Id.* It recited that Sandoz's ANDA is ongoing and the litigation is stalled because the court had entered an order staying the FDA process and administratively terminating the action, subject to the parties seeking to reopen the case by letter request. *Id.* To date, no party has reopened the case. *Id.* The Class Complaint describes how staying the litigation also stays a definitive ruling on any challenge to the EpiPen patents. *Id.* And it asserts "[o]n information and belief" that defendants "entered into an agreement with Sandoz to stay the case indefinitely in exchange for valuable consideration to Sandoz." *Id.* at ¶ 303.

Although the class plaintiffs cannot provide the precise terms of the Sandoz agreement without the benefit of discovery, one plausibly **[**96]** can infer from Sandoz's actions that it received significant consideration in exchange for its actions—*i.e.*, agreeing to stay its ANDA application for its generic product. Indeed, one also could infer the opposite conclusion—that Sandoz agreed to stay its ANDA application because it considered the patent infringement claims valid and appreciated the risk that it would lose the patent infringement litigation. But, at the pleading stage, the court cannot make that determination. Instead, the court must consider the facts alleged in the class plaintiffs' favor and draw reasonable inferences from them. Applying that standard here, the court concludes that the class plaintiffs have asserted a plausible antitrust claim based on their allegations that the Sandoz settlement involved an unlawful reverse payment settlement.

6. Have the class plaintiffs stated a plausible antitrust claim based on the FDA Citizen Petition?

Next, the Mylan Defendants argue that the class plaintiffs' allegations about the FDA Citizen Petition fail to state a plausible antitrust claim. The Mylan Defendants assert two arguments supporting dismissal.

First, the Mylan Defendants contend, the Class Complaint never alleges **[**97]** that the Citizen Petition caused any delay in the FDA approval process. The Mylan Defendants explain that a federal statute requires the FDA to take final agency action on a Citizen Petition within 150 days (about five months). *21 U.S.C. § 355(q)(1)(F)*. And, *21 U.S.C. § 355(q)(1)(A)* provides that the Secretary "shall not delay approval" of a pending ANDA based on the filing of a Citizen Petition. But, as Mylan concedes, this statute also contains an exception. It authorizes "the Secretary, upon reviewing the petition," to determine whether a further delay is necessary to protect public health. 21 U.S.C. § 355(q)(1)(A)(ii). And, as the Class Complaint alleges, legal scholars and Congress have recognized the "dangerous potential" of Citizen Petitions (such as Mylan's) to extend brand monopolies and delay approval of generics. Class Compl. ¶¶ 306, 308.

The Class Complaint asserts that Mylan filed a Citizen Petition on January 16, 2015, "a mere six months before Teva was **[*1306]** scheduled (pursuant to the settlement) to enter the market." *Id.* ¶ 311. It also alleges that Mylan waited until May 2015—almost five months after filing its Citizen Petition and only weeks before the FDA was required to respond—to supplement its Petition with a 48-page independent study purportedly **[**98]** showing that patients would not use Teva's generic product correctly. *Id.* ¶ 311. The Class Complaint quotes a legal scholar who has questioned the timing of Mylan's Citizen Petition and suggested that it was part of a strategy to delay Teva's ANDA approval. *Id.* ¶¶ 311, 314. And, the Class Complaint asserts, "[b]ut for Mylan's anti-competitive assault campaign" that included the FDA Citizen Petition, "Teva would have entered the market much sooner and fixed the deficiencies that led to the FDA's rejection of Teva's generic." *Id.* ¶ 322.

At least one court has concluded that allegations similar to those asserted here—ones that asserted, generally, that citizen petitions can delay the FDA approval process, and, more specifically, that a defendant had delayed approval of a generic competitor—"plausibly pleads that the citizen petition resulted in delay of the FDA's approval of the generic ANDAs." *In re Suboxone (Buprenorphine Hydrochloride and Naloxone) Antitrust Litig., No. 13-MD-2445, 2017 U.S. Dist. LEXIS 145501, 2017 WL 3967911, at *18 (E.D. Pa. Sept. 8, 2017)* (denying a *Rule 12(b)(6)* motion to dismiss antitrust claims based on alleged delay caused by FDA citizen petition because the Amended Complaint plausibly pleaded delay and "[w]hether such a delay actually occurred in this case **[**99]** is a subject more properly left for resolution after discovery"). For the same reasons, the court finds that the class plaintiffs plausibly have alleged that Mylan's Citizen Petition delayed the FDA approval process.[11]

Second, the Mylan Defendants assert that the *Noerr-Pennington* doctrine bars the class plaintiffs' claims based on the FDA Citizen Petition. ***HN20***[] As discussed, the *Noerr-Pennington* doctrine "exempts from antitrust liability any legitimate use of the political process by private individuals, even if their intent is to eliminate competition." *Tal v. Hogan, 453 F.3d 1244, 1259 (10th Cir. 2006)* (citation and internal quotations marks omitted). But *Noerr-Pennington* immunity does not apply to "sham" activities. *Prof'l Real Estate Inv'rs, Inc. v. Columbia Pictures Indus., Inc., 508 U.S. 49, 60-61, 113 S. Ct. 1920, 123 L. Ed. 2d 611 (1993)*. Petitioning the government is a "sham" activity if: (1) it is "objectively baseless in the sense that no reasonable litigant could realistically expect success on the merits," and (2) it "uses the governmental *process*—as opposed to the *outcome* of that process—as an anticompetitive weapon." *Id.* (citations and internal quotation marks omitted).

The Mylan Defendants assert that the Class Complaint's allegations don't satisfy these two requirements to plead adequately that Mylan's Citizen Petition falls within the sham exception **[**100]** to the *Noerr-Pennington* doctrine. First, the Mylan Defendants argue that the allegations don't plead facts capable of supporting a finding or inference **[*1307]** that Mylan's Citizen Petition was objectively baseless. ***HN21***[] Some courts have found that the question "[w]hether petitioning activity is a sham is generally [one] for the jury." *In re Suboxone (Buprenorphine Hydrochloride and Naloxone) Antitrust Litig., 64 F. Supp. 3d 665, 689 (E.D. Pa. 2014)* (citing *In re Flonase Antitrust Litig., 795 F. Supp. 2d 300, 310 (E.D. Pa. 2011))*. But "'a court may decide probable cause as a matter of law' where 'there is no dispute over the predicate facts of the underlying . . . proceeding.'" *Id.* (quoting *Prof'l Real Estate Inv'rs, Inc., 508 U.S. at 63*).

[11] In the same vein, the Mylan Defendants argue that the Citizen Petition never delayed the FDA approval process because the FDA ultimately denied Teva's application. But, for reasons explained in Part III.A.3. above, the Class Complaint adequately alleges "[b]ut for Mylan's anticompetitive assault campaign"—described in the Class Complaint as the patent settlement litigation, reverse payment settlements, and FDA Citizen Complaint—"Teva would have entered the market much sooner and fixed the deficiencies that led to the FDA's rejection of Teva's generic." Class Compl. ¶ 322. As the court concluded already, these allegations sufficiently allege causation. They also support the class plaintiffs' claim that Mylan's FDA Citizen Petition delayed Teva's entry into the market.

The Class Complaint asserts facts supporting a plausible inference that the Citizen Petition was objectively baseless because of its timing and contents. Mylan waited until January 2015—six months before Teva was scheduled to enter the market—to file the Citizen Petition even though Teva had been developing the drug for six years, the parties had litigated the patent infringement suit for three years, and the parties settled that litigation three years before the Petition's filing. Class Compl. ¶¶ 311, 314. The Class Complaint also asserts that Mylan's Citizen Petition relied on a medical statement from a doctor who Mylan paid to render the opinion. *Id.* ¶¶ 317, 318. And Mylan's Citizen Petition **[**101]** never disclosed that it had made such a payment. *Id.* ¶ 318.

The Class Complaint also alleges that Mylan waited just weeks before the FDA was required to respond to the ANDA to supplement its Citizen Petition by submitting a study. *Id.* ¶ 311. The Class Complaint asserts that this study had "numerous flaws that demonstrate that Mylan was not acting in good faith" by submitting it to the FDA. *Id.* ¶ 313. The Class Complaint identifies specific flaws: the study lacked a control group; it did not use the actual generic device, but a prototype; it used a small number of participants; the researchers failed to provide proper instructions to the study's participants for using the prototype; and the researchers told the participants to watch a video instead of actually use the prototype. *Id.*

The Mylan Defendants respond with various arguments attacking these allegations. They explain the legitimacy of the filings' timing, the doctor's medical statement, the payments the doctor received (noting that the doctor received payments from other pharmaceutical companies, including Teva), and the supplemental study. But these arguments present disputed fact issues that the court cannot decide at the pleading **[**102]** stage. On a motion to dismiss, the court considers the allegations in the class plaintiffs' favor and concludes they sufficiently allege that Mylan's FDA Citizen Petition was objectively baseless. *See* *In re Suboxone Antitrust Litig., 2017 U.S. Dist. LEXIS 145501, 2017 WL 3967911, at *17* (explaining that federal antitrust claims "based on the filing of a sham citizen petition survived dismissal" because the complaint "sets forth multiple facts which could create an inference that the petition was objectively baseless"); *see also* *La. Wholesale Drug Co. v. Sanofi-Aventis, No. 07 Civ.7343(HB), 2008 U.S. Dist. LEXIS 3611, 2008 WL 169362, at *5 (S.D.N.Y. Jan. 18, 2008)* (denying motion to dismiss antitrust claims based on an alleged sham petition because plaintiff alleged triable fact issues about "the reasonability and viability" of the citizen petition and was entitled to additional discovery to prove the allegations).

The court also finds that the Class Complaint plausibly alleges that Mylan used the *process* of filing the FDA Citizen Petition—not the *outcome* of that proceeding—to restrain competition. The Class Complaint repeatedly alleges that Mylan used the FDA Citizen Petition process as a means to delay Teva's market entry. Class Compl. ¶¶ 304, 310, 311, 316, 319, 321. These allegations suffice to state an antitrust **[*1308]** claim based on Mylan's Citizen Petition that falls within the sham exception to the *Noerr-Pennington* ***[**103]*** doctrine.

7. Have the class plaintiffs alleged a plausible antitrust claim based on allegedly misleading statements?

The Mylan Defendants next argue that the Class Complaint fails to allege plausible antitrust claims based on the Mylan Defendants' misrepresentations about Auvi-Q's bioequivalence and not-covered status.[12] ***HN22***[] Deceptive speech can support Sherman Act claims because "in some cases, such defamation, which plainly is not competition on the merits, can give rise to antitrust liability, especially when it is combined with other anticompetitive acts." *W. Penn Allegheny Health Sys., Inc. v. UPMC, 627 F.3d 85, 109 n.14 (3d Cir. 2010)*; *see also* Caldera, Inc. v.

[12] The Mylan Defendants also recognize another type of deceptive speech that the Class Complaint appears to allege to support an antitrust claim. The class plaintiffs assert that Mylan failed to disclose the "bought-and-paid-for" physician statements supporting the EpiPen 2-Pak. Doc. 95 at 60. The Mylan Defendants assert that these allegations cannot support an antitrust claim based on deceptive speech because they involve omissions—not deceptive statements. The class plaintiffs' Opposition never responds to this argument. Doc. 123 at 58-60. And instead, it confines its arguments to allegedly false statements that Mylan made about the Auvi-Q. *Id.* The court thus concludes that the class plaintiffs have abandoned any attempt to base their deceptive speech claims on Mylan's failure to disclose that it allegedly paid physicians for their statements supporting the EpiPen 2-Pak. The court thus dismisses any of the class plaintiffs' antitrust deceptive speech claims based on this alleged failure to disclose.

Microsoft Corp., 87 F. Supp. 2d 1244, 1249 (D. Utah 1999) (holding that alleged misleading statements about the plaintiff's product viewed with other anticompetitive behavior supported a Sherman Act § 2 claim sufficient to survive summary judgment).

HN23[] The Tenth Circuit presumes that allegedly false speech "bears only a *de minimis* effect on competition." Lenox MacLaren Surgical Corp. v. Medtronic, Inc., 762 F.3d 1114, 1127 (10th Cir. 2014); *see also* Nat'l Ass'n of Pharm. Mfrs., Inc. v. Ayerst Labs., 850 F.2d 904, 916 (2d Cir. 1988) ("[A] plaintiff asserting a monopolization claim based on misleading advertising must overcome a presumption that the effect on competition of such a practice was de minimis." (citation and internal quotation marks omitted)).[13] An antitrust plaintiff "may rebut this presumption by satisfying a six-factor test, showing that **[**104]** the disparagement was: (1) clearly false, (2) clearly material, (3) clearly likely to induce reasonable reliance, (4) made to buyers without knowledge of the subject matter, (5) continued for prolonged periods, and (6) not readily susceptible to neutralization or other offset by rivals. Lenox, 762 F.3d at 1127 (citing Am. Prof'l Testing Serv., Inc. v. Harcourt Brace Jovanovich Legal & Prof'l Publ'ns, Inc., 108 F.3d 1147, 1152 (9th Cir. 1997)); *see also* Ayerst Labs., 850 F.2d at 916 (quoting III P. Areeda & D. Turner, ***Antitrust Law*** **[*1309]** ¶ 738a, at 278-79 (1978)). The Tenth Circuit has not decided whether a plaintiff must satisfy all six factors to overcome the *de minimis* presumption. Lenox, 762 F.3d at 1128 n.9; *see also* Duty Free Ams., Inc. v. Estee Lauder Cos., 797 F.3d 1248, 1269 (11th Cir. 2015) (holding that it need not determine whether a plaintiff must allege all six factors because the complaint failed to allege falsity).

In *Ayerst*, the Second Circuit held that a district court had erred by dismissing a Sherman Act § 2 claim. Plaintiff there based its claim on an allegedly false and deceptive letter that defendant had sent to customers. The court found that plaintiff's Complaint alleged several of the factors required to overtake the *de minimis* presumption—including that the letter was clearly false, clearly material, and clearly likely to induce reasonable reliance. *Id.* But the court also agreed with defendant: plaintiff **[**105]** had not alleged other certain factors because the Complaint asserted that defendant sent the letter to pharmacists—persons likely to have knowledge about the subject matter—and that defendant only could have made the misrepresentations for a short time period. Id. at 917. Nevertheless, the court concluded, "several factors . . . cannot be adequately evaluated until the discovery process has moved forward to a greater extent than it has thus far." *Id.* The court thus held that the Complaint pleaded a Sherman Act § 2 claim sufficient to survive Rule 12(b)(6) dismissal.

Viewing the facts alleged here in the light most favorable to the class plaintiffs, the Class Complaint alleges several of the factors required to overcome a presumption that deceptive statements have had a *de minimis* effect on competition. The class plaintiffs allege that Mylan: (1) created and spread misinformation about the Auvi-Q and its bioequivalence to the EpiPen; (2) funded and promoted a study that was intended to undermine the FDA's conclusion that Auvi-Q demonstrated bioequivalence to the epinephrine in the EpiPen; and (3) made misleading statements to physicians that the EpiPen was the "preferred" brand based on Auvi-Q's coverage exclusions **[**106]** when Mylan itself produced the exclusion with its large, conditional rebate offers. Class Compl. ¶¶ 229, 232-34. The class plaintiffs assert that these allegedly false and misleading statements blocked Auvi-Q from competing in the market, thus excluding competition. *Id.* ¶¶ 229-31, 235.

The Mylan Defendants contend that the class plaintiffs' allegations fail to assert that Mylan's allegedly deceptive statements were "clearly false," as the first factor of the six-factor test requires. The court disagrees. One plausibly can infer from the Class Complaint's allegations that Mylan's statements about Auvi-Q were clearly false. Although the Class Complaint does not use those precise words, it calls the statements "misinformation" and so "misleading"

[13] The class plaintiffs assert that the *de minimis* test applies only to competitors asserting a deceptive speech claim—not consumers like the class plaintiffs here. But they cite no case law supporting this argument. And the Mylan Defendants respond that the Ninth Circuit has applied the *de minimis* presumption to competitors and consumers alike. *See* Am. Prof'l Testing Serv., Inc. v. Harcourt Brace Jovanovich Legal & Prof'l Publ'ns, Inc., 108 F.3d 1147, 1152 (9th Cir. 1997) (explaining that the court "insist[s] on a preliminary showing of significant and more-than-temporary harmful effects on competition (and not merely upon a competitor or *customer*) before [disparaging of a rival product] can rise to the level of exclusionary conduct" (emphasis added)). Without any authority supporting the class plaintiffs' position, the court declines to hold the *de minimis* test does not apply to their claims here.

that they "ensur[ed] that physicians would think that the EpiPen was the only realistic choice for their patients." *Id.* ¶¶ 229, 234-35. Of course, to prevail on their speechbased claims, the class plaintiffs must come forward with evidence showing that these alleged statements produced anticompetitive effects in violation of the antitrust laws. But, at the pleading stage, the court applies *Ayerst*'s rationale and concludes that the class plaintiffs **[**107]** "should be allowed to go forward with the discovery process to substantiate [their] claim" that Mylan's allegedly deceptive speech violated the antitrust laws. *Ayerst Labs., 850 F.2d at 917*.

Also, following *Ayerst*, the court need not decide whether the Class Complaint alleges facts capable of supporting each factor before it could overtake the *de minimis* presumption. The *Ayerst* plaintiff did **[*1310]** not satisfy such an obligation at the pleading stage. The court finds persuasive *Ayerst*'s conclusion that these factors require factual development through the discovery process. Here, the court cannot evaluate several of the factors adequately without the facts that discovery may or may not produce. So, the court denies the motion to dismiss the class plaintiffs' deceptive speech claim at the pleading stage. *See id. at 917*.

8. Have the class plaintiffs stated plausible claims for relief under state antitrust laws?

Finally, defendants argue that the Class Complaint fails to allege any plausible claims under all the state antitrust laws invoked by the Class Complaint. Defendants contend that the state antitrust claims fail for the same reasons that the federal claims fail. But, as discussed above, the court concludes that the Class Complaint **[**108]** states plausible claims for relief under the federal antitrust laws. It reaches the same conclusion about defendants' repackaged arguments attacking the state law claims.

Also, defendants advance three other arguments that, they say, warrant dismissal of certain state antitrust claims. *First*, defendants argue that the court should dismiss state antitrust claims asserted under the laws of Alaska, Arizona,[14] the District of Columbia, Iowa, New Mexico, North and South Dakota, Oregon,[15] Puerto Rico, Rhode Island, Vermont,[16] and Wisconsin[17] because the Class Complaint includes no named plaintiff who resides in any of these states. ***HN24***[] Our court has recognized that "[s]everal courts, including other district courts in the Tenth Circuit, have determined that the plaintiffs in a putative class action may only assert a state law claim if a named plaintiff resides in, does business in, or has some other connection to that state." *Roco, Inc. v. EOG Res., Inc., No. 14-1065-JAR-KMH, 2014 U.S. Dist. LEXIS 152203, 2014 WL 5430251, at *3 (D. Kan. Oct. 24, 2014)* (first citing *Griffin v. Dugger, 823 F.2d 1476, 1483 (11th Cir. 1987)*; then citing *Thomas v. Metro. Life Ins. Co., 540 F. Supp. 2d 1212, 1226-27 (W.D. Okla. 2008)* (other citations omitted)). Because the Class Complaint names no plaintiff who resides in the 12 states listed above, the court agrees with defendants. The named class plaintiffs lack standing to assert claims **[**109]** under the antitrust laws of these states.

The class plaintiffs argue that a number of courts have refused to dismiss antitrust state law claims at the motion to dismiss stage simply because the complaint includes no named plaintiff from that particular state. But the class plaintiffs cite district court cases from outside the Tenth Circuit to support this position. ***HN25***[] In contrast, the Tenth Circuit has held: "Prior to class certification, the named plaintiffs' failure to maintain a live case or controversy is fatal to the case as a whole—that unnamed plaintiffs might have **[*1311]** a case or controversy is irrelevant." *Thomas v. Metro. Life Ins. Co., 631 F.3d 1153, 1159 (10th Cir. 2011)* (citations omitted); *see also Roco, 2014 U.S. Dist. LEXIS 152203, 2014 WL 5430251, at *4* ("Where the only named plaintiff in a putative class action lacks

[14] The Class Complaint names only one plaintiff who resides in Arizona—Cassandra Bredek. Class Compl. ¶ 14. But Ms. Bredek voluntarily dismissed her claims on February 7, 2018. Doc. 139. So, no Arizona plaintiffs remain in the case.

[15] The Class Complaint names just one plaintiff who resides in Oregon—David Smith. Class Compl. ¶ 50. But Mr. Smith voluntarily dismissed his claims on February 7, 2018. Doc. 139. So, no Oregon plaintiffs remain in the case.

[16] The Class Complaint names just one plaintiff who resides in Vermont—John Dodge. Class Compl. ¶ 58. But Mr. Dodge voluntarily dismissed his claims on February 7, 2018. Doc. 139. So, no Vermont plaintiffs remain in the case.

[17] The Class Complaint names just one plaintiff who resides in Wisconsin—Heather Rutland. Class Compl. ¶ 63. But Ms. Rutland voluntarily dismissed her claims on February 7, 2018. Doc. 139. So, no Wisconsin plaintiffs remain in the case.

standing from the outset of the case, and a class is yet to be certified, the proper course is dismissal." (citations omitted)); *Smith v. Pizza Hut, Inc., No. 09-cv-1632-CMA-BNB, 2011 U.S. Dist. LEXIS 76793, 2011 WL 2791331, at *9 (D. Colo. July 14, 2011)* (holding, "Plaintiff lacks standing to bring claims under state laws to which Plaintiff has never been subjected and the class action claim must therefore be dismissed for lack of standing"). Based on this authority, including the binding Circuit precedent, the court dismisses the antitrust state law claims for which **[**110]** the Class Complaint includes no named plaintiff from that state.

Alternatively, the class plaintiffs seek leave to amend the Class Complaint to cure the absence of certain states' representatives. The court finds it premature to grant such relief. The class plaintiffs provide no information about these additional representatives, including whether they have located any representative from any of these 12 states. To the extent the class plaintiffs identify class representatives from any of these states, they may file an appropriate motion seeking leave to amend the Class Complaint to add them as parties.

Second, defendants argue, the class plaintiffs are indirect purchasers who cannot assert claims for relief under the antitrust laws of Alaska, Arkansas, Illinois, Massachusetts, Missouri, Puerto Rico, Rhode Island, and West Virginia. Defendants assert that these state laws bar indirect purchaser claims.

HN26[] In *Illinois Brick Co. v. Illinois, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1997)*, the Supreme Court held that only direct purchasers may bring claims for damages under the federal antitrust laws. *Id. at 737*. To avoid the *Illinois Brick* rule, some states have passed "repealer" statutes allowing indirect purchasers to recover under state antitrust laws. *See In re Broiler Chicken Antitrust Litig., 290 F. Supp. 3d 772, 818 (N.D. Ill. 2017)*. Here, defendants **[**111]** contend, the class plaintiffs assert claims under certain state laws that still bar indirect purchaser claims consistent with the rule in *Illinois Brick*.

In response to this argument, the class plaintiffs concede that Alaska does not permit indirect purchaser claims. But they stand on their claims asserted under the other seven states' laws. For two of those seven states—Puerto Rico and Rhode Island—the Class Complaint includes no named plaintiff. The court dismisses those claims for the same reason already discussed. Thus, the court need not address defendants' argument that these state laws bar indirect purchaser claims.

For Illinois, defendants assert that the *Illinois Antitrust Act* specifically provides: "[N]o person other than the Attorney General of this State shall be authorized to maintain a class action in any court of this State for indirect purchasers asserting claims under this Act." 740 Ill. Comp. Stat. § 10/7(2); *see also In re Flonase Antitrust Litig., 692 F. Supp. 2d 524, 539 (E.D. Pa. 2010)* (prohibiting plaintiffs from asserting class action claims under the Illinois Antitrust Act because "the Act does not provide relief to indirect purchasers through class actions"). ***HN27***[] But several courts have concluded that the class action prohibition in the Illinois Antitrust Act is **[**112]** procedural in nature and that *Rule 23* applies to determine whether a claim may be brought as a class action. So, because "[t]he availability of the class action procedure does not change the substantive rights or remedies available to [plaintiffs] under Illinois law," courts have refused to **[*1312]** dismiss Illinois Antitrust Act claims "on the basis of the Illinois's class action bar." *In re Broiler Chicken Antitrust Litig., 290 F. Supp. 3d at 818*; *see also, e.g., In re Propranolol Antitrust Litig., 249 F. Supp. 3d 712, 728 (S.D.N.Y. 2017)*; *In re Aggrenox Antitrust Litig., No. 14-MD-2516(SRU), 2016 U.S. Dist. LEXIS 104647, 2016 WL 4204478, at *6 (D. Conn. Aug. 9, 2016)*; *In re Lithium Ion Batteries Antitrust Litig., No. 13-MD-2420-YGR, 2014 U.S. Dist. LEXIS 141358, 2014 WL 4955377, at *21 (N.D. Cal. Oct. 2, 2014)*; *In re TFT-LCD (Flat Panel) Antitrust Litig., No. M 07-1827-SI, 2011 U.S. Dist. LEXIS 97465, 2011 WL 13152270, at *5 (N.D. Cal. Aug. 24, 2011)*. Although these cases are not binding precedent in our Circuit,[18] the court finds their reasoning persuasive. And, for the same reason, the court concludes that the class plaintiffs' Illinois antitrust claims survive dismissal at the pleading stage.

For the West Virginia claim, defendants argue that the state's Code includes a harmonization provision, directing courts to construe the state's Antitrust Act "in harmony with ruling judicial interpretations of comparable federal

---

[18] The parties do not cite, and the court has not located, a Tenth Circuit decision addressing this issue, or even one from a district court within our Circuit.

antitrust statutes." *W. Va. Code § 47-18-16*. Defendants contend that the West Virginia legislature enacted this provision one year after the Supreme Court decided *Illinois Brick* and that **[**113]** it has not otherwise abrogated *Illinois Brick* by statute. But, plaintiffs respond, the West Virginia Attorney General has issued a Legislative Rule providing that "[a]ny person who is injured directly or indirectly by reason of a violation of the *West Virginia Antitrust Act* may bring an action for damages." W. Va. Code St. R. § 142-9-2. Relying on this rule, several federal courts have held that ***HN28***[] the West Virginia Antitrust Act permits indirect purchaser claims. *See, e.g., In re Broiler Chicken Antitrust Litig., 290 F. Supp. 3d at 812*; *In re Chocolate Confectionary Antitrust Litig., 602 F. Supp. 2d 538, 582 n.55 (M.D. Pa. 2009)*; *In re Dynamic Random Access Memory (Dram) Antitrust Litig., 516 F. Supp. 2d 1072, 1097 (N.D. Cal. 2007)*; *In re New Motor Vehicles Canadian Export Antitrust Litig., 350 F. Supp. 2d 160, 173-75 (D. Me. 2004)*; *In re Terazosin Hydrochloride Antitrust Litig., 160 F. Supp. 2d 1365, 1376, n.8 (S.D. Fla. 2001)*. Following the reasoning of these decisions, the court joins them and denies defendants' motion to dismiss the West Virginia antitrust claims.

For the other state antitrust laws, the class plaintiffs rely on case law that does not support their argument that indirect purchasers may bring a cause of action under these state statutes. Instead, the authority that defendants cite establishes that ***HN29***[] indirect purchasers may not bring a cause of action under the antitrust laws of Arkansas,[19] Massachusetts,[20] and **[*1313]** Missouri.[21] The court thus dismisses these state law antitrust claims.

Third, defendants argue that the court must dismiss the California, Kansas, New York, and Tennessee antitrust claims brought in Counts IV, V, and VI (monopolization, attempted monopolization, and tying) because these states do not recognize unilateral conduct claims. The class plaintiffs' response concedes that the New York claims are not viable. Doc. 123 at 83 n.282. The court thus dismisses the New York claims asserted under Counts IV, V, and VI.

For the California claim, the Class Complaint asserts state antitrust claims under *California's Cartwright Act* (*Cal. Bus. & Prof. Code §§ 16700, et seq.*) and California's Unfair Competition Law (*Cal. Bus. & Prof. Code §§ 17200 et seq.*). Class Compl. ¶ 562.e. The Cartwright Act does not prohibit unilateral conduct. *Dimidowich v. Bell & Howell, 803 F.2d 1473, 1478 (9th Cir. 1986)*; *see also Bondi v. Jewels by Edwar, Ltd., 267 Cal. App. 2d 672, 73 Cal. Rptr. 494, 498 (Cal. Ct. App. 1968)* (concluding that Cartwright Act prohibits *agreements* in restraint of trade). But, in

---

[19] Plaintiffs assert their Arkansas antitrust claim under *Ark. Code Ann. § 4-75-212(b)*. Class Compl. ¶ 562.d. That statute authorizes the Attorney General to sue on behalf of persons injured "directly or indirectly." *Ark. Code Ann. § 4-75-212(b)*. Other courts have dismissed indirect purchaser claims brought under similar provisions in the *Arkansas Unfair Practices Act* because they do "not provide for a private individual to bring an action and only permit[ ] actions by the Attorney General." *In re Cast Iron Soil Pipe & Fittings Antitrust Litig., No. 1:14-md-2508, 2015 U.S. Dist. LEXIS 121620, 2015 WL 5166014, at *22 (E.D. Tenn. June 24, 2015)*. *See also In re TFT-LCD (Flat Panel) Antitrust Litig., 599 F. Supp. 2d 1179, 1181 (N.D. Cal. 2009)* (holding that plaintiffs could not "circumvent the restrictions on antitrust claims under Arkansas . . . law by reframing those claims as unjust enrichment actions").

[20] The Massachusetts Supreme Court has held that "indirect purchasers can assert claims for price-fixing or other anticompetitive conduct under *[Mass. Gen. Laws ch.] 93A § 9*, *where they have no standing* [otherwise] to bring such claims under the *Massachusetts Antitrust Act* *[Mass. Gen. Laws ch.] 93 §§ 1-14A*." *Ciardi v. F. Hoffmann-La Roche, Ltd., 436 Mass. 53, 762 N.E.2d 303, 306 (Mass. 2002)* (emphasis added). Here, the class plaintiffs assert their state antitrust claim under the latter chapter that *Ciardi* discusses, *i.e. Mass. Gen. Laws Ch. 93, § 1 et seq.* Class Compl. ¶ 562.l. And, as *Ciardi* holds, an indirect purchaser has no standing to sue under this chapter. *Ciardi, 762 N.E.2d at 306*.

[21] The class plaintiffs' response asserts that the *Missouri Merchandising Practices Act*, *Mo. Rev. Stat. §§ 407.020*, does not bar indirect purchaser suits. But that's not the Missouri antitrust statute that the Class Complaint asserts to support its state antitrust claim. Instead, the Class Complaint relies on *Mo. Rev. Stat. § 416.011, et seq.* And, as several courts have held, "Missouri's antitrust laws . . . prohibit recovery by indirect purchasers." *In re Lithium Ion Batteries Antitrust Litig., No. 13-MD-2420-YGR, 2014 U.S. Dist. LEXIS 141358, 2014 WL 4955377, at *19 (N.D. Cal. Oct. 2, 2014)*; *see **[**114]** also In re Asacol Antitrust Litig., No. 15-cv-12730-DJC, 2016 U.S. Dist. LEXIS 94605, 2016 WL 4083333, at *12 (D. Mass. July 20, 2016)*; *In re Pool Prods. Distrib. Mkt. Antitrust Litig., 946 F. Supp. 2d 554, 570 (E.D. La. 2013)*; *Duvall v. Silvers, Asher, Sher & McLaren, M.D.'s, 998 S.W.2d 821, 824 (Mo. Ct. App. 1999)*.

contrast, the class plaintiffs may assert a claim based on unilateral conduct under California's Unfair Competition Law. *See, e.g., In re Relafen Antitrust Litig., 221 F.R.D. 260, 283 (D. Mass. 2004)*; *In re Terazosin Hydrochloride Antitrust Litig., 160 F. Supp. 2d 1365, 1379 (S.D. Fla. 2001)*. However, the class plaintiffs' remedies under that provision are "generally limited to injunctive relief and restitution." *Cel-Tech Commc'ns, Inc. v. L.A. Cellular Tel. Co., 20 Cal. 4th 163, 83 Cal. Rptr. 2d 548, 973 P.2d 527, 539 (Cal. 1999)*; *see also In re Terazosin Hydrochloride Antitrust Litig., 160 F. Supp. 2d at 1379* (explaining that the "Unfair Competition Law does not authorize awards of damages at law"). The court thus denies **[**115]** defendants' motion to dismiss the claims asserted under California's Unfair Competition Law but dismisses the state antitrust claims based on unilateral conduct and asserted in Counts IV, V, and VI under California's Cartwright Act.

HN30[] For Kansas, the class plaintiffs assert that *Kan. Stat. Ann. § 50-161(b)* permits indirect purchasers to recover if "damaged or injured by any agreement, *monopoly*, trust, conspiracy or combination . . . ." *Id.* (emphasis added). But, as one court has observed, "the *Kansas Monopolies and Unfair Trade Act* . . . by its terms prohibits combinations and conspiracies only." *In re Relafen Antitrust Litig., 221 F.R.D. 260, 283 (D. Mass. 2004)* (citing *Kan. Stat. Ann. § 50-132* ("No person, servant, agent or employee of any person doing business within the state of Kansas shall *conspire or combine* with any other **[*1314]** persons, within or without the state for the purpose of monopolizing any line of business . . . ." (emphasis added))). Thus, *In re Relafin* reasoned, the *Kansas Restraint of Trade Act* does not permit unilateral conduct claims. *Id.* Finding no other case law addressing this issue and finding *In re Relafin*'s reasoning persuasive, the court dismisses the class plaintiffs' Kansas ***antitrust law*** claims based on unilateral conduct and asserted in Counts IV, V, and VI.

For Tennessee, the **[**116]** class plaintiffs assert their state antitrust claims under the *Tennessee Trade Practices Act*, *Tenn. Code Ann. § 47-25-101*. Class Compl. ¶ 562.cc. ***HN31***[] The Tennessee statute "declare[s]" that certain anticompetitive conduct is "against public policy, unlawful, and void." *Tenn. Code Ann. § 47-25-101*. Such conduct includes "all arrangements, contracts, agreements, trusts, or combinations *between persons or corporations* designed, or which tend, to advance, reduce, or control the price or the cost to the producer or the consumer of any such product or article." *Id.* (emphasis added). As one court has explained, "[n]one of these terms appears to include unilateral conduct." *In re Relafen Antitrust Litig., 221 F.R.D. at 283* (citing 6 Julian O. von Kalinowski, *Antitrust Laws and Trade Regulation* § 116.03 (2d ed. 2003)). Likewise, at least two other courts have held that the Tennessee Trade Practices Act does not cover unilateral conduct claims. *See, e.g., In re Flonase Antitrust Litig., 610 F. Supp. 2d 409, 415-16 (E.D. Pa. 2009)*; *In re Ditropan XL Antitrust Litig., 529 F. Supp. 2d 1098, 1108-09 (N.D. Cal. 2007)*.

The class plaintiffs cite only one case where a federal court has permitted antitrust claims asserted under the Tennessee Trade Practices Act to survive a motion to dismiss. *See In re Asacol Antitrust Litig., No. 15-12730-DJC, 2016 U.S. Dist. LEXIS 94605, 2016 WL 4083333, at *15 (D. Mass. July 20, 2016)*. The *Asacol* court relied on two Tennessee cases allowing antitrust claims to proceed under the Act. *Id.* But, as *Asacol* recognized, the two Tennessee cases never addressed **[**117]** whether the statute permits claims based on unilateral conduct. *Id.* The court is not persuaded by *Asacol*'s reasoning, at least not as applied to the unilateral conduct claimed here. Instead, it finds persuasive the federal district court cases cited above. These cases considered the plain language of the Tennessee statute, specifically addressed whether it applies to unilateral conduct, and determined that it does not reach such claims. For this reason, the court dismisses the class plaintiffs' Tennessee antitrust claims based on unilateral conduct, as asserted in Counts IV, V, and VI.

B. RICO Claim

The court now considers whether the class plaintiffs have asserted a plausible RICO claim against defendants. ***HN32***[] *Subsection 1962(c)* of RICO makes it:

> unlawful for any person employed by or associated with any enterprise engaged in, or the activities of which affect, interstate or foreign commerce, to conduct or participate, directly or indirectly, in the conduct of such enterprise's affairs through a pattern of racketeering activity or collection of unlawful debt.

18 U.S.C. § 1962(c). Subsection 1962(d) makes it "unlawful for any person to conspire to violate" subsection 1962(c). *Id.* § 1962(d). RICO also provides a private **[**118]** civil cause of action for those who are injured by violations of § 1962 and allows recovery of treble damages, costs, and attorney fees. *Id.* § 1964(c).

HN33[] When addressing plaintiffs' RICO claim below, the court is mindful that "RICO is to be read broadly." Sedima, S.P.R.L. v. Imrex Co., 473 U.S. 479, 497, 105 S. Ct. 3275, 87 L. Ed. 2d 346 (1985). "To successfully state a RICO claim, a plaintiff must allege four elements: (1) conduct (2) of an enterprise (3) through a **[*1315]** pattern (4) of racketeering activity." Robbins v. Wilkie, 300 F.3d 1208, 1210 (10th Cir. 2002) (citations and internal quotation marks omitted). And, to have standing to assert a RICO claim, the plaintiff must allege that the RICO violation proximately caused plaintiff's injuries. Bixler v. Foster, 596 F.3d 751, 756 (10th Cir. 2010).

Defendants assert eight reasons why the class plaintiffs' RICO claim fails to state a plausible claim as a matter of law. The court concludes that none of these arguments warrant dismissal at the pleading stage. The court explains why in the eight subsections that follow.

1. RICO Enterprise

First, defendants assert that the Class Complaint fails to assert a plausible RICO claim because it never alleges facts capable of supporting a finding or inference of a RICO enterprise. Instead, defendants contend, the Class Complaint alleges only that defendants engaged in arms-length business activities that do not **[**119]** suffice to state a RICO claim.

HN34[] As already described, RICO prohibits a "person" who is associated with an "enterprise" to conduct its affairs through a pattern of racketeering activity. *See* 18 U.S.C. § 1962(c). "RICO broadly defines 'enterprise' as 'any individual, partnership, corporation, association, or other legal entity, and any union or group of individuals associated in fact although not a legal entity.'" George v. Urban Settlement Servs., 833 F.3d 1242, 1248 (10th Cir. 2016) (quoting 18 U.S.C. § 1961(4)).

Here, the class plaintiffs allege that the RICO enterprise is an "association-in-fact enterprise," consisting of the RICO Defendants (Mylan N.V., Mylan Specialty, LP, Heather Bresch, Pfizer, King Pharmaceuticals, and Meridian) and the PBM Conspirators (defined as at least four PBMs: CVS Health Corporation, Express Scripts Inc., Optum Rx Inc., and Prime Therapeutics LLC), "formed for the purpose of engaging in a scheme to defraud the public regarding the pricing of the EpiPen, the medical necessity, quality, and characteristics of EpiPens and the EpiPen 2-Pak, and Mylan's profits and efforts to control the price of the EpiPen." Class Compl. ¶ 604.

HN35[] The Supreme Court has explained that "'an enterprise includes any union or group of individuals associated in fact[,]' and that 'RICO reaches **[**120]** 'a group of persons associated together for a common purpose of engaging in a course of conduct.'" Boyle v. United States, 556 U.S. 938, 944, 129 S. Ct. 2237, 173 L. Ed. 2d 1265 (2009) (quoting United States v. Turkette, 452 U.S. 576, 580, 583, 101 S. Ct. 2524, 69 L. Ed. 2d 246 (1981)). An association-in-fact enterprise requires: (1) "a purpose," (2) "relationships among those associated with the enterprise," and (3) "longevity sufficient to permit these associates to pursue the enterprise's purpose." Id. at 946.

The class plaintiffs assert that their Class Complaint alleges all three requirements of an association-in-fact enterprise. *First*, they assert, the Class Complaint alleges that the common purpose of the "EpiPen Pricing Enterprise" was to overcharge consumers for the EpiPen to enrich defendants. Doc. 123 at 99; Class Compl. ¶¶ 600, 604, 643, 648.

Second, the Class Complaint alleges relationships between the Mylan and Pfizer Defendants and that they worked together to operate and manage the EpiPen Pricing Enterprise. Also, the Class Complaint alleges that the Mylan and Pfizer Defendants worked together to stop generic competition for the EpiPen by filing patent infringement lawsuits between 2009 and 2012 against at least three generic rivals—Teva, Sandoz, and Intelliject. Class Compl. ¶ 629; *see also id.* ¶¶ 236-324. Also, the Class Complaint alleges that Pfizer **[**121]** **[*1316]** (through Meridian) and

Mylan "jointly" settled the Teva Litigation by entering a settlement agreement that secretly restrained competition and ensured that the EpiPen Pricing Enterprise could continue successfully without facing competition from Teva. *Id.* ¶¶ 630-31; *see also id.* ¶ 270 (describing how Mylan and Pfizer issued a joint press release about the Teva settlement); *see also id.* ¶ 277 (describing how Mylan CEO Heather Bresch referred to the Teva settlement as "*our* settlement with Teva") (emphasis added). The Class Complaint also alleges that Mylan Specialty LP took over for Meridian as sponsor of the EpiPen patents in the Orange Book. *Id.* ¶ 247. Although the class plaintiffs don't assert exactly why or how this change occurred, they allege that it shows "concerted action by Mylan and Pfizer to share the burden and rewards of their EpiPen monopoly." *Id.*

The Class Complaint also describes how Mylan and Pfizer's relationship is not completely clear because they never have asserted publicly that they share more than a manufacturer/seller relationship. *Id.* ¶ 632. But, as the Class Complaint describes, commenters have noted that Pfizer received significant revenues from its relationship **[**122]** with Mylan based on EpiPen sales. *Id.* And, the Class Complaint asserts, this shared interest in generating revenues has caused Mylan and Pfizer to work together to ward off competition through patent litigation and unlawful reverse payment settlements. *Id.* ¶ 241 (asserting that Mylan and Pfizer's "divided intellectual property ownership of the EpiPen and their licensing agreements for it have caused the two companies to work collaboratively to enhance the products sales volume and profitability" because their "EpiPen-related revenues rise (or fall) together").

Defendants argue that these allegations only describe how Pfizer defended its patent rights and provided Mylan products subject to a routine commercial arrangement. Defendants characterize these allegations as "routine business relationships" that cannot establish a RICO claim. Doc. 95 at 67 (first citing *Robins v. Glob. Fitness Holdings, LLC, 838 F. Supp. 2d 631, 652-53 (N.D. Ohio 2012)*; then citing *Brannon v. Boatmen's First Nat'l Bank of Okla., 153 F.3d 1144, 1148 (10th Cir. 1998)* (affirming dismissal of a RICO claim because plaintiffs' "allegations do nothing more than define a legitimate corporate and financial relationship between [defendant] and its holding company.") (further citations omitted)). But, construing the Class Complaint as describing just "routine business relationships" **[**123]** requires the court to draw inferences against the class plaintiffs' allegations. And that is not a proper endeavor for the court on a motion to dismiss. Instead, the court must take plaintiffs' allegations as true and view them in the light most favorable to the class plaintiffs. *Mayfield v. Bethards, 826 F.3d 1252, 1255 (10th Cir. 2016)*. Applying that standard, one plausibly can infer from the Class Complaint's allegations that the Mylan and Pfizer Defendants—persons or entities associated with the enterprise—formed relationships sufficient to satisfy the pleading requirements for a RICO enterprise.

Defendants also argue that the class plaintiffs' allegations about PBMs fail to allege adequately their participation in a RICO enterprise. The Class Complaint alleges, during the past decade, "the PBM Conspirators and other PBMs began to exert influence in their role as insurance-industry middle-men to dictate the success or failure of certain drugs in the marketplace by offering to include or threatening to exclude certain medications from some or all of their formularies and, in the process, extracting hundreds of millions of dollars in the form of 'discounts' or 'rebate' **[*1317]** payments from drug manufacturers in exchange." Class Compl. ¶ 636. The **[**124]** class plaintiffs assert that PBMs and drug manufacturers engage in negotiations during "complex, closed-door meetings, during which PBMs sell access to their formularies in exchange for large rebates or discounts, a substantial portion of which they pocket as pure profit." *Id.* ¶ 637. During those negotiations, the class plaintiffs contend, the RICO Defendants "participated in a scheme *with the PBM Conspirators* to increase the list price of the EpiPen." *Id.* ¶ 638 (emphasis added). The purpose of the RICO Defendants' scheme was to "[t]o facilitate the payment of 'rebates' to PBMs, and ensure their position on certain formularies without impacting their bottom line." *Id.* And also, the scheme "increase[d] the profits of PBMs through artificially increasing the list price of EpiPens" to the detriment of consumers. *Id.* ¶ 639.

The Class Complaint describes how the RICO Defendants and PBM Conspirators advanced the goals of the EpiPen Pricing Enterprise allegedly by "affirmatively misrepresent[ing] or conceal[ing] the existence of the inflated and fraudulent nature of these list price increases as well as the existence, amount, and purpose of the discounts given to the PBM Conspirators to Plaintiffs, **[**125]** the Classes, consumers, health care payers, and the general public." *Id.* ¶ 641. Also, the Class Complaint alleges that the PBM Conspirators "exerted substantial control over the

EpiPen Pricing Enterprise, and participated in the affairs of the enterprise" through a variety of specific actions. *Id.* ¶ 651. This conduct includes the PBM Conspirators' negotiating and offering to discount the EpiPen; misrepresenting and concealing the existence, amount, and purpose of the EpiPen discounts; misrepresenting and concealing the true nature of the relationship and agreements between the enterprise's members as well as its effect on the pricing of the EpiPen; and, ensuring that the other RICO Defendants and members of the EpiPen Pricing Enterprise concealed the fraudulent scheme. *Id.*

Defendants characterize these allegations as "[a] commercial negotiation, where the parties have their own independent business interests and one party demands higher rebates and lower prices from the other." Doc. 95 at 69. And, they contend, "[t]o recognize a RICO enterprise here would be tantamount to holding that negotiating strategies by PBMs, insurers, state Medicaid agencies, and other healthcare payors throughout **[**126]** the U.S. amount to organized criminal conduct—which obviously cannot be, and is not, the law." *Id.* Perhaps a factfinder would accredit defendants' characterization of these interactions. But it might not, and the court cannot accept defendants' characterization of the allegations at the pleading stage. Instead, when one accepts the allegations as true and views them in the class plaintiffs' favor, one reasonably can infer that the PBMs' alleged conduct amounted to far more than a commercial negotiation. Instead, the Class Complaint alleges that the PBMs formed relationships with defendants sufficient to plead a plausible RICO enterprise.

And finally, the Class Complaint alleges an enterprise with longevity sufficient to permit the associates to pursue the enterprise's purpose. The class plaintiffs assert that, beginning at least on January 1, 2009, to the present, the associates have engaged in various activities to pursue the enterprise's purpose. Class Compl. ¶¶ 601, 629 (discussing how the Mylan and Pfizer Defendants worked together to stop generic competition for the EpiPen by filing patent infringement lawsuits throughout 2009 to 2012); 642, 655-56. The Class Complaint plausibly **[**127]** pleads a RICO enterprise.

[*1318] 2. Conducted the Affairs of a RICO Enterprise

HN36[] Next, defendants assert that the Class Complaint never alleges that defendants "conduct[ed] or participate[d], directly or indirectly, in the conduct of such enterprise's affairs through a pattern of racketeering activity . . . ." *18 U.S.C. § 1962(c)*. As the Supreme Court has explained, RICO liability "'depends on showing that the defendants conducted or participated in the conduct of the "*enterprise's* affairs," not just their *own* affairs.'" *Cedric Kushner Promotions, Ltd. v. King, 533 U.S. 158, 163, 121 S. Ct. 2087, 150 L. Ed. 2d 198 (2001)* (quoting *Reves v. Ernst & Young, 507 U.S. 170, 185, 113 S. Ct. 1163, 122 L. Ed. 2d 525 (1993))*.

HN37[] Our Circuit has described *Reves*'s "operation and management test" as a standard requiring the defendant to have "'some part in directing' the enterprise's affairs." *George v. Urban Settlement Servs., 833 F.3d 1242, 1251 (10th Cir. 2016)* (quoting *Reves, 507 U.S. at 179*). "But importantly, the defendant need not have 'primary responsibility for the enterprise's affairs,' 'a formal position in the enterprise,' or 'significant control over or within an enterprise.'" *Id.* (quoting *Reves, 507 U.S. at 179* & n.4, 184). This test requires less. "Instead, even 'lower rung participants in the enterprise who are under the direction of upper management' may be liable under RICO if they have 'some part' in operating or managing the enterprise's affairs." *Id.* (quoting *Reves, 507 U.S. at 179, 184)*. Yet, allegations that simply describe a defendant's **[**128]** conduct "through its regular course of business, goods and services that ultimately benefit the enterprise" do not suffice to state a RICO claim. *Id.* (citing *BancOklahoma Mortg. Corp. v. Capital Title Co., 194 F.3d 1089, 1101-02 (10th Cir. 1999))*.

Here again, defendants assert that the Class Complaint alleges nothing more than two corporations pursuing routine, arms-length business activities. And, they contend, these activities fail to allege conduct or participation in the RICO *enterprise's* affairs instead of simply their *own* affairs. The court disagrees with defendants' construction of the Class Complaint's allegations.

Instead, as the court already has described, one plausibly can infer from the Class Complaint's allegations that the Mylan and Pfizer Defendants worked together to operate and manage the EpiPen Pricing Enterprise. Class Compl. ¶ 600. Specifically, the Class Complaint alleges that the Mylan Defendants committed various acts as part of a scheme to defraud the public about the EpiPen's pricing, the medical necessity, quality, and characteristics of the EpiPen, and the EpiPen 2-Pak. *See, e.g., id.* ¶ 604; *see also id.* ¶¶ 152, 229, 325-47, 354. And the Class Complaint alleges that the Mylan and Pfizer Defendants, working together, participated in various conduct **[**129]** designed to stifle generic competition, *e.g.*, filing patent infringement lawsuits and then resolving those lawsuits through unlawful reverse payment settlements. *Id.* ¶¶ 629-31; *see also id.* ¶¶ 236-324. These alleged facts permit a reasonable inference that both the Mylan and Pfizer Defendants "played some part—even a bit part—in conducting the enterprise's affairs." *George, 833 F.3d at 1252*. And these allegations suffice to support a plausible RICO claim.

3. Pattern of Racketeering Activity

Defendants next argue that the Class Complaint never alleges a "pattern of racketeering activity," as *18 U.S.C. § 1962(c)* requires. ***HN38***[] The RICO statute defines a "pattern" of racketeering as "at least two acts of racketeering activity, . . . **[*1319]** which occurred within ten years" of one another. *18 U.S.C. § 1961(5)*. But "proof of two or more predicate acts [is] not sufficient to prove a pattern unless there is a relationship between the predicate acts and a threat of continuing activity." *Tal v. Hogan, 453 F.3d 1244, 1267 (10th Cir. 2006)* (first citing *H.J. Inc. v. Nw. Bell Tel. Co., 492 U.S. 229, 239, 109 S. Ct. 2893, 106 L. Ed. 2d 195 (1989)*; then citing *Duran v. Carris, 238 F.3d 1268, 1271 (10th Cir. 2001))*. "Continuity of threat requires both proof of 'a series of related predicates extending over a substantial period of time,' as well as a 'showing that the predicates themselves involve a distinct threat of long-term racketeering activity . . . or that the **[**130]** predicates are a regular way of conducting the defendant's ongoing legitimate business or the RICO enterprise.'" *Id.* (quoting *Resolution Tr. Corp. v. Stone, 998 F.2d 1534, 1543 (10th Cir. 1993))*.

Defendants assert that the Class Complaint, at best, makes conclusory allegations of a pattern of racketeering activity. Defendants describe the Class Complaint to allege unrelated predicate acts with just one thing in common—they simply involve Mylan and the EpiPen. Defendants thus assert that these allegations lack the common thread tying them together, as required to support a plausible RICO claim.

This simply is wrong. Defendants read the class plaintiffs' allegations disjunctively. But, when one views the Class Complaint's allegations in the class plaintiffs' favor and collectively, the allegations describe predicate acts made as part of the EpiPen pricing scheme—*i.e.*, defendants' fraudulent scheme caused American consumers to pay artificially inflated prices for the EpiPen. As defendants recognize, the Class Complaint alleges that defendants used the mails and the wires to disseminate fraudulent information and corrupted an official proceeding. *See, e.g.*, Class Complaint ¶¶ 655.a. (describing how Ms. Bresch made several statements about Mylan's intent **[**131]** to add more patents in a 2009 quarterly earnings call), 655.c. (describing Mylan and Pfizer's joint announcement of its settlement agreement with Teva which, the class plaintiffs contend, really was a pay-for-delay settlement), 655.g. (asserting that Ms. Bresch made several false statements when she testified before Congress on September 21, 2016). One can infer from these alleged facts that the common thread among the predicate acts is that defendants made these communications to advance their EpiPen pricing scheme. *See id.* ¶ 659 (asserting that "[t]o effectuate the goals of the EpiPen Pricing Enterprise, including but not limited to maximizing profit and controlling a dominant market position, the RICO Defendants . . . launched a campaign of false and misleading statements and actions to distract consumers and regulators from the reality that the RICO Defendants were raising the price of the EpiPen from $100 to $600" that included Mylan's false statements about competitors, Mylan and Pfizer's "pay-fordelay" settlements, and Ms. Bresch's alleged false testimony to Congress about Mylan's profits). These facts suffice to allege a pattern of racketeering activity. *See George v. Urban Settlement Servs., 833 F.3d 1242 1254-1257 (10th Cir. 2016)* **[**132]** (holding that plaintiffs adequately alleged a pattern of racketeering activity because their complaint asserted defendants committed several acts of mail and wire fraud while executing a fraudulent scheme to deny Home Affordable Modification Program loans to eligible borrowers); *see also Resolution Tr. Corp., 998 F.3d at 1543* (holding that sufficient evidence of a pattern of racketeering activity existed to support the jury's finding because the "jury could find that the wire fraud activity was associated with ongoing acts of fraud").

[*1320] ***HN39***[] Also, our Circuit recognizes that "[w]hether a pattern [of racketeering activity] exists is a question of fact for the jury to determine." *Resolution Tr. Corp., 998 F.2d at 1543*; *see also Tal, 453 F.3d at 1268* (holding that "because the extensiveness of the threat is a question of fact" the court would "assume for the purposes of this opinion that the predicate acts alleged . . . establish a pattern of racketeering activity"). Here, the Class Complaint sufficiently alleges facts that, if true, would permit a jury to find or infer a pattern of racketeering activity and thus support a RICO claim.

4. RICO Causation

Defendants next assert that the class plaintiffs' RICO claim fails because the Class Complaint never alleges causation. ***HN40***[] To state a plausible **[**133]** RICO claim, a plaintiff must allege that he was a "person injured in his business or property by reason of a violation of *section 1962* of this chapter." *18 U.S.C. § 1964(c)*. The Supreme Court has interpreted this provision as one requiring a RICO plaintiff's damages to "flow from the commission of the predicate acts." *Sedima, S.P.R.L. v. Imrex Co., Inc., 473 U.S. 479, 497, 105 S. Ct. 3275, 87 L. Ed. 2d 346 (1985)*; *see also* *Hemi Grp., LLC v. City of New York, 559 U.S. 1, 13, 130 S. Ct. 983, 175 L. Ed. 2d 943 (2010)* ("[T]he compensable injury flowing from a [RICO] violation . . . necessarily is the harm caused by [the] predicate acts." (citations and internal quotation marks omitted)).

Section 1964(c)'s causation requirement requires a RICO plaintiff to allege "'that the defendant's violation not only was a "but for" cause of his injury, but was the proximate cause as well . . . .'" *Bridge v. Phoenix Bond & Indem. Co., 553 U.S. 639, 654, 128 S. Ct. 2131, 170 L. Ed. 2d 1012 (2008)* (quoting *Holmes v. Sec. Inv'r Prot. Corp., 503 U.S. 258, 268, 112 S. Ct. 1311, 117 L. Ed. 2d 532 (1992))*. The Supreme Court has defined RICO proximate causation as "a flexible concept that does not lend itself to 'a black-letter rule that will dictate the result in every case.'" *Id.* (quoting *Holmes, 503 U.S. at 272 n.20* (further citations and internal quotation marks omitted)). Instead, proximate cause provides a "'label generically [for] the judicial tools used to limit a person's responsibility for the consequences of that person's own acts . . . .'" *Id.* (quoting *Holmes, 503 U.S. at 268*). And it includes "a particular emphasis on the 'demand for some direct relation between the **[**134]** injury asserted and the injurious conduct alleged.'" *Id.* (quoting *Holmes, 503 U.S. at 268*).

HN41[] Thus, "'[w]hen a court evaluates a RICO claim for proximate causation, the central question it must ask is whether the alleged violation led directly to the plaintiff's injuries.'" *Safe Streets All. v. Hickenlooper, 859 F.3d 865, 889 (10th Cir. 2017)* (quoting *Anza v. Ideal Steel Supply Corp., 547 U.S. 451, 461, 126 S. Ct. 1991, 164 L. Ed. 2d 720 (2006))*. The Supreme Court has instructed that "no need [exists] to broaden the universe of actionable harms to permit RICO suits by parties who have been injured only indirectly.'" *Id.* (quoting *Anza, 547 U.S. at 460*).

But, in the context of RICO claims premised on predicate acts of mail fraud, the Supreme Court has held that "a plaintiff is not required to plead that he is a victim of the defendant's underlying crime (*e.g.*, that he relied on the fraudulent mailings) to establish a direct injury." *Id.* (citing *Bridge, 553 U.S. at 649-50*). "Rather, a plaintiff may establish proximate causation by plausibly pleading that his business or property has been directly injured as a result of the **[*1321]** defendants' *§ 1962* violation." *Id.* (citing *Bridge, 553 U.S. at 649-50*).

Here, the Class Complaint alleges, defendants' pattern of racketeering activity has injured the class plaintiffs in their business or property. Class Compl. ¶¶ 680, 682. The Class Complaint also asserts that defendants' fraudulent scheme has allowed them to "illegally **[**135]** extract[ ] revenues of millions or billions of dollars from Plaintiffs and the Class." *Id.* ¶ 602. More precisely, the class plaintiffs allege, "but for" defendants' unlawful conduct, the class plaintiffs "would have paid less for both branded and generic versions of EpiPen by: (a) substituting their purchases of EpiPen with less-expensive generic versions of EpiPen; (b) purchasing generic EpiPen at lower prices sooner; (c) purchasing individual, rather than pairs, of EpiPen injectors; (d) buying spare auto-injectors that were generic or cheaper brands; and (e) purchasing branded EpiPen at a reduced price." *Id.* ¶ 492.

One reasonably can infer from these allegations that defendants' actions produced the alleged harm—*i.e.*, paying inflated prices for the EpiPen. Defendants disagree, asserting the Class Complaint alleges no plausible relationship between defendants' alleged false and fraudulent statements and the class plaintiffs' purchasing decisions. *See* Doc. 219 at 36. The court reads the Class Complaint quite differently. ***HN42***[] As *Bridge* held, to state a plausible

RICO claim, the class plaintiffs need not plead that they relied on the alleged false statements when purchasing the EpiPen. *Bridge, 553 U.S. at 649-50*. **[**136]** Instead, they must allege plausibly that defendants' RICO violation injured their business or property directly. Here, the class plaintiffs' allegations satisfy that pleading burden.

The class plaintiffs allege that the fraudulent statements advanced defendants' pricing scheme in several ways. They include forcing consumers to purchase the EpiPen 2-Pak (instead of individual EpiPens), restricting access to generic competition, and driving up the EpiPen's price (from $100 in 2007 to more than $600 in 2016). Class Compl. ¶¶ 600, 655, 657, 659, 664. It is plausible to infer from these allegations that defendants' conduct injured the class plaintiffs directly. With this conduct, the class plaintiffs allege, defendants effectively limited consumers' purchasing decisions by restricting consumer access to competing products—all while hiking the price of the EpiPen and thus forcing consumers to pay inflated prices.

The class plaintiffs are suing to recover for their own injuries—as EpiPen consumers or third-party payors—from having to pay the inflated prices for the EpiPen. *See* *Safe Streets, 859 F.3d at 890* (holding that plaintiffs stated a RICO claim because they sought "to recover for injuries to their own land, not harms **[**137]** to third parties"); *In re Neurontin Mktg. and Sales Practices Litig., 712 F.3d 21, 37 (1st Cir. 2013)* (affirming RICO verdict because the jury could infer from the evidence that plaintiff was a "primary and intended victim" of defendants' "scheme to defraud"). And one plausibly can infer from the Class Complaint that the class plaintiffs' alleged injuries were "a foreseeable and natural consequence of [defendants'] scheme" to defraud the public about the EpiPen's price. *See* *Bridge, 553 U.S. at 658* (concluding that the "alleged injury—the loss of valuable liens—is the direct result of petitioner's fraud" because "[i]t was a foreseeable and natural consequence of petitioners' scheme to obtain more liens for themselves that other bidders would obtain fewer liens"); *see also* *In re Avandia Mktg., Sales Practices & Prod. Liab. Litig., 804 F.3d 633, 645 (3d Cir. 2015)* (holding plaintiffs pleaded direct injury sufficient to satisfy the RICO proximate causation requirement—regardless **[*1322]** of whether plaintiffs had relied on the alleged misrepresentations because the alleged "fraudulent scheme could have been successful only if plaintiffs paid for [a drug used to treat Type II diabetes], and this is the very injury that plaintiffs seek recovery for"); *Safe Streets, 859 F.3d at 890* (holding that plaintiffs stated a plausible RICO claim because the complaint alleged "[n]o intermediary break[ ] [in] the casual chain" between **[**138]** the enterprise's RICO violations and the plaintiffs' injuries). The court finds the class plaintiffs' allegations sufficient to allege RICO causation.

5. Predicate Acts of Racketeering Activity

Next, defendants assert that the Class Complaint never alleges any racketeering activity sufficient to support a RICO claim. "'***HN43***[🡅] RICO is founded on the concept of racketeering activity.'" *Safe Streets, 859 F.3d at 882* (quoting *RJR Nabisco, Inc. v. European Cmty., 136 S. Ct. 2090, 2096, 195 L. Ed. 2d 476 (2016))*. This statute "defines 'racketeering activity' to encompass dozens of state and federal offenses, known in RICO parlance as predicates." *Id.* (quoting *RJR, 136 S. Ct. at 2097*). "'These predicates include any act "indictable" under specified federal statutes . . . . '" *Id.* (quoting *RJR, 136 S. Ct. at 2096* (quoting *18 U.S.C. § 1961(1)*)). Such predicates include those "indictable" under 18 U.S.C. "*section 1341* (relating to mail fraud)," "*section 1343* (relating to wire fraud)," and "*section 1512* (relating to tampering with a witness, victim, or an informant)." *18 U.S.C. § 1961(1)(B)*.

Here, the Class Complaint alleges that defendants engaged in a pattern of racketeering activity involving mail and wire fraud, violating *18 U.S.C. §§ 1341* & *1343*. Class Compl. ¶¶ 652, 654.a., 654.b. It also alleges that the Mylan Defendants corrupted an official proceeding, violating *18 U.S.C. § 1512(c)(2)*, by having Ms. Bresch testify falsely before Congress on September 21, 2016. *Id.* ¶¶ **[**139]** 653, 654.c.

HN44[🡅] "To support the mail and wire fraud allegations, the plaintiffs must plausibly allege 'the existence of a scheme or artifice to defraud or obtain money or property by false pretenses, representations or promises,' and that [defendants] communicated, or caused communications to occur, through the U.S. mail or interstate wires to execute that fraudulent scheme." *George v. Urban Settlement Servs., 833 F.3d 1242, 1254 (10th Cir. 2016)* (quoting *Tal v. Hogan, 453 F.3d 1244, 1263 (10th Cir. 2006))*. "And because *Fed. R. Civ. P. 9(b)* requires a plaintiff to plead mail and wire fraud with particularity, the plaintiffs must 'set forth the time, place and contents of the false representation, the identity of the party making the false statements and the *consequences thereof*.'" *Id.* (quoting *Koch v. Koch Indus., Inc., 203 F.3d 1202, 1236 (10th Cir. 2000))* (emphasis added).

Defendants assert that the Class Complaint never identifies the consequences of the alleged fraudulent communications. More specifically, they contend that the class plaintiffs' allegations never identify how defendants' fraudulent mail and wire communications advanced the alleged scheme to defraud. *See* Doc. 219 at 36. Separately, the Pfizer Defendants assert that the RICO claim fails to state a plausible claim because the class plaintiffs never alleged any predicate acts by any of the Pfizer Defendants, as required to **[**140]** support the claim. *See* Doc. 93 at 20. The court rejects defendants' arguments.

The class plaintiffs have alleged that defendants made various false representations using the mails and wires—including press releases and earnings calls. The Class Complaint describes the time, place, contents, and identity of the person making the allegedly false statements. **[*1323]** Class Compl. ¶ 655. And, the class plaintiffs allege, the purpose of the communications was "to fraudulently mislead and deceive American consumers to purchase the EpiPen at an inflated price, to purchase the EpiPen as a 2-Pak only, and to cause consumers to pay an artificially inflated price for EpiPens." *Id.* ¶ 600. These communications include various representations about the medical necessity of the EpiPen 2-Pak. The class plaintiffs allege that these representations were false and misleading because they relied on flawed medical studies and paid-for medical opinions. The communications also include various representations about Mylan's efforts to provide "free" EpiPens to schools and to encourage anaphylaxis awareness. *Id.* ¶¶ 655.d., 655.e., 659.a. But, the class plaintiffs allege, these representations were fraudulent because **[**141]** Mylan actually used the school program as an anticompetitive means to implement exclusive dealing contracts, hook consumers on the EpiPen, and then raise the EpiPen price. *Id.* ¶¶ 655.d., 655.e., 655.g.iii.

The alleged fraudulent communications also include jointly issued statements about Mylan and Pfizer's patent litigation settlements. The Pfizer Defendants assert that their settlement of patent litigation cannot support a predicate act. The court doesn't read the class plaintiffs' allegations that way. Instead, the class plaintiffs allege that Mylan and Pfizer entered into unlawful reverse payment settlements, but then—together—issued false press releases describing the settlements as a legitimate means to resolve patent litigation. One reasonably can infer the Class Complaint to allege that defendants advanced their scheme to inflate the price of the EpiPen by fraudulently representing to the public that they were resolving valid patent litigation. But the class plaintiffs allege that defendants, in reality, used the patent litigation and resulting "pay-for-delay" settlements as a means to prevent generic competition, to protect the EpiPen monopoly, and to continue raising prices **[**142]** on the EpiPen. Indeed, the Class Complaint alleges that the "pay-for-delay" settlements "concealed from consumers the true, anticompetitive aims of its pay-for-delay arrangements." *Id.* ¶ 659.e.

It is reasonable to infer from these allegations that defendants' communications fraudulently misled, deceived, and caused American consumers to purchase the EpiPen at an inflated price. These allegations sufficiently set forth the "time, place and contents of the false representation, the identity of the party making the false statements and the consequences thereof" and thus state a plausible RICO claim. *George, 833 F.3d at 1254*.

Defendants also assert that the Class Complaint fails to plead facts capable of supporting a violation of *18 U.S.C. § 1512(c)(2)* for corrupting an official proceeding. ***HN45***[] This statute makes it unlawful to "obstruct[ ], influence[ ], or impede[ ] any official proceeding, or attempt[ ] to do so," and imposes a "fine[ ] under this title or imprison[ment] not more than 20 years, or both." *18 U.S.C. § 1512(c)(2)*. The Class Complaint alleges that Ms. Bresch corruptly influenced an official proceeding by giving false testimony before Congress. Class Complaint ¶¶ 654.c., 655.g., 659.h., 659.i. Defendants assert that the class plaintiffs provided **[**143]** "no evidence" and only "bald assertions" to support the allegation that Ms. Bresch's testimony was false. Doc. 95 at 77. Defendants characterize the class plaintiffs' allegations as merely "subjective disagree[ment]" with Ms. Bresch's testimony that cannot support an obstruction violation. Doc. 219 at 38. At the pleading stage, the court cannot weigh the class plaintiffs' allegations and determine whether they describe false testimony or simply report subjective disagreement with Ms. Bresch's statements. Instead, **[*1324]** taking the allegations as true, the class plaintiffs assert that Mr. Bresch testified before Congress on September 21, 2016, and that she repeatedly gave false testimony about a number of topics in an effort to advance defendants' ongoing scheme to defraud consumers into purchasing the EpiPen at inflated prices. These allegations are sufficient to state a plausible § 1512(c)(2) violation.

6. Standing

Defendants assert that the class plaintiffs lack standing to assert a RICO claim for two reasons. Neither one permits the court to dismiss the RICO claim at the pleading stage.

First, defendants contend that the class plaintiffs—as indirect purchasers—lack standing to assert a RICO claim. **HN46**[] The **[**144]** Tenth Circuit has recognized, albeit in the antitrust context, that "only the direct purchaser, and no other [person] in the distribution chain, is the 'party injured'" who "may sue for and recover the full amount of the illegal overcharge." *In re Wy. Tight Sands Antitrust Cases, 866 F.2d 1286, 1290 (10th Cir. 1989)* (first citing *Hanover Shoe, Inc. v. United Shoe Machinery Corp., 392 U.S. 481, 88 S. Ct. 2224, 20 L. Ed. 2d 1231 (1968)*; then citing *Illinois Brick Co. v. Illinois, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977))*. Citing cases from outside the Tenth Circuit, defendants argue that the court should apply this rule to civil RICO claims. *See* Doc. 95 at 77-78 (citing *McCarthy v. Recordex Serv., Inc., 80 F.3d 842, 855 (3d Cir. 1996)* (further citations omitted)).

The class plaintiffs respond that such a rule defies the Tenth Circuit's most recent guidance about standing—*i.e.*, a RICO plaintiff has standing if he has pleaded proximate causation. *See* Safe Streets, 859 F.3d at 887 (holding that "RICO standing" is determined under "the usual pleading-stage inquiry: whether the plaintiff has plausibly pled a cause of action under RICO"); *see also* *id. at 885* (explaining that a RICO claim requires "(1) injuries to [plaintiffs'] property (2) that were caused by those [RICO] violations"); *Bixler v. Foster, 596 F.3d 751, 756 (10th Cir. 2010)* ("A plaintiff has standing only if his injuries were proximately caused by the RICO violation."). The class plaintiffs also assert that applying the indirect-purchaser rule is contrary to the Supreme Court's decision in *Bridge*, holding that first-party reliance **[**145]** is not required to allege RICO causation. *See* Bridge, 553 U.S. at 649-50.

HN47[] Indeed, the Supreme Court has recognized in the RICO context that its requirements for "antitrust injury" have "no analogue in the RICO setting." *Holmes v. Sec. Inv'r Prot. Corp., 503 U.S. 258, 269 n.15, 112 S. Ct. 1311, 117 L. Ed. 2d 532 (1992)*. And, the Court has cautioned, "our use of the term 'direct' should merely be understood as a reference to the proximate-cause enquiry that is informed by the concerns set out in the text. We do not necessarily use it in the same sense as courts before us have and [we] intimate no opinion on results they reached." *Id. at 272 n.20*; *see also* *Israel Travel Advisory Serv., Inc. v. Israel Identity Tours, 61 F.3d 1250, 1257 (7th Cir.)*, *cert. denied*, *517 U.S. 1220, 116 S. Ct. 1847, 134 L. Ed. 2d 948 (1995)* ("The Supreme Court observed that it did not mean to preclude all possibility of recovery for injury that was transmitted indirectly; the holding of *Holmes* is no more than that common law ideas about proximate causation inform the understanding of RICO." (citation omitted)). Instead, the Supreme Court has recognized that "the infinite variety of claims that may arise [under RICO] make it virtually impossible to announce a black-letter rule that will dictate the result in every case" for determining whether an alleged **[*1325]** RICO violation was the proximate cause of a plaintiff's injuries. *Id.*

Because defendants just cite cases from outside the Tenth Circuit to support **[**146]** their argument that indirect purchasers lack RICO standing,[22] the court declines to apply that rule here. Instead, applying the guidance from our Circuit in *Safe Streets*, the court already has determined that the class plaintiffs adequately have alleged that defendants' RICO violations proximately caused their injuries. *See supra* Part III.B.4. These allegations suffice to confer RICO standing. *See* Safe Streets, 859 F.3d at 886-890; *see also* Bixler, 596 F.3d at 756.

---

[22] Although defendants cite a District of New Mexico case to support their argument, the cited case never holds that indirect purchasers lack RICO standing. *See* *N.M. Oncology & Hematology Consultants, Ltd. v. Presbyterian Healthcare Servs., 54 F. Supp. 3d 1189 (D.N.M. 2014)*. Instead, the New Mexico court applied Supreme Court and Tenth Circuit precedent to determine whether plaintiff had alleged proximate causation because "proximate cause is necessary to confer [RICO] standing." *Id. at 1244*; *see also* *id. at 1245* ("To have standing to pursue these claims, Plaintiff must allege facts that support a finding of proximate cause.").

Second, defendants assert the class plaintiffs lack RICO standing because they cannot assert a claim based on overpaying for pharmaceuticals when they received the benefit of their bargain, *i.e.*, effective drugs. To support this argument, defendants cite two cases from the District of New Jersey. *See In re Schering-Plough Corp. Intron/Temodar Consumer Class Action, No. 2:06-cv-5774, 2009 U.S. Dist. LEXIS 58900, 2009 WL 2043604, at *10 (D.N.J. July 10, 2009)* (dismissing plaintiffs' RICO claims for failing to allege a plausible injury based on paying an inflated price for pharmaceuticals because "purchasers of pharmaceutical products have no private cause of action where they receive the benefit of their bargain in the form of effective drugs"); *see also Dist. 1199P Health & Welfare Plan v. Janssen, L.P., 784 F. Supp. 2d 508, 519 (D.N.J. 2011)* (dismissing RICO claim because "[p]laintiffs' injury theory based on financial **[**147]** losses of overpayment" for pharmaceuticals "is inadequate for sustaining a RICO injury, absent allegations that Defendants' drug was on some level inferior and therefore worth less than what [Plaintiffs] paid for it" (citations and internal quotation marks omitted)).

The persuasive value of these two cases is tempered by the Third Circuit's more recent decision, *In re Avandia Marketing, Sales Practices & Product Liability Litigation, 804 F.3d 633 (3d Cir. 2015)*. In that case, a defendant pharmaceutical manufacturer argued that plaintiffs lacked standing to bring RICO claims because plaintiffs never alleged that they received unsafe or ineffective prescriptions. Instead, defendant argued, plaintiffs "received exactly what they bargained for" and thus had "not suffered a concrete injury." *Id. at 639*. The Third Circuit disagreed. *Id. at 639-40*. It held that plaintiffs' "damages do not depend on the effectiveness of the [drug] that they purchased, but rather on the inflationary effect that [defendant's] allegedly fraudulent behavior had on the price of [the drug]." *Id. at 640*. The court thus held that plaintiffs had alleged a concrete RICO injury in the form of overpaying for pharmaceutical products. *Id.*

In reaching this conclusion, the Third Circuit explained that defendant's reliance on *In re Schering-Plough Corp. Intron/Temodar* ***[**148]*** *Consumer Class Action* was misplaced. It recognized that the district court in that case "held that the plaintiffs lacked standing to assert [an injury based on economic loss] because they failed to allege that any consumers or beneficiaries received inadequate drugs or suffered personal **[*1326]** injuries." *Id.* (citing *In re Schering-Plough Corp. Intron/Temodar Consumer Class Action, 2009 U.S. Dist. LEXIS 58900, 2009 WL 2043604, at *16)*. But, on appeal, the Third Circuit "affirmed the District Court on causation grounds." *Id.* (citing *In re Schering-Plough Corp. Intron/Temodar Consumer Class Action, 678 F.3d 235, 246 (3d Cir. 2012))*. The Third Circuit explained its reasoning this way: "To the extent we agreed with the District Court's injury analysis in that case, we did so in dictum, not in binding precedent." *Id.* (citing *In re Schering-Plough Corp. Intron/Temodar Consumer Class Action, 678 F.3d at 246*). For the same reasons, defendants' reliance on that case here is misplaced.

And just as importantly, defendants cite no cases from the Tenth Circuit holding that a RICO plaintiff lacks standing to assert a claim for overpaying for pharmaceuticals when the plaintiff receives the benefit of the bargain in the form of purchasing effective drugs, even at inflated prices. The court declines to apply the holdings from the District of New Jersey cases here, as defendants urge. Instead, the court predicts that the Tenth Circuit would find more persuasive the Third Circuit's reasoning in the *Avandia* ***[**149]*** *Marketing Sales Practices & Product Liability Litigation* case and adopt it. And, the court believes, the Circuit would conclude that the class plaintiffs have alleged a plausible injury here by asserting that they paid inflated prices for the EpiPen—prices that defendants produced with alleged unlawful conduct. *See, e.g.*, Class Compl. ¶ 492 (asserting that "but for defendants' unlawful conduct . . . Plaintiffs and Class Members would have paid less for both branded and generic versions of EpiPen" and that "Plaintiffs and other members of the Class have sustained substantial losses and property in the form of overcharges, the exact amount of which will be the subject of proof at trial.").

7. RICO Conspiracy

HN48[] *Subsection 1962(d)* makes it "unlawful for any person to conspire to violate" *subsection 1962(c)*. *18 U.S.C. § 1962(d)*. Defendants assert that the Class Complaint fails to state a plausible RICO claim under *§ 1962(c)*, and so, it also fails to state a plausible RICO conspiracy claim under *§ 1962(d)*. *See Tal v. Hogan, 453 F.3d 1244, 1270 (10th Cir. 2006)* ("If a plaintiff has no viable claim under *§ 1962(a)*, *(b)*, or *(c)*, then its *subsection (d)* conspiracy claim fails as a matter of law."). For reasons already explained, the court rejects defendants' arguments that the Class Complaint fails to state a **[**150]** RICO conspiracy claim under *§ 1962(c)*. Instead, the court concludes that the class plaintiffs have alleged a plausible RICO claim under *§ 1962(c)* sufficient to survive *Rule 12(b)(6)* dismissal. The class plaintiffs also allege that defendants violated *§ 1962(d)* by conspiring to violate *§ 1962(c)*. Class Compl. ¶ 678. The class plaintiffs thus have stated a plausible claim for RICO conspiracy.

8. CEO Heather Bresch is Named as a RICO conspirator

Finally, the Mylan Defendants assert that it was malicious and improper for the class plaintiffs to name Mylan CEO Heather Bresch as one of the RICO Defendants. The Mylan Defendants argue that the Class Complaint attributes conduct to Ms. Bresch that she made on behalf of Mylan in her role as the company's CEO. And they assert that these allegations are insufficient to state a RICO claim against Ms. Bresch in her personal capacity. *See, e.g.*, *Ferrari v. Mercedes-Benz USA, LLC, No. 15-cv-04379-YGR, 2016 U.S. Dist. LEXIS 171559, 2016 WL 7188030, at *3 (N.D. Cal. Dec. 12, 2016)* (dismissing RICO claims against three named CEO defendants because the "allegations are insufficient to allege that [the CEOs] conducted or participated in the conduct of a racketeering enterprise, rather than just **[*1327]** the business of [the company] separate and apart from any alleged racketeering acts"). The **[**151]** court disagrees.

The Class Complaint alleges that Ms. Bresch engaged in various fraudulent actions and personally conducted or participated in the RICO enterprise's affairs. *See, e.g.*, Class Complaint ¶¶ 226-28, 380-84, 419-48, 613-22, 624-25. ***HN49***[] The Supreme Court has held that "an employee who conducts the affairs of a corporation through illegal acts comes within the terms of [the RICO] statute that forbids any 'person' unlawfully to conduct an 'enterprise,' particularly when the statute explicitly defines 'person' to include 'any individual . . . capable of holding a legal or beneficial interest in property,' and defines 'enterprise' to include a 'corporation.'" *Cedric Kushner Promotions, Ltd. v. King, 533 U.S. 158, 163, 121 S. Ct. 2087, 150 L. Ed. 2d 198 (2001)* (quoting *18 U.S.C. §§ 1961(3)*, *(4)*). In *Cedric Kushner*, the Supreme Court held that an individual and his wholly owned corporation were sufficiently distinct for RICO purposes. *Id. at 166*. The Court found that "[t]he corporate owner/employee, a natural person, is distinct from the corporation itself, a legally different entity with different rights and responsibilities due to its different legal status." *Id. at 163*. And "nothing in the [RICO] statute . . . requires more 'separateness' than that." *Id.* The Court also observed, "[a]fter all, incorporation's basic purpose **[**152]** is to create a distinct legal entity, with legal rights, obligations, powers, and privileges different from those of the natural individuals who created it, who own it, or whom it employs." *Id.* Applying that principle here, the Class Complaint plausibly alleges that Ms. Bresch participated in the affairs of the RICO enterprise.

Finally, the Mylan Defendants also argue that the Class Complaint's allegations against Ms. Bresch lack any factual support. The court cannot make that kind of decision on a motion to dismiss. Taking the Class Complaint's allegations as true, the class plaintiffs have alleged that Ms. Bresch engaged in various false and fraudulent conduct sufficient to support the RICO claim. Naturally, to prevail on their claims against Ms. Bresch, the class plaintiff must come forward with admissible evidence to support their allegations. But that question is one for another day. At the pleading stage, the class plaintiffs sufficiently have alleged a plausible RICO claim against Ms. Bresch.

C. Timeliness of the Class Plaintiffs' Antitrust and State Consumer Protection Claims.

Defendants next assert that the class plaintiffs' competitive delay claims are time-barred under federal **[**153]** ***antitrust law***, the RICO statutes, and 30 of the 33 state law claims pleaded in the Class Complaint. Defendants explain that each of these laws impose a statute of limitations of four years or less. And, defendants contend, the class plaintiffs' competitive delay claims accrued more than four years before they filed their lawsuit.

Indeed, the Class Complaint alleges that defendants entered the unlawful "pay-for-delay" agreements in 2011 and 2012. Class Complaint ¶¶ 270 (alleging that defendants settled the Teva Litigation on April 27, 2012), 298 (alleging that defendants announced the Intelliject settlement on February 16, 2012), 302-03 (alleging that defendants agreed to stay the Sandoz litigation indefinitely and that the stay was entered on May 10, 2011). But, defendants assert, the class plaintiffs didn't file their competitive delay claims against Mylan until January 2017 and didn't add Pfizer as a defendant until February 3, 2017. Defendants thus contend that the four-year (or shorter) statutes of limitations governing the class plaintiffs' **[*1328]** claims under the federal antitrust laws, the RICO statute, and 30 of the 33 state law claims bar the competitive delay claims. The class plaintiffs **[**154]** respond with two arguments why their competitive delay claims are not time-barred.

First, they argue that the continuing violation doctrine applies to make their competitive delay claims timely. ***HN50***[] The Supreme Court has described this doctrine in the antitrust context in this fashion:

> ***Antitrust law*** provides that, in the case of a "continuing violation," say, a pricefixing conspiracy that brings about a series of unlawfully high priced sales over a period of years, each overt act that is part of the violation and that injures the plaintiff, *e.g.*, each sale to the plaintiff, starts the statutory period running again, regardless of the plaintiff's knowledge of the alleged illegality at much earlier times.

Klehr v. A.O. Smith Corp., 521 U.S. 179, 189, 117 S. Ct. 1984, 138 L. Ed. 2d 373 (1997) (citations and internal quotation marks omitted).

Applying the continuing violation doctrine, the class plaintiffs contend that their claims accrued—not when defendants entered the alleged "pay-for-delay" settlement agreements—but instead each time they were overcharged for the EpiPen at artificially inflated prices. As the class plaintiffs recite, other courts have held that ongoing sales of a pharmaceutical product at a supracompetitive price constitute a continuing violation that makes **[**155]** an action timely "so long as the last act evidencing the continuing practice falls within the limitations period." *See, e.g., In re Niaspan Antitrust Litig., 42 F. Supp. 3d 735, 746-47 (E.D. Pa. 2014)* (citation and internal quotation marks omitted); *see also In re Nexium Antitrust Litig., 968 F. Supp. 2d 367, 400 (D. Mass. 2013)* (recognizing that "'[a]lthough the business of a monopolist's rival may be injured at the time the anticompetitive conduct occurs, a *purchaser*, by contrast, is not harmed until the monopolist actually exercises its illicit power to extract an excessive price,'" and so, "[i]ndulging all inferences in the Plaintiffs' favor" on a motion to dismiss "it is reasonable to assume here that, every time the Direct Purchasers were overcharged for brand Nexium, they suffered a cognizable injury" (quoting *Berkey Photo, Inc. v. Eastman Kodak Co., 603 F.2d 263, 295 (2d Cir. 1979))*).

HN51[] Indeed, *In re Niaspan Antitrust Litigation* recognized: "Every court to have considered this issue in the pay-for-delay context has held that a new cause of action accrues to purchasers upon each overpriced sale of the drug." *Id. at 746-47* (first citing *In re K-Dur Antitrust Litig., 338 F. Supp. 2d 517, 549 (D.N.J. 2004)*; then citing *In re Buspirone Patent Litig., 185 F. Supp. 2d 363, 378 (S.D.N.Y. 2002)*; then citing *In re Skelaxin (Metaxalone) Antitrust Litig., No. 12-md-2343, 2013 U.S. Dist. LEXIS 70968, 2013 WL 2181185, at *29 (E.D. Tenn. May 20, 2013))*; *see also In re Aggrenox Antitrust Litig., 94 F. Supp. 3d 224, 248 (D. Conn. 2015)* (holding that purchasers' antitrust claims based on alleged unlawful reverse payment settlement agreements were timely because "a new claim accrues with each alleged overcharge. **[**156]** Claims are therefore not time-barred that stem from alleged overcharges incurred within the relevant statutory period, whatever that period may be for a particular statute, measured backward from the filing of the claims").

Defendants respond that the above-cited cases applied a more "lenient continuing violations standard" than the one used by the Tenth Circuit. Doc. 216 at 18. The court disagrees. ***HN52***[] Although our Circuit has not considered the question in the pay-for-delay context, it has applied the continuing violation doctrine to antitrust **[*1329]** claims. The Circuit recognized: "In the context of a continuing conspiracy to violate the antitrust laws, each time a plaintiff is injured by an act of the defendants a cause of action accrues to him to recover the damages caused by that act and as to those damages, the statute of limitations runs from the commission of the act." *Auraria Student Hous. at the Regency, LLC v. Campus Vill. Apartments, LLC, 843 F.3d 1225, 1247-48 (10th Cir. 2016)* (quoting *Champagne Metals v. Ken-Mac Metals, Inc., 458 F.3d 1073, 1088 (10th Cir. 2006))*. The Circuit has held that "an overt act will restart the statute of limitations under the continuing conspiracy exception when the act is (1) a new and independent act that is not merely a reaffirmation of a previous act; and (2) the act inflict[s] new and accumulating injury on the plaintiff." *Id. at 1248* (citation and **[**157]** internal quotation marks omitted).

Auraria Student Housing illustrates a proper use of the continuing violation doctrine. There, the Tenth Circuit affirmed the district court's application of the doctrine to plaintiff's claims that defendant had conspired with a university to exclude plaintiff from the freshmen student housing market. *Id. at 1248*. The Tenth Circuit recognized that the "initial conspiratorial decision"—enactment of a residency requirement that made defendant the sole provider of new student housing—was not the "final" act of the conspiracy. *Id.* Instead, defendants' efforts to enforce the requirement each year made the injury to plaintiff "new and accumulating." *Id.* The Circuit thus held that plaintiff timely asserted its claims under the continuing conspiracy exception.

Similarly, in *Champagne Metals*, the Tenth Circuit applied the continuing conspiracy exception to a horizontal group boycott. *458 F.3d at 1078*. The Circuit held that the defendants' initial agreement to exclude a competitor was not "final" but, instead, required "further action" by the conspirators. *Id. at 1089*. The Circuit found that "[t]he subsequent actions (contacting and pressuring the mills when those mills were considering recognizing **[**158]** [the excluded competitor]) were both distinct from the act outside the limitations period (the agreement to effect a boycott) and a continuation of the same conspiracy." *Id.* (citation, internal quotation marks, and alternations omitted). Also, the Circuit observed that the alleged conspirators "did not simply sit back and watch as the unabated inertial consequences of their (alleged) anticompetitive agreement harmed [plaintiff]; rather, their actions within the limitations period manifested a commitment to renewing and enforcing that agreement." *Id.* (citation, internal quotation marks, and alternations omitted). Thus, the Circuit held, plaintiff asserted its claims timely under the continuing violation doctrine. *Id. at 1089-90*.

Likewise here, when the court reads the Class Complaint's allegations in class plaintiffs' favor, it finds allegations that defendants constructed "pay-for-delay" settlements as part of a scheme to maintain monopoly power and force consumers to pay inflated prices for the EpiPen. Construing the allegations in the light most favorable to class plaintiffs, the "pay-for-delay" settlements were not the "final" act of the conspiracy. Rather, defendants engaged in new and additional **[**159]** acts each time they charged the allegedly inflated prices for the EpiPen. And each of those acts inflicted a new and accumulating injury on the class plaintiffs because they had paid inflated prices for the EpiPen. The court concludes that the class plaintiffs asserted their claims timely under the continuing violation doctrine. It reaches this conclusion because the Class Complaint alleges damages for overcharges paid in **[*1330]** the four years before the filing of this lawsuit.

Second, the class plaintiffs contend that the doctrines of the discovery rule, fraudulent concealment, and equitable tolling apply to toll the statute of limitations. The class plaintiffs assert that the statute of limitations for their "pay-for-delay" claims did not commence when defendants entered the alleged reverse payment settlement in 2012. Instead, the class plaintiffs assert, these three doctrines toll the statute of limitations because defendants fraudulently concealed their actions and thus prevented the class plaintiffs from discovering their injuries and asserting their claims timely.

Indeed, the Class Complaint specifically alleges that the class plaintiffs "had no knowledge of the combination or conspiracy **[**160]** alleged herein, or of facts sufficient to place them on inquiry notice of the claims set forth herein, until on or about (at the earliest) August 22, 2016, the date [when] Congress publicly announced its investigation of EpiPen pricing." Class Compl. ¶ 503. The class plaintiffs assert that they are "consumers and third-party payors who had no direct contact or interaction with Defendants and had no means from which they could have discovered the combination and conspiracy described in this Complaint before August 1, 2016." *Id.* ¶ 504. They also assert that no information about the alleged unlawful activities was available in the public domain before August 1, 2016. *Id.* ¶ 505. Alternatively, the class plaintiffs allege, defendants actively concealed their anticompetitive conspiracy and also that defendants' scheme was self-concealing. *Id.* ¶¶ 509-10. The Class Complaint thus asserts that "a reasonable person under the circumstances would not have been alerted to begin to investigate the legitimacy of the Defendants' EpiPens prices before August 22, 2016." *Id.* ¶ 510. And, the class plaintiffs contend, they "could not have discovered the alleged unlawful activity, including the conspiracy **[**161]** or combination alleged herein, at an earlier date by the exercise of reasonable diligence because of the deceptive practices and techniques of secrecy employed by the Defendants and their co-conspirators to avoid detection of, and fraudulently conceal, their unlawful conduct." *Id.* ¶ 511.

HN53[] These allegations "assert[ ] affirmative conduct to conceal the fraud" and "are sufficient to invoke the doctrine of equitable tolling at this stage in the proceeding." *Aldrich v. McCulloch Props., Inc., 627 F.2d 1036, 1042 (10th Cir. 1980)* (citations omitted) (reversing district court's *Rule 12(b)(6)* dismissal of securities act violations on statute of limitations grounds because the Complaint sufficiently alleged fraudulent concealment to toll the statute of limitations and render the claims timely). Indeed, our Circuit has explained: "The question of whether a plaintiff should have discovered the basis of his suit under the doctrine of equitable tolling does not lend itself to determination as a matter of law." *Id.* (citation omitted). Here, at the pleading stage, the class plaintiffs adequately have alleged facts capable of supporting the discovery rule, fraudulent concealment, and equitable tolling to avoid *Rule 12(b)(6)* dismissal on statute of limitations grounds.

D. State Consumer Protection [162] Claims**

The Class Complaint alleges that Mylan[23] has violated various state consumer protection laws. The Mylan Defendants argue that the Class Complaint fails to plead plausible claims under these state consumer **[*1331]** protection laws. And they assert four arguments why the court should dismiss the claims. The court addresses each argument separately, below.

1. Standing

First, the Mylan Defendants contend that the class plaintiffs lack standing to assert their state consumer protection claims. **HN54**[] Article III of the United States Constitution limits federal courts' jurisdiction to "cases" and "controversies." *Clapper v. Amnesty Int'l USA, 568 U.S. 398, 408, 133 S. Ct. 1138, 185 L. Ed. 2d 264 (2013)*. To present a case or controversy under Article III, a plaintiff must establish that he has standing to sue. *Id.* (citations omitted); *see also Ariz. Christian Sch. Tuition Org. v. Winn, 563 U.S. 125, 133, 131 S. Ct. 1436, 179 L. Ed. 2d 523 (2011)* (citing *Allen v. Wright, 468 U.S. 737, 751, 104 S. Ct. 3315, 82 L. Ed. 2d 556 (1984))*. Article III standing requires a plaintiff to establish (1) that he or she has "suffered an 'injury in fact'"; (2) that the injury is "'fairly . . . trace[able] to the challenged action of the defendant'"; and, (3) that it is "'likely'" that "the injury will be 'redressed by a favorable decision.'" *Ariz. Christian Sch. Tuition Org., 563 U.S. at 134* (quoting *Lujan v. Defenders of Wildlife, 504 U.S. 555, 560-61, 112 S. Ct. 2130, 119 L. Ed. 2d 351 (1992))*; *see also Awad v. Ziriax, 670 F.3d 1111, 1120 (10th Cir. 2012)*. "At bottom, the gist of the question of standing is whether petitioners have such a personal stake in the outcome of the controversy as to assure that concrete adverseness **[**163]** which sharpens the presentation of issues upon which the court so largely depends for illumination." *Massachusetts v. E.P.A., 549 U.S. 497, 517, 127 S. Ct. 1438, 167 L. Ed. 2d 248 (2007)* (citation and internal quotation marks omitted).

The Mylan Defendants argue that the class plaintiffs lack standing to assert consumer protection claims because they neither plead (1) an injury-in-fact nor (2) that any injury is fairly traceable to defendants' conduct. Neither argument persuades the court.

HN55[] *First*, an injury in fact is "an invasion of a legally protected interest which is (a) concrete and particularized, and (b) actual or imminent, not conjectural or hypothetical." *Lujan, 504 U.S. at 560* (citations and internal quotation marks omitted). The Supreme Court has explained the requirement of pleading injury in fact this way: "At the pleading stage, general factual allegations of injury resulting from the defendant's conduct may suffice, for on a motion to dismiss we presume that general allegations embrace those specific facts that are necessary to support the claim." *Id. at 561* (citations, internal quotation marks, and alterations omitted).

Like the arguments addressed above, the Mylan Defendants assert that the class plaintiffs cannot establish standing based on their pleading's allegations that they paid **[**164]** inflated prices for the EpiPen. The Mylan Defendants contend that the class plaintiffs received exactly what they purchased—an EpiPen device (or, in some contexts, two of them). And, according to the Mylan Defendants, absent allegations that the EpiPen was different

[23] The Class Complaint asserts the state consumer protection law claims just against Mylan. Class Complaint ¶¶ 683-93.

than what they expected to purchase, the class plaintiffs have no standing to assert their consumer protection claims.

For support, the Mylan Defendants rely on two cases where courts held that the plaintiffs had failed to allege actual injuries. *See* *Rivera v. Wyeth-Ayerst Labs., 283 F.3d 315, 320 (5th Cir. 2002)* (holding that plaintiffs lacked standing to sue because they "concede they were not among the injured" by an allegedly defective drug but only claim economic injury without defining that injury); *see also* *Eike v. Allergan, Inc., 850 F.3d 315, 318 (7th* ***[*1332]*** *Cir. 2017)* (finding that class members lacked standing because "[o]ne cannot bring a suit in federal court without pleading that one has been injured in some way (physically, financially—whatever) by the defendant . . . [t]he fact that a seller does not sell the product that you want, or at the price you'd like to pay, is not an actionable injury; it is just a regret or disappointment—which is all we have here, the class having failed to allege 'an invasion of a legally protected interest.'" **[**165]** (quoting *Spokeo, Inc. v. Robins, 136 S. Ct. 1540, 1548, 194 L. Ed. 2d 635 (2016)))*. But these cases differ from the class plaintiffs' allegations here. The Class Complaint in this case actually alleges injury in the form of economic loss. Specifically, the class plaintiffs allege that defendants engaged in unlawful conduct (including unfair methods of competition and unfair or deceptive acts or practices) and that, but for the unlawful conduct, the class plaintiffs "would have paid less for both branded and generic versions of EpiPen by: (a) substituting their purchases of EpiPen with less-expensive generic versions of EpiPen; (b) purchasing generic EpiPen at lower prices sooner; (c) purchasing individual, rather than pairs, of EpiPen injectors; (d) buying spare auto-injectors that were generic or cheaper brands; and (e) purchasing branded EpiPen at a reduced price." Class Compl. ¶ 492; *see also id*. ¶ 679 ("But for the Defendants' fraudulent scheme and racketeering, Plaintiffs and the Class would not have accepted, acquired, and purchased the EpiPen 2-Pak."). The class plaintiffs also allege that they—as a consequence of defendants' conduct—"have sustained substantial losses and property in the form of overcharges, the exact amount of which will be the **[**166]** subject of proof at trial." *Id.* ¶ 492.

HN56[] "Generally, economic injury is a paradigmatic form of injury in fact." *Gonzalez v. Pepsico, Inc., 489 F. Supp. 2d 1233, 1240 (D. Kan. 2007)* (citing *Danvers Motor Co. v. Ford Motor Co., 432 F.3d 286, 291 (3d Cir. 2005)* (further citations omitted)). In *Gonzalez*, our court held that a plaintiff sufficiently alleged "economic damages resulting from the difference between the purchase price of the beverage products as warranted and their actual value considering the potential presence of benzene in those products." *Id.* The court held that the "benefit of the bargain damages are sufficient to demonstrate an injury in fact." *Id.*

Although the class plaintiffs here never allege that they purchased a defective product, the court finds that they adequately have alleged economic loss sufficient to discharge the standing requirement. The class plaintiffs allege that Mylan's conduct caused them to pay inflated prices for the EpiPen, and—but for Mylan's unlawful conduct—they would have purchased other versions of the EpiPen (both branded and generic) at lower cost. *See* *Maya v. Centex Corp., 658 F.3d 1060, 1069 (9th Cir. 2011)* (holding plaintiffs' allegations that they "spent money that, absent defendants' actions, they would not have spent" constituted a "quintessential injury-in-fact" (citing *Gen. Motors Corp. v. Tracy, 519 U.S. 278, 286, 117 S. Ct. 811, 136 L. Ed. 2d 761 (1997)* (holding that consumers who paid more for gas than they **[**167]** should have as a result of discriminatory tax laws had Article III standing))); *see also* *Pirozzi v. Apple, Inc., 913 F. Supp. 2d 840, 846-47 (N.D. Cal. 2012)* ("Overpaying for goods or purchasing goods a person otherwise would not have purchased based upon alleged misrepresentations by the manufacturer would satisfy the injury-in-fact and causation requirements for Article III standing."). *Cf.* *Estrada v. Johnson & Johnson, No. 2:14-cv-01051-TLN-EFB, 2015 U.S. Dist. LEXIS 39581, 2015 WL 1440466, at *5 (E.D. Cal. Mar. 27, 2015)* (holding that plaintiff lacked **[*1333]** standing because she never alleged that she would have purchased an alternative product but for defendant's conduct). Accepting these allegations as true and in the class plaintiffs' favor—as the court must for now—the court concludes the class plaintiffs have alleged an injury in fact.

HN57[] *Second*, to satisfy the standing requirement of traceability, "the defendant[s'] conduct must have caused the injury." *Benham v. Ozark Materials River Rock, LLC, 885 F.3d 1267, 1273 (10th Cir. 2018)*. "[T]he 'traceability' of a plaintiff's harm to the defendant's actions need not rise to the level of proximate causation." *Habecker v. Town of Estes Park, Colo., 518 F.3d 1217, 1225 (10th Cir. 2008)*. But "Article III does 'require proof of a substantial likelihood that the defendant's conduct caused plaintiff's injury in fact.'" *Id.* (quoting *Nova Health Sys. v. Gandy, 416 F.3d 1149, 1156 (10th Cir. 2005))*.

Here, the class plaintiffs allege that Mylan engaged in unlawful anticompetitive conduct and unfair or deceptive practices. **[**168]** The class plaintiffs allege that Mylan's actions caused them to pay inflated prices for the EpiPen. And, the class plaintiffs allege, but for Mylan's unlawful conduct, they would have paid less for the EpiPen (both branded and generic versions). The court finds these alleged injuries are "fairly traceable" to Mylan's alleged conduct, and they suffice to satisfy the standing requirement at the pleading stage.

2. Preemption

The Mylan Defendants next assert that federal patent law preempts the class plaintiffs' state consumer protection law claims. In essence, the Mylan Defendants argue that the class plaintiffs are using state consumer protection laws to regulate the EpiPen's price—a patented product. The Mylan Defendants contend that federal patent law preempts these claims because the patent holder maintains the exclusive right to make pricing decisions about its patented product. Doc. 95 at 85-87 (first citing *Biotech. Indus. Org. v. District of Columbia, 496 F.3d 1362, 1374 (Fed. Cir. 2007)* (holding that federal patent law preempted the *District of Columbia's Prescription Drug Excessive Pricing Act of 2005* because the "underlying determination about the proper balance between innovators' profit and consumer access to medication . . . is exclusively one for Congress **[**169]** to make," and the local law stood "as an obstacle to the federal patent law's balance of objectives"); then citing *Se. Pa. Transp. Auth. v. Gilead Scis., Inc., 102 F. Supp. 3d 688, 703 (E.D. Pa. 2015)* (holding that "[t]o the extent that plaintiffs seek to use state law to challenge [defendant's] exercise of its exclusive patent rights to make pricing decisions, plaintiffs' claims are preempted")).

The class plaintiffs respond that their state consumer protection claims don't challenge Mylan's rights under the patent laws to make pricing decisions. Instead, the class plaintiffs explain, their state consumer protection law claims allege that Mylan engaged in unfair methods of competition, unfair or deceptive acts or practices, or unconscionable acts or practices that violated various state consumer protection laws. The class plaintiffs allege that these violations furthered defendants' scheme to charge inflated prices for the EpiPen. According to the class plaintiffs, Mylan did not confine its conduct to lawful use of its patent rights. Instead, the class plaintiffs allege, Mylan engaged in unlawful conduct that caused consumers to pay inflated prices for the EpiPen.

As the class plaintiffs point out, the Mylan Defendants cited no authority holding that federal patent **[**170]** law permits a patent holder to commit unfair and deceptive practices that violate state consumer protection laws—simply because **[*1334]** it owns patent rights. Indeed, many courts have concluded just the opposite. These cases hold that federal patent law does not preempt state consumer protection claims when a state law claim "'address[es] entirely different wrongs[,]' 'provide[s] different forms of relief,' and 'is not an impermissible attempt to offer patent-like protection to subject matter addressed by federal law.'" *In re Loestrin 24 Fe Antitrust Litig., 261 F. Supp. 3d 307, 357 (D.R.I. 2017)* (quoting *Dow Chem. Co. v. Exxon Corp., 139 F.3d 1470, 1478 (Fed. Cir. 1998))*. "For the claim to escape preemption, it must seek a remedy for 'bad faith misconduct in the marketplace,' rather than 'bad faith misconduct in the PTO.'" *Id.* (citing *Dow Chem., 139 F.3d at 1476-78*). This standard requires a plaintiff to "allege and ultimately prove, fraud on the PTO *or* bad faith in the marketplace, regardless of whether the underlying state claim demands proof of such conduct." *Id.* (citation omitted) (emphasis added).

Applying that legal standard to the allegations here, the class plaintiffs have alleged that Mylan has committed a variety of misconduct in the marketplace and thus violated the state consumer protection laws. Class Complaint ¶¶ 684.a.-684.bb. Specifically, **[**171]** the Class Complaint alleges that Mylan violated state consumer protection laws by "engaging in misleading, false, unfair and/or deceptive acts or practices by foreclosing from consumers and the general public the opportunity to purchase cheaper generic versions of the EpiPen and/or cheaper products that could have competed with the EpiPen through anticompetitive practices including patent misuse, reverse 'pay-for-delay' settlements, and sham citizens' petitions as described herein." *Id.* ¶ 684.x.

Other courts have found allegations like this sufficient to state plausible consumer protection law claims not preempted by the federal patent laws. *See, e.g., Picone v. Shire PLC, No. 16-cv-12396-ADB, 2017 U.S. Dist. LEXIS 178150, 2017 WL 4873506, at *14 (D. Mass. Oct. 20, 2017)* (denying portion of *Rule 12(b)(6)* motion seeking dismissal of state consumer protection and ***antitrust law*** claims based on preemption because those claims "are based on tortious conduct in the marketplace—*i.e.*, the purportedly illegal settlement agreements—that require different elements than any arguably corresponding federal patent law claim (such as patent invalidity), and are therefore not protected or governed by federal patent law"); *In re Loestrin 24 Fe Antitrust Litig., 261 F. Supp. 3d at 357* (holding on **[**172]** a *Rule 12(b)(6)* motion to dismiss that federal patent law did not preempt plaintiffs' state consumer protection law claims because plaintiffs alleged that defendants enforced their patent in the marketplace with bad faith); *In re DDAVP Indirect Purchaser Antitrust Litig., 903 F. Supp. 2d 198, 224 (S.D.N.Y. 2012)* (holding on a *Rule 12(b)(6)* motion that the patent laws didn't preempt plaintiffs' state consumer protection law claims because plaintiffs alleged other "wrongful conduct in the marketplace" to support the claims such as "an invalid Orange Book listing, sham patent infringement litigation, and a sham citizen petition").

The court denies the Mylan Defendants' motion to dismiss the class plaintiffs' state consumer protection law claims based on a federal preemption defense.

3. Elements of the State Consumer Protection Law Claims

The Mylan Defendants next contend that the class plaintiffs have failed to plead the elements of their state consumer protection law claims. Specifically, the Mylan Defendants argue that the Class Complaint never alleges: (1) deceptive or misleading conduct; (2) unfair or unconscionable conduct; (3) actual loss; (4) reliance; (5) causation; or (5) the requisite particularity **[*1335]** to support the claims. The court rejects each of these arguments.

First, the Mylan Defendants **[**173]** assert that the Class Complaint never pleads any deceptive or misleading conduct capable of supporting any of their state consumer protection law claims. As the class plaintiffs explain, the various state consumer protection laws pleaded in the Class Complaint differ in their language. But all of them prohibit deceptive or misleading acts or practices in trade or commerce.

HN58[] Our court and many others have recognized that the question whether an act is deceptive is a factual one for the jury to decide. *Tufts v. Newmar Corp., 53 F. Supp. 2d 1171, 1177 (D. Kan. 1999)* (citing *Farrell v. Gen. Motors Corp., 249 Kan. 231, 815 P.2d 538, 547 (Kan. 1991))*; *see also* *Organic Consumers Assoc. v. Sanderson Farms, Inc., 284 F. Supp. 3d 1005, 1014 (N.D. Cal. 2018)* ("Whether a business practice is deceptive [and thus violates the California consumer protection laws] is generally a question of fact that requires weighing of evidence from both sides."); *Nature's Prods., Inc. v. Natrol, Inc., 990 F. Supp. 2d 1307, 1322 (S.D. Fla. 2013)* (holding that the jury must decide whether a seller's representation (*i.e.*, that certain healthcare products were gluten free) constituted an unfair or deceptive trade practice under the Florida statute because it presented "a question of fact for the jury to determine"); *Quinn v. Walgreen Co., 958 F. Supp. 2d 533, 543 (S.D.N.Y. 2013)* ("Under either [the New York or Connecticut consumer protection] statute, whether a particular act or practice is deceptive is usually a question of fact.") (citations omitted)).

Here, the class plaintiffs assert **[**174]** that they have alleged various deceptive acts capable of supporting a finding or inference that Mylan violated state consumer protection laws. The court agrees. The Class Complaint alleges that Mylan made several misrepresentations as part of defendants' scheme to monopolize the EAI market and charge consumers inflated prices for the EpiPen. These misrepresentations include: misinformation about Auvi-Q and its bioequivalence to the EpiPen (Class Complaint ¶¶ 229-31); misleading statements about EpiPen's status as the "preferred brand" and suggesting that Auvi-Q's exclusion from drug formularies was based on clinical recommendations and not Mylan's huge, conditional rebates (*id.* ¶¶ 232-34); false representations about the medical necessity of the EpiPen 2-Pak (*id.* ¶¶ 335-46); Ms. Bresch's false statement that Mylan had invested $1 billion in developing the EpiPen to create "access and awareness and improv[e] the product" (*id.* ¶ 375); and falsely claiming that 80% of consumers with insurance pay nothing for EpiPen (*id.* ¶¶ 403-04).

The Mylan Defendants assert that these alleged misrepresentations cannot possibly support state law consumer protection claims because none amounted to material **[**175]** representations, *i.e.*, these statements did not affect consumers' purchasing decisions because no reasonable person would attach importance to them. The court cannot reach this conclusion as a matter of law based on the allegations pleaded by the class plaintiffs. Indeed, as the class plaintiffs argue, in the context of reviewing orders issued by the Federal Trade Commission, courts have recognized the FTC's presumption of materiality for matters "that significantly involve health, safety, or other areas with which the reasonable consumer would be concerned, including a claim that concerns the purpose, safety, efficacy, or *cost* of the product or service, its durability, performance, warranties or quality or a finding by another agency regarding the product." *Novartis Corp. v. FTC, 223 F.3d 783, 786, 343 U.S. App. D.C. 111 (D.C. Cir. 2000)* (citations and internal quotations marks omitted) (emphasis added); *see also Kraft,* ***[*1336]*** *Inc. v. FTC, 970 F.2d 311, 322 (7th Cir. 1992)* (enforcing an FTC order finding that Kraft had misrepresented information about the amount of calcium contained in its cheese Singles relative to the calcium content in five ounces of milk and concluding that the evidence supporting the presumption of materiality). It is plausible to infer from the class plaintiffs' allegations that a consumer would **[**176]** find the alleged misrepresentations about the EpiPen's cost material to consumers. The same is true for the medical necessity of the 2-Pak and Auvi-Q's bioequivalence to the EpiPen. The court thus finds that the class plaintiffs' allegations sufficiently allege material misrepresentations to support the state consumer protection law claims and survive dismissal at the pleading stage.

Also, the Mylan Defendants assert that none of the alleged misrepresentations about the EpiPen price could have misled consumers about the actual price or the nature of the product. The court disagrees. The class plaintiffs direct the court to at least two alleged misrepresentations that—when viewed in the class plaintiffs' favor—permit a plausible inference that these statements were deceptive. First, the Class Complaint alleges that Mylan stated publicly on its website and in the media that "80% of consumers with insurance pay nothing for the EpiPen." Class Compl. ¶ 403. The Class Complaint alleges that this statement is a pernicious "half-truth" because, as one commentator has questioned, the EpiPen's retail price is over $600 and many Americans have high-deductible health plans that require making payments **[**177]** out of pocket before insurance coverage applies. *Id.* Also, the class plaintiffs contend, this statement ignores the costs that insurance companies incur to pay for the EpiPen which, in turn, produces increased premiums and higher co-pays. *Id.* ¶ 404. Construing the allegations in the class plaintiffs' favor, it is plausible to infer that this statement misled consumers about the EpiPen's true price.

Next, the class plaintiffs assert that Ms. Bresch falsely stated during a *Forbes* Summit interview that " Mylan has invested $1 billion in developing the EpiPen in creating access and awareness and improving the product." *Id.* ¶ 375 (citation and internal quotation marks omitted). The Class Complaint alleges that this statement was false because Mylan did not spend $1 billion on actual product improvement but, instead, spent it on lobbying and paying its executives. *Id.* ¶ 385. Accepting these allegations as true—as the court must on a motion to dismiss—it is plausible to infer that these false statements misled consumers about the EpiPen and influenced their purchasing decisions.[24]

The Mylan Defendants also contend that Mylan's statements about the medical **[*1337]** necessity of the EpiPen **[**178]** 2-Pak are not deceptive. For support, the Mylan Defendants have submitted a chart comparing statements from an August 2011 press release about the 2-Pak with NIAID and WAO guidelines. Doc. 95-9. In doing so, the Mylan Defendants ask the court to construe the medical guidelines and find that they support Mylan's statement in the press release that its decision to sell only the EpiPen 2-Pak "aligns" with medical guidelines. *Id. at 3*. The court cannot properly decide this factual dispute on a motion to dismiss. Also, the class plaintiffs assert that

---

[24] The Mylan Defendants also assert that Ms. Bresch's statements to *Forbes* are not actionable because she did not make them to consumers. For support, the Mylan Defendants cite *Group Health Plan, Inc. v. Philip Morris, Inc., 68 F. Supp. 2d 1064 (D. Minn. 1999)*. In that case, the Minnesota federal court dismissed plaintiffs' claims under the Minnesota consumer protection laws because the complaint "contain[ed] no allegations that Defendants were attempting to sell their products" when they made the alleged misrepresentations while testifying before Congress. *Id. at 1069*. Also, plaintiffs "[did] not allege that they purchased any products from Defendants." *Id.* Those facts differ significantly from the ones here.

The class plaintiffs have alleged that they purchased the EpiPen. Also, the class plaintiffs allege that Ms. Bresch made the false statements to *Forbes* as part of defendants' scheme to monopolize the market and inflate the EpiPen's price. It is plausible to infer from the Class Complaint's allegations that Ms. Bresch directed the statements to consumers—through an interview with a nationally circulated magazine—as part of defendants' scheme to sell the EpiPen to consumers at inflated prices.

the press release is misleading because it omits material facts. These allegations suffice to allege that Mylan's statements about the EpiPen 2-Pak were deceptive or misleading.

Finally, the Mylan Defendants argue that the alleged misleading statements about Auvi-Q cannot support the state consumer protection law claims. The Mylan Defendants contend that the statements could not have caused consumers to purchase EpiPen over Auvi-Q because the class plaintiffs never allege that Auvi-Q was a superior product or less expensive than EpiPen. The Mylan Defendants assert that the class plaintiffs could make no such allegations because, in October 2015, Sanofi **[**179]** recalled Auvi-Q from the market. As the class plaintiffs argue, however, the Mylan Defendants ignore the context of the alleged misrepresentations about Auvi-Q. The Class Complaint alleges that Mylan made the misrepresentations as part of defendants' scheme to restrain competition in the EAI market and, specifically, to block Auvi-Q from that market. *See* Class Compl. ¶ 235. On a motion to dismiss, the court cannot determine—as a matter of law—whether Auvi-Q left the market because of manufacturing issues or, as the class plaintiffs assert, Mylan's conduct prevented it from gaining traction in the market. The court thus finds that the allegedly deceptive and misleading statements about Auvi-Q suffice to support the state consumer protection law claims.

Second, the Mylan Defendants argue that the class plaintiffs never allege any unfair practices that violate state consumer protection laws. Largely, the Mylan Defendants premise this argument on ones that defendants asserted earlier in their briefs. The Mylan Defendants contend that the Class Complaint fails to allege that Mylan engaged in any anticompetitive or fraudulent conduct capable of supporting a finding or inference that it engaged **[**180]** in unfair practices violating state consumer protection laws. But the court already has determined that the Class Complaint plausibly alleges that defendants—including Mylan—violated the antitrust and RICO laws by implementing a fraudulent scheme to monopolize the market and force consumers to pay inflated prices for EpiPen. As explained in the next paragraph, these allegations also suffice to assert plausibly that Mylan engaged in unfair practices violating state consumer protection laws.

HN59[] As both parties explain in their briefs, states apply different standards to determine what constitutes unfair or unconscionable conduct capable of violating state consumer protection laws. Some states employ the "cigarette test," examining whether the alleged unfair practice: (1) offends established public policy; (2) is immoral, unethical, oppressive, unscrupulous; and (3) causes substantial injury to consumers. *See, e.g., Zito v. United Techs. Corp., No. 3:15-cv-744(AWT), 2016 U.S. Dist. LEXIS 31373, 2016 WL 2946157, at *6 (D. Conn. Mar. 11, 2016)* (explaining that Connecticut has adopted the "cigarette" test for determining when a practice is unfair under the *Connecticut Unfair Trade Practices Act*); *see also Hucke v. Kubra Data Transfer Ltd., Corp., 160 F. Supp. 3d 1320, 1328 (S.D. Fla. 2015)* (applying the "cigarette test" to a **[**181]** *Florida Deceptive and Unfair Trade Practices Act* **[*1338]** claim); *Hanrahan v. Specialized Loan Servicing, LLC, 54 F. Supp. 3d 149, 154 (D. Mass. 2014)* (applying the "cigarette test" to the *Massachusetts Consumer Protection Act*); *Rodriguez v. Chase Home Fin., LLC, No. 10 C 05876CH, 2011 U.S. Dist. LEXIS 123166, 2011 WL 5076346, at *3 (N.D. Ill. Oct. 25, 2011)* (applying the "cigarette test" to an *Illinois Consumer Fraud Act* claim).

Other states apply a "substantial injury" test, considering whether the alleged unfair practice: (1) produces substantial injury to consumers; (2) is not the type of injury that a consumer reasonably could avoid; and (3) is not outweighed by countervailing benefits to consumers or competition. *See, e.g.*, *Kautsman v. Carrington Mortg. Servs., LLC*, No. C16-1940-JCC, 2017 WL 8727860, at *1 (W.D. Wash. Nov. 3, 2017) (applying the "substantial injury" test to a *Washington Consumer Protection Act* claim); *Sager v. Hous. Comm'n of Anne Arundel Cty., 957 F. Supp. 2d 627, 642 (D. Md. 2013)* (applying the "substantial injury" test to a *Maryland Consumer Protection Act* claim); *Darling v. W. Thrift & Loan, 600 F. Supp. 2d 189, 202 (D. Me. 2009)* (applying the "substantial injury" test to a *Maine Unfair Trade Practices Act* claim).

The class plaintiffs have demonstrated that their allegations suffice to state a claim under either one of these tests. The Class Complaint adequately alleges the three elements of first test recited above—the "cigarette test." First, the class plaintiffs allege that Mylan's unfair acts offend public policy. Class Compl. ¶ 1012. Construing their allegations **[**182]** in the class plaintiffs' favor, Mylan's alleged unfair conduct offended the public policy against anticompetitive and fraudulent conduct and the public policy favoring consumer protection.[25] Second, the class plaintiffs allege that the conduct is "immoral, unethical, oppressive, [and] unscrupulous . . . ." *See, e.g., Votto v. Am. Car Rental, Inc., 273 Conn. 478, 871 A.2d 981, 985 (Conn. 2005)*. One court has defined the second prong of this test as including "[a] trade practice that is undertaken to maximize the defendant's profit at the expense of the plaintiff's rights . . . ." *Id.* (applying the cigarette test to a Connecticut Unfair Trade Practices Act claim). One reasonably can infer that Mylan's alleged conduct satisfies that definition under the test's second prong. Finally, the class plaintiffs allege that the unfair conduct substantially injured consumers. *Id.* Taking the allegations as true, the Class Complaint alleges that Mylan's conduct substantially injured the class plaintiffs by forcing them to pay inflated prices for the EpiPen.

The Class Complaint also plausibly alleges the elements of the second test—the "substantial injury" test. Namely, it asserts that: (1) the class plaintiffs allege that Mylan's unfair conduct substantially harmed consumers **[**183]** by requiring them to pay inflated prices for the EpiPen; (2) the class plaintiffs allege that they could not have avoided this injury because Mylan—through its unfair conduct—restrained competition, limited consumer choice, and prevented consumers from accessing competing products, and (3) the class plaintiffs identify no countervailing benefits to consumers or competition that could outweigh Mylan's unfair conduct.

[*1339] In sum, the court concludes that the class plaintiffs' allegations plausibly allege unfair practices sufficient to support their state consumer protection law claims.[26]

Third, the Mylan Defendants assert that the state consumer protection law claims fail as a matter of law because the class plaintiffs never allege that they sustained an actual injury or ascertainable loss. The Mylan Defendants' arguments mirror the ones that they asserted to attack the class plaintiffs' standing. For the same reasons already explained, the court rejects the Mylan Defendants' arguments. The class plaintiffs have pleaded economic loss adequately to support state law consumer protection claims.

Fourth, the Mylan Defendants argue that the class plaintiffs have failed to plead reliance. But, **[**184]** when pleading their state consumer protection law claims, the Class Complaint explicitly alleges that the class plaintiffs relied on Mylan's misrepresentations and omissions about the EpiPen. *See, e.g.*, Class Complaint ¶¶ 716, 729, 748, 789, 806, 820, 835, 848, 863, 878, 893, 910, 925, 941, 956, 971, 986, 1001, 1018, 1036, 1050, 1063, 1076, 1101, 1115, 1127, 1141, 1155, 1168, 1183, 1196, 1211, 1225, 1239, 1253, 1267, 1281, 1296, 1312, 1328, 1343, 1357, 1372, 1386, 1401, 1416.

The Mylan Defendants contend that the class plaintiffs' reliance allegations are just conclusory, and thus insufficient to support the state consumer protection law claims. ***HN60***[] In the context of a fraud claim, our court has held that a plaintiff—to satisfy *Rule 9(b)*'s heightened pleading standard—need only allege that it relied on an alleged misrepresentation. Such allegations need not assert "details concerning its reliance" because "the Tenth Circuit's standard does not require more." *In re Syngenta AG MIR 162 Corn Litig., 131 F. Supp. 3d 1177, 1228 (D. Kan. 2015)* (first citing *Koch v. Koch Indus., Inc., 203 F.3d 1202, 1236 (10th Cir. 2000)*; then citing *Mattos v. Eli Lilly & Co., No. 12-1014-JWL, 2012 U.S. Dist. LEXIS 71519, 2012 WL 1893551, at *7 n.7 (D. Kan. May 23, 2012)*

---

[25] The Mylan Defendants assert that public policy supports Mylan's freedom to set prices for the EpiPen—as its patent holder—because the exclusivity granted by patent rights encourages innovation. Here, the class plaintiffs allege that Mylan did more than simply set prices as a patent holder. Instead, the Class Complaint alleges that Mylan engaged in various anticompetitive and fraudulent competition for the purpose of restraining competition. The court recognizes that these are just allegations in the Class Complaint, but the court must accept them as true facts on a motion to dismiss. Taking them as true, public policy does not favor this type of conduct.

[26] The Mylan Defendants also assert that the class plaintiffs fail to allege a claim under California's Unfair Competition Law ("UCL"). This law requires a plaintiff to allege that defendant violated some other law. *See Moran v. Prime Healthcare Mgmt., Inc., 3 Cal. App. 5th 1131, 208 Cal. Rptr. 3d 303, 311 (Cal. Ct. App. 2016)* (explaining that "violation of another law is a predicate for stating a cause of action under the UCL's unlawful prong" (citation and internal quotation marks omitted)). As the court already has concluded, the class plaintiffs plausibly have alleged that defendants (including Mylan) violated other laws—including the antitrust laws and RICO. These allegations suffice to support a plausible claims under the California UCL.

(Lungstrum, J.)). In *Syngenta*, Judge Lungstrum held that a plaintiff's allegation that it had relied on the alleged misrepresentations sufficed to state **[**185]** a fraud claim and that defendant was "free to ask about the details of [the plaintiff's] reliance in discovery." *Id.* Applying the same rationale here, the class plaintiffs' allegations that they relied on Mylan's misrepresentations adequately state a claim for relief. Like Judge Lungstrum explained in *Syngenta*, the Mylan Defendants can inquire during discovery about the details of that alleged reliance.

Also, as the class plaintiffs correctly assert, a majority of their ***HN61***[] state consumer protection law claims do not require them to plead reliance.[27] And, for other **[*1340]** states, the class plaintiffs need not plead reliance when they allege misrepresentations by concealment or omission. *See In re Motor Fuel Temperature Sales Practices Litig., 292 F.R.D. 652, 663 & n.5 (D. Kan. 2013)* (holding that plaintiffs need not prove actual reliance to support their California Unfair Competition Law claims because "actual reliance is presumed given [defendant's] material misrepresentations and omissions"). *See also, e.g.*, *Glenn v. Hyundai Motor Am., No. SA CV 15-2052-DOC, 2016 U.S. Dist. LEXIS 181318, 2016 WL 3621280, at *12-13 (C.D. Cal. June 24, 2016)* (holding that plaintiff stated a claim under the *Alabama Deceptive Trade Practices Act* based on defendants' alleged omissions that had plaintiff known the truth, he would not have made the purchase); **[**186]** *Wright v. Kia Motors Am., Inc., No. Civ. 06-6212-AA, 2007 U.S. Dist. LEXIS 7431, 2007 WL 316351, at *3 (D. Or. Jan. 29, 2007)* (denying *Rule 12(b)(6)* motion to dismiss *Oregon Unfair Trade Practices Act* claim because plaintiff need not allege reliance when she alleged that defendant failed to disclose material facts). The Class Complaint here alleges various omissions of material fact that allow the court to presume reliance under these state consumer protection statutes. *See* Class Complaint ¶¶ 684.c., 684.e., 684.i., 684.j., 684.m., 684.n., 684.o.-684.t., 684.aa., 747-49.

The Mylan Defendants also allege that the class plaintiffs' consumer protection claims under six state laws fail as a matter of law because those state laws require continuing harm. *See* Doc. 95 at 49 n.45 (citing the Georgia, Illinois, Maine, Minnesota, New Mexico, and Ohio statutes). But the Class Complaint seeks injunctive relief "to stop Mylan's *continued deceptive and unconscionable practices* of **[*1341]** selling the EpiPen 2-Pak at an inflated price." Class

Code Ann. § 46A-6-102(7)(M)*).

Compl. ¶ 692 (emphasis added). The court finds these allegations **[**187]** sufficient to assert continuing harm under the consumer protection laws of these six states.

In sum, the court declines to dismiss the class plaintiffs' state consumer protection law claims based on the Mylan Defendants' argument that the Class Complaint never pleads reliance.

Fifth, the Mylan Defendants contend that the state consumer protection law claims fail because the class plaintiffs never allege that Mylan's conduct caused their injuries. The Mylan Defendants rely again on their standing arguments. *See* Doc. 219 at 49. As the court concluded above, the Class Complaint adequately alleges that Mylan's unlawful conduct caused them to pay inflated prices for the EpiPen, and—but for Mylan's unlawful conduct—the class plaintiffs would have paid less for the EpiPen (both branded and generic versions). These allegations adequately allege causation sufficient to support the state consumer protection law claims.

Finally, the Mylan Defendants assert that the class plaintiffs have failed to plead the state consumer protection law claims with the particularity required by *Fed. R. Civ. P. 9(b)*. The class plaintiffs respond, asserting that at least 15 state consumer protection statutes don't require a plaintiff **[**188]** to plead the claims with particularity. Doc. 123 at 143 & n.567. The class plaintiffs also assert that *Rule 9(b)*'s heightened pleading standards don't apply to their allegations of fraud by omission or concealment. *See, e.g.*, *AKH Co. v. Universal Underwriters Ins. Co., No. 13-2003-JAR, 2015 U.S. Dist. LEXIS 52056, 2015 WL 1809157, at *13 (D. Kan. Apr. 21, 2015)* (explaining that "allegations of concealment, as opposed to an affirmative act, do not require the same level of specificity because often it is impossible to know of the exact 'who, when, and where' in relation to an omission" and finding that "[g]iven this relaxed standard" the alleged claims about concealment were sufficiently specific to state a fraud claim). And, the class plaintiffs contend, they need not plead their claims based on unconscionable or unfair practices with particularity. *See* *DuMont v. Litton Loan Servicing, LP, No. 12 Civ. 2677(ER), 2015 U.S. Dist. LEXIS 29787, 2015 WL 1061138, at *13 (S.D.N.Y. Mar. 11, 2015)* (explaining that " unconscionable commercial practices claims are distinct from [consumer protection] claims sounding in fraud," and thus "the heightened pleading standard of *Rule 9(b)* does not apply" (citations and internal quotation marks omitted)).

The court concludes that the class plaintiffs have alleged their state consumer protection law claims with sufficient particularity. ***HN62***[] The Tenth Circuit "requires a complaint alleging **[**189]** fraud to set forth the time, place and contents of the false representation, the identity of the party making the false statements and the consequences thereof." *See* *Koch v. Koch Indus., Inc., 203 F.3d 1202, 1236 (10th Cir. 2000)* (internal quotation and citation omitted). The Class Complaint satisfies that standard here.

It alleges several misrepresentations or omissions identifying the time, place, and contents of the alleged misrepresentations, as well as the identity of the party making them. For example, the Class Complaint alleges that Mylan CEO Heather Bresch gave false and misleading statements about EpiPen's profits and the reasons for raising the EpiPen's profits in her September 21, 2016, Congressional testimony, a January 27, 2017, interview with CBS News, a June 9, 2017, interview with the *Los Angeles Times*, and a December 1, 2016, *Forbes* Summit interview. *See* Class Complaint ¶¶ 194-95, 375, 417-48. It also alleges that Mylan made misleading statements in an August 24, 2011, press release **[*1342]** about its decision to sell the EpiPen exclusively as a 2-Pak. *Id.* ¶¶ 336-39. It also alleges that Mylan made misleading statements in its marketing materials distributed during 2014. *Id.* 232-34. According to the Class Complaint, the marketing materials included **[**190]** misleading statements, touting EpiPen as the "preferred brand" and suggesting that Auvi-Q's exclusion was based on clinical recommendations—not the large, conditional rebates that Mylan gave to formularies in exchange for offering EpiPen exclusively and excluding Auvi-Q. *Id.*

While it is true, the Class Complaint does not "provide[ ] details about how and when" the class plaintiffs learned about the misrepresentations, this is of no legal consequence at this stage. ***HN63***[] The "Tenth Circuit's standard requires only particular information about the representation itself." *In re Syngenta AG MIR 162 Corn Litig., 131 F. Supp. 3d at 1228* (citing *Near v. Crivello, 673 F. Supp. 2d 1265, 1285 (D. Kan. 2009))*. As Judge Lungstrum explained, "[a] plaintiff need not plead every fact that supports its claim of fraud, and such facts concerning [a plaintiff's] receipt of the statements are readily obtained in discovery." *Id.* Here, the Class Complaint's allegations about Mylan's purported misrepresentations satisfy the Tenth Circuit's standard.

The Class Complaint also alleges the consequences of Mylan's alleged misrepresentations. They caused the class plaintiffs to pay inflated prices for the EpiPen. *Id.* ¶¶ 492, 685-91. For all these reasons, the court finds that **[**191]** the class plaintiffs have alleged their state consumer protection law claims with sufficient particularity—to the extent the asserted state law claims even require such heightened pleading.

4. Specific State Consumer Protection Laws

Finally, the Mylan Defendants assert that the court must dismiss the class claims under certain state consumer protection laws because those statutes bar class actions. These statutes include the state consumer protection laws of Alabama, Colorado, Georgia, Louisiana, Mississippi, South Carolina, and Tennessee.

The class plaintiffs respond, asserting that the Mylan Defendants' argument is premature and without merit. They contend that the court can address this issue at the class certification stage, and, even then, other courts have permitted putative class action claims for state consumer protection violations to proceed despite a statute's restrictions on class actions. *See* *Lisk v. Lumber One Wood Preserving, LLC, 792 F.3d 1331, 1336 (11th Cir. 2015)* (holding that the Alabama Deceptive Trade Practices Act "restricting class actions . . . does not apply in federal court. *Rule 23* controls."); *Suchanek v. Sturm Foods, Inc., 311 F.R.D. 239, 264 (S.D. Ill. 2015)* (holding that *Rule 23* governed plaintiffs' consumer protection act claims under Alabama, South Carolina, and Tennessee law despite those statutes' restrictions **[**192]** on class actions); *In re Hydroxycut Mktg. & Sales Practices Litig., 299 F.R.D. 648, 654 (S.D. Cal. 2014)* (explaining that "[w]hether the state statutory provisions that prohibit class actions for unfair or deceptive practices are 'procedural' or 'substantive,' is a difficult question with no clear answer" but concluding that "these limitations on class actions [are] procedural in nature" so "*Rule 23* governs Plaintiffs' claims [under the consumer protection laws of Georgia, Louisiana, Montana, South Carolina, and Tennessee] and are not subject to dismissal based on the state statutes prohibiting class actions").

As the class plaintiffs recognize, the Tenth Circuit has not provided guidance on the question. *See* *Friedman v. Dollar Thrifty Auto. Grp., Inc., No. 12-cv-02432-WYD-KMT, 2015 U.S. Dist. LEXIS 166359, 2015 WL 8479746, at *5 (D. **[*1343]** Colo. Dec. 10, 2015)* (acknowledging "there is no definitive guidance from the Tenth Circuit or the Colorado Supreme Court" whether the *Colorado Consumer Protection Act*'s class action restriction is substantive and thus controls over *Rule 23*). Although our court has dismissed class claims asserted under the Colorado Consumer Protection Act at the pleading stage based on that statute's restriction for class actions, *see* *In re Syngenta AG MIR 162 Corn Litig., 131 F. Supp. 3d at 1234-35*, this ruling never addressed whether Colorado's class **[**193]** action restriction is a substantive right or procedural rule, *see id.*[28]

Some courts have concluded that the Colorado class action restriction is substantive, thus controlling, and requires dismissal of class action claims asserted under the Act. *See, e.g.,* *Davidson v. Apple, Inc., No. 16-CV-04942-LHK, 2018 U.S. Dist. LEXIS 137707, 2018 WL 2325426, at *11 (N.D. Cal. May 8, 2018)* (holding that the Colorado Consumer Protection Act's restriction on class actions was a substantive state right that barred plaintiffs' class claims); *Friedman, 2015 U.S. Dist. LEXIS 166359, 2015 WL 8479746, at *5* (holding that "the class action restriction in the [Colorado Consumer Protection Act] is substantive, not procedural . . . [a]ccordingly, the state statute controls rather than *Fed. R. Civ. P. 23*, and the class action restriction is enforceable").

Other courts have reached the opposite conclusion. *See* *Andren v. Alere, Inc., No. 16cv1255-GPC(AGS), 2017 U.S. Dist. LEXIS 209405, 2017 WL 6509550, at *21-22 (S.D. Cal. Dec. 20, 2017)* (holding that the class action

---

[28] The class plaintiffs argue that *Syngenta* differs because that case involved only money damages—not claims for injunctive relief like the class plaintiffs seek here. The court is not persuaded by this argument. ***HN64***[] Indeed, one Colorado court recently has concluded that the Colorado Consumer Protection Act does not permit a plaintiff to seek injunctive relief "on behalf of either himself or a class." *Carter v. Amica Mut. Ins. Co., No. 17-cv-02156-RM-MEH, 2018 U.S. Dist. LEXIS 104802, 2018 WL 3093320, at *9 (D. Colo. June 22, 2018)* (citation omitted). The Mylan Defendants have not moved the court to dismiss the class plaintiffs' claims for injunctive relief under the Colorado Consumer Protection Act for this reason. Their motion only seeks dismissal of the class claims generally. For reasons explained above, the court defers ruling this issue until later in the litigation.

restriction in the Colorado consumer protection statute was procedural and thus did not bar class action claims asserted under the statute); *In re Volkswagen Timing Chain Prod. Liab. Litig., No. 16-2765(JLL), 2017 U.S. Dist. LEXIS 70299, 2017 WL 1902160, at *24 (D.N.J. May 8, 2017)* (holding that class action restrictions in the state consumer protection laws of Colorado, Georgia, and South Carolina did not bar plaintiffs' class action claims in federal court because *Rule 23*—not the state law restrictions—governed **[**194]** the claims).

While it is a close call, the court declines, for now, to dismiss these state law claims. This interim conclusion is driven by pragmatic factors. For one, leaving these claims in the case will not materially affect the discovery burden borne by the parties. Also, it may provide an opportunity for our Circuit to decide the question conclusively. This tack, as plaintiffs suggest, is one other courts have employed. *See, e.g.*, *Falk v. Nissan N. Am., Inc., No. 17-cv-04871-HSG, 2018 U.S. Dist. LEXIS 82809, 2018 WL 2234303, at *7 (N.D. Cal. May 16, 2018)* (denying defendant's motion to dismiss a plaintiff's Colorado Consumer Protection Act claim based on the statute's class action restriction because the issue was too "premature to decide at this early stage" and "can be addressed on a motion for class certification"); *In re Volkswagen Timing Chain Prod. Liab. Litig., 2017 U.S. Dist. LEXIS 70299, 2017 WL 1902160, at *24* (denying motion to dismiss state consumer protection law claims based on the statutes' class action restrictions because the motion "does not attack the sufficiency of the class allegations in the Complaint, but rather directs its argument **[*1344]** as to whether the action could proceed as a class action in general" and "any attacks as to whether class certification is appropriate can be raised at the class certification phase.").

Finding these cases **[**195]** persuasive and following their guidance, the court declines to dismiss the state consumer protection claims asserted under the laws of Alabama, Colorado, Georgia, Louisiana, Mississippi, South Carolina, and Tennessee on the *Rule 12(b)(6)* motion to dismiss. But class plaintiffs are on notice that real doubt exists about the substance of these claims. And, if the Mylan Defendants reassert these arguments at class certification or summary judgment, the court will decide them then.

The Mylan Defendants also argue that other state-specific grounds exist to dismiss the class plaintiffs' state consumer protection law claims. *See* Doc. 95 at 101 & n.78. But "[i]n the interest of judicial economy," the Mylan Defendants assert that the court need not confront all these issues now. *Id.* And the Mylan Defendants reserve their right to address their additional defenses on a motion for judgment on the pleadings under *Rule 12(c)*. The class plaintiffs don't respond to this request. The court thus permits the Mylan Defendants to raise such arguments later in the litigation, if they choose to do so.

In sum, the court finds that the class plaintiffs have stated plausible claims for relief under the various state consumer protection **[**196]** laws asserted in the Class Complaint. However, the court still dismisses the state consumer protection law claims asserted under the laws of ten states because the Class Complaint includes no named plaintiff who resides in those ten states. *See supra* Part III.A.8. Those states include: Arizona, Idaho,[29] Indiana,[30] Louisiana,[31] New Mexico, Oregon, Vermont, Washington,[32] Wisconsin, and Wyoming.[33] The court also

---

[29] *See* Doc. 569. After the class plaintiffs filed a voluntary dismissal of the only class plaintiff residing in Idaho (Doc. 555), the Mylan Defendants filed a Notice asking the court to dismiss the Idaho consumer protection claim for the same reasons asserted in their previously filed Motion to Dismiss because a named plaintiff no longer exists in the Class Complaint.

[30] The Class Complaint names only one plaintiff who resides in Indiana—Alene McDaniel. Class Compl. ¶ 29. But Ms. McDaniel voluntarily dismissed her claims on July 31, 2018. Doc. 829. So the Class Complaint contains no named plaintiff residing in Indiana.

[31] *See* Doc. 569. The Notice described in note 29 *supra* also seeks dismissal of the Louisiana consumer protection claim because the class plaintiffs filed a voluntary dismissal of the only class plaintiff residing in Louisiana (Doc. 549).

[32] The Class Complaint names only one plaintiff who resides in Washington—Connie Stafford. Class Compl. ¶ 61. But Ms. Stafford voluntarily dismissed her claims on July 24, 2018. Doc. 811. So the Class Complaint contains no named plaintiff residing in Washington.

dismisses the Class Complaint's claim asserted under the Georgia Uniform Deceptive Trade Practices Act. Kimberly Dollander is the only plaintiff who asserts a claim under this statute on her own behalf and on behalf of other George residents. Class Compl. ¶ 855. But Ms. Dollander voluntarily dismissed her claims on July 31, 2018. Doc. 829. The court does not dismiss the Georgia Fair Business Practice Act claim, however, because two plaintiffs—Ms. Dollander and Local 282—assert this claim on behalf of themselves and other Georgia **[*1345]** residents. Class Compl. ¶ 841. Because Local 282 remains a plaintiff in the case, the court does not dismiss the Georgia Fair Business Practice Act claim.

E. Unjust Enrichment

Leaving no stone unturned, the class plaintiffs bring an unjust enrichment claim **[**197]** "under the common law of all 50 states" and even one under the laws of unidentified "territories" of the United States. Class Compl. ¶ 60. Because the Class Complaint includes no named plaintiff who resides in Alaska, Arizona, the District of Columbia, Idaho, Indiana, Iowa, Louisiana, Montana, New Mexico, North and South Dakota, Oregon, Puerto Rico, Rhode Island, Vermont, Washington, Wisconsin, or Wyoming, the court dismisses the unjust enrichment claims asserted under those states' laws. *See supra* Part III.A.8.

The Mylan Defendants[34] seek dismissal of the remaining unjust enrichment claims, arguing—similar to other arguments that the court has addressed above—that the class plaintiffs cannot assert unjust enrichment claims when they received exactly what they paid for—*i.e.*, the EpiPen. Other courts have refused to dismiss unjust enrichment claims for this reason at the motion to dismiss stage because, generally, the question whether a plaintiff received the benefit of the bargain is a factual one. *See, e.g.,* In re Auto. Parts Antitrust Litig., 29 F. Supp. 3d 982, 1015 (E.D. Mich. 2014) (denying motion to dismiss unjust enrichment claims because the court "disagree[d] with Defendants that the exchange of Fuel Senders for payment acts as a flat ban on [plaintiffs'] **[**198]** unjust enrichment claims," instead, "[t]he issue is whether the transaction was unjust" and plaintiffs' allegations that they "overpaid for Fuel Senders because Defendants fixed the prices of Fuel Senders and rigged the bidding process . . . [gave] rise to factual questions as to whether the consideration was reasonable, valuable or adequate"); In re Bisphenol-A (BPA) Polycarbonate Plastic Prods. Liab. Litig., 687 F. Supp. 2d 897, 910 (W.D. Mo. 2009) (holding that defendants' argument that "there can be no unjust enrichment because Plaintiffs received what they bargained for" involved "factual matters that the Court cannot resolve while ruling on a motion to dismiss"); In re K-Dur Antitrust Litig., 338 F. Supp. 2d 517, 545 (D.N.J. 2004) (denying a Rule 12(b)(6) motion to dismiss unjust enrichment claims because "[p]laintiffs' receipt of valuable medicine for their payments does not, as Defendants contend, bar an unjust enrichment claim" and "[d]eterminations that depend on evaluating whether a benefit received approximates the value paid are primarily questions of fact, and as such, are not appropriately addressed on a motion to dismiss"). For the same reason, the court cannot conclude—as a matter of law—that the class plaintiffs' unjust enrichment claims fail simply because they have alleged that they received the EpiPen in exchange for their payments.

Instead, the **[**199]** court finds that the class plaintiffs have alleged facts that plausibly state a claim for unjust enrichment. ***HN65***[] Although the elements of an unjust enrichment claim differ among various state laws, generally, an unjust enrichment claim requires a plaintiff to allege that: (1) he or she conferred a benefit on defendant, and (2) defendant's retention of the benefit under the circumstances is unjust. *See* Doc. 95-3 (Mylan Defendants submitted a chart showing the pleading requirements for unjust enrichment claims under the **[*1346]** various state laws asserted in the Class Complaint);[35] *see also* In re Estate of Sauder, 283 Kan. 694, 156 P.3d

[33] The Class Complaint names only one plaintiff who resides in Wyoming—Curt Palmer. Class Compl. ¶ 64. But Mr. Palmer voluntarily dismissed his claims on February 7, 2018. Doc. 139. So the Class Complaint contains no named plaintiff residing in Wyoming.

[34] The Class Complaint asserts the unjust enrichment claim against just Mylan. Class Compl. ¶¶ 1421-28.

[35] The class plaintiffs agree that the Mylan Defendants' chart provides the elements of unjust enrichment claims under the various state laws asserted in the Class Complaint. *See* Doc. 123 at 147 n. 581.

1204, 1220 (Kan. 2007) ("The theory of unjust enrichment rests upon three elements: (1) a benefit conferred; (2) an appreciation or knowledge of the benefit by the one receiving the benefit; and (3) the acceptance or retention of the benefit under such circumstances as to make it inequitable to retain the benefit without payment of its value." (citations omitted)).

Here, the class plaintiffs have alleged facts sufficient to support the elements of an unjust enrichment claim. The Class Complaint alleges that the class plaintiffs conferred a benefit on the Mylan Defendants in the form of overpayments for the EpiPen. Class Compl. ¶ 1424. **[**200]** And, the class plaintiffs assert, the Mylan Defendants' retention of those benefits is unjust because they procured the benefit through "price gouging, unconscionable sales, unlawful acts, and as set forth [in other parts of the Class Complaint]." *Id.* ¶ 1427. These allegations suffice to state plausible unjust enrichment claims under the remaining state laws asserted in the Class Complaint.

IV. Conclusion

For reasons explained, the court grants defendants' Motions to Dismiss in part. The court dismisses:

(1) the class plaintiffs' exclusive dealing claims against the Mylan Defendants based on discounts or rebates that Mylan offered to state or state agencies because the *Noerr-Pennington* doctrine immunizes them from liability;
(2) the class plaintiffs' antitrust claim based on deceptive speech asserted against the Mylan Defendants to the extent the class plaintiffs base their claim on Mylan's alleged failure to disclose that it paid physicians for their statements supporting the EpiPen 2-Pak;

(3) the class plaintiffs' state law antitrust claims asserted against both sets of defendants under the laws of Alaska, Arizona, the District of Columbia, Iowa, New Mexico, North and South Dakota, Oregon, **[**201]** Puerto Rico, Rhode Island, Vermont, and Wisconsin because the Class Complaint includes no named plaintiff who resides in any of these states;
(4) the class plaintiffs' state law antitrust claims asserted under the laws of Arkansas, Massachusetts, and Missouri because indirect purchasers may not bring a cause of action under these state statutes;
(5) the class plaintiffs' state law claims based on unilateral conduct and asserted in Counts IV, V, and VI (monopolization, attempted monopolization, and tying) under California's Cartwright Act (but not its the Unfair Competition Law) and under the laws of Kansas, New York, and Tennessee because these states do not recognize unilateral conduct claims;

(6) the class plaintiffs' state law consumer protection claims asserted in Count VIII under the laws of Arizona, Idaho, Indiana, Louisiana, New Mexico, Oregon, Vermont, Washington, Wisconsin, and Wyoming and the Georgia Uniform Deceptive Trade Practices Act because the Class Complaint includes **[*1347]** no named plaintiff who resides in any of these states; and

(7) the class plaintiffs' unjust enrichment claims asserted in Count IX under the laws of Alaska, Arizona, the District of Columbia, Idaho, Indiana, **[**202]** Iowa, Louisiana, Montana, New Mexico, North and South Dakota, Oregon, Puerto Rico, Rhode Island, Vermont, Washington, Wisconsin, and Wyoming because the Class Complaint includes no named plaintiff who resides in any of these states.

In all other respects, the court denies defendants' Motions to Dismiss.

IT IS THEREFORE ORDERED BY THE COURT that the Pfizer Defendants' Motion to Dismiss Plaintiffs' Consolidated Class Action Complaint (Doc. 92) is granted in part and denied in part as set forth in this Order.

IT IS FURTHER ORDERED THAT that the Mylan Defendants' Motion to Dismiss Plaintiffs' Consolidated Class Action Complaint (Doc. 94) is granted in part and denied in part as set forth in this Order.

IT IS FURTHER ORDERED THAT the Mylan Defendants' Request for Oral Argument (Doc. 220) is denied.

IT IS SO ORDERED.

Dated this 20th day of August, 2018, at Kansas City, Kansas.

Opinion

[*400] MEMORANDUM AND ORDER

SHERIDAN, U.S.D.J.

Presently before the Court is Defendants Pfizer Inc., Pfizer Manufacturing Limited, Pfizer Ireland Pharmaceuticals, Warner-Lambert Co., and Warner-Lambert Co. LLC's Motion for Judgment on the Pleadings pursuant *Federal Rule of Civil Procedure 12(c)*, regarding End-Payor Plaintiffs' Second Amended Consolidated Complaint. (ECF No. 755). This case arises from allegations that two drug companies, Pfizer and Ranbaxy, engaged in an anticompetitive scheme that prevented the generic drug of Lipitor from entering the market. Plaintiffs are end-payor purchasers (hereinafter "EPP") who claim to have paid inflated costs for the brand-named drug, Lipitor, due to, among other things, a delayed entry provision included in Pfizer and Ranbaxy's settlement agreement. **[**3]** Unlike the Direct Purchaser Plaintiffs, who assert claims under the Sherman Act, the EPPs base their claims on their respective **[*401]** state's antitrust and consumer protection acts.

BACKGROUND

I. Parties

Plaintiffs are a collection of organizations including insurance carriers, Taft-Hartley funds, municipalities, and individuals, who have been indirectly affected by Defendants' alleged schemes. For example, jointly administered Taft-Hartley fund and employee welfare benefit plaintiffs include: A.F.L.-A.G.C. Building Trades Welfare Plan, a self-insured health and welfare benefit plan in Alabama (*Id.* at ¶ 24); New Mexico United Food and Commercial Workers Union's and Employers' Health and Welfare Trust Fund, a Taft-Hartley fund (*Id.* at ¶ 26); Bakers Local 433 Health Fund of South Dakota; and Minnesota's Twin Cities Bakery Workers Health and Welfare Fund. (*Id.* at ¶¶ 28-29).

Health insurance carrier plaintiffs include: Louisiana Health Services Indemnity Company d/b/a Bluecross/Blueshield of Louisiana, a corporation licensed to conduct business in Louisiana that provides health benefits to covered members (*Id.* at ¶ 27); Fraternal Order of Police, Fort Lauderdale Lodge 31, Insurance Trust Fund, a **[**4]** governmental health insurance plan that provides health and major medical insurance to active and retired Fort Lauderdale police officers and their dependents. (*Id.* at ¶ 30).

Municipality plaintiffs include: the Mayor and City Council of Baltimore, Maryland (*Id.* at ¶ 25), and the City of Providence, Rhode Island, both municipal corporations with self-insured health and welfare benefit plans. (*Id.* at ¶ 31).

Finally, the six individual plaintiffs are Edward Czarnecki, a Wisconsin resident; Emilie Heinle, a North Dakota resident; Andrew Livenzey from Massachusetts; Edward Ellenson from Hawaii; Jean Ellyne Dougan, an Arkansas resident; and Nancy Billington of Montana (*Id.* at ¶¶ 32-37).

All plaintiffs claim to have purchased or provided partial payment for some of, or the entire price of, Lipitor or its generic version. (*Id.* at ¶¶ 24-46). Plaintiffs contend that they were all injured as a result of Defendants' anticompetitive schemes, since they paid a premium for the medication. (*Id.*).

Defendants in this case are Pfizer and Ranbaxy. (*Id.* at ¶¶ 38-46). Pfizer Inc., Pfizer Ireland Pharmaceuticals, and Warner-Lambert Company are collectively referred to as Pfizer. (*Id.* at ¶¶ 38-42). Pfizer Inc. **[**5]** is the parent company of Pfizer Ireland Pharmaceuticals, an Irish unlimited liability company that is a wholly owned, indirect subsidiary of Pfizer Inc. (*Id.* at ¶¶ 38-39). Pfizer acquired Warner-Lambert Company in 2000. (*Id.* at ¶ 40). According to the Complaint, reference to Warner-Lambert also includes, but is not limited to, Warner-Lambert employees Bruce D. Roth, Joan Thierstein, and Jerry F. Janssen. (*Id.* at ¶ 41). In addition, the Complaint names Defendants Ranbaxy Laboratories Limited, Ranbaxy Inc., and Ranbaxy Pharmaceuticals Inc. collectively as Ranbaxy. (*Id.* at ¶¶ 43-46). Ranbaxy Laboratories Limited is an Indian corporation that wholly owns Ranbaxy Inc., which has a place of business in New Jersey. (*Id.* at ¶¶ 43-49).

II. Facts

In the Complaint, EPPs identify several anticompetitive schemes that purportedly give rise to the present lawsuit. Specifically, Plaintiffs allege that Defendants fraudulently obtained a second, duplicative, patent from the United States Patent and Trademark Office (PTO); listed that patent in the book of Approved Drug Products with Therapeutic Equivalence Evaluations **[*402]** (the "Orange Book"); engaged in sham litigation relating to the second patent; filed **[**6]** a sham citizen petition with the FDA; entered into an unlawful reverse payment agreement with Ranbaxy; and manipulated the statutorily created 180 day first-to-file period[1] to sustain Pfizer's and Ranbaxy's exclusivity and collectively prevent other generic companies from entering the market. The Court discusses each allegation in turn.

1. Walker Process and Fraudulent Orange Book Allegations

EPPs first present a *Walker Process*[2] claim against Pfizer, based on Pfizer's enforcement of an invalid patent and fraudulent listing of the patent in the Orange Book. By way of background, Warner-Lambert, which was later acquired by Pfizer in 2000, applied for the Original Lipitor Patent on March 30, 1986 and subsequently received Patent No. 4,681,893 ('893 Patent) on July 21, 1987. (*Id.* at ¶¶ 95, 104). The Original Lipitor Patent was for a racemic mixture, which contains equal amounts of two enantiomers that inhibit the production of cholesterol. (*Id.* at ¶ 7). Enantiomers are made of mirrored images of stereoisomers, which are two or more compounds with the same atoms but arranged differently. (*Id.* at ¶¶ 85-86). In a racemic mixture, it is common for one enantiomer to have all or most of the biological activity, while the other is **[**7]** largely inactive. (*Id.* at ¶ 89).

According to the Complaint, the compounds in the '893 Patent were not limited to any particular stereochemistry; instead, the structure included four different stereoisomers possibilities: R-trans, S-trans, R-cis, and S-cis isomers. (*Id.* at ¶ 103). Even though the '893 Patent covered the multiple possibilities, Warner-Lambert focused on developing the R-trans enantiomer of the compound, in calcium salt form, which would eventually be sold as Lipitor. (*Id.* at ¶¶ 106-07). Warner-Lambert achieved patent extensions and regulatory exclusivities that postponed the patent's expiration from May 30, 2006 to March 24, 2010. (*Id.* at ¶ 104).

On July 21, 1989, Warner-Lambert applied for a patent to specifically protect the R-trans enantiomer, which later became the '995 Enantiomer Patent. (*Id.* at ¶ 126). According to the Complaint, Warner-Lambert had to prove the R-trans enantiomer's activity had a "surprising" or "unexpected" characteristic to procure a subsequent patent; put differently, they had to justify why the proposed patent was not already protected by the by the '893 Patent. (*Id.* at ¶ 109). Plaintiffs allege Warner-Lambert tasked its senior management with finding "something that could **[**8]** be mischaracterized as surprising." (*Id.* at ¶¶ 110-14). Warner-Lambert included a table in the '995 Patent application to demonstrate the surprising results that the R-trans enantiomer was one hundred times more active than the S-trans enantiomer and ten times more active than the racemic mixture. (*Id.* at ¶ 128). However, Plaintiffs claim that

---

[1] *21 U.S.C. § 355(j)(5)(B)(iv)*.

[2] *Walker Process Equipment, Inc. v. Food Machinery & Chemical Corp., 382 U.S. 172, 86 S. Ct. 347, 15 L. Ed. 2d 247 (1965)*.

one skilled in the art would know "one enantiomer is the 'active' isomer, while the other is 'inactive,' and thus the active enantiomer is about twice as active as the racemic mixture." (*Id.* at ¶ 121). Further, the Complaint states Warner-Lambert would have known, through testing and experimentation, that the R enantiomer was likely to be the active isomer. (*Id.* at ¶ 122). Plaintiffs allege that Warner-Lambert failed to calculate the average result from its various tests and, instead, "cherry-picked **[*403]** from among the results [of the tests] in order to generate a table that supported its claim of 'surprising activity.'" (*Id.* at ¶ 135). As a result, the data Warner-Lambert provided in its application was allegedly both false and misleading, since the R-trans enantiomer is approximately twice as active as the racemic mixture, not ten times. (*Id.* at ¶ 133).

The **[**9]** PTO originally rejected the '995 Patent application, since the invention was already covered and anticipated by the claims in the previously procured '893 Patent. (*Id.* at ¶ 153). Under patent law, a patent application can be rejected "if the differences between the subject matters sought to be patented and the prior art [are] such that the subject matter as a whole would have been obvious at the time of the invention was made to a person having ordinary skill in the art to which said subject matter pertains." (*Id.* at ¶ 154). In response to the PTO's rejection, Warner-Lambert then requested to amend its application to provide a declaration by Dr. Bruce Roth, who participated in developing Lipitor, in support of the newfound information regarding the R-trans enantiomer's activity. (*Id.* at ¶¶ 159-60). In his declaration, Roth asserted that the available data "shows the activity of [the R-trans enantiomer] is *surprising and unexpected* because if the [S-trans enantiomer] is accepted as inactive, the activity of [the R-trans enantiomer] would be expected to be only twice that of the racemic mixture" and not the ten times that occurred. (*Id.* at ¶¶ 165-66). Warner-Lambert argued the surprising nature of this information **[**10]** overcomes the obvious inclusion under the '893 Patent and, thus, warrants the issuance of the '995 Patent. (*Id.* at ¶ 161). Plaintiffs contend the data presented to the PTO, including the Roth Declaration were knowingly false and misleading and used to fraudulently convince the PTO to procure the new patent. (*Id.* at ¶¶ 133, 165, 170-74). Persuaded by the data submitted, the PTO eventually issued the '995 Enantiomer Patent on December 28, 1993. (*Id.* at ¶ 182).

As a result of its two approved patents, Warner-Lambert submitted a new drug application to the FDA for Lipitor, which was approved on December 17, 1996. (*Id.* at ¶ 201). Warner-Lambert then listed both the '893 Original Lipitor Patent and the '995 Enantiomer Patent in the Orange Book, which expired on May 30, 2006 and December 28, 2010, respectively. (*Id.* at ¶¶ 203-04). Thereafter, it applied for an extension of the '893 Original Lipitor Patent to account for the difference in time between the issuance of the patent covering the active ingredient in the new drug and the FDA's approval of that drug. (*Id.* at ¶¶ 206-08). As a result, the PTO postponed '893 Patent's expiration until March 24, 2010. (*Id.* at ¶ 213).

2. Sham Litigation and Citizen Petition Allegations

[11]** Plaintiffs next contend Defendants engaged in sham litigation against Ranbaxy. On August 19, 2002, Ranbaxy filed an Abbreviated New Drug Application (ANDA) to sell a generic version of Lipitor. (*Id.* at ¶¶ 221-22). While Ranbaxy verified their generic version would not violate any of the Lipitor patents, Pfizer, who had acquired Warner-Lambert by this time, filed a patent infringement lawsuit against Ranbaxy on February 21, 2003 for allegedly infringing on the '893 and '995 Patents. (*Id.* at ¶¶ 223-24). In the pre-trial proceedings, Pfizer attempted to amend its complaint to include process patent infringement claims; however, their motion was denied since these patents could not be listed in the Orange Book and, therefore, **[*404]** were not a basis for the suit.[3] (*Id.* at ¶¶ 226-27). On appeal from the District of Delaware, the Federal Circuit ruled in Pfizer's favor, finding that Ranbaxy's product infringed on the '893 Patent. However, it also dismissed Pfizer's '995 Patent infringement claim since it had

[3] In July 2000 and August 2001, Warner-Lambert acquired Patent Nos. 6,274,740 ('740 Patent) and 6,087,511 ('511 Patent). (*Id.* at ¶ 219). According to the Complaint, "[b]oth the '740 and '511 Patents are process patents, which claim a specific process for making amorphous atorvastatin calcium using crystalline Form I atorvastatin as a starting material." (*Id.*). However, while the Process Patents were valid and enforceable, they had no exclusionary effect. (*Id.* at ¶ 308). Put differently, the Process Patents could not be used to exclude any generic brands of Lipitor from the market. (*Id.*).

an improper dependent claim structure. (*Id.* at ¶ 232). As a result, Ranbaxy had to wait until the expiration of the '893 Patent in March 2010, before selling its generic version. (*Id.* at ¶¶ 232, 234).

Plaintiffs contend since the '995 Patent was fraudulently obtained, the patent infringement litigation against Ranbaxy was a baseless sham, that was intended to interfere with the introduction of Ranbaxy's generic drug into the market. (*Id.* at ¶ 230).

Plaintiffs also allege that Pfizer filed a baseless citizen petition with the FDA, in further attempt to delay the entry of generic versions of Lipitor. (*Id.* at ¶ 235). According to the Complaint, Ranbaxy's ANDA could have received FDA approval in August 2005, thereby creating generic competition. (*Id.* at ¶¶ 236-38). However, a month beforehand, July 2005, Pfizer sent a letter to the FDA, in an attempt to further delay the entry to generic versions of Lipitor. (*Id.* at ¶ 239). Four months later, November 7, 2005, Pfizer re-filed this letter, as a citizen petition, alleging that the generic brand's use of "amorphous atorvastatin calcium" could **[**12]** be "susceptible to higher levels of impurities" than Pfizer's crystalline version; as such, Pfizer averred that Ranbaxy's application needed to be carefully scrutinized and reviewed with considerable skepticism. (*Id.* at ¶¶ 241-42). However, Plaintiffs claim Pfizer had also used amorphous versions in their testing and development of Lipitor and, therefore, knew that it could be, and had been, safely made. (*Id.* at ¶¶ 242-46). As such these purported safety concerns were unfounded. (*Id.*). Further, Pfizer knew from its earlier litigation with Ranbaxy that Ranbaxy's generic drug was amorphous, rather than crystalline. (*Id.*). According to Plaintiffs, the FDA's previous decisions expressly indicated that special or additional scrutiny would not be applied when reviewing an ANDA, when a different form was used; instead, the stability of a drug, not its substance, would be the key focus in measuring the drug's quality. (*Id.* at ¶ 251). As such, given Pfizer's knowledge that amorphous versions posed no safety risks, as well as the FDA's approach to treating ANDA claims, Plaintiffs claim the petition was a baseless attempt to delay generic competition. (*Id.* at ¶¶ 261-66).

*3. Reverse Settlement **[**13]** Allegations*

Finally, Plaintiffs challenge the validity of a reverse settlement agreement made between Pfizer and Ranbaxy, after Pfizer attempted to obtain reissuance of the '995 Patent. (*Id.* at ¶ 323). To correct the invalidation of the '995 Patent, Pfizer applied for its reissuance in 2007 and conceded that the data included in its original application, concerning the R-trans enantiomer's effectiveness, contained significant errors. (*Id.* at ¶¶ 274-76). Therefore, it would no longer rely on this information in its reissuance proceedings. (*Id.* at ¶ 283). Without this information, Ranbaxy filed a protest with **[*405]** the PTO, contending that the content of the '995 Patent was "anticipated, obvious, [and] constituted double-patenting." (*Id.* at ¶¶ 279, 284). As a result, the PTO issued a non-final rejection of Pfizer's reissuance application, since it "had before it no scientific basis to conclude the enantiomer claims were anything other than obvious over the '893 Patent." (*Id.* at ¶ 285, 293). Given Pfizer's failure to receive approval for the '995 Patent, there was a strong possibility that generic brand drugs would enter the market upon expiration of the '893 Patent in March 2010. (*Id.* at ¶¶ 287-88, 294).

While Pfizer struggled to obtain a reissuance of the **[**14]** '995 Patent in 2008, it was later discovered that Ranbaxy may have infringed on another patented drug, Accupril, and, therefore, Pfizer had a potential patent infringement claim worth millions of dollars in damages. (*Id.* at ¶¶ 311-12). According to the Complaint, upon learning of this information "Pfizer needed a stage to disguise a reverse payment to Ranbaxy in order to buy Ranbaxy's agreement to delay launching of its generic version of Lipitor. If there were a pending court case against Ranbaxy involving Lipitor, Pfizer could settle with Ranbaxy through a reverse payment and (unlawfully) extend its Lipitor market exclusivity"; however, when Pfizer learned of Ranbaxy's potential Accupril infringement, there was no active litigation pending. (*Id.* at ¶ 313).

Irrespective of its reasoning, it is undisputed that Pfizer filed a complaint against Ranbaxy in March 2008 for infringing on Process Patents of the '740 and '511 Patents. (*Id.* at ¶¶ 314-315). However, as mentioned above, a court had already ruled that these patents were not exclusionary and, therefore, provided no basis for relief. (*Id.* at ¶¶ 308, 316). This being said, less than three months after the suit was filed, the parties entered into a reverse settlement **[**15]** agreement, whereby Ranbaxy would refrain from manufacturing or selling generic Lipitor until November 30, 2011. (*Id.* at ¶¶ 315, 323-26). According to the Complaint, Pfizer and Ranbaxy disguised this agreement as a way to settle the process patent litigation when, in actuality, it was a "pretext for its true anticompetitive goals and accomplishments." (*Id.* at ¶¶ 3 23 -24). Under the terms of the agreement, Ranbaxy paid Pfizer $1 million and Pfizer dismissed its multi-million dollar patent infringement claims based on Ranbaxy's generic version of Accupril. (*Id.* at ¶ 327). In addition, Ranbaxy was permitted the right to market its generic version of Lipitor in some foreign markets. (*Id.*). Further, Ranbaxy did not waive its market exclusivity right to be the first to file an ANDA for Lipitor; thereby preventing other generic competition from entering the market until after November 30, 2011. (*Id.* at ¶¶ 363-65). In return, Ranbaxy also ceased challenging Pfizer's reissuance of the '995 Patent. (*Id.* at ¶ 366). As a result, the PTO eventually granted reissuance of the '995 Patent, relying in part on Lipitor's commercial success to prove the patent could not have been obvious and, therefore, was not covered by **[**16]** the '893 Original Lipitor Patent. (*Id.* at ¶ 414).

Plaintiffs contend the accumulation of Pfizer's conduct demonstrates an anticompetitive scheme to prevent generic brands from interfering with Lipitor's market share and, as a result, Pfizer's profitability. (*Id.* at ¶ 446). Had Pfizer not fraudulently procured the '995 Patent, Plaintiffs claim there would have been no basis for its reissuance. (*Id.*). In addition, Ranbaxy only stopped protesting the '995 patent after it entered a reverse settlement agreement with Pfizer. (*Id.*). If not for these circumstances, the EPPs contend that generic versions of Lipitor would have been able to enter into the market much earlier. (*Id.* at ¶ 447).

[*406] Plaintiffs bring this case on behalf of themselves and all End-Payor class members to recover damages, calculated by the increased price they had to pay due to Pfizer's conduct in delaying the market entry of generic Lipitor. (*Id.* at ¶ 486). The class contains individuals or entities who purchased or paid for Lipitor and/or its generic version for consumption by themselves, their families, or members, employees, insureds, participants, or beneficiaries in Arizona, California, Florida, Hawaii, Illinois, Iowa, Kansas, Maine, Maryland, **[**17]** Massachusetts, Michigan, Minnesota, Mississippi, Montana, Nebraska, Nevada, New Hampshire, New Mexico, New York, North Carolina, North Dakota, Oregon, Rhode Island, South Dakota, Tennessee, Utah, West Virginia, Wisconsin, and the District of Columbia. (*Id.* at ¶ 487). The Class sues for overage damages occurred from March 24, 2010 until the effects of Defendants' conduct cease. (*Id.*).

The Complaint outlines four different claims for relief in the class action. The first is for monopolization under state law against Pfizer. (*Id.* at ¶ 497). The conduct giving rise to this claim is the fraudulent obtainment of the '995 Patent, its listing in the Orange Book, its sham litigation and citizen petition, the reissuance of the patent, and the unlawful reverse settlement agreement with Ranbaxy. (*Id.* at ¶ 500). The same factual allegations and theories asserted in Count I are again alleged in Count II against all Defendants. (*Id.* at ¶ 511). In Count III, Plaintiffs allege conspiracy to restrain of trade against all Defendants. (*Id.* at ¶¶ 527, 530). Finally, Plaintiffs allege a claim unfair or deceptive trade practices against all Defendants. (*Id.* at ¶ 546). Plaintiffs contend that as a result of Pfizer's **[**18]** anticompetitive acts or practices, Plaintiffs and the Class were deprived of the opportunity to obtain a less expensive, generic equivalent to Lipitor. (*Id.* at ¶ 547). As such, Plaintiffs seek compensation from Defendants in the form of damages.

LEGAL STANDARD

Federal Rule of Civil Procedure 12(c) permits a party to dismiss a suit "[a]fter the pleadings are closed . . . but early enough not to delay trial." *Fed. R. Civ. P. 12(c)*. "A *Rule 12(c)* motion for judgment on the pleadings is treated like a motion to dismiss under *Rule 12(b)(6)*." *Syncsort Inc. v. Sequential Software, Inc., 50 F. Supp. 2d 318, 324 (D.N.J. 1999)*. Under either rule, the Court must accept all well-pleaded factual allegations in the complaint as true and draw all reasonable inferences in favor of the nonmoving party. *Id.* For a complaint to survive dismissal, it "must contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" *Wireless Media Innovations, LLC v. Maher Terminals, LLC, 100 F. Supp. 3d 405, 407 (D.N.J. 2015)* (quoting *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*). As such, "[a] complaint should not be dismissed unless it appears beyond doubt that 'the facts alleged in the complaint, even if true, fail to support the claim.'" *Syncsort Inc., 50 F. Supp. 2d at 325*.

ANALYSIS

Defendants presently challenge EPPs' Complaint on four separate bases. First, Defendants contend that EPPs' Complaint should be dismissed in its entirety based on federal preemption principles. Second, Defendants argue **[**19]** that certain states require pre-filing notices that Plaintiffs failed to comply with and proscribe class actions under their respective consumer protection statutes. Third, Defendants aver that EPPs' state antitrust claims fail because they lack standing and fail to plead a concerted act. Finally, Defendants **[*407]** challenge EPPs' consumer protection claims for failing to comply with various state consumer protection law requirements. The Court addresses each challenge in turn.

I. Federal Law Preemption

Defendants first seek dismissal of all of Plaintiffs' state law claims, since their state law claims are preempted by federal law. Plaintiffs respond, contending that because their claims are based on antitrust and consumer fraud theories, preemption is inapplicable.

"Federal patent law preempts state law claims to the extent that state law 'stands as an obstacle to the accomplishment and execution of the full purposes and objectives of Congress' in enacting the patent laws." *Wawrzynski v. H.J. Heinz Co., 574 Fed. Appx. 99, 102 (3d Cir. 2014)* (quoting *Aronson v. Quick Point Pencil Co., 440 U.S. 257, 262, 99 S. Ct. 1096, 59 L. Ed. 2d 296 (1979))*. Notably, "district courts shall have original jurisdiction of any civil action arising under any Act of Congress relating to patents, plant variety protection, copyrights and trademarks. No State court shall **[**20]** have jurisdiction over any claim for relief arising under any Act of Congress relating to patents, plant variety protection, or copyrights." *28 U.S.C. § 1338(a)*. "Under *§ 1338(a)*, then, jurisdiction extends 'only to those cases in which a well-pleaded complaint establishes either that federal patent law creates the cause of action or that the plaintiffs right to relief necessarily depends on resolution of a substantial question of federal patent law, in that patent law is a necessary element of one of the well-pleaded claims.'" *In re Lipitor Antitrust Litig., 855 F.3d 126, 143 (3d Cir. 2017)* (quoting *Christianson v. Colt Industr. Operating Corp., 486 U.S. 800, 809, 108 S. Ct. 2166, 100 L. Ed. 2d 811 (1986))*. As such, the Court is tasked with determining whether the plaintiff's claims "arise under" patent law. *Id. at 144*. "[I]f on the face of a well-pleaded complaint there are reasons completely unrelated to the provisions and purposes of the patent laws why the plaintiff may or may not be entitled to the relief it seeks," then the claims do not "arise under" patent law. *Id.* (internal quotation marks and citations omitted).

Defendants present three theories supporting their position that Plaintiffs' state law claims are preempted. First, because Plaintiffs' claims are based on the purportedly fraudulent procurement and enforcement of the '995 patent, they must demonstrate that the patent is invalid or **[**21]** unenforceable, which is preempted under federal patent law. Second, to the extent that Plaintiffs' antitrust claims are based on the reverse settlement agreement, they are preempted since they must demonstrate the validity of the generic patents, which necessarily implicates patent law. Finally, Defendants contend that Plaintiffs' "sham" citizen petition claim is preempted, since it must demonstrate the validity of the generic patents, which, again, implicates patent law.

1. Fraudulent Patent Procurement and Enforcement

Turning first to Defendants' federal patent preemption argument, Defendants argue that Plaintiffs' state law claims require them to plead and prove that the patent is invalid or unenforceable under federal patent law. According to Defendants, the allegations in Plaintiffs' complaint that trigger federal patent law include: (1) the fraudulent procurement of the '995 patent (2) the fraudulent patent listing of the '995 Patent in the FDA's Orange Book; and (3) the "sham" litigation against Ranbaxy, seeking to enforce the '995 Patent, in addition to its two **[*408]** process patents. Defendants, citing little or no supporting case law, contend that these allegations require first knowing whether the patent at issue **[**22]** is invalid or unenforceable. If the patent was valid, then the obtainment and enforcement of same would be lawful. As such, Defendants argue that because federal patent law is necessary to support these theories, they are preempted by federal law.

However, Defendants' arguments are in direct contravention with the Third Circuit's recent holding in Lipitor, 855 F.3d at 126.[4] In *Lipitor*, the Third Circuit explicitly held that the present matter does not "arise under" federal patent law. The Third Circuit held that although a resolution of a substantial question of federal patent law is necessary for a fraudulent patent claim, that alone is not sufficient to establish that the Federal Circuit has jurisdiction. Id. at 143. The court explained that unless every theory of the claim requires resolution of a substantial question of federal law, it does not "arise under" federal patent law and, therefore, the Third Circuit has jurisdiction. *Id.* The court interpreted "arises under" to mean that every theory of the claim requires the resolution of a substantial question of federal law, if it does not, federal patent law will not preempt. *Id.* Here, even if the allegations in the Complaint present substantial questions of patent **[**23]** law, because the antitrust allegations and sham citizen petition do not, this case does not arise under federal patent law for purposes of federal patent preemption. *Id.* (quoting Christianson, 486 U.S. at 812).

Moreover, federal patent law does not preempt a state law claim in which a patent law issue is implicated if "the state law cause of action [i.] includes additional elements not found in the federal patent law cause of action and [ii.] is not an impermissible attempt to offer patent-like protection to subject matter addressed by federal law." Dow Chem. Co. v. Exxon Corp., 139 F.3d 1470, 1473 (Fed. Cir. 1998). In *Dow*, the defendant was issued a patent that disclosed certain wire and cable devices manufactured using a particular insulating polymer. Id. at 1471. At about the same time, the plaintiff introduced its own line of polymer products and filed a complaint contending that its polymer did not infringe on the defendants' patent since the defendants' patent was invalid and unenforceable. Id. at 1471-72. In addition, the plaintiff asserted a state-law unfair competition claim, alleging that that the defendant obtained its patent through inequitable conduct before the PTO. *Id.*

Finding patent preemption inapplicable, the Federal Circuit explained that there are three objectives for patent law: (1) **[**24]** to provide an incentive to invent; (2) to promote the full disclosure of inventions; and (3) to ensure "that which is in the public domain cannot be removed therefrom by action of the states." Id. at 1474 (quoting Kewanee Oil Co. v. Bicron Corp., 416 U.S. 470, 480-81, 94 S. Ct. 1879, 40 L. Ed. 2d 315 (1974)). With these objectives in mind, the *Dow* court held that when the state law cause of action includes additional elements not found in the federal patent law and state law is not an obstacle to the objectives of federal patent law, it is not preempted even if patent law is implicated. Id. at 1473. As such, the Federal Circuit held that because the state law unfair competition claim included additional elements not found in federal patent law and did not otherwise conflict with the objectives of **[*409]** federal patent law, its claims were not preempted. Id. at 1478-79.

Here, as in Dow, the EPPs state antitrust and consumer protection claims require proof of elements not found in a patent cause of action. As discussed earlier, the purpose for patent protection is to provide an incentive to invent, to promote the full disclosure of inventions and to ensure "that which is in the public domain cannot be removed therefrom by action of the states." Antitrust and consumer protection law protect consumers from being overcharged **[**25]** for products, which is a wholly different goal than patent law.

This is also consistent with the Court's decision in In re Thalomid and Revlimid Antitrust Litig., No. 14-6997, 2015 U.S. Dist. LEXIS 177541 (D.N.J. Oct. 29, 2015), where the court held that even if a state court must adjudicate a question of federal patent law, it is not preempted if it includes additional elements not part of a federal cause of action. Id. at *61-63. In *Thalomid*, the plaintiffs, who were indirect purchasers, alleged that the defendants created an antitrust scheme by obtaining patents through fraud on the PTO and bringing sham lawsuits to delay generic brands from entering the market. Id. at *4-5. As is the case here, the defendants argued that the plaintiffs' antitrust claims should be preempted by federal patent law since they alleged that they obtained the patents through unjust conduct with the PTO. Id. at *61-62. Relying on *Dow*, the court held that even if a question of federal patent law must be adjudicated, the state law claim is not preempted, as long as it contains additional elements not part of a

[4] Defendants appear to be leading the Court down the same path where it was the last time — no sense putting my fingers over the fire a second time.

federal patent cause of action. *Id.* Finding the allegations were also premised on bad faith in the marketplace (an element not required in patent law) the Court reasoned that federal patent preemption was not warranted.

Here, similar to *Thalomid* ***[**26]*** , the EPPs allege that the patents were obtained through fraud on the PTO, Pfizer improperly listed the '995 patent in the Orange Book, the generic drug was delayed entry because of sham litigation, a baseless Citizens Petition was filed, and a reverse payment settlement agreement was negotiated to prolong a monopoly. As such, because EPPs claims are predicated on claims wholly separate from the federal patent law, they are not preempted.

2. Antitrust Allegations

Defendants next argue that because Plaintiffs' antitrust claims arise from the reverse settlement agreement, it implicates federal patent law and, therefore, must be preempted. Defendants rely principally on the Third Circuit's decision in *In re Wellbutrin XL Antitrust Litig., 868 F.3d 132 (3d Cir. 2017)* for support. In *Wellbutrin*, the Third Circuit held that in order to allege an antitrust injury, based on the reverse settlement agreement between pharmaceutical companies, it is the plaintiffs' burden to demonstrate that "but for" this agreement, the generic drug would have entered the market sooner. *Id. at 164-65*. As such, if a regulatory scheme or patent law would otherwise prevent the generic drug from market entry, there can be no antitrust injury. *Id.* Here, Defendants argue that because Plaintiffs must demonstrate **[**27]** that the generic patents would have entered the market, but for the settlement, this necessarily implicates patent law.

In *Wellbutrin* the defendant obtained FDA approval for bupropion hydrochloride, which was marketed as "Wellbutrin." *Id. at 145*. Between September 2004 and May 2005, four generic manufacturers filed **[*410]** ANDAs, requesting authorization to market generic versions of Wellbutrin. *Id.* On February 9, 2007, the parties entered into a settlement agreement, which included a pay-for-delay scheme, wherein the defendants agreed to not launch their own authorized generic version of the drug for 180 days and, in return, the generic manufacturer would not launch a low dosage generic version of the drug until an agreed triggering event. *Id. at 146, 162*. In May 2008, the plaintiffs filed suit, alleging that the defendants conspired with generic manufacturers to prevent a generic version of the drug from entering the market. *Id. at 146*. The Third Circuit held that because there was a patent blocking the generic versions' launch, the settlement agreement did not cause the injury. *Id. at 165*. Put differently, the Third Circuit explained that the plaintiffs were unable to prove that "but for" the defendants' settlement agreement, the generic **[**28]** drug would have entered the market, since a patent blocking the generic versions would have nevertheless created the same effect. *Id.*

The Court rejects Defendants' expansive reading of *Wellbutrin* to hold that antitrust claims, based on reverse settlement agreements, are preempted by federal patent law. *Wellbutrin* simply sets forth considerations to be made when presented with an issue of antitrust standing, based on reverse settlement agreements. At no point in its decision did the Third Circuit mention that such an issue would trigger federal patent preemption. *See Wellbutrin, 868 F.3d at 163-70*. As such, while an antitrust claim may relate to patent issues, it is not always the case that it is necessary to explore its validity. Secondly, as noted above in *Lipitor*, the Third Circuit has already held that this case was not preempted by federal law, since Plaintiffs' claims are predicated on theories of antitrust, not patent law. *Lipitor, 855 F.3d at 146*. As such, because Plaintiffs' antitrust claims do not implicate federal patent law, the Court will not dismiss these claims based on preemption. Finally, *Wellbutrin* was decided at summary judgment, where the district court had before it a full and complete record and was, therefore, capable **[**29]** of making determinations not presently available at the pleading stage. For these reasons, the Court finds Defendants' arguments, relying on *Wellbutrin*, premature.

3. Federal Patent Law Preemption of the Citizen Petition

Lastly, Defendants argue that Plaintiffs' claim that Defendants filed sham citizen petition with the FDA is also preempted. By way of background, a citizen petition is a written request made by an interested person to the FDA, asking the agency to "issue, amend, or revoke a regulation or order, or take or refrain from taking any other forms of administrative action." *21 C.F.R. §§ 10.25*, *10.30*. Here, Defendants make a similar "but for" argument as discussed above in *Wellbutrin* and contend that before addressing the merits of the sham citizen petition claim, Plaintiffs must first prove that the challenged patent was invalid, because if it is valid, then the patent, and not the citizen petition, prevented market entry of the generic brands.

This argument fails for two reasons. First, *Lipitor* expressly held that federal patent law is not implicated by a citizen petition claim, "whether [an FDA] petition was a sham is an issue independent of patent law." *Lipitor, 855 F.3d at 146* (quoting *In re DDAVP Direct Purchaser Antitrust Litig., 585 F.3d 677, 686 (2d Cir. 2009))*. In any event, even if a citizen **[**30]** petition claim did implicate federal patent law, the Third Circuit has made clear that unless *every* theory of the claim requires the resolution of a substantial question of federal law, it does not "arise under" federal patent law. *Id.* Therefore, as discussed **[*411]** above, since this case does not "arise under" federal patent law, preemption is not appropriate.

Alternatively, Defendants argue that the federal law governing the FDA preempts Plaintiffs' sham citizen petition claim. Here, Defendants rely primarily on the Supreme Court's decision in *Buckman Co. v. Plaintiffs' Legal Committee, 531 U.S. 341, 121 S. Ct. 1012, 148 L. Ed. 2d 854 (2001)*. In *Buckman*, the Supreme Court held that fraud-on-the-FDA claims are preempted by federal law. *Id. at 353*. In that case, the defendants made two attempts to obtain FDA approval to market their bone screws, for spinal surgery. *Id. at 346*. After the FDA denied approval twice, the defendants made a third application with a more limited use, this time indicating that its use for the long bones in the arms and legs, which finally received FDA approval. *Id.* Thereafter, the plaintiffs sued under state law, alleging that the defendants made fraudulent representations to the FDA as to the intended use of their product. *Id. at 343-47*. The Supreme Court held that federal law preempted the state **[**31]** law claims, since an apparent conflict existed between the state law claims and federal law. *Id. at 348, 353*. The Supreme Court explained, "[the] conflict stems from the fact that the federal statutory scheme amply empowers the FDA to punish and deter fraud against the [FDA], and that this authority is used by the [FDA] to achieve a somewhat delicate balance of statutory objectives." *Id.* Allowing state law claims would distort the balance sought by the FDA and is, therefore, preempted by federal law. *Id.* Relying on *Buckman*, Defendants contend that Plaintiffs' sham citizen petition claim is akin to a fraud-on-the-FDA claim and should therefore be preempted.

However, courts that have been presented with this issue have narrowed the scope of *Buckman's* holding, concluding that preemption is inapplicable where the plaintiffs assert antitrust and consumer protection claims, in addition to a fraud-on-the-FDA claim. *See* *In re DDAVP Indirect Purchaser Antitrust Litig., 903 F. Supp. 2d 198, 220-21 (S.D.N.Y. 2012)*. In *DDAVP*, the Southern District of New York held that "claims mak[ing] 'freestanding allegations of wrongdoing apart from the defendant's purported failure to comply with FDA disclosure requirements'' are sufficiently pled and, therefore, not preempted. *Id.* (quoting *Desiano v. Warner-Lambert & Co., 467 F.3d 85, 95 (2d Cir. 2006))*. Here, Plaintiffs allege **[**32]** freestanding allegations, under state antitrust and consumer protection laws, that are not preempted. For example, the EPPs allege that reverse-payment settlement agreement gives rise to their state claims, which is wholly different from alleging a failure to comply with the FDA. In response, Defendants contend that "*DDAVP* unjustifiably narrows the holding of *Buckman*" and request that the Court "decline to follow its holding." However, the Court finds the reasoning in *DDAVP* persuasive. *Buckman* was concerned that fraud-on-the-FDA claims, based on state law, would interfere with the FDA's statutory scheme; however, to apply that principle to claims unrelated to FDA authority would be to severely limit the theories of relief that parties could seek. As such, this Court finds that the sham citizen petition claim is not preempted by the federal FDA law.

To sum up, the Court declines to dismiss any of Plaintiff's claims based on preemption principles.

II. Notice Challenges and Permissibility of Pursuing Class Claims

Defendants next make several challenges to EPPs' state antitrust and consumer **[*412]** protection claims. First, Defendants contend that EPPs failed to satisfy the pre-filing notice requirements **[**33]** mandated in states that require the same. Second, Defendants argue that Illinois, Montana, Tennessee, and Utah explicitly prohibit the use of class actions to enforce the rights created therein. The Court discusses each challenge in turn.

1. Pre-Filing Notice Requirements

Because the Arizona, Hawaii, Nevada, and Utah antitrust laws have notice requirements, Defendants contend that EPPs' antitrust claims in these states must be dismissed since EPPs failed to give proper notice.[5] Defendants' argument is based on the language of the respective state statutes, requiring any antitrust plaintiff to serve that state attorney general a copy of the complaint. *See* *Ariz. Rev. Stat. § 44-1415*; *Haw. Rev. Stat. § 480-13.3*; *Nev. Rev. Stat. Ann. § 598A.210(3)*; *Utah Code Ann. § 76-10-3109(9)*.

Hawaii's antitrust statutes proscribes "[u]nfair methods of competition *and* unfair or deceptive acts or practices in the conduct of or any trade or commerce." *Haw. Rev. Stat. § 480-2* (emphasis added). *Section 480-13.3* sets forth procedural requirements that must be met for a putative class of indirect purchasers alleging unfair methods of competition under *Section 480-2*. First, the class plaintiffs, within seven days of filing the lawsuit, must serve a copy of the complaint, and all supporting material, with the Hawaii attorney general, who retains sole discretion for determining **[**34]** whether the State will move forward with the action or file its own action. *Haw. Rev. Stat. §§ 480-13.3(a)(1)*, *(4)*. If the Hawaii attorney general declines to proceed with the action, the class plaintiffs then have the right to move forward. *Haw. Rev. Stat. § 480-13.3 (a)(5)(C)*.[6]

Like Hawaii, the *Utah Antitrust Act* requires notice be made to its attorney general. Specifically, the Act states, "[t]he attorney general shall be notified by the plaintiff about the filing of any class action involving antitrust violations that includes plaintiffs from this state. The attorney general shall receive a copy of each filing from each plaintiff. The attorney general may, in his or her discretion, intervene or file amicus briefs in the case, and may be heard on the question of the fairness or appropriateness of any proposed settlement agreement." *Utah Code Ann. § 76-10-3109(9)*.

Similarly, both Arizona and Nevada's antitrust statutes require the putative class plaintiff to provide notice to their respective attorney generals. Specifically, the *Arizona Uniform Antitrust Act* states that "[a] person filing a complaint, counterclaim or answer for any violation of the provisions of this article shall simultaneously with the filing of the pleading in **[*413]** the superior court or, in the case of pendent state **[**35]** law claims in the federal court, serve a copy of the complaint, counterclaim or answer on the attorney general. Proof of service on the attorney general shall be filed with the court." *Ariz. Rev. Stat. § 44-1415(A)*. Under *Nevada's Unfair Trade Practices Act*, "[a]ny person commencing an action for any violation of the provisions of this chapter shall, simultaneously with the filing of the complaint with the court, mail a copy of the complaint to the Attorney General." *Nev. Rev. Stat. Ann. § 598A.210(3)*.

Finally, both the West Virginia and Massachusetts consumer protection statutes include pre-filing notice provisions. Specifically, the *West Virginia Consumer Credit Protection Act* provides consumers who are victims to unfair, deceptive, and fraudulent business practices with a cause of action. *W. Va. Code § 46A-6-106(a)*. However, prior to initiating suit, a consumer must first inform the seller, in writing, of the alleged violation. *W. Va. Code § 46A-6-106(b)*. Courts have interpreted this statute as a "mandatory prerequisite[]" to commencing a consumer protection claim under the Act. *Harrison v. Porsche Cars N. Am., Inc., No. 15-0381, 2016 W. Va. LEXIS 245, at *5 (W.Va. 2016)*; *see also* *Stanley v. Huntington Nat'l Bank, No.11-54, 2012 U.S. Dist. LEXIS 9448, at *20-21 (N.D.W.Va. Jan. 27, 2012)*. Likewise, the *Massachusetts Consumer Protection Act* requires that "[a]t least thirty days prior to the

---

[5] It should be noted that during oral argument, EPPs' attorney contended that notice was provided, "I'm the one who gave notice in this case; I gave — first of all we gave a demand to the defendants back in 2012, with respect to all states . . . so that has been fulfilled." (Tr. of June 25, 2018 Hearing at 58:35-59:4). To me, this meant Plaintiffs gave notice in accordance with the state statutes. I have no reason to disbelieve Plaintiffs' counsel, who is an officer of the Court. However, no competent proof supporting this assertion has been provided to the Court.

[6] Courts have understood this notice requirement to apply only to claims of "unfair methods of competition," not "unfair or deceptive acts or practices"; however, neither party addresses this distinction. *See* *In re Chocolate Confectionary Antitrust Litig., 749 F. Supp. 2d 224, 243-33 (M.D. Pa. 2010)*; *In re Flash Memory Antitrust Litig., 643 F. Supp. 2d 1133, 1158 (N.D. Cal. 2009)*.

filing of any such action, a written demand for relief, identifying the claimant and reasonably describing **[**36]** the unfair or deceptive act or practice relied upon and the injury suffered, shall be mailed or delivered to any prospective respondent." *Mass. Gen. Laws. Ch. 93A, § 9(3)*. "The statutory notice requirement is not merely a procedural nicety, but, rather, 'a prerequisite to suit.'" *Rodi v. S. New Eng. Sch. of Law, 389 F.3d 5, 19 (1st Cir. 2004)* (quoting *Entrialgo v. Twin City Dodge, Inc., 368 Mass. 812, 333 N.E.2d 202, 204 (Mass. 1975))*.

2. State Consumer Protection Class Bars

Defendants next contend that EPPs' Montana, Tennessee, and Utah[7] consumer fraud claims must be dismissed, since these states prohibit class actions. Each of these statutes contain language proscribing the use of class actions to enforce the rights provided therein. *See* *Mont. Code Ann. § 30-14-133(1)* ("A consumer who suffers any ascertainable loss of money or property, real or personal, as a result of the use or employment by another person of a method, act, or practice declared unlawful by [the *Consumer Protection Act*] may bring an individual but not a class action"); *Tenn. Code Ann. § 47-18-109(a)(1)* ("Any person who suffers an ascertainable loss . . . as a result of . . . an unfair or deceptive act or practice . . . may bring an action individually to recover actual damages"); and *Utah Code Ann. § 13-11-19(2)* ("A consumer who suffers loss as a result of a violation of this chapter may recover, but not in a class action, actual damages or $2,000, whichever is greater, plus court **[**37]** costs.").

Here, EPPs do not contest the meaning of the above-mentioned statutory provisions; instead, relying on *Shady Grove Orthopedic Associates, P.A. v. Allstate Ins. Co., 559 U.S. 393, 408, 130 S. Ct. 1431, 176* ***[*414]*** *L. Ed. 2d 311 (2010)*, EPPs contend these statutory provisions are preempted by *Federal Rule of Civil Procedure 23*, since "federal procedural rules control over conflicting state rules."

3. The Shady Grove Decision[8]

To properly analyze Defendants' motion, the Court must determine whether the discussed notice requirements and class action bars are procedural or substantive. It is blackletter law that that federal courts sitting in diversity jurisdiction must utilize federal procedural law and state substantive law. *See* *Erie R.R. v. Tompkins, 304 U.S. 64, 78, 58 S. Ct. 817, 82 L. Ed. 1188 (1938)*. Therefore, if these states' notice requirements and class action bars are substantive in nature, they apply and must be followed in federal court. *See* *Shady Grove, 559 U.S. at 410*. However, there is no bright line between procedural and substantive law and, thus, the distinction is difficult to determine, especially since these two categories are not mutually exclusive. *Godin v. Schencks, 629 F.3d 79, 86 (1st Cir. 2010)*.

In interpreting *Erie*, the Supreme Court explained that a federal law will only be procedural and, thus, applicable, if the case's outcome would be the same in both federal and state courts. *Guaranty Trust Co. v. York, 326 U.S. 99, 109, 65 S. Ct. 1464, 89 L. Ed. 2079 (1945)*. This is consistent with *Erie's* "twin aims" to avoid forum shopping and **[**38]** the inequitable administration of law. *Id. at 111-12*. The Supreme Court further elaborated that before a court can consider *Erie's* outcome determinative test, it must first determine whether there is a direct conflict between the federal and state laws in question. *See* *Hanna v. Plumer, 380 U.S. 460, 470-74, 85 S. Ct. 1136, 14 L. Ed. 2d 8 (1965)*. If there is a conflict, the federal law must be used, unless it is deemed unconstitutional or outside the scope of the *Rules Enabling Act, 28 U.S.C. § 2072(b)*, which prohibits the use of federal laws if they "abridge, enlarge, or modify any [state] substantive right." *Id.* If there is not a conflict, the outcome determinative test is utilized to determine the whether to apply state or federal law. *Id.* This test has been refined as an inquiry into

---

[7] Defendants also make a similar argument for Plaintiff's Illinois consumer protection claims; however, being that the *Illinois Consumer Fraud & Deceptive Business Practice Act* does not explicitly bar class actions, the Court finds it more appropriate to consider the substantive arguments Defendants present later.

[8] At the outset, it should be noted that neither party provided any post-*Shady Grove* analysis or discussion to support their position.

"whether the scope of the Federal Rule . . . is sufficiently broad to control the issue before the court." Walker v. Armco Steel Corp., 446 U.S. 740, 749-50, 100 S. Ct. 1978, 64 L. Ed. 2d 659 (1980). Only if the federal law is sufficiently broad, will the court then continue with the *Hanna* analysis.

Most recently, the Supreme Court was presented with a similar issue that is before the Court. In *Shady Grove*, the Supreme Court was tasked with determining whether Federal Rule of Civil Procedure 23 or a New York law controlled if a class action may proceed in federal court. 559 U.S. at 396. The New York law at issue prohibited the use of class actions **[**39]** to recover a "penalty" or statutory minimum damages. N.Y. Civ. Prac. Law Ann. (CPLR) § 901(b). In *Shady Grove*, the class members met the prerequisites of Rule 23, but sued under Section 901(b) to recover unpaid interest from Allstate, which was classified as a "penalty" and, therefore, not permitted under the New York law. Id. at 397. In determining which of the two rules applied, the Supreme Court had to answer two related questions: first, whether the New York rule and Rule 23 addressed the same issue; and, if so, whether Rule 23 was within its statutory authority under the **[*415]** Rules Enabling Act. Id. at 398 (citing Burlington N. R. Co. v. Woods, 480 U.S. 1, 4-5, 107 S. Ct. 967, 94 L. Ed. 2d 1 (1987); Hanna, 380 U.S. at 463-64). In doing so, a majority of the Court concluded that Rule 23's conflict with the New York law was "unavoidable" and could not fairly be read to not "control the issue." Id. at 406 n.8. As such, because the New York rule attempted to answer the same question, the Court held "it cannot apply in diversity suits unless Rule 23 is ultra vires." Id. at 398-99. Turning to the second inquiry, however, no majority was able to come to an agreed standard. Writing for three justices, Justice Scalia explained that "it is not the substantive or procedural nature of the affected state law that matters, but the substantive or procedural nature of the Federal Rule." Id. at 410. As such, the validity **[**40]** of a Federal Rule turns on whether it regulates procedure, if it does, it is lawfully authorized by the Rules Enabling Act. *Id.*

However, in his concurring opinion, Justice Stevens criticized the plurality's categorical approach, at step two, that any federal rule that "really regulates procedure" is a sufficient basis for preempting a conflicting state law. Id. at 421-29 (Stevens, J., concurring in part and concurring in judgment). Instead, in Justice Stevens' view, the inquiry should "not necessarily turn on whether the state law at issue takes the form of what is traditionally described as substantive or procedural. Rather, it turns on whether the state law actually is part of a State's framework of substantive rights or remedies." Id. at 419. This is because there may be state procedural rules that "become so bound up with the state-created right or remedy that it defines the scope of that substantive right or remedy" and, therefore, "make it significantly more difficult to bring or to prove a claim, thus serving to limit the scope of that claim." Id. at 420.

Although the Third Circuit has yet to decide whether Justice Stevens' concurrence controls, the Court is persuaded by the majority of district and circuit courts **[**41]** that have done so.[9] Greene v. Gerber Prods. Co., 262 F. Supp. 3d 38, 60 (E.D.N.Y. 2017) (collecting cases). In doing so, courts presented with the same issue presently before the Court have framed the inquiry as whether the state statute "provides a procedure that is 'so bound up with the state-created right or remedy that it defines the scope of that substantive right or remedy.'" In re Digital Music Antitrust Litig., 812 F. Supp. 2d 390, 416 (S.D.N.Y. 2011) (quoting Shady Grove, 559 U.S. at 420 (Stevens, J. concurring in part and concurring in judgment)); In re Nexium (Esomeprazole) Antitrust Litig., 968 F. Supp. 2d 367, 409 (D. Mass. 2013). If the answer is in the affirmative, the federal rule must yield to the state law, since it would "effectively abridge[], enlarge[], or modif[y] a state-created right or remedy." Shady Grove, 559 U.S. at 422 (Stevens, J. concurring in part and concurring in judgment).

4. Application

Against this legal backdrop, the Court finds that Rule 23 is not "sufficiently broad" to cover the state statutory notice provisions. First, the conflicting rules do not attempt to answer the same question or subject. *See* Shady Grove, 559

---

[9] From the Court's perspective, in agreement with Justice Stevens, the state statutes at issue focus on various forms of deceptive practices. Rule 23 is more generic and applies to all class actions. As such, the narrower and more focused approach of the state should apply.

U.S. at 399. Here, the state laws in question address notice provisions for antitrust **[*416]** and consumer protection-related lawsuits; Rule 23, on the other hand, is a general federal procedural rule governing class actions. Second, contrary to *Erie's* twin aims, to decline to apply state statutory notice provisions "in federal court would encourage forum shopping **[**42]** and the inequitable administration of laws." In re Asacol Antitrust Litig., No. 15-12730, 2016 U.S. Dist. LEXIS 94605, at *48 (D. Mass. July 20, 2016). This is also consistent with the majority of district courts that have been presented with the same issue, and have concluded that state statutory notice provisions control in federal court. *See* Asacol, 2016 U.S. Dist. LEXIS 94605, at *48 (statutory notice provisions in Arizona, Hawaii, Nevada, and Utah apply in federal court); In re Chocolate Confectionary Antitrust Litig., 749 F. Supp. 2d 224, 232-33 (M.D. Pa. 2010) (Hawaii notice provision applies); In re Flash Memory Antitrust Litig., 643 F. Supp. 2d 1133, 1158 (N.D. Cal. 2009) (same). Accordingly, because EPPs failed to comply with the notice provisions under Arizona's Uniform Antitrust Act, Hawaii's Antitrust Act, Nevada's Unfair Trade Practices Act, and Utah's Antitrust Act, as well as Massachusetts's Consumer Protection Act and West Virginia's Consumer Credit Protection Act, EPPs' class claims under these statutes are dismissed without prejudice.

For these same reasons, the Court also finds that the class action bars incorporated in the Montana, Tennessee, and Utah consumer protection laws are not preempted by Rule 23. Here, EPPs deviate from the majority of district and circuits, which have followed Justice Steven's concurrence in *Shady Grove*, and endorse the approach taken in Lisk v. Lumber One Wood Preserving, LLC, 792 F.3d 1331, 1335 (11th Cir. 2015). In *Lisk*, the Eleventh Circuit held that there was "no relevant, meaningful distinction between" the New York law in ***[**43]*** *Shady Grove* and the Alabama Deceptive Trade Practices Act, which also bars class actions. In doing so, the court, echoing Justice Scalia's plurality decision, explained, "the question whether a federal rule abridges, enlarges, or modifies a substantive right turns on matters of substance—not on the placement of a statute within a state code." Id. at 1336. However, "[t]he decision in *Lisk* has not been widely followed outside of the Eleventh Circuit." Delgado v. Ocwen Loan Servicing, LLC, No. 13-4427, 2017 U.S. Dist. LEXIS 186408, at *23 (E.D.N.Y. Nov. 8, 2017). Instead, "most courts outside of that circuit implicitly or explicitly disagree[] with its interpretation of *Shady Grove* and its determination that there was no 'meaningful distinction'" between the New York law in *Shady Grove* and the Alabama class action bar. *Id.* (collecting cases). Instead, consistent with the courts to have considered this issue, the Court finds that the class action bars in the Montana, Tennessee, and Utah consumer protection acts control in federal court. Id. at *23-24. Moreover, in *Delgado*, the court explained, "the specific inclusion of the class action bar within the Alabama, Tennessee, and Georgia consumer protection statutes . . . evinces a desire by the state legislature to limit not only the form of the action but also the remedies **[**44]** available, placing those bars squarely within Justice Stevens' concurrence." *Id.*;[10] Fejzulai v. Sam's West, ***[*417]*** Inc., 205 F. Supp. 3d 723, 728-29 (D.S.C. 2016). That same reasoning holds here.

In sum, the Court finds that the four notice provisions under Arizona, Hawaii, Nevada, and Utah antitrust laws are applicable here and Plaintiffs failed to comply. Likewise, the notice provisions in Massachusetts and West Virginia's consumer protection laws control. As such, EPPs' claims under these six statutes are dismissed without prejudice; Plaintiffs may file an amended complaint that specifically pleads compliance with each state's notice requirement. Similarly, EPPs' class claims under Montana, Tennessee, and Utah's consumer protection statutes are dismissed without prejudice; in these three states, Plaintiffs may amend their complaint to include only claims brought on behalf of Montana, Tennessee, and Utah plaintiffs in their *individual* capacities.

III. State Antitrust Challenges

---

[10] Both Alabama and Georgia's consumer protection statutes contain similar language to Montana, Tennessee, and Utah, which all prohibit the use of class actions to enforce the rights created therein. Ala. Code Ann. § 8-19-10(f) ("A consumer or other person bringing an action under this chapter may not bring an action on behalf of a class"); Ga. Code Ann. § 10-1-399(a) ("Any person who suffers injury or damages . . . as a result of consumer acts or practices in violation of this part . . . may bring an action individually, but not in a representative capacity").

Defendants next seek dismissal of EPP's Illinois, Rhode Island, and Utah state antitrust claims, since these states lack standing under Illinois Brick Co. v. Illinois, 431 U.S. 720, 746-47, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977). In *Illinois Brick*, the Supreme Court held that indirect purchasers lacked Article III standing to assert federal antitrust claims against manufacturers **[**45]** since their injury was likely only a small portion of the injury caused by the defendants' alleged conduct. *Id. at 725-26*.

1. Illinois Antitrust Act

Relying on *Illinois Brick*, Defendants contend that EPPs' Illinois antitrust claim fails, since they lack standing. The plain language of the Illinois Antitrust Act ("IAA") states "no person shall be authorized to maintain a class action in any court of this State for indirect purchasers asserting claims under this Act, with the sole exception of this State's Attorney General, who may maintain an action parens patriae." 740 Ill. Comp. Stat. § 10/7(2). EPPs respond, contending that under *Shady Grove*, the Court should treat the Illinois Antitrust Act as a procedural law and, therefore, follow Rule 23.

District courts are divided on whether the Illinois Antitrust Act precludes indirect purchasers from filing class actions. However, a majority of courts have held that the Act is distinguishable from the New York law in *Shady Grove* and that it prohibits indirect purchaser class actions. *See, e.g.,* In re Opana Er Antritrust Litig., 162 F. Supp. 3d 704, 723 (N.D. Ill. 2016); United Food & Commer. Workers Local 1776 & Participating Employers Health & Welfare Fund v. Teikoku Pharma USA, Inc., 74 F. Supp. 3d 1052, 1083-84 (N.D. Cal. 2014); Digital Music, 812 F. Supp. 2d at 415-16; Wellbutrin XL, 756 F. Supp. 2d at 677. As discussed above, the New York law at issue in *Shady Grove* involved a general procedural rule that conflicted with Rule 23; here, however, the limitation **[**46]** prescribed in the IAA is "in the same paragraph of the same statute that creates the underlying substantive right." Digital Music, 812 F. Supp. 2d at 416; *see also* Wellbutrin XL, 756 F. Supp. 2d at 677. Further, the restrictions in the Illinois Antitrust Act appear to reflect a policy decision regarding the feasibility of duplicative recovery, which is explicitly entrusted to the attorney general, not indirect purchasers. Wellbutrin XL, 756 F. Supp. 2d at 677 (citing Illinois ex rel. Burris v. Panhandle E. Pipe Line Co., 935 F. 2d 1469, 1480 (7th Cir. 1991)). In finding that the Act to bars **[*418]** indirect purchaser antitrust class actions, courts have explained "[t]he Illinois restrictions on indirect purchaser actions are intertwined with Illinois substantive rights and remedies . . . [such that] application of Rule 23 would 'abridge, enlarge or modify' Illinois' substantive rights, and therefore Illinois' restrictions on indirect purchaser actions must be applied in federal court." *Id.*; *see also* Nexium, 968 F. Supp. 2d at 408-09; In re Solodyn (Minocycline Hydrochloride) Antitrust Litig., No. 14-2503, 2015 U.S. Dist. LEXIS 125999, at *66 (D. Mass. Aug. 14, 2015) (holding that it would be inconsistent with *Shady Grove* to conclude that Rule 23 preempts the ban on class actions contained within Illinois ***Antitrust Law***).

Several district courts have taken a less restrictive interpretation of the Illinois Antitrust Act and have allowed indirect purchasers to bring class actions under the Act. *See, e.g.,* In re Broiler Chicken Antitrust Litig., 290 F. Supp. 3d 772, 817-18 (N.D. Ill. 2017); In re Propranolol Antitrust Litig., 249 F. Supp. 3d 712, 729 (S.D.N.Y 2017); In re Aggrenox Antitrust Litig. (Aggrenox II), No. 14-2516, 2016 U.S. Dist. LEXIS 104647, at *23-28 (D. Conn. Aug. 9, 2016). In *Broiler Chicken*, the Northern District of Illinois held that **[**47]** Rule 23 applies in federal court, despite the state law's requirement that the attorney general bring class actions, since the Act does not hinder the class's substantive rights. Broiler Chicken, 290 F. Supp. 3d at 818. This is "because any indirect purchaser procedurally blocked from participation in a class action would still have the same remedy in an individual action." Aggrenox II, 2016 U.S. Dist. LEXIS 104647, at *28. As such, these courts view the Illinois Antitrust Act as a procedural conflict with Rule 23, rather than substantive, and, therefore, apply Rule 23 to permit indirect purchasers to file class actions under the Act, so long as they satisfy its prerequisites. *See, e.g.,* Propranolol., 249 F. Supp. 3d at 728.

Although district courts have taken different approaches in interpreting the Illinois Antitrust Act, the Court finds the rationale of Digital Music persuasive. The language of the Act presents a substantive conflict with Rule 23; as such, since the Illinois Antitrust Act controls, the Court finds that EPPs lack standing to assert claims under the Act and, therefore, dismisses this claim with prejudice.

2. Rhode Island Antitrust Act

Defendants next move for dismissal of EPPs Rhode Island antitrust claims since they, too, lack standing to bring an antitrust claim under *Illinois Brick*. Since the Supreme Court's decision, **[**48]** multiple states have enacted *Illinois Brick* repealer statutes that allow indirect purchasers to recover under their state law. On July 15, 2013, Rhode Island passed such a repealer, which states "[t]he fact that a person or public body has not dealt directly with the defendant shall not bar or otherwise limit recovery." *R.I. Gen. Laws § 6-36-7(d)*. As such, Plaintiffs argue the statute should be applied retroactively and, even if it cannot be applied retroactively, they nevertheless fall within the repealer's protection since Plaintiffs suffered damages past July 15, 2013.

Here, Defendants argue that the activity alleged in this claim predated July 15, 2013, since the alleged anticompetitive conduct that prevented the generic brands from entering the market occurred prior to November 30, 2011. (SAC ¶¶ 23, 469, 512, 523, 535). As such, since the conduct giving rise to the present cause of action occurred prior to the passing of Rhode Island's repealer, Defendants contend it does not apply and, under *Illinois Brick*, **[*419]** must be dismissed. In addition, Defendants aver that the statute cannot be applied retroactively.

Under Rhode Island law, it is well established that statutes cannot be applied retroactively, unless **[**49]** clearly stated. The Rhode Island Supreme Court has held that, "statutes and their amendments are construed to operate prospectively unless a specific contrary intent is expressed by the Legislature, or retroactivity must necessarily be inferred from the language employed by the law makers." *State v. Jennings, 944 A.2d 171, 173 (R.I. 2008)*; *see also* *Rodrigues v. State, 985 A.2d 311, 318 (R.I. 2009)*; *Wilkinson v. State Crime Lab. Comm'n, 788 A.2d 1129, 1140-41 (R.I. 2002)*; *Hydro-Manufacturing v. Kayser-Roth Corp., 640 A.2d 950, 954-55 (R.I. 1994)*. Additionally, courts have consistently held that the Rhode Island repealer applies prospectively. *See, e.g.,* *In re Aggrenox Antitrust Litig. ("Aggrenox I"), 94 F. Supp. 3d 224, 252-53 (D. Conn. 2015)*; *In re Cast Iron Soil Pipe & Fittings Antitrust Litig., No. 14-2508, 2015 U.S. Dist. LEXIS 121620, at *63, (E.D. Tenn. July 24, 2015)*; *In re Niaspan Antitrust Litig., 42 F. Supp. 3d 735, 759 (E.D. Pa. 2014)*. Finally, Plaintiffs' contention that Defendants' conduct has continued past July 15, 2013, thereby placing it within the repealer's protection, is belied by the explicit allegations set forth in their Complaint, which focus solely on Defendants' actions made prior to November 30, 2011. (SAC ¶¶ 23, 469, 512, 523, 535). As such, because Rhode Island's repealer does not apply retroactively and none of the activity giving rise to their claims occurred after the date of enactment (July 15, 2013), EPPs' Rhode Island antitrust claims are dismissed with prejudice.

3. Utah Antitrust Act

Lastly, in addition to failing to provide notice, Defendants contend that EPPs' Utah antitrust claims fail, since none of the named Plaintiffs are **[**50]** Utah residents, as required under Utah law. (SAC ¶ 487). As such, Defendants contend that EPPs lack standing to assert claims under the Utah Antitrust Act. *See* *Niaspan, 42 F. Supp. 3d at 759-60*. Plaintiffs respond that dismissal is not warranted, since only a member of a putative class must be from Utah. *See* *In re Liquid Aluminum Sulfate Antitrust Litig., No. 16-2687, 2017 U.S. Dist. Lexis 115294, at *112-13 (D.N.J. July 20, 2017)*.

Under the Utah Antitrust Act, "[a] person who is a *citizen* of this state or a *resident* of this state" can bring a claim. *Utah Code Ann. § 76-10-3109(1)(a)* (emphasis added). The majority of courts that have been presented with this statute require at least one Utah citizen or resident be a named plaintiff. *See* *Opana Er, 162 F. Supp. 3d at 725*; *Aggrenox I., 94 F. Supp. 3d at 251-52*; *Niaspan, 42 F. Supp. 3d at 759-60*; *Nexium, 968 F. Supp. 2d at 410*; *In Re Magnesium Oxide Antitrust Litig., No. 10-5943, 2011 U.S. Dist. LEXIS 121373, at *30 n.10 (D.N.J. Oct. 20, 2011)*. Here, neither party disputes that none of the named Plaintiffs are Utah residents or citizens. As such, guided by the majority of courts to address this issue, because there must be at least one named plaintiff who is a Utah citizen or resident in order to establish standing for the putative class, EPPs' claims under the Utah Antitrust Act are dismissed without prejudice.

In sum, EPPs' antitrust claims under Illinois and Rhode Island are dismissed and there is no right to amend due to futility. Under Utah, the claim is dismissed without prejudice; but Plaintiff may amend to name such plaintiff within thirty days.

[*420] *4. States Requiring* ***[**51]*** *Concerted Action*

Defendants next seek dismissal of Count I of EPPs' Kansas, New York, and Tennessee antitrust claims, which asserts a single claim of monopolization against Pfizer, based on fraudulently obtaining and listing the '995 Patent, obtaining reissuance of that patent, filing serial sham litigation and a sham citizen petition, and entering into a reverse settlement agreement with Ranbaxy. (SAC ¶ 504). Specifically, Defendants argue that because Kansas, New York, and Tennessee require unlawful behavior between two or more individuals, Count I must be dismissed since it alleges unilateral conduct by Pfizer.

It is clear from the Complaint that the allegations concerning the obtaining, listing, and reissuance of the '995 Patent, in addition to the sham litigation and sham citizen petition, are all unilateral actions by Pfizer (SAC ¶ 500). As such, since these allegations describe unilateral conduct, Defendants contend that Count I fails in Kansas, New York and Tennessee. *See* *Kan. Stat. Ann. §§ 50-101*, *-112*, *-132*; *N.Y. Gen. Bus. Law § 340(1)*; *Tenn. Code Ann. §§ 47-25-101*, *-102*.

The Kansas Monopolies and Unfair Trade Act proscribes "all arrangements, contracts, agreements, trusts, or combinations between persons made with a view or which tend to prevent full and free competition" and **[**52]** those "designed or which tend to advance, reduce or control the price or the cost to the producer or to the consumer of any such products or articles." *Kan. Stat. Ann. § 50-112*. The Act defines a "trust" as a "combination of capital, skill, or acts, by two or more persons" and prohibits conspiracy or combination "with any other persons . . . for the purpose of monopolizing any line of business." *Kan. Stat. Ann. §§ 50-101*, *132*. While there is scant case law interpreting the *Kansas Monopolies and Unfair Trade Act*, the Kansas Court of Appeals has held that since the Act emphasizes agreements between two or more individuals, the legislature intended for the Act to require more than unilateral conduct. *Smith v. Philip Morris Cos., 50 Kan. App. 2d 535, 335 P.3d 644, 662-67 (Kan. Ct. App. 2014)*; *see also* *In re Relafen Antitrust Litig., 221 F.R.D. 260, 283 (D. Mass. 2004)*.

Like Kansas, the *New York Donnelly Act* defines an antitrust violation as "every contract, agreement, arrangement, or combination whereby a monopoly in the conduct of any business, trade, or commerce . . . may be established or maintained, or whereby [c]competition or the free exercise of any activity in the conduct of any business, trade, or commerce . . . is or may be restrained." *N.Y. Gen. Bus. Law § 340(1)*. As such, in New York "[a]n antitrust claim under the Donnelly Act...must allege both concerted action by two or more entities and a consequent restraint **[**53]** of trade within an identified relevant product market." *Global Reins. Corp.-US. Branch v. Equitas Ltd., 18 N.Y.3d 722, 969 N.E. 2d 187, 192, 946 N.Y.S.2d 71 (N.Y. 2012)*; *see also* *In re Aluminum Warehousing Antitrust Litig. No. 13-2481, 2014 U.S. Dist. Lexis 140765, at *23 (S.D.N.Y. Sept. 14, 2014)*. However, the Northern District of New York has held that allegations of monopolistic activities, based on conspiring with other individuals, suffices to state a claim under the Donnelly Act. *See* *N. Cnty. Communs. Corp. v. Verizon N.Y. Inc., 233 F. Supp. 2d 381, 385 (N.D.N.Y. 2002)*.

Finally, like Kansas and New York, the Tennessee Trade Practices Act proscribes "[a]ll arrangements, contracts, agreements, trusts, or combinations between persons or corporations made with a view to lessen, or which tend to lessen, full and free competition . . . and all arrangements, **[*421]** contracts, agreements, trusts, or combinations between persons or corporations designed, or which tend, to advance, reduce, or control the price or the cost to the producer or the consumer." *Tenn. Code Ann. § 47-25-101*. Despite limited case law interpreting the statute, several district courts have held that "the absence of an arrangement or conspiracy between two actors is a bar" to a claim under the Tennessee statute. *Sheet Metal Workers Local 441 Health & Welfare Plan v. GlaxoSmithKline, PLC, 737 F. Supp. 2d 380, 445-46 (E.D. Pa. 2010)*; *see also* *In re Ditropan XL Antitrust Litig., 529 F. Supp. 2d 1098, 1108-09 (N.D. Cal. 2007)*; *Relafen, 221 F.R.D. at 284*.

As established above, the case law as well as the plain language of the Kansas, New York, and Tennessee antitrust statutes require concerted action between two parties. As such, allegations relating to Pfizer's **[**54]** unilateral conduct fails to state a claim under these statutes. The Court is not persuaded by Plaintiffs' argument that all alleged conduct falls within a single cause of action. Therefore, Defendants' motion as it relates to Kansas, New York, and Tennessee are granted in part and denied in part. To the extent Count I is based on Pfizer fraudulently obtaining the '995 Patent, listing that patent in the Orange Book, obtaining reissuance of the '995 Patent, filing a sham citizen petition, and engaging in sham litigation, these claims are dismissed, since the conduct is unilateral. However, the Court denies Defendants' motion to the extent that they seek dismissal of Count I based on the reverse settlement agreement with Ranbaxy.

IV. State Law Consumer Protection Claims

Defendants next challenge the sufficiency of EPPs' state consumer protection claims. The Court discusses each state individually.[11]

1. California

Defendants first seek dismissal of EPPs' claims under the California Unfair Competition Law, since EPPs failed to plead reliance. The Unfair Competition Law proscribes "any unlawful, unfair or fraudulent business act or practice." *Cal. Bus. & Prof. Code § 17200*. As such, courts have understood *Section 17200* to provide relief for three varieties **[**55]** of unfair competition: "practices which are unlawful, unfair, or fraudulent." *Ditropan XL, 529 F. Supp. 2d at 1105*. However, contrary to Defendants' assertion, reliance is only required "when a[n] [Unfair Competition Law] claim is premised on allegations that the Defendants engaged in fraudulent business practices." *Id. at 1106*. Here, EPPs claims are predicated on unlawful and unfair business practices engaged by defendants. Specifically, Plaintiffs challenge, among other things, Defendants' sham litigation, fraudulent procurement of the PTO, and reverse settlement agreement. As such, "at the very least, [EPPs] allege a claim premised on the unfair prong." *Id.*; *see also* *In re Wellbutrin XL Antitrust Litig., 260 F.R.D. 143, 160 (E.D. Pa. 2009)*. Therefore, because EPPs' allege sufficient facts to sustain an Unfair Competition Law claim based on unfair business practices, Defendants' motion for judgment on the pleadings with respect to this claim is denied.[12]

[*422] *2. Illinois*

Defendants next seek dismissal of EPPs' claims under the Illinois Consumer Fraud and Deceptive Business Practices Act since: (1) the Act does not provide additional relief beyond antitrust claims; (2) EPPs failed to plead deception or reliance; and (3) EPPs fail to demonstrate that the alleged conduct was consumer-oriented or had a consumer **[**56]** nexus. The Illinois Consumer Fraud and Deceptive Business Practices Act states that "[u]nfair methods of competition and unfair or deceptive acts or practices . . . in the conduct of any trade or commerce are hereby declared unlawful whether any person has in fact been misled, deceived or damaged thereby." *815 Ill. Comp. Stat. Ann. 505/2*. However, the state legislature did not intend for the Act to serve as an "additional antitrust enforcement mechanism." *Laughlin v. Evanston Hosp., 133 Ill. 2d 374, 550 N.E.2d 986, 993, 140 Ill. Dec. 861 (Ill. 1990)* (consumer fraud statutes cannot be used when conduct is not actionable under the state ***antitrust law***); *Siegel v. Shell Oil Co., 480 F. Supp. 2d 1034, 1046-48 (N.D. Ill. 2007)* (consumers can bring a consumer fraud claim when conduct is actionable under the Illinois Antitrust Act). As such, if the plaintiff fails to plead an antitrust claim under the Illinois Antitrust Act, those same allegations of anticompetitive conduct cannot give rise to a claim

---

[11] Because the Court has already dismissed EPPs' claims under Massachusetts, Montana, Tennessee, Utah and West Virginia's consumer protection statutes, it does not address the remaining arguments pertaining to these states.

[12] Moreover, it should be noted that, at the pleading stage it is difficult to determine whether Plaintiff's claims under California law are even based on fraudulent conduct; as such, the Court also finds Defendants' motion to be premature.

under the Illinois Consumer Fraud and Deceptive Business Practices Act. *Id.*; Siegel, 480 F. Supp. 2d at 1034; Wellbutrin XL, 260 F.R.D. at 162.

As discussed above, the Illinois Antitrust Act prohibits indirect purchaser class actions. Moreover, when reviewing the Complaint, EPPs' claims are primarily focused on anticompetitive conduct and its "allegations of consumer fraud overlap entirely with the allegations of anticompetitive conduct." Wellbutrin XL, 260 F.R.D. at 162 (quoting **[**57]** Gaebler v. New Mexico Potash Corp., 285 Ill. App. 3d 542, 676 N.E.2d 228, 230, 221 Ill. Dec. 707 (Ill. App. Ct. 1996)). Simply put, "plaintiffs may not assert what are essentially antitrust claims in the guise of a claim under [the Illinois Consumer Protection Act]." *Id.* Since any amendment would be futile, judgment on the pleadings is granted without leave to amend.

3. Maine

Defendants next seek dismissal of EPPs' claims under the Maine Unfair Trade Practices Act, since EPPs failed to allege deception and, alternatively, EPPs are not considered "consumers" under the Act. The Act proscribes "[u]nfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce." Me. Rev. Stat. tit. 5 § 207. "A business practice is 'unfair' if the injury it produces is (1) 'substantial,' (2) not 'outweighed by any countervailing benefits to consumers or competition that the practice produces,' and (3) not reasonably avoidable by consumers." In re Chocolate Confectionary Antitrust Litig., 602 F. Supp. 2d 538, 584 (M.D. Pa. 2009) (quoting Tungate v. MacLean-Stevens Studios, Inc., 1998 ME 162, 714 A.2d 792, 797 (Me. 1998)). "In pricing cases, the allegedly unfair practice must also induce the consumer to acquire something that he or she would not otherwise have purchased." *Id.* However, where as here, the purported conduct resulted in higher prices, the Maine Unfair Trade Practices Act provides no such relief, since higher prices do not induce a consumer to make purchases. **[**58]** In re Graphics Processing Units (GPU) Antitrust Litig., 527 F. Supp. 2d 1011, 1031 (N.D. Cal. 2007). As **[*423]** such, since any amendment to EPPs' claims under the Maine Consumer Protection Act would be futile, judgment on the pleadings is granted without leave to amend. *See* Chocolate Confectionary, 602 F. Supp. 2d at 585.

It is worth briefly noting that the court is unpersuaded by Plaintiff's reliance on In re Motor Vehicles Canadian Exp. Antitrust Litig., 350 F. Supp. 2d 160 (D. Me. 2004), which held that deception or reliance only applies to "unfair or deceptive acts," not "unfair methods of competition." Id. at 186-87. First, federal courts have criticized the rationale in *In re Motor Vehicles*, concluding that its "crabbed reading of *Tungate*" is incongruent with the Maine Supreme Court's holding since "[t]he Maine Supreme Court [did] not qualify its pronouncement as applicable to only 'unfair or deceptive acts.'" *In re Polyurethane Foam Antitrust Litig., 799 F. Supp. 2d 777, 787 (N.D. Ohio 2011)* (quoting Flash Memory, 643 F. Supp. 2d at 1159); *see also* Chocolate Confectionary, 602 F. Supp. 2d at 584-85; In re TFT-LCD Antitrust Litig., 586 F. Supp. 2d 1109, 1126-27 (N.D. Cal. 2008). Second, the allegations in that case concerned group boycotts,[13] not price fixing or reverse settlements, which the *In re Motor Vehicles* court reasoned would nevertheless support an unfair method of competition claim.

4. Nebraska

Defendants next seek dismissal of Plaintiffs' claims under the Nebraska Consumer Protection Act, since the purportedly wrongful conduct does not have a consumer nexus. The Nebraska Consumer Protection Act proscribes "[u]nfair methods of competition and unfair or deceptive **[**59]** acts or practices in the conduct of any trade or commerce" and allows injured individuals a private right of action. Neb. Rev. Stat. Ann §§ 59-1602; -1609. In order to state a valid claim under the Act, "the unfair or deceptive act or practice must have an impact upon the public interest." Nelson v. Lusterstone Surfacing Co., 258 Neb. 678, 605 N.W.2d 136, 142 (Neb. 2000). "The purpose of the Act is to provide consumers with protection against unlawful practices in the conduct of any trade or commerce

[13] In their brief in opposition to Defendants' motion, EPPs make explicitly clear that they "have not alleged a claim based on group boycott." (Pls' Brief in Opp. at 41).

which directly or indirectly affects the people of Nebraska" and "was intended to be an antitrust measure to protect Nebraska consumers from monopolies and price-fixing conspiracies." *Arthur v. Microsoft Corp., 267 Neb. 586, 676 N.W.2d 29, 37 (Neb. 2004)*. As such, "the Act allows any person who is injured by a violation of *§§ 59-1602 to 59-1606* which directly or indirectly affects the people of Nebraska to bring a civil action to recover damages." *Id. at 38*.

Here, as discussed above, EPPs allege that Defendants engaged in anticompetitive schemes to prevent the market entry of generic-brand Lipitor, which caused EPPs to pay a premium. Since the schemes alleged in the Complaint had an indirect impact on Nebraska consumers, EPPs' have adequately alleged that the scheme impacted the public interest. As such, Defendants' motion for judgment on the pleadings with respect to EPPs' claims under the Nebraska **[**60]** Consumer Protection Act is denied.

5. Nevada

Defendants argue that EPPs claims under the *Nevada Deceptive Trade Practices Act* should be dismissed, since EPPs failed to allege consumer reliance. Under *Section 41.600 of Nevada's Revised Statutes*, "any person who is a victim of . . . [a] deceptive trade practice as defined in [the Nevada **[*424]** Deceptive Trade Practices Act]" may a bring an action thereunder. *Nev. Rev. Stat. § 41.600*. Some courts have held that when a plaintiff seeks relief based on prohibited acts listed under *Section 598.0915*, the plaintiff is required to demonstrate deception or reliance. *See, e.g., Picus v. Wal-Mart Stores, Inc., 256 F.R.D. 651, 657 (D. Nev. 2009)*; *Sheet Metal Workers, 737 F. Supp. 2d at 417*. However, contrary to Defendants' contention, EPPs' claims do not arise under *Section 598.0915*; instead, EPPs' claims appear to be predicated on *Section 598.0923(3)*, which states that "[a] person engages in a 'deceptive trade practice' when in the course of his or her business or occupation he or she knowingly . . . violates state or federal statute or regulation relating to the sale or lease of goods or service." *Nev. Rev. Stat. § 598.0923(3)*.

Under *Section 598.0923(3)*, the Nevada Deceptive Trade Practices Act does not appear to require the plaintiff must plead reliance, nor do Defendants identify any case-law that would otherwise support this contention. *See In re Pharm. Indus. Average Wholesale Price Litig., 252 F.R.D. 83, 98 (D. Mass. 2008)* (parties agreeing that the Nevada Deceptive Trade Practices Act does not require **[**61]** proof of reliance); *see also In re Packaged Seafood Prods. Antitrust Litig., 242 F. Supp. 3d 1033, 1080-81 (S.D. Cal. 2017)* (rejecting the defendant's motion to dismiss the end purchaser plaintiff's Nevada Deceptive Trade Practices Act claims, arising from an alleged antirust conspiracy regarding packaged seafood products). As such, since EPPs' claims are predicated on allegations of anticompetitive conduct, which are considered prohibited acts under *Nev. Rev. Stat. § 598A.060(1)(a)*, the Court denies Defendants' motion for judgment on the pleadings.

6. New Mexico

Defendants next challenge EPPs' claims under the New Mexico Unfair Practices Act, since the Act does not provide relief for price fixing and, in any event, they fail to plead unconscionable conduct. The New Mexico Unfair Practices Act prohibits unfair, deceptive, and unconscionable trade practices. N.M. Rev. Stat. *§ 57-12-2*. Given the remedial nature of the Act, "courts construe its provisions broadly to facilitate this purpose." *Chocolate Confectionary, 602 F. Supp. 2d at 585* (citing *State ex rel. Stratton v. Gurley Motor Co., 1987- NMCA 063, 105 N.M. 803, 737 P.2d 1180, 1185 (N.M. 1987))*. The Act defines "unconscionable trade practice" as "an act or practice in connection with the sale . . . of any goods or services . . . that to a person's detriment: (1) takes advantage of the lack of knowledge, ability, experience or capacity of a person to a grossly unfair degree; or (2) results in a gross disparity between **[**62]** the value received by a person and the price paid." *N.M. Stat. Ann. § 57-12-2(E)*.

"Federal courts generally permit [New Mexico Unfair Practices Act] actions in price-fixing cases provided that the plaintiff alleges a 'gross disparity' between the price paid for a product and the value received." *Chocolate Confectionary, 602 F. Supp. 2d at 585* (collecting cases); *see also Flash Memory, 643 F. Supp. 2d at 1159-60*; *Liquid Aluminum Sulfate, 2017 U.S. Dist. LEXIS 115294, at *108-09*; *In re Aftermarket Filters Antitrust Litig., No. 08-4883, 2009 U.S. Dist. LEXIS 104114, at *37 (N.D. Ill. Nov. 5, 2009)*. Unlike *GPU, 527 F. Supp. 2d at 1029-30*, where the court dismissed the plaintiffs' New Mexico Unfair Practices Act for failing to plead unequal bargaining power, the Court is satisfied that, at this juncture, that EPPs have sufficiently pled enough **[*425]** facts to state a claim under the New Mexico statute. EPPs Complaint is replete with allegations of price fixing and anticompetitive schemes, and it is beyond cavil that these schemes resulted in consumers paying a substantial premium for goods that they would have otherwise paid a fraction for. *See* *TFT-LCD, 586 F. Supp. 2d at 1127* (allegations of price fixing and "gross disparity" between the value of products received and amount paid sufficient to state a claim under the New Mexico Unfair Practices Act). As such, the Court denies Defendants' motion for judgment on the pleadings as to EPPs' New Mexico Unfair Practices Act claims.

7. New York

Defendants next challenge EPPs' claims under the New York Consumer **[**63]** Protection from Deceptive Acts and Practices Act, since EPPs fail to allege particular conduct directed specifically at them and, in the alternative, fail to allege consumer reliance. *Section 349 of New York's Business Law* states, "[d]eceptive acts or practices in the conduct of any business, trade or commerce or in the furnishing of any service in this state are hereby declared unlawful." *N.Y. Gen. Bus. Law § 349(a)*. "[S]ection 349 is directed at wrongs against the consuming public." *In re Rezulin Prods. Liab. Litig., 392 F. Supp. 2d 597, 613 (S.D.N.Y. 2005)* (quoting *Oswego Laborers' Local 214 Pension Fund v. Marine Midland Bank, N.A., 85 N.Y.2d 20, 647 N.E.2d 741, 744, 623 N.Y.S.2d 529 (N.Y. 1995))*. In order to state a claim under *Section 349*, the plaintiff must prove three elements: (1) "the challenged act or practice was consumer-oriented;" (2) "it was misleading in a material way;" and (3) "the plaintiff suffered injury as a result of the deceptive act." *Flash Memory, 643 F. Supp. 2d at 1160* (quoting *Stutman v. Chem. Bank, 95 N.Y.2d 24, 731 N.E.2d 608, 611, 709 N.Y.S.2d 892 (N.Y. 2000))*. "To satisfy the consumer-oriented prong, plaintiffs need only allege consumer-oriented conduct that implicates the public interest in New York." *In re Dynamic Random Access Memory Antitrust (DRAM II) Litig., 536 F. Supp. 2d 1129, 1144-45 (N.D. Cal. 2008))*.

Here, contrary to Defendants' assertion, the Court is satisfied that EPPs have alleged sufficient facts to sustain a claim under *Section 349*. As discussed above, EPPs' claims focus on the anticompetitive conduct of Defendants, which prevented the earlier market entry of generic Lipitor and, as a result, caused individuals to pay a premium. *See* ***[**64]*** *MacQuarie Grp. Ltd. v. Pac. Corporate Grp., LLC, No. 08-cv-2113, 2009 U.S. Dist. LEXIS 16554, at *23-25 (S.D. Cal. Mar. 2, 2009)* (recognizing that "courts routinely treat[] antitrust violations as deceptive acts"); *see also* *New York v. Feldman, 210 F. Supp. 2d 294, 302 (S.D.N.Y. 2002))*. In fact, similar allegations were made in both *TFT-LCD, 586 F. Supp. 2d at 1128-29*, and *DRAM II, 536 F. Supp. 2d at 1143-44*, where the district courts denied the defendants' motions to dismiss, finding the plaintiffs alleged sufficient facts to state a claim. As such, for these reasons, the Court denies Defendants' motion as to EPPs' *Section 349* claims.

8. North Carolina

Defendants next contend that EPPs lack standing to assert claims under North Carolina's Unfair and Deceptive Trade Practices Act, since Plaintiffs are neither competitors nor in commercial dealings with Defendants. *Section 75-1.1* of the Act proscribes "[u]nfair methods of competition in or affecting commerce, and unfair or deceptive acts or practices in or affecting commerce" and provides "any person" or "business of any person, firm or corporation" the right to sue for injuries **[*426]** arising from unfair business practices. *N.C. Gen. Stat. §§ 75-1.1*; *-16*. "Federal courts interpreting the [North Carolina's Unfair and Deceptive Trade Practices Act] have allowed claims asserted by businesses against one another as long as the challenged practices affect commerce or the marketplace." *Sheet Metal Workers, 737 F. Supp. 2d at 419*. Here, as discussed, **[**65]** EPPs claim that Defendants engaged in anticompetitive schemes, which ultimately resulted in consumers purchasing Lipitor at inflated prices. This suffices, under the Act, to confer EPPs with standing; as such, Defendants' motion for judgment on the pleadings is denied. *See id.* The Court only adds that Defendants' reliance on *Food Lion, Inc. v. Capital Cities/ABC, Inc., 194 F.3d 505, 519-20 (4th Cir. 1999)* is of no moment. In *Food Lion*, the Fourth Circuit held that the plaintiffs could not bring a claim against the defendant under the Act, despite engaging in deceptive conduct, since the conduct "did not harm the consuming public." *Id. at 520*. Here, unlike *Food Lion*, EPPs' allegations that Defendants' anticompetitive scheme resulted in consumers paying inflated costs for Lipitor demonstrates a harm to the "consuming public."

9. Rhode Island

Finally, Defendants challenge EPPs' claims under the Rhode Island Unfair Trade Practices and Consumer Protection Act, since: (1) the misconduct alleged in the Complaint is not prohibited under the Act and (2) EPPs are not "consumers" as defined under the Act. The Rhode Island Unfair Trade Practices and Consumer Protection Act proscribes "[u]nfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade **[**66]** or commerce." *R.I. Gen. Laws § 6-13.1-2*. The Act goes on to list twenty "acts or practices" that are considered unfair or deceptive competition. *R.I. Gen. Laws § 6-13.1-1(6)(i)-(xx)*. In determining whether a practice is "unfair" under the Act, courts must consider: "(1) whether the practice affronts public policy, as delineated by the common law, statutes, and 'other established concept[s] of unfairness; (2) whether it is immoral, unethical, oppressive, or unscrupulous; [and] (3) whether it causes substantial injury to consumers (or competitors or other businessmen).'" *Chocolate Confectionary, 602 F. Supp. 2d at 587* (quoting *Ames v. Oceanside Welding and Towing Co., Inc., 767 A.2d 677, 681 (R.I. 2001))*.

The Court finds Defendants' first argument unconvincing. The majority of courts that have been presented with this issue have held that the three prong *Ames* standard "encompass price-fixing injuries, and [therefore] consumers subject to collusive pricing possess a cognizable claim under the [Act]." *Chocolate Confectionary, 602 F. Supp. 2d at 587*; *TFT-LCD, 586 F. Supp. 2d at 1129-30*; *DRAM II, 536 F. Supp. 2d at 1144-45*. As such, since EPPs allege anticompetitive conduct, which resulted in consumers purchasing Lipitor at a premium rate, EPPs have sufficiently alleged unfair conduct under the Rhode Island Unfair Trade Practices and Consumer Protection Act. *See DRAM II, 536 F. Supp. 2d at 1145* (allegations that the defendants engaged price fixing "offend[s] public policy as has been established by statute and/or common **[**67]** law").

Alternatively, Defendants seek dismissal of EPPs' Rhode Island Unfair Trade Practices and Consumer Protection Act claims since they are not "consumers" within the meaning of the Act. The Act limits claims to "[a]ny person who purchases or leases goods or services primarily for personal, family, or household purposes." *R.I. Gen. Laws § 6-13.1-5.2(a)*. Citing no supporting case law, EPPs contend **[*427]** that the Act defines "person" to include entities such as corporations, trusts, and associations. However, contrary to EPPs' assertion, "the Rhode Island Supreme Court has construed the [Rhode Island Unfair Trade Practices and Consumer Protection Act]to require that only natural persons are permitted to bring private rights of actions under the statute." *In re Dynamic Random Access Memory (DRAM I) Antitrust Litig., 516 F. Supp. 2d 1072, 1117 (N.D. Cal. 2007)* (citing *ERI Max Entm't, Inc. v. Streisand, 690 A.2d 1351, 1354 (R.I. 1997))*; *see also TFT-LCD, 586 F. Supp. 2d at 1130* (same); *Sheet Metal Workers, 737 F. Supp. 2d at 423* (same). As such, Defendants' motion for judgment on the pleadings is granted. "However, because there may be unusual circumstances under which a business entity may be able to allege that its purchases were primarily for personal, family or household purposes, the Court will not preclude plaintiffs from amending the complaint to allege such a claim on behalf of business entities." *TFT-LCD, 586 F. Supp. 2d at 1130*.

To sum up, the Court declines to grant judgment as to EPPs' **[**68]** consumer protection claims in California, Nebraska, Nevada, New Mexico, New York, and North Carolina. However, the Court grants Defendants' motion, without leave to amend as to EPPs' Illinois and Maine consumer protection claims; and *with* leave to amend with regards to EPPs' Rhode Island consumer protection claims.

ORDER

IT IS on this 21 day of August, 2018,

ORDERED that Defendants' Motion for Judgment on the Pleadings (ECF No. 755) is **GRANTED IN PART** and **DENIED IN PART** as follows:

• Defendants' Motion for Judgment on the Pleadings based on preemption principles is **DENIED**;

• Defendants' Motion for Judgment on the Pleadings as to EPPs' state consumer protection claims in California, Nebraska, Nevada, New Mexico, New York, and North Carolina is **DENIED**.

• Defendants' Motion for Judgment on the Pleadings as it pertains to EPPs' Arizona, Hawaii, Nevada, and Utah antitrust claims is **GRANTED WITHOUT PREJUDICE**; EPPs are granted leave to amend their Complaint to plead compliance with these notice provisions;

• Defendants' Motion for Judgment on the Pleadings as it pertains to EPPs' Massachusetts, Montana, West Virginia, Rhode Island, Tennessee and Utah consumer protection claims is **GRANTED WITHOUT [**69] PREJUDICE**; EPPs are granted leave to amend their Complaint to plead compliance with Massachusetts and West Virginia's notice provisions, and plead individual claims in Montana, Rhode Island, Tennessee, and Utah;

• Defendants' Motion for Judgment on the Pleadings as it pertains to EPPs' Illinois and Rhode Island antitrust claims, and EPPs' Illinois and Maine consumer protection claims is **GRANTED WITH PREJUDICE**;

• Defendants' Motion for Judgment on the Pleadings as to Count I of EPPs' Complaint under Kansas, New York, and Tennessee is **GRANTED** to the extent these claims are predicated on unilateral activity by Pfizer.
• EPPs have thirty (30) days from the filing of this Memorandum and Order to file an Amended Complaint, consistent with this Memorandum.

/s/ Peter G. Sheridan

patent, imatinib, mesylate, prior art, crystalline, salt, antitrust, immunity, plaintiffs', infringement, sham, patent application, baseless, allegations, anticipation, invention, compound, invalid, misrepresentation, enforcing, disclose, generic, complaints, expiration, motion to dismiss, representations, manufacture, purchasers, discovery, issuance

LexisNexis® Headnotes

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Right to Petition Immunity

HN1[] **Noerr-Pennington Doctrine, Right to Petition Immunity**

The Noerr-Pennington doctrine provides a party immunity from antitrust liability for petitioning the government for redress, in light of the *First Amendment* right to petition the government.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Scope

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

HN2[] **Exemptions & Immunities, Noerr-Pennington Doctrine**

The Noerr-Pennington immunity doctrine has two exceptions. An antitrust defendant may not enjoy the immunity in enforcing its patent if it obtained that patent through a fraud on the Patent Office, or if its suit to enforce the patent is a "sham" for impermissible anti-competitive conduct.

Antitrust & Trade Law > Sherman Act > Claims

HN3[] **Sherman Act, Claims**

Appellate review of whether the plaintiffs have sufficiently alleged materiality to the issuance of a patent is de novo.

Antitrust & Trade Law > Sherman Act > Claims

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

HN4[] **Sherman Act, Claims**

The materiality requirement is a meaningful one. The heightened standard of materiality in a Walker Process case requires that the patent would not have issued but for the patent examiner's justifiable reliance on the patentee's misrepresentation or omission. In addition, like all fraud-based claims, Walker Process allegations are subject to the pleading requirements of *Fed. R. Civ. P. 9(b)*. That means that the party alleging the fraud, with respect to elements not bearing on the conditions of a person's mind, must state with particularity the circumstances constituting fraud. *Fed. R. Civ. P. 9(b)*.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

HN5[] **Noerr-Pennington Doctrine, Sham Exception**

The Supreme Court has announced a two-part test for determining whether a suit to enforce intellectual property rights is a "sham" that is not entitled to Noerr-Pennington immunity from antitrust scrutiny. First, the lawsuit must be objectively baseless in the sense that no reasonable litigant could realistically expect success on the merits. If the challenged suit is objectively baseless, a court then proceeds to consider the alleged monopolist's "subjective motivation" under the second part of the test. Under this second prong, the court should focus on whether the baseless lawsuit conceals an attempt to interfere directly with the business relationships of a competitor through the use of the governmental process -- as opposed to the outcome of that process -- as an anticompetitive weapon. In order to make a "sham" showing with respect to a suit to enforce an intellectual property right, a plaintiff must allege that both prongs of the test are met.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

Civil Procedure > Appeals > Standards of Review > De Novo Review

HN6[] **Noerr-Pennington Doctrine, Sham Exception**

Appellate review of whether the plaintiffs have plausibly alleged "sham" litigation is de novo. An appellate court proceeds on the understanding that a suit to enforce a patent, like a suit to enforce any intellectual property right, could be "objectively baseless."

Evidence > Burdens of Proof > Clear & Convincing Proof

Patent Law > ... > Defenses > Patent Invalidity > Presumption of Validity

HN7[] **Burdens of Proof, Clear & Convincing Proof**

A patent is presumed valid and thus its validity can be challenged only with clear and convincing evidence.

Patent Law > Anticipation & Novelty > Elements

HN8[] **Anticipation & Novelty, Elements**

Invalidation of a patent on anticipation grounds requires that every element and limitation of the claim was previously described in a single prior art reference, either expressly or inherently, so as to place a person of ordinary skill in possession of the invention.

Patent Law > Nonobviousness > Elements & Tests > Prior Art

HN9[] **Elements & Tests, Prior Art**

With respect to obviousness, the analysis involves several basic factual inquiries: the scope and content of the prior art are to be determined; differences between the prior art and the claims at issue are to be ascertained; and the level of ordinary skill in the pertinent art resolved. Against this background, the obviousness or nonobviousness of the subject matter is determined. Such secondary considerations as commercial success, long felt but unsolved needs, failure of others, etc., might be utilized to give light to the circumstances surrounding the origin of the subject matter sought to be patented.

Counsel: Thomas M. Sobol, with whom Hannah W. Brennan, Hagens Berman Sobol Shapiro LLP, John D. Radice, Radice Law Firm, P.C., Noah Rosmarin, Adkins, Kelston & Zavez, P.C. were on brief, for appellants.

Judges: Before Lynch, Kayatta, and Barron, Circuit Judges.

Opinion by: BARRON

Opinion

[*4] BARRON, Circuit Judge. In these consolidated appeals from orders dismissing two putative antitrust class actions, purchasers of a brand-name, prescription drug allege that the drug maker unlawfully delayed the entry of generic versions of the drug into the United States market. Specifically, the plaintiffs allege that the drug maker committed antitrust violations by obtaining through a fraud on the United States Patent and Trademark Office

("Patent Office") a patent for a particular form of a component necessary to manufacture a drug to treat leukemia **[**2]** and by then seeking to enforce that patent through "sham" infringement litigation against manufacturers trying to enter the market with generic versions of that drug.

The drug maker moved to dismiss the antitrust actions on the ground that there was no fraud and that it was immune from antitrust liability for merely enforcing its patent through litigation. The drug maker claimed this immunity based on the Noerr-Pennington doctrine. See *United Mine Workers of Am. v. Pennington, 381 U.S. 657, 669, 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965)*; *E. R.R. Presidents Conference v. Noerr Motor Freight, Inc., 365 U.S. 127, 136, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961)*. ***HN1***[] That doctrine provides a party immunity from antitrust liability for petitioning the government for redress, in light of the *First Amendment* right to petition the government. And it is clear that the petitioning activity within this **[*5]** doctrine's protection includes enforcing one's intellectual property rights in court. See *Prof'l Real Estate Inv'rs, Inc. v. Columbia Pictures Indus., Inc. ("PREI"), 508 U.S. 49, 63-65, 113 S. Ct. 1920, 123 L. Ed. 2d 611 (1993)* (applying Noerr-Pennington immunity to copyright infringement litigation); *Amphastar Pharms. Inc. v. Momenta Pharms., Inc., 850 F.3d 52, 56-58 (1st Cir. 2017)* (applying Noerr-Pennington immunity to patent infringement litigation).

The District Court agreed with the drug maker that Noerr-Pennington immunity applied to its alleged conduct and, on that basis, dismissed the putative class actions under *Rule 12(b)(6) of the Federal Rules of Civil Procedure* for failure to state a claim. The District Court acknowledged **[**3]** that ***HN2***[] Noerr-Pennington immunity has two exceptions. An antitrust defendant may not enjoy the immunity in enforcing its patent if it obtained that patent through a fraud on the Patent Office, *Walker Process Equip., Inc. v. Food Mach. & Chem. Corp., 382 U.S. 172, 177-78, 86 S. Ct. 347, 15 L. Ed. 2d 247 (1965)*, or if its suit to enforce the patent is a "sham" for impermissible anti-competitive conduct, *PREI, 508 U.S. at 51*. The District Court held, however, that the purchasers had not plausibly alleged that either exception applies here. We now affirm.

I.

The putative class actions at issue in these consolidated appeals were brought against Novartis, which distributes and holds the patents for Gleevec, a prescription drug for treating leukemia.[1] Health plans that purchased Gleevec on behalf of their beneficiaries -- so-called end payers -- are the plaintiffs in the first action. A party standing in the shoes of a direct purchaser of the drug is the named plaintiff in the other action.

The suits arise from the following events. In 1996, Novartis obtained the original patent for Gleevec, or Patent No. 5,521,184 ("Patent '184"). This patent claimed Gleevec's active ingredient -- a compound called "imatinib" -- as well as the compound's "corresponding salts." That patent's expiration date was July 4, 2015.

Four years after obtaining that patent, Novartis filed an **[**4]** application for another one. This application sought a patent that pertained to one of the compound's "corresponding salts," the "mesylate" salt of imatinib. Specifically, Novartis's patent application claimed a particular crystalline form of that salt -- namely, the non-needle or "ß-crystalline" form.

According to the complaints filed in each of the antitrust actions against Novartis, chemists commonly modify compounds from "free base" to "salt" form during the pharmaceutical process in order to enhance the drug's properties, such as its solubility. The complaints further point out that, although a salt can be left amorphous, chemists often crystallize salts in various shapes to further select for favorable properties. For this reason, a patent for a particular crystalline form of one of imatinib's corresponding salts, such as the one Novartis claimed, could be quite valuable.

The patent examiner rejected Novartis's patent application for the ß-crystalline form of imatinib mesylate. The examiner concluded that this form of imatinib mesylate was not patentable in consequence of the requirements set

---

[1] "Novartis" refers collectively to all three Novartis entities that are defendants: Novartis Pharmaceuticals Corporation, Novartis Corporation, and Novartis AG.

forth in *35 U.S.C. § 102*, which provides that an invention is not patentable if it is entirely anticipated **[**5]** by a single item of prior art, and *35 U.S.C. § 103*, **[*6]** which provides that an invention is not patentable if, from a body of prior art, "the differences between the claimed invention and the prior art are such that the claimed invention as a whole would have been obvious . . . to a person having ordinary skill in the art to which the claimed invention pertains."

With reference to *§ 102*, the patent examiner ruled that the ß-crystalline form of imatinib mesylate was "anticipated" by Patent '184. With reference to *§ 103*, the patent examiner ruled that Novartis failed to carry its burden to "show that employing routine procedures" would not produce the ß-crystalline form of the salt.

Novartis appealed the patent examiner's ruling to the Patent Trial and Appeal Board ("Board"), which reversed. With respect to *§ 102*, the Board "assume[d] arguendo, without deciding," that Patent '184, which was set to expire in 2015, anticipated the mesylate salt of imatinib. But, the Board ruled, Patent '184 "contains insufficient disclosure to support a finding of anticipation" of the ß-crystalline form of imatinib mesylate that Novartis claimed in its application for the new patent. With respect to *§ 103*, the Board concluded that the patent examiner had erroneously "shift[ed] **[**6]** the burden of persuasion to applicants to establish that the ß-crystalline form recited in their claim 'cannot be made following routine conditions.'" Moreover, the Board explained, "on this record, the examiner has not adequately explained how a person having ordinary skill would have been led from 'here to there,' i.e., from [imatinib mesylate] to the . . . ß-crystalline form of that compound."

The next month, the patent examiner issued a "notice of allowance," which issues "[i]f, on examination, it appears that the applicant is entitled to a patent" and which specifies the fees that must be paid to obtain the patent. *37 C.F.R. § 1.311*. Thereafter, Novartis made a supplemental disclosure of two prior art references that disclosed the mesylate salt of imatinib (but not the ß-crystalline form of imatinib mesylate for which Novartis sought the patent).

The Patent Office finally issued Novartis's patent for the ß-crystalline form of imatinib mesylate, or Patent No. 6,894,051 ("Patent '051"), on May 17, 2005, with an expiration date in 2019.[2] Novartis then submitted that patent to the Food and Drug Administration ("FDA") for inclusion in what is known as the "Orange Book" -- which lists FDA-approved drugs along with their corresponding patents **[**7]** -- as one of the patents, along with the as-yet-unexpired original '184 patent, that covers Gleevec.

In 2006, a generic drug manufacturer named Sun Pharma filed an abbreviated new drug application ("ANDA") with the FDA. Sun Pharma's ANDA sought to market a generic version of Gleevec in the United States. In its ANDA, Sun Pharma certified that Novartis's second patent for Gleevec, Patent '051, was invalid. Sun Pharma thus sought the FDA's approval for marketing generic Gleevec as soon as the original Gleevec patent, Patent '184, expired on July 4, 2015, even though Novartis's second Gleevec patent, Patent '051, would not expire until 2019.

Several years later, in 2013, while waiting for Patent '184 to expire, Sun Pharma sued Novartis in federal court seeking a declaratory judgment that the second **[*7]** Gleevec patent, Patent '051, was indeed invalid. Novartis counterclaimed, alleging infringement of Patent '051 and seeking a declaratory judgment that the patent was valid.

In May of 2014, before any substantive rulings in that litigation, Sun Pharma and Novartis settled. The parties to that settlement did not disclose its terms, except to announce that Sun Pharma would be permitted to launch its generic version of Gleevec on February 1, 2016, some seven months after the **[**8]** expiration of the original Gleevec patent, Patent '184.[3]

---

[2] Novartis also applied for and obtained a third patent for Gleevec -- Patent No. 7,554,799, later reissued as Patent No. RE 43,932 -- which the complaints allege is invalid for the same reasons that Patent '051 is invalid. The plaintiffs discuss only Patent '051, however, on appeal.

[3] The plaintiffs allege that other generic drug manufacturers also filed ANDAs for generic versions of Gleevec, each of which certified that Novartis's second patent for the drug, Patent '051, is invalid. Because Novartis sued each of these generic drug manufacturers for patent infringement within forty-five days of receiving notice of such certifications, Novartis obtained automatic

The two putative class actions at issue here were filed in the wake of that settlement in the United States District Court for the District of Massachusetts. Each action alleged that Novartis had "engaged in an exclusionary, anticompetitive scheme designed to create and maintain a monopoly for Gleevec and its generic substitutes" in the United States market. The complaints in each case alleged that Novartis carried out this monopolistic scheme in the following way in order to delay generic Gleevec's entry into the United States market.

First, the complaints alleged that Novartis fraudulently procured Patent '051 from the Patent Office by falsely representing that the prior art did not disclose imatinib mesylate and that the discovery of its ß-crystalline form was "surprising[]." Second, the complaints alleged that Novartis listed Patent '051 in the Orange Book.[4] And, third, the complaints alleged that Novartis then pursued infringement litigation against manufacturers of generic versions of Gleevec to enforce Patent '051 that was a "sham" for anticompetitive conduct -- given that Novartis could not reasonably expect the patent to withstand an invalidity defense.

The direct purchaser alleged its monopolization claim in its suit under the federal *Sherman Act*, *15 U.S.C. § 2*, while the end payers alleged their monopolization claim under the antitrust laws of twenty-three states and the District of Columbia. See *Ill. Brick Co. v. Illinois, 431 U.S. 720, 730, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)* (holding that indirect purchasers generally lack standing to enforce federal antitrust laws). The plaintiffs in both actions sought monetary damages as well as class certification on behalf of similarly situated direct purchasers and end payers respectively.

Novartis moved to dismiss the end-payers complaint under *Rule 12(b)(6)*. Proceedings in the direct-purchaser action were stayed pending adjudication of Novartis's motion to dismiss. Novartis contended in that motion that, under Noerr-Pennington, it could not incur antitrust liability for exercising its right to enforce Patent '051 in court against an infringer. Novartis did acknowledge that there are "two relevant exceptions" to Noerr-Pennington immunity -- namely, the exceptions based on a showing of Walker Process fraud and "sham" litigation. But, Novartis **[*8]** argued in its motion that the plaintiffs had failed plausibly to allege that either exception applied.

In their opposition to the motion to dismiss, the plaintiffs accepted **[**10]** that Novartis would be entitled to Noerr-Pennington immunity unless at least one exception to that immunity applied. The plaintiffs asserted, however, that they had plausibly alleged that both exceptions did apply. The plaintiffs contended that their suit should therefore proceed to discovery, given that Novartis was not entitled to Noerr-Pennington immunity and that Novartis had not otherwise contested their allegations of "the traditional elements of an antitrust claim: causation, antitrust injury, and market power."

The District Court rejected the plaintiffs' arguments about the application of the exceptions and agreed with Novartis that it was entitled to Noerr-Pennington immunity. On that basis, the District Court granted Novartis's motion to dismiss the end-payers action. The direct-purchaser plaintiff next moved for entry of a judgment of dismissal in its own action "in accordance with the orders entered in the end payors' case," which the District Court granted.

The plaintiffs in both actions then appealed.[5] In pressing these appeals, the plaintiffs contend that the District Court erred in holding that they had not plausibly alleged that Novartis had engaged in either fraud within **[**11]** the meaning of Walker Process in obtaining Patent '051 or "sham" litigation in enforcing that patent and thus that the District Court erred in dismissing their suits on the ground that Novartis was immune from antitrust liability for enforcing Patent '051. Novartis counters that the District Court's ruling with respect to Noerr-Pennington immunity was correct, though Novartis does not dispute the plaintiffs' assertion that they have otherwise plausibly alleged the

---

thirty-month stays of FDA approval as to each of those ANDAs. See *21 U.S.C. § 355(j)(5)(B)(iii)*. The plaintiffs represent on appeal that all of these additional infringement suits have been dismissed without prejudice.

[4] The plaintiffs clarified in their papers below that they "do not assert the Orange Book listings as a basis for antitrust liability." They explained that they instead asserted them as the basis of a third exception to Noerr-Pennington **[**9]** immunity. However, they have not pressed this argument on appeal.

[5] The end-payer plaintiffs have filed an unopposed motion to amend their notice of appeal, which we provisionally granted and now finally grant.

elements of an antitrust claim. We thus now address the plaintiffs' position against Noerr-Pennington immunity by considering the strength of their arguments pertaining to whether Novartis had engaged in fraud within the meaning of Walker Process in obtaining the patent at issue or in "sham" litigation in enforcing that patent.

II.

In Walker Process, the Supreme Court held that "the enforcement of a patent procured by fraud on the Patent Office may be violative of [federal ***antitrust law***] provided the other elements necessary to a[n] [antitrust] case are present." *Walker Process, 382 U.S. at 174*.[6] The plaintiffs rely on the following alleged misrepresentations in Novartis's patent application to support their contention that Novartis fraudulently obtained Patent '051 from the Patent Office: **[**12]** (1) that the prior art did not disclose imatinib mesylate and (2) that Novartis's manufacture of the non-needle **[*9]** or ß-crystalline form of imatinib mesylate was "surprising[]."

The plaintiffs' complaints allege that Novartis made these allegedly false representations "[w]ith intent to mislead or deceive" the Patent Office, "but for which the '051 patent would not have issued." Accordingly, the plaintiffs contend that they have sufficiently alleged the elements of intent and materiality in asserting that they are entitled to take advantage of the Walker Process-based fraud exception to the usual rule that a patent holder cannot incur antitrust liability for enforcing its patent. See *Dippin' Dots, Inc. v. Mosey, 476 F.3d 1337, 1346-47 (Fed. Cir. 2007)*; *C.R. Bard, Inc. v. M3 Systems, Inc., 157 F.3d 1340, 1364-65 (Fed. Cir. 1998)*.

Novartis counters that the District Court rightly concluded that the plaintiffs have failed plausibly to allege that either of these allegedly false representations by Novartis in its application for Patent '051 was material to the issuance of that patent or that Novartis made either of these representations with the requisite intent to deceive the Patent Office. Accordingly, Novartis contends that the plaintiffs have failed **[**13]** plausibly to allege Walker Process fraud.

We do not need to reach the issue of whether the plaintiffs have plausibly alleged that Novartis made either of the representations at issue with the requisite fraudulent intent. And that is because we agree with Novartis and the District Court that the plaintiffs have failed plausibly to allege that either representation, even if false, was material to the issuance of the patent. ***HN3***[] Our review of whether the plaintiffs have sufficiently alleged materiality is de novo. *SEC v. Tambone, 597 F.3d 436, 441 (1st Cir. 2010)* (en banc).

A.

HN4[] The materiality requirement is a meaningful one. "The heightened standard of materiality in a Walker Process case requires that the patent would not have issued but for the patent examiner's justifiable reliance on the patentee's misrepresentation or omission." *Dippin' Dots, 476 F.3d at 1347* (emphasis added) (citing *C.R. Bard, 157 F.3d at 1364*).

In addition, "[l]ike all fraud-based claims, Walker Process allegations are subject to the pleading requirements of *Fed. R. Civ. P. 9(b)*." *MedImmune, Inc. v. Genentech, Inc., 427 F.3d 958, 967 (Fed. Cir. 2005)*, rev'd on other grounds, *549 U.S. 118, 127 S. Ct. 764, 166 L. Ed. 2d 604 (2007)*. That means that the party alleging the fraud, with respect to elements not bearing on the "conditions of a person's mind," "must state with particularity the circumstances constituting fraud." *Fed. R. Civ. P. 9(b)*.

---

[6] Walker Process concerned antitrust liability under the federal *Sherman Act*. *382 U.S. at 173*. The parties assume that the Walker Process doctrine applies to the state antitrust laws at issue in the end-payers action as well.

We note that the Supreme Court has, since Walker Process, reserved the question "whether and, if so, to what extent Noerr permits the imposition of antitrust liability for a litigant's fraud or other misrepresentations." *PREI, 508 U.S. at 61 n.6* (citing *Walker Process, 382 U.S. at 176-77*). Neither party suggests to us, however, that, in light of PREI, Walker Process is not an available exception to Noerr-Pennington. So we proceed on the assumption that it is.

B.

We consider first the plaintiffs' allegations **[**14]** regarding Novartis's representation in its patent application that the prior art did not disclose the mesylate salt of the imatinib compound. Novartis does not dispute that this representation was false. But, Novartis contends, the plaintiffs have failed plausibly to allege that this representation was material to the Patent Office's decision to issue Patent '051 and so cannot provide the predicate for their allegations of fraud under *Walker Process*. We agree.

Cutting against the alleged materiality of this statement in the patent application is the fact that Patent '051 covers only a particular form of imatinib mesylate, the β-crystalline form, and not the mesylate salt itself. That feature of the patent application is significant to our assessment of **[*10]** the plaintiffs' allegations concerning materiality because the Board reversed the patent examiner's initial rejection of Novartis's claim to the β-crystalline form even though the Board appears to have assumed that the mesylate salt of the imatinib compound had been previously prepared. In such circumstances, we find it difficult to conclude that, but for Novartis's inaccurate representation that the prior art did not disclose the mesylate salt of the imatinib **[**15]** compound, the patent would not have issued.

But there is also another reason to reach that conclusion, which, at least when combined with the one that we have just given, is fatal to the plaintiffs' claim that they have plausibly alleged the materiality of the representation at issue. And that reason is that, as the District Court observed and as even the plaintiffs accept, Novartis eventually actually did submit prior art to the Patent Office that disclosed imatinib mesylate, although Novartis did so -- to use the plaintiffs' word -- "belatedly."

Specifically, Novartis submitted this prior art to the Patent Office via form PTO-1449. And there is no basis for disputing that the patent examiner, in issuing Patent '051, then considered this subsequently submitted prior art. The patent examiner initialed and signed form PTO-1449, and these "initials when placed adjacent to the considered citations . . . on a form PTO-1449 . . . provide a clear record of which citations have been considered by the Office." U.S. Patent and Trademark Office, *Manual of Patent Examining Procedure § 609* (8th ed. May 2004). In addition, Patent '051 itself lists the publications referencing the prior art disclosing imatinib mesylate among the publications that the examiner **[**16]** considered in issuing the patent. See id. § 1302.12 ("All references which have been cited by the examiner during the prosecution . . . will be printed in the patent.").[7]

It is true that the patent examiner had already issued the notice of allowance for Patent '051 by the time that Novartis had submitted this prior art. But, the plaintiffs make no argument that the examiner could not have withdrawn this allowance in light of the submission of this prior art and the disclosure of the corresponding salt that it made. In fact, the notice of allowance stated, while citing to *37 C.F.R. § 1.313*, that "this application is subject to withdrawal from issue at the initiative of the office or upon petition by the applicant."

Simply put, the record shows that the patent covers only a particular form of imatinib mesylate, that the Board reversed the patent examiner's initial ruling denying the patent even after assuming that the mesylate salt of the imatinib compound had been previously prepared, that Novartis ultimately did submit prior art disclosing that salt, and that the patent examiner considered that prior art in ultimately issuing the patent for a particular form of that salt. In light of these features of the record, we **[**17]** do not see how Novartis's earlier allegedly false representation that the prior art did not disclose imatinib mesylate to the Patent Office could plausibly be said to be material to the Patent Office's ultimate decision to issue the patent for the particular crystalline form of the salt.

---

[7] The complaints allege that there was additional prior art disclosing imatinib mesylate that was never provided to the Patent Office. But, the plaintiffs do not contend that these references disclosed anything of relevance to Novartis's patent application other than the mesylate salt of imatinib that the submitted references had already disclosed. See *Rothman v. Target Corp., 556 F.3d 1310, 1326 (Fed. Cir. 2009)* ("A piece of prior art is not material to patent prosecution when it is cumulative of information already before the examiner." (citing *37 C.F.R. § 1.56(b)*)).

[*11] C.

We next turn to the plaintiffs' allegations concerning a section of Novartis's patent application titled "BACKGROUND TO THE INVENTION," in which Novartis stated that "[i]t has now been surprisingly found that a crystal form may under certain conditions be found in the [mesylate] salt of [the imatinib] compound, which is described hereinafter as β-crystal form" (emphasis added). The plaintiffs contend that Novartis's description of its manufacture of the β-crystalline form of imatinib mesylate as "surprising[]" was false. The plaintiffs further contend that Novartis made the statement "in order to avoid the inevitable conclusion that the non-needle form of imatinib mesylate was obvious" and that the statement was material to the Patent Office's decision to issue Patent '051.[8]

The District Court disagreed. The District Court noted that it is "unclear whether such a statement qualifies as a **[**18]** misrepresentation." The District Court explained in this regard that "[t]he examiner was free to reach [her] own opinion about whether such a discovery was in fact 'surprising' based on the prior art that was available to her before the patent issued." The District Court went on to explain that the plaintiffs "have not sufficiently alleged that if Novartis had avoided using the word 'surprising,' the patent would not have issued in light of the relevant prior art."

In arguing on appeal that the District Court erred in finding that Novartis's use of the word "surprising" was not material to the patent's issuance, the plaintiffs assert that it would have been obvious to any pharmaceutical chemist of ordinary skill how to convert the mesylate salt from its non-needle to needle form through "routine" steps and that the process might even occur naturally. The plaintiffs thus suggest that Novartis's representation misled the Patent Office into concluding that the crystalline form of the salt at issue was not obvious, when it was.

But, the plaintiffs have not shown that Novartis's characterization of the existence of the crystalline form of that salt as "surprising" was anything more than an **[**19]** assertion of non-obviousness. And the bare assertion that an invention is not obvious -- which, of course, is implicit in any patent application -- is not in and of itself a material misrepresentation for purposes of *Walker Process*. Rather, it is merely a legal assertion that the patent examiner is free to assess in light of the prior art that is available to the examiner. See *Akzo N.V. v. U.S. Int'l Trade Comm'n, 808 F.2d 1471, 1482 (Fed. Cir. 1986)* ("The mere fact that [a patent applicant] attempted to distinguish [its claim] from the prior art does not constitute a material omission or misrepresentation. **[*12]** The examiner was free to reach his own conclusion regarding the [claim] based on the art in front of him.").

The case on which the plaintiffs rely to contend that the use of the word "surprising" was more than a standard assertion of non-obviousness, *Purdue Pharma L.P. v. Endo Pharms., Inc., 438 F.3d 1123 (Fed. Cir. 2006)*, is readily distinguishable. For one thing, that case concerned a claim that a patent was invalid because it was obtained through "inequitable conduct" in violation of a patent applicant's "duty to prosecute patents in the [Patent Office] with candor and good faith." *Id. at 1128*. And, at that time, the materiality standard for an inequitable-conduct claim was lower than the but-for standard that we must apply here. **[**20]** See *id. at 1129, 1132*.

In addition, *Purdue Pharma* did not purport to hold that a patent application's isolated description of a drug's new form as "surprising[]" could, standing alone, constitute a material misrepresentation under circumstances like those at issue here. The patent application at issue in Purdue Pharma described the improved effects of a drug's new

---

[8] At oral argument, the plaintiffs asserted that Novartis's representation in this portion of its patent application from 2000 as to the timing of the β-crystalline discovery -- namely, that it had just "now" been made and that it was thus a "new" crystalline form -- also effected a fraud on the Patent Office, independent of the use of the word "surprisingly." The plaintiffs argue that the use of the words "now" and "new" meant Novartis was presenting a false chronology, given the complaints' allegation that the β-crystalline form, "upon information and belief, was used by Novartis from August 1993 forward." But, although the plaintiffs' opposition brief below did allude to that allegation, the plaintiffs did not sufficiently raise below a Walker Process argument that, but for Novartis's use of the words "now" and "new," the patent would not have issued. See *United States v. Slade, 980 F.2d 27, 30 (1st Cir. 1992)* (explaining that "[p]assing allusions are not adequate to preserve an argument"). Nor was this argument developed in their briefs to us. See *Shell Co. (P.R.) Ltd. v. Los Frailes Serv. Station, Inc., 605 F.3d 10, 19 (1st Cir. 2010)* (holding that an argument developed at oral argument but not in a party's briefs is deemed waived).

dosage-release mechanism, where those effects constituted "a prominent, and at times, the only, argument in favor of [the drug's] patentability." Id. at 1130 (internal quotation marks omitted). The Federal Circuit explained that, in the context of a patent application of that sort, the applicant, by consistently representing to the Patent Office that the effects were a "surprising discovery," was clearly representing that the alleged effects were "based on the results of clinical studies," when that was not in fact true. Id. at 1131. In fact, in finding no clear error in the trial court's conclusion that these representations were therefore material to patentability, id., the Federal Circuit emphasized that Purdue Pharma was an "unusual" case, in which -- by "repeatedly rel[ying] on that discovery to distinguish its invention from other prior art . . . while using **[**21]** language that suggested the existence of clinical results" -- the patent applicant "did much more than characterize [its invention] as a surprising discovery." Id. at 1133.

Here, by contrast, Novartis's use of the word "surprising" gives rise to no similarly misleading implication. The representation at issue in Novartis's application concerns only the existence of the salt's crystalline form; it does not concern the form's "effects." Thus, Novartis's use of the word "surprising," in this context, does not suggest the presence of underlying clinical data in the way that the use of that word, in the Purdue Pharma context, was found to have falsely implied the same.

For these reasons, the plaintiffs' second Walker Process argument, like their first one, fails to provide a basis from which we could conclude that the plaintiffs have satisfied the but-for materiality standard. And thus, this Walker Process argument fails as well.

D.

In a final attempt to challenge the District Court's Walker Process ruling, the plaintiffs contend that Novartis's inclusion in its patent application of each of the alleged misrepresentations that we have just addressed amounted to the type of "egregious misconduct" that, **[**22]** like "the filing of an unmistakably false affidavit," makes the inclusion of such representations per se material to a patent's issuance. Therasense, Inc. v. Becton, Dickinson & Co., 649 F.3d 1276, 1292 (Fed. Cir. 2011) (en banc); see also Intellect Wireless, Inc. v. HTC Corp., 732 F.3d 1339, 1342 (Fed. Cir. 2013) (explaining that an "unmistakably false" declaration "alone establishes materiality" if not cured). But, we do not agree.

[*13] Novartis correctly points out that the plaintiffs forfeited this argument by not making it to the District Court, and the plaintiffs do not contend that the issue was preserved or that the District Court plainly erred. See Chestnut v. City of Lowell, 305 F.3d 18, 20 (1st Cir. 2002) (en banc) (per curiam) (describing the four prongs of plain error: "error, plainness, prejudice, and miscarriage of justice or something akin to it"). Moreover, the alleged misrepresentations here, which the complaints allege to be merely "misleading, if not false," do not rise to the level of an "unmistakably false" affidavit or declaration. Intellect Wireless, 732 F.3d at 1342; Therasense, 649 F.3d at 1292. And so, for this reason, too, we reject this attempt by the plaintiffs to show that they have plausibly alleged the element of materiality in alleging Walker Process fraud.

III.

Independent of Walker Process, the plaintiffs separately contend that Novartis is subject to antitrust scrutiny for enforcing Patent '051 on the ground that its patent infringement **[**23]** litigation was "a mere sham to cover what is actually nothing more than an attempt to interfere directly with the business relationships of a competitor." Noerr, 365 U.S. at 144 (emphasis added). But, we do not agree.

A.

HN5[] The Supreme Court has announced a two-part test for determining whether a suit to enforce intellectual property rights is a "sham" that is not entitled to Noerr-Pennington immunity from antitrust scrutiny. PREI, 508 U.S.

at 60. First, "the lawsuit must be objectively baseless in the sense that no reasonable litigant could realistically expect success on the merits." Id. If the challenged suit is objectively baseless, a court then proceeds to consider the alleged monopolist's "subjective motivation" under the second part of the test. Id. Under this second prong, "the court should focus on whether the baseless lawsuit conceals 'an attempt to interfere directly with the business relationships of a competitor' through the 'use [of] the governmental process -- as opposed to the outcome of that process -- as an anticompetitive weapon.'" *Id. at 60-61* (quoting *Noerr, 365 U.S. at 144*; *City of Columbia v. Omni Outdoor Advert., Inc., 499 U.S. 365, 380, 111 S. Ct. 1344, 113 L. Ed. 2d 382 (1991))*.

In order to make a "sham" showing with respect to a suit to enforce an intellectual property right, a plaintiff must allege that both prongs of the test are met. Id. Novartis's **[**24]** motion to dismiss the plaintiffs' antitrust claim challenged the plaintiffs' "sham" litigation argument by contending only that the plaintiffs had failed to plausibly allege that Novartis's litigation to enforce Patent '051 was "objectively baseless." We thus focus on the plausibility of the plaintiffs' allegations with respect to the "objectively baseless" prong, as the parties agree that, at least under *PREI*, the antitrust actions cannot go forward unless the plaintiffs have plausibly alleged that Novartis's litigation to enforce Patent '051 was objectively baseless.[9]

[*14] B.

Wholly apart from their allegations concerning Walker Process fraud, the plaintiffs argue, for the following reasons, that the only reasonably foreseeable outcome of Novartis's infringement litigation was dismissal on patent-invalidity grounds and thus that the infringement litigation was "objectively baseless." The plaintiffs contend that Novartis's patent was clearly invalid on either anticipation or obviousness grounds because "the non-needle crystal was an inherent characteristic of imatinib mesylate or else entirely obvious." See *35 U.S.C. §§ 102*, *103*. In this regard, the plaintiffs point to their complaints' "key factual allegation," **[**25]** as described by the District Court: "that the two techniques Novartis described in its patent application, which produced the β-crystalline form, were commonly known methods for developing alternate crystalline forms at the time."

HN6[] Our review of whether the plaintiffs have plausibly alleged "sham" litigation is de novo. *Tambone, 597 F.3d at 441*. We proceed on the understanding that a suit to enforce a patent, like a suit to enforce any intellectual property right, could be "objectively baseless." See *PREI, 508 U.S. at 63-65* (considering whether the underlying copyright infringement litigation in the case was potentially a "sham" because it was "objectively baseless"). But, here, the only ground that the plaintiffs assert to support their contention that Novartis's infringement litigation to enforce Patent '051 was "objectively baseless" is that the patent was invalid on anticipation or obviousness grounds. And that presents a problem for the plaintiffs.

HN7[] A patent is "presumed valid" and thus its validity can be challenged only with clear and convincing evidence. *Microsoft Corp. v. i4i Ltd., 564 U.S. 91, 95, 131 S. Ct. 2238, 180 L. Ed. 2d 131 (2011)* (quoting *35 U.S.C. § 282*). Against that background, we do not see how on this record plaintiffs can satisfy the "objectively baseless" prong in light of the fact that the Patent **[**26]** Office issued the patent following the Board's earlier ruling reversing the patent examiner's rulings as to anticipation and obviousness.

Although the Board did not have all of the prior art before it at the time of its decision reversing the decision of the patent examiner, the Board had assumed what the subsequently disclosed prior art showed: that imatinib mesylate

[9] In addition to invoking this "objectively baseless" test from PREI, the plaintiffs also urge us to apply the test from *California Motor Transport Co. v. Trucking Unlimited, 404 U.S. 508, 92 S. Ct. 609, 30 L. Ed. 2d 642 (1972)*, which they argue is a different test that applies to allegations that a pattern of petitioning activity, as opposed to a single petition, was a "sham." The plaintiffs contend that this case involves such a pattern because their complaint alleges that Novartis sued not only Sun Pharma but also other generic manufacturers that had filed ANDAs for generic versions of Gleevec. However, the plaintiffs concede in their reply brief that "Novartis rightly points out that the end payers did not argue below that California Motor should apply." And, contrary to their assertion otherwise, our recent decision in *Puerto Rico Telephone Co. v. San Juan Cable LLC, 874 F.3d 767 (1st Cir. 2017)*, does not excuse the forfeiture of that argument, which was no less available to them to make before that decision.

was known prior to Novartis's claim to the development of its β-crystalline form. And, in ruling for Novartis notwithstanding that assumption, the Board indicated that it was not clear on the face of the prior art either that the β-crystalline form of imatinib mesylate was inherently anticipated or that it was obvious how to get "from here to there" in terms of developing it. That ruling was significant for purposes of determining whether Novartis could have reasonably expected success in its patent infringement litigation, insofar as any defense to that infringement litigation was based on the invalidity of Novartis's patent.

After all, ***HN8***[] invalidation of a patent on anticipation grounds "requires that every element and limitation of the claim was **[*15]** previously described in a single prior art reference, either expressly or inherently, **[**27]** so as to place a person of ordinary skill in possession of the invention." *Sanofi-Synthelabo v. Apotex, Inc., 550 F.3d 1075, 1082 (Fed. Cir. 2008)*. And the plaintiffs do not dispute the District Court's conclusion that the prior art "neither describes the β-crystalline form of the imatinib mesylate salt nor a method to produce it. The prior art only mentions imatinib mesylate itself, . . . which has many different crystalline forms."

Moreover, ***HN9***[] with respect to obviousness, the analysis involves "several basic factual inquiries":

> [T]he scope and content of the prior art are to be determined; differences between the prior art and the claims at issue are to be ascertained; and the level of ordinary skill in the pertinent art resolved. Against this background, the obviousness or nonobviousness of the subject matter is determined. Such secondary considerations as commercial success, long felt but unsolved needs, failure of others, etc., might be utilized to give light to the circumstances surrounding the origin of the subject matter sought to be patented.

Graham v. John Deere Co. of Kan. City, 383 U.S. 1, 17-18, 86 S. Ct. 684, 15 L. Ed. 2d 545 (1966). And, in the face of the Board's ruling and the patent's subsequent issuance, the complaints' mere allegations that "the two techniques Novartis described in its patent application, which produced the β-crystalline **[**28]** form, were commonly known methods for developing alternate crystalline forms at the time" and that a pharmaceutical chemist of ordinary skill would have been motivated to develop an advantageous crystalline form of imatinib mesylate are insufficient to allege plausibly that Novartis was unreasonable in expecting that Patent '051's presumed validity could withstand an obviousness challenge.[10] Rather, those allegations merely demonstrate that Novartis would have been subject to a serious defense to its infringement litigation, as Novartis would have had to demonstrate that, despite those allegations, it was not obvious how, as the Board had put it in reversing the patent examiner's ruling as to obviousness, to get "from here to there," i.e., from the mesylate salt of imatinib to its β-crystalline form.

Nor have the plaintiffs identified any authority to support their contention that their allegations are sufficient to plausibly allege that, despite the Board's ruling and the patent's issuance, Novartis's litigation to enforce that patent was a sham. In fact, the plaintiffs have not identified a single precedent that permitted an antitrust "sham" litigation claim to go forward based on an allegation **[**29]** that the infringement litigation was objectively baseless because the underlying patent was alleged to be invalid due to anticipation or obviousness.

We therefore reject the plaintiffs' contentions that they have plausibly alleged **[*16]** that they may take advantage of the "sham" litigation exception to *Noerr-Pennington* immunity recognized in *PREI*. And thus, in light of our rejection of the plaintiffs' *Walker Process*-based arguments for subjecting Novartis to antitrust scrutiny, we see no reason to disturb the District Court's ruling dismissing the plaintiffs' antitrust suits for failure to state a claim.

---

[10] The plaintiffs do point to the Supreme Court of India's 2013 decision not to issue what they describe as Novartis's "Indian equivalent" of Patent '051. But, this effort fails. As indicated by a copy of that decision in the record, the India Supreme Court was applying a different patentability standard than under United States law. As the court explained there, under Indian law, "the mere discovery of a new form of a known substance" is not a "new product" "unless they differ significantly in properties with regard to efficacy." By contrast, under our law, a patent may be obtained so long as the differences between the claimed invention and the prior art were not so minimal that the invention was "obvious . . . to a person having ordinary skill in the art to which the claimed invention pertains." *35 U.S.C. § 103*.

IV.

For the foregoing reasons, the judgments of the District Court in both actions are **affirmed**.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN1[] **Motions to Dismiss, Failure to State Claim**

To survive a *Fed. R. Civ. P. 12(b)(6)* motion to dismiss for failure to state a claim, a plaintiff's factual allegations in the complaint must suggest that the claim has at least a plausible chance of success. In other words, the complaint must allege factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged. The Ninth Circuit has settled on a two-step process for evaluating pleadings: First, to be entitled to the presumption of truth, allegations in a complaint or counterclaim may not simply recite the elements of a cause of action, but must contain sufficient allegations of underlying facts to give fair notice and to enable the opposing party to defend itself effectively. Second, the factual allegations that are taken as true must plausibly suggest an entitlement to relief, such that it is not unfair to require the opposing party to be subjected to the expense of discovery and continued litigation.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN2[] **Motions to Dismiss, Failure to State Claim**

The plausibility standard is not akin to a probability requirement, but it asks for more than a sheer possibility that a defendant has acted unlawfully. Where a complaint pleads facts that are merely consistent with a defendant's liability, it stops short of the line between possibility and plausibility of entitlement to relief.

Patent Law > Subject Matter

HN3[] **Patent Law, Subject Matter**

35 U.S.C.S. § 101 defines what is patent eligible. It provides as follows: Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title. *35 U.S.C.S. § 101*. The U.S. Supreme Court has held that *§ 101* contains an important implicit exception: Laws of nature, natural phenomena, and abstract ideas are not patentable. Phenomena of nature, though just discovered, mental processes, and abstract intellectual concepts are not patentable, as they are the basic tools of scientific and technological work. Monopolization of those tools through the grant of a patent might tend to impede innovation more than it would tend to promote it.

Patent Law > Subject Matter

HN4[] **Patent Law, Subject Matter**

For all inventions at some level embody, use, reflect, rest upon, or apply laws of nature, natural phenomena, or abstract ideas. An application of a law of nature or mathematical formula to a known structure or process may well be deserving of patent protection, but to transform an unpatentable law of nature into a patent-eligible application of such a law, one must do more than simply state the law of nature while adding the words apply it.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Patent Law > Subject Matter

HN5[] **Motions to Dismiss, Failure to State Claim**

Patent eligibility under *35 U.S.C.S. § 101* is a question of law. The Federal Circuit has repeatedly recognized that in many cases it is possible and proper to determine patent eligibility under *35 U.S.C.S. § 101* on a *Fed. R. Civ. P. 12(b)(6)* motion. However, there can be underlying factual questions to a *§ 101* inquiry-e.g., whether something is well-understood, routine, and conventional to a skilled artisan at the time of the patent is a factual determination. Adding that the mere fact that something is disclosed in a piece of prior art does not mean it was well-understood, routine, and conventional.

Patent Law > Subject Matter

HN6[] **Patent Law, Subject Matter**

There is a two-step test for patent eligibility under *35 U.S.C.S. § 101*. The test distinguishes patents that claim laws of nature, natural phenomena, and abstract ideas from those that claim patent-eligible applications of those concepts. First, the court determines whether the claims at issue are directed to one of those patent-ineligible concepts. If so, the court then asks, what else is there in the claims before the court describes step two of this analysis as a search for an inventive concept-i.e., an element or combination of elements that is sufficient to ensure that the patent in practice amounts to significantly more than a patent upon the ineligible concept itself.

Patent Law > Subject Matter

HN7[] **Patent Law, Subject Matter**

With respect to step one of the two-step test for patent eligibility under *35 U.S.C.S. § 101*, the Federal Circuit has emphasized that it is not enough to merely identify a patent-ineligible concept underlying the claim; the court must determine whether that patent-ineligible concept is what the claim is directed to. In other words, what is the focus of the claim stating that, for an application of an abstract idea to satisfy step one, the claim's focus must be something other than the abstract idea itself.

Patent Law > Subject Matter

HN8[] **Patent Law, Subject Matter**

As for step two two-step test for patent eligibility under *35 U.S.C.S. § 101*, the Federal Circuit has underscored that the inventive concept cannot be furnished by the unpatentable law of nature (or natural phenomenon or abstract idea) itself. That is, a claim directed to a newly discovered law of nature (or natural phenomenon or abstract idea) cannot rely on the novelty of that discovery for the inventive concept necessary for patent eligibility; instead, the application must provide something inventive, beyond mere well-understood, routine, conventional activity. Simply appending conventional steps, specified at a high level of generality, to laws of nature, natural phenomena, and abstract ideas cannot make those laws, phenomena, and ideas patentable. In addition, the prohibition against patenting abstract ideas cannot be circumvented by attempting to limit the use of the formula to a particular technological environment or adding insignificant post solution activity.

Patent Law > Subject Matter

HN9[] **Patent Law, Subject Matter**

The mere recitation of a generic computer cannot transform a patent-ineligible abstract idea into a patent-eligible invention.

Patent Law > Subject Matter

HN10[] **Patent Law, Subject Matter**

While preemption may signal patent ineligible subject matter, the absence of complete preemption does not demonstrate patent eligibility. Moreover, an abstract idea does not become nonabstract by limiting the invention to a particular field of use or technological environment.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

HN11[] **Heightened Pleading Requirements, Fraud Claims**

Where a Lanham Act claim is predicated on the theory that the defendant engaged in a knowing and intentional misrepresentation, then *Fed. R. Civ. P. 9(b)* is applicable.

Antitrust & Trade Law > Consumer Protection > False Advertising > State Regulation

HN12[] **False Advertising, State Regulation**

Cal. Bus. & Prof. Code § 17500 essentially prohibits false or misleading advertising. *Cal. Bus. & Prof. Code § 17500*.

Contracts Law > Remedies > Restitution

HN13[] **Remedies, Restitution**

An order for restitution is one compelling a defendant to return money obtained through an unfair business practice to those persons in interest from whom the property was taken, that is, to persons who had an ownership interest in the property.

Civil Procedure > ... > Declaratory Judgments > Federal Declaratory Judgments > Scope of Declaratory Judgments

HN14[] **Federal Declaratory Judgments, Scope of Declaratory Judgments**

The difference between an abstract question and a controversy contemplated by the Declaratory Judgment Act is necessarily one of degree, and it would be difficult, if it would be possible, to fashion a precise test for determining in every case whether there is such a controversy. Basically, the question in each case is whether the facts alleged, under all the circumstances, show that there is a substantial controversy, between parties having adverse legal interests, of sufficient immediacy and reality to warrant the issuance of a declaratory judgment.

Civil Procedure > Judgments > Declaratory Judgments > Federal Declaratory Judgments

HN15[] **Declaratory Judgments, Federal Declaratory Judgments**

Special flexibility is called for in the declaratory judgment context, where the normal principle that federal courts should adjudicate claims within their jurisdiction yields to considerations of practicality and wise judicial administration.

Civil Procedure > Judgments > Declaratory Judgments > Federal Declaratory Judgments

HN16[] **Declaratory Judgments, Federal Declaratory Judgments**

That a court may take into account serious negotiations does not mean that the existence of such negotiations require dismissal of the declaratory relief claims.

Opinion

[*894] **<u>REDACTED/PUBLIC VERSION</u>**

ORDER GRANTING IN PART AND DENYING IN PART DEFENDANTS' MOTION TO DISMISS

Docket No. 29

Plaintiff 23andMe, Inc. ("23") has filed suit against three affiliated entities — Ancestry.com DNA, LLC; Ancestry.com Operations Inc.; and Ancestry.com LLC (collectively, "Ancestry") — asserting claims for, *inter alia*, patent infringement, misleading representations in violation of federal and state law, and a declaratory judgment of no trademark infringement and invalidity of trademark. Currently pending before the Court is Ancestry's motion to **[**3]** dismiss. Having considered the parties' briefs and accompanying submissions, as well as the oral argument of counsel, the Court hereby **GRANTS** in part and **DENIES** in part Ancestry's motion.

I. <u>DISCUSSION</u>

A. <u>Legal Standard</u>

> ***HN1***[] To survive a [12(b)(6)] motion to dismiss for failure to state a claim after the Supreme Court's decisions in *Ashcroft v. Iqbal, 556 U.S. 662, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* and *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*, [a plaintiff's] factual allegations [in the

complaint] "must . . . suggest that the claim has at least a plausible chance of success." In other words, [the] complaint "must allege 'factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged.'"
. . . . [The Ninth Circuit has] settled on a two-step process for evaluating pleadings:

> First, to be entitled to the presumption of truth, allegations in a complaint or counterclaim may not simply recite the elements of a cause of action, but must contain sufficient allegations of underlying facts to give fair notice and to enable the opposing party to defend itself effectively. Second, the factual allegations that are taken as true must plausibly suggest an entitlement to relief, such that it is not unfair to require the opposing party to be subjected **[**4]** to the expense of discovery and continued litigation.

Levitt v. Yelp! Inc., 765 F.3d 1123, 1134-35 (9th Cir. 2014).

HN2[] Notably,
[t]he plausibility standard is not akin to a "probability requirement," but it asks for more than a sheer possibility that a defendant has acted unlawfully. Where a complaint pleads facts that are "merely consistent with" a defendant's liability, it "stops short of the line between possibility and plausibility 'of entitlement to relief.'"

Iqbal, 556 U.S. at 678.

In the instant case, Ancestry's 12(b)(6) motion challenges all claims asserted in the operative complaint. Those claims are as follows:
(1) Infringement of the '554 patent.

(2) Misleading representations in violation of the Lanham Act. *See 15 U.S.C. § 1125*.

[*895] (3) Misleading advertising in violation of *California Business & Professions Code § 17500*.

(4) Unlawful and unfair business practices in violation of *California Business & Professions Code § 17200* (based on, "among other things, unfair, deceptive, and misleading advertising about [Ancestry's] DNA tests"). Compl. ¶ 68.
(5) Declaratory judgment of no trademark infringement.
(6) Declaratory judgment of invalidity of trademark.

B. Claim for Patent Infringement

1. Relevant Background

23's claim of patent infringement is predicated on the '554 patent, a copy of which is attached to the complaint as Exhibit 4.

The '554 patent is titled "Finding relatives in a database." The patent specification **[**5]** begins by noting that
[e]xisting genetic ancestry testing techniques are typically based on [DNA] information of the Y chromosome (Y-DNA) or DNA information of the mitochondria (mtDNA). Aside from a small amount of mutation, the Y-DNA is passed down unchanged from father to son and therefore is useful for testing patrilineal ancestry of a man. The mtDNA is passed down mostly unchanged from mother to children and therefore is useful for testing a person's matrilineal ancestry. These techniques are found to be effective for identifying individuals that are related many generations ago (e.g., 10 generations or more), but are typically less effective for identifying closer relationships. Further, many relationships that are not strictly patrilineal or matrilineal cannot be easily detected by the existing techniques.
'554 patent, col. 1:21-35. While not explicit, it is evident (and not disputed) that this specification refers to prior art wherein the described DNA information of individuals are compared to determine common ancestry.

The '554 patent is predicated not on Y-DNA or mtDNA information but rather recombinable DNA information. *See* '554 patent, col. 2:32-35 (explaining that recombinable DNA is the autosomal DNA and **[**6]** X chromosome DNA). The recombinable DNA of a person's parents

> is shuffled at the next generation, with small amounts of mutation. Thus, only relatives will share long stretches of genome regions where their recombinable DNA is completely or nearly identical. Such regions are referred to as "Identical by Descent" (IBD) regions because they arose from the same DNA sequences in an earlier generation. The relative finder technique . . . is based at least in part on locating IBD regions in the recombinable chromosomes of individuals.

'554 patent, col. 2:35-43.

The patent specification notes that, "[i]n some embodiments, locating IBD regions includes sequencing the entire genomes of the individuals and comparing the genome sequences," but, in other embodiments, "locating IBD regions includes assaying a large number of markers that tend to vary in different individuals and comparing the markers." '554 patent, col. 2:44-49. One example of such a marker is "Single Nucleotide Polymorphisms (SNDPs), which are points along the genome with two or more common variations." '554 patent, col. 2:59-51. "Long stretches of DNA sequences from different individuals' genomes in which markers in the same locations are the same or at least compatible **[**7]** indicate that the rest of the sequences, **[*896]** although not assayed directly are also likely identical." '554 patent, col. 2:56-60.

Figure 1 of the '554 patent "is a block diagram illustrating an embodiment of a relative finding system." '554 patent, col. 2:61-62. The diagram basically shows that:

> (1) user information **110** is received by the relative finder system **102**;
>
> (2) the relative finder system **102** determines, "based at least in part on the recombinable DNA information of the first user and recombinable DNA information of the second user, a predicted degree of relationship between the first user and the second user"; and
> (3) "in the event that the expected degree of relationship between the first user and the second user at least meets [a certain] threshold," the first user at least is notified about the relative relationship with the second user.

'554 patent, abstract; *see also* '554 patent, col. 2:67-3:27 (describing Figure 1); '554 patent, claim 26 (claiming "[a] system for determining a relative relationship of people who are a common ancestor within a threshold number of generations").[1] "In this example, relative finder system **102** may be implemented using one or more server computers having one or more processors, one or more special purpose computing **[**8]** appliances, or any other appropriate hardware, software, or combinations thereof." '554 patent, col. 2:62-66.

As indicated by the above, there are three critical steps in Figure 1: (1) receiving or obtaining recombinable DNA information; (2) determining a predicted degree of relative relationship based at least in part on a comparison of recombinable DNA information; and (3) notifying a person about the relative relationship. These three steps make up the method claimed at claim 1 of the '554 patent. *See* '554 patent, claim 1 (claiming "[a] method for determining a relative relationship of people who share a common ancestor within a threshold number of generations," comprising these three steps). However, claim 1 of the '554 patent is not being asserted by 23 in the instant case.

Rather, 23 claims infringement of the following dependent claims only: claims 5, 7-8, 12-14, 17, 22, 31-32, 37-38. *See* Compl. ¶ 40. Below is the invention claimed in claim 7, one of the main claims at issue in this lawsuit.

> **7**. The method of claim **1** [*i.e.*, (1) receiving/obtaining recombinable DNA information, (2) determining a predicted degree of relative relationship based at least in part on that information, and (3) notifying person about the relationship] **[**9]** wherein:

---

[1] However, 23 does not assert infringement of claim 26 in the instant case.

determining the predicted degree of relationship between the first user and the second user includes identifying one or more Inheritance by Descent (IBD)[2] regions in which a portion of recombinable DNA sequence of the first user and a portion of recombinable DNA sequence of the second user arose from same DNA sequence of an ancestor;

the predicted degree of relationship depends at least in part on an amount of DNA sequence information of the IBD regions;

the amount of DNA sequence information of the IBD regions includes a sum of the lengths of IBD regions, percentage of DNA shared in the IBD regions, or both; and

[*897] a greater amount of DNA sequence information of the IBD regions indicates a closer predicted degree of relationship.

'554 patent, claim 7 (highlight added).

2. *35 U.S.C. § 101*

In the instant case, Ancestry moves to dismiss 23's claim for patent infringement on the ground that the '554 patent is directed to unpatentable subject matter. According to Ancestry, the patent "claims an abstract idea (determining a relative relationship by comparing similarities between DNA), and a law of nature (people who share similar DNA are related)." Reply at 2.

HN3[] Title *35 U.S.C. § 101* defines what is patent eligible. It provides as follows: "Whoever **[**10]** invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title." *35 U.S.C. § 101*. The Supreme Court has held that *§ 101* "'contains an important implicit exception: Laws of nature, natural phenomena, and abstract ideas are not patentable.'" *Genetic Techs. Ld. v. Merial L.L.C., 818 F.3d 1369, 1374 (Fed. Cir. 2016)*. "Phenomena of nature, though just discovered, mental processes, and abstract intellectual concepts are not patentable, as they are the basic tools of scientific and technological work.'" *Id.* "[M]onopolization of those tools through the grant of a patent might tend to impede innovation more than it would tend to promote it." *Mayo Collab. Servs. v. Prometheus Labs., Inc., 566 U.S. 66, 71, 132 S. Ct. 1289, 182 L. Ed. 2d 321 (2012)*.[3]

HN4[] On the other hand, "too broad an interpretation of [the above] exclusionary principle could eviscerate patent law. For all inventions at some level embody, use, reflect, rest upon, or apply laws of nature, natural phenomena, or abstract ideas." *Id.* "'[A]n *application* of a law of nature or mathematical formula to a known structure or process may well be deserving of patent protection,'" but "to transform an unpatentable law of nature into a patent-eligible *application* of such a law, **[**11]** one must do more than simply state the law of nature while adding the words 'apply it.'" *Id. at 71-72* (emphasis in original).

HN5[] "Patent eligibility under *35 U.S.C. § 101* is a question of law . . . ." *Genetic Techs., 818 F.3d at 1373*. The Federal Circuit has "repeatedly recognized that in many cases it is possible and proper to determine patent eligibility under *35 U.S.C. § 101* on a *Rule 12(b)(6)* motion." *Id.* However, the Federal Circuit has also noted that there can be underlying factual questions to a *§ 101* inquiry — *e.g.*, "[w]hether something is well-understood, routine, and conventional to a skilled artisan at the time of the patent is a factual determination." *Berkheimer v. HP Inc., 881 F.3d 1360, 1369 (Fed. Cir. 2018)* (adding that "[t]he mere fact that something is disclosed in a piece of prior art . . . does not mean it was well-understood, routine, and conventional").

HN6[] There is a two-step test for patent eligibility under *§ 101*.

---

[2] The use of the term "Inheritance by Descent" appears to be an error. Rather, the correct term is "Identical by Descent."

[3] Of course, even though preemption concerns are "the basis for the judicial exceptions to patentability . . . , the absence of complete preemption does not demonstrate patent eligibility." *Ariosa Diagnostics, Inc. v. Sequenom, Inc., 788 F.3d 1371, 1379 (Fed. Cir. 2015)*.

> The test "distinguish[es] patents that claim laws of nature, natural phenomena, and abstract ideas from those that claim patent-eligible applications of those concepts." As set forth [by the **[*898]** Supreme Court] in *Alice [Corp. Pty. Ltd. v. CLS Bank Int'l, 573 U.S. 208, 134 S. Ct. 2347, 82 L. Ed. 2d 296, 189 L. Ed. 2d 296 (2014)]*:
>
>> First, we determine whether the claims at issue are *directed to* one of those patent-ineligible concepts. If so, we then ask, what else is there in the claims before us? . . . We have described step **[**12]** two of this analysis as a search for an *inventive concept* — i.e., an element or combination of elements that is sufficient to ensure that the patent in practice amounts to significantly more than a patent upon the ineligible concept itself.[4]

Id. (emphasis added).

HN7[] With respect to step one, the Federal Circuit has emphasized that "'it is not enough to merely identify a patent-ineligible concept underlying the claim; we must determine whether that patent-ineligible concept is what the claim is "directed to."'" *Thales Visionix, Inc. v. United States, 850 F.3d 1343, 1349 (Fed. Cir. 2017)*. In other words, what is the focus of the claim? *See BSG Tech LLC v. Buyseasons, Inc., No. 2017-1980, 899 F.3d 1281, 2018 U.S. App. LEXIS 22704, at *14 (Fed. Cir. Aug. 15, 2018)* (stating that, "[f]or an application of an abstract idea to satisfy step one, the claim's focus must be something other than the abstract idea itself"); *see also Accenture Global Servs., GmbH v. Guidewire Software, Inc., 728 F.3d 1336, 1341 (Fed. Cir. 2013)* (indicating that a court must "'identify and define whatever fundamental concept appears wrapped up in the claim[s]'").

HN8[] As for step two, the Federal Circuit has underscored that

> [t]he inventive concept . . . cannot be furnished by the unpatentable law of nature (or natural phenomenon or abstract idea) itself. That is, . . . a claim directed to a newly discovered law of nature (or natural phenomenon or abstract idea) cannot rely on the novelty of that discovery for the inventive **[**13]** concept necessary for patent eligibility; instead, the application must provide something inventive, beyond mere "well-understood, routine, conventional activity." "[S]imply appending conventional steps, specified at a high level of generality, to laws of nature, natural phenomena, and abstract ideas cannot make those laws, phenomena, and ideas patentable."

Genetic Techs., 818 F.3d at 1376. In addition, "[t]he prohibition against patenting abstract ideas cannot be circumvented by attempting to limit the use of the formula to a particular technological environment or adding insignificant post solution activity." *Mayo, 566 U.S. at 73* (internal quotation marks omitted).

a. Step One: "Directed to"

Ancestry argues that, at step one, the relevant claims of the '554 patent are "directed to" a law of nature and/or an abstract idea. 23 disputes such.

In resolving the step one issue, the Court begins with the Supreme Court's 2012 *Mayo* decision. The patents in *Mayo*

> concern[ed] the use of thiopurine drugs in the treatment of autoimmune diseases, such as Crohn's disease and ulcerative colitis. When a patient ingests a thiopurine compound, his body metabolizes the drug, causing metabolites to form in his bloodstream. Because the way in which people metabolize thiopurine **[**14]** compound varies, the same dose of a thiopurine drug affects different people **[*899]** differently, and it has been difficult for doctors to determine whether for a particular patient a given dose is too high, risking harmful side effects, or too low, and so likely ineffective.

Mayo, 566 U.S. at 74.

---

[4] "If a law of nature is not patentable, then neither is a process reciting a law of nature, unless that process has additional features that provide practical assurance that the process is more than a drafting effort to monopolize the law of nature itself." *Mayo, 566 U.S. at 77*.

Prior to the patents at issue, "those in the field did not know the precise correlations between metabolite levels and likely harm or ineffectiveness. The patent claims at issue here set forth processes embodying researchers' findings that identified these correlations with some precision." *Id.* For example, a representative claim covered a method of optimizing therapeutic efficacy consisting of the following steps: (1) administering a thiopurine drug and (2) determining the level of 6-TG in the blood, wherein concentrations above a certain level indicated that the dosage was likely too high and concentrations below a certain level indicated that the dosage was likely too low. *See id.* Thus, the representative claim essentially stated, *e.g.*, that, "*if* the levels of 6-TG in the blood (of a patient who has taken a dose of a thiopurine drug) exceed about 400 pmol per 8x108 red blood cells, *then* the administered dose is likely **[**15]** to produce toxic side effects." *Id. at 77* (emphasis in original).

At step one, the Supreme Court held that the patent claim was directed to a law of nature — in fact "*set forth*" a law of nature, "namely, [the] relationships between concentrations of certain metabolites in the blood and the likelihood that a dosage of a thiopurine drug will prove ineffective [too low] or cause harm [too high]." *Id. at 77* (emphasis added). The Court added:

> While it takes a human action (the administration of the thiopurine drug) to trigger a manifestation of this relation in a particular person, the relation itself exists in principle apart from any human action. The relation is a consequence of the ways in which thiopurine compounds are metabolized by the body — entirely natural processes. And so a patent that *simply describes that relation* sets forth a natural law.

Id. (emphasis added).

Since *Mayo*, the Federal Circuit has issued several decisions discussing whether a patent claim is directed to a law of nature or a natural phenomenon.

For example, in *Ariosa*, the patent inventors "discovered cell-free fetal DNA ('cffDNA') in maternal plasma and serum, the portion of maternal blood samples that other researchers had previously **[**16]** discarded as medical waste." *Ariosa, 788 F.3d at 1373*. "Applying a combination of known laboratory techniques to their discovery," the inventors "implemented a method for detecting the small fraction of paternally inherited cffDNA in maternal plasma or serum to determine fetal characteristics, such as gender." *Id.* One of the representative patent claims specifically covered a method for detecting paternally inherited cffDNA in maternal plasma or serum consisting of the following steps: "[1] amplifying the cffDNA contained in a sample of a plasma or serum from the pregnant female and [2] detecting the paternally inherited cffDNA." *Id.* At step one, the Federal Circuit stated that the asserted patent claims were

> directed to a multistep method that starts with cffDNA taken from a sample of maternal plasma or serum — a naturally occurring non-cellular fetal DNA that circulates freely in the blood stream of a pregnant woman. It is undisputed that the existence of cffDNA in maternal blood is a natural phenomenon. . . . The method ends with paternally inherited cffDNA, which is also a natural phenomenon. The method therefore begins and ends with a natural phenomenon. Thus, **[*900]** the claims are directed to matter that is **[**17]** naturally occurring.

Id. at 1376.

The court added that the patent specification made clear that the patent claims were "directed to a naturally occurring thing or natural phenomenon" — or technically, as the court later stated, "directed to detecting the presence of a naturally occurring thing or a natural phenomenon, cffDNA in maternal plasma or serum." *Id.* For example, the "Summary and Objects of the Invention" section noted that it was surprising and unexpected to find that cffDNA was detectable in maternal plasma, which had been a material routinely discarded. Also, "the description of the invention note[d]: '[w]e have demonstrated that foetal DNA is present in the maternal plasma and serum.'" *Id.* Nonetheless, that discovery did not gainsay the fact that the patent was directed to a naturally occurring matter.

The Federal Circuit's decision in *Genetic Technologies* also involved a law of nature or a natural phenomenon. There, the inventor of the patent "discovered that certain DNA sequences in coding regions (exons) of certain genes are correlated with non-coding regions (introns) within the same gene, non-coding regions in different genes, or non-coding regions of the genome that are not part **[**18]** of any gene [non-coding regions otherwise known as 'junk DNA']." *Genetic Techs., 818 F.3d at 1372*. The inventor also found that the "correlated coding and non-coding regions tend to be inherited together, with only rare shuffling. In other words, the regions are in 'linkage disequilibrium,' meaning that the coding and non-coding regions appear 'linked' together in individuals' genomes more often than probability would dictate." *Id.* The inventor "concluded that alleles of a particular gene may be detected, using well-established laboratory techniques, not by looking for the coding region of the gene itself but instead by amplifying and analyzing non-coding regions known to be linked to the coding region [*i.e.*, junk DNA]." *Id.* A representative patent claim "encompasse[d] methods of detecting a coding region allele by [1] amplifying and [2] analyzing any linked non-coding region, which would be found within the same gene as the coding region, within a different gene, or within an intergenic region." *Id. at 1372-73*.

At step one, the Federal Circuit found that the patent claim was "directed to the relationship between non-coding and coding sequences in linkage disequilibrium and the tending of such non-coding DNA sequences to be representative **[**19]** of the linked coding sequences — a law of nature." *Id. at 1374*. The court noted that "[c]laim 1 covers any comparison, for any purpose, of any noncoding region sequence known to be linked with a coding region allele at a multi-allelic locus." *Id.* It was not limited in scope to, *e.g.*, "methods of detecting any *particular* alleles linked to any *particular* non-coding sequences"; thus, "[c]laim 1 broadly covers essentially all applications, via standard experimental techniques, of the law of linkage disequilibrium to the problem of detecting coding sequences of DNA." *Id. at 1374-75* (emphasis added).

The court went on to note that the patent was "quite similar to the claims invalidated in *Mayo*": "'[J]ust as the relationship in *Mayo* was entirely a consequence of the body's natural processes for metabolizing thiopurine, so too is the correlation here (between variations in the non-coding regions and the allele presence in the coding regions) a consequence of the naturally occurring linkages in the DNA sequence.'" *Id. at 1375*. The Federal Circuit also pointed to *Ariosa* as an analogous case.

> The [*Ariosa*] court found that "the claims are directed to matter that is **[*901]** naturally occurring and that the inventors there did not purport to **[**20]** "create[] or alter[] any of the genetic information encoded in the cffDNA." The focus of the claimed advance over the prior art was allegedly newly discovered information about human biology: paternally inherited ccfDNA is to be found in maternal blood (using established detection techniques). So too in the present case: the patent claim focuses on a newly discovered fact about human biology (the linkage of coding and non-coding regions of DNA), involves no creation or alteration of DNA sequences, and does not purport to identify novel detection techniques.

Id. at 1375-76. Again, the fact that the patent concerned a newly discovered aspect of biology did not negate the fact that the patent was directed to a naturally occurring matter.

In *Cleveland Clinic Foundation v. True Health Diagnostics LLC, 859 F.3d 1352 (Fed. Cir. 2017)*, the Federal Circuit again found a patent claim was directed to a law of nature or natural phenomenon. The patents in *True Health* concerned detecting the risk of cardiovascular disease in a patient. "When an artery is damaged or inflamed, the body releases the enzyme myeloperoxidase, or MPO, in response. MPO is an early symptom of cardiovascular disease, and it can thus serve as an indicator of a patient's risk of cardiovascular disease." *Id. at 1355*. The patents at issue disclosed **[**21]** methods for detecting MPO and correlating the results to cardiovascular risk.

At step one, the Federal Circuit stated that the invention involved "'seeing' MPO already present in a bodily sample and correlating that to cardiovascular disease. Because the testing patents are based on 'the relation [between cardiovascular disease and heightened MPO levels] that exists in principle apart from human action,' they are directed to a patent-ineligible law of nature." *Id. at 1361*. "[J]ust like *Ariosa*, the method starts and ends with naturally occurring phenomena with no meaningful non-routine steps in between — the presence of MPO in a bodily sample is correlated to its relationship to cardiovascular disease." *Id.* The court underscored that "the asserted claims of the testing patents are directed to the natural existence of MPO in a bodily sample and its correlation to cardiovascular risk rather than to 'a new and useful laboratory technique' for detecting this relationship. Indeed, [the patent holder] has not created a new laboratory technique; rather it uses well-known techniques to execute the claimed method," as expressly stated in the patent specifications. *Id.*

Finally, in *BRCA1- & BRCA2-Based Hereditary Cancer Test Patent Litigation v. Ambry Genetics Corp., 774 F.3d 755 (Fed. Cir. 2014)* (hereinafter **[**22]** "*BRCA*"), the Federal Circuit acknowledged the defendant's argument that the patent at issue was directed to a law of nature or natural phenomenon but declined to reach a holding on that argument because there was an independent reason why step one was satisfied — *i.e.*, the patent was directed to an abstract idea. The plaintiffs in *BRCA* owned patents that "cover[ed] compositions of matter and methods relating to the BRCA1 and BRCA2 genes," "mutations of which are linked to hereditary breast and ovarian cancers." *Id. at 757*. The method claims "involve[d] comparisons between the wild-type BRCA sequences [*i.e.*, sequences most often found in humans] with the patient's BRCA sequences." *Id. at 759*.

The defendant argued that "*Mayo* is directly on point because the method claims here, as there, simply identify a law of nature (the precise sequence of the BRCA genes, and comparisons of the wild-type **[*902]** BRCA sequences with certain mutations of those gene sequences found in the test subject) and apply conventional techniques." *Id. at 762*. But the Federal Circuit did not decide if *Mayo* was on point "because the method claims . . . suffer from a separate infirmity: they recite abstract ideas." *Id.*

> Here, we treat separately the first **[**23]** paragraphs of claims 7 and 8, which describe the comparison of wild-type genetic sequences with the subject's genetic sequence and correspond to the first step of *Alice*, and the second paragraphs, which describe the techniques to be used in making the comparisons and correspond to the second step of *Alice*.
>
> We have already addressed the first paragraphs — the comparison step — in our own 2012 *Myriad* decision. Claims 7 and 8 at issue here depend from claim 1. Claim 1, which is the first paragraph of claims 7 and 8, is the comparison step. In our 2012 decision, we held that claim 1 was patent ineligible because it claimed an abstract mental process of 'comparing' and 'analyzing' two gene sequences.

We found:

>> [The] claim thus recites nothing more than the abstract mental steps necessary to compare two different nucleotide sequences: one looks at the first position in a first sequence; determines the nucleotide sequence at that first position; looks at the first position in a second sequence; determines the nucleotide sequence at that first position; determines if the nucleotide at the first position in the first sequence and the first position in the second sequence are the same of different, **[**24]** wherein the latter indicates an alteration; and repeats the process for the next position.
>
> Here, under our earlier decision, the comparisons described in the first paragraphs of claims 7 and 8 are directed to the patent-ineligible abstract idea of comparing BRCA sequences and determining the existence of alterations. The methods, directed to identification of alterations of the gene, require merely comparing the patient's gene with the wild-type and identifying any differences that arise. The number of covered comparisons is unlimited. The covered comparisons are not restricted by the purpose of the comparison or the alteration being detected. Because of its breadth, the comparison step covers detection of yet-undiscovered alterations, as well as comparisons for purposes other than detection of cancer. Even with respect to cancer, the comparisons are not limited to the detection of risk of breast or ovarian cancer. . . . [A]llowing a patent on the comparison step could impede a great swath of research relating to the BRCA genes, and it is antithetical to the patent laws to allow these basic building blocks of scientific research to be monopolized.

Id. at 763-64.

While *Mayo, Ariosa, Genetic Technologies,* ***[**25]*** *True Health*, and *BRCA* were all decided against the patent holder on step one, 23 points to several Federal Circuit cases that were decided in favor of the patent holder at step one.

For example, in Rapid Litigation Management v. CellzDirect, Inc., 827 F.3d 1042 (Fed. Cir. 2016), the patent concerned a process for preserving hepatocytes, a type of liver cell that has a number of attributes useful for testing, diagnostic, and treatment purposes. *See* id. at 1045-46. Prior to the patent at issue, scientists used cryopreservation techniques to preserve hepatocytes for later use. The inventors of the patent discovered that some fraction of **[*903]** hepatocytes are capable of surviving multiple freeze-thaw cycles. *See* id. at 1045. The improved preservation process at issue in the patent involved "(A) subjecting previously frozen and thawed cells to density gradient fractionation to separate viable cells from non-viable ones; (B) recovering the viable cells; and (C) refreezing the viable cells." *Id.*

The Federal Circuit noted that, at step one,

> [t]he district court identified in these claims what is called a "natural law" — the cells' capability of surviving multiple freeze-thaw cycles. We need not decide in this case whether the court's labeling is correct. It is enough in this case to recognize that the **[**26]** claims are simply not directed to the ability of hepatocytes to survive multiple freeze-thaw cycles. Rather, the claims of the '929 patent are directed to a *new and useful laboratory technique* for preserving hepatocytes. . . . The inventors certainly discovered the cells' ability to survive multiple freeze-thaw cycles, but that is not where they stopped, or is it what they patented. Rather, "as the first party with knowledge of" the cells' ability, they were "in an excellent position to claim *applications* of that knowledge."

Id. at 1048 (emphasis added).

The court distinguished many of the above cases — including *Genetic Technologies*, *Ariosa*, and *BRCA* — because the "end result of the '929 patent claims is not simply an *observation or detection* of the ability of hepatocytes to survive multiple-freeze thaws." *Id.* (emphasis added).

> That one way of describing the process is to describe the natural ability of the subject matter to *undergo* the process does not make the claim "directed to" that natural ability. If that were so, we would find patent-ineligible methods of, say, producing a new compound (as directed to the individual components' ability to combine to form the new compound), treating cancer with chemotherapy (as **[**27]** directed to cancer cells' inability to survive chemotherapy), or treating headaches with aspirin (as directed to the human body's natural response to aspirin).

Id. (emphasis in original). "[T]he claims are directed to a new and useful process of *creating* [a] pool [of multi-cryopreserved hepatocytes], not to the pool itself." *Id. at 1049* (emphasis added); *see also* *id. at 1050* (stating that "[i]t is the *process* of preservation that is patent eligible here, not necessarily the end product") (emphasis in original).

Another case on which 23 heavily relies is *Thales*. There, the patent at issue "disclose[d] an inertial tracking system for tracking the motion of an object relative to a moving reference frame." *Thales, 850 F.3d at 1344*. The tracking system involved "(1) a first inertial sensor mounted on the tracked object; (2) a second inertial sensor mounted on the moving platform; and (3) an element that uses the data from the two inertial sensors to calculate the orientation of the tracked object relative to the moving platform." *Id. at 1348*. The novelty of the tracking system was that the inertial sensors did "not use the conventional method of measuring inertial changes with respect to the earth. Instead, the platform . . . inertial sensors directly **[**28]** measure the gravitational field in the platform frame," and "[t]he object . . . inertial sensors then calculate position information relative to the frame of the moving platform." *Id. at 1345*.

The lower found the patent claims ineligible because they were "directed to the abstract idea of using laws of nature governing motion to track two objects," *id. at 1346*, but the Federal Circuit disagreed.

> **[*904]** These claims are not merely directed to the abstract idea of using "mathematical equations for determining the relative position of a moving object to a moving reference frame," as the Claims Court found. Rather, the claims are directed to systems and methods that use inertial sensors in a non-conventional manner

> to reduce errors in measuring the relative position and orientation of a moving object on a moving reference frame. . . . Just as a natural law can be utilized to create an improved laboratory technique for preserving liver cells, so can the application of physics create *an improved technique* for measuring movement of an object on a moving platform. Just as claims directed to a *new and useful technique* for defining a database that runs on general-purpose computer equipment are patent eligible, so too are **[**29]** claims directed to a *new and useful technique for using sensors to more efficiently track an object on a moving platform*. That a mathematical equation is required to complete the claimed method and system does not doom the claims to abstraction.

Id. at 1348-49 (emphasis added). The court added:

> The claims specify a *particular configuration* of inertial sensors and a *particular method of using the raw data* from the sensors in order to more accurately calculate the position and orientation of an object on a moving platform. The mathematical equations are a consequence of the arrangement of the sensors and the unconventional choice of reference frame in order to calculate position and orientation. Far from claiming the equations themselves, the claims seek to protect only the *application* of physics to the *unconventional configuration of sensors as disclosed*.

Id. at 1349 (emphasis added).

The question is whether this case falls under the *Mayo*/*Ariosa*/*Genetic Technologies*/ *True Health*/*BRCA* line (Ancestry's cases) or the *CellzDirect*/*Thales* line (23's cases). The Court finds Ancestry's cases are more on point.

The '554 patent claims at issue are "directed to" a law of nature because the focus of the claims is a correlation that exists **[**30]** in nature — *i.e.*, the more recombinable DNA information that is shared between two people, the closer the degree of relationship. That correlation "exists in principle apart from any human action." *Mayo, 566 U.S. at 77*. In fact, several of the claims of at issue, in essence, do no more than set forth or describe a law of nature, and thus are comparable to *Mayo*. Claim 5, for example, clearly falls into this category. *See* '554 patent, claim 5 (claiming a method for determining a relative relationship where the "determining" step simply involves a comparison of recombinable DNA information). Claim 5 is in all material respects indistinguishable from the patent claims at issue in *Genetic Technologies*, which focused on the observation and comparison of DNA sequences — occurrences in nature. Similarly, Claim 7 simply directs a comparison of certain regions of the users' recombinable DNA (*i.e.*, the IBD regions) and then observes that "a greater amount of DNA sequence information of the IBD regions indicates a closer predicted degree of [relative] relationship." '554 patent, claim 7 (method claim); *see also* '554 patent, claims 31, 37 (describing system and computer program product claims instead of a method claim).[5]

[*905] While some claims in the **[**31]** '554 patent involve a bit more than observations or descriptions of a law of nature, *see, e.g.*, '554 patent, claim 17 (claiming the method of claim 1 "wherein the relative relationship is one of a range of possible relative relationships between the first user and the second user, and wherein notifying includes sending an indication of the range of possible relationships"), they do not do much beyond that; notably, the Federal Circuit has held that "insignificant postsolution activity will not transform an unpatentable principle into a patentable process." *Diamond v. Diehr, 450 U.S. 175, 191-92, 101 S. Ct. 1048, 67 L. Ed. 2d 155 (1981)*.

23 protests that the focus of the claims is not a law of nature but rather "a new and useful way to identify a relative and the degree of relative relatedness, based on a specific selection and characterization of recombinable DNA." Opp'n at 7. This argument, however, is not persuasive because 23 is basically contending that the invention claimed is a new and useful way of *detecting* a relative relationship based on DNA patterns which occur in nature; 23's own authority establishes that, where a claim's focus is detecting a law of nature or natural phenomenon, that

---

[5] The system and computer program product described in claims 31 and 37 involve generic computer components. ***HN9***[] Under *Alice*, the "mere recitation of a generic computer cannot transform a patent-ineligible abstract idea into a patent-eligible invention." *Alice, 134 S. Ct. at 2358* (adding that, "[g]iven the ubiquity of computers, wholly generic computer implementation is not generally the sort of 'additional feature[]' that provides any 'practical assurance that the process is more than a drafting effort designed to monopolize the [abstract idea] itself").

meets the "directed to" standard at step one. *See* CellzDirect, 827 F.3d at 1048 (distinguishing, *inter alia, Ariosa* **[**32]** because the "end result of the '929 patent claims [at issue] is not simply an *observation or detection* of the ability of hepatocytes to survive multiple-freeze thaws") (emphasis added); *see also* Ariosa, 788 F.3d at 1376 (stating that the patent claims were "directed to a naturally occurring thing or natural phenomenon" — or rather, "directed to detecting the presence of a naturally occurring thing or a natural phenomenon, cffDNA in maternal plasma or serum"). Furthermore, as *Mayo, Genetic Technologies*, and *True Health* demonstrate, even if a patent claims discovery of a particular correlation — and even if that correlation is quantified — the patent still focuses on a naturally occurring phenomenon. Discovering some new fact about nature does not negate the patent's focus on a law of nature.[6]

To the extent 23 relies on *Thales*, that case is easily distinguishable. There, the claims were clearly not directed to any mathematical formula or equations; rather the equations were, in essence, just a useful tool in the invention claimed. The focus in *Thales* was instead on an "improved technique" for measuring movement which involved, *inter alia*, nonconventional placement of sensors. *See* Thales, 850 F.3d at 1348 (noting that, while the claims use "mathematical equations to determination the orientation of the object relative to the moving reference frame, the equations — dictated by the placement of the inertial sensors and application of laws of physics — serve only to tabulate the position and orientation in this configuration"). The patent in *Thales* thus went beyond observing a law of nature. In the case at bar, the law of nature (related people share DNA information) **[*906]** is not a mere tool in a novel application of a law of nature. Rather, the law of nature is the essence and end result of the '554 patent claims at issue.

b. Step Two: Inventive Concept

Because the "directed to" standard at step one **[**33]** has been met, the Court now turns to step two, which examines whether the claims at issue include an inventive concept. Here, as noted above, 23 contends that the claims at issue disclose a new and useful technique for detecting a relative relationship. But ultimately the only means of detecting a relative relationship is *comparing* the recombinable DNA information; an "instruction to undertake a simple comparison step does not represent an unconventional, inventive application sufficient to make [a] claim patent-eligible." Genetic Techs., 818 F.3d at 1379; *see also* BRCA, 774 F.3d at 763-64 (noting that the mental process of comparing and analyzing two gene sequences is an abstract concept).

23 disagrees, arguing, for example, that, in claim 7, the inventive concept is using IBD information to determine a relative relationship — more specifically, "by 'summing the DNA lengths of the IBD regions [and/or] percentage of DNA shared in the IBD regions.'" Opp'n at 7. But no unconventional inventive technique is claimed in making the comparison: summing (*e.g.*, DNA lengths shared in the IBD region) simply reflects the basic and conventional principle that the more DNA information that is shared, the closer the degree of relationship. *See* '554 patent, claim **[**34]** 7 (providing that "a greater amount of DNA sequence information of the IBD regions indicates a closer predicted degree of relationship"). The actual technique employed in claim 7 is not novel.[7] In this case, the '554 patent does not even quantify the degree of similarity or correlation which informs the analysis. *Cf.* Mayo, 566 U.S. at 74, 77 (noting that "[c]laim 1 . . . states that if the levels of 6-TG in the blood (of a patient who has taken a dose of a thiopurine drug) exceed about 400 pmol per 8x108 red blood cells, then the administered dose is likely to produce toxic side effects" — *i.e.*, the claim "set[s] forth processes embodying researchers' findings that identified [such] correlations with some precision"; but ultimately still finding claim patent ineligible as it simply set forth a law of nature).[8] Its methodology is left to a generalized description.

---

[6] The Court acknowledges Ancestry's contention that the patent claims at issue are directed to an abstract idea — *i.e.*, comparing similarities between DNA, similar to the situation in *BRCA*. However, the Court need not reach the question whether *BRCA* additionally justifies a finding that step one is satisfied. The Court finds it more appropriate, in the instant case, to consider the act of comparing at step two of the *Alice* test.

[7] Claim 8 refers to use of a distribution pattern, but 23 does not claim to have applied a novel distribution pattern.

[8] *Compare* Vanda Pharms. Inc. v. West-Ward Pharms. Int'l Ltd., 887 F.3d 1117, 1134 (Fed. Cir. 2018) (finding claims patent eligible; distinguishing *Mayo* on the ground that "the claims in *Mayo* were not directed to a novel method of treating a disease"

To the extent 23 asserts a broader inventive concept — *i.e.*, simply using IBD regions in the first place to determine a relative relationship — it still fares no better. That claim 7 focuses on a particular region of DNA not previously used for comparison purposes does not place the claim outside the *§ 101* exception. 23 does not claim to have discovered **[**35]** IBD regions and, even if it did, the discovery of a law of nature is not protected by the patent laws, as reflected in both *Ariosa* and *Genetic Technologies. See also Ass'n for Molecular Pathology v. Myriad Genetics, Inc., 569 U.S. 576, 579, 133 S. Ct. 2107, 186 L. Ed. 2d 124 (2013)* (holding that "a naturally occurring DNA segment is a product of nature and not patent eligible merely because it **[*907]** has been isolated"). Furthermore, the '554 specification indicates that it is an inherent characteristic of IBD regions to contain relative relationship information. *See* '554 patent, col. 2:36-40 (stating that "only relatives will share long stretches of genome regions where their recombinable DNA is completely or nearly identical[;] [s]uch regions are referred to as 'Identical by Descent' (IBD) regions . . . ."); *cf. Mayo, 566 U.S. at 77* (stating that the relationships between concentrations of certain metabolites in the blood and the effect of a thiopurine drug "exist[] in principle apart from any human action"); *True Health, 859 F.3d at 1361* (stating that the relationship between cardiovascular disease and heightened MPO levels is one that exists in principle apart from human action).

Finally, to the extent 23 argues that there is a factual dispute here that cannot be resolved at the 12(b)(6), *see Berkheimer, 881 F.3d at 1369* (stating that "[w]hether something is well-understood, routine, and **[**36]** conventional to a skilled artisan at the time of the patent is a factual determination"), that argument is unavailing. In effect, the only alleged unconventional feature of 23's claims is the requirement that specific DNA information be compared to determine a relative relationship "[b]ut this simply restates what [the Court has] determined is [a law of nature or] abstract idea." *BSG, 899 F.3d 1281, 2018 U.S. App. LEXIS 22704, at *23-24*. Again, even if the '554 patent claims a new discovery of nature, it claims no inventive, unconventional technique in making that discovery or applying it.

Accordingly, the Court concludes that, under the two-step *Alice* test, the '554 patent claims are patent-ineligible.[9]

C. Claim for Misleading Representations in Violation of the Lanham Act

1. Relevant Background

As alleged in the complaint, Ancestry has made misleading representations on its website. For example:

- On March 29, 2018, Ancestry's website stated that its DNA ancestry test tests "5X MORE REGIONS than other DNA tests." Compl. ¶ 51. 23 asked Ancestry to discontinue the claim but no changes were made to the website through at least April 16, 2018. *See* Compl. ¶ 52.

- On or about April 17, 2018, Ancestry changed its website. The website still made the claim "5X MORE REGIONS **[**37]** than other DNA tests*" but now included an asterisk footnote. The actual footnote stated: "*5x more regions than MyHeritage, Nat Geo Geno 2.0, and Family Three DNA. 2x more regions than 23andMe." Compl. ¶ 53. 23 maintains that this disclaimer was ineffective because it was "essentially hidden" — "at the end of [the] long web page and in . . . small font and color." Compl. ¶ 53.

- On or about April 21, 2018, Ancestry made another change to its website, now making the claim "AncestryDNA provides 5x more detail than other tests*" — with the actual footnote stating, "*5x more regions than MyHeritage, **[*908]** Nat Geo Geno 2.0, and Family Tree DNA. 2x more regions than 23andMe." Compl. ¶

but rather "were directed to a diagnostic method based on the 'relationships between concentrations of certain metabolites in the blood and the likelihood that a dosage of a thiopurine drug will prove ineffective or cause harm'").

[9] To the extent Plaintiffs argue that the Court should not find patent ineligibility here because there is no danger that basic building blocks of scientific research will not be monopolized, the Court is not persuaded. ***HN10***[] "While preemption may signal patent ineligible subject matter, the absence of complete preemption does not demonstrate patent eligibility." *Ariosa, 778 F.3d at 1379*. Moreover, "'[a]n abstract idea does not become nonabstract by limiting the invention to a particular field of use or technological environment . . . .'" *Intellectual Ventures I LLC v. Erie Indem. Co., 850 F.3d 1315, 1330 (Fed. Cir. 2017)*.

54. The position of the footnote was moved up. 23 contacted Ancestry again and demanded that Ancestry cease and desist; however, the website stayed the same until about May 3, 2018. *See* Compl. ¶¶ 55-56.

• On or about May 3, 2018, Ancestry changed its website, returning to the claim "5X MORE REGIONS than other DNA tests*" with the same footnote. The location of the footnote was slightly altered. 23 maintains that the disclaimer is still ineffective — represented "in small print" and with 23's name "buried following **[**38]** other company names." Compl. ¶ 49.

In addition to the above, 23 identifies one other subject on which Ancestry allegedly made misrepresentations on its website. According to 23, Ancestry "ran a perpetual 'sale' of its $99 DNA test for 'ONLY $79*,' misleading consumers to believe a sale was ongoing, when in fact it was merely a reduced price." Compl. ¶ 58. 23 adds that Ancestry stopped this "misleading advertising only after asked by [23] to desist from such misleading promotions." Compl. ¶ 58.

2. *Rule 9(b)*

The Lanham Act provides in relevant part that there is civil liability for "[a]ny person who, on or in connection with any goods or service, . . . uses in commerce any . . . false or misleading description of fact, or false or misleading representation of fact which . . . is likely to cause confusion." *15 U.S.C. § 1125(a)(1)(A)*. In its motion, Ancestry argues that 23's Lanham Act claim should be dismissed because it is subject to *Federal Rule of Civil Procedure 9(b)*, which provides that, "[i]n alleging fraud . . . , a party must state with particularity the circumstances constituting fraud." *Fed. R. Civ. P. 9(b)*. According to Ancestry, 23 has failed state the circumstances constituting fraud with particularity — in particular, what was false and why.

As an initial matter, **[**39]** 23 disputes that the Lanham Act claim is subject to *Rule 9(b)*. ***HN11***[] The Ninth Circuit does not appear to have weighed in "as to whether *Rule 9(b)* applies to Lanham Act claims," and "district courts in California have split on the issue." *Oracle Am., Inc. v. TERiX Comput. Co., No. 5:13-cv-03385-PSG, 2014 U.S. Dist. LEXIS 561, at *35 (N.D. Cal. Jan. 3, 2014)*. But the better reasoned authority is that, where a Lanham Act claim is predicated on the theory that the defendant engaged in a knowing and intentional misrepresentation, then *Rule 9(b)* is applicable. *See, e.g., Brosnan v. Tradeline Sols., Inc., No. C-08-0694 JCS, 2009 U.S. Dist. LEXIS 48262, at *13-14 (N.D. Cal. June 5, 2009)* (citing authority for the proposition that, "although Lanham Act claims are not categorically subject to the heightened pleading requirements of 9(b)," where a plaintiff alleges knowing and intentional conduct, *Rule 9(b)* is applicable); *Rise Basketball Skill Dev., LLC v. K Mart Corp., No. 16-cv-04895-WHO, 2017 U.S. Dist. LEXIS 99608, at *9 (N.D. Cal. June 27, 2017)* (noting the same). There is no real dispute here that 23 is asserting knowing and intentional misrepresentations on the part of Ancestry. Therefore, the Court must evaluate whether the requirements of *Rule 9(b)* have been met.

Each alleged misrepresentation must be considered on its own terms.

• On March 29, 2018, Ancestry's **[**40]** website stated that its DNA ancestry test tests "5X MORE REGIONS than other DNA tests." Compl. ¶ 51. **[*909]** Ancestry contends that it is not clear from the complaint why this statement was allegedly false. But just because the statement simply references "other DNA tests," and does not mention 23 by name specifically, does not mean that Ancestry is immunized from liability. This is because 23 has explicitly alleged that it and Ancestry "are the top two companies in the market." Compl. ¶ 47. That being the case, a reasonable consumer could infer that the representation covers 23 — or at least it is a question of fact whether a reasonable consumer could be misled. Ancestry makes a better argument that it is not clear that the statement was false *when made* — "the number of regions reflected in [23's] products changed over time." Reply at 10. Ancestry points out that, although this is a 12(b)(6) motion, 23 has provided evidence showing that, in April 2018, 23's own website claimed that its services covered "150+ regions*" but with the asterisk/footnote that 23's "Ancestry Composition update with over 120 additional regions will be coming soon." Docket No. 36-10 (Gaede Decl., Ex. C) (23's website). **[**41]** Thus, as to this representation, Ancestry has a meritorious argument that 23 needs to allege more to comply with *Rule 9(b)*.

• On or about April 17, 2018, Ancestry changed its website. The website still made the claim "5X MORE REGIONS than other DNA tests*" but now included an asterisk footnote. The actual footnote stated: "*5x more regions than MyHeritage, Nat Geo Geno 2.0, and Family Three DNA. 2x more regions than 23andMe." Compl. ¶ 53. Contrary to what Ancestry argues, 23 has alleged enough here to satisfy *Rule 9(b)*. The representation "5X MORE REGIONS than other DNA tests" is false as to 23 because — as conceded in the footnote — Ancestry tests only 2x more regions than 23. And it is a question of fact as to whether a reasonable consumer could be misled because, although the footnote clarifies Ancestry's position with respect to 23, 23 has alleged that the footnote was effectively buried ("at the end of [the] long web page and in . . . small font and color"). Compl. ¶ 53.

• On or about April 21, 2018, Ancestry made another change to its website, now making the claim "AncestryDNA provides 5x more detail than other tests*" — with the actual footnote stating, "*5x more regions than MyHeritage, Nat Geo **[**42]** Geno 2.0, and Family Tree DNA. 2x more regions than 23andMe." Compl. ¶ 54. The position of the footnote was moved up. As above, it is a question of fact as to whether a reasonable consumer could be misled, even with the new positioning of the footnote.

• On or about May 3, 2018, Ancestry changed its website, returning to the claim "5X MORE REGIONS than other DNA tests*" with the same footnote. The location of the footnote was slightly changed. As above, it is a question of fact as to whether a reasonable consumer could be misled. *See* Compl. ¶ 49 (alleging that the disclaimer was ineffective — represented "in small print" and with 23's name "buried following other company names").

• Finally, Ancestry represented (*e.g.*, on its website, *see* Compl. ¶ 51) that its DNA test cost $99 but that it was running a sale so that a consumer could purchase its services for **[*910]** only $79. According to 23, the representation of a sale was false because the sale was "perpetual" or never-ending — *i.e.*, the reality was that there was no "sale" but that Ancestry had simply reduced the price of its services. Contrary to what Ancestry argues, this provides the who, what, when, where, and why, and therefore there **[**43]** is no *Rule 9(b)* issue. To the extent Ancestry argues that it did not use the word "sale" on its website but simply struck out $99 and replaced it with $79, *see* Reply at 11, it is a question of fact as to how a reasonable consumer would understand the striking out — *i.e.*, indicating a sale or simply a reduced price.

Accordingly, 23's Lanham Act claim is, for the most part, adequately pled. The Court grants the motion to dismiss the Lanham Act claim only to the extent the claim is based on the March 29, 2018, representation on Ancestry's website. 23 has leave to amend to cure this specific deficiency.

D. Claims for Violations of *California Business & Professions Code §§ 17500* and *17200*

1. Relevant Background

HN12[] *California Business & Professions Code § 17500* essentially prohibits false or misleading advertising. *See Cal. Bus. & Prof. Code § 17500* (addressing "untrue or misleading" advertising "which is known, or which by the exercise of reasonable care, should be known, to be untrue or misleading"). *Section 17200* prohibits "unlawful, unfair or fraudulent business act[s] or practice[s] and unfair, deceptive, untrue or misleading advertising." *Id. § 17200*.

In its third and fourth causes of action, 23 alleges a violation of *§ 17500* and *§ 17200*, respectively. In the *§ 17500* claim, 23 cites as misrepresentations that Ancestry's "DNA test provides '5X more regions than other **[**44]** DNA tests' and '5X more detail than other DNA tests.'" Compl. ¶ 64. In the *§ 17200* claim, 23 does not claim a fraudulent business act or practice but rather only "unlawful and unfair" ones. Compl. ¶ 68. The only unlawful or unfair acts or practices identified by 23 are the "misleading advertis[ements] about Defendants' DNA tests." Compl. ¶ 68.

2. *Rule 9(b)*

For the §§ 17500 and 17200 claims, Ancestry repeats the same argument that it made above with respect to the Lanham Act claim — *i.e.*, that the §§ 17500 and 17200 claims are subject to Rule 9(b) and that the Rule 9(b) particularity requirements have not been satisfied. The analysis above is applicable here.

3. Standing

Ancestry argues that, apart from any Rule 9(b) issue, there is an independent ground to dismiss the §§ 17500 and 17200 claims. More specifically, Ancestry asserts that, because these claims essentially claim fraud, 23 is required to allege in its complaint actual reliance on the misrepresentations — and that reliance must be 23's reliance, and not just a consumer's.

Ancestry's argument is persuasive on the § 17500 claim as well as the § 17200 claim to the extent it is based on an unlawful (as opposed to unfair) act or practice. The § 17500 claim is clearly predicated on fraud. As for the § 17200/unlawful claim, as currently pled, it is also **[**45]** based on fraud. *See* Compl. ¶ 68 (referencing "misleading advertising about Defendants' DNA tests"). Contrary to what 23 suggests in its opposition, nothing in the complaint indicates that the § 17200/unlawful claim is based on patent infringement. *See* Opp'n at **[*911]** 19 (arguing that the patent infringement claim is "not predicated on misrepresentation").

Because both the § 17500 and § 17200/unlawful claims are based on predicated on fraud, actual reliance — more specifically, reliance on the part of 23 — is required. Admittedly,

> "[n]o California [state] court has addressed" whether "competitor plaintiffs must plead their own reliance or whether pleading consumer reliance is sufficient for fraudulent business practice claims brought by competitors." [And while] [t]here is a split among district courts sitting in California on this issue, . . . the majority view appears to be that a plaintiff must be able to allege its own reliance "rather than the reliance of third parties."

*A White & Yellow Cab, Inc. v. Uber Techs., Inc., No. 15-cv-05163-JSW, 2017 U.S. Dist. LEXIS 49803, at *20-21 (N.D. Cal. Mar. 31, 2017)*. This makes sense because, "in general, a traditional fraud claim cannot be premised on third-party reliance." *Id. at *21*; *cf. O'Connor v. Uber Technologies, Inc., 58 F. Supp. 3d 989, 1003 (N.D. Cal. 2014)* (in a case where plaintiff alleged a business practice likely to deceive members **[**46]** of the public (as opposed to himself), stating that "third-party reliance is insufficient to establish [plaintiff's] standing under the fraud prong of the UCL"). Therefore, the §§ 17500 and 17200/unlawful claims are dismissed for failure to plead actual reliance by 23.

However, this analysis does not apply to the § 17200 claim to the extent it simply alleges an *unfair* act or practice. Unfairness is measured on a standard different from fraud — a defendant competitor's misrepresentation can be unfair even if the plaintiff itself was not deceived by the misrepresentation. *See Van Slyke v. Capital One Bank, No. C 07-00671 WHA, 2007 U.S. Dist. LEXIS 82690, at *31 (N.D. Cal. Nov. 7, 2007)* (noting that, in a § 17200 case brought by a plaintiff against a competitor (*i.e.*, not a consumer case), unfairness relates to actual or threatened impact on competition); *Cel-Tech Comm'ns, Inc. v. L.A. Cell. Tel. Co., 20 Cal. 4th 163, 186-87, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999)* (stating that, "[w]hen a plaintiff who claims to have suffered injury from a direct competitor's 'unfair' act or practice invokes section 17200, the word 'unfair' in that section means conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition"); *see also In re Tobacco II Cases, 46 Cal. 4th 298, 325 n.17, 93 Cal. Rptr. 3d 559, 207 P.3d 20 (2009)* (noting **[**47]** that "[t]here are doubtless many types of unfair business practices in which the concept of reliance, as discussed here, has no application"). This aspect of § 17200 focuses on unfair *competition*.

The Court acknowledges that there are some cases that arguably hold to the contrary. *See, e.g., Thomas v. Costco Wholesale Corp., No. 5:12-CV-02908-EJD, 2014 U.S. Dist. LEXIS 46405, at *14 (N.D. Cal. Mar. 31, 2014)* ("The California Supreme Court has held that the phrase 'as a result of' in UCL section 17204 'imposes an actual reliance requirement on plaintiffs prosecuting a private enforcement action under the UCL's fraud prong.' This also applies under the UCL's 'unlawful' and 'unfair' prong, where the predicate unlawfulness is misrepresentation and deception."); *McNeary-Calloway v. JP Morgan Chase Bank, N.A., 863 F. Supp. 2d 928, 959 (N.D.* **[*912]** *Cal. 2012)* (Spero, J.) ("Although *In Re Tobacco* concerned a claim only under the fraudulent prong, it has been held that, under any prong, a UCL claim that is based in fraud must be supported by allegations of reliance in order to properly be pled."). To the extent they so hold, the Court respectfully disagrees with their analysis.

4. Relief

Finally, Ancestry argues that, even if its arguments on *Rule 9(b)* and standing are not successful, there is one more independent basis for dismissal — *i.e.*, the relief that 23 seeks is not recoverable. **[**48]** Ancestry notes, that per the complaint, the specific relief 23 seeks for the *§§ 17500* and *17200* claims includes (1) disgorgement of profits and (2) restitution.

Ancestry is correct that, to the extent 23 seeks *nonrestitutionary* disgorgement of profits, that relief is unwarranted because *§§ 17500* and *17200* allow only for restitution.

As for restitution, Ancestry persuasively argues that, on the face of the complaint, it is not plausible that there is any restitution to be had. ***HN13***[] "[A]n order for 'restitution' [is] one 'compelling a UCL defendant to return money obtained through an unfair business practice to those persons in interest from whom the property was taken, that is, to persons who had an ownership interest in the property.'" *Korea Supply Co. v. Lockheed Martin Corp., 29 Cal. 4th 1134, 1144-45, 131 Cal. Rptr. 2d 29, 63 P.3d 937 (2003)*. In the case at bear, the *§§ 17500* and *17200* claims, as pled, are based on misleading advertising only. 23 nowhere alleges in its complaint that Ancestry obtained any money or property from 23 through its misleading advertising. Thus, there is no basis for restitution.

23 suggests, in its opposition brief, that Ancestry should have to disgorge any profits it made from its patent infringement, *see* Opp'n at 21-22 (arguing that 23 has an "ownership interest in the DNA tests offered by Defendants (in **[**49]** that the DNA tests embody [23's] intellectual property)"), but, as noted above, the *§§ 17500* and *17200* claims, as pled, are not based on patent infringement but rather only misleading advertising. In any event, as held herein, 23 fails to state a patent infringement claim.

Accordingly, to the extent 23 has asked for disgorgement of profits and restitution, its *§§ 17500* and *17200* claims are problematic. However, this only counsels in favor of a dismissal (with leave to amend) of the requests for disgorgement and restitution — and not a dismissal of the *§§ 17500* and *17200* claims themselves. This is because 23 has also asked for injunctive relief. And on the face of the complaint, nothing indicates that Ancestry has stopped making representations about, *e.g.*, "5X MORE REGIONS" on its website. Although, in its reply brief, Ancestry claims that "the allegedly misleading statements no longer appear on Ancestry's website," Reply at 13 n.12, that assertion is outside the four corners of the complaint.

5. Summary

With respect to standing, because the *§§ 17500* and *17200* claims are predicated on misleading advertising only (and not patent infringement), 23's failure to plead its own actual reliance on Ancestry's alleged misrepresentations warrants **[**50]** a dismissal of the *§ 17500* claim and the *§ 17200*/unlawful claim. However, the *§ 17200*/unfair claim (even though based on misleading advertising) survives the standing challenge.

As to the *§ 17200*/unfair claim, disgorgement and restitution are implausible remedies. **[*913]** However, injunctive relief is still a possible remedy — at least based on what the complaint alleges (*i.e.*, there is no allegation that Ancestry has ceased making misrepresentations on its website).

For the *§ 17200*/unfair claim, 23 has pled to satisfy *Rule 9(b)*, except with respect to the March 29, 2018, representation on Ancestry's website. As above, 23 has leave to amend to cure this specific deficiency. If 23 amends, then it should address whether injunctive relief is proper if, in fact, Ancestry has ceased making misrepresentations on its website.

E. Declaratory Relief Claims (Ancestry's Trademark)

1. Relevant Background

Ancestry has a registered trademark in the word mark "Ancestry." *See* Compl., Ex. 10 (trademark). According to 23, Ancestry has claimed 23's use of the word "'Ancestry' in certain of [23's] advertising and on certain of [23's] products" causes consumer confusion. Compl. ¶ 70; *see also* Compl. ¶ 75 (alleging that Ancestry has "contended that [23's] use of the phrase 'Ancestry **[**51]** Service,' 'Health + Ancestry Service,' or use of the word 'Ancestry' under 'Your information' or 'Find out what your DNA says about your health, traits and ancestry'" infringes). 23 asks for a declaratory judgment that it does not infringe because, *e.g.*:

- 23 "has priority of usage of the mark as to the DNA testing market," Compl. ¶ 73 (adding that, when Ancestry registered the word mark, "the mark was to market genealogical periodicals and genealogy websites, not . . . DNA testing services"); and
- 23 uses the word "Ancestry" to "generically describe[] the characteristics of the service" it provides and thus its usage "constitutes fair use." Compl. ¶ 77.

23 also asks for a declaration that Ancestry's trademark is invalid because "Ancestry" "has become generic for genetic testing for ancestry information and genealogical research services." Compl. ¶ 81.

Ancestry's main argument is that the declaratory relief claims should be dismissed for lack of subject matter jurisdiction — more specifically, because there is no case or controversy (Article III) or actual controversy (the Declaratory Judgment Act) for the Court to adjudicate. Because this is a 12(b)(1) motion to dismiss, both parties **[**52]** have provided evidence as to whether there is, in fact, 28 a case or controversy. The evidence provided indicates as follows.

From January to April 2017, 23 and Ancestry communicated regarding 23's use of the term "Ancestry." On April 20, 2017, Ancestry provided 23 with an initial draft of an agreement regarding 23's use of the term. *See* Chenhansa Decl. ¶ 3. Thereafter, the parties continued to negotiate the terms of the agreement through February 2018. *See* Chenhansa Decl. ¶ 4.

On March 1, 2018, Ancestry proposed an edit to the agreement. *See* Chenhansa Decl. ¶ 5. On April 30, 2018, 23 responded that it would accept that edit but then proposed its own edit to the agreement. 23 then stated: "Please finalize the agreement, have it executed by your client, and then send it to us for final review and execution by [23]." Chenhansa Decl. ¶ 7 & Ex. 5 (email). On May 1, 2018, 23 proposed another edit to the agreement and stated: "Please make that revision or contact me if you wish to discuss." Chenhansa Decl. ¶ 8 & Ex. 6 (email).

On May 11, 2018, Ancestry rejected the proposed edits and asked 23 to "revisit and let me know if you will withdraw" the **[*914]** proposed edit. Haggarty Decl. ¶ 4 & Ex. A (email). **[**53]**

Thereafter, on that same day, 23 filed the instant lawsuit.

2. Case or Controversy

HN14[↑] Title *28 U.S.C. § 2201* provides in relevant part that, "[i]n a case of actual controversy within its jurisdiction, . . . any court of the United States, upon the filing of an appropriate pleading, may declare the rights and other legal relations of any interested party seeking such declaration, whether or not further relief is or could be sought." *28 U.S.C. § 2201(a)*.

> The difference between an abstract question and a 'controversy' contemplated by the Declaratory Judgment Act is necessarily one of degree, and it would be difficult, if it would be possible, to fashion a precise test for determining in every case whether there is such a controversy. Basically, the question in each case is whether the facts alleged, under all the circumstances, show that there is a substantial controversy, between parties having adverse legal interests, of sufficient immediacy and reality to warrant the issuance of a declaratory judgment.

Md. Cas. Co. v. Pac. Coal & Oil Co., 312 U.S. 270, 273, 61 S. Ct. 510, 85 L. Ed. 826 (1941); *see also* *MedImmune, Inc. v. Genentech, Inc., 549 U.S. 118, 127, 137, 127 S. Ct. 764, 166 L. Ed. 2d 604 (2007)* (affirming *Maryland Casualty* test in a case where patent licensee sought declaratory judgment that patent was invalid, unenforceable, or not infringed; holding that licensee was not required to break or terminate **[**54]** license agreement before seeking declaratory judgment).[10] To state the matter somewhat differently, "[a] case or controversy exists justifying declaratory relief only when the challenged . . . activity . . . is not contingent, has not evaporated or disappeared, and, by its continuing and brooding presence, casts what may well be a substantial adverse effect on the interests of the . . . parties." Bayer v. Neiman Marcus Grp., 861 F.3d 853, 867 (9th Cir. 2017) (internal quotation marks omitted). "The requirement that a case or controversy exist under the Declaratory Judgment Act is 'identical to Article III's constitutional case or controversy requirement.'" Principal Life Ins. Co. v. Robinson, 394 F.3d 665, 669 (9th Cir. 2005).

In the instant case, the parties had a disagreement about 23's actual use of the term "Ancestry." They never **[**55]** reached an agreement regarding 23's use. Hence, the case or controversy requirement is satisfied. *Compare, e.g.,* Merit Healthcare Int'l, Inc. v. Merit Med. Sys., 721 F. App'x 628, 629 (9th Cir. 2018) (No case or controversy where "the Original Complaint indicates that, despite the similarity of marks and similarity of goods, the parties have coexisted for thirty years without any apparent conflict. Moreover, the Original Complaint contains no allegation that Merit Medical has any plan to alter the status quo."). The Court notes that, before the Supreme **[*915]** Court's *MedImmune* decision, "Ninth Circuit precedent required a plaintiff in a trademark case to demonstrate a 'real and reasonable apprehension that [it] will be subject to liability.'" Homie Gear, Inc. v. Lanceberg Holdings, LLC, No. 16cv1062 BTM (DHB), 2016 U.S. Dist. LEXIS 159750, at *5 (S.D. Cal. Nov. 16, 2016) (citing Chesebrough-Pond's, Inc. v. Faberge, Inc., 666 F.2d 393, 396 (9th Cir. 1982)). But *MedImmune* held the reasonable-apprehension-of-suit test as simply one way that the "'declaratory judgment plaintiff can satisfy the more general all-the-circumstances test to establish that and action presents a justiciable Article III controversy.'" *Id.* In any event, even if the reasonable-apprehension-of-suit test were given more weight, the Ninth Circuit has indicated that, where a "plaintiff is engaged in the on-going [use]" of the disputed intellectual property, **[**56]** "the showing of real and reasonable apprehension beyond the [use] need not be substantial." Societe de Conditionnement en Aluminum v. Hunter Eng'g Co., 655 F.2d 938, 944 (9th Cir. 1981) (patent infringement case).

Ancestry contends that there is no case or controversy because, even though no contract was actually *signed*, the parties had, through their negotiations, reached agreement on most terms of use and the only places where they did not have agreement [TEXT REDACTED BY THE COURT] *See* Reply at 14 **[filed under seal]**. More specifically, in its complaint, 23 alleges: "[Ancestry has] contended that at least [23's] use of the phrase 'Ancestry Service,' 'Health + Ancestry Service,' or use of the word 'Ancestry' under "Your information' or 'Find out what your DNA says about your health, traits and ancestry,' somehow uses its 'Ancestry' trademark." Compl. ¶ 75. Ancestry asserts that the parties had reached agreement that [TEXT REDACTED BY THE COURT] Chenhansa Decl., Ex. 4 (§ 1 of the draft agreement) **[filed under seal]**.

There are several problems with Ancestry's argument. First, in the absence of a signed contract, it is not clear that 23 was (or is) willing [TEXT REDACTED BY THE COURT] **[filed under seal]**. Second, the allegation in the complaint covers [TEXT REDACTED BY THE COURT] **[**57]** **[filed under seal]**. Finally, Ancestry's attempt to characterize the agreement above (§ 1 in the draft contract) as dispositive fails to take into account that that the parties had a disagreement about a related term (§ 5 in the draft contract), which rendered that purported agreement questionable. *See* Chenhansa Decl., Ex. 4 (§ 5 of draft agreement) [TEXT REDACTED BY THE COURT] **[filed under seal]**; Chenhansa Decl., Ex. 5 (email from 23) [TEXT REDACTED BY THE COURT] **[filed under seal]**; Chenhansa Decl., Ex. 6 (email from 23) [TEXT REDACTED BY THE COURT] **[filed under seal]**; Haggarty Decl., Ex. A (email from Ancestry) (stating that "[w]e have a problem with these proposed [edits]" [TEXT

---

[10] In *MedImmune*, the Supreme Court questioned the Federal Circuit's reasonable-apprehension-of-suit test. *See, e.g.,* MedImmune, 549 U.S. at 132 n.11. Following *MedImmune*, the Federal Circuit stated that,

> [w]hile the Supreme Court rejected the reasonable apprehension of suit test as the sole test for jurisdiction, it did not completely do away with the relevance of a reasonable apprehension of suit. Rather, following *MedImmune*, proving a reasonable apprehension of suit is one of multiple ways that a declaratory judgment plaintiff can satisfy the more general all-the-circumstances test to establish that an action presents a justiciable Article III controversy.

Prasco, LLC v. Medicis Pharm. Corp., 537 F.3d 1329, 1336 (Fed. Cir. 2008).

REDACTED BY THE COURT] **[filed under seal]**. There remains a case or controversy sufficient to support 23's claim for declaratory relief.

3. Discretion

Finally, Ancestry argues that, even if this Court has subject matter jurisdiction over the declaratory relief claims, it should exercise its discretion and not entertain them. Ancestry cites *EMC Corp. v. Norand Corp., 89 F.3d 807 (Fed. Cir. 1996)*, a case where the plaintiff sought a declaration that it did not infringe certain patents and that the patents were invalid. The district court exercised discretion not to entertain **[**58]** the declaratory relief claims. On appeal, the Federal Circuit rejected the plaintiff's argument that it is an "abuse of discretion for a district court to dismiss a declaratory judgment action except when special circumstances are present." *Id. at 814*. ***HN15***[] "Rather, we heed the Supreme Court's instruction that special flexibility is **[*916]** called for in the declaratory judgment context, where 'the normal principle that federal courts should adjudicate claims within their jurisdiction yields to considerations of practicality and wise judicial administration.'" *Id.* The court therefore deemed it appropriate for the district court to consider "whether hearing the declaratory judgment action would serve the objectives for which the Declaratory Judgment Act was created." *Id.* The district court had declined jurisdiction on the ground that "allowing the declaratory judgment action to proceed would 'create an incentive structure that is inconsistent with the public interest in preserving declaratory proceedings for cases closer to the central objectives of declaratory proceedings.'" *Id.* In other words, "a party in [the plaintiff's] position could abuse the declaratory judgment device to obtain a more favorable bargaining **[**59]** position in its ongoing negotiations with the patentee and also to undermine the value of the patent so as to impede its sale or licensing to a third party." *Id.* The district court also indicated that discretionary dismissal was justified on the basis that allowing the claim to go forward would be inconsistent with the policy of promoting extrajudicial dispute resolution and conservation of judicial resources. In that case, declaratory relief was sought during active negotiations. It was in this context that the Federal Circuit stated:

> We agree that a court may take into account the pendency of serious negotiations to sell or license a patent in determining to exercise jurisdiction over a declaratory judgment action. While a court may conclude that ongoing negotiations do not negate the presence of a controversy for jurisdictional purposes, the court may nonetheless find . . . that the need for judicial relief is not as compelling as in cases in which there is no real prospect of a non-judicial resolution of the dispute.

Id.

HN16[] Of course that a court *may* take into account serious negotiations does not mean that the existence of such negotiations require dismissal of the declaratory relief **[**60]** claims. Moreover, in the instant case, it is not even clear that there are serious ongoing negotiations. While the parties have engaged in negotiations for a significant period of time (since January 2017), they still have not been able to reach an agreement after all that time. This suggests that the parties have reached a serious stumbling block in their negotiations.

Finally, 23 fairly makes the point that judicial economy would be served by putting in one lawsuit all of the parties' disputed intellectual property rights. *See* Opp'n at 25.

The Court therefore, in the exercise of its discretion, declines to dismiss the declaratory relief claims.

II. CONCLUSION

For the foregoing reasons, Ancestry's motion to dismiss is granted in part and denied in part. 23 has leave to amend as provided for in this order. Any amended complaint shall be filed no later than September 24, 2018.

This order disposes of Docket No. 29. This order shall be filed under seal.

IT IS SO ORDERED.

Opinion by: Edgardo Ramos

Opinion

OPINION AND ORDER

Ramos, D.J.:

This litigation arises from fourteen related complaints filed against a number of banks and certain of their employees who allegedly conspired to fix the price of supranational, sovereign, and agency ("SSA") bonds sold to and purchased from investors in the secondary market. These actions were consolidated under the caption *In re SSA Bonds Antitrust Litigation*, No. 16 Civ. 3711. *See* Docs. 36, 314. Pending before the Court are Defendants' motions to dismiss the Consolidated Amended Class Action Complaint ("CAC") for lack of subject-matter jurisdiction, failure to state a claim, lack of personal jurisdiction, and improper venue. Docs. 342, 358, 365, 373, 376, 378. For the reasons set forth below, the Court GRANTS the motions to dismiss for failure to state a claim.

I. Background

A. Factual Background [*7] [1]

SSA bonds are debt securities issued by governmental and quasi-governmental entities to fund a range of public-policy mandates. CAC ¶ 2, Doc. 306. Entities issuing SSA bonds include supranational organizations, which are multilateral institutions with shareholders from multiple countries, such as the World Bank's International Bank for Reconstruction and Development ("IBRD") and the European Investment Bank ("EIB"); sovereign and subsovereign borrowers, which are national, state, or provincial governments that issue debt in foreign currencies; and agency borrowers, which are typically entities owned by or working on behalf of governments, such as Germany's Kreditanstalt für Wiederaufbau ("KFW") (a government-owned investment bank). CAC ¶¶ 95-98. SSA bonds are generally regarded as secure investments because they often enjoy special legal status or government backing. CAC ¶¶ 2, 95. SSA bonds can be U.S. dollar denominated ("USD") as a way to target the U.S. bond market. CAC ¶ 103.

After being issued, SSA bonds can be resold and traded by dealers and investors. CAC ¶ 109. Investors trade SSA bonds in an over-the-counter market, meaning that rather than using an open, anonymous exchange **[*8]** that matches buyers and sellers, investors transact individually and privately with dealers. CAC ¶¶ 109, 396. An investor typically contacts one or more dealers by telephone, electronic chat messaging, or an electronic trading platform to request a quote, which the dealer relays to the investor, who can then place the order.[2] CAC ¶¶ 110-112. Because it is time-consuming to contact dealers and their quotes usually expire in a short amount of time, investors generally do not "shop around" with more than a few dealers at a time. CAC ¶ 113. Investors also do not have access to real-time market data and have limited ability to purchase secondary market trading information, so they rely on dealers for pricing information on SSA bonds. CAC ¶¶ 112, 114. Dealers typically quote prices for SSA bonds in basis

---

[1] The following facts, drawn from the CAC, are presumed to be true for the purposes of Defendants' motions to dismiss. *See* *Koch v. Christie's Int'l PLC, 699 F.3d 141, 145 (2d Cir. 2012)*.

[2] Dealers can also trade with other dealers through interdealer brokers. CAC ¶ 116. Dealers submit bid and offer prices to interdealer brokers, which publish them to trading platforms, where other dealers can view and accept them. *Id.* Transactions through interdealer brokers are supposed to be anonymous. CAC ¶ 117.

points (one basis point is 1/100th of a percentage point) as a spread above the yield of the relevant benchmark U.S. Treasury bonds with a similar maturity.[3] CAC ¶ 119. SSA bond yields are inversely related to bond prices: the higher the spread above Treasury bond yields, the cheaper the price of the bond, and vice versa. CAC ¶ 121. Therefore, investors sought to buy SSA bonds at the highest **[*9]** available offer in basis points (*i.e.*, the highest yield, and thus the cheapest price) and to sell them at the lowest available bid in basis points (*i.e.*, the lowest yield, and thus the most expensive price). *Id.*

Defendants are several banks operating as dealers in the USD SSA bond market (the "Dealer Defendants") and certain of their employees responsible for the USD SSA bond trading business (the "Individual Defendants"). CAC ¶ 3. The Dealer Defendants are Bank of America, Barclays, BNP Paribas, Citi, Crédit Agricole, Credit Suisse, Deutsche Bank, HSBC, Nomura, RBC, and TD Bank.[4] CAC ¶¶ 32-87. The Individual Defendants, who worked at various Dealer Defendants over time, are Hiren Gudka, who worked at Bank of America and Deutsche Bank; Bhardeep Singh Heer, who worked at Nomura; Amandeep Singh Manku, who worked at Bank of America, Crédit Agricole, and HSBC; Gary McDonald, who worked at Bank of America, Citi, and TD Bank; and Shailen Pau, who worked at RBC, Credit Suisse, and Crédit Agricole. CAC ¶¶ 88-94. In addition to the Individual Defendants, the CAC alleges that the conspiracy was also carried out by several other employees of the Dealer Defendants: [TEXT REDACTED BY THE COURT] **[*10]** CAC ¶ 124.

Plaintiffs allege that Defendants conspired to not compete against each other for the sale of USD SSA bonds to customers, and instead to cooperate to achieve prices and terms more favorable to them and worse for their customers. CAC ¶¶ 7, 12, 130. In support of this allegation, Plaintiffs quote from transcripts of over 150 chats and phone calls [TEXT REDACTED BY THE COURT][5] which they dub the "cooperation materials" that were produced by two settling Dealer Defendants (Bank of America and Deutsche Bank).[6] CAC ¶ 5, Pls.' Merits Opp'n 2, Doc. 424. Generally, the communications amongst these employees purport to show that, rather than compete for business, they were actively conspiring in real time to quote prices to potential customers that would steer the customer to one or another bank, among other things. The Court will not attempt to recount all the alleged conversations here, but rather provides the following representative examples:

[TEXT REDACTED BY THE COURT]
[TEXT REDACTED BY THE COURT]
[TEXT REDACTED BY THE COURT]
[TEXT REDACTED BY THE COURT]
[TEXT REDACTED BY THE COURT]
[TEXT REDACTED BY THE COURT]
[TEXT REDACTED BY THE COURT]
[TEXT REDACTED BY THE COURT]

[TEXT REDACTED BY **[*11]** THE COURT]
[TEXT REDACTED BY THE COURT]
[TEXT REDACTED BY THE COURT]

In December 2015, news broke that the U.S. Department of Justice had launched an investigation into collusion in the SSA bond market, which was followed by reports of investigations by the United Kingdom Financial Conduct Authority and the European Commission. CAC ¶¶ 315-320. Media reports and public filings indicated that Bank of America, Citi, Crédit Agricole, Credit Suisse, and Nomura were among those being investigated. CAC ¶¶ 317, 319.

---

[3] The Court will simply refer to "basis points" as a shorthand for this method of pricing.

[4] The CAC names as defendants numerous subsidiaries and affiliates of the Dealer Defendants, but for brevity's sake, the Court lists them here using the definitions employed in the CAC.

[5] [ILLEGIBLE FOOTNOTE]

[6] The CAC notes that "[t]he claims against Bank of America and Deutsche Bank are subject to a settlement agreement, but these parties are named herein because the settlements have not yet been finally approved, and these two Defendants have thus not yet been dismissed from the action." CAC ¶ 5 n.3.

In late 2015 or early 2016, "all or nearly all of the key participants in the cartel," including four of the five Individual Defendants, "were removed from their positions on the SSA bond trading desks" by their employers as a result of their alleged misconduct.[7] CAC ¶ 314.

Plaintiffs are the Iron Workers Pension Plan of Western Pennsylvania ("Iron Workers") and the Sheet Metal Workers Pension Plan of Northern California ("Sheet Metal Workers"). CAC ¶¶ 28-29. Plaintiffs seek to represent a class comprising "[a]ll persons or entities who, from January 1, 2005 to December 31, 2015 [the "Class Period"], directly entered into U.S.-dollar denominated SSA bond transactions with Defendants, **[*12]** or their respective subsidiaries or affiliates, in the United States or its territories or otherwise involving U.S. trade or commerce." CAC ¶ 404. Plaintiffs allege that at some point during the Class Period, one or both Plaintiffs transacted with six of the eleven Dealer Defendants for USD SSA bonds.[8] CAC ¶¶ 35, 39, 51, 60, 78, 85.

Plaintiffs do not allege that any of the approximately 150 cited chats referred to transactions to which they were a party. Instead, they allege that "the conspiracy was in operation on *every* transaction entered into by these Defendants during the Class Period," not just those associated with the chats summarized in the CAC. CAC ¶ 298. Consequently, they allege that USD SSA bond transactions with Defendants had prices that were artificially inflated or deflated across the board. CAC ¶¶ 307-308. In support of this theory, they cite several pieces of "academic literature" for the proposition that "less competition among dealers increases spreads and prices" paid by investors. CAC ¶ 303 (emphasis omitted). Although Plaintiffs have not specified the amount of their damages, they state that, among other methods, "damages can potentially be quantified by comparing **[*13]** the bid-ask spreads[9] paid by Class Members in the actual world (the world affected by the conspiracy) to the spreads paid on comparable instruments after the period of collusion ended," while controlling for other factors. CAC ¶ 312.

[TEXT REDACTED BY THE COURT]

B. Procedural Background

The first complaint in this case was filed on May 18, 2016, and was followed by several related actions. On August 22, 2016, the Court consolidated these and subsequent related actions under the above caption. Doc. 36. Ultimately, fourteen actions were consolidated, although some plaintiffs withdrew from the consolidated action or dismissed their action. *See* Docs. 304, 314. On December 22, 2016, the Court appointed Quinn Emanuel Urquhart & Sullivan, LLP and Robbins Geller Rudman & Dowd LLP as interim co-lead counsel in the consolidated action. Doc. 88.

On April 7, 2017, Plaintiffs filed a Consolidated Complaint. Doc. 130. Following their settlement with Deutsche Bank, Plaintiffs requested leave to file a Consolidated Amended Complaint ("CAC") on October 6, 2017, which the Court granted on November 3, 2017. Doc. 305. The CAC asserts a single cause of action for conspiracy to restrain trade in violation of **[*14]** *section 1 of the Sherman Act*, *15 U.S.C. § 1*. CAC ¶¶ 413-420. On December 12, 2017, Defendants moved to dismiss the CAC for lack of subject-matter jurisdiction, failure to state a claim, lack of personal jurisdiction, and improper venue. Docs. 342, 358, 365, 373, 376, 378. In March 2018, the Court preliminarily approved the settlement agreements staying proceedings between Plaintiffs and Bank of America, Deutsche Bank, and Gudka, and Plaintiffs voluntarily dismissed TD Securities Limited, a TD Bank subsidiary. Docs. 428, 430, 431, 448.

---

[7] The CAC does not allege that McDonald was suspended or terminated from his position, but it alleges that he has been inactive on the Financial Conduct Authority register for traders since March 2016. CAC ¶ 314 n.45.

[8] Plaintiffs allege that they transacted with Bank of America, Barclays, Citi, Credit Suisse, RBC, and TD Bank. CAC ¶¶ 35, 39, 51, 60, 78, 85. Plaintiffs do not allege that they transacted with BNP Paribas, Crédit Agricole, Deutsche Bank, HSBC, and Nomura, although they allege that putative class members did. CAC ¶¶ 45-48, 56-57, 65-75.

[9] A "bid-ask spread" or "bid-offer spread" is the difference, or margin, between a dealer's bid to buy a bond and the dealer's offer to sell the same bond. CAC ¶¶ 119-120.

II. Subject-Matter Jurisdiction

At the outset, the Court must address the question of standing under Article III of the Constitution.[10] In a footnote, the Dealer Defendants argue that Plaintiffs' failure to allege an injury-in-fact supporting antitrust standing means they have also failed to allege an injury-in-fact sufficient to support Article III standing.[11] Dealer Defs.' Merits Mem. 10 n.10, Doc. 347. That is incorrect because "the pleading standard for constitutional standing is lower than the standard for a substantive cause of action." *Harry v. Total Gas & Power N. Am., Inc., 889 F.3d 104, 110 (2d Cir. 2018)*.

"Article III of the Constitution limits the jurisdiction of federal courts to the resolution of 'cases' and 'controversies.'" *W.R. Huff Asset Mgmt. Co. v. Deloitte & Touche LLP, 549 F.3d 100, 106 (2d Cir. 2008)* (quoting *U.S. Const. art. III, § 2*). "To establish standing under Article III of the Constitution, a plaintiff **[*15]** must allege '(1) *injury-in-fact*, which is a concrete and particularized harm to a legally protected interest; (2) *causation* in the form of a fairly traceable connection between the asserted injury-in-fact and the alleged actions of the defendant; and (3) *redressability*, or a non-speculative likelihood that the injury can be remedied by the requested relief.'" *Total Gas, 889 F.3d at 110* (quoting *W.R. Huff, 549 F.3d at 106-07*).

It is important to note, however, that while "at the pleading stage, the plaintiff must 'clearly . . . allege facts demonstrating'" an injury-in-fact, *Spokeo, Inc. v. Robins, 136 S. Ct. 1540, 1547, 194 L. Ed. 2d 635 (2016)* (quoting *Warth v. Seldin, 422 U.S. 490, 518, 95 S. Ct. 2197, 45 L. Ed. 2d 343 (1975))*, "'[c]learly alleging' is a 'low[er] threshold' than that for 'sustaining a valid cause of action,'" *Total Gas, 889 F.3d at 110* (second alteration in original) (quoting *Ross v. Bank of Am., N.A. (USA), 524 F.3d 217, 222 (2d Cir. 2008))*. Put another way, while a plaintiff must show that a cause of action is "plausible" in order to state a claim, *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))*, "[f]or standing purposes, [it] is enough" to merely "place [the injury] within the realm of possibility," *Total Gas, 889 F.3d at 111*.[12]

Here, Plaintiffs allege that they were injured by Defendants who engaged in a conspiracy to not compete and to charge supracompetitive prices on every SSA bond transaction, including those that Plaintiffs entered into. CAC ¶¶ 130, 298. As will be explained, the Court finds this alleged **[*16]** injury too implausible to state an antitrust claim, but because it is "within the realm of possibility," it is sufficient to confer Article III standing on Plaintiffs. *Total Gas, 889 F.3d at 111*.

III. Failure to State a Claim[13]

---

[10] "A court proceeds to an antitrust standing analysis only after Article III standing has been established." *Ross v. Bank of Am., N.A. (USA), 524 F.3d 217, 222 n.1 (2d Cir. 2008)*.

[11] For this proposition, the Dealer Defendants cite the district court's decision in *Harry v. Total Gas & Power N. Am., Inc., 244 F. Supp. 3d 402, 420 n.13 (S.D.N.Y. 2017)*, *aff'd as modified*, *889 F.3d 104 (2d Cir. 2018)*, but this holding was subsequently rejected on modification by the Second Circuit, *Harry v. Total Gas & Power N. Am., Inc., 889 F.3d 104, 107 (2d Cir. 2018)*.

[12] To be sure, on a motion to dismiss, a plaintiff's allegations must "plausibly suggest that it has standing to sue." *Amidax Trading Grp. v. S.W.I.F.T. SCRL, 671 F.3d 140, 145 (2d Cir. 2011)*. But "at the pleading stage, 'general factual allegations of injury . . . may suffice,'" *John v. Whole Foods Mkt. Grp., Inc., 858 F.3d 732, 736 (2d Cir. 2017)* (quoting *Lujan v. Defs. of Wildlife, 504 U.S. 555, 561, 112 S. Ct. 2130, 119 L. Ed. 2d 351 (1992))*, to meet the "low threshold" of injury-in-fact under Article III, *id.* (quoting *WC Capital Mgmt., LLC v. UBS Secs., LLC, 711 F.3d 322, 329 (2d Cir. 2013))*.

[13] "Under the circumstances, the Court exercises its discretion to address [Defendants'] motion to dismiss for failure to state a claim before addressing personal jurisdiction" and venue. *In re London Silver Fixing, Ltd., Antitrust Litig., Nos. 14 MDL 2573, 14 Misc. 2573 (VEC), 332 F. Supp. 3d 885, 2018 U.S. Dist. LEXIS 124856, 2018 WL 3585277, at *5 n.5 (S.D.N.Y. July 25, 2018)*;

A. Legal Standard

"To survive a motion to dismiss, a complaint must contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" *Iqbal, 556 U.S. at 678* (quoting *Twombly, 550 U.S. at 570*). A claim is facially plausible "when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Id.* (citing *Twombly, 550 U.S. at 556*). The plaintiff must allege sufficient facts to show "more than a sheer possibility that a defendant has acted unlawfully." *Id.* (citing *Twombly, 550 U.S. at 556*). However, this "flexible 'plausibility standard'" is not a heightened pleading standard, *In re Elevator Antitrust Litig., 502 F.3d 47, 50 & n.3 (2d Cir. 2007)* (quoting *ATSI Commc'ns, Inc. v. Shaar Fund, Ltd., 493 F.3d 87, 98 n.2 (2d Cir. 2007))*, and "a complaint . . . does not need detailed factual allegations" to survive a motion to dismiss, *Twombly, 550 U.S. at 555*.

The question on a motion to dismiss "is not whether a plaintiff will ultimately prevail but whether the claimant is entitled to offer evidence to support the claims." *Sikhs for Justice v. Nath, 893 F. Supp. 2d 598, 615 (S.D.N.Y. 2012)* (quoting *Villager Pond, Inc. v. Town of Darien, 56 F.3d 375, 378 (2d Cir. 1995))*. "[T]he purpose of *Federal Rule of Civil Procedure 12(b)(6)* 'is to test, in a streamlined **[*17]** fashion, the formal sufficiency of the plaintiff's statement of a claim for relief without resolving a contest regarding its substantive merits'" or "weigh[ing] the evidence that might be offered to support it." *Halebian v. Berv, 644 F.3d 122, 130 (2d Cir. 2011)* (quoting *Global Network Commc'ns, Inc. v. City of New York, 458 F.3d 150, 155 (2d Cir. 2006))*. The Court therefore must ordinarily confine itself to the four corners of the complaint and look only to the allegations contained therein. *Id.* When ruling on a motion to dismiss pursuant to *Rule 12(b)(6)*, the Court accepts all factual allegations in the complaint as true and draws all reasonable inferences in the plaintiff's favor. *Nielsen v. Rabin, 746 F.3d 58, 62 (2d Cir. 2014)*; *see also* *Twombly, 550 U.S. at 556* ("[A] well-pleaded complaint may proceed even if it strikes a savvy judge that actual proof of those facts is improbable . . . .").

Likewise, "[t]here is no heightened pleading requirement in antitrust cases." *In re Crude Oil Commodity Futures Litig., 913 F. Supp. 2d 41, 54 (S.D.N.Y. 2012)*. However, "a plaintiff must do more than cite relevant antitrust language to state a claim for relief." *Wolf Concept S.A.R.L. v. Eber Bros. Wine & Liquor Corp., 736 F. Supp. 2d 661, 667 (W.D.N.Y. 2010)* (citing *Todd v. Exxon Corp., 275 F.3d 191, 198 (2d Cir. 2001))*. "A plaintiff must allege sufficient facts to support a cause of action under the antitrust laws. Conclusory allegations that the defendant violated those laws are insufficient." *Id. at 667-68* (quoting *Kasada, Inc. v. Access Capital, Inc., No. 01 Civ. 8893 (GBD), 2004 U.S. Dist. LEXIS 25257, 2004 WL 2903776, at *3 (S.D.N.Y. Dec. 14, 2004))*. "[A] bare bones statement of conspiracy or of injury under the antitrust laws without any supporting facts permits dismissal." **[*18]** *Id. at 668* (quoting *Heart Disease Research Found. v. Gen. Motors Corp., 463 F.2d 98, 100 (2d Cir. 1972))*.

B. Antitrust Standing

"*Section 4 of the Clayton Act* establishes a private right of action for violations of the federal antitrust laws," such as *section 1 of the Sherman Act*, and grants that right to "[a]ny person who [is] injured in his business or property by reason of anything forbidden in the antitrust laws." *Gatt Commc'ns, Inc. v. PMC Assocs., L.L.C., 711 F.3d 68, 75 (2d Cir. 2013)* (alterations in original) (quoting *15 U.S.C. § 15*). The right to pursue private actions is limited by the concept of "antitrust standing." *Id.* "[A]ntitrust standing is a threshold, pleading-stage inquiry and when a complaint by its terms fails to establish this requirement [the Court] must dismiss it as a matter of law." *Id.* (first alteration in original) (quoting *NicSand, Inc. v. 3M Co., 507 F.3d 442, 450 (6th Cir. 2007)* (en banc)). "In determining antitrust

---

see *Chevron Corp. v. Naranjo, 667 F.3d 232, 246 n.17 (2d Cir. 2012)* ("[I]n cases such as this one with multiple defendants—over some of whom the court indisputably has personal jurisdiction—in which all defendants collectively challenge the legal sufficiency of the plaintiff's cause of action, we may address first the facial challenge to the underlying cause of action and, if we dismiss the claim in its entirety, decline to address the personal jurisdictional claims made by some defendants."). Because Plaintiffs fail to state a claim, as will be explained, the Court declines to address personal jurisdiction and venue.

standing, [the Court] 'assume[s] the existence' of an antitrust violation."[14] Total Gas, 889 F.3d at 115 (quoting Gelboim v. Bank of Am. Corp., 823 F.3d 759, 770 (2d Cir. 2016)).

"To satisfy the antitrust standing requirement, a private antitrust plaintiff must plausibly allege that (i) it suffered an antitrust injury and (ii) it is an acceptable plaintiff to pursue the alleged antitrust violations."[15] In re Aluminum Warehousing Antitrust Litig., 833 F.3d 151, 157 (2d Cir. 2016). "To demonstrate antitrust injury, 'a plaintiff must show (1) an injury-in-fact; (2) that has been caused by the violation; and (3) that is the type of injury **[*19]** contemplated by the statute.'"[16] Arista Records LLC v. Lime Grp. LLC, 532 F. Supp. 2d 556, 568 (S.D.N.Y. 2007) (quoting Blue Tree Hotels Inv. (Can.), Ltd. v. Starwood Hotels & Resorts Worldwide, Inc., 369 F.3d 212, 220 (2d Cir. 2004)). "[T]o suffer antitrust injury, the putative plaintiff must be a participant in the very market that is directly restrained." Aluminum Warehousing, 833 F.3d at 161. "[U]nlike [government] agencies, [private] [p]laintiffs do not have the right to bring suit against any person they reasonably suspect has committed a certain sort of wrong. . . . Plaintiffs can only recover in a civil action if they can establish that *they themselves* have been harmed by [d]efendants' activities." Total Gas, 889 F.3d at 109-10 (emphasis added).

Plaintiffs claim they are injured because at some point during the Class Period, they transacted with certain Dealer Defendants for USD SSA bonds. CAC ¶¶ 35, 39, 51, 60, 78, 85. During that period, they argue, every USD SSA bond transaction with the Dealer Defendants closed at a price that was artificially inflated or deflated by the antitrust conspiracy. CAC ¶¶ 298, 307-308. They point to numerous chat logs evincing collusive behavior, but they do not allege that any of these chats referred to transactions to which they were a party. Pls.' Merits Opp'n 2-3, 5. Instead, Plaintiffs contend that these chats were "mere **[*20]** examples" of acts in furtherance of a continuous conspiracy that infected "each and every" transaction. Pls.' May 21, 2018 Letter 2, Doc. 488 (emphases omitted); Pls.' Merits Opp'n 3; CAC ¶¶ 20, 298, 307.

However, absent other allegations showing injury, courts have found no injury where the plaintiffs failed to allege any specific transactions that they entered into that harmed them through the defendants' misconduct. *See* Harry v. Total Gas & Power N. Am., Inc., 244 F. Supp. 3d 402, 416 (S.D.N.Y. 2017) ("The plaintiffs' failure to allege a single specific transaction that lost value as a result of the defendants' alleged misconduct precludes a plausible allegation of actual injury."), *aff'd as modified on other grounds*, 889 F.3d 104 (2d Cir. 2018); Precision Assocs., Inc. v. Panalpina World Transp. (Holding) Ltd., No. 08 Civ. 42 (JG) (VVP), 2011 U.S. Dist. LEXIS 51330, 2011 WL 7053807, at *11 (E.D.N.Y. Jan. 4, 2011) (finding no injury where plaintiffs failed to allege that they purchased freight forwarding services on the specific routes with allegedly anticompetitive surcharges), *report and recommendation adopted*, 2012 U.S. Dist. LEXIS 113829, 2012 WL 3307486 (E.D.N.Y. Aug. 13, 2012). Here, Plaintiffs have not alleged any specific transactions that had an artificially unfavorable price that injured them.[17]

---

[14] As will be explained, because Plaintiffs fail to plausibly allege antitrust standing, the Court need not address whether Plaintiffs have adequately alleged a conspiracy in violation of the antitrust laws. *Cf.* Concord Assocs., L.P. v. Entm't Props. Tr., No. 12 Civ. 1667 (ER), 2013 U.S. Dist. LEXIS 186964, 2014 WL 1396524, at *10 n.7 (S.D.N.Y. Apr. 9, 2014) ("Since the Court may dismiss the Amended Complaint on the basis of [p]laintiffs' failure to allege a relevant market, it will not address whether [p]laintiffs have adequately alleged conduct in violation of the antitrust laws."), *aff'd*, 817 F.3d 46 (2d Cir. 2016).

[15] The suitability of the plaintiff is often described as whether the plaintiff is an "efficient enforcer" of the antitrust laws. In re Aluminum Warehousing Antitrust Litig., 833 F.3d 151, 157-58 (2d Cir. 2016).

[16] "While some courts speak of 'antitrust injury' comprehensively to include" all three of these elements, the third element specifically is sometimes referred to as "antitrust injury." 2A Phillip E. Areeda, Herbert Hovenkamp, et al., ***Antitrust Law****: An Analysis of Antitrust Principles and Their Application* ¶ 337a, at 99-100 (4th ed. 2014).

[17] Although absent putative class members may have been counterparties to and injured by manipulated transactions referenced in the chat logs, this is insufficient to establish injury to the named Plaintiffs. *See* W.R. Huff, 549 F.3d at 106 n.5 ("[N]amed plaintiffs in a class action 'must allege and show that they personally have been injured, not that injury has been suffered by other, unidentified members of the class to which they belong and which they purport to represent.'" (emphasis omitted) (quoting Warth, 422 U.S. at 502)).

The closest Plaintiffs come to alleging a specific transaction is one occasion where [TEXT REDACTED BY THE COURT] CAC ¶ 264. Even assuming this chat shows manipulation of the market for [TEXT REDACTED BY THE COURT] bonds, **[*21]** "[t]he fact that Plaintiff[] may have traded in the same 24 hour period as traders . . . discussed manipulation . . . is simply too thin a basis for the Court to infer that it is plausible that the traders' employers caused the Plaintiff[] actual damages."[18] *In re London Silver Fixing, Ltd., Antitrust Litig., Nos. 14 MDL 2573, 14 Misc. 2573 (VEC), 332 F. Supp. 3d 885, 2018 U.S. Dist. LEXIS 124856, 2018 WL 3585277, at *27 n.36 (S.D.N.Y. July 25, 2018)*.

"That is not to say that Plaintiffs must *necessarily* allege 'the specific transactions on which they were injured.'" *2018 U.S. Dist. LEXIS 124856, [WL] at *25 n.34* (emphasis added) (quoting *In re Foreign Exch. Benchmark Rates Antitrust Litig., No. 13 Civ. 7789 (LGS), 2016 U.S. Dist. LEXIS 128237, 2016 WL 5108131, at *20 (S.D.N.Y. Sept. 20, 2016))*. "Although information regarding particular transactions is a straightforward method of pleading actual damages, it is not the only means of doing so. Among other things, statistical analysis of market prices and quotes or allegations based on government enforcement actions may suffice to allege the expected impact of a manipulative tactic on a given market and the expected frequency of manipulation."[19] *Id.*

However, Plaintiffs have provided no such statistical analyses. They point to "academic literature" for the unsurprising theory that "less competition among dealers increases spreads and prices" paid by investors. CAC ¶ 303 (emphasis omitted). But they provide no analysis showing that this theory **[*22]** was actually borne out by the alleged collusion in the SSA bond market and yielded higher prices on their own trades.[20] Indeed, they acknowledge that "damages can potentially be quantified by comparing the bid-ask spreads paid by Class Members in the actual world (the world affected by the conspiracy) to the spreads paid on comparable instruments after the period of collusion ended," while controlling for other factors.[21] CAC ¶ 312. Plaintiffs have provided no such comparison of spreads paid during and after the period of collusion.[22] And although Plaintiffs cite media reports confirming the existence of government investigations into collusion in the SSA bond market, none of those reports purport to show any impact of the manipulation on the market or the manipulation's scope to suggest that Plaintiffs' prices were among those affected. CAC ¶¶ 315-320. Because "Plaintiffs do not even present evidence that they traded at 'artificial prices,'" they have alleged "no actual injury . . ., let alone a connection between Defendants' unlawful conduct and that non-injury." *Total Gas, 889 F.3d at 116*.

---

[18] The requirement of "actual damages" or "actual injury" under the *Commodity Exchange Act* is similar to the requirement of injury-in-fact under the *Clayton Act*. *Total Gas, 889 F.3d at 111, 115-16* (holding that the plaintiffs satisfied neither for similar reasons).

[19] To be sure, pleading an "actual adverse effect in the marketplace" or "harm to competition [is] not required to withstand a motion to dismiss when the conduct challenged is a *per se* violation." *Gelboim, 823 F.3d at 775-76*; *see generally* *Capital Imaging Assocs., P.C. v. Mohawk Valley Med. Assocs., Inc., 996 F.2d 537, 542 (2d Cir. 1993)* (stating that *per se* violations, such as horizontal and vertical pricefixing, "are so plainly harmful to competition and so obviously lacking in any redeeming pro-competitive values that they are 'conclusively presumed illegal without further examination'" (quoting *Broad. Music, Inc. v. Columbia Broad. Sys., Inc., 441 U.S. 1, 8, 99 S. Ct. 1551, 60 L. Ed. 2d 1 (1979))*). But regardless of any *per se* violation, Plaintiffs are still required to plausibly allege harm to *them*, and one way of doing so is through an analysis of market prices.

[20] Plaintiffs admit that "there is no literature (yet) studying the precise effect that Defendants' reduction of competition had in the USD SSA bond market." Pls.' Merits Opp'n 48.

[21] The alleged collusion appears to be over or at least significantly reduced since "all or nearly all of the key participants in the cartel were removed from their positions" in late 2015 or early 2016 as their employers and government investigators became aware of the conspiracy. CAC ¶ 314.

[22] While the Court "do[es] not require that a plaintiff calculate damages at the pleading stage, [it] certainly need[s] some reason to believe that any damage has occurred at all." *Total Gas, 889 F.3d at 115*.

Plaintiffs essentially ask this Court to infer, based on approximately 150 chats allegedly showing manipulated transactions **[*23]** with unknown counterparties over the course of eleven years,[23] that Plaintiffs' individually negotiated transactions with the Dealer Defendants during that period must have likewise been tainted and injured them. Pls.' Merits Opp'n 2-3. This, by itself, is insufficient for the Court to reasonably draw such an inference. *See* *London Silver Fixing, 2018 U.S. Dist. LEXIS 124856, 2018 WL 3585277, at *25 n.34* (rejecting "[p]laintiffs' theory . . . that the Court can infer from the chat messages and government enforcement proceedings both that the chat messages are the 'tip of the iceberg' and, that given this presumed frequency of manipulation, [p]laintiffs must have been injured"); *cf.* *In re LIBOR-Based Fin. Instruments Antitrust Litig., 962 F. Supp. 2d 606, 623 (S.D.N.Y. 2013)* (rejecting the argument that alleged "manipulation was so constant that plaintiffs adequately plead actual damages by alleging merely that they traded during the Class Period" where allegations indicated that manipulation occurred between approximately 10% to 20% of the time over a four-year period).[24]

Accordingly, because Plaintiffs have not plausibly alleged that they themselves were injured by the alleged conspiracy, their antitrust claim must be dismissed.

IV. Leave to Amend

Federal Rule of Civil Procedure 15 instructs courts to "freely give leave [to amend a pleading] when justice **[*24]** so requires." *Fed. R. Civ. P. 15(a)(2)*. The Second Circuit has instructed courts not to dismiss a complaint "without granting leave to amend at least once when a liberal reading of the complaint gives any indication that a valid claim might be stated." *Shabazz v. Bezio, 511 F. App'x 28, 31 (2d Cir. 2013)* (quoting *Shomo v. City of New York, 579 F.3d 176, 183 (2d Cir. 2009))*. In *Loreley Financing (Jersey) No. 3 Ltd. v. Wells Fargo Securities, LLC, 797 F.3d 160 (2d Cir. 2015)*, the Second Circuit reaffirmed the "liberal spirit" of *Rule 15* and counseled strongly against the dismissal of claims with prejudice prior to "the benefit of a ruling" that highlights "the precise defects" of those claims. *Id. at 190-91* (quoting *Williams v. Citigroup Inc., 659 F.3d 208, 214 (2d Cir. 2011)* (per curiam)).

Here, although Plaintiffs have already had the opportunity to amend their original complaint, because this is the Court's first opportunity to highlight the precise defects of Plaintiffs' pleading and it is not yet apparent that another opportunity to amend would be futile, the Court will permit Plaintiffs to replead their dismissed claims.

V. Conclusion

---

[23] [TEXT REDACTED BY THE COURT] Plaintiffs ask the Court to infer that the depicted conduct took place continuously over an eleven-year Class Period. CAC ¶¶ 5, 404.

[24] Plaintiffs urge the Court to infer that their transactions with the Dealer Defendants injured them because Defendants' "agreement not to compete is illegal *per se.*" Pls.' Merits Opp'n 45. "For standing purposes, however, whether there was or was not a *per se* violation is irrelevant." *Balaklaw v. Lovell, 14 F.3d 793, 800 (2d Cir. 1994)*; *see also* *Atl. Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 341-42, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)* ("The *per se* rule is a method of determining whether *§ 1 of the Sherman Act* has been violated, but it does not indicate whether a private plaintiff has suffered antitrust injury . . . ."). "Regardless of any substantive violation of the *Sherman Act*," Plaintiffs must still plausibly allege that Defendants "engaged in anticompetitive conduct that caused them an antitrust injury." *Balaklaw, 14 F.3d at 800*. Plaintiffs rely on *New York v. Hendrickson Bros., 840 F.2d 1065 (2d Cir. 1988)*, which held that "[i]n general, the person who has purchased directly from those who have fixed prices at an artificially high level in violation of the antitrust laws is deemed to have suffered the antitrust injury," but that case is not to the contrary. *Id. at 1079*. Plaintiffs must still plausibly allege that the prices that *they* paid were fixed at an artificially high level. *See* *Arista Records, 532 F. Supp. 2d at 568-69* ("Although such a horizontal price-fixing arrangement is *per se* unlawful under *§ 1 of the Sherman Act*, [counter-plaintiff] has not established that *it* suffered injury-in-fact as a result of counter-defendants' purported arrangement." (citation and footnote omitted)).

The Court GRANTS Defendants' motions to dismiss for failure to state a claim because Plaintiffs have failed to plausibly allege an injury-in-fact sufficient to establish antitrust standing.[25] The Clerk of the Court is respectfully directed to terminate the motions, Docs. 342, 344, 358, 365, 373, 376, 378, 406, 453, 468. Plaintiffs may file a second consolidated **[*25]** amended complaint, if at all, on or before **October 23, 2018**. If Plaintiffs elect to not file a second consolidated amended complaint, they may apply to the Court for entry of judgment any time before then.

It is SO ORDERED.

Dated: August 24, 2018

New York, New York

Counsel: **[*1]** For Ian Michael Smith, Eileen A. Smith, Plaintiffs: Anthony Paul Cara, Peter L Nisson, LEAD ATTORNEYS, CDLG PC, Costa Mesa, CA.

For Ditech Financial LLC, Defendant: Stuart B Wolfe, LEAD ATTORNEY, Wolfe and Wyman LLP, Irvine, CA; Matthew S. Vesterdahl, Wolfe and Wyman LLP, Irvine, CA.

For Select Portfolio Servicing, Inc., Defendant: Stephen C Chuck, LEAD ATTORNEY, Victoria J Tsoong, Chuck and Tsoong LLP, Glendale, CA.

Judges: JESUS G. BERNAL, UNITED STATES DISTRICT JUDGE.

Opinion by: JESUS G. BERNAL

Opinion

CIVIL MINUTES—GENERAL

Proceedings: Order (1) GRANTING Defendants' Motions to Dismiss (Dkt. Nos. 6, 10) Pursuant to *Federal Rules of Civil Procedure 12(b)(6)*; (2) GRANTING Defendant Ditech Financial LLC's Request for Judicial Notice (Dkt. No. 6-1); (4) GRANTING-IN-PART AND DENYING-IN-PART Defendant Select Portfolio Servicing, Inc.'s Request for Judicial Notice (Dkt. No. 11) (IN CHAMBERS)

Before the Court are Defendants' Ditech Financial LLC ("Ditech") and Select Portfolio Servicing, Inc. ("Select Portfolio") motions to dismiss under *Rule 12(b)(6)* and requests for judicial notice under *Federal Rule of Evidence 201*. After considering all papers filed in support of, and in opposition to, the motions the Court considers these matters appropriate for resolution without a hearing. See *Fed. R. Civ. P. 78*; *L.R. 7-15*. On August 23, **[*2]** 2017, the Court vacated the August 27, 2018 hearing and took the matter under submission. (Dkt. No. 16.) The Court GRANTS the Defendants' Motions and DISMISSES Plaintiffs' Complaint WITH LEAVE TO AMEND.

I. BACKGROUND

On May 30, 2018, Plaintiffs Ian Michael Smith and Eileen A. Smith ("Plaintiffs") filed a complaint in the Superior Court of California, County of San Bernardino against Ditech Financial LLC; Select Portfolio Servicing, Inc.; The Bank of New York Mellon f/k/a The Bank of New York as Trustee for the Certificateholders of CWABS Inc., Asset-Backed Certificates, Series 2007-2; and Does 1-10. ("Complaint," Dkt. No. 1-1.) On July 2, 2018, Defendants removed the case. (Dkt. No. 1.) Defendant Ditech Financial LLC filed a motion to dismiss on July 9, 2018 ("Ditech Motion," Dkt. No. 6). Ditech also filed a request for judicial notice. ("Ditech RJN," Dkt. No. 6-1.) Defendant Select Portfolio Servicing filed a motion to dismiss on July 27, 2018. ("Select Portfolio Motion," Dkt. No. 10.) Select Portfolio also requested judicial notice. ("Select Portfolio RJN," Dkt. No. 11.)[1] On August 6, 2018, Plaintiffs filed an Opposition to the Select Portfolio Motion. ("Select Portfolio Opposition," **[*3]** Dkt. No. 13.) Plaintiffs, through inadvertence, did not file their Opposition to the Ditech Motion until August 20, 2018. ("Ditech Opposition," Dkt. No. 14.) Select Portfolio filed its reply on August 20, 2018. ("Select Portfolio Reply," Dkt. No. 15.) Ditech filed its reply on August 23, 2018.[2] ("Ditech Reply," Dkt. No. 19.)

II. FACTUAL ALLEGATIONS

In their Complaint, Plaintiffs allege five causes of action against Defendants: (1) violation of *California Civil Code § 2923.5*; (2) violation of *California Civil Code § 2924.11*; (3) violation of *California Civil Code § 2923.7*; (4) negligence; and (5) violation of *California Business and Professions Code §§ 17200, et seq.*

Plaintiffs own and reside at real property known as 8323 Helms Avenue, Rancho Cucamonga, CA 91730 ("Subject Property"). (Compl. ¶ 1.) The Subject Property is owner-occupied, and Plaintiffs have lived there since the date of purchase. (Id. ¶ 10.) Plaintiffs obtained a mortgage loan from Countrywide Home Loans, Inc. for $424,000 on or about February 23, 2007. (Id. ¶ 9.) The Deed of Trust was recorded in the San Bernardino County Recorder's Office on March 2, 2007. (Id.)

On or about September 16, 2011 an Assignment of Deed of Trust was recorded that transferred beneficial interest in the Deed of Trust to Bank of New York Mellon. (Id. ¶ 11.) Ditech previously serviced the mortgage **[*4]** loan account under the directive of the beneficiary Bank of New York Mellon. (Id. ¶ 12.) Select Portfolio currently services the loan. (Id. ¶ 13.)

With the help of a non-profit agent, Plaintiffs submitted "a complete request for a loan modification application"[3] with Ditech on or about April 26, 2017. (Id. ¶ 14.) As Plaintiffs and their agent tried to obtain information on this request, they were unable to get real updates because no one at Ditech was familiar with their file. (Id. ¶ 15.) Plaintiffs and their agent spoke with several people who were unable to even locate an authorization letter to speak with Plaintiffs' agent. (Id. ¶ 41.) Defendants' employees never identified themselves as a person or team that was a Single Point of Contact, and they never provided useful information that would indicate the loan was actually being reviewed. (Id. ¶ 42.) On or about May 4, 2017, Plaintiffs were told that no Single Point of Contact was assigned to their file. (Id. ¶ 16.) Plaintiffs believed they were being reviewed for a possible loan modification. (Id. ¶ 31.) But on August 14,

---

[1] Select Portfolio Motion and Select Portfolio RJN are identical documents. Counsel for Select Portfolio submitted the document twice.

[2] Ditech argues that the Court should deem the Ditech Motion unopposed as Plaintiffs' Ditech Opposition was filed late. (Ditech Reply at 1.) The Court declines to do so. Furthermore it would be unnecessary because the Court grants Ditech's motion and dismisses Plaintiffs' Complaint.

[3] Plaintiffs presumably meant to say they submitted a complete loan modification application.

2017, after review had dragged for months without any real update, Plaintiffs were advised that Ditech no longer **[*5]** serviced their loan as it had been transferred to Select Portfolio for servicing. (Id. ¶¶ 17-18.) Plaintiffs have yet to receive a denial letter or other update on this review. (Id. ¶ 19.)

On or about January 24, 2018, Defendants recorded a Notice of Default without prior notice to Plaintiffs. (Id. ¶ 21.) Despite recitations in the Notice of Default that the servicer exercised due diligence in contacting the borrower regarding foreclosure alternatives, Select Portfolio never sent any written notifications concerning foreclosure alternatives before it recorded the Notice of Default. (Id. ¶¶ 22-23.) Defendants continued the projection of sale and recorded a Notice of Sale which projected a sale date of June 4, 2018. (Id. ¶ 24.)

III. REQUEST FOR JUDICIAL NOTICE

Together with its motion to dismiss, Ditech filed a request for judicial notice asking the Court to take notice of seven exhibits, all of which are recorded in the Official Records of the County of San Bernardino. (Ditech RJN.) Included in those exhibits are (1) a Long Form Deed of Trust and Assignment of Rents for Home Equity Revolving Line of Credit on June 8, 2006 (exh. 1); (2) a Deed of Trust recorded on March 2, 2007 (exh. 2); **[*6]** (3) Assignment of Deed of Trust recorded on September 16, 2011 (exh. 3); (4) Loan Modification Agreement recorded on October 20, 2011 (exh. 4); (5) Deed of Trust (Keep Your Home California Program) recorded on December 23, 2014 (exh. 5); (6) Notice of Default recorded on January 24, 2018 (exh. 6); and (7) Notice of Trustee's Sale recorded on May 1, 2018 (exh. 7). Plaintiffs do not oppose these requests.

Pursuant to *Federal Rule of Evidence 201*, "[a] court shall take judicial notice if requested by a party and supplied with the necessary information." *Fed. R. Evid. 201(d)*. "A judicially noticed fact must be one not subject to reasonable dispute in that it is . . . capable of accurate and ready determination by resort to sources whose accuracy cannot reasonably be questioned." *Fed. R. Evid. 201(b)*. Judicial notice is appropriate for "materials incorporated into the complaint or matters of public record." *Coto Settlement v. Eisenberg, 593 F.3d 1031, 1038 (9th Cir. 2010)*. However, a court may not take judicial notice of a disputed fact in a public record. *Lee v. City of Los Angeles, 250 F.3d 668, 689 (9th Cir. 2001)*.

The Court finds it appropriate to take judicial notice of the seven above-referenced documents because they are matters of public record. But the Court does not notice any disputed underlying facts in these exhibits. The Court GRANTS Ditech's request for judicial notice. **[*7]**

Select Portfolio requests judicial notice for the documents listed in items (2), (6), and (7) above. (Select Portfolio RJN at 2.) Select Portfolio further requests that the Court take judicial notice of certain underlying facts in those documents. The Court may not take judicial notice of those facts in a public record that are disputed by the parties. See *Lee, 250 F.3d at 689*. The Court takes judicial notice for these documents themselves, but will not recognize the underlying facts to the extent they remain in dispute. Finally, Select Portfolio requests judicial notice for the fact that "[s]ubsequent to the origination of the Loan, in or around July 2017, [Select Portfolio] acquired the servicing rights to the Loan." Id. Select Portfolio provides no documentation to show that this fact is capable of accurate and ready determination by resort to sources whose accuracy cannot be reasonably questioned. For the reasons articulated above, the Court GRANTS IN PART and DENIES IN PART Select Portfolio's request for judicial notice.

IV. MOTION TO DISMISS

A. Legal Standard

Under *Federal Rule of Civil Procedure 12(b)(6)* ("*Rule 12(b)(6)*"), a party may bring a motion to dismiss for failure to state a claim upon which relief can be granted. *Rule 12(b)(6)* must be read in conjunction with *Federal Rule of Civil Procedure 8(a)*, which requires a **[*8]** "short and plain statement of the claim showing that a pleader is entitled to relief," in order to give the defendant "fair notice of what the claim is and the grounds upon which it rests." *Bell*

Atlantic Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007); see Horosny v. Burlington Coat Factory, Inc., No. 15-05005, 2015 U.S. Dist. LEXIS 179419, 2015 WL 12532178, at *3 (C.D. Cal. Oct. 26, 2015). When evaluating a Rule 12(b)(6) motion, a court must accept all material allegations in the complaint — as well as any reasonable inferences to be drawn from them — as true and construe them in the light most favorable to the non-moving party. See Doe v. United States, 419 F.3d 1058, 1062 (9th Cir. 2005); ARC Ecology v. U.S. Dep't of Air Force, 411 F.3d 1092, 1096 (9th Cir. 2005); Moyo v. Gomez, 32 F.3d 1382, 1384 (9th Cir. 1994).

"While a complaint attacked by a Rule 12(b)(6) motion to dismiss does not need detailed factual allegations, a plaintiff's obligation to provide the 'grounds' of his 'entitlement to relief' requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do." Twombly, 550 U.S. at 555 (citations omitted). Rather, the allegations in the complaint "must be enough to raise a right to relief above the speculative level." Id.

To survive a motion to dismiss, a plaintiff must allege "enough facts to state a claim to relief that is plausible on its face." Twombly, 550 U.S. at 570; Ashcroft v. Iqbal, 556 U.S. 662, 129 S. Ct. 1937, 1949, 173 L. Ed. 2d 868 (2009). "The plausibility standard is not akin to a 'probability requirement,' but it asks for more than a sheer possibility that a defendant has acted unlawfully. Where a complaint pleads facts that **[*9]** are 'merely consistent with' a defendant's liability, it stops short of the line between possibility and plausibility of 'entitlement to relief.'" Iqbal, 556 U.S. at 678 (quoting Twombly, 550 U.S. at 556). The Ninth Circuit has clarified that (1) a complaint must "contain sufficient allegations of underlying facts to give fair notice and to enable the opposing party to defend itself effectively," and (2) "the factual allegations that are taken as true must plausibly suggest an entitlement to relief, such that it is not unfair to require the opposing party to be subjected to the expense of discovery and continued litigation." Starr v. Baca, 652 F.3d 1202, 1216 (9th Cir. 2011).

B. Discussion

1. Tender Rule

As a preliminary matter, Select Portfolio contends that Plaintiffs cannot state a claim for any of their five causes of action because they did not allege that they made a valid tender. (Select Portfolio Mot. at 3.) Defendants argue the tender requirement applies to any cause of action "implicitly integrated" with allegations of an irregular foreclosure sale. Arnolds Mgmt. Corp. v. Eischen, 158 Cal. App. 3d 575, 578-79, 205 Cal. Rptr. 15 (1984).

The tender rule is an equitable doctrine meant to prevent courts "from uselessly setting aside a foreclosure sale on a technical ground when the party making the challenge has not established his ability to purchase the property." **[*10]** MacFarland v. JP Morgan Chase Bank, 2014 WL 1405968, at *12 (C.D. Cal. 2014) (citing Plastino v. Wells Fargo Bank, 873 F.Supp.2d 1179, 1187 (N.D. Cal. 2012)). Thus, "as a precondition to challenging a foreclosure sale, or any cause of action implicitly integrated to the sale, the borrower must make a valid and viable tender of payment of the secured debt." Sacchi v. Mortgage Elec. Registration Sys., Inc., 11-cv-1658—AHM, 2011 U.S. Dist. LEXIS 68007, 2011 WL 2533029, at *9 (C.D. Cal. June 24, 2011) (quotation omitted). However, "the exceptions and qualifications to California's 'tender rule' counsel against such a mechanical application of the rule at the pleading stage." MacFarland, 2014 WL 1405968, at *12 (quoting Barrionuevo v. Chase Bank, N.A., 885 F. Supp. 2d 964, 969 (N.D. Cal. 2012)). Thus, the tender rule has exceptions. Tamburri v. Suntrust Mortg., Inc., 11-cv-2899-EMC, 2011 U.S. Dist. LEXIS 144442, 2011 WL 6294472, at *3 (N.D. Cal. Dec. 15, 2011).

California courts have held that tender is not required "where it would be inequitable to impose such a condition on the party challenging the sale." Lona v. Citibank, N.A., 202 Cal. App. 4th 89, 113, 134 Cal. Rptr. 3d 622 (2011). Courts have applied this equitable exception to cases in which a borrower asserts that the loan servicer flouted certain statutory or regulatory procedural requirements intended to protect the borrower—such as the requirements of California Civil Code § 2923.5—by conducting the trustee's sale without first following those procedural requirements. See Fonteno v. Wells Fargo Bank, N.A., 228 Cal. App. 4th 1358, 1373, 176 Cal. Rptr. 3d 676 (2014);

Pfeifer v. Countrywide Home Loans, Inc., 211 Cal. App. 4th 1250, 1280, 150 Cal. Rptr. 3d 673 (2012); Mabry v. Superior Court, 185 Cal. App. 4th 208, 225-26, 110 Cal. Rptr. 3d 201 (2010). "It would be inequitable to require tender" in such circumstances "because it would defeat the salient purpose of the [procedural **[*11]** requirements], to prevent foreclosures." Fonteno, 228 Cal. App. 4th at 1373.

Here, Plaintiffs seek to prevent a foreclosure sale they allege would violate California Civil Code Sections 2923.5, 2923.7, and 2923.11. (See generally Compl.) Thus, it would be inequitable to require tender under such circumstances because Plaintiffs seek relief under statutory provisions with the purpose of preventing foreclosure.

The Court is unpersuaded by Select Portfolio's arguments. The Court DENIES Select Portfolio's motion to the extent it relies on the tender rule.

2. Violation of California Civil Code § 2923.5

In their first cause of action, Plaintiffs allege that Defendants violated California Civil Code § 2923.5. (Compl. ¶¶ 20-26.) Section 2923.5 provides that "[a] mortgage servicer, mortgagee, trustee, beneficiary, or authorized agent may not record a notice of default pursuant to Section 2924 until . . . [e]ither 30 days after initial contact is made as required by paragraph (2) or 30 days after satisfying the due diligence requirements as described in subdivision (e)." Cal. Civ. Code § 2923.5(a)(1)(A). Paragraph 2 requires, among other things, that a mortgage servicer "contact the borrower in person or by telephone in order to assess the borrower's financial situation and explore options for the borrower to avoid foreclosure." Id. § 2923.5(a)(2). Subdivision (e) defines the circumstances under which a mortgage servicers' "due diligence" can excuse a **[*12]** failure to contact the borrower. Id. § 2923.5(e). To state a claim under Section 2923, a plaintiff must allege that he suffered prejudice as a result of the defendant's failure to provide the requisite notice. Hart v. Select Portfolio Servicing, Inc., No. CV 15-7953-R, 2015 U.S. Dist. LEXIS 165152, 2015 WL 8374926, at *1 (C.D. Cal. Dec. 9, 2015).

Here, Plaintiffs allege that Defendants recorded the Notice of Default on the Subject Property without satisfying the contact or due diligence requirements of § 2923.5. (Compl. ¶¶ 22-25.) The Notice of Default was recorded on January 24, 2018. (Ditech RJN Ex. 6.) Defendants contend that Plaintiffs' claim fails because the allegations that Defendants did not contact Plaintiffs to explore foreclosure alternatives are conclusory. (Ditech Mot. at 5; Select Portfolio Mot. at 4.) Although the Court takes notice of the Notice of Default in which Select Portfolio declares it contacted Plaintiffs, this disputed fact is not established by taking such notice. See Lee, 250 F.3d at 689. Thus, the Notice of Default cannot conclusively establish that Defendants made contact with Plaintiffs. However, to state a claim Plaintiffs still must allege more than a bald assertion that the declaration was false. See Asturias v. Nationstar Mortg. LLC, 2016 U.S. Dist. LEXIS 54366, 2016 WL 1610963, at *4 (N.D. Cal. Apr. 22, 2016). Here, Plaintiffs allege facts beyond a bald assertion of the declaration's falsity. **[*13]** Plaintiffs allege they were not provided with any written notifications respecting foreclosure alternatives and that Select Portfolio never reached out to them to fulfill the contact requirement (Compl. ¶¶ 22-23). Section 2923.5(a)(1)(A), however, requires that a mortgage servicer either make contact with Plaintiffs or satisfy the due diligence requirements under Section 2923.5(e). Plaintiffs do not allege facts that make plausible their assertion that Defendants did not comply with the due diligence alternatives in Section 2923.5(e). Accordingly, even though Plaintiffs plausibly allege that Defendants did not contact them, they do not plausibly allege that Defendants failed to comply with the due diligence alternatives.

Defendants further contend that even if they violated section 2923.5, Plaintiffs fail to allege that the violation was material because Plaintiffs do not allege they were damaged or prejudiced, as no foreclosure sale has yet occurred. (Ditech Mot. at 5; Select Portfolio Mot. at 5). Where the foreclosure sale has not yet occurred, Section 2924.12(a)(1) permits a homeowner to sue for injunctive relief to enjoin a material violation of Section 2923.5. This injunction remains until the court determines that the mortgage servicer has corrected and remedied the violations giving **[*14]** rise to the action. Cal. Civ. Code § 2924.12(a)(2). Only after a deed upon sale is recorded will the mortgage servicer face liability for actual economic damages resulting from a violation of Section 2923.5. Id. ¶ 2924.12(b). Here, Plaintiffs do not allege that Defendants have sold the Subject Property. Thus, they cannot state a claim for damages resulting from a material violation of Section 2923.5. Additionally, Plaintiffs do not allege facts in their first cause of action that the alleged violation of *Section 2923.5* was material in the impending foreclosure sale of the Subject Property. (See Compl. ¶¶ 20-26.) Although Plaintiffs allege Defendants projected a sale date of the Subject Property (Id. ¶ 24), they do not allege facts that, if true, establish that the violation of *Section 2923.5* was material to the foreclosure proceedings. For example, Plaintiffs do not allege that this particular violation denied them the opportunity to obtain a loan modification. See, e.g., *Shumake v. Caliber Home Loans, Inc., 2017 U.S. Dist. LEXIS 2928, 2017 WL 1362681, at *6 (C.D. Cal. Jan. 6, 2017)* (citing *Foote v. Wells Fargo Bank, N.A., 2016 U.S. Dist. LEXIS 65019, 2016 WL 2851627, at *6 (N.D. Cal. May 16, 2016))*.

Finally, Ditech further contends that it cannot provide the sole remedy available to Plaintiffs under the statute. (Ditech Mot. at 4-5.) The Court agrees. As addressed above, the sole remedy for a pre-sale violation of *Section 2923.5* is injunctive relief. *Cal. Civ. Code ¶ 2924.12(b)*. This remedy only postpones **[*15]** a foreclosure sale to permit the violating mortgage servicer to comply with the communication requirements. *Mabry v. Superior Court, 185 Cal. App. 4th 208, 214, 110 Cal. Rptr. 3d 201 (2010)* (superseded by statute on other grounds). Here, Plaintiffs allege that Ditech is a former mortgage servicer. (Compl. ¶ 12.) Thus, Ditech cannot provide the injunctive remedy Plaintiffs seek.

For the reasons above, Plaintiffs fail to state a claim for violation of *California Civil Code Section 2923.5*. The Court GRANTS Defendants' motions to dismiss the first cause of action.

3. Violation of ***California Civil Code § 2924.11***

In their second cause of action, Plaintiffs allege that Defendants violated *California Civil Code Section 2924.11*. (Compl. ¶¶ 27-36.) *Section 2924.11(a)* prohibits a financial institution from recording a notice of sale while a loan modification application is under review. *Bevia v. Select Portfolio Servicing, Inc., 2018 U.S. Dist. LEXIS 134209, 2018 WL 3740524, at *3 (C.D. Cal. Jun. 7, 2018)* (citing *Haynish v. Bank of America, N.A., 2018 U.S. Dist. LEXIS 91274 ,2018 WL 2445516, at *5 (N.D. Cal. May 31, 2018))*. *Section 2924.11(a)* states:

> If a borrower submits a complete application for a foreclosure prevention alternative offered by, or through, the borrower's mortgage servicer, a mortgage servicer, trustee, mortgagee, beneficiary, or authorized agent shall not record a notice of sale or conduct a trustee's sale while the complete foreclosure prevention alternative application is pending, and until the borrower has been provided with a written determination by the mortgage servicer regarding that borrower's eligibility for the **[*16]** requested foreclosure prevention alternative.

Section 2924.11(f) explains that an application for a foreclosure prevention alternative is "complete" when "a borrower has supplied the mortgage servicer with all documents required by the mortgage servicer within the reasonable timeframes specified by the mortgage servicer." *Cal. Civ. Code § 2924.11(f)*. A complaint alleging a violation of *Section 2924.11(f)* requires that the plaintiff plausibly allege that her application was complete. The completeness of an application is a legal determination, and a plaintiff must make more than a mere allegation that her application was "complete." *Stokes v. CitiMortgage, Inc., 2014 U.S. Dist. LEXIS 125655, 2014 WL 4359193, at *7, *10 (C.D. Cal. Sep. 3, 2014)*. Bald allegations that a plaintiff submitted a "complete" application, without sufficient supporting factual allegation, are conclusory statements. *2014 U.S. Dist. LEXIS 125655 at *7*. Thus, a plaintiff must allege facts that demonstrate the application was complete. Id.

Here, Plaintiffs do not plausibly allege that their loan modification application was complete. Plaintiffs baldly allege that they "submitted their **COMPLETE** loan modification application . . . ." (Compl. ¶ 29) (emphasis in original.) Plaintiffs do not allege what documents Defendants required, the timeframe in which the documents were to be submitted, what documents Plaintiffs submitted, **[*17]** or when Plaintiffs submitted those documents. Thus, Plaintiffs did not plausibly allege that they submitted a complete loan modification application.

For the reasons above, Plaintiffs fail to state a claim for violation of *California Civil Code Section 2924.11*. The Court GRANTS Defendants' motions to dismiss the second cause of action.

4. Violation of *California Civil Code § 2923.7*

In their third cause of action, Plaintiffs allege that Defendants violated *California Civil Code Section 2923.7*. (Compl. ¶¶ 37-44.) *Section 2923.7* provides that "[u]pon request from a borrower who requests a foreclosure prevention alternative, the mortgage servicer shall promptly establish a single point of contact and provide to the borrower one or more direct means of communication with the single point of contact." A "single point of contact" is "an individual or team of personnel each of whom has the ability and authority to perform the responsibilities described . . . The mortgage servicer shall ensure that each member of the team is knowledgeable about the borrower's situation and current status in the alternatives to foreclosure process." *Cal. Civ. Code § 2923.7(f)*.

Where the foreclosure sale has not yet occurred, *Section 2924.12(a)(1)* permits a homeowner to sue for injunctive relief for a violation of *Section 2923.7*. As with a violation under *Section 2923.5*, above, injunctive relief for a **[*18]** violation of *Section 2923.7* requires that a violation was material. *Lucioni v. Bank of America, N.A., 3 Cal. App. 5th 150, 158-159, 207 Cal. Rptr. 3d 418 (2016)*. This injunction remains in effect until the court determines that the mortgage servicer has corrected and remedied the violations giving rise to the action. *Cal. Civ. Code § 2924.12(a)(2)*.

Defendants contend that Plaintiffs fail to state a claim because they did not allege that they requested a single point of contact. (Ditech Mot. at 7.) The Court disagrees. This Court has previously held that *Section 2923.7* does not condition the appointment of a single point of contact on a borrower's specific request but instead requires appointment of such a contact when a borrower requests a foreclosure prevention alternative, such as a loan modification. *Hild v. Bank of America, N.A., 2015 U.S. Dist. LEXIS 13419, 2015 WL 401316, at *7 (C.D. Cal. Jan. 29, 2015)*; *McFarland v. JP Morgan Chase Bank, 2014 U.S. Dist. LEXIS 118240, 2014 WL 4119399, at *11 (C.D. Cal. Aug. 21, 2014)*. Thus, because Plaintiffs allege that they submitted a loan modification application in April 2017 (Compl. ¶ 38), Defendants were obligated to appoint a single point of contact.

Defendants further contend that the facts alleged are insufficient to allege plausibly that Plaintiffs never received a specific point of contact. (Select Portfolio Mot. at 6.) A single point of contact is responsible for the following:

> (1) Communicating the process by which a borrower may apply for an available foreclosure prevention alternative and the **[*19]** deadline for any required submissions to be considered for these options.
> (2) Coordinating receipt of all documents associated with available foreclosure prevention alternatives and notifying the borrower of any missing documents necessary to complete the application.
> (3) Having access to current information and personnel sufficient to timely, accurately, and adequately inform the borrower of the current status of the foreclosure prevention alternative.
> (4) Ensuring that a borrower is considered for all foreclosure prevention alternatives offered by, or through, the mortgage servicer, if any.
> (5) Having access to individuals with the ability and authority to stop foreclosure proceedings when necessary.

Cal Civ. Code § 2923.7(b)(1)-(5). The responsibilities of the single point of contact may be carried out by an appointed team in which "each member of the team is knowledgeable about the borrower's situation and current status in the alternatives to foreclosure process." *Cal. Civ. Code § 2923.7(f)*. Courts deny motions to dismiss causes of action under *Section 2923.7* when a plaintiff alleges that purported single points of contact where not able to perform these enumerated responsibilities and were not knowledgeable about the plaintiffs situation and application **[*20]** status. *Hixson v. Wells Fargo Bank, N.A., 2014 U.S. Dist. LEXIS 108617, 2014 WL 387004, at *5-6 (N.D. Cal. Aug. 6, 2014)*. This Court has previously found that a plaintiff states a claim under *Section 2923.7* when she alleges that she endured transfer through many representatives who were not able to perform the required responsibilities; that she had to repetitively resubmit the same documents because the defendant lost them; and that the defendants could not inform the plaintiff about the status of her application. *McFarland, 2014 U.S. Dist. LEXIS 118240, 2014 WL 4119399 at *11*.

Here, Plaintiffs allege sufficient facts that, if true, would indicate that Defendants violated *Section 2923.7*. Plaintiffs allege that they and their agent contacted Defendants and spoke with several people who could not locate important file information, like an authorization to speak with Plaintiffs' agent. (Compl. ¶ 41.) Plaintiffs also allege that Defendants' representatives could not provide to Plaintiffs useful information about the status of their application. (Id. at ¶ 42.) Further, Plaintiffs allege that any sporadic information they did receive was only after insistent calling. (Id.) These assertions, if true, would put Plaintiffs in a similar position to the plaintiff in McFarland because representatives with whom Plaintiffs were able to make contact were not able to assist them in any meaningful **[*21]** way and were not knowledgeable about Plaintiffs' application. Thus, Plaintiffs allege facts sufficient to state a claim that Defendants violated *Section 2923.7*.

Finally, Defendants contend that even if they did violate *Section 2923.7*, Plaintiffs do not allege facts that would establish that the violation was material. (Ditech Mot. at 7.) The Court agrees. Where a foreclosure sale has not yet occurred, *Section 2924.12(a)(1)* permits a homeowner to sue for injunctive relief to enjoin a material violation of *Section 2923.7*. This injunction remains in effect until the court determines that the mortgage servicer has corrected and remedied the violations giving rise to the action. *Cal. Civ. Code § 2924.12(a)(2)*. Here, Plaintiffs do not allege facts in their third cause of action that the violation of *Section 2923.7* was material in the impending foreclosure sale of the Subject Property. (See Compl. ¶¶ 37-44.) Although Plaintiffs allege Defendants projected a sale date of the Subject Property (Id. ¶ 24), they do not allege facts showing that the violation of *Section 2923.7* was material in the foreclosure proceedings. For example, Plaintiffs do not allege that this particular violation denied them the opportunity to obtain a loan modification. See, e.g., *Shumake v. Caliber Home Loans, Inc., 2017 U.S. Dist. LEXIS 2928, 2017 WL 1362681, at *6 (C.D. Cal. Jan. 6, 2017)* (citing *Foote v. Wells Fargo Bank, N.A., 2016 U.S. Dist. LEXIS 65019, 2016 WL 2851627, at *6 (N.D. Cal. May 16, 2016))*.

For the reasons above, Plaintiffs fail to state **[*22]** a claim for violation of *California Civil Code Section 2923.7*. The Court GRANTS Defendants' motions to dismiss the third cause of action.

5. Negligence

In their fourth cause of action, Plaintiffs allege negligence against Defendants. (Compl. ¶¶ 45-64.) The elements of a cause of action for negligence are (1) duty, (2) breach of duty, (3) causation, and (4) damages. *Merrill v. Navegar, Inc., 26 Cal.4th 465, 500, 110 Cal. Rptr. 2d 370, 28 P.3d 116 (2001)*. Defendants argue that they do not owe Plaintiffs a legal duty. (Ditech Mot. at 9; Select Portfolio Mot. at 9.) The Court agrees.

"Whether a duty of care exists is a question of law to be determined on a case-by-case basis." *Lueras v. BAC Home Loans Servicing, LP, 221 Cal. App. 4th 49, 62, 163 Cal. Rptr. 3d 804 (2013)*. In the context of borrowers and lenders, California courts have explained that, as a general rule, "a financial institution owes no duty of care to a borrower when the institution's involvement in the loan transaction does not exceed the scope of its conventional role as a mere lender of money." *Id. at 63*; see also *Becker v. Wells Fargo Bank NA, Inc., 2014 U.S. Dist. LEXIS 109287, 2014 WL 3891933, at *19 (E.D. Cal. Aug. 7, 2014)* ("Liability to a borrower for negligence arises only when the lender actively participates in the financed enterprise beyond the domain of the usual money lender.") (Quoting *Wagner v. Benson, 101 Cal. App. 3d 27, 35, 161 Cal. Rptr. 516 (1980))*. The principle that a financial institution owes no duty to a borrower has been extended to loan servicers as well. *Bassam v. Bank of Am., 2015 U.S. Dist. LEXIS 193513, 2015 WL 12697873, at *5 (C.D. Cal. Nov. 3, 2015)*.

Plaintiffs argue that Defendants owed them **[*23]** a duty of care under the six-part test set forth in *Biakanja v. Irving, 49 Cal. 2d 647, 650, 320 P.2d 16 (Cal. 1958)*. (Ditech Opp'n at 14-15; Select Portfolio Opp'n at 15.) The Biakanja test has been applied to determine "whether a financial institution owes a duty of care to a borrower-client." *Nymark v. Heart Fed. Savings & Loan Ass'n, 231 Cal. App. 3d 1089, 1098, 283 Cal. Rptr. 53 (1991)*. The Biakanja factors are:

> (1) the extent to which the transaction was intended to affect the plaintiff, (2) the foreseeability of harm to him, (3) the degree of certainty that the plaintiff suffered injury, (4) the closeness of the connection between the

defendant's conduct and the injury suffered, (5) the moral blame attached to the defendant's conduct, and (6) the policy of preventing future harm.

49 Cal. 2d at 650. District courts within California are split on whether a lender owes a duty of care to borrowers during the during the loan modification process. See Faulks v. Wells Fargo & Co., 231 F. Supp. 3d 387, 409 (N.D. Cal. 2017) (collecting cases establishing a split among district courts of California on whether financial institutions owe a duty of care to borrowers during the loan modification process).

Unpublished Ninth Circuit cases appear to agree with Lueras and hold that lenders do not owe a duty of care during the loan modification process. See Anderson v. Deutsche Bank Nat. Tr. Co. Americas, 649 F. App'x 550, 552 (9th Cir. 2016) (applying Biakanja factors to find no duty of care where the borrower's negligence **[*24]** claim was based on an allegation of delay in the processing of the loan modification application); Badame v. J.P. Morgan Chase Bank, N.A., 641 F. App'x 707, 709-10 (9th Cir. 2016) (citing Lueras and holding Chase did not owe plaintiffs a duty of care when considering their loan modification application); Deschaine v. IndyMac Mortg. Servs., 617 F. App'x 690, 693 (9th Cir. 2015) (citing Lueras to hold the lender owed no duty of care when considering plaintiff's loan modification request because it acted within its conventional role as a lender).

This Court finds the Lueras line of cases to be more persuasive and has since followed the Ninth Circuit's interpretation of California law to find that financial institutions do not owe a duty of care to borrower-clients during the loan modification process. See, e.g., Hild v. Bank of America, N.A., 2018 U.S. Dist. LEXIS 129329, 2018 WL 3738956, at *5 (C.D. Cal. Jul. 31, 2018); Bailey v. Specialized Loan Serv., LLC, 2016 U.S. Dist. LEXIS 194987, 2016 WL 10651034, at *8 (C.D. Cal. Nov. 14, 2016). Thus, Plaintiffs' reliance on Segura v. Wells Fargo Bank, N.A., 2014 U.S. Dist. LEXIS 143038 , 2014 WL 4798890, at *14 (C.D. Cal. Feb. 24, 2015), in which this court held that offering the opportunity to apply for a loan modification created a duty of reasonable care to the borrower, predates the Ninth Circuit cases above and is unavailing. Accordingly, the Court concludes that Defendants did not owe Plaintiffs a duty of care during the loan modification process.

Defendants further contend that even if they did have a duty, Plaintiffs fail to properly allege a breach of that duty. (Ditech Mot. at 9.) Because the Court finds that Defendants **[*25]** did not owe Plaintiffs a duty of care, it will not consider whether Plaintiffs adequately alleged breach of duty.

For the reasons above, Plaintiffs fail to state a claim negligence against Defendants. The Court GRANTS Defendants' motions to dismiss the fourth cause of action.

6. *California Business and Professions Code §§ 17200, et seq.*

In their fifth cause of action, Plaintiffs allege Defendants violated California Business and Professions Code Section 17200 and its related provisions of the Unfair Competition Law ("UCL"). (Compl. ¶¶ 24-27; 65-74.)[4] Plaintiffs allege that Defendants violated each prong of the UCL. (Id. ¶ 25.)

A claim under the UCL requires a showing of either an unlawful, unfair, or fraudulent business act or practice, or an unfair, deceptive, untrue, or misleading advertisement. Lundy v. Selene Finance, LP, 2016 U.S. Dist. LEXIS 35547 , 2016 WL 1059423, at *17 (N.D. Cal. Mar. 17, 2016) (citing Steward v. Life Ins. Co. of N. Am., 388 F. Supp. 2d 1138, 1143 (E.D. Cal. 2005)).

Federal Rule of Civil Procedure Rule 9(b) requires that circumstances constituting a claim for fraud or mistake be pled with particularity. Fed. R. Civ. P. 9(b). Rule 9(b) applies also where the claim is "grounded in fraud" or "sound[s] in fraud." Vess v. Ciba-Geigy Corp. USA, 317 F.3d 1097, 1103 (9th Cir. 2003). The heightened

[4] Plaintiffs' Complaint has irregular numbering starting with their fifth cause of action. Instead of continuing with ¶ 65, Plaintiffs re-start their numbering with ¶ 24. This numbering continues through ¶ 27 and then jumps back to ¶ 65. For this Part, citations to ¶¶ 24-27 will refer to ¶¶ 24-27 alleged under the fifth cause of action.

particularity requirements of Rule 9(b) apply to claims under California's Unfair Competition Law. Horosny v. Burlington Coat Factory of Cal., LLC, 2015 U.S. Dist. LEXIS 179419, 2015 WL 12532178, at *4 (C.D. Cal. Oct. 26, 2015) (citing Kearns v. Ford Motor Co., 567 F.3d 1120, 1124-25 (9th Cir. 2009)). Rule 9(b) requires a plaintiff to "identify the 'who, what, when, where and how of the misconduct charged," as well as "what is false or misleading about [the purportedly fraudulent conduct], and why it is false." **[*26]** Shimono v. Harbor Freight Tools USA, Inc., 2016 U.S. Dist. LEXIS 147828, 2016 WL 6238483 at *5 (C.D. Cal. Oct. 24, 2016) (quoting Cafasso, ex rel. United States v. Gen. Dynamics C4 Sys., Inc., 637 F.3d 1047, 1055 (9th Cir. 2011)).

a. Standing

As a preliminary matter, Select Portfolio contends Plaintiffs lack standing under the UCL. (Select Portfolio Mot. at 8.)

The UCL only permits a plaintiff to sue if she has suffered an injury in fact. Cal. Bus. & Prof. Code § 17204. This requires that a Plaintiff allege injury in fact in a manner consistent with the federal constitutional standards. Troyk v. Farmers Group, Inc., 171 Cal. App. 4th 1305, 1346, 90 Cal. Rptr. 3d 589 (2009). For standing under the UCL, a plaintiff must "(1) establish a loss or deprivation of money or property sufficient to qualify as injury in fact, i.e., *economic injury*, and (2) show that that economic injury was the result of, i.e., *caused by*, the unfair business practice or false advertising that is the gravamen of the claim." In re Turner, 859 F.3d 1145, 1151 (9th Cir. 2017) (quoting Kwikset Corp. v. Superior Court, 51 Cal.4th 310, 322, 120 Cal. Rptr. 3d 741, 246 P.3d 877 (2011) (emphasis in original)). The causation requirement fails if the plaintiff would have suffered "the same harm whether or not a defendant complied with the law." Daro v. Superior Court, 151 Cal. App. 4th 1079, 1099, 61 Cal. Rptr. 3d 716 (2007). Specifically, a plaintiff will not have standing under the UCL if her complaint fails to establish that but for the servicer's violation foreclosure would have been avoided. See In re Turner, 859 F.3d at 1151. Where a plaintiff does not allege that she continued to make payments on her loan, her own failure to pay causes the default. **[*27]** See id.

Select Portfolio contends Plaintiffs do not allege facts regarding a specific injury or any loss of money or property. (Select Portfolio Mot. at 8.) Select Portfolio further contends that any harm Plaintiffs suffered was due to Plaintiffs' default. (Id.) Plaintiffs do not allege that they continued making payments and lack UCL standing for any injuries related to their failure to make the required loan payments. See In re Turner, 859 F.3d at 1151. However, Plaintiffs allege that the UCL violation caused them harm in the following additional ways: excessive interest charges, damaged credit, late fees, copying and faxing costs, and telephone costs. (Compl. at ¶ 69.) Although some of these alleged damages are related to Plaintiffs' failure to pay (e.g., late fees, damaged credit, etc.), the costs Plaintiffs allegedly incurred while attempting to secure a modification are not similarly tied to their own failure to pay.

Thus, the Court finds that Plaintiffs lack standing based on any injury related to their own failure to make loan payments. However, Plaintiffs—if they can otherwise state a claim—have standing based on those injuries related to the costs they incurred while seeking a loan modification to the extent **[*28]** that those injuries were caused by Defendants' alleged unlawful, unfair, or fraudulent business practices.

b. Unlawful Practices

The unlawful practices prohibited are any practices forbidden by law. Saunders v. Super. Ct., 27 Cal. App. 4th 832, 838, 33 Cal. Rptr. 2d 438 (1994); see also In re Pomona Valley Med. Grp., Inc., 476 F.3d 665, 674 (9th Cir. 2007). The unlawful prong of the UCL "borrow[s] violations of other laws and treats" them as unlawful business practices "independently actionable under section 17200." Lopez v. United Guaranty Residential Ins. Co., 2017 U.S. Dist. LEXIS 29048, 2017 WL 810273, at *5 (C.D. Cal. Feb. 27, 2017) (quoting Farmers Ins. Exch. v. Super. Ct., 2 Cal.4th 377, 383, 6 Cal. Rptr. 2d 487, 826 P.2d 730 (1992) (quotation omitted)). Thus, to plead a violation of the UCL, a plaintiff must plead a violation of another statute or common law. Id.

Plaintiffs contend that Defendants' violated the unlawful prong of the UCL by violating California Civil Code Sections §§ 2923.5, 2923.7, and 2924.11. (Compl. ¶ 27f-27h.) Plaintiffs further allege that Defendants' conduct was unlawful because they implemented a flawed loss mitigation review process that is purposefully lengthy so as to avoid providing modification; they informed Plaintiffs they were under review while purposefully delaying the review so as to prevent Plaintiffs from seeking other alternative relief; they ignored Plaintiffs' communications; and gave Plaintiffs false hope for modification on which Plaintiffs relied in determining not to seek other relief. (Id. at ¶ 27a-e.) As discussed in above **[*29]** in Parts IV.B.2 through IV.B.5, the Court concludes Plaintiffs do not adequately state any of their other claims against Defendants. Because Plaintiffs do not state a claim for other unlawful practices, Plaintiffs cannot "borrow" a violation of another law to treat as an unlawful business practice for purposes of the UCL. See *Lopez, 2017 U.S. Dist. LEXIS 29048, 2017 WL 810273, at *5*.

Therefore the Court GRANTS Defendants' motions as to the extent that Plaintiffs base their UCL claim on the unlawful prong.

c. Unfair Practices

Unfair conduct is conduct "whose harm to the victim outweighs its benefits." *Saunders, 27 Cal. App. 4th at 838*. Unfair business practices may also be those that "offend an established public policy or . . . [are] immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers." *Heighley v. J.C. Penney Life Ins. Co., 257 F. Supp. 2d 1241, 1259 (C.D. Cal. 2003)*. Unlike the unlawful prong, the unfair prong does not require borrowing another legal violation but can include a practice that not in itself unlawful. *Cal-Tech Commc'ns v. Los Angeles Cellular Telephone Co., 20 Cal.4th 163, 181, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999)*. However, a violation under the unfairness prong must be tied to some legislatively declared policy or proof that the unfair practice will have some impact on competition. *Id. at 186-87*. In Cal-Tech, the California Supreme Court, using Federal Antitrust guidance, established a standard for when a practice is "unfair" between **[*30]** direct competitors. See *id. at 186*. California courts considering unfairness in consumer cases have concluded that the analysis should similarly apply to cases brought by consumers. See *In re Firearm Cases, 126 Cal. App. 4th 959, 980, 24 Cal. Rptr. 3d 659 (2005)* (citing *Schnall v. Hertz Corp., 78 Cal. App. 4th 1144, 1154 (2000))*. The term "unfair" applies to "conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition." *Cel-Tech, 20 Cal.4th at 187*. Importantly, the unfair practice must cause the consumer's harm. See *In re Firearm Cases, 126 Cal. App. 4th at 981* (discussing *Cel-Tech, 20 Cal. 4th 163, 83 Cal. Rptr. 2d 548, 973 P.2d 527*).

Plaintiffs allege that Defendants' violated the unfair prong of the UCL by violating California Civil Code Sections *§§ 2923.5*, *2923.7*, and *2924.11*. (Compl. ¶ 27f-27h.) Plaintiffs further allege that Defendants' conduct was unlawful because they implemented a flawed loss mitigation review process that is purposefully lengthy so as to avoid providing modification; they informed Plaintiffs they were under review while purposefully delaying the review so as to prevent Plaintiffs from seeking other alternative relief; they ignored Plaintiffs' communications; and gave Plaintiffs false hope for modification on which Plaintiffs relied in determining not to seek **[*31]** other relief. (Id. at ¶ 27a-e.) For the reasons addressed in Part IV.B.6.a, above, Plaintiffs do not alleged facts sufficient that, if true, would establish that their alleged injuries were caused by Defendants' alleged wrongful conduct. Because Plaintiffs fail to allege they continued making loan payments, they cannot allege that Defendant's unfair practices caused injuries related to their default.

Therefore the Court GRANTS Defendants' motions as to the UCL claim based on the unfair prong.

d. Fraudulent Practices

A claim under the fraudulent prong requires a showing that members of the public "are likely to be deceived." *Saunders, 27 Cal. App. 4th at 838*. Plaintiffs allege Defendants engaged in fraudulent conduct by "misleading home owners into believing that they can modify their loan, when in fact Defendants never completed the loan review, and in most cases, no loan modification is approved." (Compl. ¶ 66.) Plaintiffs also allege that "Defendants' business practices were also fraudulent in that they could reasonably mislead the public." (Id. at ¶ 68.) Finally, Plaintiffs allege the information Defendants provided was "misleading and not consistent" as to the status of the loan modification and that Plaintiffs "actually **[*32]** relied" upon Defendants' actions. (Id. ¶¶ 70-71.)

Plaintiffs' conclusory assertions fail to meet the federal standard pleading requirements, much less the heightened requirement under *Rule 9(b)*. Plaintiffs fail to identify with particularity the misrepresentations that Defendants made that induced Plaintiffs to forego exploring other means of foreclosure avoidance. They also fail to allege with particularity that Defendants knew the representations were false. Plaintiffs similarly fail allege why their reliance was justifiable.

Thus, the Court GRANTS the Motion as to the UCL claim based on the fraudulent prong.

V. LEAVE TO AMEND

Rule 15 provides that leave to amend "shall be freely given when justice so requires." *Fed. R. Civ. P. 15(a)*. The Ninth Circuit has held that "'[t]his policy is to be applied with extreme liberality.'" *Eminence Capital, L.L.C. v. Aspeon, Inc., 316 F.3d 1048, 1051 (9th Cir. 2003)* (quoting *Owens v. Kaiser Found. Health Plan, Inc., 244 F.3d 708, 712 (9th Cir. 2001))*. Generally, a "district court should grant leave to amend even if no request to amend the pleading was made, unless it determines that the pleading could not possibly be cured by allegation of other facts." *Lopez v. Smith, 203 F.3d 1122, 1127 (9th Cir. 2000)* (en banc) (internal quotation marks and citation omitted).

Here, the Court has identified deficiencies in Plaintiff's complaint, which may be cured by additional factual allegations. As **[*33]** a result, the Court DISMISSES Plaintiff's Complaint WITH LEAVE TO AMEND.

VI. CONCLUSION

For the foregoing reasons, the Court GRANTS both the Ditech Motion (Dkt. No. 6) and the Select Portfolio Motion (Dkt. No. 10). Plaintiffs shall file an amended complaint, if any, by September 17, 2018.

IT IS SO ORDERED.

LexisNexis® Headnotes

Antitrust & Trade Law > Clayton Act > Claims

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Clayton Act > Scope

HN1[] **Clayton Act, Claims**

Section 1 of the Sherman Act makes illegal every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations. *15 U.S.C.S. § 1*. To state a *Section 1* claim, then, a plaintiff must allege (1) an agreement (2) to restrain trade unreasonably. A private plaintiff suing under the *Clayton Act* must also allege antitrust standing, including that its injury is of the type the antitrust laws were intended to prevent and flows from that which makes defendants' acts unlawful.

Antitrust & Trade Law > Exemptions & Immunities > McCarran-Ferguson Act Exemption

HN2[] Exemptions & Immunities, McCarran-Ferguson Act Exemption

The *McCarran-Ferguson Act*, *15 U.S.C.S. §§ 1011-1015*, exempts insurance providers from federal antitrust liability in certain instances.

Civil Procedure > Appeals > Standards of Review > De Novo Review

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN3[] Standards of Review, De Novo Review

Appellate courts exercise plenary review of dismissals under *Fed. R. Civ. P. 12(b)(6)*, accepting all factual allegations in the complaint as true and, examining for plausibility, determining whether, under any reasonable reading of the complaint, the plaintiff may be entitled to relief.

Antitrust & Trade Law > Sherman Act > Claims

Evidence > Admissibility > Circumstantial & Direct Evidence

HN4[] Sherman Act, Claims

15 U.S.C.S. § 1 of the *Sherman Act* prohibits every contract, combination, or conspiracy that unreasonably restrains trade. *15 U.S.C. § 1*. Courts have interpreted these three terms collectively simply to mean an agreement. Unilateral activity by a defendant, no matter the motivation, cannot give rise to a *Section 1* violation. Instead, a plaintiff must plead some form of concerted action, in other words, a unity of purpose or a common design and understanding or a meeting of minds or a conscious commitment to a common scheme. An agreement may be shown by either direct or circumstantial evidence.

Antitrust & Trade Law > Sherman Act > Claims

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN5[] Sherman Act, Claims

To survive a motion to dismiss, a plaintiff alleging violation of *15 U.S.C.S. § 1* of the *Sherman Act* must plead enough factual matter (taken as true) to suggest that an agreement was made. An allegation of parallel conduct and a bare assertion of conspiracy, such as a conclusory allegation of agreement at some unidentified point, will not suffice. Rather, allegations of parallel conduct must be placed in a context that raises a suggestion of a preceding agreement, not merely parallel conduct that could just as well be independent action.

Antitrust & Trade Law > Sherman Act > Claims

Evidence > Admissibility > Circumstantial & Direct Evidence

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN6[] **Sherman Act, Claims**

For circumstantial evidence of an agreement, a plaintiff alleging violation of *15 U.S.C.S. § 1* of the *Sherman Act* must allege both parallel conduct and something "more," which courts have sometimes called a "plus factor. This "more" could include evidence (1) that the defendant had a motive to enter into a conspiracy, (2) that the defendant acted contrary to its interests, or (3) implying a traditional conspiracy. In cases involving concentrated markets like oligopolies or oligopsonies—where a small number of sellers or buyers of a particular product dominate the market—courts have recognized that competitors are more likely to be influenced by each other's behavior even without agreeing to act in concert. For example, one oligopolist may refrain from lowering its price because it fears, indeed knows, that its rivals will match it. In those cases we de-emphasize the first two types of evidence, which largely restate that phenomenon of interdependence, often called conscious parallelism. Courts focus instead on the third, which is non-economic evidence that there was an actual, manifest agreement, which may include proof that the defendants got together and exchanged assurances of common action or otherwise adopted a common plan even though no meetings, conversations, or exchanged documents are shown.

Antitrust & Trade Law > Sherman Act > Claims

HN7[] **Sherman Act, Claims**

Concerted action is established by proof of a causal relationship between pressure from one conspirator and an anticompetitive decision of another conspirator.

Antitrust & Trade Law > Sherman Act > Claims

HN8[] **Sherman Act, Claims**

A restraint among competitors—called "horizontal," as opposed to "vertical" restraints on market participants at different points in a product's supply chain—is more rigorously scrutinized for an antitrust violation because it could more easily facilitate competitive harms, such as the exclusion of rivals, price fixing, or the consolidation of market power. In particular, when a firm exercises monopsony power pursuant to a conspiracy, its conduct is subject to more rigorous scrutiny. Unlike independent action, concerted activity inherently is fraught with anticompetitive risk insofar as it deprives the marketplace of independent centers of decisionmaking that competition assumes and demands. Indeed, some horizontal restraints, including price fixing and market division, are considered anticompetitive by their very nature. These are treated as per se *Sherman Act* *15 U.S.C.S. § 1* violations.

Antitrust & Trade Law > Sherman Act > Claims

HN9[] **Sherman Act, Claims**

Many horizontal restraints are not so clearly harmful to competition under *Sherman Act* *15 U.S.C.S. § 1*. Instead, or in addition, they may, for example, facilitate the creation of new products, improve efficiencies, or lead to lower consumer costs. A restraint that is not per se unreasonable is analyzed under some form of a "rule of reason" burden-shifting framework, which seeks to determine whether the restraint's harmful effects are outweighed by any procompetitive justifications and, if so, whether there are less restrictive alternatives.

Antitrust & Trade Law > Sherman Act > Claims

HN10[] **Sherman Act, Claims**

Under the rule of reason framework for a violation of *Sherman Act* *15 U.S.C.S. § 1*, a party can satisfy the unreasonable-restraint element in two ways. It can plead actual detrimental effects on competition, such as reduced output, increased prices, or decreased quality in the relevant market. Alternatively, it can plead that the defendants have market power, plus some evidence that the challenged restraint harms competition. Under either approach, courts usually cannot properly apply the rule of reason without an accurate definition of the relevant market because, in most cases, a court must conduct a fact-specific assessment of market power and market structure to assess the restraint's actual effect on competition.

Antitrust & Trade Law > Sherman Act > Claims

HN11[] **Sherman Act, Claims**

The relevant market in a *Sherman Act*, *15 U.S.C.S. § 1*, case is the area of effective competition within which significant substitution in consumption or production occurs. In other words, the outer boundaries of a relevant market are determined by reasonable interchangeability of use of a particular product within a particular geographic area. In addition to substitutability or interchangeability, courts also look to cross-elasticity of demand, which is defined as a relationship between two products, usually substitutes for each other, in which a price change for one product affects the price of the other. Critically, in a buyer-side conspiracy case, seller rather than consumer or purchaser behavior is the focus. The market is comprised of buyers who are seen by sellers as being reasonably good substitutes. Thus a court should be wary of applying the market-definition analysis for sellerside conspiracies mechanically in the context of monopsony or oligopsony.

Antitrust & Trade Law > Sherman Act > Claims

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN12[] **Sherman Act, Claims**

A *Sherman Act*, *15 U.S.C.S. § 1*, complaint may be properly dismissed if it defines the relevant market without reference to interchangeability or cross-elasticity of demand or if it alleges a proposed relevant market that clearly does not encompass all interchangeable substitute products even when all factual inferences are granted in plaintiff's favor. However, absent such obvious oversights, courts are cautious before dismissing for failure to define a relevant market. Ultimately the relevant market must both correspond to the commercial realities of the industry and be economically significant. That is why, in most cases, proper market definition can be determined only after a factual inquiry into the commercial realities faced by consumers or purchasers, in seller-side conspiracies, or sellers, in buyer-side conspiracies.

Antitrust & Trade Law > Sherman Act > Claims

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN13[] **Sherman Act, Claims**

A *Sherman Act*, *15 U.S.C.S. § 1*, plaintiff bears the burden of defining both a relevant geographic and a relevant product market.

Antitrust & Trade Law > Clayton Act > Claims

HN14[] Clayton Act, Claims

Sections 4 and *16 of the Clayton Act* enable private plaintiffs to sue for treble damages for and to enjoin antitrust injuries. *15 U.S.C.S. §§ 15*, *26*. While the statutory language of those provisions is broad, and apparently requires only constitutional standing to bring suit, the Supreme Court has held that private plaintiffs must also have "antitrust standing." The Court articulated several factors to consider when analyzing whether a plaintiff has such standing. These are summarized as: (1) the causal connection between the antitrust violation and the harm to the plaintiff and the intent by the defendant to cause that harm, with neither factor alone conferring standing; (2) whether the plaintiff's alleged injury is of the type for which the antitrust laws were intended to provide redress; (3) the directness of the injury, which addresses the concerns that liberal application of standing principles might produce speculative claims; (4) the existence of more direct victims of the alleged antitrust violations; and (5) the potential for duplicative recovery or complex apportionment of damages.

Antitrust & Trade Law > Clayton Act > Claims

HN15[] Clayton Act, Claims

An antitrust injury (1) flows from that which makes the defendants' acts unlawful and (2) is an injury of the type the antitrust laws were intended to prevent. To analyze the first prong of antitrust injury, courts must examine the causal connection between the purportedly unlawful conduct and the injury.

Antitrust & Trade Law > Clayton Act > Scope

HN16[] Antitrust & Trade Law, Clayton Act

As a general matter, the class of plaintiffs capable of satisfying the antitrust-injury requirement is limited to consumers and competitors in the restrained market and to those whose injuries are the means by which the defendants seek to achieve their anticompetitive ends.

Antitrust & Trade Law > Exemptions & Immunities > McCarran-Ferguson Act Exemption

Evidence > Burdens of Proof > Allocation

HN17[] Exemptions & Immunities, McCarran-Ferguson Act Exemption

A defendant bears the burden of establishing its immunity under the *McCarran-Ferguson Act*, *15 U.S.C.S. §§ 1011-1015*.

Antitrust & Trade Law > Sherman Act > Scope > Exemptions

Antitrust & Trade Law > Exemptions & Immunities > McCarran-Ferguson Act Exemption

HN18[] Scope, Exemptions

The *McCarran-Ferguson Act*, *15 U.S.C.S. §§ 1011-1015*, provides that the *Sherman Act* still applies to the business of insurance to the extent that such business is not regulated by State Law and to agreements to boycott, coerce, or intimidate. 15 U.S.C.S. §§ 1012(b), 1013(b). Therefore, for an insurer to be exempted from liability in a case, its challenged conduct (1) must constitute the business of insurance, (2) must be regulated by state law, and (3) must not amount to a boycott, coercion, or intimidation.

Opinion by: AMBRO

Opinion

[*329] OPINION OF THE COURT

AMBRO, Circuit Judge

The seller of a medical device, believing it was shut out of the market for it, brought suit on federal antitrust grounds against associated health insurance companies. The claim **[**2]** was that they shielded themselves from patient demand for the seller's device by agreeing to deny coverage **[*330]** as "not medically necessary" or "investigational," even while the medical community, other insurers, and independent arbiters viewed it as befitting the standard of care. The District Court dismissed the claim. For the reasons that follow, we reverse its judgment and remand the case for further consideration.

I. Factual Background

We base our analysis, as we must on review of a Rule 12(b)(6) dismissal, on the allegations in the operative complaint—here the Third Amended Complaint (for convenience, the "Complaint"). According to it, cardiovascular disease and disorders are the leading cause of death in the United States. Plaintiff LifeWatch Services, Inc. ("LifeWatch") is one of the two largest sellers of telemetry monitors. They are one of several types of outpatient cardiac monitoring devices used to diagnose and treat arrhythmias, or changes in heart rate or rhythm, which may signal or lead to more serious medical complications. An arrhythmia can be without noticeable symptoms; hence the patient may not know it is occurring.

Other outpatient cardiac monitors include Holter monitors, various **[**3]** forms of event monitors, and insertable monitors. All record the electrical activity of a patient's heart to catch any instance of an arrhythmia. But they vary in price, method of data capture, and mechanism by which the data are transmitted to an analyst or physician for diagnosis. For example, telemetry monitors are about three times as expensive as event monitors. They record up to 30 days of a patient's cardiac activity and automatically transmit the data to an analyst center. Event monitors, by contrast, record short windows of data (in some cases no more than a minute), which the patient must then take some action to transmit. Many event monitors also require the patient to trigger the data capture, creating a risk that asymptomatic arrhythmias go undetected. Insertable monitors, which are surgically implanted and less frequently used, are the most expensive; they cost eight to ten times more than event monitors. While the Complaint quotes from medical studies that recommend only telemetry monitors to treat some patients with certain conditions, in other cases telemetry and other monitors are all appropriate treatments.

LifeWatch brought suit against the Blue Cross Blue Shield **[**4]** Association (the "Association") and five of its member insurance plan administrators[1] (the "Blue Plans"; together with the Association, "Blue Cross") for violating *Section 1 of the Sherman Act, 15 U.S.C. § 1*. It claims the Blue Plans have impermissibly conspired with each other and the Association to deny coverage of telemetry monitors.

The Association, which is not an insurer itself, owns the rights to the Blue Cross and Blue Shield trademarks and trade names. It licenses the right to the Blue Cross brand to 36 insurers nationwide. **[*331]** These Blue Plans are allegedly the largest commercial health insurance group in the country, collectively insuring 105 million Americans, with a national network that covers 96% of hospitals and 92% of doctors. As a group, they are a major purchaser of medical devices and services nationwide.

The Association maintains a model medical policy that recommends to the Blue Plans which treatments, devices, or services to cover. Each Blue Plan participates in the development of these recommendations by voting on them. A panel of some kind—the Complaint is vague—then meets several times a year to finalize the model policy.[2]

For more than a decade the model policy has recommended against **[**5]** covering prescriptions for telemetry monitors, explaining that in some cases they are not "medically necessary" and in the rest they are "investigational." This provision of the model policy has been adopted in near lockstep[3] by the Association's member Blue Plans. Though the Plans' language denying coverage is not always identical, the reasoning is the same.

Meanwhile, Medicare, Medicaid, and other private insurers, including Aetna, cover telemetry monitor prescriptions. Multiple medical studies—the Complaint references 10—have reviewed telemetry monitors and found them to be effective, superior to other treatments in some cases, or medically necessary. In at least 20 cases brought between 2010 and 2012 by patients appealing a denial of telemetry monitor coverage, independent, expert review boards overturned the insurers' denials; the review board frequently determined that telemetry monitors were a standard of care or clinically necessary. Blue Plans were parties to several, if not all, of those appeals.

Nonetheless, with near uniformity, and for a decade, the Blue Plans have declined to cover telemetry monitors. As a result, LifeWatch claims both its sales and cardiac monitoring treatment **[**6]** in general have suffered. It seeks treble damages for its losses and an injunction under *Sections 4* and *16* of the Clayton Act, *15 U.S.C. §§ 15* and *26*, which authorize private plaintiffs to sue for *Sherman Act* violations.

II. Analysis

---

[1] The Defendant Blue Plans named in the Complaint are: Wellpoint, Inc., allegedly an Indiana corporation that, combined with its affiliates, serves more than 71 million people in California, Colorado, Connecticut, Georgia, Indiana, Kentucky, New York, Maine, Missouri, Nevada, New Hampshire, Ohio, Virginia, and Wisconsin, or more than a third of all privately insured Americans; Horizon Blue Cross Blue Shield of New Jersey, allegedly the largest health insurer in New Jersey; Blue Cross and Blue Shield of Minnesota, which allegedly has more members, products, and services than other insurers in that state; BlueCross BlueShield of South Carolina; and Highmark, Inc., allegedly one of the largest health insurers in the country serving, with affiliates, insureds in Pennsylvania, Delaware, and West Virginia. As described later, LifeWatch has since settled its case against Highmark.

[2] LifeWatch's brief on appeal explains that the "Medical Policy Panel" is "the name Defendants give to themselves acting in concert." Appellant Br. 3. However, we see no basis in the pleadings on which to infer who or what the panel comprises.

[3] The Complaint references only two Blue Plans that ever contracted with LifeWatch to cover telemetry. One, a Plan in Illinois, settled with LifeWatch outside this lawsuit. As described later, the other, Highmark, partially changed course and stopped covering telemetry in some cases. The claims against Highmark were dismissed on June 9, 2016, after the parties reached a settlement.

HN1[] Section 1 of the Sherman Act makes illegal "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations . . . ." 15 U.S.C. § 1. To state a Section 1 claim, then, a plaintiff must allege (1) an agreement (2) to restrain trade unreasonably. In re Ins. Brokerage Antitrust Litig., 618 F.3d 300, 315 (3d Cir. 2010). A private plaintiff suing under the Clayton Act must also allege antitrust standing, including that its "injury [is] of the type the antitrust laws were intended to prevent and . . . flows from that which makes defendants' acts unlawful." Id. n.9. (quoting (A.D. Bedell Wholesale Co. v. Philip Morris Inc., 263 F.3d 239, 247 (3d Cir.2001)). Finally, the claim **[*332]** in this case could still fail under HN2[] the McCarran-Ferguson Act, 15 U.S.C. §§ 1011-1015, which exempts insurance providers from federal antitrust liability in certain instances.

The District Court had subject matter jurisdiction under 28 U.S.C. §§ 1331 and 1337. Blue Cross moved the Court to dismiss LifeWatch's Sherman Act Section 1 claim under Rule 12(b)(6) of the Federal Rules of Civil Procedure. It argued that the Complaint fails to allege either agreement or anticompetitive effects in the relevant product **[**7]** market, that LifeWatch lacks antitrust standing because it could not show antitrust injury, and that Blue Cross's telemetry monitor coverage decisions are immune from antitrust challenge under the McCarran-Ferguson Act.

The District Court dismissed for failing to allege anticompetitive effects, and therefore failing to establish the restraint was unreasonable. LifeWatch Servs., Inc. v. Highmark, Inc., 248 F. Supp. 3d 641, 648-49 (E.D. Pa. 2017). The Court emphasized that, because "each Blue [P]lan treats all telemetry providers *equally*," LifeWatch failed to allege "competition-reducing" conduct. Id. at 649 (alteration and emphasis in original) (internal quotation marks omitted). It concluded that, "even assuming . . . a conspiracy amongst Blue Plans to deny coverage for telemetry devices, . . . this alleged conspiracy does not violate antitrust laws." Id. at 646. "[T]he Defendants' refusal—whether concerted or not—to purchase any telemetry device—whether produced by LifeWatch or not—is not an antitrust violation, but rather a legal exercise of Defendants' monopsony power."[4] Id. at 650.

The Court also suggested in a *dictum* that LifeWatch failed to allege an agreement, as it believed the Plans could have independently decided "that the benefits of telemetry devices do not (yet) **[**8]** outweigh their costs." Id. at 649. It did not reach antitrust standing or the McCarran-Ferguson Act. Id. at 650.

LifeWatch timely appealed, and the same four issues are now before us for review. We have appellate jurisdiction under 28 U.S.C. § 1291. HN3[] We exercise plenary review of dismissals under Rule 12(b)(6), "accept[ing] all factual allegations in the complaint as true and, examining for plausibility, 'determin[ing] whether, under any reasonable reading of the complaint, the plaintiff may be entitled to relief.'" In re Lipitor Antitrust Litig., 868 F.3d 231, 249 (3d Cir. 2017) (quoting Bronowicz v. Allegheny County, 804 F.3d 338, 344 (3d Cir. 2015)); *see also* Burtch v. Milberg Factors, Inc., 662 F.3d 212, 220-21 (3d Cir. 2011).

For the reasons that follow, we hold that LifeWatch plausibly stated a claim and has antitrust standing. However, we leave Blue Cross's McCarran-Ferguson Act argument for the District Court's consideration on remand.

A. Agreement

We take in order the elements of a claim under Section 1. HN4[] It prohibits "every contract, combination . . . , or conspiracy" that unreasonably restrains trade. 15 U.S.C. § 1. We have interpreted these three terms collectively simply to mean an agreement. Ins. Brokerage, 618 F.3d at 315. "Unilateral activity by a defendant, no matter the motivation, cannot give rise to a [S]ection 1 violation." InterVest, Inc. v. **[*333]** Bloomberg, L.P., 340 F.3d 144, 159 (3d Cir. 2003). Instead, a plaintiff must plead "some form of concerted action . . . , in other words, a unity of purpose

---

[4] A monopoly exists if only "one supplier or producer" has "control or advantage . . . over the commercial market within a given region." *Black's Law Dictionary* 1160 (10th ed. 2014). If "one buyer controls the market" instead of a seller, that is a monopsony. *Id.* Likewise, if "a few large sellers" have "control or domination of a market," it is an oligopoly, while oligopsony is where "a few large buyers or customers" do. *Id.* at 1260.

or a common design and understanding **[**9]** or a meeting of minds or a conscious commitment to a common scheme . . . ." *Ins. Brokerage, 618 F.3d at 315* (citations and internal quotation marks omitted).

An agreement may be shown by either direct or circumstantial evidence. *W. Penn Allegheny Health Sys., Inc. v. UPMC ("West Penn"), 627 F.3d 85, 99 (3d Cir. 2010)*. LifeWatch asserts it has provided allegations of both. Because we hold it pled sufficient circumstantial evidence of agreement here, we do not reach its direct evidence theory.

As the Supreme Court explained in detail in *Bell Atlantic Corp. v. Twombly*, ***HN5***[] to survive a motion to dismiss, a plaintiff must plead "enough factual matter (taken as true) to suggest that an agreement was made." *550 U.S. 544, 556-57, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. "[A]n allegation of parallel conduct and a bare assertion of conspiracy," such as "a conclusory allegation of agreement at some unidentified point," will not suffice. *Id.* Rather, "allegations of parallel conduct . . . must be placed in a context that raises a suggestion of a preceding agreement, not merely parallel conduct that could just as well be independent action." *Id. at 557*.

HN6[] For circumstantial evidence of an agreement, then, a plaintiff must allege both parallel conduct and something "more," which we have sometimes called a "plus factor." *Ins. Brokerage, 618 F.3d at 321*. This "more" **[**10]** could include evidence (1) "that the defendant had a motive to enter into a . . . conspiracy," (2) "that the defendant acted contrary to its interests," or (3) "implying a traditional conspiracy." *Id. at 321-22* (quoting *In re Flat Glass Antitrust Litig., 385 F.3d 350, 360 (3d Cir. 2004))*. In cases involving concentrated markets like oligopolies or oligopsonies—where a small number of sellers or buyers of a particular product dominate the market—we have recognized that competitors are more likely to be influenced by each other's behavior even without agreeing to act in concert. For example, "[o]ne oligopolist may refrain from lowering its price because it fears, indeed knows, that its rivals will match it." Phillip E. Areeda & Herbert Hovenkamp, *Fundamentals of* ***Antitrust Law*** ("*Fundamentals*") § 14.10[G] n.24 (4th ed. Supp. 2017). In those cases we de-emphasize the first two types of evidence, which "largely restate [that] phenomenon of interdependence," *Valspar Corp. v. E.I. Du Pont De Nemours & Co., 873 F.3d 185, 193 (3d Cir. 2017)* (quoting *Flat Glass, 385 F.3d at 360*), often called "conscious parallelism," *see id.* We focus instead on the third, *id.*, which is "'non-economic evidence "that there was an actual, manifest agreement . . . ,"' which may include 'proof that the defendants got together and exchanged assurances of common action or otherwise adopted a common plan even though **[**11]** no meetings, conversations, or exchanged documents are shown,'" *Ins. Brokerage, 618 F.3d at 322* (quoting *Flat Glass, 385 F.3d at 361*).

LifeWatch pled parallel conduct. The Complaint quotes the provision in the Association's model policy that recommends the Blue Plans deny telemetry monitor coverage. It then asserts the Blue Plans adopted the model policy's approach with near total uniformity and references their use of similar or identical language to deny coverage of telemetry monitors.

Blue Cross proposes that we end our analysis here because the Complaint alleges, at best, no more than parallel conduct. In particular, Blue Cross cites the alleged **[*334]** higher price of telemetry monitors relative to event monitors (but lower price relative to insertable monitors) as providing all the Plans an independent basis for denying coverage. Indeed, if LifeWatch had alleged *only* that the Association and the Plans reached the same telemetry monitor coverage decisions *en masse* multiple years in a row, and that telemetry monitors are more expensive than some other treatment options, Blue Cross might have the better argument. However, LifeWatch also pled something "more": evidence implying a traditional conspiracy.

As an initial matter, the Complaint states that **[**12]** the Association's model policy is set during meetings several times a year, where a panel reviews the votes of all Blue Plans regarding whether to cover particular treatments. As noted, this model policy, which the Blue Plans participate in creating, recommends denying coverage of telemetry monitors as either not medically necessary or investigational. Blue Cross does not dispute this description of the model policy or its creation. Instead, it argues that its member Plans are not bound to follow the model policy; in fact, it explicitly disclaims that notion in its text. Thus, according to Blue Cross, the Plans must make wholly independent decisions regarding which treatments are medically necessary.

This argument apparently misunderstands the nature of the alleged agreement, which is not contained within the model policy's text.[5] LifeWatch claims instead that the Blue Plans agreed with each other and the Association that they would *substantially comply with* the model policy. It dubs this agreement the "Uniformity Rule." The Association then allegedly enforces the Plans' conformance with the model policy through audits. If a Plan strays too far from the model, it could face sanctions, **[**13]** including losing the right to use the Blue Cross name.

Even if these allegations were too conclusory to tip the scales in favor of plausibility, the Complaint then provides a particular example of the Uniformity Rule's enforcement. Highmark initially contracted with LifeWatch to deem telemetry monitors medically necessary and cover prescriptions for them. Under that contract, Highmark covered claims for telemetry monitors submitted both by Highmark subscribers and by subscribers to other Blue Plans; those Blue Plans would then reimburse Highmark in some fashion. However, allegedly under pressure by the other Blue Plans and the Association, it stopped paying for claims from non-Highmark subscribers. As we and other courts have observed, ***HN7***[] "[c]oncerted action is established . . . [by] proof of a causal relationship between pressure from one conspirator and an anticompetitive decision of another conspirator."[6] *Gordon v. Lewistown Hosp., 423 F.3d 184, 207 (3d Cir. 2005)*; *see also* *Schachar v. Am. Acad. of Ophthalmology, Inc., 870 F.2d 397, 397-99 (7th Cir. 1989)*.

That so many sophisticated third parties allegedly view telemetry monitors as medically necessary or meeting the standard of care further undercuts Blue Cross's theory that nearly three dozen Plans independently made the opposite determination **[*335]** for 10 consecutive years. As **[**14]** noted, according to the Complaint, other large insurers, including Aetna as well as Medicaid and Medicare, cover telemetry monitors as medically necessary. Multiple medical studies reached similar conclusions. In states that mandate independent, expert review of appeals of insurance coverage denials, LifeWatch also funded many costly patient appeals of telemetry monitor denials. It allegedly prevailed in an overwhelming number of cases; the Complaint identifies 20 successful appeals between 2010 and 2012 decided by at least six different independent review boards. The Complaint indicates that many, if not all, were appeals of a Blue Plan's denial. The review boards in several cases determined that telemetry monitors were clinically necessary or a standard of care.

Viewed in the light most favorable to LifeWatch, *see, e.g.,* *In re Avandia Mktg., Sales Practices & Prod. Liab. Litig., 804 F.3d 633, 638 (3d Cir. 2015)*, these allegations make an agreement among the Defendants plausible. While a claim based on parallel—even consciously parallel—conduct alone would be insufficient to survive dismissal, *see* *Ins. Brokerage, 618 F.3d at 321*, the Complaint provides more. It alleges the type of agreement reached by the Blue Plans and the Association, an auditing mechanism by which the agreement is enforced, a particular **[**15]** time when a Blue Plan declined to cover telemetry monitors due to pressure from the Association and other Plans, and the improbability that the same coverage decision would be reached by nearly all the Blue Plans independently.[7] The agreement and enforcement mechanism pled here provide the "reasonably founded hope that the [discovery] process will reveal relevant evidence." *Twombly, 550 U.S. at 559*; *see also* *Ins. Brokerage, 618 F.3d at 324*.

B. Unreasonable Restraint of Trade

---

[5] As we have noted in the criminal conspiracy context, "common sense suggests, and experience confirms, that illegal agreements are rarely, if ever, reduced to writing or verbalized with the precision that is characteristic of a written contract." *United States v. McKee, 506 F.3d 225, 238 (3d Cir. 2007)*.

[6] Although LifeWatch's claim against Highmark has been dismissed, it and other unsued Blue Plans remain alleged coconspirators to the purported agreement. Thus their conduct can be evidence of the agreement's existence.

[7] The Complaint also gestures at a motive to conspire when it describes the Defendants' shared goal to save costs and increase profits by shifting demand to less expensive treatment options. However, in our case law the mere desire to shift demand to lower cost devices is not a plus factor establishing an agreement without further evidence "of concerted, collusive conduct." *Burtch, 662 F.3d at 229* (quoting *In re Baby Food Antitrust Litig., 166 F.3d 112, 137 (3d Cir. 1999))*. "In a free capitalistic society, all entrepreneurs have a legitimate understandable motive to increase profits." *Id.* (same).

To state a *Section 1* claim, LifeWatch must also plead that Blue Cross's agreement has unreasonably restrained trade. *See* *NYNEX Corp. v. Discon, Inc., 525 U.S. 128, 133, 119 S. Ct. 493, 142 L. Ed. 2d 510 (1998)* ("[T]he *Sherman Act's* prohibition of '[e]very' agreement in 'restraint of trade' . . . prohibits only agreements that *unreasonably* restrain trade." (emphasis in original) (citation omitted)). An "unreasonable" restraint is one that inhibits competition in the relevant market. *Eichorn v. AT & T Corp., 248 F.3d 131, 138 (3d Cir. 2001)*.

HN8[] A restraint among competitors—called "horizontal," as opposed to "vertical" restraints on market participants at different points in a product's supply chain—is more rigorously scrutinized for an antitrust violation because it could more easily facilitate competitive harms, such as the exclusion of rivals, price fixing, or the consolidation of market power. *See* Areeda & Hovenkamp, **[**16]** *Fundamentals, supra*, § 14.11[A]. In particular, "when a firm exercises monopsony power pursuant to a conspiracy, its conduct is subject to more rigorous scrutiny . . . ." *West Penn, 627 F.3d at 103*. "[U]nlike independent action, concerted activity inherently is fraught with anticompetitive **[*336]** risk insofar as it deprives the marketplace of independent centers of decisionmaking that competition assumes and demands." *Id.* (internal quotation marks omitted). Indeed, some horizontal restraints, including price fixing and market division, are considered anticompetitive by their very nature. *NYNEX Corp., 525 U.S. at 133-34* (citing *United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 218, 60 S. Ct. 811, 84 L. Ed. 1129* (horizontal price-fixing), and *Palmer v. BRG of Ga., Inc., 498 U.S. 46, 49-50, 111 S. Ct. 401, 112 L. Ed. 2d 349 (1990)* (per curiam) (horizontal market division)). These are treated as *per se* Sherman Act *Section 1* violations. *Id.*

HN9[] However, many horizontal restraints are not so clearly harmful to competition. *Deutscher Tennis Bund v. ATP Tour, Inc., 610 F.3d 820, 829-30 (3d Cir. 2010)*. Instead, or in addition, they may, for example, facilitate the creation of new products, improve efficiencies, or lead to lower consumer costs. A restraint that is not *per se* unreasonable is analyzed under some form[8] of a "rule of reason" burden-shifting framework, which seeks to determine whether the restraint's harmful effects are outweighed by any procompetitive justifications and, if so, whether there are less restrictive alternatives. ***[**17]*** *Id.; see also* *United States v. Brown Univ., 5 F.3d 658, 678-79 (3d Cir. 1993)*.

LifeWatch claims the Blue Plans are engaged in a horizontal, concerted refusal to deal. The parties agree that this conduct should be analyzed ***HN10***[] under the rule of reason framework.[9] Thus LifeWatch can satisfy the unreasonable-restraint element in two ways. It can plead "'actual detrimental effects [on competition],' . . . such as reduced output, increased prices, or decreased quality in the relevant market." *Am. Express Co., 138 S. Ct. at 2284* (quoting *Ind. Fed'n of Dentists, 476 U.S. at 460*). Alternatively, it can plead that the Blue Cross Defendants have "market power[,] plus some evidence that the challenged restraint harms competition." *Id.* Under either approach, "courts usually cannot properly apply the rule of reason without an accurate definition of the relevant market" because, in most cases, a court must "conduct a fact-specific assessment of 'market power and market structure . . . to assess the [restraint]'s actual effect' on competition." *Id. at 2284-85* (alteration in original) (quoting *Copperweld Corp. v. Indep. Tube Corp., 467 U.S. 752, 768, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984))*.

---

[8] Some horizontal restraints may warrant only a "quick look," rather than a complete rule-of-reason analysis. *See* *F.T.C. v. Ind. Fed'n of Dentists, 476 U.S. 447, 459, 106 S. Ct. 2009, 90 L. Ed. 2d 445 (1986)*; *see also* *Ohio v. Am. Express Co., 138 S. Ct. 2274, 2285 n.7, 201 L. Ed. 2d 678 (2018)*. A quick look "presum[es] competitive harm without detailed market analysis" because "the anticompetitive effects on markets and consumers are obvious." *Deutscher Tennis Bund, 610 F.3d at 832*. It is inappropriate if "'the contours of the market' . . . are not 'sufficiently well-known or defined to permit the court to ascertain without the aid of extensive market analysis whether the challenged practice impairs competition . . . .'" *Id.* (quoting *Worldwide Basketball &Sport Tours, Inc. v. Nat'l Collegiate Athletic Ass'n., 388 F.3d 955, 961 (6th Cir. 2004))*.

[9] We note that some group boycotts, which are similar to concerted refusals to deal, are treated as unlawful *per se.* *Ind. Fed'n of Dentists, 476 U.S. at 458*. But "the category of restraints classed as group boycotts is not to be expanded indiscriminately, and the *per se* approach has generally been limited to cases in which firms with market power boycott suppliers or customers in order to discourage them from doing business with a competitor," *id.*, which LifeWatch does not allege here.

[*337] The parties do not dispute that LifeWatch must allege a relevant market in this case. We thus begin with those allegations, which provide the context for both its assertions of anticompetitive effects and the District Court's rationale **[**18]** in granting Blue Cross's motion to dismiss.

1. Market Definition

HN11[] The relevant market in a *Section 1* case is "the area of effective competition . . . within which significant substitution in consumption or production occurs." *Am. Express Co., 138 S. Ct. at 2285* (internal quotation marks omitted). In other words, "the outer boundaries of a relevant market are determined by reasonable interchangeability of use" of a particular product within a particular geographic area. *Queen City Pizza, Inc. v. Domino's Pizza, Inc., 124 F.3d 430, 437, 442 (3d Cir. 1997)*. In addition to substitutability or interchangeability, "[w]e also look to . . . cross-elasticity of demand, which is defined as '[a] relationship between two products, usually substitutes for each other, in which a price change for one product affects the price of the other.'" *Mylan Pharms. Inc. v. Warner Chilcott Pub. Ltd. Co., 838 F.3d 421, 435-36 (3d Cir. 2016)* (quoting *Black's Law Dictionary* 458 (10th ed. 2014)).

Critically, in a buyer-side conspiracy case, seller rather than consumer or purchaser behavior is the focus. *Todd v. Exxon Corp., 275 F.3d 191, 201 (2d Cir. 2001)* (Sotomayor, J.) (citing Roger D. Blair & Jeffrey L. Harrison, *Antitrust Policy and Monopsony*, *76 Cornell L. Rev. 297, 324 (1991)*). "[The] market is comprised of buyers who are seen by sellers as being reasonably good substitutes." *Campfield v. State Farm Mut. Auto. Ins. Co., 532 F.3d 1111, 1118 (10th Cir. 2008)* (quoting *Todd, 275 F.3d at 202*). Thus a court should be wary of applying the market-definition analysis for sellerside conspiracies "mechanically in the **[**19]** context of monopsony or oligopsony." *Todd, 275 F.3d at 202*.

HN12[] A complaint may be properly dismissed if it defines the relevant market without reference to interchangeability or cross-elasticity of demand or if it "alleges a proposed relevant market that clearly does not encompass all interchangeable substitute products even when all factual inferences are granted in plaintiff's favor . . . ." *Queen City Pizza, 124 F.3d at 436*. However, absent such obvious oversights, courts are cautious before dismissing for failure to define a relevant market. *See* *Todd, 275 F.3d at 199-200* (collecting cases). Ultimately the relevant market must "both correspond to the commercial realities of the industry and be economically significant." *Brown Shoe Co. v. United States, 370 U.S. 294, 336-37, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)* (internal quotation omitted). That is why, "in most cases, proper market definition can be determined only after a factual inquiry into the commercial realities faced by consumers" or purchasers, in seller-side conspiracies, or sellers, in buyer-side conspiracies. *Queen City Pizza, 124 F.3d at 436*; *see also* *Todd, 275 F.3d at 199-200* ("Because market definition is a deeply fact-intensive inquiry, courts hesitate to grant motions to dismiss for failure to plead a relevant product market."). Our case deals with the latter: commercial realities faced by medical device sellers seeking purchases. For example, **[**20]** these might be direct, out-of-pocket purchases by the end-user patients, patient purchases funded by a health insurer intermediary, or patient purchases reimbursed by a health insurer after the fact.

HN13[] A plaintiff bears the burden of defining both a relevant geographic and a relevant product market. The Complaint asserts several relevant markets here: national and regional markets for the sale of **[*338]** health insurance plans and a national market for the purchase of outpatient cardiac monitors. However, LifeWatch forfeited its insurance-market theories by not fully briefing them on appeal. *Fed. R. App. P. 28(a)(8)(A)*; *Barna v. Bd. of Sch. Directors of Panther Valley Sch. Dist., 877 F.3d 136, 145 (3d Cir. 2017)*. When pressed during oral argument, it then explicitly waived them. We therefore turn to the only market definition still before us: the national outpatient cardiac monitor market.

The parties do not dispute that the alleged market is national, and the Complaint alleges commercial realities to support a nationwide market. Patients nationwide suffer arrhythmias that may require treatment with cardiac monitors. Telemetry device firms and other unspecified monitoring-device firms allegedly sell their products nationwide. Insurers on the buyer side that allegedly compensate sellers of cardiac monitors also **[**21]** operate nationally, including Medicaid and Medicare. The Association's model policy recommending that Blue Plans not pay for telemetry monitors is distributed nationally to each Blue Plan. And, as noted, the Blue Plans operating across the country allegedly cover 105 million Americans collectively, purportedly about half of all Americans with private insurance.

However, the parties vigorously dispute whether LifeWatch has pled a relevant product market. The focus of the parties' briefing on appeal is whether telemetry monitors compete with other types of monitors. According to LifeWatch, *all* outpatient cardiac monitor sellers compete within the same market. The Complaint repeatedly references an "outpatient cardiac monitor" market and describes the four categories of monitors that compete within it: telemetry, Holter, event, and insertable monitors.

Although its opinion does not say so outright, the District Court seemingly rejected that market when it dismissed LifeWatch's claim. It reasoned that the Blue Plans' alleged refusal to purchase telemetry monitors had no anticompetitive effects *among telemetry monitor providers* because it treated them all equally. *See LifeWatch Servs., 248 F. Supp. 3d at 649*. Blue Cross argues **[**22]** the District Court implicitly, and correctly, held that LifeWatch's claimed product market was implausible and therefore adopted a telemetry-monitor-only market for purposes of its anticompetitive-effects analysis.

Read in the light most favorable to LifeWatch, however, the Complaint alleges competition among all outpatient cardiac monitors such that they are plausibly within the same product market. All four of the alleged categories of monitors capture the same type of data from a patient's heart. They capture it for the same purpose: to identify and treat cardiac arrhythmias. The principal harm LifeWatch alleges is that Blue Cross is shifting demand to other outpatient cardiac monitors—presumably conduct that would be impossible if the monitors were not interchangeable to some relevant degree. Indeed, LifeWatch claims many doctors have given up prescribing telemetry monitors and instead rely exclusively on other cardiac monitors to treat their patients. The Complaint also quotes a medical study by the American Heart Association recommending telemetry monitors alongside other cardiac monitors to treat certain conditions.

Undoubtedly the Complaint alleges that certain monitors are less **[**23]** able to function in some areas than others, while others are costlier. It describes telemetry monitors as superior to Holter and event monitors in their ease of use, greater data capture, and ability to diagnose infrequent or incapacitating arrhythmias. It asserts that only **[*339]** telemetry monitors ought to be prescribed for patients with certain conditions.

Blue Cross argues these allegations are fatal to LifeWatch's claim because they establish that telemetry monitors are not reasonably interchangeable with other cardiac monitors. But differentiation is often present among competing products in the same market. For example, as we have long observed, different brands of cars may compete to provide a consumer's main transportation to and from work—and, depending on the circumstances, they may also compete with other modes of travel. *Queen City Pizza, 124 F.3d at 437*. "Many machines performing the same function—such as copiers, computers, or automobiles—differ not only in brand name but also in performance, physical appearance, size, capacity, cost, price, reliability, ease of use, service, customer support, and other features." Areeda & Hovenkamp, *Fundamentals, supra*, § 5.11[A]. "Nevertheless, they generally compete with one another sufficiently that **[**24]** the price of one brand is greatly constrained by the price of others." *Id.*

Beyond the question of competition among cardiac monitors, however, there is apparently a more fundamental problem with the District Court's reasoning and Blue Cross's arguments on appeal. The underlying question driving the unreasonable-restraint analysis in a buyer-side conspiracy case is whether the defendants' *purchasing power* is constrained by competition from other purchasers in the relevant market. Thus, from the perspective of a seller, the interchangeability that matters is for *purchasers* of outpatient cardiac monitors.

Once again, as LifeWatch argues, the Complaint alleges sufficient facts to survive a motion to dismiss. It notes that sellers of medical devices like LifeWatch "are often small and highly dependent on a limited number of products," suggesting they cannot easily change their products or expand their offerings to induce a disinterested buyer to purchase from them.[10] Third Am. Compl. ¶ 63. It also plausibly alleges that health insurers are gatekeepers controlling patient purchases in the market. According to the Complaint, it is exceedingly rare for a patient to pay for a medical device out **[**25]** of pocket. It describes in detail the difficulties patients face in obtaining outpatient cardiac monitors not covered by their insurers, including the opaque, costly appeals process for coverage denials and that patients are often locked into whatever health plan their employer sponsors. Thus it is fair to infer that individual consumers do not constrain the Blue Plans' ability to control purchases or purchase prices. The Complaint acknowledges that other insurers like Aetna, Medicaid, and Medicare also fund patient purchases of outpatient cardiac monitors. It also describes the prohibitively high entry barriers to the health insurance business. According to these allegations, only established insurers effectively control purchases of outpatient cardiac monitors.

In this context, we conclude the Complaint plausibly states that the Blue Plans compete with other insurers, but not individual consumers, in a national market for **[*340]** the purchase of outpatient cardiac monitors.

2. Anticompetitive Effects

Armed with the proper market definition, the unreasonable-restraint analysis becomes straightforward. The Complaint alleges various "actual anticompetitive effects," which, as noted, could include **[**26]** "reduction of output, increase in price, or deterioration in quality of goods and services." *Deborah Heart & Lung Ctr. v. Virtua Health, Inc., 833 F.3d 399, 403 (3d Cir. 2016)* (quoting *Angelico v. Lehigh Valley Hosp., Inc., 184 F.3d 268, 276 (3d Cir. 1999))*.

According to the Complaint, the Blue Plans refuse to pay for telemetry monitors "not as a result of independent decisionmaking, but pursuant to a conspiracy" with each other and the Association. *See West Penn, 627 F.3d at 104*. We have held in similar cases that it is "certainly plausible" for this sort of agreement to "unreasonably restrain[] trade." *Id.* "Such shortchanging poses competitive threats similar to those posed by conspiracies among buyers to fix prices . . . and other restraints that result in artificially depressed payments to suppliers—namely, suboptimal output, reduced quality, allocative inefficiencies, and (given the reductions in output) higher prices for consumers in the long run." *Id.* (citation omitted).

Indeed, these are the anticompetitive effects LifeWatch claims. According to the Complaint, Blue Cross's concerted denial of telemetry monitor coverage has harmed consumers by reducing demand for and output of more effective devices, by interfering with a patient's choice of medical treatment, and by reducing the quality of cardiac monitors in general. LifeWatch alleges the restraint artificially **[**27]** shifts demand from telemetry monitors to lower quality substitutes. It discourages physicians and their patients from choosing the most appropriate treatment. Further, physicians, who typically do not know which insurance a patient has, are allegedly deterred from prescribing telemetry monitors altogether, even if it is the preferred treatment for patients whose insurance would cover it. They simply prescribe a cardiac monitor that will certainly be covered, rather than risk discovering later that the patient cannot afford a telemetry monitor. And because the restraint reduces current and anticipated demand for telemetry monitors in favor of older technology, it hinders research, development, and innovation in the market for cardiac monitors.

The District Court's reasoning that there can be no anticompetitive effects from a restraint that treats all sellers of telemetry monitors equally rests on a telemetry-monitor-only product market that was not alleged. A concerted refusal to deal with all sellers of telemetry monitors, regardless of its equality, may still restrain competition in the alleged market for the purchase of outpatient cardiac monitors.

---

[10] We note that LifeWatch allegedly began offering a lowerpriced "Elite" monitor after Highmark's decision to stop covering telemetry monitors in part. However, the Complaint suggests that the Elite product still costs LifeWatch the same amount to make and that it operates at less-than-optimal performance, as it is a standard telemetry monitor with some functions either not provided or disabled. LifeWatch's Elite monitor allegations illustrate that medical device sellers may not be able to change their inventories readily in response to changing buyer preferences. No allegations support a contrary inference.

The District Court also attempted **[**28]** to distinguish this case from *Blue Shield of Virginia v. McCready, 457 U.S. 465, 102 S. Ct. 2540, 73 L. Ed. 2d 149 (1982)*. But with our understanding of the alleged product market, those distinctions disappear. In *McCready*, a plaintiff patient denied coverage for psychological treatment brought a class action against Blue Shield health insurance companies and a group of psychiatrists for allegedly agreeing "to exclude and boycott clinical psychologists from receiving compensation under the Blue Shield plans." *457 U.S. at 470*. In analyzing whether the patient's injury was of a type the antitrust laws were intended to prevent, the Supreme Court described the alleged agreement as an "anticompetitive scheme." *Id. at 483*. **[*341]** "Blue Shield sought to induce its subscribers into selecting psychiatrists over psychologists" by "refusing to reimburse subscribers for psychotherapy performed by psychologists, while providing reimbursement for comparable treatment by psychiatrists." *Id. at 467, 483-84*. A subscriber presented with this alleged "Hobson's choice . . . between visiting a psychologist and forfeiting reimbursement, or receiving reimbursement by forgoing treatment by the practitioner of their choice" was injured by "that which makes the defendants' acts unlawful"—*i.e.*, by their anticompetitive effects. *Id. at 484*.

Similarly, LifeWatch **[**29]** claims that the Blue Plans induce doctors and insureds to use other outpatient cardiac monitors instead of telemetry monitors by refusing to fund telemetry monitor prescriptions while funding comparable treatment with other monitors. *See id. at 483-84*. The District Court suggested there can be no "Hobson's choice" as in *McCready* where the Blue plans "do not cover *any* telemetry device supplied by *any* provider." *LifeWatch Servs., 248 F. Supp. 3d at 648*. But the "Hobson's choice" here is not among telemetry monitor brands but among all cardiac monitors—just as in *McCready* the choice was not among psychologists but among all psychotherapy providers.

Because LifeWatch has alleged actual anticompetitive effects in the relevant market, the unreasonable restraint element of the *Section 1* claim is satisfied directly. We thus need not consider whether LifeWatch also satisfied it indirectly by alleging Blue Cross's market power over the purchase of outpatient cardiac monitors. *See Am. Express Co., 138 S. Ct. at 2284*.

C. Antitrust Standing

In the preceding analysis we concluded that LifeWatch pled a *Section 1* violation. However, its claim could nonetheless fail if it lacks antitrust standing to bring suit under the *Clayton Act*.

HN14[] *Sections 4* and *16* of the Clayton Act enable private plaintiffs to sue for treble damages **[**30]** for and to enjoin antitrust injuries. *15 U.S.C. §§ 15*, *26*. While the statutory language of those provisions is broad, and apparently requires only constitutional standing to bring suit,[11] the Supreme Court has held that private plaintiffs must also have "antitrust standing." *See Hanover 3201 Realty, LLC v. Vill. Supermarkets, Inc., 806 F.3d 162, 171 (3d Cir. 2015)*. The Court articulated several factors to consider when analyzing whether a plaintiff has such standing. *Associated Gen. Contractors of Cal., Inc. v. Cal. State Council of Carpenters, 459 U.S. 519, 538, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)*. We have summarized these factors as:

> (1) the causal connection between the antitrust violation and the harm to the plaintiff and the intent by the defendant to cause that harm, with neither factor alone conferring standing; (2) whether the plaintiff's alleged injury is of the type for which the antitrust laws were **[*342]** intended to provide redress; (3) the directness of the injury, which addresses the concerns that liberal application of standing principles might produce

[11] Standing is a term for "[a] party's right to make a legal claim or seek judicial enforcement of a duty or right." *Black's Law Dictionary* 1625 (10th ed. 2014). Constitutional standing derives from Article III of the U.S. Constitution, which limits the federal court's "judicial power," or jurisdiction, to deciding "cases" or "controversies." *U.S. Const. art. III, § 2*; *see also Spokeo, Inc. v. Robins, 136 S. Ct. 1540, 1547, 194 L. Ed. 2d 635 (2016)*. For a federal court to have jurisdiction over any claim, "[t]he plaintiff must have (1) suffered an injury in fact, (2) that is fairly traceable to the challenged conduct of the defendant, and (3) that is likely to be redressed by a favorable judicial decision." *Id. at 1547*.

> speculative claims; (4) the existence of more direct victims of the alleged antitrust violations; and (5) the potential for duplicative recovery or complex apportionment of damages.

In re Lower Lake Erie Iron Ore Antitrust Litig., 998 F.2d 1144, 1165-66 (3d Cir. 1993).

The parties here dispute only whether LifeWatch alleged the second factor, antitrust injury, which "is a necessary but insufficient condition of antitrust **[**31]** standing." *Hanover* *3201 Realty, 806 F.3d at 171*. It seeks to ensure that the antitrust laws are enforced to protect competition and not individual competitors. *Brunswick Corp. v. Pueblo Bowl—O—Mat, Inc., 429 U.S. 477, 488, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*. ***HN15***[] An antitrust injury (1) "flows from that which makes [the] defendants' acts unlawful" and (2) "is an injury of the type the antitrust laws were intended to prevent." *West Penn, 627 F.3d at 101* (quoting *Brunswick Corp., 429 U.S. at 489*).

To analyze the first prong of antitrust injury, "we must examine the causal connection between the purportedly unlawful conduct and the injury." *City of Pittsburgh v. W. Penn Power Co., 147 F.3d 256, 265 (3d Cir. 1998)*. Blue Cross argues that intervening factors, such as the Plan's independent ability to decline coverage of telemetry monitors, a doctor's choice not to prescribe telemetry monitors, and a patient's desire for alternative treatments, "'cut[] the causal chain' and convert any claim of causation into 'a speculative exercise.'" Appellee Br. 32 (quoting *City of Pittsburgh, 147 F.3d at 267-68*).

We find this causation argument unpersuasive. The Complaint asserts that the Plans' near universal decision to deny coverage of telemetry monitors would not occur without enforcement of the Uniformity Rule—as evidenced by other insurers' coverage, independent arbitrators' decisions that they should be covered, and scientific studies finding them effective **[**32]** and in some circumstances preferable. It also alleges that doctors are deterred from prescribing telemetry monitors because of the Blue Plans' decision not to cover them and the hassle caused by not knowing whether a patient's insurer will deny coverage. And it alleges that the Uniformity Rule insulates the Plans from demand for telemetry treatment. This sufficiently pleads a causal link between LifeWatch's injury—lost profits from depressed telemetry monitor sales—and the Plans' denial of telemetry monitor coverage due to the Uniformity Rule. *See* *McCready, 457 U.S. at 480-81, 483* (noting providers, in addition to consumers, of a medical treatment would have a claim for "Blue Shield's selective refusal to reimburse" (internal quotation marks omitted)); *cf.* *City of Pittsburgh, 147 F.3d at 267* (finding no causal link where plaintiff's injury was due to regulations preventing competition between defendant utility companies, not the defendants' proposed merger).

Likewise, LifeWatch's alleged injury due to anticompetitive effects in the outpatient cardiac monitor market is "of the type" the antitrust laws were meant to prevent. ***HN16***[] "As a general matter, the class of plaintiffs capable of satisfying the antitrust-injury requirement is limited to consumers and **[**33]** competitors in the restrained market . . . and to those whose injuries are the means by which the defendants seek to achieve their anticompetitive ends." *West Penn, 627 F.3d at 102* (internal citations omitted). Denying coverage for LifeWatch's **[*343]** telemetry device was the means by which the Blue Plans and the Association depressed demand for telemetry monitors in the outpatient cardiac monitor market. Its ability to compete as a seller of outpatient cardiac monitors has been allegedly hindered by the Uniformity Rule. *See* *McCready, 457 U.S. at 483-84* (noting where insureds "were compelled to choose" between a covered treatment provider and one for whom Blue Shield denied coverage, the denied treatment provider also had antitrust injury). Its injury "reflect[s] the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation." *West Penn, 627 F.3d at 101* (quoting *Brunswick Corp., 429 U.S. at 489*).

Blue Cross counters that no competition-reducing conduct was alleged because all telemetry monitor providers are treated equally; therefore LifeWatch's injury is not "of the type" the antitrust laws seek to prevent. Of course, this only reiterates the District Court's implicit product market analysis with which we have already disagreed.

In sum, LifeWatch sufficiently **[**34]** pled both elements of antitrust injury, and its antitrust standing is not otherwise in dispute.

D. *McCarran-Ferguson Act*

Finally, LifeWatch's claim can only survive Blue Cross's motion to dismiss if the *McCarran-Ferguson Act*, *15 U.S.C. §§ 1011-1015*, does not exempt Blue Cross from antitrust liability. As Blue Cross acknowledged at oral argument, ***HN17***[] a defendant bears the burden of establishing its immunity under that Act. *See* *Doctors, Inc. v. Blue Cross of Greater Phila., 490 F.2d 48, 50 n.2 (3d Cir. 1973)* ("The motions to dismiss were filed before either defendant submitted an answer. As a result, the essential facts necessary to support this claim of immunity have not as yet been pleaded."); *Grp. Life & Health Ins. Co. v. Royal Drug Co., 440 U.S. 205, 216, 99 S. Ct. 1067, 59 L. Ed. 2d 261 (1979)* (analyzing the Act's exemption according to what the defendants demonstrated).

On the heels of a Supreme Court ruling that "insurance transactions were subject to federal regulation under the *Commerce Clause*, and that the antitrust laws in particular, were applicable to them," Congress passed the *McCarran-Ferguson Act* to clarify that regulation of the "business of insurance" should be relegated to the states. *Sec. & Exch. Comm'n v. Nat'l Sec., Inc., 393 U.S. 453, 458, 89 S. Ct. 564, 21 L. Ed. 2d 668 (1969)*. However, ***HN18***[] the Act provides that the *Sherman Act* still applies to "the business of insurance to the extent that such business is not regulated by State Law" and to "agreement[s] to boycott, coerce, or intimidate." **[**35]** *15 U.S.C. §§ 1012(b)*, *1013(b)*. Therefore, for Blue Cross to be exempted from liability in this case, its challenged conduct "(1) must constitute the business of insurance, (2) must be regulated by state law, and (3) must not amount to a boycott, coercion, or intimidation." *Union Labor Life Ins. Co. v. Pireno, 458 U.S. 119, 124, 102 S. Ct. 3002, 73 L. Ed. 2d 647 (1982)*. The parties agree that Blue Cross has satisfied the third element but dispute whether it can satisfy the first two.

Because it dismissed on other grounds, the District Court did not address whether Blue Cross has shown it is exempt. We do not decide the issue and leave it for the Court's consideration on remand.

III. Conclusion

LifeWatch plausibly pled an agreement between the Blue Plans and the Association that unreasonably restrains trade in the national market for outpatient cardiac monitors. It pled that its injury stems from **[*344]** the competitive harms caused by this agreement. Thus LifeWatch has stated a Sherman Act *Section 1* claim.

Blue Cross nonetheless may be exempt from liability under the *McCarran-Ferguson Act*, a question the District Court did not reach in its opinion. We therefore reverse its dismissal and remand for it to consider Blue Cross's *McCarran-Ferguson Act* argument.

Opinion

ORDER RE: MOTION TO DISMISS; MOTION TO AMEND; AND ADMINISTRATION MOTION FOR RELIEF FROM SCHEDULING ORDER

Re: Dkt. Nos. 10, 15, 18

Plaintiff Victoria Card filed this civil action in San Francisco Superior Court alleging various claims arising out of a business arrangement between Plaintiff and Defendants the Ralph Lauren Corporation, Ralph Lauren Company West, LLC, and E.J Victor Inc. Defendants thereafter removed the action to federal court based on diversity of citizenship and federal question jurisdiction, *28 U.S.C. §§ 1331*, *1332*. (Dkt. No. 1.) Defendants then moved to dismiss the claim for failure to state a claim. (Dkt. No. 10.) Plaintiff failed to timely file an opposition or statement **[*2]** of non-opposition, but the parties subsequently agreed to a new briefing schedule. (Dkt. No. 13.) Plaintiff again missed the deadline to file her opposition, and instead, filed a motion to amend her complaint three days after her opposition brief was due. (Dkt. No. 15.) Defendants' motion to dismiss, Plaintiff's motion to amend, and Plaintiff's motion for administrative relief from the case management schedule are now pending before the Court. Having considered the parties' briefs, and their joint case management conference statement, the Court concludes that oral argument is unnecessary. *See* *N.D. Cal. Civ. L.R. 7-1(b)*. For the reasons explained below, the Court GRANTS IN PART and DENIES IN PART Plaintiff's motion for leave to amend, and DENIES Defendants' motion to dismiss and Plaintiff's motion for administrative relief as MOOT.[1]

BACKGROUND

A. Allegations of the Complaint

The Court briefly summarizes the allegations of the complaint. While Plaintiff's proposed First Amended Complaint added several pages of additional factual allegations, the general facts as alleged between the two complaints are consistent. The citations here are to the proposed First Amended Complaint. (Dkt. No. 16-2.)

Plaintiff **[*3]** Victoria Card owned a business in San Francisco from 2006 through 2015 called Pacific Heights Place. (*Id.* at ¶ 2.) Prior to that, Plaintiff owned a business from 2001 through 2005 called Bluestone Main. (*Id.*) Both businesses sold home furnishing products such as furniture, lighting, fabrics and accessories. (*Id.* at ¶ 1.) From 2001 to 2015, Plaintiff had a "contractual and partnership relationship" with the Ralph Lauren Corporation to act as an approved dealer of Ralph Lauren Home products. (*Id.* at ¶ 8.) In 2015, Ralph Lauren terminated Plaintiff's account "thereby killing Plaintiff's business, which she had built up over 14 years, thereby causing her great economic and non-economic damages." (*Id.*) This termination was preceded by a series of interactions between Plaintiff and various representatives of Ralph Lauren as well as entities associated with the Ralph Lauren Corporation including E.J. Victor, which manufactures Ralph Lauren's products. (*Id.* at ¶¶ 5, 20-83.)

For example, in 2011, Plaintiff became aware that Defendants were offering discounts to other vendors such as One Kings Lane that they was not offering to her which led to a loss of business in 2012. (*Id.* at ¶¶ 24-28.) When **[*4]** Plaintiff raised this issue, Defendants agreed to allow Plaintiff to buy product at the same price it was offering to One Kings Lane. (*Id.* at ¶ 29.) However, in November 2012, Plaintiff discovered that Defendants were not honoring this agreement. (*Id.* at ¶ 35.) Around this same time, E.J. Victor imposed a new requirement that Plaintiff pre-pay 50 percent of any order. (*Id.* at ¶ 34.)

Then, in April 2013, Plaintiff received an email from Ralph Lauren advising her that she was no longer allowed to sell Ralph Lauren products on her website outside of "authorized distribution channels" and imposing other restrictions. (*Id.* at ¶ 37.) Six months later, Plaintiff was told by a representative from a lighting company with whom she did business that he had heard her account with Ralph Lauren Home had been closed and that he was going to

[1] Both parties have consented to the jurisdiction of a magistrate judge pursuant to *28 U.S.C. § 636(c)*. (Dkt. Nos. 6 & 9.)

close her account with the lighting company as a result. (*Id.* at ¶¶ 41-42.) Late 2013, Plaintiff received a call from William Li of Ralph Lauren during which he raised his voice and threatened to close her account three different times. (*Id.* at ¶¶ 47-48.) Plaintiff then contacted Ian Sears, the President of Ralph Lauren Home, to follow up on her call with Mr. Li. **[*5]** (*Id.* at ¶53.) Mr. Sears suggested that Ralph Lauren had the right to cancel her account because she had not upheld the high standard of quality and prestige associated with Ralph Lauren products and her website continued to contain impermissible information regarding Ralph Lauren products. (*Id.* at ¶ 54.) In response, Plaintiff contacted David Lauren and a few days later Plaintiff's account was "re-opened" pending reapplication. (*Id.* at ¶¶ 55-56.) Although Plaintiff completed the reapplication, she questioned whether any other retailer had been put through such an onerous process. (*Id.* at ¶¶ 60-61.)

A year later, in November 2014, Plaintiff published her new revised website "to great praise by the Lauren Defendant partners." (*Id.* at ¶ 67.) However, Defendants did not authorize Plaintiff to use the name "Ralph Lauren" in advertising, which "began swiftly to affect Plaintiff's business towards a standstill." (*Id.* at ¶¶ 70-73.)

In May of 2015, Plaintiff received an email from Nicholas Manville, Ralph Lauren Home's Vice President of Global Business Development and Merchandising, informing her that her account was closed because they had re-evaluated their wholesale and e-commerce network **[*6]** and decided to make changes to their distribution. (*Id.* at ¶ 76.)

B. Procedural Background

Two years later, in May 2017, Plaintiff filed suit in San Francisco Superior Court. (Dkt. No. 1-1.) Plaintiff alleged 11 claims for relief against Defendants, the Ralph Lauren Corporation, Ralph Lauren Company West, LLC, and E.J Victor Inc., including claims for: (1) breach of implied contract; (2) promises without intent to perform; (3) intentional misrepresentation; (4) breach of the covenant of good faith and fair dealing; (5) violation of fiduciary obligations; (6) intentional wrongdoing in violation of *California Civil Code § 1708*; (7) intentional infliction of emotional distress; (8) discrimination in violation of the Unruh Act; (9) violation of *California Business and Professions Code § 17200*; (10) violation of the Robinson-Patman Act; and (11) RICO.

Defendants were not served until March of 2018 at which point they removed this action to federal court based on diversity and federal question jurisdiction. (Dkt. No. 1.) Upon removal, Defendants moved to dismiss the complaint for failure to state a claim. (Dkt. No. 10.) Plaintiff filed to file a timely opposition, but the parties stipulated to an amended briefing schedule. (Dkt. No 13.) Plaintiff again failed to file **[*7]** her opposition, and instead, three days after her opposition was due she filed a motion to amend the complaint. (Dkt. No. 15.) Plaintiff's amended complaint pleads 11 claims for relief including: (1) breach of implied contract; (2) promises without intent to perform; (3) intentional misrepresentation; (4) breach of the covenant of good faith and fair dealing; (5) violation of fiduciary obligations; (6) interference with prospective advantage; (7) intentional infliction of emotional distress; (8) violation of the Robinson-Patman Act; (9) RICO; (10) discrimination in violation of the Unruh Act; and (11) violation of *California Business and Professions Code § 17200*.

The motion to amend is fully briefed. Plaintiff never filed an opposition to the motion to dismiss, but did file an ex parte request for leave to file a sur-reply in opposition after Defendants filed their reply. (Dkt. No. 22.) This ex parte request is DENIED as Plaintiff had ample opportunity to file an opposition to the motion to dismiss. Around the same time she filed the ex parte motion, Plaintiff filed an administrative motion for relief from the scheduling order. (Dkt. No. 18.)

DISCUSSION

There are three motions currently pending: (1) Defendants' motion to dismiss; (2) **[*8]** Plaintiff's motion to amend the complaint; and (3) Plaintiff's administrative motion for relief from the case scheduling order. The administrative motion is now moot as the parties have agreed to proceed with initial disclosures and that discovery will be stayed pending disposition of the pending motions. (Dkt. No. 25.) Of the two remaining motions, the Court first addresses the motion to amend because, if that motion is granted, then the motion to dismiss will be moot.

A. Plaintiff's Motion to Amend

Pursuant to *Federal Rule of Civil Procedure 15(a)*, once a responsive pleading has been filed, "a party may amend its pleading only with the opposing party's written consent or the court's leave." *Fed. R. Civ. P. 15(a)(2)*. The court should "freely give leave [to amend] when justice so requires," *Fed. R. Civ. P. 15(a)*, and "[t]his policy is to be applied with extreme liberality." *Eminence Capital, LLC v. Aspeon, Inc., 316 F.3d 1048, 1051 (9th Cir. 2003)*. In the absence of an "apparent reason," such as undue delay, bad faith, dilatory motive, prejudice to defendants, futility of the amendments, or repeated failure to cure deficiencies in the complaint by prior amendment, it is an abuse of discretion for a district court to refuse to grant leave to amend a complaint. *Foman v. Davis, 371 U.S. 178, 182, 83 S. Ct. 227, 9 L. Ed. 2d 222 (1962)*; *Lockheed Martin Corp. v. Network Solutions, Inc., 194 F.3d 980, 986 (9th Cir. 1999)*. These factors do not "merit equal weight," and "it is the consideration of **[*9]** prejudice to the opposing party that carries the greatest weight." *Eminence Capital, 316 F.3d at 1052*. "The party opposing leave to amend bears the burden of showing prejudice[,]" *Serpa v. SBC Telecomm'cns, Inc., 318 F. Supp. 2d 865, 870 (N.D. Cal. 2004)*, and generally of demonstrating why leave to amend should not be granted, *Genentech, Inc. v. Abbott Labs., 127 F.R.D. 529, 530-31 (N.D. Cal. 1989)*.

Here, there is no dispute that four of the five factors—undue delay, bad faith, prejudice, and previous amendment—weigh in favor of amendment. While Plaintiff delayed in filing her amended complaint until after the time for an amendment as of right, there is no suggestion that the delay was in bad faith. Rather, Plaintiff contends that upon review of the motion to dismiss, she decided that she should amend her complaint to add additional details bolstering her claims, but that it took longer than expected. Likewise, given that the case is in its early stages, any prejudice to Defendants is minimal, although the Court notes that Plaintiff's repeated failure to timely comply with deadlines has needlessly compounded motion practice on these matters. Finally, Plaintiff has not previously amended her complaint.

Defendants nonetheless insist that leave to amend would be futile because Plaintiff's proposed amended complaint fails to cure many of the original complaint's defects. **[*10]** The Court agrees in part. "The proper test to be applied when determining the legal sufficiency of a proposed amendment is identical to the one used when considering the sufficiency of a pleading challenged under *Rule 12(b)(6)*." *Nordyke v. King, 644 F.3d 776, 788 n.12 (9th Cir. 2011)*, on reh'g en banc, *681 F.3d 1041 (9th Cir. 2012)* (internal citation and quotation marks omitted). Thus, an amended "complaint must contain sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face." *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)* (internal citation and quotation marks omitted). Futile amendments, that is, proposed amendments to a complaint that do not state a claim, should not be permitted. *DCD Programs, Ltd. v. Leighton, 833 F.2d 183, 188 (9th Cir. 1987)*. "Futility of amendment can, by itself, justify the denial of a motion for leave to amend." *Bonin v. Calderon, 59 F.3d 815, 845 (9th Cir. 1995)*. The Court addresses the futility of amendment of each of Plaintiff's claims separately.

1) First Claim: Breach of Implied Contract

"A cause of action for breach of implied contract has the same elements as does a cause of action for breach of contract, except that the promise is not expressed in words but is implied from the promisor's conduct." *Yari v. Producers Guild of Am., Inc., 161 Cal. App. 4th 172, 182, 73 Cal. Rptr. 3d 803 (2008)*. The "essential elements" of a breach of contract claim are: "(1) the contract, (2) plaintiff's performance or excuse for nonperformance, (3) defendant's breach, **[*11]** and (4) the resulting damages to plaintiff." *Reichert v. Gen. Ins. Co. of Am., 68 Cal. 2d 822, 830, 69 Cal. Rptr. 321, 442 P.2d 377 (1968)*. Plaintiff alleges that Defendant Victor agreed to sell excess product to her and notify her of discounts to others, that she accepted the agreement and bought millions of dollars of products, that both sides performed under the contract for 15 years, and that Defendants breached the agreement by imposing "uniquely burdensome requirements and unique competitive disadvantages...without legal reason or reasonable justification," by destroying her business, and by failing to honor promises to continue to do business with Plaintiff. (Dkt. No. 16-2 at ¶¶ 86-88.) This is sufficient to plausibly state a claim based on breach of implied contract. Plaintiff is granted leave to amend her implied breach of contract claim.

2) Second and Third Claims: Promises without Intent to Perform and Intentional Misrepresentation

A claim of deceit by false promise arises under *Civil Code section 1709* which provides that "one is liable for fraudulent deceit if he 'deceives another with intent to induce him to alter his position to his injury or risk....'" *Beckwith v. Dahl, 205 Cal. App. 4th 1039, 1059, 141 Cal. Rptr. 3d 142 (2012)* (quoting *Cal. Civ. Code § 1709*). "The essential elements of a count for intentional misrepresentation are (1) a misrepresentation, (2) knowledge **[*12]** of falsity, (3) intent to induce reliance, (4) actual and justifiable reliance, and (5) resulting damage." *Chapman v. Skype Inc., 220 Cal. App. 4th 217, 230-31, 162 Cal. Rptr. 3d 864 (2013)*. Fraud claims are subject to the heightened pleading standard of *Rule 9(b)*, which requires a plaintiff to "state with particularity the circumstances constituting fraud or mistake." *Fed. R. Civ. P. 9(b)*. A plaintiff must include the "who, what, when, where, and how" of the fraud. *Vess v. Ciba—Geigy Corp. USA, 317 F.3d 1097, 1106 (9th Cir. 2003)*. Ultimately, "[a] pleading is sufficient under *Rule 9(b)* if it identifies the circumstances constituting fraud so that a defendant can prepare an adequate answer from the allegations." *Moore v. Kayport Package Express, Inc., 885 F.2d 531, 540 (9th Cir. 1989)*.

Plaintiff alleges that Defendants falsely represented that "if she continued to produce as she had always done" they "would support her" with the intent that she rely on the representations which she did to her detriment. (Dkt. No. 16-2 at ¶¶ 91-101.) While these allegations are sufficient to give rise to a breach of an implied contract claim, they are not sufficient under *Rule 9(b)* to give rise to a fraud claim. Plaintiff must do more than recite the elements of a claim, she must identify when the misrepresentation occurred, what the actual misrepresentation was, and who made it, as well as that it was knowingly false and made with the intent to deceive. **[*13]** Because Plaintiff's amended complaint fails to do so, the proposed amendment is futile.

3) Fourth Claim: Breach of the Covenant of Good Faith and Fair Dealing
